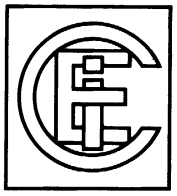
Multilingual Dictionary of

Electricity, Electronics and Telecommunications

with terms in nine languages and definitions in English



Distributed by
The Institute of Electrical and Electronics Engineers, Inc.
in cooperation with the International Electrotechnical Commission

The International Electrotechnical Commission has published the full Multilingual Dictionary of Electricity, Electronics and Telecommunications in five volumes :

Volume 1 : Terms and definitions in English and French with equivalent terms in Russian, German, Spanish, Italian, Dutch, Polish and Swedish.

Volume 2 : Terms and definitions in English with equivalent terms in French and the seven other languages.

Volume 3 : German, Dutch and Swedish indexes.

Volume 4 : Spanish and Italian indexes.

Volume 5 : Russian and Polish indexes.

This volume is a North American version of Volume 2 which is distributed in the United States and Canada by the IEEE.

Copies of the other volumes may be obtained from :

The IEC, the International Electrotechnical Commission, is the authority for world standards in electrical and electronics engineering. The IEC is composed of National Committees in more than 40 countries formed to represent in international discussions all their national electrical and electronics interests, including manufacturers, users, trade associations, the engineering profession and government. IEC standards, developed by over 200 Technical Committees and Sub-Committees whose programmes collectively span electrotechnology, are used as the basis of national rules and standards in over 100 countries, and for the purposes of international trade.

FOREWORD

Since the first years of its existence, questions of international nomenclature, which facilitate exchanges of both goods and ideas, have engaged the attention of the International Electrotechnical Commission (IEC). An alphabetical list of electrotechnical terms, together with their definitions, proposed by the IEC's first Technical Committee : " Nomenclature " (TC 1) was approved at the Berlin meeting in 1913. The secretariat duties of this Technical Committee since it was set up in 1910 have been carried out by the French Electrotechnical Committee.

From the early twenties onwards, the Commission prepared the first edition of its *International Electrotechnical Vocabulary (IEV)* which was published in 1938. That edition contained some 2 000 terms accompanied by the definitions of the concepts represented.

In 1983, the *IEC Multilingual Dictionary of Electricity* was published. It was based on 40 chapters of the IEV, defined more than 7 500 terms in French and English, and gave the equivalent terms in seven other languages : Russian (the third official language of the IEC), as well as German, Spanish, Italian, Dutch, Polish and Swedish.

Terms relating to telecommunications were excluded.

The title of the present second edition : *IEC Multilingual Dictionary of Electricity, Electronics and Telecommunications,* reflects both the ever-increasing role of electronics in the activities of the Commission and the inclusion of terms relating to telecommunications.

IEV chapters of the 700 series have been prepared by joint groups of experts from the Technical Committees of the International Telecommunication Union (ITU), the International Consultative Radiocommunication Committee (CCIR), the International Consultative Telegraph and Telephone Committee (CCITT), and the IEC. The CCIR - CCITT -IEC Joint Co-ordinating Group for vocabulary (JCG) co-ordinates these activities.

This second edition is based on nearly 70 IEV chapters and contains 18 000 terms and synonyms.

For the list of fields covered, please refer to the yellow pages.

In addition to providing a unique multilingual reference work, this dictionary is intended to facilitate understanding between electrical engineers of all countries and assist in eliminating a certain laxity in technical language, the source of numerous misunderstandings, costly in both time and money.

USING THE DICTIONARY

A brief description of some of the principles applied in the preparation of this volume may be of help to the reader.

The basic entry consists of a term and its definition with the equivalent term in French.

— The term, representing a precise concept in a specific context, i.e. chapter and section, often takes the form of an *expression* of varying complexity. When there are several expressions, the first is chosen as the main one, while the others are given as synonyms.

— The definition is sometimes accompanied by a commentary in the form of notes and examples.

— The terms given in English and French are translated into seven other languages of the IEV, namely : Russian (the third official language of the IEC), as well as German, Spanish, Italian, Dutch, Polish and Swedish.

— The absence of a term in one of the languages signifies that it was not available or did not exist at the time of publication of this edition.

Terms often consist of several words of which not all have the same significance. In an expression the main significant word retained is called the *key word;* it is used to facilitate terminological research.

Notes

1) If the same key word appears in different grammatical forms, only the simplest form is used in the list (singular, masculine nominative, infinitive) depending upon the particular language.

2) Very often the character of the key word has been assigned to groups of words, either because these groups are highly representative (occurring frequently in different expressions) or because they designate concepts quite different from those designated by the individual words of which they are formed.

The key words, listed in alphabetical order, form the framework of the Dictionary. Under each of them are listed all the expressions in which they appear, these in turn being listed in their natural alphabetical order and numbered in this order. This number — the numerical index — is used for all internal references in the Dictionary.

If an expression contains several key words, one of them is chosen as the "main key word", the others being designated "secondary key words". An expression is only accompanied by all its attributes (synonyms, definition, translation, etc.) under the main key word. A secondary key word is merely followed by a reference to the main key word.

Thus, three possible kinds of entries may appear below a key word :

1. The complete form, which is that of all expressions having this key word as a main key word and which terminates with a reference to the number(s) of the IEV chapter(s) from which the expression has been taken. These numbers refer to the yellow pages of the Dictionary and enable the field of application of the term to be identified.
2. A reduced form for all *non-synonymous* expressions having this key word as a secondary key word.
3. A reduced form for all *synonymous* expressions in which the key word can only be secondary.

A loose bookmark gives a summary of this guide for ease of reference.

A

A

1. **ampere, A** : → *ampere 1*
2. **class A operation** : → *operation 8*

A/M

1. **ampere per metre, A/M** : → *ampere 2*

AAAC

1. **AAAC** (*Syn.* all aluminium alloy conductor) : → *conductor 1*

AAC

1. **AAC** (*Syn.* all aluminium conductor) : → *conductor 2*

AACSR

1. **AACSR** (*Syn.* steel reinforced aluminium alloy conductor) : → *conductor 68*

AB

1. **class AB operation** : → *operation 9*

abandoned

1. **abandoned call attempt** : → *attempt 1*
2. **abandoned traffic** : → *traffic 1*

abandonment

1. **call abandonment probability** : → *probability 4*
2. **service user abandonment probability** : → *probability 13*

abbreviation

1. **mnemonic (abbreviation)** : → *mnemonic 1*

aberration

1. **chromatic aberration** : a focus defect in which electrons of different velocities focus at different axial distances. ★ aberration chromatique → *aberration 1.* R хроматическая абберация. D chromatische Aberration. E aberración cromática. I aberrazione cromatica. N chromatische aberratie. P aberacja chromatyczna. S kromatisk aberration. (531)
2. **spherical aberration** : a focus defect in which electrons, at different radial distances from the axis, focus at different axial distances. ★ aberration sphérique → *aberration 2.* R сферическая абберация. D sphärische Aberration. E aberración esférica. I aberrazione sferica. N sferische aberratie. P aberacja sferyczna. S sfärisk aberration. (531)

ability

1. **tracking ability** : the minimum stylus force required to maintain contact between the reproducing stylus tip and both groove walls on a given test record. ★ aptitude à la lecture → *aptitude 2.* R ..... D Abtastfähigkeit. E aptitud para la lectura. I attitudine alla riproduzione. N spoorvastheid. P zdolność śledzenia. S spårningsförmåga. (806)

Abney

1. **Abney phenomenon** : → *phenomenon 1*
2. **Abney's law** : → *law 1*

abnormal

1. **abnormal cathode fall** : → *fall 1*
2. **abnormal (ionospheric) absorption** : → *absorption 1*

ABR

1. **ABR** (*Syn.* answer bid ratio) : → *ratio 5*

abrasion

1. **resistance to abrasion** : → *resistance 54*

abrupt

1. **abrupt junction** : → *junction 1*

absence

1. **absence of offset** : → *offset 1*

absent

1. **absent subscriber service** : → *service 1*

absolute

1. **absolute address** : → *address 1*
2. **absolute chronology** : → *chronology 1*
3. **absolute error** : → *error 1*
4. **absolute error** : → *error 2*
5. **(absolute) frequency deviation** : → *frequency 1*
6. **(absolute) gain** : → *gain 1*
7. **(absolute) permeability** : → *permeability 1*
8. **absolute permeability of vacuum** (*Syn.* magnetic constant) : → *constant 24*
9. **(absolute) permittivity** : → *permittivity 1*
10. **absolute permittivity of vacuum** (*Syn.* electric constant) : → *constant 18*
11. **absolute power level** : → *level 1*
12. **absolute priority** : → *priority 1*
13. **absolute spectral sensitivity** : → *spectral-sensitivity 1*
14. **absolute spectral sensitivity characteristic** : → *characteristic 1*
15. **absolute stability** : → *stability 1*
16. **absolute thermal detector** : → *detector 1*
17. **absolute voltage level** : → *level 2*
18. **absolutely selective protection system** : → *system 1*
19. **centralised absolute chronology** : → *chronology 2*
20. **reproducing head absolute efficiency** : → *efficiency 37*

absorbance

1. **Napierian spectral absorbance** (*Syn.* Napierian spectral internal transmittance density) : → *density 16*
2. **spectral absorbance** (*Syn.* spectral internal transmittance density) : → *density 33*

absorbed

1. **absorbed dose** : → *dose 1*
2. **absorbed dose index** : → *index 1*
3. **absorbed dose rate** : → *rate 1*
4. **absorbed voltage** : → *voltage 2*
5. **cumulative absorbed dose** : → *dose 11*
6. **maximum absorbed dose** : → *dose 34*
7. **peak absorbed dose** (*Syn.* maximum absorbed dose) : → *dose 34*

absorber

1. **absorber** : a substance that removes energy from any type of radiation. ★ absorbeur → *absorbeur 1.* R поглотитель. D Absorber. E absorbente. I assorbitore. N absorbens. P absorber. S absorbator. (881)
2. **neutron absorber** (material) : a material with which neutrons interact significantly by reactions resulting in their disappearance as free particles. ★ absorbeur de neutrons → *absorbeur 2.* D Neutronenabsorbermaterial. E absorbente de neutrones substancia. I assorbente i neutroni (materiale.). N absorbens. P pochłaniacz neutronów (substancja.). S neutronabsorbator. (026)
3. **neutron absorber** (object) : an object with which neutrons interact significantly or predominantly by reactions resulting in their disappearance without production of other neutrons. ★ absorbant de neutrons → *absorbant 1.* D Neutronenabsorber. E absorbente de neutrones (objeto.). I assorbitore di neutroni (oggetto.). N absorptieplaat (je). P pochłaniacz neutronów (przedmiot.). S neutronabsorbator. (026)
4. **porous absorber** : material with interconnected voids that presents resistance to flow of gas or liquid through the material.

★ matériau absorbant poreux → *matériau 7.* **R** пористый поглотитель. **D** poröser Absorber. **E** material absorbente poroso. **I** materiale assorbente poroso. **N** poreus absorptiemateriaal. **P** pochłaniacz porowaty. **S** porös absorbent. (801)

absorbing

1. **absorbing clamp** : → *clamp 1*
2. **absorbing medium** : → *medium 1*
3. **sound absorbing material** : → *material 39*

absorptance

1. **absorptance** (α) : ratio of the absorbed radiant or luminous flux to the incident flux under specified conditions.Unit : 1. ★ facteur d'absorption → *facteur 9.* **R** коэффициент поглощения. **D** Absorptionsgrad. **E** absortancia. **I** fattore di assorbimento. **N** absorptiefactor. **P** współczynnik pochłaniania. **S** absorptans; absorptionsfaktor. (845)
2. **spectral internal absorptance** (of a homogeneous non-diffusing layer) ($\alpha_i(\lambda)$) : ratio of the spectral radiant flux absorbed between the internal entry and exit surfaces of the layer to the spectral flux that enters into the layer after crossing the entry surface.Unit : 1 *Note.* — For a given layer the spectral internal absorptance depends on the path length of the radiation in the layer , and hence, in particular, on the angle of incidence. ★ facteur d'absorption interne spectral → *facteur 13.* **R** спектральный коэффициент внутреннего поглощения. **D** spektraler Reinabsorptionsgrad (einer homogenen, nicht streuenden Schicht). **E** absortancia interna espectral. **I** fattore spettrale di assorbimento interno. **N** inwendige spectrale absorptiefactor. **P** współczynnik pochłaniania wewnętrznego widmowy. **S** inre absorptans. (845)

absorption

1. **abnormal (ionospheric) absorption** : ionospheric absorption, significantly greater than normal ionospheric absorption, which depends only slightly on the zenith angle of the Sun. ★ absorption (ionosphérique) anormale → *absorption 19.* **D** anomale (ionosphärische) Absorption. **P** absorpcja (jonosferyczna) anormalna. (705)
2. **absorption** : decrease in intensity of incident radiation while passing through an absorbent substance. ★ absorption → *absorption 1.* **D** Absorption. **E** absorción. **I** assorbimento. **N** absorptie. **P** pochłanianie. **S** absorption. (026)
3. **absorption** : in a propagation medium, the conversion of electromagnetic or acoustic wave energy into another form of energy, for instance heat. *Note.* — Associated terms are : "absorbing" ; "to absorb". ★ absorption → *absorption 2.* **R** поглощение. **D** Absorption. **E** absorción. **I** assorbimento. **N** absorptie. **P** absorpcja. **S** absorption. (702,705,726)
4. **absorption** : in a propagation medium, the conversion of electromagnetic wave energy into another form of energy, for instance heat. *Note.* — For optical fibres intrinsic absorption components consist of tails of the ultraviolet and infrared absorption bands. Extrinsic components includes : - *a)* impurities, eg. the OH-ion and transition metal ions and *b)* defects, eg. results of thermal history and exposure to nuclear radiation. ★ absorption → *absorption 3.* **R** поглощение. **D** Absorption. **E** absorción. **I** assorbimento. **N** absorptie. **P** absorpcja. **S** absorption. (731)
5. **absorption** : process by which radiant energy is converted to a different form of energy by interaction with matter. ★ absorption → *absorption 4.* **R** поглощение. **D** Absorption. **E** absorción. **I** assorbimento. **N** absorptie. **P** absorpcja; pochłanianie. **S** absorption. (841,845)
6. **absorption band** : → *band 1*
7. **absorption coefficient** : → *coefficient 1*
8. **absorption control** : → *control 1*
9. **absorption (energy)** : → *energy 1*
10. **absorption (frequency) band** : → *band 2*
11. **absorption frequency meter** : → *meter 1*
12. **absorption loss** : → *loss 1*
13. **absorption loss** : → *loss 2*
14. **absorption wavemeter** (*Syn.* absorption frequency meter) : → *meter 1*
15. **deviative absorption** : ionospheric absorption accompanied by any significant change in the direction of propagation, observed when the refractive index is appreciably less than unity for the frequency of the radio wave in question. ★ absorption avec déviation → *absorption 6.* **D** Umlenkabsorption. **P** absorpcja odchyleniowa. (705)
16. **differential absorption ratio** : → *ratio 27*
17. **digit absorption** : the interpretation and rejection of address digits received but not required, for setting crosspoints of an automatic direct control system. ★ absorption de chiffres → *absorption 8.* **R** поглощение цифр. **D** ..... **E** absorción de cifras. **I** assorbimento di cifre. **N** ..... **P** absorpcja cyfry. **S** sifferabsorbering. (714)
18. **(energy) absorption** : a phenomenon in which incident radiation transfers to the matter which it traverses some or all of its energy. *Note.* — Scattering accompanied by energy loss, e.g. the Compton effect and neutron slowing down, is considered to be energy absorption. ★ absorption (d'énergie) → *absorption 13.* **R** поглощение (энергии). **D** (Energie-) Absorption. **E** absorción (de energía). **I** assorbimento (di energia). **N** absorptie (v. energie). **P** pochłanianie (energii); absorpcja (energii). **S** (energi)absorption. (391)
19. **equivalent absorption area of an object or of a surface** : → *area 19*
20. **exponential absorption** : decrease in intensity of a beam of particles or of photons during its passage through matter, in accordance with the relation: $I = I_0 e^{\mu x}$ where, I is the beam intensity, x the measure of the amount of matter traversed, I_0 the initial intensity, and μ the appropriate absorption coefficient. ★ absorption exponentielle → *absorption 17.* **D** exponentielle Absorption. **E** absorción exponencial. **I** assorbimento esponenziale. **N** exponentiële absorptie. **P** pochłanianie wykładnicze. **S** exponentiell absorption. (026)
21. **Eyring absorption coefficient** : → *coefficient 22*
22. **ionospheric absorption** : the absorption of radio waves resulting from collisions between free electrons and neutral atoms and ions in the ionosphere. ★ absorption ionosphérique → *absorption 18.* **D** ionosphärische Absorption. **P** absorpcja jonosferyczna. (705)
23. **liquid absorption** : the amount of liquid absorbed by a specimen in contact with the liquid under specified conditions. ★ absorption de liquide → *absorption 9.* **R** поглощение жидкости. **D** Flüssigkeitabsorption; Flüssigkeitsaufnahme. **E** absorción de líquido. **I** assorbimento di liquido. **N** vloeistofabsorptie. **P** absorpcja cieczy. **S** vätskeabsorption. (212)
24. **moisture absorption** : the amount of moisture absorbed by a specimen when exposed to a humid atmosphere, under specified conditions. ★ absorption d'humidité → *absorption 15.* **R** влагопоглощение. **D** Feuchtigkeitsabsorption; Feuchtigkeitsaufnahme. **E** absorción de humedad. **I** assorbimento di umidità. **N** vochtabsorptie. **P** absorpcja wilgoci. **S** fuktabsorption. (212)
25. **Napierian spectral absorption coefficient** : → *coefficient 42*
26. **neutron absorption** : nuclear interaction in which the incident neutron disappears as a free particle even when one or more neutrons are subsequently emitted accompanied by other particles, e.g., in fission. *Note.* — scattering is not consider ed to be part of the absorption process. ★ absorption de neutrons → *absorption 10.* **D** Neutronenabsorption. **E** absorción de neutrones. **I** assorbimento di neutroni. **N** neutronenabsorptie. **P** pochłanianie neutronów. **S** neutronabsorption. (026)
27. **neutron absorption cross-section** : → *cross-section 20*
28. **neutron yield per absorption** : → *yield 6*
29. **non-deviative absorption** : ionospheric absorption which is not accompanied by any significant change in the direction of propagation, observed when the refractive index remains close to unity for the frequency of the radio wave in question. ★ absorption sans déviation → *absorption 21.* **D** umlenkfreie Absorption. **P** absorpcja bezodchyleniowa. (705)
30. **normal (ionospheric) absorption** : ionospheric absorption which is a function of the zenith angle of the Sun. ★ absorption (ionosphérique) normale → *absorption 20.* **D** normale (ionosphärische) Absorption. **P** absorpcja (jonosferyczna) normalna. (705)
31. **(particle) absorption** : an atomic or nuclear interaction in which an incident particle disappears as a free particle even when one or more of the same or different particles are subsequently emitted. *Note.* — Scattering is not considered to be particle absorption. ★ absorption (de particule) → *absorption 11.* **R** поглощение (частицы). **D** (Teilchen-) Absorption. **E** absorción (de partícula). **I** assorbimento (di

particella). N absorptie (v.e. deeltje). P pochłanianie (cząstki); absorpcja (cząstki). S (partikel)absorption. (391)

32. **polar cap absorption** (*Syn.* PCA (abbreviation)) : the intense absorption of radio waves caused in a polar cap by the arrival of high-energy solar protons, concentrated in this region by the lines of force of the Earth's magnetic field. ★ absorption dans la calotte polaire → *absorption 7.* D Polarkappen-Absorption; PCA (Abkürzung). P absorpcja czapki polarnej. (705)
33. **resonance (absorption) isolator** : → *isolator 7*
34. **room absorption** : sum of Sabine absorptions due to objects and surfaces in a room, and due to dissipation of energy in the medium within the room. *Notes. 1* — With A_i as the Sabine absorption of the i-th surface or object or medium in a room, room absorption is $A = \Sigma A_i$. *2* — Sabine absorption due to dissipation in the medium, in a room of volume, is:

$$A_m = \frac{4}{10 \log_{10} e} \alpha V = 0.921\, \alpha V$$

where: α is the attenuation coefficient of the medium in decibels per unit length. ★ absorption d'une salle → *absorption 16.* R поглощение помещения. D Raumabsorption. E absorción de una sala. I assorbimento acustico di un ambiente. N absorptie van een kamer. P przestrzeń pochłaniania równoważnego Sabine'a. S rumsabsorption. (801)
35. **Sabine absorption** : sound absorption defined by the Sabine reverberation-time equation. *Notes. 1* — The Sabine reverberation-time equation is:

$$T = \frac{(24 \ln 10)\, V}{cA} = \frac{55.3\, V}{cA}$$

where T is the reverberation time in seconds, V is the volume of the room in cub ic metres, c is the speed of sound in the air contained in the room in metres per second, A is the sum of all Sabine absorptions in the room in decibel metre-squared. *2* — The unit of Sabine absorption is the decibel metre-squared, sometimes known as the metric sabin. ★ absorption de Sabine → *absorption 12.* R сэбиновское поглощение. D Sabinesche Absorption. E absorción de Sabine. I coefficiente di assorbimento secondo Sabine. N absorptie volgens Sabine. P pochłanianie według Sabine'a. S Sabines-absorption. (801)
36. **Sabine absorption coefficient** : → *coefficient 53*
37. **self absorption** : the absorption of radiation from a radionuclide, contained in a radioactive source, in the material of that source. ★ auto-absorption → *auto-absorption 1.* R самопоглощение. D Selbstabsorption. E autoabsorcion. I autoassorbimento. N zelfabsorptie. P pochłanianie własne. S självabsorption. (881)
38. **sound absorption** : property possessed by materials and objects of converting sound energy to heat either by propagation in a medium or when sound strikes the boundary between two media. ★ absorption acoustique → *absorption 5.* R звукопоглощение. D Schallabsorption. E absorción acústica. I assorbimento acustico. N geluidabsorptie. P pochłanianie dźwięku. S ljudabsorption. (801)
39. **sound absorption coefficient** (*Syn.* Sabine absorption coefficient) : → *coefficient 53*
40. **sound (power) absorption coefficient** : → *coefficient 57*
41. **spectral absorption index** : → *index 41*
42. **spectral linear absorption coefficient** : → *coefficient 62*
43. **statistical sound (power) absorption coefficient** : → *coefficient 66*
44. **total absorption detection efficiency** : → *efficiency 43*
45. **total absorption detector efficiency** : → *efficiency 44*
46. **total absorption peak** : → *peak 46*

absorptive

1. **absorptive attenuator** (*Syn.* resistive attenuator) : → *attenuator 16*

absorptivity

1. **spectral absorptivity** (of an absorbing material) ($\alpha_{i,o}(\lambda)$) : spectral internal absorptance of a layer of the material such that the path of the radiation is of unit length, and under conditions in which the boundary of the material has no influence. Unit : 1 *Note.* — The unit length must be specified. If a new unit length is used that is k times the magnitude of the original one, then the value of $\alpha_{i,o}(\lambda) = 1 - \tau_{i,o}(\lambda)$ will change to

$$\alpha'_{i,o}(\lambda) = 1 - [\tau_{i,o}(\lambda)]^k$$

★ absorptivité spectrale → *absorptivité 1.* R удельный спектральный коэффициент поглощения (поглощающего вещества). D spektrale Absorptivität (für ein absorbierendes Medium). E absortividad espectral. I ..... N specifieke spectrale absorptiviteit. P pochłanialność widmowa. S absorptivitet. (845)

abundance

1. **abundance ratio** : → *ratio 1*
2. **isotopic abundance** : ratio of the number of atoms of a specified isotope of an element to the total number of atoms of this element in a sample. Expressed in per cent. ★ teneur isotopique → *teneur 5.* D Isotopenhäufigkeit. E abundancia isotópica. I tenore isotopico; abbondanza isotopica. N abundantie; isotoopgehalte. P zawartość izotopu. S isotopymnighet. (026)

a.c.

1. **a.c. conversion factor** : → *factor 2*
2. **a.c. electrolytic capacitor** : → *capacitor 1*
3. **a.c. filter** : → *filter 1*
4. **a.c. system** (*Syn.* alternating current system) : → *system 7*
5. **anode a.c. resistance** : → *resistance 2*
6. **direct a.c.(power) convertor** : → *convertor 13*
7. **electrode a.c. resistance** : → *resistance 16*
8. **electronic a.c. power controller** : → *controller 3*
9. **electronic a.c. (power) switch** : → *switch 17*
10. **(electronic) a.c. voltage convertor** : → *convertor 16*
11. **(electronic) a.c.(power) convertor** : → *convertor 17*
12. **(electronic)(power) a.c. conversion** : → *conversion 19*
13. **indirect a.c.(power) convertor** : → *convertor 28*
14. **single-phase a.c. motor vehicle** : → *vehicle 22*
15. **single-phase a.c. traction** : → *traction 9*
16. **three-phase a.c. motor vehicle** : → *vehicle 27*
17. **three-phase a.c. traction** : → *traction 14*

ACAR

1. **ACAR** (*Syn.* alloy reinforced aluminium conductor) : → *conductor 3*

accelerated

1. **accelerated ageing** : → *ageing 1*
2. **accelerated distance protection system** : → *system 3*
3. **accelerated test** : → *test 1*

accelerating

1. **accelerating** : the process of running a machine up to speed after breakaway. ★ accélération → *accélération 1.* R ускорение. D Beschleunigen (Hochfahren). E aceleración. I accelerazione. N versnellen. P rozbieg. S accelerering. (411)
2. **accelerating electrode** (*Syn.* accelerator) : → *accelerator 2*
3. **accelerating force** : → *force 1*
4. **accelerating relay** : → *relay 1*
5. **accelerating torque** : → *torque 1*
6. **beam accelerating voltage** : → *voltage 14*

acceleration

1. **failure intensity acceleration factor** : → *factor 76*
2. **failure rate acceleration factor** : → *factor 77*
3. **instantaneous particle acceleration** : the time derivative of instantaneous particle velocity. ★ accélération acoustique instantanée → *accélération 2.* R мгновенное колебательное ускорение (частицы). D Augenblickswert der Teilchenbeschleunigung. E aceleración acústica instantánea. I accelerazione. N momentele deeltjesversnelling. P wartość chwilowa przyspieszenia akustycznego. S momentanvärde av partikelacceleration. (801)
4. **nominal acceleration time** : → *time 113*
5. **post-deflection acceleration factor** : → *factor 135*
6. **post-deflection acceleration ratio** : → *ratio 68*
7. **residual acceleration** : the acceleration which, for a given speed, corresponds to the difference between the available tractive effort and the tractive effort necessary to maintain that speed. ★ accélération résiduelle → *accélération 3.*

R остаточное ускорение. D Restbeschleunigung. E aceleración residual. I accelerazione residua. N restversnelling. P przyspieszenie wyrównawcze. S restacceleration. (811)

8. **time acceleration factor** : → *factor 174*
9. **(vibratory) acceleration level** : → *level 101*

accelerator

1. **accelerator** (*Syn.* promoter) : a substance used in small proportion to increase the reaction rate of a chemical system (reactants plus other additives). ★ accélérateur → *accélérateur 1.* R катализатор. D Beschleuniger. E acelarador. I accelerante. N versneller. P przyśpieszacz; aktywator. S accelerator. (212)
2. **accelerator** (*Syn.* accelerating electrode) : an electrode used to increase the velocity of electrons or ions. ★ électrode accélératrice → *électrode 27.* R ускоряющий электрод. D Beschleunigungselektrode. E electrodo acelerador. I elettrodo acceleratore. N versnellingselektrode. P elektroda przyśpieszająca. S accelerationselektrod. (531)
3. **electrostatic accelerator** : a device for producing a high accelerating voltage for charged particles the voltage being built up by electrostatic induction and by physical transport of electric charges. ★ accélérateur électrostatique → *accélérateur 3.* R электростатический ускоритель. D elektrostatischer Beschleuniger. E acelerador electrostatico. I acceleratore elettrostatico. N elektrostatische versneller. P akcelerator elektrostatyczny. S elektrostatisk generator. (881)
4. **helical post-deflection accelerator** : a post-deflection accelerator, in the form of a helix, that produces an accelerating field by a potential gradient along its length. ★ hélice de post-accélération → *hélice 3.* R спиральный электрод послеускорения. D wendelförmige Nachbeschleunigungselektrode. E hélice de aceleración posterior. I elica di post-accelerazione. N spiraalvormige naversnellingselektrode. P elektroda przyśpieszająca poodchyleniowa śrubowa. S spiralformad efteraccelerationselektrod. (531)
5. **linear accelerator** : an accelerator in which charged particles are accelerated along a straight path either by means of a travelling electromagnetic field or through a series of small gaps between electrodes that are so connected to an alternating voltage supply of high frequency that, as the particles arrive at successive gaps, the field always accelerates them. *Notes. 1* — Many electron accelerators employ travelling waves. *2* — Heavy particle accelerators are usually of the second type. ★ accélérateur linéaire → *accélérateur 4.* R линейный ускоритель. D Linearbeschleuniger. E acelerador lineal. I acceleratore lineare. N lineaire versneller. P akcelerator liniowy. S linjär accelerator. (881)
6. **(particle) accelerator** : a device for imparting large kinetic energies to charged particles such as electrons, protons, deuterons, and alpha-particles. Examples are : Van de Graaff electrostatic accelerator, betatron, linear accelerator, cyclotron and synchrotron. ★ accélérateur (de particules) → *accélérateur 2.* R ускоритель (частиц). D (Teilchen-)Beschleuniger. E acelerador (de partículas). I acceleratore (di particelle). N (deeltjes)versneller. P akcelerator (cząstek). S partikelaccelerator. (881)
7. **post-deflection accelerator** (*Syn.* intensifier electrode (U.S.A.)) : an electrode that accelerates the electrons of the beam after deflection. ★ électrode de post-accélération → *électrode 46.* R электрод послеускорения. D Nachbeschleunigungselektrode. E electrodo de aceleración posterior; electrodo intensificador. I elettrodo di post-accelerazione. N naversnellingselektrode. P elektroda przyśpieszająca poodchyleniowa. S efteraccelerationselektrod. (531)

accentuated

1. **accentuated contrast** : → *contrast 1*

acceptance

1. **acceptance angle** : → *angle 1*
2. **acceptance test** : → *test 2*
3. **charge acceptance** : the ability of a battery to accept charge under specified conditions. ★ aptitude à la charge → *aptitude 1.* R принятие заряда. D Ladungsaufnahme. E aceptación de carga. I accettazione di carica. N ladingsopneming. P zdolność przyjmowania ładunku. S laddningsmottaglighet. (486)

accepted

1. **call accepted (signal)** : → *call 9*
2. **call not accepted signal** : → *signal 34*

acceptor

1. **acceptor** : an imperfection in a crystal lattice which, when it is predominant, permits hole conduction by the acceptance of electrons. ★ accepteur → *accepteur 1.* R акцептор. D Akzeptor. E aceptador. I accettore. N acceptor. P akceptor. S acceptor. (521)
2. **acceptor level** : → *level 3*
3. **ionizing energy of acceptor** : → *energy 56*

access

1. **access barred** : a function of a telecommunication network that bars calls to or from certain subscribers from or to certain services, routes or terminals. ★ interdiction → *interdiction 1.* R функция "доступ запрещен". D Zugang gesperrt; Zugang verhindert. E prohibición. I accesso sbarrato. N toegang geblokkeerd. P zakaz dostępu. S spärrad åtkomst. (721)
2. **access line** (*Syn.* connection line) : → *line 14*
3. **access to the public telegram network** : → *network 1*
4. **automatic coded access control** : → *control 7*
5. **conditional access television** : → *television 8*
6. **direct access** : the facility to obtain data from a storage device or to enter data into a storage device in such a way that the process depends only on the location of that data and not on a reference to data previously accessed. ★ accès direct → *accès 7.* R прямой доступ; избирательный доступ. D direkter Zugriff; Direktzugriff. E acceso directo. I accesso diretto; accesso casuale. N directe toegang. P dostęp bezpośredni. S direktåtkomst. (714)
7. **direct access store** : → *store 2*
8. **mean access delay (of a communication)** : → *delay 26*
9. **mean service access delay** : → *delay 29*
10. **multiple access** : any technique whereby a number of terminals are able to share the transmission capacity of a link in a predetermined manner or in accordance with traffic demand. ★ accès multiple → *accès 8.* R многократный (многоканальный) доступ. D Mehrfachnutzung. E acceso múltiple. I ingresso multiplo. N meervoudige toegang. P wielodostęp. S multipelåtkomst. (701)
11. **p-fractile access delay (of a communication)** : → *delay 31*
12. **preferential (PBX) access line** : → *line 126*
13. **prefix giving access to the intercontinental telex network** : → *prefix 2*
14. **prefix giving access to the international telex network** : → *prefix 3*
15. **prefix giving access to the long-distance telex network** : → *prefix 4*
16. **service access probability** (*Syn.* service accessibility) : → *accessibility 1*

accessibility

1. **service accessibility** (*Syn.* service access probability) : the probability that a service can be obtained within specified tolerances and other given operating conditions when requested by the user. *Note.* — In French, the term "accessibilité" is also used to denote the performance quantified by this probability. ★ accessibilité → *accessibilité 2.* R доступность услуги; вероятность получения услуги. D Dienstzugangswahrscheinlichkeit. E accesibilidad (de un servicio). I accessibilità di un servizio; probabilità di accesso ad un servizio. N toegankelijkheidskans van een dienst(verlening). P prawdopodobieństwo dostępności serwisu. S tjänsteåtkomlighet. (191)
2. **service accessibility performance** : → *performance 12*

accessible

1. **simultaneously accessible parts** : → *part 11*

accessory

1. **accessory** (for a measuring instrument) : an element, group of elements or device associated with a measuring instrument in order to confer on it different specified characteristics. ★ accessoire → *accessoire 1.* R вспомогательная часть

(измерительного прибора). **D** (Messgeräte-)Zubehör. **E** accesorio (para un aparato de medida). **I** accessorio (per uno strumento di misura). **N** toebehoren. **P** przybór (przyrządu pomiarowego). **S** tillbehör till mätinstrument. (301)

2. **accessory** : any associated item which does not form part of a basic component. ★ accessoire → *accessoire 2.* **R** деталь вспомогательная. **D** Zubehör. **E** accesorio. **I** accessorio. **N** toebehoren. **P** akcesorium; część dodatkowa. **S** tillbehör. (581)
3. **accessory of limited interchangeability** : an accessory, having its own properties and accuracy, which can only be associated with measuring instruments for which certain characteristics are within specified limits. ★ accessoire à interchangeabilité limitée → *accessoire 3.* **R** вспомогательная часть с ограниченной взаимозаменяемостью. **D** begrenzt austauschbares Zubehör. **E** accesorio de intercambiabilidad limitada. **I** accessorio con intercambiabilità limitata. **N** toebehoren met beperkte verwisselbaarheid. **P** przybór o ograniczonej zamienności. **S** tillbehör med begränsad bytbarhet. (301)
4. **interchangeable accessory** : an accessory having its own properties and accuracy, which are independent of those of the instruments with which it may be associated. ★ accessoire interchangeable → *accessoire 4.* **R** взаимозаменяемая вспомогательная часть. **D** austauschbares Zubehör. **E** accesorio intercambiable. **I** accessorio intercambiabile. **N** verwisselbaar toebehoren. **P** przybór zamienny. **S** utbytbart tillbehör. (301)
5. **non-interchangeable accessory** : an accessory which is adapted to the characteristics of a specific instrument. ★ accessoire non interchangeable → *accessoire 5.* **R** невзаимозаменяемая вспомогательная часть. **D** nichtaustauschbares Zubehör. **E** accesorio no intercambiable. **I** accessorio non intercambiabile. **N** niet-verwisselbaar toebehoren. **P** przybór niezamienny. **S** icke utbytbara tillbehör. (301)

accident

1. **accident dose** : → *dose 4*

accidental

1. **accidental voltage transfer** : → *transfer 1*

accommodation

1. **accommodation** : adjustment of the dioptric power of the crystalline lens by which the image of an object, at a given distance, is focused on the retina. ★ accommodation → *accommodation 1.* **R** аккомодация. **D** Akkomodation. **E** acomodación. **I** accomodamento. **N** accommodatie. **P** akomodacja. **S** ackomodation. (845)

account

1. **accounts for shared terminal** : provision of separate accounts to users of a shared terminal. ★ décompte pour poste partagé → *décompte 2.* **R** счета для оконечной установки совместного пользования. **D** getrennter Gebührennachweis für eine gemeinschaftliche Endstelle. **E** relación de cuentas por centro compartido. **I** conto suddiviso. **N** ..... **P** rachunek dla stacji towarzyskiej. **S** avräkning för delad terminal. (721)
2. **statement of call account** : → *statement 1*

accumulated

1. **accumulated down time** : → *time 1*
2. **accumulated time** : → *time 2*
3. **mean accumulated down time** : → *time 94*

accumulative

1. **accumulative latching mechanical system** : → *mechanical system 1*

accuracy

1. **accuracy** (of a measuring instrument) : the quality which characterizes the closeness of an indicated value of a measuring instrument to the corresponding true value. *Note.* — Accuracy is greater when the indicated value is closer to the corresponding true value. ★ précision → *précision 8.* **R** точность (средства измерений). **D** Genauigkeit (eines Messgerätes). **E** precisión (de un aparato de medida). **I** precisione (di uno strumento di misura). **N** nauwkeurigheid. **P** dokładność (narzędzia pomiarowego). **S** noggrannhet. (301)
2. **accuracy class** : → *class 1*
3. **accuracy class** : → *class 2*
4. **accuracy class** : → *class 3*
5. **accuracy limit factor** : → *factor 3*
6. **limit of accuracy of chronology** (*Syn.* time resolution) : → *resolution 9*
7. **rated accuracy limit primary current** : → *current 153*

achromatic

1. **achromatic (perceived) colour** : → *colour 1*
2. **achromatic stimulus** : → *stimulus 1*

acid

1. **acid number** : → *number 1*
2. **acid treatment** : → *treatment 1*

acknowledge

1. **acknowledge** : a transmission control used by one terminal to give an affirmative reply. ★ accusé de réception positif → *accusé de réception 4.* **R** подтверждение. **D** positive Rückmeldung. **E** acuse de recibo (positivo). **I** riscontro positivo. **N** herkenning. **P** odpowiedź pozytywna. **S** kvittens. (721)
2. **negative acknowledge** : a transmission control used by one terminal to give a negative reply. ★ accusé de réception négatif → *accusé de réception 2.* **R** отрицательное подтверждение. **D** negative Rückmeldung. **E** acuse de recibo (negativo). **I** riscontro negativo. **N** geen-herkenning. **P** odpowiedź negująca. **S** negativ kvittens. (721)

acknowledgement

1. **acknowledgement signal** : → *signal 2*
2. **acknowledgement signal unit** : → *unit 1*
3. **negative acknowledgement** : a message indicating that monitoring or command information has been received incorrectly. ★ accusé de réception négatif → *accusé de réception 1.* **R** квитанция отрицательная. **D** negative Quittung. **E** conocimiento negativo. **I** conferma negativa. **N** melding van foutieve ontvangst. **P** sprzeciw. **S** negativ kvittering. (371)
4. **positive acknowledgement** : a message indicating that monitoring or command information has been received correctly. ★ accusé de réception positif → *accusé de réception 3.* **R** подтверждение приема; квитанция положительная. **D** positive Quittung. **E** conocimiento positivo. **I** conferma positiva. **N** ontvangstbevestiging. **P** zgoda. **S** positiv kvittering. (371)

acoustic

1. **acoustic admittance** : → *admittance 1*
2. **acoustic baffle** : → *baffle 1*
3. **acoustic compliance** : → *compliance 1*
4. **acoustic coupler** : → *coupler 1*
5. **acoustic coupler** : → *coupler 2*
6. **acoustic coupling** : → *coupling 1*
7. **acoustic enclosure** : → *enclosure 1*
8. **acoustic enclosure** : → *enclosure 2*
9. **acoustic hood** : → *hood 1*
10. **(acoustic) horn** : → *horn 1*
11. **acoustic impedance** : → *impedance 1*
12. **acoustic mass** : → *mass 1*
13. **acoustic phase coefficient** : → *coefficient 2*
14. **acoustic radiation pressure** : → *pressure 1*
15. **acoustic radiometer** : → *radiometer 1*
16. **acoustic reactance** : → *reactance 1*
17. **acoustic resistance** : → *resistance 1*
18. **acoustic shock** : → *shock 1*
19. **acoustic shock suppressor** : → *suppressor 1*
20. **acoustic stiffness** : → *stiffness 1*
21. **acoustic streaming** : → *streaming 1*
22. **effective acoustic centre** : → *centre 9*
23. **specific acoustic admittance** : → *admittance 14*
24. **specific acoustic impedance** : → *impedance 55*
25. **specific acoustic reactance** : → *reactance 19*
26. **specific acoustic resistance** : → *resistance 60*

27. **virtual acoustic centre** (*Syn.* effective acoustic centre) : → *centre 9*

acoustical

1. **acoustical insulation material** : → *insulation 1*
2. **acoustical oscillation** : → *oscillation 1*
3. **acoustical speech power** : → *power 2*
4. **acoustical system** : → *system 4*

acousto-optic

1. **acousto-optic effect** : → *effect 1*

across-the-line

1. **across-the-line starting** (*Syn.* direct-on-line starting) : → *starting 7*

ACSR

1. **ACSR** (*Syn.* steel reinforced aluminium conductor) : → *conductor 69*

ACSR/AC

1. **ACSR/AC** (*Syn.* aluminium clad steel reinforced aluminium conductor) : → *conductor 4*

acting

1. **direct acting instrument** : → *instrument 3*
2. **indirect acting instrument** : → *instrument 9*

actinic

1. **actinic** : 1. Applied to a radiation : exhibiting actinism. 2. Applied to other concepts or to devices : referring to actinism. ★ actinique → *actinique 1.* R актиничный. D aktinisch. E actínico. I attinico. N actinisch. P aktyniczny. S aktinisk. (845)
2. **(actinic) action spectrum** : → *spectrum 1*
3. **actinic dose** : → *dose 5*
4. **(actinic) erythema** : → *erythema 1*
5. **artificially induced actinic effect** : → *effect 2*
6. **direct actinic effect** : → *effect 11*
7. **indirect actinic effect** : → *effect 33*
8. **natural actinic effect** : → *effect 46*

actinism

1. **actinism** : property of optical radiations which enables them to cause chemical changes on certain living or non-living materials. ★ actinisme → *actinisme 1.* R актиничность. D Aktinität. E actinismo. I attinismo. N fotochemische werking; actiniteit. P aktyniczność. S aktinism. (845)

action

1. **(actinic) action spectrum** : → *spectrum 1*
2. **composite action** : additive combination of two or more types of continuous actions (PI, PD, PID, $PIDD_2$, etc.). ★ action composée → *action 3.* R комбинированное воздействие. D zusammengesetztes Verhalten. E acción compuesta. I azione combinata. N gecombineerde werking; samengestelde werking. P działanie złożone. S sammansatt verkan. (351)
3. **continuous action** : type of action in which a continuous variation between two limits can be imposed on the output variable. *Note.* — Sometimes this type of action is improperly called "modulating action" especially when one wants to stress the fact that the action is not a step action. ★ action progressive → *action 23.* R непрерывное воздействие. D stetiges Verhalten. E acción progresiva. I azione continua. N ononderbroken werking. P działanie ciągłe; praca ciągła. S kontinuerlig verkan. (351)
4. **continuous floating action** : floating action in which the rate of change of the output variable may have any value between two given limits. ★ action flottante progressive → *action 9.* R непрерывное астатическое воздействие. D integrierendes Verhalten; I-Verhalten. E acción flotante progresiva. I azione flottante continua. N ..... P ..... S ..... (351)
5. **derivation action** (*Syn.* D-action) : type of continuous action in which the value of the output variable is proportional to the rate of change (first time derivative) of the input variable (i.e., in the case of a controller, of the system deviation). ★ action par dérivation → *action 12.* R воздействие по производной; Воздействие. D differenzierendes Verhalten; D-Verhalten. E acción derivada; acción D. I azione derivativa D. N differentiërende werking; D-actie. P działanie różniczkujące; działanie D. S derivataverkan; D-verkan. (351)
6. **double action mechanical system** : → *mechanical system 4*
7. **floating action** : type of continuous action in which the rate of change of the output variable is a predetermined function of the input variable (i.e., in the case of a controller, of the system deviation). ★ action flottante → *action 6.* R астатическое воздействие. D integrierendes Verhalten, I-Verhalten. E acción flotante. I azione flottante. N zwevende werking. P ..... S flytande verkan. (351)
8. **high-low action** : two-step action in which both steps have the same sign. ★ action par tout ou peu → *action 21.* R характеристика с высоким низким уровнем. D Hoch-Tief-Verhalten. E acción mucho-poco. I azione ad alto o basso. N hoog-laagwerking. P działanie dwustanowe jednoznakowe; praca dwustanowa jednoznakowa. S hög-lågverkan. (351)
9. **holding action** : type of sampling action in which the output variable is held constant during the time intervals between samples (zero-order hold) or varied by a definite law in accordance with preceding samples of the input variable (higher-order hold). ★ action par échantillonnage et maintien → *action 15.* R дискретизация с запоминанием. D Halte-Verhalten. E acción mantenedora. I campionamento con tenuta. N houdfunctie. P działanie z ekstrapolacją (zerowego rzędu); praca z ekstrapolacją (zerowego rzędu). S hållverkan. (351)
10. **local action** (*Syn.* self-discharge) : → *self-discharge 1*
11. **maintenance action** (*Syn.* maintenance task) : a sequence of elementary maintenance activities carried out for a given purpose. *Note.* — Examples are fault diagnosis, fault localization, function check-out, or combinations thereof. ★ opération de maintenance → *opération 2.* R операция технического обслуживания и ремонта. D Instandhaltungsvorgang; Instandhaltungsaufgabe. E acción de mantenimiento; tarea de mantenimiento. I azione di manutenzione; compito di manutenzione. N onderhoudsactie. P czynności obsługi. S underhållsåtgärd. (191)
12. **modulating action** : type of action in which the output variable results from modulation of a carrier by the input variable. ★ action par modulation → *action 18.* R модулирующее воздействие. D Modulations-Verhalten. E acción por modulación. I modulazione. N modulerende werking. P działanie z modulacją; praca z modulacją. S modulering(sverkan). (351)
13. **multiple-speed floating action** : floating action in which the rate of change of the output variable may have several absolute values. ★ action flottante à plusieurs vitesses → *action 7.* R астатизм n-го порядка. D I-Verhalten mit mehreren festen Stellgeschwindigkeiten. E acción flotante de varias velocidades. I azione flottante a più velocità. N ..... P ..... S ..... (351)
14. **multi-step action** : step action with more than two steps. ★ action à échelons multiples → *action 2.* R многопозиционная характеристика. D Mehrpunkt-Verhalten. E acción de escalones múltiples. I azione a più valori. N veelstandenwerking. P działanie wielostanowe; praca wielostanowa. S flerlägesverkan. (351)
15. **on-off action** : two-step action in which one of the steps is assigned the value zero. ★ action par tout ou rien → *action 22.* R релейная характеристика. D Ein-Aus-Verhalten. E acción todo-nada. I azione a tutto o niente. N aan/uit-werking. P działanie (dwustanowe) zero-jedynkowe; praca (dwustanowa) zero-jedynkowa. S till-frånverkan. (351)
16. **positive-negative action** : two-step action in which the steps have opposite signs. ★ action par plus ou moins → *action 19.* R двузначная характеристика. D Positiv-Negativ-Verhalten. E acción más-menos. I azione a più o meno. N plus-minuswerking. P działanie dwustanowe dwuznakowe; praca dwustanowa dwuznakowa. S positiv-negativverkan. (351)
17. **positive-negative three-step action** : multi-step action with three steps of which one is assigned the value zero and the other two have opposite signs. ★ action par plus ou moins avec encadrement → *action 20.* R двузначная трехпозиционная характеристика. D Positiv-Negativ-Dreipunktverhalten. E acción más-menos de tres escalones. I azione a tre valori con zona morta. N plus-minus-driestandenwerking. P działanie trójstanowe z zerem; praca trójstanowa z zerem. S positiv-negativ trelägesverkan. (351)

18. **quick action contact** : → *contact 97*
19. **sampling action** : type of intermittent action in which the output variable represents samples of the input variable. *Note.* — Amplitude or duration modulation of a pulse signal are types of sampling actions. ★ action par échantillonnage → *action 14.* R импульсное воздействие; дискретизация по времени. D Abtast-Verhalten. E acción por muestreo. I campionamento. N bemonstering. P działanie z próbkowaniem; praca z próbkowaniem. S sampling(sverkan). (351)
20. **single action mechanical system** : → *mechanical system 12*
21. **single-speed floating action** : floating action in which the rate of change of the output variable has only one absolute value. ★ action flottante à vitesse unique → *action 8.* R астатизм первого порядка. D I-Verhalten mit einer festen Stellgeschwindigkeit. E acción flotante de velocidad única. I azione flottante a una velocità. N ..... P ..... S ..... (351)
22. **slow action contact** : → *contact 108*
23. **step action** : type of action in which only a finite number of values, called steps, can be imposed on the output variable. ★ action par échelons → *action 16.* R ступенчатая характеристика. D Mehrpunkt-Verhalten. E acción por escalones. I azione a gradini. N stapvormige werking. P działanie skokowe; praca skokowa. S stegverkan. (351)
24. **two-step action** : type of step action which imposes on the output variable either one of two steps. ★ action à deux échelons → *action 1.* R двухпозиционная характеристика. D Zweipunkt-Verhalten. E acción de dos escalones. I azione a due valori. N tweestandenwerking. P działanie dwustanowe; praca dwustanowa. S tvålägesverkan. (351)
25. **type of action of an element** : → *type 30*

activated

1. **thermally activated luminescence** : → *luminescence 5*

activation

1. **activation** : the process of inducing radioactivity by irradiation. ★ activation → *activation 1.* R активация. D Aktivierung. E activacion. I attivazione. N activatie. P aktywacja. S aktivering. (026,881)
2. **activation analysis** : → *analysis 1*
3. **activation cross-section** : → *cross-section 1*
4. **impurity activation energy** : → *energy 53*

activator

1. **activator** : an impurity, or displaced atom, which increases the luminescence efficiency of a material to be used as a scintillating material. ★ activateur → *activateur 1.* R активатор. D Aktivator. E activador. I attivatore. N activator. P aktywator. S aktivator. (391)

active

1. **active** : pertaining to an electrical network or device which cannot function without a source of energy other than the input signals. ★ actif → *actif 1.* R активный. D aktiver. E activo. I attivo. N actief. P czynny; aktywny. S aktiv. (702)
2. **active** : pertaining to a network terminal that is being used for a call or to which a call arrival signal is being applied. ★ actif → *actif 2.* R активный. D aktiv. E activo. I attivo. N in de werkstand. P aktywny. S aktiv. (714)
3. **active antenna** : → *antenna 1*
4. **active (circuit) element** : → *circuit element 1*
5. **active corrective maintenance time** : → *time 3*
6. **active deposit** : → *deposit 1*
7. **active energy** : → *energy 2*
8. **(active) energy meter** (*Syn.* watt-hour meter) : → *meter 77*
9. **active laser medium** : → *medium 2*
10. **active line** : → *line 3*
11. **active maintenance time** : → *time 4*
12. **active mass** : → *mass 2*
13. **active mass factor** : → *factor 4*
14. **active material** : → *material 2*
15. **active material** : → *material 3*
16. **active network** : → *network 2*
17. **active power** : → *power 3*
18. **active power meter** (*Syn.* wattmeter) : → *wattmeter 2*
19. **active preventive maintenance time** : → *time 5*
20. **active redundancy** : → *redundancy 1*
21. **active satellite** : → *satellite 1*
22. **active sonar** : → *sonar 1*
23. **active surface of an electrode** : → *surface 1*
24. **active transducer** : → *transducer 1*
25. **figure of merit of an active sonar** : → *figure 5*
26. **locally active** : pertaining to a network terminal that is being used to perform a purely local function, and to which a call arrival signal may be applied. ★ actif localement → *actif 3.* R активный в местной функции. D oertlich aktiv; oertlich eingeschaltet. E activo localmente. I attivo localmente. N ..... P aktywny lokalnie. S lokalt aktiv. (714)
27. **mean active corrective maintenance time** : → *time 95*
28. **optically active material** : → *material 32*

activity

1. **activity** (A) : for a given quantity of radioactive material, the number dN of spontaneous nuclear disintegrations occurring in a given quantity of material during a suitably small time interval dt divided by that time interval.

$$A = \frac{dN}{dt}$$

★ activité → *activité 1.* R активность. D Aktivität. E actividad. I attività. N activiteit. P aktywność. S aktivitet. (026,391)

2. **activity** (A) : of an amount of a radionuclide in a particular energy state at a given time, the quotient of dN by dt, where dN is the expectation value of the number of spontaneous nuclear transitions from that energy state in the time interval dt : $A = dN/dt$ *Note.* — The SI unit of activity is the reciprocal second (s^{-1}) and is given the special name becquerel (Bq). The earlier special unit of activity, still in temporary use, was the curie (Ci). 2 Bq = 1 s^{-1} = 2.703 . 10^{-11} Ci approximately. ★ activité (nucléaire) → *activité 4.* R активность. D Aktivität. E actividad (nuclear). I attività. N activiteit. P aktywność. S aktivitet. (881)
3. **activity concentration** (*Syn.* volume activity) : → *activity 19*
4. **activity concentration** (*Syn.* radioactive concentration) : → *concentration 8*
5. **activity curve** : → *curve 1*
6. **activity factor** : → *factor 5*
7. **activity meter** : → *meter 4*
8. **elementary maintenance activity** : a unit of work into which a maintenance activity may be broken down at a given indenture level. ★ opération élémentaire de maintenance → *opération 3.* R единичная операция технического обслуживания и ремонта. D Instandhaltungselement. E acción elemental de mantenimiento. I attività elementare di manutenzione. N elementaire onderhoudsactiviteit. P czynność elementarna obsługi. S underhållsmoment. (191)
9. **high activity laboratory** : → *laboratory 1*
10. **ion activity** : the ion concentration corrected for the deviation between the actual and the ideal solution. ★ activité ionique → *activité 2.* R ионная активность. D Ionenaktivität. E actividad iónica. I attività ionica. N ionenactiviteit. P aktywność jonowa. S jonaktivitet. (111)
11. **liquid scintillator activity meter** : → *meter 29*
12. **solar activity** : the emission of electromagnetic radiation and particles from the Sun, consisting of slowly variable components and transient components caused by phenomena such as solar flares. ★ activité solaire → *activité 6.* D Sonnenaktivität. P aktywność słoneczna. (705)
13. **solar activity centre** : → *centre 19*
14. **solar (activity) index** : → *index 39*
15. **specific activity** : activity of a radioactive substance per unit mass. ★ activité spécifique → *activité 7.* R удельная активность. D spezifische Aktivität. E actividad másica. I attività massica. N massieke activiteit; specifieke activiteit. P aktywność właściwa. S specifik aktivitet. (026,391)
16. **specific activity** : activity per unit mass of the element whose radionuclide is considered. ★ activité nucléaire massique → *activité 5.* R удельная активность. D spezifische Aktivität. E actividad especifica. I attività specifica. N massieke specifieke

activiteit. P aktywność właściwa masowa. S specifik aktivitet. (881)

17. **surface activity** : activity per unit surface. ★ activité surfacique → *activité 8.* R удельная поверхностная активность. D Flächenaktivität. E actividad superficial. I attività areica. N areïeke activiteit. P aktywność powierzchniowa. S ytaktivitet. (391)
18. **tissue activity meter** : → *meter 64*
19. **volume activity** (*Syn.* activity concentration) : activity per unit volume of a solid substance. ★ activité volumique → *activité 9.* R удельная объемная активность; концентрация. D Aktivitätskonzentration. E actividad volúmica; concentración de actividad. I attività volumica. N activiteitsconcentratie; volumieke activiteit. P aktywność objętościowa; koncentracja aktywności. S aktivitetstäthet. (026,391)

actual

1. **actual transfer rate** : → *rate 2*
2. **actual transformation ratio of a current transformer** : → *ratio 2*
3. **actual transformation ratio of a voltage transformer** : → *ratio 3*
4. **actual value of a specified time** : → *value 1*
5. **degree of start-stop distortion at the actual mean modulation rate** (*Syn.* degree of synchronous start-stop distortion) : → *degree 17*

actuating

1. **actuating force** : → *force 2*
2. **actuating force** : → *force 3*
3. **actuating moment** : → *moment 1*
4. **actuating system** : → *system 5*

actuator

1. **actuator** : final controlling element of mechanical type. *Note.* — The final controlling elements are generally of mechanical type (valves, dampers, vices, etc.) but they can also be of another nature (exciter of a generator for instance). ★ actionneur → *actionneur 2.* R исполнительный механизм. D Stellantrieb. E accionador. I attuatore. N klep; ventiel. P siłownik. S mekaniskt ställdon. (351)
2. **actuator** : the part of the actuating system to which an external actuating force is applied. *Note.* — The actuator may take the form of a handle, knob, push-button, roller, plunger, etc. ★ organe de commande → *organe de commande 2.* R орган управления. D Bedienteil. E elemento de mando. I attuatore. N bedieningselement. P element napędowy. S manöverdon. (441)
3. **actuator** : the integral part of a component to which an external force is to be applied. Movement of the actuator provides a means for activating or disactivating the component. ★ organe de commande → *organe de commande 3.* R элемент приводной. D Betätiger. E elemento de mando/actuador. I organo di comando. N bedieningsorgaan. P napęd. S manöverorgan. (581)
4. **auxiliary actuator** : an accessory designed to be mounted on a component so that it may be operated by means not adapted to actuate the component directly. ★ organe auxiliaire de commande → *organe de commande 1.* R элемент приводной вспомогательный. D Zusatzbetätiger. E auxiliar de mando. I organo ausiliario di comando. N hulpbedieningsorgaan. P napęd pomocniczy. S hjälpmanöverorgan. (581)
5. **control-motor actuator** (*Syn.* servomotor actuator) : actuator in which the displacement of the controlled part is obtained by the movement of a part of a motor. ★ actionneur à servomoteur → *actionneur 4.* R сервомотор. D motorischer Stellantrieb. E accionador por servomotor. I azionamento. N (elekromagnetisch) relais. P siłownik z serwomotorem. S motorställdon. (351)
6. **(electric) actuator** : an electric transducer that converts an electric signal into a signal of any kind, such as mechanical displacement. ★ actionneur → *actionneur 1.* R (электрический) актуатор. D Stellglied. E accionador. I attuatore. N (elektrisch) bedienend element. P mechanizm wykonawczy; siłownik. S styrdon. (151)
7. **electrostatic actuator** : device comprising an auxiliary electrode that permits the application of an electrostatic force to the metallic or metallized diaphragm of a microphone in order to obtain a calibration. ★ excitateur électrostatique → *excitateur 2.* R электростатический возбудитель. D elektrostatischer Kalibrator. E excitador electrostático. I eccitatore elettrostatico. N voorelektrode. P pobudnik elektrostatyczny. S elektrostatisk kalibreringselektrod. (801)
8. **safety actuator** : sub-assembly which accepts command signals from one or more logic assemblies and directly controls safety action. *Example* : Safety actuators are used for safety shutdowns, emergency cooling, etc. ★ mécanisme de sécurité → *mécanisme 8.* R устройство безопасности. D Sicherheits-Stellglied. E mecanismo de seguridad. I meccanismo di protezione. N veiligheidsmechanisme. P urządzenie wykonawcze zabezpieczeń. S (säkerhets)manöverdon. (392)
9. **servomotor actuator** (*Syn.* control-motor actuator) : → *actuator 5*
10. **solenoid actuator** : actuator in which the displacement of the controlled part is obtained by the attraction of the armature of a solenoid. ★ actionneur à électro-aimant de commande → *actionneur 3.* R соленоидный исполнительный механизм. D Magnetantrieb. E accionador por solenoide. I attuatore a solenoide. N motorisch bediend regelorgaan. P siłownik elektromagnesowy. S solenoidställdon. (351)

ACU

1. **ACU** (*Syn.* acknowledgement signal unit) : → *unit 1*

acuity

1. **acuity (bandwidth) adaptation** : → *adaptation 1*
2. **visual acuity** (*Syn.* visual resolution) : 1. Qualitatively : Capacity of seeing distinctly fine details that have very small angular separation. 2. Quantitatively : Any of a number of measures of spatial discrimination such as the reciprocal of the value of the angular separation in minutes of arc of two neighbouring objects (points or lines or other specified stimuli) which the observer can just perceive to be separate. ★ acuité visuelle → *acuité 1.* R острота зрения. D Sehschärfe. E agudenza visual. I acuità visiva. N gezichtsscherpte; visueel scheidend vermogen. P ostrość widzenia; rozdzielczość widzenia. S synskärpa. (845)

acute

1. **acute irradiation** : → *irradiation 1*

acyclic

1. **acyclic machine** : → *machine 1*

adaptation

1. **acuity (bandwidth) adaptation** : determination of the relative bandwidths of the luminance signals and chrominance signals whereby they are chosen to match the acuity of the eye. ★ adaptation (de bande) d'acuité → *adaptation 4.* R согласование (полос частот) с остротой зрения. (723)
2. **adaptation** : the process by which the state of the visual system is modified by previous and present exposure to stimuli that may have various luminances, spectral distributions and angular subtenses. *Notes. 1* — The terms "light adaptation" and "dark adaptation" are also used, the former when the luminances of the stimuli are of at least several candelas per square metre, and the latter when the lumimances are of less than some hundredths of a candela per square metre. *2* — Adaptation to specific spatial frequencies, orientations, sizes, etc. are recognized as being included in this definition. ★ adaptation → *adaptation 2.* R адаптация. D Adaptation. E adaptación. I adattamento. N adaptatie. P adaptacja; przystosowanie. S adaptation. (845)
3. **chromatic adaptation** : adaptation by stimuli in which the dominant effect is that of different relative spectral distributions. ★ adaptation chromatique → *adaptation 3.* R хроматическая адаптация. D Farbumstimmung. E adaptación cromática. I adattamento cromatico. N chromatische adaptatie. P adaptacja barwowa. S kromatisk adaptation. (845)

adaptative

1. **adaptative channel allocation** : → *allocation 1*
2. **adaptative routing** : → *routing 1*

adapter

1. **long line adapter** : a range extender which compensates for excessive line attenuation and attenuation distortion by means

of amplifiers. ★ répéteur → *répéteur 2.* R переходное устройство для длинных абонентских линий. D NLT-Verstärker. E repetidor (en una red local de líneas). I ripetitore per linea d'utente. N ..... P wzmacniacz liniowy abonenta odległego. S telefonöverdrag. (722)

2. **(transmission line) adapter** : a device for joining two transmission lines of identical or different transverse cross-sections that are terminated with connecting devices of different types or dimensions. *Note.* — A waveguide adapter may consist of a conveniently short length of waveguide having the required mating flanges. If the waveguides to be connected have different transverse cross-sections the adapter may also include a matching conversion section. If the modes of propagation also differ, the adapter may function as a mode converter. ★ adaptateur → *adaptateur 2.* R адаптер (линии передачи). D Anpassungsglied; Adapter (für Übertragungsleitungen). E adaptador (de líneas de transmisión). I adattatore. N aanpassing. P przejście (liniowe). S övergång. (726)

adaptive

1. **adaptive antenna system** : → *system 6*
2. **adaptive colorimetric shift** : → *shift 1*
3. **adaptive control** : → *control 2*
4. **adaptive differential pulse code modulation** : → *modulation 1*
5. **adaptive (perceived) colour shift** : → *shift 2*
6. **adaptive prediction** : → *prediction 1*
7. **adaptive quantizing** : → *quantizing 1*

adaptor

1. **adaptor** : an intermediate device to provide for attachments such as special accessories, special mounting means or special interconnecting means. ★ adaptateur → *adaptateur 1.* R колодка переходная. D Adapter. E adaptador. I adattatore; raccordo intermedio (connessione intermedia). N verloopstuk. P adaptor. S adapter. (581)
2. **cable adaptor** (*Syn.* cable outlet) : a part of a connector or an accessory consisting of a rigid housing for attachment to the connector body. It may incorporate provision for a cable clamp or seal for terminating screens and provide shielding to electrical interference. It may be straight or angled. ★ sortie de câble → *sortie 40.* R кожух соединителя. D Kabelausgang. E adaptador de cable. I salida de cable; adattatore per cavo; uscita del cavo. N kabelaansluitstuk. P wpust przewodowy. S kabelinföring; kabelmuff. (581)
3. **channel adaptor** : device for changing the separation of carriers in a television channel and possibly their positions in the frequency spectrum. ★ adaptateur de canal → *adaptateur 4.* R адаптер каналов. (723)
4. **conduit adaptor** : an accessory to secure a connector to a conduit. ★ adaptateur de conduit → *adaptateur 5.* R деталь переходная кабелепровода. D Rohradapter. E adaptador de conducto. I adattatore per canalina (canaletta). N aansluitstuk. P prowadnik łącznika. S rörinföring. (581)
5. **connector adaptor** : a fixed or free component to permit electrical connection(s) between two or more connectors where direct connection is mechanically impossible. ★ connecteur intermédiaire → *connecteur 28.* R переходник. D Adaptersteckverbinder. E adaptador de conector; conector intermedio. I connettore intermedio; connettore intermedio. N verloopconnector. P adaptor złączowy. S övergångsdon. (581)

Adcock

1. **Adcock (array) antenna** : → *antenna 3*

added

1. **added filter** : → *filter 2*

additive

1. **additive** : a specific substance which is deliberately added to an insulating liquid in small proportion in order to improve certain characteristics. ★ additif → *additif 1.* R присадка. D Additiv. E aditivo. I additivo. N toevoeging. P dodatek. S tillsatsämne. (212)
2. **additive mixture of colour stimuli** : → *mixture 1*
3. **additive process** : → *process 1*

address

1. **absolute address** : an address in a computer language that identifies a storage location or a device without the use of any intermediate reference. ★ adresse absolue → *adresse 4.* R абсолютный адрес. D absolute Adresse; Absolutadresse. E dirección absoluta. I indirizzo assoluto. N absoluut adres. P adres absolutny. S absolutadress. (714)
2. **address** (*Syn.* address (information)) : → *address 5*
3. **address** (in software) : a character or group of characters that identifies a register, a particular part of storage, or some other data source or destination. ★ adresse → *adresse 2.* R адрес (в программном обеспечении). D Adresse. E dirección (en software). I indirizzo (in software). N adres. P adres (w oprogramowaniu). S adress. (714,721)
4. **address** (in circuit switching) : the part of the selection signals which indicates the destination of a call. ★ adresse → *adresse 3.* R адрес (при коммутации каналов). D Adresse (bei Leitungsvermittlung). E dirección (en conmutación de circuitos). I indirizzo del chiamato. N nummer van de opgeroepene (bij geschakelde circuits). P adres (w komutacji łączy). S adress. (721)
5. **address (information)** (*Syn.* address (in telecommunication)) : the totality of digits and possibly others characters at a point in the network which locate the called party, or those digits which are necessary for forward routing. *Note.* — The digits comprising the address information sent by the calling party may be changed by translation and/or digit absorption as a connection is progressively set up through the network, but the new and/or remaining digits at each point constitute the address information. ★ adresse → *adresse 1.* R адресная информация; адрес (в электросвязи). D Waehlinformation; Adresse. E dirección (en telecomunicación); información de dirección. I indirizzo; informazione di indirizzo. N adres. P adres (w telekomunikacji). S adress. (714,715)
6. **address sequencing** : → *sequencing 1*
7. **address signal** : → *signal 4*
8. **base address** : a numeric value that is used as a reference in the calculation of addresses in the execution of a computer program. ★ (adresse) de base → *adresse 5.* R основной адрес. D Basisadresse. E dirección de base. I indirizzo base. N basisadres. P adres podstawowy. S basadress. (714)
9. **changed address interception** : → *interception 1*
10. **direct address** : an address that designates a storage location of an item of data to be treated as an operand. ★ adresse directe → *adresse 7.* R прямой адрес. D direkte Adresse; Direktadresse; Speicheradresse. E dirección directa. I indirizzo diretto. N direct adres. P adres bezpośredni. S direktadress. (714)
11. **indirect address** : an address that designates the storage location of an item of data to be treated as the address of an operand but not necessarily as its direct address. ★ adresse indirecte → *adresse 8.* R косвенный адрес. D indirekte Adresse; Indirektadresse. E dirección indirecta. I indirizzo indiretto. N indirect adres. P adres pośredni. S indirekt adress. (714)
12. **initial address message** : → *message 1*
13. **redirection address** : information sent in the backward direction consisting of a number of address signals indicating the complete address to which the call is to be or has been redirected. ★ adresse de réacheminement → *adresse 6.* R адрес перенаправления. D Weiterleitungsadresse. E petición reencaminada. I indirizzo di restradamento. N omrouteringsbericht. P adres przekierowania. S omstyrningsadress. (721)
14. **relocatable address** : an address that is adjusted when the computer program containing it is relocated. ★ adresse translatable → *adresse 9.* R перемещаемый адрес. D verschiebbare Adresse. E dirección transladable. I indirizzo rilocabile. N verplaatsbaar adres. P adres przemieszczalny. S relokerbar adress. (714)
15. **short address** : an address having fewer characters than the normal address, e.g. for special services or certain subscribers. ★ numéro court → *numéro 6.* R сокращенный номер; сокращенный адрес. D Kurzadresse. E dirección corta. I numero breve. N verkort adres. P adres skrócony. S kortnummer. (721)
16. **subsequent address message** : → *message 16*

address-complete

1. **address-complete signal** : → *signal 5*
2. **address-complete signal (with charge)** : → *signal 6*
3. **address-complete signal (with no charge)** : → *signal 7*

address-incomplete

1. **address-incomplete signal** : → *signal 8*

adherence

1. **pantograph adherence pressure** (*Syn.* pantograph contact pressure) : → *pressure 12*

adhesion

1. **adhesion** : the friction between the wheels of a vehicle and the rails, which makes possible the transmission of tractive effort and braking force. ★ adhérence → *adhérence 1.* R сцепление. D Haftreibung. E adherencia. I aderenza. N adhesie. P przyczepność. S adhesion. (811)
2. **combined rack and adhesion drive** : → *drive 2*
3. **factor of adhesion** : → *factor 74*

adhesive

1. **adhesive** : a general term for all non-metallic materials that can join solids by surface bonding and internal strength (adhesion and cohesion). ★ adhésif → *adhésif 1.* R адгезив. D Klebstoff. E adhesivo; cola. I adesivo; colla. N kleefmiddel. P lepiszcze; spoiwo. S adhesiv; häftämne. (212)
2. **adhesive tape** : → *tape 1*
3. **adhesive weight** : → *weight 1*
4. **pressure-sensitive adhesive tape** : → *tape 9*

adjacent

1. **adjacent channel selectivity** : → *selectivity 1*

adjustable

1. **adjustable constant speed motor** : → *motor 1*
2. **adjustable luminaire** : → *luminaire 1*
3. **adjustable short circuit** (*Syn.* piston) : → *piston 4*
4. **adjustable speed motor** : → *motor 2*
5. **adjustable thermostatic switch** : → *switch 1*
6. **adjustable varying speed motor** : → *motor 3*

adjuster

1. **adjuster** (*Syn.* adjustment device) : → *device 1*
2. **electrical zero adjuster** : a device by means of which the electrical zero can be set to its required position. ★ dispositif d'ajustage du zéro électrique → *dispositif 27.* R корректор электрического нуля. D elektrischer Nullsteller. E dispositivo de ajuste del cero eléctrico. I dispositivo di regolazione dello zero elettrico. N orgaan voor instelling van elektrisch nulpunt. P nastawnik zera elektrycznego. S elektrisk nollställare. (301)
3. **mechanical zero adjuster** : a mechanism by means of which the mechanical zero can be set to its required position. ★ dispositif d'ajustage du zéro mécanique → *dispositif 28.* R корректор механического нуля. D mechanischer Nullsteller. E dispositivo de ajuste del cero mecánico. I dispositivo di regolazione dello zero meccanico. N orgaan voor mechanische nulpuntinstelling. P nastawnik zera mechanicznego. S mekanisk nollställare. (301)

adjusting

1. **adjusting command** : → *command 1*
2. **step by step adjusting command** (*Syn.* regulating step command) : → *command 17*

adjustment

1. **adjustment device** : → *device 1*
2. **adjustment frequency** : → *frequency 4*
3. **adjustment range** : → *range 1*
4. **adjustment tolerance** : → *tolerance 1*
5. **azimuth adjustment** : the adjustment of the magnetic recording and reproducing head gaps to a given angle with respect to the direction of the movement of the tape. *Note.* — In audio recording, this angle is generally a right angle. ★ réglage d'azimut → *réglage 29.* R установка наклона рабочих зазоров. D Spalteinstellung; Azimutjustage. E ajuste de azimut. I regolazione di azimut. N spleetinstelling. P ustawianie skosu (szczelin). S spaltvinkelinställning. (806)
6. **frequency adjustment range** : → *range 26*
7. **fuel cost adjustment clause** : → *clause 1*
8. **head adjustment** : an operation which consists of setting magnetic heads in a suitable position with respect to azimuth angles and desired track configuration. ★ réglage des têtes → *réglage 42.* R установка положения головок. D Kopfeinstellung. E ajuste de cabezas. I regolazione delle testine. N kopinstelling. P ustawianie głowicy. S huvudinställning. (806)
9. **preliminary adjustments** : adjustments, specified by the manufacturer, that must be made before using the instrument so that it will operate with the specified accuracy. ★ ajustage préliminaire → *ajustage 1.* R юстировка. D vorbereitende Massnahmen (für eine Messung). E ajuste preliminar. I regolazione preliminare. N afregeling. P adiustacja wstępna. S injustering före mätning. (301)
10. **price adjustment clause** : → *clause 4*
11. **recorder adjustment sensor hole** : → *hole 16*

administrative

1. **administrative delay** : → *delay 1*
2. **mean administrative delay** : → *delay 27*
3. **p-fractile administrative delay** : → *delay 32*

admittance

1. **acoustic admittance** : reciprocal of acoustic impedance. ★ admittance acoustique → *admittance 2.* R акустический адмитанс. D akustische Admittanz. E admitancia acústica. I ammettenza acustica. N akoestische admittantie. P admitancja akustyczna. S akustisk admittans. (801)
2. **admittance** : reciprocal of impedance of stated kind. ★ admittance → *admittance 1.* R адмитанс. D Admittanz. E admitancia. I ammettenza. N admittantie. P admitancja. S admittans. (801)
3. **admittance matrix of a polyphase element in coherent components** : → *matrix 1*
4. **antenna (input) admittance** : the complex admittance of an antenna appearing at the feed point terminals. *Note.* — The antenna admittance may be described in terms of the complex reflection coefficient between the feed line and the antenna. ★ admittance (d'entrée) d'antenne → *admittance 10.* R полная входная проводимость антенны; входной адмиттанс антенны. D Antennenadmittanz; Antenneneingangsadmittanz. E admitancia (de entrada) de antena. I ammettenza (d'ingresso) d'antenna. N antenne-admittantie. P admitancja (wejściowa) anteny. S matningsadmittans. (712)
5. **bus admittance matrix** : → *matrix 3*
6. **(complex) admittance** : a complex quantity whose modulus is the modulus of admittance and whose argument is the phase angle of the current minus the phase angle of the voltage. ★ admittance (complexe) → *admittance 5.* R комплексная электрическая проводимость (комплексный адмитанс). D komplexe Admittanz; komplexer Scheinleitwert. E admitancia (compleja). I ammettenza (complessa). N (complexe) admittantie. P admitancja. S (komplex) admittans. (131)
7. **electrode admittance** : at a stated operating point and frequency, the quotient of the fundamental frequency component of the current into the accessible terminal of an electrode by the sinusoidal voltage applied to that terminal to cause the current, all other terminal potentials being maintained constant. *Note.* — For infinitesimal amplitudes, this is the reciprocal of the electrode impedance. ★ admittance d'électrode → *admittance 8.* R полная проводимость электрода. D innere Elektrodenadmittanz. E admitancia de electrodo. I ammettenza di elettrodo. N elektrodeadmittantie. P admitancja elektrody. S elektrodadmittans. (531)
8. **input admittance** : the input electrode admittance. ★ admittance d'entrée → *admittance 9.* R полная входная проводимость. D Eingangsadmittanz. E admitancia de entrada. I ammettenza di ingresso. N ingangsadmittantie. P admitancja wejściowa. S inadmittans. (531)
9. **(modulus of) admittance** : a scalar quantity equal to the quotient of the r.m.s. value of the current by the r.m.s. value of the voltage of a 2-terminal circuit. ★ (module de l') admittance → *admittance 20.* R полная электрическая проводимость (адмитанс). D Betrag der Admittanz; Scheinleitwert. E (módulo de) admitancia. I (modulo dell')

ammettenza. N (modulus van de) admittantie. P moduł admitancji. S admittans(belopp). (131)

10. **motional admittance** : of a transducer, the loaded electric admittance minus the electric admittance when mechanically blocked. *Note.* — This definition is best applied to transducers with transformer coupling. ★ admittance cinétique → *admittance 4*. R адмитанс движения. D Bewegungsadmittanz. E admitancia cinética. I ammettenza mozionale. N bewegingsadmittantie. P admitancja kinetyczna. S rörelseadmittans. (801)
11. **normalized admittance** : the reciprocal of the normalized impedance of a given transmission line. ★ admittance normée → *admittance 13*. R нормализованная полная проводимость. D normierte Admittanz. E admitancia normalizada. I ammettenza normalizzata; fattore di ammettenza. N genormeerde admittantie. P admitancja unormowana. S admittanstal. (726)
12. **output admittance** : the output electrode admittance. ★ admittance de sortie → *admittance 6*. R полная выходная проводимость. D Ausgangsadmittanz. E admitancia de salida. I ammettenza di uscita. N uitgangsadmittantie. P admitancja wyjściowa. S utadmittans. (531)
13. **shunt admittance** : the admittance between a definite phase node and the reference terminal in the two-port network equivalent to a given network component. ★ admittance en dérivation → *admittance 11*. R поперечная проводимость. D Queradmittanz. E admitancia en derivación; admitancia transversal. I ammettenza derivata; ammettenza trasversale. N shuntadmittantie; dwarsadmittantie. P admitancja poprzeczna (bocznikowa). S shuntadmittans. (603)
14. **specific acoustic admittance** : reciprocal of the specific acoustic impedance. *Note.* — The real part is the specific acoustic conductance and the imaginary part is the specific acoustic susceptance. ★ admittance acoustique spécifique → *admittance 3*. R удельный акустический адмитанс. D spezifische Schalladmittanz; Feldadmittanz. E admitancia acústica específica. I ammettenza acustica specifica. N specifieke akoestische admittantie. P admitancja akustyczna jednostkowa. S ljudfältsadmittans. (801)
15. **specific wall admittance** : quotient of the particle velocity normal to a wall, by the sound pressure acting on the wall. ★ admittance spécifique d'une paroi → *admittance 14*. R податливость стенки. D Wand-Admittanz. E admitancia específica de una pared. I ammettenza specifica di una parete. N wandadmittantie. P admitancja (akustyczna) charakterystyczna ściany. S väggadmittans. (801)
16. **transfer admittance** : a transfer function in which the output quantity is a current and the input quantity a voltage. ★ admittance de transfert → *admittance 7*. R адмиттанс передачи. D Übertragungsadmittanz. E admitancia de transferencia. I ammettenza di trasferimento. N overdrachtsadmittantie. P admitancja przejścia; admitancja transferowa. S överföringsadmittans. (702)

ADPCM

1. **ADPCM** (*Syn.* adaptive differential pulse code modulation) : → *modulation 1*

adsorbant

1. **solid adsorbant treatment** : → *treatment 4*

adsorption

1. **adsorption** : an increased concentration of any component at the surface of a liquid or solid. ★ adsorption → *adsorption 1*. R абсорбция. D Adsorption. E adsorción. I assorbimento. N adsorptie. P adsorpcja. S adsorption. (111)

advance

1. **advance ball** : → *ball 1*

advancer

1. **phase advancer** : a machine which supplies reactive power to the secondary of a wound rotor induction motor to improve the power factor of the latter. ★ compensateur de phase → *compensateur 2*. R фазовый компенсатор. D Kommutator-Drehstromerregermaschine; Kommutator-Phasenschieber. E compensador de fase. I compensatore di fase. N fasecompensator. P przesuwnik fazowy. S faskompensator. (411)

AEN

1. **AEN** (*Syn.* articulation reference equivalent) : → *equivalent 1*
2. **reference speech power for the measurement of AEN** : → *power 164*
3. **reference system for the determination of AEN** : → *system 169*

aeolian

1. **aeolian vibration** : → *vibration 1*

aerial

1. **aerial (insulated) cable** : → *cable 1*
2. **aerial lift device with insulating arm** : → *device 2*
3. **bundle assembled aerial cable** : → *cable 4*

aerodrome

1. **aerodrome beacon** : → *beacon 1*

aeronautical

1. **aeronautical ground light** : → *light 1*

aerosol

1. **radioactive aerosol** : particles of radioactive material suspended in a gas, usually air. Diameters of particles range from a fraction of a micrometre to about 100 micrometres. ★ aérosol radioactif → *aérosol 1*. R радиоактивный аэрозоль. D radioaktives Aerosol. E aerosol radiactivo. I aerosol radioattivo. N radioactieve aërosol. P aerosol radioaktywny. S radioaktiv aerosol. (881)
2. **radioactive aerosol contamination meter** : → *meter 47*
3. **radioactive aerosol contamination monitor** : → *monitor 12*

AF

1. **AF** (*Syn.* audio frequency) : → *frequency 11*

after-effect

1. **magnetic after-effect** : a magnetic relaxation having a time constant ranging from a few seconds to many days. ★ traînage magnétique → *traînage 8*. R магнитное последействие. D magnetische Nachwirkung. E arrastre magnético. I effetto magnetico ritardato. N magnetische nawerking. P zjawisko następcze. S magnetisk eftereffekt. (221)

afterglow

1. **after-glow** (*Syn.* persistence) : → *persistence 1*
2. **afterglow** : slowly decaying luminescence persisting after the excitation of the luminescent material has ceased, the duration of which may be from about 100 milliseconds to several minutes. ★ postluminescence → *postluminescence 1*. R послесвечение. D Nachleuchten. E postluminiscencia. I postluminescenza. N nalichten. P poświata. S efterlysning. (845)

after-heat

1. **after-heat** : heat resulting from residual radioactivity in reactor fuel or components after a reactor has been shut down. ★ chaleur résiduelle → *chaleur 7*. D Nachwärme. E calor residual. I calore residuo. N nawarmte. P ciepło powyłączeniowe. S eftervärme. (026)

AGC

1. **AGC** (*Syn.* automatic gain control) : → *control 12*

ageing

1. **accelerated ageing** : an ageing accelerated by intensifying the level and/or the frequency of application of the ageing factors beyond expected service conditions. *Note.* — The ageing factors may be, for instance, temperature, mechanical or electrical stresses, environmental conditions. ★ vieillissement accéléré → *vieillissement 7*. R ускоренное старение. D beschleunigte Alterung. E envejecimiento acelerado. I invecchiamento accelerato. N versnelde veroudering. P starzenie przyspieszone. S accelererad åldring. (212,212)
2. **ageing** : the irreversible changes in one or more properties of an insulating solid, liquid or gas as a result of its normal use. ★ vieillissement → *vieillissement 6*. R старение. D Alterung. E envejecimiento. I invecchiamento. N veroudering. P starzenie. S åldring. (212,212)

3. **ageing failure** : → *failure 1*
4. **ageing fault** : → *fault 1*
5. **frequency tolerance (due to ageing)** : → *tolerance 9*
6. **magnetic ageing** : a continuous change with time in the magnetic properties of a material, such change arising from modification of the material structure. *Note.* — Appropriate heat treatment may accelerate the rate of change or restore the original condition. ★ vieillissement magnétique → *vieillissement 8.* R магнитное старение. D magnetische Alterung. E envejecimiento magnético. I invecchiamento magnetico. N magnetische veroudering. P starzenie magnetyczne. S magnetisk åldring. (221)

agent

1. **antistatic (agent)** : a substance applied to the surface or incorporated in the volume of an insulating material to prevent the build up of or to remove electrostatic charges. ★ agent antistatique → *agent 1.* R антистатик. D Antistatikum. E agente antiestático. I agente antistatico. N middel tegen statische elektriciteit. P antystatyk. S antistatmedel. (212)
2. **hardening agent** (*Syn.* hardener) : a curing agent that promotes or regulates the curing reaction of resins that yield rigid (hard) products. ★ agent de durcissement → *agent 2.* R отвердитель. D Härtungsmittel; Härter. E endurecedor. I agente di indurimento; indurente. N harder. P utwardzacz. S härdare. (212)

aggregate

1. **aggregate (isochronous) signal** : → *signal 9*
2. **balanced aggregate signal** : → *signal 23*
3. **multiplex aggregate bit rate** : → *rate 58*

agreement

1. **supply agreement** : an understanding between the supply undertaking and the consumer setting out particularly the conditions under which a supply of electricity is given, the characteristics of the electricity supply and the prices to be charged. *Note.* — This understanding can result from a contract signed by the parties or from a simple application for supply. ★ abonnement → *abonnement 1.* R договор об электроснабжении. D Stromlieferungsvertrag; Stromversorgungsvertrag. E abono. I accordo di fornitura. N elektriciteitsovereenkomst. P umowa na dostawę energii. S avtal; kontrakt. (691)

aid

1. **hearing aid** : portable instrument intended to assist the hearing of persons with impaired hearing, usually consisting of a microphone, amplifier and earphone or bone vibrator. ★ appareil de correction auditive → *appareil 26.* R слуховая заглушка. D Hörgerät. E audífono; aparato de corrección auditiva. I protesi uditiva. N hoortoestel. P aparat słuchowy (pomocniczy). S hörapparat. (801)

air

1. **air circuit-breaker** : → *circuit-breaker 1*
2. **air conditioning** : → *conditioning 1*
3. **air conduction** : → *conduction 1*
4. **air contamination indicator** : → *indicator 1*
5. **air contamination meter** : → *meter 5*
6. **air contamination monitor** : → *monitor 1*
7. **air duct** : → *duct 1*
8. **air duct** : → *duct 2*
9. **air filled** : → *filled 1*
10. **air guide** : → *guide 1*
11. **air insulated terminal box** : → *terminal box 1*
12. **air kerma-rate constant** : → *constant 2*
13. **air pipe** : → *pipe 1*
14. **air trunking** : → *trunking 1*
15. **ambient air temperature** : → *temperature 1*
16. **ambient air temperature** : → *temperature 2*
17. **(compressed) air brake** : → *brake 9*
18. **compressed air luminaire** (*Syn.* air-turbo lamp) : → *lamp 1*
19. **compressed air power station** : → *power station 3*
20. **compressed air storage** : → *storage 4*
21. **derived air concentration** : → *concentration 4*
22. **exposure in free air** : → *exposure 7*
23. **forced air circulation system** : → *system 72*
24. **free air ionization chamber** : → *ionization chamber 12*
25. **manual air pump** : → *pump 1*
26. **metal plate air seal gasket** : → *gasket 3*
27. **relative optical air mass** : → *mass 26*
28. **specific air resistance** : → *resistance 61*

air-arc

1. **air-arc cutting and gouging electrode** : → *electrode 3*

air-blast

1. **air-blast circuit-breaker** : → *circuit-breaker 2*

air-circuit

1. **closed air-circuit** : a term referring to a pipe or duct ventilated machine used in conjunction with external components so constructed that while it is not necessarily air-tight the enclosed air has no deliberate connection with the external air. *Note.* — The term, to be explicit, must be used in conjunction with another term, e.g. "closed air-circuit air-cooled machine". ★ machine ventilée en circuit fermé → *machine 74.* R машина с замкнутой системой воздушного охлаждения. D Maschine mit geschlossenem Luftkreislauf. E máquina ventilada en circuito cerrado. I macchina ventilata in ciclo chiuso. N met gesloten luchtomloop. P maszyna z zamkniętym obiegiem powietrza. S slutet kylsystem. (411)
2. **closed air-circuit fan-ventilated air-cooled** : → *fan-ventilated 1*
3. **closed air-circuit separately fan-ventilated air-cooled** : → *fan-ventilated 2*
4. **closed air-circuit water-cooled** : → *water-cooled 1*

air-cooled

1. **closed air-circuit fan-ventilated air-cooled** : → *fan-ventilated 1*
2. **closed air-circuit separately fan-ventilated air-cooled** : → *fan-ventilated 2*
3. **totally-enclosed fan-ventilated air-cooled** : → *fan-ventilated 4*
4. **totally-enclosed separately fan-ventilated air-cooled** : → *fan-ventilated 6*

air-cored

1. **air-cored reactor** : → *reactor 1*

aircraft

1. **aircraft warning marker** : → *marker 1*

air-cushion

1. **air-cushion vehicle** : → *vehicle 1*

air-equivalent

1. **air-equivalent material** : → *material 4*

air-gap

1. **(air) gap** : a gap between the magnetic parts of a magnetic circuit, crossed by the magnetic flux lines and short relative to the total magnetic path length. ★ entrefer → *entrefer 1.* R (воздушный) зазор. D (Luft-)Spalt. E entrehierro. I traferro. N luchtspleet. P szczelina (niemagnetyczna). S (luft)gap. (151,221,411)
2. **air gap** (of a rotating machine) : the air space separating the field system and armature or the stator and rotor of a rotating electrical machine. ★ entrefer → *entrefer 2.* R воздушный зазор (вращающейся машины). D Luftspalt. E entrehierro. I traferro. N luchtspleet. P szczelina powietrzna (maszyny wirującej). S luftgap. (811)
3. **air gap (of a linear traction motor)** : distance from the face of the field iron to the face of the armature iron or between the two faces in a double sided field system. ★ entrefer (d'un moteur de traction linéaire) → *entrefer 3.* R воздушный зазор (линейного тягового двигателя). D Luftspalt (eines Linearmotors). E entrehierro (de un motor de tracción lineal). I traferro (d'un motore di trazione lineare). N luchtspleet (van een lineaire tractiemotor). P szczelina (silnika trakcyjnego liniowego). S luftgap. (811)
4. **air-gap technique** (*Syn.* distance technique) : → *technique 7*

5. **radial air-gap (minimum)** : the minimum radial distance between the relatively moving parts of the magnetic structure. ★ entrefer principal → *entrefer 5.* R основной зазор. D Hauptluftspalt. E entrehierro principal. I traferro radiale. N vrijslag. P grubość szczeliny (minimalna). S minsta luftgap. (411)

air-turbo

1. **air-turbo lamp** : → *lamp 1*

air-wall

1. **air-wall ionization chamber** : → *ionization chamber 1*

alarm

1. **alarm indicator** : → *indicator 2*
2. **alarm set** : → *set 1*
3. **common alarm** : the combination of all individual alarms into one alarm. ★ alarme commune → *alarme 1.* R общий сигнал аварии. D Summenwarnmeldung. E alarma común. I allarme comune. N algemeen alarm. P alarm główny. S summalarm; gemensamt larm. (371)
4. **group alarm** : the combination of several individual alarms into one alarm. ★ groupement d'alarmes → *groupement 7.* R групповой аварийный сигнал. D Gruppenwarnmeldung. E grupo de alarmas. I allarme comune parziale. N groepsalarm. P alarm grupowy. S grupplarm. (371)
5. **remote alarm** : the alerting of a central point by telecommunication to the occurrence of an unwanted situation or event. ★ téléalarme → *téléalarme 1.* R телесигнализация. D Fernalarmierung. E telealarma. I teleallarme. N alarmeren op afstand. P telekomunikacja rozsiewcza powszechna; teledyfuzja. S fjärrlarm. (701)
6. **safety alarm** : an alarm which warns the operator to take essential protective action. ★ signalisation d'ordre → *signalisation 35.* R предупредительная сигнализация. D Sicherheitsgefahrenmeldung. E alarma de seguridad. I allarme di protezione. N veiligheidsalarm. P sygnał alarmowy. S säkerhetslarm. (392)
7. **(safety) alarm system** : that part of the protection system which comprises all safety alarms. ★ système de signalisation d'ordre (de sécurité) → *système 78.* R канал предупредительной сигнализации. D (Sicherheits-) Gefahrenmeldesystem. E sistema de alarma (de seguridad). I apparecchiatura di allarme (di protezione). N alarmstelsel. P układ sygnalizacji alarmowej. S (säkerhets)larmsystem. (392)
8. **transmission error alarm** : information indicating that an erroneous transmission signal has been detected. ★ alarme d'erreur de transmission → *alarme 2.* R сигнал ошибки при передаче. D Telegrammfehlermeldung. E alarma de error de transmisión. I allarme d'errore di trasmissione. N overdrachtsfoutalarm. P alarm błędu transmisji. S transmissionsfelsmeddelande. (371)

albedo

1. **albedo** (neutron) : the probability under specified conditions that a neutron entering into a region through a surface will return through that surface. ★ albedo → *albedo 1.* D Albedo. E albedo (neutrónico.). I albedo (neutrone.). N albedo (voor neutronen). P albedo. S albedo. (026)

Alford

1. **Alford loop** : → *loop 1*

algorithm

1. **algorithm** : a finite set of well-defined rules for the solution of a problem in a finite number of steps. ★ algorithme → *algorithme 1.* R алгоритм. D Algorithmus. E algoritmo. I algoritmo. N algoritme. P algorytm. S algoritm. (714)

ALI

1. **ALI** (*Syn.* annual limit on intake) : → *limit 2*

aliasing

1. **aliasing** (*Syn.* foldover distortion) : the distortion caused by sampling a signal at an inappropriate rate and which results in the overlapping of the sidebands around the harmonics of the sampling frequency in the spectrum of the sample signal. ★ distorsion de repliement → *distorsion 47.* R эффект положения. D Überlappungsverzerrung. E distorsión de imágenes superpuestas. I distorsione di ripiegamento; aliasing. N ..... P zniekształcenie zachodzenia pasm. S överlappningsdistorsion. (704)
2. **aliasing** (spatial) : a picture impairment arising because the number of display elements is insufficient to correctly represent the desired image. ★ crénelage → *crénelage 1.* R помеха дискретизации. (723)

aligned-grid

1. **aligned-grid tube** : → *tube 1*

aligner

1. **aligner** : a device used to align the elements of one data structure to particular elements of another structure and, in some cases, to change between the two structures. ★ aligneur → *aligneur 1.* R устройство согласования; устройство фазирования. D Abgleichung. E alineador. I dispositivo di allineamento. N ..... P wyrównywacz. S inriktare. (721)

alignment

1. **beam alignment** : the process of adjusting the angle of incidence of the scanning beam at the target by means of deflecting fields near the electron gun. ★ alignement du faisceau → *alignement 4.* R корректировка пучка. D Strahlausrichtung. E alineación del haz. I allineamento del fascio. N bundeluitrichting. P ..... S strålcentrering. (531)
2. **bunched frame alignment signal** : → *signal 31*
3. **distributed frame alignment signal** : → *signal 75*
4. **frame alignment** : the state in which the frame generated by the receiving equipment has a desired constant phase relationship with the frame of the received signal, so that the individual time-slots in each frame can be uniquely identified. ★ verrouillage de trame → *verrouillage 15.* R цикловый синхронизм. D Rastergleichlauf. E cerramiento de trama. I allineamento trama. N ..... P zgodność ramki. S ramlåsning. (704,721)
5. **frame alignment recovery time** : → *time 65*
6. **frame alignment signal** : → *signal 95*
7. **frame alignment time-slot** : → *time-slot 3*
8. **message alignment indicator** : → *indicator 12*
9. **multiframe alignment** : the state in which the multiframe generated by the receiving equipment has a desired constant phase relationship with the multiframe of the received signal, so that the individual frames in each multiframe can be uniquely identified. ★ verrouillage de multitrame → *verrouillage 14.* R сверхцикловый синхронизм. D Mehrfachrastergleichlauf. E cerramiento de multitramo. I allineamento di multitrama. N ..... P zgodność wieloramki. S multiramlåsning. (704)
10. **multiframe alignment signal** : → *signal 127*

alkaline

1. **alkaline secondary battery** : → *battery 1*

Allan

1. **Allan variance** : → *variance 1*

Allard

1. **Allard's law** : → *law 2*

all-glass

1. **all-glass fibre** : → *fibre 1*

all-in

1. **all-in tariff** : → *tariff 1*

allocation

1. **adaptative channel allocation** : a method of multiplexing where the transfer capacities of channels are not predetermined but are assigned on demand. ★ affectation dynamique adaptable des voies → *affectation 1.* R адаптивное назначение каналов. D Kanalzuweisung nach Bedarf. E distribución dinámica adaptable de los canales. I multiplessaggio statistico. N ..... P adaptacyjny podział kanału. S adaptiv kanaltilldelning. (721)
2. **cost allocation** : → *cost 6*
3. **maintainability allocation** (*Syn.* maintainability apportionment) : a procedure applied during the design of an item intended to apportion the requirements for maintainability performance measures for an item to its subitems according to given criteria. ★ allocation de maintenabilité

→ *allocation 1.* **R** распределение показателей ремонтопригодности. **D** Instandhaltbarkeitszuordnong; Instandhaltbarkeits-Aufteilung. **E** distribución de mantenibilidad; asignación de mantenibilidad. **I** allocazione dei requisiti di manutenibilità. **N** onderhoudbaarheidstoewijzing. **P** podział obsługiwalności. **S** underhållsmässighetsallokering. (191)

4. **path allocation** : the process of reserving a switching path for a specific connection according to a set of rules. ★ recherche d'itinéraire → *recherche 6.* **R** выбор тракта. **D** Wegzuteilung. **E** asignación de itinerario. **I** prenotazione di una via disponibile. **N** pad toewijzen; weg toewijzen. **P** przydział drogi połączeniowej. **S** vägval. (714)

all-or-nothing

1. **all-or-nothing relay** : → *relay 2*

allotting

1. **allotting** : the preselecting of that idle circuit which is to be used next. ★ réservation → *réservation 1.* **R** резервирование. **D** Zuleitung. **E** reserva. **I** distribuzione degli impegni. **N** toewijzen. **P** rezerwowanie. **S** kretstilldelning. (714)

allowance

1. **allowance for rotating parts** : a factor greater than unity applied to the mass of a train or vehicle to make allowance for the inertia of the revolving masses inseparable from the movement of the train (wheel-sets, rotors, etc.). ★ facteur (d'inertie) des masses tournantes → *facteur 179.* **R** коэффициент инерции вращающихся масс. **D** Zuschlag für rotierende Massen (Massenzuschlag). **E** factor de inercia por a las masas rotativas; coeficiente de masas en giro. **I** fattore (inerziale) delle masse rotanti. **N** toeslag voor roterende delen. **P** współczynnik mas wirujących. **S** tilläggsfaktor för roterande massor. (811)

alloy

1. **all aluminium alloy conductor** : → *conductor 1*
2. **alloy reinforced aluminium conductor** : → *conductor 3*
3. **alloy technique** : → *technique 2*
4. **steel reinforced aluminium alloy conductor** : → *conductor 68*

alloying

1. **alloying and refining time** : → *time 6*

all-plastic

1. **all-plastic fibre** : → *fibre 2*

all-silica

1. **all-silica fibre** : → *fibre 3*

alpha

1. **alpha emitter** : → *emitter 1*
2. **alpha particle** : → *particle 1*
3. **alpha radiation** : → *radiation 2*
4. **alpha ratio** : → *ratio 4*
5. **alpha ray spectrometer** : → *spectrometer 1*
6. **vacuum meter with alpha emitter** : → *meter 69*

alphabet

1. **International Alphabet No.5** (*Syn.* ISO 7 bits code) : a telegraph alphabet using a two-conditions eight-unit code with seven primary elements and one digit parity, comprising in particular upper and lower case letters, diacritical signs and control functions. *Note.* — The coding rules using the seven primary elements to code characters are specified by CCITT Recommendation T.50 or International Standard ISO 646. ★ alphabet international N° 5 → *alphabet 2.* **R** международный алфавит N° 5; семиэлементный код ИСО. **D** internationales Telegrafenalphabet Nr 5; ISO 7-bit-Code. **E** alfabeto internacional n°5; código ISO de siete elementos. **I** alfabeto telegrafico internazionale N.5; codice ISO a 7 bit. **N** internationaal telegraafalfabet nummer 5. **P** międzynarodowy alfabet telegraficzny nr 5; kod ISO 7-elementowy. **S** internationella alfabetet nr 5; ISO 7-bitkod. (721)
2. **International Telegraph Alphabet No.1** : a telegraph alphabet using a two-condition five-unit code , used in Baudot synchronous telegraphy. *Note.* — This alphabet was specified by article 16 of the past Telegraph Regulations, Geneva 1958. ★ alphabet télégraphique international N° 1 → *alphabet 4.* **R** международный телеграфный алфавит N° 1. **D** internationales Telegrafenalphabet Nr 1. **E** alfabeto telegráfico internacional n°1. **I** alfabeto telegrafico internazionale N.1. **N** internationaal telegraafalfabet nummer 1. **P** międzynarodowy alfabet telegraficzny nr 1. **S** internationella telegrafalfabetet nr 1. (721)
3. **International Telegraph Alphabet No.2** : a telegraph alphabet using a two-condition five-unit code , used in start-stop telegraphy generally for teleprinters. *Note.* — This alphabet is specified in CCITT Recommandation S.1. ★ alphabet télégraphique international N° 2 → *alphabet 5.* **R** международный телеграфный алфавит N° 2. **D** internationales Telegrafenalphabet Nr 2. **E** alfabeto telegráfico internacional n°2. **I** alfabeto telegrafico internazionale N.2. **N** internationaal telegraafalfabet nummer 2. **P** międzynarodowy alfabet telegraficzny nr 2. **S** internationella telegrafalfabetet nr 2. (721)
4. **International Telegraph Alphabet No.3** : a telegraph alphabet using a two-condition seven-unit constant ratio code. *Note.* — This alphabet is specified by CCIR Recommendation 342 or CCITT Recommendation S.13. ★ alphabet télégraphique international N° 3 → *alphabet 6.* **R** международный телеграфный алфавит N° 3. **D** internationales Telegrafenalphabet Nr 3. **E** alfabeto telegráfico internacional n°3. **I** alfabeto telegrafico internazionale N.3. **N** internationaal telegraafalfabet nummer 3. **P** międzynarodowy alfabet telegraficzny nr 3. **S** internationella telegrafalfabetet nr 3. (721)
5. **International Telegraph Alphabet No.4** : a telegraph alphabet using a two-condition six-unit code for time division multiplex synchronous telegraphy comprising in particular two code combinations corresponding to the permanent conditions A and Z so that the multiplex channel can be operated in a switched network. *Note.* — This alphabet is specified by CCITT Recommendation R.44. ★ alphabet télégraphique international N° 4 → *alphabet 7.* **R** международный телеграфный алфавит N° 4. **D** internationales Telegrafenalphabet Nr 4. **E** alfabeto telegráfico internacional n°4. **I** alfabeto telegrafico internazionale N.4. **N** internationaal telegraafalfabet nummer 4. **P** międzynarodowy alfabet telegraficzny nr 4. **S** internationella telegrafalfabetet nr 4. (721)
6. **n-unit code alphabet** : a telegraph alphabet or a data code indicating correspondence between a set of characters and a set of n-unit code combinations. ★ alphabet d'un code à n moments → *alphabet 1.* **R** *n*-элементный кодовый алфавит. **D** n-bit-Code-Alphabet. **E** alfabeto de un código de n-momentos. **I** alfabeto con codifica ennaria. **N** n-eenhedencode-alfabet. **P** alfabet kodu n-elementowego. **S** n-enhetsalfabet. (721)
7. **(telegraph) alphabet** : a convention indicating correspondence between a set of characters and a set of groups of elements which represent them. ★ alphabet (télégraphique) → *alphabet 3.* **R** (телеграфный) алфавит. **D** (Telegrafen-)Alphabet. **E** alfabeto (telegráfico). **I** alfabeto telegrafico. **N** (telegraaf)alfabet. **P** alfabet (telegraficzny). **S** telegrafalfabet. (721)

alphabetic

1. **alphabetic telegraphy** : → *telegraphy 1*

alphageometric

1. **alphageometric** : describing a method of representing information by means of a limited number of simple geometric elements or alphanumeric characters which can have different positions, dimensions or colours. ★ alphagéométrique → *alphagéométrique 1.* **R** буквенно-графический. (723)

alphanumeric

1. **alphanumeric** : describing a method of representing information by means of a limited number of individual elements which take the form of letters, digits and other symbols. ★ alphanumérique → *alphanumérique 1.* **R** буквенно-цифровой. (723)
2. **alphanumeric keyboard** : → *keyboard 1*

alphaphotographic

1. **alphaphotographic** : describing a method of representing information which is able to show alphanumerics and still images of television quality. ★ alphaphotographique → *alphaphotographique 1.* **R** буквенно-фотографический. (723)

alterable

1. **electrically alterable store** : → *store 3*

alternate

1. **alternate mark inversion code** : → *code 2*
2. **alternate mark inversion signal** : → *signal 10*
3. **alternate mark inversion violation** : → *violation 1*
4. **alternate route** (*Syn.* alternative route) : → *route 2*
5. **modified alternate mark inversion code** : → *code 37*

alternating

1. **alternating** : applies to a periodic quantity of mean value zero. ★ alternatif → *alternatif 1.* R переменная; периодическая. D Wechsel-. E alterna. I alternata. N wissel-; alternerend. P przemienny. S växel-. (101)
2. **alternating component** : → *component 2*
3. **alternating component** (*Syn.* ripple content) : → *content 9*
4. **alternating light** : → *light 2*
5. **alternating voltage** : → *voltage 5*
6. **symmetrical (alternating) signal** : → *signal 233*

alternating current

1. **a.c. conversion factor** : → *factor 2*
2. **a.c. electrolytic capacitor** : → *capacitor 1*
3. **a.c. filter** : → *filter 1*
4. **alternating current** : a periodic current having a mean value zero.*i*~ . ★ courant alternatif → *courant alternatif 7.* R переменный ток. D Wechselstrom. E corriente alterna. I corrente alternata. N wisselstroom. P prąd przemienny. S växelström. (131)
5. **alternating current commutator machine** : → *machine 2*
6. **alternating current commutator motor** : → *motor 5*
7. **alternating current generator** : → *generator 1*
8. **alternating current motor** : → *motor 6*
9. **alternating current signalling** : → *signalling 2*
10. **alternating current system** : → *system 7*
11. **anode a.c. resistance** : → *resistance 2*
12. **direct a.c.(power) convertor** : → *convertor 13*
13. **electrode a.c. resistance** : → *resistance 16*
14. **electronic a.c. power controller** : → *controller 3*
15. **electronic a.c. (power) switch** : → *switch 17*
16. **(electronic) a.c. voltage convertor** : → *convertor 16*
17. **(electronic) a.c.(power) convertor** : → *convertor 17*
18. **(electronic)(power) a.c. conversion** : → *conversion 19*
19. **indirect a.c.(power) convertor** : → *convertor 28*
20. **single-phase a.c. motor vehicle** : → *vehicle 22*
21. **single-phase a.c. traction** : → *traction 9*
22. **three-phase a.c. motor vehicle** : → *vehicle 27*
23. **three-phase a.c. traction** : → *traction 14*
24. **turbine-type alternating current generator** : → *generator 41*

alternative

1. **alternative insert position** : → *position 1*
2. **alternative route** : → *route 2*
3. **alternative routing** : → *routing 2*
4. **alternative selection signals** : → *signal 11*
5. **alternative test method** : → *method 1*
6. **alternative traffic routing** : → *routing 3*

alternator

1. **internal angle of an alternator** : → *angle 33*
2. **main alternator** : an alternating current generator, driven by the internal combustion engine and supplying the traction motors. ★ alternateur principal → *alternateur 3.* R главный генератор переменного тока. D Hauptgenerator (Wechselstrom). E alternador principal. I alternatore principale. N hoofdwisselstroomgenerator. P prądnica główna prądu przemiennego. S växelströms huvudgenerator. (811)

altitude

1. **altitude of the apogee** : the altitude of the apogee above a specified reference surface serving to represent the surface of the Earth. ★ altitude de l'apogée → *altitude 1.* R высота апогея. D Höhe des Apogäums. E altitud del apogeo. I altitudine dell'apogeo. N apogeumhoogte. P wysokość apogeum. S apogeums höjd. (725)
2. **altitude of the perigee** : the altitude of the perigee above a specified reference surface serving to represent the surface of the Earth. ★ altitude du périgée → *altitude 2.* R высота перигея. D Höhe des Perigäums. E altitud del perigeo. I altitudine del perigeo. N perigeumhoogte. P wysokość perigeum. S perigeums höjd. (725)

aluminium

1. **all aluminium alloy conductor** : → *conductor 1*
2. **all aluminium conductor** : → *conductor 2*
3. **alloy reinforced aluminium conductor** : → *conductor 3*
4. **aluminium clad steel reinforced aluminium conductor** : → *conductor 4*
5. **aluminium clad steel reinforced aluminium conductor** : → *conductor 4*
6. **steel reinforced aluminium alloy conductor** : → *conductor 68*
7. **steel reinforced aluminium conductor** : → *conductor 69*

alychne

1. **alychne** : surface in tristimulus space that represents the locus of colour stimuli of zero luminance. *Note.* — This surface passes through the origin of the space. It intersects any chromaticity diagram in a straight line which is also called the "alychne" ; this line lies wholly outside the domain of chromaticities bounded by the spectrum locus and the purple boundary. ★ alychne → *alychne 1.* R алихна. D Alychne. E alychne. I alicne. N alychne. P alychne. S alykne. (845)

AM

1. **AM** (*Syn.* amplitude modulation) : → *modulation 2*

ambient

1. **ambient air temperature** : → *temperature 1*
2. **ambient air temperature** : → *temperature 2*
3. **ambient dose** : → *dose 6*
4. **ambient dose rate** : → *rate 3*
5. **ambient noise** : → *noise 1*
6. **ambient noise sidetone** : → *sidetone 1*
7. **ambient radiation** (*Syn.* background radiation) : → *radiation 5*
8. **ambient temperature** : → *temperature 3*
9. **ambient temperature (of a cell or battery)** : → *temperature 4*
10. **ambient thermostatic switch** : → *switch 2*

american

1. **(american) reference volume** : → *volume 1*
2. **(american) volume unit** : → *unit 2*

AMI

1. **AMI** (*Syn.* alternate mark inversion code) : → *code 2*
2. **AMI signal** (*Syn.* alternate mark inversion signal) : → *signal 10*
3. **AMI violation** (*Syn.* alternate mark inversion violation) : → *violation 1*
4. **modified AMI** (*Syn.* modified alternate mark inversion code) : → *code 37*

ammeter

1. **ammeter** : an instrument intended to measure the value of a current. ★ ampèremètre → *ampèremètre 1.* R амперметр. D Strom-Messgerät. E amperímetro. I ampermetro. N stroommeter; ampèremeter. P amperomierz. S amperemeter. (301)
2. **digital ammeter** : an instrument employing analogue-to-digital conversion, which measures the value of a current and provides the result in a digital form. ★ ampèremètre numérique → *ampèremètre 2.* R цифровой амперметр. D digitales Amperemeter. E amperímetro digital. I ampermetro numerico. N digitale ampèremeter. P amperomierz cyfrowy. S digital amperemeter. (303)

amortisseur

1. **amortisseur winding** (*Syn.* damping winding) : → *winding 19*

amount

1. **total cloud amount** : ratio of the sum of the solid angles subtended by clouds to the solid angle 2π steradians of the whole sky. *Note.* — The total cloud amount is frequently called fractional cloud cover in the USA. ★ nébulosité → *nébulosité 1.* R общее количество облачности. D Gesamtbewölkungsgrad. E factor de nubusidad. I nuvolosità. N bewolkingsgraad. P współczynnik zachmurzenia. S molnmängd. (845)

ampacity

1. **ampacity** (*Syn.* (continuous) current-carrying capacity) : → *capacity 9*

ampere

1. **ampere, A** (A) : SI unit of electric current. ★ ampère, A → *ampère 1.* (100)
2. **ampere per metre, A/M** (A/m) : SI unit of magnetic field. ★ ampère par mètre → *ampère 2.* (100)

ampere-conductor

1. **ampere-conductors** (of a distributed winding) : the product of the number of conductors round the periphery of the winding and the current in amperes circulating in these conductors. ★ ampères-conducteurs → *ampère-conducteur 1.* R амперпроводники распределенной обмотки. D Ampereleiter (einer verteilten Wicklung). E amperios conductores. I amper-fili. N ampèrestaven (van een verdeelde wikkeling). P przepływ uzwojenia rozłożonego. S antal ampereledare. (411)

ampere-hour

1. **ampere-hour meter** : → *meter 6*

ampere-turn

1. **ampere-turns** : the products of the number of turns of a coil or a winding, distributed or concentrated, and the current in amperes circulating in these turns. ★ ampères-tours → *ampère-tour 1.* R ампервитки. D Amperewindungen. E amperios vuelta. I amper-spire. N ampèrewindingen. P przepływ zezwoju lub cewki. S antal amperevarv. (411)

amplification

1. **amplification factor** : → *factor 6*
2. **current amplification** (*Syn.* current ratio) : → *ratio 23*
3. **power amplification** : the ratio under steady-state conditions of a small change of the output power to the corresponding change of the control power at specified load and operating conditions. ★ rapport d'amplification en puissance → *rapport 9.* R коэффициент усиления мощности. D Leistungsverstärkung. E factor de amplificación de potencia. I guadagno di potenza. N vermogensversterkingsfactor. P wzmocnienie mocowe; współczynnik wzmocnienia mocowego. S effektförstärkning. (431)
4. **voltage amplification** (*Syn.* voltage ratio) : → *ratio 102*

amplifier

1. **amplifier** : device used to increase the level of a signal by taking the necessary energy from an auxiliary source. *Note.* — One may distinguish voltage, power, torque, etc., amplifiers. ★ amplificateur → *amplificateur 1.* R усилитель. D Verstärker. E amplificador. I amplificatore. N versterker. P wzmacniacz. S förstärkare. (151,351)
2. **amplifier** : an active two-port device essentially designed to produce an output signal of greater power than that of the input signal. *Note.* — An amplifier may be designed for acting as a filter or for effecting other operations on signals, for example, limiting. ★ amplificateur → *amplificateur 2.* R усилитель. D Verstärker. E amplificador. I amplificatore. N versterker. P wzmacniacz. S förstärkare. (702)
3. **biased direct current amplifier** : a direct current amplifier designed to provide an amplified output signal only for that portion of an input signal exceeding a predetermined threshold value. ★ amplificateur à seuil pour courant continu → *amplificateur 7.* R пороговый усилитель постоянного тока. D vorgespannter Gleichstromverstärker. E amplificador de umbral de corriente continua. I amplificatore a soglia per corrente continua. N gelijkstroomversterker met drempel. P progowy wzmacniacz prądu stałego. S tröskelförstärkare för likström. (391)
4. **biased pulse amplifier** : a pulse amplifier designed to provide an amplified output pulse only for that portion of an input signal exceeding a predetermined threshold value. ★ amplificateur d'impulsions à seuil → *amplificateur 13.* R пороговый усилитель. D vorgespannter Impulsverstärker. E amplificador de umbral de impulsos. I amplificatore di impulsi a soglia. N pulsversterker met drempel. P progowy wzmacniacz impulsowy. S tröskelförstärkare. (391)
5. **bridger amplifier** : an amplifier connected to a feeder, intended to energize one or more other feeders. ★ amplificateur de dérivation → *amplificateur 9.* R ответвительный усилитель. (723)
6. **buffer amplifier** (*Syn.* buffer (stage)) : an amplifier specially designed to prevent variations of the characteristics of electric circuits connected to its output from affecting the input signal. ★ amplificateur séparateur → *amplificateur 29.* R буферный усилитель. D Trennverstärker; Puffer(-Stufe). E amplificador separador. I amplificatore separatore; (stadio) separatore. N bufferversterker. P wzmacniacz separacyjny. S buffertsteg. (702)
7. **charge amplifier** : an electronic amplifier designed to provide an output signal the amplitude of which is proportional to the input charge signal. ★ amplificateur de charges → *amplificateur 8.* R усилитель заряда. D ladungsempfindlicher Verstärker. E amplificador de cargas. I amplificatore di carica. N ladingsversterker. P wzmacniacz ładunkowy. S laddningsförstärkare. (391)
8. **chopper amplifier** : a direct current amplifier in which the input current (voltage) is transformed into a signal of predetermined frequency, amplified by an alternating current amplifier, and then retransformed into a direct current signal. ★ amplificateur à hacheur → *amplificateur 5.* R усилитель с модуляцией — демодуляцией. D Zerhackerverstärker. E amplificador troceador. I amplificatore vibratore a modulazione. N interruptorversterker; onderbrekerversterker. P wzmacniacz z przetwornikiem. S chopperförstärkare. (391)
9. **conference amplifier** : a device for connecting a subscriber's telephone line with several extension lines in parallel with this line without degrading transmission. ★ dispositif amplificateur pour conférence → *dispositif 10.* R конференц-усилитель. D Konferenzverstärker. E amplificador de conferencia. I dispositivo amplificatore per conferenza. N telefonische vergaderschakeling. P wzmacniacz konferencyjny. S ..... (722)
10. **direct current amplifier** : an electronic amplifier designed to provide, within the limits of its normal operating characteristics, an output quantity which represents the input current (voltage), even when the frequency of this current (voltage) approaches zero. ★ amplificateur pour courant continu → *amplificateur 26.* R усилитель постоянного тока. D Gleichstromverstärker. E amplificador de corriente continua. I amplificatore per corrente continua. N gelijkstroomversterker. P wzmacniacz prądu stałego. S likströmsförstärkare. (391)
11. **distribution amplifier** (*Syn.* spur amplifier) : → *amplifier 28*
12. **electronic amplifier** : an electronic apparatus in which a parameter of the output signal depends in a specified way on a parameter (which may be different) of the input signal and contains greater power or energy. ★ amplificateur électronique → *amplificateur 14.* R электронный усилитель. D elektronischer Verstärker. E amplificador electrónico. I amplificatore elettronico. N (elektronische) versterker. P wzmacniacz elektroniczny. S elektronisk förstärkare. (391)
13. **ideal amplifier** : an active two-port network in which the output power is greater than the input power and in which the ratio of the instantaneous values of the output to the input voltages or currents is fixed. ★ amplificateur idéal → *amplificateur 15.* R идеальный усилитель. D idealer Verstärker. E amplificador ideal. I amplificatore ideale. N ideale versterker. P wzmacniacz idealny. S ideal förstärkare. (131)
14. **linear direct current amplifier** : a direct current amplifier the output quantity of which is a linear function of the input quantity. ★ amplificateur linéaire pour courant continu → *amplificateur 17.* R линейный усилитель постоянного тока. D linearer Gleichstromverstärker. E amplificador lineal de corriente continua. I amplificatore lineare per corrente

continua. N lineare gelijkstroomversterker. P linearny wzmacniacz prądu stałego. S linjär likströmförstärkare. (391)

15. **linear pulse amplifier** (*Syn.* proportional amplifier) : a pulse amplifier the output amplitude of which is proportional to the input pulse amplitude. ★ amplificateur linéaire d'impulsions → *amplificateur 16.* R линейный импульсный усилитель. D linearer Impulsverstärker; Linearverstärker. E amplificador lineal de impulsos; amplificador proporcional. I amplificatore lineare di impulsi. N lineaire pulsversterker; proportionele versterker. P linearny wzmacniacz impulsowy; wzmacniacz linearny. S linjär förstärkare. (391)
16. **logarithmic direct current amplifier** : a direct current amplifier the output quantity of which is a logarithmic function of the input quantity. ★ amplificateur logarithmique pour courant continu → *amplificateur 19.* R логарифмический усилитель постоянного тока. D logarithmischer Gleichstromverstärker. E amplificador logaritmico de corriente continua. I amplificatore logaritmico per corrente continua. N logaritmische gelijkstroomversterker. P logarytmiczny wzmacniacz prądu stałego. S logaritmisk likströmsförstärkare. (391)
17. **logarithmic pulse amplifier** : a pulse amplifier the output amplitude of which is a logarithmic function of the input pulse amplitude. ★ amplificateur logarithmique d'impulsions → *amplificateur 18.* R логарифмический импульсный усилитель. D logarithmischer Impulsverstärker. E amplificador logaritmico de impulsos. I amplificatore logaritmico di impulsi. N logaritmische pulsversterker. P logarytmiczny wzmacniacz impulsowy. S logaritmisk pulsförstärkare. (391)
18. **low-noise amplifier** : an amplifier at the input of an amplifying chain, specially designed to introduce the minimum possible internal noise for a given gain and to obtain the maximum possible signal-to-noise ratio at the output. ★ amplificateur à faible bruit → *amplificateur 4.* R усилитель с малым уровнем шума. D rauscharmer Verstärker; Kleinsignalverstärker. E amplificador de bajo ruido. I amplificatore a basso rumore. N lage-ruisversterker. P wzmacniacz o małych szumach. S lågbrusig förstärkare. (702)
19. **magnetic amplifier** : amplifier in which use is made of the saturation properties of a magnetic core. *Note.* — The magnetic amplifier may be used as a current controlling device. ★ amplificateur magnétique → *amplificateur 20.* R магнитный усилитель. D Magnetverstärker; Transduktor. E amplificador magnético. I amplificatore magnetico. N magnetische versterker. P wzmacniacz magnetyczny. S magnetisk förstärkare. (351,431)
20. **multiband amplifier with n inputs** (for MATV or CATV) : amplifier with n inputs, each corresponding to a specified broadcasting band. ★ amplificateur (multibandes) à n entrées → *amplificateur 22.* R многодиапазонный усилитель с n-входами. (723)
21. **multi-channel amplifier** (for MATV or CATV) : amplifier designed to be used for several sound and vision broadcasting channels, generally situated in the same broadcasting band. ★ amplificateur de groupe de canaux → *amplificateur 11.* R многоканальный усилитель. (723)
22. **operational amplifier** : amplifier with high gain, high input impedance and low output impedance. *Note.* — By adding external elements to an operational amplifier, one can realize summing circuits, integrating circuits and more generally any linear transfer function or any non-linear transformation law. ★ amplificateur opérationnel → *amplificateur 25.* R операционный усилитель. D Operationsverstärker; Rechenverstärker. E amplificador operacional. I amplificatore operazionale. N rekenversterker. P wzmacniacz operacyjny. S operationsförstärkare. (351)
23. **proportional amplifier** (*Syn.* linear pulse amplifier) : → *amplifier 15*
24. **pulse amplifier** : an electronic amplifier designed to provide within the limits of its normal operating characteristics a single output pulse for each input pulse. ★ amplificateur d'impulsions → *amplificateur 12.* R импульсный усилитель. D Impulsverstärker. E amplificador de impulsos. I amplificatore di impulsi. N pulsversterker. P wzmacniacz impulsowy. S pulsförstärkare. (391)
25. **rotary amplifier** : a machine which is used to produce a power output by amplifying an input signal. ★ amplificateur rotatif → *amplificateur 28.* R электромашинный усилитель. D Verstärkermaschine. E amplificador rotativo. I amplificatore rotante. N versterkermachine; roterende versterker. P wzmacniacz elektromaszynowy. S roterande förstärkare. (411)
26. **single channel amplifier** : → *channel 44*
27. **single-input multiband amplifier** : amplifier with a single input designed to be used for several specified broadcasting bands. ★ amplificateur (multibandes) à une entrée → *amplificateur 23.* R многодиапазонный усилитель с одним входом. (723)
28. **spur amplifier** (*Syn.* line extender; distribution amplifier) : an amplifier to compensate for attenuation in a spur feeder. ★ amplificateur de distribution → *amplificateur 10.* R усилитель домовой распределительной сети. (723)
29. **vibrating capacitor amplifier** : a chopper amplifier utilizing a vibrating capacitor for signal transformation prior to amplification. ★ amplificateur à condensateur vibrant → *amplificateur 3.* R усилитель с динамическим конденсатором. D Schwingkondensatorverstärker. E amplificador de condensador vibrante. I amplificatore a condensatore vibrante. N versterker met trilcondensator. P wzmacniacz z kondensatorem dynamicznym. S förstärkare med vibrerande kondensator. (391)
30. **wide-band amplifier** (for MATV or CATV) : amplifier designed to be used over the whole of the frequency band which may be used for MATV or CATV. ★ amplificateur à large bande → *amplificateur 6.* R широкополосный усилитель. (723)

amplifying

1. **amplifying semiconductor detector** : → *semiconductor detector 1*

amplitude

1. **amplitude** : the peak value of a sinusoidal quantity. ★ amplitude → *amplitude 1.* R амплитуда. D Amplitude. E amplitud. I ampiezza. N amplitude. P amplituda. S amplitud. (101)
2. **amplitude** (of a signal) (*Syn.* envelope (of a signal)) : the modulus $A(t)$ of the analytic signal corresponding to the real signal $f(t)$, written in the form :

$$f(t) + j\,g(t) = A(t)\,e^{j\varphi(t)}$$

Note. — When a modulated signal is represented by $B(t)\cos[2\pi ft + \theta(\tau)]$ in which f is substantially larger than the highest frequency of any significant spectral component of the modulating signal, the envelope is approximately represented by the curve $y = \pm B(t)$. ★ amplitude → *amplitude 3.* R амплитыда (сигнала); огибающая (сигнала). D Amplitude (eines Signals); einhüllende (eines Signals). E amplitud (de una señal); envolvente (de una señal). I ampiezza (di un segnale); inviluppo (di un segnale). N amplitude (van een signaal); omhullende. P amplituda (sygnału); obwiednia. S amplitud. (702)

3. **amplitude/amplitude characteristic** : → *characteristic 2*
4. **amplitude/amplitude distortion** : → *distortion 1*
5. **amplitude analyzer** : → *analyzer 1*
6. **amplitude demodulation** : → *demodulation 1*
7. **amplitude discriminator** : → *discriminator 1*
8. **amplitude discriminator** : → *discriminator 2*
9. **amplitude distortion** (*Syn.* amplitude/amplitude distortion) : → *distortion 1*
10. **amplitude/frequency characteristic** : → *characteristic 3*
11. **amplitude/frequency distortion** : → *distortion 3*
12. **amplitude modulated signal generator** : → *generator 2*
13. **amplitude modulation** : → *modulation 2*
14. **amplitude modulation distortion** : → *distortion 4*
15. **amplitude modulation factor** : → *factor 7*
16. **amplitude of fluctuation of the luminous flux** (of a source run on alternating current) : relative amplitude of the periodic fluctuation of the luminous flux as measured by the ratio of the difference between the maximum and the minimum luminous flux to the sum of both these values

$$\left(\frac{\Phi_{max} - \Phi_{min}}{\Phi_{max} + \Phi_{min}}\right)$$

Notes. 1 — This ratio is usually expressed in per cent and is then known under the expression per cent flicker which, however,

should be deprecated. *2* — Another means sometimes used by the lighting industry to characterize the fluctuation in light output is flicker index, which is defined by the ratio of two areas deduced from the diagram representing the variation of the instantaneous flux over a period of time ; the area of the diagram above the average value is divided by the total area under the curve (this total area is the product of the average value and the given period of time). ★ amplitude de fluctuation du flux lumineux → *amplitude 5.* R амплитуда колебаний светового потока (источника, питаемого переменным током). D Amplitude der Lichtstromschwankung (einer Lichtquelle im Wechselstrombetrieb); Flicker. E amplitud de fluctuación del flujo luminoso. I ampiezza di fluttuazione del flusso luminoso. N flikkermodulatieamplitude. P współczynnik tętnienia strumienia świetlnego. S flimmerfaktor. (845)

17. **amplitude permeability** : → *permeability 3*
18. **(amplitude) reflection factor** : → *factor 8*
19. **(amplitude) reflection factor** : → *factor 9*
20. **amplitude response** (*Syn.* square-wave response) : → *response 19*
21. **amplitude shift keying** : → *keying 1*
22. **amplitude shift modulation** (*Syn.* amplitude shift keying) : → *keying 1*
23. **amplitude sound spectrum** : → *spectrum 2*
24. **amplitude spectrum** : → *spectrum 3*
25. **(amplitude) transmission factor** : → *factor 10*
26. **constant amplitude recording** : → *recording 1*
27. **differential amplitude distortion** : → *distortion 25*
28. **direct current amplitude discriminator** : → *discriminator 4*
29. **envelope of an amplitude modulated signal** : → *envelope 9*
30. **half amplitude recovery time** : → *time 71*
31. **normalized complex wave amplitude** : at a given point in a transmission line or waveguide, the complex ratio of a specified field vector component in an electromagnetic wave in a given mode to the same field vector component in a reference wave in the same mode. *Notes. 1* — For a mode of propagation, the reference wave may be one that carries unit power and in which a specified field component has zero phase at a specified point in the reference transverse cross-section. Usually, the transverse component of the electric field vector at the center point of the reference cross-section is chosen for that purpose. *2* — For an evanescent mode, the power carried by the wave is zero. One can then make the integral of the longitudinal complex Poynting vector, over the reference cross-section, equal to the imaginary unit, or use any other well-defined normalization. *3* — It is preferable to consider separately the modes of propagation and the evanescent modes because the normalized complex wave amplitude concept is mostly applied to the former. *4* — In rare cases where the scattering matrix has to be extended to evanescent modes, it is better to give the user freedom to choose and define his own reference waves. ★ amplitude complexe normalisée → *amplitude 4.* R нормализованная амплитуда комплексной волны (не рекомендуется). D normierte komplexe Wellenamplitude. E amplitud compleja normalizada de una onda. I ampiezza complessa normalizzata. N genormeerde complexe golfamplitude. P amplituda unormowana. S normerad vågamplitud. (726)
32. **phase/amplitude distortion** : → *distortion 57*
33. **pulse amplitude modulation** : → *modulation 49*
34. **(pulse) amplitude selector** : → *selector 7*
35. **quadrature (amplitude) modulation** : → *modulation 57*
36. **recording/reproducing overall amplitude/frequency response** : → *response 10*
37. **reproducing electrical amplitude/frequency response** : → *response 11*
38. **r.m.s. amplitude permeability** ($\mu_{a,eff}$, $\mu_{a,rms}$) : the relative permeability obtained from the peak magnetic flux density divided by $\sqrt{2}$ and the r.m.s. value of the applied magnetic field strength at a stated peak value of the flux density, when the flux density is varying sinusoidally with time with an average value of zero and the material is initially in a specified neutralized state. ★ perméabilité d'amplitude efficace → *perméabilité 16.* R действующее значение амплитудной магнитной проницаемости. D Effektivwert- Amplitudenpermeabilität. E permeabilidad de amplitud eficaz. I permeabilità d'ampiezza efficace. N effectieve amplitudepermeabiliteit. P przenikalność magnetyczna amplitudowa skuteczna. S effektivvärdepermeabilitet. (221)

amplitude-to-time

1. **amplitude-to-time converter** : → *converter 1*

analogue

1. **analog system** (*Syn.* analogue system) : → *system 9*
2. **analogue carrier transmission** (*Syn.* multichannel carrier transmission) : → *transmission 42*
3. **analogue detector** : → *detector 2*
4. **analogue error detection** (*Syn.* (signal) quality detection) : → *detection 13*
5. **analogue (measuring) instrument** : → *measuring instrument 1*
6. **analogue phase shifter** : → *phase-shifter 1*
7. **analogue repeater** : → *repeater 1*
8. **analogue signal** : → *signal 14*
9. **analogue signal** : → *signal 15*
10. **analogue signalling** : → *signalling 3*
11. **analogue switching** : → *switching 1*
12. **analogue system** : → *system 9*
13. **(analogue) temporal compression** : → *compression 1*
14. **(analogue) temporal expansion** : → *expansion 1*
15. **(analogue) time compression** (*Syn.* (analogue) temporal compression) : → *compression 1*
16. **analogue transmission** : → *transmission 3*

analogue-to-digital

1. **analog-to-digital converter** : → *converter 2*
2. **analogue-to-digital conversion** : → *conversion 3*

analysis

1. **activation analysis** : a method of chemical analysis based on the identification and measurement of radiation specific to the radionuclides formed by irradiation with neutrons. ★ analyse par activation → *analyse 13.* R активационный анализ. D Aktivierungsanalyse. E análisis por activación. I analisi per attivazione. N activatie-analyse. P analiza aktywacyjna. S aktiveringsanalys. (881)
2. **carbon-type analysis** : the composition of a mineral insulating oil expressed in terms of ratio of carbon atoms in aromatic, naphthenic and paraffinic structures of the oil molecules. ★ analyse de type de carbone → *analyse 7.* R углеродный анализ. D Kohlenstoffanalyse. E análisis del tipo de carbono. I analisi di tipo di carbonio. N koolstofstructuuranalyse. P analiza typu węgla. S ..... (212)
3. **category analysis** : the processing of information defining the type of subscriber terminal equipment and possible constraints in its use and traffic possibilities. ★ analyse de catégorie → *analyse 3.* R анализ категории. D Kategorie-Analyse. E análisis de categoría. I analisi della classe di servizio. N analyse voor abonneegegevens. P analiza kategorii. S kategorianalys. (714)
4. **failure analysis** : the logical, systematic examination of a failed item to identify and analyze the failure mechanism, the failure cause and the consequences of failure. ★ analyse de défaillance → *analyse 4.* R анализ отказов. D Ausfallanalyse. E análisis de fallos. I analisi di guasto. N storinganalyse. P analiza uszkodzeń. S felanalys. (191)
5. **fault analysis** : the logical, systematic examination of an item to identify and analyze the probability, causes and consequences of potential faults. ★ analyse des pannes → *analyse 11.* R анализ (существенных) неисправностей. D Fehleranalyse. E análisis de averías. I analisi di avaria. N defect-analyse. P analiza niezdatności. S felanalys. (191)
6. **fault modes and effects analysis** (*Syn.* FMEA (abbreviation)) : a qualitative method of reliability analysis which involves the study of the fault modes which can exist in every subitem of the item and the determination of the effects of each fault mode on other subitems of the item and on the required functions of the item. ★ analyse des modes de panne et de leurs effets → *analyse 10.* R анализ видов и последствий (существенных) неисправностей. D Ausfalleffektanalyse; FMEA (Abkürzung). E análisis de los modos de avería y sus efectos; AMAE (abreviatura). I analisi dei modi di avaria ed effetti relativi. N analyse van defectmodi en hun gevolgen. P analiza rodzajów i skutków niezdatności. S feleffektanalys. (191)

7. **fault modes, effects and criticality analysis** (*Syn.* FMECA (abbreviation)) : a qualitative method of reliability analysis which involves a fault modes and effects analysis together with a consideration of the probability of their occurrence and of the ranking of the seriousness of the faults. ★ analyse des modes de panne, de leurs effets et de leur criticité → *analyse 9.* R анализ видов, последствий и критичности неисправностей. D Ausfalleffekt-und Ausfallkritizitätsanalyse; FMECA (Abkürzung). E análisis de los modos de avería, sus efectos y su criticidad. I analisi dei modi di avaria ed effetti e criticità relativi. N analyse van defectmodi en hun gevolgen en ernst. P analiza rodzajów, skutków i krytyczności niezdatności. S feleffekts- och kritikalitetsanalys. (191)
8. **fault tree analysis** (*Syn.* FTA (abbreviation)) : an analysis to determine which fault modes of the subitems or external events, or combinations thereof, may result in a stated fault mode of the item, presented in the form of a fault tree. ★ analyse par arbre de panne → *analyse 14.* R анализ графа (существенных) неисправностей. D Fehlerbaumanalyse; FTA (Abkürzung). E análisis en árbol de averías. I analisi ad albero delle avarie. N defectenboom-analyse. P analiza rodzajów niezdatności metodą schematu rozgałęzionego (drzewa). S felträdsanalys. (191)
9. **network analysis** : determination of the state of a network (voltages, currents, power). *Note.* — Network analysis can be by the node method, the mesh method, or the cutset method. ★ analyse de réseau → *analyse 6.* R анализ схемы. D Netzwerkanalyse. E análisis de una red. I analisi di una rete. N netwerkanalyse. P analiza układu. S nätanalys. (131)
10. **stress analysis** : determination of the physical, chemical or other stresses an item experiences under given conditions. ★ analyse des contraintes → *analyse 8.* R анализ нагрузок. D Beanspruchungsanalyse. E análisis de esfuerzos; análisis de solicitaciones. I analisi delle sollecitazioni. N belastingsonderzoek. P analiza narażeń. S stressanalys. (191)

analytic

1. **analytic signal** : → *signal 16*

analyzer

1. **amplitude analyzer** : an analyser designed to determine the distribution function of a group of signals in terms of their amplitude. ★ analyseur d'amplitude → *analyseur 4.* R амплитудный анализатор. D Amplitudenanalysator. E analizador de amplitud. I analizzatore di ampiezza. N pulshoogteanalysator. P analizator amplitudy. S pulshöjdsanalysator. (391,881)
2. **analyzer** (for signals) : a sub-assembly designed to determine the distribution function of a group of signals in terms of one or more of their characteristics (amplitude, duration, etc.). ★ analyseur → *analyseur 1.* R анализатор. D Analysator. E analizador. I analizzatore. N analysator. P analizator. S analysator. (391,881)
3. **multichannel analyzer** : an analyser with more than one channel, usually containing a sufficient number of channels to determine a distribution function of a group of signals by sorting the pulses into the various channels according to one of their characteristics (amplitude, duration, etc.). ★ analyseur multicanal → *analyseur 13.* R многоканальный анализатор. D Vielkanalanalysator. E analizador multicanal. I analizzatore multicanale. N meervoudige analysator; veelkanalige analysator. P analizator wielokanałowy. S mångkanalsanalysator. (391)
4. **single-channel analyzer** : an analyser (consisting of a pulse selector) used for a point by point determination of a distribution function. ★ analyseur monocanal → *analyseur 12.* R одноканальный анализатор. D Einkanalanalysator. E analizador monocanal. I analizzatore monocanale. N eenkanaalsanalysator. P analizator jednokanałowy. S enkanalsanalysator. (391)
5. **sound analyzer** : apparatus for the determination of the spectrum of a sound. ★ analyseur de son → *analyseur 6.* R анализатор звука. D Schallanalysator. E analizador de sonido. I analizzatore di suoni. N geluid(s)spectrometer; geluidanalysator. P analizator dźwięku. S ljudanalysator. (801)
6. **spectrum analyzer** : an instrument used to display the amplitude or power distribution of a signal as a function of frequency. ★ analyseur de spectre → *analyseur 7.* R анализатор спектра. D Spektrumanalysator. E analizador de espectro. I analizzatore di spettro. N spectrumanalysator. P analizator widma. S spektrumanalysator. (303)
7. **time interval analyzer** : an analyser designed to determine the distribution function of intervals of time between events. ★ analyseur d'intervalles de temps → *analyseur 10.* R временной анализатор. D Zeitintervallanalysator. E analizador de intervalos de tiempo. I analizzatore di tempi. N analysator voor tijdintervallen. P analizator przedziałów czasowych. S intervallanalysator. (391)
8. **time-of-flight analyzer** : an analyser designed to determine the distribution function of the times-of-flight of particles in a beam in order to obtain the energy distribution of the particles. ★ analyseur de temps de vol → *analyseur 8.* R анализатор по времени пролета. D Flugzeitanalysator. E analizador de tiempo de vuelo. I analizzatore di tempi di volo. N looptijdanalysator. P analizator czasu przelotu. S löptidsanalysator. (391)
9. **wave analyzer** : a tuned voltmeter used to measure the amplitude of a signal in a restricted frequency band which is tunable over a specified range of frequencies. ★ analyseur d'onde → *analyseur 11.* R анализатор формы сигнала. D Schwingungsanalysator. E analizador de onda. I analizzatore d'onda. N golfvormanalysator. P analizator fali. S våganalysator. (303)
10. **whole-body gamma spectrum analyzer** : a measuring assembly including a whole-body radiation meter and an amplitude analyser, designed to identify radionuclides present in the human body and to evaluate their respective activities. *Note.* — This is commonly referred to as "whole-body counter". ★ anthroporadiamètre à analyseur d'amplitude → *anthroporadiamètre 2.* R спектрометр излучений человека. D Ganzkörper-Gammaspektrometer. E medidor de radiación total con analizador de amplitud. I radiametro biologico ad analizzatore di ampiezza. N spectrumanalysator voor lichaamsactiviteiten. P spektrometr gamma całego ciała. S helkropps(gamma)spektrometer. (392)

analyzing

1. **(radiation) multi-parameter analyzing assembly** : a radiation measuring assembly intended to record simultaneously the information delivered by its radiation detectors, and to analyse this information as a function of two or more parameters in order to establish correlations. The assembly often includes digital data processing equipment. ★ ensemble d'analyse multiparamétrique (de rayonnement) → *ensemble 3.* R прибор для многопараметрового анализа (ионизирующих излучений). D Anordnung zur Mehrparameter-(Strahlungs-) Analyse. E conjunto de análisis multiparamétrico (de radiación). I insieme di analisi multiparametrica (di radiazione); complesso di analisi multiparametrica (di radiazione). N multiparameteranalysator; veelparameteranalysator; opstelling voor meervoudige analyse. P urządzenie do wieloparametrowej analizy promieniowania. S multiparameteranalysator. (391)

anchor

1. **anchor** : a device, usually buried in the ground, so installed as to provide a firm point of attachment for resisting uplift. ★ ancrage → *ancrage 1.* R анкер. D Anker. E muerto. I amarro. N (tui)anker. P zakotwienie. S förankring. (466)
2. **anchor clamp** : → *clamp 2*
3. **anchor rod** : → *rod 1*
4. **conductor rail anchor** : a device for anchoring a conductor rail to prevent longitudinal movement. ★ ancre de rail conducteur → *ancre 1.* R приспособление для анкеровки контактного рельса. D Stromschienenverankerung. E ancla de rail conductor. I dispositivo di ancoraggio (della rotaia di contatto). N stroomrailverankering. P kotew trzeciej szyny. S strömskeneförankring. (811)

anechoic

1. **anechoic chamber** : → *chamber 1*
2. **anechoic room** (*Syn.* free-field room) : → *room 8*

anemometer

1. **ionized-gas anemometer** : an assembly designed to measure the velocity of gas and comprising an ionizing radiation source included in an ionization chamber through which the gas studied is flowing, the value of the velocity being determined from the electric current flowing through the chamber. ★ anémomètre à ionisation → *anémomètre 1.*

R ионизационный радиоизотопный анемометр. D Anemometer nach der Gasionisierungsmethode. E anemómetro para gases ionizados. I anemometro a ionizzazione. N anemometer met gasionisatie. P przepływomierz gazu zjonizowanego. S gashastighetsmätare av jonisationstyp. (392)

angiography

1. **angiography** : the process of making radiographs to delineate blood or lymphatic vessels within the body, by means of an injected liquid contrast medium. Examples : venography, splenography, aortography. ★ angiographie → *angiographie 1.* R ангиография. D Angiographie. E angiografía. I angiografia. N angiografie. P angiografia. S angiografi. (881)

angle

1. **acceptance angle** : half the vertex angle of that cone within which optical power may be coupled into bound modes of an optical fibre. *Note.* — Acceptance angle is a function of position on the entrance face of the core when the refractive index is a function of radius in the core. In that case, it is :

$$\arcsin [n^2(r) - n_2^2]^{1/2}$$

where $n(r)$ is the refractive index and n_2 is the minimum refractive index of the cladding. *2* — Power may be coupled into leaky modes at angles exceeding the acceptance angle. ★ angle d'admission → *angle 3.* R угол приема. D Akzeptanz-Winkel. E ángulo de admisión. I angolo di accettanza. N acceptatiehoek. P kąt wejścia. S acceptansvinkel. (731)

2. **angle modulation** : → *modulation 6*

3. **angle of deviation between two e.m.f.'s** : the phase difference between the e.m.f. of an alternator taken as a reference and that of another alternator or that of an infinite bus. ★ écart angulaire entre deux f.é.m. → *écart 3.* R фазовый угол генератора. D Gesamtpolradwinkel zwischen zwei Spannungsquellen. E desviación angular entre dos f.e.m.. I scarto angolare fra due f.e.m.. N fasehoek tussen twee e.m.k.'s. P kąt rozchylenia dwóch wektorów SEM. S fasvinkelskillnad. (603)

4. **angle of flow** : that part of an alternating voltage cycle, expressed as an angle, during which current flows. ★ angle de passage → *angle 13.* R угол прохождения тока. D Flußwinkel. E ángulo de paso. I angolo di conduzione. N geleidingshoek. P kąt przepływu. S arbetsvinkel. (531)

5. **angle of incidence** : at a point on a surface, the acute angle between the normal to this surface and the direction of propagation of an incident wave. ★ angle d'incidente → *angle 29.* D Einfallswinkel. P kąt padania. (705)

6. **angle of incidence** : the angle between an incident ray and the normal to a reflecting or refracting surface. ★ angle d'incidence → *angle 28.* R угол падения. D Einstrahlwinkel. E ángulo de incidencia. I angolo di incidenza. N invalshoek. P kąt padania. S infallsvinkel. (731)

7. **angle of overlap** : the duration of commutation between two principal arms expressed in angular measure in the case where the two arms carry current simultaneously. ★ angle d'empiètement → *angle 26.* R угол перекрытия. D Überlappungswinkel. E ángulo de recubrimiento; ángulo de conmutación. I angolo di sovrapposizione; angolo di commutazione. N overlappingshoek; commutatiehoek. P kąt komutacji. S överlappningsvinkel. (551,811)

8. **angle of shade** (*Syn.* shielding angle (USA)) : the angle between the vertical plane through the earth wire and a plane through the earth wire and the conductor to be protected against lightning strokes. ★ angle de protection → *angle 15.* R угол молниезащиты. D Erdseilschutzwinkel. E angulo de protección del cable de tierra. I angolo di protezione. N beschermingshoek. P kąt ochrony odgromowej. S skyddsvinkel. (466)

9. **angle support** : → *support 1*

10. **angle support** (*Syn.* tension support) : → *support 28*

11. **anode angle** (*Syn.* target angle) : → *angle 55*

12. **beam angle** : the solid angle of the cone-shaped beam of electrons emerging from the crossover point. ★ angle de faisceau → *angle 10.* R угол расхождения пучка. D Strahlöffnungswinkel. E ángulo del haz. I apertura del fascio elettronico. N apertuur van een elektronenbundel. P kąt zbieżności wiązki. S strålvinkel. (531)

13. **Brewster angle** : an angle of incidence on a specular surface separating two perfect dielectric media such that the reflection factor is zero for a wave which has its electric flux density vector in the plane of incidence. *Notes. 1* — In radio, the term Brewster angle is often used for the complement of the angle defined above. *2* — For propagation from a medium of refractive index n_1, to a medium of refractive index n_2, Brewster angle is $\arctan (n_2/n_1)$. ★ angle de Brewster → *angle 4.* D Brewster-Winkel. P kąt Brewstera. (705,731)

14. **Brewster angle incidence** : → *incidence 3*

15. **cathode tip angle** : angle between the cathode tip and the axis of the cathode. *Note.* — A total angle, which is double the tip angle, is usually considered. ★ angle de pointe de la cathode → *angle 14.* R угол заточки катода. D Kathodenspitzenwinkel. E ángulo de punta del cátodo. I angolo di punta del catodo. N conushoek van de kathodepunt. P kąt wierzchołka katody. S katodspetsvinkel. (841)

16. **characteristic angle** : for a measuring relay, the angle between the phasors representing two of the relay's input energizing quantities which is used for the declaration of the performance of the relay. ★ angle caractéristique → *angle 1.* R характеристический угол. D charakteristischer Winkel. E ángulo característico. I angolo caratteristico. N kenmerkende hoek. P kąt charakterystyczny. S karakteristisk vinkel. (446)

17. **circuit angle** : in a rectifier connection, the phase angle between the peak of the line to neutral voltage on the a.c. line side and the simultaneous or next peak of the unsmoothed direct voltage at zero current delay angle. ★ angle de couplage → *angle 6.* R фазовый угол схемы. D Schaltungswinkel. E ángulo de acoplamiento. I angolo del circuito. N stroomkringhoek. P kąt fazowy (obwodu prostowniczego). S kopplingsvinkel. (551)

18. **critical angle** : the greatest angle of incidence for which a wave propagating in a homogeneous medium of relatively high refractive index strikes an interface with a medium having a lower refractive index, and for which refraction is just possible. *Note.* — When light propagates in a homogeneous medium of relatively high refractive index (n_{high}) onto a planar interface with a homogeneous material of lower index (n_{low}), the critical angle is defined by :

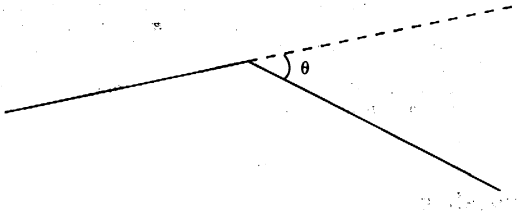
$$\arcsin (n_{low}/n_{high})$$

★ angle limite → *angle 36.* R критический угол. D Grenzwinkel (für Totalreflexion). E ángulo crítico. I angolo critico. N grenshoek. P kąt graniczny. S kritisk vinkel. (731)

19. **current delay angle** : the time expressed in angular measure by which the starting instant of current conduction is delayed by phase control. ★ angle de retard → *angle 18.* R угол задержки включения; угол управления; угол управления. D Stromverzögerungswinkel. E ángulo de retardo de la corriente. I angolo di ritardo della corrente. N vertragingshoek. P kąt opóźnienia prądu. S styrvinkel. (551)

20. **current delay angle** : the time expressed in angular measure by which the starting instant of current conduction is delayed by phase control. ★ angle de retard du courant → *angle 20.* R угол задержки включения. D Verzögerungswinkel. E ángulo de retardo de corriente. I angolo di ritardo della corrente. N vertragingshoek. P kąt opóźnienia prądu. S styrvinkel. (811)

21. **cut-off angle** (of a luminaire) : angle, measured up from nadir, between the vertical axis and the first line of sight at which the lamps and the surfaces of high luminance are not visible. ★ angle de défilement → *angle 7.* R угол прямого выхода (излучения светильника). D Abschirmwinkel (einer leuchte). E ángulo de desenfilado. I angolo di defilamento. N afschermhoek. P kąt wypromieniowania bezpośredniego. S utstrålningsvinkel. (845)



22. **delay angle** : the phase angle by which the starting instant of current conduction is delayed by phase control. *Note.* — The delay angle can be either constant or variable and is not necessarily intended to be the same for positive and negative half cycles. ★ angle de retard → *angle 17.* R угол задержки. D Stromverzögerungswinkel. E ángulo de retardo; ángulo de retraso. I angolo di ritardo. N vertragingshoek. P kąt opóźnienia. S fördröjningsvinkel. (161)

23. **delay angle** (*Syn.* phase angle) : → *angle 46*

24. **dielectric loss angle** : the value of arctan of the dielectric dissipation factor. ★ angle de pertes diélectriques → *angle de pertes 2.* R угол диэлектрических потерь. D dielektrischer Verlustwinkel. E ángulo de pérdidas dieléctricas. I angolo di

perdita dielettrica. N diëlektrische verlieshoek. P kąt strat dielektrycznych. S förlustvinkel. (212,705)

25. **entrance angle** (of a retroreflector) (β) : angle characterizing the angular position of the retroreflector with respect to the direction of the incident light. *Note.* — For a plane retroreflector, the entrance angle corresponds generally to the angle of incidence. ★ angle d'éclairage → *angle 24.* R угол освещения (световозвращающего отражателя). D Lichteinfallswinkel (eines Retroreflektors). E ángulo de iluminación. I angolo di illuminazione. N invalshoek. P kąt oświetlenia. S infallsvinkel. (845)
26. **extinction angle** : the time expressed in angular measure between the moment when the current of the arm falls to zero and the moment when the arm is required to withstand off-state voltage. ★ angle d'extinction → *angle 27.* R угол выключения. D Löschwinkel. E ángulo de extinción. I angolo d'estinzione. N doofhoek. P kąt gaśnięcia. S släckvinkel. (551)
27. **flying angle support** : → *support 10*
28. **grazing angle** : the complement of the angle of incidence. *Note.* — The use of the term angle of incidence for grazing angle is deprecated. ★ angle d'inclinaison → *angle 30.* D Erhebungswinkel; Glanzwinkel. P kąt dopełniający. (705)
29. **groove angle** : the included angle between the two sidewalls of the groove of a disk measured in a radial plane perpendicular to the disk surface. ★ angle d'ouverture du sillon → *angle 32.* R угол раскрытия канавки. D Öffnungswinkel der Rille. E ángulo de abertura del surco. I angolo di apertura del solco. N groefhoek. P kąt rowka. S spårvinkel. (806)
30. **half-value angle** (for a diffusing surface by reflection or by transmission) (γ) : angle of observation at which the luminance has half the value of the luminance of the diffused light at the angle of 0°, with perpendicular incidence of the light. *Note.* — For indicating the shape of the indicatrix of diffusion it is recommended that the diffusion factor σ be used for strongly diffusing materials, and the half-value angle γ for poorly diffusing materials. ★ angle de demi-valeur → *angle 8.* R угол половинной яркости (поверхности, рассеивающей путе″м отражения или пропускания). D Halbwertswinkel (für eine streuend reflektierende oder transmittierende Fläche). E ángulo de valor mitad. I angolo di luminanza metà. N halfwaardehoek. P kąt połówkowy. S halvvärdesvinkel. (845)
31. **Hall angle** : the angle which exists, in the presence of Hall effect, between the resulting electric field strength and the current density. ★ angle de Hall → *angle 11.* R угол Холла. D Hall-Winkel. E ángulo de Hall. I angolo di Hall. N Hallhoek. P kąt Halla. S Hallvinkel. (121,521)
32. **included angle of a reproducing stylus tip** : the acute angle between the straight sides of the stylus cone measured in a plane through the axis of the cone. ★ angle d'ouverture de la pointe de lecture → *angle 31.* R угол конуса иглы. D Kegelwinkel einer Abspielnadel. E ángulo de abertura de la aguja de lectura. I angolo di apertura della puntina di riproduzione. N ingesloten hoek van de afspeelnaald. P kąt wierzchołka igły. S nålspetsvinkel. (806)
33. **internal angle of an alternator** : the phase difference between the terminal voltage of an alternator and its electromotive force. ★ angle interne d'un alternateur → *angle 35.* R внутренний угол генератора. D innerer Polradwinkel eines Generators. E ángulo interno de un alternador. I angolo interno di un alternatore. N inwendige hoek van een generator. P kąt wewnętrzny wektorów napięć w generatorze. S inre fasvinkel hos synkrongenerator. (603)
34. **lateral tracking angle error** : → *error 47*
35. **line angle** : the angular change in direction of a line at a support (θ).

★ angle en ligne → *angle 33.* R угол поворота линии. D Leitungswinkel. E ángulo de línea. I angolo di deviazione. N lijnhoek. P kąt odchylenia trasy; kąt załomu trasy. S brytvinkel. (466)

36. **load angle characteristic** : → *characteristic 51*
37. **loss angle** (under sinusoidal conditions) : the angle whose tangent is the ratio of the active power to the absolute value of the reactive power. ★ angle de pertes → *angle de pertes 1.* R угол потерь (в синусоидальном режиме). D Verlustwinkel (bei zeitlich sinusförmigem Betrieb). E ángulo de pérdidas (en régimen senoidal). I angolo di perdita (in regime sinusoidale). N verlieshoek (bij sinusvormige grootheden). P kąt strat. S förlustvinkel. (151)
38. **(magnetic) loss angle** (δ_m) : the phase displacement between the fundamental components of the magnetic flux density and the magnetic field strength. *Notes. 1* — Where a phase displacement can be associated with eddy currents, hysteresis or residual losses, the loss angle may be designated by δ_F for eddy current loss, δ_h for hysteresis loss and δ_r for residual loss. *2* — The tangent of loss angle is often used to express the losses in a magnetic material.

$$\tan \delta_m = \frac{\mu''}{\mu'}$$

where μ' and μ'' are the real and imaginary components respectively of the complex permeability (symb. : μ). ★ angle de pertes (magnétiques) → *angle de pertes 3.* R угол потерь (магнитных). D (magnetischer) Verlustwinkel. E ángulo de pérdidas (magnéticas). I angolo di perdite (magnetiche). N verlieshoek. P kąt strat. S förlustvinkel. (221,705)
39. **minimum angle of shade** (*Syn.* minimum shielding angle (USA)) : the angle within which the line conductors must lie in order to obtain a desired degree of protection against lightning strokes. ★ angle minimal de protection → *angle 37.* R минимальный угол защиты. D minimaler Schutzwinkel. E angulo mínimo de protección. I angolo minimo di protezione. N kleinste beschermingshoek. P kąt ochrony odgromowej minimalny. S minsta skyddsvinkel. (466)
40. **minimum shielding angle** (*Syn.* minimum angle of shade) : → *angle 39*
41. **observation angle** (of a retroreflector) (α) : angle between the direction of observation of the retroreflector and the direction of the incident light. ★ angle de divergence → *angle 9.* R угол наблюдения (световозвращающего отражателя). D Beobachtungswinkel (eines Retroreflektors). E ángulo de observación. I angolo di divergenza. N waarnemingshoek. P kąt obserwacji. S observationsvinkel. (845)
42. **offset angle** : the angle measured in the clockwise direction, when viewed from above, formed by the projection into the plane of the disk of the line joining the pivot of the pick-up arm to the stylus tip and the similar projection of the perpendicular to the tangent plane of vibration of the stylus tip. ★ angle correcteur d'erreur de piste → *angle 2.* R горизонтальный угол коррекции. D horizontaler Spurwinkel, Abwinkelung des Tonarms (gegen tan. Spurfehlwinkel). E ángulo corrector de error de pista. I angolo di compensazione dell'errore di pista. N kophoek. P kąt skręcenia ramienia. S (tonarmens) korrektionsvinkel. (806)
43. **output angle** (*Syn.* radiation angle) : → *angle 48*
44. **overlap angle** : that part of an alternating voltage cycle, expressed as an angle, during which two consecutive discharge paths carry current simultaneously. ★ angle d'empiètement → *angle 25.* R угол перекрытия. D Überlappungswinkel. E ángulo de solape. I angolo di sovrapposizione. N overlappingshoek. P kąt komutacji. S överlappningsvinkel. (531)
45. **phase angle** : for a linear system in sinusoidal steady-state, phase difference between the output signal and the corresponding input signal. *Note.* — The phase angle is the argument of the frequency response. ★ déphasage → *déphasage 5.* R фазовая частотная характеристика. D Phasenwinkel; Phasengang. E desfase. I sfasamento. N fasehoek. P przesunięcie fazowe. S fasvinkel. (351)
46. **phase angle** (*Syn.* delay angle) : the electrical angle between the instantaneous zero voltage applied to the anode of a thyristor or an ignitron and the point at which it conducts in each half cycle. ★ angle de retard → *angle 19.* R фазовый угол; угол отсечки. D Phasenwinkel. E ángulo de retardo. I angolo di fase; angolo di ritardo. N fasehoek. P kąt fazowy. S fasvinkel. (851)
47. **pseudo-Brewster angle incidence** : → *incidence 8*

48. **radiation angle** (*Syn.* output angle) : half the vertex angle of the cone incorporating a specified proportion of the divergent light beam emitted by the end of a fibre. *Note.* — The cone is usually defined by the angle at which the far-field irradiance has decreased to a specified fraction of its maximum value or as the cone within which can be found a specified fraction of the total radiated power at any point in the far field. ★ angle de rayonnement → *angle 16.* R угол излучения; выходной угол. D Strahlungswinkel. E ángulo de radiación; ángulo de salida. I angolo di emergenza; angolo di uscita. N stralingshoek; uitgangshoek. P kąt wyjścia. S utstrålningsvinkel. (731)
49. **recording angle or dig** (*Syn.* rake of stylus) : → *rake 1*
50. **running angle support** (*Syn.* flying angle support) : → *support 10*
51. **shielding angle** (*Syn.* angle of shade) : → *angle 8*
52. **shielding angle** : the complementary angle of the cut-off angle. ★ ..... → . R защитный угол. D Ausstrahlungswinkel. E ángulo de apantallado. I angolo di schermatura. N ..... P kąt ochrony. S avskärmningsvinkel. (845)
53. **squint angle** : the angular deviation of the beam axis or directional null of an antenna from the corresponding specified axis. ★ angle de strabisme → *angle 22.* R угол перекоса. D Schielwinkel. E ángulo de estrabismo (de una antena). I angolo di strabismo. N hoekafwijking. P kąt odchylenia ukierunkowania (anteny). S skelvinkel. (712)
54. **tangent of the loss angle (of a capacitor)** : → *tangent 4*
55. **target angle** (*Syn.* anode angle) : the angle formed by the plane of the actual focal spot and the beam axis. ★ pente de l'anode → *pente 6.* R анодный угол. D Anoden-Neigungswinkel. E ángulo del ánodo. I angolo anodico. N anodehoek. P kąt anody. S anodvinkel. (881)
56. **transit angle** : the product of the transit time and the angular frequency of the sinusoidal component of the current. It is the phase delay occurring during the charge transit time. ★ angle de transit → *angle 23.* R угол пролета. D Laufwinkel. E ángulo de paso. I angolo di transito. N looptijdhoek. P kąt przelotu. S löpvinkel. (531)
57. **vertical modulation angle** : the angle between the perpendicular to the surface of the disk and the direction of the stylus tip movement, measured in the anti-clock-wise sense, when the pick-up head is viewed from the side, with the stylus tip to the left side of the pick-up arm pivot. ★ angle de modulation verticale → *angle 12.* R вертикальный угол записи. D vertikaler Spurwinkel. E ángulo de modulación vertical. I angolo di modulazione verticale. N verticale snijhoek. P kąt modulacji pionowej. S vertikal moduleringsvinkel. (806)
58. **vertical tracking angle error** : → *error 64*
59. **wide angle luminaire** : → *luminaire 25*

ångström

1. **ångström (deprecated) (Å)** : a unit of length, often used to measure wavelengths of X-radiation and gamma radiation, equal to 0.1 nm (exactly). *Note.* — The ångström will be used with the SI system for a limited time. ★ ångström → *ångström 1.* R ангстрем (не рекомендуется). D Ångström (veralteter Begriff). E anstron (desaconsejado). I ångström (sconsigliato). N ångström. P angstrom (jednostka nie zalecana). S ångström. (881)

angular

1. **angular deviation loss** : → *loss 3*
2. **angular frequency** : → *frequency 7*
3. **angular misalignment loss** : → *loss 4*
4. **angular momentum** : → *momentum 1*
5. **angular variation in synchronous generators** : → *variation 1*
6. **complex angular frequency** : → *frequency 22*
7. **total angular momentum quantum number** : → *number 32*

anhysteretic

1. **anhysteretic curve** : → *curve 2*
2. **anhysteretic state** : → *state 1*

aniline

1. **aniline point** : → *point 1*

animation

1. **electronic animation bench** : → *bench 1*

anion

1. **anion** : a negatively charged ion. ★ anion → *anion 1.* R анион. D Anion. E anión. I anione. N anion. P anion. S anjon. (111)

anisochronism

1. **anisochronism** : the state in which a time-varying phenomenon, a time-scale, or a signal is anisochronous. ★ anisochronisme → *anisochronisme 1.* R анизохронизм. D Anisochronismus. E anisocronismo. I anisocronismo. N anisochronisme. P anizochronizm. S anisokronism. (702)

anisochronous

1. **anisochronous** : qualifying a time-varying phenomenon, a time-scale or a signal the consecutive significant instants of which are separated by time intervals which are not all constrained to have the same rated duration or to have rated durations equal to integral multiples of a unit duration. *Note.* — The term "asynchronous" with a different meaning is used in the technique of rotating machines. ★ anisochrone → *anisochrone 1.* R анизохронный. D anisochron; nichtisochron (in diesem Sinne abgelehnt)). E anisócrono. I anisocrono. N anisochroon. P anizochroniczny. S aniskron. (702,704,721)
2. **anisochronous transmission** : → *transmission 4*
3. **degree of early anisochronous parallel distortion** : → *degree 4*
4. **degree of late anisochronous parallel distortion** : → *degree 10*

anisotropic

1. **anisotropic** (for electromagnetic waves) : pertaining to a medium whose electromagnetic properties at each point are different for different directions of propagation or different polarisations of a wave propagating in the medium. ★ anisotrope → *anisotrope 1.* R анизотропный (для электромагнитных волн). D anisotrop (für elektromagnetische Wellen). E anisótropo (para ondas electromagnéticas). I anisotropo. N anisotroop. P anizotropowy (dia fali elektromagnetycznej). S anisotropisk. (731)
2. **magnetically anisotropic substance** : → *substance 6*

anisotropy

1. **induced magnetic anisotropy** : a permanent or temporary magnetic anisotropy produced by external causes. ★ anisotropie magnétique induite → *anisotropie 2.* R наведенная магнитная анизотропия. D induzierte magnetische Anisotropie. E anisotropía magnética inducida. I anisotropia magnetica indotta. N geïnduceerde magnetische anisotropie. P anizotropia magnetyczna indukowana. S inducerad magnetisk anisotropi. (221)
2. **loss anisotropy factor** : → *factor 108*
3. **loss anisotropy factor** : → *factor 109*
4. **magnetic anisotropy** : a phenomenon whereby magnetic properties of a substance are different in different directions relative to a given frame of reference in the substance. ★ anisotropie magnétique → *anisotropie 1.* R магнитная анизотропия. D magnetische Anisotropie. E anisotropía magnética. I anisotropia magnetica. N magnetische anisotropie. P anizotropia magnetyczna. S magnetisk anisotropi. (221)
5. **magnetic field strength anisotropy factor** : → *factor 113*

anneal

1. **magnetic anneal** : a thermal treatment of a magnetic material in the presence of an applied magnetic field for the purpose of obtaining a desired magnetic texture. ★ recuit magnétique → *recuit 5.* R магнитный отжиг. D Magnetfeldglühung. E recocido magnético. I ricoltura magnetica. N magnetisch uitgloeien. P wyżarzanie w polu magnetycznym. S magnetfältglödgning. (221)

annealed

1. **annealed glass** : → *glass 1*

annealing

1. **bright annealing** : annealing in a suitable medium to reduce oxidation of the metal. ★ recuit blanc → *recuit 2.* R светлый

отжиг. D Blankglühen. E recocido blanco. I ricottura bianca. N blankgloeien. P wyżarzanie jasne; wyżarzanie bez nalotu. S blankglödgning. (841)

2. **full annealing** : a heat treatment involving heating and holding at the temperature at which austenite begins to form during the heating process, or at a higher temperature, followed by cooling performed under such conditions that after its return to the ambient temperature the steel is in a structural state approaching the state of stable equilibrium. ★ recuit → *recuit 1.* R полный отжиг. D Glühen. E recocido. I ricottura. N stabiliserend gloeien. P wyżarzanie zupełne. S ..... (841)
3. **soft annealing** : a heat treatment to reduce the hardness of a metal. ★ adoucissement → *adoucissement 1.* R мягкий отжиг. D Weichglühen. E adulzamiento. I addolcimento. N zachtgloeien. P wyżarzanie zmiękczające. S mjukglödgning. (841)

annihilation

1. **annihilation** : interaction between a particle and its antiparticle with resulting disappearance of them and emission of particles different in their nature. ★ annihilation → *annihilation 1.* R аннигиляция. D Vernichtung. E anihilación. I annichilazione. N annihilatie. P anihilacja. S förintelse; annihilation. (391,881)
2. **annihilation radiation** : → *radiation 4*

announcement

1. **change of state announcement** : an announcement of a demand for the transmission of event information. ★ annonce de changement d'état → *annonce 1.* R извещение об изменении состояния. D Meldeanreiz. E anuncio de cambio de estado. I presenza variazioni di stato. N bericht van toestandswijziging. P oznajmienie o zmianie stanu. S ändringsflagga; ändringsdetektering. (371)

annual

1. **annual limit on intake** : → *limit 2*
2. **annual, quarterly, monthly, weekly daily, maximum demand** : → *demand 1*

annular

1. **annular slot antenna** : → *antenna 4*

annunciator

1. **annunciator** : an indicator showing remotely whether each of several items is in the required position or state or not, e.g. door signal with automatic doors or lamp indicating any of several abnormal conditions. ★ organe de signalisation → *organe 4.* R сигнальное устройство. D Meldeeinrichtung. E órgano de señalización. I segnalatore. N storingsmelder. P wskaźnik (zgodności położenia). S fjärrindikeringstablå. (811)

anode

1. **anode** : an accelerating electrode that usually serves both as the output electrode and as the principal collector of electrons. ★ anode → *anode 1.* R анод. D Anode. E ánodo. I anodo. N anode. P anoda. S anod. (151,531,841,881)
2. **anode a.c. resistance** : → *resistance 2*
3. **anode angle** (*Syn.* target angle) : → *angle 55*
4. **anode characteristic** (*Syn.* anode-to-cathode (voltage-current) characteristic) : → *characteristic 5*
5. **anode current** : → *current 2*
6. **anode efficiency** : → *efficiency 1*
7. **anode input power** (*Syn.* anode supply power) : → *power 6*
8. **anode supply power** : → *power 6*
9. **anode thermal capacity** : → *capacity 1*
10. **critical anode voltage** : → *voltage 38*
11. **peak forward anode voltage** : → *voltage 138*
12. **peak negative anode voltage** : → *voltage 139*

anode-potential-stabilized

1. **anode-potential-stabilized camera tube** (*Syn.* high-velocity camera tube) : → *camera tube 4*

anode-to-cathode

1. **anode-to-cathode (voltage-current) characteristic** : → *characteristic 5*

anodic

1. **anodic polarization** : → *polarization 1*
2. **anodic reaction** : → *reaction 1*

anomalistic

1. **anomalistic period** : → *period 1*

anomaly

1. **propagation anomaly** : difference, for a given distance,between the actual propagation loss and the loss calculated for the same path in the case of spherical divergence or for any other specified propagation hypothesis. ★ anomalie de propagation → *anomalie 1.* R аномалия распространения. D Ausbreitungsanomalie. E anomalía de propagación. I anomalia di propagazione. N anomalie van de voortplanting. P anomalia propagacji. S utbredningsanomali. (801)

answer

1. **answer bid ratio** : → *ratio 5*
2. **answer seizure ratio** : → *ratio 6*
3. **answer signal** : → *signal 17*
4. **answer signal (with charge)** : → *signal 18*
5. **answer signal (with no charge)** : → *signal 19*

answer-back

1. **answer-back code** : → *code 3*
2. **answer-back unit** : → *unit 3*
3. **answer-back unit simulator** : → *simulator 1*

answering

1. **answering** (in data communication) : the process of responding to a calling station to complete the establishment of a connection between data stations. ★ réponse → *réponse 20.* R ответ (в передаче данных). D Anrufbeantwortung. E respuesta (en transmisión de datos). I risposta. N beantwoording. P odpowiedź. S svar. (721)
2. **answering delay** : → *delay 2*
3. **automatic answering** : answering in which the called terminal equipment automatically responds to the calling signal and the call may be established whether or not the called terminal is attended. ★ réponse automatique → *réponse 26.* R автоматический ответ. D automatische Rufbeantwortung. E respuesta automática. I risposta automatica. N automatische beantwoording. P odpowiedź automatyczna. S automatiskt svar. (721)
4. **manual answering** : answering in which a call is established only if the called user signals his readiness to receive it by means of a manual operation. ★ réponse manuelle → *réponse 35.* R ручной ответ. D manuelle Rufbeantwortung. E respuesta manual. I risposta manuale. N handbediende beantwoording. P odpowiedź ręczna. S manuelltsvar. (721)
5. **telephone answering and recording set** : → *set 54*
6. **telephone answering set** : → *set 55*

antenna

1. **active antenna** : an antenna incorporating active devices. ★ antenne active → *antenne 48.* R активная антенна. D aktive Antenne. E antena activa. I antenna attiva. N primaire antenne. P antena aktywna. S aktiv antenn. (712)
2. **adaptive antenna system** : → *system 6*
3. **Adcock (array) antenna** : a directional-null receiving antenna designed to be insensitive to the horizontal components of the electric field, formed from one or more pairs of vertical radiating elements regularly spaced on a horizontal circle, the diametrically opposite elements being connected in phase opposition, all pairs of elements being coupled to a common output through the field coils of a radiogoniometer to obtain a steerable directional null. ★ antenne Adcock → *antenne 50.* R антенная решетка Эдкока. D Adcock-Antenne; Adcock-Gruppenantenne. E antena (conjunto) Adcock. I antenna Adcock. N Adcock-antenne. P antena Adcocka. S Adcock-antenn. (712)
4. **annular slot antenna** : a slot antenna with the slot radiator having the shape of an annulus. ★ antenne à fente annulaire → *antenne 23.* R кольцевая щелевая антенна. D Ringschlitzantenne. E antena de ranura anular. I antenna a fessura anulare. N ringvormige sleufantenne. P antena szczelinowa pierścieniowa. S ringformad slitsantenn. (712)

5. **antenna** : that part of a radio transmitting or receiving system which is designed to provide the required coupling between a transmitter or a receiver and the medium in which the radio wave propagates. *Notes. 1* — In practice, the terminals of the antenna or the points to be considered as the interface between the antenna and the transmitter or receiver should be specified. *2* — If a transmitter or receiver is connected to its antenna by a feed line, the antenna may be considered to be a transducer between the guided waves of the feed line and the radiated waves in space. ★ antenne → *antenne 4.* R антенна. D Antenne. E antena. I antenna. N antenne. P antena. S antenn. (712)
6. **antenna array** (*Syn.* array) : → *array 4*
7. **antenna bay** : → *bay 1*
8. **antenna current** : → *current 3*
9. **antenna efficiency** : → *efficiency 2*
10. **antenna (input) admittance** : → *admittance 4*
11. **antenna (input) impedance** : → *impedance 2*
12. **antenna switching matrix** : → *matrix 2*
13. **antenna system** : → *system 10*
14. **antenna to medium coupling loss** (*Syn.* gain degradation) : → *degradation 3*
15. **antenna tuning housing** : → *housing 1*
16. **antenna wavelength** : → *wavelength 1*
17. **back-fire antenna** : an antenna with a feed consisting of one or more radiating elements and a reflector element which illuminates a closely spaced reflector, such that the antenna functions as an open resonator with radiation emanating from the open end of the resonator, i.e. in the direction opposite to that of the feed. ★ antenne rétrodirective → *antenne 118.* R антенна обратного осевого излучения. D Backfire-Antenne. E antena retrodirectiva. I antenna retrodirettiva (back-fire array). N achterwaarts stralende antenne. P antena o promieniowaniu zwrotnym. S bakåtstrålande antenn. (712)
18. **balanced antenna** : an antenna constructed from two geometrically symmetrical parts with respect to a plane considered to be a zero potential plane and designed in such a way that it may be fed directly from an unbalanced line without interposition of a separate balun. *Note.* — Such an antenna may be also be considered to incorporate a balun. ★ antenne (à alimentation) autosymétrisée → *antenne 6.* R сбалансированная антенна. D Antenne mit direkter Koaxialspeisung. E antena balanceada. I antenna bilanciata. N gebalanceerde antenne. P antena zrównoważona. S balanserad antenn. (712)
19. **bat-wing antenna** : a slot antenna formed from a plane conducting sheet having the shape of a pair of wings connected at both ends to form the slot. *Note.* — The conducting sheet may be approximated by a metal frame and bars perpendicular to the slot. ★ antenne papillon → *antenne 108.* R Ж-образная антенна. D Schmetterlingsantenne. E antena de mariposa. I antenna a farfalla. N vlindervormige antenne. P antena motylkowa. S fjärilsantenn. (712)
20. **beaver-tail beam antenna** : a fan-beam antenna in which the beamwidth in the horizontal plane is significantly greater than in the vertical plane. ★ antenne à faisceau plat horizontal → *antenne 21.* R антенна с лучом типа "бобровый хвост". D Biberschwanzantenne. E antena de haz tipo cola de castor. I antenna a fascio piatto orizzontale. N beverstaartbundelantenne. P antena o wiązce wachlarzowej spłaszczonej. S horisontal skivlobsantenn. (712)
21. **Bellini-Tosi antenna** : a directional-null receiving antenna consisting of two fixed crossed vertical loops at right angles to each other and coupled to a common output through the field coils of a radiogoniometer to obtain a steerable directional null. ★ antenne Bellini-Tosi → *antenne 53.* R гониометрическая антенна; антенна Беллини-Тоси. D Bellini-Tosi-Richtantenne; Kreuzrahmenantenne. E antena de Bellini-Tosi. I antenna Bellini-Tosi. N Bellini-Tosi-antenne. P antena Bellini-Tosi. S Bellini-Tosi-antenn. (712)
22. **Beverage antenna** : a travelling-wave receiving antenna composed of a long horizontal conductor relatively near a ground of poor conductivity, connected to the receiver at one end, oriented in the direction of the transmitter and connected to ground through an appropriate impedance at the far end. ★ antenne Beverage → *antenne 54.* R антенна Бевереджа. D Beverage-Antenne. E antena Beverage. I antenna Beverage. N Beverage-antenne. P antena Beverage. S Beverage-antenn. (712)
23. **biconical antenna** : a symmetrical antenna formed by two conducting cones, having a common axis and adjacent vertices, at which they are fed. ★ antenne biconique → *antenne 55.* R биконическая антенна. D Doppelkonusantenne. E antena bicónica. I antenna biconica. N dubbelconusantenne. P antena dwustożkowa. S konisk dipol. (712)
24. **broadband antenna** (*Syn.* wide-band antenna) : an antenna having acceptable characteristics over a wide range of radio frequencies. ★ antenne à large bande → *antenne 26.* R широкополосная антенна. D Breitbandantenne. E antena de banda ancha. I antenna a banda larga. N breedbandantenne. P antena szerokopasmowa. S bredbandsantenn. (712)
25. **cage antenna** : a multi-wire element whose wires are so disposed as to resemble a cylinder, in general of circular cross-section, e.g. an elongated cage. ★ (élément en) cage → *cage 3.* R колбасообразная проволочная антенна. D Käfigantenne; Reusenantenne. E antena jaula. I antenna a gabbia. N kooiantenne. P antena klatkowa. S burantenn. (712)
26. **Cassegrain reflector antenna** : a paraboloidal reflector antenna with a convex sub-reflector, hyperboloidal in shape, located between the vertex and the prime focus of the reflector. *Note.* — To improve the aperture efficiency of the antenna, the shape of the main reflector and sub-reflector are sometimes modified with respect to the ideal paraboloidal and hyperbolical geometrical forms. ★ antenne Cassegrain → *antenne 57.* R рефлекторная антенна Кассегрена. D Cassegrain-Reflektorantenne. E antena de Cassegrain. I antenna Cassegrain. N Cassegrain-reflectorantenne. P antena z reflektorem Cassegraina. S Cassegrain-antenn. (712)
27. **cheese antenna** : a reflector antenna having a cylindrical reflector enclosed by two parallel plates perpendicular to the cylinder and spaced more than one wavelength apart. ★ antenne fromage → *antenne 96.* R антенна типа "сыр". D Cheese-Antenne; Tortenantenne. E antena tipo queso; antena en D. I antenna formaggio (cheese antenna). N kaasantenne. P antena serowa. S ostantenn. (712)
28. **Chireix-Mesny antenna** : a curtain antenna consisting of conductors having the form of right-angled symmetrical saw-tooths with sides of half a wavelength. ★ antenne Chireix-Mesny → *antenne 59.* R антенна Ширекса-Мени. D Chireix-Mesny-Antenne. E antena de Chireix-Mesny. I antenna Chireix-Mesny. N Chireix-Mesny-antenne. P antena Chireix-Masny. S ..... (712)
29. **cigar antenna** : a surface wave antenna composed of metal disks disposed perpendiculary about a metal support which serves as their common axis and having a fed element at one end. ★ (antenne) cigare → *cigare 1.* R сигарообразная антенна. D Zigarrenantenne. E antena cigarro. I antenna a sigaro. N sigaarantenne. P antena cygarowa. S cigarrantenn. (712)
30. **clover-leaf antenna** : an antenna formed from one or more radiating elements arranged along a common axis, each consisting of three or four loops arranged in a plane around the axis, so that the overall shape is similar to a three-leaf or four-leaf clover. ★ antenne en trèfle → *antenne 87.* R антенна типа "лист клевера". D Kleeblattantenne. E antena hoja de trébol. I antenna a quadrifoglio. N klaverbladantenne. P antena koniczynowa. S klöverbladsantenn. (712)
31. **coaxial antenna** : an antenna comprising an extension to the inner conductor of a coaxial line and a quarter wave sleeve element which is formed by folding back the outer conductor of the coaxial line. ★ antenne coaxiale → *antenne 62.* R коаксиальная антенна. D Koaxialantenne. E antena coaxial. I antenna coassiale. N coaxiale antenne. P antena współosiowa. S koaxialantenn. (712)
32. **communal (broadcasting) antenna** (*Syn.* CATV) : → *CATV 1*
33. **conformal antenna** (*Syn.* flush mounted antenna) : an antenna which conforms to a surface whose shape is mainly determined by considerations other than electromagnetic, e.g. aerodynamic or hydrodynamic considerations. ★ antenne conformée → *antenne 66.* R конформная антенна. D oberflächentreue Antenne; Einbauantenne. E antena conformada. I antenna fluodinamica conforme. N verzonken antenne. P antena przystosowana. S formanpassad antenn. (712)
34. **contoured-beam antenna** : a shaped-beam antenna designed in such a way that when its beam intersects a given surface the lines of equal power flux density incident upon the surface form specified contours. *Note.* — For a satellite antenna, the area limited, on the surface of the Earth, by the line along which the power flux density has a specified value, is called "footprint of the beam" . ★ antenne à empreinte modelée

→ *antenne 13.* R антенна с контурным лучом. D Konturstrahlantenne. E antena de haz contorneado. I antenna a fascio contornato. N waaierbundelantenne. P antena o wiązce konturowej. S antenn med konturformad lob. (712)

35. **corner reflector antenna** : an antenna consisting of a dihedral corner reflector with a feed generally in the bisecting plane of the dihedral angle. ★ (antenne en) dièdre → *dièdre 1.* R уголковая рефлекторная антенна. D Winkelreflektorantenne. E antena en diedro. I antenna a diedro. N hoekreflectorantenne. P antena z reflektorem kątowym. S vinkelreflektorantenn. (712)

36. **cosecant-square beam antenna** : a shaped-beam antenna for which part of its radiation pattern in one plane is such that the radiation intensity is proportional to the square of the cosecant of the angle measured from a specified direction in the plane. *Note.* — In radar applications, the plane is vertical and the angle is measured from the horizontal so that objects with the same back-scattering cross-section at the same altitude give equal response regardless of distance. ★ antenne à faisceau en cosécante carrée → *antenne 15.* R антенна с лучом типа "косеканс-квадрат". D Kosekans-Antenne. E antena de haz cosecante al cuadrado. I antenna a fascio di tipo cosecante al quadrato. N cosecanskwadraat-bundelantenne. P antena o wiązce kosekansowej. S cosekant(kvadrat)lobsantenn. (712)

37. **curtain antenna** : a broadside planar array in which the radiating elements usually consisting of wires are arranged within a vertical plane. *Note.* — Generally, a curtain antenna is used with an array of reflector elements. ★ antenne rideau → *antenne 120.* R плоская многовибраторная антенна. D Vorhangantenne; Antennenwand mit Reflektor. E antena cortina. I antenna a cortina. N gordijnantenne. P antena ścianowa. S antennmatta. (712)

38. **dielectric rod antenna** : an end-fire antenna which employs a shaped dielectric as a significant part of a radiating element. ★ antenne (à tige) diélectrique → *antenne 43.* R диэлектрическая стержневая антенна. D dielektrische Stabantenne; Stielantenne. E antena de barra dieléctrica. I antenna a asta dielettrica. N diëlektrische staafantenne. P antena z prętem dielektrycznym. S dielektrisk stavantenn. (712)

39. **dipole (antenna)** : → *dipole 1*

40. **dipole-curtain antenna** : a curtain antenna comprising parallel dipoles with a length of either a half or a full wavelength, essentially horizontal and spaced approximately half a wavelength apart in a vertical plane. ★ rideau de doublets → *rideau 4.* R симметричная плоская многовибраторная антенна. D Dipolantennenwand. E antena cortina de dipolos. I antenna a cortina di dipoli. N dipoolgordijnantenne. P antena ścianowa dipolowa. S dipolmatta. (712)

41. **directional antenna** : an antenna designed to provide significantly higher or lower radiation intensities in specified directions than in other directions. ★ antenne directive → *antenne 71.* R направленная антенна. D Richtantenne; Richtstrahler. E antena direccional. I antenna direttiva. N gerichte antenne. P antena kierunkowa. S riktantenn. (712)

42. **directional-null antenna** : a directional antenna designed to provide one or more directional nulls in specified directions. ★ antenne à zéro de rayonnement → *antenne 46.* R антенна с направленным нулем. D Nullstellen-Richtantenne. E antena de mínimo direccional. I antenna con zeri d'irradiazione. N antenne met een nulrichting. P antena z zerami kierunkowymi. S nollriktningsantenn. (712)

43. **doublet (antenna)** (*Syn.* dipole (antenna)) : → *dipole 1*

44. **down-lead (of an antenna)** : → *down-lead 1*

45. **dual-polarized antenna** : an antenna intended to radiate or receive simultaneously two independent radio waves orthogonally polarized. ★ antenne à double polarisation → *antenne 12.* R антенна с двойной поляризацией. D doppelt polarisierte Antenne. E antena de polarización dual. I antenna a doppia polarizzazione. N tweevoudig gepolariseerde antenne. P antena spolaryzowana podwójnie. S dubbelpolariserad antenn. (712)

46. **dummy antenna** (*Syn.* dummy load) : → *load 13*

47. **equiangular spiral antenna** : a frequency independent antenna whose conducting surfaces have shapes generated by equiangular spirals having a common axis and the same defining parameter. *Notes. 1* — The antenna usually has two arms fed by a balanced feedline. It may have multiple pairs of arms. A common design requires two pairs oriented 90° apart about their common axis and fed in phase quadrature. *2* — The arms of the spirals can conform to planar or conical surfaces, in which case they are referred to as planar or conical equiangular spiral antennas respectively. *3* — These antennas are usually designed so that the non-conducting portion of the surface to which the antenna conforms is of the same shape and size as the spiral arms. This design is said to be self-complementary. ★ antenne spirale équiangulaire → *antenne 121.* R равноугольная спиральная антенна. D logarithmische Spiralantenne. E antena espiral equiangular. I antenna a spirale equiangolare. N dubbele schroeflijnantenne. P antena spiralna równokątna. S spiralantenn. (712)

48. **fan-beam antenna** : an antenna having a beam whose transverse cross-section has a large ratio of major to minor dimension. ★ antenne à faisceau plat → *antenne 20.* R антенна с веерным лучом. D Fächerstrahlantenne. E antena de haz abanicado; antena abanico. I antenna con fascio a ventaglio (fan-beam antenna). N fan-antenne. P antena o wiązce wachlarzowej. S skivlobsantenn. (712)

49. **ferrite rod antenna** : an antenna with several turns of wire around a magnetic ferrite rod and acting as a loop antenna. ★ (antenne à) ferrite → *ferrite 1.* R антенна с ферритовым сердечником. D Ferritstabantenne. E antena barra de ferrita. I antenna a ferrite. N ferrietantenne. P antena ferrytowa. S ferritantenn. (712)

50. **fishbone antenna** : an end-fire antenna consisting of an array of identical dipoles which are closely spaced in a plane and loosely coupled to a balanced transmission line. ★ antenne en arête de poisson → *antenne 74.* R антенна типа "рыбий хвост". D Fischgrätenantenne; logarithmisch-periodische Antenne. E antena espina de pescado. I antenna a lisca di pesce. N visgraatantenne. P antena szkieletowa. S fiskbensantenn. (712)

51. **flat-top antenna** : a top loaded antenna for which the end capacitor consists of parallel wires in a horizontal plane. ★ antenne en nappe → *antenne 81.* R антенна с плоской емкостной нагрузкой. D Antenne mit flacher Dachkapazität. E antena de tope plano. I antenna a padiglione. N vlakke-topantenne. P antena z płaskim końcem. S skivtoppbelastad antenn. (712)

52. **flush mounted antenna** (*Syn.* conformal antenna) : → *antenna 33*

53. **flush-mounted antenna** : an antenna constructed into the surface of a mechanical structure such as a vehicle without affecting the shape of that surface. ★ antenne encastrée → *antenne 90.* R невыступающая антенна. D Einbauantenne. E antena embutida. I antenna fluodinamica incorporata. N verzonken antenne. P antena wmontowana. S infälld antenn. (712)

54. **Franklin antenna** : a curtain antenna comprising vertical end-fed radiating elements, each of which consists of a conductor folded or loaded by series reactances at regular intervals, so that the radiation from all parts of it is in phase. ★ antenne Franklin → *antenne 94.* R антенна Франклина. D Franklin-Antenne. E antena Franklin. I antenna Franklin. N Franklin-antenne. P antena Franklina. S Franklin-antenn. (712)

55. **frequency independent antenna** : any of a class of extremely broadband antennas which possess the property that the lower and upper limits of the band over which their impedance and radiation pattern remain almost constant are fixed respectively by the antenna's maximum physical size and by the minimum spacing at the feed point. *Note.* — The equiangular spiral antenna and log-periodic antenna are notable examples of frequency independent antennas. ★ antenne indépendante de la fréquence → *antenne 97.* R частотно-независимая антенна. D frequenzunabhängige Antenne. E antena independiente de la frecuencia; antena aperiódica. I antenna indipendente dalla frequenza. N frequentieonafhankelijke antenne. P antena aperiodyczna. S frekvensoberoende antenn. (712)

56. **Fresnel lens antenna** (*Syn.* zone-plate lens antenna) : an antenna consisting of a feed and a lens, usually planar, which transmits the radiated power from the feed through the central zone and alternate Fresnel zones. ★ antenne à lentille de Fresnel → *antenne 27.* R антенна с линзой Френеля; антенна с зонированной пластинчатой линзой. D Fresnel-Linsenantenne. E antena lente de Fresnel. I lente Fresnel. N Fresnel-lensantenne. P antena soczewkowa Fresnela. S Fresnel-lins. (712)

57. **gregorian reflector antenna** : a paraboloidal reflector antenna with a concave sub-reflector ellipsoidal in shape, located at a distance from the vertex of the main reflector, that distance being greater than the prime focal length of the main reflector. *Note.* — To improve the aperture efficiency of the antenna, the shapes of the main reflector and sub-reflector are sometimes modified with respect to the ideal paraboloidal and ellipsoidal geometrical forms. ★ antenne à réflecteur grégorien → *antenne 38.* R рефлекторная антенна Грегори. D Gregory-Reflektorantenne. E antena de reflector gregoriano. I antenna gregoriana. N Gregoriaanse reflectorantenne. P antena z reflektorem Gregoriana. S Gregorian-antenn. (712)

58. **ground-plane antenna** : a monopole antenna for which the conductive surface consists only of a system of radially disposed rods or a disk. ★ antenne à plan de sol → *antenne 34.* R несимметричная антенна с высоко поднятым над землей противовесом. D Antenne mit Gegengewicht; Groundplane-Antenne. E antena de plano de tierra. I antenna ground-plane. N antenne met tegenwicht of aardnet. P antena "ground-plane". S jordplansantenn. (712)

59. **H antenna** : an antenna composed of two parallel dipoles which together with their common support are in the form of the letter H. ★ antenne en H → *antenne 78.* R симметричный полуволновый вибратор с рефлектором; H-образная антенна. D H-Antenne. E antena H. I antenna ad H. N H-antenne. P antena typu H. S H-antenn. (712)

60. **helix antenna** : an antenna consisting of a conductor in the form of an helix and designed to radiate either along the axis of the helix or perpendicular to it. *Note.* — In general, the helix is arranged with its axis perpendicular to a plane reflector and fed at the reflector end. ★ (antenne en) hélice → *hélice 1.* R спиральная антенна. D Wendelantenne. E antena helicoidal. I antenna ad elica. N schroeflijnantenne; helix. P antena śrubowa. S helixantenn. (712)

61. **image antenna** : an hypothetical antenna symmetrical with an actual antenna with respect to a plane, and traversed by electric currents of the same instantaneous value as the actual currents at the points of symmetry, the current components having the same direction as the actual currents when normal to the plane and the opposite directions when parallel. *Note.* — The combination of the actual antenna and the image antenna will produce the same radiation pattern above the plane as the combination of the actual antenna and the plane if the latter is a perfect conductor and is infinite in extent. ★ image → *image 13.* R зеркальное изображение антенны. D Spiegelbildantenne; imaginäre Antenne. E antena imagen. I immagine dell'antenna. N spiegelbeeldantenne. P antena hipotetyczna. S speglad antenn. (712)

62. **inclined - V antenna** : a symmetrical travelling-wave antenna consisting of two conductors forming a V in a plane inclined to the horizontal, fed at the apex of the V, the highest point of the antenna, the two ends being connected to the ground through appropriate impedances. ★ antenne en V incliné → *antenne 88.* R наклонная V-образная антенна. D geneigte V-Antenne. E antena en V inclinada. I antenna a V inclinato. N hellende V-antenne. P antena typu V nachylone. S lutande-V-antenn. (712)

63. **intermediate feed antenna** : a vertical antenna, with one end close to the ground, and fed at a point whose position with respect to the base is selected to give the antenna specified characteristics. ★ antenne à alimentation intermédiaire → *antenne 7.* R антенна с шунтовым питанием. D schwundmindernde Antenne; zwischengespeiste Antenne. E antena con alimentación intermedia. I antenna ad alimentazione intermedia. N intermediair gevoede antenne. P antena zasilana bocznikowo. S osymetriskt matad vertikalantenn. (712)

64. **inverted - V antenna** : a travelling-wave antenna consisting of a conductor in the form of an inverted "V" located in a vertical plane with one extremity being fed and the other connected to the ground through an appropriate impedance. ★ antenne en V renversé → *antenne 89.* R вертикальная V-образная антенна. D umgekehrte V-Antenne. E antena en V invertida. I antenna a V invertito. N omgekeerde V-antenne. P antena typu V odwrócone. S inverterat-V-antenn. (712)

65. **inverted-L antenna** : a monopole antenna consisting of one conductor perpendicular to the conducting surface, connected at its unfed end to the end of a conductor parallel to that surface ; each of the two conductors may consist of several wires. ★ antenne en L renversé → *antenne 80.* R Г-образная антенна. D (umgekehrte) L-Antenne. E antena en L invertida. I antenna a L rovesciato. N omgekeerde L-antenne. P antena L. S inverterat-L-antenn. (712)

66. **leaky-wave antenna** : an antenna whose radiation is produced by a continuous or quasi-continuous leaking of energy from a waveguide supporting a fast wave. ★ antenne à onde de fuite → *antenne 30.* R антенна вытекающей волны. D Leckwellenantenne. E antena de pérdida de onda. I antenna a onda leaky. N lekgolfantenne. P antena z falą wyciekającą. S läckvågsantenn. (712)

67. **log-periodic antenna** : a frequency-independent antenna which consists of radiating elements whose dimensions and spacings are approximately proportional to the terms of a geometric series. ★ antenne log-périodique → *antenne 99.* R логопериодическая антенна. D logarithmisch-periodische Antenne. E antena log-periódica. I antenna log-periodica. N log-periodiek antenne. P antena logarytmiczno-periodyczna. S logperiodisk antenn. (712)

68. **long-wire antenna** : a wire antenna which is long in comparison with the operating wavelength, and is fed at one end. ★ antenne à longs fils → *antenne 28.* R длинная проволочная антенна. D Langdrahtantenne. E antena de hilo largo. I antenna a fili lunghi. N langedraadantenne. P antena długoprzewodowa. S långtrådsantenn. (712)

69. **loop antenna** : an antenna whose configuration is that of a loop with one or more turns. ★ (antenne) cadre → *cadre 1.* R рамочная антенна. D Rahmenantenne. E antena de lazo; antena de cuadro. I antenna ad anello; antenna a telaio. N raamantenne. P antena ramowa. S ramantenn. (712)

70. **low noise antenna** (*Syn.* low temperature antenna) : a low loss receiving antenna which is usually very directive, and whose side lobes are reduced in such a way as to lower its noise temperature when it is installed on the Earth's surface and its major lobe is directed above the horizon. ★ antenne à faible (température de) bruit → *antenne 14.* R малошумящая антенна; низкотемпературная антенна. D rauscharme Antenne. E antena de bajo ruido; antena de baja temperatura. I antenna a basso rumore. N lage-ruisantenne; lage-temperatuurantenne. P antena małoszumna. S lågbrusantenn. (712)

71. **low temperature antenna** (*Syn.* low noise antenna) : → *antenna 70*

72. **Luneburg lens antenna** : an antenna composed of a spherically symmetric (radio wave) lens, whose index of refraction varies only in a radial direction, and a feed located on or near the surface of the sphere. *Notes. 1* — There are a number of modified Luneburg lenses including an axially symmetric cylindrical lens. *2* — The Luneburg lens may be constructed of an artificial dielectric. ★ antenne de Luneburg → *antenne 69.* R антенна с линзой Люнебурга. D Luneburg-Linsenantenne. E antena lente de Luneburg. I lente Luneburg. N Luneburg-lensantenne. P antena soczewkowa Luneburga. S Luneburg-lins. (712)

73. **magnetic core antenna** : an antenna with several turns of wire around a magnetic core and acting as a loop antenna. ★ antenne à noyau magnétique → *antenne 29.* R антенна с магнитным сердечником. D Magnetkernantenne. E antena de núcleo magnético. I antenna a nucleo magnetico. N antenne met magnetische kern. P antena z rdzeniem magnetycznym. S ramantenn med magnetkärna. (712)

74. **master (broadcasting) antenna** (*Syn.* MATV) : → *MATV 1*

75. **microstrip antenna** : an antenna which consists of a thin metallic conductor bonded to a thin dielectric substrate which is in turn bonded to a ground plane. ★ antenne microruban → *antenne 101.* R микрополосковая антенна. D Microstrip-Antenne; Streifenleiterantenne. E antena de microcinta. I antenna a microstriscia. N microstripantenne. P antena mikropaskowa. S mikrostripantenn. (712)

76. **multi-beam antenna** (*Syn.* multi-pattern antenna) : an antenna with several independent ports, having simultaneously several different radiation patterns, each pattern corresponding to a different port. ★ antenne multidiagramme → *antenne 103.* R многолучевая антенна. D Mehrstrahlantenne; Antenne mit Mehrfachcharakteristik. E antena multihaz; antena multidiagrama. I antenna multifascio. N meerbundelantenne. P antena wielowiązkowa. S flerlobsantenn. (712)

77. **multimode antenna** : an antenna, generally of electromagnetic horn type, whose aperture illumination is obtained by means of two or more waveguide-type modes of

propagation. *Note.* — Often this type of antenna is used when nearly identical E and H plane radiation patterns are required. ★ antenne multimode → *antenne 106.* R многомодовая антенна. D Multimodenantenne. E antena multimodo. I antenna multimodale. N meermode-antenne. P antena wielomodowa. S flermodsantenn. (712)

78. **multi-pattern antenna** (*Syn.* multi-beam antenna) : → *antenna 76*

79. **(multiple) antenna system** : → *system 120*

80. **multiple band antenna** : an antenna designed to operate without modification in any of a number of pre-set radio frequency bands. ★ antenne multibande → *antenne 102.* R диапазонная антенна. D Mehrbereichsantenne; Mehrbandantenne. E antena de banda múltiple; antena multibanda. I antenna multibanda. N meerbandantenne. P antena wielozakresowa. S flerbandsantenn. (712)

81. **musa antenna** (*Syn.* multiple-unit steerable array) : → *array 13*

82. **null-steering antenna** : a directional-null antenna having in its radiation pattern one or more nulls that can be steered, generally by electrical means. ★ antenne à zéro orientable → *antenne 47.* R антенна с управляемым нулем. D Antenne mit schwenkbaren Nullstellen. E antena de mínimo orientable. I antenna a scansione di zero. N antenne met een bestuurbare nulrichting. P antena ze sterowanymi zerami. S antenn med styrbar nollriktning. (712)

83. **off-set paraboloidal reflector antenna** : a paraboloidal reflector antenna using a portion of a paraboloid which is not symmetrical with respect to its focal axis, and does not include the vertex, so that the blockage of the aperture by the feed is reduced or eliminated. ★ antenne parabolique à source décalée → *antenne 110.* R неосесимметричная параболоидальная рефлекторная антенна. D Offset-Paraboloidreflektorantenne. E antena de reflector parabólico fuera de eje. I antenna a riflettore parabolico offset. N offset parabolische reflectorantenne. P antena z reflektorem paraboidalnym o niepełnym wykorzystaniu. S offsetmatad parabolantenn. (712)

84. **omnidirectional antenna** (in a given plane) : an antenna having an essentially non-directional radiation intensity in a given plane, usually horizontal, referred to a specified polarization. ★ antenne équidirective → *antenne 91.* R ненаправленная антенна (в заданной плоскости). D Rundstrahler (in einer bestimmten Ebene). E antena omnidireccional (en un plano dado). I antenna omnidirezionale. N rondstraalantenne; rondstraler. P antena dookólna (w danej płaszczyznie). S rundstrålande antenn. (712)

85. **parabolic cylinder antenna** : a reflector antenna composed of a portion of a parabolic cylinder and one or more feeds placed along its focal line. ★ antenne cylindro-parabolique → *antenne 68.* R параболическая цилиндрическая антенна. D Zylinderparabolantenne. E antena cilindro-parabólica. I antenna a cilindro parabolico. N parabolische cilinderantenne. P antena paraboliczno-cylindryczna. S parabolisk cylinderantenn. (712)

86. **paraboloidal reflector antenna** : an antenna consisting of a paraboloidal reflector and a feed placed in the vicinity of its focus. ★ antenne parabolique → *antenne 109.* R параболоидальная рефлекторная антенна. D Paraboloidreflektorantenne. E antena de reflector parabólico. I antenna a riflettore parabolico. N parabolische reflectorantenne. P antena z reflektorem paraboidalnym. S parabolantenn. (712)

87. **path antenna gain** : → *gain 29*

88. **pencil-beam antenna** : an antenna having a narrow beam that is approximately circular in transverse cross-section. ★ antenne à faisceau-crayon → *antenne 22.* R антенна с карандашным лучом. D Nadelstrahlantenne. E antena de haz tipo lápiz. I antenna a fascio stretto. N staafbundelantenne. P antena o wiązce szpilkowej. S pennlobsantenn. (712)

89. **periscope antenna** : an antenna consisting of a very directive feed located close to ground level and oriented so that its beam illuminates an elevated passive reflector which is oriented so as to produce an horizontal beam. ★ antenne périscope → *antenne 112.* R перископическая антенна. D Periskopantenne. E antena periscopio. I antenna a periscopio. N periscoopantenne. P antena peryskopowa. S periskopantenn. (712)

90. **phased array antenna** : an array antenna whose beam direction or radiation pattern is controlled primarily by the relative phase of excitation of the different radiating elements of the array. ★ (antenne en) réseau à commande de phase → *réseau 4.* R фазированная антенная решетка; ФАР. D phasengesteuerte Gruppenantenne. E conjunto de antena en fase. I schiera a scansione di fase. N fasegestuurd antennestelsel. P zestaw antenowy fazowany. S fasstyrd gruppantenn. (712)

91. **pill-box antenna** : a reflector antenna having a cylindrical reflector enclosed by two parallel conducting plates perpendicular to the cylinder and spaced less than one wavelength apart. ★ antenne pill-box → *antenne 114.* R сегментно-параболическая антенна. D Pillbox-Antenne; Segmentantenne. E antena pill-box. I antenna pill box. N doosvormige antenne. P antena typu "pill-box". S pillbox-antenn. (712)

92. **polarization of an antenna** : → *polarization 36*

93. **quadrant antenna** : a symmetrical antenna having two equal conductive elements forming an horizontal right-angled "V", and having an essentially omni-directional radiation pattern. ★ antenne quadrant → *antenne 116.* R квадрантная антенна. D Quadrantantenne; Quad-Antenne. E antena cuadrante. I antenna a quadrante. N kwadrantantenne. P antena kwadrantowa. S kvadrantantenn. (712)

94. **reactive reflector antenna** (*Syn.* reflective array antenna) : → *antenna 95*

95. **reflective array antenna** (*Syn.* reactive reflector antenna) : an antenna consisting of a feed and an array of reflecting elements arranged on a surface and adjusted so that the phase of the reflected wave from each element is such that a prescribed radiation pattern is obtained. *Note.* — The reflecting elements are generally waveguides containing electrical phase shifters and terminated by short circuits. ★ antenne catadioptrique → *antenne 58.* R рефлекторная антенная решетка; реактивная рефлекторная антенна. D Reflektorgruppenantenne. E antena de reflector reactivo; antena catadióptico. I antenna a riflettori reattivi (catadiottrica). N antenne met reactieve reflector. P antena z zestawem odbijającym. S reflekterande gruppantenn. (712)

96. **reflector antenna** : an antenna comprising at least one reflector. *Note.* — The use of the term "reflector antenna" is generally restricted to those cases where most of the radiated power emanates from a properly illuminated reflector. ★ antenne à réflecteur → *antenne 36.* R рефлекторная антенна. D Reflektorantenne. E antena de reflector. I antenna a riflettore. N reflectorantenne. P antena reflektorowa. S reflektorantenn. (712)

97. **reversible antenna** : a directive antenna such that the direction of the major lobe may be reversed by changing the feeding arrangements. ★ antenne réversible → *antenne 119.* R реверсивная антенна. D Antenne mit umkehrbarer Keule. E antena reversible. I antenna reversibile. N reversibele antenne. P antena odwracalna. S lobvändbar antenn. (712)

98. **rhombic antenna** : a symmetrical travelling wave antenna composed of long-wire radiators forming the sides of a rhombus with a balanced feed at one end and terminated by an appropriate impedance at the other end. ★ (antenne) losange → *losange 1.* R ромбическая антенна. D Rhombusantenne. E antena rómbica. I antenna a rombo. N ruitantenne. P antena rombowa. S rombantenn. (712)

99. **rotating-field antenna** : an omnidirectional antenna such that the value of its phase pattern for any direction in a given plane usually horizontal, is practically equal to the angle characterizing this direction. ★ antenne à champ tournant → *antenne 10.* R антенна с вращающимся полем. D Drehfeldantenne. E antena de campo rotante. I antenna a campo rotante. N draaiveldantenne. P antena z polem obrotowym. S faspejlantenn. (712)

100. **scanning antenna** : an antenna whose beam regularly scans a certain sector of space. ★ antenne à balayage → *antenne 8.* R сканирующая антенна. D Suchantenne. E antena de barrido. I antenna a scansione. N ruimtelijk aftastende antenne. P antena przeszukująca. S avsökande antenn. (712)

101. **series-loaded antenna** : an antenna whose radiating elements include one or more reactances in series to modify the current distribution. ★ antenne à charge série → *antenne 11.* R последовательно-нагруженная антенна. D Antenne mit Reaktanzen in Serie. E antena con carga serie. I antenna caricata in serie. N antenne met serie-inductantie (verlengspoel). P antena z obciążeniem szeregowym. S seriebelastad antenn. (712)

102. shaped-beam antenna : an antenna which is designed to have a prescribed radiation pattern differing significantly from that obtained from a uniform amplitude and phase aperture illumination of the antenna. ★ antenne à faisceau modelé → *antenne 18.* R антенна с профилированным лучом. D Antenne mit geformter Richtcharakteristik. E antena de haz modelado. I antenna a fascio sagomato. N voorgevormde-bundelantenne. P antena z wiązką kształtowaną. S antenn med formad lob. (712)

103. shielded-loop antenna : an antenna consisting of a tubular electrostatic shield formed into a loop with a small gap, and containing one or more wire turns for external coupling. ★ cadre blindé → *cadre 4.* R экранированная рамочная антенна. D geschirmte Rahmenantenne. E antena de cuadro blindado. I antenna ad anello schermato. N afgeschermde raamantenne. P antena ramowa ekranowana. S skärmad ramantenn. (712)

104. signal processing antenna : an antenna system incorporating active circuits associated with radiating elements which perform on received signals functions such as multiplication, storage, correlation and time modulation. ★ antenne à traitement de signal → *antenne 45.* R антенна с обработкой сигнала. D signalverarbeitende Antenne. E antena con procesamiento de señal. I antenna con trattamento di segnale. N signaalbewerkingsantenne. P antena przetwarzająca sygnał. S signalbehandlande antenn. (712)

105. single-polarized antenna : an antenna intended to radiate or receive radio waves with only one specified polarization. ★ antenne à simple polarisation → *antenne 42.* R антенна с единственной поляризацией. D einfach polarisierte Antenne. E antena de polarización simple. I antenna a singola polarizzazione. N enkelvoudig gepolariseerde antenne. P antena o polaryzacji pojedynczej. S enkelpolariserad antenn. (712)

106. slewing (array) antenna : a planar array capable of being adjusted so that the axis of the main lobe makes an angle, generally small, with a plane of symmetry of the array. ★ antenne à tir dévié → *antenne 44.* R антенная решетка с поворотом диаграммы направленности. D Planargruppenantenne mit abgelenktem Strahl. E antena de haz desviado. I antenna a fascio deviato. N antenne met zwaaibare bundel. P zestaw (antenowy) z odchylanym listkiem. S ..... (712)

107. slot antenna : an antenna consisting of one or more slot radiators. ★ antenne à fente(s) → *antenne 24.* R щелевая антенна. D Schlitzantenne. E antena de ranura. I antenna a fessura. N sleufantenne. P antena szczelinowa. S slitsantenn. (712)

108. spherical reflector antenna : an antenna consisting of a spherical reflector and a feed, and generally including compensation of phase errors in the reflector aperture. ★ antenne à réflecteur sphérique → *antenne 41.* R сферическая рефлекторная антенна. D spärische Reflektorantenne. E antena de reflector esférico. I antenna a riflettore sferico. N bolvormige reflectorantenne. P antena z reflektorem sferycznym. S sfärisk reflektorantenn. (712)

109. split antenna : an antenna consisting of two groups of radiating elements having identical radiation properties and fed either in parallel or separately. *Note.* — With such an antenna, transmission may be continued on one group when the other group happens to be faulty. ★ antenne dédoublable → *antenne 70.* R разветвленная антенна. D Doppelantenne; Zweifachantenne. E antena partida; antena desdoblada. I antenna sdoppiabile. N dubbelantenne. P antena rozdzielona. S uppdelad antenn. (712)

110. standing wave antenna : an antenna for which the fields and currents that produce the radiation pattern can be represented by two or more travelling waves propagating along the antenna in both directions. ★ antenne à onde stationnaire → *antenne 33.* R антенна стоячей волны. D Antenne mit stehenden Wellen (z.B. Drahtantennen). E antena de ondas estacionarias. I antenna a onda stazionaria. N staande-golfantenne. P antena z falą stojącą. S stående vågsantenn. (712)

111. steerable-beam antenna : an antenna in which the direction of the main lobe can be changed either by controlling the excitation of the different elements or by mechanical means other than moving the entire antenna. ★ antenne à faisceau orientable → *antenne 19.* R антенна с управляемым лучом. D Antenne mit schwenkbarer Strahlungskeule. E antena de haz orientable. I antenna a fascio orientabile. N antenne met bestuurbare bundel. P antena z wiązką sterowaną. S antenn med styrbar lob. (712)

112. super-turnstile antenna : an antenna similar to a turnstile antenna formed from one or more tiers of radiating elements arranged around a common vertical axis each consisting of a pair of bat-wing antennas with their vertical slots at right angles and fed in phase quadrature. ★ (antenne) super-tourniquet → *super-tourniquet 1.* R многоэтажная турникетная антенна. D Super-Drehkreuzantenne; Superturnstile-Antenne. E antena supermolinete. I antenna superturnstile. N super-tourniquetantenne. P antena superkołowrotowa. S rosettantenn. (712)

113. surface-wave antenna : an end-fire antenna whose radiation may be considered to be produced by a slow wave travelling along the surface of the antenna or a virtual surface associated with the antenna. ★ antenne à onde de surface → *antenne 31.* R антенна поверхностной волны. D Oberflächenwellenantenne. E antena de onda superficial. I antenna a onda superficiale. N oppervlaktegolfantenne. P antena o fali powierzchniowej. S ytvågsantenn. (712)

114. symmetrical antenna : an antenna constructed from two geometrically symmetrical parts with respect to a plane considered to be a zero potential plane, and intended to be fed directly from a balanced transmission line. ★ antenne symétrique → *antenne 123.* R симметричная антенна. D Antenne mit symmetrischem Fußpunkt. E antena simétrica. I antenna simmetrica. N symmetrische antenne. P antena symetryczna. S symmetrisk antenn. (712)

115. T antenna : a monopole antenna consisting of one conductor perpendicular to the conducting surface, connected at the unfed end to the mid-point of a conductor parallel to that surface ; each of the two conductors may consist of several wires. ★ antenne en T → *antenne 86.* R T-образная антенна. D T-Antenne. E antena en T. I antenna a T. N T-antenne. P antena typu T. S T-antenn. (712)

116. top-loaded antenna : a monopole antenna, generally vertical and short compared to its wavelength, incorporating an end capacitor. ★ antenne à capacité terminale → *antenne 9.* R антенна с емкостной нагрузкой. D Antenne mit Dachkapazität. E antena con capacidad de tope. I antenna caricata (capacitivamente). N antenne met topcapaciteit. P antena z obciążeniem końcowym. S toppbelastad antenn. (712)

117. travelling wave antenna : an antenna for which the fields or currents that produce the radiation pattern can be represented by a travelling wave propagating in one direction along the antenna. ★ antenne à onde progressive → *antenne 32.* R антенна бегущей волны. D Antenne mit fortschreitenden Wellen (z.B. Rhombusantenne mit Schluckwiderstand). E antena de onda progresiva. I antenna a onda progressiva. N lopende-golfantenne. P antena z falą bieżącą. S vandringsvågsantenn. (712)

118. turnstile antenna : an antenna formed from one or more radiating elements arranged along a common axis, each consisting of two dipoles perpendicular to the axis and to each other with their axes intersecting at their midpoints and fed in phase quadrature. ★ (antenne) tourniquet → *tourniquet 1.* R турникетная антенна. D Drehkreuzantenne; Kreuzdipol. E antena molinete. I antenna turnstile. N tourniquetantenne. P antena kołowrotowa. S vändkorsantenn. (712)

119. umbrella antenna : a top loaded antenna for which the end capacitor consists of wire elements sloping down towards the ground but not connected to it. *Note.* — An umbrella antenna is different from an umbrella reflector antenna. ★ antenne parapluie → *antenne 111.* R зонтичная антенна. D Schirmantenne. E antena paraguas. I antenna a ombrello. N paraplu-antenne. P antena parasolowa. S paraplyantenn. (712)

120. umbrella reflector antenna : an antenna constructed in a form similar to an umbrella which can be mounted in a space vehicle and unfolded in space to form a large reflector antenna. *Note.* — An umbrella reflector antenna is different from an umbrella antenna. ★ antenne (à réflecteur) parapluie → *antenne 39.* R зонтичная рефлекторная антенна. D Schirmreflektorantenne. E antena con reflector paraguas. I antenna a riflettore a ombrello. N paraplu-reflectorantenne. P antena z reflektorem parasolowym. S paraplyreflektorantenn. (712)

121. whip antenna : a thin flexible monopole antenna used for example on vehicles or portable equipment. ★ (antenne) fouet → *fouet 1.* R гибкая штыревая антенна.

D Peitschenantenne. E antena látigo. I baffo. N sprietantenne. P antena prętowa. S sprötantenn. (712)

122. **wide-band antenna** (*Syn.* broadband antenna) : → *antenna 24*
123. **Yagi antenna** (*Syn.* Yagi-Uda antenna) : → *antenna 124*
124. **Yagi-Uda antenna** (*Syn.* Yagi antenna) : an end-fire array consisting of a driven element, one reflector element and one or more director elements. *Note.* — In practice, the reflector element may consist of an assembly of elements or a reflecting surface. ★ (antenne) Yagi → *Yagi 1.* R антенна Уда-Яги. D Yagi-Uda-Antenne; Yagi-Antenne. E antena Yagi-Uda; antena Yagi. I antenna Yagi; antenna Yagi-Uda. N Yagi-Uda-antenne; Yagi-antenne. P antena Yagi; antena Yagi-Uda. S Yagi-antenn. (712)
125. **zone-plate lens antenna** (*Syn.* Fresnel lens antenna) : → *antenna 56*

antero-posterior

1. **antero-posterior projection** : → *projection 1*

anti-aliasing

1. **anti-aliasing** : correction intended to reduce the aliasing. ★ lissage → *lissage 3.* R подавление помехи дискретизации. (723)

anti-climbing

1. **anti-climbing device** (*Syn.* anti-climbing guard) : → *guard 1*
2. **anti-climbing guard** : → *guard 1*

anticoincidence

1. **anticoincidence** : a general term referring to an event or a pulse used to prevent a circuit or instrument from providing an output signal corresponding to a signal (or signals) at a specified input (or inputs) within a specified time interval. ★ anticoïncidence → *anticoïncidence 1.* R антисовпадение. D Antikoinzidenz. E anticoincidencia. I anticoincidenza. N anticoïncidentie. P antykoincydencja. S antikoincidens. (391)
2. **anticoincidence selector** : → *selector 1*

anti-collision

1. **anti-collision light** : → *light 3*

anti-Compton

1. **anti-Compton gamma ray spectrometer** : → *spectrometer 2*

antiferromagnetic

1. **antiferromagnetic substance** : → *substance 1*

antiferromagnetism

1. **antiferromagnetism** : a phenomena by which, in the absence of an applied magnetic field, the magnetic moments of identical neighbouring atoms or ions are held, due to their interactions, in a cancelling arrangement such that the resultant magnetic moment is zero; the alignment of the magnetic moments increases with the applied magnetic field strength. ★ antiferromagnétisme → *antiferromagnétisme 1.* R антиферромагнетизм. D Antiferromagnetismus. E antiferromagnetismo. I antiferromagnetismo. N antiferromagnetisme. P antyferromagnetyzm. S antiferromagnetism. (121)

anti-jamming

1. **anti-jamming array** : → *array 3*

antinode

1. **antinode** (*Syn.* standing-wave maximum) : → *maximum 63*
2. **antinode** : point, line or surface in a standing wave where some specified characteristic of the wave field has maximum amplitude. *Note.* — The appropriate modifier should be used before the word "antinode" to signify the type that is intended ; e.g. displacement antinode, particle velocity antinode, sound pressure antinode. ★ ventre → *ventre 2.* R пучность. D (Schwingungs-) Bauch. E vientre. I ventre. N buik. P przeciwwęzeł. S buk; antinod. (101,801)

anti-noise

1. **anti-noise microphone** : → *microphone 1*

antioxidant

1. **antioxidant** (*Syn.* oxidation inhibitor) : an additive incorporated in an insulating solid or liquid to reduce or delay its degradation by oxidation. ★ antioxydant → *antioxydant 1.* R антиокислитель; ингибитор окисления. D Antioxidans. E antioxidante; inhibidor de oxidación. I antiossidante; inibitore di ossidazione. N anti-oxidant. P przeciwutleniacz. S antioxidant. (212,212)

anti-parallel

1. **anti-parallel connection** : → *connection 1*
2. **pair of anti-parallel arms** : → *arm 9*

antiparticle

1. **antiparticle** : the antiparticle of an elementary particle has the same mass and spin as the particle, with an electric charge (if any) that is opposite in sign. Examples are : electron and positron, proton and antiproton. ★ antiparticule → *antiparticule 1.* R античастица. D Antiteilchen. E antipartícula. I antiparticella. N antideeltje. P antycząstka. S antipartikel. (881)

antipodal

1. **antipodal focussing** : → *focusing 1*

antipollution

1. **antipollution-type insulator** : → *insulator 1*

anti-pumping

1. **anti-pumping device** : → *device 4*

antireflection

1. **antireflection coating** : → *coating 1*

anti-resonance

1. **anti-resonance** : phenomenon of a system in forced oscillation such that any change in the frequency of excitation, however small, results in an increase in a response of the system. *Note.* — The quantity that is the measure of response must be indicated; for example, velocity antiresonance. ★ antirésonance → *antirésonance 1.* R антирезонанс. D Antiresonanz. E antirresonancia. I antirisonanza. N antiresonantie. P antyrezonans. S antiresonans. (801)
2. **anti-resonance frequency** : → *frequency 8*

anti-scatter

1. **anti-scatter grid** : → *grid 1*

anti-sidetone

1. **anti-sidetone device** : → *device 5*

anti-slip

1. **anti-slip brake** : → *brake 1*
2. **anti-slip device** : → *device 6*
3. **anti-slip magnet valve** : → *valve 1*
4. **anti-slip serrations** : → *serrations 1*

antistatic

1. **antistatic (agent)** : → *agent 1*

anti-Stokes

1. **anti-Stokes luminescence** : → *luminescence 1*

antisymmetric

1. **antisymmetric frequency of a monolithic bipole vibrator** : → *frequency 9*

anti-transmit/receive

1. **anti-transmit/receive tube** (*Syn.* A.T.R. tube) : → *tube 5*

anvil

1. **crimp anvil** : that part of a crimping tool which supports the conductor barrel or ferrule during crimping. ★ berceau de sertissage → *berceau 3.* R ложе обжимного инструмента. D Crimp-Amboß. E matriz de engaste. I culla di crimpatura; matrice di crimpatura. N aambeeld. P kowadełko (zagniataka). S underback. (581)

APD

1. **APD** (*Syn.* avalanche photodiode) : → *photodiode 1*

aperiodic

1. **aperiodic** : transient and non-oscillating. ★ apériodique → *apériodique 2.* **R** апериодический. **D** aperiodisch. **E** aperiódico. **I** aperiodico. **N** aperiodiek. **P** aperiodyczny. **S** aperiodisk. (101)
2. **aperiodic component of short-circuit current** : → *component 4*
3. **aperiodic time constant** : → *time constant 1*

aperture

1. **aperture** (of an antenna) (*Syn.* radiating aperture (of an antenna)) : for an antenna having one beam, a plane surface close to the antenna and normal to the axis of the beam, through which the major part of the radiated power passes. *Note.* — For certain types of antennas such as horns or reflector antennas, the aperture may practically be considered as an orthogonal projection of the radiating part of the antenna. ★ ouverture (rayonnante) → *ouverture 25.* **R** раскрыв (антенны); излучающий раскрыв. **D** Apertur (einer Antenne); strahlende Apertur (einer Antenne). **E** apertura (de una antena); apertura radiante (de una antena). **I** apertura (di un'antenna); apertura irradiante. **N** opening; apertuur. **P** apertura (anteny); apertura promieniująca (anteny). **S** apertur. (712)
2. **aperture** (of a facsimile transmitter) : the opening through which light passes and which effectively controls the size of the scanning spot at facsimile transmission. ★ ouverture → *ouverture 16.* **R** апертура (факсимильного передатчика). **D** Apertur (eines Faksimile-Senders). **E** apertura (de un emisor de telecopia). **I** apertura (del trasmettitore). **N** apertuur (van een facsimilezender). **P** otwór (nadajnika symilograficznego). **S** sändarapertur. (721)
3. **aperture** (of a facsimile receiver) : the final opening through which light-modulated by the received picture facsimile signals passes and an image of which is focussed on a photosensitive recording medium. ★ ouverture → *ouverture 17.* **R** апертура (факсимильного приемника). **D** Apertur (eines Faksimile-Empfängers). **E** apertura (de un receptor de telecopia). **I** apertura (del ricevitore). **N** apertuur (van een facsimile-ontvanger). **P** otwór (odbiornika symilograficznego). **S** mottagarapertur. (721)
4. **aperture blockage** : → *blockage 1*
5. **aperture blocking factor** : → *factor 11*
6. **aperture colour** : → *colour 4*
7. **aperture correction** : → *correction 1*
8. **aperture distortion** : → *distortion 5*
9. **aperture distortion** : → *distortion 6*
10. **aperture illumination** : → *illumination 1*
11. **aperture illumination efficiency** : → *efficiency 3*
12. **coupling aperture** (*Syn.* coupling slot; coupling hole) : an aperture in the wall of a cavity resonator or a waveguide for the purpose of transferring energy to or from an external circuit. ★ ouverture de couplage → *ouverture 18.* **R** отверстие связи; щель связи; окно связи. **D** Koppelöffnung; Koppelschlitz; Koppelloch. **E** abertura de acoplamiento. **I** apertura di accoppiamento; fenditura di accoppiamento. **N** koppelgat. **P** otwór sprzęgający; szczelina sprzęgająca. **S** kopplingshål. (726)
13. **diaphragm aperture** : diaphragm used to limit the electron beam diameter and the aperture angle. ★ diaphragme d'ouverture → *diaphragme 3.* **R** отверстие в диафрагме. **D** Aperturblende. **E** diafragma de abertura. **I** diaframma di apertura. **N** diafragmaopening. **P** przesłona otworu. **S** bländare. (841)
14. **electron beam aperture** : angle which the envelope of the electron beam forms with its axis at the crossover. ★ ouverture du faisceau → *ouverture 19.* **R** апертура электронного луча. **D** Strahlapertur. **E** abertura de haz electrónico. **I** apertura del fascio elettronico. **N** elektronenstraalopeningshoek. **P** rozbieżność wiązki. **S** strålvinkel. (841)
15. **launch numerical aperture** (*Syn.* LNA (abbreviation)) : the numerical aperture of an optical system used to couple or launch power into an optical fibre. ★ ouverture numérique d'injection → *ouverture 22.* **R** числовая апертура возбуждения. **D** Anregungs-Numerische Apertur; LNA (Abkürzung). **E** apertura numérica de inyección; LNA (abreviatura). **I** apertura numerica di lancio. **N** numerieke apertuur van de aanstraling; aanstralings numerieke apertuur. **P** apertura numeryczna sprzężenia. **S** numerisk inkopplingsapertur. (731)
16. **maximum theoretical numerical aperture** : a theoretical value of numerical aperture calculated using the values of refractive index of the core and cladding given by :

$$NA_{max\ th} = (n_1^2 - n_2^2)^{1/2}$$

where n_1 is the maximum refractive index of the core, and n_2 is the refractive index of the innermost homogeneous cladding. ★ ouverture numérique théorique maximale → *ouverture 23.* **R** максимальная теоретическая числовая апертура. **D** maximale theoretische numerische Apertur. **E** apertura numérica teórica máxima. **I** apertura numerica massima teorica. **N** maximale theoretische numerieke apertuur. **P** apertura numeryczna teoretyczna maksymalna. **S** teoretisk apertur. (731)
17. **numerical aperture** (*Syn.* NA (abbreviation)) : the sine of the vertex angle of the largest cone of meridional rays that can enter or leave an optical system or element, multiplied by the refractive index of the medium in which the vertex of the cone is located. ★ ouverture numérique → *ouverture 21.* **R** числовая апертура; NA (сокращение). **D** numerische Apertur; NA (Abkürzung). **E** apertura numérica; NA (abreviatura). **I** apertura numerica; NA (abbreviazione). **N** numerieke apertuur; NA (afkorting). **P** apertura numeryczna. **S** numerisk apertur. (731)
18. **radiating aperture** (*Syn.* aperture) : → *aperture 1*
19. **tone control aperture** : an aperture designed to permit variations in the amount of light reaching the recording material in relation to the magnitude of the received facsimile signals and the characteristics of the photosensitive recording medium. ★ diaphragme des teintes → *diaphragme 2.* **R** полутоновая апертура; полутоновая диафрагма. **D** Tonwertblende. **E** apertura de control de tono. **I** diaframma delle tonalità. **N** besturingsopening voor de toon; toner. **P** diafragma odniesienia. **S** bländare. (721)

APL

1. **APL** (*Syn.* average picture-signal level) : → *level 4*

apoapsis

1. **apoapsis** (*Syn.* apofocus) : the point in the orbit of a satellite or planet which is at a maximum distance from the centre of mass of the primary body. ★ apoapside → *apoapside 1.* **R** апоапсида; апоастр. **D** Apoapside. **E** apoápside; ápside superior; apoastro. **I** apside superiore. **N** apoapsis; apofocus. **P** apofokus. **S** apoapsis. (725)

apofocus

1. **apofocus** (*Syn.* apoapsis) : → *apoapsis 1*

apogee

1. **altitude of the apogee** : → *altitude 1*
2. **apogee** : the point in the orbit of an earth satellite which is at a maximum distance from the centre of the Earth. *Note.* — The apogee is the apoapsis of an earth satellite. ★ apogée → *apogée 2.* **R** апогей. **D** Apogäum. **E** apogeo. **I** apogeo. **N** apogeum. **P** apogeum. **S** apogeum. (725)

apparatus

1. **apparatus of category "ia"** : an intrinsically-safe electrical apparatus which is incapable of causing ignition in normal operation, and with a single fault and with any combination of two faults applied. ★ matériel de catégorie "ia" → *matériel 2.* **R** оборудование категории "ia". **D** Betriebsmittel der Kategorie "ia". **E** material de categoría "ia". **I** costruzione di categoria "ia". **N** elektrisch materieel van de categorie "ia". **P** urządzenia kategorii "ia". **S** apparat av kategori "ia". (426)
2. **apparatus of category "ib"** : an intrinsically-safe electrical apparatus which is incapable of causing ignition in normal operation and with any single fault applied. ★ matériel de catégorie "ib" → *matériel 3.* **R** оборудование категории "ib". **D** Betriebsmittel der Kategorie "ib". **E** material de categoría "ib". **I** costruzione di categoria "ib". **N** elektrisch materieel van de categorie "ib". **P** urządzenia kategorii "ib". **S** apparat av kategori "ib". (426)
3. **associated electrical apparatus** (connected to intrinsically-safe circuits) : an electrical apparatus in which the circuits or parts of circuits are not all necessarily intrinsically

safe but which contains circuits that can affect the safety of the intrinsically-safe circuits associated with it. ★ matériel électrique associé → *matériel 8.* R связанное электрическое оборудование (присоединенное к искробезопасным цепям). D zugehöriges elektrisches Betriebsmittel. E material eléctrico asociado (en circuitos de seguridad intrinseca). I costruzione elettrica associata (a circuiti a sicurezza intrinseca). N bijbehorend elektrisch materieel (verbonden met intrinsiek veilige stroomkringen). P urządzenia związane (z obwodami iskrobezpiecznymi). S tillhörande apparat. (426)

4. **capacitor-discharge apparatus** : radiographic apparatus in which the electric energy is supplied to the X-ray tube by the discharge of a high-voltage capacitor. ★ générateur à condensateur → *générateur 3.* R аппарат с разрядной емкостью; аппарат с разрядным конденсатором. D Kondensator-Diagnostik-Generator. E generador por condensador. I apparecchio a scarica di condensatore. N condensatorontladingstoestel. P generator pojemnościowy. S kondensatorapparat. (881)

5. **duplex apparatus** : apparatus comprising a transmitting and receiving part, the arrangement of which allows for duplex operation. ★ appareil (fonctionnant en) duplex → *appareil 44.* R дуплексный аппарат. D Duplexapparat. E aparato (que funciona en) dúplex. I apparecchio per funzionamento in duplex. N duplextoestel. P aparat dupleksowy. S duplexutrustning. (721)

6. **electrical apparatus for explosive atmospheres** (*Syn.* explosion-protected electrical apparatus; hazardous location equipment) : electrical apparatus constructed in such a way as not to produce an ignition of the surrounding explosive atmosphere, under specified conditions. *Note.* — IEC Publication 79 standardizes this apparatus for explosive gas atmospheres. ★ matériel électrique pour atmosphères explosives → *matériel 9.* R взрывозащищенное электрооборудование. D elektrisches Betriebsmittel für explosionsgefährdete Bereiche; explosionsgeschütztes elektrisches Betriebsmittel. E material eléctrico para atmósferas explosivas; material eléctrico protegido contra las explosiones; equipo para locales peligrosos. I costruzioni elettriche per atmosfere esplosive; apparecchi elettrici protetti contro le esplosioni; materiali per luoghi pericolosi. N elektrisch materieel voor plaatsen met ontploffingsgevaar; explosieveilig elektrisch materieel; elektrisch materieel voor gevaarlijke gebieden. P urządzenia elektryczne przeciwwybuchowe. S elmateriel för explosiv atmosfär. (426)

7. **explosion-protected electrical apparatus** (*Syn.* electrical apparatus for explosive atmospheres) : → *apparatus 6*

8. **full-wave apparatus** (*Syn.* two-peak generator) : X-ray apparatus in which both half cycles of the high voltage transformer output are applied to the X-ray tube in the same polarity by rectification. ★ générateur à deux alternances → *générateur 4.* R полупериодный аппарат; двухпиковый генератор. D Zweipulsgenerator. E generador de onda completa; generador de dos crestas. I apparecchio a onda piena; generatore bifase. N tweepulstoestel; tweepulsgenerator. P generator rentgenowski dwupulsowy; generator rentgenowski pełnofalowy. S tvåpulsapparat. (881)

9. **half-duplex apparatus** : apparatus comprising a transmitting and receiving part, the arrangement of which allows for transmission in both directions but not simultaneously. ★ appareil (fonctionnant) à l'alternat → *appareil 43.* R полудуплексный аппарат. D Halbduplexapparat. E aparato (que funciona) alternante; aparato semidúplex. I apparecchio per funzionamento in semiduplice. N simplextoestel. P aparat naprzemienny. S simplexutrustning. (721)

10. **half-wave apparatus** (*Syn.* single-peak generator) : X-ray apparatus in which alternate half-cycles of the high voltage transformer output are not used, either because of the unidirectional conductance of the X-ray tube (self-rectifying tube) itself or because a rectifier is connected in series with the X-ray tube. ★ générateur demi-onde → *générateur 20.* R полупериодный аппарат; однопиковый генератор. D Einpulsgenerator. E generador de semionda; generador de una cresta. I apparecchio a mezz'onda; generatore monofase. N halvegolftoestel; halvegolfgenerator, eenpulsgenerator. P generator rentgenowski jednopulsowy; generator rentgenowski półfalowy. S enpulsapparat. (881)

11. **intrinsically-safe electrical apparatus** : an electrical apparatus in which all the circuits are intrinsically safe. ★ matériel électrique à sécurité intrinsèque → *matériel 7.* R искробезопасное электрическое оборудование. D eigensicheres elektrisches Betriebsmittel. E material eléctrico de seguridad intrínseca. I costruzione elettrica a sicurezza intrinseca. N intrinsiek veilig elektrisch materieel. P urządzenie iskrobezpieczne. S egensäker apparat. (426)

12. **radio frequency heating apparatus** : ISM equipment designed to produce a heating effect by the use of radio frequency energy. ★ installation de chauffage radioélectrique → *installation 8.* R радиочастотные нагревательные установки. D Hochfrequenz-Erwärmungsanlagen. E instalación de calefacción radioeléctrica. I apparecchi di riscaldamento a radiofrequenza. N magnetron. P urządzenie grzejne radioelektryczne. S radiofrekvensvärmare. (161)

13. **reference apparatus for the determination of transmission performance ratings** (*Syn.* ARAEN (abbreviation)) : set of equipment kept in the CCITT Laboratory comprising : a telephone transmission system subdivided into sending system, line and receiving system ; a centralized apparatus for the supply of ambient noise and intercommunication facilities ; a calibration equipment arranged to facilitate the proper maintenance of the set of equipement. *Notes. 1* — The ARAEN is described in the CCITT Recommendation P41 from the Volume V of the Yellow Book, 1981. *2* — The ARAEN is used in the constitution : of the new fundamental system for the determination of reference equivalents or NOSFER; of the reference system for the determination of AEN or SRAEN. ★ appareil de référence pour la détermination des affaiblissements équivalents pour la netteté → *appareil 31.* R эталонная аппаратура для определения эквивалентов затухания по разборчивости, ARAEN. D ARAEN. E aparato de referencia para la determinación de las atenuaciones equivalentes para la nitidez; ARAEN (abreviación). I apparato di riferimento per la determinazione della qualità della trasmissione telefonica. N ARAEN. P urządzenie wzorcowe dlo określania umienności równoważnej wyrazistości; ARAEN. S ARAEN. (722)

14. **spark test apparatus (for intrinsically-safe circuits)** : an apparatus used to verify experimentally that the electrical sparks of a circuit are incapable of igniting a specified explosive gas atmosphere. ★ éclateur (pour circuits de sécurité intrinsèque) → *éclateur 4.* R искрообразующий механизм (для искробезопасных цепей). D Funkenprüfgerät. E explosor (para circuitos de seguridad intrínseca). I apparecchio scintillatore (per circuiti a sicurezza intrinseca). N vonkbeproevingstoestel (voor intrinsiek veilige stroomkringen). P iskiernik (dla obwodów iskrobezpiecznych). S gnistprovsapparat. (426)

15. **stabilized supply apparatus** : a power supply apparatus in which one or more of the output quantities remain within specified limits when the conditions of use, including influence quantities, are changed. ★ alimentation stabilisée → *alimentation 7.* R стабилизированный источник питания. D stabilisiertes Netzgerät. E alimentación estabilizada. I alimentatore stabilizzato. N gestabiliseerd voedingsapparaat. P zasilacz stabilizowany. S stabiliserat nätaggregat. (303)

16. **start-stop apparatus** : telegraph apparatus designed for a start-stop system. ★ appareil arythmique → *appareil 19.* R стартстопный аппарат. D Start-Stop-Apparat; Start-Stop-Gerät. E aparato arrítmico. I terminale start-stop. N start/stop-telegraaftoestel. P aparat start-stopowy. S start-stoppapparat. (721)

17. **stored-energy apparatus** (*Syn.* stored-energy generator) : X-ray apparatus in which all or part of the energy to be injected into the X-ray tube is stored in an appropriate component during periods of no-load operation. *Note.* — Stored-energy generators may use : *1)* a capacit or *2)* a fly wheel *3)* a storage battery. ★ générateur à accumulation → *générateur 2.* R аппарат, использующий запасенную энергию. D Speicher-Generator. E generador por acumulación. I apparecchio di accumulazione di energia. N toestel met energieopslag; generator voor energieopslag. P generator rentgenowski. S ..... (881)

18. **three-phase apparatus** (*Syn.* six-peak generator) : X-ray apparatus with three-phase power supply and six rectifiers, connected to produce six voltage peaks to the X-ray tube, with the anode positive with respect to the cathode, during one cycle of the power supply. ★ générateur à six crêtes → *générateur 8.* R трехфазный аппарат; шестипиковый генератор. D Sechspulsgenerator. E generador de seis crestas. I apparecchio trifase. N driefasentoestel; zespulsgenerator.

P generator rentgenowski sześciopulsowy. S sexpulsapparat. (881)

19. **visible speech apparatus** (*Syn.* sound spectrograph) : apparatus for portraying a sound spectrum as a function of time. The apparatus may be used to yield a visible portrayal of speech and hence to aid recognition of voice sounds. ★ spectrographe acoustique → *spectrographe 5.* R акустический спектрограф; прибор видимой речи. D Schallspektrograph. E espectrógrafo acústico. I spettrografo vocale; tracciatore di sonogrammi. N geluid(s)spectrograaf. P spektrograf akustyczny. S ljudspektrograf. (801)
20. **X-ray apparatus** (*Syn.* X-ray generator) : an assembly of electrical and mechanical devices, including the X-ray tube, used to produce X-radiation. ★ générateur radiologique → *générateur 28.* R рентгеновский аппарат; источник рентгеновского излучения. D Röntgenstrahlenerzeuger. E aparato de rayos X; generador de rayos X. I apparecchio a raggi X; generatore di raggi X. N röntgentoestel; röntgengenerator. P aparat rentgenowski; generator rentgenowski. S röntgenapparat. (881)

apparent

1. **apparent energy meter** (*Syn.* volt-ampere-hour meter) : → *meter 73*
2. **(apparent) internal resistance** : → *resistance 3*
3. **apparent magnitude** : → *magnitude 1*
4. **apparent mass** : → *mass 4*
5. **apparent permeability** : → *permeability 4*
6. **apparent power** : → *power 7*
7. **apparent power (mass) density** : → *density 1*
8. **apparent power meter** (*Syn.* volt-ampere meter) : → *meter 72*
9. **apparent power (volume) density** : → *density 2*
10. **no-load apparent power** : → *power 91*
11. **specific apparent power** (*Syn.* apparent power (mass) density) : → *density 1*

appearance

1. **appearance** (of an insulating liquid) : the visual characteristics of a representative sample of an insulating liquid examined in a relatively thick layer. ★ aspect → *aspect 1.* R внешний вид (жидкого электроизоляционного материала). D Aussehen (einer Isolierflüssigkeit). E aspecto (de un líquido aislante). I aspetto (di un liquido isolante). N uiterlijk (van een isolatievloeistof). P wygląd (oleju izolacyjnego). S utseende. (212)

appliance

1. **appliance impedance** : → *impedance 3*

application

1. **(secondary) battery for specific application** : → *battery 61*

applicator

1. **applicator** : 1) An arrangement of radioactive sources attached to a mechanical support, to be placed at or near the surface to irradiate a superficial layer of tissue. 2) A structure that collimates a beam of radiation; it may be open-or close-ended. 3) A device that indicates the extent of the radiation field at a given distance from a source of radiation; it may or may not incorporate the collimating diaphragms; it may be open- or close-ended. ★ applicateur → *applicateur 1.* R аппликатор. D Applikator. E aplicador. I applicatore. N applicator. P aplikator. S applikator. (881)
2. **microwave applicator** : a structure which applies the hyperfrequency electromagnetic energy to the material being processed. ★ applicateur d'hyperfréquences → *applicateur 3.* R устройства для нагрева токами сверхвысокой частоты. D Anwendungseinrichtung für Mikrowellen. E aplicador de microondas. I utilizzatore di microonde. N microgolfverwarmingstoestel. P aplikator mikrofalowy; nakładka mikrofalowa. S mikrovågsvärmare. (841)

applied

1. **applied voltage** : → *voltage 6*

apportionment

1. **maintainability apportionment** (*Syn.* maintainability allocation) : → *allocation 3*

appreciation

1. **immediate appreciation percentage** : → *percentage 3*

approach

1. **approach lighting system** : → *system 11*
2. **visual approach slope indicator** : → *indicator 27*

apron

1. **protective apron** : an apron made of attenuating materials, used to reduce radiation exposure. ★ tablier protecteur → *tablier 1.* R защитный фартик. D Strahlenschutz-Schürze. E mandil protector. I grembiule protettivo. N beschermschort. P fartuch ochronny. S strålskyddsförkläde. (881)

ARAEN

1. **ARAEN** (*Syn.* reference apparatus for the determination of transmission performance ratings) : → *apparatus 13*
2. **ARAEN speech voltmeter** : → *voltmeter 1*

arc

1. **arc chute** : → *chute 1*
2. **arc control device** : → *device 7*
3. **arc current** : → *current 4*
4. **arc cutting electrode** : → *electrode 4*
5. **arc discharge** : → *discharge 1*
6. **arc discharge tube** : → *tube 3*
7. **arc heating** : → *heating 1*
8. **arc initiation device** : → *device 9*
9. **arc lamp** : → *lamp 2*
10. **arc length** : → *length 1*
11. **arc maintenance device** : → *device 10*
12. **arc power** : → *power 11*
13. **arc resistance** : → *resistance 4*
14. **arc resistance heating** (*Syn.* submerged arc heating) : → *heating 52*
15. **arc stability** : → *stability 2*
16. **arc striking device** (*Syn.* arc initiation device) : → *device 9*
17. **arc stud welding gun** : → *gun 1*
18. **arc tube** : → *tube 4*
19. **arc voltage** : → *voltage 7*
20. **arc voltage** : → *voltage 8*
21. **arc voltage** : → *voltage 9*
22. **arc welding** : → *welding 2*
23. **arc welding electrode** : → *electrode 11*
24. **compact-source arc discharge lamp** (*Syn.* short-arc lamp) : → *lamp 58*
25. **consumable arc welding electrode** : → *electrode 15*
26. **direct arc heating** : → *heating 7*
27. **drooping characteristic (of an arc welding power source)** : → *characteristic 34*
28. **dynamic characteristic (of an arc welding power source)** : → *characteristic 36*
29. **(electric) arc** : a self-maintained gas conduction for which most of the charge carriers are electrons supplied by primary-electron emission. ★ arc (électrique) → *arc 1.* R (электрическая) дуга. D (elektrischer) Lichtbogen. E arco (eléctrico). I arco (elettrico). N (elektrische) boogontlading. P łuk elektryczny. S (elektrisk) ljusbåge. (121)
30. **flat characteristic (of an arc welding power source)** : → *characteristic 40*
31. **grid-controlled arc discharge tube** : → *tube 40*
32. **indirect arc heating** : → *heating 37*
33. **no-load voltage (in arc welding and cutting)** : → *voltage 124*
34. **non-consumable arc welding electrode** : → *electrode 73*
35. **non-transferred arc plasma torch** : → *torch 3*
36. **peak arc voltage** : → *voltage 137*
37. **pilot arc** (of a plasma torch) : an arc of low intensity between internal electrodes which is used to initiate the ignition of the main arc and, possibly, maintain it. ★ arc pilote → *arc 3.*

R вспомогательная дуга (плазменной горелки). D Pilotbogen. E arco piloto (de una antorcha de plasma). I arco pilota (di una torcia a plasma). N ontstekingsboog (van een plasmatoorts). P łuk pilotujący (plazmotronu). S pilotljusbåge. (841)

38. **plasma arc rotation rate** : → *rotation 2*
39. **rated current of an arc suppression coil** : → *current 157*
40. **static characteristic (of an arc welding power source)** : → *characteristic 87*
41. **submerged arc heating** : → *heating 52*
42. **superimposed arc plasma torch** : → *torch 6*
43. **transferred arc plasma torch** : → *torch 10*

arc furnace

1. **arc furnace** : a furnace in which the electric arc is the main source of heat. ★ four à arc → *four à arc 19.* R дуговая печь. D Lichtbogenofen. E horno de arco. I forno ad arco. N boogoven. P piec łukowy. S ljusbågsugn. (841)
2. **arc furnace bus bars** : → *busbar 1*
3. **arc furnace delta connection** : → *connection 2*
4. **arc furnace earthing device** : → *device 8*
5. **arc furnace electrode arm** : → *arm 2*
6. **arc furnace electrode clamp** : → *clamp 3*
7. **arc furnace electrode mast** : → *mast 1*
8. **arc furnace electrode mast brake** (*Syn.* arc furnace electrode mast snubber) : → *mast 3*
9. **arc furnace electrode mast snubber** : → *mast 3*
10. **arc furnace electrode pitch circle diameter** : → *pitch 1*
11. **arc furnace fixed roof** : → *roof 1*
12. **arc furnace flexible cables** : → *cable 2*
13. **arc furnace fume elbow** : → *elbow 1*
14. **arc furnace fume hood** : → *hood 2*
15. **arc furnace lining** : → *lining 1*
16. **arc furnace low reactance connection** : → *connection 3*
17. **arc furnace platform** : → *platform 1*
18. **arc furnace ram** : → *ram 1*
19. **arc furnace reactor** : → *reactor 2*
20. **arc furnace roof lift and swing aside** : → *roof 2*
21. **arc furnace roof refractories** : → *refractory 1*
22. **arc furnace roof ring** : → *roof 4*
23. **arc furnace shell** : → *shell 1*
24. **arc furnace side door** : → *door 1*
25. **arc furnace slagging door** : → *door 2*
26. **arc furnace spout** : → *spout 1*
27. **arc furnace stirrer** : → *stirrer 1*
28. **arc furnace swivel gantry** : → *gantry 1*
29. **arc furnace tilt rockers** : → *rocker 1*
30. **arc furnace tilt roller track** : → *track 1*
31. **arc furnace tilting system** : → *system 12*
32. **arc furnace transformer** : → *transformer 3*
33. **direct arc furnace** : an arc furnace in which the arc is maintained between the charge and one or more electrodes. ★ four à arc direct → *four à arc 22.* R дуговая печь прямого нагрева. D direkter Lichtbogenofen (Lichtbogen-Schmelzofen). E horno de arco directo. I forno ad arco diretto. N directe boogoven. P piec łukowy bezpośredni. S direkt ljusbågsugn. (841)
34. **dynamic voltage of an arc furnace installation** : → *voltage 56*
35. **electrode of an arc furnace** : → *electrode 45*
36. **electrode tapping for submerged arc furnace** : → *tapping 1*
37. **image arc furnace** : an indirect arc furnace incorporating an optical system having two conjugate foci, the electric arc being in one of these foci and the charge in the other. ★ four à arc à image → *four à arc 20.* R отражательная дуговая печь. D Lichtbogenstrahlungsofen. E horno de arco de imagen. I forno ad arco ad immagine. N spiegelbeeldboogoven. P piec łukowy odbłyskowy. S ljusbågsugn med optik. (841)
38. **indirect arc furnace** : an arc furnace in which the arc current does not pass through the charge. ★ four à arc indirect → *four à arc 23.* R дуговая печь косвенного нагрева. D indirekter Lichtbogenofen. E horno de arco indirecto; horno de arco libre. I forno ad arco indiretto; forno ad arco libero. N indirecte boogoven. P piec łukowy pośredni. S indirekt ljusbågsugn. (841)
39. **non-consumable electrode refining arc furnace** : a direct arc furnace in which the arc is maintained between a water-cooled, non-consumable electrode and the molten charge which is contained in a water-cooled mould, the process taking place mainly in a vacuum or a protective atmosphere. ★ four d'affinage à arc à électrode non consommable → *four à arc 26.* R дуговая печь для рафинирования с нерасходуемым электродом. D Lichtbogenofen mit sich nicht-verbrauchender Elektrode. E horno de arco de afino de electrodo no consumible. I forno ad arco per affinazione con elettrodo non consumabile. N raffinageboogoven met niet-afsmeltende elektrode. P piec łukowy do przetapiania o elektrodach nietopliwych. S raffineringsugn med icke-smältbar elektrod. (841)
40. **power rating of an arc furnace transformer** : → *rating 10*
41. **refractory hot spot of an arc furnace** : → *spot 10*
42. **rocking arc furnace** : a single-phase indirect arc furnace oscillating around an axis to move the charge during processing, giving an improved heat transfer. ★ four oscillant à arc → *four à arc 27.* R наклоняющаяся дуговая печь. D Lichtbogen-Schaukelofen. E horno basculante de arco. I forno oscillante ad arco. N schommelende boogoven. P piec łukowy wahadłowy. S oscillerande ljusbågsugn. (841)
43. **short-circuit impedance of an arc furnace installation** : → *impedance 54*
44. **submerged arc furnace** (*Syn.* submerged resistance furnace) : a direct arc furnace in which the electrode or electrodes are in the charge, the electric energy being dissipated in the arc and partly through the conducting charge by Joule effect. ★ four à arc submergé → *four à arc 25.* R печь с погруженной дугой. D Lichtbogenofen mit unterdrücktem Lichtbogen (Lichtbogen-Reduktionsofen). E horno de arco sumergido; horno de arco-resistencia. I forno ad arco sommerso; forno ad arco-resistenza. N boog-weerstandsoven met ondergedompelde elektroden. P piec łukowy o elektrodach zanurzanych. S ljusbågsmotståndsugn. (841)
45. **vacuum arc furnace mould** : → *mould 2*
46. **vacuum remelting arc furnace** : a direct arc furnace in which the arc is maintained between a consumable electrode made of the metal to be refined and the molten charge which is contained in a water-cooled mould, the process taking place in a vacuum chamber. ★ four à arc d'affinage sous vide → *four à arc 21.* R вакуумная дуговая печь для переплавки. D Vakuumumschmelzlichtbogenofen. E horno de arco de refundición al vacío. I forno ad arco per affinazione sotto-vuoto. N vacuümraffinageboogoven. P piec łukowy rafinacyjny próżniowy. S ljusbågsugn för vakuumomsmältning. (841)

arc-back

1. **arc-back** : a breakdown in the reverse direction. ★ retour d'arc → *retour 24.* R обратное зажигание. D Rückzündung. E retroceso del arco. I arco di ritorno. N terugslag. P zapłon wsteczny. S baktändning. (531)
2. **arc-back** : a back-fire in a ionic valve. ★ arc en retour → *arc 2.* R обратное зажигание. D Rückzündung (in einem Ionenventil). E arco de retorno. I arco di ritorno. N boogterugslag. P zapłon wsteczny. S baktändning (i jonventil). (551)

arc-drop

1. **arc-drop (voltage)** : → *voltage 10*

arch

1. **arch** : the roof of the heating chamber. ★ voûte → *voûte 5.* R свод. D Gewölbe. E bóveda. I volta. N toog. P sklepienie. S valv. (841)
2. **arch dam** : → *dam 1*

architecture

1. **architecture of a telecommunication network** : → *network 3*

arcing

1. **arcing contact** : → *contact 2*
2. **arcing distance** : → *distance 2*
3. **arcing horn** : → *horn 2*
4. **arcing ring** : → *ring 2*
5. **arcing time** : → *time 8*

6. **arcing time** : → *time 9*

arc-suppression

1. **arc-suppression coil** : → *coil 1*

arc-suppression-coil-earth

1. **arc-suppression-coil-earth (neutral) system** (*Syn.* resonant earthed (neutral) system) : → *system 175*

arc-through

1. **arc-through** (in a gas filled tube) : a loss of control that results in conduction in the forward direction during an intended non-conduction period. ★ raté de blocage → *raté 3.* R прямая дуга. D Durchzündung. E fallo de bloqueo. I perdita di blocco. N doorslag. P utrata blokady. S genomtändning. (531)

area

1. **area monitoring** (*Syn.* environmental monitoring) : → *monitoring 4*
2. **area turns** : → *turn 1*
3. **auditory sensation area** : region enclosed by the curves defining the threshold of hearing and the threshold of pain as functions of frequency. ★ aire d'audition → *aire 2.* R область слухового восприятия. D Hörfläche. E área de audición. I area di sensazione uditiva. N gehoorspan; gehoorveld. P obszar słyszalności. S hörområde. (801)
4. **back scattering area** (*Syn.* back scattering cross section) : → *cross-section 2*
5. **coherent area** : the area in a plane perpendicular to the direction of propagation over which propagating optical radiation may be considered to be highly coherent radiation. ★ aire de cohérence → *aire 3.* R когерентная область. D Kohärenzbereich. E área coherente. I area coerente. N coherentiegebied. P obszar spójności; obszar koherencji. S koherensarea. (731)
6. **contact area** : the area in contact between two mated contacts, two conductors or a conductor and a contact, which provides an electrical path. ★ zone de contact → *zone 21.* R площадь контактирования. D Kontaktfläche. E zona de contacto. I zona di contatto. N contactzone. P pole styczności; powierzchnia styczności. S kontaktarea. (581)
7. **controlled area** : an area, subject to special measures for the purpose of radiation protection, to which access is restricted and inside which a person might receive an annual dose equivalent exceeding 1/10 of the relevant dose equivalent limit for workers. ★ zone contrôlée → *zone 17.* R контролируемая зона. D Kontrollbereich. E zona controlada. I zona controllata. N gecontroleerd gebied. P teren kontrolowany. S kontrollerat område. (881)
8. **co-ordination area** : the area contained within a co-ordination contour. ★ zone de coordination → *zone 23.* D Koordinierungsgebiet. P obszar koordynacyjny. (705)
9. **core area** : for a cross section of an optical fibre the area within which the refractive index everywhere (excluding any index dip) exceeds that of the innermost homogeneous cladding by a given fraction of the difference between the maximum of the refractive index of the core and the refractive index of the innermost homogenous cladding. *Note.* — The core area is the smallest cross-sectional area of a fibre excluding any index dip, which is contained within the locus of points where the refractive index n_3 is given by :

$$n_3 = n_2 + k(n_1 - n_2)$$

where : n_1 is maximum refractive index of the core, n_2 is refractive index of the innermost homogeneous cladding, k is a constant (usually taken to be in the range 0 – 0.05). ★ zone de coeur → *zone 20.* R площадь сердцевины. D Kernbereich. E área del núcleo. I area del nucleo. N kerngebied. P obszar rdzenia. S kärnarea. (731)
10. **coverage area** (of a radio transmitter) : the area within which a field strength from a transmitter is equal to or greater than the usable field strength. ★ zone de couverture → *zone 24.* D Überdeckungsfläche (eines Senders). P obszar pokrycia (radiostacji). (705)
11. **coverage area** (of a broadcasting transmitter) : the area within which reception from a broadcasting transmitter is available under specified technical conditions, using household receiving equipment of currently agreed reference characteristics. ★ zone de couverture → *zone 25.* R зона охвата (вещательного передатчика). (723)
12. **cross-connection area** : the area served by a cross-connection point. ★ zone de sous-répartition → *zone 38.* R зона кроссировки. D Verzweigerbereich. E zona de subreparto. I area di rete elastica. N ..... P strefa łączy obsługiwanych przez przełącznicę pośrednią. S korskopplingsområde. (722)
13. **diffusion area** : one-sixth of the mean square distance travelled by a particle of a given type and class from appearance to disappearance (within the type and class) in an infinite homogeneous medium. ★ aire de diffusion → *aire 4.* D Diffusionsfläche. E área de difusión. I area di diffusione. N diffusieoppervlak. P powierzchnia dyfuzji. S diffusionsarea. (026)
14. **direct service area** : the area within which subscriber's lines are directly connected to the local switching entity without passing through a cross-connection point. ★ zone d'adduction directe → *zone 19.* R зона прямого обслуживания. D Nahbereich. E zona de servicio directo. I area di rete rigida. N ..... P strefa łączy bezpośrednich. S ..... (722)
15. **directly irradiated area** : a geometric surface, perpendicular to the beam axis, through which radiation passes ; its boundary is determined by the shape, size, and location of the source of radiation and of the beam-limiting devices such as cones and diaphragms. ★ surface directement irradiée → *surface 39.* R непосредственно облучаемая поверхность. D direkt exponierte Fläche. E superficie directamente irradiada. I area direttamente irradiata. N direct bestraald oppervlak. P obszar napromieniony bezpośrednio. S direktbestrålad yta. (881)
16. **effective area** (of a search coil) : the area which, when multiplied by the number of turns and the rate of change of magnetic flux density, will give the induced voltage in a search coil when it is immersed in a time-varying uniform magnetic field, the direction of which is parallel to the axis of the coil. ★ section effective → *section 14.* R эффективная площадь пробной катушки. D effektive Fläche einer Suchspule. E sección efectiva (de una bobina de exploración); área equivalente (de una bobina de exploración). I sezione effettiva (di una bobina d'esplorazione); area equivalente (di una bobina d'esplorazione). N effectieve oppervlakte van een zoekspoel. P powierzchnia skuteczna cewki probierczej. S mätspolens effektiva area. (221)
17. **effective induction area of the control current loop** : the effective area of the loop enclosed by the control current leads and the relevant conductive path through a Hall plate by the Hall effect. ★ surface effective d'induction de la boucle du courant de commande → *surface 43.* R эффективная индукционная площадь входного контура управляющего тока. D induktive Restfläche des Steuerstromkreises. E superficie efectiva de inducción del bucle de la corriente de control. I superficie effettiva di induzione della spira della corrente di comando. N effectieve inductieoppervlakte van de stuurstroomkring. P powierzchnia skuteczna pętli prądu sterującego. S styrströmsslingans effektiva area. (521)
18. **effective induction area of the output loop** : the effective area of the loop enclosed by the leads to the Hall terminals and the relevant conductive path through the Hall effect device. ★ surface effective d'induction de la boucle de sortie → *surface 42.* R эффективная индукционная площадь выходного контура. D induktive Restfläche des Hallstromkreises. E superficie efectiva de inducción del bucle de salida. I superficie effettiva di induzione della spira d'uscita. N effectieve inductieoppervlakte van de uitgangskring. P powierzchnia skuteczna pętli wyjściowej hallotronu. S effektiv area. (521)
19. **equivalent absorption area of an object or of a surface** : area of a surface having a sound power absorption coefficient of unity that would absorb the same amount of sound power in a reverberant room with a diffuse sound field as the object or the surface. In the case of a surface, the equivalent absorption area is the product of the area of the surface and its sound power absorption coefficient. ★ aire d'absorption équivalente d'un objet ou d'une surface → *aire 1.* R эквивалентная площадь поглощения объекта или поверхности. D äquivalente Absorptionsfläche. E área de absorción equivalente de un objeto o de una superficie. I area assorbente equvalente; superficie assorbente equivalente. N equivalente absorberende oppervlakte. P pole równoważne absorpcyjne obiektu lub powierzchni. S ekvivalent absorptionsyta. (801)
20. **fading area** : a region in which fading and distortion occur owing to interaction between the ground wave and the ionospheric wave from the same sound broadcasting transmitter. *Note.* — In practice this concept only applies to long wave and

medium wave transmissions, and sometimes to shortwave transmissions. ★ zone de distorsion → *zone 31.* R зона ближних замираний. (723)

21. **hazardous area** (on account of explosive gas atmospheres) : an area in which an explosive gas atmosphere is or may be expected to be present in quantities such as to require special precautions for the construction, installation and use of electrical apparatus. *Note.* — IEC Publication 79-10 gives a classification of hazardous areas. ★ emplacement dangereux → *emplacement 1.* R опасное пространство (в отношении взрывоопасных газовых сред). D explosionsgefährdeter Bereich. E emplazamiento peligroso (debido a atmósferas explosivas gaseosas). I luogo pericoloso (in relazione alla presenza di atmosfere con gas esplosivi). N gevaarlijk gebied (met betrekking tot ontplofbare gasatmosfeer). P pomieszczenie niebezpieczne (względem atmosfer gazowych wybuchowych). S riskområde. (426)

22. **indirectly irradiated area** : area outside the directly irradiated area traversed by stray radiation. ★ zone indirectement irradiée → *zone 48.* R косвенно облучаемая поверхность. D indirekt exponierte Fläche. E superficie indirectamente irradiada. I area indirettamente irradiata. N indirect bestraald oppervlak. P obszar napromieniony pośrednio. S indirektbestrålad yta. (881)

23. **label area** : the central portion of the disk between the finishing groove and the centre hole. ★ glace → *glace 1.* R зона этикетки. D Etikettenbereich; Spiegel. E zona para etiqueta. I superficie libera. N spiegel. P miejsce na etykietę. S etikettdel. (806)

24. **large area flicker** : → *flicker 10*

25. **local service area** (*Syn.* local (charge) exchange) : the geographical area within which two telephone subscribers can be connected on payment of a local fee. ★ zone de taxation locale → *zone 39.* R зона местного обслуживания. D Ortsnetzbereich. E zona de tasación local. I zona di tassazione locale. N basistariefgebied; lokaalgebied. P obszar taryfy miejscowej. S lokaltaxeområde. (722)

26. **magnetic (area) moment** : → *moment 3*

27. **migration area** : the sum of the slowing-down area from fission energy to thermal energy and the diffusion area for thermal neutrons. ★ aire de migration → *aire 6.* D Wanderfläche. E área de migración. I area di migrazione. N migratieoppervlak. P powierzchnia migracji. S migrationsarea. (026)

28. **mush area** : a region in which fading and distortion affect the reception from a sound broadcasting transmitter owing to interaction between ground and ionospheric waves from other synchronised sound broadcast transmitters. *Note.* — In practice this concept only applies to long wave and medium wave transmissions. ★ zone de distorsion → *zone 32.* R зона специфических искажений. (723)

29. **non-hazardous area** (on account of explosive gas atmospheres) : an area in which an explosive gas atmosphere is not expected to be present in quantities such as to require special precautions for the construction, installation and use of electrical apparatus. ★ emplacement non dangereux → *emplacement 3.* R неопасное пространство (в отношении взрывоопасных газовых сред). D nichtexplosionsgefährdeter Bereich. E emplazamiento no peligroso (debido a atmósferas explosivas gaseosas). I luogo non pericoloso (in relazione alla presenza di atmosfere con gas esplosivi). N niet gevaarlijk gebied (met betrekking tot ontplofbare gasatmosfeer). P pomieszczenie bezpieczne (względem atmosfer gazowych wybuchowych). S ofarligt område. (426)

30. **normal auditory sensation area** : region enclosed by the curves defining the normal threshold of hearing and the normal threshold of pain as a function of frequency. ★ aire normale d'audition → *aire 13.* R нормальная область слухового восприятия. D Normalhörfläche. E área normal de audición. I area di sensazione normale. N normale gehoorspan; normaal gehoorveld. P obszar słyszalności normalnej. S normalt hörområde. (801)

31. **occupied area** : any area where a radiation hazard may exist which may be occupied by persons other than patients undergoing treatment or diagnosis. ★ zone occupée → *zone 52.* R рабочая зона. D Aufenthaltsbereich. E zona ocupada. I zona occupata. N gevarengebied. P teren zawodowy. S strålriskzon. (881)

32. **partial effective area** (of an antenna for a given polarization and direction) : in a given direction, the ratio of the available power at the terminals of a receiving antenna to the power flux density of a plane wave of specified polarization incident on the antenna from that direction. *Notes. 1* — If no direction is specified, the direction corresponding to maximum available power is implied. *2* — In free space, for a given polarization and direction, the partial effective area A_{ep} of an antenna used for reception is related to the partial gain G_p of the same antenna used for transmission, by the equation :

$$G_p = \frac{4\pi A_{ep}}{\lambda^2}$$

where λ is the wavelength. ★ aire équivalente (partielle) → *aire 11.* R парциальная эффективная площадь раскрыва антенны (данной поляризации в заданном направлении). D Teilwirkfläche; partielle Wirkfläche (einer Antenne für eine bestimmte Polarisation und Richtung). E área efectiva (parcial) (de una antena para una polarización y dirección dadas). I area equivalente parziale (per una data polarizzazione). N effectief oppervlak (van een antenne voor een bepaalde polarisatie en een bepaalde richting). P powierzchnia skuteczna częściowa (anteny dla danej polaryzacji i kierunku). S partiell absorptionsyta. (712)

33. **presentation control area** : area containing equipment necessary for producing a television programme by linking programme signals from the various sources. ★ régie finale (vidéo) → *régie 4.* R программная аппаратная. (723)

34. **primary coverage area** : that part of the coverage area of a sound broadcasting transmitter within which the field strength of the ground wave of a sound broadcasting tranmsitter is great enough, relative to the ionospheric wave of the same transmitter and noise and interference from other transmitters, for satisfactory reception both by day and by night. *Note.* — In practice this concept only applies to long wave and medium wave transmissions. ★ zone de couverture primaire → *zone 26.* R первичная зона охвата. (723)

35. **scattering area** (*Syn.* scattering cross section) : → *cross-section 23*

36. **secondary coverage area** : that part of the coverage area of a sound broadcasting transmitter within which the ground wave is reduced sufficiently to permit satisfactory reception of the ionospheric wave. *Note.* — In practice this concept only applies to long wave and medium wave transmissions. ★ zone de couverture secondaire → *zone 27.* R вторичная зона охвата. (723)

37. **service area** (of a broadcast transmitter) : the area within which reception of a broadcast transmitter is protected against interference in accordance with international regulations. ★ zone de service → *zone 36.* R зона обслуживания (вещательным передатчиком). (723)

38. **slowing-down area** : one-sixth of the mean square distance travelled by neutrons in an infinite homogeneous medium from their points of origin to the points where they have been slowed down from the initial energy to a specified energy. ★ aire de ralentissement → *aire 7.* D Bremsfläche. E área de moderación. I area di rallentamento. N afremoppervlak. P powierzchnia spowalniania. S nedbromsningsarea. (026)

39. **supervised area** : an area, not forming part of a controlled area, that is subject to appropriate supervision for the purpose of radiation protection, and inside which a person might receive an annual dose equivalent exceeding 1/10 of the relevant dose equivalent limit for workers. ★ zone surveillée → *zone 55.* R наблюдаемая зона. D Überwachungsbereich. E zona vigilada. I zona sorvegliata. N bewaakt gebied. P teren nadzorowany. S övervakat område. (881)

40. **switching entity area** (*Syn.* (switching) exchange area) : the geographical area normally served by a specified local switching entity. ★ zone de rattachement → *zone 34.* R зона действия телефонной станции. D Anschlußbereich. E zona servida. I area di commutazione. N centralegebied. P strefa obsługiwania. S stationsområde. (722)

41. **(switching) exchange area** (*Syn.* switching entity area) : → *area 40*

42. **(total) effective area** (of an antenna for a given direction) : in a given direction, the ratio of the available power at the terminals of a receiving antenna to the power flux density of a plane wave incident from that direction, the wave being polarization matched to the antenna. *Notes. 1* — If no direction is specified, the direction corresponding to maximum available power is implied. *2* — The total effective area is the sum of the

partial effective areas for any two orthogonal polarizations of components of the antenna polarization. *3* — In free space, the effective area A_e for a given direction of an antenna when used for reception is related to the absolute gain G_i for the given direction when the same antenna is used for transmission by the equation :

$$G_i = \frac{4\pi A_e}{\lambda^2}$$

where λ is the wavelength. *4* — When an aperture illumination function is uniform in amplitude and phase and the given direction is perpendicular to the aperture, the total effective area of a radiating aperture of a lossless antenna is equal to its geometric area. ★ aire équivalente (totale) → *aire 12.* R (общая) эффективная площадь раскрыва (антенны в заданном направлении). D (Gesamt-)Wirkfläche (einer Antenne für eine bestimmte Richtung). E área efectiva (total) (de una antena para una dirección dada); superficie equivalente (total) **(término desaconsejado).** I area equivalente (per una data polarizzazione). N (totaal) effectief oppervlak (van een antenne voor bepaalde richting). P powierzchnia skuteczna (całkowita) (anteny dla danego kierunku). S absorptionsyta; effektiv area. (712)

43. **useful area** : that part of the window of a counter tube through which a particle or an incident quantum may penetrate into the sensitive volume. ★ surface utile → *surface 56.* R рабочая поверхность. D wirksamer Querschnitt. E superficie útil. I area utile. N gevoelige oppervlakte. P powierzchnia czynna. S nyttig area. (531)

arm

1. **aerial lift device with insulating arm** : → *device 2*
2. **arc furnace electrode arm** : a steel structure which is connected to the mast at one end, the opposite end of which carrying the electrode clamp. ★ bras d'électrode de four à arc → *bras 13.* R кронштейн электрода дуговой печи. D Elektroden-Tragarm. E brazo de electrodo de un horno de arco. I braccio porta-elettrodo di un forno ad arco. N elektrodearm (van een boogoven). P ramię (masztu zawieszenia elektrod). S elektrodarm. (841)
3. **arm's reach** : → *reach 1*
4. **auxiliary arm** : any other arm than a principal arm. ★ bras auxiliaire → *bras 1.* R вспомогательное плечо. D Hilfszweig. E brazo auxiliar. I ramo ausiliario. N hulptak. P ramię pomocnicze. S hjälpgren. (551)
5. **by-pass arm** : an auxiliary arm providing a conductive path to circulate current during the interval when no principal arm is conducting and without an interchange of power between source and load. ★ bras de shuntage → *bras 10.* R шунтирующее плечо. D Nebenwegzweig. E brazo de puenteo. I ramo di derivazione. N shunttak. P ramię obejściowe. S förbigångsgren. (551)
6. **convertor arm** : a principal arm in an electronic convertor connection. ★ bras de convertisseur → *bras 3.* R плечо преобразователя. D Stromrichter-Hauptzweig. E brazo de convertidor. I ramo di convertitore. N omzettertak. P ramię przekształtnika. S strömriktargren. (551)
7. **counterweight of a tone arm** : → *counterweight 1*
8. **free-wheeling arm** : a by-pass arm containing only non-controllable valves. ★ bras de roue libre → *bras 9.* R неуправляемое шунтирующее плечо. D Freilaufzweig. E brazo de vía libre. I ramo di ricircolo. N vrijlooptak. P ramię obejściowe rozładowcze. S frigångsgren. (551)
9. **pair of anti-parallel arms** : two arms in parallel with opposite conducting directions. ★ paire de bras en antiparallèle → *paire 8.* R пара встречно-параллельных плеч. D Wechselwegpaar. E par de brazos antiparalelos. I coppia di rami in antiparallelo. N antiparallel takkenpaar. P para ramion przeciwrównoległych. S antiparallellt grenpar. (551)
10. **pair of arms** : two principal arms series connected with the same sense of conduction. ★ paire de bras → *paire 7.* R пара плеч. D Zweigpaar. E par de brazos. I coppia di rami. N takkenpaar. P para ramion. S grenpar. (551)
11. **pick-up arm** (*Syn.* tone arm) : a bar pivoting at one end, and holding the pick-up head at the other end, to allow the stylus tip to follow the groove in the surface of the disk. ★ bras de lecture → *bras 4.* R тонарм. D Tonarm. E brazo de lectura. I braccio di riproduzione. N pick-uparm. P ramię (adaptera). S tonarm. (806)
12. **principal arm** : a (valve) arm involved in the major transfer of power from one side of the convertor or electronic switch to the other. ★ bras principal → *bras 15.* R главное плечо. D Hauptzweig. E brazo principal. I ramo principale. N hoofdtak. P ramię główne. S huvudgren. (551)
13. **regenerative arm** : an auxiliary arm intended to transfer a part of the power from the load side to the source side. ★ bras de retour → *bras 8.* R рекуперирующее плечо. D Rücklaufzweig. E brazo de retorno. I ramo di ricupero. N terugvoedingstak. P ramię regeneracyjne. S återmatningsgren. (551)
14. **registration arm** : a stiff component, electrically insulated from its support, carrying the steady arm and often hinged to allow along-track or vertical movement. ★ antibalançant → *antibalançant 1.* R фиксатор. D Stützrohr. E antibalancín. I braccio di poligonazione. N pijp voor zijwaartse bevestiging. P ramię ustalające izolowane. S utliggararm. (811)
15. **steady arm** : a hinged arm used to hold the contact wire in its correct across-track position and normally fixed to the registration arm so that the steady arm is always loaded in tension. ★ bras de rappel → *bras 5.* R устройство для бокового крепления рабочего провода. D Seitenhalter. E brazo de tirante. I tirante di poligonazione. N richtstang; zijwaartse bevestiging. P ramię odciągowe. S styv arm. (811)
16. **switch arm** : a principal arm in an electronic switch connection. ★ bras de contacteur → *bras 2.* R плечо коммутационного аппарата. D Schalter-Hauptzweig. E brazo de contactor. I ramo di contattore. N schakelaartak. P ramię łącznika. S elkopplargren. (551)
17. **tone arm** (*Syn.* pick-up arm) : → *arm 11*
18. **turn-off arm** : an auxiliary arm intended to temporarily take over the current directly from the conducting arm. ★ bras d'extinction → *bras 14.* R коммутирующее плечо. D Löschzweig. E brazo de extinción. I ramo di spegnimento. N dooftak. P ramię wygaszające. S släckgren. (551)
19. **(valve) arm** : a part of the circuit bounded by any two principal (a.c. or d.c.) terminals and including one or more simultaneously conducting valves connected together and other components if any. ★ bras (de valve) → *bras 12.* R (вентильное) плечо. D Zweig. E brazo (de una válvula). I ramo (di valvola). N tak (ventiel). P ramię zaworowe. S (ventil)gren. (551)

armature

1. **armature** (USA) : that portion of a commutator or synchronous machine in which a voltage is generated and which carries the load current. ★ induit → *induit 6.* R якорь. D Anker (einer Kommutator-oder einer Synchronmaschine). E inducido. I indotto. N anker. P twornik. S ankare. (411,811)
2. **armature** (UK) : a rotor which carries a winding connected to a commutator. *Note.* — The French term "induit" has a broader sense than the English *(UK)* "armature". ★ ..... → . R якорь (англия). D Anker einer Kommutatormaschine. E ..... I armatura. N anker. P twornik maszyny komutatorowej. S ankare. (411,811)
3. **armature (of a linear traction motor)** : a member which receives the thrust of the linear motor. ★ induit (d'un moteur de traction linéaire) → *induit 7.* R якорь (линейного тягового двигателя). D Anker (Linearmotor). E inducido (de un motor de tracción lineal). I indotto (d'un motore lineare). N anker (van een lineaire tractiemotor). P twornik (silnika liniowego). S armatur. (811)
4. **armature reaction** : → *reaction 2*
5. **armature winding** : → *winding 2*
6. **armature winding** : → *winding 3*
7. **moving armature** : the whole of the pick-up cartridge mobile element mechanically interdependent of the reproducing stylus tip. ★ équipage mobile → *équipage 3.* R подвижная система звукоснимателя. D auswechselbare Nadeleinheit. E armadura móvil. I equipaggio mobile. N beweegbaar anker. P mechanizm drgający (adaptera). S mekanism. (806)

armour

1. **armour** : a covering consisting of a metal tape(s) or wires, generally used to protect the cable from external mechanical effects. ★ armure → *armure 1.* R броня. D Bewehrung. E armadura. I armatura. N pantser. P pancerz. S armering. (461)
2. **armour rods** : → *rod 2*

aromatic

1. **aromatic carbon content** : → *content 1*
2. **aromatic hydrocarbon content** : → *content 2*
3. **synthetic aromatic hydrocarbons** : → *hydrocarbon 2*

ARQ

1. **ARQ** (*Syn.* error detecting and feedback system) : → *system 65*

arrangement

1. **common base (arrangement)** : a circuit arrangement of a bipolar junction transistor in which the base terminal is common to the input circuit and to the output circuit and in which the input terminal is the emitter terminal and the output terminal is the collector terminal. ★ (montage à) base commune → *montage 6.* R (схема с) общей базой. D Basisschaltung. E (montaje en) base común. I base comune (collegamento). N gemeenschappelijke-basis-schakeling. P układ o wspólnej bazie. S gemensambas(koppling). (521)
2. **common collector (arrangement)** : a circuit arrangement of a bipolar junction transistor in which the collector terminal is common to the input circuit and to the output circuit and in which the input terminal is the base terminal and the output terminal is the emitter terminal. ★ (montage à) collecteur commun → *montage 7.* R (схема с) общим коллектором. D Kollektorschaltung. E (montaje en) colector común. I collettore comune (collegamento). N gemeenschappelijke-collector-schakeling. P układ o wspólnym kolektorze. S gemensamkollektor(koppling). (521)
3. **common emitter (arrangement)** : a circuit arrangement of a bipolar junction transistor in which the emitter terminal is common to the input circuit and to the output circuit and in which the input terminal is the base terminal and the output terminal is the collector terminal. ★ (montage à) émetteur commun → *montage 9.* R (схема с) общим эмиттером. D Emitterschaltung. E (montaje en) emisor común. I emettitore comune (collegamento). N gemeenschappelijke-emitter-schakeling. P układ o wspólnym emiterze. S gemensamemitter(koppling). (521)
4. **contact arrangement** : the number, spacing and configuration of contacts in a component. ★ arrangement des contacts → *arrangement 1.* R схема расположения контактов. D Kontaktanordnung. E disposición de los contactos. I combinazione di contatti; disposizione dei contatti. N contactconfiguratie. P układ styków. S kontaktarrangemang. (581)
5. **one-and-a-half breaker arrangement** : a double busbar substation where, for two circuits, three circuit-breakers are connected in series between the two busbars, the circuits being connected on each side of the central circuit-breaker (see Figure 605-3). ★ schéma à un disjoncteur et demi par départ → *schéma 2.* R полуторная схема. D Anderthalb-Leistungsschalter-Anordnung. E esquema con un interruptor y medio por salida. I disposizione a tre interruttori per ogni coppia di linea. N ..... P schemat półtorawyłącznikowy. S en och en halvbrytarställverk. (605)
6. **security arrangements** (in common channel signalling) : the measures provided for maintaining continuity of signalling facilities for traffic circuits served by a signalling link in the event of failure of one or both signalling channels. ★ précautions de sécurité → *précaution 1.* R меры по обеспечению надежности. D Sicherheitsmassnahmen (in ZZG). E precauciones de seguridad. I provvedimenti per la sicurezza. N betrouwbaarheidsvoorzieningen. P zabiegi zabezpieczeniowe sygnalizacji. S säkerhetsåtgärder. (714)
7. **two-breaker arrangement** : a double busbar substation in which the selectors are circuit-breakers. ★ schéma à deux disjoncteurs par départ → *schéma 1.* R схема с двумя выключателями на цепь. D Zwei-Leitstungsschalter-Anordnung. E esquema con dos interruptores por salida. I disposizione a due interruttori per ogni linea. N ..... P schemat dwuwyłącznikowy. S dubbelbrytarställverk. (605)

array

1. **Adcock (array) antenna** : → *antenna 3*
2. **antenna array** (*Syn.* array) : → *array 4*
3. **anti-jamming array** : a receiving array whose radiation pattern may be adjusted to reduce or eliminate in-band jamming or interference. ★ antenne antibrouillage → *antenne 51.* R противопомеховая антенная решетка. D störungsausblendende Antenne. E conjunto antijamming; antena antiruido. I schiera antidisturbo. N antistoringsstelsel. P antena przeciwzakłóceniowa. S störningsreducerande antenn. (712)
4. **array** (antenna) (*Syn.* antenna array) : an antenna comprised of a number of generally identical radiating elements, arranged, oriented and excited to obtain a prescribed radiation pattern. *Notes. 1* — In most cases radiating elements are identical and congruent by translation or by rotation about an axis ; moreover they are in general regulary spaced. *2* — In French, unless otherwise specified, the use of the term "antenne en réseau" implies that radiating elements are congruent by a simple translation. ★ (antenne) (en) réseau → *réseau 3.* R антенная решетка. D Gruppenantenne; Antennengruppe. E conjunto; conjunto de antenas. I antenna a schiera. N antennestelsel. P zestaw antenowy. S gruppantenn. (712)
5. **array factor** : → *factor 12*
6. **Chebyshev array** (*Syn.* Dolph-Chebyshev array) : an array antenna with uniform element spacing and excitation coefficients chosen such that the array factor can be expressed as a Chebyshev polynomial whose order is the number of elements minus one. *Note.* — The array factor of a Chebyshev array is such that all the side lobes have the same level. ★ réseau de Dolph Chebyshev → *réseau 87.* R антенная решетка Чебышева. D Tschebyschew-Gruppe; Dolph-Tschebyschew-Gruppe. E conjunto Chebyshev; conjunto de Dolph Chebyshev. I schiera Dolph-Chebyshev. N Tchebyscheff-antennestelsel; Dolph-Tchebyscheff-antennestelsel. P zestaw (antenowy) Czebyszewa; zestaw (antenowy) Dolph-Czebyszewa. S Chebyshev-antenn. (712)
7. **circular array** (*Syn.* ring array) : an antenna comprised of a number of identical radiating elements of which each set of corresponding points lie on a circle. ★ groupement circulaire (d'antennes) → *groupement 4.* R кольцевая антенная решетка; круговая антенная решетка. D Kreisgruppenantenne. E conjunto circular (de antenas); red circular. I schiera circolare. N cirkelvormig stelsel; ringantenne. P zestaw (antenowy) pierścieniowy. S cirkulär gruppantenn. (712)
8. **conformal array** : an array which conforms to a surface whose shape is mainly determined by considerations other than electromagnetic, e.g. aerodynamic or hydrodynamic considerations. ★ réseau conformé → *réseau 81.* R конформная антенная решетка. D oberflächentreue Gruppenantenne. E conjunto conformado. I schiera fluodinamica conforme. N verzonken (antenne)stelsel. P zestaw antenowy przystosowany. S formanpassad gruppantenn. (712)
9. **conical array** : an antenna comprised of a number of identical radiating elements of which each set of corresponding points lie on a conical surface. ★ groupement conique (d'antennes) → *groupement 5.* R коническая антенная решетка. D Kegelantenne. E conjunto cónico (de antenas). I schiera conica. N kegelvormig stelsel. P zestaw (antenowy) stożkowy. S konisk gruppantenn. (712)
10. **cylindrical array** : an antenna comprised of a number of identical radiating elements of which each set of corresponding points lie on a cylindrical surface. ★ groupement cylindrique (d'antennes) → *groupement 6.* R цилиндрическая антенная решетка. D Zylinderantenne. E conjunto cilíndrico (de antenas). I schiera cilindrica. N cilindrisch stelsel. P zestaw (antenowy) cylindryczny. S cylindrisk gruppantenn. (712)
11. **Dolph-Chebyshev array** (*Syn.* Chebyshev array) : → *array 6*
12. **linear array** (antenna) : an array in which corresponding points of the radiating elements lie along a straight line. ★ (antenne en) réseau rectiligne → *réseau 6.* R линейная антенная решетка. D Lineargruppe. E conjunto lineal (de antenas). I schiera lineare. N lineair (antenne)stelsel. P zestaw (antenowy) liniowy. S linjär gruppantenn. (712)
13. **multiple-unit steerable array** (*Syn.* musa antenna) : a linear array of identical rhombic antennas the outputs of which are combined with adjustable phase delays so as to give steerable directional properties in the vertical plane of symmetry. ★ antenne MUSA → *antenne 107.* R многоэлементная антенная решетка с управляемой диаграммой направленности. D MUSA-Antenne; Gruppenantenne mit schwenkbarer Richtcharakteristik. E conjunto orientable de unidades múltiples; antena MUSA. I schiera a scansione.

N musa-antenne. P zestaw wieloelementowy sterowalny. S musa-antenn. (712)

14. **phased array antenna** : → *antenna 90*
15. **planar array** (antenna) : an array in which corresponding points of the radiating elements lie in a plane. ★ (antenne en) réseau plan → *réseau 5.* R плоская антенная решетка. D ebene Gruppe. E conjunto plano (de antenas). I schiera piana. N vlak (antenne)stelsel; planair (antenne)stelsel. P zestaw (antenowy) płaszczyznowy. S plan gruppantenn. (712)
16. **reflective array antenna** : → *antenna 95*
17. **ring array** (*Syn.* circular array) : → *array 7*
18. **slewing (array) antenna** : → *antenna 106*
19. **slot array** (antenna) : an array antenna whose elements are slot radiators. ★ (antenne) réseau à fentes → *réseau 7.* R щелевая антенная решетка. D Schlitzgruppenantenne; Schlitzgruppe. E conjunto de ranuras (antena). I schiera a fessura. N sleufantennestelsel. P zestaw (antenowy) szczelinowy. S slitsgruppantenn. (712)
20. **spherical array** : an antenna comprised of a number of identical radiating elements of which each set of corresponding points lie on a spherical surface. ★ groupement sphérique (d'antennes) → *groupement 11.* R сферическая антенная решетка. D sphärische Gruppenantenne. E conjunto esférico (de antenas). I schiera sferica. N bolvormig stelsel. P zestaw (antenowy) kulisty. S sfärisk gruppantenn. (712)

arrester

1. **discharge current (of an arrester)** : → *current 69*
2. **expulsion type arrester** : an arrester with an arcing chamber in which the current is interrupted by a sudden release of gas caused by the passage of the arc. ★ parafoudre à expulsion → *parafoudre 4.* R трубчатый разрядник. D Rohrableiter. E pararrayos de expulsión. I scaricatore a espulsione. N expulsieafleider. P odgromnik wydmuchowy. S blåsavledare. (604)
3. **lightning arrester** (*Syn.* surge diverter; surge arrester) : a device designed to protect the electrical apparatus from high transient overvoltages and to limit the duration and frequently the amplitude of the follow-on current. ★ parafoudre → *parafoudre 3.* R защитный разрядник. D Überspannungsableiter. E pararrayos autoválvula; pararrayos (en concepto eléctrico). I parafulmine; scaricatore. N overspanningsafleider. P odgromnik. S avledare. (604,811)
4. **non-linear resistor type arrester** : an arrester made up of non-linear resistors possibly in series with spark gaps. ★ parafoudre à résistance variable → *parafoudre 5.* R вентильный разрядник. D Ventilableiter. E pararrayos de resistencia variable. I scaricatore a resistenza variabile. N afleider van het niet-lineaire weerstandstype. P odgromnik z opornikiem nieliniowym. S ventilavledare. (604)
5. **residual voltage (of an arrester)** : → *voltage 178*
6. **surge arrester** (*Syn.* lightning arrester) : → *arrester 3*

Arrhenius

1. **Arrhenius graph** (*Syn.* thermal endurance graph) : → *graph 4*

articulated

1. **articulated unit** : → *unit 5*

articulation

1. **articulation** : the ratio, usually expressed as a percentage, of the number of speech components correctly received over the system under given complete connection conditions to the total number of unrelated and specified components transmitted. *Notes. 1* — An articulation test is carried out in a given direction of transmission. *2* — In an articulation test, the components which the listener states he has received are compared with the components spoken by the talker. ★ netteté phonétique → *netteté 5.* R коэффициент артикуляции. D Verständlichkeit. E articulación. I intelligibilità. N verstaanbaarheid. P wyrazistość fonetyczna. S uppfattbarhetstal. (722)
2. **articulation** (*Syn.* intelligibility) : percentage of speech units correctly received out of those transmitted. *Notes. 1* — The word "articulation" is used when the units of speech material are meaningless syllables or fragments; the word "intelligibility" is used when the units of speech material are complete, meaningful words, phrases or sentences. *2.* — It is important to specify the type of speech material: phonemes, logatoms, syllables, words, sentences, etc.The kind of speech material used is identified by an appropriate adjective syllable articulation, vowel (or consonnant) articulation, monosyllabic word intelligibility, discrete word intelligibility sentence intelligibility. ★ indice de netteté phonétique → *indice 18.* R артикуляция; разборчивость. D Verständlichkeit. E índice de nitidez fonética; índice de inteligibilidad. I indice di intellegibilità. N articulatiescore; spraakverstaanbaarheidspercentage. P wyrazistość; wskaźnik wyrazistości; wskaźnik zrozumiałości. S taluppfattbarhet. (801)
3. **articulation reference equivalent** : → *equivalent 1*
4. **logatom articulation** : articulation in which the speech components are logatoms. ★ netteté pour les logatomes → *netteté 6.* R коэффициент логатомной артикуляции. D Logatom-Verständlichkeit. E articulación de logatomos. I intelligibilità per i logatomi. N logatoomverstaanbaarheid. P wyrazistość logatomowa. S logatomuppfattbarhetstal. (722)
5. **sentence articulation** : articulation in which the speech components are sentences usually extracted from a conventional list. ★ netteté pour les phrases → *netteté 8.* R коэффициент фразовой артикуляции. D Satzverständlichkeit. E articulación de frases. I intelligibilità per le frasi. N zinsverstaanbaarheid. P wyrazistość zdań. S frasuppfattbarhetstal. (722)
6. **sound articulation** : articulation in which to speech components are the vowels and consonants or consonant combinations of the logatom sent over the system. ★ netteté pour les sons → *netteté 9.* R коэффициент звуковой артикуляции. D Lautverständlichkeit. E articulación de sonidos. I intelligibilità per i suoni. N foneemverstaanbaarheid. P wyrazistość dźwięków. S ljuduppfattbarhetstal. (722)
7. **syllable articulation** : articulation in which the speech components are syllables. ★ netteté pour les syllabes → *netteté 10.* R коэффициент слоговой артикуляции. D Silbenverständlichkeit. E articulación de sílabas. I intelligibilità per le sillabe. N lettergreepverstaanbaarheid. P wyrazistość sylabowa. S stavelseuppfattbarhetstal. (722)
8. **word articulation** : articulation in which the speech components are words usually extracted from a conventional list. ★ netteté pour les mots → *netteté 7.* R коэффициент словесной артикуляции. D Wortverständlichkeit. E articulación de palabras. I intelligibilità per le parole. N woordverstaanbaarheid. P wyrazistość słowna. S orduppfattbarhetstal. (722)

artificial

1. **artificial balancing line** (*Syn.* balancing network) : → *network 7*
2. **artificial dielectric** : → *dielectric 1*
3. **artificial dielectric** : → *dielectric 2*
4. **artificial ear** : → *ear 1*
5. **artificial hand** : → *hand 1*
6. **artificial mains network** : → *network 4*
7. **artificial mastoid** : → *mastoid 1*
8. **artificial mouth** : → *mouth 1*
9. **artificial pollution test** : → *test 4*
10. **artificial radioactivity** : → *radioactivity 1*
11. **artificial reverberation** : → *reverberation 1*
12. **artificial voice** : → *voice 1*
13. **general artificial ventilation** : → *ventilation 3*
14. **local artificial ventilation** : → *ventilation 4*
15. **permanent supplementary artificial lighting** : → *lighting 24*

artwork

1. **artwork master** : an accurate configuration the scale of which is chosen as required to provide the necessary accuracy, and which is used to produce the original production master. ★ dessin modèle → *dessin 1.* R оригинал рисунка печатной платы. D Druckvorlage. E diseño original. I disegno originale. N uitgangsfoto. P matryca wyjściowa; klisza wzorcowa. S mönsterritning. (541)

ascending

1. **ascending node** : → *node 1*

ash

1. **coal ash content meter** : → *content meter 2*

ASK

1. **ASK** (*Syn.* amplitude shift keying) : → *keying 1*

askarel

1. **askarel** : a synthetic, fire-resistant insulating liquid which, when decomposed by the electric arc, will evolve predominantly non-combustible gaseous mixtures. *Note.* — Askarels used at present consist of polychlorinated biphenyls with or without the addition of polychlorinated benzenes. ★ askarel → *askarel 1.* R аскарель. D Askarel. E askarel. I askarel. N askarel. P askarel. S askarel. (212)

aspect

1. **aspect ratio** : → *ratio 7*
2. **aspect ratio** : → *ratio 8*

ASR

1. **ASR** (*Syn.* answer seizure ratio) : → *ratio 6*

assemble

1. **to assemble** : to translate a program expressed in an assembly language into a computer language and perhaps to link subroutines. ★ assembler → *assembler 1.* R компоновать; транслировать с языка ассемблера; ассемблировать. D uebersetzen; assemblieren. E ensamblar. I assemblare. N assembleren. P przekładać program; asemblować. S assemblera. (714)

assembled

1. **bundle assembled aerial cable** : → *cable 4*

assembler

1. **assembler** (*Syn.* assembly program) : a computer program used to assemble. ★ assembleur → *assembleur 1.* R ассемблер; компонующая программа. D Uebersetzer; Assemblierer; Assemblierprogramm. E ensamblador; programa ensamblador. I assemblatore. N assembleerprogramma. P program komputerowy przekładowy; asembler. S assemblerare. (714)

assembly

1. **assembly** (of switchgear and controlgear) : a combination of switchgear and/or controlgear completely assembled with all internal electrical and mechanical interconnections. ★ ensemble → *ensemble 2.* R комплект (коммутационной аппаратуры и аппаратуры управления). D Schaltgerätekombination. E conjunto (de aparamenta de conexión y de mando). I complesso (di apparecchiatura di manovra e di comando). N (schakel- en verdeel)inrichting. P rozdzielnica i sterownica. S kopplingsutrustning. (441)
2. **assembly for failed fuel element localization** : an assembly designed to enable localization of failed fuel elements by scanning the different regions of the nuclear reactor. ★ ensemble de localisation de défaut d'éléments combustibles → *ensemble 8.* R прибор (установка) для обнаружения местонахождения тепловыделяющих элементов с негерметичными оболочками. D Einrichtung zur Lokalisierung defekter Brennelemente. E equipo de localización de fallo de elementos combustibles; equipo de localización de rotura de vainas. I complesso per localizzazione di rotture di guaine. N opstelling voor lokalisering van lekken in splijtstofelementen. P lokalizator nieszczelnych elementów paliwowych. S mätanordning för lokalisering av bränsleskador. (392)
3. **assembly language** : → *language 1*
4. **assembly program** (*Syn.* assembler) : → *assembler 1*
5. **automatic control assembly** (for a nuclear reactor) : an assembly designed to perform the automatic regulation of a quantity which is characteristic of the power of the reactor (such as the neutron flux density or any other quantity for which regulation is desired) and, in certain conditions, to change automatically the value of this quantity. ★ ensemble de réglage automatique → *ensemble 13.* R прибор (установка) автоматического регулирования (ядерного реактора). D Regeleinrichtung. E equipo de regulación automática (de un reactor nuclear). I complesso di regolazione automatica (di un reattore nucleare). N automatische regelopstelling (voor een kernreactor). P urządzenie do automatycznej regulacji. S automatisk regleranordning. (392)
6. **basic 15-supergroup assembly** (*Syn.* basic (15-supergroup) hypergroup) : a 15-supergroup assembly occupying the standardized frequency band 312-4 028 kHz. *Note.* — CCITT uses the French term "assemblage de base de 15 groupes secondaires" ; the simpler term "hypergroupe de base" is proposed as a preferred alternative. ★ hypergroupe de base (de 15 groupes secondaires) → *hypergroupe 3.* R основной блок из 15 вторичных групп; основная пятеричная группа (из 15 вторичных групп). D Basishypergruppe; Basis-15-Sekundärgruppenanordnung. E hipergrupo de base (de 15 grupos secundarios); conjunto de base de 15 grupos secundarios. I gruppo pseudo-quaternario di base; ipergruppo di base. N basishypergroep. P zestaw 15 grup wtórnych podstawowy. S ..... (704)
7. **cable assembly** (*Syn.* optical cable assembly) : → *assembly 17*
8. **contact assembly** : an assembly of contact members, with their insulation, which close or open their contact circuit by their relative movement. ★ ensemble de contact → *ensemble 6.* R контакт. D Kontaktsatz. E conjunto de contacto. I insieme di contatto. N contactgroep. P zestyk. S kontaktgrupp. (446)
9. **dead-end assembly** (*Syn.* tension set) : → *set 57*
10. **enclosed assembly** (of switchgear and controlgear) : an assembly enclosed on all sides, top and bottom in such a manner as to provide a specified degree of protection. *Note.* — The mounting surface may form a part of the enclosure when specified in the relevant publication. ★ ensemble sous enveloppe → *ensemble 21.* R комплект в закрытой оболочке (коммутационной аппаратуры и аппаратуры управления). D geschlossene Schaltgerätekombination; gekapselte Schaltgerätekombination. E conjunto bajo envolvente (de aparamenta de conexión y de mando). I complesso in involucro (di apparecchiatura di manovra e di comando). N omsloten (schakel- en verdeel)inrichting. P rozdzielnica i sterownica osłonięta. S kapslad kopplingsutrustning. (441)
11. **exponential assembly** : a subcritical assembly used for an exponential experiment. ★ assemblage exponentiel → *assemblage 7.* D Exponentialanordnung. E conjunto exponencial. I struttura esponenziale. N exponentiële opstelling. P zestaw wykładniczy. S exponentialuppställning. (026)
12. **factory-built assembly** (of switchgear and controlgear) (*Syn.* FBA (abbreviation)) : an assembly built and assembled under the responsibility of the manufacturer and conforming to an established type or system, without deviations likely to influence the performance significantly from that of the typical assembly verified to be in accordance with the relevant standard. ★ ensemble monté en usine → *ensemble 19.* R комплект заводского изготовления (коммутационной аппаратуры и аппаратуры управления). D fabrikfertige Schaltgerätekombination; FSK (Abkürzung). E conjunto montado en fábrica (de aparamenta de conexión y de mando); CAMF (abreviatura). I complesso costruito in fabbrica (di apparecchiatura di manovra e di comando); ACF (abbreviazione). N geprefabriceerde (schakel- en verdeel)inrichting; GSV (afgekort). P rozdzielnica i sterownica prefabrykowana. S fabrikstillverkad kopplingsutrustning. (441)
13. **flange assembly** : a waveguide flange mounted on the end of a waveguide for the purpose of aligning and connecting the waveguide aperture to a mating waveguide aperture. ★ bride montée → *bride 11.* R фланцевая сборка. D Flanschanordnung. E brida montada. I flangia montata. N koppelflens. P złącze falowodowe. S monterad fläns. (726)
14. **fuel assembly** : a grouping of fuel elements which is not taken apart during the charging and discharging of a reactor core. ★ assemblage combustible → *assemblage 3.* D Brennstoffanordnung. E conjunto combustible. I gruppo di elementi di combustibile. N splijtstofpakket. P sekcja paliwowa. S bränslepatron. (026)
15. **inductor assembly channel furnace** : → *furnace 32*
16. **inductor assembly crucible furnace** : → *furnace 33*
17. **optical cable assembly** (*Syn.* cable assembly) : an optical cable that is terminated with optical fibre connectors. ★ câble assemblé → *câble 28.* R оптический кабельный комплект. D konfektioniertes LWL-Kabel. E cable óptico ensamblado; cable ensamblado. I cavo ottico connettorizzato. N optisch kabelsamenstel; kabelsamenstel. P kabel światłowodowy kompletny. S kontakterad optokabel. (731)
18. **packet assembly** : a user facility offered by a data network so that data which are transmitted by non-packet mode terminals can be transferred by packet switching. ★ assemblage de paquets → *assemblage 5.* R сборка пакетов. D Paketierung.

E montaje de paquetes. I formazione dei pacchetti; assemblaggio dei pacchetti. N ..... P składanie pakietów. S paketsammanställning. (721)

19. **(pulse) counting assembly** : a radiation meter intended to count the pulses produced in its radiation detector or detectors. ★ ensemble de comptage → *ensemble 4.* R счетный прибор (импульсов). D (Impuls-)Zählanordnung (Impuls-). E conjunto contador. I insieme di conteggio; complesso di conteggio. N opstelling voor pulstelling; telopstelling. P urządzenie do zliczania impulsów. S ..... (391,881)
20. **radiation measuring assembly** (*Syn.* radiation meter) : → *meter 46*
21. **(radiation) multi-parameter analyzing assembly** : → *analyzing 1*
22. **(radiation) warning assembly** : an assembly intended to give a warning, usually visual or audible, that the quantity connected with ionizing radiation exceeds some predetermined value or that the measured value is not within some predetermined limits. ★ avertisseur (de rayonnement) → *avertisseur 1.* R прибор (установка) предупредительной сигнализации (о наличии ионизирующего излучения). D (Strahlungs-)Warnanordnung. E avisador (de radiación). I segnalatore (di radiazione). N stralingsalarmopstelling; waarschuwingsopstelling. P sygnalizator promieniowania. S strålningsvakt. (391,881)
23. **radiometric bore-hole logging assembly** : → *logging 1*
24. **safety logic assembly** : an assembly connected to the measuring channels of one or more safety monitoring assemblies and intended to perform a decision-making function and give a command signal to one or more safety actuators. ★ ensemble logique de sécurité → *ensemble 18.* R логическое устройство. D Auswahlschaltung. E equipo lógico de seguridad. I complesso logico di protezione. N logische opstelling (in veiligheidsschakelingen); veiligheidsnoodstopsysteem. P obwody logiczne zabezpieczeń. S (säkerhets)logikenhet. (392)
25. **(safety) monitoring assembly** : → *monitoring 15*
26. **storage assembly** : an assembly of electrodes (including the mesh grid) comprising the target, the electrodes used to control storage, the electrodes which collect the output signal and the other parts used as a structural support. ★ ensemble de mémoire → *ensemble 10.* R накопительный узел. D Speicheranordnung. E conjunto de memoria. I insieme di memoria. N elektrodenpakket van een geheugenbuis. P ..... S minnesenhet. (531)
27. **suspension assembly** (*Syn.* suspension set) : → *set 51*
28. **(valve device) assembly** : an electrically and mechanically combined assembly of valve devices or (valve device) stacks, complete with all its connections and auxiliaries in its own mechanical structure. *Note.* — Similar terms are applied to stacks or assemblies comprising specifically rectifier diodes or thyristors, e.g. diode stack (rectifier diodes only), thyristor assembly (thyristors only or in combination with rectifier diodes). ★ ensemble (d'éléments de valve) → *ensemble 15.* R вентильный блок. D (Ventinbauelement-)Satz. E conjunto (de elementos de válvula). I complesso (di dispositivi a valvola). N (ventielelement)bouweenheid. P zespół zaworowy. S ventilenhet. (551)
29. **video head assembly** : the unit on a transverse video tape recorder/reproducer comprising in particular a head wheel, magnetic heads and associated components such as: motor, vacuum guide, tachometer, rotary transformer or slip-rings, control track head, etc. ★ bloc de têtes vidéo → *bloc 8.* R блок вращающихся головок. D Videokopfträger; Videokopfaggregat. E conjunto de cabeza de imagen. I gruppo di testine video. N beeldkopeenheid. P zestaw głowic wizyjnych. S videohuvudsats. (806)
30. **X-ray tube assembly** : an X-ray tube housing with an X-ray tube installed. ★ ensemble radiogène → *ensemble 20.* R рентгеновская трубка в сборке. D Röntgenstrahler. E equipo de rayos X. I complesso tubo-guaina. N röntgenbuissamenstel. P głowica rentgenowska. S röntgenrör med skyddskåpa. (881)
31. **yoke assembly** : → *yoke 4*
32. **15-supergroup assembly** (*Syn.* (15-supergroup) hypergroup) : 1. An assembly, obtained by frequency division multiplexing, of 15 supergroups in adjacent positions in a frequency band of specified width, with guard bands between adjacent supergroups. 2. A frequency band of standardized width, 3 716 kHz, in a multichannel carrier system and occupying one of a number of specified positions in the spectrum. *Notes. 1* — "15-supergroup assembly" is the only term in use by the CCITT. *2* — The French word "hypergroupe" or the English word "hypergroup" is sometimes used for a supergroup assembly different from that standardized by CCITT. Accordingly, this term should be qualified by the number of supergroups used in each application. *3* — A 15-supergroup assembly is normally an assembly of 900 FDM telephone channels. *4* — Signals, other than those derived from an assembly of supergroups but having specified characteristics, may occupy the whole or a part of a frequency band assigned to a 15-supergroup assembly. ★ hypergroupe (de 15 groupes secondaires) → *hypergroupe 4.* R блок из 15 вторичных групп; пятеричная группа (из 15 вторичных групп). D Hypergruppe; 15-Sekundärgruppen-Anordnung. E hipergrupo (de 15 grupos secundarios); conjunto de 15 grupos secundarios. I gruppo pseudo-quaternario; ipergruppo (raggruppamento di 15 gruppi secondari). N 15-supergroepen; hypergroep. P zestaw 15 grup wtórnych. S ..... (704)
33. **15-supergroup assembly modulating equipment** : → *equipment 86*
34. **15-supergroup assembly translating equipment** : → *equipment 87*

assigned

1. **assigned error** : → *error 4*

assignment

1. **demand assignment** : the assignment of traffic-carrying capacity as and when required either on traffic demand or on individual call attempt. ★ assignation à la demande → *assignation 1.* R предоставление по требованию. D Zuordnung auf Anforderung. E asignación a demanda. I assegnazione su domanda. N toewijzing naar behoefte. P potwierdzenie wzięcia do pracy. S efterfrågestyrning. (714)

assisted

1. **assisted operation** : → *operation 1*

assisting

1. **assisting in rear** (*Syn.* banking) : → *banking 1*

associated

1. **associated electrical apparatus** : → *apparatus 3*
2. **associated phase layout** : → *layout 1*
3. **associated signalling** : → *signalling 4*

assumptions

1. **loading assumptions** : a set of loading conditions, resulting from national standards or statutory regulations or from a study of meteorological data, which are used for designing each element of a line. ★ hypothèses de charge → *hypothèse 1.* R нагрузочные условия. D Lastannahmen. E hipótesis de carga. I ipotesi di carico. N aangenomen belastingen. P założenia obciążeniowe. S belastningsantagande. (466)

assurance

1. **reliability and maintainability assurance** : the implementation of adequate planned and systematic actions necessary to provide confidence that an item will satisfy given reliability performance and maintainability performance requirements. *Note.* — Reliability and maintainability assurance aims at making sure that the reliability performance and maintainability performance will be what it should be. This includes a continuing evaluation of adequacy and effectiveness with a view to having timely corrective measures and feedback initiated where necessary. A specific reliability and maintainability assurance involves the necessary plans and actions to provide confidence through verifications, audits and evaluation. ★ assurance de la fiabilité et de la maintenabilité → *assurance 1.* R обеспечение безотказности и ремонтопригодности. D Zuverlässigkeits-Sicherung. E aseguración de la fiabilidad y de la mantenibilidad. I assicurazione dell'affidabilità e manutenibilità. N borging van betrouwbaarheid en onderhoudbaarheid. P zapewnianie niezawodności i obsługiwalności. S tillförlitlighetssäkring. (191)

astatic

1. **astatic control** : → *control 4*
2. **astatic measuring instrument** : → *measuring instrument 2*

astigmatism

1. **astigmatism** : a focus defect in which electrons, in different axial planes, focus at different axial distances. ★ astigmatisme → *astigmatisme 1.* R астигматизм. D Astigmatismus. E astigmatismo. I astigmatismo. N astigmatisme. P astygmatyzm. S astigmatism. (531)

astronomical

1. **astronomical sunshine duration** : → *duration 1*

asymmetric

1. **asymmetric bridge with external commutation "out"** : → *bridge 1*
2. **asymmetric (characteristic circuit) element** : → *element 3*
3. **asymmetric half-controlled bridge** : → *bridge 2*
4. **maximum asymmetric short-circuit current** : → *short-circuit current 5*

asymmetrical

1. **asymmetrical control** : → *control 5*
2. **asymmetrical input** : → *input 4*
3. **asymmetrical luminaire** : → *luminaire 2*
4. **asymmetrical output** : → *output 1*
5. **asymmetrical phase control** : → *control 6*
6. **asymmetrical terminal voltage** : → *voltage 11*
7. **asymmetrical voltage** (*Syn.* common mode voltage) : → *voltage 30*

asymptotic

1. **asymptotic availability** : → *availability 1*
2. **asymptotic mean availability** : → *availability 2*
3. **asymptotic mean unavailability** : → *unavailability 1*
4. **asymptotic unavailability** : → *unavailability 2*

asynchronous

1. **asynchronous impedance** : → *impedance 4*
2. **asynchronous link** : → *link 1*
3. **asynchronous machine** : → *machine 3*
4. **asynchronous motor** : → *motor 8*
5. **asynchronous operation** : → *operation 2*
6. **asynchronous operation of a synchronous machine** : → *operation 3*
7. **asynchronous reactance** : → *reactance 3*
8. **asynchronous resistance** : → *resistance 6*
9. **asynchronous telecontrol transmission** (*Syn.* start-stop telecontrol transmission) : → *transmission 61*
10. **double-fed asynchronous machine** : → *machine 9*
11. **slip (of a linear traction asynchronous motor)** : → *slip 7*

atlas

1. **colour atlas** : collection of colour samples arranged and identified according to specified rules. ★ atlas des couleurs → *atlas 1.* R атлас цветов. D Farbatlas; Farbenkarte. E atlas de color. I atlante dei colori. N kleurenatlas. P atlas barw. S färgatlas. (845)

ATM

1. **ATM** (*Syn.* alternative test method) : → *method 1*

atmosphere

1. **controlled atmosphere** : a special atmosphere whose composition is given (and in some cases, automatically controlled). ★ atmosphère contrôlée → *atmosphère 1.* R контролируемая атмосфера. D gesteuerte Atmosphäre. E atmósfera controlada. I atmosfera controllata. N beheerste atmosfeer. P atmosfera regulowana. S styrd atmosfär. (841)
2. **electrical apparatus for explosive atmospheres** : → *apparatus 6*
3. **explosive atmosphere** : a mixture with air, under atmospheric conditions, of flammable substances in the form of gas, vapour, mist, dust or fibres in which, after ignition, combustion spreads throughout the unconsumed mixture. ★ atmosphère explosive → *atmosphère 4.* R взрывоопасная среда. D explosionsfähige Atmosphäre. E atmósfera explosiva. I atmosfera esplosiva. N ontplofbare atmosfeer. P atmosfera wybuchowa. S explosiv atmosfär. (426)
4. **explosive dust atmosphere** : a mixture with air, under atmospheric conditions, of flammable substances in the form of dust or fibres in which, after ignition, combustion spreads throughout the unconsumed mixture. ★ atmosphère explosive poussiéreuse → *atmosphère 6.* R взрывоопасная пылевая среда. D explosionsfähige Staubatmosphäre. E atmósfera explosiva pulverulenta. I atmosfera esplosiva per la presenza di polvere. N ontplofbare stofatmosfeer. P atmosfera wybuchowa pyłowa. S explosiv dammblandning. (426)
5. **explosive gas atmosphere** : a mixture with air, under atmospheric conditions, of flammable substances in the form of gas, vapour or mist, in which, after ignition, combustion spreads throughout the unconsumed mixture. ★ atmosphère explosive gazeuse → *atmosphère 5.* R взрывоопасная газовая среда. D explosionsfähige Gasatmosphäre. E atmósfera explosiva gaseosa. I atmosfera esplosiva per la presenza di gas. N ontplofbare gasatmosfeer. P atmosfera wybuchowa gazowa. S explosiv gasblandning. (426)
6. **ignition temperature of an explosive gas atmosphere** : → *temperature 19*
7. **inert atmosphere** : an atmosphere with no active component to influence the process. ★ atmosphère inerte → *atmosphère 7.* R инертная атмосфера. D inerte Atmosphäre. E atmósfera inerte. I atmosfera inerte. N inerte atmosfeer. P atmosfera obojętna. S inert atmosfär. (841)
8. **natural atmosphere of a furnace** : balance gas mixture under free running conditions composed of ambient air, liberated processing gas, and gas components from chemical reactions between solids and gas. ★ atmosphère naturelle → *atmosphère 8.* R естественная атмосфера печи. D natürliche Ofenatmosphäre. E atmósfera natural. I atmosfera naturale. N natuurlijke atmosfeer. P atmosfera naturalna. S naturlig atmosfär. (841)
9. **neutral atmosphere** : a controlled and balanced atmosphere, so that no oxidizing or reducing effect will be produced on the charge. ★ atmosphère neutre → *atmosphère 9.* R нейтральная атмосфера. D neutrale Atmosphäre. E atmósfera neutra. I atmosfera neutra. N neutrale atmosfeer. P atmosfera neutralna. S neutral atmosfär. (841)
10. **optical thickness of the atmosphere** : → *thickness 6*
11. **oxidizing atmosphere** : an atmosphere with a surplus of oxidizing components, in order to produce an oxidizing process. ★ atmosphère oxydante → *atmosphère 10.* R окислительная атмосфера. D oxidierende Atmosphäre. E atmósfera oxidante. I atmosfera ossidante. N oxyderende atmosfeer. P atmosfera utleniająca. S oxiderande atmosfär. (841)
12. **processing atmosphere** : the special gas balance of the furnace's atmosphere to produce the desired process. ★ atmosphère de travail → *atmosphère 3.* R технологическая атмосфера. D Prozessgasatmosphäre. E atmósfera de trabajo. I atmosfera di lavoro. N werkatmosfeer. P atmosfera technologiczna. S ugnsatmosfär. (841)
13. **reducing atmosphere** : a controlled atmosphere with a surplus of reducing components in order to produce a reducing process. ★ atmosphère réductrice → *atmosphère 12.* R восстановительная атмосфера. D reduzierende Atmosphäre. E atmósfera reductora. I atmosfera riducente. N reducerende atmosfeer. P atmosfera redukcyjna. S reducerande atmosfär. (841)
14. **reference atmosphere for refraction** : an atmosphere in which the refractivity is determined by the equation :

$$N(h) = 315 \exp(-0{,}136\, h)$$

where h is the altitude in kilometres above sea level. *Note.* — Up to a height of 1 km, the reference atmosphere for refraction may in practice be regarded as identical to the standard radio atmosphere. ★ atmosphère de référence (pour la réfraction) → *atmosphère 2.* D Bezugsatmosphäre; Referenzatmosphäre. P atmosfera odniesienia (dla załamania). (705)
15. **special atmosphere** : an atmosphere of a particular nature, other than air at normal pressure, particularly appropriate to a specific heat treatment. *Examples :* — oxidizing atmosphere — reducing atmosphere — neutral atmosphere (protecting gas, inert gas). ★ atmosphère spéciale → *atmosphère 13.* R специальная атмосфера. D spezielle Ofenatmosphäre. E atmósfera especial. I atmosfera speciale. N bijzondere atmosfeer. P atmosfera szczególna. S specialatmosfär. (841)

16. **standard radio atmosphere** : an atmosphere whose vertical refractivity gradient is equal to the standard refractivity gradient. ★ atmosphère (radioélectrique) normale → *atmosphère 11.* D Standard-Radioatmosphäre. P atmosfera radiowa standardowa. (705)

atmospheric

1. **atmospheric transmissivity** : → *transmissivity 1*

atom

1. **atom** : the smallest particle into which a chemical element can be divided while retaining its chemical properties. ★ atome → *atome 1.* R атом. D Atom. E átomo. I atomo. N atoom. P atom. S atom. (026,111)
2. **Bohr atom** : the model of the atom based on the conception of Bohr and Sommerfeld, according to which the electrons of an atom move around the nucleus in discrete circular or elliptical orbits. *Note.* — To each of the degrees of freedom of the atom there corresponds a series of energy states which determine the spectral series emitted by the atom. ★ atome de Bohr → *atome 2.* R атом Бора. D Bohrsches Atom. E átomo de Bohr. I atomo di Bohr. N atoommodel van Bohr. P atom Bohra. S Bohrs atommodell. (521)

atomic

1. **atomic mass unit** : → *unit 6*
2. **atomic number** : → *number 2*
3. **atomic number** : → *number 3*
4. **effective atomic number** : → *number 9*

A.T.R.

1. **A.T.R. tube** : → *tube 5*

attachment

1. **universal tool attachment** : → *tool 9*

attempt

1. **abandoned call attempt** : a call attempt aborted by the calling user. ★ tentative d'appel abandonnée → *tentative 4.* D abgebrochener Verbindungsversuch. P wywołanie zaniechane. (715)
2. **blocked call attempt** : → *call 2*
3. **call attempt** (by a user) : a single sequence of operations made by a user of a telecommunication network trying to obtain the desired user, terminal or service. ★ (tentative d') appel → *appel 41.* R попытка вызова (пользователем). D Anrufversuch. E (tentativa de) llamada (por un usuario). I chiamata (tentativo di .....). N oproep (door een oproeper). P nawiązywanie połączenia. S anropsförsök. (701,714,715,721,722)
4. **completed call attempt** (*Syn.* effective call attempt) : a successful call attempt that results in the transmission of an answer signal. *Note.* — The number reached might not be the one wanted by the caller, due to dialling error or network malfunction. ★ tentative d'appel efficace → *tentative 8.* D erfolgreicher Verbindungsversuch. P połączenie dokonane. (715)
5. **effective call attempt** (*Syn.* completed call attempt) : → *attempt 4*
6. **first call attempt** : the first attempt, related to a given call intent, that reaches a given point of the network. ★ première tentative d'appel → *tentative 1.* D Erstanruf. P wywołanie pierwotne. (715)
7. **fully-routed call attempt** (*Syn.* successful call attempt) : → *attempt 11*
8. **lost call attempt** : a call attempt that fails for a lack of resources, or owing to an error or failure in the network. ★ tentative d'appel perdue → *tentative 9.* D zu Verlust gegangener Verbindungsversuch. P wywołanie stracone. (715)
9. **repeated call attempt** (*Syn.* reattempt) : any of the call attempts subsequent to a first call attempt related to a given call intent. *Note.* — Repeated call attempts may be automatic even if the first is manual. ★ tentative d'appel répétée → *tentative 10.* D Folgeanruf. P wywołanie powtórne. (715)
10. **successful call attempt** : a call attempt by a user resulting in a connection to the called subscriber's line or in the receipt of a busy tone or other subscriber-busy signal if the line is busy. ★ appel acheminé → *appel 3.* R успешный вызов. D erfolgreicher Belegungsversuch. E tentativa de llamada encaminada. I tentativo di chiamata a buon fine. N geslaagde oproep. P połączenie prawidłowe. S fullföljt anrop. (714)
11. **successful call attempt** (*Syn.* fully-routed call attempt) : a call attempt which results in the calling user receiving intelligible information about the state of the called user, as well as any possibility of establishing a connection. ★ tentative d'appel acheminée → *tentative 6.* D vollständiger Verbindungsversuch. P połączenie udane. (715)
12. **successful call attempt** : a call attempt by a user which results in ringing the wanted party. ★ appel reçu → *appel 15.* R успешная попытка вызова. D erfolgreicher Anrufversuch. E llamada recibida. I chiamata a buon fine. N geslaagde oproeppoging. P odbiór sygnału przywołania. S (fullbordat) anrop. (722)

attended

1. **attended substation** : → *substation 1*

attenuation

1. **attenuation** : the ratio of the output to the input values of quantities of the same kind in a device or system when less than unity. ★ affaiblissement → *affaiblissement 1.* R ослабление. D Dämpfung. E atenuación. I attenuazione. N verzwakking. P tłumienność. S dämpning. (303)
2. **attenuation** : the reduction of a radiation quantity upon passage of radiation through matter resulting from all types of interaction with matter. The radiation quantity may be, for example, the particle flux density or the energy flux density. *Note.* — Attenuation usually does not include the geometric reduction of the radiation quantity with distance from the source. ★ atténuation → *atténuation 2.* R ослабление. D Schwächung. E atenuación. I attenuazione. N verzwakking. P osłabienie. S dämpning. (026,391,881)
3. **attenuation** (*Syn.* loss) : 1. A decrease between two points of an electric, electromagnetic or acoustic power. 2. The quantitative expression of a power decrease by the ratio of the values at two points of a power or of a quantity related to power in a well defined manner. *Notes. 1* — By extension the words "attenuation" or "loss"may represent the ratio of powers in a given situation and in a reference condition; for example "insertion loss". *2* — Although the term "loss" is not synonymous in English with "attenuation" in every context, it is used to express the ratio of two powers in certain specified conditions as for example in "insertion loss" and "return loss", equivalent in French to "affaiblissement d'insertion" and "facteur d'adaptation" respectively. *3* — Attenuation is generally expressed in logarithmic units by a positive value. ★ affaiblissement → *affaiblissement 2.* R затухание; потери. D Dämpfung; Verlust. E atenuación. I attenuazione. N demping; verlies; verzwakking. P tłumienie; tłumienność. S dämpning. (702,705,731)
4. **attenuation** (in a transmission line) : the power reduction along a transmission line for the mode or modes under consideration, quantitatively expressed either by the ratio or the logarithm of the ratio of an input power at the initial point to the corresponding output power at the final point. *Note.* — The attenuation is generally expressed in decibels. ★ affaiblissement → *affaiblissement 3.* R затухание (в линии передачи). D Dämpfung (in einer Übertragungsleitung). E atenuación (en una línea de transmisión). I attenuazione (in una linea di trasmissione). N verzwakking. P tłumienie (w linii przesyłowej). S dämpning. (726)
5. **attenuation coefficient** : → *coefficient 3*
6. **attenuation coefficient** : → *coefficient 4*
7. **attenuation coefficient** : → *coefficient 5*
8. **attenuation constant** (*Syn.* attenuation coefficient) : → *coefficient 4*
9. **attenuation curve** : → *curve 3*
10. **attenuation equalization** : → *equalization 1*
11. **attenuation equivalent** : → *equivalent 2*
12. **attenuation factor** : → *factor 13*
13. **attenuation/frequency distortion** (*Syn.* amplitude/frequency distortion) : → *distortion 3*
14. **broad-beam attenuation** : the attenuation of radiation by matter when a maximum amount of the scattered radiation is included in the measurement. ★ atténuation en faisceau large → *atténuation 5.* R ослабление широкого пучка. D Schwächung im breiten Strahlenbündel. E atenuación en haz grueso. I attenuazione in condizioni di fascio largo.

N verzwakking in brede bundel. P osłabianie szerokiej wiązki. S bredstråledämpning. (881)

15. **crosstalk attenuation** : the ratio, usually expressed in decibels, of the apparent power at a given point of a disturbing channel, to the apparent power arriving at a given point of the disturbed channel via a crosstalk path under specified conditions of termination of these channels. ★ affaiblissement diaphonique → *affaiblissement 23.* R переходное затухание. D Nebensprechdämpfung. E atenuación diafónica. I attenuazione diafonica. N overspraakdemping. P tłumienność przesłuchowa. S överhörningsdämpning. (722)

16. **differential mode attenuation** : the difference in attenuation among the propagating modes of an optical fibre. ★ affaiblissement modal différentiel → *affaiblissement 42.* R дифференциальное затухание мод. D Moden-Dämpfungsunterschied. E atenuación modal diferencial. I attenuazione differenziale di modo. N differentiële modusverzwakking. P różnica tłumień modów. S moddämpningsskillnad. (731)

17. **elementary attenuation of propagation** : real part of the elementary exponent of sound propagation. ★ affaiblissement élémentaire de propagation acoustique → *affaiblissement 31.* R ослабление распространения (элементарное). D elementbezogener Dämpfungskoeffizient. E atenuación elemental de propagación acústica. I attenuazione specifica di propagazione. N elementaire verzwakking van de geluidsvoortplanting. P tłumienność falowa akustyczna elementarna. S ..... (801)

18. **erasing attenuation** : the difference, expressed in decibels, between the level of a signal recorded on a tape, and the remaining level of that signal on the same tape after erasure. ★ affaiblissement dû à l'effacement → *affaiblissement 29.* R величина стирания. D Löschdämpfung. E atenuación de borrado. I attenuazione di cancellazione. N wisdemping. P tłumienność kasowania. S raderingsdämpning. (806)

19. **far-end crosstalk attenuation** : crosstalk attenuation between two channels, with a common path, measured on the disturbing channel at the beginning of the common path and on the disturbed channel at the end of the common path. ★ affaiblissement télédiaphonique → *affaiblissement 52.* R переходное затухание на дальнем конце. D Fernnebensprechdämpfung. E atenuación telediafónica. I attenuazione di telediafonia. N veraf-overspraakdemping. P tłumienność zdalnoprzesłuchowa. S fjärröverhörningsdämpning. (722)

20. **geometric attenuation** : the reduction of a radiation quantity due to the effect of the distance between the point of interest and the source (e.g. the inverse-square law for a point source), excluding the effect of any matter present. ★ atténuation géométrique → *atténuation 7.* R геометрическое ослабление. D geometrische Schwächung. E atenuación geométrica. I attenuazione geometrica. N geometrische verzwakking. P osłabianie geometryczne. S geometrisk dämpning. (026,881)

21. **insertion attenuation** (of a filter) : the ratio, generally expressed in decibels, of the power delivered to the load impedance before insertion of the filter to the power delivered to the load impedance after insertion of the filter. ★ affaiblissement d'insertion → *affaiblissement 24.* R вносимое затухание (фильтра). D Einfuegungsdämpfung (eines Filters). E atenuación de inserción (de un filtro). I smorzamento d'inserzione (di un filtro). N tussenschakeldemping (van een filter). P tłumienność wtrąceniowa (filtru). S inlänkningsdämpning. (561)

22. **linear attenuation coefficient** : → *coefficient 30*

23. **mass attenuation coefficient** : → *coefficient 33*

24. **mass attenuation coefficient (pair production)** : → *coefficient 34*

25. **mass attenuation coefficient (photoelectric)** : → *coefficient 35*

26. **mass attenuation coefficient (scattering)** : → *coefficient 36*

27. **narrow-beam attenuation** : the attenuation of radiation by matter measured in such a way that scattered radiation is negligible. ★ atténuation en faisceau étroit → *atténuation 4.* R ослабление узкого пучка. D Schwächung im schmalen Strahlenbündel. E atenuación en haz fino. I attenuazione in condizioni di fascio stretto. N verzwakking in nauwe bundel. P osłabianie wąskiej wiązki. S smalstråledämpning. (881)

28. **near-end crosstalk attenuation** : crosstalk attenuation between two channels with a common path, measured on the disturbing channel at the beginning of the common path and on the disturbed channel at the same point of the common path. ★ affaiblissement paradiaphonique → *affaiblissement 46.* R переходное затухание на ближнем конце. D Nahnebensprechdämpfung. E atenuación paradiafónica. I attenuazione di paradiafonia. N nabij-overspraakdemping. P tłumienność zbliżnoprzesłuchowa. S näröverhörningsdämpning. (722)

29. **relative attenuation** : the difference between the attenuation at a given frequency and the minimum attenuation in the pass band. ★ affaiblissement relatif → *affaiblissement 47.* R относительное затухание. D relative Dämpfung. E atenuación relativa. I smorzamento relativo. N relatieve demping. P tłumienność względna (w pasmie przepustowym). S relativ dämpning. (561)

30. **residual attenuation** : the attenuation in a variable attenuator when it is set to its minimum attenuation position. ★ affaiblissement résiduel → *affaiblissement 48.* R остаточное ослабление. D Grunddämpfung. E atenuación residual. I attenuazione residua. N restverzwakking. P tłumienie szczątkowe. S restdämpning. (726)

31. **return attenuation** : the reciprocal, generally expressed in decibels, of the modulus of the reflection coefficient. ★ affaiblissement d'adaptation → *affaiblissement 6.* R затухание отражения. D Reflexionsdämpfung. E atenuación de adaptación. I smorzamento di riflessione. N reflectiedemping. P tłumienność odbiciowa. S reflexionsdämpning. (561)

32. **spectral linear attenuation coefficient** : → *coefficient 63*

33. **spectral mass attenuation coefficient** : → *coefficient 65*

34. **standard attenuation curve** : → *curve 36*

35. **transducer attenuation** (of a filter) : the ratio, generally expressed in decibels, of the available power of a given source to the power that the filter connected to this source, delivers to a load impedance under specified conditions. ★ affaiblissement de transmission → *affaiblissement 16.* R рабочее затухание (фильтра). D Betriebsdämpfung (eines Filters). E atenuación de transmisión (de un filtro). I smorzamento di trasmissione (di un filtro). N omzettingsdemping (van een filter). P tłumienność skuteczna (filtru). S filterdämpning. (561)

attenuation-limited

1. **attenuation-limited operation** : → *operation 4*

attenuator

1. **absorptive attenuator** (*Syn.* resistive attenuator) : → *attenuator 16*

2. **attenuator** : a device for reducing the value of an electrical quantity according to a defined ratio. ★ affaiblisseur → *affaiblisseur 1.* R аттенюатор. D Dämpfungsglied; Abschwächer. E atenuador. I attenuatore. N verzwakker. P tłumik. S dämpare. (303)

3. **attenuator** : a linear passive two-port device designed to supply an output signal of power less than that of the input signal, without modifying the other characteristics of the signal. *Note.* — The attenuation provided by an attenuator may be fixed or adjustable. ★ affaiblisseur → *affaiblisseur 2.* R аттенюатор. D Dämpfungsglied; Abschwächer. E atenuador. I attenuatore. N verzwakker. P tłumik. S dämpare. (702)

4. **attenuator** : a two-port device designed to supply at the output port a power less than the incident power at the input port. ★ affaiblisseur → *affaiblisseur 3.* R аттенюатор. D Dämpfungsglied; Abschwächer. E atenuador. I attenuatore. N verzwakker. P tłumik. S dämpare. (726)

5. **attenuator tube** : → *tube 6*

6. **cut-off attenuator** : a reactive attenuator in the form of a fixed or variable length of waveguide used below the waveguide cut-off frequency. ★ affaiblisseur à coupure → *affaiblisseur 6.* R запредельный аттенюатор. D Sperrbereichs-Dämpfungsglied. E atenuador infracorte. I attenuatore sotto taglio. N afsnijverzwakker. P tłumik nadkrytyczny. S reaktiv vågledardämpare. (726)

7. **disc attenuator** : a variable resistive attenuator comprising a slotted waveguide section having an excentrically pivoted disc of absorbing material which may be inserted into the waveguide

with variable penetration. ★ affaiblisseur à disque → *affaiblisseur 7.* R дисковый аттенюатор. D Scheiben-Dämpfungsglied. E atenuador de disco. I attenuatore a disco. N schijfverzwakker. P tłumik dyskowy. S excenterdämpare. (726)

8. **flap attenuator** : a variable resistive attenuator in which a plate of absorbing material is introduced through a longitudinal slot in a waveguide wall by rotating the plate about a pivot near one end of the slot. ★ affaiblisseur à lame → *affaiblisseur 9.* R аттенюатор ножевого типа. D Streifen-Dämpfungsglied. E atenuador de compuerta. I attenuatore a lama. N flapverzwakker. P tłumik płetwowy. S klaffdämpare. (726)

9. **guillotine attenuator** : a variable resistive attenuator in which a plate of absorbing material is introduced through a longitudinal slot in a waveguide wall by translating it in a direction perpendicular to the axis of the waveguide. ★ affaiblisseur à guillotine → *affaiblisseur 8.* R аттенюатор гильотинного типа. D Fallbeil-Dämpfungsglied. E atenuador de guillotina. I attenuatore a ghigliottina. N guillotineverzwakker. P tłumik gilotynowy. S giljotindämpare. (726)

10. **ideal attenuator** : a passive two-port network in which the output power is less than the input power and in which the ratio of the instantaneous values of the output to the input voltages or currents is fixed. ★ atténuateur idéal → *atténuateur 3.* R идеальный аттенюатор. D ideales Dämpfungsglied. E atenuador ideal. I attenuatore ideale. N ideale verzwakker. P tłumik idealny. S ideal dämpare. (131)

11. **one-way attenuator** (*Syn.* (microwave) isolator) : → *isolator 6*

12. **one-way attenuator** (*Syn.* isolator) : → *isolator 2*

13. **pad attenuator** : a resistive attenuator inserted between two elements of a transmission system to reduce interaction. ★ affaiblisseur fixe → *affaiblisseur 12.* R развязывающий аттенюатор (к применению не рекомендуется). D Entkopplungs-Dämpfungsglied. E atenuador fijo; atenuador separador. I attenuatore fisso; attenuatore separatore. N vaste verzwakker. P tłumik separujący. S isolationsdämpare. (726)

14. **piston attenuator** : a variable cut-off attenuator in which a coupling device is carried on a piston. ★ affaiblisseur à piston → *affaiblisseur 11.* R поршневой аттенюатор. D Kolben-Dämpfungsglied. E atenuador de pistón. I attenuatore a pistone. N zuigerverzwakker. P tłumik nadkrytyczny nastawny. S kolvdämpare. (726)

15. **reactive attenuator** : a non-absorbing attenuator which provides attenuation by reflecting a portion of the incident power. ★ affaiblisseur réactif → *affaiblisseur 14.* R реактивный аттенюатор. D reaktives Dämpfungsglied. E atenuador reactivo. I attenuatore reattivo. N reactieve verzwakker. P tłumik reaktancyjny. S reaktiv dämpare. (726)

16. **resistive attenuator** (*Syn.* absorptive attenuator) : an attenuator employing a dissipative material. ★ affaiblisseur à absorption → *affaiblisseur 4.* R резистивный аттенюатор; поглощающий аттенюатор. D Widerstands-Dämpfungsglied; Absorptions-Dämpfungsglied. E atenuador resistivo; atenuador de absorción. I attenuatore ad assorbimento; attenuatore resistivo. N absorberende verzwakker. P tłumik absorpcyjny. S resistiv dämpare. (726)

17. **rotary vane attenuator** : a variable resistive attenuator comprising a circular waveguide section operating in the TE_{11} mode in which an absorbing septum located diametrically can rotate about the waveguide axis. *Note.* — When used with a rectangular waveguide such a device is provided with appropriate transitions. ★ affaiblisseur à lame rotative → *affaiblisseur 10.* R аттенюатор с вращающейся пластиной. D Drehscheiben-Dämpfungsglied. E atenuador de lámina rotativa. I attenuatore a lama rotativa. N roterende vaanverzwakker. P tłumik obrotowy. S vridskivdämpare. (726)

18. **vane attenuator** : a variable resistive attenuator in rectangular waveguide in which an absorbing plate parallel to the narrow side of the waveguide can be displaced in a direction perpendicular to its plane. ★ affaiblisseur à cloison longitudinale → *affaiblisseur 5.* R пластинчатый аттенюатор. D Streifen-Dämpfungsglied. E atenuador de lámina desplazable. I attenuatore a setto. N vaanverzwakker. P tłumik płytkowy. S skivdämpare. (726)

attitude-stabilized

1. **attitude-stabilized satellite** : → *satellite 2*

audibility

1. **threshold of audibility** (*Syn.* threshold of hearing) : → *threshold 24*

audible

1. **audible indications** : → *indication 1*
2. **audible sound** : → *sound 2*

audio

1. **audio frequency** : → *frequency 11*
2. **audio monitoring** : → *monitoring 2*
3. **audio track** : → *track 2*

audio-communication

1. **audio-communication circuit** : → *circuit 3*

audioconference

1. **audioconference** : a teleconference in which participants are connected by telephone circuits ; the transmission of other signals such as facsimile or telewriting signals may be possible in addition to speech signals. ★ audioconférence → *audioconférence 1.* R телефонная конференцсвязь. D Telefonkonferenz; Fernsprechkonferenz. E audioconferencia. I audioconferenza. N telefonisch vergaderen zonder beeldtelefoon. P telemetria. S telefonkonferens. (701)

audiofrequency

1. **maximum recording audiofrequency current** : → *current 126*
2. **recording audio-frequency current** : → *current 165*

audiogram

1. **masking audiogram** (*Syn.* noise audiogram) : graph showing the amount by which the threshold of hearing for a pure tone or narrow of noise is raised by a stated masking sound, plotted in decibels as a function of the frequency of the pure tone or narrow band of noise. ★ audiogramme d'un effet de masque → *audiogramme 1.* R аудиограмма маскировки. D Mithörschwellen-Audiogramm. E audiograma de un efecto de enmascaramiento. I audiogramma di mascheramento. N gemaskeerd audiogram. P audiogram maskujący. S maskeringsaudiogram. (801)
2. **noise audiogram** (*Syn.* masking audiogram) : → *audiogram 1*
3. **pure tone audiogram** : graph showing hearing level as a function of frequency. ★ audiogramme tonal → *audiogramme 2.* R аудиограмма чистого тона. D Ton-Audiogramm. E audiograma tonal. I audiogramma per suoni puri. N toondrempelaudiogram. P audiogram. S audiogram. (801)

audiometer

1. **audiometer** : instrument for the measurement of certain characteristics of hearing, particularly the hearing threshold level. ★ audiomètre → *audiomètre 1.* R аудиометр. D Audiometer. E audiómetro. I audiometro. N audiometer. P audiometr. S audiometer. (801)

audiometric

1. **audiometric room** : → *room 2*

audio-radiation

1. **prospecting audio-radiation indicator** : → *indicator 18*

audiovideography

1. **audiovideography** : an audio visual system which combines an alphanumeric, alphageometric or alphaphotographic display with associated sound signals. ★ audiovidéographie → *audiovidéographie 1.* R аудиовидеография. (723)

audiovisual

1. **audiovisual** : relating to communication techniques combining sound and pictures. ★ audiovisuel → *audiovisuel 1.* R аудиовизуальный. (723)

audit

1. **reliability and maintainability audit** : a systematic and independent examination to determine whether the activities and results comply with planned arrangements and whether these arrangements are effectively implemented and are suitable to achieve reliability performance and maintainability performance objectives. ★ audit de la fiabilité et de la maintenabilité → *audit 1.* R анализ безотказности и ремонтопригодности. D Zuverlässigkeits-Audit. E auditoría de la fiabilidad y de la mantenibilidad. I verifica ispettiva dell'affidabilità e manutenibilità. N toetsing van betrouwbaarheid en onderhoudbaarheid. P sprawdzanie niezawodności i obsługiwalności. S tillförlitlighetsrevision. (191)

auditory

1. **auditory critical band** : → *band 3*
2. **auditory sensation area** : → *area 3*
3. **normal auditory sensation area** : → *area 30*

Auger

1. **Auger effect** : → *effect 3*
2. **Auger electron** : → *electron 1*

augered

1. **augered pile** : → *pile 1*

aural

1. **aural harmonic** : → *harmonic 1*

auroral

1. **auroral zone** : → *zone 1*

austenitizing

1. **austenitizing** : an operation during which the steel is raised to a temperature above the stability limit of ferrite so that the latter is transformed into austenite. ★ austénitisation → *austénitisation 1.* R аустенизация. D Austenitisierung. E austenización. I austenitizzazione. N austenitisch gloeien. P austenityzowanie. S austenitisering. (841)

auto-compound

1. **auto-compound current transformer** : → *transformer 4*

autocorrelation

1. **autocorrelation function** : → *function 1*

autodialler

1. **autodialler** (*Syn.* call maker) : → *maker 1*

auto-ignition

1. **auto-ignition temperature** : → *temperature 5*

automate

1. **automate** : to modify an installation to reduce human intervention by using automatic equipment. ★ automatiser → *automatiser 1.* R автоматизировать. D automatisieren. E automatizar. I automatizzare. N automatisering; automatie. P automatyzować. S automatisera. (351)

automatic

1. **automatic** : self-acting (not needing human operator) within a well-defined task. ★ automatique → *automatique 5.* R автоматический. D selbsttätig. E automático (adjetivo). I automatico. N automatisch. P automatyczny. S automatisk. (351)
2. **automatic answering** : → *answering 3*
3. **automatic calling** : → *calling 1*
4. **automatic charge** : → *charge 1*
5. **automatic coded access control** : → *control 7*
6. **automatic collating** (*Syn.* loop checking) : → *checking 1*
7. **automatic control** : → *control 8*
8. **automatic control assembly** : → *assembly 5*
9. **automatic control equipment for...** : → *equipment 2*
10. **automatic date and time indication** : → *indication 2*
11. **automatic exposure control** : → *control 11*
12. **automatic field-weakening** : → *field-weakening 1*
13. **automatic gain control** : → *control 12*
14. **automatic gain control** : → *control 13*
15. **automatic identification** : → *identification 1*
16. **automatic load compensation** : → *compensation 1*
17. **automatic load regulation equipment** : → *equipment 3*
18. **automatic load-shedding control equipment** : → *equipment 4*
19. **automatic loss-of-synchronism control equipment** : → *equipment 5*
20. **automatic loss-of-voltage tripping equipment** : → *equipment 6*
21. **automatic maintenance** : → *maintenance 5*
22. **automatic monitoring equipment** : → *equipment 7*
23. **automatic numbering transmitter** : → *transmitter 1*
24. **automatic reclosing** : → *reclosing 1*
25. **automatic reclosing control equipment** : → *equipment 8*
26. **automatic repetition Verdan system** : → *system 14*
27. **automatic retransmission** : → *retransmission 1*
28. **automatic retransmitter** : → *retransmitter 1*
29. **automatic sequential connection** : → *connection 4*
30. **automatic spot brake** : → *brake 3*
31. **automatic stop** : → *stop 1*
32. **automatic switching** : → *switching 3*
33. **automatic switching control equipment** : → *equipment 9*
34. **automatic switching off** : → *switching 5*
35. **automatic switching on** : → *switching 6*
36. **automatic (telephone) exchange** : → *exchange 1*
37. **automatic (telephone) operation** : → *operation 5*
38. **automatic (telephone) service** : → *service 2*
39. **automatic (telephone) set** : → *set 2*
40. **automatic tensioner** : → *tensioner 1*
41. **automatic traction control equipment** : → *equipment 10*
42. **automatic train operation** : → *operation 6*
43. **automatic transmitter** : → *transmitter 2*
44. **automatic transmitter with controlled tape-feed mechanism** : → *transmitter 3*
45. **automatic volume control** (*Syn.* automatic gain control) : → *control 12*
46. **dead time (for automatic reclosing equipment)** : → *time 41*
47. **delayed automatic reclosing** : → *reclosing 4*
48. **electric automatic coupler** : → *coupler 12*
49. **fully automatic reperforator transmitter distributor** (*Syn.* coupled reperforator and tape reader) : → *reperforator 1*
50. **high speed automatic reclosing** : → *reclosing 5*
51. **private automatic branch exchange** : → *exchange 16*
52. **private automatic exchange** : → *exchange 17*
53. **single phase automatic reclosing control equipment** (*Syn.* single pole automatic reclosing control equipment) : → *equipment 69*
54. **single pole automatic reclosing control equipment** : → *equipment 69*
55. **three phase automatic reclosing control equipment** (*Syn.* three pole automatic reclosing control equipment) : → *equipment 82*
56. **three pole automatic reclosing control equipment** : → *equipment 82*
57. **Wheatstone automatic system** : → *system 250*

automatically

1. **automatically regulated** : → *regulated 1*

autoradiograph

1. **autoradiograph** : the image produced by autoradiography. ★ autoradiogramme → *autoradiogramme 1.* R авторадиографическое изображение. D Autoradiographie. E autorradiografía. I autoradiogramma. N autoradiogram. P autoradiogram. S autoradiogram. (881)

autoradiography

1. **autoradiography** : a process in which radioactive material within an object produces an image when it is in close proximity to a radiation sensitive emulsion. ★ autoradiographie → *autoradiographie 1.* R авторадиография.

D Autoradiographie. E autorradiografía. I autoradiografia. N autoradiografie. P autoradiografia. S autoradiografi. (881)

auto-reclosing

1. **auto-reclosing** (of a mechanical switching device) : the operating sequence of a mechanical switching device whereby, following its opening, it closes automatically after a predetermined time. ★ refermeture automatique → *refermeture 1.* R автоматическое повторное включение (контактного коммутационного аппарата). D selbsttätiges Wiederschliessen (eines mechanischen Schaltgerätes). E reenganche automático (de un aparato mecánico de conexión). I richiusura (automatica) (di un apparecchio meccanico di manovra). N automatische herinschakeling (van een mechanische schakelaar). P zamykanie ponowne samoczynne; załączanie ponowne samoczynne. S återtillslag. (441)

auto-tensioned

1. **auto-tensioned conductor** : → *conductor 5*

auto-transductor

1. **auto-transductor** : a non self-excited transductor in which the same windings serve both as control windings and as power windings. ★ transducteur à autocommande → *transducteur 5.* R магнитный усилитель с совмещенными обмотками. D Transduktor in Sparschaltung. E autotransductor. I autotrasduttore. N spaartransductor; autotransductor; directe transductor. P autotransduktor; transduktor samosterowny. S sparkopplad transduktor. (431)

auto-transformer

1. **auto-transformer** : a transformer in which at least two windings have a common part. ★ autotransformateur → *autotransformateur 1.* R автотрансформатор. D Spartransformator. E autotransformador. I autotrasformatore. N spaartransformator. P autotransformator. S autotransformator; sparkopplad transformator. (421,811)
2. **auto-transformer starter** : → *starter 1*
3. **auto-transformer starting** : → *starting 2*
4. **auto-transformer substation** : → *substation 2*
5. **closed circuit transition auto-transformer starting** (*Syn.* closed transition auto-transformer starting) : → *starting 6*
6. **closed transition auto-transformer starting** : → *starting 6*
7. **instrument autotransformer** : an instrument transformer in which the primary and the secondary windings have a common part. ★ autotransformateur de mesure → *autotransformateur 2.* R измерительный автотрансформатор. D Meßwandler in Sparschaltung. E autotransformador de medida. I autotrasformatore di misura. N meetspaartransformator. P przekładnik autotransformatorowy. S autokopplad mättransformator. (321)
8. **open circuit transition auto-transformer starting** (*Syn.* open transition auto-transformer starting) : → *starting 12*
9. **open transition auto-transformer starting** : → *starting 12*

auxiliary

1. **auxiliary actuator** : → *actuator 4*
2. **auxiliary arm** : → *arm 4*
3. **auxiliary carrier** (*Syn.* auxiliary catenary) : → *catenary 1*
4. **auxiliary catenary** : → *catenary 1*
5. **auxiliary circuit** : → *circuit 4*
6. **auxiliary circuit** : → *circuit 5*
7. **auxiliary circuit** : → *circuit 6*
8. **auxiliary circuit** : → *circuit 7*
9. **auxiliary compressor** : → *compressor 1*
10. **auxiliary contact** : → *contact 3*
11. **auxiliary contact** : → *contact 4*
12. **auxiliary convertor** : → *convertor 1*
13. **auxiliary energizing quantity** : → *quantity 1*
14. **auxiliary equipment** : → *equipment 11*
15. **auxiliary generator** : → *generator 4*
16. **auxiliary generator set** : → *set 3*
17. **auxiliary pole shunting** : → *shunting 1*
18. **auxiliary power supply contactor** (*Syn.* heating contactor) : → *contactor 10*
19. **auxiliary power supply line** (*Syn.* heating train line) : → *line 44*
20. **auxiliary starting winding** : → *winding 4*
21. **auxiliary supply generator** (*Syn.* train power supply generator) : → *generator 40*
22. **auxiliary switch** : → *switch 3*
23. **auxiliary switchboard** : → *switchboard 1*
24. **auxiliary switching unit** : → *unit 7*
25. **auxiliary transformer** : → *transformer 5*
26. **auxiliary transformer of a power station** : → *transformer 6*
27. **auxiliary transformer of a unit** : → *transformer 7*
28. **auxiliary transformer regulation** : → *regulation 2*
29. **auxiliary winding** : → *winding 5*
30. **auxiliary winding** : → *winding 6*
31. **common auxiliaries** : a group of auxiliary equipment which is common to the unit and the power station. *Examples :* lighting, compressors. ★ auxiliaires généraux → *auxiliaire 4.* R общестанционные собственные нужды. D Hilfsaggregate. E auxiliares generales. I ausiliari generali. N algemene hulpapparatuur. P potrzeby własne ogólne. S allmän hjälputrustning. (602)
32. **essential auxiliary circuits** : → *circuit 75*
33. **non-essential auxiliary circuits** : → *circuit 125*
34. **train auxiliary circuit** (*Syn.* train power supply circuit) : → *circuit 187*
35. **unit auxiliaries** : any auxiliary equipment specific to the unit and indispensable for its operation. *Examples :* mills, circulating pumps, induced draught fans. ★ auxiliaires de tranche → *auxiliaire 3.* R собственные нужды энергоблока. D Block-Hilfsaggregate. E auxiliares de grupo. I ausiliari di unità. N hulpapparatuur van de opwekeenheid. P potrzeby własne bloku energetycznego. S blockbunden hjälputrustning. (602)

availability

1. **asymptotic availability** (A) : for modelling purposes, the limit, if this exists, of the instantaneous availability when the time tends to infinity. *Note.* — Under certain conditions, for instance constant failure rate and constant repair rate, the asymptotic availability may be expressed by the ratio of the mean up time to the sum of the mean up time and mean down time. ★ disponibilité asymptotique → *disponibilité 3.* R стационарный коэффициент готовности. D asymptotische Verfügbarkeit. E disponibilidad asintótica. I disponibilità asintotica. N asymptotische beschikbaarheid. P dyspozycyjność asymptotyczna. S asymptotisk tillgänglighet. (191)
2. **asymptotic mean availability** $\bar{A}$: for modelling purposes, the limit, if this exists, of the mean availability over a time interval (t_1, t_2) when t_2 tends to infinity. *Notes. 1* — The asymptotic mean availability $\bar{A}(t_1, t_2)$ is related to the mean availability as

$$\bar{A} = \lim_{t_2 \to \infty} \bar{A}(t_1, t_2)$$

. *2* — When such a limit exists it is not dependent on t_1. ★ disponibilité moyenne asymptotique → *disponibilité 7.* R асимптотически средний коэффициент готовности. D asymptotische mittlere Verfügbarkeit. E disponibilidad media asintótica. I disponibilità media asintotica. N asymptotische gemiddelde beschikbaarheid. P dyspozycyjność asymptotyczna średnia. S asymptotisk medeltillgänglighet. (191)
3. **availability factor** : → *factor 14*
4. **availability (performance)** : the ability of an item to be in a state to perform a required function under given conditions at a given instant of time or over a given time interval, assuming that the required external resources are provided. *Notes. 1* — This ability depends on the combined aspects of the reliability performance, the maintainability performance and the maintenance support performance. *2* — Required external resources, other than maintenance resources do not affect the availability performance of the item. *3* — In French the term "disponibilité" is also used in the sense of "instantaneous availability" . ★ disponibilité → *disponibilité 2.* R готовность. D Verfügbarkeit. E disponibilidad.

I disponibilità. N inzetbaarheid; beschikbaarheid. P dyspozycyjność; zdolność do działania. S driftsäkerhet. (191,603)

5. **instantaneous availability** ($A(t)$) : the probability that an item is in a state to perform a required function under given conditions at a given instant of time, assuming that the required external resources are provided. *Note.* — In French the term "disponibilité" is also used to denote the performance quantified by this probability. ★ disponibilité (instantanée) → *disponibilité 5.* R нестационарный коэффициент готовности. D momentane Verfügbarkeit. E disponibilidad instantánea. I disponibilità istantanea. N momentele beschikbaarheid. P dyspozycyjność (obiektu) chwilowa. S momentan tillgänglighet. (191)
6. **mean availability** $\bar{A}(t_1, t_2)$: the mean of the instantaneous availability over a given time interval (t_1, t_2). *Note.* — The mean availability is related to the instantaneous availability $A(t)$, as

$$\bar{A}(t_1, t_2) = \frac{1}{t_2 - t_1} \int_{t_1}^{t_2} A(t)\, dt$$

★ disponibilité moyenne → *disponibilité 6.* R средний коэффициент готовности. D mittlere Verfügbarkeit. E disponibilidad media. I disponibilità media. N gemiddelde beschikbaarheid. P dyspozycyjność średnia. S medeltillgänglighet. (191)
7. **(steady-state) availability** : the mean of the instantaneous availability under steady-state conditions over a given time interval. *Note.* — Under certain conditions, for instance constant failure rate and constant repair rate, the steady-state availability may be expressed by the ratio of the mean up time to the sum of the mean up time and mean down time. ★ disponibilité en régime établi → *disponibilité 4.* R стационарный на интервале времени коэффициент готовности. D (stationäre) Verfügbarkeit. E disponibilidad en régimen permanente. I disponibilità (stazionaria). N beschikbaarheid (in stationaire toestand). P dyspozycyjność (w stanie usalonym). S tillgänglighet (vid fortfarighet). (191)

available

1. **available capacity of a power station** : → *capacity 2*
2. **available capacity of a unit** : → *capacity 3*
3. **available power** : → *power 14*
4. **available power gain** : → *gain 4*

avalanche

1. **avalanche** : a cumulative process in which a charged particle gives, by collision with molecules of a gas, to a large number of charged particles. ★ avalanche → *avalanche 1.* R лавинный процесс. D Lawinenbildung. E avalancha. I valanga. N lawine. P lawina. S lavin. (531)
2. **avalanche breakdown** : → *breakdown 1*
3. **avalanche photodiode** : → *photodiode 1*
4. **avalanche voltage** : → *voltage 13*
5. **(electron) avalanche** : a cumulative formation of charge carriers triggered by a free carrier. ★ avalanche (électronique) → *avalanche 3.* R (электронная) лавина. D Elektronenlawine. E avalancha (electrónica). I valanga (elettronica). N elektronenlawine. P lawina (elektronowa). S (elektron)lavin. (121)
6. **Townsend avalanche** : a gas multiplication chain process in which a charged particle rapidly gives rise by collision to a large number of charged particles. ★ avalanche de Townsend → *avalanche 2.* R лавина Таунсенда. D Townsend-Lawine. E avalancha de Townsend. I valanga di Townsend. N Townsendlawine. P wyładowanie Townsenda. S Townsend-lavin. (391)

average

1. **average cladding diameter** : → *diameter 2*
2. **average core diameter** : → *diameter 3*
3. **average daily peak hour traffic intensity** : → *intensity 1*
4. **average detector** : → *detector 3*
5. **average energy expended per ion pair formed** : → *energy 5*
6. **average life** : → *life 1*
7. **average logarithmic energy decrement** : → *decrement 1*
8. **average picture-signal level** : → *level 4*
9. **average power** : → *power 16*
10. **average price per kWh** : → *price 1*
11. **average reference surface diameter** : → *diameter 4*
12. **average sound pressure level in a room** : → *level 5*
13. **average speech power** : → *power 17*
14. **average speed between stops** : → *speed 4*
15. **average transfer time** : → *time 11*
16. **gross average heat rate of a unit** : → *rate 40*
17. **net average heat rate of a unit** : → *rate 60*
18. **time average sound pressure level** (*Syn.* equivalent continuous sound pressure level) : logarithm of the ratio of a given root-mean-square sound pressure, during a stated time interval, to the reference sound pressure. Average sound pressure level in decibels is 20 times the logarithm to the base ten of that ratio. *Note.* — Unless otherwise specified, the reference sound pressure for airborne sound is 20 μPa. ★ niveau équivalent continu de pression acoustique → *niveau 83.* R средний по времени уровень звукового давления; эквивалентный уровень звукового давления. D Mittelungspegel. E nivel equivalente continuo de presión acústica. I livello acustico equivalente. N gemiddeld geluid(s)drukniveau. P poziom ciśnienia akustycznego uśredniony. S ekvivalent ljudtrycksnivå. (801)

averaged

1. **Doppler averaged cross-section** : → *cross-section 9*

averaging

1. **averaging time** : → *time 12*

Avogadro

1. **Avogadro's number** : → *number 4*

avoidable

1. **avoidable costs** : → *cost 1*

axial

1. **axial flow fan** : → *fan 1*
2. **axial interference microscopy** (*Syn.* slab interferometry) : → *interferometry 2*
3. **axial projection** : → *projection 2*
4. **axial propagation coefficient** : → *coefficient 6*
5. **axial ratio** : → *ratio 9*
6. **axial ray** : → *ray 2*
7. **axial sensitivity** : → *sensitivity 1*
8. **axial slab interferometry** (*Syn.* slab interferometry) : → *interferometry 2*
9. **axial source level** (*Syn.* sonar source level) : → *level 84*
10. **axial ventilation** : → *ventilation 1*
11. **vapour phase axial deposition technique** : → *technique 17*

axis

1. **beam axis** (of an antenna) : the direction within the beam of an antenna for which the amplitude of the specified field component is a maximum or about which the beam may be considered symmetrical. ★ axe d'un faisceau → *axe 9.* R ось луча (антенны). D Strahlachse (einer Antenne). E eje del haz (de una antena). I asse del fascio. N bundelas (van een antenne). P osie wiązki (anteny). S lobriktning. (712)
2. **beam axis** : the straight line passing through the centre of the source and the centre of the final beam-limiting device. ★ rayon axial → *rayon 7.* R ось пучка. D Achse des Nutzstrahlenbündels. E eje del haz; rayo central. I asse di un fascio. N bundelas. P oświązki. S centralstråle. (881)
3. **chrominance axis** : one of a pair of axes in a plane of constant luminance in colour space along which the chrominance components are plotted. ★ axe de chrominance → *axe 1.* R ось цветности. (723)
4. **fibre axis** (*Syn.* optical axis) : the locus of the core centres along the length of an optical fibre. ★ axe de la fibre → *axe 2.* R ось волокна. D Faserachse; optische Achse. E eje de la fibra; eje óptico. I asse della fibra; asse ottico. N as van de vezel; optische as. P oświatłowodu. S fiberaxel. (731)
5. **luminance axis** : the axis in chromatic space, containing the reference white, along which the luminance component is plotted, for any colour. ★ axe de luminance → *axe 3.* R ось яркости. (723)

6. **magnetic axis** : the axis of the magnetic moment of a magnet. ★ axe magnétique → *axe 10*. R магнитная ось. D magnetische Achse. E eje magnético. I asse magnetico. N magnetische as. P ośmagnetyczna. S magnetisk axel. (221)
7. **optic axis** : in an anisotropic medium, a direction of propagation in which the two waves having orthogonal polarisations have the same phase velocity. *Note.* — In English the term "optic axis" should be distinguished from optical axis. ★ axe optique → *axe 11*. R оптическая ось. D optische Achse. E eje óptico (de un medio). I asse ottico. N optische as. P ośoptyczna. S optisk axel. (731)
8. **optical axis** (*Syn.* fibre axis) : → *axis 4*
9. **principal axis** (*Syn.* reference axis) : axis passing through the reference point that serves to define angular coordinates for description of directional characteristics of an electroacoustic transducer. *Note.* — An axis of geometrical symmetry is often chosen as the principal axis. ★ axe de référence → *axe 5*. R основные оси; опорные оси. D Hauptachse; Bezugsachse. E eje de referencia; eje principal. I asse principale. N hoofdas. P oś główna. S huvudaxel. (801)
10. **reference axis** (*Syn.* principal axis) : → *axis 9*

axle

1. **axle load** : → *load 3*
2. **coupled axle drive** : → *drive 5*
3. **individual axle drive locomotive** : → *locomotive 3*
4. **weight per metre run between outer axles** : → *weight 5*

axle-driven

1. **axle-driven generator** : → *generator 7*

axle-hung

1. **axle-hung motor** : → *motor 9*

azimuth

1. **azimuth adjustment** : → *adjustment 5*
2. **azimuth deviation** : → *deviation 4*
3. **azimuth loss** : → *loss 6*

B

B

1. **class B operation** : → *operation 10*

babble

1. **babble** : the aggregate crosstalk caused by many disturbing channels. ★ murmure confus → *murmure 1.* R переходная помеха. D Babble; Babbeln. E murmullo; murmullo. I mormorio confuso. N meervoudige overspraak. P szum tłowy. S babbel. (722)

back

1. **back flashover** : → *flashover 1*
2. **back lobe** : → *lobe 1*
3. **back pointer** : → *pointer 1*
4. **back porch (of line-synchronising signal)** : → *porch 1*
5. **back scattering** : → *scattering 1*
6. **back scattering area** (*Syn.* back scattering cross section) : → *cross-section 2*
7. **back scattering cross section** : → *cross-section 2*
8. **back span** : → *span 1*
9. **back wall** : → *wall 1*
10. **error correction by information feedback and repetition** : → *correction 10*
11. **error detecting and feedback system** : → *system 65*
12. **fall back circuit** (*Syn.* nominated reserved circuit) : → *circuit 124*

backfill

1. **backfill** : the soil removed during excavation and re-instated after the installation of the foundation (see fig. 4.3). ★ remblai → *remblai 1.* R обратная засыпка. D Wiederverfüllmaterial. E relleno. I reinterro. N aanvulgrond. P zasyp wykopu (ziemia własną). S återfyllning. (466)
2. **imported backfill** : soil or other material placed in an excavation after the installation of the foundation, when the original soil is unsuitable. ★ remblai rapporté → *remblai 2.* R привозной грунт. D zugeführtes Verfüllmaterial. E relleno de aportación. I materiale di riporto. N aangevoerde aanvulgrond. P zasyp wykopu ziemią inną. S anskaffat fyllnadsmaterial. (466)

back-fire

1. **back-fire** : the temporary loss of the reverse blocking ability of a valve or arm with the result that it allows reverse current to flow. ★ allumage en retour → *allumage 4.* R обратное включение. D Rückzündung. E encendido inverso. I scarica inversa. N terugslag. P przewodzenie wsteczne. S baktändning. (551)
2. **back-fire antenna** : → *antenna 17*

background

1. **background** : the counting rate in the absence of that radiation which the counter tube is intended to measure. ★ mouvement propre → *mouvement 5.* R фон. D Hintergrund; Nulleffekt. E movimiento propio. I fondo proprio; sottofondo. N nuleffect. P bieg własny. S normal bakgrundsstrålning (inkl. falsk strålning och kosmisk strålning). (531)
2. **background** : the luminance of the television screen when the chrominance signals are zero and the luminance signal is at black level. ★ luminance de fond → *luminance 17.* R фон. (723)
3. **background effect** : → *effect 4*
4. **background noise** : → *noise 3*
5. **background noise** : → *noise 4*
6. **background noise** : → *noise 5*
7. **background radiation** : → *radiation 5*
8. **sonar background noise** : → *noise 77*

backing

1. **backing (material)** : → *material 5*

back-mounted

1. **back-mounted** : a component with its mounting flange behind the mounting surface when looking at the mating face or front side of the component. ★ monté par l'arrière → *monté 5.* R компонент, устанавливаемый с внутренней стороны панели. D innen befestigt. E montaje posterior. I montaggio a telaio; montaggio posteriore; montato posteriormente. N van achteren gemonteerd. P zatablicowy. S monterad bakifrån. (581)

back-pressure

1. **back-pressure set** : → *set 4*

back-scatter

1. **backscatter** : scattering of radiation by material through angles greater than 90° with respect to its initial direction. *Note.* — In radiotherapy, it is particularly applied to radiation scattered back to the skin from underlying tissues. In measurements of radioactivity, it applies to the scattering of particles into the measuring device by the material on which the sample is mounted. ★ rétrodiffusion → *rétrodiffusion 8.* R обратное рассеяние. D Rückstreuung. E retrodispersión; retrodifusión. I retrodiffusione. N terugverstrooiing. P promieniowanie rozproszone wsteczne. S återspridning. (391,881)
2. **back-scatter density meter** : → *meter 9*
3. **backscatter factor** : → *factor 15*
4. **back-scatter ionospheric sounding** : → *sounding 1*
5. **beta back-scatter thickness meter** : a thickness meter that includes a beta radiation source and that utilizes the radiation back-scattered by the material being measured. This assembly is frequently used for the measurement of lining or coating thicknesses. ★ épaisseurmètre à rétrodiffusion bêta → *épaisseurmètre 3.* R альбедный бета- толщиномер. D Dickenmeßgerät nach der Beta Rückstreumethode. E medidor de espesor por retrodispersión beta. I spessimetro a retrodiffusione beta. N diktemeter met betaterugverstrooiing. P grubościomierz izotopowy rozproszeniowy beta. S tjockleksmätare med återspridd betastrålning. (392)
6. **gamma back-scatter thickness meter** : → *meter 24*

backscattering

1. **backscattering** : the scattering into directions generally reverse to the incident beam. ★ rétrodiffusion → *rétrodiffusion 7.* R обратное рассеяние. D Rückstreuung. E retrodifusión. I retrodiffusione. N terugverstrooiing. P rozpraszanie wsteczne. S bakåtspridning. (731)
2. **backscattering cross section of a surface or a bottom** : → *cross-section 3*
3. **backscattering cross section of an object or a volume** : → *cross-section 4*
4. **backscattering technique** (*Syn.* optical time domain reflectometry) : → *reflectometry 1*
5. **object backscattering differential** (*Syn.* target strength) : level in decibels equal to ten times the logarithm to the base ten of the ratio of the backscattering cross-section of the object to the spherical reference area of $4\pi r_0^2$ where r_0 is the reference distance, preferably chosen to be 1 metre. Whatever the reference area used, it shall be specified. *Notes. 1* — The object scattering differential for a designated direction other than backward is similarly defined. *2* — Otherwise described, the object backscattering differential is the backscattered sound pressure level that would exist at the reference distance of r_0 from the acoustic centre of the scattering object, minus the sound pressure level of a plane wave incident on the object. *3* — Expressed in letter symbols, the definition reads:

$$N_{ts} = L_{sc} - L_i = 10 \log_{10} \left(\frac{A_{ob}}{4\pi r_0^2} \right) \text{dB}$$

where: N_{ts} is object backscattering differential or target strength L_{sc} is backscattered sound pressure level at reference distance L_i is incident sound pressure level A_{ob} is backscattering

cross-section of object r_0 is reference distance $4\pi r_0^2$ is reference area for object backscattering differential. ★ indice de réverbération d'un objet → *indice 34.* R сила цели. D Objekt-Rückstreumass; Zielstärke. E índice de reverberación de un objeto. I diffusione di ritorno relativa di un ostacolo. N doelsterkte. P indeks pogłosowy obiektu; siła celu. S målstyrka. (801)

6. **surface or bottom backscattering differential** : → *differential 37*
7. **volume backscattering differential** (*Syn.* volume scattering strength) : level in decibels equal to ten times the logarithm to the base ten of the ratio of the backscattering coefficient of the volume to the reference volume backscattering coefficient $4\pi/r_0$ where r_0 is the reference distance, preferably chosen to be 1 metre. Whatever reference coefficient is used, it shall be specified. *Notes. 1* — The volume scattering differential for a designated direction other than backward is similarly defined. *2* — Otherwise described, the volume backscattering differential is the backscattered sound pressure level that would exist at the reference distance of r_0 from the acoustic centre of the volume containing scatterers, minus the sound pressure level of a plane wave incident on the scatterers. *3* — Expressed in letter symbols:

$$N_v = L_{sc} - L_i = 10 \log_{10} \left(\frac{A_v/V}{4\pi r_0^2/V_0} \right) \text{dB}$$

$$= 10 \log_{10} \frac{m}{4\pi/r_0} \text{dB}$$

where: N_V is volume backscattering differential or volume scattering strength, L_{sc} is backscattered sound pressure level at reference distance, L_i is incident sound pressure level, A_V is backscattering cross-section of scatterers in volume, V r_0 is reference distance $_0 = r_0^3$ is reference volume $m = A_V/V$ is volume backscattering coefficient, $4\pi/r_0 = 4r_0^2/V$ is reference volume backscattering coefficient. ★ indice de réverbération de volume → *indice 33.* R облемная сила цели. D Volumen-Rückstreumaß; Volumen-Streustärke. E índice de reverberación de un volumen. I diffusione di ritorno di un solido. N ..... P indeks pogłosowy objętościowy; siła rozpraszania objętościowego. S volymåterspridningsmått. (801)

backspace

1. **backspace** : a format effector which causes the displacement of the printing or display position of one character backwards along the same line. ★ espace arrière → *espace 8.* R возврат на шаг. D Rückwärtsschritt. E espaciar hacia atrás. I indietro (di un carattere). N een positie terug. P cofnięcie. S backstegning. (721)

back-to-back

1. **electrical back-to-back test** : → *test 30*
2. **mechanical back-to-back test** : → *test 52*

back-up

1. **backup light** (*Syn.* reversing light) : → *light 61*
2. **back-up protection** : → *protection 4*
3. **(circuit) local back-up protection** : → *protection 10*
4. **remote back-up protection** : → *protection 51*
5. **(substation) local back-up protection** : → *protection 53*

backward

1. **backward** : pertaining to signals or operations propagating in the opposite direction relative to the call set-up. ★ en arrière → *arrière 1.* R обратный. D Rueckwaerts-. E hacia atrás. I a ritroso. N tegengericht; terugwaarts. P wstecz. S bakåtgående. (714)
2. **backward busying** : → *busying 1*
3. **backward channel** : → *channel 3*
4. **backward clearing** : → *clearing 1*
5. **backward hold** : → *hold 1*
6. **backward signal** : → *signal 22*
7. **backward wavefront** : → *wavefront 1*

backward-wave

1. **backward wave** : a wave in which group and phase velocities have opposite signs. ★ onde inverse → *onde 74.* R обратная волна. D Rückwärtswelle. E onda inversa. I onda inversa. N achterwaartse golf. P fala powrotna. S bakåtvåg. (101)
2. **backward wave** : an electromagnetic wave having a group velocity in opposite direction to that of its phase velocity. ★ onde rétrograde → *onde 109.* R обратная волна. D Rückwärtswelle. E onda inversa. I onda retrograda. N achterwaartse golf. P fala powrotna. S backvåg. (726)
3. **backward-wave tube** : → *tube 7*

bactericidal

1. **bactericidal lamp** : → *lamp 3*
2. **bactericidal radiation** : → *radiation 6*

badge

1. **film badge** (*Syn.* film dosemeter) : a dosemeter comprising essentially one or more photographic emulsions which, by the measurement of optical density, usually behind various filters and in an open field, permits an assessment of the irradiation of the part of the body on which the dosemeter is worn. ★ dosimètre photographique personnel → *dosimètre 12.* R пленочный дозиметр. D Filmdosimeter. E dosímetro fotográfico personal; dosímetro de película. I film-badge. N filmplak; filmplaatje; filmdosimeter. P dawkomierz fotometryczny. S filmdosimeter. (881)

baffle

1. **acoustic baffle** : shielding device used in conjunction with a loudspeaker to increase the effective acoustic path between the front and back of the loudspeaker. ★ écran acoustique → *écran 11.* R акустический экран. D Schallwand. E pantalla acústica. I schermo acustico. N akoestisch scherm. P ekran akustyczny; odgroda. S ljudskärm; baffel. (801)
2. **baffle** : a barrier generally of an insulating material fitted above the plate pack to reduce the effects of electrolyte splash due to gassing or electrolyte movement and to protect the plate pack against damage from objects inserted through the filling hole. ★ déflecteur → *déflecteur 1.* R предохранительный щиток. D Schwappschutz. E deflector. I paraspruzzi. N spatplaat. P przekładka ochronna. S separatorskydd. (486)
3. **baffle** : an element placed in the arc path and having no separate external connection; it may: *1)* influence the flow of gas or vapour *2)* influence the flow of radiant energy *3)* influence the distribution of current *4)* help to de-ionize the gas or vapour after conduction *5)* reduce the deposition of active material on other surfaces. ★ chicane → *chicane 1.* R манжета. D Blende. E tilbe. I deviatore (schermo). N scherm. P odrzutnik. S ledskärm. (531)

baggage

1. **motor baggage car** (*Syn.* motor luggage van) : → *van 1*

balance

1. **balance** (in stereophony) : adjustment of the relative gains of the channels conveying the left stereophonic signal and the right stereophonic signal so that the outputs of the loudspeakers will reproduce the original sound sources in their original positions. ★ équilibrage → *équilibrage 1.* R баланс (в стереофонии). (723)
2. **balance test** : → *test 5*
3. **balance weight tensioner** : → *tensioner 2*
4. **door counter balance** : → *counter 3*

balanced

1. **balanced aggregate signal** : → *signal 23*
2. **balanced antenna** : → *antenna 18*
3. **balanced bridge transition** : → *transition 1*
4. **balanced code** : → *code 4*
5. **balanced input** (*Syn.* symmetrical input) : → *input 36*
6. **balanced metallic circuit** : → *circuit 8*
7. **balanced mixer** : → *mixer 1*
8. **balanced output** (*Syn.* symmetrical output) : → *output 68*
9. **balanced polyphase source** : → *source 2*
10. **balanced polyphase system** : → *system 15*
11. **balanced state of a polyphase network** : → *state 2*
12. **balanced two-port network** : → *network 6*
13. **phonetically balanced word list** : → *list 2*

balancer

1. **direct current balancer** : a combination of two or more mechanically coupled similar direct-current machines used to

equalize automatically the voltages between the circuits of a multiple circuit direct-current system. ★ égalisatrice à courant continu → *égalisatrice 1.* R уравнительная машина постоянного тока. D Gleichstrom-Ausgleichs-maschinensatz. E equilibrador de corriente continua. I gruppo ugualizzatore di tensione. N gelijkstroomvereffenings-aggregaat. P zespół wyrównawczy prądu stałego. S utjämningsmaskin. (411)

balancing

1. **artificial balancing line** (*Syn.* balancing network) : → *network 7*
2. **balancing bus** : → *bus 1*
3. **balancing network** : → *network 7*
4. **balancing of a distribution network** : allocation of the consumer services between the various phases of a distribution network, so as to minimize the voltage unbalance. ★ équilibrage d'un réseau de distribution → *équilibrage 3.* R симметрирование распределительной сети. D Symmetrierung in einem Verteilungsnetz. E equilibrado de una red de distribución. I squilibrio di una rete di distribuzione. N balanceren van een distributienet. P symetryzacja sieci rozdzielczej. S belastningsfördelning mellan faserna. (604)
5. **balancing speed** : → *speed 5*
6. **channel balancing** : the operation consisting in adjusting the parameters of a stereophonic system, in order to obtain identical characteristics in each channel. ★ équilibrage des voies → *équilibrage 2.* R балансировка каналов. D Kanal-Abgleich. E equilibrado de canales. I equilibramento dei canali. N balansinstelling. P równoważenie kanałów. S kanalbalansering. (806)

bale

1. **bale out furnace** : → *furnace 1*

ball

1. **advance ball** : a rounded support attached to a cutter head which rests on the surface of the disk so as to maintain a uniform depth of cutting. ★ patin → *patin 3.* R ведущий шарик. D Führungskugel für Schneidkopf. E patín. I pattino. N voor-aftaststift. P ..... S ..... (806)
2. **ball and socket coupling** : → *coupling 3*
3. **ball bearing** : → *bearing 1*

ballast

1. **ballast** : a device connected between the supply and one or more discharge lamps which serves mainly to limit the current of the lamp(s) to the required value. *Note.* — A ballast may also include means for transforming the supply voltage, correcting the power factor and, either alone or in combination with a starting device, provide the necessary conditions for starting the lamp(s). ★ ballast → *ballast 1.* R балластное сопротивление. D Vorschaltgerät. E balasto. I alimentatore. N voorschakelapparaat. P statecznik. S förkopplingsdon. (845)
2. **ballast lumen factor** : → *factor 16*
3. **reference ballast** : a special inductive type ballast designed for the purpose of providing comparison standards for use in testing ballasts, for the selection of reference lamps and for testing regular production lamps under standardized conditions. ★ ballast de référence → *ballast 3.* R эталонное балластное сопротивление. D Referenz-Vorschaltgerät. E balasto de referencia. I alimentatore di riferimento. N referentievoorschakelapparaat. P statecznik odniesieniowy. S normalreaktor. (845)
4. **semiconductor ballast** : a unit comprising semiconductor devices and stabilizing elements for the operation under a.c. power of one or more discharge lamps and energized by a d.c. or an a.c. source. ★ ballast à semiconducteurs → *ballast 2.* R полупроводниковое балластное сопротивление. D Halbleiter-Vorschaltgerät. E balasto semiconductor. I alimentatore elettronico. N elektronisch voorschakelapparaat. P statecznik półprzewodnikowy. S elektroniskt förkopplingsdon. (845)

ballistic

1. **ballistic galvanometer** : → *galvanometer 1*

balun

1. **balun** : a device for transforming an unbalanced voltage to a balanced voltage or vice-versa. *Notes. 1* — A balun is used, for example, to couple a balanced antenna to an unbalanced feed line. *2* — The term is derived from "balanced to unbalanced transformer". *3* — A balun may be realized in practice by using a transformer or a lumped parameter or distributed parameter network which may include active devices. *4* — A balun may exhibit inherent impedance transformation differing from unity. ★ symétriseur → *symétriseur 1.* R симметрирующее устройство. D Symmetrierglied. E balún; simetrizador. I balun; simmetrizzatore. N balans/onbalanstransformator; balun. P symetryzator. S balun. (161,712)
2. **folded balun** (*Syn.* Pawsey stub balun) : a balun composed of two parallel, generally quarter-wavelength, conducting tubes, one end of which forms the balanced terminals and the other short-circuited ; the unbalanced coaxial feed line passes through one of the tubes with its outer conductor being connected to that tube and the centre conductor connected to the other tube at the balanced terminals. *Note.* — Often, a quarter-wavelength sleeve encloses the balun, it being open at the balanced terminals and short-circuited to the tubes at the other end. ★ symétriseur à ligne symétrique → *symétriseur 4.* R симметрирующее устройство с короткозамкнутым шлейфом. D Faltsymmetrierglied; Pawsey-Stichsymmetrierglied. E balún plegado; balún de Pawsey; simetrizador con línea simétrica. I balun a linea simmetrica. N kwartgolfmanchet. P symetryzator złożony rurowy. S gaffelbalun. (712)
3. **Pawsey stub balun** (*Syn.* folded balun) : → *balun 2*
4. **quarter-wave sleeve balun** (*Syn.* bazooka (USA)) : a balun composed of a quarter-wavelength sleeve surrounding the outer conductor of a coaxial line with one end of the sleeve flush with the end of the line but not connected to it and the other end connected to the outer conductor of the line, thus causing the inner and outer conductors of the line to be balanced at the open end of the sleeve. ★ symétriseur à écran coaxial → *symétriseur 3.* R четвертьволновое коаксиальное симметрирующее устройство; запирающий стакан. D Viertelwellen-Sperrtopf. E balún en cuarto de onda; simetrizador de manguito. I simmetrizzatore a bazooka. N kwartgolfmanchet. P symetryzator ćwierćfalowy rękawowy. S kvartvågsficka. (712)
5. **slotted coaxial balun** (*Syn.* split-tube balun) : a balun composed of a coaxial line whose outer conductor, at one end, has two diametrically opposite open quarter-wave slots ; the two sides of the open end forming the electrically balanced terminals with the centre conductor connected to one side. ★ symétriseur à coaxial fendu → *symétriseur 2.* R щелевое коаксиальное симметрирующее устройство. D Koaxial-Schlitzsymmetrierglied. E balún de coaxil ranurado; simetrizador de coaxil abierto. I balun a coassiale a fessura. N gespleten buisbalun. P symetryzator współosiowy szczelinowy. S slitsbalun. (712)
6. **split-tube balun** (*Syn.* slotted coaxial balun) : → *balun 5*

band

1. **absorption band** (of a scintillator) : that part of the absorption spectrum corresponding to energies (or wavelengths) for which the probability of absorption of photons is greatest. ★ bande d'absorption → *bande 12.* R полоса поглощения (сцинтиллятора). D Absorptionsband (eines Szintillators). E banda de absorción (de un centelleador). I banda di assorbimento (di uno scintillatore). N absorptieband (v.e. scintillerend materiaal). P pasmo pochłaniania (scyntylatora); pasmo absorpcyjne (scyntylatora). S absorptionsband. (391)
2. **absorption (frequency) band** : a band of frequencies for which a medium is considered to be an absorbing medium in a given direction. ★ bande d'absorption → *bande 13.* D Absorptions(frequenz)band. P pasmo (częstotliwości) absorbujące. (705)
3. **auditory critical band** : *a)* Frequency band within which the loudness of a band of continuously distributed sound of constant sound pressure level is independent of bandwith. *b)* Frequency band of sound, being a portion of a continuous spectrum noise covering a wide band, that contains a sound pressure level equal to that of a continuous pure tone centred in the critical band and just audible in the presence of the wideband noise. *Note.* — By "just audible" is meant in a specified fraction of the trials, for a specified manner of listening. ★ bande critique → *bande 11.* R критическая полоса слуха. D Frequenzgruppe. E banda crítica. I banda critica. N kritische band. P pasmo krytyczne. S kritiskt frekvensband. (801)

4. **band number** : → *number 5*
5. **band overlap** : → *overlap 2*
6. **band sound pressure level** : → *level 7*
7. **binding band** : a wire or a band of a material having high tensile strength, encircling the rotor, generally placed on the end windings to restrain the windings against movement due to centrifugal action. ★ frette → *frette 1.* R намотанный бандаж. D Bandage. E zuncho; bandaje. I bandaggio. N bandage. P bandaż. S lindningsbandage. (411)
8. **black band** : of a commutating machine. The range of variation of commutating field strength, over which the commutation is practically sparkless for a specified range of loads with a fixed brush setting. ★ bande noire → *bande 42.* R зона безискровой работы. D Kommutierungs-Grenzkurven. E banda negra. I banda nera. N zwarte band. P obszar beziskrowej komutacji. S gnistgränser. (411)
9. **broadcasting band** : a frequency band allocated to broadcasting by the Radio Regulations of the International Telecommunications Union. ★ bande de radiodiffusion → *bande 22.* R радиовещательный диапазон. (723)
10. **conduction band** : a permitted band incompletely occupied by electrons. ★ bande de conduction → *bande 16.* R валентная зона. D Leitungsband. E banda de conducción. I banda di conduzione. N geleidingsband. P pasmo przewodnictwa. S ledningsband. (111,521)
11. **dead band** (*Syn.* dead zone) : finite range of values within which a variation of the input variable does not produce any noticeable change in the output variable. *Note.* — When this type of characteristic is intentional, it is sometimes called a neutral zone. ★ zone d'insensibilité → *zone 42.* R зона нечувствительности; мертвая зона. D Totzone. E zona muerta. I zona di insensibilità; zona morta. N dood gebied; dode zone. P strefa nieczułości. S dödzon. (351)
12. **emission band** (of a scintillator) : that part of the emission spectrum corresponding to energies (or wavelengths) for which the probability of emission of photons is greatest. ★ bande d'émission → *bande 29.* R полоса испускания (сцинтиллятора). D Emissionsband (eines Szintillators). E banda de emisión (de un centelleador). I banda di emissione (di uno scintillatore). N emissieband (v.e. scintillerend materiaal). P pasmo emisyjne (scyntylatora). S emissionsband. (391)
13. **empty band** : a permitted band in which, at a temperature of zero kelvin, no energy level is occupied by electrons. ★ bande vide → *bande 47.* R свободная зона. D leeres Band. E banda vacía. I banda vuota. N lege band. P pasmo puste. S tomt band. (521)
14. **energy band** : a virtually continuous set of energy levels in a substance. ★ bande d'énergie → *bande 30.* R энергетическая зона. D Energieband. E banda de energía. I banda d'energia. N energieband. P pasmo energetyczne. S energiband. (111,521)
15. **energy band** (in a semiconductor) : a range of energy levels of electrons in a semiconductor, limited by the minimum and maximum values of the energies. ★ bande d'énergie → *bande 31.* R энергетическая зона (полупроводника). D Energieband (in einem Halbleiter). E banda de energía (en un semiconductor). I banda di energia (in un semiconduttore). N energieband (in een halfgeleider). P pasmo energetyczne (w półprzewodniku). S energiband (i en halvledare). (521)
16. **excitation band** : an energy band having a range of neighbouring energy levels which correspond to possible excited states of the electrons of a substance. ★ bande d'excitation → *bande 32.* R зона возбуждения. D Anregungsband. E banda de excitación. I banda di eccitazione. N excitatieband. P pasmo pobudzenia. S excitationsband. (521)
17. **filled band** : a permitted band in which, at a temperature of zero kelvin, all the energy levels are occupied by electrons. ★ bande pleine → *bande 46.* R заполненная зона. D besetztes Band. E banda llena. I banda piena. N volle band. P pasmo zapełnione. S fyllt band. (521)
18. **forbidden band** : an energy band that cannot be occupied by electrons. ★ bande interdite → *bande 35.* R запрещенная зона. D verbotenes Band. E banda prohibida. I banda interdetta. N verboden band. P pasmo zabronione. S förbjudet band. (111,521)
19. **frequency band** : a part of the frequency range of a signal generator over which the frequency can be adjusted continuously or in steps. ★ sous-gamme de fréquence → *sous-gamme 1.* R поддиапазон частот. D Frequenzband. E banda de frecuencia. I banda di frequenza. N frequentieband. P pasmo częstotliwości. S frekvensband. (303)
20. **frequency band** : a continuous set of frequencies lying between two specified limiting frequencies. *Note.* — A frequency band is characterized by two values which define its position in the frequency spectrum, for instance its lower and upper limiting frequencies. ★ bande de fréquences → *bande 17.* R полоса частот. D Frequenzband. E banda de frecuencias. I banda di frequenza. N frequentieband. P zakres częstotliwości; pasmo częstotliwości. S frekvensband. (101,702,704)
21. **guard band** : a frequency band left between the limits specified for two adjacent channels in multichannel carrier transmission, with a width chosen to reduce mutual interference. ★ bande de garde → *bande 20.* R промежуток между каналами; полоса расфильтровки. D Schutzband. E bandas de guarda. I banda di guardia. N separatieband. P pasmo międzykanałowe. S spärrband. (704)
22. **"high band" standards** : → *standard 11*
23. **impurity band** : an energy band formed by the combination of impurity levels of one type and entirely or partially located in the forbidden band. ★ bande d'impureté → *bande 33.* R примесная зона. D Störstellenband. E banda de impurezas. I livello di impurezza. N verontreinigingsband. P pasmo domieszkowe. S störämnesband. (521)
24. **ISM frequency band** : a frequency band allocated for use by ISM equipment. ★ bande de fréquences ISM → *bande 19.* R полоса частот для ПНМ-установок. D ISM-Frequenzband. E banda de frecuencias ISM. I banda di frequenza ISM. N ISM-frequentieband. P zakres częstotliwości PMN. S ISM-frekvensband. (161)
25. **light band width** (*Syn.* Buchmann and Meyer pattern) : → *pattern 1*
26. **"low band" standards** : → *standard 13*
27. **multiple band antenna** : → *antenna 80*
28. **partially occupied band** : an energy band not all the levels of which correspond to the energy of each of two electrons with opposite spins. ★ bande partiellement occupée → *bande 43.* R частично заполненная зона. D teilweise besetztes Band. E banda parcialmente ocupada. I banda parzialmente occupata. N gedeeltelijk bezette band. P pasmo zapełnione częściowo. S delvis besatt band. (521)
29. **permitted band** : an energy band each level of which may be occupied by electrons. ★ bande permise → *bande 45.* R разрешенная зона. D erlaubtes Band. E banda permitida. I banda permessa. N toegestane band. P pasmo dozwolone. S tillåtet band. (111,521)
30. **proportional band** (of a controller) : in a controller with proportional action, the reciprocal of the gain of the controller expressed as a percentage of the measuring span. ★ étendue proportionnelle → *étendue 8.* R зона пропорциональности регулятора. D Proportionalbereich. E margen proporcional de un controlador. I banda proporzionale di un regolatore. N proportionaliteitsgebied van een regelaar; P-gebied. P zakres proporcjonalności (regulatora). S proportionalband; P-band. (351)
31. **surface band** : a permitted energy band formed by the surface levels of a crystal. ★ bande de surface → *bande 26.* R поверхностная зона. D Oberflächenband. E banda de superficie. I banda di superficie. N oppervlakteband. P pasmo powierzchniowe. S ytband. (521)
32. **transition band** : a band of frequencies between a cut-off frequency and the nearest point of the adjacent stop band. ★ bande de transition → *bande 27.* R переходная полоса. D Übergangsbereich. E banda de transición. I banda trasmessa. N doorloopband. P pasmo przejściowe. S övergångsband. (561)
33. **tropical (broadcasting) band** : broadcasting band reserved for the tropical regions. *Note.* — The tropical bands concern only sound radio broadcasting and are located in the HF band or in its immediate proximity. ★ bande (de radiodiffusion) tropicale → *bande 23.* R тропический (радиовещательный) диапазон. (723)
34. **valence band** : the permitted band occupied by the valence electrons. *Notes. 1* — The valence band in an ideal crystal is completely occupied at the temperature of zero kelvin. *2* — Electrons missing from the valence band gives rise to conduction holes in the valence band and conduction electrons in the conduction band. ★ bande de valence → *bande 28.* R валентная зона. D Valenzband. E banda de valencia. I banda di valenza. N valentieband. P pasmo walencyjne. S valensband. (111,521)

banding

1. **banding** (*Syn.* headbanding) : division of a picture into horizontal stripes of slightly different luminance or hue, resulting usually from differences between the video tape recorder heads. ★ effet de persienne → *effet 32.* R полосы. (723)
2. **banding** : a visible defect in a portion of a reproduced picture associated with a particular head. ★ effet de bande → *effet 18.* R полосатость. D Banding; Kopfspuren. E efecto de banda. I effetto di banda. N ..... P prążkowanie. S randning. (806)
3. **banding insulation** : → *insulation 2*

band-pass

1. **band-pass filter** : → *filter 3*
2. **band-pass filter** : → *filter 4*

band-stop

1. **band-stop filter** : → *filter 5*
2. **band-stop filter** : → *filter 6*

bandwidth

1. **acuity (bandwidth) adaptation** : → *adaptation 1*
2. **bandwidth** (of a device) : the width of a frequency band over which a given characteristic of an equipment or transmission channel does not differ from a reference value by more than a specified amount or ratio. *Note.* — The given characteristic may be for example the amplitude/frequency characteristic, the phase/frequency characteristic or the delay/frequency characteristic. ★ largeur de bande → *largeur 7.* R ширина полосы (устройства). D Bandbreite (einer Schaltung). E anchura de banda (de un dispositivo). I larghezza di banda (di un dispositivo). N bandbreedte (van een apparaat). P szerokość pasma (urządzenia). S bandbredd. (161,702)
3. **bandwidth** (of an antenna) : the width of the frequency band within which the variations of specified characteristics of an antenna do not exceed specified limits. *Note.* — The specified characteristics may include input impedance, directivity, radiation pattern or phase pattern. ★ largeur de bande → *largeur 8.* R ширина полосы (антенны). D Bandbreite (einer Antenne). E ancho de banda (de una antena). I larghezza di banda (di un'antenna). N bandbreedte (van een antenne). P szerokość pasma (anteny). S bandbredd. (712)
4. **bandwidth** (of an optical fibre) : that value numerically equal to the lowest modulation frequency at which the magnitude of the baseband transfer function of an optical fibre decreases to a specified fraction, generally to one half, of the zero frequency value. *Note.* — The bandwidth is limited by several mechanisms ; (a) in multimode fibres - mainly modal distortion and material dispersion, (b) in singlemode fibres - mainly material and waveguide dispersion. ★ largeur de bande → *largeur 9.* R ширина полосы (оптического волокна). D Bandbreite (eines Lichtwellenleiters). E ancho de banda (de una fibra óptica). I larghezza di banda; banda (di una fibra ottica). N bandbreedte (van een optische vezel). P szerokość pasma przenoszenia (włókna światłowodowego). S bandbredd. (731)
5. **effective noise bandwidth** (of a linear two-port device) : the width of the rectangular pass-band of an ideal linear two-port device of constant gain in this pass band equal to the maximum gain of a real linear two-port device and such that, if the same source of white noise were connected to the inputs of the two devices supposed to be both free from internal noise, the same noise power would be available at the two outputs. *Note.* — If the available power gain of the real two-port device is a function of frequency $GR(f)$ having a maximum value G_M, the noise bandwidth of the two-port device is given by :

$$f = \frac{1}{G_M} \int_0^\infty G(f)\, df$$

★ largeur de bande de bruit → *largeur 12.* R эффективная ширина полосы шума (линейного четырехполюсника). D effektive Rauschbandbreite (eines linearen Zweipol Netzwerkes). E anchura de banda de ruido (de un dispositivo bipuerta lineal). I larghezza di banda equivalente del rumore (di un elemento lineare a due porte). N effectieve bandbreedte van de ruis (van een lineaire tweepoort). P szerokość pasma szumu równoważna (dwuwrotnika linearnego). S effektiv brusbandbredd. (702)
6. **(frequency) bandwidth** : the quantitative difference between the limiting frequencies of a frequency band. *Notes. 1* — The term bandwidth is usually associated with a qualification, for example : baseband bandwidth, necessary bandwidth, bandwidth of an amplifier or other device. *2* — A bandwidth is defined by a single value, and does not depend on the position of the band in the frequency spectrum. ★ largeur de bande (de fréquences) → *largeur 13.* R ширина полосы (частот). D (Frequenz-)Bandbreite. E anchura de banda (de frecuencias). I larghezza di banda. N (frequentie)bandbreedte. P szerokość pasma (częstotliwości). S bandbredd. (702,704)
7. **Nyquist slope bandwidth** : in a vestigial sideband television receiver, half of the frequency bandwidth, centred on the vision carrier frequency, over which there is a sensibly linear reduction of amplitude with frequency, from the frequency at which the amplitude is equal to that in the complete sideband, down to the frequency where the amplitude is negligible. ★ talon → *talon 3.* R склон Найквиста. (723)
8. **pass bandwidth** : the separation of frequencies between which the attenuation of a piezoelectric filter shall be equal to or less than a specified value. ★ largeur de bande passante → *largeur 16.* R ширина полосы пропускания. D Durchlassbandbreite. E ancho de banda pasante. I larghezza di banda passante. N doorlaatbandbreedte. P szerokość pasma przepustowego. S passbandbredd. (561)
9. **stop bandwidth** : the separation of frequencies between which the relative attenuation of a piezoelectric filter shall be equal to or greater than a specified value. ★ largeur de bande atténuée → *largeur 11.* R ширина полосы задерживания. D Sperrbandbreite. E ancho de banda atenuada. I larghezza di banda. N onderdrukte-bandbreedte; sperbandbreedte (afgeraden). P szerokość pasma tłumieniowego. S spärrbandbredd. (561)
10. **x dB bandwidth** (of a signal) : the width of a frequency band such that beyond its lower and upper limits any spectral line or any power spectral density of the spectrum of a signal is at least x dB lower than a reference level specified for the type of signal considered. ★ largeur de bande "à x dB" → *largeur 10.* R ширина полосы (сигнала) на уровне X дБ. D x dB Bandbreitengröße (eines Signals). E anchura de banda "de x dB" (de una señal). I larghezza di banda "a x dB" (di un segnale). N xdB-bandbreedte (van een signaal). P szerokość pasma x-decybelowa (sygnału). S x dB-bandbredd. (161,702)

bandwidth-limited

1. **bandwidth-limited operation** : → *operation 7*

bank

1. **... bank** (*Syn.* bank of ...) : → *bank 3*
2. **bank** (of a selector) : the fixed assembly of contacts of a selector to which the inlets or outlets are wired and with which the moving contacts engage. ★ banc (de broches) → *banc 2.* R поле (искателя). D Kontaktbank. E banco (de contactos) (de un selector). I banco. N kiezerbank. P wieniec (stykowy). S väljarstator. (714)
3. **bank of ...** (*Syn.* ... bank) : a number of devices of the same kind so connected as to act together. ★ batterie de ... → *batterie 16.* R батарея... группа.... D -Batterie; Bank. E batería de ... banco de .... I batteria di .... N ... -batterij. P zespół ...; bateria ... S batteri av ...; -grupp. (151)
4. **(capacitor) bank** : a number of capacitor units connected so as to act together. ★ batterie (de condensateurs) → *batterie 18.* R (конденсаторная) батарея. D Kondensatorbatterie. E batería (de condensadores). I batteria; batteria di condensatori. N condensatorbank. P bateria kondensatorów. S kondensatorbatteri. (436)
5. **capacitor bank protection** : → *protection 7*
6. **channel bank** (*Syn.* channel translating equipment) : → *equipment 12*
7. **group bank** (*Syn.* group translating equipment) : → *equipment 37*
8. **supergroup bank** (*Syn.* supergroup translating equipment) : → *equipment 75*

banking

1. **banking** (*Syn.* assisting in rear; pusher operation (USA)) : running in which a motor vehicle, coupled or uncoupled, is added to the rear of a train to assist in its propulsion. ★ marche en pousse → *marche 22.* R следование с толкачем. D Nachschiebefahrt. E marcha en múltiple tracción por cola. I (spinta di) rinforzo in coda. N rijden

met extra opdruk. P jazda pomocniczo-popychowa. S påskjutning. (811)

bar

1. **bar and post transformer** (*Syn.* crossbar transformer) : → *transformer 22*
2. **bar insulation** : → *insulation 3*
3. **bar primary bushing type current transformer** : → *transformer 10*
4. **bar primary type current transformer** : → *transformer 11*
5. **chopper bar** (*Syn.* writing bar) : → *bar 13*
6. **colour bars** : a television test signal which provides vertical colour bands for assessment of the quality of the colour signal. *Note.* — In general these comprise 8 bars, corresponding to white, yellow, cyan, green, magenta, red, blue, black. ★ mire de barres (de couleur) → *mire 2.* R цветные полосы. (723)
7. **cross bar** (of lights) : line of lights in an approach lighting system which is arranged orthogonal to, and symmetrically disposed about, the centre line of the system and the runway. ★ barre transversale → *barre 9.* R световой горизонт зоны подхода. D Querbalken. E barra transversal. I barra trasversale. N dwarsbalk. P światła zbliżania poprzeczne. S crossbar. (845)
8. **hum bars** (on a picture) : parallel horizontal bands which may move vertically on a horizontally scanned picture due to very low frequency electromagnetic interference from, for example, the mains supply. ★ ronflement → *ronflement 5.* R фоновые полосы (в изображении). (723)
9. **main earthing bar** (*Syn.* main earthing terminal) : → *terminal 18*
10. **pre-dimensioned bar** (*Syn.* lumbered synthetic quartz crystal) : any bar of synthetic quartz crystal whose "as grown" dimensions have been altered by sawing, grinding, lapping, etc., to meet a particular dimensional requirement. ★ barreau prédimensionné → *barreau 2.* R блок с предварительно заданными размерами. D vorgeformter Quarzbarren; vorbearbeiteter synthetischer Quarzkristall. E barra predimensionada; cristal de cuarzo sintético prediseñado. I barra predimensionata; cristallo di quarzo sintetico predimensionato. N voorbewerkte staaf. P kryształ przewymiarowany (kwarcu syntetycznego). S förbearbetat kvartsämne. (561)
11. **rabbling bar** : a device to enable movement of slag or other materials on the surface of a molten bath of metal and for de-slagging. ★ ringard → *ringard 1.* R мешалка. D Krätzer. E atizador. I sbarra di mescolamento. N slakkenkrabber. P ożóg (do zgarniania żużla). S slaggraka. (841)
12. **wing bar** : barrette positioned at the side of an aerodrome runway, outside the line of the runway edge lights. It may be paired symmetrically with another one on the opposite side of the runway. ★ barre de flanc → *barre 4.* R световой горизонт взлетно-посадочной полосы. D Außenkette. E barra lateral. I barra laterale. N vleugellichtbalk. P ebra s'wietlne. S vingbar. (845)
13. **writing bar** (*Syn.* writing edge; chopper bar) : a part used in some continuous facsimile receivers in conjunction a writing helix, comprising a rectilinear rib which defines at a given instant, the position of a scanning line on the recording medium. ★ lame d'inscription → *lame 8.* R записывающая линейка. D Schreibkante; Schreiblineal. E lama de inscripción. I barra di scrittura. N schrijfstang. P listwa zapisu. S skrivskena. (721)

bare

1. **bare hand method** : → *method 2*

barge

1. **barge tractor** : → *tractor 1*

Barkhausen

1. **Barkhausen effect** : → *effect 5*
2. **Barkhausen jumps** (*Syn.* Barkhausen effect) : → *effect 5*

barn

1. barn (deprecated) : a unit of cross-section equal to 10^{-28} m^2. *Note* the barn will be used for a limited time with the SI system. ★ barn → *barn 1.* R барн (не рекомендуется). D Barn (veralteter Begriff). E barn (desaconsejado). I barn (sconsigliata). N barn. P barn (jednostka nie zalecana). S barn. (026,881)

barred

1. **access barred** : → *access 1*
2. **barred signal** : → *signal 24*

barrel

1. **barrel distortion** : → *distortion 8*
2. **conductor barrel** : the section of a terminal end or splice which accommodates the conductor. ★ fût d'un conducteur → *fût 1.* R втулка для крепления проводника. D Anschlußhülse. E fuste de un conductor. I fusto (di un conduttore). N draadhuls. P szyjka końcówki. S ledarhylsa. (581)

barrette

1. **barrette** : line of closely spaced aeronautical ground lights which is designed to appear from a distance as a short bar of light orthogonal to the centre line of an aerodrome runway. ★ barrette → *barrette 1.* R световой горизонт. D Kurzbalken; Barrette. E barra. I barretta. N barrette. P ..... S barrett; ljuslinje. (845)

barretter

1. **barretter** : a resistor with a high positive temperature coefficient in which electromagnetic power is converted into heat and the corresponding change in resistance is used as a means of measuring the absorbed power. ★ varistance → *varistance 2.* R баррeттер. D Barretter. E varistor. I varistore. N barretter. P bareter. S baretter. (726)
2. **barretter mount** (*Syn.* bolometer mount) : → *mount 2*

barrier

1. **barrier** : a part providing protection against direct contact from any usual direction of access. ★ barrière → *barrière 1.* R ограждение. D Abdeckung; Umhüllung. E barrera. I barriera. N afscherming. P przegroda; bariera. S skärm. (826)
2. **barrier frequency** (*Syn.* cut-off frequency) : → *frequency 28*
3. **barrier grid** : → *grid 2*
4. **barrier layer** : → *layer 1*
5. **barrier seal** : → *seal 1*
6. **flash barrier** : a screen of fire-resistant material to prevent the formation of an arc or to minimize the damage caused thereby. ★ écran antiflash → *écran 13.* R искровой экран. D Lichtbogenschutz. E pantalla contra arcos. I schermo antiarco. N vonkenschot. P przegroda przeciwłukowa. S gnistskärm. (411)
7. **insulation barrier** : a raised or recessed configuration of the insulator to increase creepage distance between conducting surfaces. ★ barrière par contournement → *barrière 6.* R барьер изоляционный. D Kriechstreckenverlängerung. E barrera de aislamiento. I barriera d'isolamento superficiale. N kruipwegverlenging. P bariera izolacyjna. S krypströmsbarriär. (581)
8. **portable barrier** : a movable screen, which can be carried, made of materials that reduce radiation exposure. ★ cloison mobile → *cloison 4.* R переносный защитный экран. D bewegliche Abschirmung. E barrera portátil. I barriera mobile. N verplaatsbare afscherming. P osłona ruchoma. S bärbart strålskydd. (881)
9. **potential barrier** : the potential difference between two substances in contact or between two homogeneous regions having different electrical properties, due to the diffusion of charge carriers from each part and the creation of a space charge region. ★ barrière de potentiel → *barrière 2.* R потенциальный барьер. D Potentialschwelle; Potentialwall. E barrera de potencial. I barriera di potenziale. N potentiaalbarrière. P bariera potencjału. S potentialbarriär. (521)
10. **potential barrier** (of a PN junction) : a potential barrier between two points respectively located in the P-type neutral region and the N-type neutral region. ★ barrière de potentiel → *barrière 3.* R потенциальный барьер (П-Н перехода). D Potentialschwelle (eines PN-Übergangs). E barrera de potencial (de una unión PN). I barriera di potenziale (di una giunzione PN). N potentiaalbarrière (van een PN-junctie). P bariera potencjału (złącza PN). S potentialbarriär (i en PN-övergång). (521)
11. **primary protective barrier** : a barrier sufficient to attenuate the useful beam to the required degree. ★ écran primaire de radioprotection → *écran 29.* R первичный защитный барьер. D Abschirmung gegen Primärstrahlung. E barrera

protectora primaria. I barriera protettiva primaria. N primaire afscherming. P osłona pierwotna. S primärstrålskydd. (881)

12. **protective barrier** : a barrier of attenuating materials used to attenuate radiation and reduce radiation hazard. ★ écran protecteur → *écran 30.* R защитный барьер. D Abschirmung. E barrera protectora. I barriera protettiva. N afscherming. P osłona. S strålskydd. (881)
13. **safety barrier** : a device for use between intrinsically-safe and non-intrinsically-safe circuits for the purpose of limiting the voltage and current in the intrinsically-safe circuits to levels incapable of causing ignition. ★ barrière de sécurité → *barrière 4.* R барьер безопасности. D Sicherheitsbarriere. E barrera de seguridad. I barriera di sicurezza. N veiligheidsbarrière. P bariera ochronna. S säkerhetsbarriär. (426)
14. **secondary protective barrier** : a barrier sufficient to attenuate scattered and/or leakage radiation to the required degree. ★ écran secondaire de radioprotection → *écran 32.* R вторичный защитный барьер. D Abschirmung gegen Sekundärstrahlung. E barrera protectora secundaria. I barriera protettiva secondaria. N secundaire afscherming. P osłona wtórna. S sekundärstrålskydd. (881)
15. **structural protective barrier** : a barrier of attenuating materials consisting of fixed elements such as walls. ★ cloison de protection → *cloison 3.* R конструкционный защитный барьер. D Abschirmwand. E barrera protectora estructural. I barriera protettiva fissa. N structurele afscherming. P osłona stała. S strålskyddande byggelement. (881)
16. **surface barrier semiconductor detector** : → *semiconductor detector 10*

barring

1. **barring gear** (UK) (*Syn.* turning gear (USA)) : a manual or motor-operated device intended to rotate the rotor of a machine at low speed. ★ virеur → *virеur 1.* R валоповоротное устройство. D Drehvorrichtung. E virador. I viratore. N torninrichting. P urządzenie do obracania wirnika. S baxningsdon. (411)

bar-to-bar

1. **bar-to-bar test** : → *test 6*

base

1. **base** : a region between the emitter and collector junctions of a bipolar semiconductor device. ★ base → *base 4.* R база. D Basis; Basiszone. E base. I base. N basis. P baza. S bas. (521)
2. **base** : that part of an electronic tube which is attached to the envelope, and carries the majority of pins and contacts used to connect the electrodes to the external circuit. ★ culot → *culot 1.* R цоколь. D Sockel. E casquillo. I zoccolo. N buisvoet. P cokół (lampy). S sockel. (531)
3. **base** : that part of the envelope of an electronic tube which carries the majority of pins and contacts used to connect the electrodes to the external circuit. ★ embase → *embase 1.* R ножка. D Röhrenfuß. E base; pie. I base. N buisbodem. P podstawa (bańki). S fot. (531)
4. **base** (*Syn.* cap) : → *cap 3*
5. **base address** : → *address 8*
6. **base limiter** : → *limiter 1*
7. **base limiting** : → *limiting 1*
8. **base load set** : → *set 5*
9. **base material** : → *material 6*
10. **base (material)** (*Syn.* backing (material)) : → *material 5*
11. **base material** : → *material 8*
12. **base quantity** : → *quantity 2*
13. **base speed** : → *speed 6*
14. **base unit** : → *unit 10*
15. **battery base** : a support base, generally of insulating material for stationary cells. ★ chantier → *chantier 1.* R основание батареи. D Batteriestand. E base de batería. I bancale. N batterijvloerstelling. P podstawa (akumulatora stacjonarnego). S batterifundament. (486)
16. **bayonet base** (*Syn.* bayonet cap) : → *cap 1*
17. **common base (arrangement)** : → *arrangement 1*
18. **free-running time base** : a time base running periodically even in the absence of a signal. *Note.* — A free running time base may be synchronized or not; the synchronization can be external or internal. ★ base de temps relaxée → *base de temps 4.* R автоколебательный режим устройства временной развертки. D freilaufende Zeitablenkeinrichtung. E base de tiempos libre. I base dei tempi libera di scorrere. N vrijlopende tijdbasis. P układ samobieżny podstawy czasu. S frisvängande tidbas. (303)
19. **metal core base material** : → *material 29*
20. **metal-clad base material** : → *material 30*
21. **pin base** (*Syn.* pin cap) : → *cap 6*
22. **prefocus base** (*Syn.* prefocus cap) : → *cap 9*
23. **screw base** (*Syn.* screw cap) : → *cap 10*
24. **shell base** (*Syn.* shell cap) : → *cap 11*
25. **SI base unit** : → *unit 54*
26. **time base** : a device generally used to produce a spot displacement as a specified function of time. ★ base de temps → *base de temps 1.* R устройство временной развертки. D Zeitablenkeinrichtung. E base de tiempos. I base dei tempi. N tijdbasisgenerator. P układ podstawy czasu. S tidbaskrets. (303)
27. **time base** : a reference oscillation used as a reference from which time intervals can be determined in terms of the instants of occurrence of certain parts of the cycles of the oscillation. *Note.* — The term "time base" may also apply to the equipment used to generate this reference oscillation. ★ base de temps → *base de temps 2.* R база времени. D Zeitbasis. E base de tiempos. I base temporale; base dei tempi. N tijdbasis. P rozciąg czasu; podstawa czasu. S tidbas. (702,721)
28. **time base jitter** : → *jitter 5*
29. **triggered time base** : a time base which, for each sweep, is initiated by a trigger signal and therefore has a rest position. The repetition rate is not necessarily periodic. *Note.* — The duration of the sweep is not dependent on the period of the observed quantity. ★ base de temps déclenchée → *base de temps 3.* R ждущий режим устройства временной развертки. D getriggerte Zeitablenkeinrichtung. E base de tiempos con disparo. I base dei tempi sincronizzata. N getriggerde tijdbasis. P układ wyzwalania podstawy czasu. S triggad tidbas. (303)

baseband

1. **baseband** : that frequency band occupied by one signal or by a number of multiplexed signals at specified input and output points of a transmission system. *Notes. 1* — In radiocommunication, the baseband is that frequency band which is occupied by the signal modulating the transmitter. *2* — When the transmission involves multiple modulation, it is generally considered that the baseband is that frequency band occupied by the signal which is applied to the first modulation stage, and not the frequency band occupied by an intermediate modulated signal. ★ bande de base → *bande 15.* R основная полоса (частот). D Basisband. E banda de base. I banda base. N basisband. P pasmo podstawowe. S basband. (702,704)
2. **baseband response function** (*Syn.* baseband transfer function) : → *function 3*
3. **baseband transfer function** : → *function 3*

based

1. **ground based duct** : → *duct 9*

basic

1. **basic cell** : → *cell 3*
2. **basic convertor connection** : → *connection 5*
3. **basic current** : → *current 8*
4. **basic group** : → *group 1*
5. **basic mastergroup** : → *mastergroup 1*
6. **basic MUF** : → *MUF 1*
7. **basic noise** : → *noise 6*
8. **basic supergroup** : → *supergroup 1*
9. **basic supermastergroup** : → *supermastergroup 1*
10. **basic switch connection** : → *connection 6*
11. **basic transmission loss (of a radio link)** : → *loss 7*
12. **basic 15-supergroup assembly** : → *assembly 6*
13. **basic (15-supergroup) hypergroup** (*Syn.* basic 15-supergroup assembly) : → *assembly 6*
14. **free-space basic transmission loss** : → *loss 33*

basket

1. **charging basket** : a basket which is used to introduce the charge into the heating chamber. ★ panier de chargement → *panier 1.* R загрузочная корзина. D Beschickungskorb.

E cesto cargador. I cesta di carica. N laadkorf. P kosz wsadowy. S chargeringskorg. (841)

2. **drop-bottom charging basket** : a basket with removable bottom which opens to drop the charge. *Note.* — The bottom is formed with sections which are distinguishing for example orange peel, petal or clam shell. ★ panier de chargement à fond ouvrant → *panier 2.* R загрузочная корзина с откидным днищем. D Fallbodenbeschickungskorb. E cesto cargador de trampilla. I cesta di caricamento a fondo apribile. N laadkorf met onderlossing. P koszt wsadowy o drzwiczkach dennych. S chargeringskorg med bottentömning. (841)

batch

1. **batch furnace** : → *furnace 2*
2. **synthetic quartz crystal batch** : synthetic quartz crystals grown at the same time in one autoclave. ★ lot de cristaux de quartz synthétique → *lot 1.* R съем кристаллов синтетического кварца. D Charge synthetischer Quarzkristalle. E lote de cristales de cuarzo sintético. I lotto di cristalli di quarzo sintetico. N synthetische kwartspartij. P partia kryształów kwarcu syntetycznego. S kvartsämnesats. (561)

bath

1. **bath furnace** : → *furnace 3*
2. **salt bath electrode furnace** : → *furnace 47*
3. **salt bath furnace with immersed electrodes** : → *furnace 48*
4. **salt bath furnace with submerged electrodes** : → *furnace 49*

bathythermogram

1. **bathythermogram** : plot of temperature of the water in the ocean as a function of depth. ★ bathythermogramme → *bathythermogramme 1.* R батитермограмма. D Bathythermogramm. E termobatograma. I batitermogramma. N temperatuur-dieptediagram. P termogram głębokościowy. S djuptemperaturdiagram. (801)

battery

1. **alkaline secondary battery** : a secondary battery in which the electrolyte is an alkaline solution. ★ accumulateur alcalin → *accumulateur 3.* R щелочная аккумуляторная батарея. D alkalischer Akkumulator. E batería alcalina. I accumulatore alcalino. N oplaadbare alkalische batterij. P akumulator zasadowy. S (laddningsbart) alkaliskt batteri. (486)
2. **ambient temperature (of a cell or battery)** : → *temperature 4*
3. **battery base** : → *base 15*
4. **battery capacity** : → *capacity 4*
5. **battery circuit** : → *circuit 9*
6. **battery crate** : → *crate 1*
7. **battery rack** : → *rack 1*
8. **battery stand** (*Syn.* battery rack) : → *rack 1*
9. **battery stillage** (*Syn.* battery rack) : → *rack 1*
10. **battery testing** : → *testing 1*
11. **battery tray** : → *tray 1*
12. **buffer battery** : a battery connected across a direct current supply in order to reduce the effects of power variations of the source. ★ batterie tampon → *batterie 26.* R буферная батарея. D Pufferbatterie. E batería tampón. I batteria in tampone. N batterij voor bufferbedrijf; bufferbatterij. P bateria buforowa; bateria w pracy buforowej. S buffertbatteri. (486)
13. **central battery (in telephony)** (*Syn.* common battery (in telephony); CB (abbreviation)) : a source of feeding current and signalling current located at a local switching entity for the telephone stations connected to this exchange. ★ batterie centrale (intégrale) → *batterie 2.* R центральная батарея (в телефонии); ЦБ (сокращение). D Zentralbatterie; ZB. E batería central (en telefonía). I batteria centrale. N centrale batterij (bij telefonie). P bateria centralna. S centralbatteri. (722)
14. **central battery feeding (telephony)** : → *telephony 1*
15. **central battery signalling (telephony)** : → *signalling 5*
16. **charge efficiency (of a cell or battery)** : → *efficiency 6*
17. **charged drained (secondary) battery** (*Syn.* conserved charge (secondary) battery) : a secondary battery stored with a small quantity of electrolyte the greater part of which is absorbed in the plates and separators, and in which the plates are in a charged state. ★ batterie (d'accumulateurs) chargée vidée → *batterie 8.* R заряженная батарея; батарея с сохраняющимся зарядом. D entleerte, geladene Batterie. E batería drenada cargada. I batteria (di accumulatori) carica, senza elettrolita. N geleegde geladen batterij (accu). P akumulator naładowany wysączony. S konserverat batteri. (486)
18. **commissioning (of a battery)** : → *commissioning 1*
19. **common battery** : within a substation, a battery which is intended to supply the control, monitoring and protection equipment relating to all circuits. ★ batterie d'accumulateurs centralisée → *batterie 5.* R общестанционная аккумуляторная батарея. D Zentralbatterie. E batería de acumuladores central. I batteria d'accumulatori centralizzate. N hoofdbaterrij. P bateria akumulatorów centralna. S stationsbatteri. (605)
20. **common battery** (*Syn.* central battery) : → *battery 13*
21. **common battery feeding (telephony)** (*Syn.* central battery feeding (telephony)) : → *telephony 1*
22. **common battery signalling (telephony)** (*Syn.* central battery signalling (telephony)) : → *signalling 5*
23. **conserved charge (secondary) battery** (*Syn.* charged drained (secondary) battery) : → *battery 17*
24. **critical temperature (of a cell or battery)** : → *temperature 12*
25. **cycle (of a battery)** : → *cycle 4*
26. **dedicated battery** : within a substation, one of the batteries which is intended to supply the control, monitoring and protection equipment relating to one or a few circuits. ★ batterie d'accumulateurs décentralisée → *batterie 9.* R местная аккумуляторная батарея. D Teilbereichsbatterie. E batería de acumuladores específica. I batteria d'accumulatori locale. N ..... P bateria akumulatorów lokalna. S ..... (605)
27. **discharge (of a battery)** : → *discharge 12*
28. **discharged drained (secondary) battery** : a secondary battery stored with a small quantity of electrolyte the greater part of which is absorbed in the plates and separators, and in which the plates are in a discharged state. ★ batterie (d'accumulateurs) déchargée vidée → *batterie 12.* R разряженная батарея. D entleerte, entladene Batterie. E batería (acumulador) drenada descargada. I batteria (di accumulatori) scaricata e vuotata. N geleegde ontladen batterij (accu). P akumulator wyładowany wysączony. S tömt oladdat batteri. (486)
29. **discharging (of a battery)** (*Syn.* discharge (of a battery)) : → *discharge 12*
30. **dry charged (secondary) battery** : a secondary battery stored without electrolyte whose plates are dry and in a charged state. ★ batterie (d'accumulateurs) chargée sèche → *batterie 7.* R сухозаряженная батарея. D trockene, geladene Batterie. E batería (acumulador) cargada seca. I batteria (di accumulatori) carica secca. N ongevulde geladen batterij (accu); drooggeladen batterij (accu) (ontraden). P akumulator naładowany suchy. S torrladdat batteri. (486)
31. **dry discharged (secondary) battery** : a secondary battery stored without electrolyte whose plates are dry and in a discharged state. ★ batterie (d'accumulateurs) déchargée sèche → *batterie 11.* R сухоразряженная батарея. D trockene, entladene Batterie. E batería (acumulador) descargada seca. I batteria (di accumulatori) scarica senza elettrolita. N ongevulde ontladen batterij (accu). P akumulator wyładowany suchy. S torrt oladdat batteri. (486)
32. **(electrochemical) cell or battery** : → *cell 11*
33. **emergency battery** : a battery which supplies energy to a circuit when the normal supply is interrupted. ★ batterie de secours → *batterie 22.* R аварийная батарея. D Notstrom-Batterie. E batería de emergencia. I batteria di riserva. N noodstroombatterij. P bateria bezpieczeństwa. S reservkraftsbatteri. (486)
34. **end-of-charge voltage (of a cell or battery)** : → *voltage 61*
35. **energy efficiency (of a cell or battery)** : → *efficiency 23*
36. **energy of a battery** : → *energy 38*
37. **filled and charged (secondary) battery** : a secondary battery ready for use. ★ batterie (d'accumulateurs) chargée remplie → *batterie 6.* R залитая заряженная батарея. D gefüllte, geladene Batterie. E batería (acumulador) rellenada y cargada. I batteria (di accumulatori) carica, con elettrolita. N gevulde geladen batterij (accu). P akumulator naładowany napełniony. S fyllt och laddat batteri. (486)
38. **filled discharged (secondary) battery** : a secondary battery stored in a discharged state with electrolyte. ★ batterie

(d'accumulateurs) déchargée remplie → *batterie 10.* R залитая разряженная батарея. D gefüllte, entladene Batterie. E batería (acumulador) descargada rellenada. I batteria (di accumulatori) scarica con elettrolita. N gevulde ontladen batterij (accu). P akumulator wyładowany napełniony. S fyllt oladdat batteri. (486)

39. **floating battery** : a battery whose terminals are permanently connected to a source of constant voltage sufficient to maintain the battery approximately fully charged, intended to supply a circuit, if the normal supply is temporarily interrupted. ★ batterie flottante → *batterie 23.* R флотирующая батарея. D Batterie im Erhaltungslade-Betrieb. E batería flotante. I batteria in carica permanente (a tensione costante). N batterij in druppellading. P bateria rezerwowa (ładowana w czasie pracy). S hålladdat batteri. (486)

40. **heating resistor battery** : an assembly of heating resistors electrically insulated from and supported usually in a metal framework. ★ batterie de chauffage par résistance → *batterie 17.* R батарея нагревателей сопротивления. D Heizwiderstandsbatterie. E batería de calentamiento por resistencia. I batteria di riscaldamento a resistenza. N verwarmingsbatterij. P bateria rezystorów grzejnych. S ..... (841)

41. **initial temperature (of a cell or battery)** : → *temperature 20*

42. **initial voltage (of a cell or battery)** : → *voltage 89*

43. **lead-acid battery** : a secondary battery in which the electrodes are made mainly from lead and the electrolyte is a sulphuric acid solution. ★ accumulateur au plomb → *accumulateur 7.* R свинцово-кислотная аккумуляторная батарея. D Blei-Akkumulator. E batería de plomo-ácido. I accumulatore al piombo. N lood(zwavelzuur)batterij; loodaccu. P akumulator ołowiowy. S blybatteri. (486)

44. **local battery** (in telephony) (*Syn.* LB (abbreviation)) : a source of feeding current located at the telephone station. *Note.* — For signalling purposes, a local battery telephone station uses either call signal generator signalling or central battery signalling. ★ batterie locale → *batterie 24.* R местная батарея (в телефонии); МБ (сокращение). D Ortsbatterie; OB. E batería local (en telefonía). I batteria locale. N lokale batterij (bij telefonie). P bateria miejscowa. S lokalbatteri. (722)

45. **maintenance-free (secondary) battery** : a secondary battery which during its service needs no maintenance, provided specified operating conditions are fulfilled. *Note.* — In the case of the lead-acid starter battery, the term "maintenance-free battery" refers to a battery which does not require the addition of water known as "topping-up". ★ batterie (d'accumulateurs) sans entretien → *batterie 15.* R безуходная батарея. D wartungsfreie Batterie. E batería (acumulador) libre de mantenimiento. I batteria (di accumulatori) senza manutenzione. N onderhoudsvrije batterij (accu). P akumulator bezobsługowy. S underhållsfritt batteri. (486)

46. **mean voltage (of a cell or battery)** : → *voltage 114*

47. **monobloc battery** : a secondary battery in which the plate packs are fitted in a multi-compartment container. ★ batterie monobloc → *batterie 25.* R моноблочная батарея. D Blockbatterie. E batería monobloque. I batteria monoblocco. N monoblokbatterij; monoblokaccu. P bateria monoblokowa. S gruppkärlsbatteri. (486)

48. **nickel-cadmium battery** : an alkaline secondary battery in which the positive material is made mainly from nickel and the negative material is made mainly from cadmium. ★ accumulateur au nickel-cadmium → *accumulateur 4.* R никель-кадмиевая батарея. D Nickel-Cadmium-Akkumulator. E batería de níquel-cadmio. I accumulatore al nichel-cadmio. N nikkel-cadmiumbatterij. P akumulator niklowo-kadmowy. S nickel-kadmiumbatteri. (486)

49. **nickel-iron battery** : an alkaline secondary battery in which the positive material is made mainly from nickel and the negative material is made mainly from iron. ★ accumulateur au nickel-fer → *accumulateur 5.* R никель-железная батарея. D Nickel-Eisen-Akkumulator. E batería de níquel-hierro. I accumulatore al nichel-ferro. N nikkel-ijzerbatterij. P akumulator niklowo-żelazowy. S nickel-järnbatteri. (486)

50. **nickel-zinc battery** : an alkaline secondary battery in which the positive material is made mainly from nickel and the negative material is made mainly from zinc. ★ accumulateur au nickel-zinc → *accumulateur 6.* R никель-цинковая батарея. D Nickel-Zink-Akkumulator. E batería de níquel-zinc. I accumulatore al nichel-zinco. N nikkel-zinkbatterij. P akumulator niklowo-cynkowy. S nickel-zinkbatteri. (486)

51. **nominal capacity (of a cell or battery)** : → *capacity 20*

52. **nominal voltage of a cell or battery** : → *voltage 127*

53. **on-load voltage (of a cell or battery)** : → *voltage 130*

54. **original equipment battery** : a battery supplied for use on new equipment. ★ batterie de premier équipement → *batterie 20.* R батарея для специального оборудования. D Erstausrüstungs-Batterie. E batería del equipo original. I batteria di primo impianto. N eerste-uitrustingsbatterij. P bateria pierwszego wyposażenia. S originalbatteri. (486)

55. **plate (of a secondary battery)** : → *plate 21*

56. **rated capacity (of a cell or battery)** : → *capacity 23*

57. **(rechargeable) battery** (*Syn.* (secondary) battery) : → *battery 60*

58. **replacement battery** : a battery supplied to replace an existing battery. ★ batterie de remplacement → *batterie 21.* R запасная батарея. D Ersatzbatterie. E batería de recambio. I batteria di ricambio. N vervangingsbatterij. P bateria zamienna. S ersättningsbatteri. (486)

59. **reserve battery** : a battery stored in a dry charged state with the necessary electrolyte held separately and which may be transferred to the cells for priming. ★ batterie amorçable → *batterie 1.* R резервная батарея. D Reserve-Batterie. E batería de reserva. I batteria attivabile. N reservebatterij (accu). P akumulator rezerwowy. S aktiverbart batteri. (486)

60. **(secondary) battery** (*Syn.* (rechargeable) battery; storage battery (USA)) : two or more secondary cells connected together and used as a source of electric energy. ★ batterie (d'accumulateurs) → *batterie 3.* R (аккумуляторная) батарея. D Batterie. E batería (de acumuladores); batería (recargable). I batteria (di accumulatori). N (oplaadbare) batterij; accu(mulatorenbatterij). P bateria (akumulatorowa). S (laddningsbart) batteri; sekundärbatteri. (486,811)

61. **(secondary) battery for specific application** : battery designed for a particular application, e.g. : - stationary battery, - portable battery, - starter battery, - traction battery, - motorcycle battery, - train lighting battery, - aircraft battery, - aerobatic battery. ★ batterie d'accumulateurs pour application particulière → *batterie 14.* R батарея для специфических областей применения. D Batterie für spezielle Anwendung. E batería (acumulador) para aplicaciones específicas. I batterie di accumulatori per applicazioni specifiche. N batterij voor omschreven toepassing; batterij voor specifiek gebruik. P akumulator określonego przeznaczenia. S ..... (486)

62. **service mass (of a battery)** : → *mass 29*

63. **silver-cadmium battery** : an alkaline secondary battery in which the positive material is made mainly from silver and the negative material is made mainly from cadmium. ★ accumulateur à l'argent-cadmium → *accumulateur 1.* R серебряно-кадмиевая батарея. D Silber-Cadmium-Akkumulator. E batería de plata-cadmio. I accumulatore all'argento-cadmio. N zilver-cadmiumbatterij. P akumulator srebrowo-kadmowy. S silver-kadmiumbatteri. (486)

64. **silver-zinc battery** : an alkaline secondary battery in which the positive material is made mainly from silver and the negative material is made mainly from zinc. ★ accumulateur à l'argent-zinc → *accumulateur 2.* R серебряно-цинковая батарея. D Silber-Zink-Akkumulator. E batería de plata-zinc. I accumulatore all'argento-zinco. N zilver-zinkbatterij. P akumulator srebrowo-cynkowy. S silver-zinkbatteri. (486)

65. **storage battery** (*Syn.* (secondary) battery) : → *battery 60*

66. **temperature coefficient of capacity (of a cell or battery)** : → *coefficient 70*

67. **unformed dry (secondary) battery** : a secondary battery stored in a dry state with plates in which the active material has not been submitted to a formation current. ★ batterie (d'accumulateurs) non formée sèche → *batterie 13.* R неформированная сухая батарея. D unformierte Batterie. E batería (acumulador) seca no formada. I batteria (di accumulatori) secca, non formata. N ongeformeerde batterij (accu). P akumulator nieformowany suchy. S oformerat torrt batteri. (486)

battery-electric

1. **battery-electric road vehicle** : → *vehicle 2*
2. **battery-electric traction** : → *traction 4*

bat-wing

1. **bat-wing antenna** : → *antenna 19*
2. **bat-wing panel** : → *panel 1*

baud

1. **baud** (Bd) : the unit of modulation rate in telegraphy and data communication or the unit of line digit rate in digital transmission ; when expressed in terms of this unit, the modulation rate or line digit rate equals the reciprocal of the duration in seconds of the shortest signal element or of the unit interval in a digital signal composed of signal elements of constant duration. *Note.* — The term "rapidité de modulation" is used in French in all cases, with the synonym "débit en ligne" in the case of digital transmission ; in English the terms "modulation rate" and "line digit rate" are used in different fields. ★ baud → *baud 1.* R бод. D Baud. E Baudio. I baud. N baud. P bod. S baud. (702,721)

Baudot

1. **Baudot telegraphy** : → *telegraphy 2*

bay

1. **antenna bay** : a basic subdivision of an array usually consisting of those elements fed by a single branch of the feed line. ★ baie d'antenne → *baie 1.* R антенная панель. D Teilgruppe; Untergruppe. E sector de antena. I ramo di una schiera. N antennelaag; antennesector. P część zestawu antenowego. S delgruppantenn. (712)
2. **bay (of a substation)** : the part of a substation within which the switchgear and controlgear relating to a given circuit is contained. *Note.* — According to the type of circuit, a substation may include: feeder bays, transformer bays, bus coupler bays, etc. ★ cellule (d'un poste) → *cellule 4.* R ячейка электрической подстанции. D Feld. E celda (de una subestación); posición (de una subestación); módulo (de una subestación). I stallo (di una stazione). N veld. P pole (rozdzielni). S (ställverks)fack. (605)
3. **feeder bay** : in a substation, the bay relating to a feeder or a link to a transformer, a generator or another substation. ★ départ → *départ 2.* R присоединение электрического распределительного устройства. D ..... E salida (sentido general). I linea in partenza (in senso generale). N afgaand veld. P pole liniowe. S matningsfack. (605)
4. **synchronisation bay** : equipment forming part of a synchronised transmitter and comprising a very stable master oscillator together with means for comparing its frequency with a reference frequency. ★ baie de synchronisation → *baie 2.* R стойка синхронизации. (723)

bayonet

1. **bayonet base** (*Syn.* bayonet cap) : → *cap 1*
2. **bayonet cap** : → *cap 1*
3. **bayonet coupling** : → *coupling 4*
4. **bayonet pin** : → *pin 1*

bazooka

1. **bazooka** (*Syn.* quarter-wave sleeve balun) : → *balun 4*

beacon

1. **aerodrome beacon** : aeronautical ground light used to indicate the location of an aerodrome. ★ phare d'aérodrome → *phare 3.* R маяк аэродрома. D Flugplatzleuchtfeuer. E faro de aeródromo. I faro d'aeroporto. N luchthavenlicht. P latarnia lotniskowa. S flygplatsfyr. (845)
2. **beacon** : 1. Fixed artificial navigation mark. It may carry a signal light. 2. Signal light used to indicate a designated geographical location. *Note.* — In French, the term "balise" refers also to an artificial object that is used to regulate vehicular or pedestrian traffic. ★ balise → *balise 1.* R маяк. D Bake. E baliza. I segnale fisso. N baken. P stawa; znak nabrzeżny. S sjömärke; fyr. (845)
3. **identification beacon** : aeronautical ground light that shows a coded signal to indicate a designated geographical location. ★ phare d'identification → *phare 6.* R опознавательный маяк. D Kennfeuer. E faro de identificación. I faro d'identificazione. N herkenningsbaken. P latarnia identyfikacyjna. S igenkänningsfyr. (845)

bead

1. **bead** (in a coaxial line) : an electrically short dielectric support for the inner conductor of a coaxial line. ★ rondelle diélectrique → *rondelle 2.* R шайба (в коакциальной линии). D Stützscheibe (in einer Koaxialleitung). E arandela dieléctrica (en una línea coaxial). I rondella dielettrica (in linea coassiale). N steunschijf. P podpora dielektryczna (w linii współosiowej). S stödbricka. (726)

beam

1. **beam** : a unidirectional, or nearly unidirectional flow of electromagnetic radiation or of particles. ★ faisceau → *faisceau 21.* D Strahl. E haz. I fascio. N bundel. P wiązka. S stråle. (026)
2. **beam accelerating voltage** : → *voltage 14*
3. **beam alignment** : → *alignment 1*
4. **beam angle** : → *angle 12*
5. **beam axis** : → *axis 1*
6. **beam axis** : → *axis 2*
7. **beam current** : → *current 9*
8. **beam current** : → *current 10*
9. **beam deflection tube** : → *tube 8*
10. **beam diameter** : → *diameter 5*
11. **beam divergence** : → *divergence 1*
12. **beam gantry** : → *gantry 2*
13. **beam hole** : → *hole 1*
14. **beam modulation percentage** : → *modulation 7*
15. **beam transmission line** : → *line 6*
16. **beam waveguide** : → *waveguide 1*
17. **beaver-tail beam antenna** : → *antenna 20*
18. **cosecant-square beam antenna** : → *antenna 36*
19. **electromagnetic beam** : an electromagnetic wave propagating through space such that the energy remains substantially confined within a cone with a very small apex angle. ★ faisceau électromagnétique → *faisceau 38.* D elektromagnetisches Strahlbündel; Richtstrahl. P wiązka elektromagnetyczna. (705)
20. **focal line beam gun** : → *gun 5*
21. **footprint of a beam** : → *footprint 1*
22. **Gaussian beam** : a beam of optical radiation whose electric field amplitude distribution is Gaussian when measured across a cross section. *Note.* — When such a beam is circular in cross section, the amplitude is :

$$E(r) = E(0) \exp[-(r/w)^2]$$

where r is the distance from beam centre and w is the radius at which the amplitude is $1/e$ of its value on the axis. ★ faisceau gaussien → *faisceau 43.* R пучок Гаусса. D Gauß'scher Strahl. E haz gausiano. I fascio gaussiano. N bundel van Gauss; Gaussbundel. P wiązka gaussowska. S gausstråle. (731)
23. **(main) beam** (of an antenna) : the major lobe of a directional antenna, or the radiation contained in that lobe. *Note.* — The concept of beam usually applies to fairly high-gain antennas. ★ faisceau → *faisceau 22.* R (главный) луч (антенны). D (Haupt-)Strahl (einer Antenne). E haz (principal) (de una antena). I fascio principale. N (hoofd)bundel (van een antenne). P wiązka główna antenowa. S huvudlob. (712)
24. **particle beam** : a unidirectional or approximately unidirectional stream of free particles of limited cross-sectional area. ★ faisceau électronique → *faisceau 40.* R пучок частиц. D Teilchenstrahl. E haz electrónico; haz de partículas. I fascio di particelle. N deeltjesbundel. P wiązka cząstek. S partikelstråle. (881)
25. **sealed beam lamp** : → *lamp 55*
26. **useful beam** : radiation leaving the housing of a radiation source through the aperture defined by the collimating diaphragm. ★ faisceau utile → *faisceau 47.* R используемый пучок. D Nutzstrahlung; Nutzstrahlenbündel. E haz útil. I fascio utile. N nuttige bundel. P wiązka użyteczna. S arbetsstrålknippe. (881)
27. **walking beam furnace** : → *furnace 59*

beam-compression

1. **beam-compression factor** (*Syn.* electron-gun convergence ratio (GB); electron-gun density multiplication (USA)) : the ratio of the average beam current density over a stated cross-section to the average beam current density over a reference cross-section, usually at the cathode surface. ★ facteur de compression du faisceau → *facteur 42.* R коэффициент сжатия пучка. D Strahlenverdichtungsfaktor. E factor de compresión de haz. I fattore di focalizzazione di un fascio. N stroomdichtheidsverhouding. P współczynnik kompresji wiązki. S kompressionsfaktor för elektronstråle. (531)

beam-power

1. **beam-power tube** : → *tube 9*

beamsplitter

1. **beamsplitter** : a passive device for dividing an optical beam into two or more separate beams. ★ séparateur de faisceau → *séparateur 8.* R расщепитель пучка. D LWL-Strahlteiler. E divisor de haz. I divisore di fascio. N bundelverdeler; bundelsplitser. P rozdzielacz wiązki. S stråldelare. (731)

beamwidth

1. **beamwidth** : the angle between two directions in a specified plane containing the direction of maximum radiation or the axis of symmetry of a beam or a radiation lobe, on both sides of this direction or axis, the two directions corresponding, for example, to a given fraction of the maximum radiation or to the first minimums. *Note.* — The most generally used beamwidth is half-power beamwidth. ★ largeur angulaire → *largeur 5.* R ширина луча. D Keulenbreite (z.B. Halbwertsbreite). E ancho del haz. I larghezza del fascio. N bundelbreedte. P szerokość wiązki. S lobvidd. (712)
2. **beamwidth** (*Syn.* beam diameter) : → *diameter 5*

bearing

1. **ball bearing** : a bearing incorporating a peripheral assembly of balls. ★ (palier à) roulement à billes → *palier 24.* R шариковый подшипник. D Kugellager. E cojinete de bolas. I cuscinetto a sfere. N kogellager. P łożysko kulkowe. S kullager. (411)
2. **bearing** : a structure intended to support a rotating shaft and if necessary to limit its axial movement. ★ palier → *palier 6.* R подшипник. D Lager. E cojinete. I cuscinetto. N lager. P łożysko. S lager. (411)
3. **bearing bracket** (*Syn.* end bracket) : → *bracket 3*
4. **bearing clearance** : → *clearance 1*
5. **bearing housing** : → *housing 2*
6. **bearing liner** : → *liner 1*
7. **bearing lining** : → *lining 2*
8. **bearing pedestal** : → *pedestal 1*
9. **bearing pressure** : → *pressure 2*
10. **bearing shell** : → *shell 2*
11. **bearing shield** : → *shield 1*
12. **cartridge type bearing** : a complete ball or roller bearing assembly consisting of a ball or roller bearing and bearing housing which is intended to be inserted into a machine end shield. ★ boîte-palier (à roulement) → *boîte-palier 2.* R щитовой подшипник качения. D Wälzlagerkopf. E cojinete tipo cartucho (de rodamiento). I cuscinetto a cartuccia. N wentellagerblok voor flensmontage. P łożysko toczne zamknięte. S hylslager. (411)
13. **disk and wiper lubricated bearing** : a bearing in which a disk mounted on and concentric with the shaft dips into a reservoir of oil. As the shaft rotates, the oil is diverted from the surface of the disk by a scraper action into the bearing. ★ palier à graissage par disque → *palier 15.* R подшипник с дисковой смазкой. D Lager mit Festringschmierung. E cojinete con disco de engrase. I cuscinetto con lubrificazione a disco. N lager met vaste smeerschijf; lager met vaste smeerkraag. P łożysko z tarczą smarującą. S skivsmort lager. (411)
14. **flood lubricated bearing** : a bearing in which a continuous flow of lubricant is poured over the top of the bearing or journal at about normal atmospheric pressure. ★ palier à graissage par arrosage → *palier 13.* R подшипник со смазкой орошением (самотеком). D Lager mit Spülölschmierung. E cojinete de engrase por riego. I cuscinetto con lubrificazione a pioggia. N lager met spoelsmering. P łożysko ze swobodnym dopływem smaru. S oljeströmslager. (411)
15. **forced lubricated bearing** : a bearing in which a continuous flow of lubricant is forced over the bearing or journal. ★ palier à graissage forcé → *palier 12.* R подшипник с принудительной смазкой. D Lager mit verstärkter Spülölschmierung. E cojinete de engrase forzado. I cuscinetto a lubrificazione forzata. N lager met gedwongen smering. P łożysko ze smarowaniem wymuszonym. S lager med forcerad oljetillförsel. (411)
16. **guide bearing** : a bearing arranged to limit the transverse movement of a vertical shaft. ★ palier-guide → *palier-guide 1.* R направляющий подшипник. D Führungslager. E cojinete de guía. I cuscinetto di guida. N centreerlager. P łożysko kierujące. S styrlager. (411)
17. **insulated bearing housing** : → *housing 7*
18. **insulated bearing pedestal** : → *pedestal 2*
19. **journal bearing** : a cylindrical or partly cylindrical bearing which supports the journal of a shaft. ★ palier lisse → *palier 32.* R опорный подшипник. D Gleitlager. E cojinete de resbalamiento. I cuscinetto liscio. N glijlager. P łożysko poprzeczne. S radiallager. (411)
20. **location bearing** : a bearing arranged to limit the axial movement of a horizontal shaft but which is not intended to carry any continuous thrust load. It may be combined with the load-carrying bearing. ★ palier à joues → *palier 18.* R фиксирующий подшипник. D Zentrierlager. E cojinete de ajuste. I cuscinetto di registro. N opsluitlager. P łożysko wzdłużne ustalające. S axiallager. (411)
21. **motor suspension bearing (for nose-suspended motor)** : a traction motor bearing mounted on the axle and supporting one side of the traction motor, the other side being supported from the bogie frame by a bracket (nose) on the motor frame. ★ palier d'essieu (pour moteur suspendu par le nez) → *palier 29.* R моторно-осевой подшипник (для двигателя с опорно-осевой подвеской). D Tatzlagerung. E cojinete de motor de suspensión (para motor suspendido por la nariz). I cuscinetto d'asse (d'un motore sospeso a naso). N steunlager. P łożysko osiowe (silnika zawieszonego za nos). S tasslager. (811)
22. **oil ring lubricated bearing** : a bearing in which a ring, encircling the journal and rotated by it, raises oil to lubricate the bearing from a reservoir into which the ring dips. ★ palier à graissage par bague → *palier 14.* R подшипник с кольцевой смазкой. D Ringschmierlager. E cojinete con anillo de engrase. I cuscinetto con lubrificazione ad anello. N lager met ringsmering. P łożysko z pierścieniem smarującym. S ringsmort lager. (411)
23. **oil-jacked bearing** : a journal bearing in which high pressure oil is forced under the shaft journal to establish a lubricating film. ★ palier à pression d'huile → *palier 21.* R подшипник с маслом под давлением. D Lager mit Druckölentlastung. E cojinete de aceite a presión. I cuscinetto a pressione d'olio. N lager met hydrostatische smering. P łożysko hydrostatyczne ze smarowaniem wysokociśnieniowym. S lager med tryckoljelyftning. (411)
24. **pad type bearing** : a journal or thrust type bearing in which the bearing surface is not continuous but consists of separate pads. ★ palier à patins → *palier 19.* R сегментный подшипник. D Segment-Gleitlager. E cojinete segmentado. I cuscinetto a pattini. N glijblokjeslager. P łożysko segmentowe (płytkowe). S segmentlager. (411)
25. **pedestal bearing** : a complete assembly of a bearing with its supporting pedestal. ★ chaise-palier → *chaise-palier 1.* R стояковый подшипник. D Stehlager. E cojinete de pedestal. I supporto a cavalletto. N staand lagerblok. P łożysko stojakowe. S stålager. (411)
26. **plug-in type bearing** : a complete journal bearing assembly, consisting of a bearing liner and bearing housing and any supporting structure which is intended to be inserted into a machine end shield. ★ boîte-palier (à coussinet) → *boîte-palier 1.* R щитовой подшипник. D Schildlager. E cojinete tipo cartucho (de resbalamiento). I cuscinetto a innesto. N glijlagerblok voor flensmontage. P łożysko ślizgowe kompletne. S inbyggnadslager. (411)
27. **pressure lubricated bearing** : a bearing in which a continuous flow of lubricant is forced under the shaft journal in the bearing. ★ palier à graissage sous pression → *palier 17.* R подшипник со смазкой под давлением. D Lager mit Druckölschmierung. E cojinete de engrase a presión. I cuscinetto con lubrificazione sotto pressione. N lager

met druksmering. P łożysko ze smarowaniem ciśnieniowym. S tryckoljesmort lager. (411)

28. **roller bearing** : a bearing incorporating a peripheral assembly of rollers. ★ palier à rouleaux → *palier 23.* R роликовый подшипник. D Rollenlager. E cojinete de rodillos. I cuscinetto a rulli. N rollager. P łożysko walcowe. S rullager. (411)
29. **self-lubricating bearing** : a bearing lined with a material containing its own lubricant such that little or no additional lubricating fluid need be added subsequently to ensure satisfactory lubrication of the bearing. ★ palier autolubrifiant → *palier 26.* R самосмазывающийся подшипник. D selbstschmierendes Lager. E cojinete autolubricante. I cuscinetto autolubrificato. N zelfsmerend lager. P łożysko samosmarowne. S självsmörjande lager. (411)
30. **sleeve bearing** : a journal bearing having a complete bearing sleeve. ★ palier à coussinet-douille → *palier 10.* R подшипник скольжения. D ungeteiltes Ringlager. E cojinete casquillo. I cuscinetto a bronzina. N (ongedeeld) glijlager. P łożysko ślizgowe tulejowe. S glidlager. (411)
31. **spherically seated bearing** : a journal bearing in which the bearing liner is supported in such a manner as to permit the axis of the journal to be moved through an appreciable circular angle. ★ palier à rotule → *palier 22.* R подшипник со сферическим вкладышем. D Lager mit kugligem Sitz. E cojinete de rótula. I cuscinetto a sede sferica. N zelfinstellend lager. P łożysko samonastawne z panwią kulistą. S lager med sfäriskt lagerläge. (411)
32. **split sleeve bearing** : a journal bearing having a bearing sleeve which is split for assembly. ★ palier à demi-coussinets → *palier 11.* R разъемный подшипник скольжения. D geteiltes Ringlager. E cojinete de dos piezas. I cuscinetto a bronzina divisa. N gedeeld glijlager. P łożysko ślizgowe z dzieloną panwią. S tvådelat glidlager. (411)
33. **spring loaded bearing** : a ball bearing provided with a spring to ensure complete angular contact between the balls and inner and outer races, thereby removing the effect of diametral clearance in both bearings of a machine provided with ball bearings at each end. ★ roulement à ressort → *roulement 7.* R пружинный подшипник. D Federkugellager. E cojinete de bolas con resorte. I cuscinetto a sfere precaricato. N kogellager met veerbelasting. P łożysko sprężynowe. S fjäderbelastat lager. (411)
34. **straight seated bearing** : a journal bearing in which the bearing liner is constrained about a fixed axis determined by the supporting structure. ★ palier rigide → *palier 33.* R подшипник, фиксированный в осевом направлении. D Lager mit festem Sitz. E cojinete rígido. I cuscinetto rigido. N star lager. P łożysko ze sztywno zamocowaną panwią. S lager med cylindriskt lagerläge. (411)
35. **thrust bearing** : a bearing arranged to resist an axial movement of a shaft and to carry axial load. ★ palier de butée → *palier 28.* R подпятник или упорный подшипник. D Axialdrucklager. E cojinete de empuje. I cuscinetto di spinta. N axiaal lager. P łożysko wzdłużne (oporowe). S bärlager. (411)
36. **tilting pad bearing** : a pad type bearing in which the pads are capable of moving in such a manner as to improve the flow of lubricating fluid between the bearing and the shaft journal or collar. ★ palier à patins oscillants → *palier 20.* R самоустанавливающийся сегментный подшипник. D Kippsegment-Gleitlager. E cojinete de segmentos oscilantes. I cuscinetto a pattini oscillanti. N lager met kantelende glijblokjes. P łożysko z płytkami (segmentami) wahliwymi. S självinställande segmentlager. (411)
37. **wick lubricated bearing** : a bearing in which a supply of lubricant is provided by the capillary action of a wick dipping into an oil reservoir. ★ palier à graissage par mêche → *palier 16.* R подшипник с фитильной смазкой. D Lager mit Dochtschmierung. E cojinete con mecha de engrase. I cuscinetto con lubrificazione a spugna. N lager met pitsmering. P łożysko ze smarowaniem knotowym. S veksmort lager. (411)

beat

1. **beat** : a periodic variation in the amplitude of an oscillation resulting from the superposition of two periodic oscillations of slightly different frequencies. ★ battement → *battement 1.* R биение. D Schwebung. E batido. I battimento. N zweving. P dudnienie. S svävning. (101,801)
2. **beat frequency** : → *frequency 13*
3. **beat method (of measurement)** : → *method 3*

beaver-tail

1. **beaver-tail beam antenna** : → *antenna 20*

becquerel

1. **becquerel** (Bq) : the special name of the SI unit of activity : 1 Bq = 1 s^{-1}. ★ becquerel → *becquerel 1.* R беккерель. D Becquerel. E becquerelio; becquerel. I becquerel. N becquerel. P bekerel. S becquerel. (881)

bed

1. **flat bed facsimile transmitter** : → *transmitter 7*
2. **fluidized bed coating** : → *coating 3*
3. **fluidized bed furnace** : → *furnace 18*

bedding

1. **bedding** : a cushioning layer or layers applied to a cable immediately beneath a metallic layer such as the armour or the reinforcement. ★ matelas → *matelas 1.* R подушка. D Polster. E asiento. I imbottitura. N bedding. P osłona ochronna włóknista; poduszka. S armeringsbädd. (461)

bel

1. **bel** (B) : a unit used to express the ratio of two powers by the decimal logarithm of this ratio. *Notes. 1* — The bel may also be used to express the ratio of two field quantities. To obtain the same numerical value as for the corresponding power ratio, the logarithm of the field quantity ratio is multiplied by the factor 2, assuming that the impedances are equal. *2* — This unit is not often used, having been superseded by the decibel. ★ bel → *bel 1.* R бел. D Bel. E belio. I bel. N bel. P bel. S bel. (702)
2. **bel** : unit of level of a quantity proportional to power when the base of the logarithm is ten. Also, the unit of level of a field quantity when the base of the logarithm is the square root of ten. *Note.* — Examples of power-like quantities are sound power and sound energy. Examples of field quantities are sound pressure and voltage. ★ bel → *bel 2.* R бел. D Bel. E belio; bel. I bel. N bel. P bel. S bel. (801)

bell

1. **bell** (*Syn.* undercut) : the peripheral portion of an excavation which is undercut to ensure that the concrete poured for the pad bears against undisturbed soil (see fig. 4.7). ★ redan → *redan 1.* R уширение котлована. D Unterschneidung. E recueva. I sottosquadro. N ondersnijding. P podcięcie w gruncie. S underskuret schakt. (466)
2. **bell counter tube** (*Syn.* end-window counter tube) : → *counter tube 7*
3. **bell furnace** : → *furnace 4*
4. **magneto (telephone) bell** (*Syn.* polarized ringer) : a telephone bell polarized by a permanent magnet and operated by low frequency alternating current. ★ sonnerie (téléphonique) magnétique → *sonnerie 5.* R (телефонный) звонок переменного тока. D Magnetwecker. E timbre magnético; timbre polarizado. I soneria polarizzata. N wisselstroombel. P dzwonek prądu przemiennego. S polariserad ringklocka. (722)
5. **(telephone) bell** (*Syn.* ringer) : a call indicating device consisting of an electric bell. ★ sonnerie (téléphonique) → *sonnerie 4.* R (телефонный) звонок. D Wecker. E timbre (telefónico). I soneria. N (telefoon)bel. P dzwonek. S ringklocka. (722)
6. **trembler bell** : a non-polarized telephone bell operated by current made intermittent by a contact associated with the bell hammer. ★ sonnerie trembleuse → *sonnerie 7.* R прерывающийся звонок. D Rasselwecker. E timbre oscilante. I soneria ad interruttore. N gelijkstroombel. P dzwonek prądu stałego. S opolariserad ringklocka. (722)

Bellini-Tosi

1. **Bellini-Tosi antenna** : → *antenna 21*

belt

1. **belt conveyor furnace** : → *furnace 5*
2. **belt insulation** : → *insulation 4*

belted

1. **belted cable** : → *cable 3*

bench

1. **electronic animation bench** (*Syn.* rostrum television camera) : sliding bench containing a television camera and a device for supporting objects or documents which are to be televised and which allows them to be moved relative to each other. ★ banc de prise de vue → *banc 4.* R ..... (723)

bend

1. **E bend** (*Syn.* E-plane bend) : → *bend 2*
2. **E-plane bend** (*Syn.* E bend) : a waveguide bend in which the longitudinal axis of the guide remain in a plane parallel to the electric field vectors throughout the bend. ★ coude progressif E → *coude 10.* R изгиб в плоскости E; E - изгиб. D E-Krümmer. E curva plano E. I gomito progressivo E; gomito progressivo nel piano E. N E-vlakbocht. P zagięcie E. S E-krök. (726)
3. **H bend** (*Syn.* H-plane bend) : → *bend 4*
4. **H-plane bend** (*Syn.* H bend) : a waveguide bend in which the longitudinal axis of the guide remains in a plane parallel to the magnetic field vectors throughout the bend. ★ coude progressif H → *coude 11.* R изгиб в плоскости X; X - изгиб. D H-Krümmer. E curva plano H. I gomito progressivo H; gomito progressivo nel piano H. N H-vlakbocht. P zagięcie H. S H-krök. (726)
5. **waveguide bend** (*Syn.* elbow) : a section of waveguide in which the direction of the longitudinal axis changes gradually. *Note.* — The waveguide corner is sometimes referred to as a waveguide bend but this practice is deprecated. ★ coude progressif → *coude 9.* R волноводный изгиб; колено. D Hohlleiterkrümmer. E curva de guiaonda. I gomito progressivo (di guide d'onde). N golfgeleiderbocht. P zagięcie falowodowe. S vågledarkrök. (726)

bendable

1. **bendable waveguide** : → *waveguide 2*

bending

1. **bending wave** : → *wave 1*
2. **deflection under bending load** : → *deflection 10*

benzene

1. **polychlorinated benzenes** : an insulating liquid consisting of a mixture of several isomeric and homologous compounds, obtained by replacement of three or four atoms of hydrogen in the benzene molecule with chlorine atoms. ★ polychlorobenzènes → *polychlorobenzène 1.* R полихлорированные бензолы. D polychlorierte Benzole. E policlorobencenos. I policlorobenzeni. N gechloreerde benzenen. P benzeny polichlorowane. S polyklorerade bensener. (212)

BER

1. **BER** (*Syn.* bit error ratio) : → *ratio 11*

beryllium

1. **beryllium content meter** (γ, n) : → *content meter 1*
2. **beryllium prospecting meter** (γ, n) : → *meter 10*

beta

1. **beta back-scatter thickness meter** : → *back-scatter 5*
2. **beta disintegration** : → *disintegration 1*
3. **beta emitter** : → *emitter 2*
4. **beta particle** : → *particle 2*
5. **beta radiation** : → *radiation 7*
6. **beta ray spectrometer** : → *spectrometer 3*
7. **beta ray spectrum** : → *spectrum 4*

betatron

1. **betatron** : an electron accelerator in which the magnetic fields normal to the circular orbit of the electrons and within that orbit increase with time ; the field at the orbit maintains a stable orbit while the changing magnetic field inside the orbit accelerates the electrons in the orbit. ★ bêtatron → *bêtatron 1.* R бетатрон. D Betatron. E betatron. I betatrone. N bêtatron. P betatron. S betatron. (881)

Bethe

1. **Bethe hole coupler** : → *coupler 3*

Beverage

1. **Beverage antenna** : → *antenna 22*

Bezold-Brücke

1. **Bezold-Brücke phenomenon** : → *phenomenon 2*

bias

1. **bias distortion** : → *distortion 9*
2. **bias electrical restraint** : → *restraint 1*
3. **bias winding** : → *winding 7*
4. **degree of bias distortion** : → *degree 2*
5. **grid bias voltage** : → *voltage 76*
6. **grid bias voltage** : → *voltage 77*

bias-cut

1. **bias-cut fabric** : → *fabric 1*
2. **panel form bias-cut fabric** : → *fabric 4*
3. **seamless bias-cut fabric** : → *fabric 5*
4. **sewn bias-cut fabric** : → *fabric 6*
5. **stuck bias-cut fabric** : → *fabric 9*

biased

1. **biased direct current amplifier** : → *amplifier 3*
2. **biased pulse amplifier** : → *amplifier 4*
3. **biased relay** : → *relay 3*

biasing

1. **biasing** : the conditioning of the magnetic medium during recording by superimposition of a high frequency or direct magnetic field upon that produced by the wanted signal. *Note.* — In video recording, an alternating bias is used for recording audio signals. ★ polarisation magnétique → *polarisation 44.* R подмагничивание. D Vormagnetisierung. E polarización magnética. I polarizzazione magnetica. N voormagnetisatie. P podkład. S förmagnetisering. (806)
2. **biasing current** : → *current 11*

biconical

1. **biconical antenna** : → *antenna 23*

bid

1. **answer bid ratio** : → *ratio 5*
2. **bid** : an attempt to obtain the service of a pertinent resource. *Note.* — In network management, the absence of a qualification implies a bid to a circuit group, a route or a destination. ★ tentative de prise → *tentative 11.* D Belegungsversuch. P próba (uzyskania usługi). (715)

bidirectional

1. **bidirectional** : pertaining to a link where the transfer of users' information is possible simultaneously in both directions between two points. *Notes. 1* — The transmission channel capacity and signalling rate are not necessarily the same in both directions, *2* — This term should not be used to describe the directions of call set-up. ★ bilatéral → *bilatéral 1.* R двусторонний. D zweiseitig; beidseitig. E bilateral; bidireccional. I bidirezionale. N in twee richtingen. P (droga przesyłowa) obukierunkowa. S dubbelriktad. (701,704,714,715,721)
2. **bidirectional diode thyristor** : → *thyristor 1*
3. **bidirectional (electronic) valve** : → *valve 3*
4. **bidirectional transistor** : → *transistor 1*
5. **bidirectional triode thyristor** : → *thyristor 2*

bifilar

1. **bifilar winding** : → *winding 8*

bifurcated

1. **bifurcated contact** : → *contact 6*

bilateral

1. **bilateral control** : → *control 20*
2. **bilateral gearing** : → *gearing 1*
3. **bilateral transmission** : → *transmission 8*

billing
1. **billing error probability** : → *probability 1*

bimetallic
1. **bimetallic instrument** : → *instrument 1*

bin-and-feeder
1. **bin-and-feeder system boiler** : → *boiler 1*

binary
1. **binary digit** : → *digit 1*
2. **binary digit rate** : → *rate 4*
3. **binary (digital) signal** : → *signal 25*
4. **binary figure** : → *figure 1*
5. **binary hue** : → *hue 1*
6. **binary logic system** : → *system 17*
7. **binary rate** : → *rate 5*
8. **binary signal** : → *signal 26*
9. **binary state information** : → *information 2*
10. **binary-logic element** (*Syn.* binary-logic gate) : → *gate 1*
11. **binary-logic gate** : → *gate 1*
12. **equivalent binary content** : → *content 4*
13. **erroneous binary digit** : → *digit 15*
14. **PCM binary code** : → *code 43*
15. **symmetrical binary code** : → *code 49*

binder
1. **binder** : a resinous material which serves to bind the various component materials of a disk. ★ liant → *liant 1.* R связующее. D Bindemittel. E aglomerante. I legante. N bindmiddel. P lepiszcze. S bindemedel. (806)
2. **spiral binder tape** : → *tape 13*

binding
1. **binding band** : → *band 7*
2. **binding energy** : → *energy 7*

binomial
1. **binomial corner** : → *corner 1*
2. **binomial twist** : → *twist 1*

biological
1. **biological half-life** : → *half-life 1*
2. **biological rhythm** : → *rhythm 1*
3. **biological shield** : → *shield 2*
4. **relative biological effectiveness (of radiation)** : → *effectiveness 2*

biologically
1. **(biologically) equivalent single dose** : → *dose 8*

biology
1. **radiation biology** : the branche of biology which deals with the effects of radiation on living organisms. ★ radiobiologie → *radiobiologie 1.* R радиационная биология. D Strahlenbiologie. E radiobiología. I radiobiologia. N stralingsbiologie. P radiobiologia. S strålningsbiologi; radiobiologi. (881)

bioluminescence
1. **bioluminescence** : chemiluminescence occurring in living organisms. ★ bioluminescence → *bioluminescence 1.* R биолюминесценция. D Biolumineszenz. E bioluminiscencia. I bioluminescenza. N bioluminescentie. P bioluminescencja. S bioluminiscens. (845)

biophysics
1. **biophysics** : the science of physical phenomena and processes in living organisms. ★ biophysique → *biophysique 1.* R биофозика. D Biophysik. E biofísica. I biofisica. N biofysica. P biofizyka. S biofysik. (881)

biphase
1. **biphase compensation** : → *compensation 2*

biphenyl
1. **polychlorinated biphenyls** (*Syn.* PCB (abbreviation)) : an insulating liquid consisting of a mixture of several isomeric and homologous compounds, obtained by replacement of at least two atoms of hydrogen in the biphenyl molecule with chlorine atoms. ★ polychlorobiphényles → *polychlorobiphényle 1.* R полихлорированные дифенилы. D polychlorierte Biphenyle; PCB (Abkürzung). E policlorobifenilos; PCB (abreviatura). I policlorobifenili; PCB (abbreviazione). N gechloreerde bifenylen; polychloorbifenylen; PCB's. P dwufenyle polichlorowane. S polyklorerade bifenyler. (212)

bipolar
1. **bipolar code** (*Syn.* alternate mark inversion code) : → *code 2*
2. **bipolar d.c. link** : → *link 3*
3. **bipolar junction transistor** : → *transistor 2*
4. **bipolar line** : → *line 7*
5. **bipolar signal** (*Syn.* alternate mark inversion signal) : → *signal 10*
6. **bipolar violation** (*Syn.* alternate mark inversion violation) : → *violation 1*

bipole
1. **antisymmetric frequency of a monolithic bipole vibrator** : → *frequency 9*
2. **monolithic bipole vibrator** : → *vibrator 3*
3. **symmetric frequency of a monolithic bipole vibrator** : → *frequency 186*

birdies
1. **birdies** (in telecommunications) (*Syn.* whistling) : audible noise generated within an equipment or transmission channel by parasitic oscillations or by phase interference between internal oscillations, the wanted signal and unwanted signals. ★ sifflement → *sifflement 1.* R свист (в электросвязи). D Zwitschern (in der Telekommunikation); Pfeifen. E silbido (en telecomunicación). I fischio. N fluiten. P syczenie. S vissling. (702)

birefringence
1. **birefringence** : for an anisotropic medium characterized by two refractive indices in the same direction the existence of different velocities of propagation for different, orthogonal polarizations. ★ biréfringence → *biréfringence 1.* R двойное лучепреломление. D Doppelbrechung. E birrefrigencia (doble refracción). I birifrangenza. N dubbele breking. P dwójłomność. S dubbelbrytning. (731)

birefringent
1. **birefringent medium** : → *medium 4*

biscuit
1. **biscuit** : a small slab of plastic material for use in the compression moulding of disks. ★ biscuit → *biscuit 1.* R таблетка. D Masseklоß. E galleta. I pastiglia. N broodje. P kęs; gąska. S kaka. (806)

bisector
1. **bisector** : synchronous time-division multiplex equipment permitting the transmission of character signals corresponding to two start-stop transmissions of the same nominal modulation rate on a transmission channel for this same modulation rate so that the actual character transfer rate is thereby doubled. ★ bisecteur → *bisecteur 1.* R бисектор. D Kanalhalbierer. E bisector. I multiplex bisettore. N bisector. P bisektor. S ..... (721)

bistable
1. **bistable circuit** (*Syn.* bistable trigger circuit) : → *circuit 11*
2. **bistable latch** (*Syn.* bistable trigger circuit) : → *circuit 11*
3. **bistable relay** : → *relay 4*
4. **bistable trigger circuit** : → *circuit 11*

bistatic
1. **(ionospheric) bistatic sounding** : → *sounding 4*

bit
1. **bit** (*Syn.* binary digit) : → *digit 1*
2. **bit energy to noise spectral density ratio** : → *ratio 10*

3. **bit error** : → *error 6*
4. **bit error probability** : → *probability 2*
5. **bit error rate** : → *error 8*
6. **bit error ratio** : → *ratio 11*
7. **bit rate** (*Syn.* binary digit rate) : → *rate 4*
8. **bit sequence independence** : → *independence 1*
9. **bit stealing** (*Syn.* speech digit signalling) : → *signalling 58*
10. **check bit** : any binary element associated with a character signal or a block signal for the purpose of checking the absence of error within the character or block. ★ élément de contrôle → *élément 29.* R контрольный бит. D Prüfbit. E elemento de control; bit de control. I bit di controllo. N controlebit. P bit zabezpieczający. S servicebit. (721)
11. **equivalent bit rate** : → *rate 30*
12. **information bit** : a binary element which is part of the representation of a character or a block according to a specified code. ★ bit d'information → *bit 3.* R информационный бит. D Informationsbit. E bit de información. I bit informativo. N informatiebit. P bit informacyjny. S informationsbit. (721)
13. **ISO 7 bits code** (*Syn.* International Alphabet No.5) : → *alphabet 1*
14. **multiplex aggregate bit rate** : → *rate 58*
15. **quasi bit sequence independence** : → *independence 3*
16. **synchronization bit** : a binary digit which is used for synchronization of characters or blocks. ★ élément de synchronisation → *élément 49.* R бит синхронизации. D Synchronisationsbit. E elemento de sincronización. I bit di sincronizzazione. N synchronisatiebit. P bit synchronizacyjny. S synkroniseringsbit. (721)
17. **4-bit byte** (*Syn.* quartet (byte)) : → *byte 4*
18. **5-bit byte** (*Syn.* quintet (byte)) : → *byte 5*
19. **6-bit byte** (*Syn.* sextet (byte)) : → *byte 7*
20. **7-bit byte** (*Syn.* septet (byte)) : → *byte 6*
21. **8-bit byte** (*Syn.* byte) : → *byte 1*

bit-interleaved

1. **bit-interleaved telegraphy** : → *telegraphy 3*

bit-rate

1. **bit-rate reduction** : → *reduction 1*

black

1. **black and white facsimile** (*Syn.* document facsimile) : → *facsimile 2*
2. **black and white television** : → *television 1*
3. **black band** : → *band 8*
4. **black commutation** : → *commutation 2*
5. **black crushing** : → *crushing 1*
6. **black halo** : → *halo 1*
7. **black level** : → *level 8*
8. **black level shift** : → *shift 5*
9. **black light lamp** : → *lamp 4*
10. **black out** (*Syn.* fade-out) : → *fade-out 1*
11. **blacker than black** : zone where the level of a complete video signal is beyond the black level, outside the normal black and white range of levels. ★ infranoir → *infranoir 1.* R чернее черного. (723)
12. **noisy blacks** : non-uniformity in the black area of a picture reproduced by facsimile due to changes of signal levels caused by noise. ★ noir perturbé → *noir 18.* R помехи черного. D gestörtes Schwarz. E negro perturbado; negro ruidoso. I nero disturbato. N zwarten met ruis. P niejednolitość tonowania. S ojämn svärtning. (721)
13. **nominal black** : the value, such as level or frequency, of the signal corresponding to the darkest black that can be transmitted by a particular facsimile transmitter. ★ noir nominal → *noir 17.* R номинальный уровень черного. D Nominal-Schwarz. E negro nominal. I nero nominale. N nominaal zwart. P czerń odniesienia. S nominellt svart. (721)
14. **phasing on black** : phasing ensured by a phasing signal corresponding to nominal black in which a short interruption corresponding to nominal white is transmitted during the lost time. ★ mise en phase sur noir → *mise 12.* R фазирование по черному. D Einphasen auf Schwarz. E puesta en fase sobre negro. I messa in fase sul nero. N ..... P fazowanie czerni. S fasning på svart. (721)
15. **picture black** : the value, such as level or frequency, of the signal corresponding to the darkest part of the document to be transmitted by facsimile. ★ noir de l'image → *noir 16.* R уровень черного в изображении. D Bildschwarz. E negro de imagen. I nero d'immagine. N beeldzwart. P czerń obrazu. S bildsvart. (721)

black-and-white

1. **black-and-white picture tube** : → *tube 10*

black-band

1. **black-band test** : → *test 7*

blackbody

1. **black body** (*Syn.* complete radiator) : → *radiator 1*
2. **blackbody** (*Syn.* complete radiator) : → *radiator 1*
3. **blackbody** (*Syn.* Planckian radiator) : → *radiator 5*

black-level

1. **black-level clamping** : → *clamping 1*

blade

1. **blade contact** : → *contact 7*

blank

1. **blank** : a metal disk covered with lacquer used for reproduction of the original recording. ★ laque vierge → *laque 5.* R ..... D unbespielte Lackfolie. E disco no grabado. I lacca vergine. N lakplaat. P ..... S ograverad lackskiva. (806)
2. **blank groove** (*Syn.* plain groove) : → *groove 24*
3. **blank magnetic tape** : → *tape 2*

blanket

1. **blanket** : a region of fertile material placed around or within the core of a reactor for the purpose of conversion. By extension, the term "blanket" may be used when the purpose is transformation of non-fertile material. ★ couche fertile → *couche 22.* D Brutzone. E capa fértil; manto. I mantello. N mantel; kweekzone. P płaszcz. S mantel. (026)

blanketing

1. **blanketing frequency** : → *frequency 14*

blanking

1. **blanking** : the suppression of the signals conveying picture information during certain parts of the scanning period, for example, during fly-back. ★ suppression → *suppression 10.* R гашение. (723)
2. **blanking interval** : → *interval 1*
3. **blanking level** : → *level 10*
4. **blanking level discontinuity** : → *discontinuity 1*
5. **blanking period** (*Syn.* blanking interval) : → *interval 1*
6. **blanking signal** : → *signal 28*
7. **field blanking teletext** : → *teletext 1*

bleeding

1. **condensing steam turbine with bleeding** : → *turbine 2*

blemish

1. **blemish** : a localized imperfection of the storage assembly, that causes unwanted output information. ★ défectuosité → *défectuosité 1.* R дефект фона. D Störfleck. E defecto. I difetto. N spikkel. P skaza. S störfläck. (531)
2. **blemish** : a fault in which some parts of the sensitive surface of the picture signal sensor or display appear brighter or darker than the others, manifesting itself as dark or bright spots on the reproduced picture. ★ tache → *tache 6.* R пятнистость. (723)
3. **picture blemish** : a localized imperfection in a tube that causes spurious output information. ★ défectuosité d'image → *défectuosité 2.* R дефект изображения. D Störfleck. E defecto de imagen. I difetto di immagine. N beeldspikkel. P skażenie obrazu. S ljusfläckning. (531)

blended

1. **blended braking** : → *braking 1*
2. **blended lamp** : → *lamp 5*

Bloch

1. **Bloch wall** : → *wall 2*

block

1. **block** (in common channel signalling) : in a synchronous signalling system a group of signal units, containing a fixed number of signal units, transmitted and received as a composite entity. ★ bloc → *bloc 1.* R блок (в сигнализации по общему каналу). D Block. E bloque (en señalización por canal común). I blocco di unità di segnalazione (nella segnalazione a canale comune). N blok. P blok jednostek sygnału. S block. (714)
2. **block** : a sequence of digits or characters formed for technical or logic reasons to be processed as an entity. ★ bloc → *bloc 2.* R блок. D Block. E bloque. I blocco. N blok. P blok. S block. (721)
3. **block** : group of houses served by a cabled distribution sub-system. ★ îlot → *îlot 1.* R блок. (723)
4. **block check** : → *check 1*
5. **block check** : → *check 2*
6. **block diagram** : → *diagram 1*
7. **block error probability** : → *probability 3*
8. **block error rate** : → *rate 8*
9. **block error ratio** : → *ratio 12*
10. **block foundation** : → *foundation 1*
11. **block mica** : → *mica 1*
12. **block signal** : → *signal 29*
13. **block tariff** : → *tariff 2*
14. **digital block** : the combination of an appropriate digital link and digital multiplex equipments at its end. *Note.* — A digital block is qualified by the digit rate or the multiplex order of the digital link. ★ bloc numérique → *bloc 11.* R цифровой блок. D Digitalblock. E bloque numérico. I blocco numerico. N digitaal blok. P zestrój cyfrowy; blok cyfrowy. S digitalt block. (704)
15. **erroneous block** : a block in which there are one or more erroneous digits. ★ bloc erroné → *bloc 10.* R ошибочный блок. D fehlerhafter Block. E bloque erróneo. I blocco errato. N foutblok. P blok błędny. S felblock. (721)
16. **functional block** : representation of an assembly of functionally interrelated elements by means of a graphical envelope symbol associated with the functional relationships which exist between the input and output signals. ★ symbole fonctionnel → *symbole 3.* R функциональный блок. D Block. E símbolo funcional. I blocco. N functieblok. P człon funkcjonalny; blok. S funktionsblock. (351)
17. **reliability block diagram** : → *diagram 16*
18. **resistor block** : an assembly of a number of resistor cases or frames. ★ bloc de résistance → *bloc 6.* R блок резисторов. D Widerstandsgerät. E bloque de resistencia. I reostato. N weerstandsblok. P blok rezystorowy. S motståndsgrupp. (811)
19. **terminal block** : an assembly of terminals in a housing or body of insulating material to facilitate interconnection between multiple conductors. ★ répartiteur → *répartiteur 1.* R колодка монтажная. D Verteiler. E bloqueo de terminales; repartidor. I blocco (terminale) d'uscita; ripartitore. N aansluitblok. P łączówka. S uttagsplint. (581)

blockage

1. **aperture blockage** : the effect of antenna parts lying in the path of rays arriving at or departing from a radiating element or the aperture of an antenna. *Note.* — For example, the feed, sub-reflector, or support structure may produce aperture blockage for a reflector antenna. ★ effet de masque → *effet 27.* R затенение раскрыва. D Aperturabschattung. E obstrucción de apertura. I bloccaggio dell'apertura. N apertuurafscherming. P blokada apertury. S aperturblockering. (712)

blocked

1. **blocked** (*Syn.* busied out) : → *busied 1*
2. **blocked** (*Syn.* busied out) : → *busied 2*
3. **blocked call attempt** : → *call 2*
4. **blocked impedance** : → *impedance 5*
5. **blocked mechanical system** : → *mechanical system 2*
6. **blocked traffic** : → *traffic 4*

blocker

1. **transmitter blocker cell** (*Syn.* T-B cell) : → *cell 36*

blocking

1. **aperture blocking factor** : → *factor 11*
2. **blocking** (*Syn.* congestion) : the state of a pool of resources in which a bid cannot result in an immediate seizure. *Note.* — Blocking does not necessarily result in the loss of the call attempt if the call can be established after a certain delay or by using alternative resources. ★ encombrement → *encombrement 1.* D Blockierung. P natłok; blokada. (715)
3. **blocking capacitor** : → *capacitor 2*
4. **blocking overreach distance protection system** : → *system 18*
5. **blocking period** : → *period 3*
6. **blocking protection system** : → *system 19*
7. **blocking signal** : → *signal 30*
8. **blocking tube** : → *tube 11*
9. **circuit reverse blocking interval** : → *interval 3*
10. **external blocking** : the state of a multistage switching network with conjugated selection when a connection cannot be made between a given inlet and the desired pool of outlets because all these outlets are occupied. ★ blocage externe → *blocage 5.* D externe Blockierung. P blokada zewnętrzna. (715)
11. **forward blocking state** (*Syn.* off-state) : → *off-state 7*
12. **internal blocking** : the state of a multistage switching network when a connection cannot be made between a given inlet and at least one free outlet in the desired pool of outlets. ★ blocage interne → *blocage 6.* D interne Blockierung. P blokada wewnętrzna. (715)
13. **overcurrent blocking device** : → *device 39*
14. **reverse blocking diode thyristor** : → *thyristor 5*
15. **reverse blocking interval** : → *interval 16*
16. **reverse blocking state** : → *state 31*
17. **reverse blocking state** : → *state 32*
18. **reverse blocking triode thyristor** : → *thyristor 6*
19. **valve blocking** : an operation to prevent further firing of a controllable valve or arm by inhibiting the gate (grid) pulses. ★ blocage de valve → *blocage 3.* R блокирование вентиля. D Zündsperrung. E bloqueo de válvula. I blocco delle valvole. N ventielblokkering. P blokada zaworu. S tändpulsblockering. (551)

blood

1. **blood forming organs** : → *organ 1*

blooming

1. **blooming** : area of ultrawhite overload much larger than the original image, resulting from the saturation of a part of the target of the camera tube, image sensor or television screen. ★ éclat → *éclat 1.* R засветление. (723)

blower

1. **blower** (*Syn.* fan) : a machine designed to increase the pressure or kinetic energy of cooling air for a motor, transformer, etc. ★ ventilateur → *ventilateur 4.* R вентилятор. D Lüfter. E ventilador. I ventilatore. N ventilator. P wentylator; dmuchawa. S fläkt. (811)

blow-hole

1. **blow-hole** (*Syn.* unfill) : → *unfill 1*

blow-out

1. **blow-out coil** : → *coil 2*

blueing

1. **blueing** : an operation performed in a medium and at a suitable temperature to cover the clean ferrous surface with a uniform blue oxide film. ★ bleuissage → *bleuissage 1.* R воронение. D Bläuen. E azulado. I ossidazione blu. N blauwen. P wyżarzanie z niebieskim nalotem. S blåanlöpning. (841)

board

1. **board** (*Syn.* paper board) : a generic term applied to certain types of paper frequently characterized by their relatively high rigidity. *Note.* — For some purposes, materials of grammage (basis weight) less than 225 g/m^2 are considered to be paper, and materials of grammage of 225 g/m^2 or above are considered to be board. ★ carton → *carton 1.* R картон. D Pappe; Papierpappe. E cartón. I cartone. N karton. P karton. S papp. (212)

2. **control board** : a board on which are fixed control devices which are necessary to control and/or display a substation or a system. ★ tableau de conduite → *tableau 1.* R пульт управления. D Steuertafel. E cuadro de control. I quadro di comando. N bedieningsbord. P tablica sterownicza. S kontrolltavla. (605)
3. **double-sided printed board** : printed board with conductive patterns on both sides. ★ carte imprimée double face → *carte 5.* R двусторонняя печатная плата. D Leiterplatte mit Leiterbildern auf beiden Seiten. E tarjeta impresa doble cara. I piastra stampata biplaccata. N dubbelzijdig prentpaneel. P płytka drukowana dwustronna. S dubbelsidigt mönsterkort. (541)
4. **flexible double-sided printed board** : double-sided printed board using a flexible base material only. ★ carte imprimée souple double face → *carte 16.* R гибкая двусторонняя печатная плата. D flexible Leiterplatte mit Leiterbildern auf beiden Seiten. E tarjeta impresa flexible doble cara. I piastra stampata flessibile biplaccata. N flexibel dubbelzijdig prentpaneel. P płytka drukowana giętka dwustronna. S flexibelt dubbelsidigt mönsterkort. (541)
5. **flexible multilayer printed board** : multilayer printed board using a flexible base material only. *Note.* — Different areas of the flexible multilayer printed board may have different numbers of layers and different thicknesses and consequently different flexibility. ★ carte imprimée souple multicouche → *carte 17.* R гибкая многослойная печатная плата. D flexible Mehrlagenleiterplatte. E tarjeta impresa flexible multicapa. I piastra stampata flessibile multistrato. N flexibel meerlaags prentpaneel. P płytka drukowana giętka wielowarstwowa. S flexibelt flerlagerkort. (541)
6. **flexible printed board** : a printed board using a flexible base material only. *Note.* — It may be partially provided with electrically non-functional stiffeners and/or coverlayers. ★ carte imprimée souple → *carte 15.* R гибкая печатная плата. D flexible Leiterplatte. E tarjeta impresa flexible. I piastra stampata flessibile. N flexibel prentpaneel. P płytka drukowana giętka. S flexibelt mönsterkort. (541)
7. **flexible single-sided printed board** : single-sided printed board using a flexible base material only. ★ carte imprimée souple simple face → *carte 18.* R гибкая односторонняя печатная плата. D flexible Leiterplatte mit Leiterbild auf einer Seite. E tarjeta impresa flexible monocara. I piastra stampata monoplaccata. N flexibel enkelzijdig prentpaneel. P płytka drukowana giętka jednostronna. S flexibelt enkelsidigt mönsterkort. (541)
8. **flex-rigid double-sided printed board** : flex-rigid printed board with conductive patterns on two sides comprising one conductive pattern on the flexible base material and the other on the rigid base material. ★ carte imprimée flexorigide double face → *carte 8.* R гибко-жесткая двусторонняя печатная плата. D starr-flexible Leiterplatte mit Leiterbildern auf beiden Seiten. E tarjeta impresa flexible rígida de doble cara. I piastra stampata rigido-flessibile biplaccata. N star-flexibel dubbelzijdig prentpaneel. P płytka drukowana giętko-sztywna dwustronna. S ..... (541)
9. **flex-rigid multilayer printed board** : flex-rigid printed board where the area(s) of the flexible base materials and/or the area(s) of the combination of the flexible and the rigid materials bear more than two conductive layers forming a multilayer printed board. ★ carte imprimée flexorigide multicouche → *carte 9.* R гибко-жесткая многослойная печатная плата. D starr-flexible Mehrlagen-Leiterplatte. E tarjeta impresa flexible rígida multicapa. I piastra stampata rigido-flessibile multistrato. N star-flexibel meerlaags prentpaneel. P płytka drukowana giętko-sztywna wielowarstwowa. S ..... (541)
10. **flex-rigid printed board** : printed board using a flexible base material and a combination of flexible and rigid base materials in different areas. *Note.* — Both the flexible and the rigid base material bear conductive patterns which are normally interconnected in the combined area. ★ carte imprimée flexorigide → *carte 7.* R гибко-жесткая печатная плата. D starr-flexible Leiterplatte. E tarjeta impresa flexible rígida. I piastra stampata rigido-flessibile. N star-flexibel prentpaneel. P płytka drukowana giętko-sztywna. S ..... (541)
11. **jumper board** : a board consisting of terminals and connecting devices so arranged that they can be cross-connected in any desired manner. ★ répartiteur de filerie → *répartiteur 4.* R сборка зажимов. D Rangierverteiler. E panel de conexionado. I pannello di smistamento della cavetteria. N kruisverdeler. P krosownica. S korskopplingsskåp. (605)
12. **metal core printed board** : printed board using a metal core base material. ★ carte imprimée à âme métallique → *carte 4.* R печатная плата с металлической сердцевиной; печатная плата с металлическим слоем. D Metallkern-Leiterplatte. E tarjeta impresa con alma metálica. I piastra stampata con anima metallica. N prentpaneel met metalen kern. P płytka drukowana o rdzeniu metalowym. S metallkärnekort. (541)
13. **mother-daughter board (connector)** : → *connector 35*
14. **multilayer printed board** : a printed board consisting of alternate layers of conductive patterns and insulating materials with conductive patterns in more than two layers and with the conductive patterns interconnected as required. ★ carte imprimée multicouche → *carte 10.* R многослойная печатная плата. D Mehrlagen-Leiterplatte. E tarjeta impresa multicapa. I piastra stampata multistrato. N meerlaags prentpaneel. P płytka drukowana wielowarstwowa. S flerlager(mönster)kort. (541)
15. **paper board** (*Syn.* board) : → *board 1*
16. **printed board** : base material cut to size containing all required holes and bearing at least one conductive pattern. Printed boards are typically subdivided according to : - their structure (e.g., single- and double-sided, multilayers) - the nature of the base material (e.g., rigid, flexible). ★ carte imprimée → *carte 3.* R печатная плата. D Leiterplatte. E tarjeta impresa; placa impresa. I piastra stampata. N prentpaneel; printplaat. P płytka drukowana. S mönsterkort. (541)
17. **printed board connector** : → *connector 37*
18. **rigid double-sided printed board** : double-sided printed board using a rigid base material only. ★ carte imprimée double face rigide → *carte 6.* R жесткая двусторонняя печатная плата. D starre Leiterplatte mit Leiterbildern auf beiden Seiten. E tarjeta impresa rígida doble cara. I piastra stampata rigida biplaccata. N star dubbelzijdig prentpaneel. P płytka drukowana sztywna dwustronna. S styvt dubbelsidigt mönsterkort. (541)
19. **rigid multilayer printed board** : multilayer printed board using a rigid base material only. ★ carte imprimée multicouche rigide → *carte 11.* R жесткая многослойная печатная плата. D starre Mehrlagenleiterplatte. E tarjeta impresa rígida multicapa. I piastra stampata rigida multistrato. N star meerlaags prentpaneel. P płytka drukowana sztywna wielowarstwowa. S styvt flerlagerkort. (541)
20. **rigid printed board** : printed board using a rigid base material only. ★ carte imprimée rigide → *carte 12.* R жесткая печатная плата. D starre Leiterplatte. E tarjeta impresa rígida. I piastra stampata rigida. N star prentpaneel. P płytka drukowana sztywna. S styvt mönsterkort. (541)
21. **rigid single-sided printed board** : single-sided printed board using a rigid base material only. ★ carte imprimée simple face rigide → *carte 14.* R жесткая односторонняя печатная плата. D starre Leiterplatte mit Leiterbild auf einer Seite. E tarjeta impresa rígida monocara. I piastra stampata rigida monoplaccata. N star enkelzijdig prentpaneel. P płytka drukowana sztywna jednostronna. S styvt enkelsidigt mönsterkort. (541)
22. **single-sided printed board** : printed board with a conductive pattern on one side only. ★ carte imprimée simple face → *carte 13.* R односторонняя печатная плата. D Leiterplatte mit Leiterbild auf einer Seite. E tarjeta impresa monocara. I piastra stampata monoplaccata. N enkelzijdig prentpaneel. P płytka drukowana jednostronna. S enkelsidigt mönsterkort. (541)
23. **terminal board** : a board on which terminals are mounted. ★ plaques à bornes → *plaque 30.* R доска выводов. D Klemmenbrett. E placa de bornes. I piastra porta morsetti (basetta). N klemmenbord. P tabliczka zaciskowa. S uttagsplint. (411)

board-mounted

1. **board-mounted connector** : → *connector 1*

Bode

1. **Bode diagram** : → *diagram 2*

body

1. **body burden** : → *burden 1*
2. **body extension** : → *extension 1*
3. **body (of a suspension clamp)** : that part of the suspension clamp which supports the conductor. ★ corps de pince

→ *corps 3.* R лодочка поддерживающего зажима. D Klemmkörper (einer Tragklemme). E cuerpo. I corpo morsa. N schuitje (van een ophangklem). P tódłódka (uchwytu przelotowego). S linränna. (466)

4. **(body) radiocartograph** : → *radiocartograph 1*
5. **connector body** : → *connector 9*
6. **gray body** (*Syn.* grey body) : → *body 7*
7. **grey body** (*Syn.* gray body) : non-selective thermal radiator whose emissivity is less than 1. ★ corps gris → *corps 6.* R серое тело. D grauer Strahler; grauer Körper. E radiador gris. I corpo grigio. N grijze straler. P ciało szare. S grå kropp. (845)
8. **partial body dose** : → *dose 37*
9. **pole body** : → *pole 17*
10. **pole body insulation** : → *insulation 47*
11. **primary body** (in relation to a satellite) : the attracting body which primarily determines the motion of a satellite. ★ corps principal → *corps 10.* R центральное тело (по отношению к спутнику). D Zentralkörper (bezogen auf einen Satelliten). E cuerpo primario (para un satélite). I corpo principale (per un satellite). N primair lichaam. P ciało główne (w odniesieniu do satelity). S centralkropp; primärkropp. (725)
12. **smooth body conductor** : → *conductor 65*
13. **socket body** : → *socket 5*
14. **tower body** : the vertical portion of a tower (see fig. 3.2). ★ fût (d'un pylône) → *fût 3.* R ствол опоры. D Mastschaft. E fuste; cuerpo. I tronco (di un sostegno); fusto (di un sostegno). N mastlichaam. P trzon słupa. S stolpkropp. (466)
15. **whole body dose** : → *dose 44*

bogie

1. **bogie furnace** : → *furnace 6*
2. **bogie hearth furnace** : → *furnace 7*

bogie-mounted

1. **bogie-mounted motor** : → *motor 10*

Bohr

1. **Bohr atom** : → *atom 2*
2. **Bohr magneton** : → *magneton 1*

boiler

1. **bin-and-feeder system boiler** : a coal-fired boiler for which the milled coal is stored before being introduced into the furnace. ★ chaudière à chauffe indirecte → *chaudière 3.* R котел с промежуточным бункером. D Dampferzeuger für indirekte Feuerung. E caldera de quemado indirecto. I caldaia a riscaldamento indiretto. N ketel met indirecte verbranding. P kocioł pyłowy o bunkrowaniu pośrednim. S kolpulvereldad panna med centralmalningsanläggning. (602)
2. **boiler** : an installation whose function is to vaporise water under pressure, to superheat - and, in some cases, reheat - the steam. ★ chaudière → *chaudière 1.* R паровой котел. D Dampferzeuger. E caldera; generador de vapor. I caldaia. N ketel. P kocioł. S ångpanna. (602)
3. **controlled circulation boiler** : a natural circulation type boiler in which the velocity of water circulation is increased by a pump. ★ chaudière à circulation contrôlée → *chaudière 4.* R котел с принудительной циркуляцией. D Dampferzeuger mit gesteuerter Zirkulation. E caldera de circulación controlada. I caldaia a circolazione forzata. N ketel met gedwongen circulatie. P kocioł z kontrolowanym obiegiem wody. S dompanna med pumpcirkulation. (602)
4. **directly-fired boiler** : a pulverised coal boiler in which the milled coal is immediately introduced into the furnace. ★ chaudière à chauffe directe → *chaudière 2.* R котел с непосредственным сжиганием пыли. D Dampferzeuger für direkte Feuerung. E caldera de quemado directo. I caldaia a riscaldamento diretto. N ketel met directe verbranding. P kocioł pyłowy o zasilaniu bezpośrednim. S kolpulvereldad panna med kolkvarnar. (602)
5. **fluidised-bed boiler** : a boiler in which the milled local is maintained in suspension by a rising current of air during combustion. ★ chaudière à lits fluidisés → *chaudière 10.* R котел с топкой кипящего слоя. D Dampferzeuger für Wirbelschichtfeuerung. E caldera de lecho fluidificado. I caldaia a tetto fluido. N wervelbedketel. P kocioł o złożu fluidalnym. S svävbäddpanna. (602)
6. **gaseous fuel boiler** : a boiler designed for the type of fuel to be consumed. ★ chaudière à combustible gazeux → *chaudière 7.* R котел для газообразного топлива. D Dampferzeuger mit Gasfeuerung. E caldera de combustible gaseoso; caldera de gas. I caldaia a combustibile gassoso. N ketel voor gasvormige brandstof. P kocioł na paliwo gazowe. S gaseldad panna. (602)
7. **liquid fuel boiler** : a boiler designed for the type of fuel to be consumed. ★ chaudière à combustible liquide → *chaudière 8.* R котел для жидкого топлива. D Dampferzeuger mit Ölfeuerung. E caldera de combustible líquido; caldera de fuel-oil. I caldaia a combustibile liquido. N ketel voor vloeibare brandstof. P kocioł na paliwo płynne. S oljeeldad panna. (602)
8. **natural circulation boiler** : a boiler in which circulation is created by convection and in which a drum separates the water phase from the steam phase. ★ chaudière à circulation naturelle → *chaudière 6.* R котел с естественной циркуляцией. D Dampferzeuger mit natürlicher Zirkulation. E caldera de circulación natural. I caldaia a circolazione naturale. N ketel met natuurlijke circulatie. P kocioł z naturalnym obiegiem wody. S dompanna med självcirkulation. (602)
9. **once-through boiler** : an open-circuit boiler in which water delivered by a pump is evaporated and superheated in the same tube. ★ chaudière à circulation forcée → *chaudière 5.* R прямоточный котел. D Dampferzeuger mit erzwungener Zirkulation. E caldera de circulación forzada; caldera monotubular. I caldaia a circolazione monotubolare. N doorpompketel. P kocioł przepływowy. S genomströmningspanna. (602)
10. **pulverised fuel boiler** : a boiler designed for the type of fuel to be consumed. ★ chaudière à combustible pulvérisé → *chaudière 9.* R котел для пылевидного топлива. D Dampferzeuger mit Kohlestaubfeuerung. E caldera de combustible pulverizado; caldera de carbón. I caldaia a combustibile polverizzato. N ketel voor poedervormige brandstof. P kocioł pyłowy. S kolpulvereldad panna. (602)

bollard

1. **(traffic) bollard** : post used to indicate an obstruction or to regulate traffic. It may be internally illuminated and may incorporate a regulatory traffic sign. ★ borne (de circulation) → *borne 10.* R световая тумба. D Verkehrsbake; Verkehrssäule. E hito luminoso. I colonnina luminosa. N verkeerszuil. P pachołek. S ..... (845)

bolometer

1. **bolometer** : a device for measuring power which contains a power-absorbing element in which the resistance change related to the temperature coefficient of resistivity is used as a means of measuring the power. *Note.* — The absorbing element may be a barretter with a positive temperature coefficient, a thermistor with a negative temperature coefficient, or other similar device. ★ bolomètre → *bolomètre 1.* R болометр. D Bolometer. E bolómetro. I bolometro. N bolometer. P bolometr. S bolometer. (726,845)
2. **bolometer mount** : → *mount 2*

bolometric

1. **bolometric power meter** : → *meter 12*

Boltzmann

1. **Boltzmann relation** : → *relation 1*

bolus

1. **bolus** : material usually having approximately the density and effective atomic number of tissue, used in radiotherapy to fill up void spaces, thus delineating the irradiated volume as a simple geometric form ; or, placed upon the entry surface of the subject, to bring the point of maximum dose to that surface. ★ bolus → *bolus 1.* R болюсный материал. D Moulage. E bolus. I bolo. N bolus. P materiał wypełniający równoważny tkance. S bolus. (881)

bond

1. **pin type bond** : an electrical connection whose two ends are attached by friction to the ends of the rails at a joint. ★ connexion goupillée → *connexion 25.* R соединитель штепсельного типа. D eingepreßter Schienenverbinder. E conexión acuñada. I connessione a perno. N geperste railverbinder. P łącznik kołkowy. S pluggad rälförbindning. (811)

2. **rail joint bond** : a conductor ensuring the electrical continuity of rails at a joint. ★ connexion électrique de rails → *connexion 15.* R стыковое межрельсовое соединение. D Schienenverbinder. E conexión eléctrica de railes. I connessione (elettrica) di rotaia. N retourstroomverbinding; elektrische railverbinder. P łącznik szynowy podłużny. S rälförbindning. (811)
3. **solid bond** : an inter-shield bond of minimum practicable impedance. ★ connexion directe → *connexion 14.* R глухое соединение. D feste Schirmverbindung. E conexio'n directo. I connessione diretta. N star verbonden. P połączenie żył powrotnych (powłok metalowych) na całej długosci na minimum impedancji. S ..... (461)
4. **welded bond** : an electrical connection whose two ends are welded to the ends of the rails at a joint. ★ connexion soudée → *connexion 35.* R сварное соединение. D geschweißter Schienenverbinder. E conexión soldada. I connessione saldata. N gelaste langsverbinding; gelaste railverbinder. P łącznik szynowy przyspawany. S svetsad rälförbindning. (811)

bondable

1. **heat bondable mica material** : → *material 17*

bonded

1. **bonded rail joint** (*Syn.* electrical rail joint) : → *joint 8*
2. **solidly bonded single-core cable system** : → *system 190*

bonding

1. **equipotential bonding** : electrical connection putting various exposed conductive parts and extraneous conductive parts at a substantially equal potential. ★ liaison équipotentielle → *liaison 20.* R выравнивание потенциалов. D Potentialausgleich. E conexión equipotencial. I collegamento equipotenziale. N potentiaalvereffening. P połączenie wyrównawcze. S potentialutjämning. (826)
2. **equipotential bonding conductor** : → *conductor 34*
3. **shield bonding lead** : → *lead 14*
4. **single-point bonding** : a form of special bonding in which the three cable shields of an elementary section are solidly bonded together and earthed at one point only. ★ mise à la terre en un seul point → *mise à la terre 9.* R соединение в одной точке. D Einpunktverbindung. E puesta a tierra en un solo punto. I connessione (a terra) in un unico punto. N eenzijdige aarding. P połączenie żył powrotnych na jednym końcu linii. S öppna skärmar. (461)
5. **special bonding of shields** : methods of bonding and earthing the shields of single-core cables so as to minimize the longitudinal shield current induced by conductor currents. ★ connexions spéciales d'écrans → *connexion 39.* R специальное соединение экранов. D Spezial-Schirmverbindung. E conexiones especiales de pantallas. I connessione speciale degli schermi. N ..... P łączenie żył poworotnych na minimum prądu. S ..... (461)

bone-conduction

1. **bone conduction** : the transmission of sound to the internal ear mediated by mechanical vibration of the cranial bones and soft tissues. ★ conduction osseuse → *conduction 9.* R костная проводимость. D Knochenleitung. E conducción ósea. I conduzione per via ossea. N beengeleiding. P przewodzenie kostne. S benledning (av ljud till innerörat). (801)
2. **bone-conduction microphone** : → *microphone 2*
3. **bone-conduction vibrator** : → *vibrator 2*

booked

1. **booked call** : → *call 3*

boom

1. **boom** (*Syn.* trolley-pole) : → *trolley-pole 1*
2. **boom handler** : → *handler 1*

boost

1. **boost and buck connection** : → *connection 7*
2. **boost charge** : → *charge 2*
3. **boost charge** : → *charge 3*

booster

1. **booster** : a machine connected in a circuit so that its voltage either adds to or subtracts from the voltage furnished by another source. ★ survolteur-dévolteur → *survolteur-dévolteur 2.* R вольтодобавочная машина. D Zusatzmaschine (Booster). E adicionador (Substractor). I survoltore (devoltore). N opjager resp. neerjager. P maszyna dodawcza. S tillsatsmaskin. (411)
2. **booster transformer** : → *transformer 12*
3. **booster transformer** : → *transformer 13*
4. **voltage booster** : a range extender for increasing the voltage supplied by the central battery. ★ suralimentateur → *suralimentateur 1.* R усилитель напряжения. D Zusatzspeisung. E sobrealimentador. I sovralimentatore. N ..... P zasilacz dodatkowy. S spänningsöverdrag. (722)

boot

1. **boot** : an accessory usually of a flexible material, designed to be placed around the terminations of a component as a protective housing. ★ tétine → *tétine 1.* R трубка изоляционная. D Muffe. E tetón. I guaina di protezione. N beschermkous. P nasuwka ochronna; koszulka. S skyddshylsa. (581)

booth

1. **public telex booth** : telex terminal available to the public, possibly assisted by operators. ★ poste public télex → *poste 51.* R телексная установка общего пользования. D öffentliche Telexstelle. E cabina pública de télex. I posto telex pubblico. N openbare telexcel. P kabina telegraficzna publiczna. S publik telexterminal. (721)
2. **telephone booth** : a small cabin containing a telephone station and providing a certain measure of acoustic insulation and privacy for the user. ★ cabine téléphonique → *cabine 5.* R телефонная будка. D Fernsprechzelle; Telefonhäuschen. E cabina telefónica. I cabina telefonica. N telefooncel. P kabina telefoniczna. S telefonhytt. (722)

border

1. **border effect** : → *effect 6*

bored

1. **bored pile** (*Syn.* augered pile) : → *pile 1*

bore-hole

1. **bore-hole lead insulation** (*Syn.* up-shaft insulation) : → *insulation 57*
2. **radiometric bore-hole logging assembly** : → *logging 1*

boresight

1. **boresight error** : → *error 13*
2. **electrical boresight** (of an antenna) : the axis of an antenna determined by its radiation properties, for example, the null direction of a conical scanning or monopulse antenna system or the beam axis of a highly directional antenna. ★ axe radioélectrique → *axe 12.* R электрическое осевое направление (антенны). D elektrische Hauptstrahlrichtung (einer Antenne). E eje radioeléctrico (de una antena). I direzione di puntamento. N elektrische as (van een antenne). P ukierunkowanie elektryczne (anteny). S elektrisk axel. (712)
3. **reference boresight** (of an antenna) : an axis of an antenna established as a reference for alignment of its electrical boresight. ★ axe de référence → *axe 4.* R опорное направление (антенны). D Bezugs-Hauptstrahlrichtung (einer Antenne). E eje de referencia (de una antena). I direzione di riferimento. N referentie-as (van een antenne). P ukierunkowanie odniesienia (anteny). S referensriktning. (712)

boron

1. **boron coated semiconductor detector** : → *semiconductor detector 2*
2. **boron trifluoride counter tube** : → *counter tube 2*
3. **boron trifluoride ionization chamber** : → *ionization chamber 2*

boron-lined

1. **boron-lined counter tube** : → *counter tube 3*
2. **boron-lined ionization chamber** : → *ionization chamber 3*

both-way

1. **both-way** (*Syn.* two-way) : pertaining to an operational mode in which the call set-up occur in both directions. *Notes 1* — The amount of traffic flowing is not necessarily the same in both directions. *2* — These terms should not be used to describe the

direction of transfer of users' information. ★ à double sens → *sens 1.* R двусторонний (по установлению соединения). D wechselseitig gerichtet. E de doble sentido. I (a due sensi). N dubbelgericht. P obukierunkowy (sposób działania). S tvåvägs-. (701,704,704,714,715,721)

2. **both-way circuit** : → *circuit 12*

bottom

1. **bottom radius** : → *radius 1*
2. **surface or bottom backscattering differential** : → *differential 37*
3. **surface or bottom scattering coefficient** : → *coefficient 67*
4. **surface or bottom scattering strength** (*Syn.* surface or bottom backscattering differential) : → *differential 37*

bottom-side

1. **bottom-side ionospheric sounding** : → *sounding 2*

bounce

1. **bounce** (for a contact circuit) : a phenomenon which may occur while a contact circuit is making or breaking and which is characterized by the contact tips successively touching and separating before reaching their final condition. ★ rebondissement → *rebondissement 1.* R дребезг (для цепи контакта). D Prellen (bei einem Kontaktkreis). E rebote (para un circuito de contacto). I rimbalzo (di un circuito di contatto). N kaatsen (van een contact); denderen (van een contact). P odskoki (styków). S kontaktstuds. (446)
2. **bounce time** : → *time 13*
3. **frame bounce** : jitter affecting a television picture in a vertical direction. ★ sautillement → *sautillement 1.* R вертикальное подергивание. (723)
4. **pantograph bounce** : loss of contact between the pantograph and contact wire. ★ décollement du pantographe → *décollement 2.* R отрыв пантографа от контактного провода. D Absprингen des Scheren- oder Einholmstromabnehmers. E salto de pantógrafo. I distacco del pantografo. N contactonderbreking van de pantograaf; springing. P odskok pantografu. S strömavtagarstuds. (811)

bouncing

1. **bouncing** : a vertical linear disturbing movement. ★ rebondissement → *rebondissement 2.* R вертикальные колебания. D senkrechte Bewegung. E oscilación vertical. I rimbalzo. N dansen. P drgania pionowe. S vertikal svängning. (811)
2. **bouncing busy hour** (*Syn.* peak busy hour) : → *hour 6*

bound

1. **bound connection** : → *connection 8*
2. **bound electron** : → *electron 2*
3. **bound mode** : → *mode 1*
4. **bound twin-post connection** : → *connection 9*

boundary

1. **extrapolated boundary** : a hypothetical surface outside an assembly on which the neutron flux density would be zero if extrapolated from the flux distribution neglecting the distribution within a few mean free paths of the physical surface. ★ limite extrapolée → *limite 24.* D extrapolierte Reaktorbegrenzung. E límite extrapolado. I superficie limite estrapolata. N geëxtraploeerde grens. P granica ekstrapolowana. S extrapolerad randyta. (026)
2. **PN boundary** : an interface in the transition region between P-type and N-type material at which the donor and acceptor concentrations are equal. ★ limite PN → *limite 26.* R граница P-N перехода. D PN-Grenzfläche. E límite PN. I limite PN. N PN-grenslaag. P obszar PN. S PN-gräns. (521)
3. **purple boundary** : the line in a chromaticity diagram, or the plane surface in a tristimulus space, that represents additive mixtures of monochromatic stimuli of wavelengths approximately 380 nm and 780 nm. ★ limite des pourpres → *limite 22.* R линия пурпурных цветностей; плоскость пурпурных цветов. D Purpurlinie; Purpurgerade. E límite púrpura. I retta (piano) degli stimoli porpora. N purperlijn. P granica purpur. S purpurgräns. (845)

bow

1. **bow** : in tramways, an overhead current collector hinged on an axis placed transversely to the track. ★ archet (2) → *archet 2.* R дуга. D Bügelstromabnehmer. E arco (2). I presa (di corrente) ad archetto. N sleepbeugel. P kabłąk. S kontaktbygel. (811)

bowl

1. **bowl** : diffuser, refractor or reflector in the form of a bowl, intended to be placed below the lamp. ★ vasque → *vasque 1.* R чаша. D Leuchtenschale. E copa. I calotta. N schaal. P czasza. S lampskål. (845)

box

1. **box frame** : → *frame 2*
2. **brush box** : → *brush 3*
3. **coin box set** : → *set 6*
4. **coin collection device** (*Syn.* coin box set) : → *set 6*
5. **dividing box** (*Syn.* splitter box) : a box fitted to a multicore cable to enable the individual cores to emerge as single-core cables without disturbing the core insulation. *Note.* — The term "dividing box" is usually applied to low voltage cables, whereas "splitter box" is applied to high voltage cables. ★ boîte de séparation → *boîte 8.* R разделительная муфта; разветвительная муфта. D Aufteilungskasten. E caja de separacio'n. I cassetta di separazione. N verdeelkast. P skrzynka (kablowa) rozgałęźna. S grenbox. (461)
6. **echo box** : in a radar, a calibrated cavity resonator which stores part of the transmitted pulse energy and gradually feeds this energy into the receiving system after completion of the pulse transmission. ★ boîte à écho → *boîte 2.* R эхо-резонатор. D Echobox. E caja de ecos. I scatola ad eco. N echotrilholte. P rezonator echa. S ekobox. (726)
7. **glove box** : a gas-tight enclosure, usually provided with a window, re-entrant gloves, controlled air supply, and an absorber of water vapour, designed for the manipulation of radioactive materials isolated from the surroundings. ★ boîte à gants → *boîte 3.* R «бокс перчаточный». D Handschuhkasten. E caja de guantes. I scatola a guanti. N handschoenkast. P komora rękawicowa. S handskbox. (881)
8. **junction box** (*Syn.* power divider) : → *divider 4*
9. **link box** (for insulated shield system) : a box in which bonding and/or earthing connections are made through removable links and which may also contain shield voltage limiters. ★ boîte de connexions → *boîte de connexions 2.* R соединительная коробка (для системы изолированных экранов). D Auskreuzkasten (für Kabelsysteme mit isolierten Schirmen). E caja de conexiones (para circuitos con pantallas aisladas). I cassetta di connessione (per sistemi a chermi isolati). N doorverbindingskast. P skrzynka złączona (kabli o osłonach izolowanych). S ..... (461)
10. **motor connection box** (*Syn.* terminal box) : a box, usually covered, mounted on the machine or separately and containing terminals which make the connections between the machine and the supply cables. ★ boîte à bornes → *boîte 1.* R коробка выводов. D Anschlußkasten; Klemmenkasten. E caja de bornes. I connettore. N aansluitkast. P skrzynka zaciskowa. S uttagslåda. (811)
11. **splitter box** (*Syn.* dividing box) : → *box 5*
12. **trifurcating box** (*Syn.* trifurcator) : a splitter box mounted on a three-core cable. ★ trifurcation → *trifurcation 1.* R тройниковая муфта; тройник. D Dreier-Aufteilungskasten. E trifurcacio'n. I scatola di triforcazione. N trifurcator. P głowica trójwylotowa. S treſas grenbox. (461)

BQ

1. **BQ cycle** : → *cycle 1*

brachytherapy

1. **brachytherapy** : radiotherapy in which one or more closed radioactive sources are utilized to deliver gamma radiation or beta radiation at a distance up to a few centimetres either by surface, intracavitary or interstitial application. ★ brachythérapie → *brachythérapie 1.* R брахитерапия. D Brachytherapie. E braquiterapia. I curieterapia. N branchetherapie. P terapia krótkodystansowa. S brackyterapi. (881)

bracing

1. **bracing system** : → *system 20*

2. **K bracing** (*Syn.* K panel) : a bracing system executed according to figure 2.4. ★ triangulation en K → *triangulation 3.* R полураскосная шпренгельная решетка. D K-Fachwerk. E celosía en "K". I traliccjatura a "K". N K-verband. P zakratowanie K. S K-fackverk. (466)
3. **main bracing** : a tower member illustrated by figure 3.22. ★ diagonale (d'un pylône) → *diagonale 1.* R раскос (1). D Hauptdiagonale. E diagonal (de una torre). I diagonale (di un sostegno); traliccio (di un sostegno). N diagonalen. P zakratowanie główne. S diagonal. (466)
4. **plan bracing** (*Syn.* diaphragm) : a set of structural members contained in the same horizontal plane (see fig. 3.21). ★ cadre → *cadre 3.* R диафрагма. D Querverband. E encuadramiento. I crociera. N horizontaal dwarsverband. P zakratowanie poziome; przepona. S horisontalförband. (466)
5. **redundant bracings** (*Syn.* secondary bracings) : tower members illustrated by figure 3.23. ★ treillis de contreflambage → *treillis 3.* R раскос (2). D Sekundärfachwerk. E barras de relleno. I rompitratta. N knikverkorters. P zakratowanie wtórne. S knäckavstyvning. (466)
6. **secondary bracings** (*Syn.* redundant bracings) : → *bracing 5*

bracket

1. **bearing bracket** (*Syn.* end bracket) : → *bracket 3*
2. **bracket** : a small fitting attached to the outside of a building, or to any other construction. ★ potelet → *potelet 1.* R кронштейн. D Befestigungsteile. E palomilla. I palina. N uithouder. P wysięgnik (wsporczy). S fäste. (466)
3. **end bracket** (UK) (*Syn.* bearing bracket (USA)) : a beam or bracket attached to the frame of a machine and intended to support a bearing. ★ console terminale → *console 8.* R консольная опора подшипника. D Lagerbrücke. E brazo de cojinete. I trave portante (Mensola). N lagerconsole. P wspornik łożyska. S armkors. (411)
4. **suspension bracket** : a term applied either to arms which carry the motor bearings if these are separate from the end shield, or to the mechanical parts linking the stator to fixing points on the suspension bearings, bogie frame or body. ★ bras de suspension → *bras 11.* R кронштейн подвески. D Motoraufhaengearm. E brazo de suspensión. I braccio di sospensione. N ophangarm. P wspornik wieszakowy. S upphängningskonsol. (811)
5. **swinging bracket** (*Syn.* dropper) : → *dropper 1*

Bragg-Gray

1. **Bragg-Gray cavity** : → *cavity 1*
2. **Bragg-Gray cavity ionization chamber** : → *ionization chamber 4*
3. **Bragg-Gray principle** : → *principle 1*

braid

1. **braid** : a covering formed from plaited metallic or non-metallic material. ★ tresse → *tresse 2.* R оплетка. D Umflechtung. E trenza. I treccia. N braid/omvlechting. P oplot. S fläta. (461)

brake

1. **anti-slip brake** : a means of controlling the slipping of a wheelset by a light application of the air brake or other brake. ★ frein antipatinage → *frein 11.* R противобуксовочное торможение. D Schleuderschutzbremse. E freno antipatinaje. I dispositivo antipattinaggio. N antisliprem. P hamulec przeciwpoślizgowy. S slirbroms. (811)
2. **arc furnace electrode mast brake** (*Syn.* arc furnace electrode mast snubber) : → *mast 3*
3. **automatic spot brake** : a braking system which brings a train or a vehicle to a standstill at a predetermined point, regardless of its initial speed and without the need for a driver to control the brake force. ★ freinage (automatique) d'arrêt au but → *freinage 12.* R автоматическое торможение в заданном месте. D automatische Zielbremsung. E frenado automático de parada. I frenatura (automatica) d'arresto a bersaglio. N automatische doelrem. P hamowanie (automatyczne) docelowe. S målbromsning. (811)
4. **brake control** : → *control 21*
5. **brake force** : → *force 4*
6. **brake light** : → *light 6*
7. **brake test** (*Syn.* braking test) : → *test 9*
8. **brake type** : → *type 3*
9. **(compressed) air brake** : a mechanical brake in which the friction members are actuated by compressed air and controlled by varying the air pressure. ★ frein à air (comprimé) → *frein 7.* R пневматический тормоз. D Druckluftbremse. E freno de aire comprimido. I freno pneumatico. N drukluchtrem. P hamulec powietrzny. S tryckluftsbroms. (811)
10. **dynamic brake exciter** : → *exciter 2*
11. **electrically controlled brake** : a braking system in which a friction brake is controlled purely by electrical means, e.g. a stalled motor compressing a spring to a degree governed by the motor current. ★ commande électrique du frein → *commande 71.* R электрическое управление тормозом. D elektrisch gesteuerte Bremse. E control eléctrico de frenado. I comando elettrico del freno. N elektrisch rembediening. P hamulec sterowany elektrycznie. S elmanövrerad broms. (811)
12. **electrically released spring brake** : a mechanical brake in which the actuating force is provided by a metallic spring, so arranged that the brake is released by the force of the spring being overcome by a device powered by electricity. ★ frein à accumulation d'énergie → *frein 6.* R пружинный тормоз с электрическим отпуском пружин. D elektrische Federspeicherbremse. E freno por acumulación de energía eléctrica. I freno ad accumulo (di energia). N (elektrisch) veerbelaste rem. P hamulec sprężynowy zwalniany elektrycznie. S elstyrd fjäderbroms. (811)
13. **electro-magnetic rail brake** (*Syn.* electro-magnetic track brake) : → *brake 14*
14. **electro-magnetic track brake** (*Syn.* electro-magnetic rail brake) : electro-magnetic friction braking in which the electro-magnets are applied directly to the rails. ★ freinage électromagnétique sur rail → *freinage 22.* R рельсовое электромагнитное торможение. D elektromagnetische Schienenbremse; elektromagnetische Zugbremse. E freno electromagnético en railes. I frenatura elettromagnetica a pattini. N railrem. P hamowanie elektromagnesowe doszynowe. S elektromagnetisk skenbroms. (811)
15. **electro-pneumatic brake circuit** : → *circuit 70*
16. **electro-pneumatic brake control** : → *control 96*
17. **electro-vacuum brake control** : → *control 97*
18. **emergency brake** : 1. A means of actuating the brakes on a train or vehicle as rapidly as possible, initiated by the driver or independently. 2. An alternative braking system for use in the event of failure of the normal sytem. ★ frein d'urgence → *frein 13.* R аварийный тормоз. D Notbremse. E freno de emergencia. I freno d'emergenza. N noodrem. P hamulec awaryjny. S nödbroms. (811)
19. **holding brake** : a method of operating the braking system to maintain an approximately uniform speed when descending long gradients. ★ freinage de maintien → *freinage 14.* R подтормаживание. D Beharrungsbremsung. E frenado de contención. I frenatura di mantenimento; frenatura di trattenuta. N aanhoudende remming. P hamowanie stabilizujące prędkość. S hållbromsning. (811)
20. **holding brake force** : → *force 19*
21. **net brake power (of an internal combustion engine)** (*Syn.* useful service output) : → *output 71*
22. **parking brake** : a brake provided to hold a vehicle stationary and which remains applied independent of any source of power on the vehicle. It may be operated, in application or release, electrically, hydraulically, by spring or by hand. ★ frein de stationnement → *frein 12.* R стояночный тормоз. D Festhaltebremse. E freno de estacionamiento. I freno di stazionamento. N parkeerrem. P hamulec postojowy. S parkeringsbroms. (811)
23. **power/brake changeover switch** : → *switch 35*
24. **retarding brake** : a method of operating the braking system to reduce speed without bringing the train to a standstill. ★ freinage de ralentissement → *freinage 15.* R торможение замедления. D Verzögerungsbremsung. E frenado de retardo. I frenatura di rallentamento. N remmen voor snelheidsvermindering. P podhamowanie. S inbromsning. (811)
25. **stopping brake** : a method of operating the braking system to bring a train completely to a standstill. ★ freinage d'arrêt → *freinage 13.* R остановочное торможение. D Anhaltebremsung. E frenado de detención. I frenatura

d'arresto. N (normale) remmen om te stoppen. P zahamowanie. S stoppbromsning. (811)

26. **vacuum brake** : a mechanical brake in which the friction members are actuated by a controlled variable vacuum acting against a relatively constant higher vacuum. ★ frein à vide → *frein 9.* R вакуумный тормоз. D Vakuumbremse. E freno de vacío. I freno a vuoto. N vacuümrem. P hamulec próżniowy. S vakuumbroms. (811)

braking

1. **blended braking** : composite braking in which the forces produced by two or more of the component brake types are automatically controlled to provide the total force required at any instant. ★ conjugaison (de modes de freinage) → *conjugaison 1.* R смешанное торможение. D überlagerte Bremsung. E conjugación (sistema de frenado). I integrazione. N samenwerkende remming. P hamowanie zespołowe. S blandad bromsning. (811)
2. **braking characteristic** : → *characteristic 7*
3. **braking circuit** : → *circuit 13*
4. **braking contactor** : → *contactor 2*
5. **braking force** (*Syn.* brake force) : → *force 4*
6. **braking reactor** : → *reactor 3*
7. **braking resistor** : → *resistor 1*
8. **braking response** : → *response 3*
9. **braking system** : → *system 21*
10. **braking test** : → *test 9*
11. **braking torque** : → *torque 2*
12. **braking torque** : → *torque 3*
13. **braking torque** : → *torque 4*
14. **capacitor braking** : dynamic braking for induction machines in which a capacitor is used to maintain magnetizing current thereby enabling the machine to act as a generator when disconnected from the supply. ★ freinage par condensateur → *freinage 26.* R конденсаторное торможение. D Kondensatorbremsung. E frenado con condensador. I frenatura con condensatori. N weerstandremmen met condensatorbekrachtiging. P hamowanie kondensatorowe. S kondensatorbromsning. (411)
15. **combined braking system** : → *system 31*
16. **composite braking system** : → *system 35*
17. **continuous operation duty-type with electric braking** : → *duty-type 2*
18. **counter-current braking** (*Syn.* regenerative braking of a d.c. machine) : → *machine 22*
19. **critical speed in resistance braking** : → *speed 10*
20. **d.c. braking** (*Syn.* d.c. injection braking) : → *braking 21*
21. **d.c. injection braking** (UK) (*Syn.* d.c. braking (USA)) : dynamic braking for induction machines in which a separate d.c. supply provides magnetizing current thereby enabling the machine to act as a generator when disconnected from the supply. ★ freinage par injection de courant continu → *freinage 29.* R торможение постоянным током. D Gleichstrombremsung. E frenado con inyección de corriente continua. I frenatura con corrente continua. N weerstandremmen met gelijkstroombekrachtiging. P hamowanie dynamiczne silników indukcyjnych. S likströmsbromsning. (411)
22. **dynamic braking** : a system of electric braking in which the excited machine is disconnected from the supply system and connected as a generator, the energy being dissipated in the winding and, if necessary, in a separate resistor. ★ freinage rhéostatique → *freinage 34.* R динамическое торможение. D Widerstandsbremsen. E frenado reostático. I frenatura reostatica (dinamica). N weerstandremmen. P hamowanie dynamiczne. S elektrodynamisk bromsning. (411)
23. **eddy-current braking** : electric braking in which the energy to be dissipated is converted into heat by eddy currents produced in a metallic mass. ★ freinage par courants de Foucault → *freinage 28.* R торможение вихревыми токами. D Wirbelstrom-Bremsen. E frenado por corrientes de Foucault. I frenatura per correnti parassite. N remmen door middel van wervelstromen. P hamowanie prądami wirowymi. S virvelströmsbromsning. (411)
24. **electric braking** : a system in which a braking action is applied to a machine by causing it to produce electrical energy which is either dissipated or returned to the supply system. ★ freinage électrique → *freinage 16.* R электрическое торможение. D elektrisches Bremsen. E frenado eléctrico. I frenatura elettrica. N elektrisch remmen. P hamowanie elektryczne. S elbromsning. (411,811)
25. **electric induction braking** : electric braking in which the braking force is produced by induction in a conducting linear body (rail, etc.) or in a rotating part (wheel, disc, drum, etc.). ★ frein électrique par induction → *frein 14.* R индукционное электрическое торможение. D elektromagnetische Induktionsbremse. E frenado por inducción eléctrica. I frenatura elettromagnetica a induzione. N wervelstroomremmen. P hamulec elektryczny indukcyjny. S induktionsbroms. (811)
26. **electro-dynamic braking** : electric braking in which the energy is generated by the traction motors driven by the vehicle and acting as generators. ★ freinage électrodynamique → *freinage 17.* R электродинамическое торможение. D elektrodynamische Bremse. E frenado electrodinámico. I frenatura elettrodinamica. N elektrodynamisch remmen. P hamowanie elektrodynamiczne. S elektrodynamisk broms. (811)
27. **electro-dynamic braking dependent on line supply** : electro-dynamic braking in which the braking effort is available only when the traction supply system is energized. ★ freinage électrodynamique dépendant de la ligne de contact → *freinage 18.* R электродинамическое торможение, зависящее от контактной сети. D fahrleitungsabhängige Bremse. E frenado electrodinámico dependiente de la línea de contacto. I frenatura elettrodinamica dipendente dalla linea (di contatto). N elektrodynamisch remmen afhankelijk van de voeding. P hamulec (elektrodynamiczny) zależny od zasilania. S ..... (811)
28. **electro-dynamic braking independent of line supply** : electro-dynamic braking in which the braking effort is available even when the traction supply system is not energized. ★ freinage électrodynamique indépendant de la ligne de contact → *freinage 19.* R электродинамическое торможение, не зависящее от контактной сети. D fahrleitungsunabhängige Bremse. E frenado electrodinámico independiente de la línea de contacto. I frenatura elettrodinamica indipendente dalla linea (di contatto). N elektrodynamisch remmen onafhankelijk van de voeding. P hamulec (elektrodynamiczny) niezależny od zasilania. S ..... (811)
29. **electromagnetic braking** : a system in which a brake is applied to or removed from a machine by means of an electromagnet. ★ freinage à commande électromagnétique → *freinage 11.* R электромагнитное торможение. D mechanisches Magnetbremsen. E frenado electromagnético. I frenatura elettromagnetica. N elektromagnetisch remmen. P hamowanie elektromagnesem. S elektromagnetisk bromsning. (411)
30. **electro-magnetic braking** : a brake type using electro-magnets to produce a braking force. ★ freinage électromagnétique → *freinage 20.* R электромагнитное торможение. D elektromagnetische Bremse. E frenado electromagnético. I frenatura elettromagnetica. N elektromagnetisch remmen. P hamowanie elektromagnesowe. S elektromagnetisk broms. (811)
31. **electro-magnetic friction braking** : electro-magnetic braking in which the electro-magnet acts on a shoe, block or pad applied to the rail or to a rotating part (wheel, disc, drum, etc.). ★ freinage électromagnétique à frottement → *freinage 21.* R фрикционное электромагнитное торможение. D elektromagnetische Reibungsbremse. E frenado electromagnético por fricción. I frenatura elettromagnetica ad attrito. N elektromagnetische wrijvingsrem. P hamowanie elektromagnesowe tarciowe. S elektromagnetisk friktionsbroms. (811)
32. **intermittent periodic duty-type with electric braking** : → *duty-type 8*
33. **mechanical braking** : a brake type whose braking force is provided by friction between brake blocks or pads and the wheels or separate discs. ★ freinage mécanique → *freinage 24.* R механическое торможение. D mechanische Bremse. E frenado mecánico. I frenatura meccanica. N mechanisch remmen. P hamowanie mechaniczne. S friktionsbroms. (811)
34. **over-synchronous braking** : regenerative braking for induction motors in which the rotor is forced to rotate with over-synchronous speed. ★ freinage hypersynchrone → *freinage 23.* R торможение при скорости выше

синхронной. D übersynchrones Bremsen. E frenado hipersíncrono. I frenatura ipersincrona. N bovensynchroon remmen. P hamowanie nadsynchroniczne. S asynkrongeneratorbromsning. (411)

35. **plug braking** : electric braking of an induction motor by reversing the phase sequence of its supply. ★ freinage par inversion de phases → *freinage 30.* R торможение за счет изменения порядка следования фаз. D bremsen durch Gegendrehfeld. E frenado por inversión de fases. I frenatura per inversione di fase. N tegenstroomremmen (van een inductiemotor). P hamowanie przez przełączenie faz (silników prądu przemiennego). S bromsning genom fasreversering. (411)
36. **regenerative braking** : electric braking in which energy is returned to the supply system. ★ freinage par récupération → *freinage 31.* R рекуперативное торможение. D Rückarbeitsbremsung. E frenado con recuperación. I frenatura a recupero. N remmen met recuperatie. P hamowanie odzyskowe. S regenerativ bromsning. (411)
37. **regenerative braking** : electro-dynamic braking in which the energy produced by the motors is fed into the line or into energy storage devices (batteries, flywheels, etc.). ★ freinage par récupération → *freinage 32.* R рекуперативное торможение. D elektrodynamische Nutzbremse. E frenado por recuperación. I frenatura (elettrodinamica) a recupero. N recuperatieremmen. P hamowanie (elektrodynamiczne) odzyskowe. S regenerativ broms. (811)
38. **regenerative braking of a d.c. machine** : → *machine 22*
39. **resistance braking** : electro-dynamic braking in which the energy produced by the motors is dissipated in resistors. ★ freinage sur résistance → *freinage 35.* R реостатное торможение. D elektrodynamische Widerstandsbremse. E frenado por resistencia. I frenatura (elettrodinamica) reostatica. N weerstandsremmen. P hamowanie (elektrodynamiczne) rezystorowe. S motståndsbroms. (811)
40. **response time (of braking)** : → *response time 6*
41. **solenoid braking** : electro-magnetic braking in which a mechanical brake, acting on the wheels or on discs, is operated by electro-magnets. ★ freinage par solénoïdes → *freinage 33.* R соленоидное торможение. D Solenoidbremse. E frenado por solenoides. I frenatura meccanica ad azionamento elettromagnetico. N solenoïde remmen. P hamowanie solenoidowe. S elektromekanisk broms. (811)
42. **substitutional braking** : composite braking in which the force produced by one brake type is automatically eliminated in order to be replaced by that of one or more others. ★ substitution (de modes de freinage) → *substitution 4.* R замещающее торможение. D ablösende Bremsung. E sustitución (sistema de frenado). I sostituzione. N vervangende remming. P hamowanie zamienne. S alternativbromsning. (811)

branch

1. **branch** : a sub-set of a network, considered as a 2-terminal circuit, consisting of a circuit element or a combination of circuit elements. ★ branche → *branche 1.* R ветвь. D Zweig. E rama. I lato. N tak. P gałąź. S gren. (131)
2. **branch** : in a telecommunication network, a link between two nodes or terminal points without any intermediate node. ★ branche → *branche 2.* D Direktverbindung. P gałąź. (715)
3. **branch** (of a data network) : a route between two directly connected nodes in a data network. ★ branche → *branche 3.* R ветвь (сети данных). D Zweig. E rama. I ramo. N vertakking. P gałąź. S gren. (721)
4. **branch feeder** : → *feeder 1*
5. **branch line** : → *line 8*
6. **private automatic branch exchange** : → *exchange 16*
7. **private branch exchange** : → *exchange 18*
8. **private manual branch exchange** : → *exchange 19*
9. **tree and branch system** : → *system 242*

branching

1. **branching filter** : → *filter 7*

brazing

1. **brazing** (*Syn.* hard soldering) : → *soldering 1*
2. **brazing (general)** (*Syn.* soldering) : an operation by which metallic parts are joined by means of a molten filler material, having a melting temperature lower than that of the parts to be joined and wetting the parent metals, which do not participate by fusion in the formation of the joint. ★ brasage → *brasage 1.* R пайка. D Löten. E soldadura con metal de aportación de bajo punto de fusión. I brasatura (in generale); saldatura. N solderen. P lutowanie. S lödning. (851)

break

1. **break** (*Syn.* interruption) : → *interruption 1*
2. **break before make contact** (*Syn.* non-shorting contact) : → *contact 87*
3. **break contact** (*Syn.* "b" contact) : → *contact 5*
4. **break contact** : → *contact 10*
5. **break contact** : → *contact 11*
6. **break contact** : → *contact 12*
7. **closing time of a break contact** : → *time 24*
8. **make before break contact** (*Syn.* shorting contact) : → *contact 104*
9. **opening time of a break contact** : → *time 117*
10. **output break circuit** : → *circuit 130*
11. **(transmission) break** (*Syn.* interruption of transmission) : sudden break in the transmission of a programme. ★ coupure → *coupure 6.* R прерывание (передачи). (723)

breakage

1. **electrode breakages** (*Syn.* electrode scrap) : → *scrap 1*

breakaway

1. **breakaway** : the condition of a machine at the instant of change from rest of rotation. ★ décollage → *décollage 3.* R трогание. D Losbrechen. E estado inicial de arranque. I spunto. N in beweging komen. P początek rozruchu. S start. (411)
2. **break-away connector** (*Syn.* snatch-disconnect connector) : → *connector 47*
3. **breakaway force** : → *force 6*
4. **breakaway starting current** : → *current 12*
5. **breakaway torque** : → *torque 5*
6. **breakaway torque** : → *torque 6*
7. **specified breakaway torque** : → *torque 23*

break-before-make

1. **change-over break-before-make contact** : → *contact 14*

breakdown

1. **avalanche breakdown** (of a junction) : a breakdown caused by the cumulative multiplication of charge carriers in a semiconductor under the action of a strong electric field which causes some charge carriers to gain enough energy to liberate new hole-electron pairs (field-induced impact ionization). ★ claquage par avalanche → *claquage 9.* R лавинный пробой (перехода). D Lawinendurchbruch (eines Überganges). E perforación por avalancha (de una unión). I cedimento per valanga (di una giunzione). N lawinecollaps (v.e. grenslaag). P przebicie (złącza) lawinowe. S lavingenombrott. (391,521)
2. **breakdown** (*Syn.* pull-out test) : → *test 64*
3. **breakdown** (of a reverse biased PN junction) : transition from a state of high resistance to a state of substantially lower resistance for increasing magnitude of reverse voltage. ★ claquage → *claquage 1.* R пробой (P-N перехода, смещенного в обратном направлении). D Durchbruch (bei einem in ückwärtsrichtung vorgespannten PN-Übergang). E perforación (de una unión PN polarizada en inversa). I perforazione (di una giunzione PN polarizzata in senso inverso). N doorslag. P przebicie (złącza PN spolaryzowanego wstecznie). S genombrott. (391,521)
4. **breakdown** (in a gas) : the abrupt transition of the gap resistance from a practically infinite value to a relatively low value, which results in an unwanted discharge. ★ décharge disruptive → *décharge 7.* R пробой (в газе). D Durchschlag (in einem Gas). E descarga disruptiva (en un gas). I scarica disruptiva (in un gas). N doorslag (in een gas). P przebicie elektryczne (w gazie). S överslag. (531)
5. **break-down** (of a valve or arm) : a failure that permanently deprives a valve or arm of its property to block voltage. ★ claquage → *claquage 2.* R пробой (вентиля или плеча). D Durchschlag (eines Ventils oder Zweiges). E perforación (de una válvula o brazo). I rottura (di una valvola o di un ramo). N doorslag (van een ventiel of tak). P przebicie (zaworu lub ramienia). S sammanbrott. (551)

6. **breakdown** : the dielectric failure of an insulation under the effect of a strong electric field and/or by physico-chemical deterioration of the insulating material. ★ claquage → *claquage 3.* R пробой. D Durchbruch. E ruptura dieléctrica; perforación. I scarico. N diëlektrische fout. P awaryjna utrata własności izolacyjnych. S isolationssammanbrott. (604)
7. **breakdown** (after intrusion) : disconnection of an existing call by forced release after a trunk call has been offered and accepted. ★ rupture → *rupture 6.* R разъединение (после вмешательства). D Abbruch (Zwangsabbruch); Zwangsausloesung (nach Aufschalten). E ruptura (tras intrusión); corte (tras de intrusión). I disconnessione; rilascio forzato. N uit verbinding schakelen. P przerwanie połączenia. S nedkoppling efter inbrytning. (714)
8. **breakdown torque** (*Syn.* pull-out torque) : → *torque 18*
9. **breakdown voltage** : → *voltage 15*
10. **disruptive breakdown** (in an insulant) : a breakdown that locally and generally in an irreversible way destroys the insulating property of a medium. *Note.* — A fluid insulant can recover its insulating properties after a disruptive breakdown. ★ claquage disruptif → *claquage 5.* R прерывистый пробой (в изоляции). D Durchschlag (in einem Isolierstoff). E descarga disruptiva (en un aislante). I scarica disruptiva (in un isolante). N doorslag. P przebicie (elektryczne) niszczące. S genomslag. (121)
11. **(electric) breakdown** : a process, caused by an electric field, that changes abruptly all or part of an insulating medium to a conducting medium. ★ claquage (électrique) → *claquage 6.* R (электрический) пробой. D (elektrischer) Durchbruch. E ruptura (dieléctrica). I scarica (elettrica). N (elektrische) doorslag. P przebicie (elektryczne). S isolationssammanbrott. (121)
12. **(electric) breakdown** : the annihilation, at least temporarily, of the insulating properties of an insulating medium under electrical stress. ★ claquage (électrique) → *claquage 7.* R (электрический) пробой. D (elektrischer) Durchschlag. E ruptura dieléctrica. I cedimento elettrico. N (elektrische) doorslag. P przebicie (elektryczne). S isolationssammanbrott. (212)
13. **forward breakdown** : a failure that permanently deprives a valve or arm of its property to block forward voltage. ★ claquage direct → *claquage 4.* R прямой пробой. D Durchschlag in Vorwärtsrichtung. E perforación directa. I rottura diretta. N voorwaartse doorslag. P przebicie w stanie blokowania. S blocksammanbrott. (551)
14. **reverse breakdown** : a failure that permanently deprives a valve or arm of its property to block reverse voltage. ★ claquage inverse → *claquage 8.* R обратный пробой. D Durchschlag in Rückwärtsrichtung. E perforación inversa. I rottura inversa. N sperdoorslag. P przebicie w stanie zaworowym. S spärrsammanbrott. (551)
15. **thermal breakdown** (of a PN junction) : the breakdown that is caused by generation of free charge carriers owing to the cumulative interaction between increasing power dissipation and increasing junction temperature. *Note.* — The English term "thermal runaway" is also used in some countries. ★ claquage par effet thermique → *claquage 10.* R тепловой пробой. D thermischer Durchbruch (eines PN-Übergangs). E perforación por efecto térmico (de una unión PN). I perforazione per effetto termico (di una giunzione PN). N thermische doorslag. P przebicie cieplne (złącza PN). S termiskt genombrott. (521)
16. **tunnel breakdown** (*Syn.* Zener breakdown) : → *breakdown 17*
17. **Zener breakdown** (of a PN junction) (*Syn.* tunnel breakdown (of a PN junction)) : a breakdown caused by the transition of electrons from the valence band to the conduction band due to tunnel action under the influence of a strong electric field in the reverse direction. ★ claquage par effet Zener → *claquage 12.* R зенеровский пробоя (P-N перехода); туннельный пробой (P-N перехода). D Zener-Durchbruch; Tunnel-Durchbruch (eines PN-Übergangs). E perforación por efecto Zener (de una unión PN); perforación por efecto túnel (de una unión PN). I perforazione per effetto Zener (di una giunzione PN); perforazione per effetto tunnel (di una giunzione PN). N zenerdoorslag; tunneldoorslag. P przebicie Zenera (złącza PN); przebicie tunelowe (złącza PN). S zenergenombrott. (521)

breaker

1. **one-and-a-half breaker arrangement** : → *arrangement 5*

break-in

1. **break-in state** : → *state 4*

breaking

1. **breaking capacity** : → *capacity 5*
2. **breaking current** : → *current 13*
3. **breaking length** : → *length 2*
4. **limiting breaking capacity** : → *capacity 13*
5. **minimum breaking current** : → *current 129*
6. **prospective breaking current** : → *current 144*
7. **short-circuit breaking capacity** : → *capacity 24*

break-out

1. **break-out lug** : → *lug 1*

breakover

1. **breakover point** : → *point 2*

break-through

1. **break-through** : the temporary loss of forward blocking ability of a controllable valve or arm during the interval which is, in undisturbed operation, the forward blocking interval. ★ raté de blocage → *raté 4.* R временный пробой. D Durchzündung. E fallo de bloqueo. I mancato blocco. N tijdelijke doorslag. P opuszczenie blokowania. S genomtändning. (551,811)

break-time

1. **break-time** : the interval of time between the beginning of the opening time of a mechanical switching device (or the pre-arcing time of a fuse) and the end of the arcing time. ★ durée de coupure → *durée 32.* R полное время отключения. D Ausschaltzeit. E tiempo de corte. I durata d'interruzione. N uitschakeltijd. P czas wyłączania. S bryttid. (441)

breather

1. **breather** (of an electrical apparatus for explosive atmospheres) : a device which permits an exchange between the atmosphere within an enclosure and the surrounding atmosphere and which maintains the integrity of the type of protection. ★ respirateur → *respirateur 1.* R воздухообменное устройство (взрывозащищенного электрооборудования). D Atmungseinrichtung. E respirador (de un material eléctrico para atmósferas explosivas); dispositivo de respiración (de un material eléctrico para atmósferas explosivas). I dispositivo di respirazione (di una costruzione elettrica per atmosfere esplosive). N ademopening (in elektrisch materieel voor plaatsen met ontploffingsgevaar). P respirator (urządzeń przeciwwybuchowych). S luftningsdon. (426)
2. **breather** : a component linking the air space at the top of the tank of a liquid-cooled transformer with the outside air, the volume of the air space varying with the temperature of the liquid. ★ aérateur → *aérateur 1.* R воздухообменное устройство. D Entlüfter. E aireador. I aeratore. N ontluchter. P kominek; oddychacz. S tryckutjämnare. (811)

breathing

1. **breathing** : a slow rhythmic variation in the brightness, colour or size of the television picture. ★ pompage → *pompage 5.* R дыхание изображения. (723)

breeches

1. **breeches joint** : → *joint 2*

breeder

1. **breeder reactor** : → *reactor 4*

breeding

1. **breeding** : conversion when the conversion ratio is greater than unity. ★ surrégénération → *surrégénération 3.* D Brüten. E reproducción. I surrigenerazione. N kweken. P powielanie. S bridning. (026)
2. **breeding gain** : → *gain 5*
3. **breeding ratio** : → *ratio 13*

bremsstrahlung

1. **bremsstrahlung** : the electromagnetic radiation produced by the deceleration or the acceleration of charged particles, upon passage through an external electric field. ★ rayonnement de freinage → *rayonnement 58.* R тормозное излучение. D Bremsstrahlung. E radiación de frenado. I radiazione di frenamento. N remstraling. P promieniowanie hamowania. S bromsstrålning. (026,391,881)

Brewster

1. **Brewster angle** : → *angle 13*
2. **Brewster angle incidence** : → *incidence 3*

bridge

1. **asymmetric bridge with external commutation "out"** : an asymmetric half-controlled bridge including a device to interrupt conduction before interruption occurs naturally, in order to improve the power factor. ★ pont asymétrique bloquable → *pont 7.* R асимметричный мост с внешним включением. D asymmetrische, löschbare Brückenschaltung. E puente asimétrico bloqueable. I (raddrizzatore a) ponte asimmetrico a spegnimento forzato. N asymmetrische halfgestuurde brug met gedwongen commutatie. P mostek asymetryczny o komutacji wymuszonej. S asymmetrisk likriktarbrygga med släckningsfunktion. (811)
2. **asymmetric half-controlled bridge** : a double-way connection in which half of the principal arms are controlled and are those arms having a common a.c. terminal, the delay angle of the controlled arms being equal. ★ pont semi-commandé asymétrique → *pont 18.* R асимметричный полууправляемый мост. D asymmetrische, halbgesteuerte Brückemschaltung. E puente semicontrolado asimétrico. I (raddrizzatore a) ponte semicontrollato asimmettrico. N asymmetrische halfgestuurde brug. P mostek asymetryczny o regulacji połowicznej. S ..... (811)
3. **balanced bridge transition** : → *transition 1*
4. **bridge** (*Syn.* beam gantry) : → *gantry 2*
5. **bridge connection** : → *connection 10*
6. **bridge duplex** : → *duplex 1*
7. **bridge transition** : → *transition 2*
8. **bridges in cascade** : a connection in which two or more bridges are supplied in such a manner that the voltages on their direct current side are additive. ★ ponts en cascade → *pont 20.* R каскадная схема соединения мостов. D Kaskadenbrückenschaltung. E puentes en cascada. I ponti in cascata. N bruggen in cascadeschakeling. P połączenie mostków kaskadowe. S kaskadkoppling. (811)
9. **complete bridge connection** : → *connection 14*
10. **controlled bridge** : a double-way connection in which all the principal arms are controlled rectifiers. ★ pont commandé → *pont 8.* R управляемый мост. D gesteuerte Brückenschaltung. E puente controlado. I (raddrizzatore a) ponte controllato. N gestuurde brug. P mostek (prostowniczy) sterowany. S styrd likriktarbrygga. (811)
11. **feeding bridge** : a device in a central battery switching entity to supply telephone lines with feeding current and signalling current and associated with a transmission bridge. ★ pont d'alimentation → *pont 9.* R питающий мост. D Speisebrücke. E puente de alimentación. I ponte d'alimentazione. N voedingsbrug. P mostek zasilający. S strömmatningsbrygga. (722)
12. **incomplete bridge connection** : → *connection 31*
13. **Kelvin (double) bridge** (*Syn.* Thomson (double) bridge) : a six arm measuring bridge intended to measure the value of a four-terminal resistor by comparison with a four-terminal standard resistor, all of the arms being resistors, at least one of which is adjustable. ★ pont (double) de Thomson → *pont 15.* R мост Томсона (двойной). D Kelvin-Brücke; Thomson-Brücke. E puente (doble) de Thomson; puente (doble) de Kelvin. I doppio ponte di Thomson (Kelvin). N brug van Kelvin; brug van Thomson. P mostek (podwójny) Thomsona. S Kelvin(dubbel)brygga. (302)
14. **measuring bridge** : a measuring equipment consisting of at least four branches (arms) or groups of circuit elements (resistors, inductors, capacitors etc.), connected in a quadrilateral, one of whose diagonals is supplied by a source and the other is connected to a null detector or a measuring instrument. ★ pont de mesurage → *pont 10.* R измерительный мост. D Messbrücke. E puente de medida; puente de medición. I ponte di misura. N meetbrug. P mostek pomiarowy. S mätbrygga. (301)
15. **self-balancing power bridge** : a power meter where the power sensing element is one arm of a bridge circuit which is automatically balanced by adjusting a suitable parameter, the corresponding variations being used as a means of measuring the power. ★ wattmètre à pont auto-équilibreur → *wattmètre 7.* R самобалансирующийся мостовой измеритель мощности. D selbstabgleichende Leistungsmessbrücke. E vatímetro de puente autoequilibrado. I wattmetro a ponte auto equilibrante. N zelfbalancerende vermogenbrug. P miernik mocy samorównoważący. S självbalanserande effektbrygga. (726)
16. **single-phase bridge (rectifier)** : a double-way connection with single-phase input. ★ pont (redresseur) monophasé → *pont 16.* R однофазный мост (выпрямителя). D Einphasen-(Gleichrichter)-Brückenschaltung. E puente (rectificador) monofásico. I raddrizzatore monofase a ponte. N eenfase(gelijkrichter)brug. P mostek (prostowniczy) jednofazowy. S enfasmatad likriktarbrygga. (811)
17. **symmetric half-controlled bridge** : a double-way connection in which half of the principal arms are controlled and are those arms having a common d.c. terminal, the delay angle of the controlled arms being equal. ★ pont semi-commandé symétrique → *pont 19.* R симметричный полууправляемый мост. D symmetrische, halbgesteuerte Brückenschaltung. E puente semicontrolado simétrico. I (raddrizzatore a) ponte semicontrollato simmetrico. N symmetrische halfgestuurde brug. P mostek symetryczny o regulacji połowicznej. S ..... (811)
18. **temperature compensated power bridge** : a power meter in which the power calibration is automatically compensated for environmental temperature changes. ★ wattmètre à pont à compensation de température → *wattmètre 6.* R мостовой измеритель мощности с температурной компенсацией. D temperaturkompensierte Leistungsmessbrücke. E vatímetro de puente con compensación térmica. I wattmetro a ponte a compensazione di temperatura. N vermogenbrug met temperatuurcompensatie. P miernik mocy mostkowy z kompensacją temperatury. S temperaturkompenserad effektbrygga. (726)
19. **Thomson (double) bridge** (*Syn.* Kelvin (double) bridge) : → *bridge 13*
20. **three-phase bridge (rectifier)** : a double-way connection with three-phase input. ★ pont (redresseur) triphasé → *pont 17.* R трехфазный мост (выпрямителя). D Drehstrom-Brückenschaltung. E puente (rectificador) trifásico. I raddrizzatore trifase a ponte. N driefase(gelijkrichter)brug. P mostek (prostowniczy) trójfazowy. S trefasmatad likriktarbrygga. (811)
21. **transformer bridge** : an a.c. measuring bridge intended to measure impedances, in which at least two arms consist of tapped windings on a transformer, making use of the known ratios of the turns and which can therefore have fixed value standards. ★ pont à transformateur → *pont 6.* R мост трансформаторный. D Transformator-Brücke. E puente de transformador. I ponte a trasformatore. N transformatorbrug. P mostek transformatorowy. S transformatorbrygga. (302)
22. **transmission bridge** (in telephony) : a device permitting the through transmission of speech currents whilst preventing the transmission through the same path of a direct current such as the feeding current for a telephone station. *Note.* — In a telephone connection, each transmission bridge may be used to hold, supervise and release this connection. ★ pont de transmission → *pont 12.* R соединительный мост (в телефонии). D Sprachübertrager. E puente de transmisión (en telefonía). I ponte di trasmissione. N transmissiebrug. P mostek transmisyjny. S transmissionsbrygga. (722)
23. **Wheatstone bridge** : a four arm measuring bridge intended to measure the value of a resistor which forms one of the arms, the other three arms being resistors, at least one of which is adjustable. ★ pont de Wheatstone → *pont 13.* R мост Уитстона. D Wheatstone-Brücke. E puente de Wheatstone. I ponte di Wheatstone. N brug van Wheatstone. P mostek Wheatstone'a. S Wheatstonebrygga. (302)

bridger

1. **bridger amplifier** : → *amplifier 5*

bridging

1. **bridging time** : → *time 14*

bright

1. **bright** : adjective used to describe high levels of brightness. ★ lumineux → *lumineux 26.* **R** яркий. **D** hell. **E** luminoso. **I** brillante. **N** helder. **P** jaskrawy. **S** ljus. (845)
2. **bright annealing** : → *annealing 1*

brightness

1. **brightness** : attribute of a visual sensation according to which an area appears to emit more or less light. ★ luminosité → *luminosité 3.* **R** светлота. **D** Helligkeit. **E** luminosidad. **I** brillanza. **N** helderheid. **P** jaskrawość. **S** ljushet. (845)
2. **equality of brightness photometer** : → *photometer 1*

brilliance

1. **point brilliance** (E_v; E) : quantity involved in the visual observation of a source of light when viewed directly from such a distance that the apparent diameter is inappreciable. The point brilliance is measured by the illuminance produced by the source on a plane, at the observer's eye, normal to the direction of the source. unit : lx. ★ éclat apparent → *éclat 2.* **R** блеск. **D** Punkthelle. **E** esplendor puntual. **I** splendenza. **N** lichtpuntsterkte. **P** blask pozorny. **S** punktljushet. (845)

broad

1. **broad pulse** : → *pulse 3*

broadband

1. **broadband antenna** : → *antenna 24*
2. **broadband device** : → *device 12*
3. **broadband emission** : → *emission 1*

broad-beam

1. **broad-beam attenuation** : → *attenuation 14*

broadcast

1. **broadcast call** : → *call 4*
2. **broadcast command** : → *command 2*
3. **broadcast conference call** : → *call 5*
4. **(broadcast) programme** : → *programme 1*
5. **broadcast transmitter network** : → *network 10*
6. **broadcast transmitting station** : → *station 1*
7. **broadcast videography** (*Syn.* teletext) : → *teletext 3*
8. **live broadcast** : a sound or television programme in which the production and transmission are simultaneous. ★ (programme) en direct → *direct 56.* **R** прямая передача. (723)
9. **outside broadcast** (*Syn.* OB (abbreviation)) : a programme originating elsewhere than in a studio, using mobile equipment in order to provide a broadcast description of an event. ★ reportage → *reportage 1.* **R** внестудийная передача. (723)
10. **outside broadcast equipment** : → *equipment 54*
11. **outside broadcast vehicle** : → *vehicle 18*
12. **recorded broadcast** : a sound or television programme which is transmitted after it has been recorded. ★ (programme) en différé → *différé 8.* **R** вещание с записи. (723)
13. **repeat broadcast** : the second or subsequent broadcasting of a programme which has previously been broadcast. ★ rediffusion → *rediffusion 1.* **R** повторная передача. (723)
14. **simultaneous broadcast** : transmission of the same programme by several sound or television transmitter networks at the same time. ★ diffusion simultanée → *diffusion 30.* **R** одновременная передача. (723)
15. **to broadcast** : to transmit programmes from broadcast transmitters. ★ radiodiffuser → *radiodiffuser 1.* **R** вещать. (723)
16. **to broadcast** (in television) (*Syn.* to televise (a programme)) : to transmit a television programme. ★ téléviser → *téléviser 1.* **R** вещать (в телевидении). (723)

broadcaster

1. **broadcaster** : a person or organisation engaged in broadcasting. ★ radiodiffuseur → *radiodiffuseur 1.* **R** вещатель. (723)

broadcasting

1. **broadcasting** : a form of unidirectional telecommunication intended for a large number of users having appropriate receiving facilities, and carried out by means of radio or by cable networks. *Note.* — In English, it should be assumed that "broadcasting by radio waves" is intended where the word "broadcasting" is used without qualification, unless the context indicates the contrary. *Examples :* sound broadcasting, television broadcasting, teletext, the distribution of time signals and navigational warnings, the distribution of news from press agencies. ★ télédiffusion → *télédiffusion 1.* **R** вещание. **D** Rundsendung. **E** teledifusión. **I** telediffusione. **N** omroep. **P** radiofonia; radiodyfuzja dźwiękowa. **S** (rundradio)utsändning. (701)
2. **broadcasting band** : → *band 9*
3. **broadcasting network** : → *network 11*
4. **broadcasting (service)** : → *service 3*
5. **communal (broadcasting) antenna** (*Syn.* CATV) : → *CATV 1*
6. **data broadcasting** : transmission by sound or television transmitters of data signals, generally digital, for purposes such as teletext, subtitling and test and control signals. ★ radiodiffusion de données → *radiodiffusion 7.* **R** передача данных. (723)
7. **master (broadcasting) antenna** (*Syn.* MATV) : → *MATV 1*
8. **polar-modulation system (for stereophonic broadcasting)** : → *system 148*
9. **satellite broadcasting** : broadcasting by means of a transmitter on board a satellite. *Note.* — Broadcasting: radiocommunication in which the emissions are intended for direct reception by the general public. ★ radiodiffusion par satellite → *radiodiffusion 10.* **R** спутниковое радиовещание. **D** Satelliten-Rundfunk. **E** radiodifusión por satélite. **I** radiodiffusione via satellite. **N** satellietomroep. **P** radiodyfuzja satelitarna. **S** satellitrundradio; satellit-TV. (723,725)
10. **sound broadcasting receiver** : → *receiver 11*
11. **sound broadcasting (service)** : a broadcasting service limited to sound programmes. ★ radiodiffusion (sonore) → *radiodiffusion 11.* **R** звуковое вещание (служба). **D** Tonrundfunk. **E** radiodifusión sonora. **I** radio (sottointendendo il «sonora» e il «diffusa»). **N** draadloze geluidsomroep. **P** telekomunikacja rozsiewcza przewodowa. **S** ljudrundradio. (701,723)
12. **sound broadcasting transmitter** : → *transmitter 13*
13. **stereophonic broadcasting** : broadcasting in which programmes are transmitted with stereophonic sound. ★ radiodiffusion stéréophonique → *radiodiffusion 12.* **R** стереофоническое радиовещание. (723)
14. **television broadcasting** (service) (*Syn.* TV (abbreviation)) : a broadcasting service of visual programmes with associated sounds. ★ (radiodiffusion de) télévision → *télévision 19.* **R** телевизионное вещание. (723)
15. **television broadcasting (service)** : a broadcasting service of visual programmes with associated sounds. ★ radiodiffusion visuelle → *radiodiffusion 13.* **R** телевизионное вещание (служба). **D** Fernsehrundfunk. **E** (radiodifusión de) televisión. **I** televisione (diffusione). **N** draadloze beeldomroep. **P** telewizja (rozsiewcza) ; radiodyfuzja obrazowa. **S** TV-sändning; tevesändning. (701)
16. **television broadcasting transmitter** : → *transmitter 18*
17. **tropical (broadcasting) band** : → *band 33*

broadening

1. **decay-time broadening** (*Syn.* trailing-edge broadening) : → *broadening 5*
2. **leading-edge broadening** (*Syn.* rise-time broadening) : the unwanted increase of the rise-time of a pulse or of a signal element with respect to the maximum acceptable duration. ★ traînage avant → *traînage 6.* **R** расширение переднего фронта. **D** Anstiegsflankenverbreiterung; Anstiegszeitverlängerung. **E** ensanchamiento del tiempo de subida. **I** aumento del tempo di salita. **N** vergroting van de stijgtijd. **P** wydłużenie zbocza przedniego. **S** stigtidsökning. (702)
3. **pulse broadening** (*Syn.* pulse dispersion; pulse spreading) : the distortion of a pulse characterized by an increase in pulse duration. *Notes. 1* — Pulse broadening occurs as a result of dispersion or other mechanisms. *2* — Pulse

broadening may be specified by the impulse response, or the full duration half maximum pulse broadening. ★ élargissement d'une impulsion → *élargissement 1.* R уширение импульса; дисперсия импульса. D Pulsverbreiterung; Pulsdispersion. E ensanchamiento del pulso; dispersión del pulso; difusión del pulso. I allargamento dell'impulso; dispersione dell'impulso. N pulsverbreding; pulsdispersie; pulsspreiding. P poszerzenie impulsu; zniekształcenie impulsu. S pulsbreddning. (731)

4. **rise-time broadening** (*Syn.* leading-edge broadening) : → *broadening 2*
5. **trailing-edge broadening** (*Syn.* decay-time broadening) : the unwanted increase of the decay-time of a pulse or of a signal element with respect to the maximum acceptable duration. ★ traînage arrière → *traînage 5.* R расширение заднего фронта. D Abfallflankenverbreiterung; Abfallzeitverlängerung. E ensanchamiento del tiempo de bajada. I aumento del tempo di discesa. N vergroting van de vervaltijd. P wydłużenie zbocza tylnego. S falltidsökning. (702)

broadside

1. **broadside...** : pertains to a linear or planar array or to an antenna consisting of a large radiating aperture, whose maximum radiation is in a direction perpendicular or nearly perpendicular to the line or plane of the array or to the aperture. *Example :* broadside array. ★ à rayonnement transversal → *rayonnement 2.* R поперечное излучение. D Querstrahler-; Beispiel: Querstrahlergruppe. E radiación transversal. I antenna a irradiazione trasversale (broadside array). N dwarsstralend. P zestaw (antenowy) rozbudowany. S tvärstrålande. (712)

bronzing

1. **bronzing** : an operation performed in a medium and at suitable temperature to cover the clean ferrous surface with a bronze-coloured oxide film. ★ bronzage → *bronzage 1.* R оксидирование под бронзу. D Brünieren. E bronceado. I bronzatura. N bronzen. P brązowanie. S ..... (841)

brush

1. **brush** : a conducting part, generally stationary, which provides electrical connection through sliding contact with a part moving relatively to it. ★ balai → *balai 1.* R щетка. D Bürste. E escobilla. I spazzola. N borstel. P szczotka. S elborste. (411)
2. **brush** : a conducting part, generally stationary, which provides electrical contact with a commutator or slip-ring. ★ balai → *balai 3.* R щетка. D Bürste. E escobilla. I spazzola. N borstel. P szczotka. S elborste. (811)
3. **brush box** : that part of a brush holder which contains a brush. ★ cage de porte-balais → *cage 2.* R обойма щеткодержателя. D Bürstenkasten. E caja de portaescobillas. I cassetta portaspazzola. N borstelkast. P oprawka szczotkowa. S borstficka. (411)
4. **brush holder** : a structure which supports a brush and which enables it to be maintained in contact under pressure with the sliding surface. ★ porte-balais → *porte-balais 6.* R щеткодержатель. D Bürstenhalter. E portaescobillas. I portaspazzola. N borstelhouder. P trzymadło szczotkowe. S borsthållare. (411,811)
5. **brush holder support** : the intermediate member between the brush holder or holders and the supporting structure. This may be in the form of plates, spindles, studs or arms. ★ support (de) porte-balais → *support 25.* R палец щеткодержателя. D Bürstenträger. E soporte de portaescobillas. I sopporto del portaspazzola. N borstelpen. P urządzenie do mocowania trzymadeł szczotkowych. S borstbult. (411)
6. **brush ring** : → *ring 3*
7. **brush rocker** : a structure from which the brush holders are supported and fixed relative to each other and so arranged that the whole assembly may be moved circumferentially. ★ collier porte-balais → *collier 2.* R щеточная траверса. D Bürstenträgerring. E aro o collar portaescobillas. I arco portaspazzole. N borstelbrug. P most szczotkowy. S borstbrygga. (411)
8. **brush rocker gear** : the worm wheel or other gear by means of which the position of the brush rocker may be adjusted. ★ commande de collier porte-balais → *commande 35.* R регулятор щеточной траверсы. D Bürsten (träger) verstelleinrichtung. E mando del aro portaescobillas. I registratore dell'arco portaspazzole. N borstelverstelinrichting. P mechanizm mostu szczotkowego. S borstförskjutningsdon. (411)
9. **brush spring** : that portion of a brush holder which exerts pressure on the brush to hold it in contact with the sliding surface. ★ ressort de porte-balais → *ressort 1.* R пружина щеткодержателя. D Bürstenfeder. E muelle de portaescobillas. I molla del portaspazzola. N borsteldrukveer. P sprężyna dociskowa trzymadła szczotkowego. S borsthållarfjäder. (411)
10. **brush yoke** : a structure on which the brush rocker is mounted when the rocker is not supported by the frame or pedestal of the machine itself. ★ couronne porte-balais → *porte-balais 4.* R крепление щеточной траверсы. D Bürstenträger-Haltevorrichtung. E corona portaescobillas. I giogo portaspazzole. N borstelbrugdrager. P wspornik mostu szczotkowego. S konsol för borstbrygga. (411)
11. **earth-return brush** : a device on a vehicle to divert the return current away from rotating components such as roller bearings, and lead it directly to the axle. ★ balai de retour de courant → *balai 4.* R щетка заземления. D Erdungskontakt (Radsatzkontakt). E escobilla de retorno de corriente. I dispositivo di ritorno (di corrente). N retourstroomborstel. P szczotka prądu powrotnego. S återledningsdon. (811)

brushless

1. **brushless** : applied to a machine in which the conventional brushgear is eliminated. ★ machine sans contact glissant → *machine 69.* R Бесщеточная машина. D bürstenlose Maschine. E máquina sin escobillas. I macchina senza spazzole. N borstelloze machine. P maszyna bezszczotkowa. S borstlös. (411)
2. **brushless wound-rotor induction motor** : → *induction motor 1*

bubble

1. **bubble chamber** : → *chamber 2*

Buchmann and Meyer

1. **Buchmann and Meyer pattern** : → *pattern 1*

buck

1. **boost and buck connection** : → *connection 7*

bucket

1. **bucket piston** (*Syn.* quarter-wave contact piston) : → *piston 6*
2. **bucket plunger** (*Syn.* quarter-wave contact piston) : → *piston 6*

buckling

1. **geometric buckling** : a parameter, B_g^2, depending on the shape and the external dimensions of an assembly, e.g., a reactor core. For a bare reactor B_g^2 is the first eigenvalue of the equation:

$$\nabla^2 \Phi(r) + B^2 \Phi(r) = 0$$

where r is the radius vector, with the condition that the neutron flux density $\Phi(r)$ should be zero at the extrapolated boundary of the assembly. ★ laplacien géométrique → *laplacien 2.* D geometrische Flußwölbung. E laplaciana geométrica.. I parametro geometrico di criticità. N geometrische welving; geometrische bolling. P parametr geometryczny. S geometrisk buktighet. (026)

2. **material buckling** : a parameter, B_m^2, providing a measure of the multiplying properties of a medium as a function of the materials and their disposition. In age-diffusion theory B_m^2 is the value of B^2 satisfying the equation:

$$k_\infty e^{-B^2\tau} = 1 + B^2 L^2$$

where k_∞ is the infinite multiplication factor, τ the age, L the diffusion length of the neutrons. ★ laplacien matière → *laplacien 3.* D materielle Flußwölbung. E laplaciana material. I parametro fisico di criticità. N materiële welving; materiële bolling. P parametr materiałowy. S materiell buktighet. (026)

buffer

1. **buffer amplifier** : → *amplifier 6*
2. **buffer battery** : → *battery 12*
3. **buffer (stage)** (*Syn.* buffer amplifier) : → *amplifier 6*
4. **buffer store** : → *store 1*

5. **fibre buffer** : a material or assembly of materials used to protect the optical fibre against physical damage. ★ matelas protecteur → *matelas 3.* R амортизирующее покрытие. D Faserummantelung. E protector de fibra. I protezione della fibra. N vezelpantser. P osłona światłowodu. S fiberskydd. (731)
6. **weight per metre run over buffers** : → *weight 6*

building

1. **electrical installation of buildings** : → *installation 4*
2. **substation relay building** (*Syn.* substation relay kiosk) : a small building or cabinet close to the bay switchgear and controlgear, where protection and automatic equipment relating to this bay is located. ★ bâtiment de relayage → *bâtiment 1.* R пункт релейной защиты. D Relaishäuschen. E caseta de relés. I cabina relè di protezione. N ..... P kiosk przekaźnikowy. S reläkiosk. (605)

build-up

1. **build-up** : the phenomenon of the increase with depth of the absorbed dose rate due to the release of electrons and to scattered radiation in matter beyond the entrance surface. ★ accumulation → *accumulation 1.* R накопление. D Aufbaueffekt. E acumulación. I build-up. N accumulatie; opbouw. P narastanie mocy dawki pochłoniętej. S tillväxt. (881)
2. **build-up factor** : in the passage of radiation through a medium, the ratio of the total value of a specified radiation quantity at any point to the contribution to that value from radiation reaching the point without having undergone a collision. ★ facteur d'accumulation → *facteur 19.* D Aufbaufaktor. E factor de acumulación. I fattore d'accumulazione. N opbouwfactor; accumulatiefactor. P współczynnik narastania. S tillväxtfaktor. (026)
3. **build-up factor** : → *factor 19*
4. **build-up (of luminance)** : the increase in luminance with time from the initiation of excitation to the point where equilibrium occurs or excitation ceases. ★ établissement de la luminance → *établissement 6.* R нарастание (яркости). D Anstieg (der Helligkeit). E establecimiento de la luminancia. I formazione della luminanza. N opbouw (van luminantie). P narastanie (luminancji). S luminansökning. (531)
5. **critical build-up resistance** : → *resistance 8*
6. **critical build-up speed** : → *speed 9*
7. **voltage build-up** : the inherent establishment of the excitation and generated internal voltage of a generator. ★ amorçage en tension → *amorçage 5.* R нарастание напряжения. D Auferregung. E cebado de tensión. I innesco (autoeccitazione). N op spanning komen. P narastanie napięcia. S spänningsupptagning. (411)

built-up

1. **built-up mica** : → *mica 2*

bulb

1. **bulb** : transparent or translucent gas-tight envelope enclosing the luminous element(s). ★ ampoule → *ampoule 2.* R колба. D Kolben. E ampolla. I bulbo. N ballon. P bańka. S kolv. (845)
2. **bulb pile** (*Syn.* expanded pile) : → *pile 5*
3. **bulb-type unit** : → *unit 11*
4. **clear bulb** : bulb which is transparent to visible radiation. ★ ampoule claire → *ampoule 3.* R прозрачная колба. D Klarglaskolben. E ampolla clara. I bulbo chiaro. N heldere ballon. P bańka przezroczysta. S klar kolv. (845)
5. **coated bulb** : bulb coated internally or externally with a thin diffusing layer. ★ ampoule opalisée → *ampoule 9.* R колба с рассеивающим покрытием. D beschichteter Kolben. E ampolla opalizada. I bulbo opalizzato. N bedekte ballon. P bańka opalizowana. S innerbelagd kolv; ytterbelagd kolv. (845)
6. **coloured bulb** : bulb made of glass coloured in the mass, or of clear glass coated internally or externally with a coloured layer which may be transparent or diffusing. ★ ampoule colorée → *ampoule 4.* R цветная колба. D gefärbter Kolben. E ampolla coloreada. I bulbo colorato. N gekleurde ballon. P bańka barwna. S färgad kolv. (845)
7. **enamelled bulb** : bulb coated with a layer of translucent enamel. ★ ampoule émaillée → *ampoule 6.* R эмалированная колба. D emaillierter Kolben. E ampolla esmaltada. I bulbo smaltato. N geëmailleerde ballon. P bańka lakierowana. S lackerad kolv. (845)
8. **frosted bulb** : bulb which is made diffusing by roughening its inner or outer surface. ★ ampoule dépolie → *ampoule 5.* R матированная колба. D mattierter Kolben. E ampolla deslustrada. I bulbo smerigliato. N gematteerde ballon. P bańka matowana. S matterad kolv. (845)
9. **hard glass bulb** : bulb made of glass with a high softening temperature and resistant to thermal shock. ★ ampoule en verre dur → *ampoule 7.* R колба из тугоплавкого стекла. D Hartglaskolben. E ampolla de vidrio duro. I bulbo in vetro duro. N ballon van hardglas. P bańka ze szkła twardego. S hårdglaskolv. (845)
10. **opal bulb** : bulb in which all, or a layer, of the material diffuses the light. ★ ampoule opale → *ampoule 8.* R колба из молочного стекла. D Trübglaskolben; Opalglaskolben. E ampolla opal. I bulbo opale. N opaalglasballon. P bańka mleczna. S opaliserad kolv. (845)
11. **reflectorized bulb** : bulb having part of its interior or exterior surface coated to form a reflecting surface to enhance the light in particular directions. *Note.* — Such surfaces may remain transparent to certain radiations, in particular to the infrared. ★ ampoule réfléchissante → *ampoule 10.* R зеркальная колба. D verspiegelter Kolben. E ampolla reflectorizada. I bulbo riflettente. N verspiegelde ballon. P bańka zwierciadlona. S förspeglad kolv. (845)

bulk

1. **bulk eraser** : → *eraser 1*
2. **bulk lifetime** : → *lifetime 1*
3. **signal-to-erased signal ratio after bulk erasure** : → *ratio 89*

bulkhead

1. **bulkhead luminaire** : → *luminaire 3*

bunched

1. **bunched conductor** : → *conductor 6*
2. **bunched frame alignment signal** : → *signal 31*

bunching

1. **bunching** : the conversion of velocity modulation of an electron beam into density modulation. ★ groupement → *groupement 3.* R группирование. D Phasenfokussierung. E agrupamiento. I aggruppamento. N bundeldichtheidsmodulatie. P grupowanie. S klungning. (531)

bundle

1. **bundle** (*Syn.* fibre bundle) : → *bundle 4*
2. **bundle assembled aerial cable** : → *cable 4*
3. **conductor bundle** : set of individual conductors connected in parallel and disposed in a uniform geometrical configuration, that constitutes one phase or pole of a line. ★ faisceau de conducteurs → *faisceau 26.* R расщепленная фаза; пучок проводов. D Bündelleiter. E haz de conductores. I fascio di conduttori. N bundelgeleider. P wiązka przewodowa. S flerledare. (466)
4. **fibre bundle** (*Syn.* bundle) : an assembly of unbuffered optical fibres. ★ faisceau de fibres → *faisceau 30.* R жгут волокон; жгут. D Faserbündel; Bündel. E mazo de fibras; mazo. I fascio di fibre. N vezelbundel; bundel. P wiązka światłowodów. S fiberknippe. (731)
5. **four-conductor bundle** (*Syn.* quad bundle) : → *bundle 6*
6. **quad bundle** (*Syn.* four-conductor bundle (USA)) : a conductor bundle consisting of four subconductors. *Note.* — An analogous term can be used in the case of more than four subconductors. ★ faisceau quadruple → *faisceau 44.* R фаза, расщепленная на четыре провода. D Viererbündel. E haz cuádruple; haz cuadruplex. I fascio quadrinato. N vierlingbundel. P wiązka czteroprzewodowa. S kvadrupelledare. (466)
7. **sub-conductor (of a bundle)** : → *sub-conductor 1*
8. **three-conductor bundle** (*Syn.* triple bundle) : → *bundle 9*
9. **triple bundle** (*Syn.* three-conductor bundle (USA)) : a conductor bundle consisting of three sub-conductors. ★ faisceau triple → *faisceau 46.* R фаза, расщепленная на три провода. D Dreierbündel. E haz triple; haz triplex. I fascio trinato. N drielingbundel. P wiązka trójprzewodowa. S triplexledare. (466)

10. **twin bundle** (*Syn.* two-conductor bundle (USA)) : a conductor bundle consisting of two sub-conductors. ★ faisceau double → *faisceau 37.* R фаза, расщепленная на два провода. D Zweierbündel. E haz doble; haz duplex. I fascio binato. N tweelingbundel. P wiązka dwuprzewodowa. S duplexledare. (466)
11. **two-conductor bundle** (*Syn.* twin bundle) : → *bundle 10*

buoy

1. **buoy** : floating, and moored, artificial navigation mark. ★ bouée → *bouée 1.* R буй. D Tonne. E boya. I boa. N boei. P boja. S boj. (845)
2. **lighted buoy** : buoy that carries a signal light. ★ bouée lumineuse → *bouée 2.* R светящий буй. D Leuchttonne. E boya luminosa. I boa luminosa. N lichtboei. P boja świetlna. S lysboj. (845)

burden

1. **body burden** : the total amount (which may be expressed as activity) of a particular radionuclide in the body of a man or animal. ★ charge corporelle → *charge 39.* R количество радиоактивного вещества в теле. D Körperaktivität. E carga corporal. I carico corporeo. N lichaamsbelading. P obciążenie ciała. S kroppsinnehåll. (881)
2. **burden** (of an instrument transformer) : the impedance of the secondary circuit. *Note.* — The burden is usually expressed as the apparent power absorbed by the secondary circuit at a specified power factor at the rated secondary current (or voltage). ★ charge → *charge 24.* R нагрузка (измерительного трансформатора). D Bürde (eines Meßwandlers). E carga (de un transformador de medida). I prestazione (di un trasformatore di misura). N belasting (van een meettransformator). P obciążenie (przekładnika). S börda (för mättransformator). (321)
3. **internal burden** (of a current transformer) : the impedance of the secondary winding. ★ charge interne → *charge 64.* R внутренняя нагрузка (трансформатора тока). D Innenbürde (eines Stromwandlers). E carga interna (de un transformador de intensidad). I prestazione interna (di un trasformatore di corrente). N inwendige belasting (van een stroomtransformator). P obciążenie wewnętrzne (przekładnika). S egenbörda. (321)
4. **rated burden** : the value of the burden on which the accuracy requirements of a specification are based. ★ charge assignée → *charge 34.* R номинальная нагрузка. D Bemessungsbürde. E carga asignada (de un transformador de medida); carga de precisión. I prestazione nominale. N toegekende belasting. P obciążenie znamionowe. S märkbörda. (321)
5. **rated burden of an energizing circuit** (*Syn.* rated power of an energizing circuit) : → *power 159*

bureaufax

1. **bureaufax** : public facsimile transmission service between public terminals on the public switched telephone network. ★ bureaufax → *bureaufax 1.* R бюрофакс. D Bürofax. E burofax. I bureaufax. N bureaufax. P biurofaks. S postfax. (721)

burn

1. **burn in** (for repairable hardware) : a process of increasing the reliability performance of hardware employing functional operation of every item in a prescribed environment with successive corrective maintenance at every failure during the early failure period. ★ rodage → *rodage 1.* R приработка (для ремонтопригодных технических средств). D Einbrennen (für instandzusetzende Einheiten). E rodaje (de un material reparable). I rodaggio (per apparati riparabili). N inbranden (voor een te repareren eenheid). P wstępne starzenie obiektów naprawialnych. S inkörning. (191)
2. **burn in** (for a non-repairable item) : a type of screening test employing the functional operation of an item. ★ rodage → *rodage 2.* R приработка (для неремонтопригодного объекта). D Einbrennen (für nicht instandzusetzende Einheiten). E rodaje (de un material no reparable). I rodaggio. N inbranden (voor niet te repareren eenheden). P wstępne starzenie obiektów nienaprawialnych. S gallring. (191)
3. **electric burn** : a burning of the skin or an organ, caused by passing an electric current across or through the surface. ★ brûlure électrique → *brûlure 3.* R электрический ожог. D elektrische Verbrennungen. E quemadura eléctrica. I bruciatura elettrica. N elektrische brandwond. P oparzenie elektryczne. S elektrisk brännskada. (604)
4. **raster burn** : a permanent change in the characteristics of the area of the target that has been scanned, resulting in an incorrect signal corresponding to that area when a larger or differently oriented raster is scanned. ★ brûlure de mire → *brûlure 1.* R выжигание растра. D Einbrennen (des Abtastfeldes). E quemadura de mira. I bruciatura del quadro luminoso. N rasterinbranding. P zafalowanie t/a. S rasterbränning. (531)
5. **screen burn** : an area of reduced luminance resulting from the destruction of some of the active material of the screen by prolonged electron or ion impact. ★ brûlure d'écran → *brûlure 2.* R выжигание экрана. D Einbrennfleck; Schirmeinbrand. E quemadura de pantalla. I bruciatura di schermo. N inbrandvlek op een scherm. P ..... S brännfläck. (531)

burnable

1. **burnable poison** : → *poison 1*

burnishing

1. **surface burnishing facet** : → *facet 1*

burn-off

1. **burn-off chamber** : → *chamber 3*

burn-out

1. **fuel burn-out** : in reactor technology, severe local damage of a fuel element, due to failure of the coolant to dissipate all the heat produced in the element. ★ brûlage → *brûlage 1.* D Brennelementschaden. E quemado destructivo; abrasamiento. I bruciatura. N doorsmelting van splijtstof. P stopienie paliwa. S sönderbränning. (026)

burn-up

1. **burn-up** : induced nuclear transformation of atoms during reactor operation. The term may be applied to fuel or other materials. ★ combustion nucléaire → *combustion 2.* D Abbrand. E quemado. I combustione nucleare. N versplijting (van splijtstoffen); verslijting (van andere stoffen). P wypalenie. S utbränning. (026)
2. **burn-up fraction** : the fraction, usually expressed as a percentage, of an initial quantity of nuclei of a given type which has undergone burn-up. ★ taux d'épuisement → *taux 36.* D relativer Abbrand. E grado de quemado. I tasso di esaurimento. N versplijtingsfractie (van splitjtstoffen); verslijtingsfractie (van andere stoffen). P stopień wypalenia. S utbränningskvot. (026)
3. **burn-up life** : → *life 2*
4. **specific burn-up** (*Syn.* fuel irradiation level) : the total energy released per unit mass in a nuclear fuel. Commonly expressed in megawatt-days per tonne. ★ combustion massique → *combustion 1.* D spezifischer Abbrand. E grado de quemado específico; nivel de irradiación del combustible. I combustione massica; livello d'irradiazione del combustibile. N specifieke versplijting; massieke versplijting. P głębokość wypalenia. S specifik utbränning. (026)

Burrus

1. **Burrus diode** (*Syn.* surface emitting light emitting diode) : → *diode 22*

burst

1. **burst** (of pulses or oscillations) : a sequence of a limited number of distinct pulses or an oscillation of limited duration. ★ salve → *salvé 3.* R пачка (импульсов или колебаний). D schnelle transiente Störgröße (Impuls- oder Schwingung). E ráfaga de impulsos. I treno (di impulsi o di oscillazioni). N lawine (van pulsen of trillingen). P wiązka (impulsów lub drgań). S pulsskur. (161)
2. **burst** (in an ionization chamber) : sudden appearance for a short period of time of a large number of ion pairs due to one or more particles of high energy incident on the filling gas or the walls. ★ choc d'ionisation → *choc 8.* R пробой (в ионизационной камере). D Ladungsimpuls (in einer Ionisationskammer). E choque de ionización (en una cámara de ionización). I impulso di ionizzazione (in una camera di ionizzazione). N lek (in een ionisatievat). P wybuch (w komorze jonizacyjnej). S skur. (391)
3. **burst can** : → *can 1*

4. **burst firing control** : → *control 22*
5. **burst isochronous** : → *isochronous 2*
6. **burst isochronous** : → *isochronous 3*
7. **burst transmission** : → *transmission 9*
8. **colour burst guard interval** : → *interval 4*
9. **colour (reference) burst** : a signal comprising a few cycles of a sine wave of colour subcarrier frequency that is used to establish a frequency or phase reference and which may in particular be used for demodulating the chrominance signals and the identification of colours. ★ salve de couleur → *salve 4.* R цветовая (опорная) вспышка. (723)
10. **error burst** : a group of digits in which two successive erroneous digits are always separated by a number of correct consecutive digits less than a specified number; the last erroneous digit in a group and the first erroneous digit in the following group are separated by a number of correct digits at least equal to the specified number. ★ paquet d'erreurs → *paquet 9.* R пакет ошибок. D Fehlerbündel. E ráfaga de errores. I sequenza di errori; burst di errori. N foutenuitbarsting; foutsalvo. P paczka błędów. S felskur. (721)
11. **error burst length** : → *length 15*

bus

1. **balancing bus** : the node of a network the input power of which is controlled so as to equalize the sum of all other input powers and of the active power losses of the network. ★ nœud bilan → *nœud 11.* R балансирующий узел. D Bilanzknoten. E nudo equilibrado. I nodo di bilancio. N vereffeningsknooppunt. P węzeł sieciowy bilansujący. S utjämningsknutpunkt. (603)
2. **bus** (*Syn.* highway) : → *highway 1*
3. **bus admittance matrix** : → *matrix 3*
4. **bus coupler circuit-breaker** : → *circuit-breaker 3*
5. **bus impedance matrix** : → *matrix 4*
6. **bus line** : → *line 9*
7. **bus type current transformer** : → *transformer 14*
8. **infinite bus** : a network node whose voltage is predetermined and remains constant in magnitude, phase and frequency under all loading conditions. ★ nœud à puissance infinie → *nœud 8.* R шины бесконечной мощности. D starrer Knoten. E nudo de potencia infinita. I nodo a potenza infinita. N oneindig sterk knooppunt. P węzeł sieciowy o nieskończonej mocy. S styv knutpunkt. (603)
9. **load bus** (*Syn.* PQ bus) : a node with predetermined active and reactive input power. ★ nœud de consommation → *nœud 13.* R узел нагрузки. D PQ-Knoten. E nudo de consumo; nudo PQ. I nodo di consumo. N belastingsknooppunt; PQ-knooppunt. P węzeł sieciowy odbioroczy. S belastningsknutpunkt. (603)
10. **optical data bus** : → *data 26*
11. **passive bus** : a node with zero input active and reactive power. ★ nœud passif → *nœud 18.* R пассивный узел. D passiver Knoten. E nudo pasivo. I nodo passivo. N passief knooppunt. P węzeł sieciowy bezdopływowy (bierny). S nollknutpunkt. (603)
12. **PQ bus** (*Syn.* load bus) : → *bus 9*
13. **slack bus** : an infinite bus where the voltage magnitude is predetermined and which is at the same time reference node and balancing bus. ★ nœud bilan à puissance infinie → *nœud 12.* R опорный узел. D Potentialknoten; Slack. E nudo equilibrado de potencia infinita. I nodo di bilancio a potenza infinita. N oneinding sterk vereffeningsknooppunt. P węzeł sieciowy bilansujący o nieskończonej mocy. S spänningsknutpunkt. (603)
14. **voltage controlled bus** : a node with predetermined active input power and node voltage magnitude. ★ nœud à tension contrôlée → *nœud 9.* R узел с регулируемым напряжением. D PV-Knoten. E nudo de tensión controlada; nudo regulado en tensión; nudo PV. I nodo a tensione controllata. N knooppunt met gegeven spanning; PV-knooppunt. P węzeł sieciowy o zadanej mocy i napięciu. S ..... (603)
15. **Y bus matrix** (*Syn.* bus admittance matrix) : → *matrix 3*
16. **Z bus matrix** (*Syn.* bus impedance matrix) : → *matrix 4*

busbar

1. **arc furnace bus bars** : hollow water-cooled conductors, or air-cooled bars, positioned on each electrode arm, one end being connected to the flexible cables, the other to the electrode clamp. ★ barres omnibus d'un four à arc → *barre 10.* R собирательные шины дуговой печи. D Lichtbogenofen-Zuleitungen. E barras ómnibus de un horno de arco. I sbarre omnibus di un forno ad arco. N (elektrische) rails van een boogoven. P elektroda spustowa (pieca łukowego o elektrodach zanurzanych). S strömledarrör. (841)
2. **busbar** : a low-impedance conductor to which several electric circuits can be separately connected. ★ barre omnibus → *barre 5.* R сборная шина. D Sammelschiene. E barra ómnibus. I barra omnibus. N rail. P szyna zbiorcza. S samlingsskena. (151,605)
3. **busbar fault** : → *fault 2*
4. **busbar section** : → *section 1*
5. **busbar section disconnector** : → *disconnector 1*
6. **busbar trunking system** : → *system 22*
7. **busbars** (commonly called **busbar**) : in a substation, the busbar assembly necessary to make a common connection for several circuits. *Example:* three busbars for a three-phase system. ★ jeu de barres (omnibus) → *jeu de barres 3.* R система сборных шин (сборные шины). D Sammelschiene. E juego de barras. I sistema di sbarre. N railsysteem. P szyny zbiorcze; system szyn zbiorczych. S samlingsskena. (605)
8. **disconnectable busbar** : a busbar including disconnector(s) in series intended to connect or disconnect two sections of that busbar, off load. ★ jeu de barres sectionnable → *jeu de barres 5.* R система шин, секционированная разъединителями. D Sammelschiene mit Längstrennung. E juego de barras seccionable con seccionador. I sistema di sbarre sezionabile. N ..... P system szyn zbiorczych sekcjonowany odłącznikiem. S frånskiljarsektionerad samlingsskena. (605)
9. **double busbar substation** : → *substation 5*
10. **flexible busbar** : a substation busbar which is made up with flexible conductors. ★ barre tendue → *barre 8.* R гибкая шина. D Seilsammelschiene. E barra tensada; barra flexible. I sbarra tesa. N ..... P szyny giętkie. S linsamlingsskena; kabelsamlingsskena. (605)
11. **main busbar** : in a double (or triple) busbar substation, any busbar which is used under normal conditions. ★ jeu de barres principal → *jeu de barres 4.* R рабочая система шин. D Hauptsammelschiene. E juego de barras principal. I sistema di sbarre principale. N hoofdrail. P szyny zbiorcze główne; główny system szyn zbiorczych. S huvudsamlingsskena. (605)
12. **reserve busbar** : in a double (or triple) busbar substation, any busbar which is used under abnormal conditions. It is generally less well equipped than a main busbar. ★ jeu de barres de réserve → *jeu de barres 1.* R резервная система шин. D Hilfssammelschiene. E juego de barras de reserva. I sistema di sbarre di riserva. N reserverail. P szyny zbiorsze rezerwowe; rezerwowy system szyn zbiorczych. S reservsamlingsskena. (605)
13. **rigid busbar** : a substation busbar which is made up with metallic tubes or bars and which is supported by insulator posts. *Note.* — The busbar may be in the form of a self supporting bridge construction. ★ barre rigide → *barre 7.* R жесткая шина. D Profilsammelschiene. E barra rígida. I sbarra rigida. N ..... P szyny sztywne. S stel samlingsskena. (605)
14. **single busbar substation** : → *substation 26*
15. **switchable busbar** : a busbar including a switch (or a circuit-breaker) in series, intended to connect or disconnect two sections of that busbar. ★ jeu de barres tronçonnable → *jeu de barres 6.* R система шин, секционированная выключателем. D Sammelschiene mit Längskupplung. E juego de barras seccionable con interruptor o interruptor automático. I sistema di sbarre con interruzione. N ..... P system szyn zbiorczych sekcjonowany wyłącznikiem. S brytarsektionerad samlingsskena. (605)
16. **switched busbar circuit-breaker** : → *circuit-breaker 19*
17. **transfer busbar** : a back-up busbar to which any circuit can be connected independently for its bay equipment (circuit-breaker, instrument transformer), the control of this circuit being ensured by another specific bay, available for any circuit. *Note.* — This transfer busbar is generally not counted whithin "double" ("triple") busbar substation (see 605-01-17 and 605-01-18). ★ jeu de barres de transfert → *jeu de barres 2.* R обходная система шин. D Umgehungssammelschiene. E juego de barras de transferencia. I sistema di sbarre di trasferimento. N omlooprail. P szyny obejściowe. S hjälpsamlingsskena. (605)

18. **triple busbar substation** : → *substation 43*

bushing

1. **bar primary bushing type current transformer** : → *transformer 10*
2. **bushing** : a device that enables one or several conductors to pass through a partition such as a wall or a tank and insulates the conductors from it. The means of attachment (flange or fixing device) to the partition forms part of the bushing . *Notes. 1* — The conductor may form an integral part of the bushing, or be drawn into the central tube of the bushing. *2* — The bushings may be of the following types: liquid filled bushing; liquid insulated bushing; gas filled bushing; gas insulated bushing; oil impregnated paper bushing; resin bonded paper bushing; resin impregnated paper bushing; ceramic, glass or analogous inorganic material bushing; cast insulation bushing; composite bushing. ★ traversée → *traversée 5.* R проходной изолятор (ввод). D Durchführung. E aislador pasante; pasante. I isolatore passante. N doorvoerisolator. P izolator przepustowy; przepust (izolatorowy). S genomföring. (471)
3. **bushing type current transformer** : → *transformer 15*
4. **capacitance graded bushing** : a bushing in which a desired voltage grading is obtained by an arrangement of conducting layers incorporated into the insulating material. ★ traversée condensateur → *traversée 9.* R конденсаторный ввод. D kapazitiv gesteuerte Durchführung. E pasante condensador. I isolatore passante a condensatore. N capacitief gestuurde doorvoerisolator. P izolator przepustowy kondensatorowy. S kapacitivt styrd genomföring. (471)
5. **capacitor bushing** : a bushing in which a desired voltage grading is obtained by an arrangement of capacitors. ★ traversée-condensateur → *traversée-condensateur 1.* R проходной конденсатор. D Kondensatordurchführung. E pasatapas condensador. I passante a condensatore; condensatore passante. N capacitief gestuurde doorvoerisolator. P izolator (przepustowy) kondensatorowy; przepust kondensatorowy. S kondensatorgenomföring. (151)
6. **completely immersed bushing** : a bushing both ends of which are intended to be immersed in insulating media other than ambient air (e.g. oil or gas). ★ traversée immergée totalement → *traversée 15.* R полностью погружной проходной изолятор. D Kessel-Kessel-Durchführung. E pasante sumergido totalmente. I isolatore passante totalmente immerso. N scheidingswanddoorvoerisolator. P izolator przepustowy zanurzeniowy. S ..... (471)
7. **draw lead bushing** : a bushing not having an integral current-carrying conductor; a cable or other conductor may be drawn through the bushing and attached to it at one end so that it may subsequently be detached to allow the bushing to be withdrawn. ★ traversée à conducteur démontable → *traversée 6.* R проходной изолятор с протягиваемым проводником. D Durchsteck-Durchführungen. E pasante de conductor desmontable. I isolatore passante con conduttore smontabile. N doorvoerisolator voor uitneembare geleider. P izolator przepustowy szynowy. S genomföring för flexibel ledare. (471)
8. **flameproof bushing** : an insulating device carrying one or more conductors through internal or external walls of a flameproof enclosure without affecting the flameproof properties of the enclosure or its compartments. ★ traversée antidéflagrante → *traversée 8.* R взрывонепроницаемый проходной изолятор. D druckfeste Durchführung. E aislador antideflagrante. I guarnizione a tenuta di fiamma. N drukvaste doorvoer. P przepust ognioszczelny. S explosionstät genomföring. (426)
9. **indoor bushing** : a bushing both ends of which are intended to be in ambient air at atmospheric pressure but not exposed to outdoor atmospheric conditions. ★ traversée d'intérieur → *traversée 12.* R проходной изолятор внутренней установки. D Innenraum-Durchführung. E pasante de interior. I isolatore passante per interno. N doorvoerisolator voor binnenopstelling. P izolator przepustowy wnętrzowy. S inomhusgenomföring. (471)
10. **indoor-immersed bushing** : a bushing one end of which is intended to be in ambient air but not exposed to outdoor atmospheric conditions and the other end to be immersed in an insulating medium other than ambient (e.g. oil or gas). ★ traversée immergée d'intérieur → *traversée 14.* R погружной проходной изолятор внутренней установки. D Innenraum-Kessel-Durchführung. E pasante sumergido de interior. I isolatore passante immerso per interno. N invoerisolator voor binnenopstelling. P izolator przepustowy wnętrzowo-zanurzeniowy. S ..... (471)
11. **(insulating) bushing** : an insulator used to form a passage for a conductor through a non-insulating partition. ★ (isolateur de) traversée → *traversée 2.* R проходной изолятор. D Durchführung; Durchführungsisolator. E pasatapas; pasamuros; borna. I (isolatore) passante. N doorvoerisolator. P izolator przepustowy; przepust (izolacyjny). S isolerbussning. (151)
12. **outdoor bushing** : a bushing both ends of which are intended to be in ambient air at atmospheric pressure and exposed to outdoor atmospheric conditions. ★ traversée d'extérieur → *traversée 10.* R проходной изолятор наружной установки. D Freiluft-Durchführung. E pasante de exterior. I isolatore passante per esterno. N doorvoerisolator voor buitenopstelling. P izolator przepustowy napowietrzny. S utomhusgenomföring. (471)
13. **outdoor-immersed bushing** : a bushing one end of which is intended to be in ambient air and exposed to outdoor atmospheric conditions and the other end to be immersed in an insulating medium other than ambient air (e.g. oil or gas). ★ traversée immergée d'extérieur → *traversée 13.* R погружной проходной изолятор наружной установки. D Freiluft-Kessel-Durchführung. E pasante sumergido de exterior. I isolatore passante immerso per esterno. N invoerisolator voor buitenopstelling. P izolator przepustowy napowietrzno-zanurzeniowy. S ..... (471)
14. **outdoor-indoor bushing** : a bushing both ends of which are intended to be in ambient air at atmospheric pressure. One end is intended to be exposed and the other end not to be exposed to outdoor atmospheric conditions. ★ traversée d'extérieur-intérieur → *traversée 11.* R проходной изолятор наружно-внутренней установки. D Freiluft-Innenraum-Durchführung. E pasante exterior — interior. I isolatore passante per esterno-interno. N doorvoerisolator voor binnen-buitenopstelling. P izolator przepustowy napowietrzno-wnętrzowy. S utomhus-inomhusgenomföring. (471)

busied

1. **busied out** (*Syn.* blocked) : pertaining to a traffic-carrying device that has been deliberately made unavailable for use. ★ bloqué → *bloqué 1.* R блокированный. D blockiert; gesperrt. E bloqueado. I bloccato; escluso dal servizio. N geblokkeerd. P zablokowany. S blockerad. (714)
2. **busied out** (*Syn.* blocked) : pertaining to a resource that has been deliberately made unavailable for use. ★ bloqué → *bloqué 2.* D außer Betrieb. P zablokowany. (715)

busy

1. **bouncing busy hour** (*Syn.* peak busy hour) : → *hour 6*
2. **busy** : pertaining to a traffic-carrying device that is being used or has been reserved for use. ★ occupé → *occupé 3.* R занятый. D besetzt; belegt. E ocupado. I occupato. N bezet. P zajęty. S upptagen. (714)
3. **busy** : pertaining to a resource that is being used or has been reserved for use. ★ occupé → *occupé 4.* D belegt. P zajęty. (715)
4. **busy condition** : → *condition 2*
5. **busy hour** : → *hour 3*
6. **busy signal** (*Syn.* engaged signal) : → *signal 83*
7. **busy state** : → *state 5*
8. **busy test** : → *test 10*
9. **busy tone** : → *tone 1*
10. **day to busy hour ratio** : → *ratio 26*
11. **mean busy hour** (*Syn.* time consistent busy hour) : → *hour 9*
12. **peak busy hour** : → *hour 6*
13. **post selected busy hour** (*Syn.* peak busy hour) : → *hour 6*
14. **time consistent busy hour** : → *hour 9*

busying

1. **backward busying** : a facility whereby the application of a busy condition at the incoming end of a traffic circuit, or a fault condition on the circuit, automatically busies the outgoing end of the circuit. ★ coupure de disponibilité par l'extrémité entrante → *coupure 9.* R обратное занятие. D Rueckwaertsbelegung. E ocupación hacia atrás. I blocco a

ritroso. N in beslag nemen in terugwaartse richting. P zajmowanie wstecz. S beläggning i backriktning. (714)

2. **forward busying** (*Syn.* forward seizure) : changing the states of devices and links from idle to busy as they are successively seized in a forward set-up. ★ prise en avant → *prise 34.* R прямое занятие. D Vorwaertsbelegung. E ocupación hacia adelante. I impegno in avanti. N in beslag nemen in voorwaartse richting. P zajmowanie w przód. S beläggning i framriktning. (714)

butt

1. **butt contact** : → *contact 13*
2. **butt joint** : → *joint 3*

butting

1. **butting connector** : → *connector 3*

button

1. **button** (of a push-button switch) : control device of a push-button switch which moves under manual pressure, generally in the direction of the axis of the button. ★ bouton → *bouton 1.* R кнопка кнопочного переключателя. D Druckknopf (eines Druckknopfschalters). E botón (de un pulsador). I pulsante; pulsante (di un interruttore a pressione). N drukknop; druktoets. P przycisk. S (tryck)knapp. (581)
2. **illuminated button** : a button of a push-button switch which has associated with a lamp or lamps which can give a visual indication by illumination. The lamp circuitry or light source may be related to or independent of the button action. ★ bouton-poussoir lumineux → *bouton-poussoir 2.* R кнопка с сигнализацией. D beleuchteter Druckknopf. E pulsador luminoso. I pulsante luminoso. N verlichte drukknop; verlichte druktoets. P przycisk podświetlony. S lysande (tryck)knapp. (581)
3. **piano key button** : a button of a push-button switch which is generally actuated by a movement of rotation about a distant axis as with a piano key. ★ touche piano → *touche 5.* R клавиша. D Klavier-Taste. E pulsador de tecla de piano. I pulsante attuatore a rotazione. N klavierdrukknop; klavierdruktoets. P klawisz (łącznika). S tangentknapp. (581)
4. **rocker button** : a button pivoted across the middle, and sensitive to pressure at each end. ★ bouton à bascule → *bouton 2.* R клавиша коромыслового типа. D Wippe. E pulsador de báscula. I pulsante oscillante; pulsante attuatore a rotazione. N wip drukknop; wip druktoets. P przycisk kołyskowy. S vippknapp. (581)

buzz

1. **buzz** (in telecommunications) : noise appearing as a more or less regular and rapid succession of clicks. ★ crépitement → *crépitement 1.* R жужжание (в электросвязи). D Prasseln (in der Telekommunikation). E crepitación (en telecomunicación). I crepitio. N gekraak. P trzaski sypkie. S surr. (702)

buzzer

1. **buzzer** (in a telephone set) : a call indicating device producing a buzzing sound by means of a vibrating armature. ★ ronfleur → *ronfleur 1.* R зуммер (в телефонном аппарате). D Summer. E zumbador. I ronzatore. N zoemer. P buczek; brzęczyk. S summer. (722)

by-pass

1. **by-pass arm** : → *arm 5*
2. **by-pass feeder** : → *feeder 2*
3. **three-switch mesh substation with bypass** : → *substation 39*

by-path

1. **by-path** : a wired representation of the test paths of a link connected switching stage constituting a part of a marker and used for selecting the most appropriate path through this switching stage. ★ réseau-image → *réseau-image 1.* R обходной путь. D Querweg. E red imagen. I rete immagine. N ..... P odwzorowanie (sieci komutacyjnej). S förbikoppling. (714)

byte

1. **byte** (*Syn.* octet; 8-bit byte) : an ordered set of eight binary digits. ★ octet → *octet 3.* R байт. D 8-bit-Zeichen. E octete. I ottetto. N octet-byte. P oktet. S åttabitsgrupp. (702,704,721)
2. **n-bit byte** : an ordered set of a specified number of binary digits operated upon as an entity. ★ multiplet → *multiplet 1.* R n - битовый байт. D n-Bit-Byte. E multiplete. I multipletto; n-upletto. N n-waardig byte; n-bits byte. P bajt n-bitowy; multiplet. S n-bitsgrupp. (702,704,721)
3. **n-bit byte (2)** : an ordered set of n binary digits. ★ n-uplet → *n-uplet 2.* R n - битовый байт. D n-bit-Zeichen. E n-teto. I gruppo di n bit. N n-bit-byte. P n-bitowy bajt. S n-bitsgrupp. (721)
4. **quartet (byte)** (*Syn.* 4-bit byte (USA)) : an ordered set of four binary digits. *Note.* — The term quadribit is deprecated in the sense of quartet. ★ quartet → *quartet 1.* R ..... D 4-bit-Zeichen. E cuartete. I gruppo di 4 bit. N quartet-byte. P kwartet. S fyrbitsgrupp. (721)
5. **quintet (byte)** (*Syn.* 5-bit byte (USA)) : an ordered set of five binary digits. ★ quintet → *quintet 1.* R ..... D 5-bit-Zeichen. E quintete. I gruppo di 5 bit. N quintet-byte. P kwintet. S fembitsgrupp. (721)
6. **septet (byte)** (*Syn.* 7-bit byte (USA)) : an ordered set of seven binary digits. ★ septet → *septet 1.* R ..... D 7-bit-Zeichen. E septete. I gruppo di 7 bit. N septet-byte. P septet. S sjubitsgrupp. (721)
7. **sextet (byte)** (*Syn.* 6-bit byte (USA)) : an ordered set of six binary digits. ★ sextet → *sextet 1.* R ..... D 6-bit-Zeichen. E sextete. I gruppo di 6 bit. N sextet-byte. P sekstet. S sexbitsgrupp. (721)
8. **triplet (byte)** (*Syn.* 3-bit byte (USA)) : an ordered set of three binary digits. *Note.* — The term tribit is deprecated in the sense of triplet. ★ triplet → *triplet 1.* R триплет. D 3-bit-Zeichen. E triplete. I terna. N triplet-byte. P triplet. S trebitsgrupp. (702,721)
9. **3-bit byte** (*Syn.* triplet (byte)) : → *byte 8*
10. **4-bit byte** (*Syn.* quartet (byte)) : → *byte 4*
11. **5-bit byte** (*Syn.* quintet (byte)) : → *byte 5*
12. **6-bit byte** (*Syn.* sextet (byte)) : → *byte 7*
13. **7-bit byte** (*Syn.* septet (byte)) : → *byte 6*
14. **8-bit byte** (*Syn.* byte) : → *byte 1*

byte-serial

1. **byte-serial transmission** : → *transmission 10*

C

C

1. **class C operation** : → *operation 11*

cab

1. **cab cable** : → *cable 5*
2. **driver's cab** : a part of a vehicle used for driving the vehicle or train, forming a separate compartment. ★ cabine de conduite → *cabine 2.* R кабина управления. D Führerraum. E cabina de conducción. I cabina di guida. N bestuurderscabine; stuurstand van de machinist. P kabina sterownicza. S förarhytt. (811)

cabin

1. **track paralleling cabin** (*Syn.* track sectioning cabin) : → *cabin 2*
2. **track sectioning cabin** (in electric traction) (*Syn.* track paralleling cabin (in electric traction)) : a substation equipped with busbars and circuit breakers providing some or all of the functions of sectioning and of connecting the contact lines in parallel, including possibly any line feeders converging on it. ★ poste de sectionnement → *poste 34.* R пост секционирования; пост параллельного включения (в электрической тяге). D Streckentrennung (bzw Streckenparallelschaltungswerk). E centro de seccionamiento; centro de puesta en paralelo. I posto di sezionamento; posto di parallelo. N schakelstation. P kabina sekcyjna. S skenskarvförbindning. (811)

cabinet

1. **cabinet radiation** : → *radiation 8*

cable

1. **aerial (insulated) cable** : an insulated cable designed to be suspended overhead and outdoors. ★ câble aérien (isolé) → *câble 27.* R воздушный (изолированный) кабель. D (isoliertes) Lujtkabel. E cable aéreo. I cavo aero (isolato). N spanleiding; hangkabel. P kabel lub przewód napowietrzny (izolowany). S hängkabel. (461)
2. **arc furnace flexible cables** : air or water-cooled cables to carry the heavy secondary currents of the furnace transformer to the electrodes. ★ câbles souples d'un four à arc → *câble 66.* R гибкие кабели дуговой печи. D bewegliche Zuleitungen eines Lichtbogenofens. E cables flexibles de un horno de arco. I cavi flessibili di un forno ad arco. N soepele aansluitkabels (van een boogoven). P kable giętkie (pieca łukowego). S elektrodtilledare. (841)
3. **belted cable** : a multiconductor cable in which part of the insulation is applied to each conductor individually, and the remainder is applied over the assembled cores. ★ câble à ceinture → *câble 3.* R кабель с поясной изоляцией. D Gürtelkabel. E cable con cintura. I cavo con cintura isolante. N gordelkabel. P kabel o izolacji rdzeniowej. S mantelisolerad kabel. (461)
4. **bundle assembled aerial cable** : an aerial cable consisting of a group of insulated conductors, with or without an uninsulated conductor, twisted together. ★ conducteurs isolés assemblés en faisceau → *conducteur 37.* R воздушный кабель пучковой скрутки. D isolierte Freileitungsleiter. E conductores aislados cableados en haz. I cavo aereo riunito a fascio. N samengestelde spanleiding; samengestelde hangkabel. P kabel napowietrzny wiązkowy. S hängspiralkabel. (461)
5. **cab cable** : control circuit cabling connecting the cab equipment to the train lines of the vehicle. ★ fil de conduite → *fil 19.* R провод управления. D Steuerkabel. E cable de conducción. I filo di comando (in multiplo). N stuurstroomkabel. P przewód sterowniczy kabinowy. S styrkabel. (811)
6. **cable adaptor** : → *adaptor 2*
7. **cable assembly** (*Syn.* optical cable assembly) : → *assembly 17*
8. **cable clamp** : → *clamp 5*
9. **cable coupler** : → *coupler 6*
10. **cable (distribution system) receiver** : → *receiver 1*
11. **cable duct** : → *duct 3*
12. **cable handler** : → *handler 2*
13. **cable outlet** (*Syn.* cable adaptor) : → *adaptor 2*
14. **cable rack** : → *rack 2*
15. **cable screen clamp** : → *clamp 6*
16. **cable seal** : → *seal 2*
17. **cable shielding clamp** (*Syn.* cable screen clamp) : → *clamp 6*
18. **cable support sleeve** : → *sleeve 1*
19. **cable television** : → *television 2*
20. **cable trough** : → *trough 1*
21. **cable tunnel** : → *tunnel 1*
22. **cable type current transformer** : → *transformer 16*
23. **collectively shielded cable** : a multicore cable having a shield arranged around the cores concentrically with the axis of the cable. ★ câble à écran collectif → *câble 6.* R кабель с общим экраном. D gemeinsam geschirmtes Kabel. E cable con pantalla colectiva. I cavo multipolare a schermo unico. N gezamenlijk afgeschermde leiding; gezamenlijk afgeschermde kabel. P kabel o wspólnej żyle powrotnej. S skärmad kabel. (461)
24. **concentric neutral cable** : a cable having a concentric conductor which is intended to be used for the neutral. ★ câble à neutre périphérique → *câble 14.* R кабель с концентрической нейтралью. D Kabel mit konzentrischem Neutralleiter. E cable con neutro concentrado. I cavo con neutro concentrico. N leiding met concentrische nul; kabel met concentrische nul. P kabel o żyle zerowej współosiowej. S kabel med koncentrisk ledare. (461)
25. **distribution cable** : cable between a cross-connection point and a distribution point or another cross-connection point. ★ câble de distribution → *câble 33.* R распределительный кабель. D Verzweigungskabel. E cable de distribución. I cavo di distribuzione. N aftakkabel; distributiekabel; secundaire abonneekabel. P kabel rozdzielczy. S fördelningskabel. (722)
26. **elementary cable section** : → *section 8*
27. **external gas pressure cable** : a pressure cable usually pipe-type in which the pressurizing fluid is a gas separated from the insulation by a diaphragm. ★ câble à pression externe de gaz → *câble 16.* R газонаполненный кабель внешнего давления. D Gasaußendruckkabel. E cable con presión externa de gas. I cavo a pressione esterna di gas. N kabel met uitwendige gasdruk. P kabel gazowy o ciśnieniu zewnętrznym. S gaskabel. (461)
28. **feeder cable** (*Syn.* feeder) : an electrical connection between the contact line and a substation. ★ fil → *fil 16.* R питающий кабель. D Speiseleitung. E cable de alimentación; arteria. I conduttore d'alimentazione (di sottostazione); alimentatore (di sottostazione). N voedingskabel. P przewód zasilający. S matarledning. (811)
29. **flat (multicore) cable** : a multicore cable having cores or groups of cores arranged in parallel flat formation. ★ câble méplat → *câble 46.* R плоский (многожильный) кабель. D Flachkabel (mehradrig). E cable plano. I cavo piatto (multipolare). N meeraderige of veeladerige) leiding; platte meeraderige of veeladerige) kabel. P kabel (wielożyłowy) płaski. S flatkabel. (461)
30. **flexible cable** : a cable which is required to be capable of being flexed while in service and of which the structure and materials are such as to fulfill this requirement. ★ câble souple → *câble 61.* R гибкий кабель. D flexibles Kabel. E cable flexible. I cavo flessibile. N buigzame leiding. P przewód giętki. S anslutningskabel. (461)
31. **grooved cable** (*Syn.* slotted core cable) : a loose cable structure in which the optical fibres are fitted into grooves made in a cylindrical element. *Note.* — Large cables can be produced by stranding two or more cylindrical elements together, the whole assembly being sheathed. ★ câble à jonc rainuré → *câble 12.* R кабель с укладкой волокон в канавки. D Kammerkabel. E cable acanalado; cable de núcleo ranurado.

I cavo scanalato. N gegroefde kabel. P kabel rozetkowy. S spårkabel. (731)

32. **heating cable** : a cable, with or without a shield or a metallic sheath, intended to give off heat for heating purposes. ★ câble chauffant → *câble 29.* R нагревательный кабель. D Heizkabel. E cable calefactor. I cavo per riscaldamento. N verwarmingskabel. P kabel grzejny. S värmekabel. (461,841)

33. **heating cable unit** : → *unit 29*

34. **individually screened cable** (*Syn.* radial field cable) : a cable in which each core is covered with an individual screen. ★ câble à champ radial → *câble 4.* R кабель с отдельно экранированными жилами; кабель с радиальным электрическим полем. D einzelgeschirmtes Kabel; Radialfeldkabel. E cable de campo radial. I cavo con anime singolarmente schermate; cavo a campo radiale. N kabel met radiaal veld radial (field cable). P kabel o polu elektrycznym promieniowym; kabel o żyłach ekranowych. S partskärmad kabel. (461)

35. **insulated cable** : an assembly consisting of : — one or more cores, — their individual covering(s) (if any), — assembly protection (if any), —protective covering(s) (if any). Additional uninsulated conductor(s) may be included in the cable. ★ câble (isolé) → *câble 45.* R изолированный кабель. D Kabel. E cable (aislado). I cavo (isolato). N geïsoleerde leidingen; geïsoleerde kabels. P przewód (izolowany). S kabel. (461)

36. **insulated shield cable system** : → *system 91*

37. **internal gas pressure cable** : a pressure cable in which the pressurizing fluid is a gas in contact with the insulation ; it may be self-contained or pipe-type cable. ★ câble à pression interne de gaz → *câble 17.* R газонаполненный кабель внутреннего давления. D Gasinnendruckkabel. E cable con presión interna de gas. I cavo a pressione interna di gas. N kabel met inwendige gasdruk. P kabel gazowy o ciśnieniu wewnętrznym. S gaskabel. (461)

38. **jumper cable** (between vehicles) : an electric coupler in which the electrical connections between coupled vehicles are made through a suitable insulated external cable, which may be fixed or removable. ★ câblot d'accouplement → *câblot 1.* R кабель междувагонного соединения (между единицами подвижного состава). D Kupplungsleitung. E cable de acoplamiento. I presa di accoppiamento. N koppelkabel (tussen voertuigen). P kabel sprzęgnika; kabel łącznika. S anslutningskabel. (811)

39. **lightning protection cable** (in electric traction) : an earthed metal wire fitted above the overhead contact line to protect it against lightning. ★ câble de garde → *câble 36.* R провод для защиты от грозы (в электрической тяге). D Blitzschutzseil (bzw Erdseil). E cable de tierra (en tracción eléctrica); cable pararrayos (en tracción eléctrica). I fune di guardia. N bliksembeveiligingslijn (bij elektrische tractie). P linka odgromowa. S åskskyddsledning. (811)

40. **link cable** : a cable between two cross-connection points providing flexibility and relief. ★ câble de rocade → *câble 40.* R соединительный кабель. D Querkabel. E cable de enlace. I trecciola di permutazione. N dwarsverbindingskabel. P kabel rokadowy. S förbindelsekabel. (722)

41. **loose cable structure** : → *structure 2*

42. **loose tube cable** : a loose cable structure in which the fibres are fitted in one or more tubes. ★ câble à tubes → *câble 24.* R кабель со свободной укладкой волокон в трубку. D Hohlader-Kabel. E cable holgado en tubos. I cavo a tubetto morbido. N losse buiskabel. P kabel rurkowy (swobodny). S kabel med löst sekundärskyddad fiber. (731)

43. **main cable** : a cable, usually of large capacity, connecting the local switching entity to a cross-connection point. ★ câble de transport → *câble 43.* R магистральный кабель. D Hauptkabel. E cable de transporte. I cavo primario. N voedingskabel; primaire abonneekabel. P kabel główny. S huvudkabel. (722)

44. **multiconductor cable** : a cable having more than one conductor, some of which may be uninsulated. ★ câble multiconducteur → *câble 48.* R многожильный кабель. D Mehrleiterkabel. E cable multiconductor. I cavo a piu' conduttori. N ..... P przewód wielożyłowy. S flerledarkabel. (461)

45. **multicore cable** : a cable having more than one core. *Note.* — The French term "cable multipolaire" is more specifically used to designate the cable constituting the phases of a multiphase system (example : three-core cable). ★ câble multiconducteur → *câble 49.* R кабель с несколькими изолированными токопроводящими жилами. D mehradriges Kabel. E cable multipolar. I cavo multipolare. N leiding; meeraderige kabel; veeladerige leiding; veeladerige kabel. P kabel wielożyłowy. S flerledarkabel. (461)

46. **multifibre cable** : an optical cable that contains two or more optical fibres, each of which may transmit independent signals. ★ câble multifibre → *câble 50.* R многоволоконный кабель. D Vielfaserkabel. E cable multifibra. I cavo multifibre. N multivezelkabel. P kabel wielowłóknowy. S flerfiberkabel. (731)

47. **oil-filled cable** : a self-contained pressure cable in which the pressurizing fluid is the insulating oil and which is designed to facilitate the free movement of the oil within the cable. ★ câble à huile fluide → *câble 10.* R маслонаполненный кабель. D Ölkabel. E cable de aceite fluido. I cavo ad olio. N oliedrukkabel. P kabel olejowy. S oljekabel. (461)

48. **oil-filled pipe-type cable** : a pipe-type cable in which the pressurizing fluid is the insulating oil. ★ câble à huile fluide en tuyau → *câble 11.* R маслонаполненный кабель в трубопроводе. D Öl-Rohrdruckkabel. E cable de aceite fluido en tubo. I cavo ad olio tipo pipe (in tubazione di acciaio). N oliedrukpijpkabel. P kabel olejowy rurowy. S oljefylld rörkabel. (461)

49. **optical cable** (*Syn.* optical fibre cable) : an assembly comprising one or more optical fibres or fibre bundles inside a common covering designed to protect them against mechanical stresses and other environmental influences while retaining the transmission quality of the fibres. *Note.* — May also contain metallic conductors. ★ câble optique → *câble 55.* R оптический кабель; волоконно-оптический кабель. D optisches Kabel; Lichtwellenleiter-Kabel; Glasfaserkabel. E cable óptico; cable de fibra óptica. I cavo ottico; cavo a fibre ottiche. N optische kabel; optische vezelkabel. P kabel światłowodowy. S optokabel. (731)

50. **optical cable assembly** : → *assembly 17*

51. **optical fibre cable** (*Syn.* optical cable) : → *cable 49*

52. **output cable** : a cable used for electrical connection between the battery and the load or the charger. ★ câble de sortie → *câble 41.* R выходной кабель. D Endkabel. E cable de salida. I cavo di uscita. N aansluitkabel. P kabel połączeniowy (akumulatorowy). S batterikabel. (486)

53. **pipe-type cable** : a pressure cable in which the cores are drawn into a pipe, usually of steel and already installed, and which in service contains a fluid under pressure. ★ câble en tuyau → *câble 44.* R кабель в трубопроводе. D Rohrdruckkabel. E cable en tubo. I cavo tipo pipe (in tubazione di acciaio). N pijpkabel. P kabel ciśnieniowy rurowy. S rörkabel. (461)

54. **pressure cable** : a cable in which the insulation is maintained under pressure by means of a fluid. ★ câble à pression → *câble 15.* R кабель давления. D Druckkabel. E cable con presión. I cavo a pressione. N olie/gasdrukkabel. P kabel ciśnieniowy. S tryckkabel. (461)

55. **radial field cable** (*Syn.* individually screened cable) : → *cable 34*

56. **return cable** (*Syn.* track negative cable) : a conductor connecting the running rails or return current rail to the substation. ★ câble de retour → *câble 38.* R обратный провод; отрицательный рельсовый провод. D Stromrückleitungskabel. E cable de retorno. I cavo di ritorno. N retourstroomkabel. P przewód powrotny. S återledningskabel. (811)

57. **ribbon cable** : an optical cable in which the optical fibres are incorporated in a flat ribbon. *Notes. 1* — Large cables can be produced by stacking two or more ribbons together, the whole assembly being sheathed. *2* — Ribbon cable may be either a tight jacketed or loose cable structure. ★ câble à rubans → *câble 19.* R ленточный кабель. D Bandkabel. E cable encintado. I cavo a nastro. N lintkabel. P kabel tasiemkowy; kabel wstęgowy. S bandkabel. (731)

58. **self-contained pressure cable** : a cable in which the pressuring fluid is contained within the metallic sheath applied during manufacture. ★ câble à pression sous gaine métallique → *câble 18.* R кабель с центральным маслопроводящим каналом (кабель в собственной оболочке). D Manteldruckkabel. E cable con presión bajo cubierta meta'lica. I cavo a pressione sotto guaina metallica. N ..... P ..... S tryckkabel. (461)

59. **separately lead-sheathed cable** (*Syn.* S.L. cable) : a three-core cable in which each core is individually sheathed with

lead or lead alloy. ★ câble triplomb → *câble 63.* R кабель с отдельно освинцованными жилами. D Dreibleimantelkabel. E cable tres plomos. I cavo tripolare a 3 guaine di piombo. N drieloodmantelkabel. P kabel trójpowłokowy. S partskärmad kabel med skärmar av bly. (461)

60. **single-conductor cable** (*Syn.* single-core cable) : a cable having only one core. *Note.* — The French term "cable unipolaire" is more specifically used to designate the cable constituting one of the phases of a multiphase system. ★ câble à un conducteur → *câble 25.* R одножильный кабель. D Einleiterkabel; einadriges Kabel. E cable unipolar. I cavo a 1 conduttore; cavo unipolare. N eenaderige leiding; eenaderige kabel. P przewód jednożyłowy. S enledarkabel. (461)
61. **single-core cable** (*Syn.* single-conductor cable) : → *cable 60*
62. **single-phase concentric neutral cable** : a single-core cable having a concentric conductor which is intended to be used for the neutral. ★ câble monophasé à neutre périphérique → *câble 47.* R одножильный кабель с концентрической нейтральной жилой. D Einphasenkabel mit konzentrischem Neutralleiter. E cable monofa'sico con neutro concéntrico. I cavo monofase con neutro concentrico. N eenaderige leiding met concentrische nul; eenaderige kabel met concentrische nul. P kabel jednofazowy o żyle zerowej wspo'łosiowej. S enledarkabel med koncentrisk ledare. (461)
63. **S.L. cable** (*Syn.* separately lead-sheathed cable) : → *cable 59*
64. **slotted core cable** (*Syn.* grooved cable) : → *cable 31*
65. **solidly bonded single-core cable system** : → *system 190*
66. **split concentric cable** : a cable having two conductors in a single concentric layer separated from each other by insulating material. ★ câble à conducteur périphérique segmenté → *câble 5.* R расщепленный концентрический кабель. D geteilt-konzentrisches Kabel. E cable con conductor concéntrico segmentado. I cavo con concentrico suddiviso. N ..... P kabel współosiowy o dwóch żyłach wzajemnie odizolowanych. S ..... (461)
67. **three-phase concentric neutral cable** : a three-core cable having a concentric conductor which is intended to be used for the neutral. ★ câble triphasé à neutre périphérique → *câble 62.* R трехжильный кабель с концентрической нейтральной жилой. D Dreiphasenkabel mit konzentrischem Neutralleiter. E cable trifa'sico con neutro concéntrico. I cavo trifase con neutro concentrico. N drieaderige leiding met concentrische nul; drieaderige kabel met concentrische nul. P kabel trójfazowy o żyle zerowej zewnętrznej współosiowej wielodrutowej. S treledarkabel med koncentrisk ledare. (461)
68. **tight jacketed cable** : an optical cable in which the secondary coated optical fibres are not free to take up their own position but are constrained. ★ câble à structure serrée → *câble 22.* R кабель с плотно прилегающей оболочкой. D Vollader-Kabel. E cable con recubrimiento ajustado. I cavo ottico a struttura compatta. N kabel met vaste vezelbeschermmantel. P kabel zwarty. S kabel med fast sekundärskyddad fiber. (731)
69. **(track) jumper cable** : an insulated cable used for maintaining the electrical continuity of the conductor rail at a gap. ★ câble de pontage → *câble 37.* R стыковой соединитель. D Überbrückungskabel. E cable de puenteo. I cavo di continuità. N doorverbindingskabel (van de stroomrail). P kabel łącznikowy sekcyjny. S strömskeneförbindning. (811)
70. **track negative cable** (*Syn.* return cable) : → *cable 56*
71. **transposition (of insulated cables)** : → *transposition 5*
72. **underground cable** : an electric line with insulated conductors buried directly in the ground, or laid in cable ducts, pipes, troughs, etc. *Note.* — The same expression is used to describe the item physically. ★ ligne souterraine → *ligne 134.* R закрытая [кабельная] электрическая линия. D Kabel. E línea subterránea. I linea sotterranea. N ondergrondse leiding; kabel. P linia elektroenergetyczna kablowa. S jordkabelledning. (601)
73. **welding cables** : insulated electrical conductors between the welding power source and the arc. ★ câbles de soudage → *câble 65.* R сварочные кабели. D Schweißleitungen. E cables de soldadura. I cavi di saldatura. N laskabels. P kable spawalnicze. S svetskablar. (851)
74. **welding return cable** : the cable between the workpiece and the welding power source. ★ câble de retour → *câble 39.* R сварочный обратный кабель. D Schweißstromrückleitung. E cable de retorno. I cavo di ritorno. N werkstukkabel. P kabel spawalniczy prądu powrotnego. S återledare. (851)
75. **welding supply cable** : the cable between the welding power source and the electrode holder, torch or gun. ★ câble d'alimentation → *câble 32.* R сварочный питающий кабель. D Schweißzuleitung. E cable de alimentación. I cavo di alimentazione. N laskabel. P kabel spawalniczy zasilający. S svetsledare. (851)

cabled

1. **cabled distribution** : → *distribution 3*
2. **(cabled distribution) sub-system** : → *sub-system 1*
3. **cabled distribution system** : → *system 24*

cadmium

1. **effective cadmium cut-off** : that energy value which, for a given experimental configuration, is determined by the condition that, if a cadmium cover surrounding a detector were replaced by a fictitious cover opaque to neutrons with energy below this value and transparent to neutrons with energy above this value, the observed detector response would be unchanged. ★ seuil cadmium effectif → *seuil 9.* D effektive Kadmium-Schwellenenergie. E umbral efectivo de cadmio. I soglia di taglio effettiva del cadmio. N effectieve cadmiumgrens. P efektywna energia odcięcia kadmowego. S effektiv kadmiumavskärningsenergi. (026)

cage

1. **cage antenna** : → *antenna 25*
2. **cage induction motor** : → *induction motor 2*
3. **cage synchronous motor** : → *motor 11*
4. **cage winding** : → *winding 9*
5. **squirrel cage induction motor** (*Syn.* cage induction motor) : → *induction motor 2*
6. **squirrel cage winding** (*Syn.* cage winding) : → *winding 9*

calculated

1. **calculated loudness level** : → *level 12*

calculation

1. **calculation of efficiency from summation of losses** : → *efficiency 4*
2. **calculation of efficiency from total loss** : → *efficiency 5*
3. **direct calculation of efficiency** : → *efficiency 15*
4. **indirect calculation of efficiency** : → *efficiency 26*
5. **load flow calculation** : a steady-state network calculation where the known variables are input and output powers at the nodes and possibly voltages at specified nodes. ★ calcul de flux de puissance → *calcul 2.* R расчет потокораспределения. D Lastflußrechnung. E cálculo del flujo de cargas. I calcolo del flusso di potenza. N berekening van de belastingsverdeling. P obliczanie rozpływu mocy. S beräkning av belastningsfördelning. (603)
6. **network calculation** : the computation of system state variables of a network by using system parameters and other known system state variables. ★ calcul de réseau → *calcul 3.* R пасчет электрической сети. D Netzberechnung. E cálculo de redes. I calcolo di rete. N netberekening. P obliczanie sieci. S nätberäkning. (603)
7. **short-circuit calculation** : the computation of the currents and voltages within a network subjected to a short circuit. ★ calcul de court-circuit → *calcul 1.* R расчет короткого замыкания. D Kurzschlußberechnung. E cálculo de cortocircuito. I calcolo di cortocircuito. N kortsluitberekening. P obliczanie prądów zwarciowych. S kortslutningsberäkning. (603)

calibrated

1. **calibrated driving machine test** : → *test 11*

calibrating

1. **calibrating quantity** : → *quantity 3*

calibration

1. **calibration** : all the operations for the purpose of determining the values of the errors and, if necessary, other metrological properties of a measuring instrument. *Note.* — The metrological use of the term "calibration" is often extended to include operations such as adjustments, scale graduation, etc.. This use is deprecated. ★ étalonnage → *étalonnage 1.* R поверка.

D Kalibrierung. E calibrado; contraste. I taratura. N kalibratie. P wzorcowanie. S kalibrering. (301)

2. **calibration tape** : → *tape 3*

call

1. **abandoned call attempt** : → *attempt 1*
2. **blocked call attempt** : a call attempt that cannot be satisfied immediately owing to a lack of resources in the network. ★ tentative d'appel bloquée → *tentative 7.* D blockierter Verbindungsversuch. P wywołanie zablokowane. (715)
3. **booked call** : a process whereby a subscriber may have his terminal called by the network at given times, with or without an audible signal. ★ appel à heure fixe → *appel 2.* R вызов в назначенное время. D vorgebuchter Anruf. E llamada a hora fija. I chiamata prenotata. N aangemelde oproep. P wywołanie na zamówienie. S beställt anrop. (721)
4. **broadcast call** : a multi-address call in which signals are transmitted simultaneously by the calling terminal to all the called terminals. ★ communication de diffusion → *communication 6.* R циркулярное соединение. D verteilen. E comunicación de difusión. I chiamata multiindirizzo. N omroepgesprek. P połączenie rozsiewcze. S allanrop. (721)
5. **broadcast conference call** : a restricted conference call in which only one nominated terminal can transmit to and receive from the other terminals. ★ conférence-diffusion → *conférence-diffusion 1.* R циркулярная конференц-связь. D Verteil-Rundsenden. E conferencia difusión. I chiamata multipla per conferenza. N ..... P połączenie konferencyjne rozsiewcze. S konferensanrop till alla. (721)
6. **call** (sens 2) : the establishment and use of a complete connection, following a call attempt. ★ communication → *communication 3.* R вызов. D Gesprächsverbindung. E comunicación. I comunicazione. N gesprek. P połączenie telekomunikacyjne. S anrop. (701,714,715,722)
7. **call** (in software) (*Syn.* procedure call) : the use of a procedure name in an expression or statement which causes the execution of the procedure when encountered. ★ appel → *appel 1.* R заявка (в программном обеспечении); процедурная заявка; запрос. D Aufruf; Prozeduraufruf. E llamada (en software); llamada de procedimiento. I chiamata (in software). N aanroep. P przywołanie. S programanrop. (714)
8. **call abandonment probability** : → *probability 4*
9. **call accepted (signal)** : a signal sent over the return channel, indicating that the call can be accepted by a data terminal. ★ (signal d') acceptation d'appel → *acceptation 2.* R вызов принят (сигнал). D Anrufannahme. E señal de aceptación de llamada. I risposta. N oproepbevestigingssignaal. P sygnał akceptacji wywołania. S samtalsbekräftelse. (721)
10. **call attempt** : → *attempt 3*
11. **call clearing delay** : → *delay 3*
12. **call congestion** : → *congestion 1*
13. **call control character** : → *character 1*
14. **call control procedure** : → *procedure 1*
15. **call duration** : → *duration 2*
16. **call holding device** (*Syn.* musical hold device) : → *device 37*
17. **call indicating device** : → *device 14*
18. **call intensity** : → *intensity 2*
19. **call intent** : → *intent 1*
20. **call maker** : → *maker 1*
21. **call not accepted signal** : → *signal 34*
22. **call packing** : → *packing 1*
23. **call processing** : → *processing 1*
24. **call redirection** : → *redirection 1*
25. **call set-up time** : → *time 15*
26. **(call) signal generator** : → *generator 8*
27. **call spill-over** : → *spill-over 1*
28. **call string** : → *string 1*
29. **call tracing** : → *tracing 1*
30. **call without selection signals** (*Syn.* direct call) : the setting up of a connection to a single destination or group of destinations previously designated by the user, without using any selection signals. *Note.* — The network interprets the calling signals as an instruction to establish a connection. ★ appel sans numérotation → *appel 17.* R прямой вызов; вызов без набора номера. D Direktwahl. E llamada directa; llamada sin secuencia de selección. I chiamata diretta. N directe oproep. P wywołanie bezpośrednie. S direktanrop. (721)
31. **completed call attempt** : → *attempt 4*
32. **conference call** : a multi-address call in which the signals are transmitted by any one of the terminals, and are received simultaneously by all other terminals. *Note.* — The order in which the terminals may transmit shall be mutually agreed. ★ communication de conférence → *communication 5.* R конференц-связь. D Konferenzverbindung. E comunicación de conferencia. I conferenza. N conferentiegesprek. P połączenie konferencyjne. S konferensanrop. (721)
33. **direct call** (*Syn.* call without selection signals) : → *call 30*
34. **duration of a call** (*Syn.* call duration) : → *duration 2*
35. **effective call** (*Syn.* successful call) : a successful call attempt which has provided the service required. *Examples :* A telephone call with conversation, a no charged call, a charged call. ★ communication efficace → *communication 9.* R состоявшийся вызов. D erfolgreiches Gespräch. E llamada con éxito; llamada efectiva. I comunicazione a buon fine. N geslaagde verbinding. P połączenie zrealizowane. S etablerat samtal. (722)
36. **effective call attempt** (*Syn.* completed call attempt) : → *attempt 4*
37. **effective duration of a call** : → *duration 14*
38. **exchange call set-up delay** : → *delay 20*
39. **first call attempt** : → *attempt 6*
40. **fully-routed call attempt** (*Syn.* successful call attempt) : → *attempt 11*
41. **group call** (in a maritime mobile service) : a broadcast call in the maritime mobile service that permits the simultaneous transmission by a shore station to all the called ship stations without any acknowledgment given. ★ communication de groupe → *communication 8.* R групповое соединение (в морской подвижной службе). D Gruppenverbindung. E comunicación de grupo. I chiamata di gruppo. N groepsoproep. P połączenie grupowe (w systemie morskim stacji ruchomych). S gruppanrop. (721)
42. **lost call** : a request for a connection which is rejected due to network congestion. ★ appel perdu → *appel 14.* R потерянный вызов. D Verlustanruf. E llamada perdida. I chiamata perduta. N verloren oproep. P połączenie stracone. S förlorat anrop. (721)
43. **lost call attempt** : → *attempt 8*
44. **multi-address call** : a communication established with several requested terminals. ★ communication à destinations multiples → *communication 4.* R многоадресное соединение. D rundsenden. E comunicación con destinos múltiples. I chiamata multipla. N meervoudige oproep. P połączenie wieloadresowe. S fleradressanrop. (721)
45. **off-hook call** : a call attempt of a user to a local switching entity with central battery or central battery signalling, initiated when the switch hook is off-hook. ★ appel par décrochage → *appel 12.* R вызов при токовом состоянии линии. D Anruf mit Abheben. E llamada para descuelgue. I chiamata con sollevamento del gancio (BC). N oproep door opnemen van de hoorn. P wywołanie przez podniesienie mikrotelefonu. S anropsförsök med avlyftande av lur. (722)
46. **on-hook call** : the origination of calls without removing the handset from its rest position. ★ appel sans décrochage → *appel 16.* R вызов при бестоковом состоянии. D Anruf ohne Abheben. E llamada sin descuelgue; llamada manos libres. I chiamata a gancio abbassato. N oproep zonder opnemen van de hoorn. P wywołanie bez podniesienia mikrotelefonu. S anropsförsök med pålagd lur. (722)
47. **procedure call** (*Syn.* call) : → *call 7*
48. **public call office** : → *office 1*
49. **radiotelex call** : a telex call, originating in or intended for a mobile station or a mobile earth station transmitted on all or part of its route over the radiocommunication channels of the mobile service or the mobile satellite service. ★ communication radiotélex → *communication 12.* R радиотелексное соединение. D Funktelexverbindung. E comunicación radiotélex. I chiamata radiotelex. N radiotelexoproep. P połączenie radioteleksowe. S radiotelexanrop. (721)
50. **repeated call attempt** : → *attempt 9*

51. **restricted conference call** : a conference call, in which certain nominated terminals may only transmit to one, or some, of the terminals involved, or may not transmit at all. ★ conférence restreinte → *conférence 2.* R ограниченная конференц-связь. D eingeschränkte Konferenz. E conferencia restringida. I chiamata selettiva per conferenza. N beperkte-conferentiegesprek. P połączenie konferencyjne ograniczone. S begränsat konferensanrop. (721)
52. **retrieval of stored call content** : → *retrieval 2*
53. **statement of call account** : → *statement 1*
54. **storage of call content** : → *storage 20*
55. **successful call** (*Syn.* effective call) : → *call 35*
56. **successful call attempt** : → *attempt 10*
57. **successful call attempt** : → *attempt 11*
58. **successful call attempt** : → *attempt 12*
59. **(telex) call** : the use of a complete connection established between telex terminals. ★ communication (télex) → *communication 13.* R (телексный) вызов. D (Telex-)Verbindung. E comunicación (télex). I comunicazione telex. N (telex)oproep. P połączenie teleksowe. S telexförbindelse. (721)
60. **unsuccessful call** : a call attempt which does not result in the establishment of a complete connection. ★ appel infructueux → *appel 9.* R несостоявшийся вызов. D nicht erfolgreicher Anruf. E llamada infructuosa. I chiamata non a buon fine. N niet-geslaagdeverbinding. P połączenie nieudane. S misslyckat anrop. (721)
61. **virtual call** : a call established by means of a virtual circuit. ★ communication virtuelle → *communication 14.* R виртуальное соединение. D gewählte virtuelle Verbindung. E comunicación virtual. I chiamata virtuale. N oproep over een virtueel circuit. P połączenie wirtualne. S virtuellt anrop. (721)

call-arrival

1. **call-arrival signal** : → *signal 37*

call-confirmation

1. **call-confirmation (signal)** : a return switching signal, in response to a calling signal, to acknowledge the receipt of the calling signal. ★ (signal de) confirmation d'appel → *confirmation 2.* R подтверждение вызова (сигнал). D Anrufbestätigung. E señal de confirmación de llamada. I segnale di controllo di chiamata. N oproepbeantwoordingssignaal. P sygnał potwierdzenia wywołania. S anropsbekräftelse. (721)

call-connected

1. **call-connected signal** : → *signal 39*

called

1. **called party** : → *party 1*
2. **called party release** : → *release 1*
3. **priority for called subscriber** : → *priority 4*

call-in

1. **operator call-in signal** : → *signal 134*

calling

1. **automatic calling** : the sequence of operations required by the network procedure to set up a connection without manual intervention at the calling terminal. ★ appel automatique → *appel 5.* R автоматический вызов. D automatisches Wählen. E llamada automática. I chiamata automatica. N automatische oproep. P wywołanie automatyczne. S automatiskt anrop. (721)
2. **calling duration** : → *duration 3*
3. **calling party** : → *party 3*
4. **calling party release** : → *release 2*
5. **calling signal** : → *signal 40*
6. **manual calling** (in data communication) : a facility which permits the entry of selection signals from a calling terminal installation at an undefined character rate. The characters may be generated at the data terminal equipment or the data circuit terminating equipment. ★ appel manuel → *appel 11.* R ручной вызов (в передаче данных). D manuelles Anrufen. E llamada manual. I chiamata manuale. N handoproep. P wywołanie ręczne. S manuellt anrop. (721)
7. **selective calling** (*Syn.* selective ringing) : → *ringing 4*

call-sign

1. **call-sign** (*Syn.* answer-back code) : → *code 3*

call-waiting

1. **call-waiting tone** : → *tone 2*

calorimeter

1. **calorimeter power meter** (*Syn.* calorimetric power meter) : → *meter 14*

calorimetric

1. **calorimetric dosemeter** : → *dosemeter 1*
2. **calorimetric power meter** : → *meter 14*
3. **calorimetric test** : → *test 12*

cam

1. **cam group** : → *group 2*

camber

1. **camber of a stylus** (*Syn.* list of a stylus) : the angular deviation between the longitudinal axis of the stylus and a line perpendicular to the disk surface, both of which lie in a plane perpendicular to the record surface and to the groove motion at the stylus tip. ★ inclinaison latérale → *inclinaison 4.* R поперечный наклон резца (иглы). D Seitenneigung des Schneidstichels bzw. Taumelwinkel des Abtasters. E inclinación lateral (de un buril de grabación o de una cabeza de lectura). I inclinazione laterale (di una puntina di incisione o di una testina di riproduzione). N naaldvlucht. P nachylenie boczne (rylca lub igły). S nålvinkel (tvars spårriktningen). (806)
2. **camber of an insulator** : the maximum distance between the theoretical axis of an insulator and the curved line being the locus of the centres of all the transverse cross-sections of the unloaded insulator. ★ flèche propre d'un isolateur → *flèche 5.* R изогнутость изолятора. D Durchbiegung eines Isolators. E flecha de un aislador. I freccia di un isolatore in assenza di carico. N excentriciteit. P skrzywienie izolatora. S excentricitet. (471)

camcorder

1. **camcorder** (trade mark) (*Syn.* camera-recorder) : portable apparatus incorporating a television camera and a video recorder and sometimes sound recorder. ★ camescope → *camescope 1.* R камкодер. (723)

camera

1. **camera channel** : → *channel 4*
2. **camera operator** : → *operator 1*
3. **camera sensor** (*Syn.* image sensor) : → *sensor 3*
4. **camera telecine** : → *telecine 1*
5. **rostrum television camera** (*Syn.* electronic animation bench) : → *bench 1*
6. **television camera** : equipement embodying the necessary optical and electronic apparatus for converting the luminous properties of an object or scene to be televised into an electrical signal. ★ caméra de télévision → *caméra 1.* R телевизионная камера. (723)

camera tube

1. **anode-potential-stabilized camera tube** (*Syn.* high-velocity camera tube) : → *camera tube 4*
2. **camera tube** (*Syn.* image pick-up tube) : an electron-beam tube for the conversion of an optical image into a corresponding electrical signal, usually by a scanning process. ★ tube analyseur → *tube analyseur 1.* R передающая телевизионная трубка. D Bildaufnahmeröhre; Kameraröhre. E tubo analizador; tubo cámara. I tubo analizzatore; tubo da presa visiva. N opneembuis. P lampa analizująca. S kamerarör. (531,723)
3. **cathode-potential-stabilized camera tube** (*Syn.* low-velocity camera tube) : → *camera tube 6*
4. **high-velocity camera tube** (*Syn.* anode-potential-stabilized camera tube) : a camera tube operating with a beam of electrons having velocities such that the average target voltage stabilizes at a value approximately equal to that of the anode. ★ tube analyseur à électrons rapides → *tube analyseur 3.* R передающая трубка с разверткой пучком быстрых электронов. D Bildaufnahmeröhre mit schnellen Elektronen. E tubo analizador de alta velocidad; tubo analizador de potencial

anódico estabilizado. I tubo analizzatore con elettroni rapidi; tubo analizzatore con potenziale stabilizzato sull'anodo. N op anodepotentiaal stabiliserende opneembuis. P ..... S höghastighetskamerarör. (531,723)

5. **image camera tube** : a photoemissive camera tube having its photosensitive electrode separate from the target and in which the electrons emitted are focused to generate a corresponding electron image on the target. ★ tube analyseur à transfert d'image → *tube analyseur 9.* R передающая телевизионная трубка с переносом изображения. D Bildaufnahmeröhre mit Bildwandlerteil. E tubo analizador de transferencia de imagen. I tubo analizzatore con trasferimento di immagine. N beeldcamerabuis. P lampa analizująca z przetwarzaniem obrazu. S bildkamerarör. (531,723)
6. **low-velocity camera tube** (*Syn.* cathode-potential-stabilized camera tube) : a camera tube operating with a beam of electrons having velocities such that the average target voltage stabilizes at a value approximately equal to that of the electron-gun cathode. ★ tube analyseur à électrons lents → *tube analyseur 2.* R передающая телевизионная трубка с разверткой пучком медленных электронов. D Bildaufnahmeröhre mit langsamen Elektronen. E tubo analizador de baja velocidad; tubo analizador de potencial catódico estabilizado. I tubo analizzatore con elettroni lenti; tubo analizzatore con potenziale stabilizzato sul catodo. N op kathodepotentiaal stabiliserende opneembuis. P ..... S låghastighetskamerarör. (531,723)
7. **photoconductive camera tube** : a camera tube in which the photosensitive electrode is photoconductive. ★ tube analyseur photoconductif → *tube analyseur 11.* R передающая телевизионная трубка с внутренним фотоэффектом. D Bildaufnahmeröhre mit Photoleitung. E tubo analizador fotoconductor. I tubo analizzatore fotoconduttivo. N opneembuis met fotogeleiding. P lampa analizująca fotoprzewodząca. S fotokonduktivt kamerarör. (531)
8. **photo-conductive camera tube** : a camera tube in which the photo-sensitive electrode is photo-conductive. ★ tube (analyseur) à photoconduction → *tube analyseur 5.* R передающая трубка с фотопроводимостью. (723)
9. **photoemissive camera tube** : a camera tube in which the photosensitive electrode is photoemissive. ★ tube analyseur photoémissif → *tube analyseur 12.* R передающая телевизионная трубка с внешним фотоэффектом. D Bildaufnahmeröhre mit Photoemission. E tubo analizador fotoemisor. I tubo analizzatore fotoemissivo. N opneembuis met foto-elektrische emissie. P lampa analizująca fotoelektronowa. S fotoemitterande kamerarör. (531)
10. **photo-emissive camera tube** : a camera tube in which the photo-sensitive electrode is photo-emissive. ★ tube (analyseur) à photoémission → *tube analyseur 6.* R передающая трубка с фотоэмиссией. (723)
11. **storage camera tube** : a camera tube in which the target acts as an electrostatic storage surface and the output is an electric signal. ★ tube analyseur à mémoire → *tube analyseur 4.* R передающая телевизионная трубка с накоплением заряда. D Speicher-Bildaufnahmeröhre. E tubo analizador de memoria. I tubo analizzatore a memoria. N cameraheugenbuis. P lampa analizująca pamięciowa. S minneskamerarör. (531)

camera-recorder

1. **camera-recorder** (*Syn.* camcorder) : → *camcorder 1*

camp-on

1. **camp-on** (*Syn.* connect when free) : the holding by the network of a call attempt that was unsuccessful due to the called terminal(s) being busy or due to the network congestion, with subsequent automatic connection as soon as possible. ★ attente sur occupation → *attente 6.* R соединение при освобождении; постановка вызова на ожидание. D verbinden, wenn frei. E conexión cuando esté libre; retenido por ocupación. I controllo su occupato. N wachten op vrijkomen bij bezet. P oczekiwanie na zwolnienie. S väntan. (721)
2. **camp-on with recall** : a camp-on with the release of the calling terminal and recall as soon as possible. ★ attente sur occupation avec rappel → *attente 7.* R соединение при освобождении с повторным вызовом. D Rückruf nach Verbindungsanforderung. E conexión cuando esté libre y vuelta a llamar. I controllo su occupato e richiamo. N terugbellen bij bezet. P oczekiwanie na zwolnienie z ponownym wywołaniem. S väntan med återanrop. (721)

camshaft

1. **camshaft contactor** : → *contactor 3*
2. **motor-driven camshaft equipment** : → *equipment 52*

can

1. **burst can** : occurrence of a leakage in the cladding. ★ rupture de gaine → *rupture 7.* D ..... E rotura de vaina. I perdita di tenuta; rottura del rivestimento. N lek in bekledingslaag. P uszkodzenie koszulki. S kapslingsbrott. (026)
2. **can** : a sealed container enclosing nuclear fuel or other material to provide protection from a chemically reactive environment, to provide containment of radioactive products produced during the irradiation of the composite, or to provide structural support. ★ gaine → *gaine 12.* D Behälter. E cápsula. I guaina. N bus. P koszulka. S kapsel. (026)

cancellation

1. **cancellation control** : → *control 25*
2. **echo cancellation** : a method of echo control effected by subtracting an estimated echo from the signal which includes unwanted echo. ★ annulation d'écho → *annulation 1.* R эхокомпенсация. D Echokompensation. E anulación de eco; compensación de eco. I cancellazione dell'eco. N echo-opheffing. P redukcja echa. S ekokompensering. (704)

canceller

1. **echo canceller** : a device placed in a telecommunication circuit for effecting echo cancellation. ★ annuleur d'écho → *annuleur 1.* R эхокомпенсатор. D Echokompensator. E anulador de eco; compensador de eco. I cancellatore d'eco. N echo-opheffer. P reduktor echa. S ekokompensator. (704)

cancelling

1. **cancelling release mechanical system** : → *mechanical system 3*

candela

1. **candela** (cd) : SI unit of luminous intensity : The candela is the luminous intensity, in a given direction, of a source that emits monochromatic radiation of frequency 540×10^{12} hertz and that has a radiant intensity in that direction of 1/683 watt per steradian. (16th General Conference of Weights and Measures, 1979) $1\ cd = 1\ lm \cdot sr^{-1}$. ★ candela → *candela 1.* R кандела. D Candela. E candela. I candela. N candela. P kandela. S candela. (845)
2. **candela per square metre** ($cd \cdot m^{-2}$) : SI unit of luminance. *Note.* — This unit was sometimes called the nit (nt) (name discouraged). Other units of luminance : metric, non-SI : "lambert" $= 10^4/\pi\ cd \cdot m^{-2}$ non-metric : footlambert (fL) = 3.426 $cd \cdot m^{-2}$. ★ candela par mètre carré → *candela 2.* R кандела на квадратный метр. D Candela pro Quadratmeter. E nit. I candela al metro quadrato. N candela per vierkante meter. P kandela na metr kwadratowy. S candela per kvadratmeter. (845)

canned

1. **canned** : applied to a machine of which specified parts are completely enclosed and sealed against a fluid by a metal sheath. ★ machine chemisée → *machine 42.* R машина с защитной гильзой. D Maschine mit abgedichteten Bauteilen. E máquina encamisada. I macchina inscatolata. N ingeblikt. P maszyna z ekranem hermetycznym. S insvetsad. (411)

canning

1. **canning** (process) : the process of providing a material with a can. ★ gainage → *gainage 2.* D Einhülsen. E envainado. I rivestimento (procedimento). N bekleden; bekleding. P koszulkowanie. S kapsling. (026)

cantilever

1. **cantilever** (in electric traction) : a support consisting of one or more transverse members projecting from a mast. ★ console → *console 3.* R консоль (в электрической тяге). D Ausleger. E consola. I mensola. N ..... P wysięgnik. S utliggare. (811)
2. **hinged cantilever** : a cantilever fixed to the mast in such a way as to allow movement of the overhead contact line longitudinally and, to a limited extent, vertically. ★ console articulée → *console 4.* R поворотная консоль. D Schwenkausleger. E consola articulada. I mensola articolata. N ..... P wysięgnik ruchomy. S rörlig utliggare. (811)

cap

1. **bayonet cap** (*Syn.* bayonet base) : cap (international designation B) with bayonet pins on its shell which engage in slots in a lampholder. ★ culot à baïonnette → *culot 3.* R штифтовой цоколь. D Bajonettsockel. E casquillo de bayoneta. I attacco a baionetta. N bajonetlampvoet. P trzonek bagnetowy. S bajonettsockel. (845)
2. **cap** : a terminal in the form of a metal shell mounted on the top or side of the envelope. ★ coiffe → *coiffe 1.* R колпачок. D Anschlußkappe. E capacete; terminal externo. I cappuccio. N aansluitkap. P końcówka cylindryczna. S toppkontakt. (531)
3. **cap** (*Syn.* base) : that part of a lamp which provides connection to the electrical supply by means of a lampholder or lamp connector and, in most cases, also serves to retain the lamp in the lampholder. *Notes. 1* — The term base is also used in both the United Kingdom and the United States of America to denote an integral part of a lamp envelope which has been so shaped that it fulfills the function of a cap. It may engage either a holder or a connector, depending on other design features of the lamp-and-holder system. *2* — The cap of a lamp and its corresponding holder are generally identified by one or more letters followed by a number which indicates approximately the principal dimension (generally the diameter) of the cap in millimetres. The standard code is to be found in IEC Publication 61. ★ culot → *culot 2.* R цоколь. D Sockel. E casquillo. I attacco. N lampvoet. P trzonek. S sockel. (845)
4. **cap and pin insulator** : → *insulator 3*
5. **cap lamp** : → *lamp 6*
6. **pin cap** (*Syn.* pin base) : cap (international designation F for a single pin, G for two or more pins) which has one or more pins. ★ culot à broches → *culot 4.* R штырьковый цоколь. D Stiftsockel. E casquillo de patillas. I attacco a spina. N penlampvoet. P trzonek kołkowy. S stiftsockel. (845)
7. **polar cap** : polar region bounded by an auroral zone. ★ calotte polaire → *calotte 2.* D Polarkappe. P czapka polarna. (705)
8. **polar cap absorption** : → *absorption 32*
9. **prefocus cap** (*Syn.* prefocus base) : cap (international designation P) which enables the luminous element to be brought into a specified position relative to the cap during manufacture of the lamp so that reproducible positioning can be assured when the lamp is inserted in a suitable lampholder. ★ culot préfocus → *culot 8.* R фокусирующий цоколь. D Prefocus-Sockel; Einstellsockel. E casquillo prefocus. I attacco prefocus. N pre-focuslampvoet. P trzonek ogniskujący. S prefokussockel. (845)
10. **screw cap** (*Syn.* screw base) : cap (international designation E) having its shell in the form of a screw thread which engages the lampholder. ★ culot à vis → *culot 6.* R резбовой цоколь. D Schraubsockel; Gewindesockel. E casquillo de rosca. I attacco a vite. N schroeflampvoet. P trzonek gwintowy. S skruvsockel. (845)
11. **shell cap** (*Syn.* shell base) : cap (international designation S) having a smooth cylindrical shell. ★ culot cylindrique → *culot 7.* R цилиндрический цоколь. D Hülsensockel. E casquillo cilíndrico. I attacco cilindrico. N hulslampvoet. P trzonek gładki. S cylindersockel. (845)

capability

1. **capability** : the ability of an item to meet a service demand of given quantitative characteristics under given internal conditions. *Notes. 1* — Internal conditions refer for example to any combination of faulty and not faulty sub-items. *2.* — For telecommunication services this is called trafficability performance. ★ capacité → *capacité 4.* R возможности (объекта). D Leistungsfähigkeit. E capacidad (de un elemento). I capacità. N geschiktheid; vermogen. P zdolność (obiektu). S kapacitet. (191)
2. **energy capability** (of one or more hydroelectric installations) : the amount of electricity which the cumulative water flows, amended by upstream conditions, can produce under optimum conditions during a given period of time. ★ productibilité → *productibilité 2.* R потенциальная энергия водотока. D Arbeitsvermögen. E producibilidad (de un o de un conjunto de aprovechamientos hidroeléctricos); energía producible (de un o de un conjunto de aprovechamientos hidroeléctricos). I producibilità; producibilità. N energieproduktiviteit. P zasób energetyczny. S tillgänglig energi. (602)
3. **energy capability factor** : → *factor 67*
4. **energy capability of a reservoir** : the amount of electricity which could be generated by one or more power stations supplied by a reservoir by the complete draining of its useful water capacity. ★ capacité en énergie d'un réservoir → *capacité 20.* R энергетический эквивалент полезной емкости водохранилища. D Arbeitsvermögen eines Speichers. E capacidad en energía eléctrica de un embalse. I capacità in energia di un serbatoio. N energiecapaciteit van een stuwmeer. P zasób energetyczny zbiornika. S total magasinsenergi. (602)
5. **mean energy capability** (of one or more hydroelectric installations) : the mean of the energy capabilities of one or more hydroelectric installations in a given state of development, determined over the same period and for as many years as possible. ★ productibilité moyenne → *productibilité 3.* R среднемноголетнее производство энергии на ГЭС. D mittleres Arbeitsvermögen. E producibilidad media (de un o de un conjunto de aprovechamiento hidroeléctricos); energía producible media (de un o de un conjunto de aprovechamientos hidroeléctricos). I producibilità media. N gemiddelde energieproduktiviteit. P średni zasób energetyczny. S medelårsproduktion. (602)
6. **separating capability** (in telecontrol) (*Syn.* discrimination (in telecontrol)) : the minimum time by which events must be separated such that the sequence of their occurrence is determined correctly. ★ temps de discrimination → *temps 64.* R разрешающая способность по очередности (в телемеханике). D zeitliches Unterscheidungsvermögen. E capacidad de separación (en telecontrol); discriminación (en telecontrol). I capacità di separazione (nel telecontrollo); discriminazione (nel telecontrollo). N discriminatietijd. P rozdzielczość dyskryminacyjna. S upplösningsförmåga. (371)
7. **short-circuit current capability** : the permissible value of the short-circuit current in a given network component for a specified duration. ★ courant de court-circuit maximal admissible → *courant de court-circuit 8.* R допустимый ток короткого замыкания. D Kurzschlußfestigkeit. E corriente de cortocircuito máxima admisible. I corrente di cortocircuito massima ammissibile. N toelaatbare kortsluitstroom. P najwyższy dopuszczalny poziom prądu zwarciowego. S tillåten kortslutningsström. (603)
8. **starting capability** : the ability of a battery to supply power for an engine starter motor under specified conditions. ★ pouvoir de démarrage → *pouvoir 10.* R способность к запуску. D Startleistung. E capacidad de arranque. I attitudine all'avviamento. N startvermogen. P zdolność rozruchowa. S startförmåga. (486)

capacitance

1. **capacitance** (of an ideal capacitor) : the quotient of the current by the time derivative of the voltage. ★ capacité → *capacité 3.* R емкость (идеального конденсатора). D Kapazität (eines idealen Kondensators). E capacidad (de un condensador ideal). I capacità (di un condensatore ideale). N capaciteit (van een ideale condensator). P pojemność (kondensatora idealnego). S kapacitans (hos en ideal kondensator). (131)
2. **capacitance graded bushing** : → *bushing 4*
3. **capacitance of a capacitor** (property) : the ability of a capacitor to store an electrical charge. ★ capacité d'un condensateur → *capacité 15.* R емкость конденсатора (свойство). D Kapazität eines Kondensators (Eigenschaft). E capacidad de un condensador (propriedad). I capacità di un condensatore (proprietà). N capaciteit van een condensator (eigenschap). P pojemność kondensatora (właściwość). S kapacitans. (436)
4. **capacitance of a capacitor** (quantity) : the electrical charge on one of the capacitor electrodes divided by the potential difference between them, the influence of any other conductor being negligible. ★ capacité d'un condensateur → *capacité 16.* R емкость конденсатора (величина). D Kapazität eines Kondensators (Größenordnungen). E capacidad de un condensador (magnitud). I capacità di un condensatore (grandezza). N capaciteit van een condensator (waarde). P pojemność kondensatora (wielkość). S kapacitans. (436)
5. **capacitance pick-up head** : → *pick-up head 1*
6. **capacitance tolerance (of a capacitor)** : → *tolerance 2*
7. **clamped capacitance** (of a piezoelectric ceramic resonator) : the capacitance of a piezoelectric ceramic

resonator measured at a frequency well above any pronounced resonance. ★ capacité effective sous contrainte → *capacité 18.* R емкость зажатого резонатора (пьезоэлектрического керамического). D geklemmte Kapazität (eines piezoelektrischen keramischen Resonators). E capacidad efectiva bajo esfuerzo (de un resonador piezoeléctrico de cerámica). I capacità effettiva forzata (di un risuonatore piezoelettrico di ceramica). N geklampte capaciteit. P pojemność zwartego (mechanicznie) (rezonatora piezoceramicznego). S högdynamisk kapacitans. (561)

8. **free capacitance** (of a piezoelectric ceramic resonator) (C_f) : the capacitance of a piezoelectric ceramic resonator measured at a frequency well below the lowest resonance frequency. ★ capacité libre → *capacité 24.* R емкость свободного резонатора (пьезоэлектрического керамического). D freie Kapazität (eines piezoelektrischen keramischen Resonators). E capacidad libre (de un resonador piezoeléctrico de cerámica). I capacità libera (di un risuonatore piezoelettrico di ceramica). N vrije capaciteit. P pojemność swobodnego rezonatora piezoceramicznego. S statisk kapacitans. (561)
9. **high frequency capacitance (of a capacitor)** : the effective capacitance at a given frequency resulting from the joint effect of the intrinsic capacitance and the self-inductance of the capacitor. ★ capacité à haute fréquence (d'un condensateur) → *capacité 5.* R высокочастотная емкость(конденсатора). D Hochfrequenzkapazität (eines Kondensators). E capacidad para alta frecuencia (de un condensador). I capacità ad alta frequenza. N capaciteit bij hoge frequentie. P pojemność przy częstotliwości wielkiej. S högfrekvenskapacitans. (436)
10. **interelectrode capacitance** : the capacitance between stated electrodes or groups of electrodes under stated conditions. ★ capacité entre électrodes → *capacité 22.* R межэлектродная емкость. D Röhrenkapazität. E capacidad entre electrodos. I capacità interelettrodica. N inwendige buiscapaciteit. P pojemność międzyelektrodowa. S delkapacitans. (531)
11. **load capacitance** (of a piezoelectric resonator) (C_L) : the effective external capacitance which in combination with the piezoelectric resonator, determines the working frequency. ★ capacité de charge → *capacité 9.* R нагрузочная емкость (пьезоэлектрического резонатора). D Lastkapazität (eines piezoelektrischen Resonators). E capacidad de carga (de un resonador piezoeléctrico). I capacità di carico (di un risuonatore piezoelettrico). N belastingcapaciteit. P pojemność obciążenia. S belastningskapacitans. (561)
12. **motional capacitance** (of a piezoelectric resonator) (C_1) : the capacitance of the motional or series arm of the equivalent circuit. ★ capacité dynamique → *capacité 17.* R динамическая емкость (пьезоэлектрического резонатора). D dynamische Kapazität (eines piezoelektrischen Resonators). E capacidad dinámica (de un resonador piezoeléctrico). I capacità dinamica (di un risuonatore piezoelettrico). N dynamische capaciteit. P pojemność dynamiczna. S dynamisk kapacitans. (561)
13. **partially clamped capacitance** (of a piezoelectric ceramic resonator) : the capacitance of a piezoelectric ceramic resonator measured at a frequency well above the main resonance frequency ot the given family of vibration. ★ capacité effective sous contrainte partielle → *capacité 19.* R емкость частично зажатого резонатора (пьезоэлектрического керамического). D teilweise geklemmte Kapazität (eines piezoelektrischen keramischen Resonators). E capacidad efectiva bajo esfuerzo parcial (de un resonador piezoeléctrico de cerámica). I capacità effettiva forzata parziale (di un risuonatore piezoelettrico di ceramica). N gedeeltelijk geklampte capaciteit. P pojemność zwartego częściowo (mechanicznie) (rezonatora piezoceramicznego). S medeldynamisk kapacitans. (561)
14. **rated capacitance of a capacitor** : the capacitance value derived from the values of rated output, voltage and frequency of the capacitor. ★ capacité assignée d'un condensateur → *capacité 7.* R номинальная емкость конденсатора. D Nennkapazität eines Kondensators. E capacidad asignada de un condensador. I capacità nominale di un condensatore. N toegekende capaciteit van een condensator (C_N). P pojemność znamionowa kondensatora. S märkkapacitans. (436)
15. **shunt capacitance** (C_0) : the capacitance in parallel with the motional arm of the equivalent circuit. ★ capacité parallèle → *capacité 26.* R параллельная емкость. D statische Parallelkapazität. E capacidad paralelo. I capacità parallelo. N parallelcapaciteit. P pojemność równoległa. S shuntkapacitans. (561)
16. **thermal capacitance** (of a semiconductor device) : the quotient of the thermal energy stored in the device by the difference between the virtual temperature of the device and that of a specified external reference point. ★ capacité thermique → *capacité 28.* R тепловая емкость. D Wärmekapazität. E capacidad térmica. I capacità termica. N warmtecapaciteit. P pojemność cieplna (przyrządu półprzewodnikowego). S termisk kapacitans. (521)

capacitive

1. **capacitive** : applies to a device or circuit in which, under given conditions, the predominant quantity is capacitance. ★ capacitif → *capacitif 1.* R емкостный. D kapazitiv. E capacitivo. I capacitivo. N capacitief. P pojemnościowy. S kapacitiv. (151)

capacitor

1. **a.c. electrolytic capacitor** : an electrolytic capacitor specially designed for a.c. operation. ★ condensateur électrolytique pour courant alternatif → *condensateur 37.* R оксидный конденсатор переменного тока. D Wechselstrom-Elektrolytkondensator. E condensador electrolítico para corriente alterna. I condensatore elettrolitico per corrente alternata. N elektrolytische condensator voor wisselspanning. P kondensator electrolityczny prądu przemiennego. S elektrolytkondensator för växelström. (436)
2. **blocking capacitor** : a capacitor mainly used to prevent the flow of the direct component of a pulsating current. ★ condensateur de blocage → *condensateur 23.* R блокирующий конденсатор. D Trennkondensator; Blockkondensator. E condensador de bloqueo. I condensatore di blocco. N scheidingscondensator. P kondensator blokujący. S spärrkondensator. (151)
3. **capacitance of a capacitor** : → *capacitance 3*
4. **capacitance of a capacitor** : → *capacitance 4*
5. **capacitance tolerance (of a capacitor)** : → *tolerance 2*
6. **capacitor** : a device used because of its capacitance. ★ condensateur → *condensateur 10.* R конденсатор. D Kondensator. E condensador. I condensatore. N condensator. P kondensator. S kondensator. (151)
7. **(capacitor) bank** : → *bank 4*
8. **capacitor bank protection** : → *protection 7*
9. **capacitor braking** : → *braking 14*
10. **capacitor bushing** : → *bushing 5*
11. **(capacitor) element** : → *element 5*
12. **capacitor installation** : → *installation 1*
13. **capacitor ionization chamber** : → *ionization chamber 5*
14. **capacitor losses** : → *loss 10*
15. **capacitor microphone** (*Syn.* electrostatic microphone) : → *microphone 13*
16. **capacitor motor** : → *motor 12*
17. **(capacitor) stack** : → *stack 1*
18. **capacitor start and run motor** : → *motor 13*
19. **capacitor start motor** : → *motor 14*
20. **(capacitor) unit** : → *unit 12*
21. **capacitor voltage divider** : → *divider 1*
22. **capacitor voltage divider** : → *divider 2*
23. **capacitor voltage transformer** : → *transformer 17*
24. **charging current of a capacitor** : → *current 20*
25. **charging of a capacitor** : → *charging 4*
26. **circuit-breaker capacitors** : capacitors connected in parallel with interrupting units of a pole of a circuit-breaker, intended to ensure a suitable voltage distribution across them. ★ condensateurs pour disjoncteurs → *condensateur 42.* R конденсатор для прерывателей цепи. D Kondensatoren für Leistungsschalter. E condensador para interruptores automáticos. I condensatore per interruttori. N stuurcondensator voor schakelaar. P kondensator wyłącznikowy. S brytarkondensator. (436)
27. **commutation capacitor** : a capacitor which assists in the extinction of the normal or short-circuit current in a convertor arm. ★ condensateur d'extinction → *condensateur 35.* R искрогасительный конденсатор. D Löschkondensator. E condensador de extinción. I condensatore di commutazione.

N commutatiecondensator. P kondensator komutacyjny. S kommuteringskondensator. (811)

28. **coupling capacitor** : a capacitor used for the transmission of signals in a power system. ★ condensateur de couplage → *condensateur 25.* R конденсатор связи. D Kopplungskondensator. E condensador de acoplamiento. I condensatore di accoppiamento. N koppelcondensator. P kondensator sprzegający. S kopplingskondensator. (436)

29. **discharge device of a capacitor** : → *device 19*

30. **discharging of a capacitor** : → *discharging 3*

31. **electrolytic capacitor** : a capacitor in which the dielectric consists of an anodically formed oxide film on one or both electrodes. ★ condensateur électrolytique → *condensateur 36.* R оксидный конденсатор. D Elektrolytkondensator. E condensador electrolítico. I condensatore elettrolitico. N elektrolytische condensator. P kondensator elektrolityczny. S elektrolytkondensator. (436)

32. **electrolytic capacitor paper** : → *paper 4*

33. **end capacitor** : a conducting element or group of conducting elements, connected at the unfed end of a radiating element of an antenna, to modify the current distribution on the antenna. ★ capacité terminale → *capacité 27.* R концевая емкость. D Dachkapazität; Endkapazität. E capacidad terminal. I capacità terminale. N topcapaciteit. P pojemność końcowa. S kapacitiv ändbelastning. (712)

34. **energy storage capacitor** : a power capacitor intended to store energy and to release it within a very short time. ★ condensateur de stockage d'énergie → *condensateur 33.* R энергонакопительный конденсатор. D Energiespeicherkondensator. E condensador de almacenamiento de energía. I condensatore per immagazzinamento di energia. N condensator voor energieopslag. P kondensator magazynujący energię. S urladdningskondensator. (436)

35. **film capacitor** : a capacitor with a dielectric consisting of polymeric film usually impregnated. ★ condensateur au film → *condensateur 19.* R пленочный конденсатор. D Kunststoffkondensator. E condensador de película. I condensatore con dielettrico plastico. N kunststoffoliecondensator. P kondensator tworzywowy. S plastfilmkondensator. (436)

36. **filter capacitor** : a power capacitor intended to form part of a circuit designed to reduce one or more harmonic currents present in a network. ★ condensateur de filtrage → *condensateur 28.* R фильтровый конденсатор. D Filterkondensator. E condensador de filtrado; condensador antiparasitario. I condensatore per filtri. N filtercondensator. P kondensator filtrujący. S filterkondensator. (436)

37. **filter capacitor** (*Syn.* smoothing capacitor) : → *capacitor 62*

38. **heating capacitor** (of a dielectric heater) : a capacitor formed by the work electrodes and the charge which is placed between them. ★ condensateur de chauffage → *condensateur 24.* R конденсатор для нагрева (диэлектрического нагревателя). D Erwärmungskondensator (eines dielektrischen Erwärmungsgerätes). E condensador de calentamiento (de un calentador dieléctrico). I condensatore di riscaldamento (di una stazione di lavoro dielettrico). N verwarmingscondensator; belastingscondensator. P kondensator grzejny. S ..... (841)

39. **high frequency capacitance (of a capacitor)** : → *capacitance 9*

40. **high voltage capacitor** (of a capacitor voltage transformer) : capacitor connected between the high voltage and intermediate voltage terminals. ★ condensateur à haute tension → *condensateur 14.* R конденсатор высокого напряжения (емкостного трансформатора напряжения). D Hochspannungskondensator (eines kapazitiven Spannungswandlers). E condensador de alta tensión (de un transformador de tensión capacitivo). I condensatore di alta tensione (di un trasformatore di tensione capacitivo). N hoogspanningscondensator (van een capacitieve spanningstransformator). P człon wysokiego napięcia dzielnika pojemnościowego (przekładnika napięciowego pojemnościowego). S högspänningskondensator. (321)

41. **high-voltage capacitor** (of a capacitor divider) : the capacitor connected between the high-voltage terminal and the intermediate voltage terminal of a capacitor divider. ★ condensateur à haute tension → *condensateur 15.* R высоковольтный конденсатор (емкостного делителя). D Oberspannungskondensator (eines kapazitiven Spannungsteilers). E condensador para alta tensión (de un divisor capacitivo). I condensatore di alta tensione (di un divisore capacitivo). N hoogspanningscondensator (C_1) (van een capacitieve deler). P kondensator wysokonapięciowy (dzielnika kondensatorowego). S högspänningsdel. (436)

42. **ideal capacitor** : an ideal 2-terminal circuit element for which the instantaneous current is proportional to the time derivative of the voltage. ★ capacité idéale → *capacité 23.* R идеальный конденсатор. D idealer Kondensator. E capacidad ideal. I condensatore ideale. N ideale condensator. P kondensator idealny. S ideal kondensator. (131)

43. **intermediate voltage capacitor** (of a capacitor voltage transformer) : capacitor connected between the intermediate voltage terminal and the low voltage terminal. ★ condensateur à tension intermédiaire → *condensateur 16.* R конденсатор промежуточного напряжения (емкостного трансформатора напряжения). D Zwischenspannungskondensator (eines kapazitiven Spannungswandlers). E condensador de tensión intermedia (de un transformador de tensión capacitivo). I condensatore a tensione intermedia (di un trasformatore di tensione capacitivo). N middenspanningscondensator (van een capacitieve spanningstransformator). P człon pośredniego napięcia dzielnika pojemnościowego (przekładnika napięciowego pojemnościowego). S mellanspänningskondensator. (321)

44. **intermediate voltage capacitor** (of a capacitor divider) : the capacitor connected between the intermediate voltage terminal and the low-voltage terminal of a capacitor divider. ★ condensateur à tension intermédiaire → *condensateur 17.* R конденсатор промежуточного напряжения (емкостного делителя). D Unterspannungskondensator (eines kapazitiven Spannungsteilers). E condensador para tensión intermedia (de un divisor capacitivo). I condensatore a tensione intermedia (di un divisore capacitivo). N middenspanningscondensator (C_2) (van een capacitieve teler). P kondensator napięcia pośredniego (dzielnika kondensatorowego). S mellanspänningsdel. (436)

45. **kraft capacitor paper** : → *paper 8*

46. **line series capacitor** : a power capacitor connected in series with an electrical line to compensate all or part of the reactance of that line. ★ condensateur-série (de ligne) → *condensateur-série 2.* R конденсатор, включенный последовательно в цепь. D Leitungs-Reihenkondensator. E condensador-serie (de línea). I condensatore (di linea) in serie. N seriecompensatiecondensator. P kondensator kompensacyjny (linii) szeregowy. S seriekondensator. (811)

47. **metal foil capacitor** : a capacitor of which the electrodes consist of metal foils. ★ condensateur à feuilles métalliques → *condensateur 13.* R фольговый конденсатор. D Metallfolienkondensator. E condensador de hojas metálicas. I condensatore con elettrodi di nastro metallico. N metaalfoliecondensator. P kondensator o elektrodach foliowych. S metallfoliekondensator. (436)

48. **metallized capacitor** : a capacitor of which the electrodes consist of a metallic deposit on the dielectric. ★ condensateur à diélectrique métallisé → *condensateur 11.* R металлизированный конденсатор. D metallisierter Kondensator. E condensador de dieléctrico metalizado. I condensatore metallizzato. N condensator met opgedampte elektroden. P kondensator o dielektryku metalizowanym; kondensator metalizowany. S kondensator med metalliserade belägg. (436)

49. **mixed dielectric capacitor** : a capacitor of which the dielectric consists of at least two different solid substances usually impregnated. ★ condensateur à diélectrique mixte → *condensateur 12.* R комбинированный конденсатор. D Kondensator mit gemischtem Dielektrikum. E condensador de dieléctrico mixto. I condensatore con dielettrico misto. N condensator met gemengde isolatie. P kondensator o dielektryku mieszanym. S blandfoliekondensator. (436)

50. **motor running capacitor** : a power capacitor which, when used in conjunction with an auxiliary winding of a motor, assists the motor to start and improves the torque under running conditions. ★ condensateur (permanent) de moteur → *condensateur 39.* R рабочий конденсатор для двигателя. D Motorbetriebskondensator. E condensador permanente de motor. I condensatore per motori. N motor(bedrijfs)condensator. P kondensator roboczy silnika (elektrycznego). S motorkondensator. (436)

51. **motor starting capacitor** : a power capacitor that causes a phase shift in an auxiliary winding of a motor and which is switched out of circuit once the motor is running. ★ condensateur de démarrage de moteur → *condensateur 27.* R конденсатор для запуска электродвигателей. D Motoranlaufkondensator. E condensador para arranque de motor. I condensatore per avviamento motori. N motoraanloopcondensator. P kondensator rozruchowy silnika (elektrycznego). S motorstartkondensator. (436)
52. **paper capacitor** : a capacitor with a dielectric consisting of paper usually impregnated. ★ condensateur au papier → *condensateur 20.* R бумажный конденсатор. D Papierkondensator. E condensador de papel. I condensatore con dielettrico di carta. N papiercondensator. P kondensator papierowy. S papperskondensator. (436)
53. **permanent split capacitor motor** (*Syn.* capacitor start and run motor) : → *motor 13*
54. **power capacitor** : a capacitor intended for use in a power network. ★ condensateur de puissance → *condensateur 32.* R силовой конденсатор. D Leistungskondensator. E condensador de potencia. I condensatore di potenza. N sterkstroomcondensator. P kondensator energetyczny. S kraftkondensator. (436)
55. **power electronic capacitor** : a power capacitor intended to be used in power electronic equipment and capable of operating continuously under non-sinusoidal conditions. ★ condensateur pour électronique de puissance → *condensateur 40.* R конденсатор для силовой электроники. D Leistungselektronikkondensator. E condensador para electrónica de potencia. I condensatore per elettronica di potenza. N vermogenselektronicacondensator. P kondensator energoelektroniczny. S kondensator för kraftelektronik. (436)
56. **power factor correction capacitor** : a power capacitor connected in parallel with a circuit to improve its power factor. ★ condensateur d'amélioration de facteur de puissance → *condensateur 22.* R компенсирующий конденсатор. D Kompensationskondensator. E condensador de mejora del factor de potencia. I condensatore rifasatore. N arbeidsfactorverbeteringscondensator. P kondensator poprawy współczynnika mocy. S parallellkondensator. (811)
57. **protective capacitor** : a capacitor for limiting transient overvoltages. ★ condensateur de protection → *condensateur 31.* R защитный конденсатор. D Schutzkondensator. E condensador de protección. I condensatore di protezione. N overspanningsbeveiligingscondensator. P kondensator ochronny. S skyddskondensator. (811)
58. **self-healing capacitor** : a capacitor of which the electrical properties, after local breakdown of the dielectric, are rapidly and essentially restored. ★ condensateur autorégénérateur → *condensateur 21.* R самовосстанавливающийся конденсатор. D selbstheilender Kondensator. E condensador autorregenador. I condensatore autorigenerabile. N zelfherstellende condensator. P kondensator samoregenerujący. S självläkande kondensator. (436)
59. **series capacitor** : capacitor connected in series with the voltage circuit of a measuring instrument in order to extend its effective range. ★ condensateur additionnel → *condensateur 18.* R добавочный конденсатор. D Reihenkapazität. E condensador adicional. I condensatore addizionale. N voorschakelcapaciteit. P kondensator szeregowy. S förkopplingskondensator. (301)
60. **series capacitor** : a power capacitor intended to be connected in series with a line. *Note.* — These capacitors are used primarily for the compensation of all or part of the reactance of the line. ★ condensateur-série → *condensateur-série 1.* R сериесный конденсатор. D Reihenkondensator. E condensador serie. I condensatore per inserzione serie. N seriecondensator. P kondensator szeregowy. S seriekondensator. (436)
61. **shunt capacitor** : a power capacitor intended to be connected in parallel with a network. *Note.* — These capacitors are primarily used for power factor correction by reactive power compensation. ★ condensateur-shunt → *condensateur-shunt 1.* R шунтовой конденсатор. D Parallelkondensator. E condensador shunt; condensador en derivación. I condensatore di rifasamento. N parallelcondensator. P kondensator bocznikowy. S shuntkondensator. (436)
62. **smoothing capacitor** (*Syn.* filter capacitor) : a capacitor designed to reduce the alternating component of an undulating current. ★ condensateur de lissage → *condensateur 30.* R сглаживающий конденсатор; конденсатор фильтра. D Glättungskondensator; Siebkondensator. E condensador de filtrado; condensador de alisado. I condensatore di livellamento; condensatore di filtro. N afvlakcondensator. P kondensator wygładzający. S glättningskondensator. (811)
63. **starting capacitor** : a capacitor connected in series with the auxiliary winding of a single-phase asynchronous motor in order to obtain the necessary phase-displacement between the main and auxiliary field currents to permit the motor to start. ★ condensateur de démarrage → *condensateur 26.* R пусковой конденсатор. D Anlaßkondensator. E condensador de arranque. I condensatore d'avviamento. N startcondensator. P kondensator rozruchowy. S startkondensator. (811)
64. **tangent of the loss angle (of a capacitor)** : → *tangent 4*
65. **two-value capacitor motor** : → *motor 115*
66. **vibrating capacitor amplifier** : → *amplifier 29*
67. **voltage ratio of a capacitor divider** : → *ratio 103*
68. **(voltage) ratio of a capacitor divider** : → *ratio 104*

capacitor-discharge

1. **capacitor-discharge apparatus** : → *apparatus 4*

capacity

1. **anode thermal capacity** : the maximum energy in joules which can be supplied to the anode in 20 seconds under the condition specified by the manufacturer (e.g., focal spot, rotation speed of the anode, etc.). *Note.* — The value for the anode thermal capacity of the tube is obtained by using the largest focal spot, the highest rotation speed of the anode and a coefficient $f = 1$. ★ capacité d'accumulation thermique de l'anode → *capacité 8.* R тепловая емкость анода. D Wärmespeicherfähligkeit der Anode. E capacidad térmica del ánodo. I capacità termica dell'anodo. N thermische anodecapaciteit. P pojemność cieplna anody. S anodens värmekapacitet. (881)
2. **available capacity of a power station** : the maximum power at which a power station can be operated continuously under the prevailing conditions. *Note.* — This power may be gross or net. ★ puissance disponible d'une centrale → *puissance 107.* R пабочая мощность электростанции. D verfügbare Leistung eines Kraftwerks. E potencia disponible de una central. I potenza disponibile di una centrale. N beschikbaar vermogen van een elektrische centrale. P moc dyspozycyjna elektrowni. S tillgänglig stationseffekt. (602)
3. **available capacity of a unit** : the maximum power at which a unit can be operated continuously under the prevailing conditions. *Note.* — This power may be gross or net. ★ puissance disponible d'une tranche → *puissance 108.* R пабочая мощность агрегата. D verfügbare Leistung eines Blockes. E potencia disponible de un grupo. I potenza disponibile di una unità. N beschikbaar vermogen van een opwekeenheid. P moc dyspozycyjna bloku energetycznego. S tillgänglig blockeffekt. (602)
4. **battery capacity** : the quantity of electricity or electric charge, which a fully charged battery can deliver under specified conditions. *Note.* — The SI unit for electric charge is the coulomb ($1\ C = 1\ A \cdot s$) but in practice, battery capacity is usually expressed in ampere-hours ($A \cdot h$). ★ capacité d'un accumulateur → *capacité 14.* R емкость батареи. D Kapazität (eines Akkumulators). E capacidad (de una batería). I capacità di un accumulatore. N capaciteit (van een batterij); capaciteit (van een accumulator). P pojemność akumulatora. S (batteri)kapacitet. (486,811)
5. **breaking capacity** (of a switching device or a fuse) : a value of prospective current that a switching device or a fuse is capable of breaking at a stated voltage under prescribed conditions of use and behaviour. *Notes. 1* — The voltage to be stated and the conditions to be prescribed are dealt with in the relevant publications. *2* — For switching devices, the breaking capacity may be termed according to the kind of current included in the prescribed conditions, e.g. line-charging breaking capacity, cable charging breaking capacity, single capacitor bank breaking capacity, etc. ★ pouvoir de coupure → *pouvoir 8.* R отключающая способность (коммутационного аппарата или предохранителя). D Ausschaltvermögen (eines Schaltgerätes oder einer Sicherung). E poder de corte (de un aparato de conexión o de un fusible). I potere di interruzione (di un apparecchio di manovra

o di un fusibile). N uitschakelvermogen (van een schakeltoestel of een smeltveiligheid). P prąd wyłączalny; zdolność wyłączania. S brytförmåga. (441)

6. **capacity** (of a galvanic cell) : the quantity of electricity which can be delivered by an electrochemical cell under specified conditions. *Note.* — The capacity is often expressed in ampere hours (Ah). ★ capacité → *capacité 2.* R емкость (электроимического источника)). D Kapazität (einer Galvanischen Zelle)). E capacidad (de un generador electroqui'mico). I capacita (di un generatore elettrochimico). N capaciteit (van een galvanische cel). P pojemność (ogniwa galwanicznego). S kapacitet. (111)
7. **capacity cost** : → *cost 2*
8. **capacity retention** (*Syn.* charge retention) : → *retention 2*
9. **(continuous) current-carrying capacity** (of a conductor) (*Syn.* ampacity (USA)) : the maximum current which can be carried continuously by a conductor under specified conditions without its steady state temperature exceeding a specified value. ★ courant (permanent) admissible → *courant 146.* R длительно допустимый ток проводника. D (dauernde) Strombelastbarkeit eines Leiters. E corriente (permanente) admisible (de un conductor). I portata in regime permanente (di un conduttore). N (continu) toelaatbare stroom van een leiding. P obciążalność długotrwała. S strömbelastningsförmåga enlednings kontinuerliga; strömvärde. (826)
10. **heat capacity** : the quantity of heat which may be absorbed by a body. ★ capacité thermique → *capacité 29.* R теплоемкость. D Wärmekapazität. E capacidad térmica. I capacità termica. N warmtecapaciteit. P pojemność cieplna. S värmeupptagningsförmåga. (841)
11. **information capacity** (in telecontrol) : the amount of different information in a telecontrol system that may be handled at the control centre or master station and at the outstations. *Notes. 1* — The information capacity is often expressed by the number of commands and by the amount of monitored information which can be handled. *2* — The information capacity of a telecontrol equipment at the control centre or master station may be shared between several outstations. ★ capacité en informations → *capacité 21.* R информационная емкость (в телемеханике). D Informationskapazität (beim Fernwirken). E capacidad de información (en telecontrol). I capacità d'informazione (nel telecontrollo). N informatiecapaciteit. P pojemność informacyjna. S informationskapacitet. (371)
12. **justification capacity** (*Syn.* stuffing capacity; maximum justification rate; maximum stuffing rate) : the maximum possible justification rate that can be accommodated by the justification process. *Notes. 1* — In practice, the tolerance limits on the digit rates of the original digital signal and the channel provided for conveying it by justification should be such that the justification rate is always less than the justification capacity. *2* — Because of the confusion which arises in English from the similarity of the terms "maximum justification rate " and "maximum justification ratio", it is strongly recommended that "justification capacity" should be used instead of the first of those terms. ★ débit maximal de justification → *débit 21.* R максимальная скорость цифрового выравнивания. D Justierungskapazität; Füllungskapazität; maximale Justierungskapazität; maximale Füllungskapazität. E gasto máximo de justificación; capacidad de justificación. I frequenza massima di giustificazione; capacità di giustificazione. N justeercapaciteit; maximale justeersnelheid. P częstotliwość dopełniania największa. S maximal taktanpassningsrat. (704)
13. **limiting breaking capacity** : the highest value of current which an output circuit is capable of breaking under specified conditions (voltage, number of breaks, power factor, time constant, etc.). ★ pouvoir limite de coupure → *pouvoir 15.* R предельная отключающая способность. D Ausschaltvermögen. E poder límite de corte. I potere limite di apertura. N maximaal afschakelvermogen. P zdolność wyłączania. S brytförmåga. (446)
14. **limiting cycling capacity** : the highest value of current which an output circuit is capable of making and breaking successively under specified conditions (voltage, number of cycles, power factor, time constant, etc.). ★ pouvoir limite de manœuvre → *pouvoir 17.* R предельная способность циклического действия. D Schaltvermögen bei Schaltspielen. E poder límite de maniobra. I potere limite di manovra. N maximale schakelfrequentie. P zdolność łączenia cykliczna. S slut- och brytförmåga vid cyklisk drift. (446)
15. **limiting making capacity** : the highest value of current which an output circuit is capable of making under specified conditions (voltage, number of makes, power factor, time constant, etc.). ★ pouvoir limite de fermeture → *pouvoir 16.* R предельная включающая способность. D Einschaltvermögen. E poder límite de cierre. I potere limite di chiusura. N maximale inschakelwaarde. P zdolność załączania. S slutförmåga. (446)
16. **load capacity** (of a quantizer) : the level of a sinusoidal signal whose positive and negative peaks coincide with the virtual decision values in basic pulse code modulation. ★ capacité de charge → *capacité 10.* R уровень перегрузки (квантователя); порог перегрузки (квантователя). D Ladekapazität (eines Quantisierers). E capacidad de carga; punto de sobrecarga. I capacità di carico (di un quantizzatore). N belastbaarheid (van een kwantificeerder). P zdolność obciążeniowa (kwantyzatora). S överstyrningsgräns. (704)
17. **making capacity** (of a switching device) : a value of prospective making current that a switching device is capable of making at a stated voltage under prescribed conditions of use and behaviour. *Note.* — The voltage to be stated and the conditions to be prescribed are dealt with in the relevant specifications. ★ pouvoir de fermeture → *pouvoir 11.* R включающая способность (коммутационного аппарата). D Einschaltvermögen (eines Schaltgerätes). E poder de cierre (de un aparato de conexión). I potere di stabilimento (di un apparecchio di manovra). N inschakelvermogen (van een schakeltoestel). P prąd załączalny; zdolność załączania. S slutförmåga. (441)
18. **maximum capacity of a power station** : the maximum power that could be generated by a power station, under continuous operation with all of its components in working order. *Note.* — This power may be gross or net. ★ puissance maximale possible d'une centrale → *puissance 130.* R установленная мощность электростанции. D maximal mögliche Leistung eines Kraftwerks. E potencia máxima posible de una central. I potenza massima accumulabile di una centrale. N maximumvermogen van een elektrische centrale. P moc osiągana elektrowni maksymalna. S maximal kontinuerlig stationeffekt. (602)
19. **maximum capacity of a unit** : the maximum power that could be generated by a unit, under continuous operation with all of its components in working order. *Note.* — This power may be gross or net. ★ puissance maximale possible d'une tranche → *puissance 131.* R установленная мощность агрегата. D maximal mögliche Leistung eines Blockes. E potencia máxima posible de un grupo. I potenza massima accumulabile di una unità. N maximumvermogen van een opwekeenheid. P moc osiągana bloku energetycznego maksymalna. S maximal kontinuerlig blockeffekt. (602)
20. **nominal capacity (of a cell or battery)** : a suitable approximate quantity of electricity used to identify the capacity of a cell or battery. *Note.* — This value is usually expressed in ampere-hours. ★ capacité nominale (d'un accumulateur) → *capacité 25.* R номинальная емкость (вторичного химического источника тока). D Nennkapazität (einer Zelle oder Batterie). E capacidad nominal (de un elemento o batería). I capacità nominale. N nominale capaciteit. P pojemność znamionowa (akumulatora). S nominell kapacitet. (486)
21. **overload capacity** : the highest load which can be maintained during a short period of time. ★ puissance en surcharge → *puissance 114.* R мощность агрегата с кратковременной перегрузкой. D Überlastleistung. E potencia de sobrecarga. I potenza in sovraccarico. N vermogen bij overbelasting. P przeciążenie. S överlasteffekt. (602)
22. **peak capacity cost** : → *cost 18*
23. **rated capacity (of a cell or battery)** : the quantity of electricity, declared by the manufacturer which a cell or battery can deliver under specified conditions after a full charge. *Note.* — This value is usually expressed in ampere-hours. ★ capacité assignée (d'un accumulateur) → *capacité 6.* R гарантированная емкость (вторичного химического источника тока). D Bemessungskapazität (einer Zelle oder Batterie). E capacidad estimada (de un elemento o batería). I capacità dichiarata. N toegekende capaciteit. P pojemność przypisana (akumulatora). S märkkapacitet. (486)
24. **short-circuit breaking capacity** : a breaking capacity for which the prescribed conditions include a short circuit at the terminals of the switching device. ★ pouvoir de coupure en court-circuit → *pouvoir 9.* R отключающая способность при коротком замыкании. D Kurzschluss-Ausschaltvermögen.

E poder de corte en cortocircuito. I potere di interruzione in cortocircuito. N uitschakelvermogen bij kortsluiting. P prąd wyłączalny zwarciowy; zdolność wyłączania zwarciowa. S brytförmåga vid kortslutning. (441)

25. **short-circuit making capacity** : a making capacity for which the prescribed conditions include a short circuit at the terminals of the switching device. ★ pouvoir de fermeture en court-circuit → *pouvoir 12.* R включающая способность при коротком замыкании. D Kurzschluss-Einschaltvermögen. E poder de cierre en cortocircuito. I potere di stabilimento in cortocircuito. N inschakelvermogen bij kortsluiting. P prąd załączalny zwarciowy; zdolność załączania zwarciowa. S slutförmåga vid kortslutning. (441)
26. **specific heat capacity** : the quantity of heat in joules necessary to raise the temperature of 1 kilogram of substance through 1 kelvin. ★ chaleur massique → *chaleur 3.* R удельная теплоемкость. D spezifische Wärmekapazität. E calor especifico. I calore specifico. N soortelijke warmte. P pojemność cieplna właściwa. S specifik värmekapacitet. (841)
27. **stuffing capacity** (*Syn.* justification capacity) : → *capacity 12*
28. **temperature coefficient of capacity (of a cell or battery)** : → *coefficient 70*
29. **transmission capacity of a link** : the maximum permissible load of a link considering its relevant physical and electrical characteristics under specified conditions. ★ capacité de transport d'une liaison → *capacité 12.* R пропускная способность линии электропередачи. D Übertragungsfähigkeit einer Verbindung. E capacidad de transporte de una conexión. I capacità di trasporto di un collegamento. N transportcapaciteit van een verbinding. P zdolność przesyłowa linii. S överföringsförmåga hos länk. (603)
30. **useful water capacity of a reservoir** : the volume of water which a reservoir can hold between the lowest and highest levels normal allowable. ★ capacité utile en eau d'un réservoir → *capacité 30.* R полезный объем водохранилища. D Nutzraum eines Speichers. E capacidad útil en agua de un embalse. I capacità utile in acqua di un serbatoio. N nuttige watercapaciteit van een stuwmeer. P pojemność zbiornika użyteczna. S total magasinsvolym. (602)
31. **utilisation factor of the maximum capacity of a unit** : → *factor 182*
32. **utilisation period at maximum capacity of more units** : → *period 34*
33. **utilisation period at maximum capacity of one unit** : → *period 35*

capital

1. **capital contribution to connection costs** : → *contribution 1*
2. **capital contribution to network costs** : → *contribution 2*

capstan

1. **capstan** : a spindle or a shaft, often a motor shaft itself which drives the magnetic tape during the recording or reproducing action. ★ cabestan → *cabestan 1.* R ведущий вал. D Tonwelle; Bandantriebswelle. E cabrestante. I ruota di trazione. N toonas. P wałek przesuwu. S drivrulle; kapstan. (806)

capsule

1. **capsule (telephone) microphone** (*Syn.* (telephone) microphone) : → *microphone 34*
2. **(telephone) earphone capsule** (*Syn.* (telephone) earphone) : → *earphone 5*

caption

1. **caption frame** : → *frame 4*

capture

1. **capture** (of a particle) : a process by which an atomic or nuclear system acquires an additional particle. ★ capture → *capture 1.* R захват. D Einfang. E captura. I cattura. N vangst. P wychwyt. S infångning. (026,391,881)
2. **capture cross-section** : → *cross-section 5*
3. **capture gamma radiation** : → *radiation 9*
4. **orbital electron capture** : a radioactive transformation whereby a nucleus captures an orbital electron. ★ capture électronique → *capture 2.* R захват орбитального электрона. D Einfang eines Hüllenelektrons. E captura electrónica. I cattura di un elettrone orbitale. N elektronvangst. P wychwyt elektronu orbitalnego. S elektroninfångning. (881)
5. **radiative capture** : the capture of a particle by a nucleus followed by immediate emission of gamma radiation. ★ capture radiative → *capture 3.* R радиационный захват. D Einfangreaktion. E captura radiactiva. I cattura radiativa. N ..... P wychwyt promieniotwórczy. S radiativ infångning. (026,881)

car

1. **car radio** : → *radio 2*
2. **car radio-cassette** : → *radio-cassette 1*
3. **motor baggage car** (*Syn.* motor luggage van) : → *van 1*
4. **motor car** (*Syn.* motor coach) : → *coach 2*
5. **power car** : a term applied to the motor vehicles of some types of diesel or electric train unit. *Note.* — In French, the term "motrice" is also used to designate the motor car on a tramway system. ★ motrice → *motrice 1.* R моторный вагон. D Triebwagen (im übertragenen Sinne). E coche motor. I motrice (anche tranviaria). N motorrijtuig; motorwagen. P wóz silnikowy; wagon silnikowy. S ..... (811)

carbon

1. **aromatic carbon content** : → *content 1*
2. **carbon filament lamp** : → *lamp 7*
3. **carbon microphone** (*Syn.* carbon (telephone) transmitter) : → *transmitter 5*
4. **carbon (telephone) transmitter** : → *transmitter 5*

carbonitriding

1. **carbonitriding** : a thermochemical treatment applied to a ferrous alloy, in which holding is carried out in a suitable atmosphere to increase the surface concentration of carbon and nitrogen, which diffuse into the workpiece. ★ carbonitruration → *carbonitruration 1.* R нитроцементация. D Karbonitrieren. E carbonitruración. I carbonitrurazione. N carbonitreren. P węgloazotowanie. S karbonitrering. (841)

carbon-type

1. **carbon-type analysis** : → *analysis 2*

carburising

1. **carburising** : a thermochemical treatment applied to a ferrous alloy, in which holding is carried out in a suitable medium to increase the surface concentration of carbon, element which diffuses into the workpiece and in so doing, enables the carbon enriched layer to be hardened during quenching. ★ cémentation → *cémentation 1.* R цементация. D Einsatzhärten. E carburación; cementación. I carburizzazione. N opkolen; carboneren. P nawęglanie. S uppkolning. (841)

card

1. **television test card** (*Syn.* television test pattern) : → *pattern 31*

cardan-shaft

1. **cardan-shaft drive** : → *drive 1*

cardinal

1. **cardinal light** : → *light 7*
2. **cardinal mark** : → *mark 4*

carriage

1. **carriage return** : → *return 1*
2. **slotted line carriage** : a movable carriage, guided to travel longitudinally along a slotted line, which can accept a coupling probe to extract microwave energy for the purpose of measuring standing waves. ★ chariot de ligne de mesure → *chariot 1.* R каретка щелевой линии. D Messleitungsschlitten. E carro de línea ranurada. I carrello di linea di misura (a fessura). N sleuflijnhouder. P karetka linii pomiarowej ze szczeliną. S ..... (726)

carried

1. **traffic carried** : → *traffic 27*
2. **traffic carried (intensity)** : → *intensity 21*

carrier

1. **analogue carrier transmission** (*Syn.* multichannel carrier transmission) : → *transmission 42*
2. **auxiliary carrier** (*Syn.* auxiliary catenary) : → *catenary 1*
3. **carrier** : in modulation, an oscillation or wave, usually periodic, some characteristic of which follows by modulation the signal or of another oscillation or wave. ★ porteuse → *porteuse 10.* R несущая. D Träger. E portadora. I portante. N draaggolf. P nośna (fala, częstotliwość). S bärvåg. (702,704)
4. **carrier** : a substance in an appreciable amount which when associated with a trace of another substance will carry the trace with it through a chemical or physical process. ★ entraîneur → *entraîneur 1.* R носитель. D Träger. E portador. I carrier. N drager (ladingdrager). P nośnik. S bärare. (881)
5. **carrier (component)** : in a modulated signal, the spectral component of a modulated signal having the frequency of the periodical carrier prior to modulation. ★ (composante) porteuse → *porteuse 4.* R несущая (составляющая). D Träger(-Komponente). E portadora (componente). I (componente) portante. N draaggolf(component). P (składowa) nośna. S bärvåg. (702)
6. **carrier free** : → *free 1*
7. **carrier frequencies** : → *frequency 15*
8. **carrier frequency shift** : → *shift 6*
9. **carrier recovery** : → *recovery 1*
10. **carrier storage time** : → *time 16*
11. **carrier transmission** : → *transmission 11*
12. **channel carrier frequencies** : → *frequency 18*
13. **charge carrier** : a particle such as an electron, proton, ion and, by extension, a hole, having one or more elementary electric charges. ★ porteur de charge → *porteur 8.* R носитель заряда. D Ladungsträger. E portador de carga. I portatore di carica. N ladingdrager. P nośnik ładunku. S laddningsbärare. (111,391,521)
14. **charge carrier storage** : → *storage 3*
15. **excess carrier** : conduction electron or hole in excess of the number determined by means of the thermodynamic equilibrium. ★ porteur en excès → *porteur 9.* R неравновесный носитель. D Überschuß(ladungs)träger. E portador en exceso. I portatore in eccesso. N overtollige ladingdrager. P nośnik nadmiarowy. S överskotts(laddnings)bärare. (521)
16. **flexible carrier** : a non rigid material which supports the heating conductor(s). ★ support souple → *support 41.* R гибкий держатель. D biegsamer Träger. E soporte flexible. I supporto flessibile. N soepele elementdrager. P nośnik giętki. S ..... (841)
17. **full carrier** : pertaining to a transmission or emission with amplitude modulation where, by convention, the power of the sinusoidal carrier component is no more than 6 dB below the peak envelope power. ★ à porteuse complète → *porteuse 1.* R полная несущая. D Voll-Träger-. E portadora completa. I a portante completa. N volle-draaggolf. P (transmisja lub emisja) o nośnej pełnej. S fullbärvåg. (702)
18. **group carrier frequencies** : → *frequency 109*
19. **intermediate carrier** : one of the carriers used in multiple modulation other than the main carrier. ★ porteuse intermédiaire → *porteuse 12.* R промежуточная несущая. D Zwischenträger. E portadora intermedia. I portante intermedia. N tussendraaggolf. P nośna pośrednia. S mellanbärvåg. (702)
20. **main carrier** : the last carrier used in multiple modulation. ★ porteuse principale → *porteuse 13.* R главная несущая. D Hauptträger. E portadora principal. I portante principale. N hoofddraaggolf. P nośna główna. S huvudbärvåg. (702)
21. **majority carrier** : a charge carrier of a type that constitutes more than half of the total free charge concentration. ★ porteur majoritaire → *porteur 10.* R основной носитель. D Majoritätsträger. E portador mayoritario. I portatore maggioritario. N meerderheidsladingdrager. P nośnik większościowy. S majoritets(laddnings)bärare. (521)
22. **minority carrier** : a charge carrier of a type that constitutes less than half of the total free charge carrier concentration. ★ porteur minoritaire → *porteur 11.* R неосновной носитель. D Minoritätsträger. E portador minoritario. I portatore minoritario. N minderheidsladingdrager. P nośnik mniejszościowy. S minoritets(laddnings)bärare. (521)
23. **multichannel carrier transmission** : → *transmission 42*
24. **power line carrier pilot protection system** : → *system 152*
25. **principal carrier** (*Syn.* main catenary) : → *catenary 10*
26. **pulsed carrier** : a periodic sequence of identical pulses intended to be modulated. ★ porteuse à impulsions → *porteuse 11.* R импульсная несущая. D gepulster Träger. E portadora de impulsos. I portante a impulsi. N pulsdraaggolf. P nośna impulsowa. S pulsbärvåg. (702)
27. **pulsed carrier modulation** (*Syn.* modulation of pulses) : → *modulation 35*
28. **reduced carrier** : pertaining to a transmission or emission with amplitude modulation where the power of the sinusoidal carrier component is, by convention, reduced by more than 6 dB below the peak envelope power but remains at such a level that it can be reconstituted and used for demodulation. ★ à porteuse réduite → *porteuse 2.* R ослабленная несущая. D reduzierter Träger-. E portadora reducida. I a portante ridotta. N beperktedraaggolf. P (transmisja lub emisja) o nośnej zredukowanej. S reducerad bärvåg. (702)
29. **sound carrier** : the carrier which is to be modulated by the sound signal of a television programme. ★ porteuse-son → *porteuse-son 1.* R несущая звукового сопровождения. (723)
30. **suppressed carrier** : pertaining to a transmission or emission with amplitude modulation where the power of the sinusoidal carrier component is reduced to a level such that it generally cannot be reconstituted and used for demodulation. ★ à porteuse supprimée → *porteuse 3.* R подавленная несущая. D unterdrückter Träger. E portadora suprimida. I a portante soppressa. N onderdrukte-draaggolf. P (transmisja lub emisja) o nośnej wytłumionej. S undertryckt bärvåg. (702)
31. **vision carrier** : the carrier which is to be modulated by a video signal. ★ porteuse-image → *porteuse-image 1.* R несущая изображения. (723)

carry

1. **carry electrode** : → *electrode 12*

cartridge

1. **cartridge** : a device composed of a case containing a magnetic tape, in the form of a multiturn endless loop carried on a single hub. The tape is unwound from the inside turn of the loop and wound on the outside turn of the loop. the device can be easily and instantaneously inserted in a recording/reproducing equipment or in a reproducer designed for this purpose without handling the magnetic tape. ★ cartouche → *cartouche 1.* R кассета с бесконечным рулоном; кассета. D Cartridge (8-Spur-Kassette, Endlosband-Cartridge). E cartucho. I cartuccia. N cartridge. P kaseta o zamkniętym obiegu; kaseta z pętlą. S enspolekassett med ändlöst band. (806)
2. **cartridge type bearing** : → *bearing 12*
3. **pick-up cartridge** (of disk) : a removable pick-up head. ★ cartouche de lecture → *cartouche 2.* R съемная головка звукоснимателя. D auswechselbarer Tonabnehmerkopf. E cartucho de lectura. I testina di riproduzione amovibile. N verwisselbaar pick-upelement. P wkładka (adaptera). S nålmikrofonkapsel. (806)
4. **transducer cartridge** : transducer element for earphone, microphone or pick-up head. ★ capsule → *capsule 1.* R капсюль преобразователя. D Wandlerkapsel. E capsúla transductora. I capsula di trasduzione. N kapsel. P element przetwarzający. S transor; ljuddosa. (801)

cascade

1. **bridges in cascade** : → *bridge 8*
2. **cascade control** : → *control 26*
3. **cascade generator** : → *generator 9*
4. **cascade (inductive) voltage transformer** : → *transformer 18*

case

1. **case shift** : → *shift 7*
2. **clearance underneath the gear case** : → *clearance 7*
3. **figures case** : one of the cases into which the characters, predominantly numerals and signs, and functions of a telegraph code with case shift are grouped. ★ série des chiffres → *série 29.* R цифровой регистр. D Ziffernstellung. E serie de cifras. I cifre. N grafische modus. P poczet cyfr. S sifferläge. (721)

4. **gear case** : a protective casing providing a reservoir of oil or grease for the gearing. ★ carter d'engrenage → *carter 1.* R кожух зубчатой передачи. D Getriebeschutzkasten. E carter de engranaje. I scatola ingranaggi. N tandwielkast. P skrzynia przekładniowa. S växelkåpa. (811)
5. **letters case** : one of the cases into which the characters, predominantly letter characters, and functions of a telegraph code with case shift are grouped. ★ série des lettres → *série 30.* R буквенный регистр. D Buchstabenstellung. E serie de letras. I caratteri letterali. N letterkast. P poczet liter. S bokstavsläge. (721)
6. **loading case** : the combination, or set, of loads applied to an element of a line for a particular loading assumption. ★ cas de charge → *cas 1.* R нагрузочный режим. D Lastfall. E caso de carga. I schema di carico. N belastingsgeval. P przypadek obciążenia. S belastningsfall. (466)
7. **resistor case** (*Syn.* resistor frame) : a set of resistor elements assembled into a single structure. ★ boîte de résistance → *boîte 7.* R ящик резисторов; шкаф резисторов. D Widerstandskasten; Widerstandsrahmen. E caja de resistencia. I telaio di resistori; cassetta di resistori. N weerstandsrek. P zespół rezystorowy. S motståndsenhet. (811)

casing

1. **casing** : the supporting outside steel frame and metal sheeting which encloses the thermal insulation and refractory materials. ★ carcasse → *carcasse 2.* R кожух. D Gehäuse (Aussengehäuse). E carcasa. I telaio. N ovenhuis; ovenkast. P obudowa. S mantel. (841)

cask

1. **cask** : a shielded container used to store or transport radioactive material. ★ château de plomb → *château 1.* D Transportbehälter. E cofre de plomo. I contenitore schermato. N transportvat; opslagvat. P pojemnik. S skärmkärl.. (026)

Cassegrain

1. **Cassegrain reflector antenna** : → *antenna 26*

cassette

1. **cassette** : a device composed of a case containing two coplanar or super-imposed hubs or reels on which a magnetic tape is wound, so that the tape can move from hub (reel) to hub (reel) during recording, reproduction, a fast forward movement or rewinding. the device can be easily and instantaneously inserted in a recording/reproducing equipment or in a reproducer designed for this purpose, without handling the magnetic tape. ★ cassette → *cassette 1.* R кассета. D Cassette; Compactcassette. E cassette. I cassetta. N cassette. P kaseta. S tvåspolekassett. (806)
2. **cassette changer** : → *changer 1*
3. **radiographic cassette** : a container with a cover transparent to X-radiation and opaque to ordinary light, in which the film used for radiography is enclosed. *Note.* — Cassettes may contain intensifying screens; or they may be designed for the use of non-screen film. ★ cassette → *cassette 2.* R радиографическая кассета. D Röntgenkassette. E casete radiográfica. I cassetta radiografica. N röntgencassette. P kaseta radiograficzna. S röntgenfilmkassett. (881)
4. **stereoscopic cassette changer** : → *changer 10*

cast

1. **induction furnace cast lining** : → *lining 3*

casting

1. **casting** : a process in which a liquid or viscous material is poured or otherwise introduced into a mould or onto a prepared surface to solidify without the use of external pressure. ★ coulée → *coulée 2.* R отливка. D Gießen. E colada. I colata. N gieten. P zalewanie. S gjutning. (212)
2. **casting plastic** (*Syn.* casting resin) : → *resin 1*
3. **casting resin** : → *resin 1*

cataleptic

1. **cataleptic failure** : → *failure 2*

cataract

1. **cataracts** : in medicine, an opacity of the crystalline lens of the eye obstructing partially or totally its transmission of light. *Note.* — Cataracts can result from several causes, including irradiation. ★ cataracte → *cataracte 1.* R катаракты. D Katarakt. E catarata. I cataratta. N cataracten. P katarakta. S katarakter. (881)

catastrophic

1. **catastrophic failure** (*Syn.* cataleptic failure) : → *failure 2*

category

1. **apparatus of category "ia"** : → *apparatus 1*
2. **apparatus of category "ib"** : → *apparatus 2*
3. **category analysis** : → *analysis 3*
4. **radiation workers - category A** : → *worker 2*
5. **radiation workers - category B** : → *worker 3*
6. **utilization category** (for a switching device or a fuse) : a combination of specified requirements related to the condition in which the switching device or the fuse fulfils its purpose, selected to represent a characteristic group of practical applications. *Note.* — The specified requirements may concern e.g. the values of making capacities (if applicable), breaking capacities and other characteristics, the associated circuits and the relevant conditions of use and behaviour. ★ catégorie d'emploi → *catégorie 3.* R категория применения (коммутационного аппарата или предохранителя). D Gebrauchskategorien (eines Schaltgerätes oder einer Sicherung). E categoría de utilización (para un aparato de conexión o un fusible). I categoria di utilizzazione (per un apparecchio di manovra o un fusibile). N gebruikscategorie (van een schakeltoestel of een smeltveiligheid). P kategoria użytkowania (łącznika). S användningskategori. (441)

catenary

1. **auxiliary catenary** (*Syn.* auxiliary carrier) : a catenary suspended from the main catenary and supporting the contact wire or wires directly by means of droppers. ★ câble porteur auxiliaire → *câble 58.* R вспомогательный несущий трос. D Hilfstragseil; Hilfstragdraht. E cable portador auxiliar; portador auxiliar. I corda (portante) ausiliaria. N hulpdraagkabel. P linka nośna pomocnicza. S hjälpbärlina. (811)
2. **catenary** : the shape of the curve assumed by a perfectly flexible, inextensible cord suspended at its ends, and given by the equation :

$$Y = \rho\left(\cosh\frac{X}{\rho} - 1\right)$$

In practice, the simple parabola is often used,

$$Y = \frac{1}{2\rho}X^2$$

which represents the first two terms of the series expansion of the equation of the catenary. *Note.* — The catenary curve represents a cable with constant weight per unit of length of curve, while the parabola represents a wire with a constant weight per horizontal unit of length. The sag calculated by the parabolic equation is smaller than that calculated by the catenary equation. For long spans or for very sloping spans the parabolic approximation can introduce unacceptable errors. ★ chaînette → *chaînette 1.* R цепная линия. D Kettenlinie. E catenaria. I catenaria. N kettinglijn. P krzywa łańcuchowa. S linbåge. (466)
3. **catenary** (*Syn.* messenger wire (USA)) : a longitudinal cable supporting the contact wire or wires either directly or indirectly. ★ câble porteur longitudinal → *câble 59.* R продольный несущий трос. D Längstragseil. E cable portador longitudinal; catenaria. I corda portante. N draagkabel. P linka nośna podłużna. S bärlina. (811)
4. **catenary constant** : → *constant 4*
5. **catenary sag** : → *sag 1*
6. **compound catenary equipment** : → *equipment 13*
7. **curvilinear catenary** (*Syn.* inclined catenary) : → *catenary 9*
8. **double catenary equipment** : → *equipment 28*
9. **inclined catenary** (*Syn.* skew catenary; curvilinear catenary) : an overhead contact line in which one or more contact wires are suspended from the catenary by inclined droppers so that the contact wire or wires follow a path corresponding approximately to the centre line of the track. ★ caténaire inclinée → *caténaire 3.* R наклонная подвеска; косая подвеска; криволинейная подвеска. D windschiefe Oberleitung. E catenaria inclinada. I catenaria inclinata; catenaria obliqua. N ..... P sieć pochyła. S ..... (811)

10. **main catenary** (*Syn.* principal carrier) : a catenary supporting an auxiliary catenary by means of droppers. ★ câble porteur principal → *câble 60.* R главный несущий трос. D Haupttragseil. E cable portador principal; portador principal. I corda (portante) principale. N hoofddraagkabel. P linka nośna główna. S huvudbärlina. (811)
11. **overhead contact line with catenary suspension** : → *line 120*
12. **simple (catenary) equipment with single contact wire** : → *equipment 66*
13. **simple (catenary) equipment with twin contact wires** : → *equipment 67*
14. **skew catenary** (*Syn.* inclined catenary) : → *catenary 9*
15. **stitched catenary suspension** : → *suspension 8*

catering

1. **catering tariff** : → *tariff 3*

cathode

1. **abnormal cathode fall** : → *fall 1*
2. **cathode** (of a device) : an electrode through which current normally leaves the medium of different conductivity. ★ cathode → *cathode 2.* R катод (устройства). D Kathode. E cátodo (de un dispositivo). I catodo (di un dispositivo). N kathode. P katoda. S katod. (151)
3. **cathode** : an electrode that is the source of the desired electron emission. ★ cathode → *cathode 3.* R катод. D Kathode. E cátodo. I catodo. N kathode. P katoda. S katod. (531,841)
4. **cathode** (of an X-ray tube) : an electrode, usually an incandescent filament of tungsten, which emits electrons in an X-ray tube. ★ cathode → *cathode 4.* R катод (рентгеновской трубки). D Kathode; (einer Röntgenröhre). E cátodo (de un tubo de rayos X). I catodo (di un tubo a raggi X). N kathode (van een röntgenbuis). P katoda (lampy rentgenowskiej). S katod. (881)
5. **cathode current** : → *current 17*
6. **cathode current** : → *current 18*
7. **cathode diameter** : diameter of the piece, usually made of a high melting point metal, used as cathode. ★ diamètre de la cathode → *diamètre 3.* R диаметр катода. D Kathodendurchmesser. E diámetro del cátodo. I diametro del catodo. N kathodemiddellijn. P średnica katody. S katoddiameter. (841)
8. **cathode drop** (*Syn.* cathode fall) : → *fall 2*
9. **cathode fall** : → *fall 2*
10. **cathode heating rate** : → *rate 9*
11. **cathode heating time** : → *time 17*
12. **cathode interface layer** : → *layer 2*
13. **cathode preheating time** : → *time 18*
14. **cathode ray tube (television) projector** : → *projector 1*
15. **cathode rays** : → *ray 6*
16. **cathode tip angle** : → *angle 15*
17. **cold cathode** : a cathode that does not require heating to produce the desired emission. ★ cathode froide → *cathode 12.* R холодный катод. D Kaltkathode. E cátodo frío. I catodo freddo. N koude kathode. P katoda zimna. S kallkatod. (531,841)
18. **cold cathode counting tube** : → *tube 16*
19. **cold cathode lamp** : → *lamp 8*
20. **directly heated cathode filament** : → *filament 3*
21. **dispenser cathode** : a cathode, the emissive material of which is contained within a porous metal surface. ★ cathode dispensatrice → *cathode 10.* R диспенсерный катод. D Vorratskathode. E cátodo dispersor. I catodo dispensatore. N voorraadkathode. P katoda zasobnikowa. S förrådskatod. (531)
22. **external cathode counter tube** : → *counter tube 8*
23. **grid/cathode driving voltage** : → *voltage 78*
24. **indirectly heated cathode** : a hot cathode that does not carry the heating current. ★ cathode à chauffage indirect → *cathode 6.* R катод косвенного накала. D indirekt geheizte Kathode. E cátodo de caldeo indirecto. I catodo con riscaldamento indiretto. N indirect verhitte kathode. P katoda żarzona pośrednio. S indirekt upphettad katod. (531)
25. **minimum cathode current** : → *current 130*
26. **normal cathode fall** : → *fall 7*
27. **oxide cathode** (*Syn.* oxide-coated cathode) : → *cathode 28*
28. **oxide-coated cathode** (*Syn.* oxide cathode) : a cathode consisting of a metal base coated with alkaline-earth oxides as the emissive material. ★ cathode à couche d'oxydes → *cathode 7.* R оксидный катод. D Oxidschichtkathode; Oxidkathode. E cátodo de capa de óxidos; cátodo de óxidos. I catodo con ossidi. N oxydekathode. P katoda tlenkowa. S oxidkatod. (531)
29. **parallel cathode heating** : → *heating 47*
30. **parallel cathode preheating** : → *preheating 2*
31. **photoelectric cathode** (*Syn.* photocathode) : → *photocathode 1*
32. **pool cathode** : a liquid, usually mercury, used as the cathode of an arc discharge tube. ★ cathode liquide → *cathode 13.* R жидкометаллический катод. D Quecksilberkathode (Sumpf- oder Teichkathode). E cátodo líquido. I catodo liquido. N vloeibare kathode. P katoda ciekła. S vätskekatod. (531)
33. **series cathode heating** : → *heating 51*
34. **series cathode preheating** : → *preheating 5*
35. **thoriated-tungsten cathode** : a directly heated tungsten-filament cathode in which the emission is enhanced by the addition of thorium. ★ cathode en tungstène thorié → *cathode 11.* R торированный вольфрамовый катод. D thorierte Wolframkathode. E cátodo de tungsteno y torio. I catodo di tungsteno toriato. N gethoreerde wolfraamkathode. P katoda torowana. S torium-wolframkatod. (531)

cathode-covering

1. **cathode-covering current** (*Syn.* minimum cathode current) : → *current 130*

cathode-potential-stabilized

1. **cathode-potential-stabilized camera tube** (*Syn.* low-velocity camera tube) : → *camera tube 6*

cathode-ray tube

1. **cathode-ray charge-storage tube** : a charge-storage tube into which the information is written by means of a cathode-ray beam. ★ tube à rayons cathodiques à mémoire électrostatique → *tube à rayons cathodiques 7.* R электроннолучевая запоминающая трубка с накоплением заряда. D Ladungsspeicherröhre mit Schreibstrahl. E tubo de rayos catódicos de memoria electrostática. I tubo a raggi catodici a memoria elettrostatico. N kathodestraal-ladingsgeheugenbuis. P lampa pamięciowa wiązkowa ładunkowa. S elektrostatiskt katodstråleminnesrör. (531)
2. **cathode-ray storage tube** : a storage tube into which the information is written by means of a cathode-ray beam. ★ tube à rayons cathodiques à mémoire → *tube à rayons cathodiques 6.* R электроннолучевая запоминающая трубка. D Speicherröhre mit Schreibstrahl. E tubo de rayos catódicos de memoria. I tubo a raggi catodici a memoria. N kathodestraalgeheugenbuis. P lampa pamięciowa wiązkowa. S katodstråleminnesrör. (531)
3. **cathode-ray tube** : a signal-to-image converter tube in which a well defined and controllable beam of electrons is produced and directed on to a surface to give a visible or otherwise detectable display or effect. ★ tube cathodique → *tube 66.* R электроннолучевая трубка. D Signal-Bild-Wandlerröhre. E tubo de rayos catódicos. I tubo a raggi catodici — tubo catodico. N kathodestraalbuis. P lampa obrazowa. S katodstrålerör. (531)
4. **cathode-ray tube** : a vacuum tube in which a beam of electrons is formed by liberation of electrons from a cathode and their subsequent acceleration in an electric field. ★ tube (à rayons) cathodiques → *tube à rayons cathodiques 2.* R катодная трубка. D Kathodenstrahl-Röhre. E tubo de rayos catodicos. I tubo a raggi catodici. N kathodestraalbuis. P lampa katodowa. S katodstrålerör. (881)
5. **double-beam cathode-ray tube** (*Syn.* split-beam cathode-ray tube) : → *cathode-ray tube 8*
6. **double-gun cathode-ray tube** : a cathode-ray tube containing two separate electron-gun systems. ★ tube à rayons cathodiques à double canon → *tube à rayons cathodiques 3.* R двухпрожекторная электроннолучевая трубка. D Zweistrahlröhre mit getrennten Elektronenstrahlerzeugern. E tubo de rayos catódicos de doble cañón. I tubo a raggi catodici con doppio cannone.

N elektronenstraalbuis met twee bundels. P lampa elektronopromieniowa o dwóch wyrzutniach. S tvåkanonsrör. (531)

7. **multiple-gun cathode-ray tube** : a cathode-ray tube containing two or more separate electron-gun systems. ★ tube à rayons cathodiques à plusieurs canons → *tube à rayons cathodiques 8.* R многопрожекторная электроннолучевая трубка. D Mehrstrahlröhre mit getrennten Elektronenstrahlerzeugern. E tubo de rayos catódicos de varios cañones. I tubo a raggi catodici con più cannoni. N kathodestraalbuis met meer dan één (elektronen)kanon. P lampa elektronopromieniowa o wielu wyrzutniach. S flerkanonsrör. (531)
8. **split-beam cathode-ray tube** (*Syn.* double-beam cathode-ray tube) : a cathode-ray tube containing one electron gun producing a beam which is split to produce two traces on the screen. ★ tube à rayons cathodiques à faisceau divisé → *tube à rayons cathodiques 5.* R электроннолучевая трубка с расщепленным пучком. D Mehrstrahlröhre mit einem Elektronenstrahlerzeuger. E tubo de rayos catódicos de haz dividido; tubo de rayos catódicos de doble haz. I tubo a raggi catodici con fascio diviso (doppio fascio). N dubbele-bundelbuis. P lampa o wiązce rozczepionej. S dubbelstrålerör. (531)

cathodic

1. **cathodic polarization** : → *polarization 2*
2. **cathodic protection** : → *protection 8*
3. **cathodic protection** : → *protection 9*
4. **cathodic reaction** : → *reaction 5*

cathodoluminescence

1. **cathodoluminescence** : luminescence caused by the impact of electrons on certain types of luminescent materials, such as the coating on a television screen. ★ cathodoluminescence → *cathodoluminescence 1.* R катодолюминесценция. D Kathodolumineszenz. E catodoluminiscencia. I catodoluminescenza. N kathodeluminescentie. P katodoluminescencja. S elektronstråleluminiscens. (845)

cation

1. **cation** : a positively charged ion. ★ cation → *cation 1.* R катион. D Kation. E catión. I catione. N kation. P kation. S katjon. (111)

CATV

1. **CATV** (*Syn.* communal (broadcasting) antenna) : antenna associated with a cabled distribution system intended for feeding sound or television broadcast receivers of users, grouped together within a community, e.g. a village or built-up area. *Note.* — In French the use of the terms "antenne collective" and "antenne communautaire" varies according to local practice. ★ antenne communautaire → *antenne 65.* R коллективная приемная антенна. (723)

cause

1. **failure cause** : the circumstances during design, manufacture or use which have led to a failure. ★ cause de défaillance → *cause 1.* R причина отказа. D Ausfallursache. E causa de fallo. I causa di guasto. N storingsoorzaak. P przyczyna uszkodzenia. S felorsak. (191)

cavity

1. **Bragg-Gray cavity** : an ideal cavity containing gas within a solid medium, the cavity being sufficiently small not to disturb the distribution of either primary or secondary radiation in the medium. ★ cavité de Bragg-Gray → *cavité 2.* R полость Брегга-Грея. D Bragg-Gray-Hohlraum. E cavidad de Bragg-Gray. I cavità di Bragg-Gray. N Bragg-Grayholte. P wnęka Bragga-Graya. S Bragg-Gray-kavitet. (391)
2. **Bragg-Gray cavity ionization chamber** : → *ionization chamber 4*
3. **cavity** (*Syn.* cavity resonator) : → *resonator 1*
4. **cavity frequency meter** : → *meter 15*
5. **cavity ionization chamber** : → *ionization chamber 6*
6. **cavity mode** (*Syn.* mode of resonance) : → *mode 57*
7. **cavity resonator** : → *resonator 1*
8. **cavity wavemeter** (*Syn.* cavity-frequency meter) : → *meter 15*
9. **optical cavity** (*Syn.* resonant cavity) : a region bounded by two or more reflecting surfaces, whose elements are aligned to provide multiple reflections and in which a standing wave can exist at particular wavelengths. ★ cavité optique → *cavité 4.* R оптический резонатор. D Resonanzraum. E cavidad óptica; cavidad resonante. I cavità ottica; cavità risonante. N optische trilholte; optische resonator; resonatorholte; trilholte. P wnęka optyczna; wnęka rezonansowa. S optoresonator. (731)
10. **resonant cavity** (*Syn.* optical cavity) : → *cavity 9*
11. **waveguide cavity** : a cavity resonator comprising a section of uniform waveguide. ★ cavité de guide d'ondes → *cavité 3.* R волноводный резонатор. D Hohlleiter-Hohlraum. E cavidad de guíaonda. I cavità di guida d'onda. N golfgeleidertrilholte. P rezonator falowodowy. S vågledarresonator. (726)

CB

1. **CB** (*Syn.* central battery) : → *battery 13*

CBS

1. **CBS** (*Syn.* central battery signalling (telephony)) : → *signalling 5*

CCD

1. **CCD line telecine** : → *telecine 2*

CCITT

1. **fundamental reference system of the CCITT** : → *system 74*

CCP

1. **CCP** (*Syn.* cross-connection point) : → *point 7*

CCTV

1. **CCTV** (*Syn.* closed-circuit television) : → *television 4*

CDM

1. **CDM** (*Syn.* code division multiplexing) : → *multiplexing 1*

ceiling

1. **ceiling voltage** : → *voltage 20*
2. **nominal excitation system ceiling voltage** : → *voltage 125*

cell

1. **ambient temperature (of a cell or battery)** : → *temperature 4*
2. **anti T-R cell** : a gas-filled device, employed when a common transmitting and receiving antenna is used, which automatically decouples the transmitter from the antenna during the receiving period. ★ verrou émission-réception → *verrou 4.* R антиразрядник защиты приемника. D Anti-T-R-Zelle. E célula anti T-R. I cella anti T-R; blocco emettitore-ricevitore. N zenderontkoppelbuis. P lampa ANO; lampa odcinająca układu NO. S ..... (726)
3. **basic cell** (of a push-button switch) : an assembly in a push-button switch formed by a button, the mechanical system, the contact device and, possibly, an associated lamp or light source. ★ cellule élémentaire → *cellule 5.* R элемент базовый кнопочного переключателя. D Schalteinheit. E célula elemental (de un pulsador). I cella elementare. N schakeleenheid (van druktoetsschakelaar). P segment (łącznika). S strömställarsektion. (581)
4. **cell** (in a reactor) : one of a set of elementary regions in a heterogeneous reactor each of which has the same geometrical form and neutron characteristics. ★ cellule → *cellule 1.* D Reaktorzelle. E celda de reactor. I cella. N reactorcel. P komórka reaktora. S cell. (026)
5. **cell polarization** : → *polarization 3*
6. **(cell) source voltage** : → *voltage 21*
7. **cell voltage** : → *voltage 22*
8. **charge efficiency (of a cell or battery)** : → *efficiency 6*
9. **critical temperature (of a cell or battery)** : → *temperature 12*
10. **(electrochemical) cell** : a heterogeneous system in which electric energy produces chemical reactions or, conversely, in which chemical reactions produce electrical energy. ★ élément (électrochimique) → *élément 53.* R электрохимический элемент. D (elektrochemische) Zelle. E elemento (electroquímico); célula (electroqui'mica). I elemento (elettrochimico); cella (elettrochimica). N (elektrochemische) cel. P ogniwo (elektrochemiczne). S (elektrokemisk) cell. (111)

11. **(electrochemical) cell or battery** : an electrochemical system capable of storing in chemical form the electric energy received and which can give it back by reconversion. ★ accumulateur (électrique) → *accumulateur 8.* R вторичный химический источник тока. D Akkumulator. E elemento o batería (electroquímico). I accumulatore (elettrico). N (elektrische) accumulator. P akumulator elektryczny. S elektrokemisk cell. (486,811)
12. **electrolysis cell** : an electrochemical cell capable of producing a chemical reaction when electric energy is supplied. ★ électrolyseur → *électrolyseur 1.* R электролизер (аппарат для электролиза). D Elektrolysezelle. E electrolizador; célula electrolítica. I elettrolizzatore; cella elettrolitica. N elektrolysecel. P ogniwo elektrolityczne. S elektrolyscell. (111)
13. **end-of-charge voltage (of a cell or battery)** : → *voltage 61*
14. **energy efficiency (of a cell or battery)** : → *efficiency 23*
15. **fuel cell** : a generator of electricity using chemical energy directly by ionisation and oxidation of the fuel. ★ pile à combustible → *pile 1.* R топливный элемент. D Brennstoffzelle. E pila de combustible. I pila a combustibile. N brandstofcel. P ogniwo paliwowe. S bränslecell. (602)
16. **galvanic cell** : an electrochemical cell capable of converting chemical energy into electric energy. ★ générateur électrochimique → *générateur 21.* R гальванический элемент. D Galvanische Zelle. E generador elctroquímico (de energia); célula galvánica. I generatore elettrochimico (d'energia); cella galvanica. N galvanische cel. P ogniwo galwaniczne. S galvaniskt element. (111)
17. **gastight sealed (secondary) cell** : a secondary cell which remains closed and does not release either gas or liquid when operated within the limits of charge and temperature specified by the manufacturer. The cell may be equipped with a safety device to prevent dangerously high internal pressure. The cell does not require addition to the electrolyte and is designed to operate during its life in its original sealed state. ★ élément (d'accumulateur) étanche scellé → *élément 16.* R герметичный газонепроницаемый аккумулятор. D verschlossene Zelle. E elemento (acumulador) estanco sellado. I elemento (accumulatore) chiuso stagno. N gasdichte cel. P ogniwo szczelne zamknięte. S sluten cell. (486)
18. **hermetically sealed (secondary) cell** : a gastight sealed secondary cell without pressure release device. ★ élément (d'accumulateur) hermétique → *élément 17.* R герметичный аккумулятор. D hermetisch dichte Zelle. E elemento (acumulador) sellado herméticamente. I elemento (accumulatore) ermetico. N hermetisch gesloten cel. P ogniwo hermetyczne. S gastät cell. (486)
19. **initial temperature (of a cell or battery)** : → *temperature 20*
20. **initial voltage (of a cell or battery)** : → *voltage 89*
21. **mean voltage (of a cell or battery)** : → *voltage 114*
22. **nominal capacity (of a cell or battery)** : → *capacity 20*
23. **nominal voltage of a cell or battery** : → *voltage 127*
24. **on-load voltage (of a cell or battery)** : → *voltage 130*
25. **open (secondary) cell** (*Syn.* vented (secondary) cell) : → *cell 44*
26. **photoconductive cell** : a photosensitive tube in which the photoconductive effect is utilized. ★ cellule photoconductrice → *cellule 6.* R фоторезистор. D Photowiderstand. E célula fotoconductora. I cella fotoconduttrice. N fotoweerstand. P lampa fotoprzewodząca. S fotokonduktiv cell. (521,531)
27. **photoconductive cell** (*Syn.* photoresistor) : → *photoresistor 1*
28. **photoemissive cell** (*Syn.* phototube) : → *phototube 2*
29. **photoemissive cell** (*Syn.* phototube) : photoelectric detector that utilizes emission of electrons caused by optical radiation. ★ cellule photoémissive → *cellule 9.* R фотоэлемент. D Photozelle. E célula fotoemisora. I tubo fotoelettrico. N foto(-emissie)cel. P komórka fotoelektryczna; fotokomórka. S fotocell. (845)
30. **photovoltaic cell** : a photodiode in which the photovoltaic effect is utilized. ★ cellule photovoltaïque → *cellule 10.* R фотогальванический элемент. D Photoelement. E célula fotovoltaica. I cella fotovoltaica. N fotospanningscel; zonnecel. P ogniwo fotoelektryczne. S fotoelektromotorisk cell. (521,531)
31. **photovoltaic cell** (*Syn.* photoelement) : → *photoelement 1*
32. **pilot cell** : a selected cell of a battery which is used to assess the average state of the battery or part thereof. ★ élément pilote → *élément 69.* R контрольный аккумулятор. D Pilot-Zelle. E elemento piloto. I elemento pilota. N meetcel. P ogniwo pilotowe; ogniwo kontrolne. S pilotcell. (486)
33. **rated capacity (of a cell or battery)** : → *capacity 23*
34. **(rechargeable) cell** (*Syn.* (secondary) cell) : → *cell 35*
35. **(secondary) cell** (*Syn.* (rechargeable) cell) : an assembly of electrodes and electrolyte which constitutes the basic unit of a secondary battery. ★ élément (d'accumulateur) → *élément 14.* R аккумулятор. D Zelle. E elemento (acumulador); elemento (recargable). I elemento. N (oplaadbare) cel. P ogniwo (akumulatorowe). S (laddningsbar) cell. (486)
36. **T-B cell** (*Syn.* transmitter blocker cell) : a gas-filled device which acts as a short circuit in a transmission line when ionized but as an open circuit when non-ionized. ★ verrou d'émetteur → *verrou 3.* R Т - В-разрядник; разрядник блокировки передатчика. D T-B-Zelle; Sendersperrzelle. E célula T-B. I cella T-B; blocco di emettitore. N zenderblokkeerbuis. P lampa pre NO; lampa członu wstępnego układu NO. S sändarblockerare. (726)
37. **TEM cell** : an enclosed system, often a rectangular coaxial line, in which a wave is propagated in the transverse electromagnetic mode to produce a specified field for testing purposes. ★ cellule TEM → *cellule 12.* R камера с ТЕМ-волной. D TEM-Zelle. E célula TEM. I cella TEM. N TEM-cel. P komora o fali TEM (elektromagnetycznej poprzecznej). S TEM-cell. (161)
38. **temperature coefficient of capacity (of a cell or battery)** : → *coefficient 70*
39. **T-R cell** (*Syn.* transmit-receive cell) : a gas-filled device which acts as a short circuit in a transmission line when ionized but is transparent to low power energy when non-ionized. ★ verrou de récepteur → *verrou 2.* R Т - R-разрядник; разрядник защиты приемника. D T-R-Zell; Empfängersperrzelle. E célula T-R. I cella T-R; blocco di ricevitore. N ontvangerblokkeerbuis. P lampa NO; lampa układu nadawanie-odbiór. S mottagarskyddare. (726)
40. **transmit-receive cell** (*Syn.* T-R cell) : → *cell 39*
41. **transmitter blocker cell** (*Syn.* T-B cell) : → *cell 36*
42. **unspillable (secondary) cell** : a secondary cell from which the electrolyte cannot escape whatever its orientation. *Note.* — Some vented cells are designed so as to be unspillable. ★ élément (d'accumulateur) renversable → *élément 19.* R непроливаемый аккумулятор. D kippsichere Zelle. E elemento (acumulador) no derramable. I elemento (accumulatore) rovesciabile. N kantelbare cel. P ogniwo niewylewne. S läckfri cell. (486)
43. **valve-regulated sealed (secondary) cell** : a secondary cell which is closed under normal conditions but which has an arrangement which allows the escape of gas if the internal pressure exceeds a predetermined value. The cell cannot normally receive addition to the electrolyte. ★ élément (d'accumulateur) étanche à soupape → *élément 15.* R закрытый аккумулятор. D gasdichte Zelle. E elemento (acumulador) sellado con una válvula regulada. I elemento (accumulatore) chiuso con valvola. N dichte cel met regelventiel. P ogniwo szczelne z zaworem. S ventilreglerad cell; VR-cell. (486)
44. **vented (secondary) cell** (*Syn.* open (secondary) cell) : a secondary cell having a cover provided with an opening through which gaseous products may escape. *Note.* — The opening may be fitted with a venting system. ★ élément (d'accumulateur) ouvert → *élément 18.* R открытый аккумулятор. D geschlossene Zelle. E elemento (acumulador) abierto. I elemento (accumulatore) aperto. N cel met ontluchting; open cel. P ogniwo otwarte. S ventilerad cell; FV-cell. (486)

cellular

1. **cellular plastic** : → *plastic 2*

cellulosic

1. **cellulosic paper** : → *paper 1*

cement

1. **cement** (verb) : to bond together (cohere) two surfaces by application of a cement . ★ cimenter → *cimenter 1.*

R склеивать. D verkleben; verbacken. E encolar. I cementare. N lijmen. P cementować. S limma. (212)

2. **cement** (noun) : a substance which is applied in a soft and pasty state and subsequently hardened and which is used to bond surfaces together. *Note.* — The term *cement* is also used as a verb . ★ ciment → *ciment 1.* R цемент. D Kitt. E cemento; masilla adhesiva. I cemento. N lijm. P cement. S lim. (212)

cemetery

1. **radioactive cemetery** : a site reserved for dumping undesirable radioactive objects, with the appropriate protection. ★ cimetière radioactif → *cimetière 1.* D Ablagerungsplatz. E cementerio radiactivo. I cimitero radioattivo. N begraafplaats (voor radioactieve stoffen); kernhof. P mogilnik. S ..... (026)

cent

1. **cent** : logarithmic frequency interval between two sounds having a fundamental-frequency ratio of the 1200th root of two. *Notes. 1* — One octave is equal to 1200 cents. *2* — The cent is used as a unit of logarithmic frequency interval. ★ centième → *centième 1.* R цент. D Cent. E centésima. I cent. N cent. P cent. S cent. (801)

central

1. **central battery** : → *battery 13*
2. **central battery feeding (telephony)** : → *telephony 1*
3. **central battery signalling (telephony)** : → *signalling 5*
4. **central control room** : → *room 4*
5. **central processor** : → *processor 1*

centralized

1. **centralised absolute chronology** : → *chronology 2*
2. **centralized control** : → *control 28*
3. **centralized telecontrol** : → *telecontrol 2*
4. **series injection of a centralized telecontrol signal** : → *injection 6*
5. **shunt injection of a centralized telecontrol signal** : → *injection 7*

centre

1. **centre clipping** : → *clipping 1*
2. **centre conductor rail** : → *rail 2*
3. **centre holes** : → *hole 3*
4. **centre shield** : → *shield 3*
5. **centre terminal** : → *terminal 3*
6. **cladding centre** : for a cross section of an optical fibre it is the centre of that circle which best fits the outer limit of the cladding. *Notes. 1* — The cladding centre may not be the same as the core centre and the reference surface centre. *2* — The method of best fitting has to be specified. ★ centre de la gaine → *centre 9.* R центр оболочки. D Mantelmitte. E centro del revestimiento. I centro del mantello. N mantelmiddelpunt (van een glasvezel). P środek płaszcza. S mantelcentrum. (731)
7. **control centre** (*Syn.* master station (in telecontrol)) : a location at which telecontrol of outstations is performed. ★ poste de conduite → *poste 24.* R пункт управления (в телемеханике); ПУ (в телемеханике). D Zentralstation. E centro de control (en telecontrol); estación principal (en telecontrol). I centro di controllo; posto principale (nel telecontrollo). N besturingsstation; hoofdstation; besturingspost; hoofdpost. P stacja kierownicza. S huvudstation. (371)
8. **core centre** : for a cross section of an optical fibre it is the centre of that circle which best fits the outer limit of the core area. *Notes. 1* — The core centre may not be the same as the cladding centre and the reference surface centre. *2* — The method of best fitting has to be specified. ★ centre du coeur → *centre 16.* R центр сердцевины. D Kernmitte. E centro del núcleo. I centro del nucleo. N kernmiddelpunt. P środek rdzenia. S kärncentrum. (731)
9. **effective acoustic centre** (*Syn.* virtual acoustic centre) : for an electroacoustic transducer used for sound emission, in a specified direction, for a specified frequency and range of distances, position of the virtual point source from which sound pressure varies inversely as distance. *Note.* — The effective acoustic centre of a reciprocal transducer when used for sound reception is coincident with the acoustic centre when used for sound emission. ★ centre acoustique effectif → *centre 1.* R эффективный акустический центр; фактический акустический центр. D effektives akustisches Zentrum; virtuelles akustisches Zentrum. E centro acústico efectivo; centro acústico virtual. I centro acustico effettivo; centro acustico virtuale. N akoestisch middelpunt. P środek promieniowania akustycznego. S akustiskt centrum. (801)
10. **gear centre distance** : → *distance 11*
11. **light centre** (of a source) : point used as origin for photometric measurements and calculations. ★ centre lumineux → *centre 18.* R световой центр (источника). D Lichtschwerpunkt (einer Lichtquelle). E centro de luz. I centro luminoso. N lichtcentrum (van een bron). P środek świetlny (źródła). S lyspunkt. (845)
12. **load centre** : the point, in a area, at which the sum of the products of each load and its distance from this point is a minimum. ★ centre de gravité de la charge → *centre 8.* R центр нагрузки. D Lastschwerpunkt. E centro de gravedad de la carga. I baricentro del carico. N zwaartepunt van de belasting. P środek ciężkości obciążenia. S belastningscentrum. (603)
13. **local switching centre** (*Syn.* local (switching) exchange) : a switching centre containing one or more local switching entities. ★ centre (de commutation) local → *centre 5.* R местная коммутационная станция. D ..... E centro (de conmutación) local. I centro di commutazione locale. N wijkcentrale; lokale centrale; nummercentrale. P centrum komutacyjne miejscowe. S lokalstation. (722)
14. **mode centre** (*Syn.* mode top) : the point, on the electronic tuning characteristic for a chosen mode, at which the output power has the maximum value. ★ sommet du mode → *sommet 3.* R центр зоны колебания. D Modmitte. E cumbre del modo. I centro del modo. N afstemfrequentie voor maximaal vermogen. P punkt pracy optymalny. S vågtypsmaximum. (531)
15. **monitoring centre** (*Syn.* monitoring station) : → *station 20*
16. **phase centre** : the location of a point associated with an antenna, if it exists, such that, when it is taken as the centre of a sphere or a circle, the phase of a given field component in the far-field region remains essentially constant at least over that portion of the surface of the sphere or over an arc of the circle where the radiation is significant. *Note.* — Some antennas have different phase centres dependent on the plane containing the circle being considered. ★ centre de phase → *centre 11.* R фазовый центр. D Phasenzentrum. E centro de fase. I centro di fase. N fasecentrum. P środek fazy. S fascentrum. (712)
17. **programme switching centre** (*Syn.* network switching) : switching centre receiving programme signals from various sources, and feeding them to other programme switching centres, presentation control areas, or transmitting stations. ★ centre nodal (vidéo) → *centre 20.* R центральная аппаратная. (723)
18. **reference surface centre** : for a cross section of an optical fibre it is the centre of that circle which best fits the reference surface. *Notes. 1* — The reference surface centre may not be the same as the core centre and the cladding centre. *2* — The method of best fitting has to be specified. ★ centre de la surface de référence → *centre 10.* R центр опорной поверхности. D Bezugsoberflächenmitte. E centro de la superficie de referencia. I centro della superficie di riferimento. N middelpunt van het referentieoppervlak. P środek powierzchni odniesienia. S referensytas centrum. (731)
19. **solar activity centre** : a region on the sun in which are located the sources of variable electromagnetic radiation and corpuscular radiation, such as facular plages, sunspots, prominences, coronal streamers and solar flares. ★ centre d'activité solaire → *centre 2.* D Sonnenaktivitätszentrum. P centrum aktywności słonecznej. (705)
20. **switching centre** : in a telecommunication network, a node containing one or more exchanges. ★ centre de commutation → *centre 3.* R коммутационный центр. D Vermittlungsstelle. E centro de conmutación. I centro di commutazione. N schakelcentrum; centrale. P węzeł komutacyjny. S växelstation; telestation. (714,715,722)
21. **transit centre** (*Syn.* transit exchange) : → *exchange 28*
22. **virtual acoustic centre** (*Syn.* effective acoustic centre) : → *centre 9*

centre-break

1. **centre-break disconnector** : → *disconnector 2*

ceramic

1. **ceramic** : a shaped and fired inorganic material usually consisting of refractory substances (such as silicates, oxides, and titanates) mainly crystalline when cooled. ★ céramique → *céramique 1.* R керамика. D Keramik. E cerámica. I ceramica. N keramiek. P ceramika. S keramik. (212)
2. **ceramic glass (material)** : → *glass 2*
3. **ceramic pick-up head** : → *pick-up head 2*
4. **infra-red ceramic panel emitter** : → *emitter 8*
5. **piezoelectric ceramic element** : → *element 38*
6. **piezoelectric crystal or ceramic vibrator** : → *vibrator 5*

Cerenkov

1. **Cerenkov detector** : → *detector 4*
2. **Cerenkov effect** : → *effect 7*
3. **Cerenkov radiation** : → *radiation 10*

chadless

1. **chadless perforation** : → *perforation 1*

chain

1. **chain** : a potential path joining an originating exchange to the destination exchange for a given traffic parcel, generally subject to constraints such as a maximum number of intermediate nodes or a given order of choice. *Note.* — Network optimisation is possible when more than one chain exists between an originating and a destination node. ★ acheminement préférentiel → *acheminement 9.* D Ende-zu-Ende-Weg. P łańcuch (potencjalny) połączeniowy. (715)
2. **chain conveyor feed** : → *feed 1*
3. **chain conveyor furnace** : → *furnace 8*
4. **chain fission yield** : → *yield 1*
5. **chain flow** : → *flow 3*
6. **functional chain** : sub-assembly of functional blocks extracted from a block diagram by cutting only two connections. ★ chaîne fonctionnelle → *chaîne 17.* R функциональная цепь. D Wirkungskette. E cadena funcional. I catena. N functiepad. P tor sterowania. S funktionskedja. (351)
7. **lighting chain** (*Syn.* lighting string (USA)) : set of lamps arranged along a cable and connected in series or parallel. ★ guirlande (lumineuse) → *guirlande 1.* R световая гирлянда. D Leuchtkette. E guirnalda. I catena luminosa. N verlichtingsgarnituur. P łańcuch świetlny. S ljuskedja. (845)
8. **measuring chain** : a set of transducers and connecting elements of (a)measuring instrument(s) placed between the sensor, which is the first element of the chain, and the last element of the chain: e.g. the indicating, recording, storage,..., device. ★ chaîne de mesurage → *chaîne 8.* R измерительная цепь. D Messkette. E cadena de medida; cadena de medición. I catena di misura. N meetketen. P łańcuch pomiarowy. S mätöverföringskedja. (303)
9. **nuclear chain reaction** : → *reaction 6*
10. **recording chain** : a chain for transmission of signals from the input of the system to and including the recording medium. ★ chaîne d'enregistrement → *chaîne 13.* R канал записи. D Aufzeichnungskette. E cadena de registro. I catena di registrazione. N opneemketen. P tor zapisu. S inspelningskedja. (806)
11. **reproducing chain** : → *reproducing 11*
12. **standard replay chain** : → *replay 2*

chaining

1. **chaining search** : → *search 1*

chamber

1. **anechoic chamber** : room with no appreciable reverberation, used for acoustic measurements. ★ chambre anéchoïque → *chambre 7.* R безэховая камера. (723)
2. **bubble chamber** : a track chamber containing a superheated liquid and in which the ions produced along the paths of particles act as centres for the formation of bubbles. ★ chambre à bulles → *chambre 1.* R пузырьковая камера. D Blasenkammer. E cámara de burbujas. I camera a bolle. N bellenvat. P komora pęcherzykowa. S bubbelkammare. (391,881)
3. **burn-off chamber** (*Syn.* dewaxing) : a chamber through which the charge materials pass prior to entering the main heating zone of the furnace in order that contaminants are burnt off. ★ chambre de brûlage → *chambre 9.* R камера для выжигания примесей. D Abbrennkammer (Abbrennen, Entfetten). E cámara de quemado. I camera di combustione. N uitbrandruimte. P komora wypalająca. S avbränningskammare. (841)
4. **cloud chamber** : a track chamber containing supersaturated vapour in which ions produced along the paths act as centres for condensation. ★ chambre à nuage → *chambre 4.* R конденсационная камера. D Nebelkammer. E cámara de niebla. I camera a nebbia. N diffusienevelvat. P komora mgłowa. S dimkammare. (391)
5. **cloud chamber** (*Syn.* Wilson cloud chamber) : → *chamber 18*
6. **cooling chamber** : a section of the furnace structure following the heating zones through which the charge materials pass; the charge may be subjected to a controlled temperature/time cycle. ★ chambre de refroidissement → *chambre 11.* R камера охлаждения. D Kühlkammer. E cámara de enfriamiento. I camera di raffreddamento. N koelzone. P komora chłodząca. S kylkammare. (841)
7. **diffusion chamber** : a cloud chamber in which supersaturation of the vapour is produced by continuous diffusion of saturated vapour, this diffusion being due to a temperature difference between the chamber walls. ★ chambre à diffusion → *chambre 2.* R диффузионная камера. D kontinuierliche Nebelkammer. E cámara de difusión. I camera a diffusione. N diffusievat. P komora dyfuzyjna. S diffusionskammare. (391)
8. **electron collection pulse chamber** : a pulse ionization chamber in which the output signal is due principally to the collection of electrons, taking advantage of their high mobility, far greater than that of ions. ★ chambre d'ionisation à collection électronique → *chambre d'ionisation 5.* R импульсная камера с собиранием электронов. D schnelle Impuls-Ionisationskammer. E cámara de ionización de captación electrónica. I camera di ionizzazione a raccolta elettronica. N pulsionisatievat met elektronenvergaring. P impulsowa komora ze zbieraniem elektronów. S pulsjonkammare med elektronuppsamling. (391)
9. **expansion cloud chamber** (*Syn.* Wilson cloud chamber) : → *chamber 17*
10. **heating chamber** : the heated enclosure of a furnace in which the heat treatment is carried out. ★ chambre de chauffe → *chambre 10.* R камера для нагрева. D Heizraum (Heizkammer). E cámara de calentamiento. I camera di riscaldamento; laboratorio. N ovenkamer. P komora grzejna. S ugnsrum. (841)
11. **ion collection pulse chamber** : a pulse ionization chamber in which the output signal is due to the total collection of ions and electrons. ★ chambre d'ionisation à collection ionique → *chambre d'ionisation 6.* R импульсная камера с собиранием ионов. D langsame Impuls-Ionisationskammer. E cámara de ionización de captación iónica. I camera di ionizzazione a raccolta ionica. N pulsionisatievergaarvat; ionisatievat met pulstelling. P impulsowa komora ze zbieraniem jonów. S pulsjonkammare med jonuppsamling. (391)
12. **lock chamber** : an enclosure at the entry or exit of a furnace chamber working under atmosphere or vacuum, being limited by two doors which open independently to avoid pollution by the ambient air. ★ sas → *sas 1.* R шлюзовая камера. D Schleusenkammer. E esclusa. I boccaporto. N sluis. P komora wejściowa lub wyjściowa. S sluss. (841)
13. **retort chamber** : a completely enclosed chamber with a sealed lid (muffle) or, in the case of a continuous furnace, with gas seals at either end, which is located within the furnace chamber and through or into which is placed the charge materials. ★ moufle → *moufle 3.* R камера муфеля. D Muffel. E mufla. I camera a muffola. N retortruimte. P komora (retortowa). S muffel. (841)
14. **reverberation chamber** : a room specially designed to have a very long reverberation time. ★ chambre de réverbération → *chambre 12.* R эхо-камера. (723)
15. **spark chamber** : a track chamber in which the paths of ionizing particles are indicated by a succession of sparks occurring between successive electrodes at different potentials. ★ chambre à étincelles → *chambre 3.* R искровая камера. D Funkenkammer. E cámara de chispas. I camera a scintille. N vonkionisatievat. P komora iskrowa. S gnistkammare. (391,881)
16. **track chamber** : a chamber which makes visible the paths of ionizing particles passing through it or formed in it.

★ chambre à trace → *chambre 6.* R трековая камера. D Spurenkammer. E cámara de traza. I camera a traccia. N sporenvat. P komora śladowa. S spårkammare. (391,881)

17. **Wilson cloud chamber** (*Syn.* expansion cloud chamber) : a cloud chamber in which supersaturation of the vapour is produced for a short time by a rapid expansion. ★ chambre de Wilson → *chambre 13.* R камера Вильсона. D Wilsonsche Nebelkammer; Expansionsnebelkammer. E cámara de Wilson. I camera di Wilson. N expansienevelvat; Wilsonvat. P komora Wilsona. S expansionskammare; Wilson-kammare. (391)
18. **Wilson cloud chamber** (*Syn.* cloud chamber) : a track chamber containing supersaturated vapour in which ions, produced along the paths of particles, act as centres of condensation. ★ chambre de Wilson → *chambre 14.* R камера Вильсона. D Nebelkammer. E cámara de Wilson; cámara de niebla. I camera a nebbia di Wilson. N Wilsonvat; diffusienevelvat. P komora Wilsona. S dimkammare; Wilson-kammare. (881)

change

1. **change of format** (in television) : modification of the aspect ratio of a picture by suppressing certain parts at edges, without distorting the parts retained. ★ changement de format → *changement 2.* R изменение формата (в телевидении). (723)
2. **change of state announcement** : → *announcement 1*
3. **continuous operation duty-type with related load/speed changes** : → *duty-type 3*
4. **duration of a voltage change** : → *duration 11*
5. **rate of change of...relay** : → *rate 75*
6. **rate of occurrence of voltage changes** : → *rate 77*
7. **relative voltage change** : the ratio of the magnitude of a voltage change to a rated voltage. ★ variation relative de la tension → *variation 23.* R относительное изменение напряжения. D relative Spannungsänderung. E variación relativa de la tensión. I variazione relativa della tensione. N relatieve spanningsvariatie. P zmiana napięcia względna. S relativ spänningsändring. (161)
8. **to change over** (for an electrical relay) : either to operate or to release. ★ changer d'état → *changer 1.* R изменять состояние (для электрического реле). D die Schaltstellung ändern. E cambiar de estado (para un relé eléctrico). I intervenire. N wisselen (bij een elektrisch relais). P przełączać. S slå om. (446)
9. **voltage change** : a variation of the r.m.s. or peak value of a voltage between two consecutive levels sustained for definite but unspecified durations. ★ variation de tension → *variation 14.* R изменение напряжения. D Spannungsänderung. E variación de tensión. I variazione di tensione. N spanningsvariatie. P zmiana napięcia. S spänningsändring. (161)
10. **voltage change interval** : → *interval 26*

changeback

1. **changeback** : the procedure for transferring signalling traffic from one or more reserve signalling links to the regular signalling link when the latter is again serviceable. ★ retour sur canal sémaphore normal → *retour 29.* R возврат на основной тракт сигнализации. D Lastzurueckschaltung; Rueckwechsel. E retorno (al enlace normal). I ripristino. N terugschakelen. P przełączenie powrotne. S återgång. (714)

changed

1. **changed address interception** : → *interception 1*

change-over

1. **changeover** : the procedure for transferring signalling traffic from one signalling link to one or more reserve signalling links, when the link in use fails or is required to be cleared of traffic. ★ passage sur canal sémaphore de secours → *passage 9.* R переход на резервный тракт сигнализации. D Lastuebernahme; Wechsel. E cambio (al enlace de reserva). I scambio. N overschakelen. P przełączenie (na rezerwę). S byte. (714)
2. **change-over** : a change from one significant condition to another in a discretely-timed signal. ★ mutation → *mutation 1.* R переключение. D Zustandswechsel; Zustandsübergang. E mutación. I cambiamento di stato. N omzetting. P zmiana stanu znamiennego. S tillståndsväxling. (721)
3. **change-over break-before-make contact** : → *contact 14*
4. **change-over contact** : → *contact 15*
5. **change-over make-before-break contact** : → *contact 16*
6. **change-over selector** : → *selector 2*
7. **change-over switch** : → *switch 5*
8. **change-over switching** : → *switching 8*
9. **change-over with neutral position** : a change-over contact having a stable position in which its two contact circuits are open (or closed). ★ contact à deux directions avec position neutre → *contact 16.* R контакт двустороннего действия. D Wechsler mit mittlerer Ruhestellung. E contacto inversor con posición neutra. I contatto di commutazione con posizione intermedia. N wisselcontact met neutrale stand. P zestyk z pozycją neutralną. S växelkontakt med mittläge. (446)
10. **power/brake changeover switch** : → *switch 35*
11. **system changeover switch** : → *switch 52*

changer

1. **cassette changer** : a device holding two or more cassettes arranged so that one is in place for the first exposure and the others are brought into the same place by remote control for additional exposures. ★ changeur de cassette → *changeur 1.* R устройство для смены кассет. D Kassettenwechsler. E cambiador de casete. I cambiacassette. N cassettewisselaar. P zmieniacz kasety. S kassettväxlare. (881)
2. **film changer** : automatic apparatus used, for example, in angiography, for obtaining in a short interval of time a series of radiographs, consisting essentially of a device for rapidly replacing one film by another. ★ changeur de film → *changeur 3.* R устройство для смены пленок. D Filmwechsler. E cambiador de película. I cambia pellicole. N filmwisselaar. P zmieniacz błon. S filmväxlare. (881)
3. **frequency changer** (*Syn.* frequency convertor) : → *convertor 25*
4. **frequency changer** (*Syn.* frequency converter) : a device comprising an oscillator and a mixer, generally followed by a band-pass filter, for effecting the frequency translation of a signal. ★ changeur de fréquence → *changeur 4.* R частотный преобразователь. D Frequenzumsetzer; Frequenzkonverter. E cambiador de frecuencias; convertidor de frecuencia. I convertitore di frequenza. N frequentieomzetter. P przemiennik częstotliwości. S frekvensomvandlare. (702)
5. **frequency changer** (*Syn.* frequency convertor) : → *convertor 26*
6. **frequency changer set** : → *set 18*
7. **phase changer** (*Syn.* phase shifter) : → *phase-shifter 6*
8. **record changer** : a mechanism for placing a series of disks one after another automatically on the turntable of a reproducing system so that they can be played in a given order. ★ changeur de disques → *changeur 2.* R устройство для смены грампластинок проигрыватель-автомат. D Plattenwechsler. E cambiador de discos. I cambia dischi. N platenwisselaar. P zmieniacz płyt. S skivväxlare. (806)
9. **rotary phase changer** (*Syn.* rotary phase shifter) : a phase changer that alters the phase of a transmitted wave in proportion to the rotation of one of its elements generally consisting of a rotating half-wave plate located between two fixed quarter-wave plates. ★ déphaseur tournant → *déphaseur 10.* R вращающееся фазосдвигающее устройство; поляризационный фазовращатель. D Dreh-Phasenschieber. E desfasador rotativo. I sfasatore rotativo. N roterende fasedraaier. P przesuwnik fazy obrotowy. S vridskiftfasändrare. (726)
10. **stereoscopic cassette changer** : a cassette changer for making two radiographs with the X-ray tube in two positions so that the films when viewed in a stereoscope give a three-dimensional (stereoscopic) view of the object. ★ changeur stéréoscopique de cassette → *changeur 7.* R устройство для смены кассет для получения стереоскопических снимков. D Röntgen-Stereobild-Kassettenwechsler. E cambiador estereoscópico de casete. I cambiacassette stereoscopico. N stereoscopische cassettewisselaar. P zmieniacz kaset stereoskopowych. S stereoskopisk kassettväxlare. (881)

channel

1. **adaptative channel allocation** : → *allocation 1*
2. **adjacent channel selectivity** : → *selectivity 1*

3. **backward channel** (*Syn.* return channel) : a transmission channel associated with the forward channel permitting the dispatch of acknowledge and other function control signals in the direction opposite to that of the forward channel. *Note.* — In case of simultaneous transfer of information in both directions, the backward channel is at any instant in the direction opposite to that of the transfer of user's information. ★ voie de retour → *voie 40.* R обратный канал. D Hilfskanal; Rückkanal. E canal de retorno. I canale di ritorno. N terugweg. P kanał powrotny. S backkanal. (721)
4. **camera channel** : ensemble of equipment associated with a television camera, including synchronising pulse generators, amplifiers, a camera control unit and correction devices which allow a complete video signal to be generated. ★ voie de caméra → *voie 33.* R камерный канал. (723)
5. **channel** (of field-effect transistors) : a thin semiconductor layer between the source region and the drain region, the conductance of which is controlled by the gate voltage. ★ canal → *canal 3.* R канал (полевого транзистора). D Kanal (eines Feldeffekttransistors). E canal (de un transistor de efecto de campo). I canale (di un transistore a effetto di campo). N kanaal (van een veldeffecttransistor). P kanał (w tranzystorze polowym). S kanal. (521)
6. **channel adaptor** : → *adaptor 3*
7. **channel balancing** : → *balancing 6*
8. **channel bank** (*Syn.* channel translating equipment) : → *equipment 12*
9. **channel carrier frequencies** : → *frequency 18*
10. **channel gate** : → *gate 2*
11. **channel orientation** : → *orientation 1*
12. **channel phasing** : → *phasing 1*
13. **channel selecting telecontrol system** : → *system 25*
14. **channel sensitivity** : → *sensitivity 2*
15. **channel separation** : → *separation 1*
16. **channel time-slot** : → *time-slot 1*
17. **channel translating equipment** : → *equipment 12*
18. **complete telegraph channel** : a telegraph channel between two terminal sets. *Note.* — A retransmitter with storage of signals is considered as a terminal set and terminates a complete channel. ★ voie télégraphique complète → *voie 56.* R полный телеграфный канал. D vollständiger Telegrafenkanal. E canal telegráfico completo. I canale telegrafico completo. N compleet telegrafiekanaal. P kanał telegraficzny kompletny. S upprättad telegrafkanal. (721)
19. **data channel** : a unidirectional transmission path for data. ★ voie de données → *voie 35.* R канал передачи данных. D Datenkanal. E canal de datos. I canale dati. N datakanaal. P kanał danych. S datakanal. (714)
20. **data channel** : a means of transmission of data signals in one direction between two points. ★ voie de transmission de données → *voie 42.* R (односторонний) телеграфный канал [канал данных]. D Datenkanal. E canal de transmisión de datos. I canale dati. N datakanaal. P kanał teledacyjny. S datakanal. (721)
21. **data channel signalling conditions** : → *condition 5*
22. **derived channel** : any of the separate channels provided by multiplexing. *Note.* — A derived channel may be qualified by the mode of multiplexing : "frequency-derived channel", "wavelength-derived channel", "time-derived channel", "code-derived channel". ★ voie dérivée → *voie 47.* R ..... D rückgewonnener Kanal. E vía derivada. I canale derivato; canale multiplato. N afgeleid kanaal. P kanał nośny. S multiplexkanal. (704)
23. **disturbed channel** : a channel in which crosstalk appears originating from one or more disturbing channels. ★ voie perturbée → *voie 50.* R канал, подверженный влиянию. D gestörter Kanal. E canal perturbado. I canale disturbato. N gestoord kanaal. P kanał zakłócany. S störd kanal. (722)
24. **disturbing channel** : the channel carrying a signal which produces crosstalk. ★ voie perturbatrice → *voie 49.* R влияющий канал. D störender Kanal. E canal perturbador. I canale disturbante. N storend kanaal (oversprekend kanaal). P kanał zakłócający. S störande kanal. (722)
25. **(FDM telephone) channel** : a channel that has a standardized bandwidth suitable for the transmission of telephone quality speech in multichannel carrier transmission, and that occupies one of a number of specified positions in the frequency spectrum. *Notes. 1* — An FDM telephone channel normally has a standardized bandwidth of 4 kHz, this being sufficient for a signal occupying a frequency band of 300-3 400 Hz, for outband signalling, and for the required guard bands. *2* — Signals, other than speech signals, having appropriate specified characteristics may occupy the whole or a part of an FDM telephone channel. ★ voie (téléphonique) (à courant porteur) → *voie 57.* R телефонный канал ЧРК. D (FM-Telefon-) Kanal. E vía (telefónica) (de corriente portadora). I canale telefonico FDM. N (FDM-telefoon)kanaal. P kanał telefoniczny nośny. S frekvensmultiplexkanal. (704)
26. **forward channel** : a transmission channel in which the direction of transmission coincides with that in which user's informations is being transferred. ★ voie d'aller → *voie 32.* R прямой канал. D Vorwärtskanal. E canal de ida. I canale in avanti. N heenweg. P kanał docelowy. S framkanal. (721)
27. **(frequency) channel** : part of the frequency spectrum intended to be used for the transmission of signals and which may be defined by two specified limits, or by its centre frequency and the associated bandwidth, or by any equivalent indication. *Notes. 1* — A frequency channel may be time-shared in order to allow communication in both directions by simplex operation. *2* — The use of the term "channel" to mean "telecommunication circuit" is deprecated. ★ canal (de fréquences) → *canal 5.* R частотный односторонний канал. D (Frequenz-) Kanal. E canal (de frecuencias). I canale (di frequenza). N (frequentie)kanaal. P kanał częstotliwos'ciowy. S frekvenskanal. (701,721)
28. **fuel channel** : a duct through the moderator, which is designed to contain one or more fuel assemblies and through which the coolant circulates. ★ canal de combustible → *canal 4.* D Brennelementkanal. E canal del combustible. I canale di combustibile. N kanaal. P kanał paliwowy. S bränslekanal. (026)
29. **go channel** (*Syn.* transmit channel) : a transmission channel normally handling signals which leave a given point. *Notes. 1* — These qualifications are usually highly localized, for example a channel referred to as a go channel at one point in a network may be referred to as a return channel at another point. *2* — In telephony, the English qualifiers "go" and "transmit" may be considered to be synonymous. In certain applications, for example in television transmission, only the transmit channel will exist. In this case, the use of the term "go channel" is not applicable. ★ voie d'émission → *voie 44.* R прямой канал. D Vorwärtskanal. E vía de emisión. I canale di trasmissione; via di trasmissione. N zendkanaal. P kanał nadawczy. S sändningskanal. (704)
30. **induction channel furnace** : → *furnace 23*
31. **inductor assembly channel furnace** : → *furnace 32*
32. **inverted television channels** : system of two television channels, amplitude modulated and occupying substantially the same place in the frequency spectrum, but in one the sound carrier is higher in frequency than the vision carrier while in the other the sound carrier is lower in frequency than the vision carrier. *Note.* — In this system one of the two channels is called the direct channel, the other is called the inverse channel. ★ canaux (de télévision) inversés → *canal 11.* R инвертированные телевизионные каналы. (723)
33. **irradiation channel** (*Syn.* beam hole) : → *hole 1*
34. **overall channel unbalance** : → *unbalance 1*
35. **(PCM) (telephone) channel** : a channel that has a standardized effective digit rate suitable for the transmission of telephone quality speech in multichannel PCM transmission, and that occupies one of a number of channel time-slots in the frame. *Notes. 1* — In most multichannel PCM systems using basic pulse code modulation the standardized effective digit rate is 64 kbit/s. *2* — Signals, other than speech signals, having appropriate specified characteristics may occupy the whole or part of a PCM telephone channel. ★ voie téléphonique MIC → *voie 60.* R (телефонный) канал (ИКМ). D (PCM-) (Telefon-)Kanal. E vía telefónica MIC. I canale telefonico PCM. N (PCM-)(telefoon)kanaal. P kanał telefoniczny (w modulacji impulsowo-kodowej). S pulskodsmultiplexkanal. (704)
36. **receive channel** (*Syn.* return channel) : → *channel 41*
37. **receive channel** : the channel used for receiving user's information and which is relative to a given end of a circuit. ★ voie de réception → *voie 39.* R канал приема. D Empfangskanal. E canal de recepción. I canale di ricezione. N ontvangstkanaal. P kanał odbiorczy. S mottagningskanal. (721)
38. **recording channel** : a transmission channel for the purpose of carrying the signal to be recorded from a signal source to the

recording medium. A recording system may have several channels. ★ voie d'enregistrement → *voie 46.* R ..... D Aufzeichnungskanal. E canal de registro. I canale di registrazione. N opneemkanaal. P kanał zapisu. S inspelningskanal. (806)

39. **reproduce channel unbalance** : → *unbalance 2*
40. **reproducing channel** : a transmission channel for the purpose of carrying the signal being reproduced from a recording medium to an output, this output then being considered as the signal source. Several channels may be included in a reproducing equipment. ★ voie de lecture → *voie 36.* R ..... D Wiedergabekanal. E canal de lectura. I canale di riproduzione. N weergeefkanaal. P kanał odczytu. S avspelningskanal; återgivningskanal. (806)
41. **return channel** (*Syn.* receive channel) : a transmission channel normally handling signals which arrive at a given point. *Notes. 1* — These qualifications are usually highly localized, for example a channel referred to as a go channel at one point in a network may be referred to as a return channel at another point. *2* — In telephony, the English qualifiers "return" and "receive" may be considered to be synonymous. In certain applications, for example in television reception, only the receive channel will exist. In this case, the use of the term "return channel" is not applicable. ★ voie de réception → *voie 38.* R обратный канал. D Rückwärtskanal. E vía de recepción; canal de retorno. I canale di ricezione; via di ricezione. N ontvangkanaal. P kanał odbiorczy. S mottagningskanal. (704)
42. **return channel** (*Syn.* backward channel) : → *channel 3*
43. **signalling channel** : a unidirectional transmission path for signals, comprising a data channel with signalling terminal equipments at both ends. ★ voie sémaphore → *voie 53.* R канал сигнализации. D Zeichengabekanal; Signalisierungskanal. E canal de señalización. I canale di segnalazione. N signaleringskanaal. P kanał sygnalizacyjny. S signaleringskanal. (714)
44. **single channel amplifier** (for MATV or CATV) : amplifier whose passband is limited to a single specified television channel. ★ amplificateur monocanal → *amplificateur 21.* R одноканальный усилитель. (723)
45. **sound channel** : transmission channel used for the transmission of good quality sound signals. ★ voie radiophonique → *voie 52.* R звуковой канал. (723)
46. **sound channel** : zone of the ocean within which the sound velocity as a function of depth passes through a minimum. ★ chenal sonore → *chenal 1.* R подводный звуковой канал. D Schallkanal. E canal sonoro. I canale sonoro. N geluid(s)kanaal. P kanał dźwiękowy. S ljudkanal. (801)
47. **sound programme channel** : a channel that provides the frequency band required for the transmission of high quality sound signals. *Note.* — For stereo working two "matched" sound programme channels are required. ★ voie radiophonique → *voie 51.* R канал звукового вещания. D Rundfunkkanal. E vía radiofónica; circuito radiofónico. I canale musicale. N muziekkanaal. P kanał radiofoniczny. S ljudprogramkanal. (704)
48. **status channel** : a channel indicating whether a group of binary digits is for data transfer or control purposes. ★ voie d'état → *voie 48.* R статусный канал. D Statuskanal. E canal de estado. I canale di stato. N statuskanaal. P kanał sygnalizacji stanu. S statuskanal. (721)
49. **(subscriber's) channel selector** : → *selector 19*
50. **telegraph channel** : a means of transmission of telegraph signals in one direction between two points. *Notes. 1* — A telegraph channel may be qualified by the number of significant conditions and by the modulation rate it is designed to admit. Example : A 50 baud channel for two-conditions modulation. *2* — Several telegraph channels may share a common path ; for example each channel is allocated a particular frequency band or a particular time slot. ★ voie télégraphique → *voie 55.* R (односторонний) телеграфный канал. D Telegrafen-Kanal. E canal telegráfico. I canale telegrafico. N telegrafiekanaal. P kanał telegraficzny. S telegrafkanal. (721)
51. **telephone-type channel** : a transmission channel suitable for the transmission of speech but which is used for the transmission of other signals. ★ voie de type téléphonique → *voie 43.* R односторонний канал телефонного типа. D Kanal mit Fernsprechbandbreite. E canal de tipo telefónico. I via di tipo telefonico. N kanaal van het telefonietype. P kanał telefoniczny. S telefonikanal. (701,721)
52. **television channel** : radio-frequency channel used for the transmission of the vision signal and the associated sound signals of a television programme. ★ canal (de télévision) → *canal 6.* R телевизионный канал. (723)
53. **(transmission) channel** : a means of transmission of signals in one direction between two points. *Notes. 1* — Several channels may share a common path ; for example each channel is allocated a particular frequency band or a particular time slot. *2* — In some countries the term "communication channel" or its abbreviation "channel" is also used to mean "telecommunication circuit" i.e. to encompass the two directions of transmission. This usage is deprecated. *3* — A transmission channel may be qualified by the nature of the transmitted signals, or by its bandwidth, or by its digit rate for example : telephone channel, telegraph channel, data channel, 10 MHz channel, 34 Mbit/s channel. ★ voie (de transmission) → *voie 41.* R односторонний канал, канал. D (Übertragungs-) Kanal. E canal (de transmisión). I via (di trasmissione) unidirezionale. N (transmissie)kanaal. P droga przesyłowa (sygnałów elektrycznych. S transmissionskanal. (701,704,714,715)
54. **transmit channel** (*Syn.* go channel) : → *channel 29*
55. **transmit channel** : the channel used for sending user's information, defined relatively to a given end of a circuit. ★ voie d'émission → *voie 45.* R канал передачи. D Sendekanal. E canal de emisión. I canale di trasmissione. N zendkanaal. P kanał nadawczy. S sändningskanal. (721)
56. **VF channel** (*Syn.* voice-frequency channel) : → *channel 57*
57. **voice-frequency channel** (*Syn.* VF channel) : a channel that provides the frequency band required for the transmission of telephone quality speech, and that operates at the original audio frequencies. *Notes. 1* — A voice-frequency channel normally has a standardized frequency 300-3 400 Hz. *2* — Signals, other than speech signals, having appropriate specified characteristics may occupy the whole or a part of a voice-frequency channel. *3* — The use of this term to denote a wider band channel, such as one suitable for high quality sound signals, is deprecated. ★ voie téléphonique (audiofréquence) → *voie 59.* R канал тональной частоты; канал ТЧ. D Sprachfrequenzkanal; SF-Kanal. E vía telefónica (audiofrecuencia); vía telefónica AF. I canale a frequenze vocali; canale telefonico; canale FV (Frequenze Vocali). N spraakfrequent signaal. P kanał telefoniczny. S tonfrekvenskanal. (704)
58. **wideband channel** : a transmission channel with a bandwidth greater than that of a telephone channel. ★ voie à large bande → *voie 28.* R (однонаправленный) широкополосный канал. D Breitbandkanal. E canal de banda ancha. I canale a larga banda. N breedbandkanaal. P kanał szerokopasmowy. S bredbandskanal. (721)

channel-associated

1. **channel-associated signalling** : → *signalling 6*

channel-busy

1. **channel-busy tone** (*Syn.* congestion tone) : → *tone 11*

Chaoul

1. **Chaoul tube** : → *tube 13*

character

1. **call control character** : a character of an alphabet, or a part of a character, which is used for calling ; it may be used in conjunction with defined signal conditions on other interchange circuits. ★ commande d'appel → *commande 33.* R знак управления соединением. D Steuerzeichen der Verbindungssteuerung. E carácter de control de llamada. I comando di chiamata. N oproepkarakter. P znak wywołania. S anropstecken. (721)
2. **character** : a member of a set of elements used by agreement, for the organization, representation or control of information. *Note.* — Characters may be letters, digits, punctuation marks or other symbols and, by extension, function controls such as space shift, carriage return or line feed contained in a message. ★ caractère → *caractère 1.* R знак. D Zeichen. E carácter. I carattere. N teken. P znak. S tecken. (702,721)
3. **character check** : → *check 3*
4. **character cycle** : → *cycle 2*
5. **character error ratio** : → *ratio 14*
6. **character in phase** : the condition in which a character cycle of the local time-scale coincides completely with a character

cycle of the received signal so that each character signal of the aggregate isochronous signal transmitted on a particular channel is received on the correct derived channel. ★ (état de) caractère en phase → *caractère 12.* R знак в фазе. D Zeichen in Phase. E (estado de) carácter de fase. I carattere in fase. N karakter-in-fase. P zsynfazowanie znaków. S tecken i fas. (721)

7. **character indicator tube** : → *tube 14*
8. **character interleaved telegraphy** : → *telegraphy 4*
9. **character (of a light signal)** (*Syn.* characteristic (of a light signal) (USA)) : distinctive rhythm and colour, of a light signal that provide the identification or a message. ★ caractère (d'un signal lumineux) → *caractère 5.* R характеристика (светового сигнала). D Kennung (eines Lichtsignals, Feuers). E caracter (de una señal luminosa). I carattere. N karakter (van een lichtsignaal). P cecha (sygnału świetlnego). S ljuskaraktär. (845)
10. **character signal** : → *signal 44*
11. **character switching** : → *switching 9*
12. **character telegraphy** (*Syn.* alphabetic telegraphy) : → *telegraphy 1*
13. **control character** : a character whose occurrence in a particular context, initiates, modifies or stops an operation. *Notes. 1* — A control character may be recorded for use in subsequent action. *2* — A control character is not a graphic character but may have a graphic representation in some circumstances. ★ caractère de commande → *caractère 3.* R управляющий знак. D Steuerzeichen. E carácter de control. I carattere di controllo. N besturingskarakter. P znak sterujący. S styrtecken. (721)
14. **erroneous character** : a character in which there are one or more erroneous digits. ★ caractère erroné → *caractère 6.* R ошибочный знак. D fehlerhaftes Zeichen. E carácter erróneo. I carattere errato. N foutkarakter. P znak błędny. S feltecken. (721)
15. **null character** : a control character designed to fill in a portion of data medium or time interval and which may be inserted into or removed from a stream of characters without affecting the information content. *Note.* — The addition of the character may, however affect the data lay-out or the control of equipment. ★ caractère nul → *caractère 7.* R нулевой знак; знак заполнения. D Nil; Füllzeichen. E carácter nulo. I carattere nullo. N "niets"-karakter. P znak pusty. S tomtecken. (721)
16. **stuffing character** : a character used over isochronous transmission links to take account of differences in clock frequencies. ★ caractère de bourrage → *caractère 2.* R знак стаффинга. D Stopfzeichen. E carácter de relleno. I carattere tampone. N ..... P znak wypełniający. S utfyllnadstecken. (721)
17. **substitute character** : a control character used in place of a character which is recognized as invalid or in error, or which cannot be represented on the particular equipment in use. ★ caractère de substitution → *caractère 4.* R знак замены. D Ersatzzeichen. E carácter de sustitución. I carattere di sostituzione. N vervangend karakter. P znak zastępczy. S utbytestecken. (721)

characteristic

1. **absolute spectral sensitivity characteristic** : the relation, usually shown by a graph, between wavelength and absolute spectral sensitivity. ★ caractéristique de sensibilité spectrale absolue → *caractéristique 37.* R характеристика абсолютной спектральной чувствительности. D Kennlinie der absoluten spektralen Empfindlichkeitsverteilung. E característica de sensibilidad espectral absoluta. I caratteristica di sensibilità spettrale assoluta. N absolute spectrale gevoeligheidskarakteristiek. P charakterystyka czułości widmowej absolutnej. S absolut känslighetskurva. (531)
2. **amplitude/amplitude characteristic** : the amplitude of the fundamental component of the output signal of a two-port device which corresponds to an input sinusoidal signal of specified frequency, as a function of the amplitude of this input signal. *Note.* — The frequency of the fundamental component of the output signal may differ from the input frequency. ★ caractéristique amplitude-amplitude → *caractéristique 8.* R амплитудно-амплитудная характеристика. D Amplituden-Amplitudencharakteristik. E característica amplitud/amplitud. I caratteristica ampiezza/ampiezza. N amplitude/amplitudekarakteristiek. P charakterystyka amplituda/amplituda. S amplitud-amplitudkarakteristik. (702)
3. **amplitude/frequency characteristic** : the amplitude of the fundamental component of the output signal of a two-port device as a function of the frequency of a sinusoidal input signal of specified amplitude. *Notes. 1* — In the case of a linear time-invariant two-port device the amplitude/frequency characteristic is represented by the modulus of the frequency response. *2* — The frequency of the fundamental component of the output signal may differ from the input frequency. ★ caractéristique amplitude-fréquence → *caractéristique 9.* R амплитудно-частотная характеристика. D Amplituden-Frequenzcharakteristik. E característica amplitud/frecuencia. I caratteristica ampiezza/frequenza. N amplitude/frequentiekarakteristiek. P charakterystyka amplituda/częstotliwość. S amplitud-frekvenskarakteristik. (702)
4. **anode characteristic** (*Syn.* anode-to-cathode (voltage-current) characteristic) : → *characteristic 5*
5. **anode-to-cathode (voltage-current) characteristic** (*Syn.* anode characteristic) : a function, usually represented graphically, relating the anode voltage to the principal current, with the gate current, where applicable, as a parameter. ★ caractéristique (courant-tension) d'anode-cathode → *caractéristique 12.* R анодно-катодная (вольт-амперная) характеристика; анодная характеристика. D Anoden-Kathoden-(Spannungs/Strom-)Kennlinie; Anodenkennlinie. E característica (corriente-tensión) de ánodo — cátodo; característica de ánodo. I caratteristica anodo-catodo (tensione-corrente) ; caratteristica anodica. N anode(spanningstroom) karakteristiek. P charakterystyka anodowa. S anodkarakteristik. (521)
6. **asymmetric (characteristic circuit) element** : → *element 3*
7. **braking characteristic** : the relationship between the braking force and the speed. ★ caractéristique de freinage → *caractéristique 24.* R тормозная характеристика. D Bremseigenschaft. E característica de frenado. I caratteristica di frenatura. N remkarakteristiek. P charakterystyka hamowania. S bromskarakteristik. (811)
8. **characteristic** : a relationship between two or more variable quantities which describes the performance of a device under given conditions. ★ (fonction) caractéristique → *caractéristique 97.* R характеристика. D Charakteristik. E característica. I caratteristica. N karakteristiek. P charakterystyka. S karakteristika. (151)
9. **characteristic** (*Syn.* characteristic curve) : → *curve 5*
10. **characteristic angle** : → *angle 16*
11. **characteristic curve** : → *curve 5*
12. **characteristic curve** : → *curve 6*
13. **characteristic curve** : → *curve 7*
14. **characteristic (curve) of a convertor** : a curve showing the relationship between the values of the output voltage and the values of the output current. ★ courbe caractéristique (d'un convertisseur) → *courbe 5.* R внешняя (нагрузочная) характеристика преобразователя. D Strom-Spannungs-Kennlinie. E curva característica (de un convertidor). I (curva) caratteristica (di un convertitore). N uitwendige karakteristiek (van een omzetter). P charakterystyka przekształtnika. S (belastnings)karakteristik. (551)
15. **characteristic distortion** : → *distortion 10*
16. **characteristic impedance** : → *impedance 7*
17. **characteristic impedance of a medium** : → *impedance 8*
18. **characteristic impedance of a medium** : → *impedance 9*
19. **characteristic impedance of vacuum** : → *impedance 10*
20. **characteristic (of a light signal)** (*Syn.* character (of a light signal)) : → *character 9*
21. **characteristic radiation** : → *radiation 11*
22. **characteristic wave impedance** : → *impedance 11*
23. **composite characteristic** : a characteristic consisting of parts of the characteristics of different types. ★ caractéristique composée → *caractéristique 11.* R сложная характеристика. D zusammengesetzte Kennlinie. E característica compuesta. I caratteristica composta. N samengestelde karakteristiek. P charakterystyka składana. S kombinationskarakteristik. (551)

24. **compounding characteristics** : → *compounding 1*
25. **control characteristic** : a characteristic relating critical grid voltage and anode voltage, with all other operating conditions maintained constant. ★ caractéristique de commande → *caractéristique 18.* R пусковая характеристика. D Zündkennlinie. E característica de control. I caratteristica di comando. N ontsteekkarakteristiek. P charakterystyka zapłonowa. S styrkurva; kritisk gallerspänningskurva. (531)
26. **control characteristic of a controlled system** : for an automatic control system with fixed set-point, the data (formula or graph) showing the relationship, in steady state, between the controlled variable and an input variable. ★ caractéristique de régulation d'un système réglé → *caractéristique 31.* R статическая характеристика управляемого объекта. D Kennlinie eines Regelungssystems. E característica de control de un sistema controlado. I caratteristica di un sistema regolato. N regelkarakteristiek van een geregeld systeem. P charakterystyka statyczna układu regulacji. S ..... (351)
27. **cooling characteristics** (of an X-ray tube assembly) : variation as a function of time of the stored thermal energy when the energy at time zero is the thermal capacity of the X-ray tube assembly. ★ caractéristiques de refroidissement → *caractéristique 82.* R характеристики охлаждения (рентгеновского аппарата). D Abkühlkennlinie (eines Röntgenstrahlers). E características de refrigeracion (de un equipo de rayos X). I caratteristiche di raffreddamento (di un complesso tubo-guaina). N koelkarakteristiek. P charakterystyki chłodzenia lampy rentgenowskiej. S kylningskurvor. (881)
28. **crossover of load characteristic** : → *cross-over 3*
29. **cut-off (current) characteristic** (*Syn.* let-through (current) characteristic) : a curve giving the cut-off current as a function of the prospective current, under stated conditions of operation. *Note.* — In the case of a.c., the values of the cut-off currents are the maximum values which can be reached whatever the degree of asymmetry. In the case of d.c., the values of the cut-off currents are the maximum values reached related to the time constant as specified. ★ caractéristique de courant coupé limité → *caractéristique 20.* R характеристика тока обрыва. D Durchlassstromkennlinie. E característica de la corriente (intensidad) de corte limitada. I caratteristica della corrente di interruzione limitata. N kapstroomkarakteristiek. P charakterystyka prądów ograniczonych. S strömbegränsningskurva. (441)
30. **decay characteristic** (*Syn.* persistence characteristic) : → *characteristic 63*
31. **delay/frequency characteristic** : the group delay between input and output of a linear time-invariant two-port device as a function of frequency. ★ caractéristique temps de propagation-fréquence → *caractéristique 74.* R частотная характеристика группового времени запаздывания. D Laufzeit-Frequenzcharakteristik. E característica tiempo de propagación/frecuencia. I caratteristica tempo di propagazione/frequenza. N vertraging/frequentie-karakteristiek. P charakterystyka opóźnienie/częstotliwość. S grupplöptid-frekvenskarakteristik. (702)
32. **diode characteristic** (*Syn.* emission characteristic of a multielectrode tube) : characteristic relating the current of the cathode and any electrodes connected internally to it and the voltage applied between the cathode and all other electrodes connected together. ★ caractéristique en diode → *caractéristique 53.* R диодная характеристика. D Emissionskennlinie. E característica en diodo; característica de emisión de un tubo de varios electrodos. I caratteristica di emissione di un tubo con piu' elettrodi. N diodekarakteristiek; emissiekarakteristiek van een meerelektrodenbuis. P charakterystyka diodowa. S diodkurva. (531)
33. **disengaging value of the characteristic quantity** : → *value 9*
34. **drooping characteristic (of an arc welding power source)** : an external static characteristic which, in its normal welding range, is such that, as the current increases, the voltage decreases by more than 7 V/100 A. ★ caractéristique tombante (d'une source de courant pour soudage à l'arc) → *caractéristique 76.* R падающая характеристика (источник питания для дуговой сварки). D fallende Kennlinie (einer Lichtbogenschweißstromquelle). E característica descendente (de una fuente de alimentación para soldadura por arco). I caratteristica discendente (di una saldatrice ad arco). N dalende karakteristiek. P charakterystyka statyczna opadająca. S fallande karakteristik. (851)
35. **dynamic characteristic** : a characteristic for which the relevant quantities are varying with time. ★ caractéristique dynamique → *caractéristique 49.* R динамическая характеристика. D dynamische Kennlinie. E característica dinámica. I caratteristica dinamica. N dynamische karakteristiek. P charakterystyka dynamiczna. S dynamisk kurva. (531)
36. **dynamic characteristic (of an arc welding power source)** : the relationship between the main parameters of a welding power source after a sudden change of one parameter. ★ caractéristique dynamique (d'une source de courant pour soudage à l'arc) → *caractéristique 50.* R динамическая характеристика (источника питания для дуговой сварки). D dynamische Kennlinie (einer Lichtbogenschweißstromquelle). E característica dinámica (de una fuente de alimentación para soldadura por arco). I caratteristica dinamica (di una saldatrice ad arco). N dynamische karakteristiek. P charakterystyka dynamiczna (źródła przy spawaniu łukowym). S dynamisk karakteristik. (851)
37. **electrode characteristic** : characteristic relating the current and the voltage of an electrode, usually direct, all other operating conditions being maintained constant. ★ caractéristique d'électrode → *caractéristique 45.* R электродная характеристика. D Elektrodenkennlinie. E característica de electrodo. I caratteristica di elettrodo. N elektrodekarakteristiek. P charakterystyka elektrody. S ström-spänningskurva (för en elektrod). (531)
38. **emission characteristic of a multielectrode tube** (*Syn.* diode characteristic) : → *characteristic 32*
39. **falling characteristic** : a characteristic where the output voltage decreases as current increases. ★ caractéristique chutante → *caractéristique 10.* R падающая внешняя (нагрузочная) характеристика. D fallende Kennlinie. E característica descendente. I caratteristica discendente. N dalende karakteristiek. P charakterystyka opadająca. S fallande karakteristik. (551)
40. **flat characteristic (of an arc welding power source)** : an external static characteristic which, in its normal welding range, is such that, as the current increases, the voltage decreases by less than 7 V/100 A or increases by less than 10 V/100 A. ★ caractéristique plate (d'une source de courant pour soudage à l'arc) → *caractéristique 64.* R жесткая характеристика (источника питания для дуговой сварки). D Konstantspannungs-Kennlinie (einer Lichtbogenschweißstromquelle). E característica plana. I caratteristica piatta (di una saldatrice ad arco). N vlakke karakteristiek. P charakterystyka statyczna płaska. S rak karakteristik. (851)
41. **forced characteristic** : a characteristic obtained by additional means, e.g. stabilization, with specified variation limits of influence quantities. ★ caractéristique forcée → *caractéristique 56.* R искусственная внешняя (нагрузочная) характеристика. D erzwungene Kennlinie. E característica forzada. I caratteristica forzata. N gedwongen karakteristiek. P charakterystyka wymuszona. S styrd karakteristik. (551)
42. **frequency response characteristic** (*Syn.* frequency response) : → *frequency-response 2*
43. **frequency-response characteristic** (*Syn.* Bode diagram) : → *diagram 2*
44. **frequency-response characteristic** (of an a.c. machine) : the relationship between complex admittance, or its reciprocal, complex impedance, or components thereof, and rotor current frequency usually expressed as slip. ★ caractéristique de réponse en fréquence → *caractéristique 33.* R частотные характеристики. D Frequenzgang (einer Wechselstrommaschine). E característica de respuesta de frecuencia. I caratteristica di risposta in frequenza. N frequentieresponsiekarakteristiek. P charakterystyka częstotliwościowa (maszyny prądu przemiennego). S frekvensresponskurva. (411)
45. **frequency-response characteristic** : the relation, usually shown by a graph, between the radiant or luminous dynamic sensitivity and the modulation frequency of the incident radiation. ★ caractéristique de réponse en fréquence → *caractéristique 34.* R частотная характеристика. D Frequenzgang. E característica de respuesta en frecuencia. I caratteristica di risposta in frequenza. N frequentieweergavekarakteristiek. P charakterystyka częstotliwościowa. S frekvenskurva. (531)

46. inherent characteristic of a system : data (formula or graph) showing the relationship, in steady-state, between an output variable (practically the variable to be controlled) and one of the input variables of the system, with any controlling equipment disconnected and for fixed values of the other input variables. ★ caractéristique naturelle d'un système → *caractéristique 62.* R статическая характеристика разомкнутой системы. D Kennlinie eines Systems. E característica natural de un sistema. I caratteristica naturale di un sistema. N karakteristiek van een systeem. P charakterystyka statyczna obiektu. S ..... (351)

47. I^2t characteristic : the value of I^2t under prescribed conditions as a function of prospective current and/or voltage. *Note.* — The I^2t characteristics generally stated relate to pre-arcing or operating periods. ★ caractéristique I^2t → *caractéristique 57.* R характеристика I^2t. D I^2t-Kennlinie. E característica I^2t. I caratteristica I^2t. N integraal I^2t karakteristiek; integraal-van-Joule-karakteristiek. P charakterystyka I^2t. S I^2t-karakteristik. (441)

48. jumping characteristic : the property of an equipment to jump from one characteristic to another, e.g. by changing the predetermined value of a stabilizing device. ★ caractéristique sautante → *caractéristique 65.* R скачкообразная характеристика. D Kennlinie mit Kennliniensprung. E característica saltante. I caratteristica a salti. N verspringende karakteristiek. P charakterystyka skokowa. S hoppkarakteristik. (551)

49. let-through (current) characteristic (*Syn.* cut-off (current) characteristic) : → *characteristic 29*

50. light-signal transfer characteristic : the characteristic relating the illuminance on the photocathode and the signal current. ★ caractéristique de transfert lumière-signal → *caractéristique 43.* R световая характеристика. D Licht-Signal-Wandlungskennlinie. E característica de transferencia luz-señal. I caratteristica di trasferimento luce-segnale. N licht-signaalomzetkarakteristiek. P charakterystyka obraz-sygnał. S ljussignalöverföringskurva. (531)

51. load angle characteristic : the characteristic of a synchronous machine giving the relationship between the rotor displacement angle and the active load for constant values of primary winding voltage and excitation current. ★ caractéristique d'angle de charge → *caractéristique 14.* R угловая характеристика. D Polradwinkel-Kennlinie. E característica de ángulo de carga. I caratteristica dell'angolo di carico. N lasthoekkarakteristiek (van een synchrone machine). P charakterystyka kątowa. S synkronvinkel-kurva. (411)

52. load characteristic : the linear or non-linear relationship, for a specified load, between the value of the output voltage and the value of the output current for a fixed setting of the controls. *Notes. 1* — The load may be complex and/or non-linear. *2* — The term may include the effects of overload. ★ caractéristique de charge → *caractéristique 16.* R нагрузочная характеристика. D Lastkennlinie. E característica de carga. I caratteristica di carico. N belastingskarakteristiek. P charakterystyka obciążenia. S belastningskarakteristik. (303)

53. load characteristic : the saturation characteristic of a machine on a specified constant load. ★ caractéristique en charge → *caractéristique 51.* R нагрузочная характеристика. D Belastungskennlinie (Spannung über Erregerstrom). E característica en carga. I caratteristica a carico. N belastingskarakteristiek (van een generator). P charakterystyka obciążenia. S belastningskurva. (411)

54. load characteristics (of an X-ray tube assembly) : maximum load permitted by the manufacturer as a function of the time and repetition rate. ★ caractéristiques de charge → *caractéristique 80.* R нагрузочные характеристики (рентгеновского аппарата). D Belastungskennwerte (eines Röntgenstrahlers). E características de carga (de un equipo de rayos X). I caratteristiche di carico (di un complesso tubo-guaina). N belastingskarakteristiek (van een röntgenbuissamenstel). P charakterystyki obciążenia lampy rentgenowskiej. S belastningskurvor. (881)

55. locked-rotor impedance characteristic (of an asynchronous machine) : the relationship between the primary winding current and the primary winding voltage with the rotor held stationary and with the secondary winding short-circuited. ★ caractéristique à rotor bloqué → *caractéristique 6.* R характеристика короткого замыкания (асинхронной машины). D Kurzschlußkennlinie (einer Asynchronmaschine). E característica con rotor bloqueado (de una máquina asíncrona). I caratteristica a rotore bloccato. N blokkeringskarakteristiek (van een asynchrone machine). P charakterystyka zwarcia (maszyny indukcyjnej). S kortslutningsströmkurva. (411)

56. magnetoresistive characteristic curve : → *curve 27*

57. motor characteristic : a statement of the speed, current, torque (or tractive effort) and power output of a motor operating under various specified conditions. ★ caractéristiques d'un moteur → *caractéristique 83.* R параметры двигателя. D Motorcharakteristik (Motorkennlinie). E características de un motor. I caratteristiche di un motore. N motorkarakteristieken. P charakterystyka silnika. S motorkarakteristik. (811)

58. mutual characteristic (*Syn.* transfer characteristic) : → *characteristic 91*

59. natural characteristic : a characteristic determined only by the basic parts of the equipment, e.g. transformer and valve device assembly. ★ caractéristique naturelle → *caractéristique 61.* R естественная внешняя (нагрузочная) характеристика. D natürliche Kennlinie. E característica natural. I caratteristica naturale. N natuurlijke karakteristiek. P charakterystyka naturalna. S egenkarakteristik. (551)

60. no-load characteristic (*Syn.* open-circuit characteristic) : → *characteristic 61*

61. open-circuit characteristic (*Syn.* no-load characteristic) : the saturation characteristic of a machine with an open-circuited primary winding. ★ caractéristique à circuit ouvert → *caractéristique 4.* R характеристика холостого хода. D Leerlaufkennlinie. E característica en circuito abierto; característica en vacío. I caratteristica a vuoto. N nullastkarakteristiek. P charakterystyka biegu jałowego. S tomgångskurva. (411)

62. overload characteristics (of a fuse) : combinations of time and current (in excess of rated current) that a fuse can withstand repeatedly under prescribed conditions of use and behaviour. ★ caractéristique de surcharge → *caractéristique 40.* R характеристика перегрузки (предохранителя). D Überlastkennlinie (einer Sicherung). E característica de sobrecarga (de un fusible). I caratteristica di sovraccarico (di un fusibile). N overbelastingskarakteristiek (van een smeltveiligheid). P charakterystyka przeciążeniowa (bezpiecznika topikowego). S överbelastningskarakteristik. (441)

63. persistence characteristic (*Syn.* decay characteristic) : the relation, usually shown by a graph, between the luminance and the time elapsed after the removal of the excitation. ★ caractéristique de persistance → *caractéristique 27.* R характеристика послесвечения. D Nachleuchtcharakteristik. E característica de persistencia; característica de decadencia. I caratteristica di persistenza; caratteristica di decadimento. N nalichtkromme. P charakterystyka poświaty. S efterlysningskurva. (531)

64. phase/frequency characteristic : the phase difference, as a function of frequency, between the fundamental component of the output signal of a two-port device and the corresponding sinusoidal input signal of specified amplitude. *Note.* — In the case of a linear time-invariant two-port device the phase/frequency characteristic is represented by the argument of the frequency response. ★ caractéristique phase-fréquence → *caractéristique 63.* R фазочастотная характеристика. D Phasen-Frequenzcharakteristik. E característica fase/frecuencia. I caratteristica fase/frequenza. N fase/frequentie-karakteristiek. P charakterystyka faza/częstotliwość. S fas-frekvenskarakteristik. (702)

65. power/frequency characteristic (*Syn.* regulating energy of a system) : → *energy 71*

66. principal (voltage-current) characteristic : a function, usually represented graphically, relating the principal voltage to the principal current, with the gate current, where applicable, as a parameter. ★ caractéristique (courant-tension) principale → *caractéristique 13.* R основная (вольт-амперная) характеристика. D Haupt-(Strom/Spannungs-)Kennlinie. E característica (corriente-tensión) principal. I caratteristica (tensione-corrente) principale. N hoofd(spanningstroom)-karakteristiek. P charakterystyka główna (napięciowo-prądowa). S huvudkarakteristika. (521)

67. pulse response characteristic (of a quasi-peak voltmeter) : the relationship between the indication of a quasi-peak voltmeter and the repetition rate of regularly repeated identical pulses. ★ caractéristique de réponse aux impulsions → *caractéristique 32.* R импульсная характеристика (квазипикового вольтметра). D Pulsbewertungskurve. E característica de respuesta a los impulsos. I caratteristica di risposta agli impulsi (di un voltmetro di quasi-picco). N pulsresponsiekarakteristiek. P charakterystyka odpowiedzi na impulsy (woltomierza quasi-szczytowego). S pulssvarskurva. (161)

68. quantum efficiency characteristic : the relation, usually shown by a graph, between wavelength and quantum efficiency. ★ caractéristique spectrale de rendement quantique → *caractéristique 69.* R характеристика квантовой эффективности. D Kennlinie der Quantenausbeute. E característica espectral de rendimiento cuántico. I caratteristica spettrale di rendimento quantico. N kwantumopbrengst-karakteristiek. P charakterystyka wydajności kwantowej. S kvantumkänslighetskurva. (531)

69. recording characteristic : the variation, with respect to frequency, of the recorded level, when a signal of constant level and variable frequency is applied to the input of a recording system. In disk recording, the recording characteristic is defined in terms of velocity, in magnetic recording in terms of short-circuit flux. ★ caractéristique d'enregistrement → *caractéristique 47.* R амплитудно-частотная характеристика канала записи. D Aufnahmecharakteristik. E característica de registro. I caratteristica di registrazione. N opneemkarakteristiek. P charakterystyka zapisu. S inspelningskarakteristik. (806)

70. relative spectral sensitivity characteristic : the relation, usually shown by a graph, between wavelength and relative spectral sensitivity. ★ caractéristique de sensibilité spectrale relative → *caractéristique 38.* R характеристика относительной спектральной чувствительности. D Kennlinie der relativen spektralen Empfindlichkeitsverteilung. E característica de sensibilidad espectral relativa. I caratteristica di sensibilità spettrale relativa. N relatieve spectrale gevoeligheidskarakteristiek. P charakterystyka czułości widmowej względnej. S relativ känslighetskurva. (531)

71. reproducing characteristic : the inverse of the recording characteristic. The variation, with respect to frequency of the output level of an ideal reproducing transducer, when reproducing a medium, recorded with a given recording characteristic. In disk recording, the reproducing characteristic is defined in terms of recorded velocity; in magnetic recording, in terms of short-circuit flux. ★ caractéristique de lecture → *caractéristique 25.* R ..... D Wiedergabecharakteristik. E característica de lectura. I caratteristica di riproduzione. N weergeefkarakteristiek. P charakterystyka (częstotliwościowa odczytu). S återgivningskarakteristik. (806)

72. rising characteristic : a characteristic where the output voltage increases as current increases. ★ caractéristique montante → *caractéristique 59.* R возрастающая внешняя (нагрузочная) характеристика. D steigende Kennlinie. E característica ascendente. I caratteristica ascendente. N stijgende karakteristiek. P charakterystyka wzrastająca. S stigande karakteristik. (551)

73. saturation characteristic : the relationship between the voltage of the primary winding and the excitation or magnetizing current under specified conditions of load, speed, etc. ★ ..... → . R характеристика насыщения. D Spannungs-Magnetisierungsstrom-Kennlinie. E ..... I caratteristica di magnetizzazione. N verzadigingskarakteristiek. P ..... S magnetiseringskurva. (411)

74. short-circuit characteristic : the relationship between the current in the short-circuited primary winding and the excitation current at a specified speed. ★ caractéristique en court-circuit → *caractéristique 52.* R характеристика короткого замыкания. D Kurzschlußkennlinie. E característica en cortocircuito. I caratteristica di corto circuito. N kortsluitkarakteristiek. P charakterystyka zwarcia. S kortslutningsadmittans. (411)

75. specific characteristic : the ratio of an electrical characteristic related to unit mass, surface, area or volume of the battery, e.g. W·h/kg. ★ caractéristique spécifique → *caractéristique 66.* R удельная характеристика. D spezifische Kenngrößen. E característica específica. I caratteristica specifica. N specifieke kenmerken. P wskaźnik energetyczny. S ..... (486)

76. spectral characteristic : the relation, usually shown by a graph, between the emitted radiant power per wavelength interval and the wavelength. ★ caractéristique spectrale → *caractéristique 68.* R спектральная характеристика. D spektrale Energieverteilung. E característica espectral. I caratteristica spettrale. N spectrale karakteristiek. P charakterystyka widmowa. S spektralfördelning (skurva). (531)

77. spectral-sensitivity characteristic : the relation, usually shown by a graph, between wavelength and absolute or relative spectral sensitivity. ★ caractéristique de sensibilité spectrale → *caractéristique 36.* R характеристика спектральной чувствительности. D spektrale Empfindlichkeitskennlinie. E característica de sensibilidad espectral. I caratteristica di sensibilità spettrale. N spectrale gevoeligheidskarakteristiek. P charakterystyka widmowa. S spektralkänslighetskurva. (531)

78. speed regulation characteristic : the relationship between speed and the load of a motor under specified conditions. ★ caractéristique de vitesse → *caractéristique 44.* R скоростная характеристика. D Drehzahlkennlinie. E característica de velocidad. I caratteristica coppia-velocità. N toerenkarakteristiek (van een motor). P charakterystyka mechaniczna. S varvtalsändringskurva. (411)

79. square-wave response characteristic (*Syn.* modulation transfer function) : the characteristic relating square-wave response and the ratio of a stated raster dimension to the bar width in the square-wave response test pattern. ★ caractéristique de réponse en signaux carrés → *caractéristique 35.* R частотно-контрастная характеристика. D Modulationsübertragungsfunktion. E característica de respuesta en señales cuadradas; función de transferencia de modulación. I caratteristica di risposta all'onda rettangolare; funzione di trasferimento di modulazione. N kanteelsignaalweergavekarakteristiek. P charakterystyka odpowiedzi na falę prostokątną. S fyrkantvågssvarskurva. (531)

80. stabilized current characteristic : a characteristic with a stabilized output current. ★ caractéristique de courant stabilisée → *caractéristique 21.* R характеристика стабилизированного тока. D Konstantstromkennlinie. E característica de corriente estabilizada. I caratteristica con corrente stabilizzata. N gestabiliseerde stroomkarakteristiek. P charakterystyka prądu stabilizowanego. S stabiliserad strömkarakteristik. (551)

81. stabilized load characteristic : a load characteristic which remains between specified limits. ★ caractéristique de charge stabilisée → *caractéristique 17.* R стабилизированная нагрузочная характеристика. D stabilisierte Lastkennlinie. E característica de carga estabilizada. I caratteristica di carico stabilizzata. N gestabiliseerde belastingskarakteristiek. P charakterystyka obciążenia stabilizowanego. S stabiliserad belastningskarakteristik. (303)

82. stabilized output characteristic : a forced characteristic with an output quantity which is stabilized with respect to changes of influence quantities. ★ caractéristique de sortie stabilisée → *caractéristique 39.* R стабилизированная выходная характеристика. D Konstant (-spannungs- oder -strom-)kennlinie. E característica de salida estabilizada. I caratteristica d'uscita stabilizzata. N gestabiliseerde karakteristiek. P charakterystyka stabilizowana wyjściowa. S stabiliserad karakteristik. (551)

83. stabilized voltage characteristic : a characteristic with a stabilized output voltage. ★ caractéristique de tension stabilisée → *caractéristique 41.* R характеристика стабилизированного напряжения. D Konstantspannungskennlinie. E característica de tensión estabilizada. I caratteristica di tensione stabilizzata. N gestabiliseerde spanningskarakteristiek. P charakterystyka napięcia stabilizowanego. S stabiliserad spänningskarakteristik. (551)

84. stable characteristic (*Syn.* natural stability) : a characteristic of an electric braking system in which the brake force is approximately constant or increases with increasing speed without the need for adjustment manually or by an automatic device. ★ caractéristique stable → *caractéristique 70.* R устойчивая характеристика. D stabile Kennlinie. E característica de estabilidad. I caratteristica stabile; stabilità naturale. N constante

remkarakteristiek. P charakterystyka hamowania stabilna. S ..... (811)

85. **static characteristic** (of a transductor) (*Syn.* transfer curve (of a transductor)) : the graphic representation of the relation between an output quantity and a control quantity under steady-state conditions. ★ caractéristique de réglage → *caractéristique 30.* R характеристика управления (магнитного усилителя). D statische Kennlinie (eines Transduktors). E característica estática (de un transductor). I caratteristica statica (di un trasduttore). N statische karakteristiek. P charakterystyka statyczna (transduktora); charakterystyka regulacyjna (transduktora). S statisk karakteristik; styrkurva. (431)
86. **static characteristic** : a characteristic for which the relevant quantities have only direct values. ★ caractéristique statique → *caractéristique 71.* R статическая характеристика. D statische Kennlinie. E característica estática. I caratteristica statica. N statische karakteristiek. P charakterystyka statyczna. S statisk kurva. (531)
87. **static characteristic (of an arc welding power source)** : the relationship between the main parameters of a welding power source when in a state of equilibrium. ★ caractéristique statique (d'une source de courant pour soudage à l'arc) → *caractéristique 73.* R статическая характеристика (источника питания для дуговой сварки). D statische Kennlinie (einer Lichtbogenschweißstromquelle). E característica estática (de una fuente de alimentación para soldadura por arco). I caratteristica statica (di una saldatrice ad arco). N statische karakteristiek. P charakterystyka statyczna (źródła przy spawaniu łukowym). S statisk karakteristik. (851)
88. **steady-state load characteristic** : the relation between the power absorbed by a load and the voltage or frequency at the load terminals under steady-state operating conditions. ★ caractéristique statique d'une charge → *caractéristique 72.* R статическая характеристика нагрузки. D stationäre Lastkennlinie. E característica estática de una carga. I caratteristica statica di un carico. N statische karakteristiek van de belasting. P charakterystyka obciążenia statyczna. S belastningsförhållande vid stationärt tillstånd. (603)
89. **symmetric (characteristic circuit) element** : → *element 56*
90. **time-current characteristic** : a curve giving the time, e.g. prearcing time or operating time, as a function of the prospective current under stated conditions of operation. ★ caractéristique temps-courant → *caractéristique 75.* R время-токовая характеристика. D Zeit/Strom-Kennlinie. E característica tiempo-corriente (intensidad). I caratteristica tempo-corrente. N tijd-stroomkarakteristiek. P charakterystyka czasowoprądowa. S tid-strömkurva. (441)
91. **transfer characteristic** (*Syn.* mutual characteristic) : a characteristic relating the current or voltage of one electrode and the current or voltage of another electrode, all other electrode voltages being maintained constant. ★ caractéristique de transfert → *caractéristique 42.* R переходная характеристика. D Übertragungskennlinie; Steilheitskennlinie. E característica de transferencia; característica mutua. I caratteristica mutua. N terugwerkingskarakteristiek. P charakterystyka wzajemna. S ström-spänningskurva för två elektroder. (531)
92. **transient load characteristic** : the relation between the power absorbed by a load and the voltage or frequency under transient-state operating conditions. ★ caractéristique transitoire d'une charge → *caractéristique 77.* R динамическая характеристика нагрузки. D transiente Lastkennlinie. E características transitoria de una carga. I caratteristica dinamica di un carico. N transiënte karakteristiek van de belasting. P charakterystyka obciążenia w stanach przejściowych. S belastningsförhållande vid dynamiskt tillstånd. (603)
93. **unstable characteristic** : a characteristic of an electric braking system in which the braking force for a given setting of the controls varies inversely with the speed of the train. ★ caractéristique instable → *caractéristique 58.* R неустойчивая характеристика. D instabile Kennlinie. E característica de inestabilidad. I caratteristica instabile. N variabele remkarakteristiek. P charakterystyka hamowania niestabilna. S ..... (811)
94. **V-curve characteristic** : → *V-curve 1*
95. **voltage regulation characteristic** : the relationship between the primary voltage and the load of a generator under specified conditions. ★ caractéristique externe → *caractéristique 55.* R внешняя характеристика. D (äußere) Belastungskennlinie (Spannung über Belastungsstrom). E característica externa. I caratteristica esterna. N uitwendige karakteristiek (van een generator). P charakterystyka zewnętrzna. S spänningsändringskurva. (411)
96. **zero power-factor characteristic** : the load characteristic of a machine supplying constant current with a power-factor in the neighbourhood of zero. ★ caractéristique à facteur de puissance nul → *caractéristique 5.* R нагрузочная характеристика машины при коэффициенте мощности, равном нулю. D Spannungs-Erregerstromkennlinie bei konstantem Blindstrom. E característica con factor de potencia nulo. I caratteristica a cosfi zero. N belastingskarakteristiek bij arbeidsfactor nul. P charakterystyka obciążenia przy współczynniku mocy równym zeru. S magnetiseringskurva vid effektfaktor noll. (411)

characteristic quantity

1. **characteristic quantity** (of a measuring relay) : an electrical quantity, or one of its parameters the name of which characterizes the relay and the values of which are the subject of accuracy requirements. *Examples :* — the current for an over-current or under-current relay; — the frequency for a frequency relay, the input energizing quantity of which may be a voltage; — the power for a power relay, the input energizing quantities of which are the current and the voltage. ★ grandeur caractéristique → *grandeur 8.* R характеристическая величина (измерительного реле). D charakteristische Grösse (eines Messrelais). E magnitud característica (de un relé de medida). I grandezza caratteristica (di un relè di misura). N kenmerkende grootheid (van een meetrelais). P wielkość charakterystyczna (przekaźnika pomiarowego). S karakteristisk storhet (hos ett mätande relä). (446)
2. **limiting value of the characteristic quantity** : → *value 21*
3. **setting range of the characteristic quantity** : → *range 64*
4. **setting ratio of the characteristic quantity** : → *ratio 80*
5. **setting value of the characteristic quantity** : → *value 63*

character-serial

1. **character-serial transmission** : → *transmission 12*

charge

1. **automatic charge** : an arrangement for recharging a battery in which the charging current is automatically varied as required by the state of the battery, generally with the aim of recharging as quickly as possible consistent with the safety of the battery, whatever its initial state of discharge. ★ charge automatique → *charge 35.* R автоматическая зарядка. D automatisches Laden. E carga automática. I carica automatica. N automatisch laden. P ładowanie samoczynne. S automatisk laddning. (811)
2. **boost charge** : a partial charge generally at high-rate for a short period. ★ (charge rapide de) biberonnage → *biberonnage 1.* R форсированный заряд. D Starkladung. E carga rápida. I carica parziale. N snelladen. P podładowanie. S snabbladdning. (486)
3. **boost charge** (*Syn.* rapid charge) : a partial charge, usually at a high rate for a short period. ★ charge rapide → *charge 78.* R дозарядка; ускоренная зарядка. D Schnelladen. E carga rápida. I carica rapida. N snelladen. P ładowanie szybkie. S snabbladdning. (811)
4. **charge** : the fuel placed in a reactor. ★ charge → *charge 21.* D Ladung. E carga. I carica. N lading. P wsad paliwowy. S laddning. (026)
5. **charge** (of a cell or battery) : an operation during which a battery receives from an external circuit electric energy which is converted into chemical energy. ★ charge → *charge 26.* R зарядка (аккумулятора или батареи). D Laden. E carga (de una bateria). I carica (d'una batteria). N laden (van een cel of accubatterij). P ładowanie. S laddning. (486,531,811)
6. **charge** : total of materials or workpieces to be heated in a furnace or another type of electroheating appliance. ★ charge → *charge 27.* R загрузка. D Charge. E carga. I carica. N lading. P wsad. S charge. (841)
7. **charge acceptance** : → *acceptance 3*
8. **charge amplifier** : → *amplifier 7*
9. **charge carrier** : → *carrier 13*
10. **charge carrier storage** : → *storage 3*
11. **charge collection time** : → *time 19*

12. **charge discriminator** : → *discriminator 3*
13. **charge efficiency (of a cell or battery)** : → *efficiency 6*
14. **charge emission detector** : → *detector 5*
15. **charge factor** : → *factor 20*
16. **charge integrator** : → *integrator 1*
17. **charge rate** : → *rate 10*
18. **charge retention** : → *retention 2*
19. **charge transit time** : → *transit-time 1*
20. **connection charge** : a fixed sum to be paid to the supply undertaking over a given period, towards the connection and network costs. ★ redevance de raccordement → *redevance 3.* R плата за присоединение. D Anschluß- und Netzkostenbeitrag (laufend). E cuota de conexión. I contributo di allacciamento. N bijdrage in de aansluit- en netkosten. P opłata za przyłączenie do sieci. S periodbestämd engångsavgift. (691)
21. **conserved charge (secondary) battery** (*Syn.* charged drained (secondary) battery) : → *battery 17*
22. **constant current charge** : a charge during which the current is maintained at a constant value. ★ charge à courant constant → *charge 28.* R заряд при постоянном значении тока. D Konstantstrom-Ladung. E carga a corriente constante. I carica a corrente costante. N laden met constante stroom. P ładowanie przy stałym prądzie. S konstantströmsladdning; I-laddning. (486)
23. **constant voltage charge** : a charge during which the voltage across the battery terminals is maintained at a constant value. ★ charge à tension constante → *charge 31.* R заряд при постоянном значении напряжения. D Konstantspannungs-Ladung. E carga a tensión constante. I carica a tensione costante. N laden bij constante spanning. P ładowanie przy stałym napięciu. S konstantspänningsladdning; U-laddning. (486)
24. **demand charge** (*Syn.* fixed charge) : the total amount billed for demand in accordance with the relevant conditions of the tariff or supply agreement. ★ prime fixe → *prime 2.* R плата за мощность; фиксированная плата. D Leistungspreissumme. E término de potencia. I corrispettivo di potenza. N in rekening gebrachte vergoeding voor het vermogen. P opłata za moc; opłata zryczałtowana. S totalavgift. (691)
25. **electric charge** : a fundamental quantity axiomatically defined to describe certain experimentally observed interactions. ★ charge électrique → *charge électrique 1.* R электрический заряд. D elektrische Ladung. E carga eléctrica. I carica elettrica. N elektrische lading. P ładunek elektryczny. S elmängd; laddning. (111)
26. **electric charge** (*Q*) : the algebraic sum of the elementary electric charges in a body or a system. ★ charge électrique → *charge électrique 2.* R электрический заряд. D elektrische Ladung. E carga eléctrica. I carica elettrica. N (elektrische) lading. P ładunek elektryczny. S elektrisk laddning. (121)
27. **electrical charge time constant** : → *time constant 7*
28. **electrostatic unit of charge** : → *unit 21*
29. **elementary charge** (*e*) : the value of the electric charge associated with the electron, proton or positron. ★ charge élémentaire → *charge 59.* R элементарный заряд. D Elementarladung. E carga elemental. I carica elementare. N elementaire lading. P ładunek elementarny. S elementarladdning. (881)
30. **elementary (electric) charge** (*e*) : the magnitude of the quantum of electric charge (0.160219×10^{-18}C). ★ charge (électrique) élémentaire → *charge électrique 3.* R элементарный (электрический) заряд. D Elementarladung. E carga (eléctrica) elemental. I carica (elettrica) elementare. N elementaire (elektrische); lading. P ładunek elementarny. S elementarladdning. (111)
31. **equalizing charge** : an extended charge to ensure complete charging of all the cells in a battery. ★ charge d'égalisation → *charge 51.* R уравнительный заряд. D Ausgleichsladung. E carga de compensación. I carica di livellamento. N vereffeningsladen. P ładowanie wyrównawcze. S utjämningsladdning. (486)
32. **fixed charge** (*Syn.* demand charge) : → *charge 24*
33. **gross charge per tonne** : the weight of charge necessary to yield 1 000 kilograms of molten metal. ★ mise au mille → *mille 1.* R полный вес загрузки на тонну годного металла. D Einsatz je Tonne Ausbringen. E carga bruta por tonelada. I carica lorda per tonnellata. N inzet voor 1000 kg smelt. P wsad brutto na tonę. S chargevikt per ton smälta. (841)
34. **indication of charge** : → *indication 4*
35. **initial charge** : a commissioning charge given to a new battery to bring it to the fully charged state. ★ charge initiale → *charge 63.* R начальный заряд. D Erstladung. E carga inicial. I carica iniziale. N eerste lading. P ładowanie pierwsze. S initialladdning. (486)
36. **local (charge) exchange** (*Syn.* local service area) : → *area 25*
37. **melting charge** (*Syn.* heat) : the amount of materials to be charged in the furnace to obtain molten metal at the required specification. ★ charge de fusion → *charge 41.* R шихта для плавки. D Schmelzeinsatz. E carga de fusión; hornada. I carica di fusione. N inzet. P wsad stopu. S charge. (841)
38. **modified constant voltage charge** : constant voltage charge with current limitation. ★ charge à tension constante modifiée → *charge 32.* R модифицированный заряд при постоянном значении напряжения. D modifizierte Konstantspannungs-Ladung. E carga a tensión constante modificada. I carica a tensione costante modificata. N laden met constante spanning en begrensde stroom. P ładowanie modyfikowane przy stałym napięciu. S ström- och spänningsbegränsad laddning; IU-laddning. (486)
39. **radiation charge meter** (*Syn.* charge integrator) : → *integrator 1*
40. **rapid charge** (*Syn.* boost charge) : → *charge 3*
41. **recovered charge** (of a diode or thyristor) : the total charge recovered from a diode or thyristor after switching from a specified forward (on-state) current condition to a specified reverse condition. *Note.* — This charge includes components due to both charge carrier storage and depletion layer capacitance. ★ charge récupérée → *charge 80.* R заряд накопленный (диода или тиристора). D Sperrverzögerungsladung (einer Diode oder eines Thyristors). E carga recuperada (de un diodo o tiristor). I carica recuperata (di un diodo o di un tiristore). N terugkerende lading (van een diode of thyristor). P ładunek odzyskiwany (diody lub tyrystora). S återhämtad laddning. (521)
42. **standby charge** : a demand charge for the availability of a supply under the conditions of a standby tariff, to be paid by the consumer irrespective of whether or not he makes use of the standby supply. ★ prime fixe de secours → *prime 3.* R плата за резервы. D Preis für Reserveleistung. E prima fija de socorro. I corrispettivo di potenza per soccorso. N vergoeding voor reservevermogen. P opłata za rezerwę mocy. S reserveffektavgift. (691)
43. **standing charge** : a fixed amount to be paid by the consumer for a specified period (year, quarter, month, etc.) independent of consumption. This sum is either uniform, or determined according to particular parameters (number of rooms, floor area, etc.). ★ redevance d'abonnement → *redevance 1.* R постоянная плата. D Grundpreis. E cuota de servicio. I quota fissa. N vastrecht. P opłata stała. S fast avgift. (691)
44. **standing charge tariff** : → *tariff 38*
45. **(to) charge** : to store energy in a device. ★ charger → *charger 5.* R заряжать (конденсатор, аккумулятор). D laden. E cargar (un condensador, un acumulador). I caricare (un condensatore, un accumulatore). N laden. P ładować. S ladda. (151)
46. **trickle charge** : a continuous charge at low rate which compensates for self-discharge and thus maintains the battery in an approximately fully charged state. ★ charge d'entretien → *charge 52.* R непрерывный заряд малым током. D Dauerladung. E carga de mantenimiento. I carica di mantenimento. N druppelladen. P ładowanie konserwacyjne. S underhållsladdning. (486)
47. **two-rate charge** (*Syn.* two-step charge) : → *charge 48*
48. **two-step charge** (*Syn.* two-rate charge) : a charge which starts at a given current and, at a predetermined point continues at a lower current. ★ charge à deux courants → *charge 29.* R двухступенчатый заряд; двухрежимный заряд. D Zweischritt-Ladung (abgesetzte Ladung). E carga en dos pasos. I carica a due regimi. N tweetrapsladen. P ładowanie dwustopniowe. S tvåstegsladdning. (486)

chargeable

1. **chargeable demand** : → *demand 3*

charged

1. **charged drained (secondary) battery** : → *battery 17*

2. **charged particle equilibrium** : → *equilibrium 1*
3. **dry charged (secondary) battery** : → *battery 30*
4. **filled and charged (secondary) battery** : → *battery 37*
5. **fully charged state (of a cell or battery)** : → *state 18*

charge-density

1. **charge-density modulation** (*Syn.* density modulation) : → *modulation 15*
2. **linear (electric) charge density** : a scalar quantity equal to the limit of the quotient of charge by the element of length which contains it, when all the dimensions of this element tend to zero. *Note.* — When localized effects are taken into account, the size of the element must remain sufficiently large for it to contain a large number of elementary electric charges; in such cases, the mathematical concept of limit cannot be applied. ★ charge (électrique) linéique → *charge électrique 4.* R линейная плотность (электрического) заряда. D längenbezogene (elektrische) Ladung. E carga (eléctrica) por unidad lineal. I carica elettrica lineare. N (elektrische) lijnladingsdichtheid. P gęstość ładunku (elektrycznego) liniowa. S (elektrisk) linjär laddningstäthet. (121)
3. **surface (electric) charge density** : a scalar quantity equal to the limit of the quotient of charge by the element of surface which contains it, when all the dimensions of this element tend to zero. *Note.* — When localized effects are taken into account, the size of the element must remain sufficiently large for it to contain a large number of elementary electric charges; in such cases, the mathematical concept of limit cannot be applied. ★ charge (électrique) surfacique → *charge électrique 5.* R поверхностная плотность (электрического) заряда. D flächenbezogene (elektrische) Ladung. E carga (eléctrica) por unidad superficial. I carica elettrica areica. N (elektrische) oppervlakteladingsdichtheid. P gęstość ładunku (elektrycznego) powierzchniowa. S (elektrisk) ytladdningstäthet. (121)
4. **volume (electric) charge density** : a scalar quantity equal to the limit of the quotient of charge by the element of volume which contains it, when all the dimensions of this element tend to zero. *Note.* — When localized effects are taken into account, the size of the element must remain sufficiently large for it to contain a large number of elementary electric charges; in such cases, the mathematical concept of limit cannot be applied. ★ charge (électrique) volumique → *charge électrique 6.* R объемная плотность (электрического) заряда. D volumenbezogene (elektrische) Ladung. E carga (eléctrica) por unidad de volumen. I carica elettrica volumica. N (elektrische) volume-ladingsdichtheid. P gęstość ładunku (elektrycznego) objętościowa. S (elektrisk) volymladdningstäthet. (121)

charger

1. **dosemeter charger** : an instrument intended to charge a direct reading pocket dosemeter. ★ chargeur de dosimètre → *chargeur 2.* R зарядное устройство дозиметра. D Ladegerät für Dosimeter. E cargador de dosímetro. I caricatore di dosimetro. N (op)lader. P przyrząd do ładowania dawkomierzy. S dosmätarladdare. (391)
2. **dosemeter charger reader** : → *reader 1*
3. **exposure meter charger** : an instrument intended to charge a direct reading pocket exposure meter. ★ chargeur d'exposimètre → *chargeur 3.* R зарядное устройство измерителя экспозиционной дозы. D Ladegerät für Dosimeter. E cargador de exposímetro. I caricatore di esposimetro. N (op)lader. P przyrząd do ładowania dawkomierzy. S expositionsmätarladdare. (391)
4. **exposure meter charger reader** : → *reader 2*
5. **pan charger** : a charging equipment using a chain to which are attached pan-like containers. ★ chargeur à godets → *chargeur 1.* R загрузочное устройство лоткового типа. D Beschickungsbecherwerk. E cargador de gamellas. I caricatore a tazze. N baktransporteur. P ładowarka czerpakowa (łańcuchowa). S skopchargerare. (841)

charge-storage

1. **cathode-ray charge-storage tube** : → *cathode-ray tube 1*
2. **charge-storage tube** : → *tube 15*

charging

1. **charging** : the action of determining and recording a fee for the use of a circuit or facility. ★ taxation → *taxation 1.* R начисление платы. D Gebuehrenerfassung. E tasación. I tassazione. N tariferen. P taryfikacja. S debitering. (714)
2. **charging basket** : → *basket 1*
3. **charging current of a capacitor** : → *current 20*
4. **charging of a capacitor** : the storage of energy in a capacitor. ★ (mise en) charge d'un condensateur → *charge 127.* R зарядка конденсатора; заряд конденсатора. D Laden eines Kondensators. E puesta en carga de un condensador. I carica di un condensatore. N het laden van een condensator. P ładowanie kondensatora. S uppladdning. (436)
5. **charging resistor** : → *resistor 2*
6. **charging time** : → *time 20*
7. **charging tray** : → *tray 2*
8. **charging tundish** : → *tundish 1*
9. **drop-bottom charging basket** : → *basket 2*
10. **fuel charging machine** : → *machine 12*

Charles

1. **Charles gun** : → *gun 2*

chart

1. **chart driving mechanism** : → *mechanism 2*
2. **geometry test chart** : a television test card by which the geometric distortion of a picture may be assessed. ★ mire de géométrie → *mire 6.* R испытательная таблица геометрии. (723)
3. **NBS test chart** : a resolution test chart made up of alternate bars of black and white - of equal width but of different pitch and orientation. ★ mire de Foucault → *mire 5.* R испытательная таблица NBS. (723)
4. **recording chart** : a recording medium, generally paper, usually provided with pre-printed lines with or without figures. ★ support de diagramme → *support 21.* R носитель диаграммы. D Aufzeichnungsträger. E soporte de diagrama. I carta per registrazione. N registratiepapier. P nośnik wykresu; wykresówka. S skrivdiagram; diagrampapper. (301)
5. **registration chart** : a television test card by which the registration of a camera or the convergence of a display may be verified. ★ mire de convergence → *mire 3.* R таблица совмещения. (723)
6. **resolution test chart** : a television test pattern designed for checking the resolution of a television picture. ★ mire de définition → *mire 4.* R испытательная таблица четкости. (723)
7. **sequence chart** : a table or chart showing the order in which the switches of a control system operate. ★ tableau d'enclenchement → *tableau 3.* R таблица замыканий. D Schalttabelle. E esquema secuencial. I sequenza. N schakelvolgordetabel. P tablica kolejności łączeń. S kopplingsschema. (811)
8. **Smith chart** (*Syn.* Smith diagram) : a graphical representation in polar coordinates of the amplitude reflection factor $\underline{r}$ for a lossless uniform transmission line with characteristic impedance Z_0:

$$\underline{r} = \frac{\underline{Z} - Z_0}{\underline{Z} + Z_0} = \frac{\underline{Z}/Z_0 - 1}{\underline{Z}/Z_0 + 1}$$

in terms of the complex impedance $\underline{Z}$ by two families of orthogonal circles on each of which either the resistance R or the reactance X has a constant value, where

$$\underline{Z} = R + jX$$

is the complex impedance in the direction of propagation of the incident wave at the point at which the amplitude reflection factor is evaluated. *Notes. 1* — The Smith chart may be used with impedances $\underline{Z}$, admittances

$$\underline{Y} = \frac{1}{\underline{Z}}$$

normalized impedances

$$\frac{\underline{Z}}{Z_0}$$

or normalized admittances

$$\frac{\underline{Y}}{Y_0} = \frac{Z_0}{\underline{Z}}$$

2 — The Smith chart is usually restricted to positive values of R, in which case it is bounded by an outer circle where the

magnitude of the amplitude reflection factor is unity. *3* — The Smith chart allows the conversion by direct reading of the amplitude reflection factor into the real and imaginary parts of the impedance or admittance and vice versa ; the representation also simplifies the transformation of impedance or admittance from one point to another on the same transmission line. ★ abaque de Smith → *abaque 1.* R номограмма полных сопротивлений; диаграмма полных сопротивлений. D Smith-Diagramm. E diagrama de Smith. I carta di Smith; diagramma polare d'impedenza. N Smith-diagram. P wykres Smitha (impedancji, admitancji); wykres kołowy (impedancji, admitancji). S Smith-diagram. (726)

9. **strip chart recorder** : → *recorder 18*
10. **Z-Theta chart** : a graphical representation in polar coordinates of the amplitude reflection factor r, for a lossless uniform transmission line with characteristic impedance Z_0:

$$r = \frac{\underline{Z} - Z_0}{\underline{Z} + Z_0} = \frac{\underline{Z}/Z_0 - 1}{\underline{Z}/Z_0 + 1}$$

in terms of the complex impedance $\underline{Z}$ by two families of orthogonal circles on each of which either the modulus Z or the argument θ has a constant value, where $\underline{Z} = Z\ \theta$ is the complex impedance in the direction of propagation of the incident wave at the point at which the amplitude reflection factor is evaluated. *Notes. 1* — The Z-Theta chart may be used with impedances $\underline{Z}$, admittances

$$\underline{Y} = \frac{1}{\underline{Z}}$$

normalized impedances

$$\frac{\underline{Z}}{Z_0}$$

or normalized admittances

$$\frac{\underline{Y}}{Y_0} = \frac{Z_0}{\underline{Z}}$$

2 — The Z-Theta chart is usually restricted to values of θ between $-\pi/2$ and $+\pi/2$ corresponding to positive values of the real part of $\underline{Z}$, in which case it is bounded by an outer circle where the magnitude of the amplitude reflection factor is unity. *3* — The Z-Theta chart has the same properties and applications as those of the Smith chart, but the complex impedance $\underline{Z}$ is represented with two families of orthogonal circles on each of which either the modulus Z either the argument θ has a constant value instead of the real and imaginary parts R and X of $\underline{Z}$ used for the Smith chart. ★ abaque Z-Thêta → *abaque 2.* R номограмма Z-Θ. D Z-θ-Diagramm. E diagrama Z-Teta; diagrama polar. I carta Z-θ. N Z-thêta-diagram. P wykres biegunowy (impedancji, admitancji). S impedansdiagram. (726)

chassis

1. **chassis** (*Syn.* frame) : a conductive body whose potential is taken as reference. ★ masse → *masse 9.* R масса. D Körper; Chassis; Masse. E masa. I massa. N gestel; massa. P masa; korpus. S stomme. (151)

Chebyshev

1. **Chebyshev array** : → *array 6*

check

1. **block check** : a process for error control according to which a check is made on the structure of data blocks according to given rules. ★ contrôle par bloc → *contrôle 16.* R проверка блока. D Blockprüfung. E control por bloques. I verifica di blocco. N blokcontrole. P zabezpieczenie przed błędami bloku; kontrola błędów blokowa. S blockkontroll. (721)
2. **block check** : a procedure of error control which checks that each block is constructed in accordance with the rules of an error protection code. ★ contrôle par bloc → *contrôle 17.* R проверка блока. D Blockprüfung. E control por bloque. I controllo per blocco. N blokcontrole. P blok zabezpieczający. S blockkontroll. (721)
3. **character check** : a procedure of error control which checks that each character is constructed in accordance with the rules of an error protection code. ★ contrôle par caractère → *contrôle 18.* R проверка знака. D Zeichenprüfung. E control por carácter. I controllo per carattere. N karaktercontrole. P znak zabezpieczający. S teckenkontroll. (721)
4. **check bit** : → *bit 10*
5. **check command** : → *command 3*
6. **check digit** : → *digit 3*
7. **continuity check** : check made of a connection to verify that a transmission path exists. ★ contrôle de continuité → *contrôle 4.* R проверка целостности. D Durchgangspruefung; Kontinuitaetspruefung. E control de continuidad. I controllo di continuità. N continuïteitscontrole. P kontrola ciągłości. S linjekontroll. (714)
8. **cross-office check** : check made of a circuit across an exchange to verify that a transmission path exists. ★ contrôle de continuité dans le commutateur → *contrôle 5.* R внутристанционная проверка целостности. D ..... E control de continuidad en el conmutador. I prova di percorso attraverso la centrale. N ..... P kontrola przejścia przez centralę. S länkkontroll. (714)
9. **event parity check** : a procedure of error control which checks whether the number of digits of the same type in a group of binary digits representing a character or a block is even. ★ contrôle de parité → *contrôle 7.* R проверка на четность. D gerade Paritätsprüfung. E control de paridad. I controllo di parità. N controle op even pariteit. P zabezpieczenie parzystościowe. S jämn paritetskontroll. (721)
10. **odd parity check** : a procedure of error control which checks whether the number of digits of the same type in a group of binary digits representing a character or a block is odd. ★ contrôle d'imparité → *contrôle 14.* R проверка на нечетность. D ungerade Paritätsprüfung. E control de imparidad. I controllo di disparità. N controle op oneven pariteit. P zabezpieczenie nieparzystościowe. S udda paritetskontroll. (721)
11. **reasonableness check** : a procedure for verifying whether the signalling information of a received signal message is reasonable in relation to the sequence of previously received signal messages for that circuit. ★ contrôle de vraisemblance → *contrôle 11.* R проверка логичности. D Plausibilitaetspruefung. E control de veracidad. I controllo di verosimiglianza. N ..... P kontrola wiarygodności. S rimlighetskontroll. (714)
12. **routine check tests** : → *test 71*
13. **subscriber's check meter** : → *meter 59*

checking

1. **loop checking** (*Syn.* automatic collating) : an error control method where received data are automatically retransmitted from the receiving end to the transmitting end and compared with the initial data stored at the transmitter. ★ collationnement automatique → *collationnement 1.* R информационная обратная связь; сверка по шлейфу. D Schleifenprüfung. E control por retorno; colación automática. I controllo per ritrasmissione. N controle door terugzenden. P zabezpieczenie przed błędami z detekcją po stronie nadawczej. S slingkontroll. (721)

check-out

1. **check-out time** : → *time 21*
2. **function check-out** : actions taken after fault correction to verify that the item has recovered its ability to perform the required function. ★ vérification de fonctionnement → *vérification 3.* R контроль функционирования. D Funktionsprüfung. E verificación de funcionamiento. I verifica di funzionamento. N functionele controle. P sprawdzenie działania (ponaprawcze). S funktionskontroll. (191)

cheese

1. **cheese antenna** : → *antenna 27*

chemical

1. **chemical dosemeter** : → *dosemeter 2*
2. **(chemical or electrochemical) diffusion** : → *diffusion 1*
3. **chemical vapour deposition technique** : → *technique 4*

chemiluminescence

1. **chemiluminescence** : luminescence caused by energy released by a chemical reaction. ★ chimiluminescence → *chimiluminescence 1.* R хемилюминесценция. D Chemilumineszenz. E quemiluminiscencia. I chemiluminescenza. N chemiluminescentie. P chemiluminescencja. S kemisk luminiscens. (845)

chimney

1. **chimney (of a foundation)** (*Syn.* pier (of a foundation) (USA)) : the narrow portion of a foundation in which the stub is embedded (see fig. 4.5). ★ cheminée (d'une fondation) → *cheminée 3.* R стойка (фундамента). D Schaft (einer Gründung). E pilar (de una cimentación). I pilastrino (di una fondazione). N poer (van een fundament). P obelisk (fundamentu). S plint. (466)
2. **cleat (in a pad and chimney foundation)** : → *cleat 1*
3. **pad and chimney foundation** : → *foundation 6*
4. **reinforcing rods (in a pad and chimney foundation)** : → *rod 13*

chip

1. **chip** (*Syn.* swarf) : the material removed from the disk by the recording stylus while cutting the groove. ★ copeau → *copeau 1.* R стружка. D Schneidspan. E viruta. I truciolo. N spaan. P wiór. S spån. (806)

Chireix-Mesny

1. **Chireix-Mesny antenna** : → *antenna 28*

chirping

1. **chirping** : a rapid change in the wavelengths of the spectral lines emitted from an optical source. *Note.* —Chirping is most often observed in pulsed operation of a source. ★ fluctuation de longueur d'onde → *fluctuation 3.* R флуктуация длины волны. D Laserzirpen. E fluctuación (de longitudes de onda). I fluttuazione istantanea di frequenza. N lasergolflengte-variatie ten gevolge van modulatie. P migotanie (prążków) widma. S våglängdsskift. (731)

chlorine

1. **hydrolyzable chlorine** (in askarels) : the total amount of hydrolyzable chlorine compounds formed in askarels after a specified alkaline treatment. ★ chlore hydrolysable → *chlore 1.* R гидролизующиеся хлориды (в аскарелях). D hydrolysierbares Chlor (in Askarelen). E cloro hidrolizable (en askareles). I cloro idrolizzabile (nell' askarel). N hydrolyseerbare chloriden (in askarel). P związki chlorków ulegające hydrolizie (w askarelach). S hydrolysbart klor. (212)

choice

1. **first choice circuit group** : → *group 10*
2. **first choice circuit group** : → *group 11*
3. **first choice route** (*Syn.* primary route) : → *route 5*
4. **last choice circuit group** : → *group 43*

choke

1. **choke** : an impedance transforming device for preventing energy within a given frequency band from taking an undesired path. ★ piège → *piège 4.* R дроссель. D Drossel. E choque. I dispositivo di blocco. N smoorgroef. P dławik. S vågspärr. (726)
2. **choke flange** : → *flange 1*
3. **choke joint** : → *joint 4*
4. **choke piston** : → *piston 2*
5. **choke plunger** (*Syn.* choke piston) : → *piston 2*
6. **quarter-wave choke** : a device which interrupts the flow of current along a conductor, such as an antenna support, and consists of another conductor about a quarter-wave in length parallel to the first and connected to it at one end to form a short circuited transmission line. *Note.* — The quarter-wave choke may consist of a sleeve surrounding the conductor. ★ blocage quart d'onde → *blocage 7.* R четвертьволновый дроссель. D Viertelwellensperre. E bloqueo de cuarto de onda. I isolatore in quarto d'onda. N kwartgolfspruit. P dławik ćwierćfalowy. S kvartvågsspärr. (712)

chopped

1. **chopped lightning impulse** : → *impulse 1*
2. **impulse chopped on the front** : → *impulse 7*
3. **impulse chopped on the tail** : → *impulse 8*

chopper

1. **chopper** : a d.c. electronic power convertor without an intermediate a.c. link giving a variable output voltage by varying the periods of conduction and non-conduction in adjustable ratio. ★ hacheur (de courant) → *hacheur 3.* R импульсный преобразователь. D Gleichstromsteller; Chopper. E interruptor pulsatorio. I frazionatore. N chopper; directe gelijkstroomomzetter. P przekształtnik impulsowy prądu stałego; przerywacz. S chopper. (811)
2. **chopper amplifier** : → *amplifier 8*
3. **chopper bar** (*Syn.* writing bar) : → *bar 13*
4. **chopper control** (*Syn.* pulse control) : → *control 146*
5. **chopper control** : → *control 30*
6. **d.c. chopper convertor** (*Syn.* direct d.c. convertor) : → *convertor 14*

chopping

1. **time to chopping** : → *time 204*

chordal

1. **chordal hop** : → *hop 1*

chroma

1. **chroma** : chromaticness, colourfulness, of an area judged as a proportion of the brightness of a similarly illuminated area that appears white or highly transmitting. *Note.* — For given viewing conditions and at luminance levels within the range of photopic vision, a colour stimulus perceived as a related colour, of a given chromaticity and from a surface having a given luminance factor, exhibits approximately constant chroma for all levels of illuminance except when the brightness is very high. In the same circumstances, at a given level of illuminance, if the luminance factor is increased, the chroma usually increases. ★ chroma → *chroma 1.* R насыщенность. D Buntheit. E croma. I croma. N kleurwaarde. P chroma. S kulörthet. (845)

chromakey

1. **chromakey** (*Syn.* colour separation overlay) : overlay in which masking is controlled by a signal representing the parts of an image which have a specific colour, for example, a uniformly coloured background. ★ incrustation-couleur → *incrustation-couleur 1.* R цветовая рирпроекция. (723)
2. **downstream chromakey** : chromakey operation carried out on the colour picture signal after leaving its place of origin, or subsequent to the creation of the original picture or recording. ★ incrustation aval → *incrustation 2.* R последующая цветовая рирпроекция. (723)

chromatic

1. **chromatic aberration** : → *aberration 1*
2. **chromatic adaptation** : → *adaptation 3*
3. **chromatic dispersion** (*Syn.* dispersion) : → *dispersion 3*
4. **chromatic distortion** (*Syn.* intramodal distortion) : → *distortion 49*
5. **chromatic (perceived) colour** : → *colour 5*
6. **chromatic space** : → *space 1*
7. **chromatic stimulus** : → *stimulus 3*

chromaticity

1. **chromaticity** : property of a colour stimulus defined by its chromaticity coordinates, or by its dominant or complementary wavelength and purity taken together. ★ chromaticité → *chromaticité 1.* R цветность. D Farbart. E cromaticidad. I cromaticità. N kleursoort. P chromatyczność. S kromacitet. (723,845)
2. **chromaticity coordinates** : → *coordinates 1*
3. **chromaticity diagram** : → *diagram 3*
4. **chromaticity diagram** : → *diagram 4*
5. **spectral chromaticity coordinates** : → *coordinates 2*

chromaticness

1. **chromaticness** (*Syn.* colourfulness) : attribute of a visual sensation according to which the perceived colour of an area appears to be more or less chromatic. *Notes. 1* — For a colour stimulus of a given chromaticity and, in the case of related colours, of a given luminance factor, this attribute usually increases as the luminance is raised except when the brightness is very high. *2* — Formerly, "chromaticness" denoted the combined perceptions of hue and saturation, i.e., the perceptual correlate of chromaticity. ★ chromie → *chromie 1.* R ощущение цветности. D ..... E cromacidad; colorido. I predominanza di colore. N kleurigheid. P barwność. S kulörthet. (845)

chrominance

1. **chrominance axis** : → *axis 3*

2. **chrominance components** : → *component 6*
3. **chrominance path** : → *path 1*
4. **chrominance signal** : → *signal 46*
5. **chrominance subcarrier** (*Syn.* colour subcarrier) : → *subcarrier 2*
6. **chrominance (vector)** : that vector which, in a chromatic space and in a plane of constant luminance, has its origin on the luminance axis and its extremity on the axis representing the coloured radiation. ★ (vecteur) chrominance → *chrominance 5.* R вектор цветностей. (723)

chrominance-luminance

1. **chrominance-luminance delay inequality** : → *inequality 1*

chronic

1. **chronic irradiation** : → *irradiation 2*

chronology

1. **absolute chronology** (*Syn.* time tagging) : method of transmission of changes-of-state so that transmitted information is accompanied by data giving the registered time at which the changes occurred, within the time resolution. ★ transmission chronologique absolue → *transmission 72.* R абсолютная хронология; метка времени. D Absolutzeiterfassung. E cronología absoluta. I cronologia assoluta; attribuzione del tempo. N chronologische transmissie. P transmisja o chronologii bezwzględnej. S tidmarkering. (371)
2. **centralised absolute chronology** : transmission of changes of state information with absolute chronology from different locations containing synchronized clocks. *Note.* — The resulting accuracy specification has to consider separating capability, absolute chronology, and clock synchronization errors. ★ chronologie absolue centralisée → *chronologie 2.* R централизованная абсолютная хронология. D Zeiterfassung mit zentral geführter Absolutzeit. E cronología absoluta centralizada. I cronologia assoluta centralizzata. N centraal-chronologische transmissie. P chronologia bezwzględna centralizowana. S centraliserad (absolut)tidmätning. (371)
3. **limit of accuracy of chronology** (*Syn.* time resolution) : → *resolution 9*

chuck

1. **vacuum chuck turntable** : → *turntable 2*

chute

1. **arc chute** : a chamber into which the arc is transferred to assist in its extinction. ★ boîte de soufflage → *boîte 9.* R дугогасительная камера. D Lichtbogenkammer. E cámara de soplado. I camera d'arco. N boogkamer. P komora łukowa. S ljusbågsskärm; ljusbågsskärm. (441)
2. **chute** : an arrangement which allows charging or discharging by the material's own weight, generally in the form of an open sloping channel. ★ goulotte → *goulotte 1.* R желоб. D Beschickungsrinne. E canaleta (de carga o de descarga). I scivolo (di caricamento of di scarico). N valgoot. P rynna wsadowa. S chargeringsränna; slas. (841)

cigar

1. **cigar antenna** : → *antenna 29*

cinching

1. **cinching** : a non-uniform winding of the magnetic tape on a spool which may be caused, for example, by a longitudinal layer to layer slippage. ★ glissement des spires → *glissement 9.* R затяжка. D stufenförmiger Bandwickel, Cinch, Fensterbildung im Bandwickel. E deslizamiento de las espiras. I slittamento delle spire. N onregelmatig opwikkelen. P nierównomierność nawoju. S ..... (806)

cineradiography

1. **cineradiography** : the making of motion pictures by photographing the output of an image intensifier. ★ radiocinématographie → *radiocinématographie 1.* R кинорадиография. D Röntgen-Bildverstärker-Kinematographie. E radiocinematografía; cinematografía de rayos X. I cineradiografia. N röntgenbeeldverfilming. P kineradiografia. S röntgenkinematografi. (881)

circle

1. **arc furnace electrode pitch circle diameter** : → *pitch 1*
2. **circle diagram** : → *diagram 7*
3. **four concentric circle near-field template** : → *template 1*
4. **four concentric circle refractive index template** : → *template 2*

circuit

1. **associated electrical apparatus** : → *apparatus 3*
2. **asymmetric (characteristic circuit) element** : → *element 3*
3. **audio-communication circuit** : a circuit for sound communication, particularly by microphones and loudspeakers. ★ circuit électroacoustique → *circuit 65.* R цепь радиосвязи. D Lautsprecherstromkreis. E circuito electroacústico. I circuito di diffusione sonora. N omroepstroomkring. P obwód nagłośnieniowy. S kommunikationskrets. (811)
4. **auxiliary circuit** (of an assembly) : all the conductive parts of an assembly of switchgear and controlgear included in a circuit (other than the main circuit) intended to control, measure, signal and regulate. *Note.* — The auxiliary circuits of an assembly include the control and auxiliary circuits of the switching devices. ★ circuit auxiliaire → *circuit 10.* R вспомогательная цепь (комплекта). D Hilfsstromkreis. E circuito auxiliar (de un conjunto). I circuito ausiliario (di un complesso). N hulpstroombaan (van een inrichting). P obwód pomocniczy (rozdzielnicy); tor pomocniczy (rosdzielnicy). S hjälpströmbana. (441)
5. **auxiliary circuit** (of a switching device) : all the conductive parts of a switching device which are intended to be included in a circuit other than the main circuit and the control circuits of the device. *Note.* — Some auxiliary circuits fulfil supplementary functions such as signalling, interlocking, etc., and, as such, they may be part of the control circuit of another switching device. ★ circuit auxiliaire → *circuit 11.* R вспомогательная цепь (коммутационного аппарата). D Hilfsstromkreis (eines Schaltgerätes). E circuito auxiliar (de un aparato de conexión). I circuito ausiliario (di un apparecchio di manovra). N hulpstroombaan (van een schakeltoestel). P obwód pomocniczy (łącznika); tory pomocnicze (łącznika). S hjälpströmbana. (441)
6. **auxiliary circuit** : the whole of the electrical parts within a relay (including those parts, if any, intentionnally coupled by inductive or capacitive means) and which are connected to those terminals to which a given auxiliary energizing quantity is applied. ★ circuit auxiliaire → *circuit 12.* R вспомогательная цепь. D Hilfs(strom)kreis. E circuito auxiliar. I circuito ausiliario. N hulpschakeling. P obwód pomocniczy. S hjälpkrets. (446)
7. **auxiliary circuit** : a circuit carrying the current of the auxiliaries such as the compressors and fans. ★ circuit des auxiliaires → *circuit 54.* R вспомогательная цепь. D Hilfsstromkreis. E circuito de los (aparatos) auxiliares. I circuito ausiliario. N hulpstroomkring. P obwody pomocnicze. S hjälpkraftkrets. (811)
8. **balanced metallic circuit** : a circuit, between two points, composed of a pair of metallic conductors and associated terminations, with the whole ideally having equal impedances from each conductor to earth and to other circuits. ★ circuit symétrique → *circuit 105.* R симметричная металлическая цепь. D abgeglichener metallischer Stromkreis. E circuito simétrico; circuito equilibrado. I circuito metallico bilanciato; linea bilanciata. N gebalanceerde metallische stroomkring; gebalanceerde transmissielijn. P tor przewodowy symetryczny. S balanserad dubbelledning. (704)
9. **battery circuit** : a circuit, usually low voltage, carrying the current of a battery and any charging arrangements on the vehicle. ★ circuit de batterie → *circuit 20.* R цепь питания от аккумулятора. D Batteriestromkreis. E circuito de batería. I circuito di batteria. N accubatterijstroomkring. P obwody baterii (akumulatorów). S batterikrets. (811)
10. **bistable circuit** (*Syn.* bistable trigger circuit) : → *circuit 11*
11. **bistable trigger circuit** (*Syn.* bistable latch; bistable circuit) : a trigger circuit that has two stable states. *Note.* — The term "flip-flop" has been used in the USA with the meaning "bistable circuit" and in the United-Kingdom with the meaning "monostable circuit", to avoid confusion, it is strongly deprecated with any meaning. ★ bascule bistable

→ *bascule 2.* R двухстабильный триггер. D bistabile Triggerschaltung; bistabiler Multivibrator; bistabile Schaltung. E circuito biestable. I circuito bistabile. N bistabiele (trekker)schakeling. P przerzutnik bistabilny. S bistabil krets; bistabil vippa. (702)

12. **both-way circuit** (*Syn.* two-way circuit) : for a given exchange, a traffic circuit which can be used for either incoming or outgoing traffic. ★ circuit à double sens → *circuit 6.* D wechselseitig gerichtete Leitung. P łącze obukierunkowe. (715)
13. **braking circuit** : a circuit carrying the electric braking current, including the machines involved in its generation. ★ circuit de freinage → *circuit 34.* R тормозная цепь. D Bremsstromkreis. E circuito de frenado. I circuito di frenatura. N remstroomkring. P obwód hamowania. S elbromskrets. (811)
14. **circuit angle** : → *angle 17*
15. **circuit crest working off-state voltage** : → *voltage 23*
16. **circuit crest working reverse voltage** : → *voltage 24*
17. **circuit group** : → *group 3*
18. **circuit insulation voltage** : → *voltage 25*
19. **(circuit) local back-up protection** : → *protection 10*
20. **circuit non-repetitive peak off-state voltage** : → *voltage 26*
21. **circuit non-repetitive peak reverse voltage** : → *voltage 27*
22. **circuit number** : → *number 6*
23. **circuit (of an overhead line)** : a conductor or system of conductors through which an electric current is intended to flow. ★ circuit (d'une ligne aérienne) → *circuit 59.* R цепь. D Stromkreis; elektrisches System. E circuito. I circuito (di una linea aerea). N circuit. P tor. S ..... (466)
24. **circuit off-state interval** : → *interval 2*
25. **circuit repetitive peak off-state voltage** : → *voltage 28*
26. **circuit repetitive peak reverse voltage** : → *voltage 29*
27. **circuit reverse blocking interval** : → *interval 3*
28. **circuit subgroup** : → *subgroup 1*
29. **circuit switched connection** : → *connection 12*
30. **circuit switched network** : → *network 13*
31. **circuit switching** : → *switching 10*
32. **circuit switching exchange** : → *exchange 2*
33. **circuit switching unit** : → *unit 13*
34. **circuit tracing** : → *tracing 2*
35. **(circuit) valve** : → *valve 4*
36. **clean feed circuit** : a circuit by means of which the personnel at one of the sound programme sources can hear the complete programme except for their own contribution. ★ retour d'écoute → *retour 26.* R ..... (723)
37. **closed circuit transition auto-transformer starting** (*Syn.* closed transition auto-transformer starting) : → *starting 6*
38. **closing time of a output-break circuit** : → *time 26*
39. **closing time of a output-make circuit** : → *time 27*
40. **combinatorial circuit** : a device for effecting logic operations such that at each output one and only one value corresponds to each possible combination of simultaneous input values. ★ circuit combinatoire → *circuit 16.* R комбинаторная схема. D Kombinationsschaltung. E circuito combinatorio. I circuito combinatorio. N combinatorische schakeling. P układ kombinacyjny (logiczny). S kombinationskrets. (702)
41. **communications circuit** (*Syn.* talk-back circuit) : → *circuit 175*
42. **commutation circuit** : the circuit consisting of the two commutating arms and the commutating voltage source. ★ circuit de commutation → *circuit 26.* R контур коммутации. D Kommutierungskreis. E circuito de conmutación. I circuito di commutazione. N commutatiestroomkring. P obwód komutacyjny. S kommuteringskrets. (551)
43. **contact circuit** : an output circuit made by means of a contact assembly. ★ circuit de contact → *circuit 27.* R цепь контакта. D Kontaktkreis. E circuito de contacto. I circuito di contatto. N contactschakeling. P obwód zestyku. S kontaktkrets. (446)
44. **contribution circuit** (*Syn.* contribution link) : → *link 5*
45. **control circuit** (of a switching device) : all the conductive parts (other than the main circuit) of a switching device which are included in a circuit used for the closing operation or opening operation, or both, of the device. ★ circuit de commande → *circuit 24.* R цепь управления (коммутационного аппарата). D Steuerstromkreis (eines Schaltgerätes). E circuito de mando (de un aparato de conexión). I circuito di comando (di un apparecchio di manovra). N stuurstroombaan (van een schakeltoestel). P obwód sterowniczy (łącznika); tory sterownicze (łącznika). S manöverströmbana. (441)
46. **control circuit** : a circuit used to actuate the power or auxiliary equipment. ★ circuit de commande → *circuit 25.* R цепь управления. D Steuerstromkreis. E circuito de control. I circuito di comando. N stuurstroomkring. P obwody sterownicze. S manöverströmkrets. (811)
47. **cord circuit** : a connecting circuit used at switchboard positions to establish connections. ★ cordon → *cordon 2.* R шнуровой комплект. D Schnur-Stromkreis. E cordón (de conexión). I circuito di cordone. N koord. P obwód sznurowy. S snörlinje. (714)
48. **current circuit** (of a measuring instrument) : a circuit of a measuring instrument through which flows the current of the circuit to which the measuring instrument is connected. *Note.* — It may be the current directly involved in the measurement or a proportional current supplied by an external current transformer or derived from an external shunt. ★ circuit de courant → *circuit 30.* R цепь тока (измерительного прибора). D Strompfad (eines Messgerätes). E circuito de intensidad (de un aparato de medida); circuito de corriente (de un aparato de medida). I circuito di corrente. N stroomketen (van een meetinstrument). P tor prądowy (przyrządu pomiarowego). S strömkrets. (302)
49. **data circuit** : a combination of two data channels permitting transmission in both directions between two points. ★ circuit de données → *circuit 33.* R (двусторонний) канал данных. D Datenleitung. E circuito de datos. I circuito dati. N data circuit. P obwód teledacyjny. S dataförbindelse. (721)
50. **data circuit terminating equipment** : → *equipment 19*
51. **decision circuit** (for a digital signal) : a circuit that decides the probable value of a signal element of a received digital signal. ★ circuit de décision → *circuit 31.* R решающая схема (для цифрового сигнала). D Entscheidungsschaltung (für ein Digitalsignal). E circuito de decisión (en transmisión numérica). I circuito di decisione (per un segnale numerico). N besluitschakeling (voor een digitaal signaal). P układ decyzyjny (dla sygnału cyfrowego). S beslutskrets. (704)
52. **dedicated circuit** (in telegraphy and data transmission) (*Syn.* leased circuit) : a telegraph link or data link established permanently without the use of switching facilities and dedicated to the exclusive use of a set of terminals. ★ liaison spécialisée → *liaison 31.* R арендованный канал (в телеграфии и передаче данных). D überlassene Leitung; Mietleitung; festgeschaltete Leitung. E circuito dedicado; conexión especializada; cicuito alquilado. I linea dedicata. N huurlijn. P łącze trwałe (w telegrafii i teledacji). S hyrd ledning. (721)
53. **degaussing circuit** (in colour television) : circuit for minimising the residual magnetism of the internal structure of the colour display device and surrounding metal objects, or effects due to the Earth's magnetic field. ★ dispositif de démagnétisation → *dispositif 48.* R размагничивающее устройство. (723)
54. **differentiating circuit** (*Syn.* differentiator) : → *differentiator 1*
55. **distributed circuit** : a circuit that can be represented by a combination of an infinite number of ideal elements. ★ circuit à constantes réparties → *circuit 4.* R цепь с распределенными параметрами. D Schaltung aus örtlich (lokal) verteilten idealen Elementen. E circuito de constantes repartidas. I circuito con parametri distribuiti. N schakeling (netwerk) bestaande uit verdeelde elementen. P układ lity; układ o parametrach rozłożonych. S krets med fördelade element. (131)
56. **distribution circuit** (*Syn.* distribution link) : → *link 11*
57. **distribution circuit** (of buildings) : a circuit supplying a distribution board. ★ circuit de distribution → *circuit 32.* R питающая сеть (здания). D Verteilungsstromkreis (eines Gebäudes). E circuito de distribución (de edificios). I circuito di distribuzione. N groep. P linia zasilająca wewnętrzna. S huvudledning. (826)

58. **double circuit line** : → *line 28*

59. **double circuit semi-vertical configuration** : → *configuration 6*

60. **double circuit vertical configuration** : → *configuration 7*

61. **double phantom circuit** : a superposed circuit derived from the conductors of two phantom circuits, with the four conductors of each phantom circuit effectively being used in parallel. ★ circuit superfantôme → *circuit 102.* R суперфантомная цепь. D Doppel-Phantom-Stromkreis. E circuito superfantasma. I circuito super-virtuale. N dubbele fantoom schakeling. P tor wtórnie pochodny. S superfantomledning. (704,721)

62. **earth circuit connector** : → *connector 20*

63. **earth-return circuit** : a circuit, between two points, obtained by using a single metallic conductor, or a number of metallic conductors in parallel, with return through the earth or the sea between these points. ★ circuit à retour par la terre → *circuit 8.* R цепьсвозвратом тока через землю; однопроводная цепь. D Stromkreis mit der Erde als Rückführung. E circuito con retorno por tierra. I circuito con ritorno a terra. N stroomkring met retouraarde. P tor współziemny. S enkelledning. (704)

64. **earth-return double phantom circuit** : an additional earth-return circuit derived from two pairs of metallic conductors used in parallel. ★ circuit fantôme approprié → *circuit 70.* R двойная фантомная цепь с возвратом через землю. D Doppelphantomkreis mit Erdrückleitung. E circuito apropiado fantasma. I circuito supervirtuale con ritorno a massa. N dubbelfantoomcircuit met aarde als retour. P tor pochodny współziemny drugiego rzędu. S dubbelfantomjord(förbindelse). (721)

65. **earth-return phantom circuit** : an additional circuit derived from the conductors of a metallic circuit, with these two conductors effectively being used in parallel, and with return through the earth or the sea between the end points. *Example :* A telegraph circuit superposed on a telephone circuit, with earth-return. ★ circuit approprié → *circuit 9.* R фантомная цепь с возвратом через землю. D Erdphantomkreis. E circuito apropiado. I circuito virtuale con ritorno a massa. N aardfantoomcircuit. P tor pochodny współziemny. S fantomjord(förbindelse). (704,721)

66. **effectively conducting output circuit** (for relays without output contacts) : an output circuit without contacts which has a resistance lower than a specified value. ★ état passant d'un circuit de sortie → *état 50.* R проводящее состояние выходной цепи (для реле без выходного контакта). D durchgeschalteter Ausgangskreis (eines Relais ohne Ausgangskontakt). E estado de conducción efectiva de un circuito de salida (para un relé sin contacto de salida). I stato di passaggio di un circuito di contatto (per un relè senza contatto di uscita). N maximale uitgangsimpedantie (voor contactloze relais). P stan przewodzenia (przekaz'nika o wyjs'ciu bezstykowym). S effektivt ledande utgångskrets (för reläer utan utgångskontakter). (446)

67. **effectively non-conducting output circuit** (for relays without output contacts) : an output circuit without contacts which has a resistance higher than a specified value. ★ état bloqué d'un circuit de sortie → *état 9.* R блокирующее состояние выходной цепи (для реле без выходного контакта). D gesperrter Ausgangskreis (eines Relais ohne Ausgangskontakt). E estado de bloqueo efectivo de un circuito de salida (para un relé sin contacto de salida). I stato di blocco di un circuito di contatto (per un relè senza contatto di uscita). N minimale uitgangsimpedantie (voor contactloze relais). P stan nieprzewodzenia (przekaźnika o wyjściu bezstykowym). S effektivt icke-ledande utgångskrets (för reläer utan utgångskontakter). (446)

68. **electric circuit** : an arrangement of devices or media through which electric current can flow. ★ circuit électrique → *circuit 60.* R электрическая цепь. D elektrischer Stromkreis. E circuito eléctrico. I circuito elettrico. N elektrische schakeling; elektrisch netwerk. P układ (elektryczny). S strömbana; strömkrets. (131,702)

69. **(electrical) circuit** (of an installation) : an assembly of electrical equipment of the installation supplied from the same origin and protected against overcurrents by the same protective device(s). ★ circuit (électrique) → *circuit 61.* R (электрическая) цепь (установки). D (elektrischer) Stromkreis (einer Anlage). E circuito (eléctrico)(de una instalación). I circuito (elettrico) (di un impianto). N stroomketen. P obwód. S elkrets (i en installation). (826)

70. **electro-pneumatic brake circuit** : a circuit for control of the air brake by electro-pneumatic valves and other electrically actuated components. ★ circuit électrique du frein pneumatique → *circuit 62.* R схема электропневматического тормоза. D Steuerstromkreis für pneumatische Bremse. E circuito eléctrico de freno neumático. I circuito del freno elettropneumatico. N elektropneumatische remstroomkring. P obwód sterowniczy hamulców elektropneumatycznych. S elpneumatisk bromskrets. (811)

71. **element of a polyphase circuit** : → *element 18*

72. **equivalent circuit** (of a piezoelectric resonator) : the electrical circuit which has the same impedance as a piezoelectric resonator in the immediate neighbourhood of resonance. *Note.* — It consists of series elements L_1, C_1, R_1, in parallel with C_0 where L_1, C_1, R_1 represent the motional inductance, capacitance and resistance respectively and C_0, the shunt capacitance. ★ circuit équivalent → *circuit 68.* R эквивалентная схема (пьезоэлектрического резонатора). D Ersatzschaltung (eines piezoelektrischen Resonators). E circuito equivalente (de un resonador piezoeléctrico). I circuito equivalente (di un risuonatore piezoelettrico). N vervangingsschema. P układ zastępczy (elektryczny) (rezonatora piezoelektrycznego). S ekvivalent krets. (561)

73. **equivalent electric circuit** : a model to describe the behaviour of a circuit by means of a network of ideal elements. ★ circuit électrique équivalent → *circuit 63.* R эквивалентная электрическая схема. D äquivalenter elektrischer Stromkreis; Ersatzschaltung. E circuito eléctrico equivalente. I circuito elettrico equivalente. N vervangingsschakeling. P układ (elektryczny) zastępczy. S ekvivalent (elektrisk) krets. (131)

74. **equivalent random circuit group** : → *group 8*

75. **essential auxiliary circuits** : those a.c. auxiliary circuits within a substation which are supplied even during a loss of system supply, for example from a stand-by generator. ★ circuits auxiliaires secourus → *circuit 113.* R вспомогательные цепи с резервным питанием. D gesicherter Eigenbedarf. E circuitos auxiliares socorridos. I circuiti ausiliari essenziali. N ..... P obwody potrzeb własnych prądu przemiennego ważne. S favoriserade system. (605)

76. **fall back circuit** (*Syn.* nominated reserved circuit) : → *circuit 124*

77. **final circuit** (of buildings) : a circuit connected directly to current using equipment or to socket-outlets. ★ circuit terminal → *circuit 109.* R распределительная цепь (здания). D Endstromkreis (eines Gebäudes). E circuito terminal (de edificios). I circuito terminale. N eindgroep. P przyłącze (budynku). S gruppledning. (826)

78. **final circuit group** : → *group 9*

79. **first choice circuit group** : → *group 10*

80. **first choice circuit group** : → *group 11*

81. **flywheel synchronization circuit** : a form of synchronisation circuit in the television receiver in which the scanning circuits continue to operate at the system line frequency even during a short duration disturbance of the line synchronizing signal. ★ circuit-volant → *circuit-volant 1.* R инерционная схема синхронизации. (723)

82. **four-wire circuit** (*Syn.* 4-wire circuit) : a telecommunication circuit that provides four-wire transmission. *Notes. 1* — An example of a four-wire circuit is one formed from two pairs of metallic conductors arranged as two channels, one in each direction. *2* — Certain types of four-wire circuit, such as frequency separation of go and return channels over the same pair, were formerly known as four-wire type circuits. The term "four-wire type circuit" is deprecated. ★ circuit à quatre fils → *circuit 7.* R четырехпроводный двусторонний канал. D Vierdraht-Stromkreis; 4-Draht-Stromkreis. E circuito con cuatro hilos. I circuito a quattro fili. N ..... P łącze dwutorowe. S fyrtrådsförbindelse. (704)

83. **free circuit condition** : → *condition 9*

84. **fully provided circuit group** : → *group 12*

85. **heating circuit** : a circuit carrying the current for heating motor and trailer vehicles. ★ circuit de chauffage → *circuit 23.* R отопительная цепь. D Heizstromkreis. E circuito de calefacción. I circuito di riscaldamento. N verwarmingsstroomkring. P obwody ogrzewania. S tågvärmekrets. (811)

86. **high usage circuit group** : → *group 42*

87. **high voltage circuit** : a circuit carrying current at contact line voltage. ★ circuit haute tension → *circuit 72.* R цепь

высокого напряжения. D Hochspannungskreis. E circuito alta tensión. I circuito ad alta tensione. N hoogspanningskring. P obwód wysokiego napięcia. S högspänningskrets. (811)

88. idle circuit condition : → *condition 11*

89. incoming circuit : for a given exchange, a traffic circuit which can be used only for incoming traffic. ★ circuit entrant → *circuit 66.* D ankommende Leitung. P łącze przychodzące. (715)

90. indicating circuit (*Syn.* monitoring circuit) : a circuit transmitting a signal indicating or recording whether a particular operating condition exists or not, for example a signal indicating a failure in the electrical equipment. ★ circuit de signalisation et de surveillance → *circuit 43.* R цепь сигнальных устройств. D Melde-/Überwachungsstromkreis. E circuito de señalización y vigilancia. I circuito di segnalazione e controllo. N signaleringsstroomkring. P obwody sygnalizacyjne i kontrolne. S indikeringskrets. (811)

91. (inductive) coupling factor of two circuits : → *factor 92*

92. input circuit : the whole of the electrical parts within a relay (including those parts, if any, intentionnaly coupled by inductive or capacitive means) and which are connected to those terminals to which a given input energizing quantity is applied. ★ circuit d'entrée → *circuit d'entrée 1.* R входная цепь. D Eingangs(strom)kreis. E circuito de entrada. I circuito d'entrata. N ingangsschakeling. P obwód wejściowy. S ingångskrets. (446)

93. instrument circuit : a circuit terminating in electrical measuring or recording apparatus fitted principally in the driver's cab. ★ circuit de mesure → *circuit 36.* R измерительная цепь. D Meßstromkreis. E circuito de medida. I circuito di misura. N meetstroomkring. P obwody pomiarowe. S instrumentkrets. (811)

94. integrated optical circuit (*Syn.* IOC (abbreviation)) : a circuit, either monolithic or hybrid, composed of active and passive electrical, optical and/or opto-electronic elements used for signal processing functions. ★ circuit intégré optique → *circuit intégré 6.* R интегральная оптическая схема. D integrierter optischer Schaltkreis; IOC (Abkürzung). E circuito integrado óptico; IOC (abreviatura). I circuito ottico integrato. N geïntegreerde optische schakeling. P układ optyczny scalony. S integrerad optokrets. (731)

95. integrating circuit (*Syn.* integrator) : → *integrator 2*

96. intercontinental circuit : a circuit connecting two exchanges situated in different countries in different continents. ★ circuit intercontinental → *circuit 75.* R межконтинентальный канал. D interkontinentale Leitung. E circuito intercontinental. I circuito intercontinentale. N intercontinentale verbinding. P łącze międzykontynentalne. S interkontinental ledning. (721)

97. interface circuit (in switching) : a device, in general allocated individually to a traffic circuit, and including means for carrying out certain control and/or supervisory functions. ★ joncteur → *joncteur 1.* R пелейный комплект (в коммутации). D Uebertragungssatz. E circuito interfase (en conmutación). I giuntore; adattatore; ripetitore. N overdrager. P zespół przekaźnikowy (w komutacji). S gränssnitt. (714)

98. interlock circuit : a circuit linking mechanical, electrical or other devices, for example through auxiliary contacts, intended to make the operation of a piece of apparatus dependent on the condition or position of one or more others. ★ circuit d'asservissement → *circuit 19.* R цепь блокировки. D Verriegelungsstromkreis. E circuito de enclavamiento. I circuito di blocco. N vergrendelingsstroomkring. P obwody uzależnień (działania). S förreglingskrets. (811)

99. international circuit : a circuit directly connecting two exchanges situated in different countries. ★ circuit international → *circuit 76.* R международный канал. D internationale Leitung. E circuito internacional. I circuito internazionale. N internationale verbinding. P łącze międzynarodowe. S internationell ledning. (721)

100. intrinsically-safe circuit : a circuit in which any spark or thermal effect produced either normally or in specified fault conditions is incapable, in the specified test conditions, of causing ignition of a given gas or vapour. *Note.* — IEC Publication 79-11 specifies the test conditions for these circuits. ★ circuit de sécurité intrinsèque → *circuit 42.* R искробезопасная электрическая цепь. D eigensicherer Stromkreis. E circuito de seguridad intrı nseca. I circuito a sicurezza intrinseca. N intrinsiek veilige stroomkring. P obwód iskrobezpieczny. S egensäker strömkrets. (426)

101. last choice circuit group : → *group 43*

102. leased circuit (*Syn.* dedicated circuit) : → *circuit 52*

103. leased circuit (*Syn.* private wire (telephone) circuit) : → *circuit 146*

104. lighting circuit : a circuit carrying the current for lighting the inside and outside of powered and trailing vehicles. ★ circuit d'éclairage → *circuit 53.* R осветительная цепь. D Beleuchtungsstromkreis. E circuito de iluminación. I circuito d'illuminazione. N verlichtingsstroomkring. P obwody oświetlenia. S belysningskrets. (811)

105. limiting continuous current of an output circuit : → *current 117*

106. limiting short-time current of an output circuit : → *current 119*

107. line circuit : a functional unit associated with a traffic circuit and able to receive and respond to control signals according to the conditions of that circuit. ★ organe de ligne → *organe 2.* R линейное устройство; линейное оборудование. D Leitungssatz; Teilnehmerschaltung. E circuito de línea; equipo de línea. I dispositivo di linea; circuito di linea. N lijncircuit. P zespół liniowy. S linjekrets. (714)

108. (local line) network with link circuit : → *network 40*

109. local (telephone) circuit : the combination of subscriber's station, subscriber's line and feeding bridge if existing. *Note.* — This term is used in the context of transmission planning and performance. ★ système (téléphonique) local → *système 131.* R местная (телефонная) система. D Teilnehmersystem. E sistema (telefónico) local. I sistema d'utente. N lokaal systeem. P układ miejscowy. S lokalkrets. (722)

110. logic circuit : a circuit the input and output signals of which represent logic states, i.e. quantities which may assume one value of a finite set of discrete values. *Note.* — A logic circuit may include logic gates and elements of sequential circuits such as delay and storage elements. ★ circuit logique → *circuit 78.* R логическая схема. D logische Schaltung. E circuito lógico. I circuito logico. N logische schakeling. P układ logiczny. S logikkrets. (702)

111. low voltage circuit : a circuit carrying current at a voltage significantly less than voltage of the contact line and supplied by a battery, a convertor or a transformer. ★ circuit basse tension → *circuit 13.* R цепь низкого напряжения. D Niederspannungskreis. E circuito baja tensión. I circuito a bassa tensione. N laagspanningskring. P obwód niskiego napięcia. S lågspänningskrets. (811)

112. lumped circuit : a circuit that can be represented by a combination of a finite number of ideal elements. ★ circuit à constantes localisées → *circuit 3.* R цепь с сосредоточенными параметрами. D Schaltung aus konzentrierten idealen Elementen. E circuito de constantes localizadas. I circuito con parametri concentrati. N schakeling (netwerk) bestaande uit geconcentreerde elementen. P układ ziarnisty; układ o parametrach skupionych. S krets med koncentrerade element. (131)

113. magnetic circuit : a combination of media through which a magnetic flux is channelled in a given region. ★ circuit magnétique → *circuit 79.* R магнитная цепь. D magnetischer Kreis. E circuito magnético. I circuito magnetico. N magnetisch circuit. P magnetowód. S magnetisk krets. (131)

114. magnetic circuit (of a transformer) : an assembly comprising yokes, cores and poles, often laminated, carrying the magnetic flux of a transformer. ★ circuit magnétique → *circuit 80.* R магнитная система (трансформатора). D Magnetkreis. E circuito magnético (de un transformador). I circuito magnetico (d'un trasformatore). N magnetisch circuit (van een transformator). P obwód magnetyczny. S magnetisk krets. (811)

115. main circuit (of an assembly) : all the conductive parts of an assembly included in a circuit which is intended to transmit electrical energy. ★ circuit principal → *circuit 92.* R главная цепь (комплекта). D Hauptstromkreis; Hauptstrombahn. E circuito principal (de un conjunto). I circuito principale (di un complesso). N hoofdstroombaan (van een inrichting). P obwód główny (rozdzielnicy); tor główny (rozdzielnicy). S huvudströmbana. (441)

116. main circuit (of a switching device) : all the conductive parts of a switching device included in the circuit which it is designed to close or open. ★ circuit principal → *circuit 93.* R главная цепь (коммутационного аппарата).

D Hauptstrombahn (eines Schaltgerätes). E circuito principal (de un aparato de conexión). I circuito principale (di un apparecchio di manovra). N hoofdstroombaan (van een schakeltoestel). P obwód główny (łącznika); tory główne (łącznika). S huvudströmbana. (441)

117. measuring instrument with circuit control devices : → *measuring instrument 14*

118. metallic circuit : a circuit composed of a pair of metallic conductors between two points. ★ circuit métallique → *circuit 81.* R металлическая цепь. D metallischer Stromkreis. E circuito metálico. I circuito metallico. N metallische stroomkring. P tor przewodowy. S dubbelledning. (704)

119. monitoring circuit (*Syn.* indicating circuit) : → *circuit 90*

120. monostable circuit (*Syn.* monostable trigger circuit) : → *circuit 121*

121. monostable trigger circuit (*Syn.* monostable circuit) : a trigger circuit that has one stable and one unstable state. *Note.* — The term "flip-flop" has been used in the USA with the meaning "bistable circuit" and in the United-Kingdom with the meaning "monostable circuit" ; to avoid confusion, it is strongly deprecated with any meaning. ★ bascule monostable → *bascule 3.* R одностабильный триггер. D monostabile Triggerschaltung; monostabiler Multivibrator; monostabile Schaltung. E circuito monoestable. I circuito monostabile. N monostabiele (trekker)schakeling. P przerzutnik monostabilny. S monostabil krets; monostabil vippa. (702)

122. *m*-phase circuit (*Syn.* polyphase circuit) : → *circuit 137*

123. multiple circuit line : → *line 113*

124. nominated reserved circuit (*Syn.* fall back circuit) : a circuit, normally available for telephone traffic, which is allocated for the operation of a multi-channel telegraph system when the main, or primary, circuit becomes faulty. ★ circuit de secours → *circuit 41.* R резервный канал. D Reserveleitung. E circuito de socorro (para la telegrafía armónica). I circuito di riserva. N aangewezen reserve circuit. P łącze rezerwowe. S reservförbindelse. (721)

125. non-essential auxiliary circuits : those a.c. auxiliary circuits within a substation which are not supplied during a loss of system supply. ★ circuits auxiliaires non secourus → *circuit 112.* R вспомогательные цепи с нерезервируемым питанием. D ungesicherter Eigenbedarf. E circuitos auxiliares no socorridos. I circuiti ausiliari non essenziali. N ..... P obwody potrzeb własnych prądu przemiennego zwykłe. S ofavoriserade system. (605)

126. n-terminal circuit : an electric circuit having n terminals. ★ multipôle → *multipôle 1.* R *n*-полюсник. D Mehrpol. E multipolo; circuito de n bornes. I multipolo o n-polo. N *n*-klemmennetwerk. P układ n-końcówkowy; wielownik. S n-pol. (131)

127. opening time of a output-break circuit : → *time 119*

128. opening time of a output-make circuit : → *time 120*

129. outgoing circuit : for a given exchange, a traffic circuit which can be used only for outgoing traffic. ★ circuit sortant → *circuit 101.* D abgehende Leitung. P łącze wychodzące. (715)

130. output break circuit : an output circuit which, when the relay is in its operate condition, either is opened by a contact or is effectively non-conducting and, when the relay is in its release condition, either is closed by a contact or is effectively conducting. ★ circuit de sortie de repos → *circuit de sortie 3.* R размыкающая выходная цепь. D Ausgangskreis mit Öffnerfunktion. E circuito de salida de reposo. I circuito di uscita di riposo. N uitgangsverbreekschakeling. P wyjście rozwierne. S brytande utgångskrets. (446)

131. output circuit : the whole of the electrically conductive parts within a relay connected to the terminals between which the predetermined change is produced (see 446-11-01). ★ circuit de sortie → *circuit de sortie 1.* R выходная цепь. D Ausgangskreis. E circuito de salida. I circuito di uscita. N uitgangsschakeling. P obwód wyjściowy. S utgångskrets. (446)

132. output make circuit : an output circuit which, when the relay is in its operate condition, either is closed by a contact or is effectively conducting, and when the relay is in its release condition, either is opened by a contact or is effectively non-conducting. ★ circuit de sortie de travail → *circuit de sortie 4.* R замыкающая выходная цепь. D Ausgangskreis mit Schliesserfunktion. E circuito de salida de trabajo. I circuito di uscita di lavoro. N uitgangsmaakschakeling. P wyjście zwierne. S slutande utgångskrets. (446)

133. parallel-resonant circuit : a resonant circuit with two paths in parallel, one containing capacitance and the other inductance. ★ circuit résonant parallèle → *circuit 97.* R параллельный резонансный контур. D Parallelresonanzkreis. E circuito resonante paralelo. I circuito risonante parallelo. N parallel (resonantie)kring. P obwód rezonansowy równoległy; dwójnik rezonansowy równoległy. S parallellresonanskrets. (151)

134. passive (electric) circuit : a circuit containing only passive circuit elements. ★ circuit (électrique) passif → *circuit 64.* R пассивная (электрическая) цепь. D passiver Stromkreis. E circuito (eléctrico) pasivo. I circuito (elettrico) passivo. N passief netwerk. P układ (elektryczny) pasywny; układ (elektryczny) bierny. S passiv krets. (131)

135. permanent virtual circuit : a connection permanently established between two data terminal equipments in a packet switching network. ★ circuit virtuel permanent → *circuit 111.* R постоянный витруальный канал. D feste virtuelle Verbindung. E circuito virtual permanente. I circuito virtuale permanente. N permanent virtueel circuit. P łącze wirtualne stałe. S permanent virtuell förbindelse. (721)

136. phantom circuit : an additional circuit derived from the conductors of two metallic circuits, with the two conductors of each metallic circuit effectively being used in parallel. *Example :* A telegraph circuit superposed on two telephone circuits. ★ circuit fantôme → *circuit 69.* R фантомная цепь. D Phantomkreis. E circuito fantasma. I circuito virtuale. N fantoomcircuit. P tor pochodny. S fantomförbindelse. (704,721)

137. polyphase circuit (*Syn. m*-phase circuit) : a circuit whose graph possesses a symmetry of cyclic permutation iterated *m* times. ★ circuit polyphasé → *circuit 87.* R многофазная цепь (-фазная цепь). D Mehrphasenstromkreis; m-Phasenstromkreis. E circuito polifásico. I circuito polifase di ordine m. N meerfasennetwerk; m-fasennetwerk. P obwód wielofazowy; obwód m-fazowy. S flerfaskrets; m-faskrets. (131)

138. polyphase circuit : a set of interconnected polyphase devices. ★ circuit polyphasé → *circuit 88.* R многофазная цепь. D Mehrphasen-Stromkreis. E circuito polifásico. I circuito polifase. N meerfasenketen. P układ (elektryczny) wielofazowy. S flerfaskrets. (151)

139. power circuit (*Syn.* traction circuit) : a circuit carrying the current of the machines and equipment, such as the convertors and traction motors, which transmit the traction output. ★ circuit de puissance → *circuit 39.* R силовая цепь; тяговая цепь. D Fahrstromkreis. E circuito de potencia; circuito de tracción. I circuito di trazione. N hoofdstroomkring; tractiestroomkring. P obwód trakcyjny. S huvudkrets; traktionskrets. (811)

140. primary circuit (USA) : a circuit carrying the load current and comprising at least one winding in an induction machine. ★ circuit primaire → *circuit 90.* R первичная цепь. D Primärkreis einer Induktionsmaschine. E circuito primario. I circuito primario. N primaire keten. P obwód pierwotny. S primärkrets. (411)

141. primary coolant circuit : a system for circulating a coolant used to remove heat from a primary heat source, such as a reaction core or a breeding blanket. ★ circuit primaire de refroidissement → *circuit de refroidissement 3.* D Primärkühlkreislauf. E circuito primario de refrigeración. I circuito primario di raffreddamento. N primaire koelkring. P pierwotny obieg chłodziwa. S primärkylkrets. (026)

142. primary series circuit : a circuit carrying the load current and comprising at least one winding in a machine. ★ circuit principal → *circuit 91.* R главная цепь. D Hauptstromkreis. E circuito principal. I circuito principale. N hoofdstroomketen. P obwód główny. S primärkrets. (411)

143. printed circuit : this term is in common use with at least three meanings : *a)* A generic term to describe a certain technique. *b)* Circuit obtained by printing and comprising printed components, printed wiring, or a combination thereof, all formed in a predetermined design in, or attached to, a surface or surfaces of a common base. *c)* Circuit obtained by printing and comprising printed wiring and conventional components, all arranged in a predetermined design in, or attached to, a surface or surfaces of a common base. ★ circuit imprimé → *circuit 73.* R печатная схема. D gedruckte Schaltung. E circuito impreso. I circuito stampato. N gedrukte schakeling. P układ drukowany. S tryckta kretsar. (541)

144. **private circuit** (*Syn.* private owned circuit) : a telecommunication circuit which is not part of the public telephone network. ★ liaison privée → *liaison 28.* R ведомственный канал. D privater Stromkreis. E circuito privado. I collegamento privato. N particuliere lijn; eigen lijn. P łącze prywatne. S privat teleförbindelse. (722)

145. **private owned circuit** (*Syn.* private circuit) : → *circuit 144*

146. **private wire (telephone) circuit** (*Syn.* leased circuit) : a telecommunication circuit of the public telephone network assigned to or reserved exclusively for the exclusive use of a specified user for an agreed upon time period. ★ liaison spécialisée → *liaison 32.* R арендованный канал. D überlassener Stromkreis. E circuito especializado; circuito alquilado. I collegamento a noleggio. N (telefoon)huurlijn. P łącze dzierżawione. S uthyrd förbindelse. (722)

147. **protective circuit** : a specific circuit, or a part of a control circuit, used for protection. ★ circuit de protection → *circuit 38.* R цепь защиты. D Schutzstromkreis. E circuito de protección. I circuito di protezione. N beveiligingsstroomkring. P obwód zabezpieczeniowy. S skyddskrets. (811)

148. **quenching circuit** : a circuit which achieves quenching by reducing, suppressing or reversing the potential applied to a Geiger-Müller counter tube. ★ circuit coupeur → *circuit 17.* R схема гашения. D Löschkreis. E circuito extintor. I circuito interruttore. N doofschakeling. P układ gaszący. S släckkrets. (391)

149. **rated burden of an energizing circuit** (*Syn.* rated power of an energizing circuit) : → *power 159*

150. **rated impedance of an energizing circuit** : → *impedance 47*

151. **rated power of an energizing circuit** : → *power 159*

152. **resonant circuit** : an electric circuit operating near resonance. ★ circuit résonant → *circuit 96.* R резонансный контур. D Resonanzkreis. E circuito resonante. I circuito risonante. N resonantiekring. P obwód rezonansowy; dwójnik rezonansowy. S resonanskrets. (151)

153. **return circuit** : the electric circuit comprising the running rails or a return current rail, their electrical connections and the return cables to the substation. ★ circuit de retour → *circuit 40.* R обратная цепь. D Fahrstromrückleitung. E circuito de retorno. I circuito di ritorno. N retourstroomcircuit. P sieć powrotna. S återledning. (811)

154. **scaling circuit** : an electronic circuit designed to provide an output pulse each time a specified number of pulses has been received at its input. ★ circuit d'échelle → *circuit 52.* R пересчетная схема. D Zählstufe. E circuito de escala. I circuito demoplificatore. N deelschakeling. P układ przeliczający. S räknekrets. (391,881)

155. **secondary circuit** : the external circuit receiving the information signals supplied by the secondary winding of an instrument transformer. ★ circuit secondaire → *circuit 99.* R вторичная цепь. D Sekundärkreis. E circuito secundario. I circuito secondario. N secundaire uitwendige keten. P obwód wtórny. S sekundärkrets. (321)

156. **secondary coolant circuit** : a system for circulating a coolant used to remove heat from the primary coolant circuit. ★ circuit secondaire de refroidissement → *circuit de refroidissement 4.* D Sekundärkühlkreislauf. E circuito secundario de refrigeración. I circuito secondario di raffreddamento. N secundaire koelkring. P wtórny obieg chłodziwa. S sekundärkylkrets.. (026)

157. **sequential circuit** : a device for effecting a sequence of logic operations whose output values at any given instant depend upon its input values and internal state at that instant, and whose internal state depends upon the immediately preceding input values and the preceding internal state. ★ circuit séquentiel → *circuit 100.* R схема последовательного включения. D sequentielle Schaltung. E circuito secuencial. I circuito sequenziale. N sequentiële schakeling. P układ sekwencyjny (logiczny). S sekvenskrets. (702)

158. **series-resonant circuit** : a resonant circuit with a single path containing capacitance and inductance in series. ★ circuit résonant série → *circuit 98.* R последовательный резонансный контур. D Reihenresonanzkreis; Serienresonanzkreis. E circuito resonante serie. I circuito risonante serie. N serie(resonantie)kring. P obwód rezonansowy szeregowy; dwójnik rezonansowy szeregowy. S serieresonanskrets. (151)

159. **set of circuits** (*Syn.* circuit group) : → *group 3*

160. **set of circuits** : → *set 44*

161. **set of voice-frequency multiplex (telegraph) circuits** : → *set 47*

162. **side circuit** : one of the metallic circuits from which a superposed circuit is derived. ★ circuit combinant → *circuit 15.* R физическая цепь; основная цепь. D Flanken-Stromkreis. E circuito combinado; circuito real. I circuito reale. N gecombineerde stroomkring. P tor macierzysty. S stamledning. (704)

163. **signalling circuit** (in a telephone set) : the aggregate circuit elements in a telephone set provided primarily to permit the setting up and release of telephone connections. ★ organes de signalisation → *organe 7.* R сигнальная цепь (в телефонном аппарате). D Signalisierungskreis. E circuito de señalización (de un aparato telefónico). I organi di segnalazione. N signaleringsorgaan (in een telefoontoestel). P układ sygnalizacyjny. S signaleringskrets. (722)

164. **single circuit line** : a line comprising one circuit. ★ ligne simple → *ligne 133.* R одноцепная линия. D Einfachleitung; Einsystemleitung. E línea de simple circuito. I linea semplice. N lijn met één circuit. P linia jednotorowa. S enkelledning. (466)

165. **single-phase circuit** : a set of interconnected single-phase devices. ★ circuit monophasé → *circuit 83.* R однофазная цепь. D Einphasen-Stromkreis. E circuito monofásico. I circuito monofase. N eenfaseketen. P układ (elektryczny) jednofazowy. S enfaskrets. (151)

166. **spark test apparatus (for intrinsically-safe circuits)** : → *apparatus 14*

167. **speech circuit** (in a telephone set) : the aggregate circuit elements in a telephone set where speech currents circulate. ★ organes de conversation → *organe 6.* R разговорная цепь (в телефонном аппарате). D Sprach(strom)kreis. E circuito de conversación (en un aparato telefónico). I circuito di conversazione (di un apparecchio telefonico). N spreekstroomcircuit (in een telefoontoestel). P układ rozmówny. S talkrets. (722)

168. **starting circuit** : a specific circuit for starting up an internal combustion engine by its generator acting as a motor or by a separate starter motor. ★ circuit de lancement → *circuit 35.* R пусковая цепь. D Anlaßstromkreis. E circuito de lanzamiento. I circuito di lancio. N startstroomkring. P obwód rozruchowy. S startkrets för förbränningsmotor. (811)

169. **superposed circuit** : an additional circuit obtained from one or more conductors provided for other circuits, and arranged so that all the circuits may be used simultaneously. *Note.* — An example of a superposed circuit is a phantom circuit. ★ circuit superposé → *circuit 104.* R искусственная цепь. D aufgesetzter Stromkreis. E circuito superpuesto. I circuito sovrapposto. N gesuperponeerde stroomkring. P tor wtórny. S överlagrad ledning. (704)

170. **supervisory circuit** (*Syn.* control line) : → *line 17*

171. **supply detection circuit** : on multi-system vehicles, the circuit of the apparatus which senses the electrical characteristics of the contact line. ★ circuit de palpage → *circuit 37.* R цепь для обнаружения рода тока. D Systemerfassungsstromkreis. E circuito de detección de alimentación; circuito de palpado. I circuito per il rilievo (della natura) della tensione di linea. N (bovenleiding)spanningsdetectiestroomkring. P obwód czujnika systemu zasilania. S ..... (811)

172. **switch (circuit)** (*Syn.* circuit switching exchange) : → *exchange 2*

173. **symmetric (characteristic circuit) element** : → *element 56*

174. **symmetrical polyphase circuit** : a circuit in which the driving point and transfer immittances of the different elements are identical in all phases. ★ circuit polyphasé symétrique → *circuit 89.* R симметричная многофазная цепь. D symmetrisch gebauter Mehrphasenstromkreis. E circuito polifásico simétrico. I circuito polifase simmetrico. N symmetrisch meerfasennetwerk. P obwód wielofazowy symetryczny. S ..... (131)

175. **talk-back circuit** (*Syn.* communications circuit) : a circuit enabling spoken communications between persons engaged in programme production, and especially for giving instructions to the production staff. ★ circuit d'ordre → *circuit 58.* R линия служебной связи. (723)

176. **(telecommunication) circuit** : a combination of two transmission channels permitting transmission in both

directions between two points. *Notes. 1* — If the telecommunication is by nature unidirectional, e.g. long distance television transmission, the term "circuit" is sometimes used to designate the single transmission channel providing the facility, but this usage is deprecated. *2* — A telecommunication circuit may be qualified by the nature or characteristics of the transmitted signals ; for example : telephone circuit, telegraph circuit, data circuit, digital circuit. *3* — Such characteristics of the transmission channels as bandwidth, or digit rate, may be different in the two directions of transmission. *4* — In telephony, usage of the term "telephone circuit" is generally limited to a telecommunication circuit directly connecting two switching centres. ★ circuit (de télécommunication) → *circuit 45.* R двусторонний канал, канал. D (Fernmelde-) Stromkreis; Fernmeldeleitung. E circuito (de telecomunicación). I circuito (di telecomunicazione). N (telecommunicatie) circuit. P łącze (telekomunikacyjne). S teleförbindelse. (701,704,715)

177. (telecommunication) circuit : a combination of two transmission channels permitting transmission in both directions between two points. *Note.* — In switching, the "go" and "return" channels may be : a) permanently associated together ; b) selected from separate sets for association together throughout a call ; c) selected from time to time during a call and then released, the selecting and release processes being determined, separately in the two directions, by the varying characteristics of the information being transmitted over the circuit. ★ circuit (de télécommunication) → *circuit 46.* R двусторонний канал; канал. D Stromkreis; Durchschaltung. E circuito (de telecomunicación). I circuito (di comunicazione). N (telecommunicatie)circuit. P łącze (telekomunikacyjne). S krets; teleförbindelse. (714)

178. telegraph circuit : a combination of two telegraph channels permitting transmission in both directions between two points. *Note.* — Unless otherwise specified a telegraph circuit connects two switching centres. ★ circuit télégraphique → *circuit 106.* R (двусторонний) телеграфный канал. D Telegrafenleitung. E circuito telegráfico. I circuito telegrafico. N telegraafcircuit. P obwód telegraficzny. S telegrafförbindelse. (721)

179. telegraph junction circuit : a telegraph circuit connecting a sub-centre with its parent switching centre. ★ jonction de sous-centre → *jonction 14.* R телеграфная соединительная линия. D Telegrafenortsverbindungsleitung. E unión de sub-centro. I subgiunzione telegrafica. N ..... P łącze telegraficzne zbiorcze. S koncentratorförbindelse. (721)

180. telegraph trunk circuit : a permanent telegraph circuit between two telegraph exchanges permitting intercommunication. ★ circuit télégraphique de jonction → *circuit 107.* R межстанционный телеграфный канал. D Telegrafenverbindungsleitung. E circuito telegráfico de unión. I giunzione telegrafica. N telegraafbundel. P łącze telegraficzne dalekosiężne. S rikstelegrafförbindelse. (721)

181. (telephone) circuit : a combination of two transmission channels permitting telephone transmission in both directions between two points. *Note.* — Usage of the term "telephone circuit" is generally limited to a circuit directly connecting two switching centres. ★ circuit (téléphonique) → *circuit 108.* R (телефонный) канал. D (Fernsprech-)Stromkreis. E circuito (telefónico). I giunzione (telefonica). N (telefoon)circuit. P łącze telefoniczne. S telefonförbindelse. (722)

182. telephone-type circuit : a pair of associated telephone-type channels permitting transmission in both directions between two points. ★ circuit de type téléphonique → *circuit 51.* R двусторонний канал телефонного типа. D Fernsprechstromkreis. E circuito de tipo telefónico. I circuito di tipo telefonico. N circuit van het telefonietype. P łącze telefoniczne. S telefonförbindelse. (701,721)

183. traction circuit (*Syn.* power circuit) : → *circuit 139*

184. traffic circuit : a telecommunication circuit that is being used in a connection or that could be used for such a purpose. ★ circuit de trafic → *circuit 49.* R канал обмена. D Verkehrsverbindung (-durchschaltung). E circuito de tráfico. I circuito. N verbindingscircuit. P łącze telekomunikacyjne (do zestawu łączy). S trafikkrets. (714)

185. traffic circuit : a telecommunication circuit that may be used in a connection. ★ circuit de trafic → *circuit 50.* D Sprechkreis. P łącze użytkowe. (715)

186. train auxiliary circuit (*Syn.* train power supply circuit) : → *circuit 187*

187. train power supply circuit (*Syn.* train auxiliary circuit) : a circuit supplying substantial amounts of power to each vehicle of a train for air-conditioning, heating and other auxiliary services. ★ circuit d'alimentation du train → *circuit 18.* R цепь энергоснабжения поезда; вспомогательная цепь поезда. D Zugversorgungsstromkreis. E circuito de alimentación del tren. I condotta d'alimentazione del treno. N boordnetstroomkring. P obwody zasilania (nietrakcyjne) pociągu. S genomgående hjälpkraftkrets. (811)

188. trigger circuit : a circuit that has a number of stable states or unstable states, at least one being stable; and designed so that a desired transition can be initiated by the application of a suitable pulse. ★ dispositif à déclenchements → *dispositif 5.* R триггер. D Triggerschaltung. E circuito de disparo. I circuito di sgancio. N trekkerschakeling. P przerzutnik. S triggbar krets. (702)

189. two-way circuit (*Syn.* both-way circuit) : → *circuit 12*

190. two-wire circuit (*Syn.* 2-wire circuit) : a telecommunication circuit that provides two-wire transmission. *Notes. 1* — An example of a two-wire circuit is one formed from a pair of metallic conductors. *2* — Certain types of two-wire circuit were formerly known as two-wire type circuits. The term "two-wire type circuit" is deprecated. ★ circuit à deux fils → *circuit 5.* R двухпроводный двусторонний канал. D Zweidraht-Stromkreis; 2-Draht-Stromkreis. E circuito con dos hilos. I circuito a due fili. N ..... P łącze jednotorowe. S tvåtrådsförbindelse. (704)

191. unbalanced metallic circuit : a circuit, between two points, composed of a pair of metallic conductors and associated terminations, with the whole having different impedances from each conductor to earth and to other circuits. ★ circuit dissymétrique → *circuit 56.* R несимметричная металлическая цепь. D unabgeglichener metallischer Stromkreis. E circuito asimétrico; circuito no equilibrado. I circuito metallico sbilanciato; linea sbilanciata. N metallische stroomkring in onbalans; transmissielijn in onbalans. P tor przewodowy niesymetryczny. S obalanserad dubbelledning. (704)

192. virtual circuit : in a data network operating in packet switching, those facilities provided by the network for transferring data between data stations that simulate facilities provided by a circuit switched connection. ★ circuit virtuel → *circuit 110.* R виртуальный канал. D virtuelle Verbindung. E circuito virtual. I circuito virtuale. N virtueel circuit. P łącze wirtualne. S virtuell förbindelse. (721)

193. voltage circuit (of a measuring instrument) : a circuit of a measuring instrument to which is applied the voltage of the circuit to which the measuring instrument is connected. *Note.* — It may be the voltage directly involved in the measurement or a proportional voltage supplied by an external voltage transformer or voltage divider or derived by means of an external series resistor (impedance). ★ circuit de tension → *circuit 47.* R цепь напряжения (измерительного прибора). D Spannungspfad (eines Messgerätes). E circuito de tensión (de un aparato de medida). I circuito di tensione. N spanningsketen (van een meetinstrument). P tor napięciowy (przyrządu pomiarowego). S spänningskrets. (302)

194. welding circuit : a circuit that includes all conductive material through which the welding current is intended to flow. *Notes. 1* — In arc welding, the arc is a part of the welding circuit. *2* — In certain arc welding processes, the welding arc may be established between two electrodes. In such a case the workpiece is not necessarily a part of the welding circuit. ★ circuit de soudage → *circuit 44.* R сварочная цепь. D Schweißstromkreis. E circuito de soldadura. I circuito di saldatura. N lasketen. P obwód (elektryczny) spawalniczy. S svetsströmkrets. (851)

195. 2-terminal circuit : an electric circuit having two terminals. ★ bipôle → *bipôle 1.* R двухполюсник. D Zweipol. E bipolo; circuito de 2 bornes. I bipolo. N eenpoort. P dwójnik. S tvåpol. (131)

196. 2-wire circuit (*Syn.* two-wire circuit) : → *circuit 190*

197. 4-wire circuit (*Syn.* four-wire circuit) : → *circuit 82*

circuit element

1. active (circuit) element : a circuit element whose equivalent circuit contains a source of electrical energy. ★ élément actif (de circuit) → *élément de circuit 1.* R активный элемент (цепи). D aktives (Stromkreis-) Element. E elemento activo (de circuito). I elemento attivo (di circuito). N actief

(netwerk)element. P element (układu) aktywny. S aktivt kretselement. (131)

2. **circuit element** : that constituent part of an electric circuit which cannot be physically divided into smaller parts without losing its character. ★ élément de circuit → *élément de circuit 2.* R элемент цепи. D Stromkreiselement. E elemento de circuito. I elemento di circuito. N netwerkelement. P element układu. S kretselement. (131)
3. **circuit element in terms of components** : a circuit element defined by its immittance matrix or by its sources or by both, expressed in terms of components. ★ élément de circuit en composantes → *élément de circuit 5.* R элемент цепи, представленный составляющими. D transformiertes Stromkreiselement. E elemento de circuito en componentes. I elemento di circuito in componenti. N netwerkelement uitgedrukt in componenten. P element obwodu w ujęciu składowych. S ..... (131)
4. **ideal (circuit) element** : the abstract representation of a device, characterized by a single parameter. ★ élément idéal (de circuit) → *élément de circuit 7.* R идеальный элемент (цепи). D ideales (Stromkreis-) Element. E elemento ideal (de circuito). I elemento ideale (di circuito). N ideaal (netwerk)element. P element (układu) idealny. S idealt kretselement. (131)
5. **linear 2-terminal circuit element** : a 2-terminal circuit element for which voltage and current are related by a linear operator. ★ bipôle élémentaire linéaire → *bipôle 5.* R линейный двухполюсник. D elementarer linearer Zweipol. E bipolo elemental lineal; elemento de circuito lineal de 2 bornes. I bipolo elementare lineare. N lineair (netwerk)element met twee klemmen. P dwójnik elementarny linearny. S linjärt tvåpoligt kretselement. (131)
6. **passive (electric) circuit element** : a circuit element in which the energy absorbed can only be positive or zero. ★ élément passif → *élément 68.* R пассивный элемент (электрической) цепи. D passives Stromkreiselement. E elemento pasivo (de circuito eléctrico). I elemento passivo (di circuito elettrico). N passief (netwerk)element. P element (układu) pasywny; element (układu) bierny. S passivt kretselement. (131)
7. **2-terminal circuit element** : a circuit element having two terminals only. ★ bipôle élémentaire → *bipôle 4.* R двухполюсник элементарный. D elementarer Zweipol. E bipolo elemental; elemento de circuito de 2 bornes. I bipolo elementare. N (netwerk)element met twee klemmen. P element dwójnikowy; dwójnik elementarny. S tvåpoligt kretselement. (131)

circuit-breaker

1. **air circuit-breaker** : a circuit-breaker in which the contacts open and close in air at atmospheric pressure. ★ disjoncteur à air → *disjoncteur 3.* R воздушный выключатель. D Luft(-leistungs-)schalter. E interruptor automático en aire. I interruttore ad aria. N luchtschakelaar. P wyłącznik powietrzny (normalnociśnieniowy). S luftbrytare. (441)
2. **air-blast circuit-breaker** : a gas-blast circuit-breaker in which the gas used is air. ★ disjoncteur à air comprimé → *disjoncteur 4.* R выключатель с воздушным дутьем. D Druckluft(-leistungs-)schalter. E interruptor automático de aire comprimido. I interruttore ad aria compressa. N drukluchtschakelaar. P wyłącznik pneumatyczny. S tryckluftsbrytare. (441,811)
3. **bus coupler circuit-breaker** : in a substation a circuit-breaker which is located between two busbars and which permits the busbars to be coupled ; it may be associated with selectors in case of more than two busbars. ★ disjoncteur de couplage de barres → *disjoncteur 14.* R шиносоединительный выключатель. D Sammelschienen-Kuppelschalter. E interruptor automático de unión de barras. I interruttore di accoppiamento sbarre. N koppelschakelaar. P wyłącznik sprzęgłowy szyn zbiorczych. S kopplingsbrytare. (605)
4. **circuit-breaker** : a mechanical switching device, capable of making, carrying and breaking currents under normal circuit conditions and also making, carrying for a specified time and breaking currents under specified abnormal circuit conditions such as those of short circuit. ★ disjoncteur → *disjoncteur 2.* R выключатель. D Leistungsschalter. E interruptor automático (mecánico). I interruttore. N vermogenschakelaar. P wyłącznik. S effektbrytare. (441,811)
5. **circuit-breaker capacitors** : → *capacitor 26*
6. **circuit-breaker failure protection system** : → *system 28*
7. **circuit-breaker with lock-out preventing closing** : a circuit-breaker in which none of the moving contacts can make current if the closing command is initiated while the conditions which should cause the opening operation remain established. ★ disjoncteur à fermeture empêchée → *disjoncteur 7.* R выключатель с блокировкой против включения. D Leistungsschalter mit Einschaltsperre. E interruptor automático con cierre impedido. I interrutore a chiusura impedita. N vermogenschakelaar met inschakelvergrendeling. P wyłącznik z uzależnieniem zamykania. S effektbrytare med frånslagsprioritering. (441)
8. **current-limiting circuit-breaker** : a circuit-breaker with a break-time short enough to prevent the short-circuit current reaching its otherwise attainable peak value. ★ disjoncteur limiteur de courant → *disjoncteur 19.* R токоограничивающий выключатель. D strombegrenzender Leistungsschalter. E interruptor automático limitador de corriente. I interruttore limitatore di corrente. N stroombegrenzende vermogenschakelaar. P wyłącznik ograniczający; wyłącznik szybki. S strömbegränsande effektbrytare. (441)
9. **(d.c.) high-speed circuit-breaker** : a circuit-breaker with a very short break-time intended to prevent the short-circuit current from attaining its prospective value. ★ disjoncteur ultra-rapide (à courant continu) → *disjoncteur 20.* R быстродействующи выключатель (постоянного тока). D Schnellschalter (Gleichstrom). E interruptor automático ultrarápido (de corriente continua). I interruttore extrarapido. N (gelijkstroom)snelschakelaar. P wyłącznik szybki (prądu stałego). S höghastighets ls-brytare. (811)
10. **dead tank circuit-breaker** : a circuit-breaker with interrupters in an earthed metal tank. ★ disjoncteur à cuve mise à la terre → *disjoncteur 5.* R выключатель с заземленным баком. D Kessel(-leistungs-)schalter. E interruptor automático con cuba a tierra. I interruttore con involucro a terra. N vermogenschakelaar met geaarde bak. P wyłącznik z kadzią uziemioną. S effektbrytare med jordad tank. (441)
11. **feeder circuit-breaker** : in a substation, a circuit-breaker which is located within a feeder bay and through which a feeder can be energized. ★ disjoncteur de ligne → *disjoncteur 15.* R линейный выключатель. D Leitungsschalter. E interruptor automático de línea. I interruttore di linea. N ..... P wyłącznik liniowy. S ledningsbrytare. (605)
12. **gas-blast circuit-breaker** : a circuit-breaker in which the arc develops in a blast of gas. *Note.* — Where the gas is moved by a difference in pressure established by mechanical means during the opening operation of the circuit-breaker, it is termed a single pressure gas-blast circuit-breaker. Where the gas is moved by a difference in pressure established before the opening operation of the circuit-breaker, it is termed a double pressure gas-blast circuit-breaker. ★ disjoncteur à gaz comprimé → *disjoncteur 9.* R выключатель с газовым дутьем. D Druckgas(-leistungs-)schalter. E interruptor automático de gas comprimido. I interruttore a gas compresso. N drukgasschakelaar. P wyłącznik z gazem sprężonym. S tryckgasbrytare. (441,811)
13. **integrally fused circuit-breaker** : a combination, in a single device, of a circuit-breaker and fuses, one fuse being placed in series with each pole of the circuit-breaker intended to be connected to a phase conductor. ★ disjoncteur à fusibles incorporés → *disjoncteur 8.* R выключатель со встроенными предохранителями. D Leistungsschalter mit integrierten Sicherungen. E interruptor automático con fusibles incorporados. I interruttore con fusibili incorporati. N vermogenschakelaar met smeltveiligheden. P zestaw wyłącznika z bezpiecznikami; wyłącznik dobezpieczony. S effektbrytare med inbyggda säkringar. (441)
14. **live tank circuit-breaker** : a circuit-breaker with interrupters in a tank insulated from earth. ★ disjoncteur à cuve sous tension → *disjoncteur 6.* R выключатель с баком, находящимся под напряжением. D Schaltkammer(-leistungs-)schalter. E interruptor automático con cuba activa. I interruttore con involucro in tensione. N vermogenschakelaar met bak onder spanning. P wyłącznik z kadzią pod napięciem. S effektbrytare med spänningsförande tank. (441)
15. **moulded-case circuit-breaker** : a circuit-breaker having a supporting housing of moulded insulating material forming an integral part of the circuit-breaker. ★ disjoncteur en boîtier

moulé → *disjoncteur 18.* R выключатель в литом (формованном) корпусе. D kompakter Leistungsschalter. E interruptor automático de estuche moldeado. I interruttore scatolato. N kunststofomsloten vermogenschakelaar. P wyłącznik zwięzły; wyłącznik kompakt. S isolerkapslad effektbrytare. (441)

16. **oil circuit-breaker** : a circuit-breaker in which the contacts open and close in oil. *Note.* — Typical examples of oil circuit-breakers are live tank minimum oil circuit-breakers and dead tank bulk oil circuit-breakers. ★ disjoncteur à huile → *disjoncteur 11.* R масляный выключатель. D Öl(-leistungs-)schalter. E interruptor automático en aceite. I interruttore ad olio. N olieschakelaar. P wyłącznik olejowy. S oljebrytare. (441,811)
17. **SF_6 circuit-breaker** (*Syn.* sulphur hexafluoride circuit-breaker) : → *circuit-breaker 18*
18. **sulphur hexafluoride circuit-breaker** (*Syn.* SF_6 circuit-breaker) : a circuit-breaker in which the contacts open and close in sulphur hexafluoride. ★ disjoncteur à hexafluorure de soufre → *disjoncteur 10.* R элегазовый выключатель. D Schwefelhexafluorid-Leistungsschalter; SF_6-Leisttungsschalter. E interruptor automático de hexafluoruro de azufre; interruptor automático de SF_6. I interruttore ad esafluoruro di zolfo; interruttore a SF_6. N SF_6-schakelaar. P wyłącznik z sześciofluorkiem siarki; wyłącznik z SF_6. S SF_6-brytare. (441)
19. **switched busbar circuit-breaker** : in a substation a circuit-breaker, connected in series within a busbar, between two busbar sections. ★ disjoncteur de tronçonnement de barres → *disjoncteur 17.* R секционирующий выключатель. D Sammelschienen-Längsschalter. E interruptor automático de seccionamiento longitudinal de barras. I interruttore di divisione sbarre. N ..... P wyłącznik sekcjonujący. S sektioneringsbrytare. (605)
20. **transformer circuit-breaker** : in a substation, one of the circuit-breakers located on each side of a transformer and which is usually designated by the corresponding voltage level. ★ disjoncteur de transformateur → *disjoncteur 16.* R трансформаторный выключатель. D Transformatorschalter. E interruptor automático de transformador. I interruttore di trasformatore. N ..... P wyłącznik transformatorowy. S transformatorbrytare. (605)
21. **vacuum circuit-breaker** : a circuit-breaker in which the contacts open and close within a highly evacuated envelope. ★ disjoncteur à vide → *disjoncteur 13.* R вакуумный выключатель. D Vakuum(-leistungs-)schalter. E interruptor automático de vacío. I interruttore a vuoto. N vacuümschakelaar. P wyłącznik próżniowy. S vakuumbrytare. (441,811)

circular

1. **circular array** : → *array 7*
2. **circular connector** : → *connector 4*
3. **circular orbit** : → *orbit 1*
4. **circular polarization** : → *polarization 4*
5. **circular polarization** : → *polarization 5*
6. **circular waveguide** : → *waveguide 3*
7. **compound circular horn** : → *horn 3*
8. **concentrically stranded circular conductor** : → *conductor 10*

circularity

1. **non circularity of cladding** : the difference between the diameters of the two circles defined by the cladding tolerance field divided by the cladding diameter. ★ non-circularité de la gaine → *non-circularité 1.* R некруглость оболочки. D Mantel-Kreisabweichung. E no circularidad del revestimiento. I non circolarità del mantello. N onrondheid van de vezel. P współczynnik eliptyczności płaszcza. S mantelorundhet. (731)
2. **non circularity of core** : the difference between the diameters of the two circles defined by the core tolerance field divided by the core diameter. ★ non-circularité du cœur → *non-circularité 3.* R некруглость сердцевины. D Kern-Kreisabweichung. E no circularidad del núcleo. I non circolarità del nucleo. N onrondheid van de vezelkern. P współczynnik eliptyczności rdzenia. S kärnorundhet. (731)
3. **non circularity of reference surface** : the difference between the diameters of the two circles defined by the reference surface tolerance field divided by the reference surface diameter. ★ non-circularité de la surface de référence → *non-circularité 2.* R некруглость опорной поверхности. D Bezugsoberflächen-Kreisabweichung. E no circularidad de la superficie de referencia. I non circolarità della superficie di riferimento. N onrondheid van het referentieoppervlak. P współczynnik eliptyczności powierzchni odniesienia. S referensytas orundhet. (731)

circularly

1. **circularly polarized** : → *polarized 1*
2. **scalar permeability for circularly polarized fields** : → *permeability 26*

circulating

1. **circulating current** : → *current 21*
2. **circulating reactor** : → *reactor 5*

circulating circuit

1. **dependent circulating circuit component** : a separate component in the coolant circulating circuit which is dependent for its operation on the operation of the main machine. ★ dispositif de circulation dépendant → *dispositif de circulation 1.* R зависимый элемент циркуляционной системы. D abhängige Kühlvorrichtung (Eigenkühlung). E dispositivo de circulación dependiente. I dispositivo di circolazione dipendente. N afhankelijke component voor koelmiddelcirculatie. P element zależny wprowadzający chłodziwo w ruch. S del i beroende kylsystem. (411)
2. **independent circulating circuit component** : a separate component in the coolant circulating circuit which is independent of the operation of the main machine. ★ dispositif de circulation indépendant → *dispositif de circulation 3.* R независимый элемент циркуляционной системы. D unabhängige Kühlvorrichtung (Fremdkühlung). E dispositivo de circulación independiente. I dispositivo di circolazione indipendente. N onafhankelijke component voor koelmiddelcirculatie. P element niezależny wprowadzający chłodziwo w ruch. S del i oberoende kylsystem. (411)
3. **integral circulating circuit component** : a component in the coolant circulating circuit which forms part of the machine and which can only be replaced by partially dismantling the main machine. ★ dispositif de circulation incorporé → *dispositif de circulation 2.* R встроенный элемент циркуляционной системы. D eingebaute Kühlvorrichtung. E dispositivo de circulación incorporado. I dispositivo di circolazione incorporato. N ingebouwde koelcircuitcomponent. P element wbudowany wprowadzający chłodziwo w ruch. S del i påbyggt kylsystem. (411)
4. **machine mounted circulating circuit component** : a component in the coolant circulating circuit which is mounted on the machine and forms part of it, but which can be replaced without disturbing the main machine. ★ dispositif de circulation monté sur la machine → *dispositif de circulation 5.* R элемент циркуляционной системы, смонтированный на машине. D aufgebaute Kühlvorrichtung. E dispositivo de circulación montado sobre la máquina. I dispositivo di circolazione montato sulla macchina. N opgebouwde koelcircuitcomponent. P element dobudowany wprowadzający chłodziwo w ruch. S ..... (411)
5. **separately mounted circulating circuit component** : a component in the coolant circulating circuit which is associated with a machine, but which is not mounted on or integral with the machine. ★ dispositif de circulation monté séparément → *dispositif de circulation 4.* R отдельно монтируемый элемент циркуляционной системы. D getrennt aufgestellte Kühlvorrichtung. E dispositivo de circulación montado separadamente. I dispositivo di circolazione montato separatamente. N afzonderlijk opgestelde koelcircuitcomponent. P element oddzielny wprowadzający chłodziwo w ruch. S del i separat kylsystem. (411)

circulation

1. **circulation** : a scalar line integral along a closed path. ★ circulation → *circulation 6.* R циркуляция. D Umlaufintegral. E circulación (a lo largo de una curva cerrada). I circolazione (lungo un contorno chiuso). N kringintegraal. P cyrkulacja; całka cyrkulacyjna. S omloppsintegral. (101)
2. **controlled circulation boiler** : → *boiler 3*
3. **forced air circulation system** : → *system 72*

4. **forced circulation** : the circulation of oil in a transformer tank or cooling system by means of a pump. ★ circulation d'huile forcée → *circulation 7.* R принудительная циркуляция. D erzwungene Ölströmung. E circulación de (aceite) forzada. I circolazione forzata (dell'olio). N geforceerde (olie)circulatie. P obieg oleju wymuszony. S forcerad kylning. (811)
5. **natural circulation** : the circulation of oil in a transformer tank or cooling system solely by convection without the use of a pump. ★ circulation d'huile naturelle → *circulation 8.* R естественная циркуляция. D natürliche Ölströmung. E circulación de aceite natural. I circolazione naturale (dell'olio). N natuurlijke (olie)circulatie. P obieg oleju naturalny. S självkylning. (811)
6. **natural circulation boiler** : → *boiler 8*

circulator

1. **circulator** : a passive device having three or more ports in which the power entering any port is transmitted to the next port according to a given order of sequence. *Note.* — By reversing the biasing field, the order of sequence is reversed. This property may be used to switch electromagnetic energy. ★ circulateur → *circulateur 1.* R циркулятор. D Zirkulator. E circulador. I circolatore. N circulator. P cyrkulator. S cirkulator. (221,726)
2. **E-plane T circulator** : a junction circulator in the form of an E-plane T junction. ★ circulateur T plan E → *circulateur 8.* R Т-образный циркулятор в Е-плоскости. D T-Zirkulator in der E-Ebene. E circulador en T plano E. I circolatore a T nel piano E. N E-vlak-T-circulator. P cyrkulator typu T w płaszczyźnie E. S ..... (726)
3. **E-plane Y circulator** : a junction circulator in the form of an E-plane Y junction. ★ circulateur Y plan E → *circulateur 11.* R Y-образный циркулятор в Е-плоскости. D Y-Zirkulator in der E-Ebene. E circulador en Y plano E. I circolatore a Y nel piano E. N E-vlak-Y-circulator. P cyrkulator typu Y w płaszczyźnie E. S ..... (726)
4. **H-plane T circulator** : a junction circulator in the form of an H-plane T junction. ★ circulateur T plan H → *circulateur 9.* R Т-образный циркулятор в Н-плоскости. D T-Zirkulator in der H-Ebene. E circulador en T plano H. I circolatore a T nel piano H. N H-vlak-T-circulator. P cyrkulator typu T w płaszczyźnie H. S ..... (726)
5. **H-plane Y circulator** : a junction circulator in the form of an H-plane Y junction. ★ circulateur Y plan H → *circulateur 12.* R Y-образный циркулятор в Н-плоскости. D Y-Zirkulator in der H-Ebene. E circulador en Y plano H. I circolatore a Y nel piano H. N H-vlak-Y-circulator. P cyrkulator typu Y w płaszczyźnie H. S ..... (726)
6. **junction circulator** : a circulator providing a junction between transmission lines. *Note.* — Junction circulators may be built in several ways characterized by the symmetry of the junction. To denote these circulator types, the word "junction" is usually omitted and a qualifying prefix used instead. Examples of this practice are the terms "Y-circulator" and "T-circulator", where the capitals are used to describe the type of junction employed. In the case of waveguide junction circulators, further qualification may be needed, for example as illustrated by the term "H-plane Y-circulator". Such qualifying prefixes should conform with normal waveguide terminology (see IEV Chapter 726). ★ circulateur jonction → *circulateur 6.* R соединительный циркулятор. D Verzweigungszirkulator. E circulador de unión. I circolatore di giunzione. N contactcirculator. P cyrkulator rozgałęzieniowy. S greningscirkulator. (221,726)
7. **lumped-element circulator** : a circulator in which the ports are internally connected by a network of lumped impedance elements. ★ circulateur à éléments localisés → *circulateur 4.* R циркулятор с сосредоточенными реактивными элементами. D Zirkulator aus diskreten Elementen. E circulador de elementos localizados. I circolatore a elementi localizzati. N circulator bestaande uit discrete elementen. P cyrkulator o elementach skupionych. S kretselementcirkulator. (221)
8. **lumped-element circulator** : a circulator in which the ports are connected to a network of lumped impedance elements. ★ circulateur à constantes localisées → *circulateur 2.* R циркулятор на сосредоточенных элементах. D Zirkulator mit Einzelelementen. E circulador de constantes concentradas. I circolatore a parametri concentrati. N geconcentreerde-elementencirculator. P cyrkulator o elementach skupionych. S kretselementcirkulator. (726)
9. **phase-shift circulator** : a circulator containing at least one non-reciprocal phase-shifter. ★ circulateur à déphasage → *circulateur 3.* R фазовый циркулятор. D Phasenschieber-Zirkulator. E circulador de desfase. I circolatore a sfasamento. N faseverschuivingscirculator. P cyrkulator o przesunięciu fazowym. S fasändringscirkulator. (221,726)
10. **T circulator** : a junction circulator in the form of a T junction. ★ circulateur T → *circulateur 7.* R Т-образный циркулятор. D T-Zirkulator. E circulador en T. I circolatore a T. N T-circulator. P cyrkulator typu T. S T-cirkulator. (726)
11. **(wave) rotation circulator** : a circulator containing at least one non-reciprocal polarization rotator. ★ circulateur à rotation (de polarisation) → *circulateur 5.* R поляризационный циркулятор. D Zirkulator mit Faraday-Rotator. E circulador de rotación (de polarización). I circolatore a rotazione (di polarizzazione). N rotatiecirculator. P cyrkulator rotacyjny. S rotationscirkulator; vågvridningscirkulator. (221,726)
12. **Y circulator** : a junction circulator in the form of a Y junction. ★ circulateur Y → *circulateur 10.* R Y-образный циркулятор. D Y-Zirkulator. E circulador en Y. I circolatore a Y. N Y-circulator. P cyrkulator typu Y. S Y-cirkulator. (726)

circumaural

1. **circumaural earphone** : → *earphone 1*

clad

1. **aluminium clad steel reinforced aluminium conductor** : → *conductor 4*
2. **clad** (*Syn.* cladding) : → *cladding 2*
3. **clad temperature computer** : → *computer 1*
4. **plastic clad silica fibre** : → *fibre 22*

cladding

1. **average cladding diameter** : → *diameter 2*
2. **cladding** (*Syn.* clad) : an external layer of material applied directly to a nuclear fuel or other material, to provide protection from a chemically reactive environment, to provide containment of radioactive products produced during the irradiation of the composite, or to provide structural support. ★ gaine → *gaine 11.* D Brennelementhülle. E vaina. I rivestimento. N bekleding. P koszulka. S kapsling. (026)
3. **cladding** (process) : the process of providing a material with a cladding. ★ gainage → *gainage 1.* D Einhüllen. E envainado. I rivestimento (procedimento.). N bekleden; bekleding. P koszulkowanie. S kapsling. (026)
4. **cladding** : that dielectric material of an optical fibre surrounding the core. ★ gaine → *gaine 15.* R оболочка (оптического волокна). D Mantel. E revestimiento. I mantello. N mantel (van een glasvezel). P płaszcz (światłowodu). S (fiber)mantel. (731)
5. **cladding centre** : → *centre 6*
6. **cladding diameter** : → *diameter 7*
7. **cladding diameter tolerance** : → *tolerance 3*
8. **cladding mode** : → *mode 3*
9. **cladding mode stripper** : → *stripper 1*
10. **cladding tolerance field** : → *field 1*
11. **core/cladding concentricity error** : → *error 17*
12. **depressed cladding** : a region of the cladding, immediately adjacent to the core, having a value of the refractive index less than that of outer cladding regions. ★ fossé de gaine → *fossé 1.* R оболочка с провалом в профиле показателя преломления. D abgesenkter Mantel. E revestimiento deprimido. I mantello depresso. N (vezel) mantel met plaatselijk verlaagde brekingsindex. P warstwa przejściowa płaszcza. S försänkt mantel. (731)
13. **homogeneous cladding** : a region of the cladding, where the refractive index is constant within a specified tolerance, at least part of which influences the wave propagation. *Note.* — There may be more than one homogeneous cladding in a fibre. ★ gaine homogène → *gaine 18.* R однородная оболочка. D homogener Mantel. E revestimiento homogéneo. I mantello omogeneo. N homogene mantel. P warstwa jednorodna płaszcza. S homogen mantel. (731)
14. **matched cladding** : a cladding composed of a single homogeneous cladding. ★ gaine compensée → *gaine 16.* R согласованная оболочка. D angepaßter Mantel. E revestimiento compensado. I mantello adattato; mantello

continuo. N (vezel) mantel met aansluitende brekingsindex. P płaszcz immersyjny; płaszcz dopasowany. S kompenserad mantel. (731)

15. **non circularity of cladding** : → *circularity 1*

clamp

1. **absorbing clamp** : a measuring device, movable along the mains lead of an appliance or similar device, intended to assess the maximum radio frequency power emitted by the appliance or device. ★ pince absorbante → *pince 7.* R поглощающие клещи. D Absorberzange. E pinza de absorción. I pinza assorbente. N absorberende meettang; absorberende meetsonde. P cęgi absorpcyjne. S absorberande tång. (161)
2. **anchor clamp** (*Syn.* tension clamp; dead-end clamp) : a clamp which attaches a conductor to a tension insulator set or to a support, and designed to withstand the conductor tension. ★ pince d'ancrage → *pince 8.* R натяжной зажим (2). D Abspannklemme. E grapa de amarre. I morsa di amarro. N afspanklem. P uchwyt odciągowy. S spännlinhållare. (466)
3. **arc furnace electrode clamp** : a metallic device which carries the electrode and ensures electrical contact, a part or the whole of which is water-cooled. ★ pince d'électrode de four à arc → *pince 11.* R зажим электрода дуговой печи. D Elektroden-Fassung. E pinza de electrodo de horno de arco. I morsa dell'elettrodo di forno ad arco. N elektrodeklem (van een boogoven). P zacisk elektrody (pieca łukowego). S elektrodhållare. (841)
4. **body (of a suspension clamp)** : → *body 3*
5. **cable clamp** : an accessory or part of a component to grip the cable or wire to provide strain relief and absorb mechanical stress which would otherwise be transmitted to the termination. ★ serre-câble → *serre-câble 2.* R зажим кабельный. D Zugentlastungsklemme. E aprietacable. I fascia di serraggio; serra-cavi. N kabelklem. P uchwyt przewodu. S kabelklammer. (581)
6. **cable screen clamp** (*Syn.* cable shielding clamp) : a cable clamp to terminate the cable screen. ★ serre-écran de câble → *serre-écran 1.* R зажим экранный. D Kabelschirmklemme. E aprietapantalla de cable. I serra-schermo per cavo. N klem voor kabelafschermmantel. P uchwyt ekranu przewodu. S kabelskärmsklammer. (581)
7. **cable shielding clamp** (*Syn.* cable screen clamp) : → *clamp 6*
8. **clamp** : any fitting which can be fixed on to a conductor. ★ pince → *pince 5.* R зажим. D Klemme. E grapa. I morsa; morsetto. N klem. P uchwyt (przewodu). S linhållare. (466)
9. **clamp** : a non-linear device used for clamping. ★ caleur → *caleur 1.* R фиксирующее устройство. D Halteschaltung. E dispositivo de fijación. I dispositivo di blocco. N vergrendeling. P utrzymywacz poziomu (sygnału). S låsorgan. (702)
10. **clamp fault** (*Syn.* black level shift) : → *shift 5*
11. **dead-end clamp** (*Syn.* anchor clamp) : → *clamp 2*
12. **feeder clamp** : a conducting fitting providing electrical connection between the conductors of a contact system and a feeder cable. ★ griffe d'alimentation → *griffe 2.* R питающий зажим. D Stromklemme. E grifa de alimentación. I (connessione) equipotenziale. N aansluitklem voor elektrische verbinding; voedingsklem. P zacisk zasilania. S ..... (811)
13. **pivot-type suspension clamp** : a suspension clamp whose body can oscillate around a horizontal axis normal to the conductor. ★ pince de suspension oscillante → *pince 10.* R качающийся поддерживающий зажим. D Tragklemme mit Gelenk. E grapa de suspensión oscilante. I morsa di sospensione oscillante. N scharnierende ophangklem. P uchwyt przelotowy wahliwy. S pivoterande hänglinhållare. (466)
14. **suspension clamp** : a fitting which attaches a conductor to a suspension insulator set. ★ pince de suspension → *pince 9.* R поддерживающий зажим. D Tragklemme. E grapa de suspensión. I morsa di sospensione. N ophangklem. P uchwyt przelotowy. S hänglinhållare. (466)
15. **suspension clamp** : a fitting providing mechanical connection between the catenary or contact wire and the supporting assembly. ★ griffe de suspension → *griffe 4.* R подвесной зажим. D Hängerklemme. E grapa de suspensión. I morsetto di sospensione. N ophangklem. P uchwyt. S linhållare. (811)
16. **suspension straps (of a suspension clamp)** : → *strap 1*
17. **tension clamp** (*Syn.* anchor clamp) : → *clamp 2*
18. **trunnion (of a pivot-type suspension clamp)** : → *trunnion 1*
19. **welding current return clamp** : a clamp that is attached to, or in contact with, the workpiece, to connect the welding return cable to the workpiece. ★ connecteur de pièce → *connecteur 20.* R зажим для обратного сварочного кабеля. D Schweißstromrückleitungsklemme. E terminal de conexión. I pinza di ritorno della corrente di saldatura. N werkstukklem. P zacisk kabla spawalniczego prądu powrotnego. S återledarklämma. (851)

clamped

1. **clamped capacitance** : → *capacitance 7*
2. **partially clamped capacitance** : → *capacitance 13*

clamping

1. **black-level clamping** : clamping in which the blanking level is maintained at a specified value. *Note.* — Where the line synchronising signal is a pulse, black-level clamping takes place in the back porch. ★ alignement du niveau du noir → *alignement 5.* R фиксация уровня черного. (723)
2. **clamping** : a process in which some feature of a recurrent signal, for instance its d.c. component, is held at a reference value. *Notes. 1* — The reference value may be fixed or adjustable. *2* — The French term "clampage" applies to a specific clamping process, for instance in television. ★ calage → *calage 1.* R фиксация уровня. D Festhalten (eines Signalwertes). E sujeción (de una señal). I ancoraggio; blocco al valore di riferimento. N vergrendeling. P utrzymywanie poziomu (sygnału). S låsning. (702)
3. **clamping** : holding the level of a defined part of the complete video signal at a specified value. *Notes. 1* — Clamping is usually used to restore the DC component of a picture. *2* — Associated term : to clamp. ★ clampage → *clampage 2.* R фиксация. (723)
4. **clamping pulse** : → *pulse 4*

class

1. **accuracy class** : a class of measuring instruments all of which are intended to comply with a relevant set of accuracy requirements. ★ classe de précision → *classe 1.* R класс точности. D Genauigkeitsklasse. E clase de precisión. I classe di precisione. N nauwkeurigheidsklasse. P klasa dokładności. S noggrannhetsklass. (302)
2. **accuracy class** : a designation assigned to an instrument transformer the current (or voltage) error and phase displacement of which remain within specified limits under prescribed conditions of use. ★ classe de précision → *classe 2.* R класс точности. D Klasse. E clase de precisión. I classe di precisione. N nauwkeurigheidsklasse. P klasa dokładności. S noggrannhetsklass. (321)
3. **accuracy class** : a class of measuring relays all of which are intended to comply with a relevant set of accuracy requirements. ★ classe de précision → *classe 3.* R класс точности. D Genauigkeitsklasse. E clase de precisión. I classe di precisione. N nauwkeurigheidsklasse. P klasa dokładności. S noggrannhetsklass. (446)
4. **class A operation** : → *operation 8*
5. **class AB operation** : → *operation 9*
6. **class B operation** : → *operation 10*
7. **class C operation** : → *operation 11*
8. **class index** : → *index 4*
9. **class of an exchange** : the ranking allocated to an exchange for traffic routing. *Note.* — For example serving connection, transit. ★ catégorie d'un commutateur → *catégorie 4.* D Hierarchieklasse einer Vermittlungsstelle. P klasa łącznicy; kategoria łącznicy. (715)
10. **class of insulation** : a standard classification applied to an insulating material for use in electrical apparatus and machines and specifying the nature of the material and a recommended limiting temperature. *Note.* — Lower class materials may be used in parts not subject to the highest temperatures without lowering the classification of the insulating system as a whole. ★ classe d'isolation → *classe 5.* R класс изоляции. D Isolierstoffklasse. E clase de aislamiento. I classe d'isolamento. N isolatieklasse. P klasa izolacji. S isolationsklass. (811)
11. **class 1 monitor** (*Syn.* picture monitor) : → *monitor 10*
12. **temperature class** (of electrical apparatus for explosive atmospheres) : a classification of electrical apparatus for

explosive atmospheres based on its maximum surface temperature. ★ classe de température → *classe 4.* R температурный класс (взрывозащищенного электрооборудования). D Temperaturklasse. E clase de temperatura (de un material eléctrico para atmósferas explosivas). I classe di temperatura (di una costruzione elettrica per atmosfere esplosive). N temperatuurklasse. P klasa temperaturowa (urządzeń elektrycznych przeciwwybuchowych). S temperaturklass. (426)

13. **user class of service** : the category that defines the characteristics of a call available to a user of a public telecommunication service. *Note.* — The characteristics for a user class of service could be for example binary rate, terminal operating mode, code structure, access barred. ★ catégorie d'usager → *catégorie 5.* R класс обслуживания абонентов. D Benutzerklasse. E categoría de usuarios. I classe d'utente. N abonneekenmerken. P kategorie użytkownika. S användarkategori. (721)
14. **(user) class of service signal** : a character or group of characters among the selection signals identifying the user's class of service of the calling party. ★ signal de catégorie → *signal 90.* R сигнал "класс обслуживания (абонентов)". D Benutzerklassenkennzeichen. E señal de categoría. I segnale di classe di servizio. N (aansluiting)kenmerkensignaal. P sygnał kategorii użytkownika. S kategorisignal. (721)

classification

1. **cost classification** : → *cost 7*

class-of-service

1. **class-of-service tone** : → *tone 4*

clause

1. **fuel cost adjustment clause** : a price adjustment clause based upon variations in fuel cost. ★ clause combustible → *clause 1.* R пункт об установлении затрат на топливо. D Kohlenklausel. E cláusula combustible. I clausola combustibile. N brandstofclausule. P klauzula paliwowa. S ..... (691)
2. **minimum payment clause** : a clause requiring the consumer to pay to a supply undertaking, for a specified period, at least the price of a specified quantity of energy, whether consumed in its entirety or not, or a specified minimum sum. ★ clause de minimum de consommation → *clause 4.* R пункт о минимальной оплате. D Mindestabnahme; Mindestzahlung. E cláusula de mínimo consumo; cláusula de consumo garantizado. I clausola di consumo minimo garantito. N garantieclausule voor het verbruik. P określenie minimalnej opłaty. S minimiavgiftsklausul. (691)
3. **power factor clause** : a price adjustment clause setting out the charges which apply according to the level of power factor or to the magnitude of reactive energy consumption. ★ clause de facteur de puissance → *clause 3.* R пункт об учете коэффициента мощности. D Blindstromklausel. E cláusula de factor de potencia; cláusula de energía reactiva. I clausola di fattore di potenza; clausola di energia reattiva. N blindstroomclausule; arbeidsfactorclausule. P klauzula współczynnika mocy. S effektfaktorklausul. (691)
4. **price adjustment clause** : a clause by which some or all of the charges set out in tariffs are subject to revision, either as a function of other prices (fuel, labour, etc.) or as a function of the variation of certain price indices or of an index peculiar to electricity. ★ clause de variation des prix → *clause 6.* R пункт об изменении тарифов. D Preisanpassungsklausel; Preisänderungsklausel. E cláusula de variación de precios; cláusula índice. I clausola di variazione dei prezzi. N prijsvariatieclausule. P klauzula przy ustalaniu opłat taryfowych. S ..... (691)
5. **revision clause** : a clause permitting the revision of the conditions of supply where economic or technological changes cause significant changes in the economics of the contract. ★ clause de révision → *clause 5.* R пункт о пересмотре договора. D Wirtschaftsklausel. E cláusula de revisión. I clausola di revisione. N herzieningsclausule. P klauzula rewizyjna. S prisändringsklausul. (691)

clean

1. **clean feed circuit** : → *circuit 36*

clear

1. **CIE standard clear sky** : → *sky 1*
2. **clear bulb** : → *bulb 4*
3. **tubular clear emitter (high temperature)** : → *emitter 13*
4. **tubular clear emitter (low temperature)** : → *emitter 14*

clearance

1. **bearing clearance** : the difference in diameter between the journal and the bearing lining. ★ jeu de coussinet → *jeu 3.* R зазор подшипника. D Lagerspiel. E juego de cojinete. I gioco del cuscinetto. N lagerspeling. P luz łożyskowy. S lagerspel. (411)
2. **clearance** : the distance between two conductive parts along a string stretched the shortest way between these conductive parts. ★ distance d'isolement → *distance d'isolement 1.* R изоляционный промежуток. D Schalgweite; Luftstrecke. E distancia de aislamiento. I distanza d'isolamento. N slagwijdte; luchtweg. P odstęp izolacyjny. S luftavstånd. (441)
3. **clearance between open contacts** : the total clearance between the contacts, or any conductive parts connected thereto, of a pole of a mechanical switching device in the open position. ★ distance d'isolement entre contacts ouverts → *distance d'isolement 4.* R изоляционный промежуток между разомкнутыми контактами. D Schaltstrecke (eines mechanischen Schaltgerätes). E distancia de aislamiento entre contactos abiertos. I distanza d'isolamento tra i contatti aperti. N slagwijdte van het geopende contact; luchtweg van het geopende contact. P przerwa biegunowa. S luftavstånd mellan öppna kontakter. (441)
4. **clearance between poles** : the clearance between any conductive parts of adjacent poles. ★ distance d'isolement entre pôles → *distance d'isolement 5.* R изоляционный промежуток между полюсами. D Schlagweite zwischen den Polen; Luftstrecke zwischen den Polen. E distancia de aislamiento entre polos. I distanza d'isolamento tra i poli. N slagwijdte tussen polen; luchtweg tussen polen. P odstęp izolacyjny międzybiegunowy. S luftavstånd mellan poler. (441)
5. **clearance to earth** : the clearance between any conductive parts and any parts which are earthed or intended to be earthed. ★ distance d'isolement à la terre → *distance d'isolement 3.* R изоляционный промежыток на землю. D Schlagweite zur Erde; Luftstrecke zur Erde. E distancia de aislamiento a tierra. I distanza d'isolamento verso terra. N slagwijdte naar aarde; luchtweg naar aarde. P odstęp izolacyjny doziemny. S luftavstånd till jord. (441)
6. **clearance to obstacles** : the minimum distance, under specified conditions, between any live parts and any obstacle at earth potential. ★ distance aux obstacles → *distance 6.* R расстояние до препятствий. D minimaler Abstand zu Objekten. E distancia a obstáculos. I distanza dagli ostacoli. N afstand tot objecten. P odstęp od przeszkód. S minsta avstånd till hinder. (466)
7. **clearance underneath the gear case** : the minimum distance between the gear case and the gauge line with maximum acceptable wear of the wheels. ★ hauteur libre sous carter → *hauteur 11.* R клиренс по кожуху зубчатой передачи. D Bodenfreiheit. E altura libre bajo cárter. I franco minimo (della scatola ingranaggi). N vrije ruimte onder de tandwielkast. P prześwit pod skrzynią przekładniową. S kåpa-rälsavstånd. (811)
8. **electrical clearance** (of contact line) : the minimum distance permitted between fixed structures and parts energized at contact line voltage. ★ distance d'isolement → *distance d'isolement 2.* R изоляционный промежуток (контактной сети). D Schutzabstand (zur Fahrleitung). E distancia de aislamiento (de la línea de contacto). I distanza d'isolamento (della linea di contatto). N isolatie afstand. P odstęp izolacyjny (w sieci trakcyjnej). S ..... (811)
9. **electrification clearance gauge** : → *gauge 2*
10. **fault clearance** : the disconnection from the electrical system of a defective item, by automatic or manual operations, in order to maintain or restore supply. ★ élimination d'un défaut → *élimination 1.* R отключение замыкания. D Fehlerbeseitigung. E eliminación del defecto. I eliminazione di un guasto. N opheffen van een storing. P wyłączenie zwarcia. S felbortkoppling. (604)
11. **fault clearance time** : → *time 59*
12. **ground clearance** : the minimum distance, under specified conditions, between any live parts and the ground. ★ distance au sol → *distance 5.* R расстояние до поверхности земли; габарит до земли. D minimaler Bodenabstand. E distancia al suelo. I distanza dal terreno. N afstand tot maaiveld. P odstęp od ziemi. S fri höjd över mark. (466)

13. **pantograph clearance gauge** : → *gauge 4*
14. **phase-to-earth clearance** : the minimum distance between any live parts and all structures at earth potential. ★ distance à la masse → *distance 2.* R воздышный промежуток между фазой и землей. D Abstand Leiter-Erde. E distancia a tierra. I distanza verso massa. N slagwijdte naar aarde. P odstęp doziemny. S jordavstånd. (466,605)
15. **phase-to-phase clearance** : the minimum distance between live parts of two adjacent phases taking into account all operating conditions. ★ distance entre phases → *distance 19.* R воздушный промежуток между фазами. D Abstand Leiter-Leiter. E distancia entre fases. I distanza fra le fasi. N slagwijdte tussen fasen. P odstęp międzyfazowy. S fasavstånd. (605)
16. **safe clearance working** : → *working 7*
17. **working clearance** : the minimum safe distance to be observed between normally exposed live parts and any person working in a substation. ★ distance de travail → *distance 16.* R рабочий воздушный промежуток. D Schutzabstand. E distancia de trabajo. I distanza di lavoro. N ..... P odstęp bezpieczny (przy pracy ludzi). S säkerhetsavstånd. (605)

clear-back

1. **clear-back signal** : → *signal 47*

clear-forward

1. **clear-forward signal** : → *signal 48*

clearing

1. **backward clearing** : clearing of a circuit, starting at the far end relative to the direction of call set-up. ★ libération en arrière → *libération 4.* R разъединение в обратном направлении. D Rueckwaertsausloesen. E liberación hacia atrás. I liberazione a ritroso. N terugwaarts verbreken. P zwalnianie wstecz. S nedkoppling i backriktning. (714)
2. **call clearing delay** : → *delay 3*
3. **clearing** : the process of releasing a telecommunication connection so that its various constituent links and functional units are correctly returned to their free condition. ★ relâchement → *relâchement 2.* R разъединение. D ausloesen; Ausloesung. E despeje. I liberazione; svincolo. N vrijgeven. P oczyszczanie. S nedkoppling. (714)
4. **clearing signal** : → *signal 49*
5. **confirmation of clearing signal** : → *confirmation 1*
6. **forward clearing** : clearing of a circuit, starting at the near end relative to the direction of call set-up. ★ libération en avant → *libération 5.* R разъединение в прямом направлении. D Vorwaertsausloesen. E liberación hacia adelante. I liberazione in avanti. N voorwaarts verbreken. P zwalnianie w przód. S nedkoppling i framriktning. (714)
7. **total clearing time** (*Syn.* operating time) : → *time 123*

cleat

1. **cleat (in a pad and chimney foundation)** : a device attached to the stub for the purpose of reinforcing its connection to the foundation (see fig. 4.9). ★ broche (dans une fondation à dalle et cheminée) → *broche 4.* R анкерующий уголок (для грибовидных фундаментов). D Knaggen (in einem Pilzfundament). E travesaños (del anclaje). I squadretta (di una fondazione a piastra e pilastrino). N knag. P zbrojenie kotwy słupa. S ..... (466)

clevis

1. **clevis and tongue coupling** : → *coupling 5*
2. **tower swivel clevis** : a fitting free to rotate around an axis and attached to the steelwork of a support. (see figure 466-8). ★ chape tourillon → *chape 3.* R вертлюг. D Abspanngelenk. E brida giratoria. I forcella a perno. N afspanscharnier. P wieszak obrotowy. S isolatorfäste. (466)

click

1. **click** : an electromagnetic disturbance which, when measured in a specified way, has a duration not exceeding a specified value. ★ claquement → *claquement 2.* R кратковременная помеха. D Knacken; Knackstörung. E chasquido. I click. N klikstoring. P trzask. S klick. (161)
2. **click** (in telecommunications) : noise of very short duration. ★ claquement → *claquement 3.* R щелчок (в электросвязи). D Knacken (in der Telekommunikation). E chasquido (en telecomunicación). I clic. N klik; tik. P trzask (w telekomunikacji). S knäpp. (702)
3. **click** (*Syn.* pop) : a spurious sharp noise generated when reproducing a disk. ★ claquement → *claquement 4.* R щелчок. D Knacker. E chasquido. I clic. N tik; plop. P stuk. S knäpp. (806)
4. **click rate** : → *rate 11*
5. **key clicks** (*Syn.* telegraph noise) : → *noise 87*

clip

1. **clip** : a resilient device which deflects on mating to produce a connection. ★ clip → *clip 2.* R зажим контактный. D Klammer. E clip. I clip. N schuifklem. P zatrzask. S klämma. (581)
2. **clip connection** : → *connection 13*
3. **clip post** : → *post 2*

clipper

1. **clipper** : a limiter used for clipping. ★ écrêteur → *écrêteur 1.* R односторонний ограничитель. D Klipper. E descrestador. I limitatore per l'eliminazione della cresta; screstatore. N aftopper. P obcinacz szczytów (sygnału). S toppnivåbegränsare. (702)

clipping

1. centre clipping (inappropriate term) : an action by which all the instantaneous values of a signal lying between two fixed thresholds of opposite low value are replaced by values closer to zero, other instantaneous values of the signal being preserved. ★ écrêtage du centre → *écrêtage 5.* R ограничение по центру. D Zentral-Klippen (unpassender Begriff). E descrestado del centro. I eliminazione del centro. N afsnijden rond het midden. P obcinanie przyzerowe. S ..... (702)
2. **clipping** : a form of limiting in which all the instantaneous values of a signal exceeding a predetermined threshold value are reduced to values close to that of the threshold, all other instantaneous values of the signal being preserved. ★ écrêtage → *écrêtage 3.* R одностороннее ограничение. D Klippen; Abschneiden. E descrestado. I limitazione per eliminazione della cresta; screstatura. N aftopping. P obcinanie szczytów (sygnału). S toppnivåbegränsning. (702)

clock

1. **clock** : a device that provides a cyclic timing signal. *Note.* — When replicated sources are used for reliability reasons, the assembly of these is regarded as a single clock. ★ horloge → *horloge 1.* R часы; тактовый генератор. D Taktgenerator. E reloj; generador de ritmo. I orologio. N klok. P zegar; generator rytmu. S klocka. (702,704)
2. **master clock** : a clock used to control the frequency of other clocks. ★ horloge maîtresse → *horloge 3.* R ведущий генератор. D Haupttakt. E reloj principal; reloj maestro. I orologio principale. N moederklok. P zegar główny. S huvudur. (704,714)
3. **reference clock** : a clock of very high stability, accuracy, and reliability which is used as the single reference standard for the clocks in a synchronized network. ★ horloge de référence → *horloge 2.* R эталонный генератор. D Bezugstakt. E reloj de referencia. I orologio di riferimento. N standaardklok. P zegar odniesienia. S referensklocka. (704)

clockwise

1. **clockwise polarization** (*Syn.* right-hand polarization) : → *polarization 42*
2. **clockwise polarized wave** (*Syn.* right-hand polarized wave) : → *wave 49*

clogging

1. **head clogging** : the accumulation of particles from the tape on the front surface of the heads especially in the vicinity of the gaps. ★ colmatage des têtes vidéo → *colmatage 1.* R замазывание головки. D Kopfverschmutzung, Kopfzuschmieren. E suciedad de las cabezas de imagen. I intasamento delle testine video. N kopvervuiling. P zabrudzenie głowicy. S tilltäppning av huvud. (806)

closed

1. **closed air-circuit** : → *air-circuit 1*
2. **closed air-circuit fan-ventilated air-cooled** : → *fan-ventilated 1*

3. **closed air-circuit separately fan-ventilated air-cooled** : → *fan-ventilated 2*
4. **closed air-circuit water-cooled** : → *water-cooled 1*
5. **closed circuit transition auto-transformer starting** (*Syn.* closed transition auto-transformer starting) : → *starting 6*
6. **closed position** : → *position 3*
7. **closed private network** : → *network 14*
8. **closed radioactive source** : → *source 5*
9. **closed transition auto-transformer starting** : → *starting 6*
10. **closed user group** : → *group 4*
11. **partially closed user group** : → *group 47*
12. **time to stable closed condition** : → *time 211*

closed-circuit

1. **closed circuit** : a circuit with a continuous path for current. ★ circuit fermé → *circuit 71.* R замкнутая цепь. D geschlossener Stromkreis. E circuito cerrado. I circuito chiuso. N gesloten (stroom)kring. P obwód zamknięty. S (sluten) strömkrets. (151)
2. **closed circuit** : a circuit for testing, rehearsal or recording of programmes or for other purposes, solely for use within the production centre. ★ circuit local → *circuit 77.* R внутренняя линия. (723)
3. **closed circuit cooling** : → *cooling 1*
4. **closed-circuit television** : → *television 4*

closed-loop

1. **closed loop stabilization** : → *stabilization 1*
2. **closed-loop control** (*Syn.* feedback control) : → *control 100*

close-open

1. **close-open time** : → *time 22*

close-talking

1. **close-talking microphone** : → *microphone 6*
2. **close-talking sensitivity** : → *sensitivity 3*

closing

1. **circuit-breaker with lock-out preventing closing** : → *circuit-breaker 7*
2. **closing** : the closing of a circuit-breaker by either manual or automatic control of protective devices. *Note.* — The expression "closing" of a network item (line, transformer) in fact means closing of the associated circuit-breakers. ★ enclenchement → *enclenchement 3.* R включение. D Einschalten. E conexión. I richiusura. N inschakelen. P załączenie. S tillslag. (604)
3. **closing operation** : → *operation 12*
4. **closing time** : → *time 23*
5. **closing time of a break contact** : → *time 24*
6. **closing time of a make contact** : → *time 25*
7. **closing time of a output-break circuit** : → *time 26*
8. **closing time of a output-make circuit** : → *time 27*
9. **ring closing** : 1. the transition from radial operation to ring operation. 2. establishing a ring connection. ★ bouclage → *bouclage 1.* R замыкание кольца. D Ringbildung. E cierre del anillo. I chiusura d'anello. N het sluiten van een ring. P zamykanie pierścienia. S övergång till slingdrift. (603)

clothing

1. **conductive clothing** : clothing made of natural or synthetic material interwoven with conductive threads to shield workers from the effect of the electric field. ★ vêtement conducteur → *vêtement 1.* R экранирующий комплект одежды. D leitfähige Schutzkleidung. E vestimenta conductora. I abito isolante. N geleidende kleding. P ubranie przewodzące. S ledande klädsel. (604)

cloud

1. **cloud chamber** : → *chamber 4*
2. **cloud chamber** (*Syn.* Wilson cloud chamber) : → *chamber 18*
3. **cloud point** : → *point 3*
4. **expansion cloud chamber** (*Syn.* Wilson cloud chamber) : → *chamber 17*
5. **total cloud amount** : → *amount 1*
6. **Wilson cloud chamber** : → *chamber 17*
7. **Wilson cloud chamber** : → *chamber 18*

clover-leaf

1. **clover-leaf antenna** : → *antenna 30*

cluster

1. **ion cluster** : a group of ions close together, along or near the path of an ionizing particle. ★ nuage d'ions → *nuage 3.* R ионный сгусток. D Ionisations-Cluster. E nube de iones. I ammasso di ioni. N ionenhoop; opeenhoping van ionen. P grupa jonowa. S jonmoln. (881)
2. **network cluster** : a final circuit group and all the high usage circuit groups which have at least one traffic parcel for which the final circuit group is in the last choice route. ★ faisceau de faisceaux → *faisceau 29.* D Netzgruppe. P sieć elementarna. (715)

clutch

1. **magnetic friction clutch** : a friction clutch in which magnetic devices are used to engage or disengage the friction surfaces. ★ embrayage magnétique à friction → *embrayage 1.* R магнитная фрикционная муфта. D magnetische Reibungskupplung. E embrague magnético de fricción. I innesto a frizione magnetico. N magnetische frictiekoppeling. P magnetyczne sprzęgło tarciowe. S elektrisk friktionskoppling. (411)

c.m.f.

1. **c.m.f.** (*Syn.* field strength-distance product) : → *product 3*

CMRR

1. **CMRR** (*Syn.* common mode rejection ratio) : → *ratio 15*

coach

1. **individual coach lighting** : → *lighting 12*
2. **motor coach** (*Syn.* motor car) : a railway motor vehicle, generally electric, itself carrying a payload. ★ automotrice → *automotrice 1.* R моторный вагон. D elektrischer Triebwagen. E automotor. I automotrice (se elettrica); elettromotrice. N motorrijtuig. P wagon silnikowy (wagon samojezdny). S motorvagn. (811)
3. **multiple coach lighting** : → *lighting 22*

coal

1. **coal ash content meter** : → *content meter 2*

coarse

1. **coarse control element** (*Syn.* coarse control member) : → *control 33*
2. **coarse control member** : → *control 33*
3. **coarse control (shimming)** : → *control 34*
4. **coarse groove** : → *groove 2*
5. **coarse synchronizing** : → *synchronizing 1*

coasting

1. **coasting** : the free running of a train with no traction current and no brakes applied. ★ marche sur l'erre → *marche 31.* R езда на выбеге. D Auslauf. E marcha por inercia. I marcia per inerzia. N uitlopen. P jazda z wybiegu; jazda rozpędu. S rullning. (811)

coated

1. **coated bulb** : → *bulb 5*
2. **coated electrode** : → *electrode 13*

coating

1. **antireflection coating** : a thin, dielectric or metallic film (or several such films) applied to an optical surface to reduce the reflectance and thereby increase the transmittance. *Note.* — The ideal value of the refractive index of a single layered film is the square root of the product of the refractive indices on either side of the film, the ideal optical thickness being one quarter of a wavelength. ★ couche antireflet → *couche 8.* R неотражающее покрытие. D Antireflexionsschicht. E revestimiento antirreflectante. I rivestimento antiriflettente.

N antireflectielaag. P pokrycie przeciwodblaskowe. S antireflexbeläggning. (731)

2. **coating powder** : → *powder 1*
3. **fluidized bed coating** : a coating process in which either: 1. A part to be coated is prehaeted, dipped into a fluidized bed of powdered plastic particles, and usually subsequently heated to fuse the adhering particles; or 2. A part to be coated, which is at least slightly electrically conductive and earthed (grounded), is dipped cold into a fluidized bed of electrostatically charged powdered plastic particles which adhere to the part, and is subsequently heated to fuse the adhering particles. ★ revêtement en bain fluidisé → *revêtement 5.* R покрытие псевдоожиженным слоем. D Wirbelsinter-Beschichten. E recubrimiento en lecho fluidificado. I rivestimento in letto fluido. N wervelbedlakken. P pokrycie przez fluidyzację. S virvelsintring. (212)
4. **primary coating** : a thin coating applied directly to the cladding to preserve integrity of the cladding surface. ★ revêtement primaire → *revêtement 6.* R первичное покрытие. D Primär-Ummantelung. E recubrimiento primario. I rivestimento primario. N primaire deklaag. P osłona wewnętrzna. S primärbeläggning. (731)
5. **secondary coating** (*Syn.* fibre jacket) : a coating applied directly to the primary coating to reinforce the protection of the optical fibre during handling and cabling. ★ revêtement secondaire → *revêtement 7.* R вторичное покрытие; защитное покрытие волокна. D Sekundär-Ummantelung; Faserumhüllung. E recubrimiento secundario; reforzamiento de fibra. I rivestimento secondario; guaina; camicia della fibra. N secundaire deklaag; vezelbeschermmantel. P osłona zewnętrzna. S sekundärskydd. (731)

coaxial

1. **coaxial antenna** : → *antenna 31*
2. **coaxial line** : → *line 12*
3. **coaxial pair** : → *pair 2*
4. **semi-rigid coaxial line** : → *line 140*
5. **slotted coaxial balun** : → *balun 5*

code

1. **adaptive differential pulse code modulation** : → *modulation 1*
2. **alternate mark inversion code** (*Syn.* AMI (abbreviation); bipolar code) : a paired-disparity code employing a ternary digital signal to convey binary digits, in which the binary 1 states are represented by signal elements that are normally of alternate positive and negative polarity but equal in amplitude, and in which binary 0 states are represented by signal elements having zero amplitude. *Note.* — In telegraphy and data communication, the binary 1 state is known as the Z state (or "mark") and the binary 0 state is known as the A state (or "space"). ★ code bipolaire (alternant) → *code 15.* R код с чередованием полярности импульсов; ЧПИ; биполярный код. D Bipolarcode; alternierender Code; AMI (Abkürzung). E código bipolar (alternante). I codice bipolare alternato; AMI (Alternate Mark Inversion) (abbreviazione). N bipolaire code. P kod dwubiegunowy. S alternerande pulsinverteringskod; AMI-kod. (704)
3. **answer-back code** (*Syn.* call-sign) : unique sequence of characters identifying a particular telegraph terminal or data station. ★ indicatif → *indicatif 2.* R автоответ. D Stationskennung; Teilnehmerkennung. E señal de identificación. I identificativo. N oproepsignaal. P znamię. S svarskod. (721)
4. **balanced code** : a line code producing an encoded signal which has a finite digital sum variation, and which has no discrete zero-frequency component in its power spectrum. ★ code à somme bornée → *code 10.* R сбалансированный код; балансный код. D symmetrischer Code. E código equilibrado. I codice bilanciato. N gebalanceerde code. P kod zrównoważony. S balanserad kod. (704)
5. **bipolar code** (*Syn.* alternate mark inversion code) : → *code 2*
6. **code** : a set of rules establishing a correspondence between data and their representation in discrete form. ★ code → *code 2.* R код. D Code. E código. I codice. N code. P kod. S kod. (101)
7. **code** : a system of rules defining a one-to-one correspondence between information and its representation by characters, symbols or signal elements. ★ code → *code 3.* R код. D Code. E código. I codice. N code. P kod. S kod. (701,702,721)
8. **code combination** (*Syn.* code word) : → *word 1*
9. **code combination** : → *combination 2*
10. **code conversion** : → *conversion 4*
11. **code converter** : → *converter 3*
12. **code convertor** : → *convertor 4*
13. **code division** : → *division 1*
14. **code division multiplexing** : → *multiplexing 1*
15. **code independent** : → *independant 1*
16. **code representation** (*Syn.* code combination) : → *combination 2*
17. **code reversion** : → *reversion 1*
18. **code shift** : → *shift 8*
19. **code value** (*Syn.* code combination) : → *combination 2*
20. **code word** : → *word 1*
21. **code word** : → *word 2*
22. **code word** : → *word 3*
23. **constant ratio code** : an error detecting code which uses in each character or function signal an assigned number of elements of each type. *Note.* — A constant ratio two-condition n-unit code comprising p elements of A condition in n elements is designated by the expression "p in n code". ★ code à rapport constant → *code 9.* R код с постоянным отношением; равновесный код. D Code mit konstantem Verhältnis. E código de relación constante. I codice a rapporto costante. N constante-verhouding-code. P kod wyważony. S konstantförhållandekod. (721)
24. **cyclic code** : a code in which every cyclic shift of a code word is itself a code word. ★ code cyclique → *code 19.* R циклический код. D zyklischer Code. E código cíclico; código polinominal. I codice ciclico. N cyclische code. P kod cykliczny. S cyklisk kod. (721)
25. **data code** : a system of rules and conventions according to which the data signals representing a message should be formed and translated. ★ code de données → *code 21.* R код данных. D Datencode. E código de datos. I codice dato. N datacode. P kod teledacyjny. S datakod. (721)
26. **destination code** : a sequence of digits identifying the country in which the called subscriber is located or a specified network in that country. *Note.* — The telex destination codes have been fixed by the CCITT Recommendation F.69. ★ code de destination télex → *code 20.* R телексный код назначения. D Netzkennzahl. E código de destino télex. I codice di destinazione. N bestemmingscode. P kod przeznaczenia. S landsnummer. (721)
27. **differential pulse code modulation** : → *modulation 17*
28. **equal length code** : a code the character signals of which are composed of the same number of unit elements, each having the same duration. ★ code à moments → *code 6.* R равномерный код. D gleichgewichtiger Code. E código de momentos. I codice di uguale lunghezza. N code met vaste lengte. P kod jednowymiarowy; kod równomierny. S isomerisk kod. (721)
29. **error correcting code** : an error detecting code which also permits the automatic correction of a proportion of the errors detected, without using a backward channel. ★ code correcteur d'erreurs → *code 18.* R код с исправлением ошибок. D Fehlerkorrekturcode. E código corrector de errores; código autocorrector. I codice a correzione d'errore. N foutencorrigerende code. P kod korekcyjny. S felkorrigerande kod. (702,721)
30. **error detecting code** : a redundant code in which the rules of construction permit the automatic detection of certain errors which have been produced during recording, processing or transfer of information, when these errors have caused a deviation from the rules. ★ code détecteur d'erreurs → *code 25.* R код с обнаружением ошибок. D fehlererkennender Code. E código detector de errores. I codice rivelatore di errori. N foutdetecterende code. P kod detekcyjny. S felupptäckande kod. (702,721)
31. **error protection code** : a code designed to permit error detection with or without error correction. ★ code de protection contre les erreurs → *code 23.* R код защиты от ошибок. D Fehlersicherungscode. E código de protección contra los errores. I codice protetto. N tegen fouten beschermde code. P kod protekcyjny. S felskyddskod. (721)
32. **flux code** (of a luminaire) : set of values of flux triplet, downward flux fraction and light output ratio, representative of the relative flux distribution of the luminaire, used in the

calculation of utilization factors and/or utilances. ★ code de flux → *code 22.* R код светильника по потоку. D ..... E código de flujo. I codice del flusso. N lichtstroomcode (van een armatuur). P wskaźnik strumienia oprawy. S ..... (845)

33. **generic pulse code modulation** : → *modulation 23*
34. **interlock code** : information sent in the forward direction and, in some circumstances, in the backward direction, indicating the closed user group involved in the call. ★ code de verrouillage → *code 24.* R код блокировки. D Verknüpfungscode. E código de cerramiento; código de enclavamiento. I codice di gruppo. N ..... P kod zamkniętej grupy użytkowników. S blockeringskod. (721)
35. **ISO 7 bits code** (*Syn.* International Alphabet No.5) : → *alphabet 1*
36. **line code** : a code, chosen to suit the characteristics of a transmission channel, defining the equivalence between a set of digits, represented by the signal elements of the transmitted source signal, and the sequence of signal elements in the corresponding line signal. ★ code en ligne → *code 27.* R линейный код. D Leitungscode. E código en línea. I codice di linea. N lijncode. P kod liniowy. S linjekod. (704)
37. **modified alternate mark inversion code** (*Syn.* modified AMI) : a line code, based on alternate mark inversion code, in which alternate mark inversion violations occur in accordance with a defined set of rules. *Note.* — Examples of such codes are HDB3, B6ZS. ★ code bipolaire modifié → *code 16.* R модифицированный биполярный код. D modifizierter Bipolarcode; modifizierter AMI-Code. E código bipolar modificado; código AMI modificado. I codice bipolare alternato modificato; codice AMI modificato. N gewijzigde bipolaire code. P kod dwubiegunowy zmodyfikowany. S modifierad AMI. (704)
38. **Morse code** : a two-conditions telegraph code in which characters are represented by groups of dots and dashes, these groups being separated by spaces. ★ code Morse → *code 30.* R код Морзе. D Morse-Code. E código Morse. I codice Morse. N Morsecode. P kod Morse'a. S morsekod. (721)
39. **n-unit code** : equal-length code according to which the character signals are composed of n unit elements. ★ code à n moments → *code 7.* R *n*-элементный код. D n-bit-Code. E código de n momentos. I codice multiplo. N n-eenhedencode. P kod n-elementowy. S n-enhetskod. (721)
40. **n-unit code alphabet** : → *alphabet 6*
41. **paired-disparity code** : a line code in which the sequence of digits in the original signal is divided into successive groups of digits, some of which, when encoded, may be represented by one of two combinations of signal elements of equal and opposite disparity, the specific combinations used being chosen such that the digital sum tends to zero whenever possible, and in which the other groups of digits, if any, in the original signal are represented by combinations of signal elements of zero disparity. ★ code à disparité compensée → *code 5.* R попарно сбалансированный код. D Paar-Ungleichheitscode. E código con disparidad compensada. I codice a disparità compensata. N gepaarde dispariteitscode. P kod o skompensowanym zrównoważeniu. S ..... (704)
42. **parity code** : an error protection code in which each character signal or block signal contains a number of elements of the same type which is always even or always odd. ★ code à parité → *code 8.* R код с проверкой на четность (нечетность). D Paritätscode. E código de paridad. I codice di parità. N pariteitscode. P kod parzystościowy. S paritetskod. (721)
43. **PCM binary code** : a pulse code in which the quantized values, from the most negative to the most positive, are identified by binary numbers taken in natural order. ★ code binaire MIC → *code 13.* R двоичный код ИКМ. D PCM-Binärcode. E código binario. I codice binario PCM. N PCM-binaire-code. P kod impulsowy binarny. S binär PCM-kod. (704)
44. **pulse code** : a set of rules defining the equivalence between each quantized value and a particular arrangement of digits used to represent it. ★ code d'impulsions → *code 26.* R импульсный код. D Pulscode. E código de impulsos. I codice a impulsi. N pulscode. P kod impulsowy. S pulskod. (704)
45. **pulse code modulation** : → *modulation 50*
46. **redundant code** : a code according to which a larger number of characters, symbols or signal elements than strictly necessary are used to represent information. *Examples : 1*— A five-unit code using all the characters of International Telegraph Aphabet No.2 is not redundant. *2*— A seven-unit code such as International Telegraph Alphabet No.3 which uses only signals made of four elements of A condition and three elements of Z condition is redundant. ★ code redondant → *code 32.* R избыточный код. D redundanter Code. E código redundante. I codice con ridondanza. N redundante code. P kod nadmiarowy. S redundant kod. (702,721)
47. **redundant line code** : a line code using more encoded signal elements than strictly necessary to represent groups of digits of the original signal. ★ code en ligne redondant → *code 28.* R избыточный линейный код. D redundanter Leitungscode. E código en línea redundante. I codice di linea ridondante. N overdadige lijncode. P kod liniowy nadmiarowy. S redundant linjekod. (704)
48. **short code selection** : → *selection 17*
49. **symmetrical binary code** : a pulse code in which the positive or negative sign of a quantized value is represented by one binary digit, and in which the magnitude is represented by the remaining digits. *Note.* — The order of the digits and the use made of the binary symbols 0 and 1 in the various digit positions must be specified. ★ code binaire symétrique → *code 14.* R симметричный двоичный код. D symmetrischer Binärcode. E código binario simétrico. I codice binario simmetrico. N symmetrische binaire code. P kod binarny symetryczny. S symmetrisk binär kod. (704)
50. **telegraph code** : a system of rules and conventions according to which the telegraph signals representing a message should be formed and translated. ★ code télégraphique → *code 33.* R телеграфный код. D Telegrafiecode. E código telegráfico. I codice telegrafico. N telegraafcode. P kod telegraficzny. S telegrafkod. (721)
51. **to code** (*Syn.* to encode) : → *encode 1*
52. **Van Duuren code** : a seven unit two-condition constant ratio code used in synchronous radiotelegraphy and which uses in each character signal four elements of A condition. *Note.* — This code is defined by CCIR recommendation 342 and its alphabet is International Telegraph Alphabet No.3. ★ code Van Duuren → *code 34.* R код Ван Дюрена. D van-Duuren-Code. E código Van Duuren. I codice di Van Duuren. N Van Duuren-code. P kod Van Duurena. S van Duuren-kod. (721)

codec

1. **PCM codec** (*Syn.* PCM encoder-decoder) : an assembly of a PCM encoder and a PCM decoder operating in opposite directions, in the same equipment. *Note.* — The meaning of the term is often widened to embrace an assembly of equipment for quantizing a signal sample, encoding the quantized value as a code word, generating the required digital signal, and for performing the complementary processes in the opposite direction. ★ codec MIC → *codec 1.* R кодек ИКМ. D PCM-Coder-Decoder; PCM Codec. E codificador — descodificador MIC. I codec PCM; codificatore/decodificatore PCM. N PCM-codec. P koder-dekoder (w modulacji impulsowo-kodowej); kodek. S PCM-kodek. (704)

coded

1. **automatic coded access control** : → *control 7*
2. **coded signal** : → *signal 50*

coder

1. **coder** (*Syn.* encoder) : equipment for coding the primary colour television signals. ★ codeur → *codeur 2.* R кодер. (723)

coding

1. **coding** (*Syn.* encoding) : → *encoding 1*
2. **coding** (in colour television) : the process of producing a colour picture signal from the primary colour signals generated by the scanning process or from the luminance and chrominance components. *Note.* — Associated term : to code. ★ codage → *codage 4.* R кодирование (в цветном телевидении). (723)
3. **composite (digital) coding** : method for the analogue-digital conversion of a colour television signal in which the conversion is effected on the composite colour signal. ★ codage (numérique) composite → *codage 6.* R (цифровое) композитное кодирование. (723)
4. **(digital) component coding** : method for the analogue-digital conversion of a colour television signal in which the conversion is effected separately on each of the three components. For example, the luminance signal and the two colour-difference signals may be used. ★ codage (numérique) en

composantes → *codage 7.* R (цифровое) компонентное кодирование. (723)

coefficient

1. **absorption coefficient** : of a substance, for a parallel beam of radiation, the quantity μ_{abs} in the expression $\mu_{abs}dx$ for the fraction of energy absorbed in passing through a thin layer of thickness dx of that substance. It is a function of the energy of the radiation. According as to whether dx is expressed in terms of length, mass per unit area, moles per unit area, or atoms per unit area μ_{abs} is called the linear, mass, molar, or atomic absorption coefficient. ★ coefficient d'absorption → *coefficient 1.* R коэффициент поглощения. D Absorptionskoeffizient. E coeficiente de absorcio n. I coefficiente di assorbimento. N absorptiecoëfficiënt. P współczynnik pochłaniania. S absorptionskoefficient. (026,391,881)
2. **acoustic phase coefficient** : imaginary part of the linear exponent of sound propagation. *Note.* — The unit is the radian per metre. ★ déphasage linéique de propagation acoustique → *déphasage 11.* R акустическая фазовая постоянная. D Phasenkoeffizient. E desfase lineal de propagación acústica; coeficiente de fase acústica. I attenuazione specifica di fase. N akoestische fasecoëfficiënt. P przesuwność falowa akustyczna liniowa. S faskonstant; vågtal. (801)
3. **attenuation coefficient** : the quantity μ in the expression μdx for the fraction of a radiation quantity removed by attenuation in passing through a thin layer of thickness dx of a substance, for a parallel beam of specified radiation. It is a function of the energy of the radiation. *Note* According as to whether dx is expressed in terms of length, mass per unit area, moles per unit area or atoms per unit area, μ is called the linear, mass, molar or atomic attenuation coefficient. ★ coefficient d'atténuation → *coefficient 8.* R коэффициент ослабления (веществом). D Schwächungskoeffizient. E coeficiente de atenuación. I coefficiente di attenuazione. N verzwakkingcoëfficiënt. P współczynnik osłabienia. S dämpningskoefficient. (026,391,881)
4. **attenuation coefficient** (*Syn.* attenuation constant (USA)) (α) : the real part of the propagation coefficient. *Note.* — The attenuation cefficient of a transmission line or waveguide is the limit of the attenuation between two points on the axis of the guide, divided by the distance between the points when this distance tends to zero. ★ affaiblissement linéique → *affaiblissement 40.* R коэффициент затухания. D Dämpfungskoeffizient. E atenuación lineal; coeficiente de atenuación. I coefficiente di attenuazione; costante di attenuazione. N dempingscoëfficiënt; verzwakkingcoëfficiënt. P tłumienność jednostkowa. S dämpningskoefficient. (702,705,726,731)
5. **attenuation coefficient** : real part of the linear exponent of sound propagation. *Note.* — The unit is the neper per metre. ★ affaiblissement linéique de propagation acoustique → *affaiblissement 41.* R коэффициент поглощения. D Dämpfungskoeffizient. E atenuación lineal de propagación acústica. I coefficiente di attenuazione. N dempingscoëfficiënt. P tłumienność falowa akustyczna liniowa. S dämpningskonstant. (801)
6. **axial propagation coefficient** : the propagation coefficient evaluated along the axis of an optical fibre in the direction of transmission. ★ exposant linéique de propagation longitudinal → *exposant 4.* R коэффициент осевого распространения. D axiale Fortpflanzungsgeschwindigkeit. E coeficiente de propagación axial. I coefficiente di propagazione assiale; coefficiente di propagazione longitudinale. N axiale voortplantingscoëfficiënt. P tamowność jednostkowa osiowa. S axiell utbredningskoefficient. (731)
7. **coefficient of luminous intensity** (of a retroreflector) (R) : quotient of the luminous intensity I of the retroreflector in the direction of observation by the illuminance $E_\perp$ at the retroreflector on a plane perpendicular to the direction of the incident light.

$$R = I/E_\perp$$

Unit : $cd \cdot lx^{-1}$. ★ coefficient d'intensité lumineuse → *coefficient 60.* R коэффициент силы света (световозвращающего отражателя). D Rückstrahlwert (eines retroreflehtors). E coeficiente de intensidad luminosa. I coefficiente di intensità luminosa. N lichtsterktecoëfficiënt. P ..... S ljusstyrkekoefficient. (845)

8. **coefficient of retroreflected luminance** (of a plane retroreflective surface) (R_L) : quotient of the luminance L of the retroreflective surface in the direction of observation by the illuminance $E_\perp$ at the retroreflector on a plane perpendicular to the direction of the incident light.

$$R_L = L/E_\perp$$

Unit : $cd \cdot m^{-2} \cdot lx^{-1}$ *Note.* — This quantity is particularly suitable for describing materials in sheet form. ★ coefficient de luminance rétroréfléchie → *coefficient 37.* R коэффициент световозвращающей яркости (плоской световозвращающей поверхности). D Leuchtdichtekoeffizient bei Retroreflexion (eines ebenen Reflexstoffes). E coeficiente de luminancia retroreflejada. I coefficiente di luminanza per riflessione catadiottrica. N luminantiecoëfficiënt bij retroreflectie. P ..... S retroluminanskoefficient. (845)
9. **coefficient of retroreflection** (of a plane retroreflecting surface) (R') : quotient of the coefficient of luminous intensity R of a plane retroreflective surface by its area A.

$$R' = R/A = \frac{I/E_\perp}{A}$$

Unit : $cd \cdot lx^{-1} \cdot m^{-2}$ *Note.* — This quantity is particularly suitable for describing materials in sheet form. ★ coefficient de rétroréflexion → *coefficient 46.* R показатель световозвращающего отражения (плоской световозвращающей поверхности). D spezifischer Rückstrahlwert (eines ebenen Reflexstoffes). E coeficiente de retroreflexión. I coefficiente aerico di intensità luminosa. N retroreflectiecoëfficiënt. P ..... S retroflexionskoefficient. (845)
10. **coefficient of utilization** (*Syn.* utilization factor) : → *factor 184*
11. **commutation coefficient** : the product of the rate of decrease of electrode current immediately prior to the termination of conduction and the rate of increase of peak inverse voltage immediately after the termination of conduction. ★ coefficient de commutation → *coefficient 20.* R коэффициент коммутации. D Kommutierungskennwert. E coeficiente de conmutación. I coefficiente di commutazione. N commutatiecoëfficiënt. P współczynnik komutacji. S kommuteringsfaktor. (531)
12. **convection coefficient** (α) : the quantity of heat which is exchanged between the unit surface area of a solid body and a contacting fluid, in unit time, for a temperature difference of 1 kelvin. ★ coefficient de convection → *coefficient 21.* R коэффициент конвекции. D Wärmeübergangskoeffizient. E coeficiente de convección. I coefficiente di convezione. N warmteoverdrachtscoëfficiënt (door convectie). P współczynnik konwekcji. S konvektiv värmeövergångskoefficient. (841)
13. **deflection coefficient** : the quotient of the voltage to the length of the deflection produced by this voltage. ★ coefficient de déviation → *coefficient 27.* R коэффициент отклонения. D Ablenkkoeffizient. E coeficiente de desviación. I coefficiente di deflessione. N ..... P współczynnik odchylenia. S avlänkningsfaktor. (303)
14. **deflection coefficient** : the reciprocal of the electrostatic or magnetic deflection sensitivity. ★ coefficient de déviation → *coefficient 28.* R коэффициент отклонения. D Ablenkkoeffizient. E coeficiente de desviación. I coefficiente di deflessione. N afbuigcoëfficiënt. P współczynnik odchylania. S avböjningsfaktor. (531)
15. **derivative-action coefficient** : for an element with pure derivative action, the ratio of the value of the output variable to the rate of change (time derivative) of the input variable. ★ coefficient d'action par dérivation → *coefficient 5.* R коэффициент воздействия по производной. D Differenzierbeiwert. E coeficiente de acción derivada. I coefficiente dell'azione derivativa. N differentiatiecoëfficiënt. P współczynnik różniczkowania. S D-faktor. (351)
16. **diffusion coefficient for neutron flux density** : the ratio of the neutron current density at a particular energy to the negative gradient of the neutron flux density at the same energy in the direction of that current. ★ coefficient de diffusion pour la densité de flux de neutrons → *coefficient 32.* D Diffusionskoeffizient für Neutronenflußdichte. E coeficiente de difusión para la densidad de flujo de neutrones. I coefficiente

di diffusione per densità di flusso neutronico. N diffusiecoëfficiënt voor de neutronenfluxdichtheid. P współczynnik dyfuzji dla strumienia neutronów. S diffusionskoefficient för neutronflödestäthet. (026)

17. **disaccommodation coefficient (of permeability)** (d) : the disaccommodation of permeability after magnetic conditioning divided by the logarithm (to the base of 10) of the ratio of the time intervals between the cessation of that conditioning and the second and first measurement respectively:

$$d = \frac{D}{\lg \frac{t_2}{t_1}}$$

where, in this context, D is the disaccommodation measured over the interval between t_1 and t_2 after magnetic conditioning. ★ coefficient de désaccommodation (de la perméabilité) → *coefficient 26.* R коэффициент дезаккомодации (магнитной проницаемости). D Desakkommodationskoeffizent (der Permeabilität). E coeficiente de desacomodación (de la permeabilidad). I coefficiente di disaccomodazione (della permeabilità). N desaccommodatiecoëfficiënt (van de permeabiliteit). P współczynnik dezakomodacji(przenikalności magnetycznej). S desackomodationskoefficient. (221)

18. **electroacoustic coupling coefficient (1)** : one of the two following quotients : a) for transduction of an electric signal into an acoustic signal, quotient of the resulting sound pressure in the blocked acoustical system by the excitation current in the electrical system ; b) for transduction of an acoustic signal into an electric signal, quotient of the resulting open-circuit voltage in the electrical system by the excitation volume velocity in the acoustical system. *Note.* — These definitions are best applied to a reciprocal electroacoustic transducer with gyroscopic coupling, for example an electromagnetic transducer, in which case the two quotients have equal magnitude. ★ coefficient de couplage électroacoustique (1) → *coefficient 22.* R электроакустический коэффициент связи (1). D elektroakustischer Wandlerkoeffizient. E coeficiente de acoplamiento electroacústico (1). I coefficiente d'accoppiamento elettroacustico (1). N elektro-akoestische overdrachtsfactor. P współczynnik sprzężenia elektroakustycznego (1). S elektroakustisk kopplingsfaktor. (801)

19. **electroacoustic coupling coefficient (2)** : one of the two following quotients : a) for transduction of an electric signal into an acoustic signal, quotient of the resulting sound pressure in the blocked acoustical system by the excitation voltage in the electrical system ; b) for transduction of an acoustic signal into an electric signal, quotient of the resulting short-circuit current in the electrical system by the excitation volume velocity in the acoustical system. *Note.* — These definitions are best applied to a reciprocal electroacoustic transducer with transformer coupling, for example an electrostatic or piezoelectric transducer, in which case the two quotients have equal magnitude. ★ coefficient de couplage électroacoustique (2) → *coefficient 23.* R электроакустический коэффициент связи (2). D elektroakustischer Wandlerkoeffizient. E coeficiente de acoplamiento electroacústico (2). I coefficiente d'accoppiamento elettroacustico (2). N elektro-akoestische koppelfactor. P współczynnik sprzężenia elektroakustycznego (2). S elektroakustisk kopplingsfaktor. (801)

20. **electromechanical coupling coefficient (1)** : one of the two following quotients : a) for transduction of an electric signal into a mechanical signal, quotient of the resulting force in the blocked mechanical system by the excitation current in the electrical system ; b) for transduction of a mechanical signal into an electric signal, quotient of the resulting open-circuit voltage in the electrical system by the excitation velocity in the mechanical system. *Note.* — These definitions are best applied to a reciprocal electromechanical transducer with gyroscopic coupling, for example an electromagnetic transducer, in which case the two quotients have equal magnitude. ★ coefficient de couplage électromécanique (1) → *coefficient 24.* R электромеханический коэффициент связи (1). D elektromechanischer Wandlerkoeffizient. E coeficiente de acoplamiento electromecánico (1). I coefficiente di accoppiamento elettromeccanico (1). N elektromechanische overdrachtsfactor. P współczynnik sprzężenia elektromechanicznego (1). S elektromekanisk kopplingsfaktor. (801)

21. **electromechanical coupling coefficient (2)** : one of the two following quotients : a) for transduction of an electric signal into a mechanical signal, quotient of the resulting force in the blocked mechanical system by the excitation voltage in the electrical system ; b) for transduction of a mechanical signal into an electric signal, quotient of the resulting short-circuit current in the electrical system by the excitation velocity in the mechanical system. *Note.* — These definitions are best applied to a reciprocal electromechanical transducer with transformer coupling, for example an electrostatic or piezoelectric transducer, in which case the two quotients have equal magnitude. ★ coefficient de couplage électromécanique (2) → *coefficient 25.* R электромеханический коэффициент связи (2). D elektromechanischer Wandlerkoeffizient. E coeficiente de acoplamiento electromecánico (2). I coefficiente di accoppiamento elettromeccanico (2). N elektromechanische koppelfactor. P współczynnik sprzężenia elektromechanicznego (2). S elektromekanisk kopplingsfaktor. (801)

22. **Eyring absorption coefficient** : sound power absorption coefficient attributed to a surface by the Eyring reverberation-time equation. *Note.* — The Eyring reverberation-time equation is:

$$T = \frac{(24 \ln 10)\, V}{-cS \ln (1 - \bar{\alpha})}$$

where T is the reverberation time, V is the volume of the rooms, c is the speed of sound in the contained air, $S = \Sigma S_i$ is the total area of surfaces of the room

$$\bar{\alpha} = \Sigma\, S_i\, \alpha_i / S$$

is the area weighted mean Eyring coefficient of all the surfaces S_i is the area of the i-th surface α_i is Eyring sound power absorption coefficient attributed to the i-th surface.The equivalent absorption area of the i-th surface is $S_i\alpha_i$. ★ facteur d'absorption d'Eyring → *facteur 12.* R коэффициент поглощения Эйринга. D Eyringscher Absorptionsgrad. E factor de absorción de Eyring. I cefficiente di assorbimento secondo Eyring. N absorptiecoëfficiënt volgens Eyring. P współczynnik pochłaniania Eyringa. S Eyrings absorptionsfaktor. (801)

23. **frequency/load coefficient** : the fractional change in output frequency resulting from an incremental change in electrical load impedance, other parameters remaining unchanged. ★ coefficient fréquence - charge → *coefficient 62.* R коэффициент нестабильности частоты от нагрузки. D Frequenz-Belastungskoeffizient. E coeficiente frecuencia/carga. I coefficiente frequenza-carico. N frequentiegevoeligheid van de belasting. P współczynnik obciążeniowy częstotliwości. S frekvens-belastningskoefficient. (561)

24. **frequency/voltage coefficient** : the fractional change in output frequency resulting from an incremental change in supply voltage, other parameters remaining unchanged. ★ coefficient fréquence - tension → *coefficient 63.* R коэффициент нестабильности частоты от напряжения питания. D Frequenz-Spannungskoeffizient. E coeficiente frecuencia/tensión. I coefficiente frequenza-tensione. N frequentiegevoeligheid van de spanning. P współczynnik napięciowy częstotliwości. S frekvens-spänningskoefficient. (561)

25. **gyromagnetic coefficient** (of an electron) (γ) : of an electron in a gyromagnetic substance, the quotient of the magnetic area moment due to spin by the angular moment of the spin. *Notes. 1* — The angular precessional frequency ω of an electron is related to the applied magnetic field H by the expression: $\omega = \gamma \mu_0 H$ where μ_0 is the magnetic constant and γ is the gyromagnetic coefficient. *2* — For a free electron the gyromagnetic coefficient approximately equals:176×10^9 C kg^{-1}. ★ coefficient gyromagnétique → *coefficient 65.* R гиромагнитный коэффициент (электрона). D gyromagnetischer Koeffizient (eines Elektrons). E coeficiente giromagnético (de un electrón). I coefficiente giromagnetico (di un elettrone). N gyromagnetische verhouding (van een elektron). P współczynnik giromagnetyczny (elektronu). S gyromagnetisk kvot. (221)

26. **Hall coefficient** : the coefficient of proportionality R_H in the Hall effect quantitative relation :

$$\vec{E}_H = R_H (\vec{J} \times \vec{B})$$

where: $\vec{E}_H$ is the resulting transverse electric field strength, $\vec{J}$ is the current density, B is the magnetic flux density. *Note :* the sign of the majority carrier charge can usually be inferred from the sign of the Hall coefficient. ★ coefficient de Hall

→ *coefficient 34.* **R** коэффициент Холла. **D** Hallkoeffizient. **E** coeficiente de Hall. **I** coefficiente di Hall. **N** Hallcoëfficiënt. **P** współczynnik Halla. **S** hallkonstant. (521)

27. **heat transmission coefficient** (k) : the quantity of heat which passes per unit of area and time through a partition of constant thickness from a fluid to another having a temperature difference of 1 kelvin. ★ coefficient global de transmission thermique → *coefficient 64.* **R** коэффициент теплопередачи. **D** Wärmedurchgangskoeffizient. **E** coeficiente global de transmisión de calor. **I** coefficiente globale di trasmissione termica. **N** warmtedoorgangscoëfficiënt. **P** współczynnik przenikania ciepła. **S** värmegenomgångskoefficient. (841)

28. **influence coefficient** : the quotient of the change of the error due to an influence quantity to the change of the influence quantity causing it. *Note.* — The influence coefficient is only used when, over the whole rated range of use, a substantially linear relationship exists between the influence error and the effect causing it. ★ coefficient d'influence → *coefficient 59.* **R** коэффициент влияния. **D** Einflusskoeffizient. **E** coeficiente de influencia. **I** coefficiente d'influenza. **N** invloedsfactor. **P** współczynnik oddziaływania (wielkości wpływającej). **S** influensfaktor. (303)

29. **integral-action coefficient** : for an element with integral action, the ratio of the rate of change (time derivative) of the output variable to the concomitant value of the input variable. ★ coefficient d'action par intégration → *coefficient 6.* **R** коэффициент интегрального воздействия. **D** Integrierbeiwert. **E** coeficiente de acción integral. **I** coefficiente di azione per integrazione. **N** integratiecoëfficiënt. **P** współczynnik wzmocnienia całkowego. **S** I-faktor. (351)

30. **linear attenuation coefficient** (μ) : the product of the mass attenuation coefficient by the density of the attenuating material (ρ). *Note.* — The linear attenuation coefficient can be expressed as the sum of several parts (τ, σ_c, σ_{coh}, κ). ★ coefficient d'atténuation linéaire → *coefficient 9.* **R** линейный коэффициент ослабления. **D** linearer Schwächungskoeffizient. **E** coeficiente lineal de atenuación. **I** coefficiente di attenuazione lineare. **N** lineaire verzwakkingscoëfficiënt. **P** współczynnik osłabienia liniowego. **S** längddämpningskoefficient. (881)

31. **luminance coefficient** (at a surface element, in a given direction, under specified conditions of illumination) (q_v; q) : quotient of the luminance of the surface element in the given direction by the illuminance on the medium. Unit : sr^{-1}. ★ coefficient de luminance (lumineuse) → *coefficient 36.* **R** показатель яркости (элемента поверхности среды, в определенном направлении при определенных условиях облучения). **D** Leuchtdichtekoeffizient (an einem Flächenelement auf der Oberfläche eines mediums in einer Richtung, unter gegebenen Beleuchtungsbedingungen). **E** coeficiente de luminancia. **I** coefficiente di luminanza. **N** luminantiecoëfficiënt. **P** wskaźnik luminancji świetlnej. **S** luminanskoefficient. (845)

32. **magnetoresistive coefficient** : at a specified magnetic flux density, the quotient of the variation of the resistance with magnetic induction of a magnetoresistor by the resistance at that specified magnetic flux density. ★ coefficient de magnétorésistance → *coefficient 38.* **R** магниторезистивный коэффициент. **D** Widerstandskoeffizient eines Magnetowiderstandes. **E** coeficiente de magnetorresistencia. **I** coefficiente di magnetoresistenza. **N** magnetoweerstandscoëfficiënt. **P** współczynnik magnetorezystancji. **S** magnetoresistiv koefficient. (521)

33. **mass attenuation coefficient** (μ/ρ) : of a material for indirectly ionizing particles, the quotient dN/N by ρdl, where dN/N is the fraction of particles that experience interactions in traversing a distance dl in a medium of density ρ

$$\frac{\mu}{\rho} = \frac{1}{\rho N}\frac{dN}{dl}$$

Note. — The mass attenuation coefficient μ/ρ for X-radiation and gamma-radiation may be expressed as the sum of several parts, each attributed to a particular phenomenon; τ/ρ for the photoelectric effect ; σ_c/ρ for the Compton effect ; σ_c/ρ for coherent scattering ; and κ/ρ for pair production. ★ coefficient d'atténuation total massique → *coefficient 15.* **R** массовый коэффициент ослабления. **D** Massen-Schwächungskoeffizient. **E** coeficiente másico de atenuación total (de un material para particulas indirectamente ionizantes). **I** coefficiente di attenuazione massico. **N** verzwakkingscoëfficiënt per massadichtheid. **P** masowy współczynnik osłabiania. **S** massdämpningskoefficient. (881)

34. **mass attenuation coefficient (pair production)** (κ/ρ) : that part of the mass attenuation coefficient that is attributable to pair production. ★ coefficient d'atténuation massique de formation de paires → *coefficient 12.* **R** массовый коэффициент ослабления за счет образования пары. **D** Massen-Paarbildungskoeffizient. **E** coeficiente másico de atenuación de formacion de pares. **I** coefficiente di attenuazione massico (per produzione di coppie). **N** verzwakkingscoëfficiënt per massadichtheid (paarvorming). **P** masowy współczynnik osłabienia (tworzenia par). **S** parbildningsmassdämpningskoefficient. (881)

35. **mass attenuation coefficient (photoelectric)** (τ/ρ) : that part of the mass attenuation coefficient that is attributable to the photoelectric effect. ★ coefficient d'atténuation massique photoélectrique → *coefficient 13.* **R** массовый коэффициент ослабления за счет фотоэлектрического эффекта. **D** Massen-Photoschwächungskoeffizient. **E** coeficiente másico de atenuación fotoeléctrica. **I** coefficiente di attenuazione massico (per effetto fotoelettrico). **N** verzwakkingscoëfficiënt per massadichtheid (foto-elektrisch effect). **P** masowy współczynnik osłabienia fotoelektrycznego. **S** fotoelektrisk massdämpningskoefficient. (881)

36. **mass attenuation coefficient (scattering)**

$$\left(\frac{\sigma_c}{\rho} + \frac{\sigma_{coh}}{\rho}\right)$$

those parts of the mass attenuation coefficient attributable to Compton scattering (σ_c/ρ) and to coherent scattering (σ_{coh}/ρ). ★ coefficient d'atténuation massique de diffusion → *coefficient 11.* **R** массовый коэффициент ослабления за счет рассеяния. **D** Massen-Streukoeffizient. **E** coeficiente masico de atenuacion de dispersion. **I** coefficiente di attenuazione massico (per diffusione). **N** verzwakkingscoëfficiënt per massadichtheid (verstrooiing). **P** masowy współczynnik osłabienia rozproszeniowego. **S** spridningsmassdämpningskoefficient. (881)

37. **mass energy transfer coefficient** (of a material for indirectly ionizing particles) (μ_{tr}/ρ) : the quotient of dE_{tr}/E_N by ρdl, where E_N is the energy of each particle (excluding rest energy), N is the number of particles, and dE_{tr}/E_N is the fraction of incident particle energy that is transferred to kinetic energy of charged particles by interactions in traversing a distance dl in the material of density ρ

$$\frac{\mu_{tr}}{\rho} = \frac{1}{E_N \rho}\cdot\frac{dE_{tr}}{dl}$$

Note. — For a given monoenergetic radiation, the relationship between kerma (K) and energy fluence (Ψ) may be written

$$K = \Psi\frac{\mu_{tr}}{\rho}$$

★ coefficient de transfert d'énergie massique → *coefficient 56.* **R** массовый коэффициент преобразования энергии. **D** Massen-Energieübertragungskoeffizient. **E** coeficiente másico de transferencia de energía (de un material para particulas indirectamente ionizantes). **I** coefficiente massico di trasferimento di energia. **N** energieoverdrachtcoëfficiënt. **P** masowy współczynnik przekazania energii. **S** massenenergiöverföringskoefficient. (881)

38. **mass energy-absorption coefficient** (of a material for indirectly ionizing particles) (μ_{en}/ρ) : the product of the mass energy transfer coefficient (μ_{en}/ρ) for that energy and ($1 - g$) where g is the fraction of the energy of secondary charged particles that is lost to bremsstrahlung in the material. *Note.* — When the material is air, (μ_{en}/ρ) is proportional to the quotient of exposure by energy fluence in the usual case of constant W. ★ coefficient d'absorption d'énergie massique → *coefficient 2.* **R** массовый коэффициент поглощения энергии. **D** Massen-Energieabsorptionskoeffizient. **E** coeficiente masico de absorción de energía (de un material para partuclas indirectamente ionizantes). **I** coefficiente massico di assorbimento di energia. **N** energieabsorptiecoëfficiënt per massadichtheid. **P** masowy współczynnik pochłaniania energii. **S** massenenergiabsorptionskoefficient. (881)

39. (complex) reflection coefficient (*Syn.* (complex) reflection factor) : → *factor 23*

40. modulus of the reflection coefficient : → *modulus 3*

41. (mutual) exchange coefficient (between two surfaces S_1 and S_2, when the radiance or luminance of S_1 (or S_2) is the same at all points and for all directions) (g) : quotient of the radiant or luminous flux that surface S_1 (or S_2) sends to surface S_2 (or S_1), by the radiant or luminous exitance of surface S_1 (or S_2).

$$g = \frac{\Phi_2}{M_1} = \frac{\Phi_1}{M_2}$$

Unit : m^2 *Notes. 1* — Since $M = \pi L$, and in the particular case where all points on S_1 are seen from all points on S_2.

$$g = \frac{1}{\pi} \int_{A1} \int_{A2} \frac{\cos\theta_1 \cdot \cos\theta_2}{l^2} \, dA_1 \cdot dA_2 = \frac{1}{\pi} G$$

where l is the distance between the elements of areas dA_1 and dA_2 on the surfaces S_1 and S_2, and G is the geometric extent of the beam delimited by the boundaries of S_1 and S_2. *2* — For two elementary areas dA_1 and dA_2

$$dg = \frac{1}{\pi} dA_1 \cdot d\Omega_1 \cdot \cos\theta_1 = \frac{1}{\pi} dA_2 \cdot d\Omega_2 \cdot \cos\theta_2$$

where $d\Omega_1$ (or $d\Omega_2$) is the solid angle which the area dA_2 (or dA_1) subtends from the centre of dA_1 (or dA_2). *3* — The radiance or luminance of the beam delimited by the boundaries of dA_1 and dA_2 is

$$L = \frac{1}{\pi} \cdot \frac{d\Phi}{dg}$$

★ coefficient d'échange (mutuel) → *coefficient 58.* **R** площадь полного обмена (между двумя поверхностями C_1 и C_2 корда яркость или энергетическая яркость поверхности C_1 (или C_2) одинакова во всех точках и для все х направлений). **D** (gegenseitiger) Austauschkoeffizient (zwischen zwei Flächen S_1 und S_2 für den Fall, daß die Strahldichte bzw. Leuchtdichte von S_1 (oder S_2) in allen Punkten und in allen Richtungen gleich ist). **E** coeficiente de cambio (mutuo). **I** coefficiente di mutuo scambio. **N** licht [stralings]-uitwisselingscoëfficiënt. **P** współczynnik wymiany (wzajemnej). **S** ..... (845)

42. Napierian spectral absorption coefficient (of a homogeneous non-diffusing layer) ($a_n(\lambda)$) : quotient of the Napierian logarithm of the reciprocal of the spectral internal transmittance $\tau_i(\lambda)$ of a layer of the medium by the length l of the path of a beam of radiation traversing that layer.

$$a_n(\lambda) = -\frac{\ln \tau_i(\lambda)}{l}$$

$$= -\frac{\log_{10} \tau_i(\lambda)}{l} \ln 10 = A_n(\lambda)/l$$

★ coefficient d'absorption spectral népérien → *coefficient 4.* **R** натуральный спектральный показатель поглощения (однородного нерассеивающего слоя). **D** spektraler natürlicher Absorptionskoeffizient (einer homogenen, nicht streuenden Schicht). **E** coeficiente de absorción espectral neperiano. **I** coefficiente spettrale neperiano di assorbimento. **N** Naperiaanse spectrale absorptiecoëfficiënt. **P** ..... **S** ..... (845)

43. offset coefficient : absolute value of the slope of the tangent to a control characteristic at a given point. *Note.* — The offset coefficient and the steady-state deviation are expressed by the same number when the same units are used for the input variable and the controlled variable in both cases. ★ coefficient de statisme → *coefficient 47.* **R** коэффициент неравномерности статизм. **D** Kennliniensteigung, P-Grad der Regelung. **E** coeficiente de estatismo. **I** statismo, coefficiente di statismo. **N** afwijkingscoëfficiënt. **P** współczynnik statyzmu. **S** ..... (351)

44. phase-change coefficient (*Syn.* phase constant (USA)) (β) : the imaginary part of the propagation coefficient. *Note.* — The phase-change coefficient of a transmission line or waveguide is the limit of the quotient of the phase change of a field quantity between two points on the axis, by the distance between the points when this distance tends to zero. ★ déphasage linéique → *déphasage 10.* **R** коэффициент фазы. **D** Phasenkoeffizient. **E** desfase lineal. **I** coefficiente di fase; costante di fase. **N** faseveranderingscoëfficiënt. **P** przesuwność jednostkowa. **S** faskoefficient. (702,705,726,731)

45. power reflection coefficient (*Syn.* reflectance) : the ratio of the power flux density of a reflected wave and an incident wave, in a same point, in the corresponding directions of propagation of energy after and before reflection. *Note.* — In optics, frequently expressed as reflectance density or as a percentage ; in communication applications, generally expressed in decibels. ★ facteur de réflexion → *facteur 130.* **R** коэффициент отражения (мощности). **D** Leistungsreflexionsfaktor. **E** coeficiente de reflexión de potencia; reflectancia. **I** coefficiente di riflessione in potenza; rifluttività (riflettanza); riflettanza. **N** reflectiefactor. **P** współczynnik odbicia (energii). **S** reflektans. (731)

46. power-regulation coefficient of load : the first derivative with respect to voltage of the power-voltage steady-state load characteristic. ★ coefficient d'autorégulation d'une charge → *coefficient 18.* **R** регулирующий эффект нагрузки по напряжению. **D** Leistungsregelungskoeffizient einer Last. **E** coeficiente de autorregulación de una carga. **I** coefficiente di autoregolazione di un carico. **N** coëfficiënt voor het zelfregelend vermogen van een belasting. **P** współczynnik samoregulacji obciążenia. **S** reglerkoefficient hos belastning. (603)

47. propagation coefficient (*Syn.* propagation constant (USA)) (γ) : the limit of the natural logarithm of the ratio of values at a given frequency of a specified component of electromagnetic field at two points aligned in the direction of propagation of a guided or plane wave, or of a wave practically plane in a limited space domain, divided by the distance between the two points when this distance tends to zero. *Note.* — The propagation coefficient is a complex quantity usually a function of frequency, and has the dimension of reciprocal length. The real part, the attenuation coefficient, is usually expressed in Np/m and the imaginary part, the phase-change coefficient, is expressed in rad/m. ★ exposant linéique de propagation → *exposant 2.* **R** коэффициент распространения; постоянная распространения. **D** Ausbreitungskoeffizient; Ausbreitungskonstante. **E** exponente lineal de propagación; coeficiente de propagación. **I** coefficiente di propagazione; costante di propagazione. **N** voortplantingscoëfficiënt; propagatiecoëfficiënt. **P** tamowność jednostkowa. **S** utbredningskoefficient. (702,705,726,731)

48. proportional-action coefficient : for an element with proportional action, the ratio of the variation of the output variable to the corresponding variation of the input variable. ★ coefficient d'action proportionnelle → *coefficient 7.* **R** коэффициент усиления. **D** Proportionalbeiwert. **E** coeficiente de acción proporcional. **I** coefficiente dell'azione proporzionale. **N** proportionaliteitscoëfficiënt. **P** współczynnik wzmocnienia proporcjonalnego. **S** P-faktor. (351)

49. radiance coefficient (at a surface element of a medium, in a given direction, under specified conditions of irradiation) (q_e; q) : quotient of the radiance of the surface element in the given direction by the irradiance on the medium. Unit : sr^{-1} *Note.* — In the USA the concept bi-directional reflectance distribution function (BRDF) is similar to the above coefficient except that it is defined for directional incident radiation. ★ coefficient de luminance énergétique → *coefficient 35.* **R** показатель энергетической яркости (элемента поверхности среды, в определенном направлении при определенных условиях облучения). **D** Strahldichtekoeffizient (an einem Flächenelement auf der Oberfläche eines Mediums in einer Richtung, unter gegebenen Bestrahlungsbedingungen). **E** coeficiente de radiancia. **I** coefficiente di radianza. **N** radiantiecoëfficiënt. **P** wskaźnik luminancji energetycznej. **S** radianskoefficient. (845)

50. reactivity temperature coefficient : the partial derivative of reactivity with respect to temperature. *Note :* the temperature may be specified for some location or component. ★ coefficient de température de réactivité → *coefficient 54.* **D** Temperaturkoeffizient der Reaktivität. **E** coeficiente de reactividad por temperatura «Corete». **I** coefficiente di temperatura di reattività. **N** temperatuurcoëfficiënt van de reactiviteit. **P** współczynnik temperaturowy reaktywności. **S** temperaturkoefficient (för reaktivitet). (026)

51. reciprocity coefficient : for a reciprocal electroacoustic transducer, at a specified frequency : a) quotient of the voltage sensitivity of the transducer functioning as a receiver of sound

(e.g. a microphone) by the sensitivity to current of the transducer functioning as an emitter of sound ; or b) quotient of the current sensitivity of the transducer functioning as a receiver of sound (e.g. a microphone) by the sensitivity to voltage of the transducer functioning as an emitter of sound. ★ coefficient de réciprocité → *coefficient 43.* R коэффициент взаимности. D Reziprozitätskoeffizient. E coeficiente de reciprocidad. I coefficiente di reciprocità. N reciprociteitscoëfficiënt. P współczynnik wzajemności. S reciprocitetskoefficient. (801)

52. **recombination coefficient** : the quotient of the recombination rate by the square of the charge carrier density of the recombining charges. ★ coefficient de recombinaison → *coefficient 44.* R коэффициент рекомбинации. D Rekombinationskoeffizient. E coeficiente de recombinación. I coefficiente di ricombinazione. N recombinatiecoëfficiënt. P współczynnik rekombinacji. S rekombinationskoefficient. (111)

53. **Sabine absorption coefficient** (*Syn.* sound absorption coefficient) : quotient of Sabine absorption of a surface by the area of the surface. *Note.* — With a_i as the Sabine coefficient of the i-th surface whose area is S_i, the Sabine absorption attributed to the surface is $A_i = S_i \ a_i$. ★ facteur d'absorption de Sabine → *facteur 11.* R сэбиновский коэффициент поглощения. D Sabinescher Absorptionsgrad. E factor de absorción de Sabine. I coefficiente di assorbimento di Sabine. N geluidabsorptiecoëfficiënt. P współczynnik pochłaniania Sabine'a. S Sabines absorptionsfaktor. (801)

54. **scattering coefficient** (*Syn.* scattering parameter) : → *parameter 8*

55. **self-exchange coefficient** (of a surface when its radiance or luminance is the same at all points and for all directions) (g_s) : quotient of that part of the radiant or luminous flux from the surface which falls on the surface itself, by the radiant or luminous exitance of the surface. Unit : m^2 *Note.* — The self-exchange coefficient of a surface S limited by a flat curve C and situated on only one side of the plane of this curve is equal to the surface area of S minus the flat surface area limited by C. ★ coefficient d'auto-échange → *coefficient 17.* R площадь возврата (света поверхностью, имеющей одинаковую яркость или энергерическую яркость во всех точках для всех направлений). D Eigenaustauschkoeffizient (einer Fläche für den Fall, daß ihre Strahldichte bzw. Leuchtdichte in allen Punkten und in allen Richtungen gleich ist). E factor de configuración. I coefficiente di autoscambio. N zelfuitwisselingscoëfficiënt. P współczynnik samowymiany. S ..... (845)

56. **sound absorption coefficient** (*Syn.* Sabine absorption coefficient) : → *coefficient 53*

57. **sound (power) absorption coefficient** : at a given frequency and for specified conditions, of a surface, fraction of incident sound power not reflected from the surface. *Note.* — Unless otherwise specified, a diffuse sound field is to be understood. ★ facteur d'absorption (de la puissance) acoustique → *facteur 10.* R коэффициент поглощения звука (по мощности). D Schallabsorptionsgrad. E factor de absorción (de la potencia) acústica. I coefficiente di assorbimento acustico. N geluidabsorptiecoëfficiënt. P współczynnik pochłaniania dźwięku. S ljudabsorptionsfaktor. (801)

58. **sound (power) reflection coefficient** : at a given frequency and for specified conditions, of a surface, fraction of incident sound power reflected from the surface. *Note.* — Unless otherwise specified, random incidence is presumed. ★ facteur de réflexion (de la puissance) acoustique → *facteur 135.* R коэффициент отражения звука (по мощности). D Schallreflexionsgrad. E factor de reflexión (de la potencia) acústica. I potere riflettente. N geluid(s)vermogenreflectiecoëfficiënt. P współczynnik odbicia dźwięku. S ljudreflektionsfaktor. (801)

59. **sound pressure reflection coefficient** : at a given frequency and for a given angle of incidence, in plane waves, the ratio between the sound pressure amplitude of the reflected wave and that of the incident wave. ★ facteur de réflexion en pression → *facteur 138.* R коэффициент отражения звука по давлению. D Schallreflexionsfaktor. E factor de reflexión de la presión acústica. I potere riflettente acustico. N geluid(s)drukreflectiecoëfficient. P współczynnik odbicia dźwięku ciśnieniowy. S ljudtrycksreflektionsfaktor. (801)

60. **sound propagation coefficient** (*Syn.* linear exponent of sound propagation) : → *exponent 2*

61. **specific ionization coefficient** : the average number of pairs of ions of opposite sign that a particle with a given kinetic energy produces per unit path length under specified conditions. *Note.* — A positive ion and an electron are considered also to be a pair of ions. ★ ionisation linéique → *ionisation 17.* R удельный коэффициент ионизации. D spezifischer Ionisationskoeffizient. E coeficiente de ionización. I ionizzazione lineare; coefficiente di ionizzazione. N ionisatiecoëfficiënt. P współczynnik jonizacji. S längdjonisation (av en partikel). (026,111,391,881)

62. **spectral linear absorption coefficient** (at a point in an absorbing medium, for a collimated beam of radiation) ($a(\lambda)$) : quotient of the relative decrease caused by absorption of the spectral concentration of the radiant flux $\Phi_{e,\lambda}$ of a collimated beam during its propagation along an elementary length dl at the point considered, by the length dl.

$$a(\lambda) = \frac{1}{\Phi_{e,\lambda}} \cdot \frac{d\Phi_{e,\lambda}}{dl}$$

Unit : m^{-1}. ★ coefficient d'absorption linéique spectral → *coefficient 3.* R спектральный натуральный показатель поглощения (в точке поглощающей среды для параллельного пучка лучей излучения). D spektraler Absorptionskoeffizient (an einem Punkt eines absorbierenden Mediums für ein quasiparalleles Strahlenbündel). E coeficiente de absorción lineal espectral. I coefficiente lineico spettrale di assorbimento. N spectrale lineaire absorptiecoëfficiënt. P współczynnik pochłaniania linearnego widmowy. S absorptionskoefficient. (845)

63. **spectral linear attenuation coefficient** (at a point in an absorbing and diffusing medium, for a collimated beam of radiation) ($\mu(\lambda)$) : quotient of the relative decrease caused by both absorption and diffusion of the spectral concentration of the radiant flux $\Phi_{e,\lambda}$ of a collimated beam during its propagation along an elementary length dl at the point considered, by the length dl.

$$\mu(\lambda) = \frac{1}{\Phi_{e,\lambda}} \cdot \frac{d\Phi_{e,\lambda}}{dl}$$

Unit : m^{-1}. ★ coefficient d'atténuation linéique spectral → *coefficient 10.* R спектральный натуральный показатель ослабления (в точке поглощающей или пассеивающей среды для параллельного пучка лу чей излучения). D spektraler Schwächungskoeffizient (an einem Punkt eines absorbierenden und streuenden Mediums für ein quasiparalleles Strahlenbündel). E coeficiente de atenuación lineal espectral. I coefficiente lineico spettrale di attenuazione. N spectrale lineaire verzwakkingscoëfficiënt. P współczynnik osłabienia linearnego widmowy. S dämpningskoefficient. (845)

64. **spectral linear scattering coefficient** (at a point in a diffusing medium, for a collimated beam of radiation) ($s(\lambda)$) : quotient of the relative decrease caused by diffusion of the spectral concentration of the radiant flux $\Phi_{e,\lambda}$ of a collimated beam during its propagation along an elementary length dl at the point considered, by the length dl.

$$s(\lambda) = \frac{1}{\Phi_{e,\lambda}} \cdot \frac{d\Phi_{e,\lambda}}{dl}$$

Unit : m^{-1}. ★ coefficient de diffusion linéique spectral → *coefficient 31.* R спектральный натуральный показатель рассеяния (в точке рассеивающей среды для параллельного пучка лучей излучения). D spektraler Streukoeffizient (an einem Punkt eines streuenden Mediums für ein quasiparalleles Strahlenbündel). E coeficiente de esparcimiento lineal espectral. I coefficiente lineico spettrale di diffusione. N spectrale lineaire verstrooiingscoëfficiënt. P współczynnik rozpraszania linearnego widmowy. S diffusionskoefficient. (845)

65. **spectral mass attenuation coefficient** : quotient of the spectral linear attenuation coefficient $\mu(\lambda)$ by the (mass) density ρ of the medium.Unit : $m^2 \cdot kg^{-1}$. ★ coefficient d'atténuation massique spectral → *coefficient 14.* R спектральный показатель ослабления на единицу массы. D spektraler Massenschwächungskoeffizient. E coeficiente de atenuación másica espectral. I coefficiente massico spettrale di attenuazione. N spectrale massa-verzwakkings-coëfficiënt. P wskaźnik pochłaniania na jednostkę masy widmowy. S massdämpningskoefficient. (845)

66. **statistical sound (power) absorption coefficient** : sound power absorption coefficient measured or calculated with plane waves at randomly distributed angles of incidence. ★ facteur d'absorption statistique (de la puissance) acoustique

→ *facteur 14.* R статистический коэффициент поглощения звука (по мощности). D statistischer Schallabsorptionsgrad. E factor de absorción estadístico (de la potencia) acústica. I coefficiente statistico di assorbimento acustico. N geluidabsorptiecoëfficiënt bij alzijdige inval. P współczynnik pochłaniania dźwięku statystyczny. S statistisk ljudabsorptionsfaktor. (801)

67. **surface or bottom scattering coefficient** : the ratio of the scattering cross section corresponding to this surface (bottom), to the area of the surface (bottom) considered. ★ coefficient de diffusion d'une surface ou d'un fond → *coefficient 30.* R коэффициент рассеяния поверхности (дна). D Oberflächen-Streugrad. E coeficiente de dispersión de una superficie o del fondo. I diffusione areica. N oppervlakteverstrooiingscoëfficiënt (bodemverstrooiingscoëfficiënt). P współczynnik rozproszenia powierzchniowy; współczynnik rozproszenia dna. S spridningsfaktor (för en yta eller botten). (801)

68. **synchronizing coefficient** : the quotient of the shaft power and the angular displacement of the rotor. *Note.* — It is expressed in kilowatts per electrical radian. Unless otherwise stated, the value will be for rated voltage, load, power factor and frequency. ★ coefficient de synchronisation → *coefficient 48.* R коэффициент синхронизации. D Leistung-Polradwinkel-Verhältnis. E coeficiente de sincronización. I coefficiente di sincronizzazione. N synchroniseringscoëfficiënt. P moment synchronizujący. S synkroniseringskoefficient. (411)

69. **synchronizing power coefficient** : the quotient of the change in electrical power and the variation of the rotor angular displacement. ★ coefficient de puissance synchronisante → *coefficient 42.* R синхронизирующая мощность. D synchronisierende Leistung. E coeficiente de potencia sincronizante. I coefficiente di potenza sincronizzante. N synchroniserend vermogen. P moment synchronizujący dynamiczny. S ..... (411)

70. **temperature coefficient of capacity (of a cell or battery)** : at a specified temperature, the quotient of the change in capacity of a cell or battery by the corresponding change in temperature. ★ coefficient de température de la capacité (d'un accumulateur) → *coefficient 49.* R температурный коэффициент емкости (вторичного химического источника тока). D Temperatur-Koeffizient der Kapazität (einer Zelle oder Batterie). E coeficiente de temperatura de la capacidad (de un elemento o batería). I coefficiente di temperatura della capacità. N temperatuurcoëfficiënt van de capaciteit. P współczynnik temperaturowy pojemności (akumulatora). S temperaturkoefficient för kapacitet. (486)

71. **temperature coefficient of effective permeability** (symb. : α_{μ_e}) : the fractional change of effective permeability due to a change in temperature divided by that change in temperature:

$$\alpha_{\mu_e} = \frac{\mu_{e,\theta} - \mu_{e,\mathrm{ref}}}{\mu_{e,\mathrm{ref}}\,(\theta - \theta_{\mathrm{ref}})}$$

where $\mu_{e,\theta}$ and $\mu_{e,\mathrm{ref}}$ are the effective permeabilities at temperatures θ and θ_{ref} respectively. ★ coefficient de température de la perméabilité effective → *coefficient 51.* R температурный коэффициент эффективной магнитной проницаемости. D Temperaturkoeffizient der effektiven Permeabilität. E coeficiente de temperatura de la permeabilidad efectiva. I coefficiente di temperatura della permeabilità effettiva. N temperatuur coëfficiënt van de effectieve permeabiliteit. P współczynnik temperaturowy przenikalności równoważnej. S effektiva permeabilitetens temperaturkoefficient. (221)

72. **temperature coefficient of inductance** (α_L) : the fractional change of inductance due to a change in temperature divided by that change in temperature:

$$\alpha_L = \frac{L_\theta - L_{\mathrm{ref}}}{L_{\mathrm{ref}}\,(\theta - \theta_{\mathrm{ref}})}$$

where L_θ and L_{ref} are the inductances at temperatures θ and θ_{ref} respectively. ★ coefficient de température de l'inductance → *coefficient 53.* R температурный коэффициент индуктивности. D Temperaturkoeffizient der Induktivität. E coeficiente de temperatura de la inductancia. I coefficiente di temperatura dell'induttanza. N temperatuurcoëfficiënt van de zelfinductie. P współczynnik temperaturowy indukcyjności. S induktansens temperaturkoefficient. (221)

73. **temperature coefficient of open-circuit voltage** : at a specified temperature, the quotient of the change of the open-circuit voltage by the corresponding change in temperature. ★ coefficient de température de la tension en circuit ouvert → *coefficient 52.* R температурный коэффициент напряжения разомкнутой цепи. D Temperatur-Koeffizient der elektromotorischen Kraft; EMK. E coeficiente de temperatura de la tensión en circuito abierto. I coefficiente di temperatura della tensione a circuito aperto. N temperatuurcoëfficiënt van de EMK. P współczynnik temperaturowy napięcia bez obciążenia. S temperaturkoefficient för vilospänning. (486)

74. **temperature coefficient of permeability** (α_μ) : the fractional change of permeability due to a change in temperature divided by that change in temperature:

$$\alpha_\mu = \frac{\mu_\theta - \mu_{\mathrm{ref}}}{\mu_{\mathrm{ref}}\,(\theta - \theta_{\mathrm{ref}})}$$

where μ_θ and μ_{ref} are the permeabilities at temperatures θ and θ_{ref} respectively. ★ coefficient de température de la perméabilité → *coefficient 50.* R температурный коэффициент магнитной проницаемости. D Temperaturkoeffizient der Permeabilität. E coeficiente de temperatura de la permeabilidad. I coefficiente di temperatura della permeabilità. N temperatuurcoëfficiënt van de permeabiliteit. P współczynnik temperaturowy przenikalności. S permeabilitetens temperaturkoefficient. (221)

75. **temperature coefficient of the Geiger-Müller threshold** : coefficient representing the variation of the Geiger-Müller threshold as a function of temperature, between specified temperature limits. It is expressed in volts per degree Celsius or in percentage of a given threshold per degree Celsius. ★ coefficient de température du seuil de Geiger-Müller → *coefficient 55.* R температурный коэффициент порога Гейгера-Мюллера. D Temperaturkoeffizient der Schwelle des Auslösebereiches (Geiger-Müller-Bereiches). E coeficiente de temperatura del umbral de Geiger-Müller. I coefficiente di temperatura della soglia di Geiger-Müller. N temperatuurcoëfficiënt van de Geigerdrempel. P współczynnik temperaturowy progu licznika G-M. S Geiger-Müller-tröskelns temperaturkoefficient. (391)

76. **time coefficient** : the quotient of the time to the distance that the spot is displaced by the time base during this time. ★ coefficient de balayage → *coefficient 19.* R коэффициент временной развертки. D Zeitkoeffizient. E coeficiente de barrido. I coefficiente di tempo. N tijdcoëfficiënt. P współczynnik czasu. S tidskalefaktor. (303)

77. **volume scattering coefficient** : the quotient of the scattering cross-section of the volume considered, divided by that volume. ★ coefficient de diffusion d'un volume → *coefficient 29.* R коэффициент объмного рассеяния. D Volumen-Streukoeffizient. E coeficiente de dispersión de un volumen. I fattore di diffusione volumica. N volume-verstrooiingscoëfficient. P współczynnik rozproszenia objętościowy. S volymspridningskoefficient. (801)

coercive

1. **coercive field strength** : → *field strength 1*

coercivity

1. **coercivity** : the value of the coercive field strength in a material when the magnetic flux density, magnetic polarization or magnetization is brought from saturation by a monotonically changing magnetic field. *Note.* — The parameter that is varied should be stated, and the appropriate symbol used as follows : H_{cB} for the coercivity relating to the flux density, H_{cJ} for the coercivity relating to the polarization, H_{cM} for the coercivity relating to the magnetization. The first two symbols supersede ${}_BH_c$ and ${}_JH_c$. ★ coercitivité → *coercitivité 1.* R коэрцитивная сила. D Koerzitivfeldstärke. E coercitividad. I coercitività. N coërcitie. P koercja. S koercivitet. (221)

2. **cyclic coercivity** : the value of the coercive field strength in a material when the magnetic flux density, magnetic polarization or magnetization is alternating at an amplitude corresponding to the saturation hysteresis loop. *Note.* — The relevant parameter should be stated, and the appropriate symbol used as follows : H'_{cB} for the cyclic coercivity relating to the flux density, H'_{cJ} for the cyclic coercivity relating to the polarization, H'_{cM} for the cyclic coercivity relating to the magnetization. The first two symbols supersede ${}_BH'_c$ and ${}_JH'_c$. ★ coercitivité cyclique → *coercitivité 2.* R циклическая коэрцитивная сила.

D Wechselfeld-Koerzitivfeldstärke. E coercitividad cíclica. I coercitività ciclica. N cyclische coërcitie. P koercja cykliczna. S cyklisk koercivitet. (221)

coffer

1. **coffer** : recessed panel or dome in the ceiling. ★ plafonnier encastré → *plafonnier 1.* R кессон. D Deckeneinbauleuchte. E panel empotrado. I plafoniera da incasso. N plafondopbouwarmatuur. P wnęka świetlna. S kasettarmatur. (845)

coherence

1. **coherence** : the phenomenon related to the existence of a correlation between the phases of the corresponding components of two waves or between the values of the phase of a given component of one wave at two instants in time or two points in space. ★ cohérence → *cohérence 2.* R когерентность. D Kohärenz. E coherencia. I coerenza. N coherentie. P spójność; koherencja. S koherens. (101,705,731)
2. **coherence length** : → *length 3*
3. **coherence time** : → *time 28*
4. **degree of coherence** : → *degree 3*
5. **partial coherence** : coherence such that the electromagnetic fields at two points or two instants have a low statistical correlation. ★ cohérence partielle → *cohérence 3.* R неполная когерентность. D teilweise Kohärenz. E coherencia parcial. I coerenza parziale. N gedeeltelijke coherentie. P spójność częściowa; koherencja częściowa. S partiell koherens. (731)
6. **space coherence** (*Syn.* spatial coherence) : → *coherence 7*
7. **spatial coherence** (*Syn.* space coherence) : coherence such that the electromagnetic fields are correlated in a region of space. ★ cohérence spatiale → *cohérence 4.* D räumliche Kohärenz. P koherencja przestrzenna. (705,731)
8. **temporal coherence** (*Syn.* time coherence) : → *coherence 9*
9. **time coherence** (*Syn.* temporal coherence) : coherence such that the electromagnetic fields are correlated over a given time. ★ cohérence temporelle → *cohérence 5.* D zeitliche Kohärenz. P koherencja czasowa. (705,731)

coherent

1. **coherent** : qualifying one or more waves or radiations characterized by the phenomenon of coherence. ★ cohérent → *cohérent 1.* R когерентный. D kohärent. E coherente. I coerente. N coherent. P spójny; koherentny. S koherent. (731)
2. **coherent area** : → *area 5*
3. **coherent components** : → *component 8*
4. **coherent demodulation** : → *demodulation 2*
5. **coherent modulation** : → *modulation 9*
6. **coherent radiation** : → *radiation 12*
7. **coherent radiation** : → *radiation 13*
8. **coherent scattering** : → *scattering 4*
9. **coherent scattering cross-section** : → *cross-section 6*
10. **coherent significant instants** : → *instant 1*
11. **coherent system (of units)** : → *system 29*

coil

1. **arc-suppression coil** : a single-phase neutral earthing reactor intended for compensating the capacitive line-to-earth current due to a single-phase earth fault. ★ bobine d'extinction d'arc → *bobine 12.* R (заземляющий) дугогасящий реактор. D Erdschlußlöschspule. E bobina de extinción de arco. I bobina di estinzione d'arco. N aardsluitstroomcompensatiespoel; blusspoel. P dławik gaszący. S släckningsreaktor; Petersenspole. (421)
2. **blow-out coil** : a coil designed to produce a magnetic field arranged to deflect an arc, e.g. into an arc-chute. ★ bobine de soufflage → *bobine 9.* R катушка магнитного дутья. D Blasspule. E bobina de soplado. I bobina di soffio. N blaasspoel. P cewka wydmuchowa. S blåsspole. (441)
3. **coil** : a physical assembly of one or more electrical coil sections generally surrounded by common insulation. ★ bobine → *bobine 3.* R катушка. D Spule. E bobina. I matassa; bobina. N spoel. P wiązka zezwojów. S härva. (411)
4. **coil flux guide** : → *guide 2*
5. **coil insulation** : → *insulation 8*
6. **coil pitch** (*Syn.* coil span) : → *span 2*
7. **coil section** : → *section 3*
8. **coil side** : either of the two, normally straight, parts of a coil which lie in the axial direction of the core of the machine. ★ côté de bobine → *côté 2.* R сторона катушки. D Spulenseite. E lado de bobina. I lato di matassa. N spoelzijde. P bok zezwoju. S härvsida. (411)
9. **coil side separator** : → *separator 1*
10. **coil span** : → *span 2*
11. **coil switching link** : → *link 4*
12. **cooling and protection shield for a coil** : → *shield 5*
13. **cranked coil** : a coil having specially shaped winding overhangs to allow both its end windings to cross from one tier to the other. ★ bobine mixte → *bobine 16.* R ..... D gekröpfte Spule. E bobina acodada. I matassa con testate a gradini. N overgangsspoel. P krzywy zezwój. S övergångshärva mellan plan. (411)
14. **crucible furnace inductor coil** : a heating inductor for creating the magnetic field which induces currents in a metal charge or in a crucible of conductive materials. ★ inducteur d'un four à creuset → *inducteur 12.* R индуктор тигельной печи. D Induktionsspule für Tiegelöfen. E inductor de un horno de crisol. I induttore di un forno a crogiolo. N kroesoveninductor. P wzbudnik do pieca tyglowego. S degelugnsspole. (841)
15. **deflection coils** : the assembly of coils and magnetic circuits disposed around the neck of a camera tube or picture tube for scanning purposes. ★ bloc de déviation → *bloc 4.* R отклоняющие катушки. (723)
16. **deflector coil** : a coil used to produce the magnetic field for deflection of the electron beam. ★ bobine de déviation → *bobine 8.* R отклоняющая катушка. D Ablenkspule. E bobina de desviación. I bobina di deflessione. N afbuigspoel. P cewka odchylająca. S avböjningsspole. (531)
17. **dummy coil** (of winding) : a coil which is not required electrically in a winding, but which is installed for mechanical reasons and left unconnected. *Note.* — When such dummy coils can be connected at a later date, this should be stated. e.g. the third phase of a machine initially connected as a single-phase machine. ★ section morte → *section 19.* R мертвая секция. D blinde Spule. E sección muerta. I sezione morta. N blinde spoel. P martwy zezwój. S blindhärva. (411)
18. **(electrical) coil** : a set of series-connected turns, usually coaxial. ★ bobine → *bobine 2.* R катушка. D Spule. E bobina. I bobina. N spoel. P cewka. S spole. (151)
19. **embedded coil side** : that part of a coil side which lies in a slot between the ends of the core. ★ côté de bobine logé dans le fer → *côté 3.* R пазовая часть катушки. D eingebettete Spulenseite. E lado de bobina en ranura. I lato in cava. N gleuf; groef gedeelte van een spoelzijde. P część żłobkowa zezwoju. S spårdel av härvsida. (411)
20. **field coil** : the component of a concentrated excitation winding which is carried on a single salient pole. *Note.* — The component of a distributed excitation winding is best defined by the type of winding used. ★ bobine de champ → *bobine 6.* R катушка обмотки возбуждения. D Polspule; Feldspule. E bobina de campo. I bobina di campo. N veldspoel; poolspoel. P cewka. S magnetspole. (411)
21. **field coil flange** : → *flange 4*
22. **focusing coil** : a coil used to produce a magnetic field for focusing an electron beam. ★ bobine de concentration → *bobine 7.* R фокусирующая катушка. D Fokussierspule. E bobina de concentración. I bobina di focalizzazione. N focusseerspoel. P cewka ogniskująca. S fokuseringsspole. (531)
23. **hairpin coil** : a particular form of open-ended coil intended for pushing through semi-closed or closed slots. ★ bobine en U → *bobine 15.* R катушка У-образной формы. D U-Spule; Haarnadelspule. E bobina en U. I bobina a forcella a U. N haarspeldspoel; kramspoel. P zezwój o kształcie U. S instickshärva. (411)
24. **hybrid coil** (*Syn.* hybrid transformer) : → *transformer 35*
25. **induction coil** (*Syn.* differential transformer; hybrid transformer) : a differential coupler essentially consisting of a transformer. ★ bobine d'induction → *bobine 13.* R индукционная катушка. D Induktionsspule. E bobina de inducción; transformador diferencial. I bobina d'induzione.

N vorktransformator; toesteltransformator. P transformator telefoniczny; cewka indukcyjna. S taltransformator. (722)

26. **induction "lift off coil" crucible melting furnace** : → *furnace 30*
27. **inductor coil earth leakage protection** : → *protection 20*
28. **multi-section coil** : a coil consisting of two or more coil sections or a group of turns, each section or group being individually insulated. ★ bobine à plusieurs sections → *bobine 4.* R многосекционная катушка. D Mehrfachspule (unterteilte Spule). E bobina de varias secciones. I bobina a più sezioni. N samengestelde spoel. P wiązka wielozezwojowa. S flerdelad härva. (411)
29. **open-ended coil** : a partly preformed coil the turns of which are left open at one end to facilitate their assembly into the machine. ★ bobine ouverte → *bobine 17.* R разомкнутая катушка. D offene Spule. E bobina abierta. I bobina aperta. N open spoel. P otwarty zezwój. S öppen härva. (411)
30. **phase coil insulation** : → *insulation 46*
31. **rated current of an arc suppression coil** : → *current 157*
32. **search coil** : a coil or loop of conductor used to detect or measure a magnetic field. ★ bobine d'exploration → *bobine 11.* R пробная катушка. D Suchspule. E bobina de exploración. I bobina di esplorazione. N zoekspoel. P cewka probiercza. S mätspole. (221)
33. **segmental or locked coil conductor** (*Syn.* smooth body conductor) : → *conductor 65*
34. **work coil** (*Syn.* heating inductor) : → *inductor 7*

coiled-coil

1. **coiled-coil filament** : → *filament 2*

coin

1. **coin box set** : → *set 6*
2. **coin collection device** (*Syn.* coin box set) : → *set 6*
3. **coin tone** (*Syn.* coinbox discriminating tone) : → *tone 6*

coinbox

1. **coinbox discriminating tone** : → *tone 6*
2. **coinbox identification tone** : → *tone 7*
3. **special coinbox discriminating tone** : → *tone 30*

coincidence

1. **coincidence factor** : → *factor 21*
2. **coincidence resolving time** : → *time 29*
3. **coincidence selector** : → *selector 3*
4. **false coincidence** : any coincidence which is not a true coincidence. ★ fausse coïncidence → *coïncidence 4.* R ложное совпадение. D falsche Koinzidenz. E coincidencia falsa. I coincidenza falsa. N valse coïncidentie. P koincydencja fałszywa. S falsk koincidens. (391)
5. **(pulse) coincidence** : the occurrence of pulses within a preselected time interval in each of two or more channels, as specified. ★ coïncidence (d'impulsions) → *coïncidence 1.* R совпадение (импульсов). D (Impuls-) Koinzidenz. E coincidencia (de impulsos). I coincidenza (di impulsi). N coïncidentie (van pulsen). P koincydencja (impulsów). S koincidens. (391)
6. **random coincidence** : a false coincidence due to the detection of unrelated particles that happen to occur within the coincidence resolving time as a result of their random time distribution. ★ coïncidence fortuite → *coïncidence 2.* R случайное совпадение. D zufällige Koinzidenz. E coincidencia fortuita. I coincidenza casuale. N toevallige coïncidentie. P koincydencja przypadkowa. S tillfällig koincidens. (391)
7. **true coincidence** : a coincidence due to the detection of a single particle, or of two or more particles resulting from a single event. ★ coïncidence vraie → *coïncidence 3.* R истинное совпадение. D wahre Koinzidenz. E coincidencia verdadera. I coincidenza vera. N ware coïncidentie. P koincydencja rzeczywista. S sann koincidens. (391)

coin-denomination

1. **coin-denomination tone** (*Syn.* coin-value tone) : → *tone 9*

coin-value

1. **coin-value tone** : → *tone 9*

cold

1. **cold cathode** : → *cathode 17*
2. **cold cathode counting tube** : → *tube 16*
3. **cold cathode lamp** : → *lamp 8*
4. **cold conditions** : → *condition 3*
5. **cold curing** : → *curing 1*
6. **cold emission** : → *emission 3*
7. **cold lead** : → *lead 2*
8. **cold loss** : → *loss 11*
9. **cold point** : → *point 4*
10. **cold reserve** : → *reserve 1*
11. **cold setting** (*Syn.* cold curing) : → *curing 1*
12. **cold start-up of a thermal generating set** : → *start-up 1*
13. **cold tail** (*Syn.* cold lead) : → *lead 2*
14. **cold wall vacuum furnace** : → *furnace 9*
15. **cold walls** : → *wall 4*

cold-start

1. **cold-start lamp** : → *lamp 9*

collapse

1. **voltage collapse** (*Syn.* voltage depression) : a sudden and large decrease in the voltage of the electrical system. ★ effondrement de la tension → *effondrement 1.* R посадка напряжения. D Spannungszusammenbruch. E hundimiento de la tensión. I crollo della tensione. N spanningsineenstorting. P załamanie napięcia. S spänningssammanbrott. (604)

collar

1. **heating resistance collar** (*Syn.* heating resistance pad) : → *pad 3*

collating

1. **automatic collating** (*Syn.* loop checking) : → *checking 1*

collecting

1. **collecting electrode** : → *electrode 14*

collection

1. **charge collection time** : → *time 19*
2. **collection efficiency** : → *efficiency 7*
3. **data collection** : a facility for gathering small quantities of data from a nominated group of addresses, and assembling them within the network into a single message for delivery to another nominated address. ★ collecte de données → *collecte 1.* R сбор данных. D datensammeln. E agrupamiento de datos. I raccolta dati. N gegevensverzameling. P grupowanie danych. S datainsamling. (721)
4. **electron collection pulse chamber** : → *chamber 8*
5. **electron collection time** : → *time 52*
6. **ion collection pulse chamber** : → *chamber 11*
7. **ion collection time** : → *time 79*

collective

1. **collective dose equivalent** : → *equivalent 4*

collectively

1. **collectively shielded cable** : → *cable 23*

collector

1. **collector** : a region between the collector junction and the collector electrode. ★ collecteur → *collecteur 3.* R коллектор. D Kollektor; Kollektorzone. E colector. I collettore. N collector. P kolektor. S kollektor. (521)
2. **collector** (of an electronic tube) : an electrode that collects electrons or ions that have completed their functions. ★ collecteur → *collecteur 4.* R коллектор. D Kollektor (Auffänger). E colector. I collettore; elettrodo collettore. N collector (elektrode). P kolektor. S kollektor. (531)
3. **collector junction** : → *junction 3*
4. **collector ring** : → *ring 4*
5. **collector ring** (*Syn.* slip ring) : → *ring 20*
6. **collector shoe** : → *shoe 1*
7. **common collector (arrangement)** : → *arrangement 2*
8. **current collector** : equipment fitted to the vehicle and intended to collect current from a contact wire or conductor rail.

★ appareil de prise de courant → *appareil 28.* R токоприемник. D Stromabnehmer. E aparato de toma de corriente. I presa di corrente. N stroomafnemer. P odbierak prądu. S strömvtagare. (811)

9. **current collector** (*Syn.* trolley-head) : → *trolley-head 1*
10. **third rail collector** (*Syn.* shoegear) : → *shoegear 1*

collectron

1. **collectron** (*Syn.* self-powered neutron detector) : a neutron detector in which an electric current is produced without the application of an external power source through the emission of beta particles or electrons by a part of the detector called the emitter. This emission is caused by neutron interaction. ★ collectron → *collectron 1.* R коллектрон. D Kollektron. E colectrón; detector de neutrones autoenergizado. I collettrone. N collectron. P samozasilający detektor neutronów; kolektron. S betaströmdetektor. (391)

collimating

1. **collimating diaphragm** : → *diaphragm 1*
2. **collimating lens** : → *lens 1*

collimation

1. **collimation** : the process of rendering and maintaining an electron beam parallel within a stated cross-section along a stated length. ★ collimation → *collimation 1.* R коллимация. D Bündelung (Kollimation). E colimación. I collimazione. N elektronenparallelbundeling. P kolimacja. S kollimation. (531)
2. **collimation** : the process by which a divergent or convergent beam of optical radiation is converted to and maintained as a beam of parallel rays. ★ collimation → *collimation 2.* R коллимация. D Kollimator. E colimación. I collimazione. N collimatie. P kolimacja. S kollimering. (731)

collision

1. **collision** : an interaction between two particles (including photons), which changes the existing momentum and/or energy conditions. ★ collision → *collision 1.* R столкновение. D Stossprozess. E colisión. I collisione. N botsing. P zderzenie. S stöt; kollision. (881)
2. **collision frequency** : → *frequency 19*
3. **collision mass stopping power** : → *power 21*
4. **collision of the first kind** : a collision in which the quantum of energy given to an atom is supplied by the incident particle. ★ choc de première espèce → *choc 7.* R соударение первого рода. D Stoß erster Ordnung. E choque de primera especie. I urto di prima specie. N botsing van de eerste soort. P zderzenie pierwszego rodzaju. S kollission av första slaget. (111)
5. **collision of the second kind** : a collision in which the quantum or quanta of energy taken from an atom increase the energy of the incident particle. ★ choc de deuxième espèce → *choc 4.* R соударение второго рода. D Stoß zweiter Ordnung. E choque de segunda especie. I urto di seconda specie. N botsing van de tweede soort. P zderzenie drugiego rodzaju. S kollission av andra slaget. (111)
6. **effective collision cross-section** : → *cross-section 10*
7. **elastic collision** : a collision in which the physical content of each colliding system and the total kinetic energy are left unchanged, although the directions of their relative motion will probably be altered. ★ collision élastique → *collision 2.* R упругое столкновение. D elastischer Stoss. E colisión elástica. I collisione elastica. N elastische botsing. P zderzenie elastyczne. S elastisk stöt. (881)
8. **first collision dose** : → *dose 30*
9. **head on collision** : the condition which exists when, on a transmission path capable of being used to set up calls in both directions, the path is seized from both ends simultaneously or nearly so. The seizure of the path by the distant end is not apparent, due to propagation delays. ★ double prise → *prise 10.* R встречный вызов. D Belegungszusammenstoß. E doble toma (sobre circuito mixto); colisión frontal. I collisione. N oproepbotsing. P kolizja czołowa. S anropskollision. (721)
10. **inelastic collision** : a collision in which at least one system gains internal excitation energy at the expense of the total kinetic energy. ★ collision inélastique → *collision 4.* R неупругое столкновение. D inelastischer Stoss. E colisión inelástica. I collisione anelastica. N inelastische botsing. P zderzenie nieelastyczne. S inelastisk stöt. (881)
11. **linear collision stopping power** : → *power 77*
12. **restricted linear collision stopping power** (*Syn.* linear energy transfer) : → *transfer 14*

color

1. **(perceived) color** (*Syn.* (perceived) colour) : → *colour 65*
2. **(psychophysical) color** (*Syn.* (psychophysical) colour) : → *colour 70*

colorimeter

1. **colorimeter** : instrument for measuring colorimetric quantities, such as the tristimulus values of a colour stimulus. ★ colorimètre → *colorimètre 1.* R колориметр. D Farbmeßgerät. E colorimetro. I colorimetro. N colorimeter. P kolorymetr. S kolorimeter. (845)

colorimetric

1. **adaptive colorimetric shift** : → *shift 1*
2. **CIE 1931 standard colorimetric observer** : → *observer 2*
3. **CIE 1931 standard colorimetric system (X Y Z)** : → *system 26*
4. **CIE 1964 supplementary standard colorimetric observer** : → *observer 3*
5. **CIE 1964 supplementary standard colorimetric system (X_{10} Y_{10} Z_{10})** : → *system 27*
6. **colorimetric distortion** : → *distortion 12*
7. **colorimetric functions** : → *function 5*
8. **colorimetric purity** : → *purity 1*
9. **colorimetric system** : → *system 30*
10. **illuminant colorimetric shift** : → *shift 19*
11. **resultant colorimetric shift** : → *shift 33*

colorimetry

1. **colorimetry** : measurement of colours based on a set of conventions. ★ colorimétrie → *colorimétrie 1.* R колориметрия. D Farbmessung. E colorimetría. I colorimetria. N colorimetrie; kleurmeting. P kolorymetria. S kolorimetri. (845)
2. **physical colorimetry** : colorimetry in which physical detectors are used to make the measurements. ★ colorimétrie physique → *colorimétrie 2.* R физическая колориметрия. D physikalische Farbmessung. E colorimetría física. I colorimetria fisica. N fysische colorimetrie. P kolorymetria fizyczna. S fysikalisk kolorimetri. (845)
3. **visual colorimetry** : colorimetry in which the eye is used to make quantitative comparisons between colour stimuli. ★ colorimétrie visuelle → *colorimétrie 3.* R визуальная колориметрия. D visuelle Farbmessung. E colorimetría visual. I colorimetria visiva. N visuele colorimetrie. P kolorymetria wzrokowa. S visuell kolorimetri. (845)

coloriser

1. **coloriser** : apparatus allowing a particular area of an image to appear in any chosen colour. ★ colorieur → *colorieur 1.* R колоризер. (723)

colour

1. **achromatic (perceived) colour** : 1. In the perceptual sense : Perceived colour devoid of hue. The colour names white, grey and black are commonly used or, for transmitting objects, colourless and neutral. 2. In the psychophysical sense : See "achromatic stimulus". ★ couleur (perçue) achromatique → *couleur 8.* R ахроматическое цветовое ощущение. D unbunte Farbe. E color acromático (percibido). I colore acromatico. N achromatische kleur. P barwa achromatyczna. S okulört färg. (845)
2. **adaptive (perceived) colour shift** : → *shift 2*
3. **additive mixture of colour stimuli** : → *mixture 1*
4. **aperture colour** : perceived colour for which there is no definite spatial localization in depth, such as that perceived as filling a hole in a screen. ★ couleur-ouverture → *couleur-ouverture 1.* R апертурный цвет; нелокализованный цвет (воспринимаемый). D freie Farbe. E color-apertura (percibido). I colore di apertura. N apertuurkleur. P barwa swobodna. S fältfärg. (845)
5. **chromatic (perceived) colour** : 1. In the perceptual sense : Perceived colour possessing hue. In everyday speech, the word

"colour" is often used in this sense in contradistinction to white, grey or black. The adjective "coloured" usually refers to chromatic colour. 2. In the psychophysical sense : See "chromatic stimulus". ★ couleur (perçue) chromatique → *couleur 9.* R хроматическое цветовое ощущение. D bunte Farbe. E color-cromático (percibido). I colore cromatico. N chromatische kleur. P barwa chromatyczna. S kulört färg. (845)

6. **CIE 1974 general colour rendering index** : → *index 2*
7. **CIE 1974 special colour rendering index** : → *index 3*
8. **CIE 1976 $L^* a^* b^*$ colour difference** : → *difference 1*
9. **CIE 1976 $L^* a^* b^*$ colour space** : → *space 2*
10. **CIE 1976 $L^* u^* v^*$ colour difference** : → *difference 2*
11. **CIE 1976 $L^* u^* v^*$ colour space** : → *space 3*
12. **CIELAB colour difference** (*Syn.* CIE 1976 $L^* a^* b^*$ **colour difference**) : → *difference 1*
13. **CIELAB colour space** (*Syn.* CIE 1976 $L^* a^* b^*$ **colour space**) : → *space 2*
14. **CIELUV colour difference** (*Syn.* CIE 1976 $L^* u^* v^*$ **colour difference**) : → *difference 2*
15. **CIELUV colour space** (*Syn.* CIE 1976 $L^* u^* v^*$ **colour space**) : → *space 3*
16. **colour** (of an insulating liquid) : a numerical value obtained by comparison of a liquid sample with a series of numbered colour standards with transmitted light under standardized conditions. ★ couleur → *couleur 5.* R цвет (жидкого электроизоляционного материала). D Farbe (einer Isolierflüssigkeit). E índice de color (de un líquido aislante). I colore (di un liquido isolante). N kleur (van een isolatievloeistof). P wskaźnik barwy (oleju izolacyjnego). S färg. (212)
17. **colour atlas** : → *atlas 1*
18. **colour bars** : → *bar 6*
19. **colour burst guard interval** : → *interval 4*
20. **colour crosstalk** (*Syn.* crosscolour) : → *crosscolour 1*
21. **colour difference signal** : → *signal 51*
22. **colour equation** : → *equation 1*
23. **colour field** : → *field 2*
24. **(colour) fringing** (*Syn.* contrast) : → *contrast 2*
25. **colour identification signal** : → *signal 52*
26. **(colour) intensity control** (*Syn.* (colour) saturation control) : → *control 36*
27. **colour killer** : → *killer 1*
28. **colour matching** : → *matching 1*
29. **colour matting** : → *matting 1*
30. **colour picture tube** : → *tube 17*
31. **colour (reference) burst** : → *burst 9*
32. **colour rendering** : → *rendering 3*
33. **colour rendering index** : → *index 5*
34. **(colour) saturation control** : → *control 36*
35. **colour separation overlay** (*Syn.* chromakey) : → *chromakey 1*
36. **colour signal** : → *signal 53*
37. **colour solid** : → *solid 1*
38. **colour space** (*Syn.* chromatic space) : → *space 1*
39. **colour space** : → *space 7*
40. **colour stimulus** : → *stimulus 4*
41. **colour stimulus function** : → *function 6*
42. **colour subcarrier** : → *subcarrier 2*
43. **colour television** : → *television 5*
44. **colour temperature** : → *temperature 7*
45. **colour triad** : → *triad 1*
46. **colour video signal** : → *signal 54*
47. **complementary colour stimuli** : → *stimulus 6*
48. **component colour television system** : → *system 33*
49. **component (in a colour television system)** : → *component 12*
50. **composite colour signal** : → *signal 57*
51. **(correlated) colour temperature** : → *temperature 10*
52. **correlated colour temperature** : → *temperature 11*
53. **defective colour vision** : → *vision 1*
54. **dot sequential colour television system** : → *system 49*
55. **field sequential colour television system** : → *system 69*
56. **illuminant (perceived) colour shift** : → *shift 20*
57. **line sequential colour television system** : → *system 102*
58. **luminous (perceived) colour** : colour perceived to belong to an area that appears to be emitting light as a primary light source, or that appears to be specularly reflecting such light. *Note.* — Primary light sources seen in their natural surroundings normally exhibit the appearance of luminous colours in this sense. ★ couleur-lumière (perçue) → *couleur-lumière 1.* R цвет (воспринимаемый) светящегося объекта. D Lichtfarbe. E color-autoluminoso (percibido). I colore luminoso. N kleur (als) van een zelflichtgevend voorwerp. P barwa pierwotnego źródła światła. S lysfärg. (845)
59. **MAC (colour television) system** : → *system 112*
60. **metameric colour stimuli** : → *stimulus 8*
61. **non-luminous (perceived) colour** : colour perceived to belong to an area that appears to be transmitting or diffusely reflecting light as a secondary light source. *Note.* — Secondary light sources seen in their natural surroundings normally exhibit the appearance of non-luminous colours in this sense. ★ couleur (perçue) d'un objet non lumineux → *couleur 10.* R цвет (воспринимаемый) несветящегося объекта. D Körperfarbe; Farbe eines Nichtselbstleuchters. E color-no-autoluminoso (percibido). I colore non luminoso. N kleur (als) van een niet-zelflichtgevend voorwerp. P barwa wtórnego źródła światła. S färg hos belyst föremål. (845)
62. **NTSC (colour television) system** : → *system 129*
63. **optimal colour stimuli** : → *stimulus 10*
64. **PAL (colour television) system** : → *system 140*
65. **(perceived) colour** (*Syn.* (perceived) color (USA)) : attribute of visual perception consisting of any combination of chromatic and achromatic content. This attribute can be described by chromatic colour names such as yellow, orange, brown, red, pink, green, blue, purple, etc., or by achromatic colour names such as white, grey, black, etc., and qualified by bright, dim, light, dark, etc., or by combinations of such names. *Notes. 1* — Perceived colour depends on the spectral distribution of the colour stimulus, on the size, shape, structure and surround of the stimulus area, on the state of adaptation of the observer's visual system, and on the observer's experience of the prevailing and similar situations of observation. *2* — See Notes 1 and 2 to "colour" *4* — Perceived colour may appear in several modes of colour appearance. The names for various modes of appearance are intended to distinguish among qualitative and geometric differences of colour perceptions. Some of the more important terms of the modes of colour appearance are given in "object colour", "surface colour", "aperture colour". Other modes of colour appearance include "film colour", "volume colour", "illuminant colour", "body colour" and "Ganzfeld colour". Each of these modes of colour appearance may be further qualified by adjectives to describe combinations of colour or their spatial and temporal relationships. Other terms that relate to qualitative differences among colours perceived in various modes of colour appearance are given in "luminous (perceived) colour", "non-luminous (perceived) colour", "related (perceived) colour", "unrelated (perceived) colour". ★ couleur (perçue) → *couleur 7.* R цвет (воспринимаемый). D Farbe; Farbempfindung. E color (percibido). I colore. N kleur. P barwa (postrzegana). S (varsebliven) färg. (845)
66. **primary (colour)** : one of the three specified reference colour stimuli which permit, by appropriate mixing, the reproduction of various colour sensations, at least within a certain field. *Note.* — In television the primary colours are, in general, red, green and blue. ★ (couleur) primaire → *couleur 13.* R основной цвет. (723)
67. **primary colour field** (*Syn.* colour field) : → *field 2*
68. **primary colour picture** : → *picture 20*
69. **primary colour signal** : → *signal 143*
70. **(psychophysical) colour** (*Syn.* (psychophysical) color (USA)) : A specification of a colour stimulus in terms of operationally defined values, such as three tristimulus values. *Notes. 1* — When the meaning is clear from the context the term "colour" can be used alone. *2* — In German, "Farbe" is often used instead of "Farbempfindung". The use of "Farbe" in the sense of "Farbvalenz" should be avoided. It is only when the sense is obvious from the context, or when "Farbempfindung" and "Farbvalenz" are equally suitable, that "Farbe" may be used in the sense of "Farbvalenz". ★ couleur (psychophysique) → *couleur 14.* R (с психологической точки зрения) цвет.

D Farbevalenz; Farbe. E color (percibido o sicofísico). I colore. N kleur. P barwa (psychofizyczna). S färg. (845)

71. **reference colour stimuli** : → *stimulus 12*
72. **related (perceived) colour** : colour perceived to belong to an area seen in relation to other colours. ★ couleur (perçue) non isolée → *couleur 12.* R неизолированный цвет (воспринимаемый). D bezogene Farbe. E color-dependiente (percibido). I colore relativo. N relatieve kleur. P barwa niesamoistna. S relaterad färg. (845)
73. **relative colour stimulus function** : → *function 27*
74. **resultant (perceived) colour shift** : → *shift 34*
75. **SECAM (colour television) system** : → *system 182*
76. **sequential colour television system** : → *system 185*
77. **simultaneous colour television system** : → *system 187*
78. **simultaneous line sequential colour television system** : → *system 188*
79. **surface colour** : colour perceived as belonging to a surface from which the light appears to be diffusely reflected or radiated. ★ couleur de surface → *couleur 6.* R цвет поверхности. D Aufsichtfarbe. E color-superficie (percibido). I colore superficiale. N oppervlaktekleur. P barwa powierzchni. S ytfärg. (845)
80. **uniform colour space** : → *space 28*
81. **unrelated (perceived) colour** : colour perceived to belong to an area seen in isolation from other colours. ★ couleur (perçue) isolée → *couleur 11.* R изолированный цвет (воспринимаемый). D unbezogene Farbe. E color-independiente (percibido). I colore non relativo. N eigen kleur. P barwa samoistna. S orelaterad färg. (845)

coloured

1. **coloured bulb** : → *bulb 6*
2. **coloured noise** : → *noise 8*

colourfulness

1. **colourfulness** (*Syn.* chromaticness) : → *chromaticness 1*

colour-matching

1. **CIE colour-matching functions** : → *function 4*
2. **colour-matching functions** : → *function 7*

column

1. **shadow column instrument** : → *instrument 29*

columnar

1. **columnar ionization** : → *ionization 1*

coma

1. **coma** : a spot distortion occurring together with spherical aberration and giving a comet-like appearance to a stationary spot. ★ coma → *coma 1.* R кома. D Koma. E coma. I coma; cometa. N coma. P koma; zniekształcenie przecinkowe. S koma. (531)

comb

1. **comb filter** : → *filter 8*

combination

1. **code combination** (*Syn.* code word) : → *word 1*
2. **code combination** (*Syn.* code representation; code value) : a combination of n-unit elements formed in accordance with an n-unit code which assigns a significant condition to each of the unit elements. ★ combinaison de code → *combinaison 2.* R кодовая комбинация; кодовое представление. D Codekombination. E combinación de código; representación de código; valor de código. I rappresentazione codificata. N codecombinatie. P kombinacja kodowa; reprezentacja kodu. S kodelement. (721)
3. **combination frequency** : → *frequency 20*
4. **combination tone** (*Syn.* combination frequency) : → *frequency 20*
5. **consonant combination** : a group of two or three consonants which, either preceded or followed by a vowel, can be pronounced in a single emission of the voice. ★ consonance → *consonance 1.* R консонанс. D Konsonantenbündel. E consonancia. I gruppo di consonanti. N consonantengroep. P konsonans. S konsonantkluster. (722)
6. **(motor) combination** : a method of speed regulation effected by connecting motors, singly or as permanent groups, in series, series-parallel or parallel. ★ couplage (des moteurs) → *couplage 15.* R соединение двигателей. D Gruppenschaltung der Fahrmotoren. E acoplamiento (de motores). I connessione o combinazione (dei motori). N motorgroepering. P grupowanie silników. S motorgruppering. (811)

combinatorial

1. **combinatorial circuit** : → *circuit 40*

combined

1. **combined braking system** : → *system 31*
2. **combined distribution frame** : → *frame 5*
3. **combined field-weakening** : → *field-weakening 2*
4. **combined heat and power** : → *heat 1*
5. **combined heat transmission** : → *transmission 13*
6. **combined (insulating) material** : → *material 9*
7. **combined rack and adhesion drive** : → *drive 2*
8. **combined station** : → *station 2*
9. **combined transformer** : → *transformer 19*
10. **motor with combined ventilation** : → *motor 65*

combiner

1. **optical combiner** : a directional coupler in which power from several input ports is distributed among a smaller number of output ports. ★ combinateur optique → *combinateur 10.* R оптический комбинированный разветвитель. D LWL-Kombinator. E combinador óptico. I combinatore ottico. N optische trilholte samenvoeger, combinator. P łącznik (optyczny) kombinacyjny. S sammankopplingsdon. (731)

combining

1. **combining unit** : → *unit 15*

combustion

1. **continuous output (of an internal combustion engine)** (*Syn.* continuous power (of an internal combustion engine)) : → *power 26*
2. **internal combustion set** : → *set 28*
3. **maximum service output (of an internal combustion engine)** : → *output 23*
4. **net brake power (of an internal combustion engine)** (*Syn.* useful service output) : → *output 71*
5. **overload output (of an internal combustion engine)** (*Syn.* overload power (of an internal combustion engine)) : → *power 99*
6. **standard power (of an internal combustion engine)** (*Syn.* international rated output) : → *output 15*

comet

1. **comet tail** : → *tail 2*

command

1. **adjusting command** : a command used to change the state of operational equipment having more than two states. ★ commande de position → *commande 47.* R многопозиционная команда. D Stellbefehl. E mando de posición. I comando di organo a più posizioni. N instelcommando. P rozkaz nastawienia. S justeringskommando. (371)
2. **broadcast command** : a command which is addressed to operational equipment at several or all outstations of a telecontrol network. ★ commande diffusée → *commande 60.* R циркулярная команда. D Befehl an alle. E mando difundido. I comando generale. N rondzendcommando. P rozkaz rozsiewczy. S generellt kommando. (371)
3. **check command** : a command for the purpose of ensuring that the telecontrol equipment is functioning correctly. ★ commande de vérification → *commande 57.* R команда контроля. D Prüfbefehl. E mando de comprobación. I comando di prova. N testcommando. P rozkaz weryfikacji. S kontrollorder; kontrollkommando. (371)
4. **command** (in telecontrol) : information used to cause a change of state of operational equipment. ★ commande → *commande 16.* R команда (в телемеханике). D Befehl (beim Fernwirken). E mando (en telecontrol). I commando (in telecontrollo); comando. N commando. P rozkaz. S kommando. (371)

5. **command language** : → *language 2*
6. **double command** : a pair of commands each of which is used to cause operational equipment to change to one of two determined states. ★ commande double → *commande 69.* R двухпозиционная команда. D Doppelbefehl. E mando doble. I comando doppio. N dubbel commando. P rozkaz podwójny; rozkaz złożony. S dubbelt kommando. (371)
7. **function command** : command which initiates the operation of an automatic sequencing device in order to achieve the required function. *Example :* The command to change busbars for a feeder. ★ commande de fonction → *commande 40.* R функциональная команда. D Programmbefehl. E mando de función. I comando di funzione. N functiecommando. P rozkaz czynności żądanej. S sekvens(start)kommando. (371)
8. **general interrogation command** : an interrogation command requesting all outstations to transmit all their monitored information to their control centre. ★ commande d'interrogation générale → *commande 65.* R общая команда запроса. D Generalabfragebefehl. E interrogación general. I comando generale di interrogazione. N algemeen afvraagcommando. P zapytanie ogólne. S allmänt (fråge)anrop. (371)
9. **group command** : a command which is addressed to several operational equipments at one outstation. ★ commande groupée → *commande 75.* R групповая команда. D Gruppenbefehl. E mando agrupado. I comando generale di posto. N groepscommando. P rozkaz grupowy. S gruppkommando. (371)
10. **incremental command** (*Syn.* regulating step command) : → *command 17*
11. **instruction command** (*Syn.* standard command) : a command which is input at a control centre and which indicates a standard instruction to operators in the control room of a manned station. *Examples :* "Start generators" or "Adjust generator output to ... MW". *Note.* — The instruction command is distinguished from instructions transmitted by general communication means (e.g. teleprinter) in that it is input and transmitted by means of devices used in telecontrol systems for other purposes and therefore must be programmed in a similar manner to other types of commands. ★ commande d'instruction → *commande 61.* R команда инструкций; служебная команда. D Anweisung. E mando de instrucción. I ordine breve. N intructiecommando. P rozkaz instrukcyjny; rozkaz instrukcja. S instruktionskommando. (371)
12. **interrogation command** : a command by which one or more outstations are requested to transmit information. ★ commande d'interrogation → *commande 63.* R команда запроса. D Abfragebefehl. E interrogación. I comando di interrogazione. N afvraagcommando. P zapytanie. S förfrågningsanrop. (371)
13. **maintained command** : a command in which the output signal to operational equipment is maintained until the change of state is executed or until the end of a predetermined delay longer than the response of the slowest operational equipment ; the duration of the output signal is independent of the duration of the initiating signal. ★ commande maintenue → *commande 82.* R ..... D Befehl mit Selbsthaltung. E mando mantenido. I comando temporizzato. N stationair commando. P rozkaz podtrzymywany. S hållkommando; utdraget kommando. (371)
14. **persistent command** : a command in which the output signal to operational equipment persists for as long as the initiating signal is present. ★ commande continue → *commande 27.* R непрерывная команда. D Dauerbefehl. E mando continuo. I comando continuo. N continu commando. P rozkaz ciągły. S kontinuerligt kommando. (371)
15. **persistent regulating command** : a persistent command which during the time of execution causes continual change to a parameter. ★ commande continue de régulation → *commande 28.* R непрерывная команда регулирования. D Dauereinstellbefehl. E mando continuo de regulación. I comando continuo di regolazione. N doorloopcommando. P rozkaz ciągły regulacji. S öka/minskakommando. (371)
16. **pulse command** : a command in which the output signal to an operational equipment is a single pulse of predetermined duration independent of the duration of the initiating signal. ★ commande par impulsions → *commande 92.* R импульсная команда. D Impulsbefehl. E mando por impulso. I comando impulsivo. N impulscommando. P rozkaz jednoimpulsowy. S impulskommando. (371)
17. **regulating step command** (*Syn.* incremental command; step by step adjusting command) : a pulse command which changes the state of operational equipment in predetermined steps. *Note.* — It is usual to have two distinct commands to adjust operational equipment in its two possible directions. ★ commande de régulation par échelons → *commande 50.* R команда пошагового регулирования. D Schrittschaltbefehl; Imkrementalbefehl; Stufenstellbefehl. E mando de regulación por escalón; mando incremental; mando paso a paso. I comando a gradini di regolazione; comando incrementale. N stapcommando. P rozkaz nastawienia skokowego; rozkaz regulacji skokowej. S stegändringskommando. (371)
18. **select and execute command** : a command whereby two successive actions are required to effect a change of state of an operational equipment ; the first or "select command" energises part of the control circuit which in turn causes confirmatory return information to be transmitted back ; the second or "execute command" causing the full energization of the control circuit at the receiving station is transmitted only after receipt of this return information. ★ commande sélection/exécution → *commande 107.* R предварительная и исполнительная команды. D Anwahl- und Ausführungsbefehl. E mando selección/ejecución. I comando di selezione ed esecuzione. N keuze-en uitvoeringscommando. P rozkaz zaproszeniowy i wykonawczy. S tvåstegskommando. (371)
19. **selection command** : a command used to connect one of several parts of an installation to a common equipment. *Example :* The connection of one measurand at a time to a common display device. ★ commande de sélection → *commande 53.* R команда выбора. D Anwahlbefehl. E mando selectivo. I comando di selezione. N keuzecommando. P rozkaz zaproszeniowy indywidualny. S urvalskommando. (371)
20. **selective interrogation command** : an interrogation command by which one outstation is requested to transmit the state information of one or more operational equipment. ★ commande d'interrogation sélective → *commande 66.* R селективный вызов контрольной информации. D gezielter Abfragebefehl. E interrogación selectiva. I comando di interrogazione selettivo. N keuzeafvraagcommando. P zapytanie selektywne. S selektivt (stations)frågeanrop. (371)
21. **set point command** : a command in which the value for the required state of operational equipment is transmitted to a controlled station where it is stored. ★ commande de valeur de consigne → *commande 56.* R команда уставки. D Sollwert-Stellbefehl. E mando de valor de consigna. I comando di set-point. N commando voor gewenste waarde. P rozkaz współpracy z pamięcią. S börvärdeskommando. (371)
22. **single command** : a command used to cause a change of state of operational equipment in one direction. ★ commande simple → *commande 109.* R однопозиционная команда. D Einzelbefehl. E mando simple. I comando singolo. N enkelvoudig commando. P rozkaz prosty. S enkelt kommando. (371)
23. **standard command** (*Syn.* instruction command) : → *command 11*
24. **starting command** : a command which initiates action of operational equipment. ★ commande de mise en marche → *commande 44.* R команда пуска. D Startbefehl. E mando de arranque. I comando di avvio. N startcommando. P rozkaz startu; start. S startkommando. (371)
25. **station interrogation command** : an interrogation command by which one outstation is requested to transmit all monitored information to its control centre. ★ commande d'interrogation de poste → *commande 64.* R команда запроса контролируемого пункта. D Stationsabfragebefehl. E interrogación general de estación. I comando di interrogazione di posto. N stationsafvraagcommando. P zapytanie stanowiskowe. S stations(fråge)anrop. (371)
26. **step by step adjusting command** (*Syn.* regulating step command) : → *command 17*
27. **stop command** : a command which stops action of operational equipment. ★ commande d'arrêt → *commande 34.* R команда останова. D Stop-Befehl. E mando de parada. I comando di fermata. N stopcommando. P rozkaz zatrzymania; stop. S stoppkommando. (371)
28. **switching command** : a command used to change the state of two-state operational equipment from one state to the other state. *Examples :* "Switch-on/Switch-off"; "Open/Close".

★ commande de commutation → *commande 36.* R команда на переключение. D Schaltbefehl. E mando de conmutación. I comando di organo a due posizioni. N schakelcommando. P rozkaz przełączenia. S kopplingskommando. (371)

commercial

1. **commercial tariff** : → *tariff 4*

commissioning

1. **commissioning (of a battery)** : final checking of installation and operation of a battery on site. ★ mise en service (d'un accumulateur) → *mise 15.* R ввод в эксплуатацию (батареи). D Inbetriebsetzung (einer Batterie). E puesta en servicio. I messa in servizio. N in bedrijf stellen. P uruchomienie (instalacji akumulatorowej). S idrifttagning. (486)
2. **commissioning test** : → *test 13*
3. **commissioning tests** : → *test 14*

committed

1. **committed dose equivalent** : → *equivalent 5*

common

1. **common alarm** : → *alarm 3*
2. **common auxiliaries** : → *auxiliary 31*
3. **common base (arrangement)** : → *arrangement 1*
4. **common battery** : → *battery 19*
5. **common battery** (*Syn.* central battery) : → *battery 13*
6. **common battery feeding (telephony)** (*Syn.* central battery feeding (telephony)) : → *telephony 1*
7. **common battery signalling (telephony)** (*Syn.* central battery signalling (telephony)) : → *signalling 5*
8. **common collector (arrangement)** : → *arrangement 2*
9. **common control** : → *control 37*
10. **common diagram telecontrol system** (*Syn.* channel selecting telecontrol system) : → *system 25*
11. **common emitter (arrangement)** : → *arrangement 3*
12. **common mode conversion** : → *conversion 5*
13. **common mode failure** : → *failure 5*
14. **common mode rejection ratio** : → *ratio 15*
15. **common mode voltage** : → *voltage 30*
16. **common mode voltage** : → *voltage 31*
17. **common winding** : → *winding 10*
18. **input and output with isolated common point** : → *input 16*
19. **point of common coupling** : → *point 33*

common-channel

1. **common-channel signalling** : → *signalling 8*

communal

1. **communal (broadcasting) antenna** (*Syn.* CATV) : → *CATV 1*

communication

1. **communication** (sens 1) : information transfer according to agreed conventions. *Note.* – In French and Spanish the corresponding terms "communication" and "comunicación" have additional specific meaning in telecommunications. ★ communication → *communication 2.* R связь. D Kommunikation. E comunicación. I comunicazione. N communicatie. P komunikacja; łączność. S kommunikation. (701,714,715)
2. **communications circuit** (*Syn.* talk-back circuit) : → *circuit 175*
3. **data communication** : a form of telecommunication intended for the transfer of information between data processing equipments. ★ communication de données → *communication 7.* R подача данных. D Datenkommunikation; Datenübertragung (nicht empfohlen). E comunicación de datos. I trasmissione dati. N datacommunicatie; datatransmissie. P teleinformatyka. S datakommunikation. (701,721)
4. **mean access delay (of a communication)** : → *delay 26*
5. **p-fractile access delay (of a communication)** : → *delay 31*

community

1. **community reception** : → *reception 1*
2. **community reception** : → *reception 2*

commutating

1. **commutating group** : → *group 5*
2. **commutating pole** (*Syn.* interpole) : → *interpole 1*
3. **commutating voltage** : → *voltage 32*
4. **commutating winding** : → *winding 11*

commutation

1. **asymmetric bridge with external commutation "out"** : → *bridge 1*
2. **black commutation** : on a commutator machine, commutation where there is no visible sparking between any brushes and the commutator. ★ commutation noire → *commutation 30.* R темная [безыскровая] коммутация. D funkenfreie Kommutierung. E conmutación negra. I commutazione nera. N zwarte band commutatie. P komutacja ciemna. S svart kommutering. (811)
3. **commutation** : change-over switching in a periodic and automatic manner. ★ commutation (périodique) → *commutation 34.* R периодическое переключение. D periodisches automatisches Umschalten (Kommutieren). E conmutación (periódica). I commutazione (periodica). N commutatie. P komutacja; przełączanie. S kommutering. (151)
4. **commutation** (of a gas discharge) : the transfer of current from one main gap to another in a predetermined order. ★ commutation → *commutation 11.* R коммутация (газового разряда). D Kommutierung, Stromübernahme (bei einer Gasentladung). E conmutación (de una descarga en un gas). I commutazione (di una scarica in un gas). N commutatie (van een gasontlading). P komutacja (wyładowania). S kommutering. (531)
5. **commutation** : the transfer of current from one arm to another. ★ commutation → *commutation 12.* R коммутация. D Stromübernahme (bei Überlappen: Kommutierung). E conmutación. I commutazione. N commutatie. P komutacja. S kommutering. (551)
6. **commutation capacitor** : → *capacitor 27*
7. **commutation circuit** : → *circuit 42*
8. **commutation coefficient** : → *coefficient 11*
9. **commutation curve** : → *curve 9*
10. **commutation failure** : → *failure 6*
11. **commutation (in a convertor)** : the transfer of current from one arm to another. ★ commutation (dans un convertisseur) → *commutation 19.* R коммутация (в преобразователе). D Kommutierung. E conmutación (en un convertidor). I commutazione. N commutatie (in een omzetter). P komutacja (w przetworniku). S kommutering. (811)
12. **commutation inductance** : → *inductance 1*
13. **commutation notch** : → *notch 1*
14. **commutation number** : → *number 7*
15. **commutation test** : → *test 15*
16. **direct commutation** : a commutation between two principal arms, without transfer through any auxiliary arms. ★ commutation directe → *commutation 24.* R прямая коммутация. D direktes Kommutieren. E conmutación directa. I commutazione diretta. N directe commutatie. P komutacja bezpośrednia. S direktkommutering. (551)
17. **external commutation** : a commutation where the commutating voltage is supplied by a source outside the convertor or electronic switch. ★ commutation externe → *commutation 26.* R внешняя коммутация. D Fremdführung. E conmutación externa. I commutazione esterna. N uitwendige commutatie. P komutacja zewnętrzna. S externkommutering. (551,811)
18. **indirect commutation** : a series of commutations from one principal arm to another or back to the original one by successive commutations via one or more auxiliary arms. ★ commutation indirecte → *commutation 27.* R непрямая коммутация. D indirektes Kommutieren. E conmutación indirecta. I commutazione indiretta. N indirecte commutatie. P komutacja pośrednia. S indirekt kommutering. (551)
19. **line commutation** : an external commutation where the commutating voltage is supplied from the line.

★ commutation par le réseau → *commutation 33.* R сетевая коммутация. D Netzführung. E conmutación por la red. I commutazione dalla linea. N netcommutatie. P komutacja sieciowa. S nätkommutering. (551)

20. **load commutation** : an external commutation where the commutating voltage is taken from a load other than the line. ★ commutation par la charge → *commutation 32.* R коммутация за счет нагрузки. D Lastführung. E conmutación por la carga. I commutazione del carico. N belastingscommutatie. P komutacja obciążeniowa. S lastkommutering. (551)

commutator

1. **alternating current commutator machine** : → *machine 2*
2. **alternating current commutator motor** : → *motor 5*
3. **commutator** : an assembly of conducting members insulated from one another and from their supports, against which the brushes are maintained and used to enable commutation of current between a moving winding and the stationary part of a circuit by sliding contact. ★ collecteur → *collecteur 5.* R коллектор. D Kommutator. E colector. I collettore. N commutator. P komutator. S kommutator. (411,811)
4. **commutator mica material** : → *material 10*
5. **commutator pitch** : → *pitch 3*
6. **commutator riser** : → *riser 1*
7. **commutator segment** : → *segment 1*
8. **commutator segment insulation** : → *insulation 9*
9. **commutator type frequency convertor** : → *convertor 6*
10. **commutator V-ring** : the V-section ring used to clamp the commutator segments into a rigid assembly. ★ manchon de collecteur → *manchon 6.* R стяжное кольцо коллектора. D Kommutator-Druckring. E cono de colector. I anello a V. N V-ring (van een commutator); klemring. P stożkowy pierścień dociskowy komutatora. S kommutatortryckring. (411)
11. **commutator V-ring insulation** : → *insulation 10*
12. **direct current commutator machine** : → *machine 8*
13. **double commutator motor** : → *motor 24*

compacted

1. **compacted conductor** : → *conductor 8*

compact-source

1. **compact-source arc discharge lamp** (*Syn.* short-arc lamp) : → *lamp 58*

companding

1. **companding** : the combination of compression and expansion carried out successively on the same signal at two points in a transmission channel. ★ compression-expansion → *compression-expansion 1.* R компандирование. D kompandieren; Anwendung von Kompression und Expansion. E compresión-expansión. I compressione-espansione. N compressie/expansie; compansie. P kompresja-ekspansja; kompansja. S kompansion. (702)
2. **companding** (of a sound signal) : the combination of compression and expansion carried out successively on the same sound signal at two points in a transmission channel. ★ compression-expansion → *compression-expansion 2.* R компандирование (звукового сигнала). (723)
3. **syllabic companding** : companding of a speech signal in which the average levels for compression and expansion are taken during intervals of time which are comparable in duration with those of spoken syllables. ★ compression-expansion syllabique → *compression-expansion 3.* R слоговое компандирование. D Silben-Kompandieren; Anwendung von silbenbezogener Kompression und Expansion. E compresión-expansión silábica. I compressione-espansione sillabica. N syllabische compressie/expansie; syllabische compansie. P kompresja-ekspansja sylabowa; kompansja sylabowa. S stavelsekompansion. (702)

compandor

1. **compandor** : a combination of a compressor at one point in a transmission channel and an expander at a subsequent point in the same channel. ★ compresseur-expanseur → *compresseur-expanseur 1.* R компандер. D Kompander. E compresor-expansor; compandor. I compressore-espansore. N compander. P kompandor. S kompander. (702)

comparative

1. **comparative tracking index** : → *index 6*

comparator

1. **comparator** : a device which, by comparison, provides information on the difference between the values of two quantities. ★ comparateur → *comparateur 1.* R компаратор. D Komparator. E comparador. I comparatore. N comparator. P komparator. S komparator. (303)
2. **phase comparator relay** : → *relay 28*

comparing

1. **comparing element** : → *element 7*

comparison

1. **comparison lamp** : → *lamp 11*
2. **comparison (method of) measurement** : → *measurement 2*
3. **comparison scale** : → *scale 1*
4. **comparison standard** : → *standard 10*
5. **comparison value** : → *value 3*
6. **directional comparison protection system** : → *system 47*
7. **frequency comparison pilot** : → *pilot 1*
8. **phase comparison protection system** : → *system 144*

compartment

1. **compartment** (of an assembly) : a part of an assembly enclosed except for openings necessary for interconnection, control or ventilation. ★ compartiment → *compartiment 1.* R отсек (комплекта). D (Schott-)Raum; (Schott-)Fach (schott-). E compartimento (de un conjunto). I compartimento (di un complesso). N compartiment (van een inrichting). P przedział. S cell. (441)

compatibility

1. **compatibility** (in plastic) : a state in which a substance in admixture in a plastic will not exude, bloom or similarly separate. ★ compatibilité → *compatibilité 1.* R совместимость (в пластмассе). D Kompatibilität (in Kunststoffen); Verträglichkeit (in Kunststoffen). E compatibilidad (en un plástico). I compatibilità (in una plastica). N compatibiliteit (in een kunststof); verenigbaarheid (in een kunststof). P kompatybilność (w masie plastycznej); zgodliwość substancji (w masie plastycznej). S kompatibilitet. (212)
2. **compatibility** (of insulating materials) : the ability of two or more materials to be used together without deleterious changes in either. ★ compatibilité → *compatibilité 2.* R совместимость (электроизоляционных материалов). D Kompatibilität (von Isolierstoffen); Verträglichkeit (von Isolierstoffen). E compatibilidad (de materiales aislantes). I compatibilità (di materiali isolanti). N compatibiliteit (van isolatiematerialen); verenigbaarheid (van isolatiematerialen). P kompatybilność (materiałów izolacyjnych); zgodliwość użytkowa (materiałów izolacyjnych). S kompatibilitet. (212)
3. **compatibility** (of a television system) : the attribute of a new television system which allows the acceptable reception of programmes from the new system on unmodified existing television receivers. *Note.* — Associated term : compatible. ★ compatibilité → *compatibilité 3.* R совместимость (телевизионной системы). (723)
4. **compatibility** : a) a mechanical characteristic of a pick-up head which enables it to reproduce without damage the modulation of a monophonically or stereophonically recorded groove. b) a characteristic of the groove modulation which enables it to be played monophonically or stereophonically. ★ compatibilité → *compatibilité 4.* R совместимость. D Kompatibilität; (Mono-Stereo Abstaster); Aufnahme. E compatibilidad. I compatibilità. N compatibiliteit. P kompatybilność. S kompatibilitet. (806)
5. **electromagnetic compatibility** (*Syn.* EMC (abbreviation)) : the ability of an equipment or system to function satisfactorily in its electromagnetic environment without introducing intolerable electromagnetic disturbances to anything in that environment. ★ compatibilité électromagnétique → *compatibilité 5.* R электромагнитная совместимость; ЭМС (аббревиатура). D elektromagnetische Verträglichkeit; EMV (Abkürzung). E compatibilidad electromagnética; CEM (abreviatura). I compatibilità elettromagnetica. N elektromagnetische

compatibiliteit; EMC. P kompatybilność elektromagnetyczna; zgodliwość elektromagnetyczna. S elektromagnetisk kompatibilitet; EMC. (161,702)

6. **(electromagnetic) compatibility level** : → *level 17*
7. **(electromagnetic) compatibility margin** : → *margin 2*
8. **reverse compatibility** (in television) : the ability of a receiver designed for a new television system to receive programmes transmitted from the existing system at an acceptable level of quality. ★ rétrocompatibilité → *rétrocompatibilité 1.* R обратная совместимость (в телевидении). (723)

compatible

1. **compatible connectors** : → *connector 5*
2. **compatible monophonic signal** : → *signal 55*
3. **compatible single sideband modulation** : → *modulation 10*

compelled

1. **compelled signalling** : → *signalling 9*

compensated

1. **compensated ionization chamber** : → *ionization chamber 7*
2. **compensated motor** : → *motor 15*
3. **compensated regulated** : → *regulated 2*
4. **compensated repulsion motor** : → *motor 16*
5. **compensated semiconductor** : → *semiconductor 1*
6. **compensated semiconductor detector** : → *semiconductor detector 3*
7. **temperature compensated crystal oscillator** : → *oscillator 7*
8. **temperature compensated power bridge** : → *bridge 18*
9. **temperature compensated thermal time-delay switch** : → *switch 53*

compensating

1. **compensating element** (*Syn.* equalizer) : → *equalizer 1*
2. **compensating filter** : → *filter 9*
3. **compensating network** : → *network 15*
4. **compensating winding** : → *winding 12*

compensation

1. **automatic load compensation** : a method of varying the brake force produced at any given step of braking so that it is proportional to the mass of the vehicle, including any load which it may be carrying. ★ correction automatique de charge → *correction 5.* R автоматическое регулирование тормозной силы. D automatischer Lastwechsel. E corrección automática de carga. I carico variabile. N automatische belastingscorrectie. P korekcja automatyczna hamowania według masy. S automatisk lastutbromsning. (811)
2. **biphase compensation** : a method of matching a two-part antenna by feeding the two parts of the antenna with such phases that the reflected waves on the two feed lines substantially cancel each other at the junction with the antenna feed line or inside the power divider. ★ compensation diphasée → *compensation 8.* R бифазная компенсация. D Zweiphasenanpassung. E compensación bifásica. I compensazione bifase. N tweefasecompensatie. P kompensacja dwufazowa. S tvåfaskompensering. (712)
3. **compensation factor** : → *factor 22*
4. **compensation ratio** : → *ratio 16*
5. **drift compensation** (in common channel signalling) : the procedure for adjusting the differences in the time relationships between forward signal units and their backward acknowledgements when these differences have been caused by drift. ★ compensation de dérive → *compensation 4.* R компенсация дрейфа (в сигнализации по общему каналу). D Verschiebungsausgleich (in ZZG). E compensación de deriva (en señalización por canal común). I compensazione della deriva. N ..... P kompensacja dryftu. S driftkompensering. (714)
6. **impurity compensation** : addition of donor impurities to a P type semiconductor or of acceptor impurities to an N type semiconductor, leading to partial, balanced or over-compensation. ★ compensation au moyen d'impuretés → *compensation 3.* R примесная компенсация. D Störstellenkompensation. E compensación por impurezas. I compensazione a mezzo di impurità. N verontreinigingscompensatie. P kompensacja domieszkowa. S störämneskompensering. (521)
7. **luminance compensation** : in phototelegraphy, any changing of the received signals, according to the photometric characteristics of the recording medium used for reception, in order to reproduce correctly the luminances. ★ compensation des luminances → *compensation 7.* R компенсация (коррекция) яркости. D Helligkeitskompensation. E compensación de luminancias. I compensazione di luminanza. N luminantiecompensatie. P kompensacja luminancji. S luminanskompensering. (721)
8. **multiphase compensation** : a method of matching an n-part antenna by feeding the n parts of the antenna with such phases that the reflected waves on their feed lines, substantially cancel each other at the junction with the antenna feed line or inside the power divider. ★ compensation polyphasée → *compensation 11.* R многофазная компенсация. D Mehrphasenanpassung. E compensación polifásica. I compensazione multifase. N meerfasecompensatie. P kompensacja wielofazowa. S flerfaskompensering. (712)
9. **reactive power compensation** : an action to optimize the transmission of reactive power in the network as a whole. ★ compensation de l'énergie réactive → *compensation 5.* R компенсация реактивной мощности. D Blindleistungskompensation. E compensación de energía reactiva. I compensatore dell'energia reattiva. N compensatie van blindvermogen. P kompensacja mocy biernej. S reaktiv optimering. (603)
10. **series compensation** : the reduction of the series impedance of a line by the insertion of series capacitors. ★ compensation en série → *compensation 9.* R продольная компенсация. D Reihenkompensation. E compensación serie. I compensazione serie. N seriecompensatie. P kompensacja mocy biernej szeregowa. S seriekompensering. (603)
11. **shunt compensation** : the change of reactive power at a point of a network by means of reactors, capacitors or synchronous compensators, shunt connected to the network. ★ compensation shunt → *compensation 12.* R поперечная компенсация. D Parallelkompensation. E compensación paralelo. I compensazione derivata. N shuntcompensatie. P konpensacja mocy biernej równoległa. S shuntkompensering. (603)
12. **weight transfer compensation device** : → *device 60*

compensator

1. **compensator** : a device used to accommodate oil or compound expansion in the sealing ends. ★ compensateur → *compensateur 1.* R компенсатор. D Ausgleichsgefäß. E compensador. I compensatore. N compensator. P kompensator. S expander. (461)
2. **synchronous compensator** (*Syn.* synchronous condenser) : → *condenser 3*

compile

1. **to compile** : to translate a program expressed in a high level language into a program expressed in a computer language. ★ compiler → *compiler 1.* R компилировать. D kompilieren. E compilar. I compilare. N compileren. P kompilować. S kompilera. (714)

compiler

1. **compiler** (*Syn.* compiling program) : a computer program used to compile. ★ compilateur → *compilateur 1.* R компилятор; компилирующая программа. D Kompilierer. E compilador. I compilatore. N compileerprogramma. P program kompilowania; kompilator. S kompilator. (714)

compiling

1. **compiling program** (*Syn.* compiler) : → *compiler 1*

complementary

1. **complementary colour stimuli** : → *stimulus 6*
2. **complementary (method of) measurement** : → *measurement 3*
3. **complementary picture effect** : → *effect 8*
4. **complementary wavelength** : → *wavelength 2*

complete

1. **complete bridge connection** : → *connection 14*
2. **(complete) connection** : → *connection 15*

3. **complete failure** : → *failure 7*
4. **complete fault** : → *fault 4*
5. **complete picture** (*Syn.* frame) : → *frame 14*
6. **complete radiator** : → *radiator 1*
7. **complete telegraph channel** : → *channel 18*
8. **complete video signal** : → *signal 56*

completed

1. **completed call attempt** : → *attempt 4*

completely

1. **completely immersed bushing** : → *bushing 6*
2. **completely restricted extension** : → *extension 2*

completion

1. **completion ratio** : → *ratio 17*

complex

1. **(complex) admittance** : → *admittance 6*
2. **complex angular frequency** : → *frequency 22*
3. **(complex) impedance** : → *impedance 12*
4. **complex parameter** : → *parameter 1*
5. **complex permeability** : → *permeability 5*
6. **complex permittivity** : → *permittivity 3*
7. **complex power** : → *power 23*
8. **complex power** : → *power 24*
9. **complex Poynting vector** : → *vector 2*
10. **complex refractive index** : → *index 7*
11. **complex refractive index** : → *index 8*
12. **complex sound** : → *sound 3*
13. **complex sound spectrum** : → *spectrum 5*
14. **complex spectrum** (*Syn.* spectral representation) : → *representation 3*
15. **normalized complex wave amplitude** : → *amplitude 31*
16. **relative complex permeability** : → *permeability 21*
17. **relative complex permittivity** : → *permittivity 4*

complexor

1. **complexor** (*Syn.* phasor (USA)) : a complex quantity equal to the quotient of two phasors representing two sinusoidal quantities of the same frequency. ★ complexeur → *complexeur 1.* R комплексор. D Komplexor. E fasor. I ..... N complexor. P .....; S visaroperator. (101)

compliance

1. **acoustic compliance** : reciprocal of acoustic stiffness. ★ élasticité acoustique → *élasticité 2.* R акустическая податливость. D akustische Nachgiebigkeit. E elasticidad acústica. I cedevolezza acustica. N akoestische compliantie. P podatność akustyczna. S akustisk mjukhet. (801)
2. **compliance** : reciprocal of stiffness. ★ souplesse → *souplesse 1.* R податливость. D Nachgiebigkeit. E flexibilidad. I cedevolezza. N compliantie. P podatność. S mekanisk mjukhet. (801)
3. **compliance** : the ratio of the reproducing stylus tip displacement to the force applied to that same point which generated the displacement. It is expressed in millimetres per newton. *Note.* — Both vertical and horizontal compliance can be stated. ★ élasticité → *élasticité 1.* R гибкость звукоснимателя. D Nadelnachgiebigkeit (Compliance). E elasticidad. I cedevolezza. N slapheid; compliantie. P podatność (mechaniczna). S mjukhet. (806)
4. **compliance test** : → *test 16*

component

1. **admittance matrix of a polyphase element in coherent components** : → *matrix 1*
2. **alternating component** (of a pulsating voltage or current) : the quantity derived by removing the direct component from the pulsating quantity.

$$u\sim = u - U_0 \qquad i\sim = i - I_0$$

★ composante alternative → *composante 3.* R переменная составляющая (пульсирующего напряжения или тока). D Wechselanteil (einer Mischspannung oder eines Mischstromes). E componente alterna (de una tensión o corriente pulsatoria). I componente alternata. N wisselspanningscomponent; wisselstroomcomponent. P składowa przemienna. S växelkomponent. (131)
3. **alternating component** (*Syn.* ripple content) : → *content 9*
4. **aperiodic component of short-circuit current** : the component of current in the primary winding immediately after it has been suddenly short-circuited, all components of fundamental and higher frequencies being excluded. ★ composante apériodique d'un courant de court-circuit → *composante 5.* R апериодическая составляющая тока короткого замыкания. D Gleichstromanteil des Stoßkurzschlußstromes. E componente aperiódica de una corriente de cortocircuito. I componente aperiodica della corrente di corto circuito. N aperiodieke component van een kortsluitstroom. P składowa aperiodyczna prądu zwarciowego. S korslutningsströmmens aperiodiska komponent. (411)
5. **carrier (component)** : → *carrier 5*
6. **chrominance components** : the two components of the chrominance vector relative to a pair of axes in a plane of constant luminance having common origin on the luminance axis of a chromatic space system. ★ composantes de chrominance → *composante 36.* R компоненты цветностей. (723)
7. **circuit element in terms of components** : → *circuit element 3*
8. **coherent components** : the set of components where the transformation matrices $\boldsymbol{A}$ and $\boldsymbol{B}$ related to the voltages and currents respectively are not necessarily identical but they satisfy if $\boldsymbol{A}$ and $\boldsymbol{B}$ are real:

$$\boldsymbol{B}^{\mathrm{T}}\boldsymbol{A} = k\,\mathrm{1}$$

if $\underline{\boldsymbol{A}}$ and $\underline{\boldsymbol{B}}$ are complex:

$$\underline{\boldsymbol{B}}^{\mathrm{T}^*}\,\underline{\boldsymbol{A}} = k\,\mathrm{1}$$

1 being the identity matrix and k a real positive number. The instantaneous or complex powers are then proportionnal:

$$\boldsymbol{I}_{\mathrm{m}}^{\mathrm{T}}(t)\,\boldsymbol{U}_{\mathrm{m}}(t) = k\boldsymbol{I}_{\mathrm{c}}^{\mathrm{T}}(t)\,\boldsymbol{U}_{\mathrm{c}}(t)$$

or

$$\underline{\boldsymbol{I}}_{\mathrm{m}}^{\mathrm{T}^*}\,\underline{\boldsymbol{U}}_{\mathrm{m}} = k\underline{\boldsymbol{I}}_{\mathrm{c}}^{\mathrm{T}^*}\,\underline{\boldsymbol{U}}_{\mathrm{c}}$$

★ composantes cohérentes → *composante 35.* R сопряженные составляющие. D kohärente Komponenten. E componentes coherentes. I componenti coerenti. N coherente componenten. P składowe koherentne. S ..... (131)
9. **component** (of a vector quantity) : each of the n scalar quantities that characterize the vector quantity. ★ composante → *composante 2.* R составляющая векторной величины. D Koordinate einer vektoriellen Größe. E componente de una magnitud vectorial. I componente di una grandezza vettoriale. N component van een vector. P składowa wektora. S komponent av vektor. (101)
10. **component colour television system** : → *system 33*
11. **component hole** : → *hole 4*
12. **component (in a colour television system)** : one of the three signals derived from the primary colour signals ; the components are usually the luminance signal and two narrow-band chrominance signals. ★ composante (d'un signal de télévision en couleur) → *composante 12.* R компонента (в цветном телевидении). (723)
13. **DC component** (of a video signal) : a steady component of the picture signal which depends upon the average luminance and in some cases the average values of the chrominance components of the picture, and which may vary from one picture to another. ★ composante continue (utile) → *composante 8.* R постоянная составляющая. (723)
14. **dependent circulating circuit component** : → *circulating circuit 1*
15. **(digital) component coding** : → *coding 4*
16. **direct component** (of a pulsating voltage or current) : the mean value, taken over one period, of the pulsating quantity.

$$U_0 = \bar{u} = \frac{1}{T}\int_0^T u\,\mathrm{d}t$$

$$I_0 = \bar{i} = \frac{1}{T}\int_0^T i\,\mathrm{d}t$$

★ composante continue → *composante 6.* **R** постоянная составляющая (пульсирующего напряжения или тока). **D** Gleichwert (einer Mmischspannung oder eines Mischstromes); Gleichanteil. **E** componente continua (de una tensión o corriente pulsatoria). **I** componente continua. **N** gelijkspanningscomponent; gelijkstroomcomponent. **P** składowa stała. **S** likkomponent. (131)

17. **direct-axis component of current** : that component of a current which produces the direct-axis component of the magnetomotive force of the armature reaction. ★ composante longitudinale du courant d'induit → *composante 21.* **R** составляющая тока по продольной оси. **D** Längsstrom. **E** componente longitudinal de la corriente de inducido. **I** componente diretta della corrente di indotto. **N** langscomponent van de (anker)stroom. **P** składowa podłużna prądu twornika. **S** längskomponent av ström. (411)

18. **direct-axis component of magnetomotive force** : that component of a magnetomotive force which is directed along the axis of the poles. ★ composante longitudinale de la force magnétomotrice → *composante 19.* **R** составляющая магнитодвижущей силы по продольной оси. **D** Längsdurchflutung. **E** componente longitudinal de la fuerza magnetomotriz. **I** componente longitudinale della f.m.m. **N** langscomponent van de magnetomotorische kracht. **P** składowa podłużna przepływu. **S** längskomponent av mmk. (411)

19. **direct-axis component of synchronous generated voltage** : that component of the synchronous generated voltage induced by the flux due to the quadrature-axis component of the magnetomotive force of the synchronous machine. ★ composante longitudinale de la force électromotrice (synchrone) → *composante 18.* **R** составляющая синхронной э.д.с. по продольной оси. **D** Längsanteil der Polradspannung. **E** componente longitudinal de la fuerza electromotriz (síncrona). **I** componente longitudinale della tensione indotta. **N** langscomponent van de geïnduceerde spanning. **P** składowa podłużna napięcia indukowanego wewnętrznego. **S** längskomponent av emk. (411)

20. **direct-axis component of voltage** : the potential difference resulting from the vectorial addition of the direct-axis component of the synchronous generated voltage and the voltage drop in the direct axis. ★ composante longitudinale de la tension → *composante 20.* **R** составляющая напряжения по продольной оси. **D** Längsspannung. **E** componente longitudinal de la tensión. **I** componente diretta della tensione. **N** langscomponent van de spanning. **P** składowa podłużna napięcia. **S** längskomponent av spänning. (411)

21. **explosion-containing component** : a component which is capable of containing an internal explosion without causing an explosion in a surrounding specified explosive environment. ★ composant antidéflagrant → *composant 2.* **R** компонент взрывостойкий. **D** druckfest gekapseltes Bauelement. **E** componente antideflagrante. **I** componente antideflagrante. **N** explosiebestendig onderdeel. **P** element ognioszczelny. **S** explosionsskyddande komponent. (581)

22. **explosion-proof component** : a component which is capable of normal operation within a specified explosive environment and will not cause an explosion when it is operated, mated or unmated while under load. ★ composant résistant à l'explosion → *composant 3.* **R** компонент взрывобезопасный. **D** explosionsgeschütztes Bauelement. **E** componente resistente a la explosión. **I** componente resistente all'esplosione. **N** explosievast onderdeel. **P** element przeciwwybuchowy. **S** explosionssäker komponent. (581)

23. **externally reflected component of daylight factor** (D_e) : ratio of that part of the illuminance at a point on a given plane in an interior which is received directly from external reflecting surfaces illuminated directly or indirectly by a sky of assumed or known luminance distribution, to the illuminance on a horizontal plane due to an unobstructed hemisphere of this sky. The contribution of direct sunlight to both illuminances is excluded. ★ composante réfléchie externe du facteur de lumière du jour → *composante 25.* **R** доля коэффициента естественной освещенности, обусловленная внешним отражением. **D** Außenreflexionsanteil des Tageslichtquotienten. **E** componente reflejada externa del factor de luz de día. **I** componente riflessa esterna del fattore di luce diurna. **N** buitenreflectiecomponent van de daglichtfactor. **P** składowa odbić zewnętrznych współczynnika oświetlenia dziennego. **S** dagsljusfaktorns utereflekterade komponent. (845)

24. **Fortescue components** (*Syn.* symmetrical components) : → *component 57*

25. **fundamental (component)** : → *fundamental 2*

26. **harmonic (component)** : → *harmonic 3*

27. **homopolar component** (*Syn.* zero component) : the component identical in each term of $\underline{X}_m$ or of $\underline{X}_m$; in particular the homopolar component of $\underline{X}_F$ is

$$\underline{X}_{1.0} = \underline{X}_{2.0} = \ldots = \underline{X}_{m.0} = \underline{X}_0$$

or in normalized components

$$\underline{X}_{1.0} = \underline{X}_{2.0} = \ldots = \underline{X}_{m.0} = \frac{1}{\sqrt{m}}\underline{X}_0$$

★ composante homopolaire → *composante 15.* **R** составляющие нулевой последовательности. **D** Homopolarkomponente; Nullkomponente. **E** componente homopolar. **I** componente omopolare. **N** homopolaire component; nulcomponent. **P** składowa zerowa. **S** nollföljdskomponent. (131)

28. **immittance matrix of a polyphase element in normalized components** : → *matrix 5*

29. **immittance relative to a component** x : → *immittance 4*

30. **impedance matrix of a polyphase element in coherent components** : → *matrix 6*

31. **independent circulating circuit component** : → *circulating circuit 2*

32. **integral circulating circuit component** : → *circulating circuit 3*

33. **intermodulation component** (*Syn.* intermodulation product) : → *product 5*

34. **internally reflected component of daylight factor** (D_i) : ratio of that part of the illuminance at a point on a given plane in an interior which is received directly from internal reflecting surfaces illuminated directly or indirectly by a sky of assumed or known luminance distribution, to the illuminance on a horizontal plane due to an unobstructed hemisphere of this sky. The contribution of direct sunlight to both illuminances is excluded. ★ composante réfléchie interne du facteur de lumière du jour → *composante 26.* **R** доля коэффициента естественной освещенности, обусловленная внутренним отражением. **D** Innenreflexionsanteil des Tageslichtquotienten. **E** componente reflejada interna del factor de luz de día. **I** componente riflessa interna del fattore di luce diurna. **N** binnenreflectiecomponent van de daglichtfactor. **P** składowa odbić wewnętrzych współczynnika oświetlenia dziennego. **S** dagsljusfaktorns innereflekterade komponent. (845)

35. **ionization gradient component** : the partial derivative of the electron density with respect to the distance in a specified direction. ★ gradient d'ionisation → *gradient 3.* **D** Ionisationsgradient (in einer Richtung). **P** składowa gradientu jonizacji. (705)

36. **longitudinal component** : the projection of one of the vectors of an electromagnetic field onto the direction of propagation. ★ composante longitudinale → *composante 17.* **D** longitudinale Komponente; Längskomponente. **P** składowa wzdłużna. (705)

37. **machine mounted circulating circuit component** : → *circulating circuit 4*

38. **magneto-ionic component** : one of the separate radio waves into which a radio wave propagating within the ionosphere is divided as a result of the action of the Earth's magnetic field. ★ composante magnéto-ionique → *composante 22.* **D** magneto-ionische Komponente. **P** składowa magnetojonowa. (705)

39. **negative component** : the $\underline{X}_{m-1}$ component of $\underline{X}_F$ which brings in the different terms of $\underline{X}_m$ a balanced polyphase contribution which forms a symmetrical series whose sequence is opposite to that of the positive component (counter-clock wise)

$$\underline{X}_{1,m-1} = \underline{X}_{m-1}$$
$$\underline{X}_{2,m-1} = b^{m-1}\underline{X}_{m-1} \ldots$$
$$\underline{X}_{m,m-1} = b\underline{X}_{m-1}$$

or in normalized components:

$$\underline{X}_{1,m-1} = \frac{1}{\sqrt{m}} \underline{X}_{m-1}$$

$$\underline{X}_{2,m-1} = \frac{1}{\sqrt{m}} b^{m-1} \underline{X}_{m-1} \cdots$$

$$\underline{X}_{m,m-1} = \frac{1}{\sqrt{m}} b \underline{X}_{m-1}$$

★ composante inverse → *composante 16.* R составляющие обратной последовательности. D Gegenkomponente. E componente inversa. I componente inverso. N negatieve componenl. P składowa przeciwna. S minusföljdskomponent. (131)

40. **network in terms of components** : → *network 50*

41. **normalized components** : the sets of coherent components where the transformation matrix A is the same for the currents and the voltages and which preserves: -the instantaneous powers if A a real matrix

$$I_m^T(t)\, U_m(t) = I_c^T(t)\, U_c(t)$$

-the complex powers if $\underline{A}$ is a complex matrix

$$\underline{I}_m^{T*}\, \underline{U}_m = \underline{I}_c^{T*}\, \underline{U}_c$$

Note. — The modulus of the determinant of matrix $\underline{A}$ is then equal to unity. ★ composantes normées → *composante 38.* R нормированные составляющие. D normierte Komponenten. E componentes normalizadas. I componenti normalizzati. N genormeerde componenten. P składowe znormalizowane. S ..... (131)

42. **positive component** : the $\underline{X}_1$ component of $\underline{X}_F$ which brings in the different terms of $\underline{X}_m$ a balanced polyphase contribution which forms a symmetrical clock-wise sequence series:

$$\underline{X}_{1,1} = \underline{X}_1, \quad \underline{X}_{2,1} = b\underline{X}_1 \cdots$$
$$\underline{X}_{m,1} = b^{m-1}\, \underline{X}_1$$

or in normalized components

$$\underline{X}_{1,1} = \frac{1}{\sqrt{m}} \underline{X}_1, \quad \underline{X}_{2,1} = \frac{1}{\sqrt{m}} b\underline{X}_1 \cdots$$

$$\underline{X}_{m,1} = \frac{1}{\sqrt{m}} b^{m-1}\, \underline{X}_1$$

★ composante directe → *composante 11.* R составляющая прямой последовательности. D Mitkomponente. E componente directa. I componente diretto. N positieve component. P składowa zgodna. S plusföljdskomponent. (131)

43. **protection (of a power system component)** : → *protection 38*

44. **quadrature-axis component of current** : that component of a current which produces the quadrature-axis component of the magnetomotive force of the armature reaction. ★ composante transversale du courant d'induit → *composante 33.* R составляющая тока по поперечной оси. D Querstrom. E componente transversal de la corriente de inducido. I componente in quadratura della corrente di indotto. N dwarscomponent van de (anker)stroom. P składowa poprzeczna prądu twornika. S tvärkomponent av ström. (411)

45. **quadrature-axis component of magnetomotive force** : that component of a magnetomotive force, which is directed along an axis in quadrature with the axis of the poles. ★ composante transversale de la force magnétomotrice → *composante 31.* R составляющая магнитодвижущей силы по поперечной оси. D Querdurchflutung. E componente transversal de la fuerza magnetomotriz. I componente trasversale della f.m.m. N dwarscomponent van de magnetomotorische kracht. P składowa poprzeczna przepływu. S tvärkomponent av mmk. (411)

46. **quadrature-axis component of synchronous generated voltage** : that component of the synchronous generated voltage induced by the flux due to the direct-axis component of the magnetomotive force of the synchronous machine. ★ composante transversale de la force électromotrice (synchrone) → *composante 30.* R составляющая синхронной э.д.с. по поперечной оси. D Queranteil der Polradspannung. E componente transversal de la fuerza electromotriz (síncrona). I componente trasversale della tensione indotta. N dwarscomponent van de geïnduceerde spanning. P składowa poprzeczna napięcia indukowanego wewnętrznego. S tvärkomponent av emk. (411)

47. **quadrature-axis component of voltage** : the potential difference resulting from the vectorial addition of the quadrature-axis component of the synchronous generated voltage and the voltage drop in the quadrature axis. ★ composante transversale de la tension → *composante 32.* R составляющая напряжения по поперечной оси. D Querspannung. E componente transversal de la tensión. I componente in quadratura della tensione. N dwarscomponent van de spanning. P składowa poprzeczna napięcia. S tvärkomponent av spänning. (411)

48. **radial component** : 1) The projection of one of the vectors of an electromagnetic field onto the radius vector from the source of the field considered as a point source. 2) The projection of one of the vectors of an electromagnetic field at a point of the transverse cross-section of a circular cylindrical structure, such as a wire or a waveguide, onto the radius of the cross-section at this point. ★ composante radiale → *composante 24.* D radiale Komponente. P składowa radialna. (705)

49. **separately mounted circulating circuit component** : → *circulating circuit 5*

50. **(set of) components of a polyphase (or *m*-phase) linear quantity** : the base set of m quantities of the same kind, appearing as the components of the vector.

$$\mathrm{X_c} = \begin{bmatrix} X_A \\ X_B \\ \vdots \\ X_M \end{bmatrix} = (X_A\ X_B \ldots X_M)^T$$

in terms of which any linear polyphase quantity of the same kind is expressed by a linear transformation defined by a non singular matrix A such that $X_m = A\, X_c$. ★ (système de) composantes d'une grandeur linéaire polyphasée (ou *m*-phasée) → *composante 48.* R (система) составляющих многофазной (-фазной) линейной величины. D Satz von Komponenten einer linearen Mehrphasengröße oder m-Phasengröße. E (sistema de) componentes de una magnitud lineal polifásica. I (sistema di) componenti di una grandezza lineare polifase (di ordine m). N (de) componenten van een lineaire meerfasengrootheid (of *m*-fasengrootheid). P wektor wielkości linearnych układu. S ..... (131)

51. **signal component** : in alternating current signalling, that part of a signal which keeps a uniform character throughout its duration. ★ élément de signal → *élément 47.* R составляющая сигнала. D Bestandteile der Zeichen. E elemento de señal (de señalización). I elemento di segnale. N signaalcomponent. P element sygnału. S signalkomponent. (714)

52. **sky component of daylight factor** (D_s) : ratio of that part of the illuminance at a point on a given plane which is received directly (or through clear glass) from a sky of assumed or known luminance distribution, to the illuminance on a horizontal plane due to an unobstructed hemisphere of this sky. The contribution of direct sunlight to both illuminances is excluded. ★ composante de ciel du facteur de lumière du jour → *composante 9.* R доля коэффициента естественной освещенности, обусловленная светом неба. D Himmelslichtanteil des Tageslichtquotienten. E componente celeste del factor de luz de día. I componente cielo del fattore di luce diurna. N hemelcomponent van de daglichtfactor. P składowa nieboskłonu współczynnika oświetlenia dziennego. S dagsljusfaktorns himmelskomponent. (845)

53. **spectral component** : each sinusoidal oscillation contributing to a signal or noise spectrum. ★ composante spectrale → *composante 27.* R спектральная составляющая. D Spektralkomponente. E componente espectral. I componente spettrale. N spectrale component. P składowa widma. S växelkomponent. (702)

54. **standing DC component** : a steady or slowly varying component of a video signal that is unrelated to the average luminance of the picture. *Example :* The DC component which is superimposed on the video signal at the output of a video amplifier. ★ composante continue inutile → *composante 7.* R установленная постоянная составляющая. (723)

55. **suppression component** (*Syn.* suppressor) : → *suppressor 7*

56. **symmetrical component of order *k*** : the component $\underline{X}_k$ of $\underline{X}_F$ such that $k \in [2, m-2]$ *Note.* — The three phase variables have only one positive, one negative and one homopolar component. ★ composante symétrique d'ordre *k* → *composante 28.* R симметричная составляющая порядка *k*. D symmetrische Komponente *k*-ter Ordnung. E componente simétrica de orden *k*. I componente simmetrico di ordine *k*. N symmetrische component van de orde *k*. P składowa symetryczna rzędu *k*. S ..... (131)

57. **symmetrical components** (*Syn.* Fortescue components) : the base set of phasors appearing as the components of the vector

$$\underline{X}_F = (\underline{X}_0\ \underline{X}_1 \ldots \underline{X}_{m-1})^T$$

used in sinusoidal or isomorphic state such that the matrix $\underline{A}$ is:

$$\underline{A} = \underline{F} = \begin{array}{c} \text{Phases} \\ \downarrow \end{array} \begin{array}{c} \text{Components} \rightarrow \\ 0 \end{array} \begin{array}{c} \\ 1 \end{array} \begin{array}{c} \\ 2 \end{array} \begin{array}{c} \\ 3 \end{array} \begin{array}{c} \\ \ldots \end{array} \begin{array}{c} \\ m-1 \end{array}$$

$$\begin{array}{c} 1 \\ 2 \\ 3 \\ \vdots \\ m \end{array} \begin{bmatrix} 1 & 1 & 1 & 1 & \ldots & 1 \\ 1 & b & b^2 & b^3 & \ldots & b^{m-1} \\ 1 & b^2 & b^4 & b^6 & \ldots & b^{2(m-1)} \\ & & & & & \\ 1 & b^{m-1} & b^{2(m-1)} & b^{3(m-1)} & \ldots & b^{(m-1)(m-1)} \end{bmatrix}$$

where

$$b = \exp\left(-j\frac{2\pi}{m}\right)$$

Note. — The elements of this matrix are often written in terms of

$$a = b^* = \exp\left(j\frac{2\pi}{m}\right)$$

★ composantes symétriques → *composante 39.* R симметричные составляющие. D symmetrische Komponenten. E componentes simétricas componentes Fortescue. I componenti simmetrici (di Fortescue). N symmetrische componenten; Fortescue-componenten. P składowe symetryczne. S ..... (131)

58. **symmetrical normalized components** : the base set of phasors $\underline{X}_{Fn}$ such that the matrix $\underline{A}$ is

$$\underline{A} = \underline{F}_n = \frac{1}{\sqrt{m}}\underline{F}$$

★ composantes symétriques normées → *composante 40.* R нормированные симметричные составляющие. D normierte symmetrische Komponenten. E componentes simétricas normalizadas. I componenti simmetrici normalizzati. N symmetrische genormeerde componenten. P składowe symetryczne znormalizowane. S ..... (131)

59. **taped components** : components attached to continuous tapes. ★ composants sur bande → *composant 4.* R элементы на ленте. D gegurtete Bauteile. E componentes embandados. I componenti su nastro. N componenten op rol. P podzespoły (elementy) taśmowane. S bandade komponenter. (541)

60. **transverse component** : the projection of one of the vectors of an electromagnetic field onto a plane perpendicular to the direction of propagation. ★ composante transversale → *composante 29.* D transversale Komponente; Querkomponente. P składowa poprzeczna. (705)

61. **Z component** : the magneto-ionic component which, at vertical incidence, is reflected at the height at which the electron density and the Earth's magnetic field are such that :

$$f_p^2 = f^2 + f f_B$$

where f_p is the plasma frequency, f is the wave frequency, and f_B is the electron gyro-frequency. *Notes. 1* — This component may appear when the direction of propagation of the wave is close to the direction of the Earth's magnetic field, or when the wave frequency is less than the electron gyro-frequency, and also in top-side ionospheric sounding. *2* — The polarization of this component is either that of the ordinary wave, or that of the extraordinary wave, depending on the value of its frequency relative to the values of the plasma frequency and electron gyro-frequency on the wave path before reflection. ★ composante Z → *composante 34.* D Z-Komponente. P składowa Z. (705)

62. **zero component** (*Syn.* homopolar component) : → *component 27*

63. **zero insertion force component** : a component designed to eliminate the insertion and withdrawal forces during mating and unmating. ★ composant à force d'insertion nulle → *composant 1.* R компонент с нулевым усилием вставления. D steckkraftloses Bauelement. E componente de fuerza de introducción nula. I componente a forza d'inserzione nulla. N connector zonder insteekkracht. P mechanizm łączenia bezsiłowego. S nollkraftsdon. (581)

composite

1. **composite action** : → *action 2*
2. **composite braking system** : → *system 35*
3. **composite characteristic** : → *characteristic 23*
4. **composite colour signal** : → *signal 57*
5. **composite configuration** (*Syn.* hybrid configuration) : → *configuration 9*
6. **composite (digital) coding** : → *coding 3*
7. **composite error** : → *error 15*
8. **composite gain** : → *gain 6*
9. **composite insulator** : → *insulator 4*
10. **composite loss** : → *loss 12*
11. **composite loudspeaker** (*Syn.* multichannel loudspeaker) : → *loudspeaker 16*

compositely

1. **compositely excited** : → *excited 1*

composition

1. **stochiometric composition** : the chemical composition of a compound in which the elements exist in the precise proportions represented by its chemical formula. ★ composition stœchiométrique → *composition 1.* R стехиометрический состав. D stöchiometrische Zusammensetzung. E composición estequiométrica. I composizione stechiometrica. N stoichiometrische samenstelling. P skład stochiometryczny. S stökiometrisk sammansättning. (521)

compound

1. **compound** : applied to a machine to denote that it is excited by at least two windings, one of which is a series winding. ★ machine à excitation composée → *machine 9.* R машина смешанного возбуждения. D Maschine mit Verbunderregung. E máquina con excitación mixta; máquina con excitación «compound». I macchina ad eccitazione composta. N compoundmachine. P maszyna z dowzbudzeniem szeregowym. S kompound. (411)
2. **compound catenary equipment** : → *equipment 13*
3. **compound circular horn** : → *horn 3*
4. **compound filter** : → *filter 10*
5. **compound motor (cumulative or differential)** : → *motor 17*
6. **compound nucleus** : → *nucleus 1*
7. **compound rectangular horn** : → *horn 4*
8. **compound semiconductor** : → *semiconductor 2*
9. **compound signal** : → *signal 58*
10. **compound switching** : → *switching 14*
11. **lid sealing compound** : material used to seal the lid to the container or to the terminals. ★ matériau de scellement → *matériau 11.* R герметизирующий компаунд крышки. D Dichtungsmasse. E compuesto de sellado. I mastice. N gietmassa. P masa zalewowa. S lim. (486)
12. **potting compound** : a liquid compound which is applied by casting. See also *casting*, and *potting.* ★ composé d'empotage → *composé 3.* R заливочный компаунд. D Vergußmasse. E compuesto de revestimiento. I mescola da inscatolamento. N ingietmassa. P masa zalewowa; zalewa. S ingjutningsmassa. (212)

compounded

1. **cumulative compounded** : applied to a compound machine to denote that the magnetomotive forces of the series and shunt windings are in the same direction. ★ machine à excitation série additive → *machine 16.* R машина смешанного

возбуждения с согласным включением обмоток. D Maschine mit feldverstärkender Verbunderregung. E máquina con excitación mixta aditiva; máquina con excitación «compound» aditiva. I macchina ad eccitazione composta con serie addizionale. N meegecompoundeerde machine. P maszyna z dowzbudzeniem szeregowym zgodnym. S medkompounderad. (411)

2. **differential compounded** : applied to a compound machine to denote that the magnetomotive forces of the series winding is opposed to that of the shunt winding. ★ machine à excitation différentielle → *machine 12.* R машина смешанного возбуждения со встречным включением обмоток. D Maschine mit feldschwächender Verbunderregung. E máquina con excitación mixta sustractiva; máquina con excitación «compound» sustractiva. I macchina ad eccitazione composta con serie differenziale. N tegengecompoundeerde machine. P maszyna z dowzbudzeniem szeregowym przeciwnym. S motkompounderad. (411)
3. **flat compounded** (*Syn.* level compounded) : → *compounded 4*
4. **level compounded** (UK and USA) (*Syn.* flat compounded (USA)) : applied to a compound generator to denote that the series winding is so proportioned that the terminal voltage at rated load is the same as at no load. ★ génératrice à excitation compound ajustée → *générateur 31.* R генератор с постоянным напряжением на выводах. D Generator mit ausgeglichener Verbunderregung. E generador con excitación «compound» ajustada. I generatore ad eccitazione compensata. N vlakgecompoundeerde machine. P prądnica z dowzbudzeniem szeregowym wyrównującym. S ..... (411)

compounding

1. **compounding characteristics** : the relationship between the voltage or speed or power-factor, and the load current of a machine with compound excitation. ★ caractéristique de compoundage → *caractéristique 19.* R характеристики машин со смешанным возбуждением. D Kompoundierungskennlinien. E característica de «compound». I caratteristica di compoundaggio. N compounderingskarakteristiek. P charakterystyki maszyny z dowzbudzeniem szeregowym. S kompoundkaraktär. (411)

compound-wound

1. **compound-wound current transformer** : → *transformer 20*

compress

1. **to compress** : to subject a signal to compression. ★ comprimer → *comprimer 4.* R компрессировать. D komprimieren. E comprimir. I comprimere. N samendrukken. P sprężać. S komprimera. (702)

compressed

1. **(compressed) air brake** : → *brake 9*
2. **compressed air luminaire** (*Syn.* air-turbo lamp) : → *lamp 1*
3. **compressed air power station** : → *power station 3*
4. **compressed air storage** : → *storage 4*

compression

1. **(analogue) temporal compression** (of a video signal) (*Syn.* (analogue) time compression (of a video signal)) : time compression of an analogue luminance, chrominance or composite colour signal providing a reduction in the duration of the signal without modification of the line period. *Notes. 1* — The compressed signals may be located in any part of the line, and the space made available during this period may be utilised for other signals. *2* — Temporal compression increases the bandwidth necessary for transmission of the analogue signal. ★ compression temporelle (analogique) → *compression 6.* R сжатие во времени (аналогового видеосигнала). (723)
2. **(analogue) time compression** (*Syn.* (analogue) temporal compression) : → *compression 1*
3. **compression** : the automatic reduction, according to a specified law, of the variation of the average level of a signal, the average being taken over a period of time specified in each case. ★ compression → *compression 1.* R компрессия. D Kompression. E compresión. I compressione. N compressie; samendrukking. P kompresja. S kompression. (702)
4. **compression** (of a sound signal) : the reduction of the dynamic range of a sound signal either automatically in accordance with a specific law, or controlled by an operator. *Note.* — Associated terms : to compress, compressor. ★ compression → *compression 2.* R компрессирование (звукового сигнала). (723)
5. **compression** (of a picture) (*Syn.* expansion (of a picture)) : intentional distortion of a picture by stretching or compressing the picture horizontally or vertically. ★ anamorphose → *anamorphose 1.* R сжатие (изображения); расширение (изображения). (723)
6. **compression cone** : → *cone 1*
7. **compression factor** : → *factor 24*
8. **compression moulding** : → *moulding 1*
9. **compression of the luminance range** : deliberate or accidental change in the facsimile signals which causes the luminance range of the received picture to be less than that of the original. ★ compression des luminances → *compression 4.* R сжатие диапазона яркости. D Einengung des Helligkeitsbereichs. E compresión de luminancias. I compressione di luminanza. N compressie van het luminantiegebied. P zmniejszenie luminancji. S luminanskompression. (721)
10. digital compression (of a video signal) (deprecated) : process for the non-uniform quantisation of a video signal, with the object of reducing the number of bits per sample needed to ensure a given level of picture quality. ★ compression numérique → *compression 5.* R цифровое сжатие (видеосигнала). (723)

compressional

1. **compressional wave** : → *wave 4*

compressor

1. **auxiliary compressor** : a compressor intended to produce a supply of compressed air before the main compressor is available. ★ compresseur auxiliaire → *compresseur 4.* R вспомогательный компрессор. D Hilfskompressor. E compresor auxiliar. I compressore ausiliario. N hulpcompressor. P sprężarka pomocnicza. S hjälpkompressor. (811)
2. **compressor** : a non-linear device used for signal compression. ★ compresseur → *compresseur 1.* R компрессор. D Kompressor (in der Telekommunikation). E compresor. I compressore. N compressor. P kompresor. S kompressor. (702)
3. **compressor** : a machine supplying compressed air to operate brakes, pneumatic control gear, etc. ★ compresseur → *compresseur 2.* R компрессор. D Kompressor; Hauptluftpresser. E compresor. I compressore. N compressor. P sprężarka. S kompressor. (811)
4. **compressor unit** : → *unit 16*
5. **reciprocating compressor** : a compressor comprising one or more cylinders in which air is compressed by a piston or pistons. ★ compresseur à pistons → *compresseur 3.* R поршевый компрессор. D Kolbenkompressor. E compresor de pistón. I compressore alternativo. N zuigercompressor. P sprężarka tłokowa. S kolvkompressor. (811)
6. **rotary compressor** : a compressor in which air is compressed between one or more specially shaped rotating elements and the casing within which they move. ★ compresseur rotatif → *compresseur 5.* R ротационный компрессор. D Rotationskompressor. E compresor rotativo. I compressore rotativo. N roterende compressor. P sprężarka wirnikowa. S rotationskompressor. (811)

Compton

1. **Compton effect** : → *effect 9*
2. **Compton electron** : → *electron 3*
3. **Compton scattering** : → *scattering 6*
4. **Compton shift** : → *shift 9*

computed

1. **computed tomography** : → *tomography 1*

computer

1. **clad temperature computer** (for a nuclear reactor) : a computer that calculates the temperature reached by the hottest cladding inside a nuclear reactor. The calculation is based on the reactor power and temperatures measured at certain points. ★ calculateur de température de gaine → *calculateur 2.*

R вычислительная машина для расчета температуры оболочек тепловыделяющих элементов (ядерного реактора). D Brennelementhüllentemperatur-Rechner. E calculador de temperatura de vaina (para un reactor nuclear). I calcolatore della temperatura di guaina. N rekenautomaat voor bekledingstemperatuur (voor een kernreactor). P komputer temperatury koszulek elementów paliwowych. S ..... (392)

2. **computer graphics** : → *graphics 1*
3. **computer graphics equipment** : → *equipment 14*
4. **computer language** : → *language 3*
5. **process computer** : digital, analogue or hybrid computer which is part of the process control system. *Notes. 1* — Such a computer can carry out one or more of the following functions: acquisition (logging) and reduction of data monitoring and taking logical decisions specifying set-points working as a substitute for one or more controllers (that type of operation is called direct digital control when the computer is digital). *2* — The human operator communicates with the computer through a console, an input keyboard, display units, a printing unit, card and tape readers, etc. *3* — The exchange of information between the other parts of the system and the computer is achieved by input and output units which may include a multiplexer, an analogue-to digital converter, a digital-to-analogue converter, etc.(The detailed computer terminology is determined by ISO/TC 97.). ★ calculateur de processus → *calculateur 1.* R управляющая вычислительная машина (УВМ). D Prozeßrechner. E calculadora de procesos. I calcolatore di processo. N procescomputer. P komputer do sterowania. S processdator. (351)
6. **service computer** : → *service 24*
7. **three-dimensional computer generated image** : → *image 22*
8. **two-dimensional computer generated image** : → *image 23*
9. **2-D computer generated image** (*Syn.* two-dimensional computer generated image) : → *image 23*
10. **2 1/2 — D computer generated image** : → *image 26*
11. **3-D computer generated image** (*Syn.* three-dimensional computer generated image) : → *image 22*

computer-generated

1. **computer-generated image** : → *image 2*

concentrated

1. **concentrated winding** : → *winding 13*
2. **maximum concentrated weight per metre** : → *weight 3*

concentration

1. **activity concentration** (*Syn.* volume activity) : → *activity 19*
2. **activity concentration** (*Syn.* radioactive concentration) : → *concentration 8*
3. **concentration** (in switching) : a process performed by a switching stage, or stages, in which the number of inlets exceeds the number of outlets. ★ concentration → *concentration 4.* R концентрация (в коммутации). D Konzentration. E concentración (en conmutación). I concentrazione. N concentratie. P koncentracja (w komutacji). S koncentrering. (714)
4. **derived air concentration** (*Syn.* DAC (abbreviation)) : the annual limit on intake of a radionuclide divided by the volume of air inhaled by a standard man in a working year. ★ concentration dérivée de l'air → *concentration 6.* R производная концентрация в воздухе. D abgeleiteter Grenzwert der Luftkonzentration. E concentración derivada del aire. I concentrazione derivata in aria; DAC (abbreviazione). N afgeleide luchtconcentratie. P pochodne stężenie powietrza; DAC. S härledd luftkoncentration; DAC. (881)
5. **electron concentration** (*Syn.* electron density) : → *density 7*
6. **impurity concentration transition zone** : → *zone 7*
7. **ion concentration** : the amount of ionic substance of a specific type per unit volume of a solution. ★ concentration ionique → *concentration 9.* R ионная концентрация. D Ionenkonzentration. E concentración iónica. I concentrazione ionica. N ionenconcentratie. P stężenie jonowe. S jonkoncentration. (111)
8. **radioactive concentration** (*Syn.* activity concentration) : activity of a radionuclide per unit volume of the radioactive material in which it is contained. ★ concentration radioactive → *concentration 11.* R концентрация активности. D Aktivitätskonzentration. E concentración radiactiva. I concentrazione radioattiva; concentrazione di attività. N radioactieve concentratie. P aktywność właściwa objętościowa. S radioaktiv koncentration. (881)
9. **spectral concentration** (of a radiant, luminous or photon quantity $X(\lambda)$) (*Syn.* spectral distribution) (X_λ) : quotient of the radiant or luminous or photon quantity $dX(\lambda)$ contained in an elementary range $d\lambda$ of wavelength at the wavelength λ, by that range.

$$X_\lambda = \frac{dX(\lambda)}{d\lambda}$$

Unit : $[X]\cdot m^{-1}$, e.g. $W\cdot m^{-1}$, $lm\cdot m^{-1}$, etc . *Note.* — The term *spectral distribution* is to be preferred when dealing with the function $X_\lambda(\lambda)$ over a wide range of wavelengths, not at a particular wavelength. ★ densité spectrale → *densité 23.* R спектральная плотность (энергетической, световой или фотонной величины $X(\lambda)$); спектральное распределение. D spektrale Dichte (einer Strahlungs-, Licht- oder Photonen-größe $X(\lambda)$); spektrale Verteilung. E concentración espectral. I distribuzione spettrale. N spectrale dichtheid; spectrale dichtheidsverdeling. P rozkład widmowy. S spektral täthet; spektralfördelning. (845)

concentrator

1. **concentrator** : a switching device allowing simultaneous different connections between a plurality of inlets on one side and a small number of traffic circuits on the other. *Note.* — The concentrator performs a traffic concentration in one direction and a traffic expansion in the other direction. ★ concentrateur → *concentrateur 1.* R концентратор. D Konzentrator. E concentrador. I concentratore. N concentrator. P koncentrator. S koncentrator. (714)
2. **concentrator** : a transformer of which the secondary is a heating inductor designed to concentrate the heating effect within a specific zone of the workpiece. ★ concentrateur → *concentrateur 2.* R концентратор. D Konzentrator. E concentrador. I concentratore. N concentrator/transformator. P koncentrator. S ..... (841)
3. **concentrator station** (*Syn.* submaster station) : → *station 35*
4. **data concentrator** : equipment located at each end of a path which enables this path to serve more terminals than there are transmission channels in the common path. ★ concentrateur (de données) → *concentrateur 4.* R концентратор (данных). D Datenkonzentrator. E concentrador de datos. I concentratore per dati. N dataconcentrator. P koncentrator teledacyjny. S datakoncentrator. (721)
5. **line concentrator** : a concentrator to which subscribers lines are connected. ★ concentrateur de lignes → *concentrateur 5.* R линейный концентратор. D Anschlussleitungs-Konzentrator. E concentrador de líneas. I concentratore di linee. N abonneelijnconcentrator. P koncentrator liniowy. S linjekoncentrator. (714)
6. **line concentrator** (in a local line network) : a switching equipment remotely located in a local line network and enabling the traffic between the local switching entity and a number of subscribers to be carried by a smaller number of lines. *Note.* — A compatible equipment must normally be provided at the switching entity. ★ concentrateur de lignes → *concentrateur 6.* R линейный концентратор (в местной телефонной сети). D Konzentrator. E concentrador de líneas. I concentratori di linee. N (lijn)concentrator. P koncentrator łączy. S linjekoncentrator. (721,722)
7. **remote concentrator** : a concentrator located some distance from a serving system control. ★ concentrateur distant → *concentrateur 7.* R удаленный концентратор. D abgesetzter Konzentrator. E concentrador remoto. I concentratore remoto. N ..... P koncentrator zdalny. S utbrutet abonnentsteg. (714)
8. **speed converter concentrator** : the temporary storing of data arriving from slow channels and their retransmission on high speed channels and vice-versa. ★ concentrateur-diffuseur → *concentrateur-diffuseur 1.* R концентратор с преобразованием скорости. D geschwindigkeitsumsetzender Konzentrator. E concentrador-difusor. I concentratore con conversione di velocità. N concentrator door

snelheidsomzetting. P koncentrator z konwersją szybkości. S ratomvandlare. (721)

9. **trunk concentrator** : a concentrator to which only traffic circuits are connected. ★ concentrateur de circuits → *concentrateur 3.* R канальный концентратор. D Fernleitungskonzentrator. E concentrador de circuitos. I concentratore di giunzioni. N ..... P koncentrator łączy. S trunkkoncentrator. (714)

concentric

1. **concentric conductor** : → *conductor 9*
2. **concentric contact** : → *contact 20*
3. **concentric groove** (*Syn.* locked groove) : → *groove 21*
4. **concentric neutral cable** : → *cable 24*
5. **concentric winding** : → *winding 14*
6. **concentric windings** : → *winding 15*
7. **four concentric circle near-field template** : → *template 1*
8. **four concentric circle refractive index template** : → *template 2*
9. **single-phase concentric neutral cable** : → *cable 62*
10. **split concentric cable** : → *cable 66*
11. **three-phase concentric neutral cable** : → *cable 67*

concentrically

1. **concentrically stranded circular conductor** : → *conductor 10*

concentricity

1. **core/cladding concentricity error** : → *error 17*
2. **core/reference surface concentricity error** : → *error 18*

concomitant

1. **concomitant radiation** : → *radiation 14*

condensation

1. **condensation pressure** : → *pressure 3*
2. **condensation temperature** : → *temperature 8*

condensed-mercury

1. **condensed-mercury temperature** : → *temperature 9*

condenser

1. **condenser** : a heat exchanger which is the cold source in a closed steam cycle and condenses the exhaust steam of the turbine. ★ condenseur → *condenseur 1.* R конденсатор паровой турбины. D Kondensator. E condensador. I condensatore. N condensor. P skraplacz; kondensator. S kondensor. (602)
2. **condenser microphone** (*Syn.* electrostatic microphone) : → *microphone 13*
3. **synchronous condenser** (*Syn.* synchronous compensator) : a synchronous machine running without mechanical load and supplying or absorbing reactive power. ★ compensateur synchrone → *compensateur 5.* R синхронный компенсатор. D Synchron-Blindleistungs-maschine; Synchron-Phasenschieber. E compensador síncrono. I compensatore sincrono. N synchrone compensator; synchrone condensator. P kompensator synchroniczny. S synkronkompensator. (411)

condensing

1. **condensing set** : → *set 8*
2. **condensing set with reheat** : → *set 9*
3. **condensing steam turbine** : → *turbine 1*
4. **condensing steam turbine with bleeding** : → *turbine 2*

condition

1. **A condition** : the significant condition of a start element in start-stop transmission. ★ état A → *état 4.* R состояние А. D A-Zustand. E estado A. I condizione A. N A-toestand. P stan A. S A-tillstånd. (721)
2. **busy condition** (*Syn.* occupation) : the state of a traffic-carrying device that is being used or has been reserved for use following a request for its service. ★ occupation → *occupation 6.* R состояние занятости. D besetzt; Besetztzustand. E ocupación. I condizione di occupato. N bezette toestand. P zajętość; stan zajętości. S upptaget(tillstånd). (714)
3. **cold conditions** : conditions in which no supply voltages are applied to the tube. ★ conditions à froid → *condition 5.* R нерабочий режим. D Kaltzustand. E condiciones en frío. I condizioni a freddo. N rustcondities. P stan zimny. S vilotillstånd. (531)
4. **cyclic magnetic condition** : a condition of a magnetic material in which the hysteresis loop is independent of the number of identical cyclic excursions to which the material has been subjected. ★ condition magnétique cyclique → *condition 4.* R циклическое магнитное состояние. D stabilisierter Zustand. E condición magnética cíclica. I condizione magneticamente ciclica. N cyclische magnetische toestand. P stan ustabilizowany cyklicznie. S cykliskt magnetiseringstillstånd. (221)
5. **data channel signalling conditions** : inter-exchange data channel conditions employed in the call set-up and clear-down procedures such as : trunk-free, trunk-seized, ready-for-data, clear request. ★ états de signalisation sur la voie de données → *état 55.* R состояния сигнализации в канале данных. D Datenkanal-Kennzeichengabe. E estados de señalización sobre el canal de datos; condiciones de señalización sobre el canal de datos. I fase di segnalazione su canale dati. N datakanaaltoestanden. P stany sygnalizacyjne w kanale danych. S signaltillstånd för datakanal. (721)
6. **environmental conditions** : those characteristics of the environment (altitude, temperature, humidity,...) which may affect performance. *Notes. 1* — These may include e.g. pressure, temperature, radiations, vibrations. *2* — Site conditions are the range of environmental conditions for a given site. ★ conditions ambiantes → *condition 6.* R внешние условия. D Umgebungsbedingungen; Betriebsbedingungen. E condiciones ambientales. I condizioni ambientali. N omgevingsomstandigheden. P warunki środowiskowe. S miljöförhållanden. (151)
7. **final condition** : any specified condition reached by a relay in order to complete its designated function in a given output circuit. *Note.* — This term is used mainly for measuring relays and specified-time relays. ★ état final → *état 36.* R состояние завершенного срабатывания. D Endzustand. E estado final. I stato di funzionamento. N eindtoestand. P stan końcowy. S slutläge. (446)
8. **four conditions** : a qualifying term indicating that the number of significant conditions used is four. ★ tétravalent → *tétravalent 2.* R четверичный. D vierwertig. E tetravalente. I quattro stati. N tetravalent. P czterowartościowy. S fyrtillstånd. (721)
9. **free circuit condition** : the characteristic state of a circuit available for the setting up of a call. ★ état de disponibilité → *état 17.* R состояние "канал свободен". D Freizustand. E estado de disponibilidad. I stato di disponibilità. N vrij-circuit-toestand. P stan łącza wolnego. S ledigtillstånd. (721)
10. **hot conditions** (*Syn.* operating conditions) : → *condition 19.*
11. **idle circuit condition** : the characteristic state of the circuit in an established connection when no transmission takes place. ★ état de repos → *état 23.* R исходное состояние канала. D Freizustand der Leitung. E estados de reposo (de circuitos). I condizione di riposo. N circuit in vrije toestand. P stan spoczynkowy łącza. S vilotillstånd. (721)
12. **initial condition** : any specified condition which the relay leaves in order to complete its designated function in a given output circuit. *Note.* — This term is used mainly for measuring relays and specified-time relays. ★ état initial → *état 38.* R исходное состояние. D Anfangszustand. E estado inicial. I stato iniziale. N aanvangstoestand. P stan początkowy. S begynnelseläge. (446)
13. **inter-character rest condition** : in a data transmission without a clock, the distinctive condition which exists for the period of time between two successive transfers of data characters. ★ état de repos intercalaire entre les caractères → *état 24.* R состояние покоя между знаками. D Ruhezustand zwischen Zeichen. E estado de reposo intercalado entre caracteres; condición de reposo intercalado entre caracteres. I condizione di riposo fra caratteri. N rusttoestand tussen karaktertransport. P spoczynek międzyznakowy. S teckenlucketillstånd. (721)
14. **mark condition** (in Morse code) : designation given to one of the two significant conditions in Morse code. ★ travail → *travail 22.* R состояние токовой посылки (в коде Морзе). D Zeichenlage (im Morse-Code). E trabajo (en código morse).

I attivo (mark). N teken-toestand van de Morsecode. P znak (w kodzie Morse'a). S teckentillstånd. (721)

15. **n-condition frequency shift keying** : → *keying 7*
16. **noise-limited condition** : condition in which detection is limited by sonar background noise other than reverberation. ★ situation de bruit prépondérant → *situation 1.* R условия ограничения по шуму. D Geräusch-begrenzte Bedingung. E situación de ruido preponderante. I condizione di rumore preponderante. N toestand waarbij het geruis overheerst. P warunek ograniczający szumowy. S brusbegränsande villkor. (801)
17. **number of significant conditions** : → *number 22*
18. **operate condition** : for a monostable relay, the specified condition of the relay when it is energized in a specified manner. For a bistable relay the condition other than the release condition as declared by the manufacturer. ★ état de travail → *état 28.* R конечное состояние. D Arbeitszustand. E estado de trabajo. I stato di lavoro. N werktoestand. P stan działania; stan pracy. S tillåge. (446)
19. **operating conditions** (*Syn.* hot conditions) : conditions in which all supply voltages and, where appropriate, signals are applied to the tube. ★ conditions en fonctionnement → *condition 12.* R рабочий режим. D Betriebszustand. E condiciones en funcionamiento. I condizioni in funzionamento. N werkcondities. P stan roboczy. S drift(betingelser); drifttillstånd. (531)
20. **operating conditions** : a description of the operation of a machine or equipment, including the time schedule and operating factors. ★ service → *service 34.* R условия эксплуатации. D Betriebsbedingungen. E servicio. I condizioni di funzionamento. N bedrijfsvoorwaarden; bedrijfstoestand. P warunki pracy. S driftbetingelser. (881)
21. **reference conditions** : the appropriate set of specified values and ranges of values of influence quantities under which the smallest permissible errors of a measuring instrument are specified. ★ conditions de référence → *condition 7.* R нормальные условия. D Referenzbedingungen. E condiciones de referencia. I condizioni di riferimento. N referentievoorwaarden. P warunki odniesienia. S referensvillkor. (301)
22. **reference conditions of influencing quantities and factors** : the reference values of all influencing quantities and factors. ★ conditions de référence des grandeurs et des facteurs d'influence → *condition 8.* R нормальные условия влияющих величин и факторов. D Bezugsbedingungen der Einflussgrössen und -faktoren. E condiciones de referencia de las magnitudes y de los factores de influencia. I condizioni di riferimento delle grandezze e dei fattori d'influenza. N referentievoorwaarden voor beïnvloedende grootheden en factoren. P warunki odniesienia wielkości wpływającej i czynnika wpływającego. S referensvillkor för påverkande storheter och faktorer. (446)
23. **release condition** : for a monostable relay, the specified condition of the relay when it is not energized. For a bistable relay, a specified condition, as declared by the manufacturer. ★ état de repos → *état 21.* R начальное состояние. D Ruhezustand. E estado de reposo. I stato di riposo. N afvalvoorwaarde. P stan spoczynku. S frånläge. (446)
24. **reverberation-limited condition** : condition in which detection by an active sonar is limited by the reverberation part of the sonar background noise. ★ situation de réverbération prépondérante → *réverbération 12.* R условия ограничения по реверберации. D nachhallbegrenzte Bedingung. E situación de reverberación preponderante. I condizione di campo riverberante. N toestand waarbij de nagalm overheerst. P warunek ograniczający pogłosowy. S efterklangsbegränsande villkor. (801)
25. **significant condition** : condition of a signal element defining the meaning of that signal element in accordance with a code. ★ état significatif → *état 51.* R значащее положение. D signifikantes Merkmal. E estado significativo. I stato significativo. N significante toestand. P stan znamienny. S signifikant tillstånd. (702,721)
26. **space condition** (in Morse code) : designation given to one of the two significant conditions in Morse code, the other condition being designated "mark". ★ repos → *repos 20.* R состояние бестоковой посылки (в коде Морзе). D Trennlage (im Morse-Code). E reposo (en código morse). I riposo (space). N spatietoestand (van de Morsecode). P spoczynek (w kodzie Morse'a). S mellanrumstillstånd. (721)
27. **standby conditions** : conditions in which the heater or filament voltage only is applied to the tube. *Note.* — For some types of tubes, other auxiliary voltages may be applied, e.g. to the reservoir, the ion pump, etc. ★ conditions de veille → *condition 10.* R дежурный режим. D Bereitschaftsbetrieb. E condiciones de vigilia. I condizioni di riserva. N waakcondities. P stan gotowości. S beredskapstillstånd. (531)
28. **steady state condition** (*Syn.* equilibrium mode distribution) : → *distribution 25*
29. **three conditions** : a qualifying term indicating that the number of significant conditions used is three. ★ trivalent → *trivalent 1.* R троичный. D dreiwertig. E trivalente. I tre stati. N trivalent. P trójwartościowy. S tretillstånd. (721)
30. **time to stable closed condition** : → *time 211*
31. **time to stable open condition** : → *time 212*
32. **two conditions** : a qualifying term indicating that the number of significant conditions used is two. ★ bivalent → *bivalent 1.* R двоичный. D zweiwertig. E bivalente. I due stati. N bivalent. P dwuwartosciowy. S tvåtillstånd. (721)
33. **voltage drop or rise for a specified load condition** : → *voltage drop 3*
34. **voltage regulation for a specified load condition** (*Syn.* voltage drop or rise for a specified load condition) : → *voltage drop 3*
35. **Z condition** : the significant condition of a stop element in start-stop transmission. ★ état Z → *état 54.* R состояние Z. D Z-Zustand. E estado Z. I condizione Z. N Z-toestand. P stan Z. S Z-tillstånd. (721)

conditional

1. **conditional access television** : → *television 8*
2. **conditional short-circuit current** : → *short-circuit current 2*
3. **conditional stability** : → *stability 3*
4. **conditional stability of a power system** : → *stability 4*

conditioning

1. **air conditioning** : treatment of the ambient air to bring it to predetermined conditions of temperature and humidity. ★ climatisation → *climatisation 1.* R кондиционирование воздуха. D Klimatisierung. E climatización. I climatizzazione. N luchtbehandeling; klimaatregeling. P klimatyzacja. S luftkonditionering. (811)
2. **conditioning** : the subjection of a specimen to an atmosphere of a specified relative humidity or complete immersion in water or other liquid, at a specified temperature for a specified period of time. ★ conditionnement → *conditionnement 1.* R кондиционирование. D Konditionierung. E acondicionamiento. I condizionamento. N conditionering. P kondycjonowanie. S konditionering. (212)
3. **magnetic conditioning** : a treatment of a magnetic material or core to obliterate its magnetic history and put it in a reproducible magnetic state. ★ conditionnement magnétique → *conditionnement 2.* R магнитная подготовка. D (magnetische) Idealisierung. E acondicionamiento magnético. I trattamento magnetico. N ontmagnetiseren. P kondycjonowanie magnetyczne. S magnetisk konditionering. (221)

conductance

1. **conductance** (of an ideal resistor) : the reciprocal of the resistance. ★ conductance → *conductance 1.* R проводимость (идеального резистора). D Leitwert; Konduktanz (eines idealen Widerstandes). E conductancia (de una resistencia ideal). I conduttanza (di un resistore ideale). N geleiding (van een ideale weerstand). P konduktancja (rezystora idealnego). S konduktans (hos en ideal resistor). (131)
2. **electrode conductance** : the real component of the electrode admittance. ★ conductance d'électrode → *conductance 2.* R активная проводимость электрода. D innerer Elektrodenwirkleitwert. E conductancia de electrodo. I conduttanza di elettrodo. N elektrodeconductantie. P konduktancja elektrody. S elektrodkonduktans. (531)
3. **(equivalent) conductance** : the real part of a complex admittance. ★ conductance (équivalente) → *conductance 3.* R (активная) проводимость. D Konduktanz; Wirkleitwert. E conductancia (equivalente). I conduttanza (equivalente). N conductantie. P konduktancja. S konduktans. (131)

4. **mutual conductance** : the transconductance between the output electrode and the control electrode. ★ pente → *pente 3.* R средняя крутизна. D Steilheit (reell, Bezugselektrode: Steuergitter). E conductancia mutua; pendiente. I pendenza — mutua conduttanza. N steilheid. P nachylenie (charakterystyki prądu anody). S branthet. (531)

conducting

1. **conducting** : applies to a device or a circuit to indicate that it is carrying a current. ★ ..... → . R ..... D stromführend. E ..... I ..... N stroomgeleidend. P przewodzący. S strömförande. (151)
2. **conducting direction** : → *direction 1*
3. **conducting direction** : → *direction 2*
4. **conducting medium** : → *medium 7*
5. **conducting period** : → *period 4*
6. **conducting state** (*Syn.* on-state) : → *on-state 3*
7. **conducting varnish** : → *varnish 1*
8. **effectively conducting output circuit** : → *circuit 66*
9. **reverse conducting diode thyristor** : → *thyristor 7*
10. **reverse conducting triode thyristor** : → *thyristor 8*

conduction

1. **air conduction** : the transmission of sound through the external and middle ear to the internal ear. ★ conduction aérienne → *conduction 2.* R воздушная проводимость. D Luftleitung. E conducción aérea. I conduzione per via aerea. N luchtgeleiding. P przewodzenie powietrzne. S luftledning (av ljud via hörselgången). (801)
2. **conduction band** : → *band 10*
3. **conduction current** : → *current 23*
4. **conduction current** : → *current 24*
5. **(conduction) current density** : → *current-density 1*
6. **conduction electron** : → *electron 4*
7. **conduction interval** : → *interval 5*
8. **conduction ratio** : → *ratio 18*
9. **conduction through** : in inverter operation, the situation that the principal arm continues conducting at the end of the normally conducting period or at the end of the hold-off interval. ★ décrochage → *décrochage 6.* R опрокидывание срыв инвертирования. D Wechselrichterkippung. E postconducción. I sgancio. N kippen. P przedłużenie przewodzenia. S genomledning. (551)
10. **corona (conduction)** : → *corona 2*
11. **crystal conduction detector** : → *detector 6*
12. **electron conduction** : a conduction in a semiconductor in which conduction electrons in a crystal lattice are propagated through the lattice under the influence of an electric field. ★ conduction par électrons → *conduction 10.* R электронная проводимость. D Elektronenleitung; N-Leitung; Überschußleitung. E conducción por electrones. I conduzione per elettroni. N elektronengeleiding. P przewodnictwo elektronowe. S elektronledning. (521)
13. **elementary (conduction) current** : → *current 78*
14. **gas conduction** : the passage of a conduction current through an ionized gas. ★ conduction gazeuse → *conduction 4.* R газовая проводимость. D (Strom-) Leitung in Gas. E conducción gaseosa. I conduzione gassosa. N geleiding in gassen; gasontlading. P przewodzenie gazowe. S elektrisk ledning i gas. (121)
15. **hole conduction** : a conduction in a semiconductor, in which holes in a crystal lattice are propagated through the lattice under the influence of an electric field. ★ conduction par trous → *conduction 11.* R дырочная проводимость. D Löcherleitung. E conducción por huecos. I conduzione per lacune. N gatengeleiding. P przewodnictwo dziurowe. S hålledning. (521)
16. **intrinsic conduction** : conduction in a semiconductor caused by the movement of holes and conduction electrons formed due to the thermal generation of pairs of charge carriers. ★ conduction intrinsèque → *conduction 7.* R собственная проводимость. D Eigenleitung. E conducción intrínseca. I conduzione intrinseca. N intrinsieke geleiding. P przewodnictwo samoistne. S egenledning; I-ledning. (521)
17. **ionic conduction** : a mechanism of conduction caused by the directed movement of charges due to the displacement of ions, the movement being maintained by a continuous contribution of external energy. ★ conduction ionique → *conduction 8.* R ионная проводимость. D Ionenleitung. E conducción iónica. I conduzione ionica. N ionengeleiding. P przewodnictwo jonowe. S jonledning. (521)
18. **non-self-maintained gas conduction** : a gas conduction for which the necessary charge carriers are produced by the aid of an external ionizing agent. ★ conduction gazeuse non autonome → *conduction 6.* R несамостоятельная газовая проводимость. D unselbständige (Strom-) Leitung in Gas. E conducción gaseosa no automantenida. I conduzione gassosa non autonoma. N niet-zelfstandige geleiding in gassen. P przewodzenie gazowe niesamoistne. S osjälvständig gasurladdning. (121)
19. **self-maintained gas conduction** : a gas conduction for which the necessary charge carriers are produced without the aid of an external ionizing agent. ★ conduction gazeuse autonome → *conduction 5.* R самостоятельная газовая проводимость. D selbständige (Strom-) Leitung in Gas. E conducción gaseosa automantenida. I conduzione gassosa autonoma. N zelfstandige geleiding in gassen. P przewodzenie gazowe samoistne. S självständig gasurladdning. (121)
20. **thermal conduction** : a mode of heat transmission within a body or between bodies in contact resulting from the interaction between adjacent molecules. ★ conduction thermique → *conduction 12.* R теплопроводность. D Wärmeleitung. E conducción térmica. I conduzione termica. N warmtegeleiding. P przewodzenie ciepła. S värmeledning. (841)

conductive

1. **conductive** : applies to a medium to indicate that it can conduct current. ★ conducteur → *conducteur 7.* R проводящий материал. D leitfähig; leitend. E conductor. I conduttore. N geleidend. P przewodzący. S konduktiv; ledande. (151)
2. **conductive clothing** : → *clothing 1*
3. **conductive part** : → *part 2*
4. **conductive pattern** : → *pattern 2*
5. **exposed conductive part** : → *part 3*
6. **extraneous conductive part** : → *part 4*

conductivity

1. **conductivity** : the scalar or matrix quantity whose product by the electric field strength is the conduction current density. ★ conductivité → *conductivité 1.* R удельная электрическая проводимость. D (elektrische) Leitfähigkeit. E conductividad. I conduttività. N soortelijke geleiding; conductiviteit. P konduktywność; przewodność właściwa. S konduktivitet. (121)
2. **conductivity modulation** : → *modulation 11*
3. **high conductivity polymer** : → *polymer 1*
4. **intrinsic conductivity** : conductivity of an intrinsic semiconductor. ★ conductivité intrinsèque → *conductivité 4.* R собственная электропроводность. D Eigenleitfähigkeit. E conductividad intrínseca. I conduttività intrinseca. N intrinsieke conductiviteit; intrinsieke soortelijke geleiding. P przewodnictwo samoistne. S egenkonduktivitet. (521)
5. **low conductivity polymer** : → *polymer 2*
6. **N-type conductivity** : conductivity caused by a flow of electrons from a donor. ★ conductivité de type N → *conductivité 2.* R электропроводность N-типа. D N-Leitfähigkeit. E conductividad tipo N. I conduttività di tipo N. N elektronenconductiviteit; soortelijke elektronengeleiding. P przewodnictwo elektronowe; przewodnictwo typu N. S elektronkonduktivitet. (521)
7. **P-type conductivity** : conductivity caused by a flow of holes from an acceptor. ★ conductivité de type P → *conductivité 3.* R электропроводность P-типа. D P-Leitfähigkeit. E conductividad tipo P. I conduttività di tipo P. N gatenconductiviteit; soortelijke gatengeleiding. P przewodnictwo dziurowe; przewodnictwo typu P. S hålkonduktivitet. (521)
8. **thermal conductivity** (λ) : in a steady-state, the quantity of heat which is transmitted by conduction through a body per unit area, per unit time, per unit thickness for a temperature difference of 1 kelvin. ★ conductivité thermique → *conductivité 5.* R удельная теплопроводность. D Wärmeleitfähigkeit. E conductividad térmica. I conducibilità termica. N warmtegeleidingscoëfficiënt. P przewodność cieplna. S värmeledningsförmåga; värmekonduktivitet. (841)

conductor

1. **all aluminium alloy conductor** (*Syn.* AAAC (abbreviation)) : a stranded conductor of which all wires are made of aluminium alloy. ★ conducteur en alliage d'aluminium → *conducteur 26.* R провод из алюминиевого сплава. D E-AlMgSi(Aldrey)-Seil. E conductor de aleación de aluminio. I conduttore in lega di alluminio. N geleider van gelegeerd aluminium. P przewód stopowo-aluminiowy. S lina av legerat aluminium. (466)
2. **all aluminium conductor** (*Syn.* AAC (abbreviation)) : a stranded conductor, of which all wires are made of aluminium. ★ conducteur en aluminium → *conducteur 27.* R алюминиевый провод. D Aluminiumseil. E conductor de aluminio. I conduttore in alluminio. N aluminium geleider. P przewód aluminiowy; linka aluminiowa. S renaluminiumlina. (466)
3. **alloy reinforced aluminium conductor** (*Syn.* ACAR (abbreviation)) : a reinforced conductor comprising aluminium wires with one or more aluminium alloy wires disposed symmetrically within the conventional stranding configuration. ★ conducteur aluminium - alliage d'aluminium → *conducteur 10.* R алюминиевый провод с сердечником из алюминиевого сплава. D Aluminium/E-AlMgSi(Aldrey)-Verbundseil. E conductor de aluminio-aleación de aluminio. I conduttore alluminio-lega d'alluminio. N aluminium geleider versterkt door draden van gelegeerd aluminium. P przewód o żyłach aluminiowych i stopowo-aluminiowych. S ..... (466)
4. **aluminium clad steel reinforced aluminium conductor** (*Syn.* ACSR/AC (abbreviation)) : a reinforced conductor comprising aluminium wires with one or more aluminium-clad steel wires disposed symmetrically within the conventional stranding configuration. ★ conducteur aluminium-acier gainé d'aluminium → *conducteur 12.* R сталеалюминиевый провод с сердечником из алюминизированной стали. D Aluminium/Stalum-Seil. E conductor de aluminio-acero recubierto de aluminio. I conduttore alluminio-acciaio rivestito di alluminio. N aluminium geleider versterkt met door met aluminium beklede staaldraden. P przewód o żyłach aluminiowych i stalowych powleczonych aluminium. S ..... (466)
5. **auto-tensioned conductor** : a contact wire or catenary whose tension is regulated by an automatic tensioner. ★ fil à tension réglée → *fil 17.* R контактный провод с самонатяжением. D automatisch gespannter Draht (gespanntes Seil). E hilo con tensión regulada. I filo contrappesato; corda (portante) contrappesata. N nagespannen rijdraad en/of draagkabel. P przewód o regulowanym naprężeniu. S ..... (811)
6. **bunched conductor** : a stranded conductor in which the wires are assembled together in helical formation in a random manner, all in the same direction and with the same length of lay. ★ âme tordonnée → *âme 19.* R токопроводящая жила пучковой скрутки. D verwürgter Leiter. E conductor en fila'stica irregular. I conduttore a fascio. N gebundelde kern; gebundelde geleider. P żyła przewodząca drutowa nieregularna. S ..... (461)
7. **centre conductor rail** : → *rail 2*
8. **compacted conductor** : a stranded conductor in which the interstices between the component wires have been reduced by mechanical compression or by drawing or by suitable choice of the shape and disposition of wires. *Note.* — The French term "âme en pavés" means a particular compacted conductor of large cross-section comprising a small number of shaped wires. ★ âme compacte → *âme 4.* R уплотненная токопроводящая жила. D verdichteter Leiter. E conductor compacto. I conduttore compatto. N verdichte kern; verdichte geleider. P żyła przewodząca prasowana. S komprimerad ledare. (461)
9. **concentric conductor** : a conductor so constructed as to surround one or more insulated conductors. ★ âme concentrique → *âme 5.* R концентрическая токопроводящая жила. D konzentrischer Leiter. E conductor concéntrado. I conduttore concentrico. N concentrische geleider. P żyła przewodząca współosiowa. S koncentrisk ledare. (461)
10. **concentrically stranded circular conductor** : a stranded conductor in which the individual wires are assembled together in helical formation, in one or more separate concentric layers and generally with an alternating direction of lay. ★ âme (câblée) circulaire à couches concentriques → *âme 3.* R концентрически скрученная круглая токопроводящая жила. D lagenverseilter Rundleiter. E conductor (cableado) circular de capas conéntricas. I conduttore a corda di sezione circolare. N concentrisch samengeslagen ronde kern; concentrisch samengeslagen ronde geleider. P żyła przewodząca wielodrutowa okrągła o skręcie regularnym. S ..... (461)
11. **conductor** : a substance having free charge carriers which can be moved by an electric field. ★ conducteur → *conducteur 5.* R проводник. D Leiter. E conductor. I conduttore. N geleider. P przewodnik. S ledare. (121,521)
12. **conductor** : a component intended to carry electric conduction current. ★ conducteur → *conducteur 6.* R проводник. D Leiter. E conductor. I conduttore. N geleider. P przewód. S ledare. (151)
13. **conductor** (of a cable) : a part of a cable which has the specific function of carrying current. ★ âme → *âme 1.* R токопроводящая жила (кабеля). D Leiter. E conductor (de un cable). I conduttore (di un cavo). N kern; geleider (van een leiding). P żyła przewodząca (kabla lub przewodu). S ledare. (461)
14. **conductor** (of a printed board) : single conductive path in a conductive pattern. ★ conducteur → *conducteur 8.* R печатный проводник. D Leiter (auf einer Leiterplatte). E conductor (de una tarjeta impresa). I conduttore. N geleider. P ścieżka (płytki drukowanej). S ledare. (541)
15. **conductor barrel** : → *barrel 2*
16. **conductor bundle** : → *bundle 3*
17. **conductor configuration** : → *configuration 2*
18. **conductor galloping** : → *galloping 1*
19. **conductor insulation** : → *insulation 11*
20. **conductor insulation** : → *insulation 12*
21. **conductor (of an overhead line)** : a wire or combination of wires not insulated from one another, suitable for carrying an electric current. ★ conducteur (d'une ligne aérienne) → *conducteur 24.* R провод (воздушной линии электропередачи). D Leiter (einer Freileitung). E conductor (de una línea aérea). I conduttore (di una linea aerea). N (bovengrondse) geleider. P przewód (linii napowietrznej). S ledare (i friledning). (466)
22. **conductor pull-out force** (*Syn.* conductor tensile force) : → *force 8*
23. **conductor rail** : → *rail 3*
24. **conductor rail anchor** : → *anchor 4*
25. **conductor rail gap** : → *gap 1*
26. **conductor rail gauge** : → *gauge 1*
27. **conductor screen** : → *screen 2*
28. **conductor tensile force** : → *force 8*
29. **conductor vibration** : → *vibration 2*
30. **conduit conductor rail** : → *rail 7*
31. **core (of a reinforced conductor)** : → *core 16*
32. **earth conductor** (*Syn.* ground conductor (USA)) : a conductor of low impedance which provides an electrical connection between a given point in equipment (an installation or system) and an earth electrode. ★ conducteur de terre → *conducteur 20.* R заземляющий проводник. D Erdungsleitung. E conductor de tierra. I conduttore di protezione. N aardgeleider. P przewód uziemiający. S jordledare. (151,604)
33. **earthing conductor** : a protective conductor connecting the main earthing terminal or bar to the earth electrode. ★ conducteur de terre → *conducteur 21.* R заземляющий проводник. D Erdungsleitung. E conductor de tierra. I conduttore di terra. N aardleiding. P przewód uziemiający. S jordtagsledare. (826)
34. **equipotential bonding conductor** : a protective conductor for ensuring equipotential bonding. ★ conducteur d'équipotentialité → *conducteur 23.* R выравнивающий проводник. D Potentialausgleichsleiter. E conductor de equipotencial. I conduttore equipotenziale. N potentiaalvereffeningsleiding. P przewód wyrównawczy. S potentialutjämningsledare. (826)
35. **expanded conductor** : a conductor in which some of the internal wires have been omitted, or replaced by non-metallic, lighter wires to obtain an increase in diameter. ★ conducteur expansé → *conducteur 28.* R расширенный провод. D erweiterter Leiter. E conductor expandido. I conduttore ingrossato; conduttore dilatato. N geëxpandeerde geleider. P przewód z rdzeniem wypełniającym. S expanderad lina. (466)

36. **fixed termination conductor** (*Syn.* fixed equipment) : a conductor whose tension is not regulated by an automatic tensioner. ★ câble porteur (à tension) non réglé(e) → *câble 57.* R некомпенсированный несущий трос. D festes Tragseil. E cable portador no regulado. I corda portante non contrappesata. N niet-nagespannen draagkabel. P linka nośna o nieregulowanym naprężeniu. S ..... (811)
37. **flexible conductor** : a stranded conductor having wires of diameters small enough and so assembled that the conductor is suitable for use in a flexible cable. ★ âme souple → *âme 18.* R гибкая токопроводящая жила. D flexibler Leiter. E conductor flexible. I conduttore flessibile. N buigzame kern; buigzame geleider. P żyła przewodząca giętka. S flexibel ledare. (461)
38. **ground conductor** (*Syn.* earth conductor) : → *conductor 32*
39. **heating conductor** (*Syn.* heating resistor) : a conductor connected to a source of electric current and used to transform electrical energy into heat. ★ conducteur chauffant → *conducteur 15.* R нагреватель сопротивления. D Heizleiter; Heizwiderstand. E conductor de calentamiento; resistencia de calentamiento. I conduttore riscaldante; resistenza riscaldante. N warmtegeleider; verwarmingsweerstand. P przewód grzejny; rezystor grzejny. S värmningsledare; värmningsmotstånd. (841)
40. **heating conductor green rot** : → *rot 1*
41. **heating conductor surface rating** : → *rating 6*
42. **hollow conductor** : a conductor so constructed as to provide a central channel. ★ âme creuse → *âme 6.* R полая токопроводящая жила. D Hohlleiter. E conductor hueco. I conduttore con foro centrale. N holle kern; holle geleider. P żyła przewodząca rurowa. S hålledare. (461)
43. **hollow conductor** : a tubular conductor made up of wires or segments helically stranded sometimes around reinforcing wires. ★ conducteur creux → *conducteur 17.* R полый провод. D Hohlleiter. E conductor hueco. I conduttore cavo. N holle geleider. P przewód rurowy. S hållina. (466)
44. **insulated conductor** (*Syn.* core) : → *core 3*
45. **lightning conductor** : metal rod and strip placed on a structure which discharges any lightning current to earth. ★ paratonnerre → *paratonnerre 1.* R молниеотвод. D Blitzableiter. E pararrayos de puntas; varilla pararrayos; pararrayos (en concepto físico). I calata. N bliksemafleider. P piorunochron. S blixtledare. (604)
46. **metal-clad conductor** : a conductor in which each wire consists of an inner part of one metal and a metallurgically bonded outer shell of another metal. ★ âme plaquée de métal → *âme 12.* R биметаллическая токопроводящая жила. D metallumhüllter Leiter. E conductor chapado meta'licamente. I conduttore placcato. N ..... P żyła przewodząca platerowana. S metallklädd ledare. (461)
47. **metal-coated conductor** : a conductor in which each individual wire is covered with a thin layer of a different metal or metal alloy. ★ âme revêtue d'une couche métallique → *âme 15.* R токопроводящая жила с металлическим покрытием. D metallbeschichteter Leiter. E conductor recubierto por una capa meta'lica. I conduttore rivestito. N ..... P żyła przewodząca metalizowana (np. cynowana). S pläterad ledare. (461)
48. **milliken conductor** : a stranded conductor comprising an assembly of shaped stranded conductors, lightly insulated from each other. ★ âme segmentée → *âme 17.* R расщепленная токопроводящая зъила. D Segmentleiter. E conductor segmentado. I conduttore Milliken. N millikenkern; millikengeleider. P żyła millikona. S millikenledare. (461)
49. **multiple stranded conductor** : a stranded conductor consisting of a number of groups of wires assembled together in one or more helical layers, the wires in each group being either binched or stranded. *Note.* — The French term "toron" means an element of multiple stranded conductor consisting of concentrically assembled wires. The French term "tordon" means an element of a multiple stranded conductor in which the wires are bunched. ★ âme en torons → *âme 9.* R многократно скрученная токопроводящая жила. D mehrfach verseilter Leiter. E conductor con fila'stica. I conduttore cordato a trefoli. N meervoudig samengeslagen kern; meervoudig samengeslagen geleider. P żyła przewodząca wieloskrętkowa. S ..... (461)
50. **neutral conductor** : a conductor connected to the neutral point of a system and capable of contributing to the transmission of electrical energy. ★ conducteur neutre → *conducteur 33.* R нулевой рабочий проводник. D Neutralleiter. E conductor neutro; (símbolo N). I conduttore di neutro. N nul. P przewód zerowy. S neutralledare. (826)
51. **overhead conductor rail** : → *rail 11*
52. **parallel earth continuity conductor** : a conductor usually laid along the cable route to provide a continuous low impedance metallic earth connection between the earthing systems at the ends of the cable route. ★ conducteur de terre en parallèle → *conducteur 22.* R параллельный заземляющий непрерывный провод. D kontinuierlicher paralleler Erdungsleiter. E conductor de tierra en paralelo. I conduttore di terra parallelo. N parallelle doorgaande aardgeleider. P przewo'd uziemiający ciągły. S längsgående jordledare. (461)
53. **PEN conductor** : an earthed conductor combining the functions of both protective conductor and neutral conductor. *Note.* — The acronym PEN results of the combination of both symbols PE for the protective conductor and N for the neutral conductor. ★ conducteur PEN → *conducteur 34.* R совмещенный нулевой рабочий и защитный проводник (ГЗЕ—проводник). D PEN-Leiter. E conductor PEN. I conduttore PEN. N PEN-leiding. P przewód PEN; przewód ochronno-zerujący; przewód zerowo-zerujący. S PEN-ledare. (826)
54. **perfect conductor** : an hypothetical medium such that an external variable electric field would produce on its surface an electrical current density vector J which would be tangential to the surface and arbitrarily large in a particular frequency band. *Note.* — It is possible for an anisotropic medium to be a perfect conductor in certain directions only ; in these directions conductivity may be considered infinite. ★ (milieu) conducteur parfait → *conducteur 52.* D idealer Leiter. P przewodnik doskonały. (705)
55. **plain conductor** : a metal conductor in which the wire or wires are not coated with an additional metal. ★ âme (en métal) nue → *âme 8.* R токопроводящая жила без защитных покрытий. D blanker Leiter. E conductor desnudo. I conduttore nudo. N blanke geleider. P żyła przewodząca goła. S obelagd ledare. (461)
56. **protective conductor** (PE) : a conductor required by some measures for protection against electric shock for electrically connecting any of the following parts: exposed conductive parts, extraneous conductive parts, main earthing terminal, earth electrode, earthed point of the source or artificial neutral. ★ conducteur de protection → *conducteur 19.* R защитный проводник. D Schutzleiter. E conductor de protección. I conduttore di protezione. N beschermingsleiding. P przewód ochronny. S skyddsledare. (826)
57. **reinforced conductor** : a stranded conductor containing wires of two different materials to obtain enhanced mechanical characteristics. ★ conducteur mixte → *conducteur 32.* R комбинированный провод. D Verbundseil. E conductor reforzado. I conduttore bimetallico. N versterkte geleider. P przewód wzmocniony; przewód dwumetalowy. S ..... (466)
58. **return conductor rail** : → *rail 14*
59. **sector-shaped conductor** : a shaped conductor the cross-section of which approximates to a sector of a circle. ★ âme sectorale → *âme 16.* R токопроводящая жила секторного сечения. D Sektorleiter. E conductor sectoral. I conduttore settorale. N sectorvormige kern; sectorvormige geleider. P żyła przewodząca sektorowa. S sektorformad ledare. (461)
60. **segmental or locked coil conductor** (*Syn.* smooth body conductor) : → *conductor 65*
61. **shaped conductor** : a conductor the cross-section of which is other than circular. ★ âme profilée → *âme 13.* R токопроводящая жила фасонного сечения. D Profilleiter. E conductor perfilado. I conduttore. N niet-ronde kern; niet-ronde geleider. P żyła przewodząca profilowa. S formad ledare. (461)
62. **shielding conductor** : a separate conductor or single-core cable laid parallel to a cable or cable circuit and itself forming part of a closed circuit in which induced currents may flow whose magnetic field will oppose the field caused by the current in the cable(s). ★ conducteur écran → *conducteur 25.* R экранирующий провод. D reduzierender Leiter. E conductor pantalla. I conduttore con funzione schermante. N afzonderlijke geleider voor elektrische afscherming. P żyła ekranująca; przewód ekranujący. S skärmledare. (461)

63. **side conductor rail** : → *rail 16*
64. **single conductor** : a conductor constituting by itself one phase or one pole of a line. ★ conducteur unique → *conducteur 36.* R одиночный провод. D Einfachleiter. E conductor sencillo. I conduttore singolo. N enkele geleider. P przewód pojedynczy. S enkelledare. (466)
65. **smooth body conductor** (*Syn.* segmental or locked coil conductor) : a conductor with a relatively smooth surface obtained by using, for the outer layer, wires whose shape is that of a radial section of an annulus (segmental), or whose shape prevents them from having any radial movement (locked coil). ★ conducteur lisse → *conducteur 30.* R провод с гладкой поверхностью. D Leiter mit glatter Oberfläche; geschlossener Leiter. E conductor comprimido. I conduttore compatto. N geleider met glad oppervlak. P przewód segmentowy. S ..... (466)
66. **solid conductor** : a conductor consisting of a single wire. *Note.* — The solid conductor may be circular or shaped. ★ âme massive → *âme 11.* R сплошная жила. D eindrähtiger Leiter. E conductor de un solo alambre. I conduttore a filo unico. N massieve kern; massieve geleider. P żyła przewodząca jednodrutowa. S solid ledare; entrådig ledare. (461)
67. **solid conductor** : a conductor consisting of a single wire. ★ conducteur massif → *conducteur 31.* R однопроволочный провод. D massiver Leiter. E varilla. I conduttore massiccio. N massieve geleider. P przewód jednodrutowy. S entrådig ledare. (466)
68. **steel reinforced aluminium alloy conductor** (*Syn.* AACSR (abbreviation)) : a reinforced conductor with one or more layers of aluminium alloy wires stranded around a core of galvanised steel wires. ★ conducteur alliage d'aluminium-acier → *conducteur 9.* R провод из алюминиевого сплава со стальным сердечником. D E-AlMgSi(Aldrey)-Stahlseil. E conductor de aleación aluminio-acero. I conduttore lega di alluminio-acciaio. N staal/gelegeerd aluminium geleider. P przewód stopowo-aluminiowy o rdzeniu stalowym. S ..... (466)
69. **steel reinforced aluminium conductor** (*Syn.* ACSR (abbreviation)) : a reinforced conductor with one or more layers of aluminium wires stranded around a core of galvanised steel wires. ★ conducteur aluminium-acier → *conducteur 11.* R сталеалюминиевый провод. D Aluminium-Stahlseil. E conductor de aluminio-acero. I conduttore alluminio-acciaio. N staal/aluminium geleider. P przewód aluminiowy o rdzeniu stalowym. S stålaluminiumlina. (466)
70. **stranded conductor** : a conductor consisting of a number of individual wires, all or some of which generally have a helical form. *Note.* — The stranded conductor may be circular or shaped. ★ âme câblée → *âme 2.* R скрученная жила. D verseilter Leiter. E conductor cableado. I conduttore a corda. N samengeslagen kern; samengeslagen geleider. P żyła przewodząca wielodrutowa. S fåtrådig ledare. (461)
71. **stranded conductor** : a conductor consisting of a number of individual uninsulated wires laid up together in alternating left- and right-hand helical layers. ★ conducteur câblé → *conducteur 14.* R многопроволочный провод. D verseilter Leiter. E conductor cableado. I conduttore cordato. N geslagen geleider. P przewód wielodrutowy; linka wielożyłowa. S lina. (466)
72. **tinned conductor** : a metal-coated conductor in which the metal coating is of tin. ★ âme étamée → *âme 10.* R луженая токопроводящая жила. D verzinnter Leiter. E conductor estañado. I conduttore stagnato. N vertinde kern; vertinde geleider. P żyła przewodząca cynowana. S förtent ledare. (461)
73. **tinsel conductor** : a conductor comprising one or more elements stranded together, each element consisting of one or more thin metal tapes helically wound and supported by a textile thread. ★ fil rosette → *fil 22.* R мишуирная токопроводящая жила. D Lahnleiter. E conductor oropel. I conduttore in similrame. N koperbandgeleider. P żyła przewodząca szychowa. S spinsledare. (461)

conduit

1. **conduit adaptor** : → *adaptor 4*
2. **conduit conductor rail** : → *rail 7*

cone

1. **compression cone** : a device used in diagnostic radiology and radiotherapy to exert pressure upon the surface of the body, to immobilize the surface and/or compress the underlying tissues. ★ cône de compression → *cône 3.* R конус сжатия. D Kompressionstubus. E cono de compresión. I cono compressore. N compressieconus; compressor. P stożek uciskowy. S kompressionstub. (881)
2. **cone** : that part of the envelope, usually in the form of a truncated cone which lies between the neck and the face-plate. ★ cône → *cône 1.* R конус. D Konus. E cono. I cono. N conus. P stożek (lampy). S kon. (531)
3. **cone loudspeaker** : → *loudspeaker 2*
4. **cones** : photoreceptors in the retina containing light-sensitive pigments capable of initiating the process of photopic vision. ★ cônes → *cône 5.* R колбочки. D Zapfen. E conos. I coni. N kegeltjes. P czopki. S tappar. (845)

conference

1. **broadcast conference call** : → *call 5*
2. **conference amplifier** : → *amplifier 9*
3. **conference call** : → *call 32*
4. **restricted conference call** : → *call 51*

configuration

1. **composite configuration** (*Syn.* hybrid configuration) : → *configuration 9*
2. **conductor configuration** : the geometrical arrangement of the phase conductors in relation to the support. ★ armement → *armement 1.* R расположение проводов. D Leiteranordnung. E configuración. I disposizione dei conduttori. N configuratie van de geleiders. P układ przewodów (na słupie). S fas(ledar)placering. (466)
3. **configuration control** : → *control 38*
4. **configuration factor** : → *factor 25*
5. **delta configuration** : a configuration in which the phase conductors of a circuit are located at the apexes of an isosceles triangle whose base is not necessarily horizontal. ★ armement en delta → *armement 2.* R ..... D Delta-Anordnung. E configuración delta. I disposizione a delta. N deltaconfiguratie. P układ trójkąta równoramiennego. S ..... (466)
6. **double circuit semi-vertical configuration** : a variation of the double circuit vertical configuration in which the centre phases are horizontally offset. ★ armement en tonneau → *armement 7.* R двухцепное смешанное расположение. D Tonnenanordnung einer Doppelleitung. E configuración exágono. I disposizione semi-verticale doppia terna. N tonconfiguratie. P układ dwutorowy niby-pionowy. S ..... (466)
7. **double circuit vertical configuration** : a configuration in which each of the two circuits, in vertical formation, is located on either side of the support. ★ armement en double drapeau → *armement 3.* R двухцепное вертикальное расположение. D vertikale Anordnung einer Doppelleitung. E configuración vertical doble circuito. I disposizione verticale - doppia terna. N verticale configuratie met 2 circuits. P układ dwutorowy pionowy. S dubbel vertikal fasplacering. (466)
8. **horizontal configuration** : a configuration in which all the phase conductors on a support are in the same horizontal plane. ★ armement en nappe horizontale → *armement 5.* R горизонтальное расположение. D horizontale Anordnung; Einebenenanordnung. E configuración en capa. I disposizione orizzontale. N horizontale configuratie. P układ poziomy. S horisontell fasplacering. (466)
9. **hybrid configuration** (in telecontrol) (*Syn.* composite configuration (in telecontrol)) : a combination of several telecontrol configurations, such as multipoint-star and multipoint-partyline configurations. ★ réseau (de téléconduite) hybride → *réseau de téléconduite 6.* R радиально-цепочечная структура (в телемеханике); смешанная структура (в телемеханике). D Misch-Konfiguration; zusammengesetzte Konfiguration. E configuración híbrida (en telecontrol); configuración compuesta (en telecontrol). I configurazione mista. N samengestelde configuratie. P układ hybrydowy. S hybridnät. (371)
10. **multiple point-to-point configuration** : a configuration whereby the control centre or master station is connected to more than one outstation in such a way that simultaneous data exchange is possible between the master station and every outstation. ★ réseau (de téléconduite) en étoile → *réseau de téléconduite 4.* R радиальная структура «один-один». D mehrfach End-End-Konfiguration. E configuración en

estrella; configuración radial. I configurazione punto a punto multiplo. N sterconfiguratie. P układ gwiazdowy wybierczy i konferencyjny. S mångpunkts direktnät. (371)

11. **multipoint-partyline configuration** : a telecontrol configuration whereby the control centre or master station is connected to more than one outstation by a common link in such a way that at any time only one outstation may transmit data to the master station; the master station may transmit data either to one or more selected outstations or global messages to all outstations simultaneously. ★ réseau (de téléconduite) en ligne partagée → *réseau de téléconduite 5.* R цепочечная структура. D Linien-Konfiguration. E configuración en línea compartida. I configurazione multipunto. N gedeelde-lijnconfiguratie. P układ wielopunktowy otwarty. S delad-linje; «multidrop». (371)
12. **multipoint-ring configuration** : a telecontrol configuration whereby the communication link among all stations forms a ring; the control centre or master station may communicate with each outstation using two different routes. ★ réseau (de téléconduite) en boucle → *réseau de téléconduite 3.* R многоточечная кольцевая структура. D Ring-Konfiguration. E configuración en bucle. I configurazione ad anello. N ringconfiguratie. P układ wielopunktowy zamknięty. S slingnät. (371)
13. **multipoint-star configuration** : a telecontrol configuration whereby the control centre or master station is connected to more than one outstation in such a way that at any time only one outstation may transmit data to the master station; the master station may transmit data either to one or more selected outstations or global messages to all outstations simultaneously. ★ réseau (de téléconduite) multipoint → *réseau de téléconduite 7.* R многоточечная радиальная структура; радиальная структура «один-n». D Stern-Konfiguration. E configuración multipunto. I configurazione a stella. N meervoudige sterconfiguratie. P układ gwiazdowy wybierczy i rozsiewczy. S stjärnnät. (371)
14. **omnibus configuration** : a telecontrol configuration in which any one of several stations may communicate with any other. ★ réseau (de téléconduite) omnibus → *réseau de téléconduite 8.* R структура «каждый с каждым». D Omnibus-Konfiguration. E configuración ómnibus. I configurazione omnibus. N omnibusconfiguratie. P układ o wzajemnej dostępności; układ «omnibusowy». S bussystem. (371)
15. **point-to-point configuration** : a telecontrol configuration whereby one station is connected to another station by a dedicated transmission link. ★ réseau (de téléconduite) point à point → *réseau de téléconduite 9.* R соединение пункт-пункт. D End-End-Konfiguration. E configuración punto a punto. I configurazione punto a punto. N punt-tot-punt-configuratie. P układ (stacji) dwupunktowy. S punkt-till-punktförbindelse. (371)
16. **semi-horizontal configuration** : a variation of the horizontal configuration in which the centre phase is at a slightly higher or lower level than the outer phases. ★ armement en nappe voûte → *armement 6.* R горизонтальное расположение с приподнятой или опущенной средней фазой. D semi-horizontale Anordnung. E configuración en capa boveda. I disposizione semi-orizzontale. N nagenoeg horizontale configuratie. P układ niby-poziomy. S ..... (466)
17. **semi-vertical configuration** : a variation of the vertical configuration in which the centre phase is horizontally offset. ★ armement semi-vertical → *armement 9.* R смешанное расположение. D Tonnenanordnung. E configuración semi-vertical. I disposizione semi-verticale. N nagenoeg verticale configuratie. P układ niby-pionowy. S blandad uppläggning. (466)
18. **system configuration** : a permanent or temporary grouping of similar or dissimilar individual system patterns. ★ configuration d'un réseau → *configuration 3.* R конфигурация электрической сети. D Netzkonfiguration. E configuración de una red. I configurazione di una rete. N netconfiguratie. P układ sieci. S systemkonfiguration. (601)
19. **telecontrol configuration** : the combination of telecontrol stations and transmission links by which these stations are connected. ★ réseau de téléconduite → *réseau de téléconduite 2.* R структура телемеханической сети. D Fernwirkkonfiguration. E configuración de la red de telecontrol. I configurazione del sistema di telecontrollo. N afstandsbesturingconfiguratie. P układ sieci (sterowania zdalnego). S fjärrstyrningsnät. (371)
20. **track configuration** : the location and dimensions of recorded magnetic tracks on the recording medium. ★ répartition des pistes → *répartition 20.* R формат сигналограммы (фонограммы, видеограммы). D Spuranordnung; Spurlage. E configuración de las pistas. I ripartizione delle piste. N spoorligging. P konfiguracja ścieżek. S spårmönster. (806)
21. **triangular configuration** : a configuration in which the phase conductors of a circuit are located at the apexes of a triangle whose base is not necessarily horizontal. ★ armement en triangle → *armement 8.* R треугольное расположение. D Dreiecksanordnung. E configuración en triángulo. I disposizione a triangolo. N driehoekige configuratie. P układ trójkątowy. S triangulär fasplacering. (466)
22. **vertical configuration** : a configuration in which the phase conductors of a circuit are located virtually in the same vertical plane. ★ armement en drapeau → *armement 4.* R вертикальное расположение. D vertikale Anordnung. E configuración vertical; configuración en bandera. I disposizione verticale. N verticale configuratie. P układ pionowy. S vertikal fasplacering. (466)

confirmation

1. **confirmation of clearing signal** : return switching signal which indicates that the clearing signal has been executed. ★ signal de confirmation de libération → *signal 99.* R сигнал "подтверждение отбоя". D Auslösebestätigung. E señal de confirmación de liberación. I segnale di controllo dello svincolo. N vrijgavebevestigingssignaal. P sygnał potwierdzenia rozłączenia. S nedkopplingsbekräftelse. (721)
2. **delivery confirmation** : a user facility which will provide information to the sending data terminal equipment that a given packet has been delivered to the nominated address(es). ★ confirmation de remise → *confirmation 1.* R подтверждение доставки. D Zustellungsbestätigung. E confirmación de envío. I conferma di ricezione. N afleverbevestiging. P potwierdzenie przekazania. S leveransbekräftelse. (721)

conformal

1. **conformal antenna** : → *antenna 33*
2. **conformal array** : → *array 8*

conformity

1. **conformity** (of a teletext system) : the property of a teletext system whereby it provides an image which conforms to the original ; in particular the presence of all characters, the absence of erroneous or displaced characters, and the correct paging. ★ conformité → *conformité 1.* R ..... (723)

congestion

1. **call congestion** : the proportion of bids for a particular pool of resources will does not result in an immediate seizure estimated within a specified time interval by the ratio of unsuccesful bids to the total number of bids. *Note.* — The call congestion may be also called "probability of loss". ★ encombrement d'appel → *encombrement 2.* D Rufblockierrungswahrscheinlichkeit. P natłok zgłoszeń. (715)
2. **congestion** (*Syn.* blocking) : → *blocking 2*
3. **congestion signal** : → *signal 60*
4. **congestion tone** : → *tone 11*
5. **time congestion** : the probability that a particular pool of resources does not contain any free resource, estimated within a specified time interval by the proportion of time during which these resources are fully occupied. ★ congestion temporelle → *congestion 2.* D Zeitblockierungswahrscheinlichkeit. P czas natłoku. (715)

conical

1. **conical array** : → *array 9*
2. **conical horn** : → *horn 5*
3. **conical rotor machine** : → *machine 6*

conjugate

1. **conjugate impedances** : → *impedance 13*
2. **conjugate selecting** : → *selecting 2*
3. **harmonic conjugate signal** (*Syn.* quadrature signal) : → *signal 151*

connect

1. **connect when free** (*Syn.* camp-on) : → *camp-on 1*
2. **(to) connect** : to join conductors so that they are in electrical contact with one another. ★ connecter → *connecter 1.* R соединять. D verbinden; anschließen. E conectar. I collegare. N verbinden. P łączyć. S förbinda. (151)

connected

1. **associated electrical apparatus** : → *apparatus 3*
2. **connected load** : → *load 5*
3. **connected network** : → *network 16*
4. **connected position** (*Syn.* service position) : → *position 32*
5. **link connected switching stage** : → *stage 2*
6. **series connected starting-motor starting** : → *starting 16*

connection

1. **anti-parallel connection** : a combination of two valves, where each cathode is connected to the anode of the other valve, used to control both half waves of an alternating current. ★ montage antiparallèle → *montage 12.* R встречно-параллельная схема соединения. D Gegenparallelschaltung. E montaje antiparalelo. I connessione in antiparallelo. N antiparallelle verbinding. P połączenie równoległe przeciwsobne. S antiparallell koppling. (814)
2. **arc furnace delta connection** : a method of connecting in delta configuration the phases of the low voltage windings of a three-phase arc furnace transformer to provide a three line supply to the electrodes. ★ couplage en triangle d'un four à arc → *couplage 18.* R соединение треугольником в схеме питания дуговой печи. D Lichtbogenofen-Dreieckverbindung. E conexión en triángulo de un horno de arco. I connessione a triangolo di un forno ad arco. N boogoven in driehoekschakeling. P połączenie w trójkąt (pieca łukowego). S deltakoppling i ljusbågsugn. (841)
3. **arc furnace low reactance connection** : a system of heavy current conductors arranged to provide minimum reactance and optimum balance between phases of the furnace circuit. ★ montage à faible réactance d'un four à arc → *montage 10.* R соединение с низким реактивным сопротивлением в дуговой печи. D Lichtbogenofen-Niederreaktanz-Verbindung. E conexión de baja reactancia de un horno de arco. I connessione a bassa reattanza di un forno ad arco. N lagerreactantieaansluiting voor boogoven. P połączenie pieca łukowego małoreaktancyjne. S ..... (841)
4. **automatic sequential connection** : a facility provided by a public data service to connect automatically, in a predetermined sequence, the data terminal equipments at each of a set of specified addresses to a single data terminal equipment at a specified address. ★ connexion automatique séquentielle → *connexion 13.* R автоматическое поочередное соединение. D automatische Verbindungsfolge. E conexión automática secuencial. I connessione automatica sequenziale. N automatisch seriegesprek. P automatyczne sekwencjowanie połączeń. S automatisk sekvensanslutning. (721)
5. **basic convertor connection** : the electrical arrangement of principal arms in a convertor. ★ montage de base d'un convertisseur → *montage 18.* R основная схема преобразователя. D Stromrichter-Grundschaltung. E montaje básico de un convertidor. I connessione di base di un convertitore. N omzetterbasisschakeling. P układ przekształtnika podstawowy. S grundkoppling hos strömriktare. (551)
6. **basic switch connection** : the electrical arrangement of principal arms in an electronic switch. ★ montage de base d'un contacteur → *montage 17.* R основная схема коммутационного аппарата. D Schalter-Grundschaltung. E montaje básico de un contactor. I connessione di base di un contattore. N schakelaarbasisschakeling. P układ łącznika podstawowy. S grundkoppling hos elkopplare. (551)
7. **boost and buck connection** : a series connection in which the convertor connections are controlled independently. ★ montage survolteur-dévolteur → *montage 39.* R вольтодобавочное и вольтовычитающее соединения. D Zu- und Gegenschaltung. E montaje elevador-reductor. I connessione a survoltore-devoltore. N mee- en tegenschakeling. P układ dodawczy. S boosterkoppling. (551)
8. **bound connection** : an electrical connection between a wire and a sharp-cornered post in which the wire is laid parallel to the length of the post and adjacent to its wider face. The wire is secured to the post by tightly wrapping several turns of a separated solid wire around the post and the wire to be secured. Each turn of the wrapping wire contacts the bound producing deformation in it and locks on at least two corners of the post. ★ connexion liée → *connexion 26.* R соединение бандажированное. D gebundene Verbindung. E conexión enlazada. I connessione legata. N indirecte draadwikkelverbinding. P połączenie (elektryczne) owiązane. S najförbindning. (581)
9. **bound twin-post connection** : a hybrid type of connection formed when two rectangular sharp-cornered posts are positioned with their wider faces in contact and secured by tightly wrapping several turns of solid wire around them. ★ connexion liée de deux bornes → *connexion 27.* R соединение двух выводов бандажированное. D gebundene Zwillingsstift-Verbindung. E conexión enlazada de dos bornes. I connessione legata a due terminali. N tweepens-draadwikkelverbinding. P połączenie (elektryczne) owiązane dwukońcówkowe. S tvåstifts najförbindning. (581)
10. **bridge connection** ; a double-way connection of pairs of arms the centre terminals of which are the a.c. terminals and the outer terminals of like polarity connected together are the d.c. terminals. ★ montage en pont → *montage 22.* R мостовая схема. D Brückenschaltung. E montaje en puente. I connessione a ponte. N brugschakeling. P układ mostkowy. S bryggkoppling. (551)
11. **capital contribution to connection costs** : → *contribution 1*
12. **circuit switched connection** : a temporary connection that is established on request between two or more data stations in order to allow the exclusive use of that connection until it is released. ★ liaison commutée → *liaison 10.* R соединение с коммутацией каналов; коммутируемое соединение. D Durchschalteverbindung; leitungsvermittelte Verbindung. E conexión conmutada. I collegamento a commutazione di circuito. N geschakelde verbinding. P połączenie komutowane. S kopplad förbindelse. (721)
13. **clip connection** : a connection made by a clip. ★ connexion par clip → *connexion 28.* R соединение зажимное. D Klammerverbindung. E conexión por clip. I ..... N schuifklemverbinding. P połączenie zatrzaskowe. S klämförbindning. (581)
14. **complete bridge connection** (of an auto self-excited transductor) : a connection of an auto self-excited transductor the self-excitation of which is obtained by inserting the power windings in all the valve arms of a rectifier bridge connection. ★ montage (redresseur) en pont complet → *montage 34.* R полная мостовая схема (магнитного усилителя с самоподмагничиванием). D vollständige Brückenschaltung (eines Transduktors mit direkter Selbsterregung). E montaje en puente completo (de un transductor de autoexcitación directa). I montaggio come raddrizzatore a ponte completo (di un trasduttore con autosaturazione). N volledige brugschakeling (van een spaartransductor met zelfbekrachtiging). P układ transduktora pełnomostkowy. S fullbryggekoppling (sparsjälvmagnetiserad transduktor i). (431)
15. **(complete) connection** : a connection between users' terminals. ★ chaîne de connexion complète → *chaîne 5.* R (полное) соединение. D (vollständige) Verbindung. E cadena de conexión completa; (camino de) comunicación. I collegamento completo. N (volledige) verbinding. P zestaw łączy kompletny. S fullbordad förbindelsekedja. (701,714,721,722)
16. **connection** : a mode of connecting conductors or devices. *Examples :* series, parallel, delta, star connection. ★ couplage → *couplage 11.* R соединение. D Schaltung. E acoplamiento. I collegamento. N schakeling. P połączenie. S koppling(sart). (151)
17. **connection** : a physical interface between conductors and/or contacts to provide an electrical path. ★ connexion → *connexion 12.* R соединение (электрическое). D Verbindung. E conexión. I connessione. N verbinding. P połączenie (elektryczne). S förbindning. (151,581)
18. **connection** : a temporary association of transmission channels or telecommunication circuits, switching and other functional units set up to provide for the transfer of information between two or more points in a telecommunication network. *Note.* — A connection is the result of a switching operation. ★ chaîne de

connexion → *chaîne 4.* R соединение. D Verbindung. E cadena de conexión. I catena delle connessioni di un collegamento. N (geschakelde) verbinding. P zestaw łączy. S förbindelse. (701,714,715,721,722)

19. **connection charge** : → *charge 20*
20. **connection line** : → *line 14*
21. **connection retainability** : → *retainability 1*
22. **connection symbol** : → *symbol 1*
23. **convertor connection** : the electrical arrangement of arms and other components important for the function of the main power circuit of a convertor. ★ montage convertisseur → *montage 16.* R схема преобразователя. D Stromrichterschaltung. E montaje convertidor. I connessione di un convertitore. N omzetterschakeling. P układ przekształtnika. S strömriktarkoppling. (551)
24. **crimp connection** : a connection made by crimping. ★ connexion sertie → *connexion 33.* R соединение обжимное. D Crimpverbindung. E conexión engastada. I connessione crimpata. N felsverbinding. P połączenie (elektryczne) zagniatane. S pressförbindning. (581)
25. **delta connection** : the winding connection so arranged that the phase windings of a three-phase transformer or reactor, or the windings for the same rated voltage of single-phase transformers or reactors associated in a three-phase bank, are connected in series to form a closed circuit. ★ connexion triangle → *connexion 37.* R соединение треугольником. D Dreieckschaltung. E conexión en triángulo. I collegamento a triangolo. N driehoekschakeling. P połączenie w trójkąt. S D-koppling. (421)
26. **double-way connection** (of a convertor) : a convertor connection such that the current through each of the phase terminals of the a.c. circuit is bidirectional. ★ montage à double voie → *montage 8.* R двухпутевая схема (преобразователя). D Zweiwegschaltung (eines Stromrichters). E montaje de doble vía (de un convertidor). I connessione a doppia via. N tweewegschakeling (van een omzetter). P układ (przekształtnika) dwukierunkowy. S tvåvägskoppling. (551,811)
27. **fully controllable connection** : a connection with both controllable and non controllable principal arms. ★ montage totalement commandé → *montage 40.* R симметричная управляемая схема. D vollgesteuerte Schaltung. E montaje totalmente controlable. I connessione completamente comandata. N volledig stuurbare schakeling. P układ pełnosterowany. S fullstyrd koppling. (551)
28. **half-controllable connection** : a uniform connection with all principal arms controllable. ★ montage semi-commandé → *montage 37.* R полууправляемая схема. D halbgesteuerte Schaltung. E montaje semicontrolable. I connessione semicomandata. N halfstuurbare schakeling. P układ półsterowany. S halvstyrd koppling. (551)
29. **hypothetical reference connection** (in telegraphy) : hypothetical connection made up for two terminals in the world telex network or other telegraph network corresponding in principle to the most demanding case in order to study the transmission and switching characteristics necessary to ensure satisfactory operation. ★ communication fictive de référence → *communication 10.* R условное эталонное соединение (в телеграфии). D hypothetische Bezugsverbindung (in der Telegrafie). E comunicación ficticia de referencia. I collegamento fittizio di riferimento. N hypothetische referentieverbinding (bij telegrafie). P hipotetyczne łącze odniesienia. S hypotetisk referensförbindelse. (721)
30. **hypothetical reference connection** (for telephony) : an imaginary complete connection, specified by the CCITT and serving as a model for studying transmission performance impairments caused by telephone circuits and switching entities. ★ communication fictive de référence → *communication 11.* R условное эталонное соединение (в телефонии). D hypothetische Bezugsverbindung. E comunicación ficticia de referencia (para telefonía). I collegamento fittizio di riferimento. N hypothetische referentieverbinding. P sztuczne łącze odniesienia (w telefonii). S hypotetisk referensförbindelse. (722)
31. **incomplete bridge connection** (of an auto self-excited transductor) : a connection of an auto self-excited transductor the self-excitation of which is obtained by inserting the power windings in half the valve arms of a rectifier bridge connection. ★ montage (redresseur) en pont ouvert → *montage 35.* R неполная мостовая схема (магнитного усилителя с самоподмагничиванием). D unvollständige Brückenschaltung (eines Transduktors mit direkter Selbsterregung). E montaje en puente incompleto (de un transductor de autoexcitación directa). I montaggio come raddrizzatore a ponte aperto (di un trasduttore con auto-saturazione). N open brugschakeling. P układ transduktora niepełnomostkowy. S ofullständig bryggkoppling (sparsjälvmagnetiserad transduktor i). (431)
32. **Leblanc connection** : a method of connecting the windings of a three-phase transformer for the transformation of three-phase voltages to two-phase voltages or vice versa. ★ montage Leblanc → *montage 28.* R схема Леблана. D Leblanc-Schaltung. E montaje Leblanc. I collegamento Leblanc. N leblancschakeling. P układ Leblanca. S Leblanc-koppling. (421)
33. **line connection** (*Syn.* supply service) : → *service 47*
34. **motor connection box** : → *box 10*
35. **multiple connection** (of commutating groups) : a connection in which two or more identical commutating groups which do not commutate simultaneously are connected in such a way that their direct currents add. ★ montage multiple → *montage 31.* R параллельная схема соединения (коммутирующих групп). D indirekte Parallelschaltung (von Kommutierungsgruppen). E montaje múltiple (de grupos conmutadores). I connessione multipla (di gruppi commutanti). N meervoudige schakeling (van commutatie groepen). P układ wielokrotny (grup komutacyjnych). S flergruppskoppling. (551)
36. **multipoint connection** : a data link established between three or more data stations. ★ liaison multipoint → *liaison 22.* R многоточечное соединение. D Mehrpunktverbindung. E conexión multipunto. I connessione punto multipunto. N meerpuntverbinding. P połączenie wielopunktowe. S flerpunktsförbindelse. (721)
37. **neutral point connection** : the means of electrical connection of the neutral point to earth. ★ régime du neutre → *régime 22.* R режим нейтрали. D Sternpunktbehandlung. E conexión del neutro. I regime del neutro. N sterpuntsschakeling. P sposób przyłączenia punktu zerowego. S nollpunktsjordning. (601)
38. **non-controllable connection** : a connection with all principal arms identical. ★ montage non commandé → *montage 32.* R неуправляемая схема. D ungesteuerte Schaltung. E montaje no controlable. I connessione non comandata. N niet stuurbare schakeling. P układ niesterowany. S ostyrd koppling. (551)
39. **non-uniform connection** : a uniform connection with all principal arms non controllable. ★ montage mixte → *montage 30.* R несимметричная(неоднородная) схема. D teilgesteuerte Schaltung. E montaje no uniforme. I connessione mista (non omogenea). N heterogene schakeling. P układ niejednorodny. S blandad koppling. (551)
40. **open-delta connection** : the winding connection in which the phase windings of a three-phase transformer, or the windings for the same rated voltage of single-phase transformers associated in a three-phase bank, are connected in series without closing one corner of the delta. ★ connexion en triangle ouvert → *connexion 18.* R соединение открытым треугольником. D offene Dreieckschaltung. E conexión en triángulo abierto. I collegamento a triangolo aperto. N open driehoekschakeling. P połączenie w otwarty trójkąt. S öppen D-koppling; öppet delta. (421)
41. **parallel connection** : the connection of devices so that the same voltage is applied to all of them. ★ couplage (en) parallèle → *couplage 16.* R параллельное соединение. D Parallelschaltung. E acoplamiento (en) paralelo. I collegamento (in) parallelo. N parallelschakeling. P połączenie równoległe. S parallellkoppling. (151)
42. **point-to-point connection** : a data link established between only two data stations. ★ liaison point à point → *liaison 27.* R двухточечное соединение. D Punkt-zu-Punkt-Verbindung. E conexión punto a punto. I connessione punto a punto. N punt-tot-punt-verbinding. P połączenie dwupunktowe. S tvåpunktsförbindelse. (721)
43. **polygon connection** : a connection in which the phases form a closed polygon of *m* sides, the order of sequence of the sides being the order of sequence of the phases. ★ connexion en polygone → *connexion 17.* R соединение в многоугольник. D Polygonschaltung. E conexión en polígono. I connessione a poligono. N veelhoekschakeling. P połączenie wielokątowe; połączenie wielobokowe. S polygonkoppling. (131)

44. **post-insulated connection** : a connection which is insulated after it has been completed. ★ connexion post-isolée → *connexion 30.* R соединение с последующей изоляцией. D nachträglich isolierte Verbindung. E conexión postaislada. I connessione post-isolata. N nageïsoleerde verbinding. P połączenie (elektryczne) izolowane (po wykonaniu). S efterisolerad förbindning. (581)
45. **pre-insulated connection** : a connection formed with an insulated terminal end or insulated cable splice by crimping through the insulation. ★ connexion pré-isolée → *connexion 31.* R соединение с предварительной изоляцией. D vorisolierte Verbindung. E conexión preaislada. I connessione pre-isolata. N voorgeïsoleerde verbinding. P połączenie (elektryczne) skrośne izolacji. S förisolerad förbindning. (581)
46. **rectifier connection** (of an auto self-excited transductor) : a connection of an auto self-excited transductor the self-excitation of which is obtained by connecting the power winding of each transductor element in series with a valve arm of a rectifier connection. ★ montage redresseur → *montage 33.* R выпрямительная схема (магнитного усилителя с самоподмагничиванием). D Gleichrichterschaltung (eines Transduktors mit direkter Selbsterregung). E montaje rectificador (de un transductor de autoexcitación directa). I montaggio come raddrizzatore (di un trasduttore con autosaturazione). N gelijkrichterschakeling (voor een spaartransductor met zelfbekrachtiging). P układ transduktora prostowniczy. S likriktarkoppling (sparsjälvmagnetiserad transduktor i). (431)
47. **Scott connection** : a method of interconnecting the windings of two single-phase transformers for the transformation of three-phase voltages to two-phase voltages or vice versa. ★ montage Scott → *montage 36.* R схема Скотта. D Scott-Schaltung. E montaje Scott. I collegamento Scott. N scottschakeling. P układ Scotta. S Scott-koppling. (421)
48. **series connection** : the connection of devices so that the same current passes through all of them. ★ couplage (en) série → *couplage 17.* R последовательное соединение. D Reihenschaltung; Serienschaltung. E acoplamiento (en) serie. I collegamento (in) serie. N serieschakeling. P połączenie szeregowe. S seriekoppling. (151)
49. **series connection** (of convertor connections) : a connection in which two or more convertor connections are connected in such a way that their direct voltages add. ★ montage en série → *montage 23.* R последовательная (каскадная) схема. D Reihenschaltung; Kaskadenschaltung (von Stromrichterschaltungen). E montaje en serie (de montaje de convertidores). I connessione in serie (di connessioni di convertitori). N serieschakeling (van commutatiegroepen); cascadeschakeling (van omzetterschakeling). P układ szeregowy (układów przekształtnika). S seriekoppling; kaskadkoppling. (551)
50. **service connection impedance** : → *impedance 51*
51. **serving connection exchange** : → *exchange 23*
52. **single-way connection** (of a convertor) : a convertor connection such that the current through each of the phase terminals of the a.c. circuit is unidirectional. ★ montage à simple voie → *montage 11.* R однопутевая (нулевая) схема (преобразователя). D Einwegschaltung (eines Stromrichters). E montaje de una vía (de un convertidor). I connessione a una sola via. N eenwegschakeling (van een omzetter). P układ (przekształtnika) jednokierunkowy. S envägskoppling. (551,811)
53. **solder connection** : a connection made by soldering. ★ connexion soudée → *connexion 34.* R соединение паяное. D Lötverbindung. E conexión soldada. I connessione saldata. N soldeerverbinding. P połączenie (elektryczne) lutownicze. S lödförbindning. (581)
54. **solderless connection** : a connection achieved by mechanical means. ★ connexion sans soudure → *connexion 32.* R соединение непаянное. D lötfreie Verbindung. E conexión sin soldadura. I connessione senza saldatura. N soldeervrije verbinding. P połączenie (elektryczne) nielutownicze. S lödfri förbindning. (581)
55. **star connection** : a connection in which all phases have a common node. ★ connexion en étoile → *connexion 16.* R соединение в звезду. D Sternschaltung. E conexión en estrella. I connessione a stella. N sterschakeling. P połączenie gwiazdowe. S stjärnkoppling. (131)
56. **star connection** (*Syn.* Y connection (USA); wye connection (USA)) : the winding connection so arranged that one end of each of the phase windings of a polyphase transformer or reactor, or of each of the windings for the same rated voltage of single-phase transformers or reactors associated in a polyphase bank, is connected to a common point, i.e. the neutral point, and the other end to its appropriate line terminal. ★ connexion étoile → *connexion 23.* R соединение в звезду. D Sternschaltung. E conexión en estrella. I collegamento a stelle. N sterschakeling. P połączenie w gwiazdę. S Y-koppling. (421)
57. **switch connection** : the electrical arrangement of arms in an electronic switch. ★ montage contacteur → *montage 15.* R схема коммутационного аппарата. D Schalter-Schaltung. E montaje contactor. I connessione di un contattore. N schakelaarschakeling. P układ łącznika. S elkopplarkoppling. (551)
58. **terminal connection method** : → *method 25*
59. **through-group connection point** : → *point 49*
60. **uniform connection** ★ montage homogène → *montage 27.* R симметричная (однородная) схема. D einheitliche Schaltung. E montaje uniforme. I connessione omogenea. N homogene schakeling. P układ jednorodny. S ren koppling. (551)
61. **welded connection** : a connection made by welding. ★ connexion par soudage → *connexion 29.* R соединение сварное. D Schweißverbindung. E conexión por soldadura. I connessione saldata. N gelaste verbinding. P połączenie (elektryczne) zgrzewane. S svetsförbindning. (581)
62. **welding output connections** : the output connections on the power source to which the welding cables are connected. ★ bornes du circuit de soudage → *borne 27.* R сварочные выходные зажимы. D Schweißleitungsanschluß. E bornes del circuito de soldadura. I collegamenti del circuito di saldatura. N lasklemmen. P zaciski obwodu spawalniczego. S svetsuttag. (851)
63. **wrapped connection** : a connection achieved by wrapping a solid conductor around a post. ★ connexion enroulée → *connexion 20.* R соединение навивное. D Wickelverbindung. E conexión enrollada. I connessione avvolta. N draadwikkelverbinding. P połączenie (elektryczne) okrętne. S virförbindning. (581)
64. **wye connection** (*Syn.* star connection) : → *connection 56*
65. **Y connection** (*Syn.* star connection) : → *connection 56*
66. **zigzag connection** : the winding connection in which one end of each phase winding of a polyphase transformer or reactor is connected to a common point, i.e. the neutral point, and each phase winding consists of two parts in which phase-displaced voltages are induced. *Note.* — These two parts normally have the same number of turns. ★ connexion en zigzag → *connexion 19.* R соединение зигзагом. D Zickzackschaltung. E conexión en zig-zag. I collegamento a zigzag. N zigzagschakeling. P połączenie w zygzak. S Z-koppling. (421)

connector

1. **board-mounted connector** : a connector suitable for being permanently attached to a printed board. ★ connecteur enfichable de type A → *connecteur 22.* R соединитель печатной платы. D Steckverbinder für Leiterplattenmontage. E conector enchufable «tipo A». I connettore su circuito stampato. N connector voor montage op gedrukte schakeling. P łącznik (złącza) płytki drukowanej. S kortmonterat anslutningsdon. (581)
2. **break-away connector** (*Syn.* snatch-disconnect connector) : → *connector 47*
3. **butting connector** : a connector in which connection is achieved between non-penetrating contacts and maintained by axial pressure. ★ connecteur abouté → *connecteur 14.* R соединитель стыковой. D Stirnkontakt-Steckverbinder. E conector de presión. I connettore frontale. N connector met drukcontacten. P łącznik (złącza) czołowodociskowy. S tryckanslutningsdon. (581)
4. **circular connector** : a connector which is basically cylindrical and has a mating face with a basically circular periphery. ★ connecteur circulaire → *connecteur 17.* R соединитель цилиндрический. D Rundsteckverbinder. E conector circular. I connettore circolare. N cilindrische connector. P łącznik (złącza) kołowy. S runt anslutningsdon. (581)
5. **compatible connectors** : two connectors are compatible, when they are intermountable, intermatable and of identical performance. ★ connecteurs interconnectables

→ *connecteur 42.* R соединители совместимые. D kompatibler Steckverbinder. E conectores compatibles. I connettori; connettori compatibili. N compatibele connectors. P łączniki kompatybilne. S kompatibilitet (hos don). (581)

6. **connector** : a component which terminates conductors for the purpose of providing connection and disconnection to a suitable mating component. ★ connecteur → *connecteur 3.* R соединитель. D Steckverbinder. E conector. I connettore. N connector. P łącznik (złącza); półzłącze. S (elektriskt) anslutningsdon. (581)
7. **connector** : a fitting providing mechanical connection between two electrical conductors. ★ pièce de jonction → *pièce 6.* R соединительный зажим. D Verbindungsklemme. E conector. I dispositivo di collegamento. N verbindingsklem. P złącze (przewodu). S kontakthylsa. (811)
8. **connector adaptor** : → *adaptor 5*
9. **connector body** : a connector less its contacts. ★ corps d'un connecteur → *corps 5.* R основа соединителя. D Steckverbinderkörper. E cuerpo de un conector. I corpo del connettore. N connectorlichaam. P korpus łącznika. S donkropp. (581)
10. **connector front** : the side of a connector which is the mating face. ★ face avant d'un connecteur → *face 10.* R лицевая сторона соединителя. D Steckverbinder-Vorderseite. E cara frontal de un conector. I fronte di un connettore. N connectorvoorzijde. P czoło łącznika (złącza). S anslutningsdons framsida. (581)
11. **connector housing** : → *housing 3*
12. **connector insert** : → *insert 2*
13. **connector interface** : → *interface 2*
14. **connector mated set** : a particular combination of mating connectors. ★ jeu de connecteurs accouplés → *jeu 1.* R комплект сочленяемых соединителей. D Steckverbindersatz. E juego de conectores acoplados. I paio di connettori accoppiati; serie di connettori accoppiati. N stel. P złącze. S hopkopplat donpar. (581)
15. **connector rear** : the wiring side of a connector. ★ face arrière d'un connecteur → *face 9.* R монтажная сторона соединителя. D Steckverbinder-Rückseite. E cara posterior de un conector. I retro di un connettore. N connectorachterzijde. P tył łącznika (złącza). S anslutningsdons baksida. (581)
16. **connector shield** : → *shield 4*
17. **connector style** : a particular connector within a type. *Example :* rectangular, flange-mounting. ★ modèle de connecteur → *modèle 8.* R типоконструкция соединителя. D Steckverbinder-Bauform. E modelo de conector. I modello di connettore. N connectormodel. P wykonanie. S anslutningsdonsslag. (581)
18. **connector type** : → *type 9*
19. **connector variant** : variation within a connector type and style or within a group of related connectors. *Example :* number of contacts, polarization, terminations, etc. ★ variante de connecteur → *variante 1.* R типономинал соединителя. D Steckverbinder-Ausführung. E variante de conector. I variante di connecttore. N connectorvariant. P odmiana. S anslutningsdonsvariant. (581)
20. **earth circuit connector** : a device which is designed to connect together the different parts of an earthing system within a substation. This device sometimes includes a component which is intended to connect the earthing for work. ★ raccord de circuit de terre → *raccord 5.* R заземляющий проводник. D Potentialausgleichsschiene. E conector de circuitos de tierra. I raccordo dei circuiti di terra. N aarder. P łącznik obwodu uziemiającego; zacisk uziomowy. S jordningsdon. (605)
21. **earthing connector** : a connector designed to provide a low resistance connection to earth. ★ connecteur à masse connectée → *connecteur 13.* R соединитель заземляемый. D Erdungssteckverbinder. E conector de masa. I connettore di massa. N aardingsconnector. P łącznik (złącza) uziomowy. S jordanslutningsdon. (581)
22. **edge-socket connector** : a connector into which the edge of a printed board is inserted to make contact directly to edge-board contacts. ★ connecteur encartable → *connecteur 21.* R соединитель краевой. D Steckverbinder für direktes Stecken. E conector de tarjeta. I connettore per circuito stampato. N randcontacten. P łącznik (złącza) krawędziowy. S kantanslutningsdon. (581)
23. **environment resistant connector** : a connector provided with means for protection against moisture, temperature or contaminants. ★ connecteur résistant à l'environnement → *connecteur 35.* R соединитель, устойчивый к воздействию окружающей среды. D umweltbeständiger Steckverbinder. E conector resistente al ambiente. I connettore resistente alla contaminazione. N connector bestand tegen specifieke omgevingsomstandigheden. P łącznik (złącza) środowiskowoodporny. S miljötåligt anslutningsdon. (581)
24. **fireproof connector** : a connector capable of withstanding flame of a specified temperature for a specified time. ★ connecteur résistant au feu → *connecteur 36.* R соединитель огнестойкий. D feuerfester Steckverbinder. E conector resistente al fuego. I connettore resistente al fuoco. N vuurvaste connector. P łącznik (złącza) ognioodporny. S brandsäkert anslutningsdon. (581)
25. **fixed connector** : a connector for attachment to a rigid surface. ★ embase → *embase 2.* R соединитель приборный. D fester Steckverbinder. E conector fijo. I connettore fisso (di base). N vaste connector. P łącznik (złącza) aparatowy. S fast anslutningsdon. (581)
26. **float mounting connector** : a fixed connector with mounting means permitting movement to facilitate alignment with the mating connector. ★ connecteur flottant → *connecteur 25.* R соединитель межблочный с «плавающим» монтажом. D schwimmend befestigter Steckverbinder. E conector flotante. I connettore flottante. N zelfzoekende connector. P łącznik (złącza) luźny. S flytande monterat anslutningsdon. (581)
27. **free connector** : a connector for attachment to the free end of a wire or cable. ★ fiche → *fiche 1.* R соединитель кабельный. D freier Steckverbinder. E conector libre. I spina. N snoerconnector; kabelconnector. P łącznik (złącza) przewodowy. S propp. (581)
28. **free coupler connector** : a connector that mates with a free connector in a cable-to-cable application. ★ prolongateur → *prolongateur 1.* R соединитель «кабель-кабель». D freier Kupplungssteckverbinder. E conector acoplador. I prolunga. N connector voor verlengkabel. P ..... S skarvdon. (581)
29. **hermaphroditic connector** : a connector which mates with an identical connector. ★ connecteur hermaphrodite → *connecteur 26.* R соединитель-гибрид. D Zwitter-Steckverbinder. E conector hermafrodita. I connettore ermafrodita. N hermafrodietconnector. P łącznik (złącza) obojętnostykowy. S hermafroditiskt anslutningsdon. (581)
30. **hermetic connector** : a connector having a hermetic seal. ★ connecteur hermétique → *connecteur 27.* R соединитель герметичный. D hermetischer Steckverbinder. E conector hermético. I connettore ermetico. N hermetisch gesloten connector. P łącznik (złącza) hermetyczny. S hermetiskt anslutningsdon. (581)
31. **intercell connector** : a conductor of electricity used for carrying current between cells. ★ connexion entre éléments → *connexion 21.* R межэлементное соединение. D Zellenverbinder. E conector entre elementos. I connessione fra gli elementi. N celverbinder. P łącznik międzyogniwowy. S cellförbindning. (486)
32. **intermateable connectors** : two connectors are intermateable when they are capable of being connected electrically and mechanically but without regard to their performance and intermountability. ★ connecteurs accouplables → *connecteur 39.* R соединители взаимосочленяемые. D zusammensteckbar (Steckverbinder). E conectores acoplables. I connettori appaiabili o accoppiabili. N passende connectoren. P łączniki połączalne. S hopkopplingsbara anslutningsdon. (581)
33. **(lamp) connector** : a device consisting of electrical contacts, with appropriate insulation and mounted on flexible conductors, which provides for connection of the lamp to the electric supply but does not support the lamp. ★ connecteur (de lampe) → *connecteur 19.* R соединитель (лампы). D (Lampen-) Anschlußelement. E conector. I connettore. N aansluitkabel. P łącznik. S lampanslutning. (845)
34. **lanyard disconnect connector** : a quick-disconnect connector designed to separate when a specified force is applied to the coupling device through a lanyard, without damage to the connector. ★ connecteur largable → *connecteur 29.* R соединитель, расчленяемый с помощью шнура. D Steckverbinder mit Kabelzugentriegelung. E conector de desconexión por acollado. I connettore a sblocco. N trekkoordconnector. P łącznik (złącza) odłączany linką.

35. **mother-daughter board (connector)** : a board-mounted connector designed for interconnection of printed boards. ★ connecteur pour carte-mère et carte-fille → *connecteur 32.* R соединитель «плата-плата». D Steckverbinder für Mutter-Tochter-Leiterplatte. E conector de tarjeta madre-hija. I connettore a cartella madre/figlia. N moeder-dochterkaartconnector. P łącznik (złącza) międzypłytkowy. S moder-dotterkortslutningsdon. (581)
36. **optical fibre connector** : an optical fibre component normally attached to a cable or piece of apparatus, for the purpose of providing interconnection/disconnection of optical cables. ★ connecteur → *connecteur 4.* R оптический (разъемный) соединитель. D LWL-Steckverbinder. E conector de fibra óptica. I connettore in fibra ottica. N optische vezelconnector. P złącze (światłowodowe). S fiberoptiskt anslutningsdon. (731)
37. **printed board connector** : a connector specifically designed to facilitate connections to printed boards. ★ connecteur pour cartes imprimées → *connecteur 33.* R соединитель для печатных плат. D Steckverbinder für gedruckte Schaltung. E conector para tarjeta impresa. I ..... N connector voor gedrukte schakeling. P łącznik (złącza) do płytki drukowanej. S kortanslutningsdon. (581)
38. **pull-off connector** : a connector equipped with a pull-off coupling. ★ connecteur à déconnexion par traction → *connecteur 9.* R соединитель с оттяжным замком. D pull-off-Steckverbinder. E conector de desconexión por tracción. I connettore a dissipazione per trazione. N lostrekconnector. P łącznik (złącza) odciągany. S anslutningsdon med dragurkoppling. (581)
39. **push-pull connector** : a connector having a push-pull coupling. ★ connecteur « pousser-tirer » → *connecteur 5.* R соединитель с пушпульным замком. D push-pull-Steckverbinder. E conector «push-pull»(empujar-tirar). I connettore per circuito stampato; connettore «spingi e tira». N druk-trek-connector. P łącznik (złącza) odciąganopchany. S anslutningsdon med skjutdragkoppling. (581)
40. **quick disconnect connector** : a connector fitted with a coupling device which permits relatively rapid unmating. ★ connecteur à désaccouplement rapide → *connecteur 11.* R соединитель быстрорасчленяемый. D Steckverbinder mit Schnellentkupplung. E conector de desacoplamiento rápido. I connettore a disaccoppiamento rapido. N snel ontkoppelbare connector. P łącznik (złącza) szybkorozłączny. S snabbsärkopplingsdon. (581)
41. **rack-and-panel connector** : one of two mating fixed connectors intended to provide a connection between a unit and its mounting rack. It is usually provided with an alignment device to ensure correct mating. It normally has no coupling device and is mated by the movement between the unit and the rack (does not apply to the printed boards). ★ connecteur de baie et tiroir → *connecteur 18.* R соединитель панельностоечный. D Einschub-Steckverbinder. E conector de panel y bastidor. I connettore per cassetti; connettore semplice. N rek-paneelconnector. P łącznik (złącza) szufladowo-stojakowy. S stativ-chassianslutningsdon. (581)
42. **rectangular connector** : a connector which is basically rectangular and has a basically rectangular mating face. ★ connecteur rectangulaire → *connecteur 34.* R соединитель прямоугольный. D rechteckiger Steckverbinder. E conector rectangular. I connettore rettangolare. N rechthoekige connector. P łącznik (złącza) prostokątny. S rektangulärt anslutningsdon. (581)
43. **right-angle connector** : a connector in which the axis of the cable outlet is at right-angles with the axis of the mating face. ★ connecteur à angle droit → *connecteur 6.* R соединитель угловой. D Winkelsteckverbinder. E conector en ángulo recto. I connettore ad angolo retto. N haakse connector. P łącznik (złącza) kątowy. S vinkelanslutningsdon. (581)
44. **scoop-proof connector** : a connector incorporating features preventing its contacts, either male or female, from being touched by the front of the mating connector. ★ connecteur à contacts protégés → *connecteur 8.* R соединитель слепого сочленения. D kontaktgeschützter Steckverbinder. E conector de contactos protegidos. I connettore a contatti protetti. N connector met beschermde contacten. P łącznik (złącza) stykochronny. S beröringsskyddat anslutningsdon. (581)
45. **sealed connector** : a connector employing a seal capable of fulfilling specified gas-tightness requirements. ★ connecteur étanche → *connecteur 23.* R соединитель герметизированный. D gasdichter Steckverbinder. E conector estanco. I connettore stagno. N afgedichte connector. P łącznik (złącza) uszczelniany. S tätt anslutningsdon. (581)
46. **shielded connector** : a connector designed to prevent the radiation of electromagnetic interference to and from the internal conductor(s). ★ connecteur blindé → *connecteur 15.* R соединитель экранированный. D geschirmter Steckverbinder. E conector apantallado. I connettore schermato. N afgeschermde connector. P łącznik (złącza) ekranowany. S skärmat anslutningsdon. (581)
47. **snatch-disconnect connector** (*Syn.* break-away connector) : a connector designed to separate when a specified force is applied to the cable, without damage to the cable or the connector. ★ connecteur à force de désaccouplement définie → *connecteur 12.* R соединитель отрывной. D Steckverbinder mit Notzugentriegelung. E conector de desacoplamiento calibrado. I connettore con forza di disinserzione definita; connettore a disaccoppiamento calibrato. N lostrekbare connector. P łącznik (złącza) odłączany przewodem. S snabburkopplingsdon. (581)
48. **staggered-contact connector** : a connector having a staggered arrangement of the terminations and/or the contacts. ★ connecteur à contacts en quinconce → *connecteur 7.* R соединитель с расположением контактов в шахматном порядке. D Steckverbinder mit versetzter Kontaktanordnung. E conector de contactos al tresbolillo. I connettore a contatti sfalsati. N connector met versprongen contacten. P łącznik (złącza) przemiennostykowy. S anslutningsdon med sicksackordnade kontakter. (581)
49. **submersible connector** : a connector capable of withstanding submersion to a specified depth. ★ connecteur submersible → *connecteur 37.* R соединитель водонепроницаемый. D tauchfester Steckverbinder. E conector sumergible. I connettore sommergibile. N onderdompelbare connector. P łącznik (złącza) podwodny. S tryckvattentätt anslutningsdon. (581)
50. **terminal connector** : a part for connecting electrically a battery to the external circuit. ★ prise de courant → *prise 24.* R наружный вывод. D Endableitung. E conector terminal. I polo terminale. N aansluitklem. P zacisk (kabla połączeniowego). S poluttag; polsko. (486)
51. **twist-on connector** : a connector which is mated by axial force and locked by rotation of the locking device. ★ connecteur verrouillé par rotation → *connecteur 38.* R соединитель поворотный. D Steckverbinder mit Drehverriegelung. E conector de bloqueo por rotación. I connettore con blocco a rotazione. N connector met draaiende vergrendeling. P łącznik (złącza) blokowany obrotowo. S anslutningsdon med vridkoppling. (581)
52. **umbilical connector** : a connector used to connect a cable to a vehicle, which is separated automatically before or during the initial movement of the vehicle. ★ connecteur ombilical → *connecteur 30.* R соединитель разрывной. D Nabel-Steckverbinder. E conector umbilical. I connettore ombelicale. N navelconnector. P łącznik (złącza) samorozłączny. S navelanslutningsdon. (581)

conservation

1. **conservation of radiance** : a basic principle stating that no passive optical system can increase the quantity $L \cdot n^{-2}$ where L is the radiance of a beam and n is local refractive index. *Note.* — The quantity $L \cdot n^{-2}$ would be constant if the losses by absorption, scattering etc were zero. ★ conservation de la luminance → *conservation 2.* R сохранение яркости; теорема яркости. D Radianzgesetz. E conservación de radiación. I conservazione della radianza. N behoud van radiantie; behoud van helderheid; helderheidstheorema. P zasada zachowania luminancji (energetycznej). S ..... (731)

conservator

1. **oil conservator** (*Syn.* expansion tank) : a vessel connected to the tank of an oil-filled transformer so as to permit free expansion and contraction of the oil to minimise the deleterious effect of contact between the oil in the main tank and the air. ★ conservateur d'huile → *conservateur 1.* R расширитель; консерватор масла. D Ölausdehnungsgefäs. E conservador de aceite; depósito de expansión. I conservatore d'olio. N expansievat; conservator. P zbiornik konserwacyjny oleju. S expansionskärl. (811)

conserved

1. **conserved charge (secondary) battery** (*Syn.* charged drained (secondary) battery) : → *battery 17*

consistency

1. **consistency** : for a given relay, the maximum value to be expected with a given confidence level, of the difference between any two measured values determined under identical specified conditions. ★ fidélité → *fidélité 1.* R абсолютный разброс. D zulässige Streuung der Abweichung. E fidelidad (desaconsejado). I errore di fedeltà. N consistentie. P wierność. S spridning. (446)
2. **reference consistency** : the consistency determined under reference conditions. ★ fidélité de référence → *fidélité 2.* R основной абсолютный разброс. D zulässige Streuung der Abweichung unter Bezugsbedingungen. E fidelidad de referencia (desaconsejado). I errore di fedeltà di riferimento. N consistentie onder referentievoorwaarden. P wierność odniesienia. S spridningens refensvärde. (446)

consistent

1. **time consistent busy hour** : → *hour 9*

console

1. **console** : a desk for communication between the staff and the switching system for monitoring, controlling and maintaining an exchange. ★ console → *console 2.* R пульт. D Konsole; Bedienplatz. E consola. I consolle; posto d'operatore. N ..... P konsola. S manöverbord. (714)
2. **mixing console** (*Syn.* mixing desk) : → *desk 2*
3. **sound control console** (*Syn.* sound control desk) : → *desk 3*

consonant

1. **consonant combination** : → *combination 5*

conspicuity

1. **conspicuity** : quality of an object or a light source to appear prominent in the surroundings. ★ évidence → *évidence 1.* R заметность объекта. D Auffälligkeit. E conspicuidad. I visibilità. N opvallendheid. P ..... S synbarhet. (845)

constant

1. **adjustable constant speed motor** : → *motor 1*
2. **air kerma-rate constant** (Γ_δ) : for a radionuclide emitting photons, the quotient of $l^2 \dot{K}_\delta$ by A, where $\dot{K}_\delta$ is the air kerma-rate due to photons of energy greater than δ, at a distance l from a point source of this nuclide having an activity A

$$\Gamma_\delta = \frac{l^2 \dot{K}_\delta}{A}$$

Note. — The SI unit of air kerma-rate constant is $m^2 \cdot J \cdot kg^{-1}$. When the special names gray (Gy) and becquerel (Bq) are used $m^2 \cdot J \cdot kg^{-1}$ becomes $m^2 \cdot Gy \cdot Bq^{-1} \cdot s^{-1}$. When the earlier special units of activity (the curie) and kerma (the rad) are used 1 $rad \cdot m^2 \cdot Ci^{-1} \cdot s^{-1} = 10^{-12}/3.7$ $m^2 \cdot J \cdot kg^{-1}$ (exactly). ★ constante de débit de kerma dans l'air → *constante 4.* R постоянная мощности кермы в воздухе. D Luftkermaleistungs Konstante. E constante de tasa de kerma en el aire. I costante di rateo di kerma in aria. N ..... P stała mocy kermy w powietrzu. S kermaratkonstant. (881)
3. **attenuation constant** (*Syn.* attenuation coefficient) : → *coefficient 4*
4. **catenary constant** : the constant in the catenary and parabola equations, geometrically represented by the radius of curvature at the lowest point of the span. *Note.* — The catenary constant ρ is equal to the quotient of the horizontal tension in the conductor T_0 at a given temperature (see fig. 1) by its unit weight ω, which must take into account the ice or wind overloads, if applicable.

$$\rho = \frac{T_0}{\omega}$$

★ paramètre (de la chaînette) → *paramètre 2.* R параметр цепной линии. D Kettenlinienparameter. E parámetro (de la catenaria). I parametro (della catenaria). N kettinglijnparameter. P stała krzywej łańcuchowej. S ..... (466)
5. **constant amplitude recording** : → *recording 1*
6. **constant current charge** : → *charge 22*
7. **constant failure intensity period** : → *period 5*
8. **constant failure rate period** : → *period 6*
9. **constant of a measuring instrument** : the factor or coefficient by which the indication must be multiplied to obtain the value of the measured quantity. ★ constante d'un instrument de mesurage → *constante 12.* R постоянная средства измерения. D Messkonstante. E constante de un aparato de medida. I costante di uno strumento di misura. N schaalfactor van een meetinstrument. P stała narzędzia pomiarowego. S instrumentkonstant. (301)
10. **constant ratio code** : → *code 23*
11. **constant speed motor** : → *motor 18*
12. **constant velocity recording** : → *recording 2*
13. **constant voltage charge** : → *charge 23*
14. **constant voltage/constant current crossover** : → *cross-over 1*
15. **decay constant** (*Syn.* desintegration constant) : for a radionuclide, the probability for the spontaneous decay of one of its nuclei within a unit time. It is given by:

$$\lambda = -\frac{1}{N}\frac{dN}{dt}$$

in which N is the number of nuclei of concern existing at time t.. ★ constante de désintégration → *constante 6.* R постоянная распада. D Zerfallskonstante. E constante de desintegración; constante radiactiva. I costante di decadimento; costante radioattiva. N vervalconstante; desintegratieconstante. P stała rozpadu. S sönderfallskonstant. (026,391,881)
16. **desintegration constant** (*Syn.* decay constant) : → *constant 15*
17. **diffusion constant** (of charge carriers) : the quotient of diffusion current density by the charge carrier concentration gradient. ★ constante de diffusion → *constante 7.* R коэффициент диффузии (носителей заряда). D Diffusionskonstante; Diffusionskoeffizient (von Ladungsträgern). E constante de difusión (de portadores de carga). I costante di diffusione (di un portatore di carica). N diffusieconstante (van ladingdragers). P stała dyfuzji (nośników ładunku). S diffusionskonstant. (521)
18. **electric constant** (*Syn.* absolute permittivity of vacuum) : a scalar constant ε_0 such that, in vacuum, its product by the electrical field vector E is equal to the electric flux density vector D :

$$\vec{D} = \varepsilon_0 \vec{E}$$

Notes. 1 — In the International System of units (SI), the value of ε_0 is $(4 \Pi C_0^2)^{-1} 10^7$ farad per metre, approximately 8.85 pF/m, where C_0 is the numerical value of the velocity of electromagnetic waves in vacuum. *2* — The electric constant is related to the magnetic constant μ_0 by

$$\varepsilon_0 \mu_0 C_0^2 = 1$$

★ constante électrique → *constante 13.* D elektrische Feldkonstante. P stała elektryczna; przenikalność elektryczna. (121,705)
19. **equivalent constant voltage** : → *voltage 62*
20. **exposure rate constant (deprecated)** (Γ_δ) : for a gamma or X-ray emitting nuclide, the quotient of $l^2(dX/dt)_\delta$ by A, where $(dX/dt)_\delta$ is the exposure rate due to photons of energy greater than δ at a distance l from a point source of this nuclide having an activity A

$$\Gamma_\delta = \frac{l^2}{A}\left(\frac{dX}{dt}\right)_\delta$$

A special unit of exposure rate constant is $R\ m^2\ h^{-1}\ Ci^{-1}$. *Note.* — It is assumed that the attenuation in the source and along l is negligible. In the case of radium, the value of Γ is determined for a filter thickness of 0.5 mm platinum. More-over, Γ is related not to the activity but to the mass of ^{226}Ra; a special unit is then $R\ m^2 h^{-1}\ g^{-1}$. ★ constante de débit d'exposition → *constante 5.* R постоянная мощности экспозиционной дозы (не рекомендуется). D Standardionendosisleistungs-Konstante (veralteter Begriff). E constante de tasa de exposición (desaconsejado). I costante di rateo di esposizione (sconsigliata). N ..... P stała mocy ekspozycji (nie zalecana). S expositionsratkonstant. (881)

21. **hysteresis core constant** (η_i) : in a magnetic core operating in the Rayleigh region, the tangent of the magnetic loss angle due to hysteresis divided by the product of the peak current I in, and the square root of the inductance L of, the measuring coil:

$$\eta_i = \frac{\tan \delta_h}{I\sqrt{L}}$$

Note. — The relation between the hysteresis material constant η_B and the hysteresis core constant is:

$$\eta_i = \eta_B \sqrt{\frac{\mu_0 \mu_e^3}{V_e}}$$

where μ_e is the effective permeability and V_e the effective volume. ★ constante hystérétique → *constante 15.* R постоянная гистерезиса сердечника. D Hysterese-Kernkonstante. E constante histerética (de un núcleo). I costante d'isteresi (di un nucleo). N kernhysteresisconstante. P stała histerezowa magnetowodu. S kärnhystereskonstant. (221)

22. **hysteresis material constant** (η_B) : in a magnetic material operating in the Rayleigh region, the magnetic loss factor due to hysteresis divided by the peak value of the magnetic flux density:

$$\eta_B = \frac{\tan \delta_h}{\mu_r \hat{B}}$$

★ constante hystérétique → *constante 14.* R постоянная гистерезиса материала. D Hysterese-Materialkonstante. E constante histerética (de un material). I costante di isteresi (di un materiale). N hysteresis-materiaalconstante. P stała histerezowa materiału. S materialhystereskoefficient. (221)

23. **inertia constant** : that constant, independent of the rated speed of the machine, which relates the torque and the angular acceleration of a rotating electrical machine expressed in a per unit system. *Note.* — It can be related to the stored-energy constant by the system frequency and a numerical constant. ★ constante d'inertie → *constante 11.* R инерционная постоянная. D relative Trägheitskonstante. E constante de inercia. I costante di inerzia. N traagheidsconstante. P stała bezwładnościowa. S tröghetsmomentkonstant. (411)

24. **magnetic constant** (*Syn.* absolute permeability of vacuum) : a scalar constant μ_0 such that, in vacuum its product by the magnetic field vector H is equal to the magnetic flux density vector B :

$$\vec{B} = \mu_0 \vec{H}$$

Notes. 1 — In the International System of units (SI) the value $4\pi \cdot 10^{-7}$ henry per metre has been adopted for μ_0. *2* — The magnetic constant is related to the electric constant ε_0 and to the speed of propagation of electromagnetic waves in vacuum c_0 by

$$\varepsilon_0 \mu_0 C_0^2 = 1$$

★ constante magnétique → *constante 16.* D magnetische Feldkonstante. P stała magnetyczna; przenikalność magnetyczna bezwzględna próżni. (121,705)

25. **modified constant voltage charge** : → *charge 38*

26. **phase constant** (*Syn.* phase-change coefficient) : → *coefficient 44*

27. **Planck's constant** (h) : the constant used in the formula $E = h\nu$ where E is the energy of a photon and ν is the frequency of its associated wave. *Note.* — It should be distinguished from h which is

$$\frac{h}{2\pi}$$

★ constante de Planck → *constante 8.* R постоянная Планка. D Plancksche Konstante. E constante de Planck. I costante di Planck. N constante van Planck. P stała Plancka. S Plancks konstant. (881)

28. **propagation constant** (*Syn.* propagation coefficient) : → *coefficient 47*

29. **solar constant** ($E_{e,o}$) : irradiance produced by the extraterrestrial solar radiation on a surface perpendicular to the Sun's rays at mean Sun-Earth distance. *Note.* — $E_{e,o}$ = (1367 ± 7) $W \cdot m^{-2}$. Final report No. 590 of CIMO VIII of the World Meteorological Organization, Mexico City, October 1981. ★ constante solaire → *constante 18.* R солнечная постоянная. D Solarkonstante. E constante solar. I costante solare. N zonneconstante. P stała słoneczna. S solarkonstant. (845)

30. **specific gamma-ray constant** (Γ) : for a gamma emitter, the constant which is equal to the product of exposure rate, at a given distance from a point source of that emitter and the square of that distance divided by the activity of the source neglecting attenuation. ★ constante spécifique de rayonnement gamma → *constante 19.* R постоянная мощности экспозиционной дозы; гамма-постоянная. D spezifische Gammastrahlen-Konstante. E constante específica de radiación gamma. I costante specifica di radiazione gamma. N specifieke gammastralingsconstante. P stała jonizacyjna promieniowania gamma. S expositionsratkonstant. (391,881)

31. **stored-energy constant** : the quotient of the kinetic energy stored in the rotor when running at rated speed and the apparent power, or the product of rated voltage and current for d.c. machines. ★ constante d'énergie cinétique → *constante 9.* R постоянная запасенной энергии. D Trägheitskonstante. E constante de energía cinética. I costante di energia cinetica. N kinetischeenergieconstante. P stała energii kinetycznej. S rörelseenergikonstant. (411)

32. **stored-energy constant of a set** : the quotient of the kinetic energy stored in the rotors of all the coupled machines comprising the set and the rated apparent power of a specified machine in the set. ★ constante d'énergie cinétique d'un groupe → *constante 10.* R постоянная запасенной энергии агрегата. D Trägheitskonstante eines Maschinensatzes. E constante de energía cinética de un grupo. I costante di energia cinetica del gruppo. N kinetischeenergieconstante van een aggregaat. P stała energii kinetycznej zespołu. S rörelseenergikonstant för ett aggregat. (411)

33. **system constants** (*Syn.* system parameters) : → *parameter 9*

constrained

1. **constrained current operation** : → *operation 13*
2. **constrained lens** : → *lens 2*

consumable

1. **consumable arc welding electrode** : → *electrode 15*
2. **consumable electrode** : → *electrode 16*

consumer

1. **consumer** : a user of electricity provided by an electricity supply system, generally a distribution system. ★ usager → *usager 6.* R потребитель электрической энергии. D Kunde. E usuario. I utente. N verbruiker. P odbiorca; użytkownik. S elabonnent; elförbrukare. (604)
2. **consumer** (*Syn.* customer) : the party who receives electricity from the supply or distribution undertaking. ★ client → *client 1.* R потребитель. D Abnehmer. E cliente. I cliente. N afnemer. P odbiorca bezpośredni. S abonnent; kund. (691)
3. **consumer-related cost** : → *cost 5*
4. **high load factor consumer** : a consumer who in relation to his demand consumes a great amount of energy. ★ client à forte utilisation → *client 3.* R потребитель с большой нагрузкой. D Abnehmer mit niedriger Benutzungsdauer. E cliente de alta utilización. I utente con alta utilizzazione. N afnemer met lange bedrijfstijd van het maximum. P odbiorca wielki. S abonnent med lång utnyttjningstid. (691)
5. **high voltage consumer** : a consumer supplied at high voltage. *Note.* — The values of high, medium and low voltage are defined differently in each country. ★ client haute tension → *client 5.* R потребитель высокого напряжения. D Hochspannungs- Abnehmer. E cliente en alta tensión. I utente in alta tensione. N hoogspanningsafnemer(-verbruiker). P odbiorca energii elektrycznej wysokiego napięcia. S högspänningsabonnent. (691)
6. **low load factor consumer** : a consumer who in relation to his demand consumes a small amount of energy. ★ client à faible utilisation → *client 2.* R потребитель с малой нагрузкой. D Abnehmer mit hoher Benutzungsdauer. E cliente de baja utilización. I utente con bassa utilizzazione. N afnemer met korte bedrijfstijd van het maximum. P odbiorca drobny. S abonnent med kort utnyttjningstid. (691)
7. **low voltage consumer** : a consumer supplied at low voltage. *Note.* — The values of high, medium and low voltage are defined differently in each country. ★ client basse tension → *client 4.* R потребитель низкого напряжения. D Niederspannungs- Abnehmer. E cliente en baja tensión.

I utente in bassa t-ensione. N laagspanningsafnemer(-verbruiker). P odbiorca energii elektrycznej niskiego napięcia. S lågspänningsabonnent. (691)

8. **medium voltage consumer** : a consumer supplied at medium voltage. *Note.* — The values of high, medium and low voltage are defined differently in each country. ★ client moyenne tension → *client 6.* R потребитель среднего напряжения. D Mittelspannungs- Abnehmer. E cliente en media tensión. I utente in media tensione. N middenspanningsafnemer(-verbruiker). P odbiorca energii elektrycznej średniego napięcia. S medelspänningsabonnent. (691)
9. **ultimate consumer** : the party who uses electricity for his own needs. ★ consommateur → *consommateur 2.* R собственно потребитель. D Verbraucher; Letztverbraucher. E consumidor; usuario. I consumatore; utilizzatore. N verbruiker. P odbiorca. S förbrukare; konsument. (691)

consumption

1. **specific electrode consumption** : the ratio of the mass of electrode consumed in an arc furnace for a number of melts, excluding electrode scrap, to the weight of ingots produced in the same time. ★ consommation spécifique d'électrode → *consommation 4.* R удельный расход электронов. D spezifischer Elektrodenverbrauch. E consumo específico de electrodo. I consumo specifico di elettrodo. N specifiek elektrodeverbruik. P zużycie elektrody właściwe; zużycie elektrody jednostkowe. S relativ elektrodförbrukning. (841)
2. **specific energy consumption of an electric vehicle** : the energy consumption per traffic unit. *Note.* — The expression of a specific consumption must, in order to be complete, state the energy and traffic units used and also, owing to the various efficiencies of the parts concerned, indicate where the energy input was measured or calculated. ★ consommation spécifique d'énergie d'un véhicule thermoélectrique → *consommation 5.* R удельный расход энергии электрической единицы подвижного состава. D spezifischer Energieverbrauch eines elektrischen Triebfahrzeuges. E consumo específico de energía de un vehículo termoeléctrico. I consumo specifico (d'energia) di un veicolo termoelettrico. N specifiek energieverbruik van een elektrisch krachtvoertuig. P zużycie energii jednostkowe (pojazdu elektrycznego). S specifik energiförbrukning. (811)
3. **specific fuel consumption of a thermo-electric vehicle** : the fuel comsumption per traffic unit which must, in order to be complete, state the fuel and traffic units used. ★ consommation spécifique d'un véhicule thermoélectrique → *consommation 6.* R удельный расход топлива теплоэлектрического подвижного состава. D spezifischer Kraftstoffverbrauch eines thermoelektrischen Fahrzeuges. E consumo específico de un vehículo termoeléctrico. I consumo specifico d'un veicolo termoelettrico. N specifiek brandstofverbruik (van een thermo-elektrisch voertuig). P zużycie paliwa jednostkowe (pojazdu). S specifik bränsleförbrukning. (811)

contact

1. **"a" contact** (*Syn.* make contact) : a control or auxiliary contact which is closed when the main contacts of the mechanical switching device are closed and open when they are open. ★ contact à fermeture → *contact 19.* R контакт включения; контакт «а». D Schliesser. E contacto de cierre; contacto «a». I contatto di chiusura; contatto «a». N meegaand contact; a-contact. P zestyk zwierny. S a-kontakt. (441,811)
2. **arcing contact** : a contact on which the arc is intended to be established. *Note.* — An arcing contact may serve as a main contact; it may be a separate contact so designed that it opens after and closes before another contact which it is intended to protect from injury. ★ contact d'arc → *contact 37.* R дугогасительный контакт. D Lichtbogenkontakt; Abbrennkontakt. E contacto de arco. I contatto d'arco. N afbrandcontact. P zestyk opalny. S ljustbågskontakt. (441)
3. **auxiliary contact** : a contact included in an auxiliary circuit and mechanically operated by the switching device. ★ contact auxiliaire → *contact 32.* R вспомогательный контакт. D Hilfskontakt. E contacto auxiliar. I contatto ausiliario. N hulpcontact. P zestyk pomocniczy (łącznika mechanizmowego). S hjälpkontakt. (441)
4. **auxiliary contact** : contact of a switch used for control, alarm or indication purposes. ★ contact auxiliaire → *contact 33.* R контакт вспомогательный. D Hilfskontakt. E contacto auxiliar. I contatti ausiliari. N hulpcontact. P styk pomocniczy. S hjälpkontakt. (581)
5. **"b" contact** (*Syn.* break contact) : a control or auxiliary contact which is open when the main contacts of a mechanical switching device are closed and closed when they are open. ★ contact à ouverture → *contact 24.* R контакт отключения; контакт «b». D Öffner. E contacto de apertura; contacto «b». I contatto di apertura; contatto «b». N tegengaand contact; b-contact. P zestyk rozwierny. S b-kontakt. (441)
6. **bifurcated contact** : a flat contact with a lengthwise slot, the two arms of which apply contact force in the same direction. ★ contact jumelé → *contact 55.* R контакт раздвоенный. D geschlitzter Kontakt. E contacto gemelo. I contatti gemellati. N gespleten contact. P styk bliźniaczy. S tvillingkontakt. (581)
7. **blade contact** : a solid contact with a rectangular cross-section, usually with a chamfered mating edge. ★ contact sabre → *contact 67.* R контакт ножевой. D Messer-Kontakt. E contacto sable. I contatto a lama. N mescontact. P styk nożowy. S bladkontakt. (581)
8. **break before make contact** (*Syn.* non-shorting contact) : → *contact 87*
9. **break contact** (*Syn.* "b" contact) : → *contact 5*
10. **break contact** : a contact which is opened when the relay is in its operate condition and which is closed when the relay is in its release condition. ★ contact de repos → *contact 40.* R размыкающий контакт. D Öffner. E contacto de reposo; contacto de apertura. I contatto di riposo. N verbreekcontact. P zestyk rozwierny. S brytkontakt. (446)
11. **break contact** : a contact of a switch which opens when the actuator is moved to the depressed or "on" position. ★ contact à ouverture → *contact 26.* R контакт размыкающий. D Öffner (-Kontakt). E contacto de apertura. I contatti di apertura. N verbreekcontact. P zestyk rozwierny. S brytkontakt. (581)
12. **break contact** : a control or auxiliary contact which is open when the main contacts of a mechanical switching device are closed and closed when they are open. ★ contact à ouverture → *contact 27.* R размыкающий контакт; нормально замкнутый контакт. D Öffnerkontakt. E contacto de apertura. I contatto in disaccordo. N verbreekcontact. P zestyk rozwierny. S ..... (811)
13. **butt contact** : a contact in which relative movement of the contact pieces is substantially in a direction perpendicular to the contact surface. ★ contact à pression directe → *contact 29.* R торцевой контакт. D Druckkontakt. E contacto de presión directa. I contatto a pressione diretta. N frontaal contact. P zestyk czołowy. S stum kontakt. (441)
14. **change-over break-before-make contact** ; a change-over contact, one contact circuit of which breaks before the other makes. ★ contact à deux directions sans chevauchement → *contact 17.* R неперекрывающий контакт. D Wechsler mit Unterbrechung. E contacto inversor sin solape. I contatto di commutazione con interruzione. N verbreek-vóór-maakcontact; niet-overbruggend contact. P zestyk przełączny przerwowy. S växelkontakt med avbrott. (446)
15. **change-over contact** : a combination of two contact circuits including three contact members, one of them being common to the two contact circuits. When one of these contact circuits is open, the other is closed and vice versa. ★ contact à deux directions → *contact 14.* R переключающий контакт. D Wechsler. E contacto inversor. I contatto di commutazione. N wisselcontact. P zestyk przełączny. S växelkontakt. (446)
16. **change-over make-before-break contact** : an change-over contact, one contact circuit of which makes before the other breaks. ★ contact à deux directions avec chevauchement → *contact 15.* R перекрывающий контакт. D Wechsler ohne Unterbrechung (folgewechsler); Folgewechsler. E contacto inversor con solape. I contatto di commutazione senza interruzione. N maak-vóór-verbreekcontact; overbruggend contact. P zestyk przełączny bezprzerwowy. S växelkontakt utan avbrott. (446)
17. **clearance between open contacts** : → *clearance 3*
18. **closing time of a break contact** : → *time 24*
19. **closing time of a make contact** : → *time 25*
20. **concentric contact** : a set of coaxial contacts providing independent circuits through a single mechanical assembly. ★ contact concentrique → *contact 35.* R контакт коаксиальный. D konzentrischer Kontakt. E contacto concéntrico. I contatto concentrico. N concentrisch contact. P styki współosiowe. S koncentrisk kontakt. (581)

21. **contact** (of a mechanical switching device) : conductive parts designed to establish circuit continuity when they touch and which, due to their relative motion during an operation, open or close a circuit or, in the case of hinged or sliding contacts, maintain circuit continuity. ★ contact → *contact 9.* R контакт (контактного коммутационного аппарата). D Kontakt (eines mechanischen Schaltgerätes). E contacto (de un aparato mecánico de conexión). I contatto (di un apparecchio meccanico di manovra). N contact (van een mechanische schakelaar). P zestyk. S kontakt. (441)
22. **contact** : the conductive element in a component which mates with a corresponding element to provide an electrical path. ★ contact → *contact 10.* R контакт. D Kontaktelement. E contacto. I contatto. N contact. P styk. S kontakt(element). (581)
23. **contact area** : → *area 6*
24. **contact arrangement** : → *arrangement 4*
25. **contact assembly** : → *assembly 8*
26. **contact circuit** : → *circuit 43*
27. **contact element** : → *element 9*
28. **contact extraction force** : → *force 9*
29. **contact flange** (*Syn.* flat flange) : → *flange 12*
30. **contact float** : → *float 1*
31. **contact follow** : → *follow 1*
32. **contact force** : → *force 10*
33. **contact force** : → *force 11*
34. **contact gap** : → *gap 2*
35. **contact joint** (*Syn.* butt joint) : → *joint 3*
36. **contact lead-in** : → *lead-in 1*
37. **contact line** : → *line 15*
38. **contact member** : → *member 2*
39. **contact (piece)** : one of the conductive parts forming a contact. ★ (pièce de) contact → *contact 110.* R контакт-деталь. D Kontaktstück; Schaltstück. E (pieza de) contacto. I (elementi di) contatto. N contactstuk. P styk. S kontaktdel. (441)
40. **contact piston** : → *piston 3*
41. **contact plate** : → *plate 1*
42. **contact plunger** (*Syn.* contact piston) : → *piston 3*
43. **contact point** (*Syn.* contact tip) : → *tip 2*
44. **contact potential difference** : → *difference 6*
45. **contact potential difference** : → *difference 7*
46. **contact resistance** : → *resistance 7*
47. **contact retainer** : → *retainer 1*
48. **contact roll** : → *roll 1*
49. **contact shoe** (*Syn.* contact slipper) : → *slipper 1*
50. **contact size** : the designation used to differentiate one contact from another. It may be denoted by one of the following systems: a) numbering system assigned numbers used to denote the size of the contact and its related conductor accommodation, b) current rating system the related current-carrying capacity is used to denote the size of the contact, c) cross-sectional area system reference is made to the cross-sectional area of the maximum conductor accommodation to denote the size of the contact. ★ taille d'un contact → *taille 2.* R размер контакта. D Kontaktgröße. E tamaño de un contacto. I dimensione di un contatto. N contactmaat. P wielkość styku. S kontaktstorlek(sbeteckning). (581)
51. **contact slipper** : → *slipper 1*
52. **contact strips** : → *strip 1*
53. **contact time difference** : → *difference 8*
54. **contact tip** : → *tip 2*
55. **contact wipe** : → *wipe 1*
56. **contact wire** : → *wire 1*
57. **contact wire pre-sag** : → *pre-sag 1*
58. **contact wire range** : → *range 3*
59. **contact wire sag** : → *sag 2*
60. **contact wire splice** : → *splice 1*
61. **contact X-ray therapy** : → *therapy 1*
62. **control contact** : a contact included in a control circuit of a mechanical switching device and mechanically operated by this device. ★ contact de commande → *contact 38.* R контакт управления. D Steuerkontakt. E contacto de mando. I contatto di comando. N stuurcontact. P zestyk sterowniczy (łącznika mechanizmowego). S manöverkontakt. (441)
63. **crimp contact** : a contact having a conductor barrel designed to be crimped. ★ contact à sertir → *contact 30.* R контакт под обжатие. D Crimpkontakt. E contacto de engarce. I contatto a crimpare. N krimpcontact. P styk do zagniatania. S pressförbindningskontakt. (581)
64. **dip-solder contact** : a contact with a termination intended to be bath-soldered. ★ contact pour soudure à la vague → *contact 61.* R контакт для пайки методом погружения. D Tauchlöt-Kontakt. E contacto para soldadura por ola. I contatto per saldatura ad onda. N dompelsoldeercontact; golfsoldeercontact. P styk do lutowania kąpielowego. S dopplödningskontakt. (581)
65. **direct contact** : contact of persons or livestock with live parts. ★ contact direct → *contact 46.* R непосредственное прикосновение (прямой контакт). D direktes Berühren. E contacto directo. I contatto diretto. N directe aanraking. P dotyk bezpośredni. S direkt kontakt. (826)
66. **edge-board contacts** : series of contacts printed on the edges of a printed board and intended for mating with an edge socket connector. ★ contacts d'extrémité de carte → *contact 69.* R концевые печатные контакты. D gedruckte Randkontakte. E contactos de borde de tarjeta; contacto impreso. I contatti laterali per connettori. N paneelrandcontacten. P styki krawędziowe płytki. S kontaktfingrar. (541)
67. **electrically separated contact elements** : → *element 15*
68. **female contact** : a contact intended to make electrical engagement on its inner surface and which will accept entry of a male contact. ★ contact femelle → *contact 51.* R контакт гнездовой. D weiblicher Kontakt. E contacto hembra. I contatto femmina. N buscontact. P styk gniazdowy. S honkontakt. (581)
69. **filter contact** : a contact with filter to discriminate against certain frequencies. ★ contact à filtre → *contact 22.* R контакт с фильтром. D Filter-Kontakt. E contacto filtro. I contatto con filtro. N contact met ingebouw filter. P styk filtrowy. S kontakt med filter. (581)
70. **front-release contact** : a removable contact in which release is effected from the mating face. ★ contact déverrouillable par l'avant → *contact 45.* R контакт, освобождаемый с лицевой стороны соединителя. D von vorn entriegelbarer Kontakt. E contacto liberable por delante. I contatto sbloccabile anteriormente. N contact aan de voorzijde uitneembaar. P ..... S framifrån demonterbar kontakt. (581)
71. **fuse-base contact** : the contact piece of a fuse-base designed to engage with a corresponding part of the fuse. ★ contact d'un socle → *contact 49.* R контакт основания предохранителя. D Kontaktstück des Sicherungsunterteils. E contacto de una base. I contatto della base del fusibile. N contact van (smeltveiligheid-) voetstuk; contact van (smelt)patroonhouder. P styk podstawy bezpiecznikowej. S säkringssockel kontakt. (441)
72. **fuse-carrier contact** : the contact piece of a fuse-carrier designed to engage with a corresponding part of the fuse. ★ contact d'un porte-élément de remplacement → *contact 48.* R держателя предохранитель. D Kontaktstück des Sicherungsträgers. E contacto de un portafusible. I contatto del porta fusibile. N contact van (smelt)patroondrager. P styk głowki bezpiecznikowej. S säkringspatronbärar-kontakt. (441)
73. **fuse-link contact** : the contact piece of a fuse-link designed to engage with a corresponding part of the fuse. ★ contact d'un élément de remplacement → *contact 47.* R заменяемого элемента предохранителя. D Kontaktstück des Sicherungseinsatzes. E contacto de un fusible. I contatto dell'elemento sostituibile. N (smelt)patrooncontact. P styk wkładki topikowej. S säkringspatron kontakt. (441)
74. **hermaphroditic contact** : a contact which is intended to mate with an identical contact. ★ contact hermaphrodite → *contact 53.* R контакт-гибрид. D Zwitter-Kontakt. E contacto hermafrodita. I contatto ermafrodita. N hermafrodietcontact. P styk obojętny. S hermafroditisk kontakt. (581)
75. **indirect contact** : contact of persons or livestock with exposed conductive parts which have become live under fault conditions. ★ contact indirect → *contact 54.* R косвенное прикосновение (косвенный контакт). D indirektes Berühren. E contacto indirecto. I contatto indiretto. N indirecte aanraking. P dotyk pośredni. S indirekt kontakt. (826)
76. **instrument with contacts** : → *instrument 16*
77. **locking contact** : an electrical contact for preventing the operation of a piece of apparatus under certain conditions. ★ (contact de) verrouillage → *contact 43.*

R блок-контакт. D Verriegelung; Verriegelungskontakt. E contacto de bloqueo. I (contatto di) blocco. N vergrendelcontact. P zestyk blokujący. S blockeringskontakt. (811)

78. **main contact** : a contact included in the main circuit of a mechanical switching device, intended to carry, in the closed position, the current of the main circuit. ★ contact principal → *contact 63.* R главный контакт. D Hauptkontakt. E contacto principal. I contatto principale. N hoofdcontact. P zestyk główny. S huvudkontakt. (441)

79. **main contact** : a specific contact of a switch to which the external load circuit is connected. ★ contact principal → *contact 64.* R контакт главный. D Hauptkontakt. E contacto principal. I contatto principale. N hoofdcontact. P styk główny. S huvudkontakt. (581)

80. **main contacts** : any set of through-current carrying contacts which has no transition impedance fitted in circuit between the transformer winding and the contacts and which does not switch any current. ★ contacts principaux → *contact 70.* R главные контакты. D Hauptkontakte. E contactos principales. I contatti principali. N hoofdcontacten. P styki główne przewodzące. S huvudkontakter. (421)

81. **main switching contacts** : any set of contacts which has no transition impedance fitted in circuit between the transformer winding and the contacts and breaks the current. ★ contacts principaux de coupure → *contact 71.* R главные переключающие контакты. D Schaltkontakte. E contactos principales de corte. I contatti principali di interruzione. N hoofdschakelcontacten. P styki główne przełączające. S huvudbrytarkontakter. (421)

82. **make before break contact** (*Syn.* shorting contact) : → *contact 104*

83. **make contact** (*Syn.* "a" contact) : → *contact 1*

84. **make contact** : a contact which is closed when the relay is in its operate condition and which is opened when the relay is in its release condition. ★ contact de travail → *contact 42.* R замыкающий контакт. D Schliesser. E contacto de trabajo; contacto de cierre. I contatto di lavoro. N maakcontact. P zestyk zwierny. S slutkontakt. (446)

85. **make contact** : a contact of a switch which closes when the actuator is moved to the depressed or "on" position. ★ contact à fermeture → *contact 21.* R контакт замыкающий. D Schließer(-Kontakt). E contacto de cierre. I contatti di chiusura. N maakcontact. P zestyk zwierny. S slutkontakt. (581)

86. **male contact** : a contact intended to make electrical engagement on its outer surface and which will enter a female contact. ★ contact mâle → *contact 57.* R контакт штыревой. D männlicher Kontakt. E contacto macho. I contatto maschio. N pencontact. P styk wtykowy. S hankontakt. (581)

87. **non-shorting contact** (*Syn.* break before make contact) : a contact such that one contact is completely open before the next contact is made. ★ contact non court-circuitant → *contact 59.* R контакт переключающий (незакорачивающий). D Öffner-vor-Schließer (-Kontakt)(nicht überlappend). E contacto no cortocircuitante. I contatti di commutazione. N verbreek-voor-maakcontact. P zestyk przełączny przerwowy. S icke-kortslutande kontakt. (581)

88. **opening time of a break contact** : → *time 117*

89. **opening time of a make contact** : → *time 118*

90. **overhead contact line** : → *line 119*

91. **overhead contact line with catenary suspension** : → *line 120*

92. **overhead contact line with longitudinal suspension** (*Syn.* overhead contact line with catenary suspension) : → *line 120*

93. **pantograph contact pressure** : → *pressure 12*

94. **passing contact** : the combination of a contact assembly designed for opening or closing in a passing fashion the corresponding contact circuit when the relay changes over. The passing may occur either when the relay operates or when the relay releases or both during operating and releasing. ★ contact de passage → *contact 39.* R временно-коммутирующий контакт. D Wischkontakt. E contacto de paso. I contatto di passaggio. N tussentijds contact. P zestyk przelotny. S impulskontakt. (446)

95. **push-on contact** : a contact with which a connection is achieved by axial force, separation being restricted by friction. ★ contact à pousser → *contact 28.* R контакт вставной. D Steckhülse. E contacto por empuje. I contatto a pressione. N opschuifcontact. P styk wsuwany. S påskjutskontakt. (581)

96. **quarter-wave contact piston** : → *piston 6*

97. **quick action contact** : a contact of a switch the relative displacement of which is always rapid regardless of the speed of the actuating part. ★ contact à action rapide → *contact 13.* R контакт независимого действия. D Sprungkontakt (indirekt geschalteter Kontakt). E contacto de acción rápida. I contatto ad azione rapida. N snel schakelend contact. P zestyk migowy. S momentankontakt. (581)

98. **rear-release contact** : a removable contact in which release is effected from the rear. ★ contact déverrouillable par l'arrière → *contact 44.* R контакт, освобождаемый с монтажной стороны соединителя. D rückseitig entriegelbarer Kontakt. E contacto liberable por detrás. I contatto sbloccabile posteriormente. N contact aan de achterzijde uitneembaar. P ..... S bakifrån demonterbar kontakt. (581)

99. **reed contact** : contact assembly, the contact members of which are blades either fully or partly of magnetic material and which are moved directly by a magnetic force. ★ contact à lames souples → *contact 23.* R язычковый магнитоуправляемый контакт. D Reedkontakt. E contacto de láminas magnéticas. I contatto ad ancia; contatto reed. N rietcontact. P zestyk magnetyczny; zestyk kontaktronowy. S tungkontakt. (446)

100. **resilient contact** : a contact having elastic properties to provide a force to its mating part. ★ contact élastique → *contact 50.* R контакт упругий. D federnder Kontakt. E contacto elástico. I contatto elastico. N verend contact. P styk sprężysty. S fjädrande kontakt. (581)

101. **rolling contact** : a contact in which one contact piece rolls on the other. ★ contact roulant → *contact 66.* R катящийся контакт. D Wälzkontakt. E contacto rodante. I contatto rotolante. N rolcontact. P zestyk toczny. S rullkontakt. (441)

102. **rotor contact** : a conductive segment of a rotary switch carried by the rotor and shaped to engage with the contacts on the stator as required. ★ contact de rotor → *contact 41.* R контакт роторный. D Rotorkontakt. E contacto de rotor. I contatto rotativo. N rotorcontact. P styk rotora (łącznika). S rotorkontakt. (581)

103. **set of contacts** : → *set 46*

104. **shorting contact** (*Syn.* make before break contact) : a contact such that one contact is maintained until after the next contact is made. ★ contact court-circuitant → *contact 36.* R контакт мостящий (закорачивающий). D Schließer-vor-Öffner (-Kontakt)(überlappend). E contacto cortocircuitante. I contatti di commutazione senza interruzione. N maak-voor-verbreekcontact. P zestyk przełączny bezprzerwowy. S kortslutande kontakt. (581)

105. **simple (catenary) equipment with single contact wire** : → *equipment 66*

106. **simple (catenary) equipment with twin contact wires** : → *equipment 67*

107. **sliding contact** : a contact in which relative movement of the contact pieces is substantially in a direction parallel to the contact surface. ★ contact glissant → *contact 52.* R скользящий контакт. D Gleitkontakt. E contacto deslizante. I contatto strisciante. N glijcontact. P zestyk ślizgowy. S glidkontakt. (441)

108. **slow action contact** : a contact of a switch the relative displacement of which is directly related to the speed of the actuating part. ★ contact à action lente → *contact 12.* R контакт зависимого действия. D direkt geschalteter Kontakt. E contacto de acción lenta. I contatto ad azione lenta. N langzaam schakelend contact. P zestyk powolny. S trögverkande kontakt. (581)

109. **snap-on contact** : a push-on contact in which retention is achieved by means of a deformation of the contact area which provides positive axial location. ★ contact à enclenchement → *contact 18.* R контакт с фиксацией. D Steckhülse mit Rastung. E contacto de conexión. I contatto ad agganciamento. N klikcontact. P styk dociskowy. S snäppkontakt. (581)

110. **solder contact** : a contact designed for the attachment of the conductor by solder. *Note.* — These contacts may assume but are not limited to the following types: *a)* the wire is surrounded by the terminal, barrel, bucket, cup, well, etc. *b)* the wire surrounds the terminal: post, standoff, tag etc. *c)* the wire passes through the terminal: eyelet, hook, etc. *d)* no wire is involved, as in printed circuit applications: post spill, tail, etc. ★ contact à souder → *contact 31.* R контакт под пайку. D Löt-Kontakt.

E contacto para soldar. I contatto a saldare. N soldeercontact. P styk do lutowania. S lödkontakt. (581)

111. **stake contact** : a contact for individual mounting to a printed board by staking, and normally soldered to a land. ★ contact rapporté → *contact 65.* R контакт стоечный. D Nietkontakt. E contacto añadido. I contatto riportato. N inperscontact voor gedrukte schakeling. P ..... S enstiftskontakt. (581)
112. **static relay with output contact** : → *relay 42*
113. **static relay without output contact** : → *relay 43*
114. **thermocouple contact** : a contact manufactured of thermocouple materials and used in thermocouple applications. ★ contact pour thermocouple → *contact 62.* R контакт-термопара. D Thermoelement-Kontakt. E contacto termopar. I contatto per termocoppia. N thermokoppelcontact. P styk termoelementowy. S termoelementkontakt. (581)
115. **transition contacts** : any set of contacts where a transition impedance is in series with the transformer winding and the contacts. ★ contacts de passage → *contact 68.* R помежуточные контакты. D Widerstandskontakte. E contactos de conmutación. I contatti secondari. N overbruggingscontacten. P styki pośredniczące. S motståndskontakt. (421)
116. **tuning fork contact** : a resilient contact having a shape similar to that of a tuning fork, the two arms of which apply contact force in opposite directions. ★ contact lyre → *contact 56.* R контакт-лира. D Gabel-Kontakt. E contacto lira. I contatto a lira. N vorkcontact. P styk widlasty. S gaffelkontakt. (581)
117. **virtual contact width** : combination of the width of the contact face together with any positional variation of the contact. ★ largeur virtuelle du contact → *largeur 22.* R ширина контакта эффективная. D Kontaktbereich. E anchura virtual del contacto. I larghezza virtuale del contatto. N schijnbare contactbreedte. P pole styczności wirtualne. S skenbar kontaktbredd. (581)
118. **wetted contact** : a contact through which sufficient direct current flows to reduce the contact resistance. ★ contact mouillé → *contact 58.* R контакт, обтекаемый постоянным током. D ..... E contacto mojado. I contatto bagnato. N ..... P zestyk zwilżany. S fuktad kontakt. (714)
119. **wrap contact** : a contact designed to accept a wrapped connection. ★ contact pour connexion enroulée → *contact 60.* R контакт под навивку. D Wickel-Kontakt. E contacto para conexión enrollada. I contatto per connessione avvolta. N draadwikkelcontact. P końcówka do okręcania. S virkontakt. (581)

contactor

1. **auxiliary power supply contactor** (*Syn.* heating contactor) : → *contactor 10*
2. **braking contactor** : a contactor which sets up the connections of a braking circuit. ★ contacteur de freinage → *contacteur 9.* R тормозной контактор. D Bremsschütz. E contactor de frenado. I contattore di frenatura. N remschakelaar. P stycznik hamowania. S bromskontaktor. (811)
3. **camshaft contactor** : a contactor having main contacts operated by a camshaft. ★ contacteur à came → *contacteur 4.* R контактор с распределительным валом. D Nockenschütz. E contactor de levas. I contattore a camme. N nokkenschakelaar. P stycznik krzakowy. S kamstyrd kontaktor. (811)
4. **contactor equipment** : → *equipment 15*
5. **contactor group** : → *group 6*
6. **contactor relay** : a contactor used as a control switch. ★ contacteur auxiliaire → *contacteur 5.* R вспомогательный контактор. D Hilfsschütz. E contactor auxiliar. I contattore ausiliario. N hulprelais. P stycznik pomocniczy; stycznik sterowniczy. S reläkontaktor. (441)
7. **earthing contactor** : a contactor used to connect a circuit to earth. ★ contacteur de mise à la terre → *contacteur 10.* R заземляющий контактор. D Erdungsschuetz. E contactor de puesta a tierra. I contattore di messa a terra. N aardingsschakelaar. P stycznik uziemienia. S jordningskontaktor. (811)
8. **electro-magnetic contactor** : a contactor having main contacts operated by an electro-magnet. ★ contacteur électromagnétique → *contacteur 13.* R электромагнитный контактор. D elektromagnetisches Schütz. E contactor electromagnético. I contattore elettromagnetico. N elektromagnetische schakelaar. P stycznik elektromagnesowy. S elektromagnetisk kontaktor. (811)
9. **electro-pneumatic contactor** : a contactor having main contacts operated by a pneumatic piston controlled by an electro-pneumatic valve. ★ contacteur électropneumatique → *contacteur 17.* R электропневматический контактор. D elektropneumatisches Schütz. E contactor electroneumático. I contattore elettropneumatico. N elektropneumatische schakelaar. P stycznik elektropneumatyczny. S elpneumatisk kontaktor. (811)
10. **heating contactor** (*Syn.* train power supply contactor; auxiliary power supply contactor) : a contactor controlling the supply of power to the heating circuits or other services of one or more coaches. ★ contacteur de chauffage → *contacteur 8.* R выключатель подачи питания; выключатель вспомогательных цепей. D Heizschütz; Energieversorgungsschütz. E contactor de calefacción. I contattore ausiliario (ad alta tensione). N hoogspanningsverwarmingsschakelaar. P stycznik ogrzewania. S tågvärmekontaktor. (811)
11. **individual contactor equipment** : → *equipment 44*
12. **instantaneous contactor relay** : a contactor relay operating without any intentional time delay. *Note.* — Unless otherwise stated, a contactor relay is an instantaneous contactor relay. ★ contacteur auxiliaire instantané → *contacteur 6.* R вспомогательный контактор мгновенного действия. D unverzögertes Hilfsschütz. E contactor auxiliar instantáneo. I contattore ausilario istantaneo. N hulprelais zonder vertraging. P stycznik pomocniczy bezzwłoczny. S momentan reläkontaktor. (441)
13. **latched contactor** : a contactor, the moving elements of which are prevented by means of a latching arrangement from returning to the position of rest when the operating means are de-energized. *Notes. 1* — The latching, and the release of the latching, may be mechanical, electromagnetic, pneumatic, etc. *2* — Because of the latching, the latched contactor actually acquires a second position of rest and, according to the definition of a contactor, it is not, strictly speaking, a contactor. However, since the latched contactor in both its utilization and its design is more closely related to contactors in general than to any other classification of switching device, it is considered proper to require that it complies with the specifications for contactors wherever they are appropriate. ★ contacteur à accrochage → *contacteur 3.* R контактор с защелкой. D verklinktes Schütz. E contactor con retención. I contattore con agganci. N contactor met vasthoudpal. P stycznik zapadkowy. S kontaktor med tillägesspärr. (441)
14. **(mechanical) contactor** : a mechanical switching device having only one position of rest, operated otherwise than by hand, capable of making, carrying and breaking currents under normal circuit conditions including operating overload conditions. *Note.* — Contactors may be designated according to the method by which the force for closing the main contacts is provided. ★ contacteur (mécanique) → *contacteur 18.* R контактор (механический). D Schütz. E contactor (mecánico). I contattore (meccanico). N contactor. P stycznik. S kontaktor. (441,811)
15. **tapping contactor** : a contactor connected to a tapping point. ★ contacteur de prises → *contacteur 12.* R контактор вывода. D Anzapfschütz; Stufenschütz. E contactor de tomas. I contattore di presa. N aftakschakelaar. P stycznik zaczepowy. S transformatorkontaktor. (811)
16. **time-delay contactor relay** : a contactor relay with specified time-delay characteristics. *Note.* — The time-delay may be associated with energization ("e" delay) or with de-energization ("d" delay) or both. ★ contacteur auxiliaire temporisé → *contacteur 7.* R вспомогательный контактор с выдержкой времени. D verzögertes Hilfsschütz. E contactor auxiliar temporizado. I contattore ausiliario temporizzato. N hulprelais met tijdvertraging. P stycznik pomocniczy zwłoczny. S fördröjd reläkontaktor. (441)
17. **train power supply contactor** (*Syn.* heating contactor) : → *contactor 10*
18. **transition contactor** : a contactor which carries current during transition from one tap of a transformer to the next. ★ contacteur de passage → *contacteur 11.* R переходной контактор. D Überschaltschütz; Übergangsschütz. E contactor de paso. I contattore di transizione. N ..... P stycznik przełączeniowy. S överkopplingskontaktor. (811)

container

1. **container** (of a cell) : a container for the plate pack and electrolyte of a cell made of a material impervious to attack by the electrolyte. ★ bac (d'accumulateur) → *bac 1.* R бак аккумулятора. D Zellengefäß. E contenedor (de un elemento). I recipiente (di un accumulatore). N celbak. P naczynie (akumulatorowe). S cellkärl. (486)
2. **monobloc container** : a container with several compartments each of which can hold a plate pack. ★ bac monobloc → *bac 2.* R моноблок. D Blockkasten. E contenedor monobloque. I recipiente monoblocco. N monoblokbak. P blok (akumulatorowy). S gruppkärl. (486)

containing

1. **pressure containing terminal box** : → *terminal box 7*

containment

1. **reactor containment** : the prevention of release, even under the conditions of a reactor accident, of unacceptable quantities of radioactive material beyond a controlled zone. Also, commonly, the containing system itself. ★ ..... → . D Reaktorsicherheitshülle.. E contención del reactor. I contenimento del reattore. N insluiting van een reactor. P obudowa ochronna. S reaktorinneslutning. (026)

contaminant

1. **contaminant** : a foreign substance or material in an insulating liquid or gas which usually has deleterious effect on one or more properties. ★ contaminant → *contaminant 1.* R примеси. D Verunreinigung. E contaminante. I contaminante. N verontreiniging. P zanieczyszczenie. S förorening. (212)

contamination

1. **air contamination indicator** : → *indicator 1*
2. **air contamination meter** : → *meter 5*
3. **air contamination monitor** : → *monitor 1*
4. **contamination monitor** : → *monitor 3*
5. **radioactive aerosol contamination meter** : → *meter 47*
6. **radioactive aerosol contamination monitor** : → *monitor 12*
7. **(radioactive) contamination** : the involuntary presence of a radioactive substance in a region where it is not wanted ; e.g., in or on the body of a person, (internal or external contamination), or on clothing or on parts of a laboratory. ★ contamination (radioactive) → *contamination 1.* R загрязнение (радиоактивное). D (radioaktive) Kontamination. E contaminacion (radiactiva). I contaminazione (radioattiva). N (radioactieve) besmetting (contaminatie). P skażenie (radioaktywne). S (radioaktiv) kontamination. (026,391,881)
8. **surface contamination meter** : → *meter 61*

content

1. **aromatic carbon content** : the ratio of carbon atoms present in aromatic structures to the total carbon atoms content. ★ teneur en carbone aromatique → *teneur 2.* R содержание ароматического углерода. D Gehalt an aromatisch gebundenem Kohlenstoff. E contenido en carbonos aromáticos. I tenore di carbonio aromatico. N gehalte aan aromatische koolstof. P zawartość węgla aromatycznego. S halt av aromatiskt kol. (212)
2. **aromatic hydrocarbon content** : the percentage by mass of molecules containing at least one aromatic ring in a mineral insulating oil. ★ teneur en hydrocarbures aromatiques → *teneur 4.* R содержание ароматического углеводорода. D Gehalt an aromatisch gebundenem Kohlenwasserstoff. E contenido en hidrocarburos aromáticos. I tenore di idrocarburi aromatici. N gehalte aan aromatische koolwaterstoffen. P zawartość węglowodorów aromatycznych. S halt av aromatiska kolväten. (212)
3. **decision content** : the number of decisions needed to select a given event among a finite number of mutually exclusive events, equal to the logarithm of the number of events, where the base of the logarithm is the number of choices on each decision. ★ quantité de décision → *quantité 1.* R количество информации. D Entscheidungsgehalt. E cantidad de decisión. I quantità di decisione; contenuto di decisione. N beslissingsinhoud. P ilość decyzji. S beslutsinnehåll. (702)
4. **equivalent binary content** : the minimum number of binary digits strictly necessary to convey the same information as a defined number of consecutive signal elements in a given digital signal. ★ contenu binaire équivalent → *contenu 1.* R эквивалентное двоичное содержание. D gleichwertiger Binärinhalt. E gasto de símbolos. I contenuto binario equivalente. N equivalente cijferinhoud. P zawartość binarna równoważna; równoważność binarna. S ekvivalent bitinnehåll. (704)
5. **gas content** (of an insulating liquid) : the volume of gas dissolved in the unit volume of an insulating liquid, generally expressed as a percentage. ★ teneur en gaz → *teneur 3.* R содержание газа (в жидком электроизоляционном материале). D Gasgehalt (einer Isolierflüssigkeit). E contenido en gas (de un líquido aislante). I contenuto di gas (di un liquido isolante). N gehalte aan gas (van een isolatievloeistof). P zawartość gazu (w cieczy izlocyjnej). S gashalt. (212)
6. **harmonic content** : → *harmonic 5*
7. **relative harmonic content** (*Syn.* harmonic distortion) : the ratio of the r.m.s. value of the harmonic content to the r.m.s. value of the alternating quantity. ★ taux d'harmoniques → *taux 50.* R относительное содержание высших гармоник. D Oberschwingungsgehalt. E tasa de armónicos; distorsión de armónicos. I tasso d'armoniche; distorsione armonica. N harmonisch gehalte. P pozostałość odkształceniowa względna; zniekształcenie harmoniczne. S klirrfaktor. (551)
8. **retrieval of stored call content** : → *retrieval 2*
9. **ripple content** (*Syn.* alternating component) : the quantity derived by removing the direct component from a pulsating quantity. ★ ondulation → *ondulation 2.* R переменная составляющая. D Wechselanteil. E ondulación; componente alterna. I ondulazione; componente alternata. N wisselspanningcomponent; wisselstroomcomponent. P falowanie; składowa zmienna. S växelkomponent. (161)
10. **storage of call content** : → *storage 20*
11. **total electron content** (*Syn.* TEC (abbreviation)) : the number of free electrons in a tube passing through the ionosphere, generally with a vertical axis, from the ground to a specified height, divided by the cross-section area of this tube. ★ contenu électronique total → *contenu 2.* D Gesamtelektroneninhalt; TEC (Abkürzung). P liczba ogólna elektronów. (705)

content meter

1. **beryllium content meter (γ, n)** : an ore content meter having a gamma radiation source and designed to determine the beryllium content of an ore sample by means of the beryllium nuclear reaction (γ, n). ★ teneurmètre en béryllium (γ, n) → *teneurmètre 4.* R измеритель содержания бериллия (γ, n). D Gerät zur Bestimmung des Berylliumgehaltes (γ, n). E medidor del contenido de berilio (γ, n). I berilliotenorimetro (γ, n). N berylliumgehaltemeter. P miernik zawartości berylu. S berylliumhaltsmätare. (392)
2. **coal ash content meter** (ionizing radiation) : a content meter designed to determine ash content in coal by measurement of the radiation backscattered or transmitted by the coal. ★ teneurmètre en cendres de charbon → *teneurmètre 5.* R радиоизотопный концентратомер каменноугольной золы. D Gerät zur Bestimmung des Aschengehaltes der Kohle (mittels ionisierender Strahlung). E medidor del contenido de cenizas de carbón (por radiaciones ionizantes). I tenorimetro in cenere di carbone (per mezzo di radiazione ionizzante). N koolasgehaltemeter. P popiołomierz izotopowy. S askhaltsmätare för kol (med joniserande strålning). (392)
3. **content meter** (ionizing radiation) : a measuring assembly that includes an ionizing radiation source for determining the amount of a specified element or material that is present in a substance. ★ teneurmètre → *teneurmètre 1.* R радиоизотопный концентратомер. D Gehaltsmeßgerät (mittels ionisierender Strahlung). E medidor del contenido de un elemento (por radiaciones ionizantes). I tenorimetro (per mezzo di radiazioni ionizzanti). N gehaltemeter (berustend op ioniserende straling). P analizator składu. S haltmätare (med joniserande strålning). (392)
4. **ore content meter** : a measuring assembly designed to determine the amount of a specified element or material in ore specimens. ★ teneurmètre de minerai → *teneurmètre 3.* R измеритель содержания руды. D Gerät zur Bestimmung des Erzgehaltes. E medidor del contenido de un elemento en minerales. I tenorimetro di minerali. N ertsgehaltemeter. P miernik składu rudy. S haltmätare för malmer. (392)
5. **radon content meter** (for prospecting purposes) : a prospecting assembly used to determine the concentration of radon by measuring the counting rate and/or the number of

counts corresponding to the alpha particle emission rate from radon and its daughters in the air sample. ★ émanomètre → *émanomètre 1.* R поисковый измеритель содержания радона; поисковый эманометр. D Gerät zur Bestimmung des Radongehaltes (zur Prospektion). E medidor de radon de prospección. I radontenorimetro di prospezione. N radongehaltemeter (voor verkenningsdoeleinden). P miernik zawartości radonu (do poszukiwań geologicznych). S radonmätare (för prospektering). (392)

6. **sulphur content meter for hydrocarbons** (ionizing radiation) : a content meter designed to determine the sulphur content of hydrocarbons by measurement of residual radiation after absorption in the hydrocarbons. ★ sulfoteneurmètre d'hydrocarbures → *sulfoteneurmètre 1.* R радиоизотопный концентратомер серы в углеводородах. D Gerät zur Bestimmung des Schwefelgehaltes in Kohlenwasserstoffen (mittels ionisierender Strahlung). E medidor del contenido de azufre en hidrocarburos (por radiaciones ionizantes). I solfotenorimetro per idrocarburi (a radiazione ionizzante). N zwavelgehaltemeter voor koolwaterstoffen (berustend op ioniserende straling). P miernik zawartości siarki w węglowodorach. S svavelhaltsmätare för kolväten (med joniserande strålning). (392)
7. **thorium content meter** : an ore content meter designed to determine the thorium content of an ore sample by means of a method based on the difference between the half-lives of radon and thoron. ★ teneurmètre en thorium → *teneurmètre 7.* R измеритель содержания тория. D Gerät zur Bestimmung des Thoriumgehaltes. E medidor del contenido de Torio. I toriotenorimetro. N thoriumgehaltemeter. P miernik zawartości toru. S toriumhaltsmätare. (392)
8. **uranium content meter** (by beta and gamma radioactivity) : an ore content meter designed to determine the uranium content of an ore sample by means of the measurement of beta and gamma emission rates of this sample. ★ teneurmètre en uranium → *teneurmètre 8.* R измеритель содержания урана (по бета- и гамма-излучениям). D Gerät zur Bestimmung des Urangehaltes (mittels Beta- und Gamma- Strahlen). E medidor del contenido de uranio (por radiactividad beta y gamma). I uraniotenorimetro (per radioattività beta e gamma). N uraniumgehaltemeter (voor beta- en gammaradioactiviteit). P miernik zawartości uranu. S uranhaltsmätare. (392)
9. **X-ray fluorescence content meter** (*Syn.* X-ray excitation fluorimeter) : a content meter designed to determine the content of one or several elements in liquid or solid samples, by measurement of X-ray fluorescence excited by X-rays. ★ teneurmètre à fluorescence X → *teneurmètre 2.* R рентгено-флуоресцентный радиоизотопный концентратомер. D Röntgenfluoreszenz-Gehaltsmeßgerät. E medidor del contenido de un elemento por fluorescencia X; fluorímetro de excitación X. I tenorimetro a fluorescenza X. N fluorimeter met röntgenexcitatie; gehaltemeter met röntgenfluorescentie. P analizator składu fluorescencyjny X. S haltmätare med röntgenfluorescens. (392)

contention

1. **contention** : a condition arising when two or more stations attempt to transmit at the same time over a shared transmission channel, or when two stations normally operating with each other in simplex, either way mode, attempt to transmit at the same time. ★ conflit → *conflit 1.* R столкновение. D Zugangskonflikt. E contienda. I contesa. N ... P kolizja. S kollision. (721)

continuity

1. **continuity** : the progression from one programme or part of a programme to the next according to a pre-arranged plan, in order to produce a desired effect. *Note.* — Associated term in French : enchaîner. ★ enchaînement → *enchaînement 1.* R компоновка программы. (723)
2. **continuity check** : → *check 7*
3. **continuity control room** : → *room 5*
4. **continuity of supply** : the quality of supply which is expressed by the extent to which the operation of an electrical system approaches the ideal state of freedom from interruption over a given period of time. ★ continuité du service → *continuité 1.* R непрерывность электроснабжения. D Versorgungskontinuität. E continuidad de servicio. I continuità del servizio. N continuïteit van de voorziening. P ciągłość dostawy (energii elektrycznej). S leveranssäkerhet. (604)
5. **continuity studio** : → *studio 1*
6. **continuity suite** : → *suite 1*
7. **parallel earth continuity conductor** : → *conductor 52*
8. **(supply) continuity criterion** : → *criterion 2*

continuous

1. **continuous action** : → *action 3*
2. **continuous control** : → *control 40*
3. **continuous cross-bonding** : → *cross-bonding 1*
4. **(continuous) current-carrying capacity** : → *capacity 9*
5. **continuous disturbance** : → *disturbance 1*
6. **continuous duty** : → *duty 1*
7. **continuous electrode** : → *electrode 17*
8. **continuous facsimile receiver** : → *receiver 2*
9. **continuous floating action** : → *action 4*
10. **continuous flow** : → *flow 4*
11. **continuous furnace** : → *furnace 10*
12. **continuous line recorder** : → *recorder 1*
13. **continuous muffle furnace** : → *furnace 11*
14. **continuous noise** : → *noise 9*
15. **continuous operation duty-type** : → *duty-type 1*
16. **continuous operation duty-type with electric braking** : → *duty-type 2*
17. **continuous operation duty-type with related load/speed changes** : → *duty-type 3*
18. **continuous output (of an internal combustion engine)** (*Syn.* continuous power (of an internal combustion engine)) : → *power 26*
19. **continuous power (of an internal combustion engine)** : → *power 26*
20. **continuous (quantity)** : → *quantity 4*
21. **continuous rated current** : → *current 28*
22. **continuous rating** : → *rating 1*
23. **continuous running duty-type** : → *duty-type 4*
24. **continuous signal** : → *signal 61*
25. **continuous spectrum** : → *spectrum 7*
26. **continuous spectrum** : → *spectrum 8*
27. **continuous wave magnetron** : → *magnetron 1*
28. **continuous X-ray spectrum** : → *spectrum 9*
29. **equivalent continuous rating** : → *rating 3*
30. **equivalent continuous sound level** (*Syn.* time-average sound level) : → *level 99*
31. **equivalent continuous sound pressure level** (*Syn.* time average sound pressure level) : → *average 18*
32. **limiting continuous current of an output circuit** : → *current 117*
33. **limiting continuous thermal withstand value of an energizing quantity** : → *value 17*
34. **maximum continuous operating temperature** : → *temperature 25*
35. **maximum continuous rating** : → *rating 9*
36. **rated continuous thermal current** : → *current 154*

contour

1. **contour correction** : → *correction 2*
2. **contour effect** : → *effect 10*
3. **co-ordination contour** : the locus of points at the co-ordination distances of a radio station in all directions. ★ contour de coordination → *contour 1.* D Koordinierungskontur. P kontur koordynacyjny. (705)
4. **equal-loudness contour** : curve that shows, as a function of frequency, the sound pressure level required to cause a given loudness for a listener having normal hearing, when listening to a specified kind of sound in a specified manner. ★ ligne isosonique → *ligne 119.* R кривая равной громкости. D Kurven gleicher Lautstärke. E línea isofónica. I isofona. N isofoon. P izofona. S hörnivådiagram. (801)

contoured-beam

1. **contoured-beam antenna** : → *antenna 34*

contrast

1. **accentuated contrast** : the result of a process whereby all the picture elements of the original document which have a luminance less than a specified intermediate value are transmitted as nominal black and all those with a luminance greater than that value as nominal white. ★ contraste accentué → *contraste 3.* R усиленный контраст. D betonter Kontrast. E contraste acentuado. I contrasto accentuato. N overdreven contrast; hard. P kontrast zwiększony. S betonad kontrast. (721)
2. **contrast** (in television) (*Syn.* (colour) fringing) : the ratio of luminance levels at two points of a scene or reproduced picture. ★ contraste → *contraste 1.* R контраст (в телевидении). (723)
3. **contrast** : 1. In the perceptual sense : Assessment of the difference in appearance of two or more parts of a field seen simultaneously or successively (hence : "brightness contrast", "lightness contrast", "colour contrast", "simultaneous contrast", "successive contrast" etc.). 2. In the physical sense : Quantity intended to correlate with the perceived brightness contrast, usually defined by one of a number of formulae which involve the luminances of the stimuli considered, for example : $\Delta L/L$ near the luminance threshold, or L_1/L_2 for much higher luminances. ★ contraste → *contraste 2.* R контраст. D Kontrast. E contraste. I contrasto. N contrast. P kontrast. S kontrast. (845)
4. **contrast range** : → *range 4*
5. **contrast range** : → *range 5*
6. **contrast range** : → *range 6*
7. **contrast ratio correction** (*Syn.* gamma correction) : → *correction 13*
8. **contrast rendering factor** : → *factor 26*
9. **contrast sensitivity** : → *sensitivity 4*
10. **equality of contrast photometer** : → *photometer 2*
11. **equivalent contrast** (of a task) : luminance contrast of a visibility reference task having equal visibility at the same luminance level as that of the task considered. ★ contraste équivalent → *contraste 5.* R эквивалентный контраст (стимула). D äquivalenter Kontrast (einer Sehaufgabe). E contraste equivalente. I contrasto equivalente. N equivalent contrast. P kontrast równoważny (zadania wzrokowego). S ekvivalent kontrast. (845)
12. **maximum contrast** : the ratio of the luminance of the brightest portion of a picture to that of the darkest portion. *Note.* — The value of this quantity is generally expressed as the logarithm to the base ten which equals the difference of corresponding optical densities. ★ contraste maximal → *contraste 6.* R максимальный контраст. D Maximalkontrast. E contraste máximo. I contrasto massimo. N maximum contrast. P kontrast maksymalny. S maximal kontrast. (721)
13. **radiographic contrast** : the difference in optical density (D_2-D_1) between two areas of a radiograph of densities D_2 and D_1. ★ contraste radiographique → *contraste 10.* R контрастность радиографии. D Schwärzungskontrast. E contraste radiográfico. I contrasto radiografico. N radiografisch contrast. P kontrast radiograficzny. S kontrast. (881)
14. **refractive index contrast** (Δ) : a measure of the relative difference in refractive index of the core and the cladding of an optical fibre, given by :

$$\Delta = \frac{n_1^2 - n_2^2}{2\,n_1^2}$$

where n_1 and n_2 are, respectively, the maximum in the core and the refractive index of the innermost homogeneous cladding. ★ contraste d'indice → *contraste 4.* R контраст показателей преломления. D Brechzahldifferenz. E contraste del índice de refracción. I contrasto d'indice di rifrazione. N brekingsindexcontrast. P współczynnik załamania środowiska względny. S relativ indexskillnad. (731)

15. **visual contrast threshold** : → *threshold 32*

contribution

1. **capital contribution to connection costs** : an amount to be paid to the supply undertaking either for the establishment, or for the reinforcement, of the service line connecting the consumer's installation to the supply network. ★ contribution aux frais de branchement → *contribution 1.* R участие в капитальных затратах по присоединению. D Anschlußkostenbeitrag (einmalig). E participación en los gastos de acometida. I contributo alle spese di derivazione. N bijdrage in de aansluitkosten. P opłata za wykonanie przyłącza. S engångsavgift; servisavgift. (691)
2. **capital contribution to network costs** : an amount to be paid to the supply undertaking for the network capacity reserved for the consumer's needs or for the reinforcement of, and the extension to, the distribution network necessary to meet these needs. ★ contribution aux frais de réseau → *contribution 2.* R участие в капитальных затратах на сети. D Netzkostenbeitrag (einmalig). E participación en los gastos de la red. I contributo alle spese di rete. N bijdrage in de netkosten. P opłata za rozbudowę sieci. S engångsavgift; anslutningsavgift. (691)
3. **contribution circuit** (*Syn.* contribution link) : → *link 5*
4. **contribution link** : → *link 5*

control

1. **absorption control** : control of a reactor by adjustment of the properties, position, or quantity of neutron-absorbing material, other than fuel, moderator and reflector material, in such a way as to change the reactivity. ★ commande par absorption → *commande 85.* D Steuerung durch Absorption. E control por absorción. I regolazione per mezzo di assorbimento. N regeling met absorptie. P sterowanie (reaktora) zmianą pochłaniania. S absorptionsstyrning. (026)
2. **adaptive control** : secondary control whose characteristics are time-variable and result from the optimisation of some operational conditions. ★ réglage adaptatif → *réglage 27.* R адаптивное регулирование. D adaptive Regelung. E regulación adaptativa. I regolazione evolutiva. N adaptieve regeling. P regulacja wtórna adaptacyjna. S optimerad styrning. (603)
3. **arc control device** : → *device 7*
4. **astatic control** : type of control with zero-offset coefficient in every point of the control characteristic. ★ régulation astatique → *régulation 14.* R астатическое регулирование. D Regelung mit P-Grad gleich Null. E control astático. I controllo astatico. N astatische regeling. P regulacja statyczna. S ..... (351)
5. **asymmetrical control** (single phase) : control by a device designed to operate in a different manner on the positive and negative half cycles of an alternating voltage or current. *Notes. 1* — Generalized phase control is asymmetrical if the current waveform is not the same for both positive and negative half cycles. *2* — Multicycle control is asymmetrical if within each conduction period the number of positive and negative half cycles is unequal. ★ commande asymétrique → *commande 20.* R несимметричное управление (при одной фазе). D unsymmetrische Steuerung (einphasig). E control asimétrico (en monofásico). I controllo asimmetrico (in monofase). N enkelfasige asymmetrische regeling. P regulacja niesymetryczna (jednofazowa). S asymmetrisk styrning. (161)
6. **asymmetrical phase control** : phase control with different delay angles in the principal arms of a convertor connection or commutating group. ★ réglage de phase asymétrique → *réglage 33.* R несимметричное фазовое управление. D unsymmetrische Zündeinsatzsteuerung. E regulación de fase asimétrica. I regolazione di fase asimmetrica. N onsymmetrische fasesturing. P sterowanie fazowe asymetryczne. S osymmetrisk fasstyrning. (551)
7. **automatic coded access control** : a control for automatically locating a picture identified by a coded number accompanying each picture contained in the recording. ★ accès automatique indexé → *accès 6.* R автоматическая выборка. D Zugriffssteuerung. E acceso automático codificado. I ricerca automatica a codice. N automatische gecodeerde plaatsbepalingsregeling. P układ wyszukiwania obrazu numeryczny. S automatisk bildsökning. (806)
8. **automatic control** : type of control in which a direct or indirect action of man on the final controlling element is not needed. ★ commande automatique → *commande 21.* R автоматическое управление. D selbsttätige Regelung und Steuerung. E control automático. I controllo automatico. N automatische regeling. P sterowanie automatyczne. S automatisk styrning. (351,441)
9. **automatic control assembly** : → *assembly 5*

10. **automatic control equipment for... :** → *equipment 2*
11. **automatic exposure control** : a device for radiography or photofluorography that automatically terminates the exposure after a predetermined quantity of radiation has been measured. ★ exposeur automatique → *exposeur 1.* R автоматический контроль облучения. D Belichtungsautomat. E control automático de exposicion. I controllo automatico dell'esposizione. N belichtingsautomatiek. P czasownik jonizacyjny. S exponeringsautomat. (881)
12. **automatic gain control** (*Syn.* AGC (abbreviation); automatic volume control) : a process or device by which the gain of an amplifier is automatically adjusted, generally with the object of minimising changes in the level of the output signal with changes in the level of the input signal. ★ commande automatique de gain → *commande 22.* R автоматическая регулировка усиления. D automatische Verstärkungssteuerung; AGC (Abkürzung); automatische Lautstärkeüberwachung. E control automático de ganancia; control automático de volumen; CAG (abreviatura). I controllo automatico del guadagno. N automatische volumeregeling; automatische versterkingsregeling; AVR. P regulacja wzmocnienia automatyczna. S automatisk volymkontroll. (702)
13. **automatic gain control** : a process or device to automatically ensure that the level of output signal remains sensibly constant using the input signal itself as the control. ★ commande automatique de gain → *commande 23.* R автоматическая регулировка усиления. (723)
14. **automatic load-shedding control equipment :** → *equipment 4*
15. **automatic loss-of-synchronism control equipment :** → *equipment 5*
16. **automatic reclosing control equipment :** → *equipment 8*
17. **automatic switching control equipment :** → *equipment 9*
18. **automatic traction control equipment :** → *equipment 10*
19. **automatic volume control** (*Syn.* automatic gain control) : → *control 12*
20. **bilateral control** : control between two synchronization nodes such that the frequency of the clock of each of these nodes is influenced by timing information derived from the clock of the other node. ★ synchronisation bilatérale → *synchronisation 32.* R двустороннее управление. D zweiseitige Steuerung. E sincronización bilateral; control bilateral. I sincronizzazione bilaterale. N bilaterale synchonisatie. P sterowanie obustronne. S tvåvägsstyrning. (704)
21. **brake control** : the means by which the driver or automatic driving system regulates the operation of the braking system. ★ commande de frein → *commande 42.* R управление тормозом. D Bremssteuerung. E control de frenos. I comando del freno. N rembediening. P sterowanie hamulcem. S bromsmanöverdon. (811)
22. **burst firing control** : synchronous multicycle control in which the starting instant is synchronized at voltage zero and current flows for an integral number of complete half cycles. *Note.* — Burst firing control is employed with resistive loads. ★ commande par déclenchement d'une salve → *commande 87.* R ..... D Impulspaket-Steuerung. E control por ráfagas. I controllo di innesco di un treno (di cicli). N regeling door lawineontsteking. P sterowanie wzbudzenia wiązki. S nollgenomgångstyrning. (161)
23. **call control character :** → *character 1*
24. **call control procedure :** → *procedure 1*
25. **cancellation control** : a function control which indicates, according to certain conventions, that the data preceding it contain errors and must be ignored. ★ commande d'annulation → *commande 31.* R знак аннулирования. D ungültig. E control de anulación. I comando di cancellazione. N ..... P anulowanie. S annullering. (721)
26. **cascade control** : type of control in which the reference variable of a controller is provided by another control system. ★ régulation en cascade → *régulation 24.* R каскадное регулирование. D Kaskadenregelung. E control en cascada. I regolazione in cascata. N cascaderegeling. P regulacja kaskadowa. S kaskadstyrning (-reglering). (351)
27. **central control room :** → *room 4*
28. **centralized control** : a type of common control which has a single set of functional units. ★ commande centralisée → *commande 25.* R централизованное управление. D zentralgesteuert. E control centralizado. I controllo centralizzato. N gecentraliseerde besturing. P sterowanie scentralizowane. S centraliserad styrning. (714)
29. **chopper control** (*Syn.* pulse control) : → *control 146*
30. **chopper control** : a method of controlling the voltage supplied to d.c. motors by using a chopper. ★ régulation par hacheur → *régulation 27.* R регулирование напряжения импульсным преобразователем. D Steuerung mit Gleichstromsteller. E regulación por troceado. I regolazione a frazionatore. N choppersturing. P regulacja przetwornikiem impulsowym. S chopperreglering. (811)
31. **closed-loop control** (*Syn.* feedback control) : → *control 100*
32. **coarse control element** (*Syn.* coarse control member) : → *control 33*
33. **coarse control member** (*Syn.* coarse control element) : a control member used for coarse adjustment of the reactivity of a reactor or for altering flux distribution. ★ élément de réglage grossier → *élément 38.* D Grobsteuerelement. E elemento de control aproximado. I elemento di regolazione grossolana. N grofregellichaam. P element (sterowniczy) sterowania zgrubnego. S grovstyrelement. (026)
34. **coarse control (shimming)** : coarse regulation for the purpose of correcting reactivity variation of major amplitude spreading over a long period. ★ compensation → *compensation 2.* D Grobsteuerung. E compensación. I regolazione grossolana. N grofregeling. P sterowanie zgrubne; kompensacja. S grovstyrning. (026)
35. **(colour) intensity control** (*Syn.* (colour) saturation control) : → *control 36*
36. **(colour) saturation control** (*Syn.* (colour) intensity control) : gain control in the chrominance path, in a colour television receiver, allowing adjustment of colour saturation. ★ commande de saturation (des couleurs) → *commande 52.* R регулировка насыщенности цвета. (723)
37. **common control** : indirect control in which the necessary functional units are shared, being associated with a given call only during the period required to accomplish the control of the setting-up function. ★ commande commune → *commande 26.* R общее управление. D gemeinsamgesteuert; Zentralsystem. E control común. I controllo comune. N gemeenschappelijke besturing. P sterowanie zwykłe. S gemensam styrning. (714)
38. **configuration control** : control of a reactor by changing its configuration. ★ commande par configuration → *commande 86.* D Konfigurationssteuerung. E control por configuración. I regolazione per variazione di configurazione. N configuratieregeling. P sterowanie (reaktora) układem rdzenia. S konfigurationsstyrning. (026)
39. **continuity control room :** → *room 5*
40. **continuous control** (*Syn.* notchless control) : fine and uninterrupted control of a quantity (voltage, current, speed, tractive effort) eliminating notching peaks. ★ réglage continu → *réglage 28.* R непрерывное регулирование; плавное регулирование. D kontinuierliche Steuerung. E regulación continua. I regolazione continua. N continu variabele regeling. P regulacja płynna. S steglös reglering. (811)
41. **control** : purposeful action on or in a system, to meet specified objectives. *Note.* — Control may include monitoring and safeguarding besides the control action itself. ★ commande → *commande 15.* R управление. D Regelung und Steuerung. E control. I controllo. N besturing. P sterowanie. S styrning. (351)
42. **control board :** → *board 2*
43. **control centre :** → *centre 7*
44. **control character :** → *character 13*
45. **control characteristic :** → *characteristic 25*
46. **control characteristic of a controlled system :** → *characteristic 26*
47. **control circuit :** → *circuit 45*
48. **control circuit :** → *circuit 46*
49. **control contact :** → *contact 62*
50. **control current :** → *current 29*
51. **control current :** → *current 30*
52. **control current sensitivity :** → *sensitivity 5*
53. **control current terminals :** → *terminal 4*

54. **control desk** : → *desk 1*
55. **control discrepancy switch** : → *switch 6*
56. **control drive** : → *drive 3*
57. **control electrode** : → *electrode 18*
58. **control electronics** : → *electronics 1*
59. **control element** (*Syn.* control member) : → *control 66*
60. **control element drive mechanism** : → *mechanism 3*
61. **control equipment** : → *equipment 16*
62. **control exciter** : → *exciter 1*
63. **control grid** : → *grid 3*
64. **control line** : → *line 17*
65. **control loop** : → *loop 3*
66. **control member** (*Syn.* control element) : a movable part of a reactor which itself affects reactivity and is used for reactor control. ★ élément de commande → *élément 24.* D Steuerelement. E elemento de control. I elemento di regolazione. N regellichaam. P element sterowniczy. S styrorgan; styrelement. (026)
67. **control point** : → *point 6*
68. **control range** : → *range 7*
69. **control range** : → *range 8*
70. **control ratio** : → *ratio 21*
71. **control rod** : → *rod 3*
72. **control room** : → *room 6*
73. **control station** : → *station 4*
74. **control station** : → *station 5*
75. **control switch** : → *switch 7*
76. **control switchgroup** : → *switchgroup 1*
77. **control system** : → *system 38*
78. **control track** : → *track 3*
79. **control trailer** (*Syn.* driving trailer) : → *trailer 2*
80. **control train line** : → *line 18*
81. **control valve** : → *valve 5*
82. **control voltage** : → *voltage 35*
83. **control winding** : → *winding 16*
84. **control winding** : → *winding 17*
85. **control with fixed set point** : feedback control by which the controlled variable is made to remain substantially constant. *Note.* — The controlled variable may then be called a regulated variable. ★ régulation de maintien → *régulation 21.* R стабилизирующее управление. D Festwertregelung. E control fijo. I regolazione con riferimento costante. N regeling met een vaste, ingestelde waarde. P regulacja stałowartościowa. S konstantreglering. (351)
86. **cyclic control signal** : → *signal 64*
87. **cyclic on/off switching control** : a power control which operates to switch the supply to an equipment on and off in a repetitive manner. ★ commande (cyclique) par tout ou rien → *commande 29.* R управление путем периодического включения и выключения питания. D periodische Ein-Aus-Steuerung. E control (cíclico) de encendido o apagado. I controllo (ciclico) tutto o niente. N cyclische aan/uitschakelingsregeling. P sterowanie cyklicznego załączania i wyłączania. S periodisk till-frånstyrning. (161)
88. **device control** : a function control designed to control certain ancillary equipments associated with a terminal and used in particular to switch such equipments on or off. ★ commande d'appareil (auxiliaire) → *commande 32.* R знак управления (вспомогательными) устройствами. D Gerätesteuerung. E control de aparatos (auxiliares). I comando ausiliare. N apparaatbesturing. P sterowanie urządzeniem (dodatkowym). S utrustningsstyrning. (721)
89. **direct control** : control of an automatic switching arrangement in which the switches are set directly in response to signals from the calling device. ★ commande directe → *commande 68.* R прямое управление. D direktgesteuert. E control directo. I comando diretto. N directe besturing. P sterowanie bezpośrednie. S direktstyrning. (714)
90. **distributed control** : a type of common control in which groups of functional units each serve limited sets of the total number of calls. ★ commande répartie → *commande 106.* R распределенное управление. D verteilte Steuerung. E control distribuido. I controllo distribuito. N verdeelde besturing. P sterowanie rozłożone. S distribuerad styrning. (714)
91. **dynamic range control** (of a sound signal) : control of the maximum and minimum levels of a sound programme signal to bring it within specified limits determined by the onset of non-linearity distortion on the one hand and inadequate signal-to-noise ratio on the other. ★ réglage de la dynamique → *réglage 30.* R управление динамическим диапазоном (звукового сигнала). (723)
92. **echo control** : the intentional reduction of unwanted echoes arising in a telecommunication circuit. *Notes. 1* — The reduction may be effected, for example, by techniques of impedance balancing, inserting loss, or cancelling. *2* — The echo control function may be implemented so as to operate on a multiplex signal. ★ protection contre les échos → *protection 23.* R управление эхо-сигналом. D Echoregulierung. E protección de eco; reducción de eco. I controllo dell'eco; protezione contro l'eco. N echobeheersing. P ograniczanie echa. S ekostyrning. (704)
93. **effective induction area of the control current loop** : → *area 17*
94. **electrode control regulator** : → *regulator 1*
95. **(electronic)(power) resistance control** : control using continuous variation of the resistance of electronic devices. ★ réglage par résistance (électronique) (de puissance) → *réglage 50.* R электронное управление сопротивлением в силовой цепи. D Stellen durch elektronischen Widerstand. E regulación (electrónica) por resistencia (de un circuito de potencia). I regolazione per resistenza (elettronica) (di potenza). N elektronische weerstandsturing (van vermogen). P sterowanie rezystancyjne (przyrządu elektronicznego). S elktronisk resistansstyrning. (551)
96. **electro-pneumatic brake control** : a system where valves on each vehicle are operated electrically from the driver's cab and control the admission or release of compressed air to or from the brake cylinders. ★ commande électropneumatique du frein → *commande 72.* R электропневматическое управление тормозом. D elektropneumatische Bremssteuerung. E control electroneumático de frenos. I comando elettropneumatico del freno. N elektropneumatische rembediening. P sterowanie elektryczne hamulcem powietrznym. S elpneumatiskt bromssystem. (811)
97. **electro-vacuum brake control** : a vacuum brake control in which atmospheric air is admitted to the brake cylinders through a valve or valves on each vehicle, controlled electrically from the driver's cab. ★ frein à vide à commande électrique → *frein 10.* R электровакуумное управление тормозом. D elektrisch gesteuerte Vakuumbremse. E freno por vacío por control eléctrico. I freno a vuoto a comando elettrico. N elektrische bediening van een vacuümrem. P hamulec próżniowy sterowany elektrycznie. S ..... (811)
98. **error control** : any technique used to reduce the incidence of errors in the recording, processing or transfer of information. ★ protection contre les erreurs → *protection 24.* R защита от ошибок. D Fehlerüberwachung; Fehlerminderung; Fehlerreduzierung. E protección contra los errores; control de error. I protezione contro gli errori. N foutenbeheersing. P ochrona przed błędami. S felreduktion. (702,721)
99. **feed forward control** : type of control in which the manipulated variable, while still depending on the controller output, is also made to depend on the measured value of one or more input variables. ★ régulation avec action anticipatrice → *régulation 16.* R регулирование с прямой связью. D Regelung mit Störgrößenaufschaltung. E control de alimentación directa; control de anticipación. I controllo in avanti. N voorwaartsregeling; anticiperende regeling. P regulacja w układzie zamknięto-otwartym. S framkoppling. (351)
100. **feedback control** (*Syn.* closed-loop control) : control in which the control action is made to depend on the measurement of the controlled variable. ★ régulation → *régulation 11.* R управление с обратной связью; управление с замкнутой цепью воздействий. D Regelung. E control por realimentación; control de bucle cerrado. I regolazione (controllo con retroazione). N regeling. P sterowanie w układzie zamkniętym; regulacja. S reglering. (351)
101. **fine control** : fine regulation for the purpose of correcting small reactivity variations. ★ pilotage → *pilotage 2.* D Feinsteuerung. E control fino. I regolazione fine. N fijnregeling. P sterowanie dokładne. S finstyrning. (026)

102. fine control element (*Syn.* fine control member) : → *control 103*

103. fine control member (*Syn.* fine control element; regulating member; regulating element) : a control member used for small and precise adjustment of the reactivity of a reactor. ★ élément de pilotage → *élément 35.* D Feinsteuerelement. E elemento de control fino. I elemento di regolazione fine. N fijnregellichaam. P element (sterowniczy) sterowania dokładnego. S finstyrelement. (026)

104. flow control : the procedure for controlling the rate of transfer of packets between two nominated points in a data network, for example between a data terminal equipment and a data switching exchange. ★ commande de flux → *commande 38.* R управление потоком. D Flußregelung. E control de flujo; control de gasto. I controllo di flusso. N informatiestroombesturing. P kontrola przepływu. S flödesstyrning. (721)

105. fluid poison control : control of a reactor by adjustment of the position or quantity of a fluid nuclear poison in such a way as to change the reactivity. The fluid poison may include soluble chemicals or particles in suspension. ★ commande par poison fluide → *commande 99.* D ..... E control por veneno fluido. I regolazione per mezzo di veleno fluido. N regeling met gedispergeerd gif. P sterowanie (reaktora) cieklą trucizną. S styrning med flytande gift. (026)

106. follow-up control : feedback control by which the controlled variable is made to vary according to the variations of a reference variable. ★ régulation de correspondance → *régulation 20.* R следящее управление. D Folgeregelung. E control variable. I asservimento (regolazione con riferimento variabile). N volgregeling. P regulacja nadążna. S följereglering. (351)

107. frequency control : a method of controlling motor speed enabling several speeds, or a continuous range of speeds, to be obtained by varying the supply frequency. ★ régulation par la fréquence → *régulation 29.* R регулирование изменением частоты. D Frequenzregelung. E regulación por la frecuencia. I regolazione di frequenza. N frequentiesturing. P regulacja częstotliwościowa. S frekvensstyrd hastighetsreglering. (811)

108. fuel control : control of a reactor by adjustment of the properties, position, or quantity of fuel in such a way as to change the reactivity. ★ commande par le combustible → *commande 93.* D Steuerung durch Brennstoff. E control por combustible. I regolazione per mezzo del combustibile. N regeling met splijtstof. P sterowanie (reaktora) paliwem. S bränslestyrning. (026)

109. function control : control of an elementary operation to be performed by a device other than recording or printing a letter, figure, punctuation mark or graphic symbol contained in a message or in data. ★ commande de fonction → *commande 41.* R функциональный знак; функциональная команда. D Steuerfunktion. E control de función. I comando di funzione. N bewaking van de werking; functiebewaking. P funkcja sterująca. S funktionsstyrning. (721)

110. function divided control (*Syn.* function sharing) : a type of common control which has a number of separate functional units each of which is dedicated to a specific task. ★ (commande par) partage de fonction → *partage 1.* R управление с разделением функций. D funktionsunterteile Steuerung. E control por división de función. I controllo distribuito per funzioni. N functieverdeelde besturing; functieverdeling. P sterowanie według funkcji. S funktionsindelad styrning. (714)

111. gate control : in thyristors control by means of currents impressed on the gates. ★ commande par gâchette → *commande 89.* R управление с помощью управляющего электрода. D ..... E control por puerta. I comando di porta. N poortsturing. P sterowanie bramkowe. S grindstyrning. (551)

112. generalized phase control : the process of varying, within the cycle or half cycle of the supply voltage, the time interval or intervals during which current conduction occurs. ★ réglage de phase généralisé → *réglage 34.* R обобщенное управление фазой. D Anschnittssteuerung. E control de fase generalizado. I regolazione di fase generalizzato. N algemene faseregeling. P regulacja fazy ogólna. S fasstyrning. (161)

113. grid control : in ionic valves, control by means of voltages applied to control grids. ★ commande par grille → *commande 99.* R сеточное управление. D Gittersteuerung. E control por rejilla. I comando di griglia. N roostersturing. P sterowanie siatkowe. S gallerstyrning. (551)

114. ignitor control : control by means of currents injected through ignitors. ★ commande par igniteurs → *commande 91.* R управление с помощью поджигающего электрода. D Zündstiftsteuerung. E control por encendedores (ignitores). I comando con ignitore. N ontstekersturing. P sterowanie zapłonnikowe; sterowanie igniterowe. S tändarstyrning. (551)

115. indirect control : control of an automatic switching arrangement in which functional units are used to process the signals from the calling device and to set the switches according to the desired connection. ★ commande indirecte → *commande 77.* R косвенное управление. D indirektgesteuert. E control indirecto. I comando indiretto. N indirecte besturing. P sterowanie pośrednie. S indirekt styrning. (714)

116. induced control voltage : → *voltage 87*

117. in-phase (voltage) control : voltage control by means of an additional variable in-phase voltage component. ★ réglage (de tension) en phase → *réglage 38.* R продольное регулирование напряжения. D Längsregelung. E regulación (de tensión) en fase. I regolazione (di tensione) in fase. N langsregeling (van de spanning). P regulacja w układzie dodawczym. S spänningsreglering i längsled. (603)

118. input power control : the regulation of the electric power supplied to an apparatus, machine or system to achieve the required performance. ★ commande de puissance d'entrée → *commande 49.* R управление входной мощностью. D Eingangs-Leistungssteuerung. E control de potencia de entrada. I regolazione della potenza di ingresso. N ingangsvermogensregeling. P regulacja mocy wejściowej. S styrning av ineffekt. (161)

119. line load control : a means of selectively restricting calls from local lines during emergencies so as to permit the handling of essential traffic. ★ régulation de charge → *régulation 19.* R регулирование загрузки. D Leitungslastregelung. E regulación de carga. I limitazione del traffico originato (di linea). N belastingsregeling. P sterowanie obciążeniem awaryjne. S linjebegränsning. (714)

120. linear control electromechanism (for a nuclear reactor) : an electromechanism designed to perform a linear motion of one or several nuclear reactor control elements. ★ électromécanisme de commande linéaire → *électromécanisme 1.* R электромеханическое устройство линейного перемещения регулирующих элементов (ядерного реактора). D Stellantrieb, linear (für einen Kernreaktor). E electromecanismo de control lineal (para un reactor nuclear). I elettromeccanismo di comando lineare (di un reattore nucleare). N elektromechanisme voor lineaire regeling (in een kernreactor). P elektromechanizm liniowy napędu elementu regulacyjnego. S drivdon för linjärt styrelement. (392)

121. local control : control of an operation at a point on or adjacent to the controlled switching device. ★ commande directe → *commande 67.* R местное управление. D Vor-Ort-Steuerung. E mando directo. I comando diretto. N besturing ter plaatse. P sterowanie miejscowe. S direkt manövrering. (441)

122. manual control : type of control in which man operates either directly or indirectly on the final controlling element. *Note.* — In the process industry, this is generally done via a standardized signal. ★ commande manuelle → *commande 83.* R ручное управление. D Handregelung; Handsteuerung. E control manual. I controllo manuale. N handbediening. P sterowanie ręczne. S manuell styrning. (351,441)

123. measuring instrument with circuit control devices : → *measuring instrument 14*

124. moderator control : control of a reactor by an adjustment of the properties, position or quantity of the moderator in such a way as to change the reactivity. ★ commande par le modérateur → *commande 94.* D Moderatortrimmung. E control por moderator. I regolazione per mezzo del moderatore. N regeling met moderator. P sterowanie (reaktora) moderatorem. S moderatorstyrning. (026)

125. multicycle control (by half-cycles) : the process of varying the ratio of the number of half-cycles of current conduction to the number of half-cycles of non-conduction. *Note.* — The various combinations of times of conduction and non-conduction enable, for example, the average power supplied to the controlled load to be varied. ★ commande par trains d'alternances → *commande 103.* R управление полупериодами переменного тока. D Vielperiodensteuerung (durch Halbschwingungen). E control multiciclo. I controllo con

treni di cicli. N meerperiodenregeling. P sterowanie wielocyklowe (wielokrotność połowy cyklu). S sekvensperiodstyrning. (161)

126. **multicycle control** : the process of varying the ratio of the number of cycles which include current conduction to the number of cycles in which no current conduction occurs. ★ réglage par train d'ondes → *réglage 51.* R многопериодное управление. D Vielperiodensteuerung (Schwingungspaketsteuerung). E regulación por ondas completas. I regolazione per treni d'onda. N meerperiodensturing. P sterowanie pełnofalowe. S sekvensperiodstyrning. (551)

127. **multicycle control factor** : → *factor 121*

128. **network control phase** : → *phase 20*

129. **neutral zone control** : type of control where a change of the controlled variable over a well-defined and adjustable portion of the control range does not cause any change in the manipulated variable. ★ régulation avec zone d'insensibilité → *régulation 18.* R регулирование с нейтральной зоной. D Regelung mit Unempfindlichkeitsbereich. E control con zona de insensibilidad. I controllo con zona morta. N neutrale-zoneregeling. P regulacja ze strefą nieczułości. S styrning (eller reglering) med neutralzon. (351)

130. **notchless control** (*Syn.* continuous control) : → *control 40*

131. **open-loop control** : control which does not utilize the measurement of the controlled variable. ★ commande en chaîne (ouverte) → *commande 73.* R управление с разомкнутой цепью воздействий. D Steuerung. E control de bucle abierto. I comando (controllo con catena aperta). N sturing. P sterowanie w układzie otwartym. S öppen styrning. (351)

132. **optimal control** : control for which the performance index reaches a maximum or a minimum under specified limitations. ★ régulation optimale → *régulation 25.* R оптимальное управление. D optimale Regelung und Steuerung. E control óptimo. I controllo ottimo. N optimale regeling. P sterowanie optymalne. S optimal styrning. (351)

133. **output power control** : the regulation of the electric power supplied from an apparatus, machine or system to achieve the required performance. ★ commande de la puissance de sortie → *commande 43.* R управление выходной мощностью. D Ausgangs-Leistungssteuerung. E control de potencia de salida. I regolazione della potenza di uscita. N uitgangsvermogensregeling. P regulacja mocy wyjściowej. S styrning av uteffekt. (161)

134. **pantograph control mechanism** (*Syn.* pantograph cylinder) : → *cylinder 3*

135. **parallel control devices** : → *device 42*

136. **phase control** : the process of varying, within the cycle or half-cycle of the supply voltage, the instant at which current conduction begins ; in this process the conduction ceases at or about the passage of current through zero. *Note.* — Phase control is a particular case of generalized phase control. ★ réglage de phase → *réglage 31.* R управление фазой. D Zündeinsatzsteuerung. E control por fase. I regolazione di fase. N faseregeling. P regulacja fazy. S fasvinkelstyrning. (161)

137. **phase control** : the process of varying the instant within the cycle at which current conduction in a valve or an arm begins. ★ réglage de phase → *réglage 32.* R фазовое управление. D Zündeinsatzsteuerung. E regulación de fase. I regolazione di fase. N fasesturing; faseaansnijding. P sterowanie fazowe. S fasstyrning. (551,811)

138. **phase control factor** : → *factor 133*

139. **pole-changing control** : a method of obtaining two or more speeds from a polyphase motor, or group of motors working in parallel, by changing the number of poles. ★ régulation par changement du nombre de pôles → *régulation 26.* R регулирование изменением числа полюсов. D Steuerung durch Polumschaltung. E regulación por cambio de número de polos. I regolazione per variazione del numero di poli. N poolomschakeling. P regulacja przez zmianę biegunów. S hastighetsreglering genom polomkoppling. (811)

140. **power/frequency control** : secondary control of the active power of generating sets in response to variations in system frequency and to the variations in the grand total of active power exchanged with the interconnected systems. ★ réglage fréquence-puissance → *réglage 44.* R регулирование частоты и активной мощности. D Frequenz-Leistungs-Regelung. E regulación frecuencia-potencia. I regolazione frequenza-potenza. N vermogens/frequentieregeling. P regulacja mocy i częstotliwości. S frekvens-effektstyrning. (603)

141. **presentation control area** : → *area 33*

142. **primary control** (of the speed of generating sets) : the control of the speed of each generating set by its individual governor which ensures that the driving torque is a function of the system frequency. ★ réglage primaire → *réglage 52.* R первичное регулирование генерирующей установки. D Primärregelung (der Drehzahl von Generatorsätzen). E regulación primaria (de velocidad de grupos generadores). I regolazione primaria (del numero di giri di gruppi di produzione). N primaire toerenregeling van de produktie-eenheden. P regulacja obrotów generatorów; regulacja pierwotna obrotów. S frekvensstyrning. (603)

143. **program (of a control system)** : → *program 6*

144. **programme delivery control** (*Syn.* PDC (abbreviation)) : a mode of broadcasting programmes in which each part of a programme carries an identification signal to allow the user to preselect one more of these parts of the programme, to set his receiver in operation or to record the selected programme. ★ messagerie de programmes → *messagerie 1.* R управление выбором программ. (723)

145. **programmed control** : control in which a programme is executed. ★ commande à programme → *commande 19.* R программное управление. D Programmsteuerung; Programmregelung. E control programado. I controllo a programma. N volgordeprogramma; sequentieprogramma. P sterowanie programowe. S programstyrning. (351)

146. **pulse control** (*Syn.* chopper control) : the process of varying the starting and termination points of a repeated current conduction in a principle arm. ★ réglage par impulsion → *réglage 47.* R импульсное управление. D Pulssteuerung; Aussteuerung nach dem Pulsverfahren. E regulación por impulso; regulación por troceo. I regolazione per impulsi; regolazione per frazionamento. N pulssturing; hakkersturing; choppersturing. P sterowanie impulsowe. S pulsstyrning. (551)

147. **pulse control factor** : → *factor 140*

148. **pulse duration control** : pulse control at variable pulse duration and fixed frequency. ★ réglage par durée d'impulsion → *réglage 45.* R широтно-импульсное управление. D Pulsbreitensteuerung. E regulación por duración del impulso. I regolazione per durata dell'impulso. N pulsduursturing. P sterowanie szerokością impulsów. S pulsbreddsstyrning. (551)

149. **pulse frequency control** : pulse control at variable frequency and fixed pulse duration. ★ réglage par impulsions à fréquence variable → *réglage 48.* R частотно-импульсное управление. D Pulsfolgesteuerung (Pulsfrequenzsteuerung). E regulación por impulso de frecuencia variable. I regolazione per frequenza variabile degli impulsi. N pulsfrequentiesturing. P sterowanie częstotliwością impulsów. S pulsfrekvensstyrning. (551)

150. **quadrature (voltage) control** : voltage control by means of an additional variable quadrature voltage component. ★ réglage (de tension) en quadrature → *réglage 39.* R поперечное регулирование напряжения. D Querregelung. E regulación (de tensión) en cuadratura. I regolazione (di tensione) in quadratura. N dwarsregeling (van de spanning). P regulacja kwadraturowa napięcia w układzie dodawczym. S spänningsreglering i tvärled. (603)

151. **radial tracking control** : a servo control system for following radial track displacements: spiral track motion forwards, and periodic offsettings. ★ asservissement radial → *asservissement 1.* R радиальная сервосистема. D radiale Spursteuerung. E control de seguimiento radial. I servosistema di tracking radiale. N radiale spoorvolgregeling. P układ śledzenia ścieżki (na płycie bezrowkowej); ścieżkowanie poprzeczne. S radiell avspelningskontroll. (806)

152. **radio control** : the transmission by radio of driving control signals for one or more motor vehicles, either from a driver's cab at the head of a train or from a fixed location. ★ télécommande par radio → *télécommande 8.* R управление по радио. D Funkfernsteuerung. E control por radio. I telecomando radio. N radiobesturing. P sterowanie radiowe. S radiostyrning. (811)

153. **reactive-power voltage control** : voltage control by the adjustement of reactive power generation in a power system. ★ réglage de tension par puissance réactive → *réglage 40.* R регулирование напряжения реактивной

мощностью. D Spannungs-Blindleistungs-Regelung. E regulación de tensión por potencia reactiva. I regolazione di tensione mediante potenza reattiva. N spanningsregeling door middel van het blindvermogen. P regulacja napięcia za pomocą mocy biernej. S reaktiv spänningsreglering. (603)

154. reactor control : the intentional variation of the reaction rate in a reactor or the adjustment of reactivity to maintain a desired state of operation. ★ commande d'un réacteur → *commande 70.* D Reaktorsteuerung und -regelung. E control de un reactor. I regolazione di un reattore. N reactorregeling. P sterowanie reaktora. S reaktorstyrning. (026)

155. reflector control : control of a reactor by adjustment of the properties, position or quantity of the reflector in such a way as to change the reactivity. ★ commande par le réflecteur → *commande 95.* D Reflektorsteuerung. E control por reflector. I regolazione per mezzo del riflettore. N regeling met reflector. P sterowanie reaktora reflektorem. S reflektorstyrning. (026)

156. reject control : a manual control, the purpose of which is to interrupt the playing or selection of a disk at any time, to play the next record on the spindle, or to return the pick-up arm to its rest position. ★ commande de rejet → *commande 51.* R отказ. D Hand-Abschaltung. E control de rechazo. I comando di rigetto. N onderbreektoets. P ..... S återföring. (806)

157. reliability and maintainability control : the operational techniques and activities that are employed to satisfy given reliability performance and maintainability performance requirements of an item. ★ maîtrise de la fiabilité et de la maintenabilité → *maîtrise 1.* R контроль безотказности и ремонтопригодности. D Zuverlässigkeits-Lenkung. E control de la fiabilidad y de la mantenibilidad. I controllo dell'affidabilità e manutenibilità. N beheersing van betrouwbaarheid en onderhoudbaarheid. P sterowanie niezawodnością i obsługiwalnością. S tillförlitlighetsstyrning. (191)

158. remote control : control of an operation at a point distant from the controlled switching device. ★ commande à distance → *commande 18.* R дистанционное управление. D Fernsteuerung. E mando a distancia; telemando. I comando a distanza; telecomando. N besturing op afstand. P sterowanie zdalne. S avståndsmanövrering. (441)

159. residual voltage for zero current control : → *voltage 176*

160. resistance control (*Syn.* rheostatic control) : a method of controlling the starting current of electric motors by using variable resistors in series with the motor armatures. ★ régulation rhéostatique → *régulation 32.* R реостатное регулирование. D Widerstandssteuerung. E regulación reostática. I regolazione reostatica. N weerstandssturing. P regulacja rezystorowa. S motståndsstyrd hastighetsreglering. (811)

161. rheostatic control (*Syn.* resistance control) : → *control 160*

162. rotational control electromechanism (for a nuclear reactor) : an electromechanism designed to perform a rotational motion of one or several nuclear reactor control elements. ★ électromécanisme de commande rotative → *électromécanisme 2.* R электромеханическое устройство поворота регулирующих элементов (ядерного реактора). D Stellantrieb, drehend (für einen Kernreaktor). E electromecanismo de control rotativo (para un reactor nuclear). I elettromeccanismo di comando rotativo (di un reattore nucleare). N elektromechanisme voor rotatieregeling (bij een kernreactor). P elektromechanizm obrotowy napędu elementu regulacyjnego. S drivdon för roterande styrelement. (392)

163. secondary control (of active power in a system) : coordinated control of the active power supplied to the network by particular generators. ★ réglage secondaire → *réglage 53.* R вторичное регулирование активной мощности в энергосистеме. D Sekundärregelung (der Wirkleistung in einem Netz). E regulación secundaria (de potencia activa de una red). I regolazione secondaria (della potenza attiva di gruppi di produzione). N secundaire regeling van het werkzame vermogen in een systeem. P regulacja wtórna wytwarzania mocy czynnej. S effektstyrning. (603)

164. (secondary) power control operation : → *operation 59*

165. sequential control : control in which a sequential programme is executed. ★ commande séquentielle → *commande 108.* R секвенционное управление. D Ablaufsteuerung. E control secuencial. I controllo sequenziale. N volgorderegeling; sequentieregeling. P sterowanie sekwencyjne. S sekvensstyrning. (351)

166. sequential phase control : asymmetrical phase control such that the delay angles are determined according to a given sequence. ★ réglage de phase séquentiel → *réglage 35.* R последовательное фазовое управление. D Folgesteuerung. E regulación de fase secuencial. I regolazione di fase sequenziale. N fasesturing in volgorde. P sterowanie fazowe sekwencyjne. S sekvensfasstyrning. (551)

167. shunting control position : → *position 33*

168. single phase automatic reclosing control equipment (*Syn.* single pole automatic reclosing control equipment) : → *equipment 69*

169. single pole automatic reclosing control equipment : → *equipment 69*

170. sound control : all operations concerned with converting sound source signals into electrical signals intended to be incorporated in a sound programme. *Note.* — Sound control usually includes technical and artistic monitoring. ★ prise de son → *prise 27.* R управление звуком. (723)

171. sound control console (*Syn.* sound control desk) : → *desk 3*

172. sound control desk : → *desk 3*

173. sound control room : → *room 15*

174. spectral shift control : a special type of moderator control, in which the neutron spectrum is intentionally changed. ★ commande par déviation spectrale → *commande 88.* D Spektralsteuerung. E control por corrimiento espectral. I regolazione per spostamento dello spettro. N regeling met spectrumverschuiving. P sterowanie (reaktora) przesunięciem widma. S spektrumstyrning. (026)

175. standby hand control : a device to allow hand operation of a switchgroup normally operated by a motor. ★ commande auxiliaire à main → *commande 24.* R вспомогательное ручное управление. D handbetätigter Hilfssteuerschalter. E control auxiliar manual. I comando manuale ausiliario. N noodhandbesturingsschakelaars. P sterowanie (nastawnika) pomocnicze ręczne. S manuell reservmanöverutrustning. (811)

176. step-by-step control : electrical and mechanical devices stopping the motor-drive mechanism after completion of a tap change independently of the operating sequence of the control switch. ★ dispositif de marche cran par cran → *dispositif 52.* R устройство пошагового управления. D Schrittsteuerung. E dispositivo de marcha paso a paso. I dispositivo di controllo passo-passo. N stap-voor-stapbesturing. P sterowanie krokowe. S utrustning för stegvis styrning. (421)

177. stored program control (*Syn.* SPC (abbreviation)) : control of an automatic switching arrangement in which the call processing is determined by a program stored in an alterable store. ★ commande par programme enregistré → *commande 101.* R управление по записанной программе. D speicherprogrammierte Steuerung. E control por programa registrado. I controllo a programma registrato; SPC. N ..... P sterowanie według programu w pamięci. S programmeringsstyrning. (714)

178. stored program control (*Syn.* SPC (abbreviation)) : the control of an exchange by means of a set of instructions which are stored and can be modified. ★ commande par programme enregistré → *commande 102.* R программное управление; управление по записанной программе. D Speicherprogrammsteuerung. E control por programa registrado. I controllo a programma registrato. N besturing met opgeslagen programma; SPC (afkorting). P sterowanie programowane. S programstyrning. (721)

179. substation control room : → *room 18*

180. switching control pilot : → *pilot 17*

181. symmetrical control (single phase) : control by a device designed to operate in an identical manner on the positive and negative half cycles of an alternating voltage or current. *Note.* — On the basis of identical positive or negative half cycles of the input source : - generalized phase control is symmetrical if the current waveform is the same for both positive and negative half cycles ; - multicycle control is symmetrical if within each conduction period the number of positive and negative half cycles is equal. ★ commande symétrique → *commande 110.* R симметричное управление (при одной фазе). D symmetrische Steuerung (einphasig). E control simétrico (en monofásico). I controllo simmetrico. N enkelfasige

symmetrische regeling. P regulacja symetryczna (jednofazowa). S symmetrisk styrning. (161)

182. symmetrical phase control : phase control with equal delay angles in all principal arms of a fully controllable convertor connection or commutating group. ★ réglage de phase symétrique → *réglage 36.* R симметричное фазовое управление. D symmetrische Zündeinsatzsteuerung. E regulación de fase simétrica. I regolazione di fase simmetrica. N symmetrische fasesturing. P sterowanie fazowe symetryczne. S symmetrisk fasstyrning. (551)

183. synchronisation control : a function control used in synchronous transmission to produce a signal from which the synchronism or the correction of synchronism may be effected between terminals especially during periods when no other signals are being transmitted. ★ commande de synchronisation → *commande 54.* R синхронизирующий знак. D Synchronisationssteuerung. E control de sincronización. I controllo di sincronismo. N synchronisatiebewaking. P kontrola synchronizmu. S synkronisering. (721)

184. synchronous multicycle control : multicycle control in which the starting and stopping instants of the conduction intervals are synchronized with respect to the instantaneous values of line voltage. ★ commande synchrone par trains d'alternances → *commande 111.* R синхронное управление полупериодами переменного тока. D synchronisierte Vielperiodensteuerung. E control síncrono de los multiciclos. I controllo sincrono con treni di cicli. N synchrone meerperiodenregeling. P sterowanie wielocyklowe synchroniczne. S synkron sekvensperiodstyrning. (161)

185. system control station : → *station 39*

186. system demand control : the control of the power demand of the consumers on a power system. ★ ..... → . R регулирование нагрузки системы. D Laststeuerung. E control de demanda del sistema. I programmazione della domanda d'energia. N regeling van de netbelasting. P sterowanie zapotrzebowaniem energii. S belastningsstyrning. (603)

187. tangential tracking control : a servo control system for compensating time base errors, resulting, for example, from defects in the disk centring. ★ asservissement tangentiel → *asservissement 2.* R тангенциальная сервосистема. D tangentiale Spursteuerung. E control de seguimiento tangencial. I servosistema di tracking tangenziale. N tangentiële spoorvolgregeling. P kompensator błędów czasowych; ścieżkowanie wzdłużne. S tangentiell avspelningskontroll. (806)

188. (teleprinter) control unit : → *unit 65*

189. termination phase control : the process of varying the instant within the cycle at which current conduction in a valve or an arm terminates. ★ réglage d'extinction → *réglage 43.* R фазовое управление запиранием. D Löscheinsatzsteuerung. E regulación de extinción. I regolazione d'estinzione. N doofsturing. P sterowanie fazowe wyłączeniem prądu. S bakkantsstyrning. (551)

190. three phase automatic reclosing control equipment (*Syn.* three pole automatic reclosing control equipment) : → *equipment 82*

191. three pole automatic reclosing control equipment : → *equipment 82*

192. time divided control (*Syn.* time sharing (in control)) : a type of centralized control in which the controlling functional unit is used for the simultaneous processing of several calls, by interleaving the processing of individual calls. ★ (commande par) partage de temps → *partage 2.* R управление с разделением по времени. D zeitmultiple Steuerung. E control por división de tiempo. I controllo con tecnica a divisione di tempo. N tijdverdeelde besturing; tijdverdeling. P sterowanie według czasu. S tidsindelad styrning. (714)

193. tone control aperture : → *aperture 19*

194. traffic load control : a means of selectively restricting calls from trunks during high traffic periods. ★ régulation de surcharge de trafic → *régulation 22.* R регулирование избыточной нагрузки. D Verkehrslastregelung. E regulación de sobrecarga de tráfico. I limitazione del traffico entrante (di giunzione). N overbelastingsregeling. P sterowanie przeciążeniem ruchu. S trafikbegränsning. (714)

195. traffic load divided control (*Syn.* load sharing (in control)) : a type of distributed control in which the number of functional units provided for control is proportional to the anticipated busy hour traffic. ★ (commande par) partage de trafic → *partage 3.* R управление с разделением нагрузки. D Steuerung mit Lastteilung. E control por división de tráfico. I controllo con tecnica a suddivisione del carico. N belastingsverdeelde besturing; belastingsverdeling. P sterowanie według obciążenia. S trafikindelad styrning. (714)

196. transmission control (function) : a function control used solely to permit transmission over telecommunication networks. ★ commande de transmission → *commande 55.* R знак (функция) управления передачей. D Übertragungssteuerfunktion. E control de transmisión. I comando di trasmissione. N overdrachtsbesturing(-sfunctie). P sterowanie transmisją (funkcja). S överföringsstyrning. (721)

197. transmit flow control : a flow control such that the rate at which data are transmitted from one data terminal equipment is not more than the rate at which they can be received by the remote terminal. *Notes. 1* — This procedure may apply between a data terminal equipment and the adjacent data switching exchange or between two data terminals. In the latter case the transfer rate may be controlled due to network or remote data terminal equipment requirements. *2* — This procedure may operate independently in the two directions of data transfer thus permitting different data transfer rates in these directions. ★ commande de flux d'émission → *commande 39.* R управление потоком передачи. D Sendeflußregelung. E control de flujo de emisión. I controllo di flusso in trasmissione. N overdrachtbesturing. P kontrola szybkości nadawania. S flödesstyrning vid sändning. (721)

198. type of control : type of action of the controlling equipment (for instance: continuous control, step control, proportional control, integral control, composite control, etc.). ★ mode de régulation → *mode 42.* R тип регулирования. D Regelverhalten. E tipo de control. I tipo dell'azione di controllo. N soort van regeling. P rodzaj regulacji. S ..... (351)

199. unilateral control : control between two synchronization nodes such that the frequency of the clock of only one of these nodes is influenced by timing information derived from the clock of the other node. ★ synchronisation unilatérale → *synchronisation 43.* R одностороннее управление. D einseitige Steuerung. E sincronización unilateral; control unilateral. I sincronizzazione unilaterale. N unilaterale synchronisatie. P sterowanie jednostronne. S envägsstyrning. (704)

200. variable voltage control : a method of speed control in which the voltage applied to the motors is varied by means of a generator, transformer or electronic power convertor supplying a variable output voltage. ★ régulation par variation de tension → *régulation 31.* R управление переменным напряжением. D Spannungssteuerung. E regulación por variación de tensión. I regolazione di tensione. N spanningssturing. P regulacja napięciowa. S spänningsstyrd hastighetsreglering. (811)

201. voltage control : the adjustement of the network voltages to values within a given range. ★ réglage de tension → *réglage 37.* R регулирование напряжния. D Spannungsregelung. E regulación de tensión. I regolazione di tensione. N spanningsregeling. P regulacja napięcia. S spänningsreglering. (603)

202. voltage phase control : a method of controlling the voltage supplied to the motors by using phase control of a convertor. ★ régulation de tension par réglage de phase → *régulation 23.* R фазовое регулирование. D Anschnittsteuerung. E regulación de tensión por control de fase. I regolazione di fase. N fasesturing; faseaansnijding. P regulacja napięciowa fazowa. S fasspänningsreglering. (811)

203. volume control : a control for adjusting the sound power output from a headset or loudspeaker. ★ commande de volume (sonore) → *commande 58.* R регулировка громкости. (723)

204. wired program control : control of an automatic switching arrangement in which the call processing is determined by a program embodied in a pattern of fixed physical interconnections among a group of devices. ★ commande par programme câblé → *commande 100.* R управление на основе жестко закоммутированной программы. D verdrahtete Programmsteuerung. E control por programa cableado. I controllo a programma cablato. N ..... P sterowanie według programu w okablowaniu. S trådbunden styrning. (714)

controlgear

1. controlgear : a general term covering switching devices and their combination with associated control, measuring, protective and regulating equipment, also assemblies of such devices and equipment with associated interconnections, accessories,

enclosures and supporting structures, intended in principle for the control of electric energy consuming equipment. ★ appareillage de commande → *appareillage 3.* R аппаратура управления. D Schaltanlagen und/oder Schaltgeräte für Energieverbrauch. E aparamenta de mando. I apparecchiatura di comando. N schakelmaterieel voor verbruikende toestellen. P aparatura łączeniowo-sterownicza. S ..... (441)

2. **indoor switchgear and controlgear** : → *switchgear 2*
3. **insulation-enclosed switchgear and controlgear** : → *switchgear 3*
4. **metal-enclosed switchgear and controlgear** : → *switchgear 4*
5. **outdoor switchgear and controlgear** : → *switchgear 5*
6. **switchgear and controlgear** : → *switchgear 7*
7. **switchgear and controlgear** : → *switchgear 8*

controllable

1. **controllable load** : → *load 7*
2. **controllable set** : → *set 11*
3. **fully controllable connection** : → *connection 27*

controlled

1. **automatic transmitter with controlled tape-feed mechanism** : → *transmitter 3*
2. **control characteristic of a controlled system** : → *characteristic 26*
3. **controlled area** : → *area 7*
4. **controlled atmosphere** : → *atmosphere 1*
5. **controlled bridge** : → *bridge 10*
6. **controlled circulation boiler** : → *boiler 3*
7. **controlled conventional no-load direct voltage** : → *direct voltage 1*
8. **controlled current source** : → *source 6*
9. **controlled ideal no-load direct voltage** : → *direct voltage 2*
10. **controlled maintenance** : → *maintenance 6*
11. **controlled rectifier** : → *rectifier 1*
12. **controlled slip** : → *slip 1*
13. **controlled system** : → *system 39*
14. **controlled variable** : → *variable 1*
15. **controlled voltage source** : → *voltage source 1*
16. **directly controlled equipment** : → *equipment 24*
17. **electrically controlled brake** : → *brake 11*
18. **oven controlled crystal oscillator** : → *oscillator 3*
19. **overtone controlled oscillator** : → *oscillator 4*
20. **voltage controlled bus** : → *bus 14*
21. **voltage controlled crystal oscillator** : → *oscillator 8*

controller

1. **controller** : in the controlling equipment of a feedback control system, an element that combines two or more functions of the controlling system; one of these must be comparison between a feedback signal and a reference signal; the other functions may be amplification, equalization, etc. ★ régulateur → *régulateur 2.* R регулятор. D Regler. E controlador; regulador. I regolatore. N regelaar. P regulator. S regulator. (351)
2. **drum controller** : a switchgroup in which the moving contacts are arranged on the surface of an insulated drum against which the fixed contacts bear. ★ combinateur à tambour → *combinateur 4.* R барабанный групповой переключатель. D Walzenschaltwerk. E combinador de tambor. I combinatore a tamburo. N wals. P nastawnik walcowy. S valskontroller. (811)
3. **electronic a.c. power controller** : a unit which is able to operate as a controllable direct electronic a.c. voltage convertor as well as an electronic a.c. switch. ★ régleur électronique de puissance à courant alternatif → *régleur 3.* R электронный силовой контроллер переменного тока. D Wechselstromsteller. E regulador electrónico (de potencia) de corriente alterna. I regolatore elettronico di potenza a corrente alternata. N elektronische wisselstroomvermogenregelaar. P sterownik mocy przemiennoprądowy (elektroniczny). S vs-kontroller. (551)
4. **electronic d.c. power controller** : a unit which is able to operate as a controllable direct electronic d.c. convertor as well as an electronic d.c. switch. ★ régleur électronique de puissance à courant continu → *régleur 4.* R электронный силовой контроллер постоянного тока. D ..... E regulador electrónico (de potencia) de corriente continua. I regolatore elettronico di potenza a corrente continua. N elektronische gelijkstroomvermogenregelaar. P sterownik mocy stałoprądowy (elektroniczny). S ls-kontroller. (551)
5. **level controller** (in a network) : device for maintaining one or more signals at a constant level by means other than the signal itself such as a pilot signal, a temperature compensator, or by remote control etc. ★ régulateur de niveau → *régulateur 6.* R регулятор уровня. (723)
6. **master controller** : a manually operated switchgroup used for controlling the operation of the traction equipment on one or more motor vehicles working in multiple. ★ manipulateur → *manipulateur 1.* R контроллер машиниста. D Fahr-Steuerschalter. E manipulador. I manipolatore. N rijcontroller. P nastawnik pojazdowy ręczny centralny. S körkontroller. (811)
7. **motor-driven controller** : a control switchgroup driven by a motor. ★ combinateur pilote → *combinateur 11.* R контроллер с приводом от двигателя. D indirekt angetriebenes Steuerschaltwerk. E combinador piloto. I combinatore (con comando) a motore. N servo-bediende schakelaars. P nastawnik sterowniczy o napędzie silnikowym. S motordriven kontaktor. (811)
8. **power controller** : a manually operated power switchgroup used for the driving control of low power vehicles. ★ contrôleur → *contrôleur 1.* R силовой контроллер. D Fahrschalter. E controlador. I combinatore a comando diretto (di potenza). N handbediende hoofdstroomschakelwals. P nastawnik pojazdowy. S kontroller. (811)

controlling

1. **controlling equipment** (*Syn.* controlling system) : → *system 40*
2. **controlling power range** : → *range 9*
3. **controlling (repeater) station** : → *station 6*
4. **controlling system** : → *system 40*
5. **current controlling transductor** : → *transductor 2*
6. **electronic controlling elements for current** : active electronic components with at least three electrodes (e.g. for a tube, an anode, a cathode and a control grid) acting as a current path between anode and cathode when an appropriate signal is applied to the control electrode. *Note.* — Examples of such controlling elements are: the thyratron (gas-filled tube with control grid), the thyristor or semi-conductor controlled rectifier (four-layer semi-conducting device with one control electrode, called gate), the silicon controlled switch (four-layer semi-conducting device with two control electrodes called cathode gate and anode gate), the triac (which in principle, is a special connection of two silicon controlled rectifiers). ★ éléments électroniques de réglage du courant → *élément 77.* R электронные управляющие элементы. D Stromrichter. E elementos electrónicos de control de la corriente. I raddrizzatori controllati. N elektronische elementen voor het sturen van een elektrische stroom. P elementy elektronowe prądowe (sterowane). S ..... (351)
7. **final controlling element** : element of the forward path which directly changes the manipulated variable. ★ élément de réglage final → *élément 37.* R исполнительное устройство. D Stellglied. E elemento final de control. I elemento finale di controllo. N corrigerend orgaan. P urządzenie wykonawcze. S ..... (351)
8. **voltage controlling transductor** : → *transductor 14*

control-motor

1. **control-motor actuator** : → *actuator 5*

convection

1. **convection coefficient** : → *coefficient 12*
2. **thermal convection** : a mode of heat transmission in which the heat transfer results from the interchange of a part of a fluid with another part at a different temperature. ★ convection (thermique) → *convection 2.* R тепловая конвекция. D Konvektion. E convección térmica. I convezione (termica). N (warmte)convectie. P konwekcja. S (värme)konvektion. (841)
3. **thermal forced convection** : a mode of heat transmission by thermal convection in which the movement of the fluid is produced and accelerated with the help of external mechanical

means, for example a fan. ★ convection (thermique) forcée → *convection 3.* R принудительная тепловая конвекция. D verstärkte Konvektion. E convección térmica forzada. I convezione (termica) forzata. N gedwongen convectie. P konwekcja wymuszona. S forcerad konvektion. (841)

4. **thermal natural convection** : a mode of thermal convection in which the movement of the fluid is caused by its density difference. ★ convection (thermique) naturelle → *convection 4.* R естественная тепловая конвекция. D natürliche Konvektion. E convección térmica natural. I convezione (termica) naturale. N natuurlijke convectie. P konwekcja naturalna. S naturlig konvektion; egenkonvektion. (841)

conventional

1. **controlled conventional no-load direct voltage** : → *direct voltage 1*
2. **conventional degree of distortion** : → *degree 1*
3. **conventional error** : → *error 16*
4. **conventional flux density** (*Syn.* 2 200 m/s flux density) : → *flux density 17*
5. **conventional fusing current** : → *current 34*
6. **conventional impulse withstand voltage** : → *voltage 36*
7. **conventional no-load direct voltage** : → *direct voltage 3*
8. **conventional non-fusing current** : → *current 35*
9. **conventional non-tripping current** : → *current 36*
10. **conventional operating current** : → *current 37*
11. **conventional thermal power station** : → *power station 4*
12. **conventional touch voltage limit** : → *voltage 37*
13. **conventional tripping current** : → *current 38*
14. **conventional true value** : → *value 4*
15. **conventional value** : → *value 5*

convergence

1. **convergence** : the increase of the amplitude of a specified electromagnetic wave at a point, due to the curvature of reflecting surfaces or to the space variations of refractive index, on the propagation path of the wave. ★ convergence → *convergence 2.* D Konvergenz; Fokussierung. P zbieżność; konwergencja. (705)
2. **convergence** (in a display) : a condition in which light from a projection system or electron beams of a multi-gun display arrive at the correct part of the screen at the correct time, so that the images corresponding to the three primary colours are correctly superposed. ★ convergence → *convergence 3.* R совмещение (в воспроизводящем устройстве). (723)
3. **convergence electrode** : → *electrode 19*
4. **convergence factor** : → *factor 27*
5. **convergence gain** : → *gain 7*
6. **convergence magnet** : → *magnet 2*
7. **convergence surface** : → *surface 3*
8. **convergence zone** : → *zone 2*
9. **dynamic convergence** : the convergence of electron beams on a specified surface during the scanning process. ★ convergence dynamique → *convergence 4.* R динамическое сведение. D dynamische Konvergenz. E convergencia dinámica. I focalizzazione dinamica. N dynamische convergentie. P zbieżność dynamiczna. S dynamisk konvergens. (531)
10. **dynamic convergence** : convergence achieved by the application of magnetic or electrical fields, the amplitudes of which vary with the deflections of the electron beams. ★ convergence dynamique → *convergence 5.* R динамическое совмещение. (723)
11. **electron-gun convergence ratio** (*Syn.* beam-compression factor) : → *beam-compression 1*
12. **faulty convergence** : faulty superposition of the three primary colour images in a picture signal source or display. ★ défaut de convergence → *défaut 16.* R рассовмещение. (723)
13. **static convergence** : convergence achieved by the application of constant magnetic or electrical fields acting on each of the electron beams. ★ convergence statique → *convergence 6.* R статическое совмещение. (723)

conversation

1. **conversation** (in telecommunication) : an exchange of information between terminals. *Note.* — This term is specifically reserved for an end-to-end communication whether provided by means of a continuous connection or a virtual connection. ★ conversation → *conversation 2.* R разговор (в электросвязи). D Gespräch; Nachrichtenübertragung. E conversación (en telecomunicación). I conversazione. N informatie-uitwisseling. P wymiana (telekomunikacyjna). S samtal. (701,714)
2. **conversation test** : → *test 17*
3. **conversation time** : → *time 31*
4. **telex conversation mode** : → *mode 79*

conversational

1. **conversational mode** : → *mode 10*

conversion

1. **A/D conversion** (*Syn.* analogue-to-digital conversion) : → *conversion 3*
2. **a.c. conversion factor** : → *factor 2*
3. **analogue-to-digital conversion** (*Syn.* A/D conversion (abbreviation)) : a process designed to convert an analogue signal into a digital signal with essentially the same information. *Note.* — There is always some minor loss of information in analogue-to digital conversion. ★ conversion analogique-numérique → *conversion 4.* R аналого-цифровое преобразование. D Analog-Digital-Wandlung; A/D-Wandlung (Abkürzung). E conversión analógico — numérica; conversión A/N; conversión analógico — digital. I conversione analogico/numerica; conversione A/N (abbreviazione). N analoog/digitaal-omzetting; A/D-omzetting. P przewarzanie analogowe w cyfrowe. S analog-digitalomvandling. (303,704)
4. **code conversion** : the changing of the representation of information according to a given code into a representation of the same information according to another code. *Example* Conversion of character signals or groups of character signals in one telegraph code into corresponding signals or group of signals in an other code. ★ transcodage → *transcodage 2.* R преобразование кода. D Code-Umsetzung. E transcodificación. I conversione di codice. N codeconversie; code-omzetting. P konwersja kodu; przekodowanie. S kodkonvertering. (702,721)
5. **common mode conversion** : the process by which a differential mode voltage is produced in response to a common mode voltage. ★ conversion du mode commun → *conversion 9.* R преобразование симметричного напряжения в общее несимметричное. D unsymmetrische Umwandlung. E conversión de modo común. I conversione del modo comune. N in-fase omzetting. P przemiana napięcia fazowego. S ..... (161)
6. **conversion** (reactor technology) : nuclear transformation of a fertile substance into a fissile substance. ★ conversion → *conversion 2.* D Konversion. E conversión (tecnología de los reactores.). I conversione (tecnologia dei reattori.). N conversie. P konwersja paliwa. S konversion. (026)
7. **conversion electron** : → *electron 5*
8. **conversion factor** : → *factor 28*
9. **conversion of electricity** : the changing of the characteristics of the form and frequency of voltage and current by means of a converter. ★ conversion d'énergie électrique → *conversion 8.* R преобразоавание электрической энергии. D Umformung elektrischer Energie. E conversión de energía eléctrica. I conversione d'energia elettrica. N omzetting van elektrische energie. P przekształcanie energii elektrycznej. S omformning (av elkraft). (601)
10. **conversion quantum efficiency** : → *efficiency 8*
11. **conversion rate** : → *rate 13*
12. **conversion ratio** : → *ratio 22*
13. **conversion transconductance** : → *transconductance 1*
14. **D/A conversion** (*Syn.* digital-to-analogue conversion) : → *conversion 17*
15. **d.c. conversion factor** : → *factor 34*
16. **delta-wye conversion** (*Syn.* delta-star transformation) : a network conversion by reduction of the number of meshes. ★ transformation triangle-étoile → *transformation 13.* R преобразование треугольника в звезду. D Dreieck-Stern-Umwandlung. E transformación triángulo-estrella; conversión triángulo-estrella. I trasformazione triangolo-stella. N driehoek-stertransformatie.

P przekształcenie trójkąt-gwiazda. S triangel-stjärntransformering. (603)

17. **digital-to-analogue conversion** (*Syn.* D/A conversion (abbreviation)) : a process designed to convert a digital signal into an analogue signal with essentially the same information. *Note.* — Normally, there is no significant loss of information in digital-to-analogue conversion. ★ conversion numérique-analogique → *conversion 17.* R цифро-аналоговое преобразование. D Digital-Analog-Wandlung; D/A-Wandlung (Abkürzung). E conversión numérico — analógica; conversión N/A; conversión digito — analógica. I conversione numerico/analogica; conversione N/A (abbreviazione). N digitaal/analoog-omzetting; D/A-omzetting (afkorting). P przetwarzanie cyfrowe w analogowe. S digital-analogomvandling. (303,704)
18. **(electronic) d.c.(power) conversion** : electronic conversion from d.c. to d.c. . ★ conversion (électronique) (de puissance) de courant continu → *conversion 11.* R (электронное)(силовое) преобразование постоянного напряжения. D Gleichstromumrichten. E conversión (electrónica)(de potencia) de corriente continua. I conversione di corrente continua. N elektronische weerstandssturing (van vermogen). P przekształcanie stałoprądowe (elektroniczne). S ls-omriktning. (551)
19. **(electronic)(power) a.c. conversion** : electronic conversion from a.c. to a.c. ★ conversion (électronique) (de puissance) de courant alternatif → *conversion 10.* R (электронное)(силовое) преобразование параметров переменного тока. D Wechselstromumrichten. E conversión (electrónica)(de potencia) de corriente alterna. I conversione (elettronica) (di potenza) di corrente alternata. N elektronische wisselstroomomzetting. P przekształcanie przemiennoprądowe (elektroniczne). S vs-omriktning. (551)
20. **(electronic)(power) conversion** : change of one or more of the characteristics of an electric power system essentially without appreciable loss of power by means of electronic valve devices. Characteristics are for example, voltage, number of phases and frequency including zero frequency. ★ conversion (électronique)(de puissance) → *conversion 12.* R (электронное)(силовое) преобразование. D Stromrichten. E conversión (electrónica) (de potencia). I conversione (elettronica) (di potenza). N (elektronische) vermogensomzetting. P przekształcanie elektroniczne (mocy). S omriktning. (551)
21. **energy conversion efficiency** : → *efficiency 22*
22. **internal conversion** : the emission of an electron from an atom due to the liberation of energy from its excited nucleus. ★ conversion interne → *conversion 13.* R внутренняя конверсия. D innere Umwandlung. E conversion interna. I conversione interna. N interne conversie. P konwersja wewnętrzna. S inre konversion. (881)
23. **linear conversion** : a conversion for which the quotient of each change in the output value to the corresponding change in the input is intended to be constant. ★ conversion linéaire → *conversion 14.* R линейное преобразование. D lineare Umsetzung. E conversión lineal. I conversione lineare. N lineaire omzetting. P przetwarzanie linearne. S linjär omvandling. (303)
24. **mode conversion** (in waveguides) : the transformation of an electromagnetic wave from one mode of propagation to one or more other modes. ★ conversion de mode → *conversion 5.* R преобразование типов колебаний (в волноводах). D Modenwandlung (in Wellenleitern). E conversión de modo (en guíaondas). I conversione di modo (nelle guide d'onda). N modusomzetting. P transformacja rodzajów (w falowodzie). S modomvandling. (726)
25. **mode conversion gain** : → *gain 24*
26. **mode conversion loss** : → *loss 67*
27. **network conversion** (*Syn.* network transformation) : the transformation of a network into a calculated equivalent network. ★ transformation d'un réseau → *transformation 11.* R преобразование электрической сети. D Netzumwandlung. E transformación de una red; conversión de una red. I trasformazione di una rete. N nettransformatie. P przekształcenie sieci. S nätreduktion. (603)
28. **non-linear conversion** : a conversion for which the quotient of each change in the output to the corresponding change in the input value is not constant. *Note.* — Logarithmic conversion is a typical kind of non-linear conversion. ★ conversion non linéaire → *conversion 16.* R нелинейное преобразование. D nichtlineare Umsetzung. E conversión no lineal. I conversione non lineare. N niet-lineaire omzetting. P przetwarzanie nielinearne. S icke linjär omvandling. (303)
29. **speed conversion** : the conversion of the modulation rate of a received signal to a different modulation rate suitable for the subsequent equipment. ★ conversion de rapidité → *conversion 7.* R преобразование скорости. D Geschwindigkeitsumsetzung. E conversión de velocidad. I conversione di velocità. N snelheidsomzetting. P konwersja szybkości. S ratomvandling. (721)
30. **standards conversion** : conversion of a television signal coded in accordance with a given television system into the corresponding signal for another system, particularly using different scanning frequencies. ★ conversion de normes → *conversion 6.* R преобразование стандартов. (723)
31. **star-polygon conversion** (*Syn.* star-polygon transformation) : a network conversion by reduction of the number of nodes. ★ transformation étoile-polygone → *transformation 12.* R преобразование звезды в многоугольник. D Stern-Vieleck-Umwandlung. E transformación estrella-polígono; conversión estrella-polígono. I trasformazione stella-triangolo. N ster-veelhoektransformatie. P przekształcenie gwiazda-wielobok. S stjärn-polygontransformering. (603)
32. **(total) conversion time** : → *time 214*

converter

1. **amplitude-to-time converter** : a sub-assembly, designed to provide, according to the type of apparatus: a) an output signal the duration of which is proportional to the amplitude of the input signal; b) two output signals separated by a time interval proportional to the amplitude of the input signal. ★ convertisseur amplitude-temps → *convertisseur 11.* R амплитудно-временной преобразователь. D Amplituden-Zeit-Wandler. E convertidor amplitud-tiempo. I convertitore ampiezza-tempo. N amplitude-tijdomzetter. P przetwornik amplituda-czas. S pulshöjd-tidomvandlare. (391)
2. **analog-to-digital converter** (USA) : a sub-assembly designed to provide an output signal which is a digital representation of the analog input signal. ★ convertisseur analogique-numérique → *convertisseur 12.* R аналого-цифровой преобразователь. D Analog-Digital-Wandler. E convertidor analógiconumérico. I convertitore analogico-numerico. N analoog/digitaalomzetter. P przetwornik analogowocyfrowy. S analog-digitalomvandlare; A/D-omvandlare. (391)
3. **code converter** (*Syn.* transcoder) : a device for changing the representation of information according to a given code into representation of the same information according to another code. ★ transcodeur → *transcodeur 1.* R кодовый преобразователь. D Codekonverter; Transcodierer. E convertidor de código; transcodificador. I trascodificatore. N code-omzetter. P transkoder; przetwornik kodu. S kodkonverterare. (702,721)
4. **converter reactor** : → *reactor 6*
5. **converter substation** : → *substation 4*
6. **digital time converter** : a sub-assembly designed to provide an output signal which is a digital representation of the time interval between two input signals. ★ convertisseur numérique de temps → *convertisseur 47.* R преобразователь интервала времени в цифровой код. D Zeit-Digital-Wandler. E convertidor numérico de tiempo. I convertitore numerico di tempo. N digitale tijdmeter. P przetwornik cyfrowo-czasowy. S digital tidomvandlare. (391)
7. **frequency converter** (*Syn.* frequency changer) : → *changer 4*
8. **frequency converter substation** : → *substation 8*
9. **frequency converter tube** : → *tube 36*
10. **mode converter** : a device for converting an electromagnetic wave from one mode of propagation to another. ★ convertisseur de mode → *convertisseur 24.* R конвертер типов колебаний. D Modenwandler. E convertidor de modos. I convertitore di modo. N modusomzetter. P przekształtnik rodzaju pola (fali). S modomvandlare. (726)
11. **modulation converter** : a telegraph repeater in which the input and output telegraph signals are represented with the same code, but use different types of modulation. ★ translation

convertisseuse de modulation → *translation 1.* R преобразователь модуляции. D Modulationswandler. E traslación convertidora de modulación; convertidor de modulación. I convertitore di modulazione. N modulatieomzetter. P translacja telegraficzna przelotowa. S moduleringsomvandlare. (721)

12. **neutron converter** : a device placed in a flux of slow neutrons to produce fast neutrons. ★ convertisseur de neutrons → *convertisseur 25.* D Neutronenkonverter. E convertidor de neutrones. I convertitore di neutroni. N neutronenomzetter. P konwertor neutronowy. S neutronkonverter. (026)
13. **parallel-to-serial converter** (*Syn.* serializer) : a device for converting a group of signal elements which are all presented simultaneously, into a corresponding sequence of consecutive signal elements, which represents the same information. ★ convertisseur parallèle-série → *convertisseur 48.* R параллельно-последовательный преобразователь. D Parallel-Serien-Wandler; Serialisierer. E convertidor paralelo-serie; serializador. I convertitore parallelo-serie; serializzatore. N parallel-serie-omzetter. P przetwornik równoległo-szeregowy. S parallell-serieomvandlare. (702,704)
14. **radiotelegraph converter** : a device which accepts telegraph signals at audio frequency or intermediate frequency and converts them into signal elements capable of operating a telegraph recorder. ★ convertisseur de signaux radiotélégraphiques → *convertisseur 32.* R радиотелеграфный преобразователь. D Telegrafenfunkumsetzer. E convertidor de señales radiotelegráficas; detector de señales (radiotelegráficas). I convertitore di segnali radiotelegrafici. N radiotelegraaf-omzetter. P konwerter radiotelegraficzny. S radiotelegrafomvandlare. (721)
15. **serial-to-parallel converter** (*Syn.* deserializer) : a device for converting a sequence of consecutive signal elements into a corresponding group of signal elements, all presented simultaneously, which represents the same information. ★ convertisseur série-parallèle → *convertisseur 51.* R последовательно-параллельный преобразователь. D Serien-Parallel-Wandler; Entserialisierer. E convertidor serie-paralelo. I convertitore serie-parallelo. N serie-parallelomzetter. P przetwornik szeregowo-równoległy. S serie-parallellomvandlare. (702,704)
16. **signal converter** : device which changes a standardized signal into a different standardized signal, the physical nature of the output being the same as that of the input. ★ convertisseur de signal → *convertisseur 31.* R преобразователь сигнала. D Signalwandler. E convertidor de señal. I convertitore di segnale. N signaalomzetter. P przekształnik sygnału. S signalomformare. (351)
17. **speed converter concentrator** : → *concentrator 8*
18. **television standards converter** : equipment for television standards conversion. ★ convertisseur de normes → *convertisseur 26.* R преобразователь (телевизионных) стандартов. (723)
19. **time-to-amplitude converter** : a sub-assembly designed to provide, according to the type of apparatus: a) an output signal the amplitude of which is proportional to the time interval between two input signals; b) an output signal the amplitude of which is proportional to the duration of the input signal. ★ convertisseur temps-amplitude → *convertisseur 54.* R время-амплитудный преобразователь. D Zeit-Amplituden-Wandler. E convertidor tiempo-amplitud. I convertitore tempo-ampiezza. N tijd-amplitudeomzetter. P przetwornik czas-amplituda. S tid-pulshöjdsomvandlare. (391)

convertor

1. **auxiliary convertor** : a convertor providing power for auxiliary services e.g. lighting, battery charging, air conditioning, control circuits, etc. ★ convertisseur auxiliaire → *convertisseur 13.* R вспомогательный преобразователь. D Hilfsumformer. E convertidor auxiliar. I convertitore ausiliario. N hulpomzetter. P przekształtnik pomocniczy. S hjälpkraftomformare. (811)
2. **basic convertor connection** : → *connection 5*
3. **characteristic (curve) of a convertor** : → *characteristic 14*
4. **code convertor** : a device which converts a coded digital input signal into a differently coded digital output signal. ★ convertisseur de code → *convertisseur 14.* R преобразователь кодов. D Codeumsetzer. E convertidor de código. I convertitore di codice. N code-omzetter. P przetwornik kodu; konwerter kodu. S kodomvandlare. (303)
5. **commutation (in a convertor)** : → *commutation 11*
6. **commutator type frequency convertor** : a polyphase machine, the rotor of which has one or two windings connected to collector rings and to a commutator. By feeding one set of terminals with a voltage of given frequency, a voltage of another frequency may be obtained from the other set of terminals. ★ convertisseur de fréquence à collecteur → *convertisseur 20.* R коллекторный преобразователь частоты. D Kommutator-Frequenzwandler. E convertidor de frecuencia de colector. I convertitore di frequenza a collettore. N commutator-frequentieomzetter. P przetwornica częstotliwości komutatorowa. S frekvensomformare med kommutator. (411)
7. **convertor** : a set of equipment, static or rotating, to convert one type of electric current to another type different in nature, voltage and/or frequency. ★ convertisseur → *convertisseur 4.* R преобразователь. D Umformer. E convertidor. I convertitore. N omzetter. P przekształtnik. S omformare. (411,811)
8. **convertor arm** : → *arm 6*
9. **convertor connection** : → *connection 23*
10. **convertor section of a double convertor** : → *section 4*
11. **d.c. chopper convertor** (*Syn.* direct d.c. convertor) : → *convertor 14*
12. **d.c. convertor** : a convertor for the conversion of direct current to direct current of a different voltage. ★ convertisseur de courant continu → *convertisseur 16.* R преобразователь постоянного тока. D Gleichstromumformer. E convertidor de corriente continua. I convertitore di corrente continua. N gelijkstroomomzetter. P przekształtnik prądu stałego. S likströmsomformare. (811)
13. **direct a.c.(power) convertor** : an a.c. convertor without an intermediate d.c. link. ★ convertisseur (de puissance) direct de courant alternatif → *convertisseur 29.* R непосредственный (силовой) преобразователь параметров переменного тока. D (Wechselstrom-)Direktumrichter. E convertidor (de potencia) directo de corriente alterna. I convertitore diretto di corrente alternata. N directe wisselstroomomzetter. P przekształtnik przemiennoprądowy pośredni. S vs-omriktare utan ls-mellanled. (551)
14. **direct d.c. convertor** (*Syn.* d.c. chopper convertor) : a d.c. convertor without an intermediate a.c. link. ★ hacheur → *hacheur 2.* R непосредственный преобразователь постоянного напряжения; импульсный преобразователь постоянного напряжения. D Gleichstromsteller. E convertidor directo de corriente continua; convertidor troceador de corriente continua. I convertitore diretto di corrente continua. N directe gelijkstroomomzetter; gelijkstroomhakkeromzetter; gelijkstroomchopperomzetter. P przekształtnik stałoprądowy bezpośredni. S ls-omriktare utan vs-mellanled. (551)
15. **double convertor** : a reversible convertor for connection to a d.c. system (containing two sections) with direct current in both direction. ★ convertisseur double → *convertisseur 35.* R двухкомплектный преобразователь. D Doppelstromrichter (Umkehrstromrichter). E convertidor doble. I convertitore doppio. N tweevoudige omzetter. P przekształtnik (rewersyjny sterowany) obukierunkowy. S dubbelströmriktare. (551)
16. **(electronic) a.c. voltage convertor** : an electronic a.c. convertor changing the voltage. ★ convertisseur (électronique) de tension alternative → *convertisseur 42.* R (электронный) преобразователь переменного напряжения. D Wechselspannungsumrichter. E convertidor (electrónico) de tensión alterna. I convertitore (elettronico) di tensione alternata. N (elektronische) wisselspanningsomzetter. P przekształtnik napięcia przemiennego. S vs-omriktare för spänning. (551)
17. **(electronic) a.c.(power) convertor** : an electronic convertor for a.c. conversion. ★ convertisseur (électronique) (de puissance) de courant alternatif → *convertisseur 41.* R (электронный)(силовой) преобразователь параметров переменного тока. D (Wechselstrom-)Umrichter. E convertidor (electrónico)(de potencia) de corriente alterna. I convertitore di corrente alternata. N elektronische wisselstroomomzetter. P przekształtnik przemiennoprądowy (elektroniczny). S vs-omriktare. (551)
18. **electronic convertor** (*Syn.* static convertor) : a convertor having no moving parts and notably using semi-conductor

rectifiers. ★ convertisseur électronique → *convertisseur 37.* R электронный преобразователь; статический преобразователь. D statischer Umformer. E convertidor electrónico; convertidor estático. I convertitore elettronico. N statische omzetter. P przekształtnik statyczny. S statisk omriktare. (811)

19. (electronic) d.c. convertor : an electronic convertor for d.c. conversion. ★ convertisseur (électronique) de courant continu → *convertisseur 38.* R (электронный) преобразователь постоянного напряжения. D Gleichstromumrichter. E convertidor (electrónico) de corriente continua. I convertitore (elettronico) di corrente continua. N (elektronische) gelijkstroomomzetter. P przekształtnik stałoprądowy (elektroniczny). S ls-omriktare. (551)

20. (electronic) frequency convertor : an electronic a.c. convertor for changing the frequency. ★ convertisseur (électronique) de fréquence → *convertisseur 39.* R (электронный) преобразователь частоты. D Frequenzumrichter. E convertidor (electrónico) de frecuencia. I convertitore (elettronico) di frequenza. N (elektronische) frequentieomzetter. P przemiennik częstotliwości (elektroniczny). S frekvensomriktare. (551)

21. (electronic) phase convertor : an electronic a.c. convertor for changing the number of phases. ★ convertisseur (électronique) de phase → *convertisseur 40.* R (электронный) преобразователь числа фаз. D Phasenzahlumrichter. E convertidor (electrónico) de fase. I convertitore (elettronico) di fase. N (elektronische) faseomzetter. P przekształtnik liczby faz (elektroniczny). S fastalsomriktare. (551)

22. (electronic)(power) convertor : an operative unit for electronic power conversion comprising one or more electronic valve devices, transformers and filters if necessary and auxiliaries if any. ★ convertisseur (électronique)(de puissance) → *convertisseur 43.* R (электронный)(силовой) преобразователь. D Stromrichter. E convertidor (electrónico)(de potencia). I convertitore (elettronico) (di potenza). N (elektronische)(vermogens-)omzetter. P przekształtnik (energoelektroniczny). S omriktare; strömriktare. (551)

23. fixed frequency convertor : a frequency convertor in which the ratio between the input and output frequencies is fixed. ★ convertisseur à fréquences fixes → *convertisseur 6.* R преобразователь постоянной частоты. D Umformer mit fester Frequenz. E convertidor de frecuencias fijas. I convertitore (di frequenza) a frequenze fisse. N frequentieomzetter met vaste frequentieverhouding. P przemiennik częstotliwości o stałej przekładni. S omformare med fast frekvensförhållande. (811)

24. four quadrant convertor : an externally commutated convertor for connection to a d.c. system with two possible directions of the flow of the d.c. power each of which is determined by two associations of direct voltage polarity with direct current direction. ★ convertisseur à quatre quadrants → *convertisseur 8.* R четырехквадрантный преобразователь. D Vier-Quadrant-Stromrichter. E convertidor de cuatro cuadrantes. I convertitore a quattro quadranti. N vierkwadrantenomzetter. P przekształtnik czterokwadrantowy. S fyrkvadrantströmriktare. (551)

25. frequency convertor (*Syn.* frequency changer (USA)) : an electric energy transducer that transfers electric energy with change of frequency. ★ convertisseur de fréquence → *convertisseur 17.* R преобразователь частоты. D Frequenzwandler. E convertidor de frecuencia. I convertitore di frequenza. N frequentieomzetter. P przemiennik częstotliwości. S frekvensomformare. (151)

26. frequency convertor (*Syn.* frequency changer) : a convertor for the conversion of alternating current of a certain frequency to alternating current of a different frequency. ★ convertisseur de fréquence → *convertisseur 19.* R преобразователь частоты. D Frequenzumformer. E convertidor de frecuencia. I convertitore di frequenza. N frequentieomzetter. P przemiennik częstotliwości. S frekvensomformare. (441,811)

27. ideal impedance convertor : a reciprocal or non-reciprocal two-port network whose input impedance is a fixed multiple of the load impedance. *Note.* — If the multiple is real and negative, it is called a negative impedance convertor (NIC). ★ convertisseur idéal d'impédance → *convertisseur 45.* R идеальный конвертор импеданса. D idealer Impedanzwandler. E convertidor ideal de impedancia. I convertitore ideale di impedenza. N ideale impedantie-omzetter. P konwertor impedancji idealny. S ideal impedanstransformator. (131)

28. indirect a.c.(power) convertor : an a.c. convertor with an intermediate d.c. link. ★ convertisseur (de puissance) indirect de courant alternatif → *convertisseur 30.* R двухзвенный (силовой) преобразователь параметров переменного тока. D Zwischenkreis-(Wechselstrom-)Umrichter. E convertidor (de potencia) indirecto de corriente alterna. I convertitore (di potenza) indiretto di corrente alternata. N indirecte wisselstroomomzetter. P przekształtnik przemiennoprądowy pośredni. S vs-omriktare med ls-mellanled. (551)

29. indirect d.c. convertor : a d.c. convertor with an intermediate a.c. link. ★ convertisseur indirect de courant continu → *convertisseur 46.* R двухзвенный преобразователь постоянного напряжения. D Zwischenkreis-Gleichstromumrichter. E convertidor indirecto de corriente continua. I convertitore indiretto di corrente continua; frazionatore. N indirecte gelijkstroomomzetter. P przekształtnik stałoprądowy pośredni. S ls-omriktare med vs-mellanled. (551)

30. induction frequency convertor : a wound-rotor induction machine in which the frequency conversion is obtained by induction between a primary winding and a secondary winding rotating with respect to each other. The secondary winding delivers power at a frequency proportional to the relative speed of the primary magnetic field and the member carrying the secondary winding. ★ convertisseur de fréquence à induction → *convertisseur 22.* R асинхронный преобразователь частоты. D Drehfeldumformer (Induktions-Frequenzumformer). E convertidor de frecuencia de inducción. I convertitore di frequenza a induzione. N asynchrone frequentieomzetter. P indukcyjna przetwornica częstotliwości. S asynkron frekvensomformare. (411)

31. inductor frequency convertor : a convertor having a stationary input alternating current winding, which supplies the excitation, and a stationary output winding of a different number of poles in which the generated voltage at the output frequency is induced through change in field reluctance by means of a toothed rotor. ★ convertisseur de fréquence à fer tournant → *convertisseur 21.* R индукторный преобразователь частоты. D Induktor-Frequenzumformer. E convertidor de frecuencia de hierro giratorio. I convertitore di frequenza a ferro rotante. N frequentieomzetter van het inductortype. P induktorowa przetwornica częstotliwości. S ..... (411)

32. main convertor : a convertor providing traction power. ★ convertisseur principal → *convertisseur 49.* R главный преобразователь. D Hauptumformer. E convertidor principal. I convertitore principale. N tractieomzetter. P przekształtnik główny. S traktionsomformare. (811)

33. motor convertor : the combination of an induction motor with a rotary convertor on a common shaft system, the current produced in the rotor of the motor flowing through the armature of the rotary convertor. ★ convertisseur en cascade → *convertisseur 44.* R двигатель-преобразователь. D Kaskadenumformer. E convertidor en cascada. I convertitore in cascata. N cascadeomzetter. P zespół kaskadowy. S kaskadomformare. (411)

34. one quadrant convertor : an externally commutated convertor for connection to a d.c. system with one possible direction of the flow of d.c. power which is determined by one voltage polarity associated with one direct current direction. ★ convertisseur à un quadrant → *convertisseur 10.* R одноквадратный преобразователь. D Ein-Quadrant-Stromrichter. E convertidor de un cuadrante. I convertitore a un quadrante. N eenkwadrantomzetter. P przekształtnik jednokwadrantowy. S enkvadrantströmriktare. (551)

35. phase convertor : an electric energy transducer that transfers electric energy with change of number of phases. ★ convertisseur de phase → *convertisseur 27.* R преобразователь числа фаз. D Phasenwandler. E convertidor de fases. I convertitore di fase. N faseomzetter. P przemiennik fazy. S fas(tals)omformare. (151)

36. phase convertor : a machine for converting the power of an alternating current system having a given number of phases into in a system having another number of phases but of the same frequency. ★ convertisseur de phase → *convertisseur 28.*

R преобразователь фаз. D Phasenumformer. E convertidor de fase. I convertitore di fase. N fasetalomzetter. P przetwornica liczby faz. S fastalsomformare. (411,811)

37. **reversible convertor** : a convertor in which the direction of the power flow is reversible. ★ convertisseur réversible → *convertisseur 50.* R рекуперирующий преобразователь. D Zwei-Energierichtung-Stromrichter. E convertidor reversible. I convertitore reversibile. N omkeerbare omzetter. P przekształtnik rewersyjny. S reversibel strömriktare. (551)
38. **rotary convertor** : a convertor with a single armature having a commutator and collector rings and used for converting alternating current into direct current or vice versa. ★ commutatrice → *commutatrice 1.* R одноякорный преобразователь. D Einankerumformer. E conmutatriz. I commutatrice. N eenankeromzetter. P przetwornica synchroniczna jednotwornikowa. S enankaromformare. (411)
39. **rotating convertor** : a convertor consisting only of rotating electrical machines. ★ convertisseur tournant → *convertisseur 55.* R вращающийся преобразователь. D rotierender Umformer. E convertidor giratorio. I convertitore rotante. N roterende omzetter. P przekształtnik wirujący. S roterande omformare. (811)
40. **semiconductor convertor** : an electronic power convertor with semiconductor valve devices. *Notes. 1* — Similar terms are used for convertors in general or for specific kinds of convertors and for convertors with other or specific valve devices, e.g. thyristor convertor, mercury-arc rectifier, transistor inverter. *2* — Similar terminology is used for electronic switches and a.c. controllers , e.g. thyristor switch, thyristor a.c. controller. ★ convertisseur à semiconducteurs → *convertisseur 9.* R полупроводниковый преобразователь. D Halbleiter-Stromrichter. E convertidor de semiconductores. I convertitore a semiconduttori. N halfgeleidergelijkrichter. P przekształtnik półprzewodnikowy. S halvledaromriktare. (551)
41. **single convertor** : an externally commutated reversible convertor for connection to a d.c. system with direct current in one direction. ★ convertisseur simple → *convertisseur 52.* R однокомплектный преобразователь. D Einzelstromrichter. E convertidor simple. I convertitore semplice. N enkelvoudige omzetter. P przekształtnik (rewersyjny sterowany) jednokierunkowy. S enkelströmriktare. (551)
42. **static convertor** (*Syn.* electronic convertor) : → *convertor 18*
43. **subscriber's convertor** : device, which is part of the subscribers equipment, for changing the cabled distribution system frequency channels to those for which the receiver was designed. ★ convertisseur d'usager → *convertisseur 36.* R абонентский конвертор. (723)
44. **two quadrant convertor** : an externally commutated convertor for connection to a d.c. system with two possible directions of the flow of the d.c. power each of which is determined by one association of one direct voltage polarity with one direct current direction. ★ convertisseur à deux quadrants → *convertisseur 5.* R двухквадрантный преобразователь. D Zwei-Quadrant-Stromrichter. E convertidor de dos cuadrantes. I convertitore a due quadranti. N tweekwadrantenomzetter. P przekształtnik dwukwadrantowy. S tvåkvadrantströmriktare. (551)
45. **variable frequency convertor** : a frequency convertor providing a variable ratio between input and output frequencies, in which one of the frequencies may remain fixed. ★ convertisseur à fréquences variables → *convertisseur 7.* R преобразователь переменной частоты. D Umformer mit regelbarer Frequenz. E convertidor de frecuencias variables. I convertitore (di frequenza) a frequenze variabili. N frequentieomzetter met variabele frequentieverhouding. P przemiennik częstotliwości regulowany. S omformare med variabelt frekvensförhållande. (811)

conveyor

1. **belt conveyor furnace** : → *furnace 5*
2. **chain conveyor feed** : → *feed 1*
3. **chain conveyor furnace** : → *furnace 8*
4. **screw conveyor furnace** : → *furnace 50*
5. **shaker conveyor** : a charging system consisting of a horizontal or slightly sloping hearth subjected to a to-and-from motion and quick return which moves the material forward by successive impulses. ★ transporteur par secousses → *transporteur 2.* R пульсирующий конвейер. D Schüttelförderer (Schüttelrinne). E transportador por sacudidas (de vaivén). I trasportatore a scosse. N schudgoot. P przenośnik wstrząsowy. S skaktransportör. (841)
6. **vibratory conveyor** (*Syn.* vibratory feed) : → *feed 17*

coolant

1. **primary coolant circuit** : → *circuit 141*
2. **secondary coolant circuit** : → *circuit 156*

cooling

1. **closed circuit cooling** : a method of cooling in which a primary coolant is circulated in a closed circuit through the machine and if necessary a heat exchanger. Heat is transferred from the primary coolant to the secondary coolant through the structural parts or in the heat exchanger. ★ circuit de refroidissement fermé → *circuit de refroidissement 1.* R замкнутая система охлаждения. D geschlossener Kühlkreislauf. E circuito de refrigeración cerrado. I raffreddamento in ciclo chiuso. N gesloten koelsysteem. P układ chłodzenia zamknięty. S slutet kylsystem. (411)
2. **cooling and protection shield for a coil** : → *shield 5*
3. **cooling chamber** : → *chamber 6*
4. **cooling characteristics** : → *characteristic 27*
5. **cooling fin** : → *fin 1*
6. **cooling time** : → *time 32*
7. **cooling tower** : → *tower 1*
8. **dry cooling tower** : → *tower 2*
9. **forced draught cooling tower** : → *tower 3*
10. **fuel cooling installation** : → *installation 6*
11. **open circuit cooling** : a method of cooling in which the coolant is drawn from the medium surrounding the machine, passes through the machine and then returns to the surrounding medium. ★ circuit de refroidissement ouvert → *circuit de refroidissement 2.* R разомкнутая система охлаждения. D offener Kühlkreis. E circuito de refrigeración abierto. I raffreddamento in ciclo aperto. N open koelsysteem. P układ chłodzenia otwarty. S öppet kylsystem. (411)
12. **standby or emergency cooling** : a cooling system which is provided in addition to the normal cooling system and which is intended to be used when the normal cooling system is not available. ★ dispositif de refroidissement de secours → *dispositif 56.* R запасная или аварийная система охлаждения. D Notkühlung. E dispositivo de refrigeración de socorro. I raffreddamento di emergenza. N noodkoelsysteem. P układ chłodzenia rezerwowy. S reservkylning. (411)
13. **wet cooling tower** : → *tower 8*

cooperation

1. **factor of cooperation** : → *factor 75*
2. **index of cooperation** : → *index 22*

coordinates

1. **chromaticity coordinates** : ratio of each of a set of three tristimulus values to their sum. *Notes. 1* — As the sum of the three chromaticity coordinates equals 1, two of them are sufficient to define a chromaticity. *2* — In the CIE, standard colorimetric systems, the chromaticity coordinates are represented by the symbols x, y, z and x_{10}, y_{10}, z_{10}. ★ coordonnées trichromatiques → *coordonnée 1.* R координаты цветности. D Farbwertanteile. E coordenadas de cromaticidad. I coordinate tricromatiche. N kleurcoördinaten. P współrzędne chromatyczności. S kromacitetskoordinater. (845)
2. **spectral chromaticity coordinates** ($x(\lambda)$, $y(\lambda)$, $z(\lambda)$, resp. $x_{10}(\lambda)$, $y_{10}(\lambda)$, $z_{10}(\lambda)$) : chromaticity coordinates of monochromatic stimuli. ★ coordonnées trichromatiques spectrales → *coordonnée 2.* R спектральные координаты цветности. D Spektralwertanteile. E coordenadas de cromaticidad espectral. I coordinate tricromatiche spettrali. N spectrale kleurcoördinaten. P współrzędne chromatyczności widmowe. S spektrala kromacitetskoordinater. (845)

co-ordination

1. **co-ordination area** : → *area 8*
2. **co-ordination contour** : → *contour 3*
3. **co-ordination distance** : → *distance 4*
4. **insulation co-ordination** : the selection of the dielectric strength of equipment in relation to the voltages which can appear on the system for which the equipment is intended, and taking into account the characteristics of the available protective

devices. ★ coordination de l'isolement → *coordination 3.* R координация изоляции. D Isolationskoordination. E coordinación de aislamiento. I coordinamento dell'isolamento. N coördinatie van de isolatie. P koordynacja izolacji. S isolationskoordination. (604)

co-polar

1. **co-polar pattern** : → *pattern 3*

copy

1. **master copy** : → *master 6*

copying

1. **copying** (*Syn.* duplicating) : → *duplicating 1*

Corbino

1. **Corbino disc** : → *disk 1*

cord

1. **cord** : a flexible cable with a limited number of conductors of small cross-sectional area. ★ cordon → *cordon 1.* R шнур. D flexible Leitung. E cordo'n. I cavo flessibile. N snoer. P sznur. S anslutningskabel. (461)
2. **cord circuit** : → *circuit 47*

cordless

1. **cordless switchboard** : → *switchboard 2*

core

1. **average core diameter** : → *diameter 3*
2. **core** : that region of a reactor in which a chain reaction can take place. ★ cœur → *cœur 3.* D Spaltzone. E núcleo. I nocciolo. N reactorkern; kern. P rdzeń. S härd. (026)
3. **core** (*Syn.* insulated conductor (North America)) : an assembly comprising a conductor with its own insulation (and screens if any). *Note.* — In North American usage : the core of a cable has been defined as the assembly of components of a cable lying under a common covering such as the sheath. Such usage is deprecated. ★ conducteur (isolé) → *conducteur 29.* R изолированная жила (термин ипотребляется в Северной Америке). D Ader. E conductor aislaldo. I anima. N ader. P żyła izolowana; ośrodek kabla lub przewodu. S part. (461)
4. **core** : the central region of an optical fibre through which most of the optical power is transmitted. ★ cœur → *cœur 4.* R сердцевина (оптического волокна). D Kern. E núcleo. I nucleo. N kern (van een glasvezel). P rdzeń (światłowodu). S kärna. (731)
5. **core area** : → *area 9*
6. **core centre** : → *centre 8*
7. **core/cladding concentricity error** : → *error 17*
8. **core diameter** : → *diameter 9*
9. **core diameter tolerance** : → *tolerance 5*
10. **core duct** : → *duct 4*
11. **core end plate** : → *plate 2*
12. **core factor** C_1 : → *factor 29*
13. **core factor** C_2 : → *factor 30*
14. **core hysteresis parameter** (*Syn.* core factor C_2) : → *factor 30*
15. **core inductance parameter** (*Syn.* core factor C_1) : → *factor 29*
16. **core (of a reinforced conductor)** : the centre wire or inner layers of the higher strength material in a reinforced conductor. *Note.* — The proportion of strength contributed by the core may be greater or smaller than that contributed by the conducting outer aluminium or aluminium alloy layers. ★ âme d'un conducteur mixte → *âme 7.* R сердечник комбинированного провода. D Seele (eines Verbundseiles). E alma de un conductor reforzado. I anima di un conduttore bimetallico. N kern (van een geleider). P rdzeń przewodu wzmocnionego. S kärna. (466)
17. **core of an insulator** : the central insulating part of an insulator which provides the mechanical characteristics and from which the sheds project. ★ fût d'un isolateur → *fût 2.* R тело изолятора. D Isolatorstrunk. E núcleo de un aislador. I nucleo di un isolatore. N isolatorstronk. P pień izolatora. S isolatorkärna. (471)
18. **core/reference surface concentricity error** : → *error 18*
19. **core screen** (*Syn.* insulation screen) : → *screen 9*
20. **core test** : → *test 18*
21. **core tolerance field** : → *field 3*
22. **core type inductor** : → *inductor 1*
23. **core-type reactor** : → *reactor 7*
24. **core-type transformer** : → *transformer 21*
25. **hysteresis core constant** : → *constant 21*
26. **laminated core** : a core composed of sheets of ferromagnetic material insulated from one another for the purpose of reducing eddy currents. ★ noyau feuilleté → *noyau 11.* R шихтованный сердечник. D Schichtkern; Blechkern. E núcleo laminado. I nucleo laminato. N gelamelleerde kern. P magnetowód blachowy. S laminerad kärna. (151,411)
27. **laminated (magnetic) core** : a core made of magnetically soft sheet material, or pieces cut thereof, stacked in parallel configuration and having an interlamination resistance that is sufficiently high for the application. ★ noyau (magnétique) feuilleté → *noyau 15.* R шихтованный (магнитный) сердечник. D geblechter (magnetischer) Kern. E núcleo (magnético) laminado. I nucleo (magnetico) laminato. N gelamelleerde (magnetische) kern. P magnetowód blachowy. S laminerad kärna. (221)
28. **(magnetic) core** : 1. That part of a magnetic circuit composed of magnetic material. 2. That part of a magnetic circuit which is intended to be placed inside a coil in a fixed position relative to the coil. ★ noyau (magnétique) → *noyau 12.* R (магнитный) сердечник. D (magnetischer) Kern. E núcleo (magnético). I nucleo (magnetico). N (magnetische) kern. P magnetowód (1); rdzeń (2). S (magnetisk) kärna. (151,221,411,811)
29. **magnetic core antenna** : → *antenna 73*
30. **magnetic head core** : a part of a magnetic head composed of a solid or laminated magnetic material forming the magnetic circuit of the head and carrying the coils. ★ noyau de tête magnétique → *noyau 9.* R сердечник магнитной головки. D Magnetkopfkern. E núcleo de cabeza magnética. I nucleo di una testina magnetica. N kern van de magneetkop. P magnetowód głowicy magnetycznej; rdzeń głowicy magnetycznej. S magnethuvudkärna. (806)
31. **magnetic powder core** : a core consisting of a compact of magnetic powder particles having contact resistance between particles that is sufficiently high for the application. ★ noyau (magnétique) en poudre → *noyau 13.* R сердечник из магнитного порошка. D magnetischer Pulverkern. E núcleo (magnético) de partículas de polvo. I nucleo (magnetico) in polvere. N magnetische poederkern. P magnetowód proszkowy. S (magnetisk) pulverkärna. (221)
32. **metal core base material** : → *material 29*
33. **metal core printed board** : → *board 12*
34. **non circularity of core** : → *circularity 2*
35. **slotted core cable** (*Syn.* grooved cable) : → *cable 31*
36. **split core type current transformer** : → *transformer 62*
37. **strip-wound (magnetic) core** : a core made of a strip or strips of magnetically soft material, wound spirally layer upon layer, and having an interlayer resistance that is sufficiently high for the application. ★ noyau (magnétique) enroulé → *noyau 14.* R ленточный витой (магнитный) сердечник. D (magnetischer) Bandkern. E núcleo (magnético) en banda arrollada. I nucleo (magnetico) avvolto. N van band gewikkelde (magnetische) kern. P magnetowód taśmowy. S bandkärna. (221)
38. **transformer with radially laminated core** : → *transformer 74*
39. **wound core** : a laminated core made of a continuous strip or strips wound spirally layer upon layer. *Note.* — This term is also used to designate a core provided with a winding. ★ noyau enroulé → *noyau 10.* R ленточный сердечник. D Bandkern. E núcleo en banda arrollada. I nucleo avvolto. N gewikkelde kern. P magnetowód zwijany. S bandkärna. (151)

coreless

1. **crucible of coreless induction furnace** : → *crucible 3*

corner

1. **binomial corner** : a composite waveguide corner formed by more than two waveguide corners in succession approximately a quarter of a wavelength apart, each causing by itself an amplitude reflection factor approximately proportional in magnitude to a coefficient of a binomial series. *Note.* — The

exponent of the binomial will be $(n-1)$ where n is the number of corners. ★ coude binômial → *coude 2.* R биноминальный уголок. D binomisch gestufter Winkel. E codo binomial. I gomito binomiale. N binomiale knik. P załamanie dwumianowe. S binomialknä. (726)

2. **corner reflector antenna** : → *antenna 35*
3. **dihedral corner reflector** : → *reflector 4*
4. **E corner** (*Syn.* E-plane corner) : → *corner 5*
5. **E-plane corner** (*Syn.* E corner) : a waveguide corner in which the longitudinal axis of the guide remains in a plane parallel to the electric field vectors throughout the corner. ★ coude brusque E → *coude 4.* R уголок в плоскости E; E-уголок. D E-Winkel. E codo plano E. I gomito brusco E; gomito brusco nel piano E. N E-vlakknik. P załamanie E. S E-knä. (726)
6. **H corner** (*Syn.* H-plane corner) : → *corner 7*
7. **H-plane corner** (*Syn.* H corner) : a waveguide corner in which the longitudinal axis of the guide remains in a plane parallel to the magnetic field vectors throughout the corner. ★ coude brusque H → *coude 5.* R уголок в плоскости H; H-уголок. D H-Winkel. E codo plano H. I gomito brusco H; gomito brusco nel piano H. N H-vlakknik. P załamanie H. S H-knä. (726)
8. **trihedral corner reflector** : → *reflector 31*
9. **waveguide corner** (*Syn.* elbow) : a section of waveguide in which the direction of the longitudinal axis changes abruptly. *Note.* — The waveguide corner is sometimes referred to as a waveguide bend but this practice is deprecated. ★ coude brusque → *coude 3.* R волноводный уголок; колено. D Hohlleiter-Winkel. E codo de guiaonda. I gomito brusco (di guide d'onde). N golfgeleiderknik. P załamanie falowodowe. S vågledarknä. (726)

cornice

1. **cornice lighting** : → *lighting 2*

corona

1. **corona** : partial discharges in a gas immediately adjacent to an uninsulated or lightly insulated conductor which creates a highly divergent field remote from other conductors. Corona usually produces light and noise. ★ effet de couronne → *effet 25.* R корона. D Koronaentladung. E efecto corona. I effetto corona. N corona. P ulot. S korona. (212)
2. **corona (conduction)** : a glow conduction occurring in a non-uniform electric field of very high intensity. *Note.* — Its visible part is localized near a conductor. ★ effet de couronne → *effet 24.* R корона. D Koronaentladung. E efecto corona. I effetto corona. N corona-ontlading. P ulot. S korona(urladdning). (121)
3. **corona counter tube** : → *counter tube 4*
4. **corona discharge** : → *discharge 4*
5. **corona discharge tube** : → *tube 18*
6. **corona shielding** : → *shielding 2*

corpuscle

1. **corpuscle** : a particle with a rest mass. ★ corpuscule → *corpuscule 1.* R корпускула. D Korpuskel. E corpúsculo. I corpuscolo. N materiedeeltje. P korpuskuła. S korpuskel. (881)

corrected

1. **corrected reference equivalent** : → *equivalent 6*

correcting

1. **correcting quantity** : → *quantity 5*
2. **correcting range** : → *range 10*
3. **error correcting code** : → *code 29*

correction

1. **aperture correction** : compensation for aperture distortion by increasing the levels of the high frequency components of the video signal. ★ correction d'ouverture → *correction 23.* R апертурная коррекция. (723)
2. **contour correction** : subjective enhancement of picture definition by the selective increase in level of high frequency components of the video signal in order to accentuate the edges of objects. ★ correction de contour → *correction 6.* R контурная коррекция. (723)
3. **contrast ratio correction** (*Syn.* gamma correction) : → *correction 13*
4. **correction from signals** : synchronous correction ensured without correcting signals by the position of the characteristic instants of restitutions of message signals. ★ correction sans signaux spéciaux → *correction 26.* R коррекция по принимаемому сигналу; коррекция без специального сигнала. D Korrektur durch Signale. E corrección sin señales especiales. I sincronismo intrinseco. N correctie uit signalen. P korekcja synchronizacji na podstawie sygnału odebranego. S ..... (721)
5. **correction signal** : → *signal 63*
6. **dead time correction** (*Syn.* resolving time correction) : → *correction 16*
7. **dead time correction** : a correction to the observed counting rate based on the probability of the occurence of ionizing events during the dead-time of a radiation counter tube. ★ correction de temps mort → *correction 17.* R поправка на мертвое время. D Totzeit-Korrektur. E corrección de tiempo muerto. I correzione di tempo morto. N correctie voor de dode tijd. P korekcja czasu martwego. S dödtidskorrektion. (531)
8. **error correction** : any technique for correcting some of the elements recognized as erroneous in a message. ★ correction d'erreurs → *correction 19.* R коррекция ошибки. D Fehlerkorrektur. E corrección de errores. I correzione di errori. N foutcorrectie. P korekcja błędów. S felkorrigering. (702)
9. **error correction** : error control with a view to correcting a significant proportion of errors, making use of either an error correcting code or an error detecting code or a loop-checking with, in the last two cases, automatic repetition of the signals recognized as being erroneous. ★ correction d'erreurs → *correction 20.* R исправление ошибок. D Fehlerkorrektur. E corrección de errores. I correzione d'errori. N foutencorrectie. P korekcja błędów. S felkorrigering. (721)
10. **error correction by information feedback and repetition** : error correction using loop checking followed by an automatic repetition of signal representing the characters or blocks recognized as erroneous. ★ correction d'erreurs par retour et répétition → *correction 22.* R исправление ошибок с помощью информационной обратной связи и повторения. D Fehlerkorrektur durch Informationsrückführung und Wiederholung. E corrección de errores por retorno y repetición. I rivelazione e rinvio d'errore. N foutencorrectie door terugzenden en herhalen van foute informatie. P korekcja błędów z detekcją po stronie nadawczej i powtarzaniem. S slingstyrd felkorrigering. (721)
11. **fault correction** : actions taken after fault localization to restore the ability of the faulty item to perform a required function. ★ correction de panne → *correction 11.* R устранение (существенной) неисправности. D Fehlerbehebung. E corrección (de una avería). I correzione di avaria. N herstellen van een defect. P usuwanie przyczyny niezdatności. S felavhjälpning. (191)
12. **fault correction time** : → *time 60*
13. **gamma correction** (*Syn.* contrast ratio correction) : non-linear amplification of the components of the picture source signal prior to transmission to achieve a satisfactory system gamma for the system. ★ correction de gamma → *correction 9.* R гамма-коррекция. (723)
14. **non-linearity correction** : an action intended to reduce non-linearity distortion produced by a two-port device or a transmission channel. ★ correction de non-linéarité → *correction 10.* R нелинейная коррекция. D nichtlineare Entzerrung. E corrección de no linealidad. I correzione di non linearità. N niet-lineariteitscorrectie. P linearyzacja; korekcja nielinearności. S olinjaritetskorrektion. (702)
15. **power factor correction capacitor** : → *capacitor 56*
16. **resolving time correction** (*Syn.* dead time correction) : correction to be applied to the observed number of pulses in order to take into account the number of pulses lost due to the resolving time. ★ correction de temps de résolution → *correction 15.* R поправка на время разрешения поправка на мертвое время. D Totzeitkorrektion. E corrección de tiempo de resolución; correción de tiempo muerto. I correzione di tempo di risoluzione; correzione di tempo morto. N correctie voor de scheidingstijd. P poprawka na czas rozdzielczy; poprawka na czas martwy. S korrektion för upplösningstid; dödtidskorrektion (endast för GM-rör). (391)

17. **selection error correction** : the facility for a subscriber to correct an error in his selection sequence without having to repeat the complete selection process. ★ correction d'erreur de numérotation → *correction 18.* R исправление ошибки набора. D Wählfehlerkorrektur. E corrección de error de numeración. I correzione di errore di selezione. N kiesfoutencorrectie. P korekcja błędu wybierania. S nummerkorrigering. (721)
18. **synchronous correction** : a method by which the receiver of a synchronous transmission system is kept in a designed phase relationship with the transmitter. ★ correction de synchronisme → *correction 13.* R коррекция синхронизма. D Synchronkorrektur. E corrección de sincronismo. I correzione di sincronismo. N synchrone correctie. P korekcja synchronizacji. S synkronisering. (721)
19. **turns correction** : a design feature of a current transformer in which the turns ratio differs from the rated transformation ratio. ★ compensation par correction de spires → *compensation 10.* R витковая коррекция. D Windungsabgleich. E compensación por corrección de espiras. I correzione di spire. N windingscorrectie. P poprawka zwojowa. S varvkorrektion. (321)

corrective

1. **active corrective maintenance time** : → *time 3*
2. **corrective maintenance** : → *maintenance 7*
3. **corrective maintenance time** : → *time 33*
4. **mean active corrective maintenance time** : → *time 95*

corrector

1. **corrector** : a device intended to reduce distortion of a signal or improve the characteristics of an apparatus, equipment or transmission channel. *Example* : a non-linear distortion corrector. ★ correcteur → *correcteur 5.* R корректор. D Korrektor. E corrector. I correttore. N corrigeertoestel. P korektor. S korrigerare. (702)

correlated

1. **(correlated) colour temperature** : → *temperature 10*
2. **correlated colour temperature** : → *temperature 11*

correlation

1. **correlation function** : → *function 8*

corresponding

1. **corresponding terminals** : → *terminal 5*

corrosive

1. **corrosive sulphur** : → *sulphur 1*

corrugated

1. **corrugated horn** : → *horn 6*

cosecant-square

1. **cosecant-square beam antenna** : → *antenna 36*

cosine

1. **Lambert's (cosine) law** : → *law 7*

cosmic

1. **cosmic radiation** : → *radiation 15*

cost

1. **avoidable costs** : those costs which will be avoided in a given time period if a certain action is taken, but which will be incurred if such action is not taken. ★ coûts évitables → *coût 10.* R затраты, которых можно избежать. D vermeidbare Kosten. E costes evitables. I costi evitabili. N vermijdbare kosten. P koszty do uniknięcia. S påverkbara kostnader. (691)
2. **capacity cost** : that component of the total cost which is primarily related to the cost of equipment; generating plant, transmission system, distribution system, etc. ★ charges d'investissement → *charge 89.* R затраты на мощность. D Kapitaldienst der Anlagekosten. E cargas de inversión. I oneri di investimento. N kapitaalskosten. P koszt mocy. S årskostnad för anläggningar. (691)
3. **capital contribution to connection costs** : → *contribution 1*
4. **capital contribution to network costs** : → *contribution 2*
5. **consumer-related cost** : that component of the fixed cost which is independent of the demand and consumption, but is primarily related to the number of consumers. ★ coûts fonction de la clientèle → *coût 12.* R затраты, зависящие от класса потребителя. D abnehmerabhängige Kosten. E costes función de la clientela; gastos de abonado. I costi di utenza. N verbruikerskosten. P koszt zależny od liczby odbiorców. S abonnentberoende kostnader. (691)
6. **cost allocation** : allocating costs among consumers, classes of consumers, or cost headings on behalf of which it is deemed to be incurred. This may or may not include apportioning of costs which, strictly speaking, are unallocable, i.e., joint. ★ répartition des coûts partiels → *répartition 17.* R распределение затрат. D Kostenverteilung. E reparto de los costes parciales. I ripartizione dei costi parziali. N kostentoerekening. P podział kosztów. S kostnadsfördelning. (691)
7. **cost classification** : the identification, classification and grouping of cost components, the aim being to separate the total cost into components according either to the nature of the expenditure, or to the function (generation, transmission, distribution, etc.), or to whether they are of fixed or variable nature. ★ classification des coûts → *classification 1.* R классификация затрат. D Kostenklassifikation. E clasificación de los costes. I classificazione dei costi. N kostengroepering. P klasyfikacja kosztów. S kostnadsuppdelning. (691)
8. **cost formula** : the formula expressing the cost, or some defined portion of the cost, of a supply of electricity at a stated point in the system or under stated conditions. ★ formule de coûts → *coût 16.* R формула затрат. D Kostenformel. E fórmula de costes. I formula dei costi. N kostprijsbepaling. P wzór na koszt. S självkostnadsformel. (691)
9. **cost of kWh not supplied** : the economic cost assessment of all consequences resulting from supply interruptions in a given system divided by the energy not supplied and expressed in kWh. ★ coût du kilowattheure coupé → *coût 4.* R удельный ущерб от недоотпуска электроэнергии. D Kosten je nicht gelieferter Kilowattstunde. E coste del kWh no suministrado. I costo del chilovattora non fornito. N kosten van de niet-geleverde energie per kWh. P koszt niedostarczonej kWh (liczony jako straty powstałe przez odbiorców). S avbrottsvärdering. (604)
10. **demand-related cost** : that component of the fixed cost which is directly related to the expenditure incurred in providing for the maximum demand at each level of the system, and which is independent of the number of consumers supplied. ★ coûts fonction de la puissance → *coût 13.* R затраты, зависящие от нагрузки. D leistungsabhängige Kosten. E costes función de la potencia; gastos de potencia. I costi di potenza. N vermogenskosten; capaciteitskosten. P koszt zależny od obciążenia. S effektberoende kostnader. (691)
11. **energy cost** : that component of the total cost which is related to the energy supplied. ★ coûts variables → *coût 14.* R себестоимость электроэнергии. D bewegliche Kosten; arbeitsabhängige Kosten. E costes variables. I costi variabili. N energiekosten. P koszt własny energii elektrycznej. S energikostnad. (691)
12. **fixed cost** : a general term covering all components of the total cost which are independent of variations in electrical energy consumed. ★ coûts fixes → *coût 11.* R постоянные затраты. D feste Kosten. E costes fijos. I costi fissi. N vaste kosten. P koszt stały. S fasta kostnader. (691)
13. **fuel cost adjustment clause** : → *clause 1*
14. **long-run marginal cost** : the marginal cost in the case where plant capacity needs to be modified. ★ coût marginal à long terme → *coût 7.* R долговременные дополнительные затраты. D langfristige Grenzkosten; langfristige Zuwachskosten. E coste marginal a largo plazo. I costo marginale a lungo termine. N differentiële kosten; marginale kosten (op lange termijn). P długotrwałe koszty dodatkowe. S långsiktig marginalkostnad. (691)
15. **marginal cost** : the increase (decrease) in total cost within a specified period (e.g., peak, winter day, summer day, night), resulting from the addition (subtraction) of one unit (kilowatt or kilowatthour) to the quantity supplied in that period. ★ coût marginal → *coût 5.* R дополнительные затраты. D Grenzkosten; Zuwachskosten. E coste marginal. I costo marginale. N marginale kosten. P koszty dodatkowe. S marginalkostnad. (691)

16. **marginal cost method** (of determining consumer class costs) : imputing to each consumer class a cost equal to the product of the number of units (kilowatt or kilowatthour) taken within a specified period (e.g., peak, winter day, summer day, night), and the corresponding marginal cost. ★ méthode des coûts marginaux → *méthode 31.* R метод определения затрат по группам потребителей. D Methode der Grenzkosten; Methode der Zuwachskosten. E método de los costes marginales. I metodo dei costi marginali. N toerekening naar marginale kosten. P metoda podziału kosztów wg grup odbiorców. S marginalkostnadsmetod. (691)
17. **other fixed works costs** : power station fixed costs, other than capacity costs, which are not variable with the number of kilowatthours generated. These will comprise certain maintenance and staffing costs. ★ autres charges fixes de production → *charge 6.* R другие постоянные составляющие затрат. D feste Unterhaltungs- und Personalkosten in Kraftwerken. E otras cargas fijas de producción. I altri costi fissi di produzione. N overige vaste kosten. P inne składowe stałe kosztów produkcji. S fasta driftkostnader. (691)
18. **peak capacity cost** : capacity cost attributable to plant capacity installed specifically, or allocated primarily, to operate only over periods of probable system peak demand. ★ ..... → . R затраты на пиковую мощность. D Kapitaldienst der Anlagekosten für Spitzendeckung. E coste de la potencia de punta. I costi della potenza di punta. N kosten van het piekvermogen. P koszt mocy w szczycie. S toppeffektkostnad. (691)
19. **present value of cost losses** : → *value 43*
20. **present worth of cost of losses** (*Syn.* present value of cost losses) : → *value 43*
21. **short-run marginal cost** : the marginal cost in the case where it is not intended to change the plant capacity envisaged. ★ coût marginal à court terme → *coût 6.* R кратковременные дополнительные затраты. D kurzfristige Grenzkosten; kurzfristige Zuwachskosten. E coste marginal a corto plazo. I costo marginale a breve termine. N marginale kosten (op korte termijn). P krótkotrwałe koszty dodatkowe. S kortsiktig marginalkostnad. (691)
22. **supply-interruption costs** : conventional costs used in economic studies to evaluate the consequences to the community of an interruption of supply. ★ coûts d'interruption de fourniture → *coût 9.* R ущерб от нарушения энергоснабжения. D Versorgungsunterbrechungskosten. E costos de interrupción del suministro. I costi di interruzione di fornitura. N kosten van stroomonderbreking. P koszty przerw w dostawie energii. S leveransavbrottsförluster. (603)

costing

1. **three-part costing** : the allocation of costs under three headings, demand-related, energy-related and consumer-related. ★ analyse trinôme des coûts → *analyse 15.* R три составляющие затрат. D Aufteilung in leistungsabhängige, arbeitsabhängige und abnehmerabhängige Kosten. E análisis trinómico de los costes. I analisi trinomia dei costi. N toerekening naar vermogens-, energie- en verbruikerskosten. P wyliczenie kosztów według trzech składowych. S fördelning på tre kostnadsled. (691)
2. **two-part costing** : the allocation of costs under two headings, one demand-related, and the other energy-related. ★ analyse binôme des coûts → *analyse 2.* R две составляющие затрат. D Aufteilung in feste (leistungsabhängige) and bewegliche (arbeitsabhängige) Kosten. E análisis binómico de los costes. I analisi binomia dei costi. N toerekening naar vermogens en energiekosten. P wyliczenie kosztów według dwóch składowych. S fördelning på två kostnadsled. (691)

co-tree

1. **co-tree** : the set of branches of a network not included in a chosen tree. ★ co-arbre → *co-arbre 1.* R дополнение дерева. D komplementärer Baum; Ko-Baum. E coárbol. I co-albero. N co-boom. P współdrzewo; dopełnienie (drzewa). S träd(näts)komplement. (131)

cotton

1. **cotton paper** : → *paper 2*

coulomb

1. **coulomb, C** (C) : the special name for the SI unit of electric charge. 1C = 1 As. ★ coulomb → *coulomb 1.* R кулон. D Coulomb. E culombio; coulomb. I coulomb. N coulomb. P coulomb. S coulomb. (100,881)

Coulomb-Lorentz

1. **Coulomb-Lorentz force** : → *force 12*

coulometer

1. **coulometer** : an instrument intended to measure an amount of electric charge (quantity of electricity). ★ coulombmètre → *coulombmètre 1.* R кулонометр. D Ladungs-Messgerät. E culombímetro. I columbometro. N coulombmeter. P kulometr; woltametr. S coulometer. (301)

count

1. **count** : a single response of a counting assembly. ★ coup → *coup 1.* R отсчет. D Zählereignis. E cuenta. I impulso. N telpuls; telsignaal; telling. P zliczenie. S puls. (391)
2. **count** : an output pulse that has been registered. ★ coup → *coup 2.* R отсчет (одиночный). D Zählimpuls. E unidad de cuenta. I colpo. N impuls. P impuls zarejestrowany. S räknarpuls. (531)
3. **count** : the number of output pulses registered in a stated period. ★ compte → *compte 1.* R отсчет. D Zählung. E cuenta; recuento. I conteggio. N aantal impulsen. P zliczanie (impulsów). S pulsantal. (531)
4. **spurious count** : count caused by any agency other than the ionizing radiation to be measured with a counter tube. ★ coup parasite → *coup 8.* R ложный отсчет. D parasitäres Zählereignis. E cuenta parásita. I impulso parassita. N valse telpuls. P zliczenie fałszywe. S falsk puls. (391,531)

counter

1. counter (deprecated) : a generic term for a system (such as a Geiger counter or scintillation counter) that indicates or records the number of the physical events it is designed to register in a prescribed time interval. ★ compteur → *compteur 1.* R счетчик (не рекомендуется). D Zähler (veralteter Begriff). E contador (desaconsejado). I contatore (sconsigliato). N teller. P licznik (termin nie zalecany). S räknare. (881)
2. **counter range** : → *range 11*
3. **door counter balance** : a device for reducing the force necessary to raise door gear of the furnace by fitting counter balance weights. *Note.* — The counter balancing usually employes cast iron weight sections of shape and weight to satisfy requirements. Hydraulic or pneumatic counter balancing systems may also be employed. ★ contrepoids → *contrepoids 2.* R противовес дверцы печи. D Gegengewicht. E contrapesos. I contrappeso. N contragewicht van een deur. P odciążnik drzwiowy. S motvikt. (841)
4. **liquid-flow counter** : a counter device specially constructed for measuring the radioactivity of a flowing liquid. ★ compteur à circulation de liquide → *compteur 2.* R счетчик для протока жидкости. D Tauchzählrohr. E contador de circulación de líquido. I tubo contatore con circolazione di liquido. N vloeistofdoorstroomtelbuis. P licznik (promieniowania) cieczowy przepływowy. S räknare för strömmande vätska. (531)
5. **liquid-sample counter** : a counter device specially constructed for measuring the radioactivity of a stationary liquid sample. It often consists of a Geiger-Müller counter tube surrounded by an annular chamber for the sample. ★ compteur à source liquide → *compteur 7.* R счетчик для жидких образцов. D Becherzählrohr. E contador de muestra líquida. I tubo contatore con sorgente liquida. N vloeistofmonstertelbuis. P licznik (promieniowania) o próbce ciekłej. S räknare för stationär vätska. (531)
6. **operation counter** : a device indicating the number of tap-changes accomplished. ★ compteur de manœuvres → *compteur 12.* R счетчик числа переключений. D Zählwerk. E contador de maniobras. I contatore di manovre. N teller. P licznik przełączeń. S räkneverk. (421)
7. **photon counter** : instrument comprising a photoelectric detector and auxiliary electronics with which the electrons emitted by the photocathode can be counted. ★ compteur de photons → *compteur 13.* R счётчик фотонов. D Photonenzähler. E contador de fotones. I contatore di fotoni. N fotonenteller. P licznik fotonów. S fotonräknare. (845)
8. **scintillation counter** : an assembly usually consisting of a luminescent material (scintillator), a light guide, a photomultiplier, and a counting circuit. ★ ensemble de comptage à scintillation → *ensemble 5.*

R сцинтилляционный счетчик. D Szintillationszähler. E contador de centelleo. I contatore a scintillazione. N scintillatieteller. P licznik scyntylacyjny. S scintillationsräknare. (881)

counter tube

1. **bell counter tube** (*Syn.* end-window counter tube) : → *counter tube 7*
2. **boron trifluoride counter tube** : a counter tube intended to detect neutrons and containing for this purpose boron trifluoride. The initial ionization is caused by alpha particles and lithium nuclei produced by nuclear reaction of neutrons with boron. ★ tube compteur à trifluorure de bore → *tube compteur 13.* R счетчик с трехфтористым бором. D Bortrifluoridzählrohr; BF_3-Zählrohr. E tubo contador de trifluoruro de boro. I tubo contatore a trifluoruro di boro. N BF3-telbuis; telbuis met boriumtrifluoride. P licznik wypełniony trójfluorkiem boru. S bortrifluoridräknerör. (391)
3. **boron-lined counter tube** : a counter tube intended to detect neutrons and containing for this purpose a boron sensitive lining on its walls or on conveniently shaped electrodes. The initial ionization is caused by alpha particles and lithium nuclei produced by nuclear reaction of neutrons with boron in the lining. ★ tube compteur à dépôt de bore → *tube compteur 4.* R счетчик с покрытием из бора. D Borzählrohr. E tubo contador de depósito de boro. I tubo contatore a deposito di boro. N boriumtelbuis. P licznik z pokryciem borowym. S borbelagt räknerör. (391)
4. **corona counter tube** : a counter tube in which a corona discharge is maintained and a sharp current change is caused by a passing ionizing particle. ★ tube compteur à effet de couronne → *tube compteur 5.* R коронный счетчик. D Coronazählrohr. E tubo contador de efecto corona. I tubo contatore a effetto corona. N coronatelbuis. P licznik koronowy. S koronaräknerör. (391)
5. **counter tube** : a pulse ionization detector consisting of a tube filled with a suitable gas, in which an electric field, sufficient to induce gas multiplication, is provided for the collection at the electrodes of charges associated with the ions and the electrons produced in the sensitive volume of the detector by the ionizing radiation. ★ tube compteur → *tube compteur 1.* R газоразрядный счетчик. D Zählrohr. E tubo contador. I tubo contatore. N telbuis. P licznik promieniowania. S räknerör. (391,881)
6. **dip counter tube** : a counter tube specially designed to be dipped into the liquid whose activity is to be measured. ★ tube compteur à immersion → *tube compteur 10.* R погружной счетчик. D Eintauchzählrohr. E tubo contador de inmersión. I tubo contatore a immersione. N dompeltelbuis. P licznik zanurzeniowy. S doppräknerör. (391)
7. **end-window counter tube** (*Syn.* bell counter tube) : a counter tube, usually having a thin window, designed to allow radiation to enter at one end. ★ tube compteur à fenêtre en bout → *tube compteur 7.* R торцевой счетчик. D Fensterzählrohr. E tubo contador de ventana; tubo contador de campana. I tubo contatore con finestra in testa; tubo contatore campana. N venstertelbuis. P licznik (promieniowania) dzwonowy. S fönster(räkne)rör. (391,531)
8. **external cathode counter tube** : a counter tube, the envelope of which is generally of glass, and the cathode of which is a carbon or metal coating on the external surface of this envelope. ★ tube compteur à cathode externe → *tube compteur 2.* R счетчик с внешним катодом. D Zählrohr mit Aussenkathode; Maze-Zählrohr. E tubo contador de cátodo externo. I tubo contatore a catodo esterno. N telbuis met uitwendige kathode; telbuis van Maze. P licznik z katodą zewnętrzną. S räknerör med yttre katod. (391)
9. **externally-quenched counter tube** : a counter tube that requires the use of an external quenching circuit to inhibit reignition by a momentary reduction of the applied potential difference. ★ tube compteur à coupage externe → *tube compteur 3.* R счетчик с внешним гашением. D Zählrohr mit Fremdlöschung. E tubo contador de extinción externa. I tubo contatore con spegnimento esterno. N telbuis met uitwendige doving. P licznik (promieniowania) gaszony zewnętrznie. S räknerör med yttre släckning. (531)
10. **fission counter tube** : a counter tube intended to detect neutrons and containing, for that purpose, a sensitive lining of fissile materials. The initial ionization is caused by fission fragments produced by nuclear reaction of neutrons with the fissile materials. ★ tube compteur à fission → *tube compteur 8.* R счетчик делений. D Spaltzählrohr. E tubo contador de fisión. I tubo contatore a fissione. N splijtingstelbuis. P licznik rozszczepieniowy. S fissionsräknerör. (391)
11. **flat counter tube** : a counter tube formed by two metallized plane sheets between which several parallel wires are suspended parallel to these sheets. ★ tube compteur plan → *tube compteur 16.* R плоскопараллельный счетчик. D Großflächenzählrohr. E tubo contador plano. I tubo contatore piano. N platte telbuis. P licznik płaski. S plant räknerör. (392)
12. **gas-flow counter tube** : a counter tube in which an appropriate atmosphere is maintained by allowing a gas to flow slowly through the volume. ★ tube-compteur à circulation de gaz → *tube compteur 20.* R счетчик с протоком газа. D Durchflußzählrohr. E tubo contador de circulación de gas. I tubo contatore con circolazione di gas. N gasdoorstroomtelbuis. P licznik (promieniowania) gazowy przepływowy. S räknerör med gasflöde. (531)
13. **gas-sample counter tube** : a counter tube in which the filling gas consists wholly or partly of the radioactive gas whose activity is to be measured. ★ tube-compteur à source gazeuse → *tube compteur 23.* R счетчик внутреннего наполнения. D Gasprobenzählrohr. E tubo contador de muestra gaseosa. I tubo contatore con sorgente gassosa. N gasmonstertelbuis. P licznik (promieniowania) o próbce gazowej. S räknerör för gas. (531)
14. **Geiger-Müller counter tube** : a radiation-counter tube, usually consisting of a hollow cylindrical cathode with a wire anode along its axis, which is operated in the Geiger region. ★ tube-compteur de Geiger-Müller → *tube compteur 27.* R счетчик Гейгера-Мюллера. D Geiger-Müller-Zählrohr. E tubo contador de Geiger-Müller. I tubo contatore di Geiger-Müller. N Geiger-Müllertelbuis. P licznik Geigera-Müllera; licznik G-M. S Geiger-Müllerräknerör. (391,531,881)
15. **halogen-quenched counter tube** : a self-quenched counter tube in which the quenching agent is a halogen, usually bromine or chlorine. ★ tube-compteur à halogène → *tube compteur 21.* R счетчик с галогенным гашением. D Halogenzählrohr. E tubo contador de halógeno. I tubo contatore con alogeno. N telbuis met halogeendoving. P licznik (promieniowania) samogaszący halogenowy. S halogenräknerör. (391,531)
16. **helium counter tube** : a counter tube intended to detect neutrons and containing for this purpose helium-3. The initial ionization is caused by protons and tritium nuclei produced by nuclear reaction of neutrons on helium. ★ tube compteur à hélium → *tube compteur 9.* R гелиевый счетчик. D Helium 3-Zählrohr. E tubo contador de helio. I tubo contatore a elio. N heliumtelbuis. P licznik helowy. S heliumräknerör. (391)
17. **liquid sample counter tube** : a counter tube intended to measure the activity of a liquid. Typically, the unit consists of a cylindrical counter tube surrounded by a coaxial cylindrical cup, which may be either fixed or removable. The liquid is introduced into the annular space between the cup and the counter tube. ★ tube compteur à jupe → *tube compteur 11.* R жидкостной счетчик. D Becherzählrohr. E tubo contador de muestra líquida. I tubo contatore a camicia. N vloeistoftelbuis. P licznik do pomiaru aktywności cieczy. S vätskeräknerör. (391)
18. **needle counter tube** : a radiation counter tube in which the sensitive volume is of small diameter, e.g. 2-3 mm. ★ tube-compteur à aiguille → *tube compteur 17.* R игольчатый счетчик. D Sondenzählrohr. E tubo contador de aguja. I tubo contatore ad ago. N naaldtelbuis. P licznik (promieniowania) igłowy. S nålformat räknerör. (531)
19. **organic-quenched counter tube** : a self-quenched counter tube in which the filling gas contains a small amount of organic vapour (e.g. methanol). ★ tube compteur à vapeur organique → *tube compteur 14.* R счетчик с добавкой паров органических веществ. D Zählrohr mit organischem Löschzusatz. E tubo contador de vapor orgánico. I tubo contatore a vapore organico. N telbuis met organische dover. P licznik z organicznym gazem gaszącym. S räknerör med organisk släckgas. (391)
20. **organic-vapour-quenched counter tube** : a self-quenched counter tube in which the quenching agent is an organic vapour. ★ tube-compteur à vapeur organique → *tube compteur 24.* R счетчик с гашением органическим паром. D Zählrohr mit organischen Dämpfen. E tubo contador de vapor orgánico. I tubo contatore con vapore organico. N telbuis met organischedampdoving. P licznik (promieniowania)

samogaszący o parach organicznych. S räknerör med organisk släckgas. (531)

21. **proportional counter tube** : a counter tube deigned to operate in the proportional region. ★ tube-compteur proportionnel → *tube compteur 29.* R пропорциональный счтчик. D Proportionalzählrohr. E tubo contador proporcional. I tubo contatore proporzionale. N proportionele telbuis. P licznik (promieniowania) proporcjonalny. S proportional(räkne)rör. (391,531,881)
22. **radiation counter tube** : a gas-filled tube, having a gas multiplication factor greater than unity, and in which the individual ionizing events give rise to discrete electrical output pulses. ★ tube-compteur de rayonnement → *tube compteur 28.* R счетчик излучения. D Zählrohr (Strahlungszählrohr). E tubo contador de radiación. I tubo contatore di radiazione. N stralingstelbuis. P licznik promieniowania. S strålningsräknerör. (531)
23. **recoil proton counter tube** : a counter tube intended to detect fast neutrons and containing for this purpose hydrogenous atoms. The initial ionization is caused mainly by recoil protons resulting from the collision of fast neutrons with the nuclei of these hydrogenous atoms. ★ tube compteur à protons de recul → *tube compteur 12.* R счетчик протонов отдачи. D Rückstoßprotonenzählrohr. E tubo contador de protones de rechazo. I tubo contatore a protoni di rinculo. N terugstoottelbuis. P protonowy licznik neutronów. S rekylprotonräknerör. (391)
24. **self-quenched counter tube** : a Geiger-Müller counter tube in which the filling gas is such that the quenching is obtained in the absence of any other device. ★ tube compteur autocoupeur → *tube compteur 15.* R самогасящийся счетчик. D selbstlöschendes Zählrohr. E tubo contador autoextintor. I tubo contatore ad autospegnimento. N zelfdovende telbuis. P licznik samogaszący. S självsläckande räknerör. (391)
25. **self-quenched counter tube** : a Geiger-Müller counter tube in which the discharge is quenched by means of a suitable constituent in the gas. ★ tube-compteur autocoupeur → *tube compteur 25.* R самогасящийся счетчик. D selbstlöschendes Zählrohr. E tubo contador autoextintor. I tubo contatore autospegnente. N zelfdovende telbuis. P licznik (promieniowania) samogaszący. S självsläckande räknerör. (531)
26. **thin-wall counter tube** : a counter tube in which part of the envelope has such low absorption as to permit the detection of radiation of low penetrating capability. ★ tube-compteur à paroi mince → *tube compteur 22.* R тонкостенный счетчик. D Dünnwandzählrohr. E tubo contador de pared delgada. I tubo contatore con parete sottile. N dunwandige telbuis. P licznik (promieniowania) cienkościenny. S tunnväggigt räknerör. (391,531)
27. **window counter tube** : a counter tube with a portion of its envelope, called the window, of such low absorption as to permit the detection of low penetrating power radiation. ★ tube compteur à fenêtre → *tube compteur 6.* R счетчик с окном. D Fensterzählrohr. E tubo contador de ventana. I tubo contatore a finestra. N venstertelbuis. P licznik okienkowy. S fönster[räkne]rör. (391)

counter-clockwise

1. **counter-clockwise polarization** (*Syn.* left-hand polarization) : → *polarization 19*
2. **counter-clockwise polarized wave** (*Syn.* left-hand polarized wave) : → *wave 29*

counter-current

1. **counter-current braking** (*Syn.* regenerative braking of a d.c. machine) : → *machine 22*

counterpoise

1. **counterpoise** : a conductor, or system of conductors, buried in the ground, and connected to the footings of the supports of the line. ★ contrepoids (électrique) → *contrepoids 5.* R заземлитель. D Erdungsleiter. E flagelo (de toma de tierra). I conduttore di terra. N ondergronds aardingssysteem. P uziom (*sł*upa). S markledare. (466)
2. **counterpoise** : a system of conductors, elevated above and capacitively coupled to the ground, to provide the conductive surface for a vertical monopole antenna. ★ contrepoids → *contrepoids 1.* R противовес. D Gegengewicht. E contrapeso. I contrappeso. N tegenwicht. P przeciwwaga. S motvikt. (712)

counterweight

1. **counterweight of a tone arm** : a mass located behind the pivot of the tone arm and the purpose of which is to permit adjustment of the stylus force. ★ contrepoids d'un bras de lecture → *contrepoids 4.* R противовес тонарма. D Gegengewicht eines Tonarmes. E contrapeso de un brazo de lectura. I contrappeso di un braccio di riproduzione. N tegenwicht van een pick-uparm. P przeciwwaga ramienia. S motvikt. (806)
2. **counterweight (to a suspension insulator set)** (*Syn.* suspension set weight) : → *weight 4*

counting

1. **cold cathode counting tube** : → *tube 16*
2. **counting efficiency** : → *efficiency 9*
3. **counting loss** : → *loss 13*
4. **counting rate** : → *rate 14*
5. **(counting) ratemeter** : → *ratemeter 1*
6. **fractional counting loss** : → *loss 32*
7. **maximum counting rate** : → *rate 51*
8. **(pulse) counting assembly** : → *assembly 19*

countouring

1. **countouring** (*Syn.* posterisation) : an effect occurring in digital television images, resulting from the use of an insufficient number of quantising levels to convey the original analogue signal. *Note.* — Contouring is the terme used when the effects are unwanted, whereas the term posterisation is used when the technique is used to provide special effects. ★ (effet de) sous-quantification → *sous-quantification 1.* R ложные контуры. (723)

country

1. **cross country fault** (*Syn.* multiple faults) : → *fault 60*

coup

1. **coup de fouet** : a transient voltage drop at the start of discharge of a fully charged battery with a subsequent recovery to the normal on-load voltage. ★ coup de fouet → *coup 6.* R начальный импульс. D Spannungssack. E caida en la conexión. I colpo di frusta. N spanningszak. P uskok napięcia początkowego. S spänningssäck. (486)

couple

1. **plate couple** (*Syn.* plate pair) : → *pair 12*

coupled

1. **coupled axle drive** : → *drive 5*
2. **coupled modes** : → *mode 11*
3. **coupled reperforator and tape reader** : → *reperforator 1*

coupled-axle

1. **coupled-axle locomotive** : → *locomotive 1*

coupler

1. **acoustic coupler** (for data transmission) : an electro-acoustic transducer by which a data terminal equipment may be coupled to a telephone line by means of a handset. ★ coupleur acoustique → *coupleur 5.* R акустический соединитель. D akustischer Kuppler. E acoplador acústico (para transmisión de datos). I accoppiatore acustico. N akoestische koppeling (voor data-overdracht). P sprzęgacz akustyczny. S akustiskt modem. (721,722)
2. **acoustic coupler** : cavity of predetermined shape and volume used, for example, for the calibration of earphones or microphones in conjunction with a calibrated microphone adapted to measure the sound pressure developed within the cavity. ★ coupleur acoustique → *coupleur 6.* R акустическая камера связи. D akustischer Kuppler. E acoplador acústico. I accoppiatore. N koppelstuk. P łącznik akustyczny. S trykkammare. (722,801)
3. **Bethe hole coupler** : a directional coupler in which two skewed waveguides are coupled by a circular coupling aperture in their contacting broad walls. ★ coupleur de Bethe → *coupleur 7.* R ответвитель Бете. D Bethe-Loch(richt)koppler. E acoplador de Bethe.

I accoppiatore di Bethe. N Bethe-koppeling. P sprzęgacz Bethego. S ..... (726)

4. **branching device** (*Syn.* optical fibre coupler) : → *coupler 18*
5. **bus coupler circuit-breaker** : → *circuit-breaker 3*
6. **cable coupler** : a form of termination in which the terminals are connected to the supply leads by means of a plug and socket device. ★ connecteur → *connecteur 2*. R штепсельный разъем. D Kabelmuffe. E conexiones en enchufe. I connettore a spina. N stopcontactaansluiting. P złącze wtykowe. S uttagsdon av propptyp. (411)
7. **coupler loss** : → *loss 14*
8. **differential coupler** (*Syn.* hybrid coupler) : a four-port device intended to distribute the power fed into any one port equally between two other ports, transferring minimum power, ideally zero, to the fourth port. *Notes. 1* — The ideal distribution of power usually requires that all ports be terminated with matched impedances, the differential coupler being then said to be "balanced". *2* — A differential coupler may be used to combine two signals incident on two ports and feeding a single output port. ★ coupleur différentiel → *coupleur 9*. R дифференциальный ответвитель. D Differentialkoppler; Hybridkoppler. E acoplador diferencial; acoplador híbrido. I accoppiatore differenziale; accoppiatore ibrido. N differentiële koppelaar. P rozgałęźnik. S differentialgrening. (702)
9. **differential coupler** (in a telephone set) : a device in a telephone set for matching the telephone receiver and the telephone transmitter to the line and providing an acceptable level of sidetone. ★ coupleur différentiel → *coupleur 10*. R дифференциальная система. D Differentialkoppler. E acoplador diferencial. I traslatore differenziale. N toestelvork. P rozgałęźnik (różnicowy). S gaffelkoppling. (722)
10. **directional coupler** : a four port device consisting of two transmission lines coupled together in such a manner that a single travelling wave in any one transmission line will induce a single travelling wave in the other, the direction of propagation of the latter wave being dependent upon that of the former. ★ coupleur directif → *coupleur 11*. R направленный ответвитель. D Richtkoppler. E acoplador direccional. I accoppiatore direzionale. N richtkoppeling. P sprzęgacz kierunkowy. S riktkopplare. (726)
11. **directional coupler** : an optical fibre coupler such that the optical power applied to certain input ports is only transferred to one or more defined output ports. ★ coupleur (optique) directif → *coupleur 20*. R направленный оптический разветвитель. D LWL-Richtungskoppler. E acoplador direccional. I accoppiatore direzionale. N richtingskoppelaar. P sprzęgacz kierunkowy. S riktkopplare. (731)
12. **electric automatic coupler** : an electric coupler in which the electrical connections are made through contacts incorporated in mechanical couplings which connect vehicles together automatically on impact. ★ coupleur électrique automatique → *coupleur 13*. R автосцепка. D automatische elektrische Kupplung. E acoplador eléctrico automático. I accoppiatore (elettrico) automatico. N koppeldoos (voor automatisch koppelen). P sprzęgnik elektryczny samoczynny. S automatiskt elkoppel. (811)
13. **electric coupler** : a device used to connect the electric circuits of two coupled vehicles. ★ coupleur électrique → *coupleur 12*. R электрическое междувагонное соединение. D elektrische Kupplung. E acoplador eléctrico. I accoppiatore (elettrico). N elektrische koppeling. P sprzęgnik elektryczny międzywagonowy. S anslutningsdon. (811)
14. **free coupler connector** : → *connector 28*
15. **hybrid coupler** (*Syn.* differential coupler) : → *coupler 8*
16. **mechanical coupler** : device for calibrating bone-conduction vibrators, designed to present a specified mechanical impedance to a vibrator applied with a specified static force, and equipped with an electromechanical transducer to enable the vibratory force level at the surface of contact between vibrator and mechanical coupler to be determined. ★ coupleur mécanique → *coupleur 18*. R механическая камера связи. D mechanischer Kuppler. E acoplador mecánico. I accoppiatore meccanico. N mechanisch koppelstuk. P łącznik mechaniczny. S ..... (801)
17. **(optical) coupler** (*Syn.* optical fibre coupler) : → *coupler 18*
18. **optical fibre coupler** (*Syn.* (optical) coupler; branching device) : a passive device whose purpose is to transfer optical power between two or more ports in a predetermined manner. *Note.* — The ports may be connected to waveguides, sources, detectors etc. ★ coupleur optique → *coupleur 19*. R оптический разветвитель; разветвитель. D LWL-Faserkoppler; LWL-Koppler; Koppler; Verzweiger. E acoplador de fibra óptica; acoplador óptico; acoplador; dispositivo divisor. I accoppiatore ottico a fibra; accoppiatore ottico; accoppiatore; dispositivo di diramazione. N optische vezelkoppelaar; optische koppelaar; koppelaar. P sprzęgacz optyczny; sprzęgacz światłowodowy. S optokopplare. (731)
19. **Riblet coupler** (*Syn.* short slot coupler) : → *coupler 20*
20. **short slot coupler** (*Syn.* Riblet coupler) : a three dB coupler in which two waveguides are coupled by an electrically short single aperture in their common narrow wall. ★ coupleur à fente courte → *coupleur 3*. R щелевой мост; ответвитель Рибле. D Kurzschlitz-(Richt)koppler; Riblet-Koppler. E acoplador de ranura corta; acoplador Riblet. I accoppiatore a fenditura corta; accoppiatore Riblet. N Riblet-koppeling. P sprzęgacz o krótkiej szczelinie. S kortslitskopplare. (726)
21. **star coupler** : an optical fibre coupler in which optical power may be either distributed from one or several input ports to a larger number of output ports or combined from several input ports to a smaller number of output ports. ★ coupleur en étoile → *coupleur 14*. R звездообразный оптический разветвитель. D LWL-Sternkoppler. E acoplador en estrella. I accoppiatore a stella. N sterkoppelaar. P sprzęgacz gwiaździsty. S stjärnkopplare. (731)
22. **tee coupler** : an optical fibre coupler that connects three ports. ★ coupleur en té → *coupleur 15*. R Т-образный разветвитель. D LWL-T-Koppler. E acoplador en T. I accoppiatore a "T". N T-koppelaar. P sprzęgacz typu T. S T-kopplare. (731)
23. **three dB coupler** (*Syn.* 3 dB coupler) : a directional coupler in which one half of the power incident on one port of one transmission line is diverted to one port of the other transmission line. ★ coupleur à 3 dB → *coupleur 4*. R трехдецибельный ответвитель; 3дБ-ответвитель. D 3-dB-(Richt)koppler. E acoplador de 3 dB. I accoppiatore a 3 dB. N 3 dB-koppeling. P sprzęgacz 3 dB. S 3 dB-kopplare. (726)
24. **"Y-coupler"** : a directional coupler with three ports. ★ coupleur en Y → *coupleur 16*. R У-образный разветвитель. D LWL-Y-Koppler. E acoplador en Y. I accoppiatore a "Y". N Y-koppelaar. P sprzęgacz typu Y. S Y-kopplare. (731)
25. **3 dB coupler** (*Syn.* three dB coupler) : → *coupler 23*

coupling

1. **acoustic coupling** (to a telephone line) : a method of coupling a non-telephone equipment to a telephone line by means of transducers which transmit sound waves to a telephone microphone, and receive waves from the telephone receiver. ★ couplage acoustique → *couplage 13*. R акустическое соединение (с телефонной линией). D akustische Kupplung. E acoplamiento acústico (a una línea telefónica). I accoppiamento acustico. N akoestische koppeling (aan een telefoonlijn). P sprzężenie akustyczne. S akustisk koppling. (721)
2. **antenna to medium coupling loss** (*Syn.* gain degradation) : → *degradation 3*
3. **ball and socket coupling** : a coupling consisting of a ball, a socket and a locking device, and providing flexibility. ★ assemblage à rotule → *assemblage 2*. R шарнирное соединение. D Klöppel-Pfannen-Verbindung. E unión por rotura y alojamiento de rótula. I accoppiamento a bottone ed orbita. N klepel-en-komverbinding. P złącze gniazdowo-główkowe. S kläpp- och klapphuskoppling. (471)
4. **bayonet coupling** : a quick coupling device for mating connectors utilizing projections riding in ramps and providing jacking and locking features with limited rotation. ★ accouplement à baïonnette → *accouplement 1*. R замок байонетный. D Bajonettkupplung. E acoplamiento de bayoneta. I accoppiamento a baionetta. N bajonetsluiting; bajonetvergrendeling. P sprzężenie bagnetowe (złącza). S bajonettkoppling. (581)
5. **clevis and tongue coupling** : a coupling consisting of a clevis, a tongue and a clevis-pin, providing limited flexibility. ★ assemblage à chape et tenon → *assemblage 1*. R соединение серьга-проушина. D Gabel-Laschen-Verbindung. E unión por horquilla y lengüeta. I accoppiamento a forcella e mazzetta. N gaffel-en-stripverbinding. P złącze widlasto-uchowe. S gaffel- och länkkoppling. (471)

6. **coupling** : the linkage between two circuits or parts of a circuit, otherwise separate, whereby energy may be transferred from one to the other. ★ couplage → *couplage 10.* R связь. D Kopplung. E acoplamiento. I accoppiamento. N koppeling. P sprzężenie. S koppling. (131)
7. **coupling** : a means or device for transferring power between systems. ★ couplage → *couplage 12.* R связь. D Koppler. E acoplamiento. I accoppiamento. N koppeling. P sprzężenie; sprzęgacz. S kopplingselement. (726)
8. **coupling aperture** : → *aperture 12*
9. **coupling capacitor** : → *capacitor 28*
10. **coupling device (in welding)** : → *device 15*
11. **coupling efficiency** : → *efficiency 10*
12. **coupling factor** : → *factor 31*
13. **coupling hole** (*Syn.* coupling aperture) : → *aperture 12*
14. **coupling loop** : → *loop 4*
15. **coupling loss** : → *loss 15*
16. **coupling path** : → *path 2*
17. **(coupling) probe** : → *probe 1*
18. **coupling ring** : → *ring 6*
19. **coupling slot** (*Syn.* coupling aperture) : → *aperture 12*
20. **coupling torque** : → *torque 8*
21. **cross coupling** (of a circulator) : in a circulator having four or more ports, the attenuation between an input port and any other port that is not adjacent to the input port according to the order of sequence. *Note.* — The cross coupling should not be confused with the reverse loss occurring between adjacent ports. ★ couplage mutuel → *couplage 19.* R развязка в циркулятоpe. D Kreuzkopplung (eines Zirkulators). E acoplamiento neutro (de un circulador); acoplamiento cruzado (de un circulador). I mutuo accoppiamento (di un circolatore). N overspreekfactor. P sprzężenie skrośne. S tvärsdämpning. (221,726)
22. **electric coupling** : a machine which transmits torque from one shaft to another by electrical or magnetic means or in which the torque is controlled by electrical or magnetic means. ★ accouplement électrique → *accouplement 7.* R электромагнитная муфта. D elektrische Kupplung. E acoplamiento eléctrico. I giunto elettrico. N elektr(omagnet)isch koppeling. P sprzęgło elektromagnetyczne. S elektrisk axelkoppling. (411)
23. **electroacoustic coupling coefficient (1)** : → *coefficient 18*
24. **electroacoustic coupling coefficient (2)** : → *coefficient 19*
25. **electromechanical coupling coefficient (1)** : → *coefficient 20*
26. **electromechanical coupling coefficient (2)** : → *coefficient 21*
27. **electromechanical coupling factor** : → *factor 66*
28. **hysteresis coupling** : an electric coupling in which torque is transmitted by forces arising from the resistance to reorientation of established magnetic fields within a ferromagnetic material. ★ accouplement à hystérésis → *accouplement 3.* R гистерезисная муфта. D Hysteresiskupplung. E acoplamiento por histéresis. I giunto ad isteresi. N hysteresiskoppeling. P sprzęgło histerezowe. S hystereskoppling. (411)
29. **induction coupling** : an electric coupling in which torque is transmitted by the interaction of the magnetic field produced by magnetic poles on one rotating member and induced currents in the other rotating member. *Notes. 1* — The magnetic poles may be produced by direct current excitation, permanent magnet excitation, or alternating current excitation. *2* — The induced currents may be carried in a cage or insulated winding, or may be present as eddy currents. *3* — Couplings utilizing a wound secondary winding or a cage winding are known as slip or magnetic couplings. Couplings utilizing eddy-current effects are known as eddy-current couplings. ★ accouplement à induction → *accouplement 4.* R индукционная муфта. D Schlupfkupplung (Induktions-Kupplung). E acoplamiento por inducción. I giunto a induzione. N inductiekoppeling. P sprzęgło indukcyjne. S elektrisk slirkoppling. (411)
30. **(inductive) coupling factor of two circuits** : → *factor 92*
31. **magnetic coupling** (*Syn.* magnetic transmission) : a variable magnetic coupling, used either for starting up or for driving the auxiliaries of an internal combustion engine. ★ coupleur magnétique → *coupleur 17.* R магнитная муфта; магнитная передача. D Magnetkupplung. E acoplador magnético. I frizione magnetica. N magnetische koppeling. P sprzęgło magnetyczne. S magnetisk koppling. (811)
32. **magnetic particle coupling** : an electric coupling which transmits torque through the medium of particles of a magnetic material which conglomerate in a magnetic field between coupling members. ★ accouplement à particules magnétiques → *accouplement 5.* R (ферромагнитная) порошковая муфта. D Magnetpulverkupplung. E acoplamiento por partículas magnéticas. I giunto a limatura magnetica. N magnetische poederkoppeling. P sprzęgło proszkowe. S magnetpulverkoppling. (411)
33. **mode coupling** : in an optical fibre, the exchange of power among modes. ★ couplage des modes → *couplage 14.* R связь мод. D Modenkopplung. E acoplo de modos. I accoppiamento di modo; accoppiamento modale. N moduskoppeling. P sprzężenie modów. S modkoppling. (731)
34. **point of common coupling** : → *point 33*
35. **polarization coupling loss** : → *loss 70*
36. **pull-off coupling** : a coupling in which unlocking is achieved by an axial pull on the coupling ring. ★ accouplement à déconnexion par traction → *accouplement 2.* R замок оттяжной. D pull-off-Kupplung. E acoplamiento de desconexión por tracción. I accoppiamento a disinserzione per trazione. N trekontkoppeling. P sprzężenie odciągane (złącza). S dragurkoppling. (581)
37. **push-pull coupling** : a quick axial coupling device with self-locking and unlocking features. Unlocking is achieved by an axial pull on the coupling ring. ★ accouplement pousser-tirer → *accouplement 10.* R замок самозапирающийся. D push-pull-Kupplung. E acoplamiento «push-pull»(empujar-tirar). I accoppiamento spingi e tira. N druk-trek-koppeling. P sprzężenie odciągano-pchane (złącza). S skjut-dragkoppling. (581)
38. **quick-disconnect coupling** : a type of coupling device which permits relatively rapid uncoupling. ★ déconnexion rapide → *déconnexion 3.* R замок быстродействующий. D Schnellentkupplung. E desconexión rápida. I sconnessione rapida. N snelle ontkoppeling. P sprzężenie szybkorozłączne (złącza). S snabbsärkoppling. (581)
39. **synchronous coupling** : an electric coupling in which torque is transmitted by attraction between magnetic poles on both the driving and driven members which rotate at the same speed. *Note.* — The magnetic poles may be produced by direct or alternating current excitation, or by permanent magnets. The poles on one rotating member may be produced by varying the reluctance. ★ accouplement synchrone → *accouplement 11.* R синхронная муфта. D Synchronkupplung. E acoplamiento síncrono. I giunto sincrono. N synchrone koppeling. P sprzęgło synchroniczne. S elektrisk axelkoppling av synkrontyp. (411)
40. **threaded coupling** : a means of coupling by engaging screw threads present on the mating components. ★ accouplement par bague filetée → *accouplement 8.* R замок резьбовой. D Schraubkupplung. E acoplamiento por anillo fileteado. I accoppiamento a filetto. N schroefkoppeling; schroefvergrendeling. P sprzężenie gwintowe (złącza). S gängkoppling. (581)
41. **transductor fault limiting coupling** : a transductor used to limit the short-circuit current in a power system. ★ transducteur de limitation du courant de défaut → *transducteur 10.* R управляемый токоограничивающий реактор. D Transduktor-Strombegrenzer. E transductor limitador de corriente de falta. I trasduttore limitatore di corrente di guasto. N stroombegrenzende transductor. P transduktor przeciwzwarciowy. S transduktorströmbegränsare. (431)

cove

1. **cove lighting** : → *lighting 3*

cover

1. **cover flange** : → *flange 3*
2. **dust cover** : a cover used in storage and transit. ★ protecteur → *protecteur 8.* R чехол пылезащитный. D Staubschutzkappe. E protector (contra el polvo). I prova polvere. N stofkap. P osłona przeciwpyłowa. S dammskydd. (581)
3. **end-winding cover** : a cover to protect an end winding against mechanical damage or to prevent inadvertent contact with the

end winding, or both. ★ couvre-enroulement → *couvre-enroulement 1.* R кожух лобовых частей. D Wickelkopf-Abdeckung. E cubredevanado. I cuffia. N spoelkopbeschermkap. P osłona uzwojenia. S lindningskåpa. (411)

4. **protective cover** : an accessory to cover a component for mechanical, environmental and/or electrical protection, normally fitted with a means for attachment to the equipment or cable. ★ capuchon protecteur → *capuchon 1.* R заглушка. D Schutzkappe. E capuchón protector. I cappuccio di protezione. N beschermkap. P osłona; pokrywa. S skyddshuv. (581)
5. **protective cover** (*Syn.* shroud) : a cover made of insulating material, used to cover live or unenergized elements, or adjacent earthed metalwork in order to avoid accidental contact. ★ protecteur → *protecteur 9.* R изолирующая накладка. D isolierende Schutzvorrichtung. E protector. I ricoprimento protettivo. N beschermende afdekking. P izolacyjna nakładka ochronna. S isolerande klädsel. (604)

coverage

1. **coverage** (of a broadcast transmitter) : the size of, or the population within, the coverage area of a transmitter. ★ couverture → *couverture 2.* R охват (вещательным передатчиком). (723)
2. **coverage area** : → *area 10*
3. **coverage area** : → *area 11*
4. **fault coverage** : the proportion of faults of an item that can be recognized under given conditions. ★ couverture des pannes → *couverture 3.* R полнота выявления неисправностей. D erkennbarer Fehleranteil. E cobertura de averías. I copertura di avaria. N dekkingsgraad van te achterhalen defecten. P zasięg niezdatności. S felupptäcktsgrad. (191)
5. **primary coverage area** : → *area 34*
6. **repair coverage** : the proportion of faults of an item that can be successfully corrected. ★ couverture des réparations → *couverture 4.* R полнота ремонта. D reparierbarer Fehleranteil. E cobertura de reparaciones. I copertura per la riparazione. N dekkingsgraad van reparaties. P zasięg naprawy. S reparationsförmåga. (191)
7. **secondary coverage area** : → *area 36*

covering

1. **inner covering** : a non-metallic covering which surrounds the assembly of the cores (and fillers if any) of a multiconductor cable and over which the protective covering is applied. ★ revêtement d'assemblage → *revêtement 4.* R поясная изоляция. D gemeinsame Aderumhüllung. E revestimiento interior. I guainetta (interna). N gesloten opvulling. P powłoka wewnętrzna (wypełniająca). S inre mantel. (461)

crackle

1. **crackle** (in telecommunications) : noise appearing as an intermittent succession of clicks. ★ crachement → *crachement 1.* R потрескивание (в электросвязи). D Prasseln (in der Telekommunikation). E crujido; chisporroteo (en telecomunicación). I crepitio intermittente. N ratel. P trzeszczenie. S knaster. (702)
2. **crackle** : a spurious noise perceived as a series of crackling sounds when reproducing a disk. ★ grésillement → *grésillement 2.* R потрескивание. D Kratzgeräusch. E crepitación. I crepitio. N gekraak. P trzask. S knaster. (806)

crackling

1. **crackling** : abrupt changes of an electrode current caused by varying insulation or varying contact resistance. ★ crachements → *crachement 2.* R треск. D Krachen. E crepitaciones. I scroscio. N gekraak. P trzaski. S sprak; knaster. (531)

cradle

1. **cradle switch** (*Syn.* switch hook) : → *hook 2*
2. **tilting cradle** : a steel framework into which is placed the inductor assembly, the whole of which may be tilted to allow liquid metal to be emptied from the crucible which is contained within the inductor assembly. ★ berceau de basculement → *berceau 1.* R наклоняющийся каркас с узлом индуктора. D Kippgestell. E cuna de basculamiento. I culla di rovesciamento. N kipstoel. P kołyska przechyłowa. S tippvagga. (841)

cranked

1. **cranked coil** : → *coil 13*

crate

1. **battery crate** : a container with frame walls for holding several cells or batteries. ★ châssis → *châssis 1.* R батарейный ящик. D Batterieträger. E chasis de batería. I telaio. N batterijkrat. P skrzynia klatkowa. S batterilåda. (486)

crawling

1. **crawling** : stable but abnormal running of a synchronous or asynchronous machine at a speed near to a submultiple of the synchronous speed. ★ rampage → *rampage 1.* R застревание. D Schleichen. E arrastre. I rotazione lenta subsincrona. N kruipen. P pełzanie. S krypkörning. (411)

CRE

1. **CRE** (*Syn.* corrected reference equivalent) : → *equivalent 6*

creep

1. **creep** : a condition under which a wheel producing tractive or braking effort rotates slightly faster or slower than that required by the speed of the vehicle. *Note.* — The value may be expressed either in percentage or in absolute terms. ★ microglissement → *microglissement 1.* R микроскольжение. D Mikroschlupf. E corrimiento de la vía. I microslittamento. N microslip. P mikropoślizg. S krypning. (811)

creepage

1. **creepage distance** : → *distance 5*
2. **protected creepage distance** : → *distance 18*

creeping

1. **creeping** (of a d.c motor) : the undesired running at slow speed of a d.c. motor due to residual magnetism. ★ rampage → *rampage 2.* R самопроизвольное вращение (машины постоянного тока). D Schleichen (eines Gleichstrommotors). E arrastre (de un motor de corriente continua). I rotazione lenta per magnetismo residuo. N kruipen (van een gelijkstroommotor). P samobieg. S krypning. (411)

crepe

1. **crepe paper** : → *paper 3*

creping

1. **creping** : the operation of crinkling paper in order to increase its stretch and softness. ★ crêpage → *crêpage 1.* R крепирование. D Kreppen. E crepado; corrugado. I crespatura. N crêpen. P marszczenie. S kräppning. (212)

crest

1. **circuit crest working off-state voltage** : → *voltage 23*
2. **circuit crest working reverse voltage** : → *voltage 24*
3. **time to crest (of a switching impulse)** : → *time 205*

crimp

1. **crimp** : a connection made by crimping. ★ sertissure → *sertissure 1.* R обжатие (операция). D Crimpverbindung. E engastado. I crimpatura. N krimpverbinding. P połączenie (elektryczne) zagniatane. S pressförbindning. (581)
2. **crimp anvil** : → *anvil 1*
3. **crimp connection** : → *connection 24*
4. **crimp contact** : → *contact 63*
5. **crimp indentor** : → *indentor 1*
6. **crimp inspection hole** : → *hole 6*
7. **full cycle crimp mechanism** : → *mechanism 7*

crimping

1. **crimping** : a method of permanently attaching a termination to a conductor by pressure deformation or by reshaping the barrel around the conductor to establish good electrical and mechanical connection. ★ sertissage → *sertissage 9.* R обжатие (метод). D Crimpen. E engaste. I crimpatura. N krimpen. P zagniatanie. S kontaktpressning. (581)
2. **crimping tool** : → *tool 1*
3. **locator of a crimping tool** : → *locator 2*
4. **positioner of a crimping tool** : → *positioner 1*

criterion

1. **Rayleigh criterion** : a criterion which characterizes the degree of roughness of a surface, for a given grazing angle of an electromagnetic wave, according to the value of the quantity :

$$\frac{h \sin \theta}{\lambda}$$

where h is the average height of the surface irregularities, θ is the grazing angle relative to the average surface, λ is the wavelenght. *Note.* — In practice, roughness is negligible and the surface is considered specular if :

$$\frac{h \sin \theta}{\lambda} < \frac{1}{100}$$

★ critère de Rayleigh → *critère 2.* D Rayleigh-Kriterium. P kryterium Rayleigha. (705)

2. **(supply) continuity criterion** : a quantity derived by aggregation of an appropriate characteristic of each supply interruption such as number, duration, lost energy, and which expresses the deviation from the ideal state of continuous supply to consumers over a given period of time. ★ critère de continuité (du service) → *critère 1.* R показатель непрерывности электроснабжения. D Kontinuitätskriterium (der Versorgung). E criterios de continuidad (de servicio). I criterio di continuità (del servizio). N continuïteitscriterium. P kryterium ciągłości dostawy. S kriterium på leveranssäkerhet. (604)

critical

1. **auditory critical band** : → *band 3*
2. **critical** : fulfilling the condition that a nuclear chain reacting medium has an effective multiplication factor equal to unity. (A reactor is critical when the rate of neutron production, excluding neutron sources whose strengths are not a function of fission rate is equal to the rate of neutron loss). ★ critique → *critique 7.* D kritisch. E crítico. I critico. N kritiek; kritisch. P krytyczny. S kritisk. (026)
3. **critical angle** : → *angle 18*
4. **critical anode voltage** : → *voltage 38*
5. **critical build-up resistance** : → *resistance 8*
6. **critical build-up speed** : → *speed 9*
7. **critical damping** : → *damping 1*
8. **critical equation** : → *equation 2*
9. **critical experiment** : → *experiment 1*
10. **critical failure** : → *failure 10*
11. **critical fault** : → *fault 5*
12. **critical field** : → *field 4*
13. **critical flicker frequency** (*Syn.* fusion frequency) : → *frequency 108*
14. **critical frequency** : → *frequency 24*
15. **critical frequency** : → *frequency 25*
16. **critical grid current** : → *current 39*
17. **critical grid voltage** : → *voltage 39*
18. **critical mass** : → *mass 8*
19. **critical organ** : → *organ 2*
20. **critical rate of rise of off-state voltage** : → *rate 15*
21. **critical rate of rise of on-state current** : → *rate 16*
22. **critical resistance** : → *resistance 9*
23. **critical self-excitation** : → *self-excitation 3*
24. **critical size** : → *size 2*
25. **critical speed in resistance braking** : → *speed 10*
26. **critical state** : → *state 8*
27. **critical temperature (of a cell or battery)** : → *temperature 12*
28. **critical torsional speeds** : → *speed 11*
29. **critical wavelength** : → *wavelength 3*
30. **critical whirling speeds** : → *speed 12*
31. **delayed critical** : identical with "critical"; the term is used to emphasize that the delayed neutrons are necessary to achieve the critical state. ★ critique différé → *critique 8.* D verzögert kritisch. E crítico retrasado. I critico ritardato. N kritiek (kritisch) met nakomende neutronen. P krytyczny na neutronach opóźnionych. S fördröjd kritisk. (026)
32. **prompt critical** : fulfilling the condition that a nuclear chain reacting medium is critical utilizing prompt neutrons only. ★ critique instantané → *critique 9.* D prompt kritisch. E crítico instantáneo. I critico istantaneo. N prompt-kritiek (-kritisch). P krytyczny na neutronach natychmiastowych. S prompt kritisk. (026)

criticality

1. **criticality monitor** : → *monitor 4*
2. **fault modes, effects and criticality analysis** : → *analysis 7*

cross

1. **cross bar** : → *bar 7*
2. **cross country fault** (*Syn.* multiple faults) : → *fault 60*
3. **cross coupling** : → *coupling 21*
4. **cross fading** : → *fading 1*
5. **cross firing** (*Syn.* multi-field therapy) : → *therapy 5*
6. **cross grid** : → *grid 6*
7. **cross polarization** : → *polarization 8*
8. **cross polarization discrimination** : → *discrimination 1*
9. **cross polarization isolation** : → *isolation 1*
10. **ionospheric cross modulation** : → *modulation 24*

crossarm

1. **crossarm** : a component which is part of a top hamper of a tower and illustrated by figure 3.13. ★ console → *console 1.* R консольная часть траверсы. D Querträger. E cruceta. I mensola. N traverse. P poprzecznik wysięgnikowy. S regelarm. (466)

crossbar

1. **crossbar switch** : → *switch 9*
2. **crossbar transformer** : → *transformer 22*
3. **crossbar transition** (*Syn.* crossbar transformer) : → *transformer 22*

cross-bonding

1. **continuous cross-bonding** : a form of cross-bonding applicable to circuits consisting of more than three elementary sections in which the cable shields are successively cross bonded and the cables usually transposed at each junction between adjacent elementary sections throughout the cable route. At each end of the route the shields are solidly bonded and earthed. ★ permutation continue → *permutation 3.* R непрерывное поперечное соединение. D kontinuierliches Auskreuzen. E permutacio'n continua. I connessione trasposta continua. N ..... P krzyżowanie ciągłe. S ..... (461)
2. **cross-bonding** : a form of special bonding in which the cable shields in consecutive elementary sections are cross connected so that each continuous shield circuit surrounds the three phase conductors consecutively. ★ permutation → *permutation 1.* R поперечное соединение. D Auskreuzen. E permutacio'n. I connessione trasposta. N kruislings doorverbonden. P krzyżowanie żył powrotnych (powłok metalowych). S korskoppling av skärmar. (461)
3. **sectionalised cross-bonding** : the form of cross-bonding in which three consecutive elementary sections, termed «minor sections», are taken to form a single unit, termed a «major section». The three shields are solidly bonded at both ends of a major section and may be earthed at these points. At the two intermediate positions the cables are usually transposed and the shields are so interconnected that each continuous shield circuit through the major section occupies the same geometrical position in the cable formation. For long cable routes there may be a number of major sections. ★ permutation ternaire → *permutation 4.* R секционированиое соединение. D unterteiltes Auskreuzen. E permutacio'n ternaria. I connessione trasposta a sezioni ternarie. N kruislings doorverbonden per sectie. P krzyżowanie sekejonowane. S ..... (461)

crosscolour

1. **crosscolour** (*Syn.* colour crosstalk) : appearance of spurious colour on a picture due to the luminance signals of a picture interfering with the chrominance signals of the same picture. *Note.* — This impairment occurs particularly in systems using composite colour signals. ★ diaphotie luminance-chrominance → *diaphotie 5.* R перекрестные искажения яркость- цветность. (723)

2. **crosscolour noise** : → *noise 10*

cross-compound

1. **cross-compound set** : → *set 13*

cross-connection

1. **cross-connection area** : → *area 12*
2. **cross-connection point** : → *point 7*

crosscorrelation

1. **crosscorrelation function** : → *function 9*

crossed-field

1. **crossed-field** (M-type tube) : a space-charge-wave tube in which the directions of the electron beam, the static electric field and the static magnetic field are mutually perpendicular. ★ tube à champs croisés → *tube 28.* R лампа со скрещенными полями (лампа М-типа). D Kreuzfeldröhre (M-Typ-Röhre). E tubo de campos cruzados (tubo tipo M). I tubo con campi incrociati (tipo M). N dwarsveldbuis (M-type buis). P lampa typu M; lampa o polach skrzyżowanych. S carcinotronrör (M-typsrör). (531)

crossing

1. **crossing** : the passage of a telecommunication line from one side of electrical line to the other. ★ croisement → *croisement 1.* R пересечение электрических линий. D Kreuzung. E cruzamiento. I incrocio. N kruising. P skrzyżowanie. S korsning. (604)
2. **overhead crossing** : an arrangement employed where contact wires cross at an angle, permitting the current collector to travel along either of the wires. ★ croisement aérien → *croisement 2.* R воздушное пересечение. D Fahrdrahtkreuzung. E cruzamiento aéreo. I incrocio dei fili. N (vrijlopend) rijdraadkruising. P krzyżownica. S ledningsgrening. (811)

crossluminance

1. **crossluminance** : appearance of spurious dots on a picture due to the chrominance signal of a picture interfering with the luminance signals of the same picture. *Note.* — This impairment occurs particularly in systems using composite colour signals. ★ diaphotie chrominance-luminance → *diaphotie 3.* R перекрестные искажения цветность-яркость. (723)

crossmodulation

1. **crossmodulation** : modulation of the carrier of a wanted signal by an unwanted signal, produced by interaction of the signals in non-linear equipment, electrical networks or transmission media. ★ transmodulation → *transmodulation 1.* R перекрестная модуляция. D Kreuzmodulation. E transmodulación. I transmodulazione. N kruismodulatie. P modulacja skrośna. S korsmodulation. (161,702)

cross-office

1. **cross-office check** : → *check 8*

cross-over

1. **constant voltage/constant current crossover** : behaviour of an instrument supplying a quantity which automatically converts the mode of operation from voltage stabilization to current stabilization when the output current reaches a preset value, and vice-versa. ★ transition de fonctionnement tension constante/courant constant → *transition 11.* R переход «стабилизированное напряжение × стабилизированный ток». D Übergang von Konstantspannungs- zu Konstantstrom-Betrieb. E transición de funcionamiento tensión constante/corriente constante. I transizione da tensione costante a corrente costante. N overgang van constante spanning naar constante stroom. P zmiana stabilizacji napięciowej na prądową (i odwrotnie). S konstant spänning/konstant ström-övergång. (303)
2. **cross-over junction** : → *junction 4*
3. **crossover of load characteristic** : the transition from one load characteristic to another when at least one is a stabilized characteristic. ★ transition de caractéristique de charge → *transition 10.* R переходная область нагрузочной характеристики. D Übergang der Lastkennlinie. E transición de característica de carga. I transizione della caratteristica di carico. N overgang van de belastingskarakteristiek. P zmiana charakterystyki obciążenia. S gränspunkt för belastningsstabilisering. (303)
4. **crossover point** : → *point 8*
5. **cross-over range** : → *range 12*

crosspoint

1. **crosspoint** : an elementary controlled device used for switching. ★ point de connexion → *point 17.* R точка коммутации. D Koppelpunkt. E punto de conexión; punto de cruce. I punto d'incrocio; punto di connessione. N kruispunt. P punkt komutacyjny. S kopplingspunkt. (714)
2. **electronic crosspoint** : a crosspoint implemented by solid state of other non-moving contact devices. *Note.* — A sealed moving contact, such as a reed contact, cannot be regarded as an electronic crosspoint. ★ point de connexion électronique → *point 18.* R электронная точка коммутации. D elektronischer Koppelpunkt. E punto de conexión electrónico. I punto d'incrocio elettronico. N elektronisch kruispunt. P punkt komutacyjny elektroniczny. S elektronisk kopplingspunkt. (714)
3. **mechanical crosspoint** : a crosspoint implemented by a set of moving electrical contacts, operated simultaneously. ★ point de connexion mécanique → *point 19.* R механическая точка коммутации. D mechanischer Koppelpunkt. E punto de conexión mecánico. I punto d'incrocio elettromeccanico. N mechanisch kruispunt. P punkt komutacyjny mechaniczny. S mekanisk kopplingspunkt. (714)

cross-polar

1. **cross-polar pattern** : → *pattern 4*

cross-section

1. **activation cross-section** : the cross-section for the formation of a radionuclide by a specified interaction. ★ section efficace d'activation → *section efficace 3.* D Aktivierungsquerschnitt. E sección eficaz de activación. I sezione efficace d'attivazione. N activeringsdoorsnede. P przekrój czynny aktywacji. S aktiveringstvärsnitt. (026)
2. **back scattering cross section** (of an antenna) (*Syn.* back scattering area (of an antenna)) : the scattering cross section of a receiving antenna for the direction opposite to the direction of propagation of the incident wave. ★ aire de rétrodiffusion → *aire 9.* R поперечное сечение обратного рассеяния (антенны); площадь обратного рассеяния (антенны). D Rückstreuquerschnitt (einer Antenne); Rückstreufläche (einer Antenne). E sección transversa de retrodispersión (de una antena); área de retrodispersión (de una antena). I sezione di reirradiazione. N achterwaarts verstrooiingsgebied. P powierzchnia rozpraszania wstecznego (anteny). S monostatiskt spridningstvärsnitt. (712)
3. **backscattering cross section of a surface or a bottom** : backscattering cross section of a surface (or bottom) that scatters isotropically over a hemisphere and returns an echo equal to that from the actual scatterer. ★ surface efficace de réverbération d'une surface ou d'un fond → *surface 46.* R поперечное сечение обратного рассеяния поверхности (дна). D Rückstreuquerschnitt einer Oberfläche; Rückstreuquerschnitt eines Grundes. E sección transversal de reverberación de una superficie, del fondo. I area di diffusione di ritorno di una superficie, del fondo. N terugverstrooiingsdoorsnede van een oppervlak (van een bodem). P przekrój pogłosowy powierzchni lub dna. S återspridningstvärsnitt (för en yta eller botten). (801)
4. **backscattering cross section of an object or a volume** : 4π multiplied by the square of backscattered sound pressure multiplied by the square of distance from the acoustic centre of the scatterer divided by the square of the sound pressure incident on the scatterers in the stated volume. The angle of incidence must be indicated, and the angle of scattering if other than backward. ★ surface efficace de réverbération d'un objet ou d'un volume → *surface 45.* R поперечное сечение обратного рассеяния объекта или объема. D Rückstreuquerschnitt. E sección transversal de reverberación de un objeto o volumen. I superficie di diffusione di ritorno di un ostacolo. N terugverstrooiingsdoorsnede. P przekrój pogłosowy obiektu lub objętości. S återspridningstvärsnitt (för ett föremål eller en volym). (801)
5. **capture cross-section** : the cross-section for the capture process. ★ section efficace de capture → *section efficace 4.* D Einfangquerschnitt. E sección eficaz de captura.

I sezione efficace di cattura. N vangstdoorsnede. P przekrój czynny wychwytu. S infångningstvärsnitt. (026)

6. **coherent scattering cross-section** : the cross-section for the coherent scattering process. ★ section efficace de diffusion cohérente → *section efficace 7.* D Wirkungsquerschnitt für kohärente Streuung. E sección eficaz de dispersión coherente. I sezione efficace per sparpagliamento coerente. N doorsnede voor coherente verstrooiing. P przekrój czynny rozpraszania spójnego. S tvärsnitt för koherent spridning. (026)

7. **cross-section** : a measure of the probability of a specified interaction between an incident radiation and a target particle or system of particles. It is the reaction rate per target particle for a specified process divided by the flux density of the incident radiation (microscopic cross-section). In reactor physics the term is sometimes applied to a specified group of target particles, e.g. those per unit volume (macroscopic cross-section), or per unit mass, or those in a specified body. *Note :* unless otherwise qualified the term "Cross-section" means "Microscopic cross-section". ★ section efficace → *section efficace 1.* D Wirkungsquerschnitt. E sección eficaz. I sezione efficace. N (werkzame) doorsnede. P przekrój czynny. S tvärsnitt. (026,881)

8. **differential cross-section** : the cross-section for an interaction process involving one or more outgoing particles with specified direction or energy per unit interval of solid angle or energy. ★ section efficace différentielle → *section efficace 18.* D differentieller Wirkungsquerschnitt. E sección eficaz diferencial. I sezione efficace differenziale. N differentiële (werkzame) doorsnede. P przekrój czynny różniczkowy. S differentiellt tvärsnitt. (026)

9. **Doppler averaged cross-section** : a cross-section averaged over energy, employing appropriate weighting factors, to take into account the effect of thermal motion of the target particles such that the product of the average cross-section so obtained and the flux density in the laboratory system gives the correct reaction rate. ★ section efficace moyenne Doppler → *section efficace 22.* D Doppler gemittelter Wirkungsquerschnitt. E sección eficaz media Doppler. I sezione efficace media Doppler. N doorsnede met Doppler-correctie. P przekrój czynny uśredniony wg efektu Dopplera. S dopplervägt medeltvärsnitt. (026)

10. **effective collision cross-section** : the probability of collision per unit path-length of the incident particles divided by the number density of the particles constituting the target. ★ section efficace de choc → *section efficace 5.* R эффективное поперечное сечение соударения. D (effektiver) Wirkungsquerschnitt. E sección eficaz de choque. I sezione efficace d'urto. N werkzame doorsnede. P przekrój zderzenia czynny. S träffarea. (111)

11. **effective thermal cross-section** (*Syn.* Westcott cross-section) : a fictitious cross-section for a specified interaction which, when multiplied by the conventional flux density, gives the correct reaction rate. *Note.* — the use of the term is usually restricted to capture and fi ssion in well-moderated systems. ★ section efficace thermique effective → *section efficace 24.* D effektiver thermischer Wirkungsquerschnitt. E sección eficaz térmica efectiva; sección eficaz de Wescott. I sezione efficace termica effettiva; sezione efficace di Westcott. N effectieve thermische doorsnede; Westcott-doorsnede. P efektywny termiczny przekrój czynny Westcotta. S effektivt termiskt tvärsnitt. (026)

12. **elastic scattering cross-section** : the cross-section for the elastic scattering process. ★ section efficace de diffusion élastique → *section efficace 8.* D Wirkungsquerschnitt für elastische Streuung. E sección eficaz de dispersión elástica. I sezione efficace per sparpagliamento elastico. N doorsnede voor elastische verstrooiing. P przekrój czynny rozpraszania sprężystego. S tvärsnitt för elastisk spridning. (026)

13. **fission cross-section** : the cross-section for the fission process. ★ section efficace de fission → *section efficace 13.* D Wirkungsquerschnitt für Kernspaltung. E sección eficaz de fisión. I sezione efficace di fissione. N doorsnede voor splijting. P przekrój czynny rozszczepienia. S klyvningstvärsnitt. (026)

14. **group removal cross-section** : the weighted average cross-section characteristic of an energy group, that will account for the removal of neutrons from that group by all processes. ★ section efficace d'extraction de groupe → *section efficace 17.* D Gruppenverlustquerschnitt. E sección eficaz de extracción de grupo. I sezione efficace d'estrazione di gruppo. N groepsdoorsnede voor verwijdering. P przekrój czynny usunięcia z grupy. S gruppavlägsningstvärsnitt. (026)

15. **group transfer scattering cross-section** : the weighted average cross-section, characteristic of the energy group structure, that will account for the transfer of neutrons by scattering from one specified group to another specified group. It is one element of the corresponding group transfer scattering matrix. ★ section efficace de transfert de groupe par diffusion (dispersion) → *section efficace 14.* D Gruppenübergangsquerschnitt. E sección eficaz de transferencia de grupo por dispersión. I sezione efficace di gruppo per sparpagliamento. N intergroepdoorsnede voor verstrooiing. P przekrój czynny przeniesienia z grupy do grupy. S gruppspridningstvärsnitt. (026)

16. **incoherent scattering cross-section** : the cross-section for the incoherent scattering process. ★ section efficace de diffusion incohérente → *section efficace 9.* D Wirkungsquerschnitt für inkohärente Streuung. E sección eficaz de dispersión incoherente. I sezione efficace per sparpagliamento incoerente. N doorsnede voor incoherente verstrooiing. P przekrój czynny rozpraszania niespójnego. S tvärsnitt för inkoherent spridning. (026)

17. **inelastic scattering cross-section** : the cross-section for the inelastic scattering process. ★ section efficace de diffusion inélastique → *section efficace 10.* D Wirkungsquerschnitt für unelastische Streuung. E sección eficaz de dispersión inelástica. I sezione efficace per sparpagliamento anelastico. N doorsnede voor inelastische verstrooiing. P przekrój czynny rozpraszania niesprężystego. S tvärsnitt för inelastisk spridning. (026)

18. **macroscopic cross-section** : the cross-section per unit volume of a given material for a specified process. It has the dimension of reciprocal length. For a pure nuclide, it is the product of the microscopic cross-section and the number of target nuclei per unit volume; for a mixture of nuclides, it is the sum of such products. ★ section efficace macroscopique → *section efficace 20.* D makroskopischer Wirkungsquerschnitt. E sección eficaz macroscópica. I sezione efficace macroscopica. N macroscopische doorsnede. P przekrój czynny makroskopowy. S makroskopiskt tvärsnitt. (026)

19. **microscopic cross-section** : the cross-section per target nucleus, atom or molecule. It has the dimension of area and may be visualized as the area normal to the direction of an incident particle which has to be attributed to the target particle to account geometrically for its interaction with the incident particle. (See also "cross-section" and "barn"). ★ section efficace microscopique → *section efficace 21.* D mikroskopischer Wirkungsquerschnitt. E sección eficaz microscópica. I sezione efficace microscopia. N microscopische (werkzame) doorsnede. P przekrój czynny mikroskopowy. S mikroskopiskt tvärsnitt. (026)

20. **neutron absorption cross-section** : the cross-section for the neutron absorption process. It is the difference between the total cross-section and the scattering cross section. ★ section efficace d'absorption des neutrons → *section efficace 2.* D Neutronenabsorptionsquerschnitt. E sección eficaz de absorción neutrónica. I sezione efficace d'assorbimento dei neutroni. N doorsnede voor neutronabsorptie; absorptiedoorsnede. P przekrój czynny pochłaniania neutronów. S neutronabsorptionstvärsnitt. (026)

21. **non-elastic (interaction) cross-section** : the difference between the total cross-section and the elastic scattering cross-section. *Note.* — the non-elastic cross-section is differen t from the inelastic scattering cross-section. ★ section efficace (d'interaction) non élastique → *section efficace 19.* D Wirkungsquerschnitt für nichtelastische Wechselwirkung. E sección eficaz (de interacción) inelástica. I sezione efficace (d'interazione) non elastica. N niet-elastische doorsnede. P przekrój czynny oddziaływania nieelastycznego. S tvärsnitt för oelastisk växelverkan. (026)

22. **radiative inelastic scattering cross-section** : the cross-section for the radiative inelastic scattering process. ★ section efficace de diffusion inélastique radiative → *section efficace 11.* D Wirkungsquerschnitt für unelastische Streuung mit Strahlungsemission. E sección eficaz de dispersión inelástica radiativa. I sezione efficace per sparpagliamento anelastico radiativo. N doorsnede voor stralende inelastische verstrooiing. P przekrój czynny radiacyjnego rozpraszania niesprężystego. S tvärsnitt för radiativ inelastisk spridning. (026)

23. **scattering cross section** (of an antenna) (*Syn.* scattering area (of an antenna)) : the ratio of the total power that an isotropic radiator would radiate when producing a radiation

intensity equal to that of the re-radiation from a given receiving antenna in a specified direction, to the power flux density of the incident plane wave of specified polarization and direction of propagation. ★ aire de rerayonnement → *aire 8.* R поперечное сечение рассеяния (антенны); площадь рассеяния (антенны). D Streuquerschnitt (einer Antenne); Streufläche (einer Antenne). E sección transversa de dispersión (de una antena); área de dispersión (de una antena). I sezione di diffusione; sezione di scattering. N verstrooiingsgebied (van een antenne). P powierzchnia rozpraszania (anteny). S spridningstvärsnitt. (712)

24. **scattering cross-section** : the cross-section for the scattering process. ★ section efficace de diffusion → *section efficace 6.* D Streuquerschnitt. E sección eficaz de dispersión. I sezione efficace per sparpagliamento. N verstrooiingsdoorsnede. P przekrój czynny rozpraszania. S spridningstvärsnitt. (026)
25. **scattering cross-section of a surface or a bottom** : area of a plane progressive wave intercepting an amount of sound power equal to that scattered from the surface (or bottom) over a hemisphere. ★ surface efficace de diffusion d'une surface ou d'un fond → *surface 44.* R поперечное сечение рассеяния поверхности (дна). D Streuquerschnitt einer Oberfläche; Streuquerschnitt eines Grundes. E sección transversal de dispersión de una superficie, del fondo. I area di diffusione di una superficie, del fondo. N verstrooiingsdoorsnede van een oppervlak (van een bodem). P przekrój rozpraszający powierzchni lub dna. S spridningstvärsnitt (för en yta eller botten). (801)
26. **scattering cross-section of an object or volume** : area intercepting an amount of sound power of a plane progressive wave equal to that scattered in all directions by the object or by the scatterers in the stated volume. ★ surface de diffusion d'un objet ou d'un volume → *surface 35.* R поперечное сечение объекта или объема. D Streuquerschnitt. E sección transversal de dispersión de un objeto o volumen. I superficie di diffusione. N verstrooiingsdoorsnede. P przekrój rozpraszający obiektu lub objętości. S spridningstvärsnitt (för ett föremål eller en volym). (801)
27. **thermal cross-section** : the cross-section for interaction by thermal neutrons. *Note.* — since t hermal neutrons have different energy distributions in different situations e.g. at different temperatures, this is not a precise term, and for this reason cross-sections for 2200 m/s neutrons are commonly quoted. ★ section efficace thermique → *section efficace 23.* D thermischer Wirkungsquerschnitt. E sección eficaz térmica. I sezione efficace termica. N thermische doorsnede. P termiczny przekrój czynny. S termiskt tvärsnitt. (026)
28. **thermal inelastic scattering cross-section** : the cross-section for the thermal inelastic scattering process. ★ section efficace de diffusion inélastique thermique → *section efficace 12.* D Wirkungsquerschnitt für unelastische Streuung thermischer Neutronen. E sección eficaz de dispersión inelástica térmica. I sezione efficace per sparpagliamento anelastico termico. N doorsnede voor thermische inelastische verstrooiing. P przekrój czynny termicznego rozpraszania niesprężystego. S tvärsnitt för termisk inelastisk spridning. (026)
29. **total cross-section** : the sum of the cross-sections for all the separate interactions between the incident radiation and a specified target. ★ section efficace totale → *section efficace 25.* D totaler Wirkungsquerschnitt. E sección eficaz total. I sezione efficace totale. N totale microscopische (werkzame) doorsnede. P całkowity przekrój czynny. S totalt tvärsnitt. (026)
30. **transport cross-section** : the total cross-section less the product of the scattering cross-section and the average cosine of the scattering angle in the laboratory system. The reciprocal of the macroscopic transport cross-section is the transport mean free path. ★ section efficace de transport → *section efficace 15.* D Transportquerschnitt. E sección eficaz de transporte. I sezione efficace di trasporto. N transportdoorsnede. P przekrój czynny transportu. S transporttvärsnitt. (026)
31. **Westcott cross-section** (*Syn.* effective thermal cross-section) : → *cross-section 11*

cross-span

1. **cross-span** (*Syn.* span wire) : a wire or cable, normally electrically insulated, placed across the track and used : either to support one or more overhead contact lines (headspan) or to carry the lateral registration forces (cross-span registration). ★ transversal → *transversal 38.* R поперечный трос. D Querdraht; Querseil. E transversal. I filo (di sostegno) trasversale. N spandraad. P linka poprzeczna. S tvärspann. (811)

crosstalk

1. **colour crosstalk** (*Syn.* crosscolour) : → *crosscolour 1*
2. **crosstalk** : the appearance of undesired energy in a channel, owing to the presence of a signal in another channel, caused by, for example induction, conduction or non-linearity. ★ diaphonie → *diaphonie 1.* R переходное влияние. D Nebensprechen. E diafonía. I diafonia. N overspraak. P przesłuch. S överhörning. (722)
3. **crosstalk** (in television) (*Syn.* crossview) : superposition on the picture of unwanted images caused by signals in other video channels. ★ diaphotie → *diaphotie 2.* R перекрестные искажения (в телевидении). (723)
4. **cross-talk** : the ratio, expressed in decibels, between two voltages occurring at the output terminals of channels A and B, viz. U_A due to the wanted signal intended for channel A, and U'_A due to the unwanted signal produced by channel A in channel B. ★ diaphonie → *diaphonie 2.* R переходное затухание. D Übersprechen. E diafonía. I diafonia. N overspraak. P przesłuch. S överhörning. (806)
5. **crosstalk attenuation** : → *attenuation 15*
6. **cross-talk between spiral groove** : spurious signals occuring during the reproduction of a disk record, due to the intermodulation of two adjacent grooves. ★ diaphonie entre spires → *diaphonie 3.* R механическое эхо. D Übersprechen von Rille zu Rille. E diafonía entre espiras. I diafonia tra spire. N groefoverspraak. P przesłuch międzyrowkowy. S spåröverhörning. (806)
7. **crosstalk meter** : → *meter 16*
8. **crosstalk reference equivalent** : → *equivalent 7*
9. **far-end crosstalk** : crosstalk which corresponds to far-end crosstalk attenuation. ★ télédiaphonie → *télédiaphonie 1.* R переходное влияние на дальнем конце. D Fernnebensprechen. E telediafonía. I telediafonia. N veraf-overspraak. P przesłuch zdalny. S fjärröverhörning. (722)
10. **far-end crosstalk attenuation** : → *attenuation 19*
11. **intelligible crosstalk** : crosstalk in the form of intelligible signals. ★ diaphonie intelligible → *diaphonie 5.* R внятное переходное влияние. D verständliches Nebensprechen. E diafonía inteligible. I diafonia intelligibile. N verstaanbare overspraak. P przesłuch zrozumiały. S förståbar överhörning. (722)
12. **near-end crosstalk** : crosstalk which corresponds to near-end crosstalk attenuation. ★ paradiaphonie → *paradiaphonie 1.* R переходное влияние на ближнем конце. D Nahnebensprechen. E paradiafonía. I paradiafonia. N nabij-overspraak. P przesłuch zbliżny. S näröverhörning. (722)
13. **near-end crosstalk attenuation** : → *attenuation 28*
14. **quadrature crosstalk** : in colour television systems where the colour components are transmitted by quadrature amplitude modulation of a subcarrier, crosstalk between the two components of the chrominance signal as a result of quadrature distortion. ★ diaphotie de quadrature → *diaphotie 4.* R квадратурные перекрестные искажения. (723)
15. **signal to crosstalk ratio** : → *ratio 84*
16. **unintelligible crosstalk** : crosstalk in the form of unintelligible signals. ★ diaphonie inintelligible → *diaphonie 4.* R невнятное переходное влияние. D unverständliches Nebensprechen. E diafonía ininteligible. I diafonia inintelligibile. N niet verstaanbare overspraak. P przesłuch niezrozumiały. S oförståbar överhörning. (722)

crossview

1. **crossview** (*Syn.* crosstalk) : → *crosstalk 3*

crown

1. **crown roof** (*Syn.* arc furnace roof refractories) : → *refractory 1*

CRT

1. **CRT projector** (*Syn.* cathode ray tube (television) projector) : → *projector 1*

crucible

1. **crucible** : a container for the charge being made of refractory or electrical conducting materials, for example steel, copper or graphite. ★ creuset → *creuset 1.* **R** тигель. **D** Tiegel. **E** crisol. **I** crogiolo. **N** kroes. **P** tygiel. **S** degel. (841)
2. **crucible furnace inductor coil** : → *coil 14*
3. **crucible of coreless induction furnace** : a pot for containing a charge, usually constructed of refractory materials and placed within the furnace induction coil. ★ creuset du four à induction → *creuset 4.* **R** тигель индукционной печи. **D** Tiegel eines kernlosen Induktionstiegelofens. **E** crisol de horno de inducción. **I** crogiolo di un forno ad induzione senza nucleo. **N** kroes van een kernloze inductieoven. **P** tygiel pieca indukcyjnego bezrdzeniowego. **S** ugnsdegel. (841)
4. **double crucible technique** : → *technique 8*
5. **induction crucible furnace** : → *furnace 24*
6. **induction "lift off coil" crucible melting furnace** : → *furnace 30*
7. **inductor assembly crucible furnace** : → *furnace 33*

crush

1. **crush load (of a train unit)** : → *load 9*

crushing

1. **black crushing** (of a television picture) : a marked reduction in contrast of dark areas of the picture. ★ écrasement des noirs → *écrasement 2.* **R** сжатие черного. (723)
2. **white crushing** (of a television picture) : a marked reduction in contrast of bright areas of the picture. ★ écrasement des blancs → *écrasement 1.* **R** сжатие белого. (723)

crystal

1. **crystal conduction detector** : → *detector 6*
2. **crystal cutter head** : → *head 1*
3. **crystal mixer** : → *mixer 2*
4. **crystal pick-up head** : → *pick-up head 3*
5. **crystal spectrograph** : → *spectrograph 1*
6. **ideal crystal** : a crystal which is perfectly periodic in structure, and accordingly contains no impurities or other imperfections. ★ cristal idéal → *cristal 4.* **R** идеальный кристалл. **D** Idealkristall. **E** cristal ideal. **I** cristallo ideale. **N** perfect kristal. **P** kryształ idealny. **S** ideal kristall. (521)
7. **liquid crystal display** : → *display 4*
8. **lumbered synthetic quartz crystal** (*Syn.* pre-dimensioned bar) : → *bar 10*
9. **orientation of a synthetic quartz crystal** : → *orientation 4*
10. **oven controlled crystal oscillator** : → *oscillator 3*
11. **piezoelectric crystal element** : → *element 39*
12. **piezoelectric crystal or ceramic vibrator** : → *vibrator 5*
13. **simple packaged crystal oscillator** : → *oscillator 6*
14. **synthetic quartz crystal** : a single crystal of alpha quartz grown by the hydrothermal method. *Note.* — The crystal is of either handedness and in the "as grown" condition. ★ cristal de quartz synthétique → *cristal 2.* **R** кристалл синтетического кварца. **D** synthetischer Quarzkristall. **E** cristal de cuarzo sintético. **I** cristallo di quarzo sintetico. **N** synthetisch kwartskristal. **P** kryształ kwarcu syntetycznego. **S** syntetiskt kvartsämne. (561)
15. **synthetic quartz crystal batch** : → *batch 2*
16. **temperature compensated crystal oscillator** : → *oscillator 7*
17. **voltage controlled crystal oscillator** : → *oscillator 8*

CT

1. **CT** (*Syn.* computed tomography) : → *tomography 1*

CTI

1. **CTI** (*Syn.* comparative tracking index) : → *index 6*

CTV

1. **CTV** (*Syn.* colour television) : → *television 5*

cue

1. **cue** : a pre-arranged signal sent to a studio or other programme source for production purposes, to indicate that some action is about to be taken. ★ signal d'avertissement → *signal 82.* **R** сигнал предупреждения. (723)
2. **cue track** : → *track 4*

cumulative

1. **compound motor (cumulative or differential)** : → *motor 17*
2. **cumulative absorbed dose** : → *dose 11*
3. **cumulative compounded** : → *compounded 1*
4. **cumulative distribution** (*Syn.* probability distribution) : → *probability 7*
5. **cumulative dose** : → *dose 12*
6. **cumulative downward flux proportion** : → *proportion 1*
7. **cumulative fission yield** : → *yield 2*
8. **cumulative flux** : → *flux 3*
9. **water cumulative flows** : → *flow 13*

cup

1. **focusing cup** : a metal cup, in which the cathode of an X-ray tube is mounted, which electrostatically focuses the electron beam upon the focal spot on the surface of the anode. ★ pièce de focalisation → *pièce 4.* **R** фокусирующий цилиндр. **D** Wehnelt-Zylinder. **E** pieza de focalización. **I** coppa focalizzata. **N** focusseerelektrode. **P** cylinder ogniskujący. **S** fokuseringskåpa. (881)

cupping

1. **cupping** (*Syn.* transverse curl) : the curvature of the tape surface perpendicular to and symmetrical about the centre line of the tape. ★ courbure transversale → *courbure 1.* **R** поперечное коробление. **D** transversaler Bandverzug. **E** curvatura transversal. **I** curvatura trasversale. **N** dwarskrul. **P** korytkowatość (taśmy). **S** (band)buktighet. (806)

cure

1. **cure** (verb) : to convert a prepolymeric or polymeric composition into a more stable, usable condition by polymerization and/or crosslinking. ★ traiter → *traiter 1.* **R** отверждать. **D** härten. **E** curar. **I** trattare; cuocere. **N** uitharden. **P** utwardzać. **S** härda. (212)

curie

1. **curie** (*Ci*) : the unit of activity, expressed in disintegrations per second, $1\,Ci = 3{,}7 \times 10^{10}$ disintegrations per second. *Note.* — Sometimes it is used incorrectly to designate a quantity of radionuclide. ★ curie → *curie 1.* **R** кюри. **D** Curie. **E** curie. **I** curie. **N** Curie. **P** kiur. **S** curie. (026,391,881)
2. **Curie point** : → *point 9*

curing

1. **cold curing** (*Syn.* cold setting) : curing a thermosetting material at room temperature. *Note* — May be used as a noun, and as an adjective. ★ durcissement à froid → *durcissement 2.* **R** холодное отверждение; холодное затвердевание. **D** Kalthärtung. **E** curado en frío. **I** indurimento a freddo. **N** koudhardend. **P** utwardzanie na zimno. **S** kallhärdning. (212)
2. **curing temperature** : → *temperature 13*
3. **curing time** : → *time 34*

curl

1. **curl** (of a vector field) (*Syn.* rotation (of a vector field)) : a vector quantity equal to the limit of the integral over a closed surface of the vector product of the surface element and the vector field divided by the volume contained by the surface when all its dimensions become infinitesimal.

$$\mathrm{rot}\, f = \nabla \times f = \lim_{\int \mathrm{d}\tau \to 0} \frac{\int n \times f \mathrm{d}A}{\int \mathrm{d}\tau}$$

★ rotationnel → *rotationnel 2.* **R** ротор (векторного поля). **D** Rotor; Rotation (eines Vektorfeldes). **E** rotacional (de un campo vectorial). **I** rotazionale (di un campo vettoriale). **N** rotatie. **P** rotacja; wirowość. **S** rotation. (101)

2. **transverse curl** (*Syn.* cupping) : → *cupping 1*

current

1. **actual transformation ratio of a current transformer** : → *ratio 2*
2. **anode current** : the electrode current corresponding to the anode. ★ courant anodique → *courant 21.* R анодный ток. D Anodenstrom. E corriente anódica. I corrente anodica. N anodestroom. P prąd anody. S katodström. (531)
3. **antenna current** : for an antenna where each radiating element may be considered to be a single wire, the total current at a specified point, usually at the feed point or at a current standing-wave maximum. ★ courant d'antenne → *courant 48.* R ток антенны. D Antennenstrom. E corriente de antena. I corrente d'antenna. N antennestroom. P prąd anteny. S antennström. (712)
4. **arc current** : the current in an electric arc. ★ courant d'arc → *courant 49.* R ток дуги. D Bogenstrom. E intensidad de corriente de arco. I corrente d'arco. N boogstroom. P prąd łuku. S ljusbågsström. (841)
5. **auto-compound current transformer** : → *transformer 4*
6. **bar primary bushing type current transformer** : → *transformer 10*
7. **bar primary type current transformer** : → *transformer 11*
8. **basic current** : the specified limiting value of the current for which the relay is required not to operate. ★ courant de base → *courant 50.* R уставка по току несрабатывания. D Basisstrom. E corriente básica. I corrente di base. N basisstroom. P prąd bazowy : prąd nastawczy. S basvärdesström. (448)
9. **beam current** : the current through a specified cross section of an electron beam. ★ courant de faisceau → *courant 75.* R ток пуча. D Strahlstrom. E corriente de haz. I corrente del fascio. N bundelstroom. P prąd wiązki. S strålström. (531)
10. **beam current** : the electron current of the beam impinging upon the screen. ★ courant de faisceau → *courant 76.* R ток пучка. D Strahlstrom. E corriente de haz. I corrente di fascio. N bundelstroom (kathodestraalbuizen). P prąd wiązki. S strålström. (531)
11. **biasing current** : a direct or alternating current passing through the coils of a recording head which produces the biasing magnetic field. ★ courant de polarisation → *courant 90.* R ток подмагничивания. D Vormagnetisierungsstrom. E corriente de polarización. I corrente di polarizzazione. N voormagnetiseringsstroom. P prąd podkładu. S förmagnetiseringsström. (806)
12. **breakaway starting current** (of an a.c. motor) : the highest root mean square current absorbed by the motor when at rest, and when it is supplied at the rated voltage and frequency. *Note.* — This is a design value and transient phenomena are ignored. ★ courant initial de démarrage → *courant 134.* R начальный пусковой ток (двигателя переменного тока). D Anzugsstrom (eines Wechselstrommotors, Rechenwert). E corriente inicial de arranque (de un motor de corriente alterna). I corrente di spunto. N initiële aanloopstroom (van een wisselstroommotor). P początkowy prąd rozruchowy-wartość obliczona. S startström. (411)
13. **breaking current** (of a switching device or a fuse) : the current in a pole of a switching device or in a fuse at the instant of initiation of the arc during a breaking process. ★ courant coupé → *courant 37.* R ток отключения (коммутационного аппарата или предохранителя). D Ausschaltstrom (eines Schaltgerätes oder einer Sicherung). E corriente (intensidad) de corte (de un aparato de conexión o de un fusible). I corrente d'interruzione (di un apparecchio di manovra o di un fusibile). N uitschakelstroom (van een schakeltoestel of een smeltveiligheid). P prąd wyłączeniowy. S brytström. (441)
14. **bus type current transformer** : → *transformer 14*
15. **bushing type current transformer** : → *transformer 15*
16. **cable type current transformer** : → *transformer 16*
17. **cathode current** : the electrode current corresponding to the cathode. ★ courant cathodique → *courant 28.* R катодный ток. D Kathodenstrom. E corriente catódica. I corrente catodica. N kathodestroom. P prąd katody. S katodström. (531)
18. **cathode current** : the current flowing to that cathode which carries the main discharge. ★ courant cathodique → *courant 29.* R катодный ток. D Kathodenstrom. E corriente catódica. I corrente catodica. N kathodestroom (met gas gevulde buizen). P prąd katody. S (huvud)katodström. (531)
19. **cathode-covering current** (*Syn.* minimum cathode current) : → *current 130*
20. **charging current of a capacitor** : the current which flows during the charging of a capacitor. ★ courant de charge d'un condensateur → *courant 51.* R зарядный ток конденсатора. D Ladestrom eines Kondensators. E corriente de carga de un condensador. I corrente di carica di un condensatore. N laadstroom van een condensator. P prąd ładowania kondensatora. S uppladdningsström. (436)
21. **circulating current** : that part of the current which flows through the transition impedance at the time when two tappings are bridged during a tap-change operation and which is due to the voltage difference between the tappings. ★ courant de circulation → *courant 56.* R циркулирующий ток. D Ausgleichstrom. E corriente de circulación. I corrente di circolazione. N circulatiestroom. P prąd wyrównawczy. S cirkulationsström. (421)
22. **compound-wound current transformer** : → *transformer 20*
23. **conduction current** : the steady state component of the electrification current. ★ courant de conduction → *courant 59.* R ток проводимости. D Leitungsstrom. E corriente de conducción. I corrente di conduzione. N geleidingsstroom. P prąd przewodzenia. S ledningsström. (212)
24. **conduction current** : directed movement of free charge carriers in a medium under the influence of an electric field. ★ courant de conduction → *courant 60.* R ток проводимости. D Leitungsstrom. E corriente de conducción. I corrente di conduzione. N geleidingsstroom. P prąd przewodzenia. S ledningsström. (521)
25. **constant current charge** : → *charge 22*
26. **constant voltage/constant current crossover** : → *cross-over 1*
27. **constrained current operation** : → *operation 13*
28. **continuous rated current** : a) of a series reactor : The continuous current for which the reactor is designed. b) of a three-phase neutral reactor or three-phase earthing transformer: The continuous current in the neutral for which the equipment is designed when it is supplied at its rated voltage and frequency. ★ courant permanent assigné → *courant 147.* R установившийся номинальный ток. D Bemessungs-Dauerstrom. E corriente permanente asignada. I corrente nominale permanente. N toegekende continu toelaatbare stroom. P prąd pracy ciągłej znamionowy. S kontinuerlig märkström. (421)
29. **control current** : the current which flows in a control winding of a transductor. ★ courant de commande → *courant 57.* R ток управления. D Steuerstrom. E corriente de control. I corrente di comando. N stuurstroom. P prąd sterowniczy. S styrström. (431)
30. **control current** (of a Hall generator) : the current through a Hall plate which generates the Hall voltage by interaction with a magnetic field. ★ courant de commande → *courant 58.* R управляющий ток (генератора Холла). D Steuerstrom (eines Hallgenerators). E corriente de control (de un generador de Hall). I corrente di comando (di un generatore di Hall). N stuurstroom (van een Hallgenerator). P prąd sterujący (generatora Halla). S styrström. (521)
31. **control current sensitivity** : → *sensitivity 5*
32. **control current terminals** : → *terminal 4*
33. **controlled current source** : → *source 6*
34. **conventional fusing current** : a value of current specified as that which causes operation of the fuse-link within a specified time (conventional time). ★ courant conventionnel de fusion → *courant 34.* R условный ток плавления. D grosser Prüfstrom. E corriente (intensidad) convencional de fusión. I corrente convenzionale di fusione. N grote beproevingsstroom. P prąd probierczy górny. S gränsbrytström. (441)
35. **conventional non-fusing current** : a value of current specified as that which the fuse-link is capable of carrying for a specified time (conventional time) without melting. ★ courant conventionnel de non-fusion → *courant 36.* R условный ток неплавления. D kleiner Prüfstrom. E corriente (intensidad) convencional de no fusión. I corrente convenzionale di non fusione. N kleine beproevingsstroom. P prąd probierczy dolny. S gränshållström (för säkring). (441)
36. **conventional non-tripping current** (of an over-current release) : a specified value of current which the release can

carry for a specified time (conventional time) without operating. ★ courant conventionnel de non-déclenchement → *courant 35.* R условный ток несрабатывания (максимального расцепителя тока). D Nichtauslösestrom (eines überlastauslösers). E corriente (intensidad) convencional de no disparo (de un disparador de sobreintensidad). I corrente convenzionale di non sgancio (di uno sganciatore di massima corrente). N aangegeven houdstroom (van een overstroomlosser). P prąd niezadziałania (wyzwalacza nadprądowego). S gränshållström (för överströmsutlösare). (441)

37. **conventional operating current** (of a protective device) : a specified value of the current which causes the protective device to operate within a specified time, designated conventional time. ★ courant conventionnel de fonctionnement → *courant 33.* R ток срабатывания. D vereinbarter Ansprechstrom. E corriente convencional de funcionamiento (de un dispositivo de protección). I corrente convenzionale di funzionamento. N aanspreekstroom. P prąd wyzwalający. S överenskommen funktionsström. (826)

38. **conventional tripping current** (of an over-current release) : a specified value of current which causes the release to operate within a specified time (conventional time). ★ courant conventionnel de déclenchement → *courant 32.* R условный ток срабатывания (максимального расцепителя тока). D Auslösestrom (eines Überlastauslösers). E corriente (intensidad) convencional de disparo (de un disparador de sobreintensidad). I corrente convenzionale di sgancio (di uno sganciatore di massima corrente). N aangegeven uitschakelstroom (van een overstroomlosser). P prąd zadziałania zwłocznego (wyzwalacza nadprądowego). S gränsutlösningsström. (441)

39. **critical grid current** : the grid current corresponding to the critical grid voltage immediately prior to anode ignition. ★ courant critique de grille → *courant 41.* R критический ток сетки. D kritischer Gitterstrom. E corriente crítica de rejilla. I corrente critica di griglia. N kritische roosterstroom. P prąd siatki zapłonowy. S kritisk gallerström. (531)

40. **critical rate of rise of on-state current** : → *rate 16*

41. **current** (through a surface) (*I*) : a scalar quantity equal to the flux of the current density through that surface. ★ courant → *courant 16.* R ток (через поверхность). D Strom (durch eine Oberfläche). E corriente (a través de una superficie). I corrente (attraverso una superficie). N stroom. P natężenie prądu; prąd (przewodzenia). S ström. (121)

42. **current amplification** (*Syn.* current ratio) : → *ratio 23*

43. **current circuit** : → *circuit 48*

44. **current collector** : → *collector 8*

45. **current collector** (*Syn.* trolley-head) : → *trolley-head 1*

46. **current controlling transductor** : → *transductor 2*

47. **current delay angle** : → *angle 19*

48. **current delay angle** : → *angle 20*

49. **current element** : → *element 12*

50. **current error** : → *error 19*

51. **current in the fault** : the current flowing through the fault. ★ courant dans le défaut → *courant 46.* R ток в месте повреждения. D Fehlerstrom. E corriente en la falta. I corrente nel guasto. N stroom door de foutplaats. P prąd w miejscu zakłócenia. S ström i felställe. (603)

52. **current in the short circuit** : the current flowing through the short circuit. ★ courant dans le court-circuit → *courant 45.* R ток в месте замыкания. D Kurzschlußstrom. E corriente en el cortocircuito. I corrente nel cortocircuito. N stroom door de kortsluiting. P prąd w miejscu zwarcia. S ström i kortslutningspunkt. (603)

53. **current ionization chamber** : → *ionization chamber 8*

54. **current linkage** : → *linkage 1*

55. **current matching transformer** : → *transformer 23*

56. **current probe** : → *probe 2*

57. **current pulsation** : → *pulsation 1*

58. **current ratio** : → *ratio 23*

59. **current relay** : → *relay 6*

60. **current setting** : → *setting 2*

61. **current setting range** : → *range 13*

62. **current transformer** : → *transformer 24*

63. **cut-off current** (*Syn.* let-through current) : the maximum instantaneous value of current attained during the breaking operation of a switching device or a fuse. *Note.* — This concept of particular importance when the switching device or the fuse operates in such a manner that the prospective peak current of the circuit is not reached. ★ courant coupé limité → *courant 38.* R ток обрыва. D Durchlassstrom. E corriente (intensidad) de corte limitada. I corrente di interruzione limitata. N kapstroom. P prąd ograniczony. S begränsningsström. (441)

64. **de-electrification current** : the current through a short circuit established between two electrodes immediately after they have been applied to an insulating medium, or after storage for some time with the electrodes disconnected from a voltage source and from each other. *Note.* — The de-electrification current may arise, for example from residual polarization of the insulating medium, or from static charges. ★ courant de désélectrisation → *courant 73.* R ток разряда. D Entladungsstrom. E corriente de deselectrización. I corrente di de-elettrizzazione. N ontlaadstroom. P prąd deelektryzacji. S urladdningsström. (212)

65. **deflection current** : the current in a deflector coil. ★ courant de déviation → *courant 74.* R отклоняющий ток. D Ablenkstrom. E corriente de desviación. I corrente di deflessione. N afbuigstroom. P prąd odchylający. S avböjningsström. (531)

66. **depolarization current** : the current through a short circuit established between two electrodes in contact with an insulating medium after electrification by direct voltage for some time. *Note.* — The depolarization current is usually measured after electrification for so long a time that the polarization current is negligible. ★ courant de dépolarisation → *courant 72.* R ток деполяризации. D Depolarisationsstrom. E corriente de despolarización. I corrente di depolarizzazione. N depolarisatiestroom. P prąd depolaryzacji. S depolariseringsström. (212)

67. **design current** (of a circuit) : the current intended to be carried by a circuit in normal service. ★ courant d'emploi → *courant 114.* R расчетный ток (цепи). D Nennstrom (eines Stromkreises). E corriente de diseño (de un circuito). I corrente di impiego (di un circuito). N ontwerpstroom (van een stroomketen). P prąd obliczeniowy. S normal belastningsström (för en elkrets). (826)

68. **direct-axis component of current** : → *component 17*

69. **discharge current (of an arrester)** : the impulse current which flows through the arrester. ★ courant de décharge (d'un parafoudre) → *courant 65.* R ток разрядника. D Ableitstoßstrom eines Überspannungsableiters. E corriente de descarga (de un pararrayos). I corrente di scarica (di un parafulmine); corrente di uno scaricatore. N ontlaadstroom (van een afleider). P prąd wyładowczy odgromnika. S avledningsström. (604)

70. **discharging current of a capacitor** : the current which flows during the discharging of a capacitor. ★ courant de décharge d'un condensateur → *courant 64.* R разрядный ток конденсатора. D Entladestrom eines Kondensators. E corriente de descarga de un condensador. I corrente di scarica di un condensatore. N ontlaadstroom van een condensator. P prąd rozładowania kondensatora. S urladdningsström. (436)

71. **double current transmission** : → *transmission 22*

72. **earth current** : all the leakage currents and capacitive currents between a conductor and the earth. ★ courant à la terre → *courant 17.* R ток на землю. D Erdstrom. E corriente de tierra. I corrente di terra. N aardlekstroom. P prąd doziemny. S jordfelsström. (151)

73. **eddy current loss** : → *loss 24*

74. **effective induction area of the control current loop** : → *area 17*

75. **electrification current** : the current between two electrodes in contact with an insulating medium when direct voltage is applied between them. ★ courant d'électrisation → *courant 111.* R ток электризации. D Ladungsstrom; Elektrisierungsstrom. E corriente de electrización. I corrente di elettrizzazione. N laadstroom. P prąd elektryzacji. S inkopplingsström. (212)

76. **electrode current** : the net value of the current passing to or from an electrode through the interelectrode space. *Note.* — Unless otherwise stated, an electrode current is measured at an available terminal. ★ courant d'électrode → *courant 112.* R ток электрода. D Elektrodenstrom. E corriente de electrodo. I corrente elettrodica. N elektrodestroom. P prąd elektrody. S elektrodström. (531)

77. **electronic controlling elements for current** : → *controlling 6*

78. **elementary (conduction) current** : for a charge carrier, a vector quantity equal to the product of its charge and its average velocity. *Note.* — The average velocity should be considered over a very short time interval but nevertheless sufficiently great so that the effects of thermal agitation are negligible. ★ courant élémentaire (de conduction) → *courant 129.* R элементарный ток (проводимости). D ..... E corriente elemental (de conducción). I corrente (di conduzione) elementare. N elementaire (geleidings)stroom. P prąd (przewodzenia) elementarny. S ..... (121)

79. **erasing current** : a direct or alternating current passing through the coils of an erasing head which produces a magnetic field used to erase signals recorded on a magnetic tape. ★ courant d'effacement → *courant 110.* R ток стирания. D Löschstrom. E corriente de borrado. I corrente di cancellazione. N wisstroom. P prąd kasujący. S raderström. (806)

80. **exciting current** : the r.m.s. value of the current taken by the secondary winding of a current transformer, when a sinusoidal voltage of rated frequency is applied to the secondary terminals, the primary and any other windings being open-circuited. ★ courant d'excitation → *courant 118.* R ток намагничивания. D sekundärer Erregerstrom. E intensidad de excitación. I corrente di eccitazione. N magnetiseringsstroom. P prąd jałowy. S tomgångsström. (321)

81. **extended rating current** : the highest value of the primary current, expressed as a percentage of primary rated current, at which an extended rating type current transformer complies with the temperature rise and accuracy requirements. ★ courant étendu assigné → *courant 131.* R номинальный ток расширенного диапазона. D erweiterte Bemessungsstromstärke. E intensidad extendida asignada. I corrente nominale primaria estesa. N vergrote toegekende stroom. P rozszerzony zakres prądowy. S förhöjd märkström. (321)

82. **extended rating type current transformer** : → *transformer 31*

83. **extinction current** : the minimum current at which a discharge can be maintained between two given electrodes. ★ courant d'extinction → *courant 119.* R ток деионизации. D Löschstrom. E corriente de extinción. I corrente di estinzione. N doofstroom. P prąd gaśnięcia. S släckström. (531)

84. **fault current** : the current flowing at a given point of a network resulting from a fault at another point of this network. ★ courant de défaut → *courant 67.* R ток при повреждении. D Teilfehlerstrom. E corriente de falta. I corrente di guasto. N foutstroom. P prąd zakłóceniowy. S felström. (603)

85. **fault current of an electrode** : the surge current of an electrode under fault conditions, e.g. arc-backs or external short-circuits. ★ courant de défaut d'une électrode → *courant 68.* R ток электрода в аварийных условиях. D Überlastungsstromstoß. E corriente de defecto de un electrodo. I corrente di guasto di un elettrodo. N elektrodefoutstroom. P prąd (elektrody) udarowy anomalny. S elektrodström vid fel. (531)

86. **feeding current** (of a telephone station) : a direct current primarily used to power the speech circuit in a telephone station. ★ courant d'alimentation → *courant 43.* R питающий ток (телефонного аппарата). D Speisestrom. E corriente de alimentación (de un aparato telefónico). I corrente di alimentazione. N voedingsstroom. P prąd zasilania. S matningsström. (722)

87. **fibrillating current** : a current giving rise to an irregular action of the heart known as fibrillation. ★ courant de fibrillation → *courant 77.* R ток фибрилляции. D Flimmerstrom. E corriente de fibrilación. I corrente di fibrillazione. N fibrillatiestroom. P prąd migotania (serca). S strömförorsakat hjärtkammarflimmer. (604)

88. **filament current** : the current in a filament lead under stated conditions. ★ courant de chauffage → *courant 52.* R ток накала. D Heizstrom (einer direkt geheizten Kathode). E corriente de caldeo (cátodo de caldeo directo). I corrente di riscaldamento (catodo a riscaldamento diretto). N gloeistroom (direct verhitte kathode). P prąd żarzenia. S glödström (hos direkt upphettad katod). (531)

89. **filament or heater starting (surge) current** : the peak value of the filament or heater current resulting from the application of the filament or heater voltage under stated conditions. ★ courant de chauffage au démarrage → *courant 54.* R пусковой ток (бросок тока) тела прямого накала или подогревателя. D Heizer-oder (Faden-) Einschaltstrom. E corriente de caldeo de arranque. I corrente di riscaldamento all'inserzione. N inschakelstootstroom. P prąd żarzenia rozruchowy. S glödström vid inkoppling. (531)

90. **forward current** (of a junction) : current which flows in the forward direction. ★ courant direct → *courant 123.* R прямой ток (перехода). D Strom in Leitrichtung (eines Überganges). E corriente directa (de una unión). I corrente diretta (di una giunzione). N doorlaatstroom (v.e. grenslaag). P prąd w kierunku przewodzenia (złącza). S framström. (391)

91. **free current operation** : → *operation 24*

92. **free-field current sensitivity** : → *sensitivity 10*

93. **freezing current** : that value of increasing current causing contraction of the muscles of a person subjected to an electric shock and preventing separation from the current source. ★ courant de contraction → *courant 61.* R неотпускающий ток. D Krampfschwelle. E corriente de contracción. I corrente di contrazione. N contractiestroom. P prąd skurczu (mięśni). S strömförorsakad muskelkramp. (604)

94. **frequency of unity current transfer ratio** : → *ratio 40*

95. **fully insulated current transformer** : → *transformer 32*

96. **gas current** : an unwanted ion current resulting from collisions between electrons and residual gas molecules in a vacuum tube. ★ courant de gaz → *courant 83.* R ионный ток. D Ionen-Gitter (fehl) strom. E corriente de gas. I corrente di ionizzazione. N gasïonisatiestroom. P prąd jonowy szczątkowy. S gasström. (531)

97. **gate non-trigger current** : the gate current corresponding to the gate non-trigger voltage. ★ courant de non-amorçage par la gâchette → *courant 87.* R неотпирающий ток управляющего электрода. D höchster nichtzündender Steuerstrom. E corriente de no disparo de puerta. I corrente di non-innesco di comando. N niet-ontstekende stuurstroom. P prąd bramki nieprzełączający. S icke-tändande styrström. (521)

98. **gate trigger current** : the lowest gate current required to switch a thyristor from the off-state to the on-state. ★ courant d'amorçage par la gâchette → *courant 44.* R отпирающий ток управляющего электрода. D Zündstrom. E corriente de disparo de puerta. I corrente di innesco di comando. N stuurstroom voor ontsteking. P prąd bramki przełączający. S tänd(styr)ström. (521)

99. **grid current** : the total current in the lead of the grid of a tube. The grid current is defined as being positive when the flow of electrons is from the grid terminal to the external circuit. ★ courant de grille → *courant 84.* R ток сетки. D Gitterstrom. E corriente de rejilla. I corrente di griglia. N roosterstroom. P prąd siatki. S gallerström. (531)

100. **heater current** : the current through the heater. ★ courant de chauffage → *courant 53.* R ток подогревателя. D Heizstrom (einer indirekt geheizten Kathode). E corriente de caldeo (cátodo de caldeo indirecto). I corrente di riscaldamento (catodo a riscaldamento indiretto). N gloeistroom (indirect verhitte kathode). P prąd żarzenia. S glödström (hos indirekt upphettad katod). (531)

101. **heater-cathode current** (*Syn.* heater-cathode insulation current) : → *current 102*

102. **heater-cathode insulation current** (*Syn.* heater-cathode current) : the current between the heater and the cathode, when these have a potential difference. The term includes leakage current and any current caused by electron emission from the heater and the cathode. ★ courant d'isolement entre filament et cathode → *courant 124.* R ток утечки подогреватель-катод. D Heizer-Kathoden-Isolationsstrom. E corriente de aislamiento entre filamento y cátodo. I corrente di perdita tra filamento e catodo. N gloeidraadkathode(isolatie)stroom. P prąd katoda-grzejnik. S läckström mellan glödtråd och katod. (531)

103. **holding current** : the minimum principal current required to maintain a thyristor in the on-state. ★ courant hypostatique → *courant 132.* R удерживающий ток. D Haltestrom. E corriente de mantenimiento. I corrente di mantenimento. N houdstroom. P prąd podtrzymywania; prąd wyłączania. S hållström. (521)

104. **ideal current source** : → *source 12*

105. impedance voltage at rated current (for the principal tapping) : → *voltage 86*

106. incident current : a current that travels toward a discontinuity or a port in a transmission line. ★ courant incident → *courant 133.* R падающий ток. D einfließender Strom. E corriente incidente. I corrente incidente. N invallende stroom. P prąd docelowy. S infallande ström(våg). (702)

107. (independent) current source : → *source 13*

108. inverse electrode current (*Syn.* reverse electrode current) : → *current 176*

109. ionization current : the electric current carried by ions and free electrons that result from ionization processes, usually in a gas, and that move under the influence of an applied electric field. ★ courant d'ionisation → *courant 122.* R ионизационный ток. D Ionisationsstrom. E corriente de ionización. I corrente di ionizzazione. N ionisatiestroom. P prąd jonizacyjny. S jonisationsström. (391,881)

110. irradiation-saturation current : the output current that is not changed significantly by an increase of irradiance under constant operating conditions. ★ courant de saturation par irradiation → *courant 96.* R ток насыщения при облучении. D Strahlungs-Sättigungsstrom. E corriente de saturación por irradiación. I corrente di saturazione per irradiazione. N stralingsverzadigingsstroom. P prąd nasycenia napromienieniowego. S bestrålningsmättnadsström. (531)

111. latching current : the minimum principal current required to maintain a thyristor in the on-state immediately after switching from the off-state to the on-state has occurred and the triggering signal has been removed. ★ courant d'accrochage → *courant 42.* R ток включения. D Einraststrom. E corriente de retención. I corrente di aggancio. N vergrendelstroom. P prąd załączania. S låsström. (521)

112. leakage current : the current in a path other than that desired, due to imperfect insulation. ★ courant de fuite → *courant 80.* R ток утечки. D Fehlerstrom (in diesem Sinn nicht emp fohlen). E corriente de fuga. I corrente di dispersione. N lekstroom. P prąd upływowy. S läckström. (151)

113. leakage current : the total detector current flowing at the operating bias in the absence of radiation. ★ courant de fuite → *courant 81.* R ток утечки. D Leckstrom. E corriente de fuga. I corrente di fuga. N lekstroom. P prąd upływu. S läckström. (391)

114. leakage current (in an installation) : a current which flows to earth or to extraneous conductive parts in a circuit in the absence of a fault. *Note.* — This current may have a capacitive component including that resulting from the deliberate use of capacitors. ★ courant de fuite → *courant 82.* R ток утечки (установки). D Ableitstrom (in einer Anlage). E corriente de fuga (en una instalación). I corrente di disposizione (in un impianto). N lekstroom (in een installatie). P prąd upływowy. S läckström (i en installation). (826)

115. let-go current (*Syn.* releasing current) : → *current 167*

116. let-through current (*Syn.* cut-off current) : → *current 63*

117. limiting continuous current of an output circuit : the highest value of the current (r.m.s. if a.c.) which a previously closed contact (effectively conducting output) circuit is capable of carrying continuously under specified conditions. ★ courant limite de service continu d'un circuit de sortie → *courant 140.* R предельный длительный ток выходной цепи. D Grenzdauerstrom eines Ausgangskreises. E corriente límite de servicio continuo de un circuito de salida. I corrente limite di servizio continuo di un circuito di uscita. N maximale continuwaarde van de stroom in de uitgangsschakeling. P prąd dopuszczalny ciągły (obwodu wyjściowego). S kontinuerlig gränsström för utgångskrets. (446)

118. limiting current of a capacitor : the maximum peak current which can be carried periodically or occasionally by the capacitor. ★ courant limite d'un condensateur → *courant 141.* R предельный ток конденсатора. D Grenzstrom eines Kondensators. E corriente límite de un condensador. I corrente limite di un condensatore. N grensstroom van een condensator. P prąd graniczny kondensatora. S högsta korttidsström. (436)

119. limiting short-time current of an output circuit : the highest value of current which a previously closed contact (effectively conducting output) circuit is capable of carrying for a specified short period under specified conditions. ★ courant limite de courte durée d'un circuit de sortie → *courant 138.* R предельный кратковременный ток выходной цепи. D Grenzkurzzeitstrom eines Ausgangskreises. E corriente límite de corta duración de un circuito de salida. I corrente limite di breve durata di un circuito di uscita. N toelaatbare piekwaarde van de stroom in de uitgangsschakeling. P prąd dopuszczalny krótkotrwały (obwodu wyjściowego). S korttidsström för utgångskrets. (446)

120. locked-rotor current : the measured steady-state root mean square current taken from the line with the motor at rest, with rated voltage and frequency applied. ★ courant à rotor bloqué → *courant 18.* R ток при заторможенном ротоpe. D Strom bei festgebremstem Läufer. E corriente con rotor bloqueado. I corrente a rotore bloccato. N initiële aanloopstroom. P początkowy prąd rozruchowy. S ström i stillestånd. (411)

121. locked-rotor current of a motor and starter : the steady-state root mean square current taken from the line with the rotor locked, with the starter in its initial starting position, and with rated voltage and frequency applied. ★ courant à rotor bloqué de l'ensemble moteur-démarreur → *courant 19.* R ток при заторможенном ротоpe агрегата двигатель-пускатель. D Strom bei festgebremstem Läufer eines Motors mit Anlasser. E corriente con rotor bloqueado del conjunto motor arrancador. I corrente a rotore bloccato con avviatore inserito. N initiële aanloopstroom van een motor met aanzetter. P początkowy prąd rozruchowy silnika w układzie rozruchowym. S startström med startdon. (411)

122. magnetic detector for lightning currents : → *detector 16*

123. maximum permissible a.c. current of a capacitor : the maximum r.m.s. alternating current which the capacitor can sustain for a given time in specified conditions. ★ courant alternatif maximal admissible d'un condensateur → *courant alternatif 8.* R максимальный допустимый ток конденсатора переменного тока. D höchster zulässiger Wechselstromwert eines Kondensators. E corriente alterna máxima admisible de un condensador. I massima corrente alternata ammissibile di un condensatore. N maximaal toelaatbare stroom van een condensator. P prąd przemienny maksymalny dopuszczalny kondensatora. S högsta driftström. (436)

124. maximum prospective peak current (of an a.c. circuit) : the prospective peak current when initiation of the current takes place at the instant which leads to the highest possible value. *Note.* — For a multiple device in a polyphase circuit, the maximum prospective peak current refers to a single pole only. ★ valeur maximale de crête du courant présumé → *valeur 57.* R максимальный пик ожидаемого тока (цепи переменного тока). D maximaler unbeeinflusster Stossstrom (eines Wechselstromkreises). E valor máximo de cresta de la corriente (intensidad) prevista (de un circuito de corriente alterna). I valore massimo di cresta della corrente presunta (di un circuito a corrente alternata). N maximale ideële stroompiek (van een wisselstroomketen). P wartość szczytowa największa prądu spodziewanego. S maximal nätstötström. (441)

125. maximum rated supply current : current specified by the manufacturer of an X-ray generator, ancillary equipment or accessory and for which the circuit breakers must be rated. ★ courant maximal d'alimentation assigné → *courant 143.* R предельный номинальный ток питания. D Nenn-Anschlussstrom. E corriente de alimentacion máxima asignada. I corrente nominale massima di ingresso. N maximale toegekende voedingsstroom. P maksymalny znamionowy prąd zasilania. S märkström. (881)

126. maximum recording audiofrequency current : the audiofrequency recording current necessary to obtain maximum output level from the specified reference tape at reference bias. ★ courant audiofréquence maximal d'enregistrement → *courant 27.* R ток записи при заданных нелинейных искажениях. D maximaler NF-Aufnahmestrom. E corriente de audiofrecuencia máxima de registro. I corrente di registrazione per ottenere l'uscita massima. N maximale audiofrequente opneemstroom. P prąd zapisywania sygnału fonicznego maksymalny. S inspelningsström för maximal utnivå. (806)

127. measuring current transformer : → *transformer 41*

128. mesh current : the current in the link defining the mesh. ★ courant de maille → *courant 85.* R контурный ток. D Maschenstrom. E corriente de lazo. I corrente di maglia. N maasstroom. P prąd oczka. S maskström. (131)

129. minimum breaking current : a minimum value of prospective current that a fuse-link is capable of breaking at a stated voltage under prescribed conditions of use and behaviour. ★ courant minimal de coupure → *courant 144.* R наименьший ток отключения. D Mindestausschaltstrom.

E corriente (intensidad) mínima de corte. I corrente minima di interruzione. N minimumuitschakelstroom. P prąd wyłączalny najmniejszy. S lägsta brytström. (441)

130. minimum cathode current (*Syn.* cathode-covering current (for character indicator tubes)) : the minimum cathode current at which the cathode is completely covered by glow. ★ courant cathodique minimal → *courant 30.* R минимальный катодный ток (для знаковых индикаторных приборов). D Kathodenbedeckungsstrom. E corriente catódica mínima (tubos indicadores de caracteres). I minima corrente catodica (tubi indicatori di caratteri). N kathodedekstroom (tekenindicatorbuizen). P prąd katody progowy. S minsta katodström (hos teckenindikatorrör). (531)

131. minimum igniting current (*Syn.* MIC (abbreviation)) : the minimum current which, in a specified spark test apparatus and under specified conditions, is capable of igniting the most easily ignitable mixture. *Note.* — IEC Publication 79-3 standardizes a spark test apparatus. ★ courant minimal d'inflammation → *courant 145.* R минимальный воспламеняющий ток; МВТ (аббревиатура). D Mindestzündstrom; MIC (Abkürzung). E intensidad mínima de inflamación; corriente mínima de inflamación; CMI (abreviatura). I corrente minima di accensione; MIC (abbreviazione). N minimale ontstekingsstroom; MIC. P prąd zapalający minimalny. S minsta tändström. (426)

132. multi-core type current transformer : → *transformer 43*

133. no-load current : the current flowing through a line terminal of the primary winding when a voltage, equal to the rated supply voltage at the rated frequency of the transformer, is applied to the terminals of the primary winding of the transformer, corresponding to the highest secondary voltage, the secondary windings being open-circuited. ★ courant à vide → *courant 20.* R ток холостого хода. D Leerlaufstrom. E corriente en vacío. I corrente a vuoto. N nullaststroom. P prąd pierwotny stanu jałowego. S tomgångsström. (421,851)

134. operating current (of an over-current release) : the current value at and above which the release can operate. ★ courant de fonctionnement → *courant 79.* R ток срабатывания (максимального расцепителя). D Ansprechstrom (eines Überstromauslösers). E corriente (intensidad) de funcionamiento (de un disparador de sobreintensidad). I corrente di intervento (di uno sganciatore di massima corrente). N aanspreekstroom (van een overstroomlosser). P prąd zadziałania (wyzwalacza nadprądowego). S funktionsström för överströmsutlösare. (441)

135. output current : the current through the signal electrode lead. ★ courant de sortie → *courant 101.* R выходной ток. D Ausgangsstrom. E corriente de salida. I corrente di uscita. N uitgangsstroom. P prąd wyjściowy. S utström. (531)

136. overload current (of a circuit) : an overcurrent occuring in a circuit in the absence of an electrical fault. ★ courant de surcharge → *courant 103.* R ток перегрузки (цепи). D Überlaststrom (eines Stromkreises). E corriente de sobrecarga (de un circuito). I corrente di sovraccarico (di un circuito). N overbelastingsstroom (van een stroomketen). P prąd przeciążeniowy (w obwodzie). S överlaststrom (för en elkrets). (826)

137. peak current (of a traction motor) : the maximum instantaneous value of current taken by a traction motor during the starting period. ★ courant de pointe → *courant 88.* R максимальный ток (тягового двигателя). D Motor-Spitzenstrom. E corriente de punta (de un motor de tracción). I corrente di punta (d'un motore di trazione). N piekstroom. P prąd szczytowy (silnika trakcyjnego). S maximal startström. (811)

138. peak withstand current : the value of peak current that a circuit or a switching device in the closed position can withstand under prescribed conditions of use and behaviour. ★ valeur de crête du courant admissible → *valeur 20.* R пик выдерживаемого тока; ток электродинамической стойкости. D Halte-Stossstrom. E valor de cresta de la corriente (intensidad) admisible. I valore di cresta della corrente di breve durata. N grensstroompiek. P prąd znamionowy szczytowy. S stötström. (441)

139. peak-switching current : the maximum peak transient current attained following a switching operation on a machine. ★ courant d'enclenchement de crête → *courant 115.* R пиковое значение тока при включении. D Schaltstrom-Spitzenwert. E valor de cresta de la corriente de conexión. I corrente massima di cresta per manovra interruttori. N piekinschakelstroom. P udarowy prąd łączeniowy. S toppvärde av kopplingsström. (411)

140. polarization current : the transient component of the electrification current. *Note.* — The polarization current is usually measured after previously short-circuiting the electrodes for so long a time that the short circuit current is negligible. ★ courant de polarisation → *courant 89.* R ток поляризации. D Polarisationsstrom. E corriente de polarización. I corrente di polarizzazione. N polarisatiestroom. P prąd polaryzacji. S polariseringsström. (212)

141. primary current (of a current transformer) : the current which flows through the primary winding of a current transformer. ★ courant primaire → *courant 150.* R первичный ток (трансформатора тока). D Primärstrom (eines Stromwandlers). E intensidad primaria (de un transformador de intensidad). I corrente primaria (di un trasformatore di corrente). N primaire stroom (van een stroomtransformator). P prąd pierwotny (przekładnika prądowego). S primärström (hos strömtransformator). (321)

142. principal current : the current which flows through the device excluding gate current. ★ courant principal → *courant 152.* R основной ток. D Hauptstrom. E corriente principal. I corrente principale. N hoofdstroom. P prąd główny. S huvudström. (521)

143. probe current : the current flowing to or from an electrode when it does not form part of the main gap. ★ courant de sonde → *courant 100.* R зондовый ток. D Sondenstrom. E corriente de sonda. I corrente di sonda. N sondestroom. P prąd sondy. S hjälpelektrodström; tändelektrodström. (531)

144. prospective breaking current (for a pole of a switching device or a fuse) : the prospective current evaluated at a time corresponding to the instant of the initiation of the breaking process. *Note.* — Specifications concerning the instant of the initiation of the breaking process are to be found in the relevant publications. For mechanical switching devices or fuses, it is usually defined as the moment of initiation of the arc during the breaking process. ★ courant coupé présumé → *courant 39.* R ожидаемый ток отключения (для полюса коммутационного аппарата или предохранителя). D unbeeinflusster Ausschaltstrom (für einen Pol eines Schaltgerätes oder einer Sicherung). E corriente (intensidad) prevista de corte (para un polo de un aparato de conexión o de un fusible). I corrente d'interruzione presunta (per un polo di un apparecchio di manovra o di un fusibile). N ideële uitschakelstroom (voor een pool van een schakeltoestel of een smeltveiligheid). P prąd spodziewany wyłączeniowy. S nätbrytström. (441)

145. prospective current (of a circuit and with respect to a switching device or a fuse) : the current that would flow in the circuit if each pole of the switching device or the fuse were replaced by a conductor of negligible impedance. *Note.* — The method to be used to evaluate and to express the prospective current is to be specified in the relevant publications. ★ courant présumé → *courant 149.* R ожидаемый ток (цепи и относительно коммутационного аппарата или предохранителя). D unbeeinflusster Strom (in einem Stromkreis in bezug auf ein Schaltgerät oder eine Sicherung). E corriente (intensidad) prevista (de un circuito y con relación a un aparato de conexión o a un fusible). I corrente presunta (di un circuito e relativa ad un apparecchio di manovra o ad un fusibile). N ideële stroom (van een stroombaan met betrekking tot een schakeltoestel of een smeltveiligheid). P prąd spodziewany. S nätström. (441)

146. prospective making current (for a pole of a switching device) : the prospective current when initiated under specified conditions. *Note.* — The specified conditions may relate to the method of initiation, e.g. by an ideal switching device, or to the instant of initiation, e.g. leading to the maximum prospective peak current in an a.c. circuit, or to the highest rate of rise. The specification of these conditions is found in the relevant publications. ★ courant établi présumé → *courant 130.* R ожидаемый ток включения (для полюса коммутационного аппарата или предохранителя). D unbeeinflusster Einschaltstrom (für einen Pol eines Schaltgerätes). E corriente (intensidad) prevista de cierre (para un polo de un aparato de conexión). I corrente di stabilimento presunta (per un polo di un apparecchio di manovra). N ideële inschakelstroom (voor een pool van een schakeltoestel). P prąd spodziewany załączeniowy. S nätslutström. (441)

147. prospective peak current : the peak value of a prospective current during the transient period following initiation. *Note.* —

The definition assumes that the current is made by an ideal switching device, i.e. with instantaneous transition from infinite to zero impedance. For circuits where the current can follow several different paths, e.g. polyphase circuits, it further assumes that the current is made simultaneously in all poles, even if only the current in one pole is considered. ★ valeur de crête du courant présumé → *valeur 21.* R пик ожидаемого тока. D unbeeinflusster Stossstrom. E valor de cresta de la corriente (intensidad) prevista. I valore di cresta della corrente presunta. N ideële stroompiek. P prąd spodziewany szczytowy. S nätstötström. (441)

148. prospective symmetrical current (of an a.c. circuit) : the prospective current when it is initiated at such an instant that no transient phenomenon follows the initiation. *Notes. 1* —For polyphase circuits, the conditions of non-transient period can only be satisfied for the current in one pole at a time. *2* — The prospective symmetrical current is expressed by its r.m.s. ★ courant symétrique présumé → *courant 160.* R симметричный ожидаемый ток (цепи переменного тока). D unbeeinflusster, symmetrischer Strom (eines Wechselstromkreises). E corriente (intensidad) prevista simétrica (de un circuito de corriente alterna). I componente corrente alternata presunta (di un circuito a corrente alternata). N ideële symmetrische stroom (van een wisselstroomketen). P prąd spodziewany symetryczny. S symmetrisk nätström. (441)

149. protective current transformer : → *transformer 48*

150. pulsating current : a periodic current having a mean value which is not zero.

$$i = I_0 + i\sim$$

★ courant pulsatoire → *courant 153.* R пульсирующее ток. D Mischstrom. E corriente pulsatoria. I corrente pulsante. N pulserende stroom. P prąd tętniący. S pulserande ström. (131)

151. pulsed current motor : → *motor 77*

152. quadrature-axis component of current : → *component 44*

153. rated accuracy limit primary current (of a protective current transformer) : the value of primary current up to which the current transformer will comply with the requirements for composite error. ★ courant limite de précision assigné → *courant 139.* R номинальный предельный первичный ток пно точности (трансформатора тока для защиты). D primäre Bemessungs-Fehlergrenzstromstärke (eines Stromwandlers für Schutzzwecke). E intensidad límite de precisión asignada (de un transformador de intensidad para protección). I corrente nominale limite di precisione (di un trasformatore di corrente per protezione). N toegekende primaire nauwkeurigheidsgrensstroom (van een beveiligingsstroomtransformator). P prąd pierwotny graniczny dla znamionowej dokładności. S märköverström för reläkärna. (321)

154. rated continuous thermal current : the value of the current which can be permitted to flow continuously in the primary winding, the secondary winding being connected to the rated burden, without the temperature rise exceeding the values specified. ★ courant assigné thermique permanent → *courant 26.* R нормированный ток длительного нагрева. D thermische Bemessungsdauerstromstärke. E intensidad térmica permanente asignada. I corrente massima permanente di riscaldamento. N toegekende thermische continu toelaatbare stroom. P prąd znamionowy cieplny długotrwały. S termisk märkström. (321)

155. rated current (of a winding of a transformer or shunt reactor) : the current, flowing through a line terminal of a winding, derived by dividing the rated power of the winding by the rated voltage of the winding and by an appropriate phase factor. ★ courant assigné → *courant 22.* R номинальный ток (обмотки трансформатора или шунтирующего реактора). D Bemessungsstrom (einer Wicklung eines Transformators oder einer Drosselspule). E corriente asignada (de un arrollamiento de un transformador o de una reactancia shunt). I corrente nominale (di un avvolgimento di trasformatore o di reattore in derivazione). N toegekende stroom (van een wikkeling van een transformator of een laadstroomcompensatiespoel). P prąd znamionowy (uzwojenia transformatora lub dławika bocznikującego). S märkström (för lindning). (421)

156. rated current of a capacitor : the r.m.s. value of the alternating current for which the capacitor has been designed. ★ courant assigné d'un condensateur → *courant 23.* R номинальный ток конденсатора. D Nennstrom eines Kondensators. E corriente asignada de un condensador; intensidad asignada de un condensador. I corrente nominale di un condensatore. N toegekende stroom van een condensator (I_N). P prąd znamionowy kondensatora. S märkström. (436)

157. rated current of an arc suppression coil : the current which the apparatus is designed to carry for a specified period when rated voltage is applied at rated frequency with the reactor arranged for maximum current. ★ courant assigné d'une bobine d'extinction d'arc → *courant 24.* R номинальный ток дугогасящего реактора. D Bemessungsstrom einer Erdschlußlöschspule. E corriente asignada de una bobina de extinción de arco. I corrente nominale di una bobina di estinzione d'arco. N toegekende stroom van een aardsluitstroomcompensatiespoel. P prąd dławika gaszącego znamionowy. S märkström för släckningsreaktor. (421)

158. rated dynamic current : the maximum peak value of the primary current which a transformer will withstand without being damaged electrically or mechanically by the resulting electromagnetic forces, the secondary winding being short-circuited. ★ courant dynamique assigné → *courant 128.* R номинальный ток динамической стойкости. D dynamische Bemessungsstromstärke. E intensidad dinámica asignada. I corrente nominale dinamica. N toegekende dynamische grensstroom. P prąd znamionowy dynamiczny. S dynamisk märkström. (321)

159. rated instrument limit primary current (*Syn.* IPL (abbreviation)) : the value of the minimum primary current at which the composite error of the measuring current transformer is equal to or greater than 10%, the secondary burden being equal to the rated burden. ★ courant limite primaire assigné → *courant 142.* R номинальный предельный первичный ток для измерений. D Bemessungssicherheitsstromstärke (für Meßinstrumente). E intensidad primaria límite asignada (para los aparatos de medida); IPL. I corrente nominale di sicurezza per gli apparecchi di misura. N toegekende primaire grensstroom voor meetinstrumenten. P prąd znamionowy bezpieczny dla przyrządu; IPL. S märköverström för mätkärna. (321)

160. rated primary current (of a current transformer) : the value of the primary current which appears in the designation of a current transformer and on which its performance is based. ★ courant primaire assigné → *courant 151.* R номинальный первичный ток (трансформатора тока). D primäre Bemessungsstromstärke (eines Stromwandlers). E intensidad primaria asignada (de un transformador de intensidad). I corrente nominale primaria (di un trasformatore di corrente). N toegekende primaire stroom (van een stroomtransformator). P prąd znamionowy pierwotny (przekładnika prądowego). S primär märkström. (321)

161. rated secondary current (of a current transformer) : the value of the secondary current which appears in the designation of a current transformer and on which its performance is based. ★ courant secondaire assigné → *courant 158.* R номинальный вторичный ток (трансформатора тока). D sekundäre Bemessungsstromstärke (eines Stromwandlers). E intensidad secundaria asignada (de un transformador de intensidad). I corrente nominale secondaria (di un trasformatore di corrente). N toegekende secundaire stroom (van een stroomtransformator). P prąd znamionowy wtórny (przekładnika prądowego). S sekundär märkström. (321)

162. rated short time thermal current : the maximum value of the primary current which a transformer will withstand for a specified short time without suffering harmful effects, the secondary winding being short-circuited. ★ courant assigné thermique de courte durée → *courant 25.* R номинальный ток термической стойкости. D thermische Bemessungs-Kurzzeitstromstärke. E intensidad térmica asignada de corta duración. I corrente nominale termica di corto circuito. N toegekende thermische grensstroom. P prąd znamionowy cieplny krótkotrwały. S termisk märkkorttidsström. (321)

163. rated short-time current : a) of a series reactor or single-phase neutral earthing reactor : The fault current which the reactor is designed to carry for a specified duration. b) of a three-phase neutral reactor or earthing transformer : The current in the neutral which the apparatus is designed to carry for a specified duration. ★ courant de courte durée assigné → *courant 63.* R номинальный кратковременный ток. D Bemessungs-Kurzzeitstrom. E corriente de corta duración asignada. I corrente nominale di breve durata. N toegekende

kortstondig toelaatbare stroom. P prąd krótkotrwały znamionowy. S korttidsström. (421)

164. rated transformation ratio of a current transformer : → *ratio 73*

165. recording audio-frequency current : an audio-frequency alternating current passing through the coils of a recording head, generating a magnetic field related to the signal to be recorded on a magnetic medium. ★ courant d'enregistrement audiofréquence → *courant 116.* R ток записи. D Tonfrequenzaufzeichnungsstrom. E corriente de audiofrecuencia para registro. I corrente di registrazione ad audio frequenza. N audiofrequente opneemstroom. P prąd zapisu. S inspelningsström. (806)

166. reflected current : a current due to the effect of a discontinuity in a transmission line on an incident current and travelling in the opposite direction. ★ courant réfléchi → *courant 154.* R отраженный ток. D reflektierter Strom. E corriente reflejada. I corrente riflessa. N teruggekaatste stroom. P prąd odbity; prąd powrotny. S reflekterad ström(våg). (702)

167. releasing current (*Syn.* let-go current (USA)) : that value of decreasing current at which muscle convulsions subside enough to permit release of the victim from the current source. ★ courant de relâchement → *courant 93.* R ток расслабления. D Loslaßschwelle. E corriente de separación. I corrente di rilascio. N lossingsstroom. P prąd rozkurczu (mięśni). S släppström. (604)

168. residual current : the sum of the instantaneous values of all three line currents, in a three-phase system. ★ courant résiduel → *courant 155.* R ток нулевой последовательности. D Nullstrom. E intensidad residual. I corrente residua. N homopolaire stroom. P prąd zerowy. S summaström; nollföljdsström. (321)

169. residual current : the current which continues to be produced by a detector after it is no longer exposed to external radiation, and which is due to activation of the component materials of the detector, to their contamination and to the poor quality of its insulation. ★ courant résiduel → *courant 156.* R остаточный ток. D Reststrom. E corriente residual. I corrente residua. N reststroom (v.e. ionisatievat). P prąd szczątkowy. S restström. (391)

170. residual current : the algebraic sum of the instantaneous values of current flowing through all live conductors of a circuit at a point of the electrical installation. ★ courant différentiel-résiduel → *courant 120.* R ток нулевой последовательности. D Differenzstrom (Reststrom). E corriente diferencial-residual. I corrente differenziale. N verschilstroom. P prąd resztkowy. S restström. (826)

171. residual current transformer : → *transformer 54*

172. residual voltage for zero current control : → *voltage 176*

173. return current rail (*Syn.* return conductor rail) : → *rail 14*

174. reverse current (of a junction) : current which flows in the reverse direction. ★ courant inverse → *courant 135.* R обратный ток (перехода). D Sperrstrom (eines Überganges). E corriente inversa (de una unión). I corrente inversa (di una giunzione). N sperstroom (v.e. grenslaag). P prąd zwrotny (złącza). S backström. (391)

175. reverse current release : → *release 28*

176. reverse electrode current (*Syn.* inverse electrode current (USA)) : the current flowing through the electrode in the reverse direction. ★ courant inverse d'électrode → *courant 136.* R обратный ток электрода. D Elektrodenstrom in Sperrichtung. E corriente inversa de electrodo. I corrente inversa di elettrodo. N elektrodetegenstroom. P prąd (elektrody) wsteczny. S backström. (531)

177. saturation current (of an ionization chamber) : under a given irradiation, the ionization current obtained when the applied voltage is sufficiently high for essentially all the ions to be collected (without the gas multiplication region being reached). ★ courant de saturation → *courant 94.* R ток насыщения (ионизационной камеры). D Sättigungsstrom. E corriente de saturación (de una cámara de ionización). I corrente di saturazione (di una camera di ionizzazione). N verzadigingsstroom (v.e. ionisatievat). P prąd nasycenia (komory jonizacyjnej). S mättnadsström. (391)

178. saturation current : the current in a device when further increase in voltage produces practically no increase in current. *Examples : 1)* In an ionization chamber : the electric current which results when the applied potential is sufficient to collect practically all ions. *2)* In an X-ray tube : the electric current in the tube when practically all emitted electrons reach the anode. ★ courant de saturation → *courant 95.* R ток насыщения. D Sättigungsstrom. E corriente de saturación. I corrente di saturazione. N verzadigingsstroom. P prąd nasycenia. S mättnadsström. (881)

179. secondary current (of a current transformer) : the current which flows through the secondary winding of a current transformer when current is passed through the primary winding. ★ courant secondaire → *courant 157.* R вторичный ток (трансформатора тока). D Sekundärstrom (eines Stromwandlers). E intensidad secundaria (de un transformador de intensidad). I corrente secondaria (di un trasformatore di corrente). N secundaire stroom (van een stroomtransformator). P prąd wtórny (przekładnika prądowego). S sekundärström (hos strömtransformator). (321)

180. secondary limiting thermal current : the maximum continuous secondary current at the highest voltage for equipment which the transformer can supply without the temperature of any part exceeding the stipulated temperature limits. ★ limite thermique du courant secondaire de charge → *limite 28.* R вторичный предельный ток термической стойкости. D sekundäre thermische Grenzstromstärke. E límite térmico de la intensidad secundaria de carga. I corrente termica limite nominale. N secundaire thermische grensstroom. P prąd wtórny graniczny cieplny. S sekundär termisk gränsström. (321)

181. secondary-electron emission current : the current resulting from secondary-electron emission and reflection of incident primary electrons. ★ courant d'émission électronique secondaire → *courant 113.* R ток вторичной электронной эмиссии. D Sekundärelektronenstrom. E corriente de emisión electrónica secundaria. I corrente di emissione elettronica secondaria. N secundaire elektronenemissiestroom. P prąd emisji wtórnej. S sekundäremissionsström. (531)

182. self-extinguishing current limit : the highest fault current at which self-extinction of an arc may take place, for a given system state. ★ courant limite d'auto-extinction → *courant 137.* R максимальный ток самоликвидирующегося замыкания. D Löschgrenze für den Fehlerstrom. E corriente límite de autoextinción. I corrente limite di autoestinzione. N hoogste nog zichzelf blussende stroom. P prąd graniczny samogaśnięcia łuku. S högsta självsläckande ström. (604)

183. sensitivity to current : → *sensitivity 29*

184. shock current : a current passing through a body of a person or animal and having characteristics likely to cause pathophysiological effects. ★ courant de choc → *courant 55.* R поражающий ток. D gefährlicher Körperstrom. E corriente de choque. I corrente di scossa. N stroom die leidt tot een elektrische schok. P prąd rażeniowy. S chockström. (826)

185. short-time whithstand current : the current that a circuit or a switching device in the closed position can carry during a specified short time under prescribed conditions of use and behaviour. ★ courant de courte durée admissible → *courant 62.* R кратковременный выдерживаемый ток; ток термической стойкости. D Halte-Kurzzeitstrom. E corriente (intensidad) de corta duración admisible. I corrente di breve durata. N korte-duurstroom. P prąd znamionowy *n*-sekundowy. S korttidsström. (441)

186. signal current : the difference between the output current in the presence of light and the dark current. ★ courant de signal → *courant 98.* R ток сигнала. D Signalstrom. E corriente de señal. I corrente di segnale. N signaalstroom. P prąd sygnału. S signalström. (531)

187. signalling current (in telephony) : a direct current supplied by a switching entity to a telephone station to enable the station to send supervision and calling signals. ★ courant de signalisation → *courant 99.* R сигнальный ток (в телефонии). D Signalisierungsstrom. E corriente de señalización (en telefonía). I corrente di segnalazione. N lijnstroom. P prąd sygnalizacyjny. S signalström. (722)

188. single current transmission : → *transmission 58*

189. single-core type current transformer : → *transformer 61*

190. small-signal short-circuit forward current transfer ratio : → *ratio 92*

191. source current : the current through an ideal current source. ★ courant de source → *courant 102.* R ток источника. D ..... E corriente de fuente; intensidad de fuente. I sorgente di corrente. N bronstroom. P prąd źródłowy. S källström. (131)

192. source of harmonic current : → *source 36*

193. speech current : an analogue electric signal directly representing speech. ★ courant vocal → *courant 166.* R речевой ток. D Sprachstrom. E corriente vocal. I corrente vocale. N spreekstroom. P prąd rozmówny. S talström. (722)

194. split core type current transformer : → *transformer 62*

195. stabilized current characteristic : → *characteristic 80*

196. starter transfer current : the starter gap current required to initiate a discharge across the main gap for a stated anode voltage. ★ courant de transfert de l'électrode d'amorçage → *courant 108.* R пусковой ток переноса разряда. D Starterübernahmestrom. E corriente de transferencia del electrodo de cebado. I corrente di trasferimento dell'elettrodo di innesco. N ontsteekoverneemstroom. P prąd startera zapłonowy. S startkopplingsström. (531)

197. starting current : the root mean square current drawn by the motor during the starting period. *Note.* — This current is not a single value and the complete current-speed curve of the motor is needed to express it. ★ courant de démarrage → *courant 70.* R ток при пуске. D Anlaufstrom. E corriente de arranque. I corrente di avviamento. N aanloopstroom. P prąd rozruchowy. S startningsström. (411)

198. starting current (of a traction of a motor) : the mean value of the current taken by the motor during the starting period. ★ courant de démarrage → *courant 71.* R пусковой ток (тягового двигателя). D Motor-Anfahrstrom. E corriente de arranque (de un motor de tracción). I corrente d'avviamento (d'un motore di trazione). N aanzetstroom. P prąd rozruchowy. S startström. (811)

199. static forward current transfer ratio : → *ratio 96*

200. stray currents : portions of the return current which, over at least part of their travel, follow paths other than the return circuit (for example water pipes or telephone cables). ★ courants vagabonds → *courant 168.* R блуждающие токи. D Streuströme; vagabundierende Ströme. E corrientes vagabundas. I correnti vaganti. N zwerfstromen. P prądy błądzące. S vagabonderande strömmar. (604,811)

201. sub-transient current : the current flowing at rated voltage through a primary winding having a value of reactance equal to the sub-transient reactance of the machine. ★ courant subtransitoire → *courant 159.* R сверхпереходный ток. D subtransienter Strom. E corriente subtransitoria. I corrente subtransitoria. N aanvangsstroom. P prąd podprzejściowy. S subtransient ström. (411)

202. summation current transformer : → *transformer 64*

203. support type current transformer : → *transformer 65*

204. surge current of an electrode : the peak electrode current under exceptional conditions such as switching-on conditions or fault conditions. ★ courant de surcharge d'une électrode → *courant 104.* R бросок тока электрода. D maximal zulässiger Stromstoß. E corriente de sobrecarga de un electrodo. I corrente di sovraccarico di un elettrodo. N elektrodestootstroom. P prąd (elektrody) udarowy. S elektrodströms toppvärde vid stötström hos elektrod. (531)

205. switched current : the prospective current to be broken during switching operation by each set of main switching or transition contacts incorporated in the diverter switch or selector switch. ★ courant commuté → *courant 31.* R коммутируемый ток. D Schaltstrom. E corriente conmutada. I corrente commutata. N schakelstroom. P prąd przełączany. S brytström. (421)

206. take-over current : the current co-ordinate of the intersection between the time-current characteristics of two over-current protective devices. ★ courant d'intersection → *courant 121.* R ток пересечения. D Übernahmestrom. E corriente (intensidad) de intersección. I corrente di scambio. N overgangsstroompunt. P prąd przełomowy. S koordinationsström. (441)

207. tapping current of a winding : the current flowing through a line terminal of a winding derived by dividing the tapping power of the winding by the tapping voltage of the winding and by an appropriate phase factor. ★ courant de prise d'un enroulement → *courant 91.* R ток ответвления обмотки. D Anzapfungsstrom einer Wicklung. E corriente de toma de un arrollamiento. I corrente di presa di un avvolgimento. N aftakkingstroom van een wikkeling. P prąd zaczepowy uzwojenia. S reglerlägesström. (421)

208. threshold current : the minimum value of current which can be sensed when passing through the body. ★ seuil de perception de courant → *seuil 22.* R пороговый ощутимый ток. D Wahrnehmbarkeitsschwelle. E umbral de percepción de la corriente. I soglia di percezione di corrente. N drempelstroom. P próg wyczuwalności prądu. S minsta förnimbara ström. (604)

209. threshold current (of a laser diode) : the driving current corresponding to lasing threshold. ★ courant du seuil → *courant 127.* R пороговый ток (лазера). D Schwellenstrom (einer Laserdiode). E corriente umbral (de un diodo láser). I corrente di soglia. N drempelstroom (v.e. laserdiode). P prąd progowy (diody laserowej). S tröskelström. (731)

210. through fault current : a current due to a power system fault external to that part of the circuit protected by the given protection system and which flows through the protected part. ★ courant de défaut traversant → *courant 69.* R сквозной ток повреждения. D Durchgangsstrom (bei äußerem Fehler). E corriente de falta circulante. I corrente di guasto traversante. N doorgaande foutstroom. P prąd zwarcia zewnętrznego. S genomgående felström. (448)

211. total current : a scalar quantity given by the flux of the total current density through a surface. ★ courant total → *courant 161.* R полный ток. D Gesamtstrom. E corriente total. I corrente totale. N totale stroom. P prąd. S total ström. (121)

212. total reflector current : the current flowing in the reflector circuit, including leakage current, gas current and the current caused by the electron bombardment of the reflector electrode. ★ courant total de réflecteur → *courant 162.* R полный ток отражателя. D Gesamtreflektorstrom. E corriente total del reflector. I corrente totale di riflettore. N totale reflectorstroom. P prąd reflektora całkowity. S total reflektorström. (531)

213. transfer current : the current in one gap required to establish ignition of another gap under stated conditions. ★ courant de transfert → *courant 107.* R ток переноса разряда. D Übernahmestrom. E corriente de transferencia. I corrente di trasferimento. N overneemstroom. P prąd zapłonu. S kopplingsström. (531)

214. transient current : the current flowing at rated voltage through a primary winding having a value of reactance equal to the transient reactance of the machine. ★ courant transitoire → *courant 163.* R переходный ток. D transienter Strom. E corriente transitoria. I corrente transitoria. N overgangsstroom. P prąd przejściowy. S transient ström. (411)

215. transient-decay current : the decreasing current in the device after the irradiation has been abruptly cut off. ★ courant de traînage → *courant 106.* R остаточный ток. D Abklingstrom. E corriente de decadencia. I corrente di decadimento. N uitloopstroom. P prąd zanikowy. S nedtoningsström. (531)

216. transition current : the mean direct current of a convertor connection when the direct current of the commutating groups becomes intermittent when decreasing the current. ★ courant critique → *courant 40.* R критический ток. D kritischer Strom (einer Stromrichterschaltung). E corriente crítica. I corrente critica; corrente di transizione. N leemtegrensstroom. P prąd krytyczny. S kritisk likström. (551)

217. undulating current motor : → *motor 117*

218. video record current : an alternating current flowing through the windings of a recording head and generating a magnetic field, the frequency of which is a function of the value of the video signal to be recorded on the magnetic medium. ★ courant d'enregistrement vidéo → *courant 117.* R ток видеозаписи. D Video-Aufnahmestrom. E corriente de registro de imagen. I corrente di registrazione video. N beeldopneemstroom. P prąd zapisu (wizyjny). S videoinspelningsström. (806)

219. voltage-saturation current : the output current that is not changed significantly by an increase of voltage under constant irradiance. ★ courant de saturation par tension → *courant 97.* R ток насыщения. D Spannungs-Sättigungstrom. E corriente de saturación por tensión. I corrente di saturazione di tensione. N spanningsverzadigingsstroom. P prąd nasycenia napięciowego. S spänningsmättnadsström. (531)

220. welding current regulator : → *regulator 6*

221. welding current return clamp : → *clamp 19*

222. wound primary type current transformer : → *transformer 80*

223. **X-ray tube current** : the electric current from anode to cathode of an X-ray tube, usually specified by its average value in mA. ★ courant dans un tube radiogène → *courant 47.* R ток рентгеновской трубки. D Röntgenröhren-Strom. E corriente en un tubo de rayos X. I corrente in un tubo a raggi X. N röntgenbuisstroom. P prąd lampy rentgenowskiej. S rörström. (881)

current-carrying

1. **(continuous) current-carrying capacity** : → *capacity 9*

current-density

1. **(conduction) current density** (*J*) : a vector quantity equal to the volume density of the sum of the elementary currents. ★ densité de courant (de conduction) → *densité de courant 1.* R плотность тока (проводимости). D (Leitungs-) Stromdichte. E densidad de corriente (de conducción). I densità di corrente (di conduzione). N (geleidings)stroomdichtheid. P gęstość prądu (przewodzenia). S strömtäthet. (121)
2. **current-density modulation** : → *modulation 12*
3. **displacement current density** : a vector quantity given by the time derivative of the electric flux density. ★ densité de courant de déplacement → *densité de courant 2.* R плотность тока смещения. D Verschiebungsstromdichte. E densidad de corriente de desplazamiento. I corrente dielettrica areica. N verplaatsingsstroomdichtheid. P gęstość prądu (przesunięcia). S förskjutningsströmtäthet. (121)
4. **neutron or particle current density** : a vector such that its component along the normal to a surface equals the net number of particles crossing that surface in the positive direction per unit area per unit time. ★ densité de courant de neutrons ou de particules → *densité de courant 3.* D Neutronen- oder Teilchen-Stromdichte. E densidad de corriente de neutrones o de partículas. I densità di corrente di neutroni o di particelle. N deeltjesstroomdichtheid; stroomdichtheid van deeltjes. P gęstość prądu neutronów lub cząstek. S neutronströmtäthet; partikelströmtäthet.. (026)
5. **total current density** : a vector quantity given by the sum of the current density and the displacement current density. ★ densité de courant total → *densité de courant 4.* R плотность полного тока. D Gesamtstromdichte. E densidad de corriente total. I corrente areica totale. N totale stroomdichtheid. P gęstość prądu. S total strömtäthet. (121)

current-limiting

1. **current-limiting circuit-breaker** : → *circuit-breaker 8*
2. **current-limiting fuse-link** : → *fuse-link 1*

current-using

1. **current-using equipment** : → *equipment 18*

curtain

1. **curtain antenna** : → *antenna 37*

curvature

1. **tape curvature** : the amount by which the edge of the magnetic tape departs from a straight line when the tape is lying in a plane under zero tension. ★ sabrage → *sabrage 1.* R сабельность. D säbelförmiger Bandverzug. E curvatura de la cinta. I curvatura del nastro. N bandkromming. P szablistość (taśmy). S (band)krokighet. (806)

curve

1. **activity curve** : curve representing as a function of time the activity of a radioactive source. ★ courbe d'activité → *courbe 7.* D Aktivitätskurve.. E curva de actividad. I curva d'attività. N activiteitskromme. P krzywa aktywności. S aktivitetskurva. (026)
2. **anhysteretic curve** : a magnetization curve, every point of which represents the anhysteretic state. ★ courbe anhystérétique → *courbe 1.* R безгистерезисная кривая. D Anhysteretische Kurve. E curva anhisterética. I curva non-isterica. N anhysteretische kromme. P krzywa magnesowania bezhisterezowego. S anhysteretisk magnetiseringskurva. (221)
3. **attenuation curve** (*Syn.* transmission curve) : a curve relating the value of a radiation quantity and the thickness of material traversed by the radiation. *Note.* — If these terms are used it should be stated: *1)* which radiation quantity is the dependent variable; *2)* whether the dependent variable is the logarithm of the radiation quantity; *3)* whether the incident beam is narrow and collimated and the measuring device beyond the attenuator is relatively small and far from it (narrow-beam measurements), or the incident beam is broad and not collimated and the measuring device beyond the attenuator is relatively near to it (broad-beam measurements). ★ courbe d'atténuation → *courbe 13.* R кривая ослабления; кривая пропускания. D Schwächungskurve; Transmissionskurve. E curva de atenuacion; curva de transmision. I curva di attenuazione; curva di trasmissione. N verzwakkingskromme; transmissiekromme. P krzywa osłabiania; krzywa przepuszczania. S dämpningskurva. (881)
4. ***B*(*H*) curve** : a magnetization curve representing magnetic flux density as a function of magnetic field strength. ★ courbe *B*(*H*) → *courbe 33.* R кривая *B*(*H*). D *B*(*H*)-Kurve. E curva *B*(*H*). I curva *B*(*H*). N *B*(*H*)-kromme. P krzywa *B*(*H*). S *B*(*H*)-kurva. (221)
5. **characteristic curve** (*Syn.* characteristic) : graph (curve) which shows the values, in steady-state, of an output variable of a system as a function of an input variable, the other input variables being maintained at specified constant values. *Note.* — When the other input variables are treated as parameters, a set of characteristic curves is obtained. ★ courbe caractéristique → *courbe 2.* R статическая характеристика. D Kennlinie. E curva característica. I caratteristica. N karakteristiek. P charakterystyka statyczna. S (statisk) utstyrningskurva. (351)
6. **characteristic curve** (of a Geiger-Müller counter tube) : a curve showing the counting rate as a function of the voltage applied to a Geiger-Müller counter tube with all other parameters constant. ★ courbe caractéristique → *courbe 3.* R счетная характеристика (счетчика Гейгера-Мюллера). D Charakteristik (eines Auslösezählrohres). E curva característica (de un tubo contador Geiger-Müller). I curva caratteristica (di un tubo contatore di Geiger-Müller). N karakteristieke kromme (v.e. geiger-müller-telbuis). P charakterystyka (licznika G-M). S räknerörskurva (för GM-rör). (391)
7. **characteristic curve** (of radiographic film) : a graphical representation of the optical density of a radiographic film plotted against the logarithm to the base 10 of a specified radiation quantity such as exposure or kerma in air. ★ courbe caractéristique → *courbe 4.* R характеристическая кривая (радиографической пленки). D Schwärzungskurve (eines Röntgenfilmes). E curva característica (de una película radiografica). I curva caratteristica. N karakteristieke kromme (van een radiografische film). P krzywa charakterystyczna (błony). S svärtningskurva. (881)
8. **characteristic (curve) of a convertor** : → *characteristic 14*
9. **commutation curve** (*Syn.* normal magnetization curve) : the locus of the tips of normal hysteresis loops, when the peak value of the cyclic magnetic field is varied. ★ courbe de commutation → *courbe 15.* R коммутационная кривая; кривая намагничивания. D Kommutierungskurve; normale Magnetisierungskurve. E curva de conmutación; curva de magnetización normal. I curva di magnetizzazione normale. N commutatiekromme; normale magnetisatiekromme. P krzywa magnesowania komutacyjnego. S kommuteringskurva. (221)
10. **decay curve** : a curve representing the activity of a sample, or of one of its constituents, as a function of time. ★ courbe de décroissance → *courbe 17.* R кривая распада. D Zerfallskurve. E curva de desintegracion. I curva di decadimento. N vervalkromme. P krzywa zaniku. S sönderfallskurva. (881)
11. **demagnetization curve** : that part of the hysteresis loop in which the magnetic flux density goes from remanence to zero when the applied magnetic field strength varies monotonically. ★ courbe de désaimantation → *courbe 18.* R кривая размагничивания. D Entmagnetisierungskurve. E curva de desimantación. I curva di smagnetizzazione. N ontmagnetiseringskromme. P krzywa odmagnesowania. S avmagnetiseringskurva. (121)
12. **discriminator curve** : a curve showing the counting rate as a function of the discriminator threshold. ★ courbe de discrimination → *courbe 19.* R кривая дискриминации интегральный спектр — (не рекомендуется). D Diskriminatorkurve. E curva de discriminación. I curva di discriminazione. N discriminatiekromme. P charakterystyka dyskryminacji. S diskriminatorkurva. (391)
13. **dynamic magnetization curve** : a magnetization curve obtained when the rate of change of the magnetic field strength

is high enough to influence the shape of the curve. ★ courbe d'aimantation dynamique → *courbe 9.* R кривая динамического намагничивания. D dynamische Magnetisierungskurve. E curva de magnetización dinámica. I curva di magnetizzazione dinamica. N dynamische magnetisatiekromme. P krzywa magnesowania (dynamicznego). S dynamisk magnetiseringskurva. (221)

14. **electric polarization curve** : a curve representing the electric flux density or polarization of a substance as a function of the electric field strength. ★ courbe de polarisation → *courbe 21.* R кривая электрической поляризации. D elektrische Polarisationskurve. E curva de polarización. I curva di polarizzazione elettrica. N elektrische polarisatiekromme. P krzywa indukcji elektrycznej; krzywa polaryzacji elektrycznej. S elektrisk polarisationskurva. (121)

15. **initial magnetization curve** : the magnetization curve obtained when a material, initially in a neutral magnetic state, is subjected to a magnetic field, the strength of which increases monotonically from zero. *Note.* — The method of obtaining the neutral magnetic state should be thermal or dynamic ; the method used should be stated. ★ courbe d'aimantation initiale → *courbe 10.* R кривая начального намагничивания. D Neukurve. E curva de magnetización inicial. I curva di prima magnetizzazione. N aanvangsmagnetisatiekromme; initiële magnetisatiekromme. P krzywa magnesowania pierwszego. S nykurva. (221)

16. **(ionospheric) transmission curve** : a curve showing, as a function of the virtual height, the ratio of the frequencies of the radio waves which, using a simplified model of the ionosphere, would be reflected at the same virtual height at vertical incidence and at oblique incidence between two points on the surface of the Earth separated by a given distance, usually 3000 km. ★ courbe de transmission (ionosphérique) → *courbe 30.* D Ionosphären-Übertragungskurve. P krzywa transmisji jonosferycznej. (705)

17. **isodose curve** : a line on which the absorbed dose is constant. ★ courbe isodose → *courbe 36.* R изодозная кривая. D Isodosenkurve. E curva de isodosis. I curva isodose. N isodosiscurve. P krzywa izodoz. S isodoskurva. (881)

18. **isoexposure curve** : a line on which exposure is constant. ★ courbe isoexposition → *courbe 38.* R изодозная (экспозиционная) кривая. D Kurve gleicher Standardionendosis. E curva de isoexposición. I curva di isoesposizione. N isoexposiekromme. P krzywa izoekspozycji. S isoexpositionskurva. (881)

19. **iso-illuminance curve** (*Syn.* iso-illuminance line; isolux curve; isolux line) : locus of points on a surface where the illuminance has the same value. ★ courbe isoéclairement → *courbe 37.* R кривая равной освещенности; изолюкса. D Isolux-Linie; Kurve gleicher Beleuchtungsstärke. E curva iso-illuminancia. I curva isoilluminamento. N isolux lijn. P izoluksa; krzywa izoluksów. S isoluxkurva. (845)

20. **iso-intensity curve** (of a source) (*Syn.* iso-intensity line (USA)) : curve traced on a sphere that has its centre at the light centre of the source, joining all the points corresponding to those directions in which the luminous intensity in the same, or a plane projection of that curve. ★ courbe isointensité → *courbe 39.* R кривая равных значений силы света (источника света); изокандела. D Kurve gleicher Lichtstärke (einer Lichtquelle) (einer lichtquelle). E curva isointensidad. I curva isointensità. N isocandela lijn. P izokandela. S isocandelakurva. (845)

21. **isoluminance curve** : locus of points on a surface at which the luminance is the same, for given positions of the observer and of the source or sources in relation to the surface. ★ courbe isoluminance → *courbe 40.* R кривая равной яркости. D Kurve gleicher Leuchtdichte. E curva isoluminancia. I curva isoluminanza. N isoluminantie lijn. P izonita; krzywa izoluminancyjna. S isoluminanskurva. (845)

22. **isolux curve** (*Syn.* iso-illuminance curve) : → *curve 19*

23. ***J*(*H*) curve** : a magnetization curve representing magnetic polarization as a function of magnetic field strength. ★ courbe *J*(*H*) → *courbe 34.* R кривая *J*(*H*). D *J*(*H*)-Kurve. E curva *J*(*H*). I curva *J*(*H*). N *J*(*H*)-kromme. P krzywa *J*(*H*). S *J*(*H*)-kurva. (221)

24. **load curve** : graphical representation of the observed or expected variation of load as a function of time. ★ courbe de charge → *courbe 14.* R график нагрузки. D Lastganglinie. E curva de carga. I curva di carico; diagramma di carico. N belastingsdiagram; belastingskromme. P krzywa obciążenia; wykres obciążenia. S belastningskurva. (601)

25. **load duration curve** : a curve showing the duration, within a specified period of time, when the load equalled or exceeded a given value. ★ diagramme des charges classées → *diagramme 25.* R график продолжительности нагрузки. D Lastdauerlinie. E monótona de cargas; curva de duraciones de cargas. I curva di durata dei carichi. N belastingsduurkromme. P wykres obciążenia uporządkowany. S varaktighetskurva. (601)

26. **magnetization curve** : a curve representing the magnetic flux density, magnetic polarization or magnetization of a substance as a function of the magnetic field strength. ★ courbe d'aimantation → *courbe 8.* R кривая намагничивания. D Magnetisierungskurve. E curva de imantación. I curva di magnetizzazione. N magnetiseringskromme. P krzywa indukcji magnetycznej; krzywa polaryzacji magnetycznej; krzywa magnetyzacji. S magnetiseringskurva. (121)

27. **magnetoresistive characteristic curve** : a curve of resistance of a magnetoresistor versus magnetic flux density. ★ courbe caractéristique d'une magnétorésistance → *courbe 6.* R характеристика магниторезистора. D Widerstandsverlauf eines Magnetowiderstandes. E curva característica de una magnetorresistencia. I curva caratteristica di una magnetoresistenza. N karakteristieke magnetoweerstandskromme. P charakterystyka magnetorezystora. S magnetoresistiv R/B-kurva. (521)

28. ***M*(*H*) curve** : a magnetization curve representing magnetization as a function of magnetic field strength. ★ courbe *M*(*H*) → *courbe 35.* R кривая *M*(*H*). D *M*(*H*)-Kurve. E curva *M*(*H*). I curva *M*(*H*). N *M*(*H*)-kromme. P krzywa *M*(*H*). S *M*(*H*)-kurva. (221)

29. **normal magnetization curve** (*Syn.* commutation curve) : → *curve 9*

30. **operating curve** (*Syn.* operating line) : → *line 117*

31. **photon emission curve** (of a scintillator) : the curve representing the variation with time of the photon emission rate corresponding to a single excitation of a scintillator. ★ courbe d'émission de photons → *courbe 31.* R кривая высвечивания (сцинтиллятора). D Photonenemissionsverlauf (eines Szintillators). E curva de emisión de fotones (de un centelleador). I curva di emissione di fotoni (di uno scintillatore). N fosforescentiekromme. P krzywa fotoemisji (scyntylatora). S lyskurva. (391)

32. **recoil curve** (*Syn.* recoil line) : → *line 129*

33. **saturation curve** (of a current ionization chamber) : under a given irradiation, a curve characteristic of the variation of output current with applied voltage, which permits the determination of saturation current and voltage. ★ courbe de saturation → *courbe 27.* R кривая насыщения (токовой ионизационной камеры). D Sättigungskurve (einer Ionisationskammer). E curva de saturación (de una cámara de ionización de corriente). I curva di saturazione (di una camera di ionizzazione a corrente). N verzadigingskromme (v.e. ionisatievat met stroommeting). P krzywa nasycenia (prądowej komory jonizacyjnej). S mättningskurva. (391)

34. **specific resistance due to curves** : → *resistance 63*

35. **spectral response curve** (of a photocathode) : the curve which shows the variation of conversion quantum efficiency with wavelength of the incident radiation. ★ courbe de réponse spectrale → *courbe 25.* R спектральная характеристика (фотокатода). D spektrale Verteilungsfunktion (einer Photokathode). E curva de respuesta espectral (de un fotocátodo); característica espectral (de un fotocátodo). I curva di risposta spettrale (di un fotocatodo); caratteristica spettrale (di un fotocatodo). N spectrumkarakteristiek (v.e. fotokathode). P charakterystyka widmowa (fotokatody). S spektral känslighetskurva. (391)

36. **standard attenuation curve** : a curve showing the energy flux density or, more often, the exposure rate of a beam of photon radiation, either mono-energetic radiation or heterogeneous radiation, under narrow-beam conditions as a function of thickness of material such as aluminium, copper or lead, usually with specified and constant X-ray tube voltages and with as little initial filtration as possible. ★ courbes d'atténuation de référence → *courbe 43.* R стандартная кривая ослабления. D Standardschwächungskurve. E curvas de atenuación de referencia; curvas de atenuación patrón. I curva di attenuazione di riferimento. N standaardverzwakkingskromme. P standardowa krzywa osłabiania. S referensdämpkurva. (881)

37. **static magnetization curve** : a magnetization curve obtained at such a low rate of change of magnetic field strength that the curve is not influenced by the rate of change. ★ courbe

d'aimantation statique → *courbe 12.* **R** кривая статического намагничивания. **D** statische Magnetisierungskurve. **E** curva de magnetización estática. **I** curva di magnetizzazione statica. **N** statische magnetisatiekromme. **P** krzywa magnesowania statycznego. **S** statisk magnetiseringskurva. (221)

38. **survival curve** : a graph showing either the surviving fraction of biological units as a function of absorbed dose or the surviving fraction as a function of time after a fixed absorbed dose. ★ courbe de survie → *courbe 28.* **R** кривая выживания. **D** Überlebenskurve. **E** curva de supervivencia. **I** curva di sopravvivenza. **N** overlevingskromme. **P** krzywa przeżycia. **S** överlevnadskurva. (881)
39. **swing curve** : the diagram of the value of a given system state variable against time, following a disturbance. ★ courbe d'évolution → *courbe 32.* **R** кривая качаний. **D** Schwingkurve. **E** curva de oscilación. **I** curva evolutiva. **N** uitslingerkromme. **P** krzywa kołysań. **S** svingkurva. (603)
40. **transfer curve** (*Syn.* static characteristic) : → *characteristic 85*
41. **transmission curve** (*Syn.* attenuation curve) : → *curve 3*

curvilinear

1. **curvilinear catenary** (*Syn.* inclined catenary) : → *catenary 9*

customer

1. **customer** (*Syn.* consumer) : → *consumer 2*

cut

1. **cut** (of a piezoelectric crystal element) : the orientation of the edges and/or faces of a crystal element with respect to the crystallographic axes of the single piezoelectric crystal from which it is cut. ★ coupe → *coupe 1.* **R** срез (пьезоэлектрического кристаллического элемента). **D** Schnitt (eines piezoelektrischen Quarzelementes); Quarzschnitt. **E** corte (de un cristal piezoeléctrico). **I** taglio (di un cristallo piezoelettrico). **N** kristalsnede. **P** cięcie (elementu piezokrystalicznego). **S** snitt. (561)
2. **cut** (in a programme) : the intentional removal of part of a broadcast programme. ★ coupure → *coupure 5.* **R** вырезка (в программе). (723)

cutback

1. **cutback technique** : → *technique 5*
2. **(safety) power cutback system** : → *system 179*

Cutler

1. **Cutler feed** : → *feed 3*

cut-off

1. **cut off voltage** (*Syn.* end (point) voltage) : → *point 14*
2. **cut-off** : technique used for concealing lamps and surfaces of high luminance from direct view in order to reduce glare. *Note.* — In public lighting, distinction is made between full-cut-off luminaires, semi-cut-off luminaires and non-cut-off luminaires. ★ défilement → *défilement 2.* **R** экранирование. **D** Abschirmung. **E** desenfilado. **I** defilamento. **N** afscherming. **P** zabezpieczenie przeciwolśnieniowe. **S** avskärmning. (845)
3. **cut-off angle** : → *angle 21*
4. **cut-off attenuator** : → *attenuator 6*
5. **cut-off current** : → *current 63*
6. **cut-off (current) characteristic** : → *characteristic 29*
7. **cut-off frequency** : → *frequency 26*
8. **cut-off frequency** : → *frequency 27*
9. **cut-off frequency** : → *frequency 28*
10. **cut-off frequency (for a mode)** : → *frequency 29*
11. **cut-off load** : → *load 10*
12. **cut-off voltage** (*Syn.* final voltage) : → *voltage 68*
13. **cut-off voltage** : → *voltage 43*
14. **cut-off voltage** : → *voltage 44*
15. **cut-off wavelength** : → *wavelength 4*
16. **cut-off wavelength** : → *wavelength 5*
17. **effective cadmium cut-off** : → *cadmium 1*
18. **mode cut-off frequency** (*Syn.* critical frequency) : → *frequency 25*
19. **mode cut-off wavelength** (*Syn.* critical wavelength) : → *wavelength 3*
20. **remote cut-off tube** (*Syn.* variable-mu tube) : → *tube 95*
21. **resistive cut-off frequency** : → *frequency 172*
22. **waveguide below cut-off** : → *waveguide 22*
23. **(waveguide) cut-off frequency** : → *frequency 195*

cut-out

1. **panel cut-out** : a hole or group of holes cut in a panel or chassis for the purpose of mounting a component. ★ perçage du panneau → *perçage 1.* **R** отверстия установочные. **D** Montage-Ausschnitt. **E** taladrado de panel. **I** foratura di pannello. **N** paneelgatenpatroon. **P** wycięcie montażowe. **S** monteringshål. (581)

cut-set

1. **cut-set** : a set of branches of a graph such that cutting all its branches increases the number of unconnected parts of the graph, but the retention of any one of these branches does not increase that number. ★ (ensemble de) coupure → *coupure 20.* **R** сечение. **D** Schnittmenge; Trennbündel. **E** grupo de corte. **I** (insieme di) taglio. **N** snede. **P** rozcięcie. **S** ..... (131)

cutter

1. **crystal cutter head** : → *head 1*
2. **cutter head** : → *head 2*
3. **electrodynamic cutter head** : → *head 3*
4. **feedback cutter head** : → *head 4*
5. **magnetic cutter head** : → *head 13*

cut-through

1. **cut-through test** : → *test 19*

cutting

1. **air-arc cutting and gouging electrode** : → *electrode 3*
2. **arc cutting electrode** : → *electrode 4*
3. **cutting** : continuity operation in which one part of a programme is intentionally and suddenly replaced by another. *Note.* — Associated term : to cut (in), to cut (to). ★ enchaînement sec → *enchaînement 4.* **R** срез. (723)
4. **cutting electrode** : → *electrode 20*
5. **cutting on disk** : the process of converting audiofrequency signals, usually previously recorded on magnetic tape, into a modulated spiral groove which is cut into a blank disk by electromechanical means, the modulation characteristic being determined by the signal to be recorded. ★ gravure sur disque → *gravure 3.* **R** грамзапись запись на диск. **D** Überspielung auf Lackfolie. **E** grabación en disco. **I** incisione su disco. **N** het snijden van de plaat. **P** zapisywanie (mechaniczne płytowe). **S** skivgravering. (806)
6. **cutting stylus** : → *stylus 2*
7. **no-load voltage (in arc welding and cutting)** : → *voltage 124*
8. **oxy-arc cutting electrode** : → *electrode 75*
9. **thermal cutting** : the parting by burning or local fusion of materials by means of a heat source, such as a flame, an electric arc, a plasma arc or a laser beam. ★ coupage thermique → *coupage 2.* **R** термическая резка. **D** thermisches Schneiden. **E** corte térmico. **I** taglio termico. **N** thermisch snijden. **P** cięcie termiczne. **S** termisk skärning. (851)

CVD

1. **CVD** (*Syn.* chemical vapour deposition technique) : → *technique 4*

c.w.

1. **c.w. magnetron** (*Syn.* continuous wave magnetron) : → *magnetron 1*

cyaniding

1. **cyaniding** : a thermochemical treatment applied to a ferrous alloy, in which heating and holding are carried out in a salt bath containing cyanides to increase the surface concentration of carbon and nitrogen which diffuse into the workpiece. Generally this treatment is followed by quenching. ★ cyanuration → *cyanuration 1.* **R** цианирование. **D** Zyan-Badhärten. **E** cianuración. **I** cianurazione. **N** in zoutbad carbonitreren. **P** cyjanowanie. **S** cyanidhärdning. (841)

cycle

1. **BQ cycle** (*Syn.* response cycle) : the repetition cycle transmitted in an error detecting and feedback system when signal repetition is received. *Note.* — See CCIR Recommendation 342. ★ cycle BQ → *cycle 3.* R цикл ответа. D Antwortzyklus. E ciclo BQ; ciclo de respuesta. I ciclo di risposta; BQ. N reactiecyclus; BQ-cyclus. P cykl odpowiedzi; cykl BQ. S svarscykel. (721)
2. **character cycle** : the period in which each derived channel of a time-division multiplex has completed one character in the common channel. ★ cycle de caractère → *cycle 5.* R цикл знака. D Zeichen-Zyklus. E ciclo de carácter. I ciclo di carattere. N karaktercyclus. P cykl znakowy. S teckencykel. (721)
3. **cycle** : the complete range of states or of values through which a phenomenon or a set of quantities passes in a given repeatable order. ★ cycle → *cycle 1.* R цикл. D Zyklus. E ciclo. I ciclo. N cyclus. P cykl. S cykel. (101,161)
4. **cycle (of a battery)** : a sequence of a discharge followed by a charge or a charge followed by a discharge of a battery under specified conditions. ★ cycle (d'un accumulateur) → *cycle 19.* R цикл (батареи). D Zyklus (einer Batterie). E ciclo (de una batería). I ciclo. N cyclus. P cykl (rozładowanie-ładowanie lub ładowanie-rozładowanie). S cykel. (486)
5. **cycle of operation** : a series of operations that may be repeated at will or automatically. ★ cycle (de fonctionnement) → *cycle 7.* R цикл операций. D Betriebszyklus. E ciclo (de funcionamiento). I ciclo (di funzionamento). N werkingscyclus. P cykl pracy. S operationscykel. (151,161)
6. **cycle of operation** : the movement of the tap-changer from one end of its range to the other and the return to its original position. ★ cycle de fonctionnement → *cycle 8.* R цикл переключения. D Schaltzyklus. E ciclo de funcionamiento. I ciclo di funzionamento. N schakelcyclus. P cykl przełączenia zaczepów. S manövercykel. (421)
7. **cycle of operation of a thermal time-delay switch** : one cycle of operation of a thermal time-delay switch starts with the switch at ambient temperature and consists of the application of heater current until point at which the switch contacts operate followed by a return to ambient temperature. ★ cycle de fonctionnement d'un interrupteur à retard thermique → *cycle 9.* R цикл срабатывания (термовыключатель с задержкой времени). D Schaltzyklus eines temperaturgesteuerten Zeitschalters. E ciclo de funcionamiento (de un interruptor con retardo térmico). I ciclo di funzionamento di un interruttore a ritardo termico. N cyclus van een thermische tijdschakelaar. P cykl pracy (łącznika zwłocznego cieplnego). S funktionscykel (för termisk tidsfördröjningsströmställare). (581)
8. **full cycle crimp mechanism** : → *mechanism 7*
9. **melting cycle** : complete process from switching on power after charging till time when charge is ready for pouring. ★ cycle de fusion → *cycle 10.* R цикл плавки. D Schmelzzyklus. E ciclo de fusión. I ciclo di fusione. N smeltperiode. P cykl topienia. S smältcykel. (841)
10. **neutron cycle** : the average energy, interaction and migration history of neutrons in a reactor, beginning with fission and continuing until they have leaked out or have been absorbed. ★ cycle des neutrons → *cycle 18.* D Neutronenzyklus. E ciclo neutrónico. I ciclo neutronico. N neutronenkringloop. P cykl neutronowy. S neutroncykel. (026)
11. **non-print cycle** : the operating time of a receiver in an error detecting and feedback system, initiated by the detection of a mutilation or by a signal repetition that has the same duration as a repetition cycle and during which all signals received are prevented from producing printing. *Note.* — See CCIR Recommendation 342. ★ cycle sans impression → *cycle 37.* R цикл отсутствия печати. D Schreibsperre-Zyklus. E ciclo sin impresión. I ciclo di non stampa. N geen-afdruk-cyclus. P cykl bez wydruku. S icke-tryckningscykel. (721)
12. **operating cycle** (of a mechanical switching device) : a succession of operations from one position to another and back to the first position through all other positions, if any. ★ cycle de manœuvres → *cycle 11.* R рабочий цикл (контактного коммутационного аппарата). D Schaltspiel (eines mechanischen Schaltgerätes). E ciclo de maniobras (de un aparato mecánico de conexión). I ciclo di operazioni (di un apparecchio meccanico di manovra). N schakelcyclus (van een mechanische schakelaar). P cykl przestawieniowy. S manövercykel. (441)
13. **operating cycle** (of a cell or battery) : the discharge and subsequent recharge of the cell or battery to restore the initial conditions. ★ cycle d'utilisation → *cycle 20.* R рабочий цикл (аккумулятора или батареи). D Arbeitszyklus. E ciclo de utilización (de una bateria). I ciclo di utilizzazione (d'una batteria). N gebruikscyclus (van een cel of accubatterij). P cykl pracy. S driftcykel. (811)
14. **production cycle** : operations carried out from tap to tap. *Note.* — Consisting of charging, melting, alloying and refining, sampling, pouring and making small repairs. ★ cycle de production → *cycle 12.* R производственный цикл. D Fertigungszyklus. E ciclo de producción. I ciclo di produzione. N produktiecyclus. P cykl produkcyjny. S chargecykel. (841)
15. **production per cycle** : → *production 5*
16. **repetition cycle** : the sequence of characters, the minimum number of which is determined by the loop time-delay of an error detecting and feedback system, which is necessary to provide automatic repetition of information. ★ cycle de répétition → *cycle 14.* R цикл повторения. D Wiederholungszyklus. E ciclo de repetición. I ciclo di ripetizione. N herhalingscyclus. P cykl powtórzeń. S repeteringscykel. (721)
17. **request cycle** (*Syn.* RQ cycle) : → *cycle 19*
18. **response cycle** (*Syn.* BQ cycle) : → *cycle 1*
19. **RQ cycle** (*Syn.* request cycle) : the repetition cycle requested in an error detecting and feedback system when a mutilation is detected. *Note.* — See CCIR Recommendation 342. ★ cycle RQ → *cycle 36.* R цикл запроса. D Rückfragezyklus; RQ. E ciclo de demanda; ciclo RQ. I ciclo di richiesta; RQ. N verzoekcyclus; RQ-cyclus. P cykl żądania powtórzenia; cykl RQ. S förfrågningscykel. (721)
20. **solar cycle** : a period of approximately 11 years characterizing the slowly variable components of solar activity. ★ cycle d'activité solaire → *cycle 4.* D Sonnenzyklus. P cykl słoneczny. (705)
21. **testing repetition cycle** : a non-print cycle in which a check is made for the presence of a signal repetition and for the correct ratio of the number of elements A to number of elements Z in all the characters received. *Note.* — See CCIR Recommendation 342. ★ cycle de répétition contrôlé → *cycle 15.* R цикл повторения с контролем. D Prüfwiederholungszyklus. E ciclo de repetición controlado. I ciclo di ripetizione controllato. N testherhalingscyclus. P cykl powtórzeń kontrolowanych. S styrd repeteringscykel. (721)
22. **to cycle** (for an electrical relay) : to operate and then to release or vice-versa. ★ manœuvrer → *manœuvrer 1.* R выполнять цикл (для электрического реле). D ein Schaltspiel ausführen. E maniobrar (para un relé eléctrico). I manovrare. N doorlopen van een cyclus. P wykonać cykl (pracy). S cykla. (446)
23. **weld cycle time** : → *time 227*
24. **X-ray tube exposure cycle time** : → *time 228*

cyclic

1. **cyclic code** : → *code 24*
2. **cyclic coercivity** : → *coercivity 2*
3. **cyclic control signal** : → *signal 64*
4. **cyclic distortion** : → *distortion 14*
5. **cyclic duration factor** : → *factor 32*
6. **cyclic irregularity** : → *irregularity 1*
7. **cyclic magnetic condition** : → *condition 4*
8. **cyclic noise** : → *noise 11*
9. **cyclic on/off switching control** : → *control 87*
10. **cyclic time** : → *time 35*
11. **cyclic time-scale** : → *time-scale 1*
12. **cyclic timing signal** : → *signal 65*
13. **cyclic transmission** : → *transmission 14*
14. **cyclic voltage variation** : → *variation 2*

cycling

1. **limiting cycling capacity** : → *capacity 14*

cycloconvertor

1. **cycloconvertor** : a frequency convertor for conversion from a higher to a lower frequency by building up an alternating voltage of lower frequency from successive waves of the higher frequency system. ★ cycloconvertisseur → *cycloconvertisseur 1.* R непосредственный

преобразователь частоты. D Steuerumrichter; Hüllkurvenumrichter. E cicloconvertidor. I cicloconvertitore. N cyclo-omzetter. P cyclokonwertor. S styromriktare. (551)

cyclotron

1. **cyclotron** : a positive-particle accelerator in which the particles travel in a succession of semi-circular orbits of increasing radii under the influence of a magnetic field which is constant in time and are accelerated at the beginning of each such orbit by traversing an electric field produced by a high- frequency generator. ★ cyclotron → *cyclotron 1.* R циклотрон. D Zyklotron. E ciclotrón. I ciclotrone. N cyclotron. P cyklotron. S cyklotron. (881)
2. **cyclotron frequency** (*Syn.* gyro-frequency) : → *gyro-frequency 2*

cylinder

1. **cylinder (of a steam turbine)** : one of the casings of a steam turbine in which are located most stationary parts. *Notes. 1* — In a 3 cylinder turbine, following the input steam pressure, exist : H.P. cylinder (high-pressure) I.P. cylinder (intermediate-pressure) L.P. cylinder (low-pressure). *2* — In a wider sense, both casing and rotor together may be called a cylinder. ★ corps → *corps 1.* R цилиндр паровой турбины. D Turbinengehäuse. E cuerpo (de una turbina de vapor). I corpi (di una turbina a vapore). N huis. P kadłub turbiny. S turbinhus. (602)
2. **(insulation) cylinder** : a tube of large diameter usually rigid, and of a length which is not necessarily great in proportion to its diameter. *Note.* — See tube, tubing. ★ cylindre (isolant) → *cylindre 2.* R (электроизоляционный) цилиндр. D (Isolier)-Zylinder. E cilindro (aislante). I cilindro (isolante). N cilinder. P rura (izolacyjna). S cylinder. (212)
3. **pantograph cylinder** (*Syn.* pantograph control mechanism) : a hydraulic or compressed air cylinder or an electromechanical device with a system of levers and springs, for raising and lowering the pantograph. ★ mécanisme de commande du pantographe → *mécanisme 5.* R цилиндр пантографа; механизм управления пантографом. D Betätigungsmechanismus für Scheren- oder Einholmstromabnehmer (Hub- und Senkantrieb). E mecanismo de control del pantógrafo. I meccanismo di comando del pantografo. N bedieningsmechanisme van de pantograaf. P mechanizm sterowniczy pantografu. S manöverutrustning för strömavtagare. (811)
4. **parabolic cylinder antenna** : → *antenna 85*
5. **slotted cylinder** (antenna) : an antenna formed by one or more slot radiators in a conducting a cylindrical surface. ★ cylindre à fente(s) → *cylindre 1.* R щелевая цилиндрическая антенна. D Schlitzzylinderantenne; Schlitzzylinder. E cilindro ranurado (antena). I cilindro a fessura. N cilindrische sleufantenne. P antena cylindryczna szczelinowa. S cylinderslitsantenn. (712)
6. **slotted cylinder panel** : → *panel 13*

cylindrical

1. **cylindrical array** : → *array 10*
2. **cylindrical inductor** (*Syn.* solenoid inductor) : → *inductor 22*
3. **cylindrical irradiance** : → *irradiance 1*
4. **cylindrical post insulator** : → *insulator 7*
5. **cylindrical reflector** : → *reflector 3*
6. **cylindrical rotor machine** : → *machine 7*
7. **cylindrical wave** : → *wave 7*
8. **radiant cylindrical exposure** : → *exposure 15*

cymomotive

1. **cymomotive force** (*Syn.* field strength-distance product) : → *product 3*
2. **specific cymomotive force** (*Syn.* specific field strength-distance product) : → *product 9*

Czochralski

1. **growing by Czochralski's method** (*Syn.* growing by pulling) : → *pulling 2*

D

DAC

1. **DAC** (*Syn.* derived air concentration) : → *concentration 4*

D-action

1. **D-action** (*Syn.* derivation action) : → *action 5*

daily

1. **annual, quarterly, monthly, weekly daily, maximum demand** : → *demand 1*
2. **average daily peak hour traffic intensity** : → *intensity 1*

dam

1. **arch dam** : a concrete and/or masonry dam which is curved so as to transmit the major part of the water pressure to the abutments. ★ barrage-voûte → *barrage-voûte 1.* R арочная плотина. D Bogenmauer. E presa bóveda. I diga a volte. N boogdam. P zapora łukowa. S valvdamm. (602)
2. **dam** : a structure to retain water inflows for specific uses. ★ barrage → *barrage 1.* R плотина. D Stauwerk. E presa. I diga. N dam. P zapora. S damm. (602)
3. **earth dam** : an embankment dam in which more than the half of the total volume is formed of compacted fine grained material. ★ barrage en terre → *barrage 2.* R плотина из грунтовых материалов. D Erddamm. E presa de escollera. I diga in terra. N aarden dam. P zapora nasypowa. S jorddamm. (602)
4. **gravity dam** : a dam constructed of concrete and/or masonry which relies on its weight for stability. ★ barrage-poids → *barrage-poids 1.* R гравитационная плотина. D Schwergewichtsmauer. E presa de gravedad. I diga a gravità. N gewichtsdam. P zapora ciężka; zapora grawitacyjna. S gravitationsdamm. (602)

damage

1. **damage fault** : → *fault 8*
2. **radiation damage** : deleterious changes in the physical or chemical properties of a material as a result of exposure to ionizing radiation. ★ dégâts par rayonnements → *dégâts 1.* D Strahlenschaden. E daño por irradiación. I danni da radiazioni. N stralingsschade. P uszkodzenie radiacyjne. S strålskada. (026)

damped

1. **damped natural frequency** : → *frequency 31*
2. **damped oscillation** : → *oscillation 2*

damper

1. **damper winding** (*Syn.* damping winding) : → *winding 19*
2. **pantograph damper** : a damper controlling the movement of the pantograph main frame. ★ amortisseur de pantographe → *amortisseur 1.* R регулятор движения пантографа. D Schwingungsdämpfer (für Scheren- oder Einholmabnehmers). E amortiguador de pantógrafo. I ammortizzatore del pantografo. N pantograafdemper. P tłumik pantografu. S strömavtagardämpare. (811)
3. **spacer damper** : a flexible or semi-rigid spacer which reduces aeolian vibrations and subspan oscillations of the subconductors. ★ entretoise amortisseuse → *entretoise 2.* R демпфирующая распорка. D dämpfender Feldbündelabstandhalter. E separador amortiguador. I distanziatore ammortizzatore. N dempende veldafstandhouder. P odstępnik tłumiący (drgania). S dämpande distansstång. (466)
4. **vibration damper** : a device attached to a conductor or an earth wire in order to suppress or minimize vibrations due to wind. ★ amortisseur de vibration → *amortisseur 2.* R виброгаситель. D Schwingungsdämpfer. E amortiguador de vibración. I smorzatore di vibrazioni. N trillingsdemper. P tłumik drgań. S vibrationsdämpare. (466)

damping

1. **critical damping** : minimum damping that will allow a displaced system to return to its initial state without oscillation. ★ amortissement critique → *amortissement 3.* R критическое затухание. D kritische Dämpfung. E amortiguamiento crítico. I smorzamento critico. N kritische demping. P tłumienie krytyczne. S kritisk dämpning. (801)
2. **damping** (of an oscillation) : progressive reduction with time of the amplitude of an oscillation. ★ amortissement → *amortissement 1.* R демпфирование (колебаний). D Dämpfung (einer Schwingung). E amortiguamiento (de una oscilación). I smorzamento (di un'oscillazione). N demping. P tłumienie (drgań). S dämpning. (351)
3. **damping** : dissipation of energy of an oscillating system with time or distance. ★ amortissement → *amortissement 2.* R затухание. D Dämpfung. E amortiguamiento. I smorzamento. N demping. P tłumienie. S dämpning. (801)
4. **damping ratio** : → *ratio 24*
5. **damping ratio** : → *ratio 25*
6. **damping resistor** : → *resistor 3*
7. **damping torque** : → *torque 9*
8. **damping winding** : → *winding 19*
9. **viscous damping** : damping that occurs when a particle in an oscillating system is resisted by a force that has a magnitude proportional to the magnitude of the velocity of the particle and direction opposite to the direction of the particle. ★ amortissement visqueux → *amortissement 4.* R вязкое затухание. D viskose Dämpfung. E amortiguamiento viscoso. I smorzamento vischioso. N viskeuze demping. P tłumienie «lepkie». S viskös dämpning. (801)

dark

1. **dark** : adjective used to describe low levels of lightness. ★ sombre → *sombre 1.* R тёмный. D dunkel. E oscuro. I scuro. N donker. P ciemny. S mörk. (845)
2. **dark resistance** : → *resistance 11*

dark-current

1. **dark current** (of a photomultiplier tube) : the current flowing in the anode circuit of a photomultiplier tube in the absence of light. ★ courant d'obscurité → *courant 125.* R темновой ток (фотоумножителя). D Dunkelstrom (eines SEV mit Photokathode). E corriente de oscuridad (de un tubo fotomultiplicador). I corrente di oscurità (in un tubo fotomoltiplicatore). N donkerstroom (v.e. fotomultiplicatorbuis). P prąd ciemny (fotopowielacza). S mörkström. (391)
2. **dark current** (I_o) : output current of a photoelectric detector or of its cathode in the absence of incident radiation. ★ courant d'obscurité → *courant 126.* R темновой ток. D Dunkelstrom. E corriente oscura. I corrente di buio. N donkerstroom. P prąd ciemny. S mörkström. (531,731,845)
3. **equivalent dark-current irradiation** : → *irradiation 3*

dash

1. **dash** (in Morse code) : a signal element of mark condition and of duration of three unit intervals followed by a signal element of space condition having a nominal duration of one unit interval. ★ trait → *trait 1.* R тире (в коде Морзе). D Strich (im Morse-Code). E raya (en código Morse). I linea. N streep (bij Morsecode). P kreska (w kodzie Morse'a). S streck. (721)

data

1. **data** : information represented in a manner suitable for automatic processing. ★ données → *donnée 10.* R данные. D Daten. E datos. I dati. N gegevens; data. P teledacja. S data. (701,721)
2. **data broadcasting** : → *broadcasting 6*
3. **data channel** : → *channel 19*
4. **data channel** : → *channel 20*
5. **data channel signalling conditions** : → *condition 5*

6. **data circuit** : → *circuit 49*
7. **data circuit terminating equipment** : → *equipment 19*
8. **data code** : → *code 25*
9. **data collection** : → *collection 3*
10. **data communication** : → *communication 3*
11. **data concentrator** : → *concentrator 4*
12. **data link** : → *link 6*
13. **data link** : → *link 7*
14. **data network** : → *network 17*
15. **data signal** : → *signal 66*
16. **data sink** : → *sink 1*
17. **data source** : → *source 7*
18. **data station** : → *station 7*
19. **data switching exchange** : → *exchange 4*
20. **data terminal equipment** : → *equipment 20*
21. **data transfer phase** : → *phase 5*
22. **data transmission** : → *transmission 15*
23. **field data** : observed data obtained during field operation. ★ données d'exploitation → *donnée 13.* R эксплуатационные данные. D Einsatzdaten. E datos de explotación. I dati di campo. N praktijkgegevens. P wyniki z eksploatacji. S fältdata. (191)
24. **first data multiplexer** : → *multiplexer 2*
25. **observed data** : values related to an item or a process obtained by direct observation. *Notes. 1* — Values referred to could be events, time instants, time intervals, etc. *2* — When data is recorded all relevant conditions and criteria should be stated. ★ valeur observée → *valeur 68.* R наблюдаемые данные. D Beobachtungsdaten. E valores observados; datos observados. I dati osservati. N waargenomen gegevens. P wyniki obserwacji. S observerade data. (191)
26. **optical data bus** : a data bus employing optical fibres for transmission. ★ bus optique → *bus 2.* R шина оптических данных. D LWL-Datenbus. E bus de datos ópticos. I canale di dati ottico. N optischedatabus. P optyczna magistrala danych. S fiberoptisk databuss. (731)
27. **public data network** : → *network 75*
28. **ready for data signal** : → *signal 154*
29. **reference data** : data which, by general agreement, may be used as a standard or as a basis for prediction and/or comparison with observed data. ★ valeur de référence → *valeur 35.* R исходные данные. D Bezugsdaten. E datos de referencia; valores de referencia. I dati di riferimento. N referentiegegevens. P dane odniesienia. S referensdata. (191)
30. **request data transfer** : → *transfer 23*
31. **second data multiplexer** : → *multiplexer 5*
32. **start-stop system of data transmission** : → *system 198*
33. **stepped start-stop system of data transmission** : → *system 203*
34. **synchronous data network** : → *network 101*
35. **synchronous data transmission** : → *transmission 68*
36. **terminal installation for data transmission** (*Syn.* data station) : → *station 7*
37. **test data** : observed data obtained during tests. ★ données d'essai → *donnée 12.* R данные испытаний. D Prüfdaten. E datos de ensayo. I dati di prova. N beproevingsgegevens. P wyniki prób. S data från provning. (191)

datafax

1. **datafax** : public facsimile transmission service between subscribers terminals on the public data network. ★ datafax → *datafax 1.* R датафакс. D Datafax. E datafax. I datafax. N datafax. P datafaks. S datafax. (721)

datagram

1. **datagram service** : → *service 4*

data-sensitive

1. **data-sensitive fault** : → *fault 9*

date

1. **automatic date and time indication** : → *indication 2*

day

1. **day/night tariff** (*Syn.* two-rate time-of-day tariff) : → *tariff 48*
2. **day to busy hour ratio** : → *ratio 26*

daylight

1. **daylight** : visible part of global solar radiation. *Note.* — When dealing with actinic effects of optical radiations, this term is commonly used for radiations extending beyong the visible region of the spectrum. ★ lumière du jour → *lumière 16.* R дневной свет. D Tageslicht. E luz de día. I luce del giorno; luce diurna. N daglicht. P oświetlenie słoneczne całkowite. S dagsljus. (845)
2. **daylight factor** : → *factor 33*
3. **daylight illuminant** : → *illuminant 2*
4. **daylight lamp** : → *lamp 12*
5. **daylight locus** : → *locus 1*
6. **daylight opening** : → *opening 1*
7. **externally reflected component of daylight factor** : → *component 23*
8. **internally reflected component of daylight factor** : → *component 34*
9. **sky component of daylight factor** : → *component 52*

d.c.

1. **bipolar d.c. link** : → *link 3*
2. **d.c. braking** (*Syn.* d.c. injection braking) : → *braking 21*
3. **d.c. chopper convertor** (*Syn.* direct d.c. convertor) : → *convertor 14*
4. **DC component** : → *component 13*
5. **d.c. conversion factor** : → *factor 34*
6. **d.c. convertor** : → *convertor 12*
7. **d.c. filter** : → *filter 11*
8. **d.c. form factor** : → *factor 35*
9. **(d.c.) high-speed circuit-breaker** : → *circuit-breaker 9*
10. **d.c. injection braking** : → *braking 21*
11. **(d.c.) main generator** : → *generator 10*
12. **d.c. motor vehicle** : → *vehicle 3*
13. **d.c. power** : → *power 28*
14. **DC restoration** : → *restoration 1*
15. **d.c. ripple factor** : → *factor 36*
16. **d.c. steady-state recovery voltage** : → *recovery voltage 1*
17. **d.c. system** (*Syn.* direct current system) : → *system 46*
18. **d.c. traction** : → *traction 5*
19. **direct d.c. convertor** : → *convertor 14*
20. **electrode d.c. resistance** : → *resistance 17*
21. **(electronic) d.c. convertor** : → *convertor 19*
22. **electronic d.c. power controller** : → *controller 4*
23. **electronic d.c. (power) switch** : → *switch 18*
24. **(electronic) d.c.(power) conversion** : → *conversion 18*
25. **high-voltage d.c. link** : → *link 14*
26. **indirect d.c. convertor** : → *convertor 29*
27. **monopolar d.c. link** : → *link 29*
28. **regenerative braking of a d.c. machine** : → *machine 22*
29. **standing DC component** : → *component 54*
30. **(volume) d.c. resistance** : → *resistance 74*
31. **(volume) d.c. resistivity** : → *resistivity 4*

DCE

1. **DCE** (*Syn.* data circuit terminating equipment) : → *equipment 19*

deactivator

1. **deactivator** (*Syn.* passivator) : → *passivator 1*

dead

1. **dead** : applies to a device or a circuit to indicate that a voltage is not applied. ★ hors tension → *tension 61.* R неподнапряжением. D spannungslos. E sin tensión. I fuori tensione. N spanningsloos. P bez napięcia. S spänningslös. (151)
2. **dead** : adjective describing a studio or other location which has a very short reverberation time, used for example to simulate open air acoustic conditions. ★ sourd → *sourd 2.* R заглушенная студия. (723)
3. **dead band** : → *band 11*
4. **dead layer** : → *layer 3*

5. **dead phase** : → *phase 6*
6. **dead room** : → *room 7*
7. **dead sector** : → *sector 1*
8. **dead short** : → *short 1*
9. **dead tank circuit-breaker** : → *circuit-breaker 10*
10. **dead time** : → *time 36*
11. **dead time** : → *time 37*
12. **dead time** : → *time 38*
13. **dead time correction** (*Syn.* resolving time correction) : → *correction 16*
14. **dead time correction** : → *correction 7*
15. **dead time (for automatic reclosing equipment)** : → *time 41*
16. **dead zone** (*Syn.* dead band) : → *band 11*
17. **electrode dead time** : → *time 51*

dead-end

1. **dead-end assembly** (*Syn.* tension set) : → *set 57*
2. **dead-end clamp** (*Syn.* anchor clamp) : → *clamp 2*
3. **dead-end tension joint** : → *joint 6*

dead-man

1. **dead-man's handle** (*Syn.* driver's safety device) : → *device 21*

debug

1. **to debug** (in programming) : to detect, to trace and to eliminate mistakes in programs or in other software. ★ mettre au point → *mettre 2.* **R** отлаживать (в программировании). **D** Fehler suchen; korrigieren. **E** poner a punto (en programación). **I** verificare e correggere (un programma). **N** foutzoeken/zuiveren. **P** oczyszczanie (programu). **S** avlusa. (714)

debunching

1. **space-charge debunching** : the process of dispersal of the electrons of a bunch because of mutual interaction between electrons in the beam. ★ dispersion par charge d'espace → *dispersion 12.* **R** разгруппирование, обусловленное пространственным зарядом. **D** Phasendefokussierung durch Raumladung. **E** dispersión por carga de espacio. **I** dispersione per carica spaziale. **N** spontaan dichtheidsmodulatieverlies. **P** rozogniskowanie wiązki. **S** klungspridare. (531)

decadic

1. **decadic key pad** : → *pad 2*
2. **decadic push-button** (*Syn.* decadic key pad) : → *pad 2*
3. **decadic signal** : → *signal 69*

decay

1. **decay** : a decrease in stored information not caused by erasing or writing. ★ déclin → *déclin 3.* **R** затухание. **D** Abklingen. **E** decadencia. **I** decadimento. **N** verval. **P** zanikanie (informacji). **S** nedtoning. (531)
2. **decay characteristic** (*Syn.* persistence characteristic) : → *characteristic 63*
3. **decay constant** : → *constant 15*
4. **decay curve** : → *curve 10*
5. **decay product** : → *product 2*
6. **decay rate** : → *rate 17*
7. **decay time** : → *time 42*
8. **decay time** : → *time 43*
9. **radioactive decay** : activity decrease versus time of a substance or of a mixture of radioactive substances by radioactive desintegration. ★ décroissance radioactive → *décroissance 4.* **D** radioaktiver Zerfall. **E** desintegración radiactiva. **I** decadimento radioattivo. **N** radioactief verval. **P** rozpad radioaktywny. **S** radioaktivt sönderfall. (881)
10. **radioactive decay** : *a)* A spontaneous nuclear transformation in which corpuscles or gamma radiation are emitted, or X-radiation is emitted following orbital electron capture, or the nucleus undergoes spontaneous nuclear fission. *b)* The decrease with time, by spontaneous nuclear transformation, of the activity of a radioactive substance or a mixture of such substances. ★ désintégration radioactive → *désintégration 4.* **R** радиоактивный распад. **D** radioaktiver Zerfall. **E** desintegración radiactiva. **I** decadimento radioattivo. **N** radioactief verval. **P** rozpad radioaktywny. **S** radioaktivt sönderfall. (881)
11. **scintillation decay time** : → *time 159*

decay-time

1. **decay-time broadening** (*Syn.* trailing-edge broadening) : → *broadening 5*

decelerating

1. **decelerating electrode** : → *electrode 21*
2. **decelerating force** : → *force 14*

deceleration

1. **effective deceleration (as a function of distance)** : the value of deceleration γ_e obtained by dividing the difference of the squares of the initial and final speeds by twice the distance travelled while the reduction of speed is taking place :

$$\gamma_e = \frac{V_i^2 - V_f^2}{2\,l}$$

where : l is the distance between the position of the train or vehicle at the moment of the operation of the brake control and its position when the final speed is attained ; V_i is the initial speed measured at the moment of operation of the control device for the brake ; V_f is the final speed obtained at the end of the braking. ★ décélération effective (en fonction de l'espace) → *décélération 1.* **R** эффективное замедление (как функция расстояния). **D** wirksame Verzögerung. **E** deceleración efectiva (en función de la distancia). **I** decelerazione effettiva. **N** effectieve vertraging (als functie van de afstand). **P** opóźnienie hamowania skuteczne (na danym odcinku). **S** effektiv retardation. (811)

2. **mean deceleration (as a function of time)** : the value of deceleration γ_a obtained by dividing the reduction in speed by the time taken to effect it :

$$\gamma_a = \frac{V_i - V_f}{t}$$

where : V_i is the initial speed measured at the moment of the operation of the control device for the brake ; V_f is the final speed obtained at the end of the braking ; t is the time between the moment of operation of the control device for the brake and the moment at which the final speed is attained. ★ décélération moyenne (en fonction du temps) → *décélération 2.* **R** среднее замедление (как функция времени). **D** mittlere Verzoegerung. **E** deceleración media (en función del tiempo). **I** decelerazione media. **N** gemiddelde vertraging (als functie van de tijd). **P** opóźnienie hamowania średnie. **S** medelretardation. (811)

decibel

1. **decibel** (dB) : a unit used to express the ratio of two powers by ten times the decimal logarithm of this ratio. *Notes. 1* — The decibel may also be used to express the ratio of two field quantities. To obtain the same numerical value as for the corresponding power ratio, the logarithm of the field quantity ratio is multiplied by the factor 20, assuming that the impedances are equal. If P_1 and P_2 are two powers, their ratio expressed in decibels is :

$$10 \lg \frac{P_1}{P_2}$$

The relation between a field quantity ratio and the corresponding power ratio is dependent on the impedances. If P_1 and P_2 represent the powers dissipated by currents I_1 and I_2 in resistances R_1 and R_2, then :

$$10 \lg \frac{P_1}{P_2} = 10 \lg \frac{I_1^2}{I_2^2}\frac{R_1}{R_2} = 20 \lg \frac{I_1}{I_2} + 10 \lg \frac{R_1}{R_2}$$

2 — Guidance for the use for the decibel and appropriate symbols to represent the ratios of various quantities is given in CCIR Recommendation 574, in CCITT Recommendation B.12, and in IEC publication 27-3. ★ décibel → *décibel 1.* **R** децибел. **D** Dezibel. **E** decibelio. **I** decibel. **N** decibel. **P** decybel. **S** decibel. (702,801)

decision

1. **decision circuit** : → *circuit 51*
2. **decision content** : → *content 3*
3. **decision instant** : → *instant 2*

4. **decision value** : → *value 6*
5. **transmission with decision feedback** : → *transmission 110*
6. **virtual decision value** : → *value 75*

deck

1. **tape deck** : an equipment consisting of the tape transport system, the magnetic heads and the associated controls. ★ platine de magnétophone → *platine 1.* R лентопротяжный механизм. D Magnetbandgerätechassis (Platine); Laufwerk. E platina de magnetófono. I piastra di magnetofono. N loopwerk. P ..... S bandspelarchassi. (806)

decode

1. **to decode** : to restore information from its coded representation to the original form. ★ décoder → *décoder 1.* R декодировать. D decodieren. E decodificar. I decodificare. N decoderen. P dekodować. S avkoda. (702)

decoder

1. **decoder** : a device for restoring information from a coded representation to the original form according to a given code. ★ décodeur → *décodeur 1.* R декодирующее устройство. D Decodierer. E decodificador. I decodificatore. N decoder; decodeertoestel. P dekoder. S avkodare. (702)
2. **decoder** : equipment for decoding colour television signals. ★ décodeur → *décodeur 2.* R декодер. (723)
3. **PCM decoder** : a device for implementing decoding in pulse code modulation. ★ décodeur MIC → *décodeur 3.* R декодер ИКМ. D PCM-Decoder. E descodificador MIC. I decodificatore PCM. N PCM-decodeerder. P dekoder (w modulacji impulsowo-kodowej). S PCM-avkodare. (704)
4. **stereophonic decoder** : equipment for deriving the left- and right-hand stereophonic signals from the stereophonic multiplex signal. ★ décodeur stéréophonique → *décodeur 4.* R стереофонический декодер. (723)

decoding

1. **decoding** : the process of restoring information from its coded representation to the original form. ★ décodage → *décodage 1.* R декодирование. D Decodierung. E decodificación. I decodifica. N decodering. P dekodowanie. S avkodning. (702,704)
2. **decoding** (in colour television) : the process for deriving signals corresponding to the three primary colours from the colour picture signal. *Note.* — Associated term : to decode. ★ décodage → *décodage 2.* R декодирование (в цветном телевидении). (723)

decontamination

1. **decontamination factor** : → *factor 37*
2. **(radioactive) decontamination** : the removal or reduction of radioactive contamination from an object or body or material. ★ décontamination (radioactive) → *décontamination 1.* R дезактивация (при радиоактивном заражении). D Dekontamination. E descontaminación (radiactiva). I decontaminazione (radioattiva). N (radioactieve) ontsmetting. P usuwanie skażenie radioaktywnego. S dekontaminering. (881)

decoupling

1. **mains decoupling factor** : → *factor 117*
2. **polarization (decoupling) ratio** : → *ratio 65*

decrement

1. **average logarithmic energy decrement** : the average value of the decrease per collision of the logarithm of the neutron energy. ★ décrément logarithmique moyen de l'énergie → *décrément 2.* D mittleres logarithmisches Energiedekrement. E decremento logarítmico medio de la energía; parámetro de moderación. I decremento logaritmico medio dell'energia; parametro di rallentamento. N gemiddelde logaritmische energievermindering. P średni logarytmiczny dekrement energii. S logaritmiskt energidekrement. (026)
2. **logarithmic decrement** : natural logarithm of the ratio of any two successive maxima of like sign, in the decay of a single-frequency oscillation. ★ décrément logarithmique → *décrément 1.* R логарифмический декремент. D logarithmisches Dekrement. E decremento logarítmico. I decremento naturale. N logarithmisch decrement. P dekrement logarytmiczny tłumienia. S logaritmiskt dekrement. (801)

dedicated

1. **dedicated battery** : → *battery 26*
2. **dedicated circuit** : → *circuit 52*
3. **dedicated low-voltage wiring** : → *wiring 1*

dee

1. **dee** : each of two hollow electrodes of a cyclotron between the straight edges of which is the accelerating electric field. *Note.* — In the original version of the cyclotron the electrodes were D-shaped. ★ dé → *dé 2.* R дуант. D Dee. E dé. I di. N D-elektrode. P duant. S D-elektrod. (881)

de-electrification

1. **de-electrification current** : → *current 64*

de-emphasis

1. **de-emphasis** : a process which deliberately reduces the magnitude of certain spectral components of a signal with respect to the magnitudes of others, for instance in order to restore the original magnitude of the signal components increased by pre-emphasis. ★ désaccentuation → *désaccentuation 1.* R деэмфазис. D Deemphase; Entzerrung. E desacentuación; de énfasis. I deenfasi. N de-emfase. P deemfaza. S avbetoning. (702)
2. **de-emphasis** (*Syn.* post-equalization) : the operation which consists in restoring the original amplitude/frequency characteristic of the recorded signal on reproduction. ★ désaccentuation → *désaccentuation 2.* R частотная коррекция. D Deemphasis; Rückentzerrung. E desacentuación; postecualización. I de-enfasi. N na-correctie; de-emfasis. P korekcja odczytu; deemfaza. S nedtoning. (806)

deep

1. **deep scattering layer** : → *layer 4*
2. **deep space** : → *space 8*
3. **deep space probe** : → *probe 3*
4. **deep X-ray therapy** : → *therapy 2*

defect

1. **mass defect** : difference between the sum of the masses of the nucleons forming the nucleus and the mass of that nucleus. ★ défaut de masse → *défaut 18.* D Massendefekt. E defecto de masa. I difetto di massa. N massatekort. P defekt masy. S massdefekt. (026)

defective

1. **defective colour vision** : → *vision 1*

defender

1. **ear defender** (*Syn.* hearing protector) : → *protector 2*

deferrable

1. **deferrable load** : → *load 11*

deferred

1. **deferred maintenance** : → *maintenance 9*

definite

1. **definite purpose motor** : → *motor 20*
2. **definite time-delay over-current release** : → *release 4*

definition

1. **definition** (*Syn.* resolution) : a measure of the sharpness of detail of a television picture. *Examples :* vertical resolution, horizontal resolution. ★ définition → *définition 1.* R четкость. (723)
2. **extended definition television (system)** : → *television 11*
3. **high definition television (system)** : → *television 14*

deflecting

1. **deflecting electrodes** : → *electrode 22*
2. **deflecting torque** : → *torque 10*

deflection

1. **beam deflection tube** : → *tube 8*
2. **deflection** (of an electronic beam) : variation of the direction of an electronic beam by an electric or magnetic field. ★ déviation → *déviation 10.* R отклонение. D Ablenkung. E desviación; deflexión. I deflessione. N afbuiging. P odchylanie. S avböjning. (531)

3. **deflection coefficient** : → *coefficient 13*
4. **deflection coefficient** : → *coefficient 14*
5. **deflection coils** : → *coil 15*
6. **deflection current** : → *current 65*
7. **deflection defocusing** : → *defocusing 1*
8. **deflection sensitivity** : → *sensitivity 6*
9. **deflection sensitivity** : → *sensitivity 7*
10. **deflection under bending load** : the displacement of a point on an insulator, measured perpendicularly to its axis, under the effect of a load applied perpendicularly to this axis. ★ flèche sous charge de flexion → *flèche 6.* R изогнутость изолятора под нагрузкой. D Auslenkung unter Last. E flecha bajo carga. I freccia sotto carico. N doorbuiging onder belasting. P ugięcie pod obciążeniem. S utböjning vid belastning. (471)
11. **deflection uniformity factor** : → *factor 38*
12. **deflection voltage** : → *voltage 46*
13. **electron beam deflection system** : → *system 60*
14. **electrostatic deflection** : deflection by an electric field. ★ déviation électrique → *déviation 14.* R электростатическое отклонение. D elektrostatische Ablenkung. E desviación eléctrica. I deflessione elettrica. N elektrostatische afbuiging. P odchylanie elektryczne. S elektrostatisk avböjning. (531)
15. **magnetic deflection** : deflection by a magnetic field. ★ déviation magnétique → *déviation 17.* R магнитное отклонение. D magnetische Ablenkung. E desviación magnética. I deflessione magnetica. N magnetische afbuiging. P odchylanie magnetyczne. S magnetisk avböjning. (531)
16. **symmetrical deflection** : deflection characterized by the application of deflection voltage in such a manner that the mean value of the voltages of the two deflecting electrodes is constant. ★ déviation symétrique → *déviation 18.* R симметричное отклонение. D symmetrische Ablenkung. E desviación simétrica. I deflessione simmetrica. N symmetrische afbuiging. P odchylanie symetryczne. S symmetrisk avböjning. (531)

deflector

1. **deflector coil** : → *coil 16*
2. **deflector plates** (*Syn.* deflecting electrodes) : → *electrode 22*

defocusing

1. **deflection defocusing** : an enlargement of the spot, usually non uniform, caused by change of focus of the beam when deflected. ★ déconcentration de déviation → *déconcentration 1.* R дефокусировка при отклонении. D Ablenk-Defokussierung. E desconcentración de desviación. I sfocamento di deflessione. N afbuigonscherpte. P rozogniskowanie odchyleniowe. S avböjningsdefokusering. (531)
2. **ionospheric defocussing** : decrease of the electromagnetic field received at a given point after ionospheric reflection, relative to the field which would be received at this point if the curvature of the ionosphere were negligible. ★ défocalisation ionosphérique → *défocalisation 1.* D ionosphärische Defokussierung. P rozogniskowanie jonosferyczne. (705)
3. **(ionospheric) defocussing factor** : → *factor 99*

defroster

1. **defroster** : a device to dispel ice from the windows of a driver's cab. ★ dégivreur → *dégivreur 1.* R антиобледенитель. D Scheibenheizung. E descongelador. I sbrinatore. N ruitverwarming. P odmrażacz szyby. S defroster. (811)

degassing

1. **degassing** : a metallurgical process to extract undesirable elements in gaseous form from within the molten metal. ★ dégazage → *dégazage 1.* R дегазация. D Entgasen. E desgasificación. I degasaggio. N ontgassing. P odgazowywanie. S avgasning. (841)

degaussing

1. **degaussing circuit** : → *circuit 53*

degenerate

1. **degenerate mode** : → *mode 13*
2. **degenerate mode** : → *mode 14*
3. **degenerate semiconductor** : → *semiconductor 3*
4. **polarization (of a degenerate mode)** : → *polarization 35*

degradation

1. **degradation** (of performance) : an undesired departure in the operational performance of any device, equipment or system from its intended performance. *Note.* — The term "degradation" can apply to temporary or permanent failure. ★ dégradation → *dégradation 2.* R ухудшение (качества работы). D Funktionsminderung. E degradación (de funcionamiento); pérdida de calidad funcional. I degradazione (di prestazione). N verslechtering (van een prestatie). P degradacja jakości. S försämring. (161)
2. **degradation failure** : → *failure 11*
3. **gain degradation** (*Syn.* antenna to medium coupling loss) : the apparent decrease of the sum of the gains, expressed in decibels, of a transmitting antenna and the associated receiving antenna on a long propagation path, when significant scattering effects occur on this path. *Note.* — The gain degradation is connected to the radiation characteristics of the antennas and to the propagation characteristics along the transmission path. ★ baisse de gain d'antenne → *baisse 2.* D Gewinnmaß-Degradation; Antennengewinnminderung. P zmniejszenie zysku. (705)

degree

1. **conventional degree of distortion** : the degree of individual distortion which has a very small specified probability of being exceeded over a prolonged period of time. ★ degré conventionnel de distorsion → *degré 1.* R условная степень искажения. D vereinbarter Grad der Verzerrung. E grado convencional de distorsión. I grado convenzionale di distorsione. N mate van conventionele vervorming. P umowny stopień zniekształcenia. S konventionell distorsionsgrad. (721)
2. **degree of bias distortion** : ratio of the difference between the mean measured durations of signal elements of different values to the unit interval. ★ degré de distorsion biaise → *degré 7.* R степень искажения преобладания. D Grad der einseitigen Verzerrung. E grado de distorsión de polaridad. I grado di distorsione di dissimetria. N mate van ingestelde vervorming. P stopień zniekształcenia jednostronnego. S sneddistorsionsgrad. (721)
3. **degree of coherence** : a measure of the extent to which radiation can be considered to be coherent. *Notes. 1* — The magnitude of the degree of coherence is equal to the visibility, V, of the fringes of a 2-beam interference experiment, :

$$V = \frac{S_{max} - S_{min}}{S_{max} + S_{min}}$$

where S_{max} is the irradiance at a maximum of the interference pattern, and S_{min} is the irradiance at a minimum. *2* — Optical radiation is considered highly coherent when the degree of coherence exceeds 0.88, partially coherent for values less than 0.88 and incoherent for values significantly less than 0.88. ★ degré de cohérence → *degré 2.* R степень когерентности. D Kohärenzgrad. E grado de coherencia. I grado di coerenza. N coherentiegraad. P stopień spójności; stopień koherencji. S koherensgrad. (731)
4. **degree of early anisochronous parallel distortion** : in parallel transmission, the ratio to the theoretical duration of the significant interval of the maximum measured difference between this theoretical duration and the duration of the interval between the earliest of all coherent significant instants of a character signal and the earliest of all coherent significant instants of the following character signal. ★ degré de distorsion parallèle anisochrone en avance → *degré 11.* R степень анизохронного параллельного искажения опережения. D Grad der voreilenden Parallelverzerrung. E grado de distorsión paralela anisócrona en avance. I grado di distorsione parallela anisocrona in anticipo. N mate van late anisochrone parallelvervorming. P stopień zniekształcenia wyprzedzenia równoległego anizochronicznego. S ..... (721)
5. **degree of enrichment** : enrichment factor minus one. ★ degré d'enrichissement → *degré 16.* D Anreicherungsgrad. E grado de enriquecimiento. I grado d'arricchimento. N verrijkingsgraad. P stopień wzbogacenia. S anrikningsgrad. (026)
6. **degree of gross start-stop distortion** : the degree of start-stop distortion determined when the assumed unit interval is exactly that appropriate to the nominal modulation rate. *Note.* — By convention the gross start-stop distortion may be considered positive when the significant instant occurs after the

ideal instant and conversely, negative when it occurs before. ★ degré de distorsion arythmique globale → *degré 6.* R степень общего стартстопного искажения. D Gesamt-Start-Stop-Verzerrungsgrad. E grado de distorsión arrítmica global; tasa de distorsión arrítmica global. I grado di distorsione telegrafica lorda. N mate van gemiddelde start/stop-vervorming. P stopień zniekształcenia arytmicznego całkowitego. S total start-stoppdistorsionsgrad. (721)

7. **degree of individual distortion** (of a particular significant instant) : the ratio of the algebraic value of the displacement in time of a given significant instant from the corresponding ideal instant, to a specified unit interval. *Notes. 1* — By convention the displacement is considered positive when the significant instant occurs after the ideal instant, and conversely it is considered negative when it occurs before. *2* — The degree of individual distortion is usually expressed as a percentage. ★ degré de distorsion individuelle → *degré 9.* R степень индивидуального искажения (отдельного значащего момента). D individueller Verzerrungsgrad. E grado de distorsión individual (de un instante significativo); tasa de distorsión individual (de un instante significativo). I grado di distorsione. N mate van individuele vervorming (van een speciaal significant moment). P stopień zniekształcenia indywidualnego. S relativt felläge. (721)
8. **degree of ionization** (of a plasma) : the ratio of free electrons in an element of volume within a plasma to the total number of neutral and charged particles in the same element of volume. ★ degré d'ionisation → *degré 18.* D Ionisationsgrad (eines Plasmas). P stopień jonizacji (plazmy). (705)
9. **degree of isochronous distortion** : the ratio of the algebraical difference between the highest and the lowest value of the degree of individual distortion refered to the mean duration of the unit interval for the significant instants of an isochronous signal during a specified time interval. ★ degré de distorsion isochrone → *degré 10.* R степень изохронного искажения. D Isochronverzerrungsgrad. E grado de distorsión isócrona; tasa de distorsión isócrona. I grado di distorsione isocrona. N mate van isochrone vervorming. P stopień zniekształcenia izochronicznego. S fellägesdifferens. (721)
10. **degree of late anisochronous parallel distortion** : in parallel transmission, the ratio to the theoretical duration of the significant interval of the maximum measured difference between the latest and the earliest coherent significant instants. ★ degré de distorsion parallèle anisochrone en retard → *degré 12.* R степень анизохронного параллельного искажения запаздывания. D Grad der nacheilenden Parallelverzerrung. E grado de distorsión paralela anisócrona en retardo. I grado di distorsione parallela anisocrona in ritardo. N mate van vroege anisochrone parallelvervorming. P stopień zniekształcenia opóźnienia równoległego anizochronicznego. S ..... (721)
11. **degree of polymerization** (of a polymer) : the average value of the number of monomeric units in the molecules of a polymer. *Note.* — Different average values (number, mass, or viscometric average) can be determined for the same material. ★ degré de polymérisation → *degré 13.* R степень полимеризации (полимера). D Polymerisationsgrad (bei einem Polymer). E grado de polimerización (de un polímero). I grado di polimerizzazione (di un polimero). N polymerisatiegraad (van een polymeer). P stopień polimeryzacji (polimeru). S polymerisationsgrad. (212)
12. **degree of polymerization** (of cellulosic paper) : the average number of anhydrous-β-glucose monomers, $C_6H_{10}O_5$, in the cellulose molecules. ★ degré de polymérisation → *degré 14.* R степень полимеризации (целлюлозы). D Polymerisationsgrad (bei Zellulosepapier). E grado de polimerización (del papel celulósico). I grado di polimerizzazione (di una carta cellulosica). N polymerisatiegraad (van cellulose-papier). P stopień polimeryzacji (papieru celulozowego). S polymerisationsgrad. (212)
13. **degree of protection provided by enclosures** (of electrical apparatus) : the measures applied to the enclosures of electrical apparatus to provide for : 1) the protection of persons against contact with or approach to live parts and against contact with moving parts (other than smooth rotating shafts and the like) inside the enclosure and the protection of the apparatus against ingress of solid foreign bodies ; 2) the protection of the apparatus inside the enclosure against harmful ingress of water. ★ degré de protection procuré par les enveloppes → *degré 15.* R степень защиты, обеспечиваемая оболочками (электрооборудования). D Schutzart des Gehäuses. E grado de protección proporcionado por las envolventes (de un material eléctrico). I grado di protezione dato dalla custodia (di una costruzione elettrica). N beschermingsgraad (van omhulsels). P stopień ochrony zapewniony przez osłony (urządzenia elektrycznego). S kapslingsklass. (426)
14. **degree of standardized test distortion** : the degree of individual distortion of the received signal measured during a specified period of time when the signal at the sending end is a perfect discrete signal and corresponds to a specified text. ★ degré de distorsion d'essai normalisé → *degré 8.* R степень искажения стандартизированного текста. D Standardtest-Verzerrungsgrad. E grado de distorsión de ensayo normalizado. I grado di distorsione di prova normalizzata. N mate van vervorming bij een genormaliseerde beproeving. P stopień zniekształcenia tekstu pomiarowego znormalizowanego. S ..... (721)
15. **degree of start-stop distortion** : the highest absolute value of the degree of individual distortion of the significant instants of a start-stop signal which is reached within a specified time interval. ★ degré de distorsion arythmique → *degré 3.* R степень стартстопного искажения. D Start-Stop-Verzerrungsgrad. E grado de distorsión arrítmica; tasa de distorsión arrítmica. I grado di distorsione telegrafica. N mate van start/stop-vervorming. P stopień zniekształcenia arytmicznego. S start-stoppdistorsionsgrad. (721)
16. **degree of start-stop distortion at the actual mean modulation rate** (*Syn.* degree of synchronous start-stop distortion) : → *degree 17*
17. **degree of synchronous start-stop distortion** (*Syn.* degree of start-stop distortion at the actual mean modulation rate) : the degree of start-stop distortion determined when the assumed unit interval is that appropriate to the actual mean modulation rate. *Note.* — In practice the degree of synchronous start-stop distortion is measured by adjusting the scanning rate of the distortion measuring set. ★ degré de distorsion arythmique au synchronisme → *degré 5.* R степень синхронного стартстопного искажения; степень стартстопного искажения при фактической средней скорости модуляции. D Start-Stop-Verzerrungsgrad bei der tatsächlichen mittleren Schrittgeschwindigkeit; synchroner Start-Stop-Verzerrungsgrad. E grado de distorsión arrítmica en sincronismo; grado de distorsión arrítmica a la velocidad real media. I grado di distorsione telegrafica sincrona. N mate van synchrone start/stop-vervorming. P stopień zniekształcenia arytmicznego w synchronizmie. S synkron start-stoppdistorsionsgrad. (721)

de-ionization

1. **de-ionization** : recombination of ions in an ionized fluid. ★ désionisation → *désionisation 1.* R деионизация. D Entionisierung. E desionización. I deionizzazione. N deïonisatie. P dejonizacja. S avjonisation. (111)
2. **de-ionization rate** : → *rate 19*

de-ionizing

1. **de-ionizing grid** : → *grid 7*

de-iteration

1. **de-iteration** : the process applied to a reiterated digital signal for restoring the original signal. ★ déitération → *déitération 1.* R ..... D De-Iteration. E deiteración. I deiterazione. N ont-iteratie; de-iteratie. P odpełnianie. S ..... (704)

delamination

1. **delamination** : separation of layers of material. ★ déstratification → *déstratification 1.* R расслаивание. D Delaminierung. E delaminación. I delaminazione. N laagscheiding. P rozwarstwienie. S delaminering. (212)

delay

1. **administrative delay** (for corrective maintenance) : the accumulated time during which an action of corrective maintenance on a faulty item is not performed due to administrative reasons. ★ délai administratif → *délai 1.* R продолжительность задержки непланового ремонта по организационным причинам. D administrative Verzugsdauer (für Instandsetzung). E retardo administrativo (para el mantenimiento correctivo). I ritardo amministrativo. N administratieve vertraging (voor correctief onderhoud).

P opóźnienie administracyjne (obsługi naprawczej). S administrativ väntetid. (191)

2. **answering delay** : the duration of the time interval between the establishment of a connection between calling and called users, and the detection of an answer signal at the originating exchange. ★ délai du signal de réponse → *délai 3.* D Meldeverzug. P opóźnienie odzewu abonenta wywoływanego. (715)
3. **call clearing delay** : the interval of time between the beginning of the sending of the clearing signal by a terminal and the appearance of the free circuit condition on the return line. ★ temps de libération → *temps 77.* R время отбоя соединения. D Auslöseverzug. E tiempo de liberación. I tempo di disconnessione. N verbindingsvrijgave-vertraging. P opóźnienie rozłączenia. S nedkopplingsfördröjning. (721)
4. **chrominance-luminance delay inequality** : → *inequality 1*
5. **current delay angle** : → *angle 19*
6. **current delay angle** : → *angle 20*
7. **delay** (*Syn.* dead time) : → *time 36*
8. **delay angle** : → *angle 22*
9. **delay angle** (*Syn.* phase angle) : → *angle 46*
10. **delay/frequency characteristic** : → *characteristic 31*
11. **delay line** : → *line 20*
12. **delay line** : → *line 21*
13. **delay mode of operation** : → *mode 15*
14. **dial tone delay** : the time interval between the instant the switch hook is off-hook and the receipt by the calling party of dial tone. ★ attente de tonalité (d'invitation à numéroter) → *attente 5.* R задержка сигнала ответа станции. D Wähltonverzug. E espera de tono. I attesa del segnale di centrale. N wachttijd op kiestoon. P stan oczekiwania sygnału zgłoszenia się centrali. S tid till kopplingston. (722)
15. **dial-tone delay** : the duration of the time interval between off hook and reception of dial tone. ★ durée d'attente de tonalité → *durée 23.* D Wähltonverzug. P czas oczekiwania na sygnał do nadawania numeru. (715)
16. **differential mode delay** (*Syn.* multimode group delay) : the difference in propagation delay that occurs because of the different group velocities of the bound modes of an optical fibre. ★ temps de propagation de groupe modal différentiel → *temps 94.* R дифференциальная задержка мод; многомодовая групповая задержка. D Multimoden-Laufzeitunterschied. E retardo modal diferencial; retardo de grupo multimodal. I ritardo differenziale di modo; ritardo di gruppo. N differentiële modusvertraging; multimodus groepsvertraging. P różnica opóźnień modów. S modlöptidsskillnad. (731)
17. **digital switching delay** : the difference in time between the arrival of a bit at a digital switching node and its subsequent departure. *Note.* — Digital switching delay may be caused by buffering, synchronizing or time slot interchange. ★ retard de commutation numérique → *retard 22.* R задержка цифровой коммутации. D digitale Durchschaltungsverzoegerung. E retardo de conmutación digital. I ritardo di trasmissione attraverso la centrale. N vertraging ten gevolge van digitaal schakelen. P opóźnienie komutacji cyfrowej. S digitalkopplingsfördröjning. (714)
18. **envelope delay** : the time of propagation between two points of a wave envelope representing a signal in a transmission system. *Notes. 1* — The envelope delay is significant only if the envelope is relatively undistorted by the transmission system. *2* — The envelope delay is equal to the group delay if the latter is approximately constant for all the significant spectral components of the signal. ★ temps de propagation de signal → *temps 97.* R задержка огибающей. D Signallaufzeit. E retardo de envolvente. I tempo di propagazione del segnale; tempo di propagazione dell'inviluppo. N vertraging van de omhullende. P opóźnienie obwiedni. S envelopplöptid. (702,726)
19. **envelope delay distortion** (*Syn.* group delay/frequency distortion) : → *distortion 43*
20. **exchange call set-up delay** : the duration of the time interval from the reception, at the incoming side of the exchange, of the address information required for setting up a call, to the sending to the subsequent exchange of the seizing signal or the beginning of the address information. ★ durée de sélection d'un commutateur → *durée 68.* D Verbindungsaufbauverzug. P opóźnienie zestawienia połączenia. (715)
21. **group delay** : the propagation time between two points of a signal which may be ideally represented by two superimposed sinusoidal waves of equal amplitude and slightly different frequencies approaching a common limiting value. *Note.* — In a homogeneous propagation medium, or on a uniform line, the group delay is equal to the derivative with respect to the angular frequency of the difference, at the same time, of the phases, at the two points, of the common limit wave. ★ temps de propagation de groupe → *temps 93.* R групповое время запаздывания. D Gruppenlaufzeit. E retardo de grupo. I tempo di propagazione di gruppo; ritardo di gruppo. N groeplooptijd. P opóźność grupowa. S grupplöptid. (702,705,726)
22. **group delay equalization** : → *equalization 6*
23. **group delay/frequency distortion** : → *distortion 43*
24. **incoming response delay** : the duration of the time interval from the instant when a seizing signal arrives to the instant when the proceed-to-send signal is sent back, when the signals are sent on the same channel as speech or on a signalling channel which is permanently associated. ★ durée de présélection → *durée 59.* D Empfängeranschalteverzug; Belegungsverzug. P opóźnienie zgłoszenia centrali. (715)
25. **logistic delay** : that accumulated time during which a maintenance action cannot be performed due to the necessity to acquire maintenance resources, excluding any administrative delay. *Note.* — Logistic delays can be due to, for example, travelling to unattended installations, pending arrival of spare parts, specialists, test equipment, information and suitable environmental conditions. ★ délai logistique → *délai 5.* R продолжительность задержки из-за необеспеченности материальными ресурсами. D logistische Verzugsdauer. E retardo logístico. I ritardo logistico. N logistieke vertraging. P opóźnienie organizacyjne (obsługi). S logistisk väntetid. (191)
26. **mean access delay (of a communication)** : the expectation of the time duration between the first call attempt made by a user of a telecommunication network to reach another user or a service and the instant of time the user reaches the wanted other user or service, within specified tolerances and under given operational conditions. ★ durée moyenne d'établissement (d'une communication) → *durée 115.* R среднее время задержки соединения (в технике связи). D mittlerer Verbindungsaufbauverzug. E demora media de implantación (de una comunicación). I ritardo medio di accesso (di una comunicazione). N gemiddelde toegangsvertraging (bij telecommunicatie). P opóźnienie uzyskania połączenia średnie. S medelväntetid för åtkomst. (191)
27. **mean administrative delay** (*Syn.* MAD (abbreviation)) : the expectation of the administrative delay. ★ durée moyenne du délai administratif → *durée 117.* R средняя продолжительность задержки по организационным причинам. D mittlere administrative Verzugsdauer. E retardo medio administrativo. I ritardo amministrativo medio. N gemiddelde administratieve vertraging; MAD (afkorting). P opóźnienie administracyjne średnie. S medelvärde för administrativ väntetid. (191)
28. **mean logistic delay** (*Syn.* MLD (abbreviation)) : the expectation of the logistic delay. ★ durée moyenne du délai logistique → *durée 118.* R средняя продолжительность задержки из-за необеспеченности материальными ресурсами. D mittlere logistische Verzugsdauer. E retardo medio logístico. I ritardo logistico medio. N gemiddelde logistieke vertraging; MLD (afkorting). P opóźnienie organizacyjne średnie. S medelvärde för logistisk väntetid. (191)
29. **mean service access delay** : the expectation of the time duration between an initial bid by the user for the acquisition of a service and the instant of time the user has access to the service and it is obtained within specified tolerances and other given operating conditions. ★ durée moyenne d'accès → *durée 107.* R среднее время задержки обслуживания. D mittlerer Dienstzugangsverzug. E demora media de acceso (a un servicio). I ritardo medio di accesso al servizio. N gemiddelde toegangsvertraging van een dienst(verlening). P opóźnienie uzyskania serwisu średnie. S medelväntetid för tjänst. (191)
30. **multimode group delay** (*Syn.* differential mode delay) : → *delay 16*
31. **p-fractile access delay (of a communication)** : the p-fractile value of the duration between the first call attempt made by a user of a telecommunication network to reach another user or a service and the instant of time the user reaches the wanted other user or service, within specified tolerances and under given operational conditions. ★ fractile d'ordre p de la durée d'établissement (d'une communication)

→ *fractile 3.* R П - квантиль времени задержки соединения (в тюнике связи). D Quantil des Verbindungsaufbauverzugs. E cuantil de orden-p de la demora de implantación (de una comunicación). I p-frattile del ritardo di accesso. N p-fractiel van de toegangsvertraging (bij telecommunicatie). P kwantyl rzędu p opóźnienia uzyskania serwisu. S p-fraktil för väntetid för åtkomst. (191)

32. **p-fractile administrative delay** : the p-fractile value of the administrative delay. ★ fractile d'ordre p du délai administratif → *fractile 4.* R П - квантиль продолжительности задержки по организационным причинам. D Quantil der administrativen Verzugsdauer. E cuantil-p del retardo administrativo. I p-frattile del ritardo amministrativo. N p-fractiel van de administratieve vertraging. P kwantyl rzędu p opóźnienia administracyjnego. S p-fraktil för administrativ väntetid. (191)
33. **p-fractile logistic delay** : the p-fractile value of the logistic delay. ★ fractile d'ordre p du délai logistique → *fractile 5.* R П - квантиль продолжительности задержки из-за необеспеченности материальными ресурсами. D Quantil der logistischen Verzugsdauer. E cuantil-p del retardo logístico. I p-frattile del ritardo logistico. N p-fractiel van de logistieke vertraging. P kwantyl rzędu p opóźnienia organizacyjnego. S p-fraktil för logistisk väntetid. (191)
34. **phase delay** : the time taken by a moving point, associated with a sinusoidal travelling wave and defined by a fixed phase of a field quantity, to travel between two given points in a propagation medium. ★ temps de propagation de phase → *temps 96.* R фазовая задержка. D Phasenlaufzeit. E retardo de fase. I tempo di propagazione di fase; ritardo di fase. N fasevertraging. P opóźność fazowa. S fasfördröjning. (702,705)
35. **post-dialling delay** : the duration of the time interval between the end of dialling by the user and the reception by him of the appropriate tone or recorded announcement, or the abandonment of the call attempt without tone. ★ attente après numérotation → *attente 3.* D Rufverzug. P oczekiwanie po wybraniu numeru. (715)
36. **post-dialling delay** : the time interval between the end of the dialling by the calling party and either receipt by the calling party of some indication of the success or failure of the call attempt or abandonment of the call attempt. ★ attente de réponse après numérotation → *attente 4.* R задержка после набора номера. D Rufverzug. E espera de respuesta tras la numeración. I attesa dopo la selezione. N wachttijd na het kiezen; wachttijd op vrijtoon. P stan oczekiwania na rezultat wybierania. S kopplingstid. (722)
37. **preselection delay** : the interval of time between the sending of the calling signal by the calling party and the reception of the proceed-to-select signal. ★ temps de présélection → *temps 91.* R время "до набора". D Wahlaufforderungsverzug. E tiempo de preselección. I ritardo alla selezione. N vertraging in kiessignaalontvangst. P opóźnienie przedwybiercze. S förvalsfördröjning. (721)
38. **queuing delay** : the delay incurred by a signal message waiting for previously applied signal messages to be sent by the transmitting terminal of the signalling channel concerned. ★ retard dû aux files d'attente → *retard 26.* R задержка вследствие образования очередей. D Warteverzoegerung. E demora por cola. I ritardo dovuto alla coda. N wachtrijvertraging. P opóźnienie z oczekiwania. S köfördröjning. (714)
39. **statistical delay of ignition** : the statistical average of delay times from the application of the specified voltage to initiate the discharge to the beginning of ignition. ★ durée statistique de préamorçage → *durée 125.* R запаздывание возникновения разряда. D Zündverzug. E duración estadística de precebado. I ritardo statistico di innesco. N statistische ontsteekvertraging. P opóźnienie zapłonu średnie. S statistisk tändfördröjning. (531)
40. **technical delay** : the accumulated time necessary to perform auxiliary technical actions associated with the maintenance action itself. ★ délai technique → *délai 7.* R продолжительность задержки по техническим причинам. D technische Verzugsdauer. E retardo técnico. I ritardo tecnico. N technische vertraging. P opóźnienie techniczne. S teknisk väntetid. (191)
41. **through-connection delay** : the duration of the time interval from the instant when the information required for setting up a through-connection in an exchange is available for processing in the exchange, to the instant when the switching network through-connection is established. ★ durée d'établissement d'un commutateur → *durée 77.* D Durchschalteverzug. P opóźnienie zestawienia przejścia przez centralę. (715)

delayed

1. **delayed automatic reclosing** : → *reclosing 4*
2. **delayed critical** : → *critical 31*
3. **delayed delivery** : → *delivery 1*
4. **delayed neutron fraction** : → *neutron 1*
5. **delayed neutrons** : → *neutron 2*
6. **effective delayed neutron fraction** : → *neutron 4*

delay-time

1. **delay-time** : the time interval between a step-function change of the input signal level and the instant at which the magnitude of the output signal passes through a specified value which is close to its initial value. ★ retard à la croissance → *retard 16.* R время задержки. D Verzögerungszeit. E retardo de subida. I tempo di ritardo. N vertragingstijd. P czas opóźnienia. S fördröjningstid. (521)
2. **distortion of envelope delay time** : → *distortion 32*
3. **envelope delay time** : the time of propagation of a certain characteristic of a signal envelope between two points, for a certain frequency. ★ temps de propagation de groupe → *temps 92.* R время задержки огибающей. D Gruppenlaufzeit. E tiempo de propagación de grupo. I tempo di propagazione di gruppo. N groeplooptijd (bij transmissie tussen twee punten). P opóźność obwiedniowa (w transmisji między dwoma punktami). S grupplöptid. (561)
4. **H.T. delay time** : the time interval between the instant at which a stated heater or filament voltage is reached and the instant at which the high tension may be applied. ★ délai haute tension → *délai 4.* R время задержки по высокому напряжению. D Vorheizzeit. E retraso en alta tensión. I ritardo dell'alta tensione. N hoogspanning-vertragingstijd. P czas opóźnienia wysokiego napięcia. S fördröjning av högspänningsinkoppling. (531)
5. **phase delay time** : the time of propagation of a sinusoidal oscillation of a certain frequency between two points. ★ temps de propagation de phase → *temps 95.* R фазовое время задержки. D Phasenlaufzeit. E tiempo de popagación de fase. I tempo di propagazione di fase. N fasevertraging (in de transmissie tussen twee punten). P opóźność fazowa (w transmisji między dwoma punktami). S faslöptid. (561)

deletion

1. **digit deletion** : the elimination of a portion of the address in call processing. ★ suppression de chiffres → *suppression 11.* R упразднение цифр. D ..... E supresión de cifras. I cancellazione di cifre. N ..... P eliminacja cyfry. S siffereliminering. (714)

delineator

1. **delineator** (USA) : marker post used as one of a series to indicate the line of the edge of a carriageway. ★ délinéateur → *délinéateur 1.* R контур. D Leitpfosten. E guia luminosa. I delineatore. N bermplank. P ..... S kantstolpe. (845)

delivery

1. **delayed delivery** : a store-and-forward process in which the re-transmission of stored messages is delayed until a pre-determined period. ★ remise différée → *remise 4.* R задержанная доставка. D verzögerte Weitersendung. E envío diferido. I consegna differita. N vertraagde aflevering. P przekazywanie z opóźnieniem. S fördröjd mellanlagringsöverföring. (721)
2. **delivery confirmation** : → *confirmation 2*
3. **programme delivery control** : → *control 144*

delta

1. **arc furnace delta connection** : → *connection 2*
2. **delta configuration** : → *configuration 5*
3. **delta connection** : → *connection 25*
4. **delta light pulse** : → *pulse 5*
5. **delta modulation** : → *modulation 14*
6. **delta network** : → *network 18*
7. **delta radiation** : → *radiation 16*
8. **delta rays** (*Syn.* delta radiation) : → *radiation 16*

delta-connected

1. **delta-connected device** : → *device 16*

delta-M

1. **ΔM** (*Syn.* delta modulation) : → *modulation 14*

delta-star

1. **delta-star transformation** (*Syn.* delta-wye conversion) : → *conversion 16*

delta-wye

1. **delta-wye conversion** : → *conversion 16*

demagnetization

1. **demagnetization curve** : → *curve 11*
2. **demagnetization factor** : → *factor 39*

demagnetize

1. **to demagnetize** : to reduce the magnetic flux density of a magnetized material along the demagnetization curve. *Note.* — This definition applies mainly in the context of permanent magnet technology. ★ désaimanter → *désaimanter 1.* R размагнитить. D abmagnetisieren. E desmagnetizar. I smagnetizzare. N ontmagnetiseren. P odmagnesowywać. S avmagnetisera. (121,221)

demagnetized

1. **statically demagnetized state** : → *state 40*

demagnetizer

1. **demagnetizer** : a device for reducing magnetization of various components such as magnetic heads, spindles, rollers, etc. ★ démagnétiseur → *démagnétiseur 1.* R размагничивающий электромагнит. D Entmagnetisierungsdrossel. E desmagnetizador. I smagnetizzatore. N ontmagnetiseerapparaat. P rozmagneśnica. S avmagnetiserare. (806)

demand

1. **annual, quarterly, monthly, weekly daily, maximum demand** : the highest value of the hourly (half-hourly) (quarter-hourly) (*n*-minute) demand, recorded within a year (quarter) (month) (week) (day). ★ puissance maximale annuelle, trimestrielle, mensuelle, hebdomadaire, quotidienne → *puissance 124.* R годовая (квартальная, месячная, недельная, суточная) максимальная мощность. D Jahres-, Vierteljahres-, Monats-, Wochen-, Tages-Höchstleistung. E potencia máxima anual (trimestral)(mensual)(semanal)(diaria). I potenza massima annua, trimestrale, mensile, settimanale, giornaliera. N maximaal jaar- kwartaal- maand- week- dag- vermogen. P moc maksymalna roczna, kwartalna, miesięczna, tygodniowa, dobowa. S maximieffekt per år, kvartal, månad, vecka, dag. (691)
2. **authorized maximum demand** : the maximum demand, requested in advance by the consumer and authorized by the supply undertaking under the terms of an agreement, for which supply capacity is made available. *Note.* — An automatic switch may prevent the consumer from exceeding the limit of his authorized maximum demand. ★ puissance mise à disposition → *puissance 133.* R разрешенная максимальная мощность. D bereitgestellte Leistung. E potencia puesta a disposición. I potenza a disposizione. N beschikbaar gesteld vermogen. P moc przydzielona. S abonnerad maximieffekt. (691)
3. **chargeable demand** : the demand taken into account for calculating the charges to be billed. ★ puissance de facturation → *puissance 87.* R оплачиваемая мощность. D Verrechnungsleistung. E potencia de facturación. I potenza da fatturare. N berekend vermogen. P moc obrachunkowa. S debiteringseffekt. (691)
4. **demand** : the magnitude of an electricity supply, expressed in kilowatts or kilovoltamperes. ★ puissance → *puissance 51.* R мощность. D Leistung. E potencia. I potenza. N vermogen. P moc. S effekt. (691)
5. **demand assignment** : → *assignment 1*
6. **demand charge** : → *charge 24*
7. **demand factor** : → *factor 40*
8. **demand integration period** : → *integration 1*
9. **demand rate** : → *rate 20*
10. **demand set up** : the demand that the consumer has used within a specified period. ★ puissance appelée → *puissance 66.* R обеспеченная мощность. D in Anspruch genommene Leistung. E potencia absorbida. I potenza prelevata. N afgenomen vermogen. P moc gwarantowana. S uttagen effekt. (691)
11. **demand tariff** : → *tariff 6*
12. **demand-related cost** : → *cost 10*
13. **effective demand** : the magnitude of the demand set up by a consumer, consumer class, or type of load, at the time of peak demand on the supply system or during a given potential peak demand period. *Note.* — In using this term, it is necessary to specify to which level of the system it relates. ★ puissance à la pointe de charge → *puissance 53.* R участие в пике. D Höchstlastanteil. E potencia en el momento de la punta de carga. I carico partecipante alla punta. N aandeel in de maximale belasting. P współczynnik udziału w obciążeniu szczytowym. S spetsdelaktighet. (691)
14. **effective demand factor** : → *factor 62*
15. **hidden demand** (*Syn.* suppressed traffic) : → *traffic 21*
16. **hourly, half-hourly, quarter hourly, *n* minute etc... demand** : the average demand taken over a time interval of one hour (half an hour) (quarter of an hour) (*n*-minutes) etc. defined within the tariff and designated as the demand integration period. ★ puissance horaire demi-horaire, quart-horaire, de *n* minutes etc... → *puissance 117.* R часовая (получасовая, четверть-часовая, *n*-минутная и т. д.) мощность. D Stunden- Halbstunden- Viertelstunden-*n*-Minuten- Leistung. E potencia horaria (semi-horaria)(por cuarto de hora)(de *n* minutos) etc. I potenza oraria di mezz'ora di un quarto d'ora di *n* minuti ecc. N uur- halfuur- kwartier- *n*-minuten- vermogen. P moc godzinowa półgodzinowa, 15-minutowa itp. S tim- halvtimmes- kvartstimmes- effekt. (691)
17. **maximum demand required** : the limiting value of the demand requested by the consumer. ★ puissance maximale demandée → *puissance 127.* R заявленная максимальная мощность. D angeforderte Leistung. E potencia máxima solicitada. I potenza massima richiesta. N maximaal verlangd vermogen. P moc zapotrzebowana. S begärd maximieffekt. (691)
18. **meter with maximum demand indicator** : → *meter 33*
19. **minimum demand** : the demand, fixed by agreement or specified in the tariff, for which the consumer is obliged to pay whether that demand has been completely used or not. ★ puissance minimale facturée → *puissance 132.* R минимальная нагрузка. D Mindestleistung. E potencia mínima facturada. I potenza minima fatturata. N overeengekomen minimumvermogen. P moc zamówiona minimalna. S avgiftsbestämmande minimieffekt. (691)
20. **power demand from the system** : the power which has to be supplied to the system in order to meet the demand. ★ puissance appelée par le réseau → *puissance 67.* R нагрузка энергосистемы требуемая. D angeforderte Leistung. E potencia pedida por la red. I potenza richiesta dalla rete. N door het net gevraagd vermogen. P zapotrzebowanie mocy. S effektbehov. (602)
21. **subscribed demand** : the demand, fixed by agreement, that the consumer may not exceed except according to the specific conditions of the tariff. *Note.* — An automatic switch may prevent the consumer from exceeding the limit of his subscribed demand. ★ puissance souscrite → *puissance 153.* R заявленная мощность. D bestellte Leistung. E potencia suscrita; potencia contractual. I potenza impegnata; potenza contrattuale. N gecontracteerd vermogen. P moc zamówiona. S abonnerad effekt. (691)
22. **system demand control** : → *control 186*
23. **transmission on demand** : → *transmission 99*

demister

1. **demister** : a device to dispel mist from the windows of a driver's cab. ★ antibuée → *antibuée 1.* R устройство против запотевания стекол. D Scheibenklaranlage. E antivaho. I dispositivo antiappannamento. N ontwasemer. P odparowywacz szyby. S ..... (811)

democratic

1. **democratic mutually synchronized network** : → *network 19*

demodulation

1. **amplitude demodulation** : demodulation applicable to a modulated signal produced by amplitude modulation. ★ démodulation d'amplitude → *démodulation 3.* R амплитудная демодуляция. D Amplitudendemodulation. E demodulación de amplitud. I demodulazione di ampiezza. N amplitudedemodulatie. P demodulacja amplitudy. S amplituddemodulering. (702)
2. **coherent demodulation** (*Syn.* synchronous demodulation) : amplitude demodulation performed by combining the modulated signal with a sinusoidal oscillation having the same frequency and phase as the carrier component. ★ démodulation cohérente → *démodulation 2.* R когерентная демодуляция. D kohärente Demodulation; Synchrondemodulation. E demodulación coherente; demodulación síncrona. I demodulazione coerente. N coherente demodulatie; synchrone demodulatie. P demodulacja spójna. S koherent demodulering. (702)
3. **demodulation** : the process of recovering the original modulating signal from a modulated signal. ★ démodulation → *démodulation 1.* R демодуляция. D Demodulation. E demodulación. I demodulazione. N demodulatie. P demodulacja. S demodulering. (702)
4. **envelope demodulation** (*Syn.* linear demodulation) : → *demodulation 6*
5. **frequency demodulation** : demodulation applicable to a modulated signal produced by frequency modulation. ★ démodulation de fréquence → *démodulation 4.* R частотная демодуляция. D Frequenzdemodulation. E demodulación de frecuencia. I demodulazione di frequenza. N frequentiedemodulatie. P demodulacja częstotliwości. S frekvensdemodulering. (702)
6. **linear demodulation** (*Syn.* envelope demodulation) : amplitude demodulation which produces an output signal proportional to the instantaneous values of the envelope of the modulated signal. ★ démodulation d'enveloppe → *démodulation 6.* R линейная демодуляция. D lineare Demodulation; Umhüllungsdemodulation. E demodulación de envolvente; demodulación lineal. I demodulazione di inviluppo. N lineaire demodulatie. P demodulacja linearna. S linjär demodulering. (702)
7. **phase demodulation** : demodulation applicable to a modulated signal produced by phase modulation. ★ démodulation de phase → *démodulation 5.* R фазовая демодуляция. D Phasendemodulation. E demodulación de fase. I demodulazione di fase. N fasedemodulatie. P demodulacja fazy. S fasdemodulering. (702)
8. **synchronous demodulation** (*Syn.* coherent demodulation) : → *demodulation 2*

demodulator

1. **demodulator** : a device for recovering the original modulating signal from an oscillation or wave produced by modulation. *Examples* of demodulators : amplitude demodulator ; linear demodulator or envelope demodulator ; frequency demodulator ; phase demodulator ; pulse demodulator ; coherent demodulator or synchronous demodulator. ★ démodulateur → *démodulateur 1.* R демодулятор. D Demodulator. E demodulador. I demodulatore. N demodulator. P demodulator. S demodulator. (702)
2. **Nyquist demodulator** : equipment for recovering the modulating signal from a carrier modulated by a vision signal and having a selectivity curve identical to that of an ideal receiver with the standard Nyquist slope bandwidth for the television system concerned. ★ démodulateur à talon → *démodulateur 3.* R демодулятор Найквиста. (723)
3. **telegraph demodulator** : a demodulator controlled by a telegraph signal. ★ démodulateur télégraphique → *démodulateur 4.* R телеграфный демодулятор. D Telegrafendemodulator. E demodulador telegráfico. I demodulatore telegrafico. N telegraafdemodulator. P demodulator telegraficzny. S telegrafdemodulator. (721)
4. **television demodulator** (*Syn.* video tuner) : → *demodulator 5*
5. **video tuner** (*Syn.* television demodulator; video demodulator) : a radio receiver designed to reproduce as an electrical signal the visual part of a television programme. *Note.* — This is often associated with a television sound tuner which produces a high quality low-level audio output. ★ récepteur vidéofréquence → *récepteur 33.* R видеотюнер; телевизионный демодулятор; видеодемодулятор. (723)

demonstration

1. **maintainability demonstration** : a maintainability verification performed as a compliance test. ★ vérification expérimentale de maintenabilité → *vérification 5.* R опытная проверка ремонтопригодности. D Instandhaltbarkeitsnachweisprüfung. E demostración de la mantenibilidad. I dimostrazione della manutenibilità. N onderhoudbaarheidsverificatieproef. P próba obsługiwalności. S demonstration av underhållsmässighet. (191)

demultiplexer

1. **demultiplexer** : an equipment for effecting demultiplexing. ★ démultiplexeur → *démultiplexeur 1.* R демультиплексор. D Demultiplexer. E desmultiplexor. I demultiplatore. N demultiplexer. P krotnica odbiorcza; demultiplekser. S demultiplexor. (704,721)
2. **digital demultiplexer** : equipment for separating, by time division demultiplexing, a composite digital signal into its component tributary digital signals. *Note.* — A digital demultiplexer may be qualified by the digit rate or the multiplex order of the composite digital signal. ★ démultiplexeur numérique → *démultiplexeur 2.* R цифровой демультиплексор. D Digitaldemultiplexer. E desmultiplexor numérico. I demultiplatore numerico. N digitaaldemultiplexer. P krotnica cyfrowa odbiorcza; demultiplekser cyfrowy. S digitaldemultiplexor. (704)

demultiplexing

1. **demultiplexing** : a process applied to a composite signal formed by multiplexing, for recovering the original independent signals, or groups of these signals. *Note.* — Demultiplexing may be partial, for instance for extracting a group from a supergroup. ★ démultiplexage → *démultiplexage 1.* R разделение (демультиплексирование). D Entmultiplexen ; demultiplexen. E desmultiplaje; desmultiplexado. I ..... N demultiplexen. P składowa widma o częstotliwości nośnej. S demultiplexering. (701,704,721)

dendrite

1. **dendrite** : a needle or branching, tree-like formation of crystalline growth formed during electrochemical deposition. ★ dendrite → *dendrite 1.* R дендрит. D Dendrit. E dendrita. I dendrite. N dendriet. P dendryt. S utväxt. (111)

densitometer

1. **densitometer** : photometer for measuring reflectance or transmittance optical density. ★ densitomètre → *densitomètre 1.* R денсиметр. D Densitometer. E densitómetro. I densitometro. N densitometer. P densytometr. S densitetsmätare. (845,881)

density

1. **apparent power (mass) density** (*Syn.* specific apparent power) : in a uniformly magnetized material, the apparent power transferred to a given mass, divided by that mass. ★ puissance apparente massique → *puissance 62.* R кажущаяся плотность мощности (по массе); удельная кажущаяся мощность. D Scheinleistungsdichte (massebezogen); spezifische Scheinleistung. E potencia aparente por unidad de masa. I potenza apparente massica. N (massa)dichtheid van het schijnbare vermogen. P moc pozorna na jednostkę masy. S massrelaterad magnetiseringseffekt. (221)
2. **apparent power (volume) density** : in a uniformly magnetized material, the apparent power transferred to a given volume, divided by that volume. ★ puissance apparente volumique → *puissance 65.* R кажущаяся плотность мощности (по объему). D Scheinleistungsdichte (volumenbezogen). E potencia aparente por unidad de volumen. I potenza apparente volumica. N volumedichtheid van het schijnbare vermogen. P moc pozorna na jednostkę objętości. S volymrelaterad magnetiseringseffekt. (221)
3. **back-scatter density meter** : → *meter 9*
4. **bit energy to noise spectral density ratio** : → *ratio 10*

5. **density meter** : → *meter 17*
6. **density modulation** : → *modulation 15*
7. **electron density** (*Syn.* electron concentration) : the number of free electrons within a given element of space in an ionized medium or a plasma divided by the volume of this element. ★ densité électronique → *densité 9.* D Elektronendichte; Elektronenkonzentration. P gęstość elektronów; koncentracja elektronów. (705)
8. **electron density profile** (*Syn.* ionization profile) : → *profile 5*
9. **electron-gun density multiplication** (*Syn.* beam-compression factor) : → *beam-compression 1*
10. **energy spectral density** : the distribution as a function of frequency of the energy of a signal, or a noise, having a continuous spectrum and finite total energy. *Notes. 1* — The total energy of a signal or noise is by convention proportional to the time integral of the square of its instantaneous value. This integral is proportional to a physical energy if the characteristic quantity is a field quantity. *2* — The energy spectral density of a deterministic signal exists if its representative time function is integrable square. It is equal to the squared modulus of the Fourier transform of a signal and also equals the Fourier transform of the autocorrelation function of the signal. ★ densité spectrale d'énergie → *densité 28.* R спектральная плотность энергии. D Energiedichtespektrum. E densidad espectral de energía. I densità spettrale di energia. N energiespectrumdichtheid. P gęstość energii widmowa. S spektral energitäthet. (702)
11. **instantaneous kinetic sound energy density** : half the product of the density of the medium by the square of the velocity of a particle in the said medium. ★ énergie volumique cinétique acoustique instantanée → *énergie 60.* R мгновенная плотность кинетической энергии звука. D Augenblickswert der kinetischen Schallenenergiedichte. E densidad de energía acústica cintica instantanea. I energia acustica volumica cinetica. N momentane kinetische geluid(s)energiedichtheid. P gęstość energii akustycznej kinetycznej. S momentanvarde av hastighetstäthet. (801)
12. **instantaneous potential sound energy density** : half the quotient of the square of the instantaneous sound pressure by the modulus of elasticity of the medium. ★ énergie volumique potentielle acoustique instantanée → *énergie 61.* R мгновенная плотность потенциальной энергии звука. D Augenblickswert der potentiellen Schallenenergiedichte. E densidad de energía acústica potencial instantánea. I energia acustica volumica potentiale. N momentane potentiële geluid(s)energiedichtheid. P gęstość energii akustycznej potencjalnej. S momentanvärde av potentiell ljudenergitäthet. (801)
13. **ion density** : the number of positive or negative ions in an element of volume, divided by the volume of that element. ★ densité d'ionisation → *densité 8.* R плотность ионизации. D Ionendichte. E densidad de ionización. I densità ionica. N ionendichtheid. P gęstość jonizacji. S jontäthet. (881)
14. **linear ion density** : number of ion pairs per unit length. ★ nombre linéique de paires d'ions → *nombre 13.* R линейная плотность ионов. D Ionendichte. E densidad lineal de pares de iones. I numero lineico di coppia di ioni. N lineïeke ionendichtheid; ionendichtheid. P linearna gęstość jonów. S jontäthet. (391)
15. **load density** : the quotient of load and area of the zone geographically accessible to a given distribution network. ★ densité de charge → *densité 2.* R плотность нагрузки. D Lastdichte. E densidad de carga. I densità di carico. N belastingsdichtheid. P gęstość obciążenia. S belastningstäthet. (603)
16. **Napierian spectral internal transmittance density** (of a homogeneous non-diffusing layer) (*Syn.* Napierian spectral absorbance) ($A_n(\lambda)$; $B(\lambda)$) : natural (Napierian) logarithm of the reciprocal of the spectral internal transmittance.

$$A_n(\lambda) = B(\lambda) = -\ln \tau_i(\lambda)$$

★ densité optique interne spectrale népérienne par transmission → *densité 16.* R плотность натурального спектрального коэффициента внутреннего пропускания; натуральная спектральная поглощательная способность. D spektrales natürliches Absorptionsmaß (einer homogenen, nicht streuenden Schicht). E densidad de transmitancia interna neperiana espectral. I densità ottica spettrale neperiana per trasmissione interna. N Naperiaanse inwendige spectrale optische dichtheid. P ..... S ..... (845)
17. **neutron (number) density** : the number of free neutrons per unit volume. Partial densities may be defined for neutrons characterized by such parameters as energy and direction. ★ nombre volumique de neutrons → *nombre 21.* D Neutronendichte. E densidad neutrónica. I densità neutronica. N neutronendichtheid. P całkowita gęstość neutronów. S neutrontäthet. (026)
18. **(optical) density** (of a film) : the logarithm to the base 10 of the opacity of an exposed and procesed film. ★ densité optique → *densité 15.* R плотность (оптическая). D optische Dichte (eines Filmes). E densidad óptica (de una película). I densità (ottica) (di una pellicola); annerimento (di una pellicola). N (optische) dichtheid (van een film). P gęstość optyczna (błony). S svärtning. (881)
19. **power spectral density** (*Syn.* power spectrum density) : the distribution as a function of frequency of the power per unit bandwidth of the spectral components of a signal or a noise having a continuous spectrum and a finite mean power. *Notes. 1* — The instantaneous power of a signal or a noise is by convention equal to the square of its instantaneous value. This square is proportional to a physical power if the characteristic quantity is a field quantity. *2* — The power spectral density is the Fourier transform of the autocorrelation function of the signal or noise. The autocorrelation function of a deterministic signal exists if the signal has a finite mean power. The autocorrelation function of a random signal or random noise exists if it is represented by a second order random stationary function. ★ densité spectrale de puissance → *densité 25.* R спектральная плотность мощности. D Leistungsdichtespektrum; Leistungsspektraldichte. E densidad espectral de potencia; potencia específica. I densità spettrale di potenza. N vermogensspectrumdichtheid. P gęstość mocy widmowa. S spektral effekttäthet. (702)
20. **power spectral density** (*Syn.* power spectrum density) : limit, as the bandwidth approaches zero, of sound power divided by bandwidth. ★ densité spectrale de puissance → *densité 26.* R спектральная плотность мощности. D spektrale Schalleistungsdichte. E densidad espectral de potencia. I densità spettrale di potenza. N spectrale vermogensdichtheid. P gęstość widmowa mocy akustycznej. S spektral effekttäthet. (801)
21. **power spectral density of fractional frequency deviations** : the r.m.s. value of the random fluctuations of the frequency. *Note.* — This quantity is the preferred frequency domain measure of short-term stability. ★ densité spectrale énergétique des écarts relatifs de la fréquence → *densité 29.* R спектральная плотность мощности относительных уходов частоты. D spektrale Leistungsdichte der relativen Frequenzabweichungen. E densidad espectral energética de las desviaciones relativas de la frecuencia. I densità spettrale energetica degli scarti relativi della frequenza. N spectrale dichtheid van kleine frequentievariaties. P gęstość widmowa względnych fluktuacji częstotliwości. S frekvensjitter. (561)
22. **power spectrum density** (*Syn.* power spectral density) : → *density 19*
23. **power spectrum density** (*Syn.* power spectral density) : → *density 20*
24. **probability density** : the derivative of the probability distribution. ★ densité de probabilité → *densité 4.* R плотность вероятности. D Wahrscheinlichkeitsdichte. E densidad de probabilidad. I densità di probabilità. N waarschijnlijkheidsdichtheid. P gęstość prawdobodobieństwa. S sannolikhetstäthet. (101)
25. **reflectance density** : the logarithm to base 10 of the reciprocal of the reflectance. ★ densité optique par réflexion → *densité 18.* R плотность коэффициента отражения. D Rückstrahldichte. E densidad de reflectancia. I densità di riflettanza. N (reflectie-)zwartheid. P gęstość współczynnika odbicia. S reflektanstal. (731)
26. **reflectance factor (optical) density** (D_R) : logarithm to base ten of the reciprocal of the reflectance factor. $D_R = -\log_{10} R$. ★ ..... → . R оптическая плотность по фактору коэффициента отражения. D optische Dichte für den Reflexionsfaktor. E densidad (óptica) de factor de reflectancia. I ..... N bundelreflectiefactor. P ..... S reflektansfaktortal. (845)
27. **reflectance (optical) density** (D_ρ) : logarithm to base ten of the reciprocal of the reflectance. $D_\rho = -\log_{10} \rho$. ★ densité

optique par réflexion → *densité 19.* R оптическая плотность по отражению. D optische Dichte bei Reflexion. E densidad (óptica) de reflectancia. I densità ottica per riflessione. N (reflectie)zwartheid. P gęstość (optyczna) współczynnika odbicia. S reflektanstal. (845)

28. **saturation magnetization (mass) density** (*Syn.* specific saturation magnetization) (σ) : the saturation magnetization divided by the mass density. ★ densité d'aimantation à saturation → *densité 1.* R плотоность намагниченности насыщения (по массе); удельная намагниченность насыщения. D dichteberozene Sättigungsmagnetisierung. E densidad de magnetización de saturación; magnetización de saturación especifica. I magnetizzazione volumica a saturazione. N specifieke verzadigingsmagnetisatie. P magnetyzacja nasycenia właściwa. S massrelaterad mättningsmagnetisering. (221)

29. **scanning density** : the number of scanning lines per unit length. *Note.* — The scanning density is the reciprocal of the scanning pitch. ★ finesse d'exploration → *finesse 3.* R четкость развертки. D Abtastdichte; Schreibdichte. E finura de exploración. I densità di scansionamento. N scheidend vermogen bij het aftasten. P gęstość rozwinięcia. S linjetäthet. (721)

30. **sound energy density** (*Syn.* total energy density) : sum of instantaneous potential and kinetic energy densities. ★ énergie volumique acoustique → *énergie 59.* R плотность звуковой энергии; полная плотность энергии. D Schallenergiedichte. E densidad de energía acústica; densidad de energía total. I densità di energia. N geluid(s)energiedichtheid. P gęstość energii akustycznej. S ljudenergitathet. (801)

31. **sound power density** (*Syn.* sound intensity; sound energy flux density) : sound energy flux in a specified direction and sense through an area perpendicular to that direction, divided by the area. ★ intensité acoustique → *intensité 4.* R плотность звуковой мощности; интенсивность звука; плотность протока звуковой энергии. D Schallintensität. E intensidad acústica; potencia acústica media superficial. I intensità acustica; intensità sonora. N geluid(s)intensiteit. P natężenie akustyczne; natężenie dźwięku. S ljudintensitet. (801)

32. **spectral density** (*Syn.* spectrum density) : limit, as the bandwidth approaches zero, of the mean square value of a field quantity divided by bandwidth. The kind of field quantity must be specified, such as sound pressure, instantaneous particle velocity, instantaneous particle acceleration. ★ densité spectrale → *densité 22.* R спектральная плотность. D spektrale Dichte. E densidad espectral. I densità spettrale. N spectrale dichtheid. P gęstość widmowa. S spektraltäthet. (801)

33. **spectral internal transmittance density** (of a homogeneous non-diffusing layer) (*Syn.* spectral absorbance) ($A_i(\lambda)$) : logarithm to base ten of the reciprocal of the spectral internal transmittance.

$$A_i(\lambda) = -\log_{10} \tau_i(\lambda)$$

Note. — The symbol $E(\lambda)$ is still in use. ★ densité optique interne spectrale par transmission → *densité 17.* R плотность спектрального коэффициента внутреннего пропускания (однородного нерассеивающего слоя); спектральная поглощательная способность. D spektrales dekadisches Absorptionsmaß (einer homogenen, nicht steuenden Schicht); dekadische Extinktion. E densidad de transmitancia interna espectral. I densità ottica spettrale per trasmissione interna. N inwendige spectrale optische dichtheid. P ..... S absorbans. (845)

34. **spectrum density** (*Syn.* spectral density) : → *density 32*

35. **spectrum density level** : → *level 92*

36. **(telephone) line density** (*Syn.* (telephone) penetration) : the number of main telephone stations or main exchange lines relative to a characteristic element such as number of inhabitants, number of households, business premises, area units, income groups, etc., used generally for planning purposes. ★ densité de lignes (téléphoniques) principales → *densité 3.* R плотность (телефонных) линий. D Hauptanschlußdichte. E densidad de líneas (telefónicas) principales; grado de penetración (telefónica). I densità telefonica. N telefoondichtheid. P gęstość łączy głównych. S telefontäthet. (722)

37. **total energy density** (*Syn.* sound energy density) : → *density 30*

38. **total loss (mass) density** (*Syn.* specific total loss) : in a uniformly magnetized material, the total power absorbed in a given mass, divided by that mass. ★ pertes totales massiques → *perte 67.* R общая плотность потерь (по массе); удельные полные магнитные потери. D Ummagnetisierungsverlust; spezifische Gesamtverluste. E pérdidas totales por unidad de masa. I perdite totali massiche. N (massa)dichtheid van de totale verliezen. P straty całkowite na jednostkę masy. S massrelaterad ommagnetiseringsförlust. (221)

39. **total loss (volume) density** : in a uniformly magnetized material, the total power absorbed in a given volume, divided by that volume. ★ pertes totales volumiques → *perte 68.* R общая плотность потерь (по объему). D Gesamtverlustdichte (volumenbezogen). E pérdidas totales por unidad de volumen. I perdite totali volumiche. N volumedichtheid van de totale verliezen. P straty całkowite na jednostkę objętości. S volymrelaterad ommagnetiseringsförlust. (221)

40. **transmission density meter** : → *meter 66*

41. **transmittance density** : the logarithm to base 10 of the reciprocal of the transmittance. ★ densité optique par transmission → *densité 20.* R плотность коэффициента пропускания. D Übertragungsdichte. E densidad de transmitancia. I densità di trasmittanza. N optische dichtheid, zwarting. P gęstość współczynnika przepuszczania. S transmittanstal. (731)

42. **transmittance (optical) density** (D_τ) : logarithm to base ten of the reciprocal of the transmittance. $D_\tau = -\log_{10}\tau$. ★ densité optique par transmission → *densité 21.* R оптическая плотность по пропусканию. D optische Dichte bei Transmission. E densidad (óptica) de transmitancia. I densità ottica per trasmissione. N optische dichtheid; zwarting. P gęstość (optyczna) współczynnika przepuszczania. S transmittanstal. (845)

43. **(volume) density of electromagnetic energy** : the electromagnetic energy contained within a given element of space divided by the volume of the element. *Note.* — Only the variations of energy contained within a volume can be practically determined. ★ énergie (électromagnétique) volumique → *énergie 46.* D (räumliche) elektromagnetische Energiedichte. P gęstość energii elektromagnetycznej. (121,705)

44. **volume ion density** : number of ion pairs per unit volume. ★ nombre volumique de paires d'ions → *nombre 22.* R объемная плотность ионов. D Ionendichte. E densidad volúmica de pares de iones. I numero volumico di coppia di ioni. N volumieke areïeke ionendichtheid; ionendichtheid. P objętościowa gęstość jonów. S jontäthet. (391)

department

1. **X-ray department** : a department or laboratory forming part of a larger organization such as hospital, clinic, institute... comprising one or several X-ray rooms, the associated offices, processing rooms, etc., as well as the personnel employed therein. ★ service radiologique → *service 57.* R рентгеновское отделение. D Röntgenabteilung. E departamento de rayos X. I reparto di radiologia. N röntgenafdeling. P oddział rentgenowski. S röntgenavdelning. (881)

departure

1. **frequency departure** : an unintentional frequency deviation from a stated frequency. ★ écart de fréquence → *écart 6.* R отклонение частоты. D Frequenzabweichung. E desviación de frecuencia; separación de frecuencia. I scarto di frequenza. N frequentieafwijking. P odchylenie częstotliwości. S frekvensavvikelse. (702)

dependability

1. **dependability** : the collective term used to describe the availability performance and its influencing factors : reliability performance, maintainability performance and maintenance support performance. *Note.* — Dependability is used only for general descriptions in non-quantitative terms. ★ sûreté de fonctionnement → *sûreté 3.* R надежность. D Zuverlässigkeit. E seguridad de funcionamiento. I fidatezza. N tijdsafhankelijkheid. P pewność działania. S tillförlitlighet. (191)

dependence

1. **energy dependence** : the change in the response of a physical or biological system with a change in the energy of radiation. ★ dépendance de l'énergie → *dépendance 1.* R энергетическая зависимость. D Energieabhängigkeit. E dependencia de la energía. I diendenza dall'energia. N energie-afhankelijkheid. P zależność energetyczna. S energiberoende. (881)

dependent

1. **dependent circulating circuit component** : → *circulating circuit 1*
2. **dependent manual operation** : → *operation 21*
3. **dependent power operation** : → *operation 22*
4. **dependent (repeater) station** : → *station 8*
5. **electro-dynamic braking dependent on line supply** : → *braking 27*

dependent-time

1. **dependent-time measuring relay** : → *relay 7*

dephasing

1. **elementary dephasing of sound propagation** : imaginary part of the elementary exponent of sound propagation. ★ déphasage élémentaire de propagation acoustique → *déphasage 9.* R сдвиг фазы при распространении звука (элементарный). D elementbezogener Phasenkoeffizient. E desfase elemental de propagación acústica. I sfasamento lineico; sfasamento specifico. N ..... P przesuwność falowa akustyczna elementarna. S ..... (801)

depleted

1. **depleted material** : → *material 11*
2. **totally depleted semiconductor detector** : → *semiconductor detector 11*

depletion

1. **depletion** : reduction of the concentration of one or more specified isotopes in a material or in one of its constituents. ★ appauvrissement → *appauvrissement 1.* D Verarmung. E empobrecimiento; agotamiento. I impoverimento. N verarming. P zubożenie. S utarmning. (026)
2. **depletion layer** : → *layer 5*
3. **depletion layer** : → *layer 6*
4. **depletion type field-effect transistor** : → *transistor 3*
5. **total depletion voltage** : → *voltage 211*

depolarization

1. **depolarization** : a phenomenon by virtue of which all or part of the power of a radio wave transmitted with a defined polarization, no longer has any defined polarization after propagation. *Note.* — The term "depolarization" is sometimes used to designate the change from a defined polarization to another defined polarization. ★ dépolarisation → *dépolarisation 2.* D Depolarisation. P depolaryzacja. (705)
2. **depolarization current** : → *current 66*

deposit

1. **active deposit** : any radioelement deposited on surface. ★ dépôt actif → *dépôt 3.* D aktiver Niederschlag. E poso radiactivo. I deposito attivo. N actieve neerslag. P osad promieniotwórczy. S aktiv beläggning. (026)

deposition

1. **chemical vapour deposition technique** : → *technique 4*
2. **vapour phase axial deposition technique** : → *technique 17*

depressant

1. **pour point depressant** : an additive that enables the pour point of a mineral insulating oil to be lowered. ★ améliorant de point d'écoulement → *améliorant 1.* R депрессантная присадка, понижающая температуру застывания масла. D Pourpoint-Erniedriger. E depresor del punto de congelación. I abbassatore del punto di scorrimento. N vloeipuntverlagend middel. P obniżacz temperatury krzepnięcia. S flytpunktssänkare. (212)

depressed

1. **depressed cladding** : → *cladding 12*
2. **depressed or "on" position** : → *position 5*

depression

1. **voltage depression** (*Syn.* voltage collapse) : → *collapse 1*

depth

1. **depth dose** : → *dose 13*
2. **depth of penetration** : the thickness of an imaginary surface layer, assumed to carry throughout its cross section a direct uniform current of the same value as the r.m.s. value of the actual current, of the same material as the conductor, and dissipating through Joule effect the same heat per unit of external surface. *Note.* — The German definition, although using different terms, is practically equivalent to the French, English and Russian definitions. ★ profondeur de pénétration → *profondeur 4.* R глубина проникновения тока. D Eindringtiefe. E profundidad de penetración. I profondità di penetrazione. N indringdiepte. P głębokość wnikania. S inträngningsdjup. (841)
3. **electron penetration depth** : the depth of material within which the electron kinetic energy is converted to heat energy. *Note.* — Heat penetration within the workpiece is less when the beam passes through atmosphere than when through vacuum. ★ profondeur de pénétration d'un faisceau électronique → *profondeur 5.* R глубина проникновения электронов. D Elektroneneindringtiefe. E profundidad de penetración de un haz electrónico. I profondità di penetrazione di un fascio elettronico. N indringdiepte van elektronen. P głębokość wnikania elektronów. S inträngningsdjup (för elektronstråle). (841)
4. **fading depth** : the ratio, generally expressed in decibels, of a reference value to the magnitude of the electromagnetic field or signal power during fading. *Note.* — The reference value may be pre-determined, for example the free space value, or determined statistically over a sufficiently long time period, for example a median, mean or percentile value. ★ profondeur d'évanouissement → *profondeur 7.* D Schwundtiefe. P głębokość zaniku. (705)
5. **gap depth** : the dimension of the magnetic gap perpendicular to the plane of the tape movement. ★ profondeur d'entrefer → *profondeur 6.* R глубина рабочего зазора. D Spalttiefe. E profundidad de entrehierro. I altezza di traferro. N spleetdiepte. P głębokość szczeliny. S spaltdjup. (806)
6. **groove depth** : the perpendicular distance from the disk surface to the groove bottom. ★ profondeur du sillon → *profondeur 8.* R глубина канавки. D Rillentiefe. E profundidad del surco. I profondità del solco. N groefdiepte. P głębokość rowka. S spårdjup. (806)
7. **half value depth** (tissue) : the depth in tissue at which the absorbed dose is 50 per cent of the surface dose, for specified radiation quality, source-surface distance, and exposed surface area. ★ couche de demi-atténuation → *couche 13.* R глубинный слой половинного ослабления (ткани). D Halbwertstiefe (im Gewebe). E espesor de semirreduccion (de un tejido). I profondità emivalente (in tessuto). N halveringsdiepte. P warstwa połówkowa (tkanki). S halvvärdesdjup. (881)
8. **penetration depth** (*Syn.* skin depth) : for a homogeneous isotropic medium of substantially infinite thickness limited by a plane surface, the depth at which the electric field of a sinusoidal uniform plane wave penetrating the medium and propagating normally to its surface is attenuated in the ratio 1/e. *Note.* — The penetration depth expressed in metres is equal to the reciprocal of the attenuation coefficient, expressed in neper per metre, in the medium that the wave penetrates. ★ profondeur de pénétration → *profondeur 3.* D Eindringtiefe. P głębokość przenikania; głębokość naskórkowości. (705,726)
9. **percentage depth dose** : → *dose 39*
10. **skin depth** (*Syn.* penetration depth) : → *depth 8*
11. **spectral optical depth** (*Syn.* spectral optical thickness) : → *thickness 7*
12. **throat depth** : the usable distance, in a resistance welding machine, from the axis of the electrodes or the axis of the platens or the centre of the wheel contact line to the nearest point of obstruction to the workpieces. ★ longueur utile des bras → *longueur 23.* R вылет. D Ausladung. E longitud útil de los brazos (de una máquina de soldar). I profondita di gola.

N nuttige armlengte. P wysięg użyteczny ramion zgrzewarki. S gapdjup; tångdjup. (851)

13. **variable groove depth** : a groove, the average depth of which varies in relation to the lateral and/or vertical amplitude of the modulation. ★ sillon à profondeur variable → *sillon 14.* R канавка переменной глубины. D Rille mit variabler Tiefe. E surco de profundidad variable. I solco con profondità variabile. N variabele groefdiepte. P rowek o zmiennej głębokości. S variabelt spårdjup. (806)

Déri

1. **Déri motor** : → *motor 21*

derivation

1. **derivation action** : → *action 5*

derivative-action

1. **derivative-action coefficient** : → *coefficient 15*
2. **derivative-action time constant** : → *time constant 2*
3. **second derivative action** (*Syn.* D2-action) : type of continuous action in which the value of the output variable is at all times proportional to the second time derivative of the input variable (i.e., in the case of a controller, of the system deviation). ★ action par double dérivation → *action 13.* R воздействие по второй производной; Д2-воздействие. D differenzierendes Verhalten zweiter Ordnung. E acción derivada segunda; acción D_2. I azione derivativa seconda D_2. N tweede differentiërende werking; D_2-actie. P działanie różniczkujące drugiego rzędu; działanie D_2. S andraderivataverkan; D_2-verkan. (351)

derived

1. **derived air concentration** : → *concentration 4*
2. **derived channel** : → *channel 22*
3. **derived limit** : → *limit 4*
4. **derived quantity** : → *quantity 6*
5. **derived unit** : → *unit 18*
6. **SI derived unit** : → *unit 55*

descending

1. **descending node** : → *node 2*

descrambler

1. **descrambler** (in digital transmission) : a device for processing a scrambled signal in order to restore the original signal. *Note.* — The associated verb is "to descramble". ★ désembrouilleur → *désembrouilleur 1.* R дескремблер (в цифровой передаче). D Descrambler (in digitaler Nachrichtenübertragung). E desescamoteamiento (en transmisión digital). I descrambler (in una trasmissione numerica). N ontsleutelschakeling (bij digitale transmissie). P odtwarzacz (w transmisji cyfrowej). S dekrypterare. (704)

describing

1. **describing function** : → *function 10*

desensitization

1. **desensitization** : a reduction of the wanted output of a receiver due to an unwanted signal. ★ désensibilisation → *désensibilisation 1.* R понижение чувствительности. D Desensibilisierung. E desensibilización. I desensibilizzazione. N ongevoeliger maken. P znieczulenie. S känslighetsnedsättning. (161)

deserializer

1. **deserializer** (*Syn.* serial-to-parallel converter) : → *converter 15*

Desieter

1. **Desieter telegraph translation** : → *translation 1*

design

1. **design current** : → *current 67*
2. **design failure** : → *failure 12*
3. **design fault** : → *fault 10*
4. **design review** : → *review 1*
5. **ultimate design load** : → *load 90*

designation

1. **mode designation** (in a waveguide or cavity resonator) : a convention whereby a normal mode or a mode of resonance is identified by adding numerical subscripts to the abbreviations TE and TM. *Note.* — This notation strictly applies only to modes in structures which can be expressed in a simple way in an adequate co-ordinate system. ★ désignation de mode → *désignation 1.* R обозначние типа колебаний (в волноводе или объемном резонаторе). D Moden-Bezeichnung (im Wellenleiter oder Hohlraumresonator). E designación de modo (en una guíaonda o en una cavidad). I designazione di modo (in una guida d'onda o cavità). N aanduiding van de modus. P oznaczenie radzajów pola (w falowodzie lub rezonatorze mikrofalowym). S modbeteckning. (726)

desired

1. **desired signal** (*Syn.* wanted signal) : → *signal 256*
2. **desired value** : → *value 7*

desk

1. **control desk** : a desk on which are fixed control devices which are necessary to control and/or display a substation or a system. ★ pupitre de conduite → *pupitre 1.* R щит управления. D Steuerpult. E pupitre de control. I banco di comando. N ..... P pulpit sterowniczy. S kontrollpulpet. (605)
2. **mixing desk** (*Syn.* mixing console) : desk on which all control and monitoring devices required for mixing programme signals are situated. ★ pupitre de mélange → *pupitre 2.* R пульт микширования. (723)
3. **sound control desk** (*Syn.* sound control console) : desk or console including controls for sound control, mixing and processing of sound signals and for other associated operations. ★ console de prise de son → *console 6.* R пульт управления звуком; панель управления звуком. (723)

destination

1. **destination** (of a call attempt) : the location of the called terminal point in the network. *Note.* — The destination may be specified to whatever accuracy is appropriate to the situation according to the relevant part of the address information. ★ destination → *destination 3.* D Ziel. P miejsce przeznaczenia (ruchu). (715)
2. **destination code** : → *code 26*

desynchronisation

1. **picture-sound desynchronisation** (*Syn.* picture-sound lag) : → *lag 5*

detecting

1. **detecting device** (*Syn.* sensor) : → *sensor 6*
2. **detecting instrument** : → *instrument 2*
3. **error detecting and feedback system** : → *system 65*
4. **error detecting code** : → *code 30*
5. **insulation fault detecting instrument** : → *instrument 20*
6. **(speed) detecting element** : → *element 52*

detection

1. **analogue error detection** (*Syn.* (signal) quality detection) : → *detection 13*
2. **detection** : the act of discerning the existence of oscillations, signals or waves, or their variation, usually for extracting conveyed information. ★ détection → *détection 2.* R детектирование. D Nachweis (in der Telekommunikation); Detektion. E detección. I rivelazione. N detectie. P detekcja. S detektering. (702)
3. **detection** (in acoustics) : determination of the presence of a signal. ★ détection → *détection 3.* R обнаружение (в акустике). D Wahrnehmung. E detección (acútica). I rivelazione (acustica). N detectie (via het gehoor). P detekcja (sygnału akustycznego). S detektion. (801)
4. **detection differential** : → *differential 3*
5. **detection efficiency** : → *efficiency 11*
6. **detection efficiency** : → *efficiency 12*

7. **detection threshold** : → *threshold 1*
8. **error detection** : any technique for determining the presence of erroneous elements in a received message. ★ détection d'erreurs → *détection 8.* R обнаружение ошибки. D Fehlererfassung. E detección de errores. I rivelazione di errori. N foutendetectie. P wykrywanie błędów. S felupptäckt. (702)
9. **error detection** : error control making use of an appropriate code by which the presence of mutilation can be discovered at reception. ★ détection d'erreurs → *détection 9.* R обнаружение ошибок. D Fehlererkennung. E detección de errores. I rivelazione degli errori. N foutendetectie. P detekcja błędów. S felupptäckt. (721)
10. **error detection without repetition** : error detection in which every character or block found to be erroneous at the receving end is either removed from data retained with a possible indication at its removal or is retained with the indication of existence of an error. ★ détection d'erreurs sans répétition → *détection 11.* R обнаружение ошибок без повторения. D Fehlererkennung ohne Wiederholung. E detección de errores sin repetición. I rivelazione d'errore senza richiesta di ritrasmissione. N foutendetectie zonder herhaling. P detekcja błędów bez powtórzeń. S felindikering. (721)
11. **overcurrent detection** : a function establishing that the value of current in a circuit exceeds a predetermined value for a specified length of time. ★ détection de surintensité → *détection 7.* R обнаружение сверхтока. D Überstromüberwachung. E detección de sobreintensidad. I rilevamento di sovracorrente. N overstroomdetectie. P wykrywanie przeciążenia. S överströmsavkänning. (826)
12. **signal quality detection** : a measurement of the degradation in quality of the received signal, used for error control purposes. *Examples :* — Signal to noise ratio falling below a given threshold ; — Pulse length exceeding a specified value. ★ détection de la qualité du signal → *détection 4.* R контроль качества сигнала. D Überwachung der Signalqualität. E detección de la calidad de la señal. I allarme qualità del segnale ricevuto. N detectie van signaalkwaliteit. P wykrywanie pogorszenia sygnału. S signalkvalitetsmätning. (371)
13. **(signal) quality detection** (*Syn.* analogue error detection) : determination that a received signal has departed from an acceptable form, based on criteria such as amplitude of signal, signal-to-noise ratio or time distortion, without involving checks of the significance or the value of the restituted digital signal. ★ détection de qualité → *détection 6.* R детектирование качества (сигнала); детектирование аналоговых ошибок. D Analog-Fehlerkennung. E detección de calidad (de una señal); detección analógica de errores. I rivelazione analogica dell'errore. N (signaal)kwaliteitsdetectie; analoge foutendetectie. P kontrola jakości sygnału; analogowa detekcja błędów. S analogifelsupptäckt. (721)
14. **square law detection** : a non-linear operation performed by a device having a characteristic such that the output signal is approximately proportional to the square of the instantaneous values of the envelope of the input oscillation. ★ détection quadratique → *détection 12.* R квадратурное детектирование. D quadratische Detektion. E detección cuadrática; demodulación cuadrática. I rivelazione quadratica. N kwadratische detectie. P detekcja kwadratowa. S kvadratisk detektering. (702)
15. **supply detection circuit** : → *circuit 171*
16. **total absorption detection efficiency** : → *efficiency 43*

detectivity

1. **detectivity** (*D*) : the reciprocal of noise equivalent power. ★ détectivité → *détectivité 1.* R способность к обнаружению. D Rauschempfindlichkeit. E detección. I rivelabilità; capacità di rivelazione. N detectiviteit. P detekcyjność. S detektivitet. (731)
2. **detectivity** (of a detector) (*D*) : reciprocal of the noise equivalent power. $D = 1/\Phi_m$. ★ détectivité → *détectivité 2.* R чувствительность обнаружения (приёмника). D Detektivität (eines Empfängers). E detectividad. I rivelabilità. N detectiviteit. P próg czułości. S detektivitet. (845)
3. **normalized detectivity** (of a detector) (D^*) : detectivity normalized to take into account two important parameters of the detection system, the sensitive area A of the detector and the measurement bandwidth Δf.

$$D^* = D(A \cdot \Delta f)^{1/2} = \Phi_m^{-1}(A \cdot \Delta f)^{1/2}$$

Note. — This concept is realistic only if the responsivity and noise output of the detector are frequency independent throughout the frequency range under consideration and if the noise equivalent input varies as the square root of the detector area ; this is not always the case. ★ détectivité spécifique → *détectivité 4.* R нормализованная чувствительность обнаружения (приёмника). D normierte Detektivität (eines Empfängers). E detectividad normalizada. I rivelabilità normalizzata. N genormeerde detectiviteit. P wykrywalność unormowana. S normerad detektivitet. (731,845)

detector

1. **absolute thermal detector** (*Syn.* self-calibrating thermal detector) : thermal detector of optical radiation which can compare radiant flux directly with electrical power. ★ radiomètre absolu → *radiomètre 2.* R абсолютный тепловой приёмник; самокалибрующийся тепловой приёмник. D absoluter thermischer Empfänger; selbst-kalibrierender thermischer Empfänger. E detector térmico absoluto. I rivelatore termico assoluto. N absolute thermische stralingstransductor; thermische stralingstransductor met inwendige ijking. P odbiornik termiczny samokalibrujący. S absolut termisk detektor. (845)
2. **analogue detector** : a radiation detector providing the information in an analogue form. ★ détecteur analogique → *détecteur 14.* R аналоговый детектор. D analoger Detektor. E detector analógico. I rivelatore analogico. N analoge detector. P detektor analogowy. S analogdetektor. (391)
3. **average detector** : a detector the output voltage of which is the average value of the envelope of an applied signal. *Note.* — The average value must be taken over a specified time interval. ★ détecteur de valeur moyenne → *détecteur 28.* R детектор средних значений. D Mittelwert-Detektor. E detector de valor medio. I rivelatore di valore medio. N gemiddelde-waardedetector. P detektor wartości średniej. S medelvärdesdetektor. (161)
4. **Cerenkov detector** : a radiation detector intended to detect relativistic particles, using a medium in which the Čerenkov effect is produced. It is optically coupled to a photosensitive device (for example one or more photomultiplier tubes), either directly or through light guides. ★ détecteur Cerenkov → *détecteur 15.* R детектор Черенкова. D Tscherenkow-Zähler. E detector Čerenkov. I rivelatore Čerenkov. N čerenkov-detector. P detektor Czerenkowa. S Čerenkov-detektor. (391)
5. **charge emission detector** : a radiation detector in the form of an electric capacitor between the plates of which the potential difference changes due to the transfer, from one plate to the other, of charged particles produced under the influence of radiation. ★ détecteur à émission de charge → *détecteur 6.* R эмиссионный детектор. D Detektor mittels Ladungsemission. E detector de emisión de carga. I rivelatore a emissione di carica. N detector met ladingemissie. P pojemnościowy detektor ładunkowy. S laddningsemissionsdetektor. (391)
6. **crystal conduction detector** : an ionization detector which is made of a semiconductor of homogeneous crystalline structure. ★ détecteur à cristal → *détecteur 5.* R кристаллический детектор. D Kristallzähler. E detector de cristal. I rivelatore a cristallo. N kristaldetector. P krystaliczny detektor konduktancyjny. S kristalldetektor. (391)
7. **detector** : a device for discerning the existence or variations of waves, oscillations, or signals, usually for extracting information conveyed. *Exemples* of detectors : linear detector ; square law detector. ★ détecteur → *détecteur 3.* R детектор. D Detektor. E detector. I rivelatore. N detector. P detektor. S detektor. (702)
8. **detector efficiency** : → *efficiency 13*
9. **detector mount** : → *mount 3*
10. **earth leakage detector** : an instrument intended to detect a leakage current to earth. ★ détecteur de courant de fuite à la terre → *détecteur 17.* R индикатор токов утечки. D Ableitstrom-Anzeiger. E detector de corriente de fuga a tierra. I rivelatore di correnti di dispersione. N aardlekzoeker. P wskaźnik doziemienia. S läckströmsdetektor. (302)
11. **gas-flow detector** : a radiation detector (counter tube, ionization chamber, etc.) in which an appropriate atmosphere is maintained by means of a low rate of flow of a suitable gas. ★ détecteur à circulation de gaz → *détecteur 4.*

R проточный детектор. D Durchflußdetektor. E detector de circulación de gas. I rivelatore a circolazione di gas. N gasactiviteitsdetector; gasdoorstroomdetector. P gazowy detektor przepływowy. S detektor med gasflöde. (391)

12. **internal gas detector** : an ionization detector designed to measure the activity of the gas which is used wholly or partly as the filling gas. ★ détecteur d'activité des gaz → *détecteur 16.* R детектор внутреннего наполнения. D Strahlungsdetektor mit innerer gasförmiger Strahlungsquelle. E detector de actividad de los gases. I rivelatore di attività dei gas. N detector met interne gasvormige bron. P detektor do pomiaru aktywności gazu. S detektor med inre gasformig källa. (391)
13. **ionization detector** : a radiation detector based on the use of ionization in the sensitive volume of the detector. ★ détecteur à ionisation → *détecteur 10.* R ионизационный детектор. D Ionisationsdetektor. E detector de ionización. I rivelatore a ionizzazione. N ionisatiedetector. P detektor jonizacyjny. S jonisationsdetektor. (391)
14. **linear detector** : a radiation detector in which the output signal of interest is directly proportional to a quantity related to the radiation, generally the energy lost in the sensitive volume of the detector by the incident radiation. ★ détecteur linéaire → *détecteur 30.* R пропорциональный детектор. D linearer Detektor. E detector lineal. I rivelatore lineare. N lineaire detector. P detektor linearny. S linjär detektor. (391)
15. **live voltage detector** : an instrument intended to show whether or not a conductive component is live. ★ détecteur de tension → *détecteur 25.* R индикатор напряжения. D Anzeiger einer berührungsgefährlichen Spannung. E detector de tensión; indicador de tensión. I rivelatore di tensione. N spanningzoeker. P wskaźnik napięcia. S spänningsdetektor. (302)
16. **magnetic detector for lightning currents** : an instrument intended to detect a lightning stroke and to give an estimate of the value of the current due to this lightning stroke by means of changes in the magnetic characteristics of some of its components. ★ détecteur magnétique de courant de foudre → *détecteur 31.* R индицатор токов молнии. D ..... E detector magnético de corrientes de rayo. I rivelatore magnetico di corrente di fulmini. N magnetische bliksemverklikker. P wskaźnik prądu wyładowania piorunowego. S magnetdetektor för blixtströmmar. (302)
17. **non-linear detector** : a radiation detector in which the output signal of interest is not directly proportional to a quantity related to the radiation. ★ détecteur non linéaire → *détecteur 32.* R непропорциональный детектор. D nichtlinearer Detektor. E detector no lineal. I rivelatore non lineare. N niet-lineaire detector. P detektor nielinearny. S olinjär detektor. (391)
18. **non-selective detector** (of optical radiation) : detector of optical radiation whose spectral responsivity is independent of wavelength over the spectral range considered. *Note.* — In French, the terms "détecteur" or "capteur" are also used instead of "récepteur". ★ récepteur non sélectif → *récepteur 18.* R неселективный приёмник (оптического излучения). D aselektiver Empfänger (optischer Strahlung). E detector no selectivo. I rivelatore non selettivo. N aselectieve transductor (voor optische straling). P odbiornik nieselektywny. S icke-selektiv detektor. (845)
19. **(non-selective) quantum detector** : detector of optical radiation whose quantum efficiency is independent of wavelength over the spectral range considered. *Note.* — A photoluminescent material having a photoluminescence yield independent of the wavelength of the exciting radiation over a wide spectral range is sometimes called a quantum counter. ★ récepteur quantique (non sélectif) → *récepteur 24.* R (неселективный) квантовый приёмник. D (aselektiver) Quantenempfänger. E detector cuántico (no selectivo). I rivelatore di quanti. N aselectieve fotonentransductor. P odbiornik kwantowy (nieselektywny). S kvantumdetektor. (845)
20. **optical detector** : a transducer that generates an electrical output signal when irradiated with optical power. ★ photodétecteur → *photodétecteur 1.* R оптический детектор. D optischer Empfänger. E detector óptico. I rivelatore ottico. N optische detector. P detektor optyczny. S optodetektor. (731)
21. **peak detector** : a detector, the output voltage of which is the peak value of an applied signal. ★ détecteur de crête → *détecteur 18.* R пиковый детектор. D Spitzenwert-Detektor. E detector de cresta. I rivelatore di picco. N topwaardedetector. P detektor wartości szczytowej. S toppvärdesdetektor. (161)
22. **phase detector** : a device for producing an output signal which is a function of the phase difference between an input sinusoidal signal and a reference oscillation. ★ comparateur de phases → *comparateur 3.* R фазовый детектор. D Phasendetektor. E comparador de fases; detector de fase. I rivelatore di fase. N fasedetector. P detektor fazy; komparator fazy. S fasdetektor. (702)
23. **photoelectric detector** : detector of optical radiation which utilizes the interaction between radiation and matter resulting in the absorption of photons and the consequent liberation of electrons from their equilibrum states, thereby generating an electric potential or current, or causing a change in electrical resistance, excluding electrical phenomena caused by temperature changes. ★ récepteur photoélectrique → *récepteur 21.* R фотоэлектронный приёмник. D photoelektrischer Empfänger. E detector fotoeléctrico. I rivelatore fotoelettrico. N foto-elektrische transductor. P odbiornik fotoelektryczny. S fotoelektrisk detektor. (845)
24. **photoluminescence detector** : a radiation detector using a photoluminescent substance (for instance silver phosphate glass) which, on excitation by radiation of certain wavelengths (e.g., ultra-violet radiation for silver phosphate), emits a luminous radiation of a different wavelength, generally in the visible spectrum, the magnitude of which is a function of the energy stored in the detector during its exposure to ionizing radiation. ★ détecteur à photoluminescence → *détecteur 11.* R фотолюминесцентный детектор. D Photolumineszenz-Detektor. E detector de fotoluminscencia. I rivelatore a fotoluminescenza. N fotoluminescentiedetector. P detektor luminescencyjny. S fotoluminiscensdetektor. (391,881)
25. **pulse detector** : a radiation detector providing the information in the form of pulses. ★ détecteur à impulsions → *détecteur 9.* R импульсный детектор. D Impulsdetektor. E detector de impulsos. I rivelatore a impulsi. N pulsdetector. P detektor impulsowy. S pulsdetektor. (391)
26. **pyroelectric detector** : thermal detector of optical radiation that utilizes the time rate of change of the spontaneous electric polarization, or of induced long-lived polarization, of certain dielectric materials, caused by the temperature change. ★ récepteur pyroélectrique → *récepteur 23.* R пироэлектрический приёмник. D pyroelektrischer Empfänger. E detector piroeléctrico. I rivelatore piroelettrico. N pyro-elektrische transductor. P odbiornik piroelektryczny. S pyroelektrisk detektor. (845)
27. **quasi-peak detector** : a detector having specified electrical time constants which, when regularly repeated identical pulses are applied to it, delivers an output voltage which is a fraction of the peak value of the pulses, the fraction increasing towards unity as the pulse repetition rate is increased. ★ détecteur de quasi-crête → *détecteur 21.* R квазипиковый детектор. D Quasi-Spitzenwert-Detektor. E detector de cuasicresta. I rivelatore di quasi-picco. N quasi-topwaarde detector. P detektor quasi-szczytowy. S kvasitoppdetektor. (161)
28. **radiation detector** : an apparatus, generally sub-assembly, or substance which, in the presence of radiation, provides by either direct or indirect means a signal or other indication suitable for use in measuring one or more quantities of the incident radiation. ★ détecteur de rayonnement → *détecteur 22.* R детектор ионизирующего излучения. D Strahlungsdetektor. E detector de radiación. I rivelatore di radiazione. N stralingsdetector. P detektor promieniowania. S (strålnings)detektor. (391,881)
29. **root-mean-square detector** : a detector, the output voltage of which is the r.m.s. value of an applied signal. *Note.* — The r.m.s. value must be taken over a specified time interval. ★ détecteur de valeur efficace → *détecteur 27.* R среднеквадратичный детектор. D Effektivwert-Detektor. E detector de valor eficaz. I rivelatore di valore efficace. N effektievewaardedetector. P detektor wartości skutecznej. S effektivvärdesdetektor. (161)
30. **Rosenblum detector** : a particular type of spark detector. ★ détecteur Rosenblum → *détecteur 34.* R детектор Розенблюма. D Rosenblum-Zähler. E detector Rosenblum. I rivelatore Rosenblum. N detector van Rosenblum. P detektor Rosenbluma. S Rosenblum-detektor. (391)
31. **scintillation detector** : a radiation detector consisting of a scintillator optically coupled to a photosensitive device (for example one or more photomultiplier tubes), either directly or through light guides. ★ détecteur à scintillation

→ *détecteur 12.* R сцинтилляционный детектор. D Szintillationsdetektor. E detector de centelleo. I rivelatore a scintillazione. N scintillatiedetector. P detektor scyntylacyjny. S scintillationsdetektor. (391,881)

32. **secondary emission detector** : a radiation detector with a confined evacuated volume in which a current is produced as a result of charged particles being ejected from the walls and collected with a suitable applied potential. ★ détecteur à émission secondaire → *détecteur 7.* R вторично-эмиссионный детектор. D Detektor mittels Sekundäremission. E detector de emisión secundaria. I rivelatore a emissione secondaria. N detector voor secundaire emissie. P detektor z emisją wtórną. S sekundäremissionsdetektor. (391)
33. **selective detector** (of optical radiation) : detector of optical radiation whose spectral responsivity varies with wavelength over the spectral range considered. *Note.* — In French, the terms "détecteur" or "capteur" are also used instead of "récepteur". ★ récepteur sélectif → *récepteur 26.* R селективный приёмник (оптического излучения). D selektiver Empfänger (optischer Strahlung). E detector selectivo. I rivelatore selettivo. N selectieve transductor (voor optische straling). P odbiornik selektywny. S selektiv detektor. (845)
34. **self-calibrating thermal detector** (*Syn.* absolute thermal detector) : → *detector 1*
35. **self-powered neutron detector** (*Syn.* collectron) : → *collectron 1*
36. **spark detector** : a radiation detector in which the passage of a strongly ionizing particle produces, between electrodes, a spark which generates an electric pulse of measurable amplitude. ★ détecteur à étincelles → *détecteur 8.* R искровой детектор. D Funkenkammer. E detector de chispas. I rivelatore a scintille. N vonkdetector. P detektor iskrowy. S gnistdetektor. (391)
37. **standing wave detector** : a detector mounted on a slotted line carriage, for the purpose of measuring standing waves. ★ détecteur d'ondes stationnaires → *détecteur 29.* R детектор стоячей волны. D Stehwellen-Detektor. E detector de ondas estacionarias. I rilevatore d'onda stazionaria. N staande-golfdetector. P detektor fali stojącej. S ..... (726)
38. **thermal detector of radiation** (*Syn.* thermal (radiation) detector) : detector of optical radiation in which a measurable physical effect is produced by the heating of the part that absorbs radiation. ★ récepteur thermique (de rayonnement) → *récepteur 31.* R тепловой приемник излучения; термодетектор излучения. D thermischer Strahlungsempfänger. E detector térmico. I rivelatore termico (di radiazione ottica). N thermische stralingstransductor. P odbiornik promieniowania termiczny. S termisk (strålnings)detektor. (845)
39. **thermal (radiation) detector** (*Syn.* thermal detector of radiation) : → *detector 38*
40. **thermoluminescence detector** : a radiation detector using a thermoluminescent medium which, by thermal stimulation, emits a luminous radiation, the magnitude of which is a function of the energy stored in the detector during its exposure to ionizing radiation. ★ détecteur à thermoluminescence → *détecteur 13.* R термолюминесцентный детектор. D Thermoluminiszenzdetektor. E detector termoluminiscente. I rivelatore a termoluminescenza. N thermoluminescentiedetector. P detektor termoluminescencyjny. S termoluminiscensdetektor. (391,881)
41. **total absorption detector efficiency** : → *efficiency 44*
42. **track (etch) detector** : a device that records the paths of heavy charged particles in a transparent solid, the tracks being directly visible or enhanced by etching with an appropriate reagent (such as potassium hydroxide for cellulose acetate). ★ détecteur de traces → *détecteur 26.* R детектор треков. D Ätzspur-Detektor. E detector de trazas. I rivelatore (solido) di tracce. N sporendetector. P detektor śladowy. S spårdetektor. (881)
43. **2π[4π] radiation detector** : a detector intended to detect the radiation over 2π[4π] steradians from a radiation source. ★ détecteur de rayonnement 2π[4π] → *détecteur 23.* R 2π[4π]-детектор. D 2π[4π]Strahlungsdetektor. E detector de radiación 2π[4π]. I rivelatore di radiazione 2π[4π]. N halfgeleiderdetector met gediffundeerde grenslaag; 2π[4π] stralingsdetector. P detektor promieniowania 2π[4π]. S 2π[4π] detektor. (391,881)

determinate

1. **determinate fault** : → *fault 11*

determination

1. **determination test** : → *test 21*
2. **new fondamental system for the determination of reference equivalents** : → *system 124*
3. **primary system for the determination of reference equivalents** : → *system 156*
4. **reference apparatus for the determination of transmission performance ratings** : → *apparatus 13*
5. **reference system for the determination of AEN** : → *system 169*

deuteron

1. **deuteron** : the nucleus of deuterium, which is the hydrogen isotope of mass number 2. ★ deutéron → *deutéron 1.* R дейтрон. D Deuteron. E deuteron. I deutone. N deutron. P deuteron. S deutron. (881)

developing

1. **developing fault** : → *fault 12*

deviated

1. **laterally deviated (ionospheric) propagation** : → *propagation 12*

deviation

1. **(absolute) frequency deviation** : → *frequency 1*
2. **angle of deviation between two e.m.f.'s** : → *angle 3*
3. **angular deviation loss** : → *loss 3*
4. **azimuth deviation** : the deflection of the centre line of the recording/reproducing head gap(s) with respect to a line perpendicular to the edge of a reference tape in the plane of the tape. Azimuth deviation is expressed in minutes of arc, positive if the deviation is in a clockwise direction as seen on the non coated side of the tape and negative if the deviation is in anticlockwise direction. ★ écart d'azimut → *écart 4.* R перекос рабочего зазора. D Azimutabweichung; . E desviación de azimut. I errore di azimuth. N afwijking in de spleetstand. P kąt skosu głowicy. S spaltvinkelavvikelse. (806)
5. **deviation** : difference between the desired value and the actual value of a variable at a given instant. *Note.* — This definition applies whether the desired value is constant or varies in time. ★ écart → *écart 2.* R отклонение. D Sollwertabweichung. E desviación. I errore. N afwijking. P uchyb. S avvikelse. (351)
6. **deviation from rated speed** (tape speed or speed of rotation) : the relative deviation of the mean measured speed with respect to the rated speed (tape speed or speed of rotation). It is expressed in percentage, regarded either as positive (+) when the measured speed is higher than the rated speed, or as negative (-) when it is lower. It is given by:

$$\frac{\text{mean measured speed} - \text{rated speed}}{\text{rated speed}} \cdot 100\,\%$$

★ écart de la vitesse réelle par rapport à la vitesse nominale → *écart 7.* R отклонение от номинальной скорости (линейной скорости или частоты вращения). D Geschwindigkeitsabweichung. E desviación de la velocidad con relación a la velocidad nominal (de la cinta o de rotación). I variazione relativa della velocità di scorrimento. N afwijking van de toegekende snelheid (bandsnelheid of omwentelingssnelheid). P odchyłka od prędkości znamionowej (prędkości tasmy lub prędkości obrotowej). S procentuell hastighetsavvikelse. (806)
7. **deviation of synchronous time** : deviation of synchronous time from standard time. ★ écart de temps synchrone → *écart 10.* R отклонение синхронного времени. D Synchronzeitabweichung. E desviación del tiempo síncrono. I scarto di tempo sincrono. N afwijking van de synchrone tijd. P odchylenie czasu synchronicznego. S synkrontidavvikelse. (603)
8. **frequency deviation** : the difference between the system frequency at a given instant and the nominal value. ★ écart de fréquence → *écart 5.* R отклонение частоты. D Frequenzabweichung. E desviación de la frecuencia. I scarto di frequenza. N frequentieafwijking. P odchyłka częstotliwości. S frekvensavvikelse. (604)

9. **(instantaneous) frequency deviation** : in angle modulation, at a given instant and under specified conditions, the difference between the instantaneous frequency of the modulated signal and the frequency of the carrier prior to modulation. ★ déviation (instantanée) de fréquence → *déviation 15.* R (мгновенная) девиация частоты. D (momentane) Frequenzabweichung. E desviación (instantánea) de frecuencia. I deviazione (istantanea) di frequenza. N (ogenbliks)frequentie-afwijking. P dewiacja częstotliwości chwilowa. S frekvensavvikelse. (702)
10. **(instantaneous) phase deviation** : in angle modulation at a given instant and under specified conditions, the difference between the phase of the modulated signal and the phase of the carrier in the absence of modulation. ★ déviation (instantanée) de phase → *déviation 16.* R (мгновенная) девиация фазы. D (momentane) Phasenwinkelabweichung. E desviación (instantánea) de fase. I deviazione (istantanea) di fase. N (ogenbliks)fase-afwijking. P dewiacja fazy (chwilowa). S fasavvikelse. (702)
11. (frequency) **deviation ratio** : → *ratio 59*
12. **peak (frequency) deviation** : in angle modulation, the maximum value of the instantaneous frequency deviation for a given modulating signal. ★ déviation (de fréquence) de crête → *déviation 12.* R пиковая девиация (частоты). D Frequenzhub. E desviación (de frecuencia) de cresta; desviación pico (frecuencia). I deviazione (di frequenza) di picco. N maximale (frequentie-) afwijking. P dewiacja częstotliwości szczytowa. S maximal frekvensavvikelse. (702)
13. **peak (phase) deviation** : in angle modulation, the maximum value of the instantaneous phase deviation for a given modulating signal. ★ déviation (de phase) de crête → *déviation 13.* R пиковая девиация (фазы). D Phasenhub. E desviación (de fase) de cresta; desviación pico (fase). I deviazione (di fase) di picco. N maximale (fase-)afwijking. P dewiacja fazy szczytowa. S maximal fasavvikelse. (702)
14. **peak-to-peak (frequency) deviation** (*Syn.* frequency swing) : in angle modulation and under specified conditions, the difference between the maximum value and the minimum value of the instantaneous frequency of the modulated signal for a given modulating signal. ★ déviation (de fréquence) crête à crête → *déviation 11.* R междупиковая девиация (частоты); разнос частот. D Spitze-zu-Spitze-Frequenzhub; maximaler Frequenzhub. E desviación (de frecuencia) pico a pico. I deviazione di frequenza picco-picco. N top-top-(frequentie-) afwijking; frequentiezwaai. P dewiacja częstotliwości międzyszczytowa. S frekvenssving. (702)
15. **periodic and/or random deviation** (*Syn.* PARD (abbreviation)) : unwanted deviations of a periodic and/or random nature in the value of a performance characteristic of an instrument, occurring in a specified frequency band, all conditions remaining constant. *Notes.* — These deviations, which may be due to various causes, can appear either in the presence or in the absence of an input or output signal. *2* — Hum and ripple are periodic deviations, noise and fluctuations are random deviations. ★ variations périodiques et/ou erratiques → *variation 26.* R периодические и (или) случайные отклонения; PARD. D periodische und/oder zufällige Abweichung. E desviaciones periódicas y/o erráticas. I deviazione periodica e/o accidentale; PARD. N ..... P odchylenie okresowe i/lub losowe; PARD. S periodisk och/eller slumpmässig avvikelse. (303)
16. **power spectral density of fractional frequency deviations** : → *density 21*
17. **standard deviation** : the positive square root of the variance. ★ écart type → *écart 18.* R стандартное отклонение. D Standardabweichung. E desviación típica. I deviazione tipo. N standaarddeviatie. P odchylenie standardowe. S medelavvikelse; standardavvikelse. (101)
18. **steady-state deviation** : steady state value of the system deviation when all input variables are maintained constant. ★ écart de statisme → *écart 9.* R остаточное отклонение. D bleibende Regelabweichung. E desviación permanente; desviación de estatismo. I errore stazionario. N blijvende afwijking; statische afwijking. P uchyb ustalony. S stationär avvikelse. (351)
19. **steady-state deviation of the *n*th order** : steady state value of the system deviation when the *n*th derivative of one input variable is maintained constant and the other input variables are constant. ★ écart permanent du $n^{ième}$ ordre → *écart 16.* R астаточное отклонение -го порядка; астатизм ГЗЕ—го порядка. D ..... E desviación permanente de orden n. I errore stazionario di ordine *n*. N blijvende afwijking van de n^{e} orde. P uchyb ustalony n-tego stopnia. S stationär avvikelse av n:te ordningen. (351)
20. **system deviation** : for a control system, the difference between the reference variable and the controlled variable at a given instant. ★ écart de régulation → *écart 8.* R отклонение системы. D Regelabweichung. E desviación del sistema. I errore del sistema (con controllo). N regelafwijking. P uchyb regulacji. S regleravvikelse. (351)
21. **voltage deviation** : the difference, generally expressed as a percentage, between the voltage at a given instant at a point in the system, and a reference voltage such as : nominal voltage, a mean value of the operating voltage, declared supply voltage. ★ écart de tension → *écart 11.* R отклонение напряжения. D Spannungsabweichung. E desviación de la tensión. I scarto di tensione. N spanningsafwijking. P odchyłka napięcia. S spänningsavvikelse. (604)

deviative

1. **deviative absorption** : → *absorption 15*

device

1. **adjustment device** (*Syn.* adjuster) : a device intended to modify the performance of a measuring instrument to cause it to have desired characteristics. ★ dispositif d'ajustage → *dispositif 26.* R устройство регулировки. D Einstelleinrichtung; Einsteller. E dispositivo de ajuste. I dispositivo di regolazione. N instelinrichting. P nastawnik. S justeranordning. (301)
2. **aerial lift device with insulating arm** : a device comprising an insulating arm equipped with one or two buckets, mounted on a vehicle and used to place a worker in the working position. ★ engin élévateur à bras isolant → *engin 1.* R изолирующий подъемник. D isolierende Arbeitshebebühne. E aparato elevador de brazo aislante. I elevatore con braccio isolante. N hefwerkplatform met isolerende arm. P podnośnik izolowany z koszem. S isolerad plattform. (604)
3. **anti-climbing device** (*Syn.* anti-climbing guard) : → *guard 1*
4. **anti-pumping device** : a device which prevents reclosing after a close-open operation as long as the device initiating closing is maintained in the position for closing. ★ dispositif d'antipompage → *dispositif 37.* R устройство против повторного включения. D Wiedereinschaltsperre. E dispositivo antibombeo. I dispositivo antipompaggio. N antipompinrichting. P blokada ponownego zamknięcia. S pumpningsskydd. (441)
5. **anti-sidetone device** : a device designed to reduce sidetone level in a telephone set. ★ dispositif anti-local → *dispositif 14.* R противоместное устройство. D Rückhörsperre. E dispositivo antilocal. I dispositivo antilocale. N antilokaalschakeling. P układ antylokalny. S antisidtonskrets. (722)
6. **anti-slip device** : a device which corrects slipping of driving wheels during traction. ★ dispositif d'antipatinage (en traction) → *dispositif 36.* R противобуксовочное устройство. D Schleuderschutzeinrichtung. E dispositivo antipatinaje (en tracción). I dispositivo antislittamento. N antislipinrichting. P urządzenie przeciwpoślizgowe. S slirskydd. (811)
7. **arc control device** : a device, surrounding the arcing contacts of a mechanical switching device, designed to confine the arc and to assist in its extinction. ★ chambre d'extinction → *chambre 15.* R дугогасительное устройство. D Lichtbogen-Löscheinrichtung. E cámara de extinción. I camera d'estinzione. N bluskamer. P komora gaszeniowa. S släckningskammare. (441)
8. **arc furnace earthing device** : a device to ensure earthing of the furnace heavy current circuit in the event of transient over-voltages and/or break-down of electrical insulation of the transformer high voltage windings to the low voltage windings. ★ dispositif de mise à la terre d'un four à arc → *dispositif 53.* R заземляющее устройство дуговой печи. D Lichtbogenofen-Erdungseinrichtung. E dispositivo de puesta a tierra de un horno de arco. I dispositivo di messa a terra di un forno ad arco. N aardingsvoorziening voor boogoven. P przyrząd uziemiający (pieca łukowego). S jordningsutrustning för ljusbågsugn. (841)
9. **arc initiation device** (*Syn.* arc striking device) : a device to initiate an arc between the electrode and the workpiece without direct contact. ★ dispositif d'amorçage d'arc

→ *dispositif 30.* R устройство для возбуждения дуги. D Lichtbogenzündeinrichtung. E dispositivo de cebado del arco. I dispositivo d'innesco dell'arco. N ontstekingsinrichting. P zapłonnik łuku. S tänddon. (851)

10. **arc maintenance device** : a device to stabilize the arc during welding. ★ dispositif de stabilisation de l'arc → *dispositif 59.* R устройство для поддержания дуги. D Lichtbogenstabilisierungseinrichtung. E dispositivo de estabilización del arco. I dispositivo di stabilizzazione dell'arco. N boogstabilisator. P stabilizator łuku. S bågstabiliseringsdon. (851)
11. **arc striking device** (*Syn.* arc initiation device) : → *device 9*
12. **broadband device** : a device whose bandwidth is such that it is able to accept and process all the spectral components of a particular emission. ★ dispositif à large bande → *dispositif 7.* R широкополосное устройство. D Breitband-Betriebsmittel. E dispositivo de banda ancha. I dispositivo a larga banda. N brede-bandtoestel. P urządzenie szerokopasmowe. S bredbandsutrustning. (161)
13. **call holding device** (*Syn.* musical hold device) : → *device 37*
14. **call indicating device** : a device associated with a telephone set to give an audible or visual indication of a successful call attempt. ★ récepteur d'appel → *récepteur 8.* R вызывное устройство. D Rufanzeiger. E indicador de llamada. I ricevitore di chiamata. N oproepsignaalindicator. P odbiornik przywołania. S signalorgan. (722)
15. **coupling device (in welding)** : a device to connect two flexible welding cables or to connect a flexible welding cable to a welding power source or to a welding equipment. ★ dispositif de connexion (en soudage) → *dispositif 44.* R соединительное устройство (для сварки). D Steckverbindung (zum Schweißen). E dispositivo de conexión (en soldadura). I dispositivo di collegamento (nella saldatura). N koppeling. P złącze kabla spawalniczego. S kopplingsdon. (851)
16. **delta-connected device** : a three-phase mesh-connected device. ★ dispositif (connecté) en triangle → *dispositif 23.* R устройство, соединенное в треугольник. D Betriebsmittel in Dreieckschaltung. E dispositivo (conectado) en triángulo. I dispositivo (collegato) a triangolo. N in-driehoek-geschakeld toestel. P człon (urządzenia elektrycznego) w układzie delta. S triangelkopplat don. (151)
17. **detecting device** (*Syn.* sensor) : → *sensor 6*
18. **device control** : → *control 88*
19. **discharge device of a capacitor** : a device which may be incorporated in a capacitor, intended to reduce the voltage between the terminals to a given value, within a given time, after the capacitor has been disconnected from a network. ★ dispositif de décharge d'un condensateur → *dispositif 45.* R разрядное устройство конденсатора. D Entladevorrichtung eines Kondensators. E dispositivo de descarga de un condensador. I dispositivo di scarica di un condensatore. N ontlaadinrichting van een condensator. P przyrząd rozładowczy kondensatora. S urladdningdon. (436)
20. **draining device** (*Syn.* drain) : → *drain 1*
21. **driver's safety device** (*Syn.* dead-man's handle) : a device which must be used continuously by the driver and which will stop the train in the event of indisposition on his part. ★ (dispositif d')homme-mort → *homme-mort 1.* R прибор бдительности. D Sicherheitsfahrschaltung; Totmannknopf. E (dispositivo de) hombre-muerto. I dispositivo di sicurezza (tipo uomo morto). N dode-mens bedieningsorgaan. P czuwak (pasywny). S säkerhetsdon. (811)
22. **electric device** : an assembly of components utilizing electromagnetic energy to perform a required function. *Note.* — A device may be considered as a component of a larger assembly. ★ dispositif électrique → *dispositif 68.* R электротехническое устройство. D (elektrisches) Gerät. E dispositivo eléctrico. I dispositivo elettrico. N elektrisch toestel. P człon urządzenia elektrycznego; podzespół elektryczny. S elektriskt don. (151)
23. **electronic device** : a device in which conduction is principally by electrons moving through a vacuum, gas or semiconductor. ★ dispositif électronique → *dispositif 69.* R время выдержки при термообработке электронный прибор. D elektronisches Bauelement. E dispositivo electrónico. I dispositivo elettronico. N elektronisch element. P przyrząd elektronowy. S elektroniskt organ. (531)
24. **emergency tripping device** : an electrical, mechanical, or electromechanical device for stopping the motor-drive mechanism at any time in such a way that a special action has to be performed before the next tap-change operation can be started. ★ dispositif de déclenchement d'urgence → *dispositif 46.* R устройство аварийного отключения. D Notauslösung. E dispositivo de parada de emergencia. I dispositivo d'emergenza per l'arresto. N nooduitschakeling. P blokada awaryjna napędu silnikowego. S nödstopp. (421)
25. **fibre optic terminal device** : an assembly including one or more opto-electronic devices which converts an electrical signal into an optical signal, and/or vice-versa, which is designed to be connected to at least one optical fibre. *Note.* — A fibre optic terminal device always has one or more integral fibre optic connector(s) or optical fibre pigtail(s). ★ dispositif d'extrémité de liaison optique → *dispositif 66.* R оптоэлектронный модуль. D LWL-Endeinrichtung. E dispositivo terminal de fibra óptica. I terminale di linea ottica. N optische-vezel-aansluitapparaat. P końcownik światłowodowy. S optofiberterminal. (731)
26. **fixing device** : a device, forming part of an insulator, intended to connect it to a supporting structure, or to a conductor, or to an item of equipment, or to another insulator. *Note.* — Where the fixing device is metallic, the term "metal fitting" is normally used. ★ dispositif de fixation → *dispositif 50.* R крепежное устройство (арматура изолятора). D Armatur. E dispositivo de fijación. I dispositivo di fissaggio. N armatuur. P okucie izolatora. S isolatorarmatur. (471)
27. **gyromagnetic device** : a device that utilizes a gyromagnetic material or medium. ★ dispositif gyromagnétique → *dispositif 70.* R гиромагнитное устройство (прибор). D gyromagnetisches Bauelement. E dispositivo giromagnético. I dispositivo giromagnetico. N gyromagnetisch apparaat. P przyrząd giromagnetyczny. S gyromagnetisk anordning. (221,726)
28. **Hall effect device** : a semiconductor device in which the Hall effect is utilized. ★ dispositif à effet Hall → *dispositif 6.* R датчик Холла. D Halleffekt-Bauelement. E dispositivo de efecto Hall. I dispositivo a effetto Hall. N Hallelement. P hallotron. S hallkomponent. (521)
29. **hazard reducing device** : a device designed to reduce the hazard of electric shock that may originate from the no-load voltage. ★ dispositif de réduction de risques → *dispositif 55.* R устройство, снижающее опасность. D Gefahrminderungseinrichtung. E dispositivo de reducción de riesgos. I dispositivo per ridurre il rischio. N beschermingsinrichting. P urządzenie zwiększające bezpieczeństwo pracy. S riskreduceringsdon. (851)
30. **indicating device** (of a measuring instrument) : the ensemble of components of a measuring instrument intended to indicate the value of the measured quantity. *Note.* — By extension, the indicating means or setting device of any instrument such as a material measure or a signal generator. ★ dispositif indicateur → *dispositif 71.* R отсчетное устройство (средства измерения). D Anzeigevorrichtung (für ein Messgerät). E dispositivo indicador (de un aparato de medida). I apparecchio indicatore (di uno strumento di misura). N aanwijsinrichting. P urządzenie wskazujące (przyrządu pomiarowego). S visaranordning. (301)
31. **indicating device** (*Syn.* indicator) : a part of a fuse provided to indicate whether the fuse has operated. ★ dispositif indicateur → *dispositif 73.* R указатель срабатывания. D Anzeiger. E dispositivo indicador. I dispositivo indicatore. N verklikker. P wskaźnik zadziałania (wkładki topikowej). S indikeringsanordning. (441)
32. **instrument with locking device** : → *instrument 17*
33. **interlocking device** : a device which makes the operation of a switching device dependent upon the position or operation of one or more other pieces of equipment. ★ dispositif de verrouillage → *dispositif 61.* R устройство блокировки. D Verriegelungsvorrichtung. E dispositivo de enclavamiento. I dispositivo di blocco. N vergrendelinrichting. P urządzenie uzależniające. S förreglingsdon. (441)
34. **locking device** : a feature incorporated in certain components to provide mechanical retention of their mating part. ★ système de blocage → *système 34.* R замок. D Verriegelungsvorrichtung. E sistema de bloqueo. I sistema di bloccaggio. N vergrendeling. P mechanizm blokujący. S låsanordning. (581)

35. **measuring instrument with circuit control devices** : → *measuring instrument 14*
36. **mesh-connected device** : → *mesh-connected 1*
37. **musical hold device** (*Syn.* call holding device) : a device for sending music or spoken information to a calling party to indicate that the call attempt has been received and to invite the caller to wait for connection to the wanted user or service. ★ dispositif d'attente → *dispositif 38.* R устройство тональной блокировки. D Warteansagegerät. E dispositivo de espera. I dispositivo di fonia su attesa. N wachttijdindicatie-apparaat. P automat informacyjny. S väntanordning. (722)
38. **narrowband device** : a device whose bandwidth is such that it is able to accept and process only a portion of the spectral components of a particular emission. ★ dispositif à bande étroite → *dispositif 3.* R узкополосное устройство. D Schmalband-Betriebsmittel. E dispositivo de banda estrecha. I dispositivo a banda stretta. N smalle-bandtoestel. P urządzenie wąskopasmowe. S smalbandsutrustning. (161)
39. **overcurrent blocking device** : an electrical device preventing or interrupting operation of the motor-drive mechanism for the period in which an overcurrent exceeding a preset value is flowing in the transformer winding. ★ dispositif de blocage par surintensité → *dispositif 42.* R блокировка при перегрузках. D Überstromsperre. E dispositivo de bloqueo por sobreintensidad. I dispositivo di blocco per sovracorrente. N blokkeerinrichting bij overstroom. P blokada zwarciowa napędu silnikowego. S överströmsblockerare. (421)
40. **overspeed device** : a device whose function is to close the intake valves of the turbine in order to limit rotation speed increase after sudden loss of load. ★ protection de survitesse → *protection 32.* R защита от разгона. D Überdrehzahlschutz. E protección de sobrevelocidad; proteccio'n de envalamiento. I dispositivo di protezione contro le sovravelocità. N overtoerenbeveiliging. P wytrzask. S rusningsskydd. (602)
41. **pantograph dropping device** : a device intended to lower the pantograph automatically if it should be damaged. ★ dispositif d'abaissement automatique du pantographe → *dispositif 25.* R устройство для опускания пантографа. D Senkautomatik des Scheren- oder Einholmstromabnehmers. E dispositivo de bajada automática del pantógrafo. I dispositivo automatico di abbassamento del pantografo. N neerlaatmechanisme van de pantograaf. P urządzenie automatycznego opuszczania pantografu. S fallmekanism för strömavtagare. (811)
42. **parallel control devices** : electrical control devices to move, in the case of parallel operation of several transformers with tappings, all tap-changers to the required position and to avoid divergence of the respective motor-drive mechanisms. ★ dispositif de commande de marche en parallèle → *dispositif 43.* R устройство управления параллельной работой. D Parallellaufeinrichtung. E dispositivo de mando de marcha en paralelo. I dispositivo di comando del funzionamento in parallelo. N parallelbesturing. P urządzenie sterujące równoległą pracą przełączników. S parallellstyrningsutrustning. (421)
43. **photoelectric device** : → *photoelectric 7*
44. **polyphase device** : a polyphase source, or a device intended to be energized by such a source. ★ dispositif polyphasé → *dispositif 78.* R многофазное устройство. D Mehrphasen-Betriebsmittel. E dispositivo polifásico. I dispositivo polifase. N meerfasentoestel. P człon (urządzenia elektrycznego) wielofazowy. S flerfasigt don. (151)
45. **position indicating device** : a part of a mechanical switching device which indicates whether it is in the open, closed, or where appropriate, earthed position. ★ indicateur de position → *indicateur 13.* R указатель положения. D Schaltstellungsanzeiger. E indicator de posición. I dispositivo indicatore di posizione. N standaanwijzer. P wskaźnik stanu łącznika. S lägesvisare. (441)
46. **protective device** (of a capacitor voltage transformer) : a device incorporated in a capacitor voltage transformer for the purpose of limiting overvoltages which may appear across one or more of its components, notably due to ferro-resonance phenomena. ★ dispositif de protection → *dispositif de protection 2.* R защитное устройство (емкостного трансформатора напряжения). D Schutzvorrichtung (eines kapazitiven Spannungswandlers). E dispositivo de protección (de un transformador de tensión capacitivo). I dispositivo di protezione (di un trasformatore di tensione capacitivo). N beveiligingsmiddelen (voor een capacitieve spanningstransformator). P urządzenie zabezpieczające (przekładnika napięciowego pojemnościowego). S dämpkrets. (321)
47. **receive fibre optic terminal device** : a fibre optic terminal device including one or more optical detectors and having one or more optical inputs. ★ récepteur optique → *récepteur 19.* R приемный оптоэлектронный модуль. D LWL-Empfangseinrichtung. E dispositivo de recepción terminal de fibra óptica. I ricevitore ottico. N optische-vezelontvanger. P końcownik światłowodowy odbiorczy. S optofibermottagare. (731)
48. **recording device** : the assembly of parts of a recording instrument which records the measured value on the recording medium. ★ dispositif d'enregistrement → *dispositif 63.* R регистрирующее устройство. D Aufzeichnungsvorrichtung. E dispositivo de registro. I dispositivo di registrazione. N registreerinrichting. P urządzenie zapisowe; urządzenie rejestrujące. S skrivanordning. (301)
49. **semiconductor device** : a device whose essential characteristics are due to the flow of charge carriers within a semiconductor material. ★ dispositif à semi-conducteur → *dispositif 9.* R полупроводниковое устройство. D Halbleiter-Bauelement. E dispositivo semiconductor. I dispositivo a semiconduttore. N halfgeleiderelement. P element półprzewodnikowy; przyrząd półprzewodnikowy. S halvledarkomponent. (151,521)
50. **serial radiographic device** (*Syn.* spot-film device) : → *device 53*
51. **short-circuiting device** : a device to make a short-circuit at the terminals of a circuit or part of a circuit to protect it against malfunctioning. ★ court-circuiteur → *court-circuiteur 1.* R короткозамыкатель. D Kurzschließer. E cortocircuitador. I cortocircuitatore. N kortsluitschakelaar. P zwiernik. S kortslutningsutrustning. (811)
52. **single-phase device** : a single-phase source, or a device intended to be energized by such a source. ★ dispositif monophasé → *dispositif 76.* R однофазное устройство. D Einphasen- Betriebsmittel. E dispositivo monofásico. I dispositivo monofase. N eenfasetoestel. P człon (urządzenia elektrycznego) jednofazowy. S enfasigt don. (151)
53. **spot-film device** (*Syn.* serial radiographic device; seriograph) : an apparatus for taking a series of radiographs of the same organ on separate areas of the same film or on different films combined with fluoroscopy. ★ sériographe → *sériographe 1.* R устройство для получения серии рентгенограмм. D Zielaufnahmegerät. E seriógrafo. I spot-film camera; seriografo. N röntgenserieopnametoestel. P seriograf. S prickbildsapparat. (881)
54. **star-connected device** : an *m*-phase device whose *m* branches have a common node. ★ dispositif (connecté) en étoile → *dispositif 21.* R устройство, соединенное в звезду. D Betriebsmittel in Sternschaltung. E dispositivo (conectado) en estrella. I dispositivo (collegato) a stella. N in-ster-geschakeld toestel. P człon (urządzenia elektrycznego) gwiazdowy. S stjärnkopplat don. (151)
55. **starting device** : apparatus which provides, by itself or in combination with other components in the circuit, the appropriate electrical conditions needed to start a discharge lamp. ★ dispositif d'amorçage → *dispositif 29.* R зажигающее устройство. D Startvorrichtung. E dispositivo de cebado. I dispositivo d'innesco. N ontsteekapparaat. P urządzenie zapłonowe. S tänddon. (845)
56. **tensioning device** (*Syn.* tensioning equipment) : → *equipment 80*
57. **traffic-carrying device** : a functional unit used directly or indirectly to establish, maintain or clear a connection. ★ organe de trafic → *organe 5.* R устройство передачи обмена. D vermittlungstechnische Einrichtung; Einrichtung fuer Verkehrsabwicklung. E dispositivo de tráfico. I organo di traffico. N verbindingsorgaan. P zespół łączeniowy. S trafikbärande organ. (714)
58. **transmit fibre optic terminal device** : a fibre optic terminal device including one or more optical sources and having one or more optical outputs. ★ émetteur optique → *émetteur 24.* R передающий оптоэлектронный модуль. D LWL-Übertragungseinrichtung. E dispositivo de transmisión terminal de fibra óptica. I emettitore ottico. N optische-vezelzender. P końcownik światłowodowy nadawczy. S optofibersändare. (731)

59. **voltage reducing device** : a hazard reducing device designed to reduce the no-load voltage automatically when welding is not being performed and which makes available the voltage at its unreduced value for welding. ★ dispositif réducteur de tension → *dispositif 79.* R устройство снижения напряжения. D Spannungsminderungseinrichtung. E dispositivo reductor de tensión. I dispositivo per ridurre la tensione. N spanningsverlagingsrelais. P reduktor napięcia. S spänningsreduceringsdon. (851)
60. **weight transfer compensation device** : a device to compensate for the effect of weight transfer, either by transferring weight from one axle to another or by modifying the tractive effort on certain axles. ★ dispositif d'anticabrage → *dispositif 33.* R устройство для выравнивания нагрузки на ось. D Radsatzentlastungsausgleich. E dispositivo de compensación de reducción de la carga de un eje. I dispositivo anticabraggio. N compensatie-inrichting voor asontlasting. P urządzenie kompensujące odciążenie osi. S axellastutjämnare. (811)
61. **wheel slide protection device** : a device which corrects skidding or locking of any wheels during braking. ★ dispositif d'antienrayage (en freinage) → *dispositif 34.* R противоюзное устройство. D Gleitschutz. E dispositivo antirayado (en frenado). I dispositivo antipattinaggio. N antiblokkeerinrichting. P urządzenie przeciwblokujące. S fastbromsningsskydd. (811)

dewaxing

1. **dewaxing** (*Syn.* burn-off chamber) : → *chamber 3*

dew-point

1. **dew-point** : the temperature at which the water vapour contained in a gas or a gas mixture at a given constant pressure is just sufficient to permit its saturation. ★ point de rosée → *point 39.* R точка росы. D Taupunkt. E punto de condensación; punto de rocío. I punto di rugiada. N dauwpunt. P temperatura rosy. S daggpunkt. (212,841)

diac

1. **diac** (*Syn.* bidirectional diode thyristor) : → *thyristor 1*

diagnosis

1. **fault diagnosis** : actions taken for fault recognition, fault localization and cause identification. ★ diagnostic de panne → *diagnostic 1.* R определение (существенной) неисправности; диагностирование. D Fehlerdiagnose. E diagnóstico (de una avería). I diagnosi di avaria. N diagnose van een defect. P diagnoza przyczyny niezdatności. S felsökning. (191)
2. **fault diagnosis time** : → *time 61*

diagnostic

1. **diagnostic radiology** ; → *radiology 1*

diagnostic-type

1. **diagnostic-type protective tube housing** : → *housing 4*

diagonal

1. **diagonal leg profile** : → *profile 1*

diagram

1. **block diagram** : relatively simple diagram to facilitate the understanding of the principle of operation of a system. It is a diagram in which a system or part of a system, together with its functional relationships, are represented by symbols, block symbols or pictures, here called functional blocks, without necessarily showing all the connections. *Note.* — A block diagram for a feedback control system contains at least: an input an output a comparing element a forward path a feedback path. ★ schéma fonctionnel → *schéma 5.* R структурная схема; блок-схема. D Signalflußplan; Blockschaltbild. E diagrama bloque; diagrama funcional. I schema a blocchi. N blokschema. P schemat funkcjonalny; schemat blokowy. S översiktsschema; blockschema. (351)
2. **Bode diagram** (*Syn.* frequency-response characteristic) : graphical representation of logarithmic gain and phase angle as functions of the frequency, which is usually represented on a logarithmic scale. ★ courbes de réponse harmonique → *courbe 46.* R логарифмическая частотная характеристика. D Frequenzkennlinien; Bode-Diagramm. E característica de respuesta en frecuencia; diagrama de Bode; característica de respuesta armónica. I diagramma di Bode. N frequentieresponsie-karakteristiek; bodediagram. P charakterystyki częstotliwościowe logarytmiczne; wykresy Bodego. S Bode-diagram. (351)
3. **chromaticity diagram** : a plane diagram in which the distances measured along specified axes represent the trichromatic coordinates of a colour, other than luminance. *Notes. 1* — Two orthogonal axes are normally used, in particular in the case of xy chromaticity diagrams,or in the uniform uv chromaticity diagram of the Commission Internationale de l'Éclairage. *2* — In a chromaticity diagram the real colours occupy a surface area limited on the one side by the curve joining those points representing the monochromatic colours and on the other by the straight line joining the ends of this curve,the so-called purple boundary. ★ diagramme de chromaticité → *diagramme 5.* R график цветностей. (723)
4. **chromaticity diagram** : a plane diagram in which points specified by chromaticity coordinates represent the chromaticities of colour stimuli. *Note.* — In the CIE standard colorimetric systems *y* is normally plotted as ordinate and *x* as abscissa, to obtain an "*x,y* chromaticity diagram". ★ diagramme de chromaticité → *diagramme 6.* R график цветностей. D Farbtafel. E diagrama de cromaticidad. I diagramma colorimetrico. N kleurendriehoek. P wykres chromatyczności. S kromacitetsdiagram. (845)
5. **CIE 1976 UCS diagram** (*Syn.* CIE 1976 uniform-chromaticity-scale diagram) : → *diagram 6*
6. **CIE 1976 uniform-chromaticity-scale diagram** (*Syn.* CIE 1976 UCS diagram) : the uniform-chromaticity-scale diagram produced by plotting in rectangular coordinates v' against u', quantities defined by the equations :

$$u' = \frac{4X}{X + 15Y + 3Z} = \frac{4x}{-2x + 12y + 3}$$

$$v' = \frac{9Y}{X + 15Y + 3Z} = \frac{9y}{-2x + 12y + 3}$$

X, Y, Z are the tristimulus values in the CIE 1931 or 1964 standard colorimetric systems, and *x, y* are the corresponding chromaticity coordinates of the colour stimulus considered. *Note.* — This diagram is a modification of, and supersedes, the CIE 1960 UCS diagram in which *v* was plotted against *u* in rectangular coordinates. The relationships between the two pairs of coordinates are : $u' = u$; $v' = 1{,}5\ v$. ★ diagramme de chromaticité uniforme CIE 1976 → *diagramme 8.* R равноконтрастный цветовой график МКО 1976 г. D empfindungsgemäß gleichabständige Farbtafel CIE 1976; UCS-Farbtafel CIE 1976. E diagrama de cromaticidad uniforme CIE 1976. I diagramma colorimetrico uniforme CIE 1976. N uniform kleurendiagram van de CIE 1976. P wykres chromatyczności CIE 1976 równomierny. S CIE 1976 UCS-diagram. (845)
7. **circle diagram** : the characteristic of a synchronous or asynchronous machine giving the relationship between the active and reactive components of the primary winding current under specified conditions. ★ diagramme du cercle → *diagramme 28.* R круговая диаграмма. D Kreisdiagramm. E diagrama de círculo. I diagramma circolare. N cirkeldiagram. P wykres pracy (kołowy). S cirkeldiagram. (411)
8. **common diagram telecontrol system** (*Syn.* channel selecting telecontrol system) : → *system 25*
9. **energy-level diagram** : a diagram representing the energy levels of the particles of a quantized system by horizontal lines, having for ordinates the energy of these particles. ★ diagramme énergétique → *diagramme 29.* R диаграмма энергетических уровней. D Energieniveau-Diagramm. E diagrama energético. I diagramma energetico. N energieniveauschema. P wykres poziomów energetycznych (czątek). S energinivådiagram. (521)
10. **illumination diagram** (*Syn.* illumination pattern) : → *pattern 13*
11. **iso-intensity diagram** : array of iso-intensity curves. ★ diagramme isointensité → *diagramme 30.* R совокупность изокандел. D Diagramm gleicher Lichtstärke. E diagrama isointensidad. I diagramma isointensità. N isocandela diagram. P wykres izokandeli. S isocandeladiagram. (845)
12. **Jordan diagram** : a graph showing the tangent of the magnetic loss angle, or some closely related quantity, as a function of magnetic field strength within the Rayleigh region, with

frequency as a parameter. ★ diagramme de Jordan → *diagramme 16.* R диаграмма Иордана. D Jordan-Diagramm. E diagrama de Jordan. I diagramma di Jordan. N Jordandiagram. P wykres Jordana. S Jordandiagram. (221)

13. **mimic diagram** (*Syn.* wall diagram) : an arrangement of symbols representing the current state of switchgear and lines of a substation (network) and which may be updateable and may have control functions. ★ schéma synoptique → *schéma 6.* R мнемоническая схема. D Funktionsabbild. E esquema sinóptico. I quadro sinottico. N blindschema. P schemat synoptyczny; tablica synoptyczna. S symbolschema. (605)
14. **phase diagram** (*Syn.* phase pattern) : → *pattern 22*
15. **radiation diagram** (*Syn.* radiation pattern) : → *pattern 26*
16. **reliability block diagram** : block diagram showing, for one or more functional modes of a complex item, how faults of the subitems represented by the blocks, or combinations thereof, result in a fault of the item. ★ diagramme de fiabilité → *diagramme 15.* R блок-схема анализа безотказности. D Zuverlässigkeitsblockdiagramm. E diagrama de bloques de fiabilidad. I diagramma a blocchi dell'affidabilità. N betrouwbaarheidsblokdiagram. P schemat blokowy niezawodności. S funktionssäkerhetsblockschema. (191)
17. **single-line diagram** : a system diagram in which the polyphase links are represented by their equivalent single line. ★ schéma unifilaire d'un réseau → *schéma 9.* R однолинейная схема электрической сети. D Einstrich-Netzschema. E esquema unifilar de una red. I schema unifilare di una rete. N eenfasenetschema. P schemat sieci jednoprzewodowy. S enlinjeschema. (601)
18. **Smith diagram** (*Syn.* Smith chart) : → *chart 8*
19. **state-transition diagram** : a diagram showing the set of possible states of an item and the possible one step transitions between these states. ★ diagramme de transition → *diagramme 24.* R диаграмма состояний и переходов. D Zustandsübergangs-Diagramm. E diagrama de transición de estados. I diagramma di transizione degli stati. N toestandsovergangsdiagram. P schemat zmiany stanów. S tillståndsschema. (191)
20. **system diagram** : a topological representation of a system in which the information content depends on a specific requirement. ★ schéma d'un réseau → *schéma 4.* R схема электрической сети. D Netzschema. E esquema de una red. I schema di una rete. N netschema. P plan sieci. S nätschema. (601)
21. **system operational diagram** : a system diagram representing a particular operational condition. ★ schéma d'exploitation d'un réseau → *schéma 3.* R оперативная схема электрической сети. D Betriebs-Netzschema. E esquema de una red en explotación; esquema de explotación de una red. I schema d'esercizio di una rete. N bedrijfsnetschema. P schemat sieci ruchowy. S driftschema. (601)
22. **three-phase system diagram** : a diagram of a three-phase system in which all phase and neutral conductors are each represented by separate lines. ★ schéma triphasé d'un réseau → *schéma 8.* R трехлинейная схема электрической сети. D Dreiphasen-Netzschema. E esquema trifásico de una red. I schema trifase di una rete. N driefasennetschema. P schemat sieci trójfazowy. S trefasschema. (601)
23. **topological diagram of a network** : the graphical representation of the network topology. ★ schéma topologique d'un réseau → *schéma 7.* R топологическая схема сети. D topologischer Netzplan. E esquema topológico de una red. I schema topologico di una rete. N topologisch schema van een net. P schemat typologiczny sieci elektroenergetycznej. S nätbild. (603)
24. **UCS diagram** (*Syn.* uniform-chromaticity-scale diagram) : → *diagram 25*
25. **uniform-chromaticity-scale diagram** (*Syn.* UCS diagram) : two-dimensional diagram in which the coordinates are defined with the intention of making equal distances represent as nearly as possible equal steps of colour discrimination for colour stimuli of the same luminance throughout the diagram. ★ diagramme de chromaticité uniforme → *diagramme 7.* R равноконтрастный цветовой график. D gleichförmige Farbtafel; UCS-Farbtafel. E diagrama de cromaticidad uniforme. I diagramma colorimetrico uniforme. N uniform kleurenvlak; UCS-vlak. P wykres chromatyczności równomierny. S jämnfördelat kromacitetsdiagram; UCS-diagram. (845)
26. **wall diagram** (*Syn.* mimic diagram) : → *diagram 13*

dial

1. **dial** : the part of an indicating device carrying the scale or scales and generally including other information to characterize the instrument. ★ cadran → *cadran 1.* R циферблат. D Skalenplatte. E esfera. I quadrante. N schaalplaat; wijzerplaat. P podzielnia; tarcza (przyrządu pomiarowego). S skaltavla. (301)
2. **dial** : an apparatus in an automatic telephone set in which each single digit of the telephone number is initiated manually. ★ dispositif manuel de numérotation → *dispositif 75.* R номеронабиратель. D Wählvorrichtung. E dispositivo manual de numeración. I dispositivo di selezione. N kieseenheid. P urządzenie wybiercze ręczne. S impulsgivare. (722)
3. **dial selection** : → *selection 3*
4. **dial tone** : → *tone 13*
5. **dial tone delay** : → *delay 14*
6. **frequency push-button dial** (*Syn.* multifrequency key pad) : → *pad 6*
7. **push-button dial** (*Syn.* key pad) : → *pad 4*
8. **rotary dial** : a dial consisting of a disc the rotation of which produces the calling signals. ★ cadran → *cadran 2.* R дисковый номеронабиратель. D Nummernschalter. E disco (de llamada) (de numeración). I disco combinatore. N kiesschijf. P tarcza numerowa. S fingerskiva. (722)
9. **rotary dial (telephone) set** : → *set 41*
10. **special dial tone** : → *tone 31*

dialling

1. **dialling** (in switching) : the generation, in a network terminal, of signals required for establishing connections automatically. ★ numérotation → *numérotation 9.* R набор номера (в коммутации). D waehlen; anrufen. E numeración (en conmutación). I selezione. N kiezen. P wytwarzanie sygnałów wybierczych. S nummertagning. (714,722)
2. **dialling duration** : → *duration 5*
3. **dialling mistake probability** : → *probability 5*
4. **dialling time** : → *time 45*

dial-tone

1. **dial-tone delay** : → *delay 15*

diamagnetic

1. **diamagnetic substance** : → *substance 2*

diamagnetism

1. **diamagnetism** : a phenomenon by which in the presence of an applied magnetic field a substance acquires a magnetic moment opposing that field. ★ diamagnétisme → *diamagnétisme 1.* R диамагнетизм. D Diamagnetismus. E diamagnetismo. I diamagnetismo. N diamagnetisme. P diamagnetyzm. S diamagnetism. (121)

diameter

1. **arc furnace electrode pitch circle diameter** : → *pitch 1*
2. **average cladding diameter** : the mean value of the cladding diameters along a fibre. ★ diamètre moyen de la gaine → *diamètre 12.* R средний диаметр оболочки. D mittlerer Manteldurchmesser. E diámetro medio del revestimiento. I diametro medio del mantello. N gemiddelde manteldiameter. P przeciętna wartość średnicy płaszcza. S mantelmedeldiameter. (731)
3. **average core diameter** : the mean value of the core diameters along an optical fibre. ★ diamètre moyen du cœur → *diamètre 14.* R средний диаметр сердцевины. D mittlerer Kerndurchmesser. E diámetro medio del núcleo. I diametro medio del nucleo. N gemiddelde kerndiameter. P przeciętna wartość średnicy rdzenia. S kärnmedeldiameter. (731)
4. **average reference surface diameter** : the mean value of the reference surface diameters along a fibre. ★ diamètre moyen de la surface de référence → *diamètre 13.* R средний диаметр опорной поверхности. D mittlerer Bezugsoberflächendurchmesser. E diámetro medio de la superficie de referencia. I diametro medio della superficie di riferimento. N gemiddelde diameter van het

referentie-oppervlak. P przeciętna wartość średnicy powierzchni odniesienia. S referensytas medeldiameter. (731)

5. **beam diameter** (*Syn.* beamwidth) : the distance between two diametrically opposed points where the irradiance is a specified fraction of the beam's peak irradiance. *Note.* — Most commonly applied to beams that are circular or nearly circular in cross section. ★ diamètre → *diamètre 2.* R диаметр пучка; ширина пучка. D Strahldurchmesser; Strahlweite. E diámetro de haz; ancho del haz. I diametro del fascio; larghezza del fascio. N bundeldiameter; bundelbreedte. P średnica wiązki; szerokość wiązki. S strålknippsbredd. (731)
6. **cathode diameter** : → *cathode 7*
7. **cladding diameter** : the diameter of the circle defining the cladding centre. ★ diamètre de la gaine → *diamètre 4.* R диаметр оболочки. D Manteldurchmesser. E diámetro del revestimiento. I diametro del mantello. N manteldiameter. P średnica płaszcza. S manteldiameter. (731)
8. **cladding diameter tolerance** : → *tolerance 3*
9. **core diameter** : the diameter of the circle defining the core centre. ★ diamètre du cœur → *diamètre 8.* R диаметр сердцевины. D Kerndurchmesser. E diámetro del núcleo. I diametro del nucleo. N kerndiameter. P średnica rdzenia. S kärndiameter. (731)
10. **core diameter tolerance** : → *tolerance 5*
11. **diameter equalization** : → *equalization 2*
12. **inner diameter of the recorded surface** : the diameter of the last modulated groove at the point where the lead-out groove commences. ★ diamètre intérieur de la surface gravée → *diamètre 11.* R конечный диаметр зоны записи. D Durchmesser der letzten modulierten Rille. E diámetro interior de la superficie grabada. I diametro interno della superficie modulata. N laatste muziekgroefmiddellijn. P średnica zapisu wewnętrzna. S innerdiameter hos den inspelade ytan. (806)
13. **mode field diameter** : for Gaussian distributions in singlemode fibres it is the diameter at the 1/e points of the optical field amplitude distribution which is also equivalent to the $1/e^2$ points of the optical power distribution. ★ diamètre du champ de mode → *diamètre 7.* R диаметр модового поля. D Felddurchmesser. E diámetro de campo modal. I diametro di campo modale. N modusvelddiameter. P średnica pola modu. S modfältsdiameter. (731)
14. **outer diameter of the recorded surface** : the diameter of the last groove preceding the first modulated groove. ★ diamètre extérieur de la surface gravée → *diamètre 10.* R начальный диаметр зоны записи. D Durchmesser der ersten modulierten Rille. E diámetro exterior de la superficie grabada. I diametro esterno della superficie modulata. N eerste muziekgroefmiddellijn. P średnica zapisu zewnętrzna. S ytterdiameter hos den inspelade ytan. (806)
15. **reference surface diameter** : the diameter of the circle defining the reference surface centre. ★ diamètre de la surface de référence → *diamètre 5.* R диаметр опорной поверхности. D Bezugsoberflächendurchmesser. E diámetro de la superficie de referencia. I diametro della superficie di riferimento. N diameter van het referentieoppervlak. P średnica powierzchni odniesienia. S referensytas diameter. (731)
16. **reference surface diameter tolerance** : → *tolerance 13*

diamond

1. **diamond winding** : → *winding 20*

diaphragm

1. **collimating diaphragm** : a device, having either a fixed or adjustable aperture, for limiting the cross-sectional area or solid angle, of a beam of radiation. ★ diaphragme (de collimation) → *diaphragme 1.* R коллимирующая диафрагма. D Kollimator. E diafragma de colimación. I diaframma collimatore. N bundelend diafragma. P przesłona kolimacyjna. S primärbländare. (881)
2. **diaphragm** (*Syn.* plan bracing) : → *bracing 4*
3. **diaphragm aperture** : → *aperture 13*
4. **light-beam diaphragm** (*Syn.* light-beam localizer) : → *localizer 1*

diascope

1. **diascope** (in a television camera) : equipment permitting the insertion of a test slide into the optical system of a television camera, to permit various adjustments. ★ diascope → *diascope 1.* R диаскоп. (723)

dichotomizing

1. **dichotomizing search** : → *search 2*

dichroic

1. **dichroic filter** : → *filter 12*
2. **dichroic mirror** : → *mirror 1*

dielectric

1. **artificial dielectric** : an inhomogeneous medium which consists of a regular arrangement of scatterers, usually metallic, embedded in a low permittivity dielectric and which reacts to radio waves in a certain frequency range as an homogeneous dielectric with a permittivity differing from that of the low permittivity dielectric. ★ diélectrique artificiel → *diélectrique 7.* R искусственный диэлектрик. D künstliches Dielektrikum. E dieléctrico artificial. I dielettrico artificiale. N kunstmatig diëlektricum. P dielektryk sztuczny. S artificiellt dielektrikum. (712)
2. **artificial dielectric** : a composite material comprising conducting or dielectric elements distributed throughout a dielectric to produce a desired permittivity. ★ diélectrique artificiel → *diélectrique 8.* R искусственный диэлектрик. D künstliches Dielektrikum. E dieléctrico artificial. I dielettrico artificiale. N kunstmatig diëlektricum. P dielektryk sztuczny; dielektryk kompozycyjny. S artificiellt dielektrikum. (726)
3. **dielectric** : a substance whose basic electromagnetic property is to be polarized by an electric field. *Note.* — In practice insulating materials are often called dielectrics when permittivity is an important property concerned in use. ★ diélectrique → *diélectrique 6.* R диэлектрик. D Dielektrikum. E dieléctrico. I dielettrico. N diëlektricum. P dielektryk. S dielektrikum. (121,212)
4. **dielectric dissipation factor** : → *factor 41*
5. **dielectric dissipation factor** : → *factor 42*
6. **dielectric dry test** : → *test 22*
7. **dielectric heater** : → *heater 1*
8. **dielectric heating** : → *heating 5*
9. **dielectric heating oven** : → *oven 1*
10. **dielectric lens** : → *lens 3*
11. **dielectric loss** : → *loss 16*
12. **dielectric loss angle** : → *angle 24*
13. **(dielectric) loss index** : → *index 9*
14. **(dielectric) loss index** : → *index 10*
15. **(dielectric) loss tangent** (*Syn.* dielectric dissipation factor) : → *factor 42*
16. **dielectric (medium)** : → *medium 8*
17. **dielectric rod antenna** : → *antenna 38*
18. **dielectric waveguide** : → *waveguide 4*
19. **dielectric wet test** : → *test 23*
20. **ideal dielectric** (*Syn.* perfect dielectric) : → *dielectric 22*
21. **mixed dielectric capacitor** : → *capacitor 49*
22. **perfect dielectric** (*Syn.* ideal dielectric) : an ideal dielectric medium in which a variable electric field produces an electric current density vector J of zero magnitude in a given direction in a particular frequency band. *Notes.* — For a homogeneous medium, the medium is a perfect dielectric in a given direction if the conductivity σ may be considered zero in this direction. *2* — Vacuum is a perfect dielectric at any frequency. ★ (milieu) diélectrique parfait → *diélectrique 22.* D ideales Dielektrikum. P dielektryk idealny. (705)

diesel-electric

1. **diesel-electric motor vehicle** : → *vehicle 4*

difference

1. **CIE 1976 $L^* a^* b^*$ colour difference** (*Syn.* CIELAB colour difference) (ΔE^*_{ab}) : the difference between two colour stimuli defined as the Euclidean distance between the points representing them in the L^*, a^*, b^* space and calculated as equation:

$$\Delta E^*_{ab} = [(\Delta L^*)^2 + (\Delta a^*)^2 + (\Delta b^*)^2]^{1/2}$$

Note. — The CIE 1976 *a, b* hue-difference may be calculated as follows : "CIE 1976 *a, b* hue-difference"

$$\Delta H^*_{ab} = [(\Delta E^*_{ab})^2 - (\Delta L^*)^2 - (\Delta C^*_{ab})^2]^{1/2}$$

(See CIE-Publication No.15.2). ★ différence de couleur $L^* a^* b^*$ CIE 1976 → *différence 6.* R разность цветов МКО 1976 г. $L^* a^* b^*$. D $L^* a^* b^*$ Farbabstand CIE 1976; CIELAB-Farbabstand. E diferencia de color CIELAB. I differenza di colore *L a b* CIE 1976; differenza di colore CIELAB. N ($L^* a^* b^*$)kleurverschil van de CIE 1976. P różnica barw CIE 1976 ($L^* a^* b^*$). S CIELAB-färgdifferens. (845)

2. **CIE 1976 $L^* u^* v^*$ colour difference** (*Syn.* CIELUV colour difference) (ΔE^*_{uv}) : the difference between two colour stimuli, defined as the Euclidean distance between the points representing them in the $L^* u^* v^*$ space and calculated as equation :

$$\Delta E^*_{uv} = [(\Delta L^*)^2 + (\Delta u^*)^2 + (\Delta v^*)^2]^{1/2}$$

Note. — The CIE 1976 *u, v* hue-difference may be calculated as follows : "CIE 1976 *u, v* hue-difference"

$$\Delta H^*_{uv} = [(\Delta E^*_{uv})^2 - (\Delta L^*)^2 - (\Delta C^*_{uv})^2]^{1/2}$$

(See CIE Publication No.15.2). ★ différence de couleur $L^* u^* v^*$ CIE 1976 → *différence 7.* R разность цветов МКО 1976 г. $L^* u^* v^*$. D $L^* u^* v^*$ Farbabstand CIE 1976; CIELUV-Farbabstand. E diferencia de color CIELUV. I differenza di colore $L^* u^* v^*$ CIE 1976; differenza di colore CIELUV. N ($L^* u^* v^*$)kleurverschil van de CIE 1976. P różnica barw CIE 1976 ($L^* u^* v^*$). S CIELUV-färgdifferens. (845)

3. **CIELAB colour difference** (*Syn.* CIE 1976 $L^* a^* b^*$ **colour difference**) : → *difference 1*
4. **CIELUV colour difference** (*Syn.* CIE 1976 $L^* u^* v^*$ **colour difference**) : → *difference 2*
5. **colour difference signal** : → *signal 51*
6. **contact potential difference** : the voltage across the interface of two media or across the junction of two different materials in the absence of current. ★ force électromotrice de contact → *force électromotrice 7.* R контактная электродвижущая сила. D Kontaktpotential (-differenz). E fuerza electromotriz de contacto; fem de contacto. I forza elettromotrice di contatto. N contactpotentiaal. P siła elektromotoryczna kontaktowa; SEM kontaktowa. S kontaktpotential. (121)
7. **contact potential difference** : the difference between the work functions of two materials, divided by the elementary charge. ★ différence de potentiel de contact → *différence 14.* R контактная разность потенциалов. D Kontaktspannung. E diferencia de potencial de contacto. I differenza di potenziale di contatto. N contactpotentiaal. P napięcie kontaktowe. S kontaktpotentialdifferens. (531)
8. **contact time difference** : for a relay having several contacts of the same type (make contacts or break contacts), the difference between the maximum value of the operate (release) time of the slower and the minimum value of the operate (release) time of the faster. ★ dispersion des temps de contact → *dispersion 10.* R разновременность контактов. D Kontaktzeitdifferenz. E dispersión de los tiempos de contacto. I disposizione dei tempi di contatto. N contacttijdverschil. P różnica czasu działania zestyków. S tidskillnad mellan kontakter. (446)
9. **difference galvanometer** : → *galvanometer 2*
10. **difference in levels** : the vertical distance between the two horizontal planes passing through the attachment points of the conductor of an inclined span. ★ dénivellation → *dénivellation 1.* R разность высот точек подвеса. D Höhenunterschied. E desnivel. I dislivello. N hoogteverschil. P różnica wysokości zawieszenia. S nivåskillnad. (466)
11. **difference ionization chamber** : → *ionization chamber 9*
12. **difference limen for loudness** : → *limen 1*
13. **difference limen for pitch** : → *limen 2*
14. **difference scaler** : → *scaler 1*
15. **difference signal** : → *signal 71*
16. **electrical path length difference** (*Syn.* path length difference) : → *difference 23*
17. **ESI refractive index difference** : the difference between the refractive index of the core and the refractive index of the cladding in an ESI-profile. ★ saut d'indice équivalent → *saut 10.* R разность показателей преломления в эквивалентном ступенчатом профиле. D ESI-Brechzahldifferenz. E diferencia en el índice de refracción en un perfil ESI. I differenza d'indice di rifrazione in un profilo ESI. N ESI-brekingsindexverschil. P różnica równoważnego profilu skokowego. S ekvivalent indexskillnad. (731)
18. **level difference** (*Syn.* sound isolation between rooms) : in decibels, difference in space and time average sound pressure levels produced in two rooms by one or more sound sources in one of them. ★ isolement acoustique brut → *isolement 10.* R звукоизоляция между помещениями. D Schallpegeldifferenz; Schallisolation zwischen Räumen. E aislamiento acústico bruto. I isolamento acustico. N geluidsisolatie tussen kamers. P różnica poziomów akustycznych; izolacyjność akustyczna pomieszczenia. S nivåskillnad. (801)
19. **luminance difference threshold** : → *threshold 7*
20. **mean phase difference between related information** : the phase difference between two channels of related information (e.g. stereo) resulting from incorrect head-gap alignment with respect to a specified calibration tape. ★ différence de phase moyenne entre deux voies associées → *différence 12.* R средний сдвиг фаз между сигналами коррелированной информации. D mittlerer Phasenunterschied zwischen verwandter Information. E diferencia de fase media entre dos canales asociados. I errore di fase medio tra due informazioni sincrone. N gemiddeld faseverschil tussen twee gerelateerde signalen. P różnica fazy średnia między dwoma kanałami (transmitującymi skorelowaną informację). S kanalfasfel mellan sammanhörande information. (806)
21. **negative phase difference** (*Syn.* phase lead (of an electromagnetic wave)) : the negative difference between the phase delay of a sinusoidal electromagnetic wave and a reference phase delay. ★ avance de phase → *avance 4.* D negative Phasenverschiebung. P różnica fazy ujemna. (705)
22. **normalized level difference** (*Syn.* standardized sound isolation between rooms) : in decibels, level difference between rooms plus ten times the common logarithm of the ratio of the reverberation time in the receiving room to the reference reverberation time. *Note.* — For dwellings, reference reverberation time is 0,5s. ★ isolement acoustique normalisé → *isolement 12.* R приведённая звукоизоляция. D Norm-Schallpegeldifferenz. E aislamiento acústico normalizado. I isolamento acustico normalizzato. N genormeerde geluidsisolatie. P różnica poziomów akustycznych normowa. S normerad nivåskillnad. (801)
23. **path length difference** (*Syn.* electrical path length difference) : the difference between the lengths of two separate ray paths between two points ; these lengths are generally expressed in wavelengths along the paths considered. ★ différence de marche → *différence 9.* D Wegunterschied; Wegdifferenz. P różnica długości drogi. (705)
24. **peak to peak phase difference between related information** : phase instability between two channels intended to transmit related information, as in stereophony, produced by variation in the direction of tape movement passing the magnetic head gap. ★ différence de phase crête à crête entre deux voies associées → *différence 11.* R двойное пиковое значение сдвига фаз между сигналами коррелированной информации. D Spitze-Spitze Phasenunterschied zwischen verwandter Information. E diferencia de fase pico a pico entre dos canales asociados. I errore di fase massimo (cresta-a-cresta) tra due informazioni sincrone. N top-top-faseverschil tussen twee gerelateerde signalen. P różnica fazy międzyszczytowa między dwoma kanałami (transmitującymi skorelowaną informację). S kanalfasvariation mellan samhörande information. (806)
25. **phase difference** (of one sinusoidal quantity with respect to another of the same period) : for two quantities $A \cos(\omega t + \alpha)$ and $B \cos(\omega t + \beta)$, the phase angle $\alpha - \beta \pm 2k\pi$ (where k is an integer), of absolute value not greater than π. ★ différence de phase → *différence 10.* R разность фаз (одной синусоидальной величины по отношению к другой, имеющей тот же самый период). D Phasenverschiebungswinkel. E diferencia de fase (de una magnitud sinusoidal con relación a otra del mismo período); desfase (de una magnitud sinusoidal con relación a otra del mismo período). I differenza di fase (di una grandezza sinusoidale rispetto a un'altra di ugual periodo). N faseverschil. P przesunięcie fazowe. S fasdifferens. (101)
26. **phase difference** (*Syn.* phase displacement) : → *displacement 13*
27. **positive phase difference** (*Syn.* phase lag (of an electromagnetic wave)) : the positive difference between the phase delay of a sinusoidal electromagnetic wave and a reference

phase delay. ★ retard de phase → *retard 25.* D positive Phasenverschiebung. P różnica fazy dodatnia. (705)

28. **space phase difference** : that part of the phase differece at a point between two travelling sinusoidal waves from different sources having the same frequency, due to the difference between the phase delays between the two sources and the point considered. ★ différence de phase spatiale → *différence 13.* D abstandbedingte Phasendifferenz. P różnica fazy przestrzennej. (705)

differential

1. **adaptive differential pulse code modulation** : → *modulation 1*
2. **compound motor (cumulative or differential)** : → *motor 17*
3. **detection differential** (*Syn.* recognition differential) : for a specified aural detection system, that amount by which the signal level exceeds the noise level presented to the ear for a stated probability of detection. *Note.* — The bandwith of the system, within which signal and noise are presented and measured, must be specified. ★ différence de détection → *différence 8.* R разностное обнаружение; разностное различение. D Unterschiedsschwelle. E diferencia de detección; diferencia de reconocimiento. I soglia differenziale. N differentiële (relatieve) detectiedrempel. P rozpoznanie różnicowe. S ..... (801)
4. **differential absorption ratio** : → *ratio 27*
5. **differential amplitude distortion** : → *distortion 25*
6. **differential compounded** : → *compounded 2*
7. **differential coupler** : → *coupler 8*
8. **differential coupler** : → *coupler 9*
9. **differential cross-section** : → *cross-section 8*
10. **differential dE/dx semiconductor detector** : → *semiconductor detector 4*
11. **differential duplex** : → *duplex 2*
12. **differential force** : → *force 15*
13. **differential gain distortion** (*Syn.* differential amplitude distortion) : → *distortion 25*
14. **differential gap** : → *gap 3*
15. **differential input** : → *input 6*
16. **differential measuring instrument** : → *measuring instrument 4*
17. **differential (method of) measurement** : → *measurement 4*
18. **differential mode attenuation** : → *attenuation 16*
19. **differential mode delay** : → *delay 16*
20. **differential mode voltage** : → *voltage 47*
21. **differential modulation** : → *modulation 16*
22. **differential movement** : → *movement 1*
23. **differential permeability** : → *permeability 6*
24. **differential phase distortion** : → *distortion 27*
25. **differential phase shift keying** : → *keying 2*
26. **differential phase-shift** : → *phase-shift 1*
27. **differential pulse code modulation** : → *modulation 17*
28. **differential quantum efficiency** : → *efficiency 14*
29. **differential relay** : → *relay 8*
30. **differential temperature** : → *temperature 14*
31. **differential transformer** (*Syn.* induction coil) : → *coil 25*
32. **(longitudinal) differential protection system** : → *system 108*
33. **negative differential resistance region** : → *region 13*
34. **object backscattering differential** : → *backscattering 5*
35. **recognition differential** (*Syn.* detection differential) : → *differential 3*
36. **relative differential limen of frequency** : → *limen 3*
37. **surface or bottom backscattering differential** (*Syn.* surface or bottom scattering strength) : backscattered sound pressure level that would exist at unit distance from the acoustic centre of a scattering surface or bottom element, minus the sound pressure level of a plane wave incident on the scattering surface or bottom. ★ indice de réverbération de surface ou de fond → *indice 32.* R сила цели поверхности или дна в обратном направлении. D Oberflächen-Rückstreumaß. E índice de reverberación de superficie o de fondo. I indice di riverberazione di superficie o di fondo. N terugverstrooiingsfactor van het oppervlak of de bodem. P indeks pogłosowy powierzchniowy; siła rozpraszania powierzchniowego lub dna. S återspridningsmått (för en yta eller botten). (801)
38. **transverse differential protection system** : → *system 241*
39. **volume backscattering differential** : → *backscattering 7*

differentiating

1. **differentiating circuit** (*Syn.* differentiator) : → *differentiator 1*

differentiator

1. **differentiator** (*Syn.* differentiating circuit) : a device for producing an output quantity proportional to the time derivative of the input quantity. ★ différentiateur → *différentiateur 1.* R дифференцирующее устройство. D Differenzierer; Differenzierungsschaltung. E diferenciador; derivador. I derivatore. N differentiator; differentiërende schakeling. P układ różniczkujący. S differentieringskrets. (702)

diffracted

1. **diffracted wave** : → *wave 8*

diffraction

1. **diffraction** : the phenomenon whereby the propagation of a wave differs from that predicted by geometric optics due to the influence on that wave of an opening, obstruction or inhomogeneity in the medium. ★ diffraction → *diffraction 5.* R дифракция. D Beugung. E difracción. I diffrazione. N buiging; diffractie. P ugięcie; dyfrakcja. S diffraktion. (705,731,845)
2. **diffraction** : phenomenon by which a sound wave is changed in direction by an obstacle or other heterogeneity in the medium. ★ diffraction acoustique → *diffraction 6.* R акустическая дифракция (дифракция звука). D Diffraktion; Beugung. E difracción acústica. I diffrazione acustica. N buiging. P dyfrakcja; ugięcie. S diffraktion; böjning. (801)
3. **diffraction factor** : → *factor 43*
4. **diffraction grating** : → *grating 1*
5. **diffraction region** : → *region 2*
6. **edge diffraction** : tropospheric propagation due to diffraction by a transverse obstacle such as a hill or mountain, with a relatively sharp profile and located between the transmission and reception points. *Note.* — Edge diffraction may result in trans-horizon propagation. ★ diffraction par une arête → *diffraction 7.* D Kantenbeugung. P ugięcie krawędziowe. (705)
7. **far-field diffraction pattern** : → *pattern 7*
8. **Fraunhofer diffraction pattern** (*Syn.* far-field diffraction pattern) : → *pattern 7*
9. **Fresnel diffraction pattern** (*Syn.* near-field diffraction pattern) : → *pattern 16*
10. **knife-edge diffraction** : an edge diffraction by an obstacle for which the radius of curvature at the top is negligible with respect to the wavelength. ★ diffraction par une arête vive → *diffraction 9.* D Beugung an einer scharfen Kante. P ugięcie ostrzowe. (705)
11. **near-field diffraction pattern** : → *pattern 16*
12. **spherical diffraction** : tropospheric propagation due to diffraction by the spherical surface of the Earth, or more generally by any rounded obstacle which is extremely large in relation to the wavelength. *Note.* — Spherical diffraction may result in trans-horizon propagation. ★ diffraction sphérique → *diffraction 10.* D (Ausbreitung bei) sphärische(r) Beugung. P ugięcie sferyczne (propagacji). (705)

diffuse

1. **diffuse layer potential** : → *layer 7*
2. **diffuse reflectance** : → *reflectance 1*
3. **diffuse reflection** : → *reflection 4*
4. **diffuse reflection** : → *reflection 5*
5. **diffuse sky radiation** : → *radiation 17*
6. **diffuse sound field** : → *sound field 1*
7. **diffuse transmission** : → *transmission 16*
8. **diffuse transmittance** : → *transmittance 1*
9. **isotropic diffuse reflection** : → *reflection 11*
10. **isotropic diffuse transmission** : → *transmission 39*

diffused

1. **diffused junction semiconductor detector** : → *semiconductor detector 5*
2. **diffused lighting** : → *lighting 4*
3. **general diffused lighting** : → *lighting 9*

diffuse-field

1. **diffuse-field distance** : → *distance 6*
2. **diffuse-field sensitivity** : → *sensitivity 8*

diffuser

1. **diffuser** : device used to alter the spatial distribution of radiation and depending essentially on the phenomenon of diffusion. *Note.* — If all the radiation reflected or transmitted by the diffuser is diffused with no regular reflection or transmission, the diffuser is said to be completely diffusing, independently of whether or not the reflection or transmission is isotropic. ★ diffuseur → *diffuseur 2.* R рассеиватель. D Diffusor. E difusor. I diffusore. N diffusor; verstrooier. P rozpraszacz. S diffusor. (845)
2. **diffuser** : device used to alter the spatial distribution of the luminous flux from a source and depending essentially on the phenomenon of diffusion. ★ diffuseur → *diffuseur 3.* R рассеиватель. D Diffusor; lichtstreuender Körper. E difusor. I diffusore. N diffusor. P rozpraszacz. S diffusor. (845)
3. **perfect reflecting diffuser** : ideal isotropic diffuser with a reflectance equal to 1. ★ diffuseur parfait par réflexion → *diffuseur 4.* R совершенный отражающий рассеиватель. D vollkommen mattweißes Medium bei Reflexion. E difusor perfecto por reflexión. I diffusore perfetto per riflessione. N perfecte diffusor door reflectie. P rozpraszacz doskonały przy odbiciu. S totalreflekterande diffusor. (845)
4. **perfect transmitting diffuser** : ideal isotropic diffuser with a transmittance equal to 1. ★ diffuseur parfait par transmission → *diffuseur 5.* R совершенный пропускающий рассеиватель. D vollkommen mattweißes Medium bei Transmission. E difusor perfecto por transmisión. I diffusore perfetto per trasmissione. N perfecte diffusor door doorlating. P rozpraszacz doskonały przy przepuszczaniu. S totaltransmitterande diffusor. (845)

diffusion

1. **(chemical or electrochemical) diffusion** : the transport of particles due to the effect of a concentration gradient. ★ diffusion (chimique ou électrochimique) → *diffusion 16.* R (электрохимическая или химическая) диффузия. D (chemische oder elektrochemische) Diffusion. E difusión (química o electroquímica). I diffusione (chimica o elettrochimica). N (chemische of elektrochemische) diffusie. P dyfuzja (chemiczna lub elektrochemiczna). S diffusion. (111)
2. **diffusion** (in a semiconductor) : the movement of particules caused only by a concentration gradient. ★ diffusion → *diffusion 12.* R диффузия (в полупроводнике). D Diffusion (in einem Halbleiter). E difusión (en un semiconductor). I diffusione (in un semiconduttore). N diffusie (in een halfgeleider). P dyfuzja (w półprzewodniku). S diffusion. (521)
3. **diffusion** (*Syn.* scattering) : process by which the spatial distribution of a beam of radiation is changed when it is deviated in many directions by a surface or by a medium, without change of frequency of its monochromatic components. *Note.* — A distinction is made between selective diffusion and non-selective diffusion according to whether or not the diffusing properties vary with the wavelength of the incident radiation. ★ diffusion → *diffusion 14.* R рассеяние. D Streuung. E difusión. I diffusione. N verstrooiing; diffusie. P rozpraszanie. S diffusion. (705,841,845)
4. **diffusion area** : → *area 13*
5. **diffusion chamber** : → *chamber 7*
6. **diffusion coefficient for neutron flux density** : → *coefficient 16*
7. **diffusion constant** : → *constant 17*
8. **diffusion factor** : → *factor 44*
9. **diffusion length** : → *length 4*
10. **diffusion length** : → *length 5*
11. **diffusion technique** : → *technique 6*
12. **indicatrix of diffusion** (for a specified incident beam) (*Syn.* scattering indicatrix) : representation in space, in the form of a surface expressed in polar coordinates, of the angular distribution of (relative) radiant or luminous intensity or of (relative) radiance or luminance of an element of surface of a medium that diffuses by reflection or transmission. *Notes. 1* — For a narrow incident beam of radiation, it is convenient to represent the indicatrix of diffusion in Cartesian coordinates. If the angular distribution has rotational symmetry, a meridian section of the surface is sufficient. *2* — The term indicatrix is often used to denote, instead of the surface, the curve obtained in a similar manner in a plane normal to the element concerned. ★ indicatrice de diffusion → *indicateur 23.* R индикатриса рассеяния (для данного падающего пучка лучей). D Streuindikatrix (für ein gegebenes einfallendes Strahlungsbündel). E indicatriz de difusión. I indicatrice di diffusione. N verstrooiingsindicatrix. P wskaźnikowa rozpraszania. S diffusionsindikatris. (845)
13. **neutron diffusion** : a phenomenon in which neutrons in a medium tend, through a process of successive scattering collisions, to migrate from regions of high concentration to regions of low concentration. ★ diffusion des neutrons → *diffusion 21.* D Neutronendiffusion. E difusión neutrónica. I diffusione neutronica. N neutronendiffusie. P dyfuzja neutronów. S neutrondiffusion. (026)

diffusivity

1. **thermal diffusivity** (*a*) : the quotient of the thermal conductivity of a body by the product of its specific heat capacity and its specific mass. ★ diffusion thermique → *diffusion 31.* R температуропроводность. D Temperaturleitzahl. E difusibilidad térmica. I diffusione termica. N temperatuurvereffeningscoëfficiënt. P dyfuzyjność cieplna. S värmediffusivitet. (841)

dig

1. **recording angle or dig** (*Syn.* rake of stylus) : → *rake 1*

digit

1. **binary digit** (*Syn.* bit (abbreviation)) : a member of a set of two elements commonly used to represent information. *Note.* — The terms "unit element" and "unit" used in telegraph transmission may not be used for the term bit. ★ élément binaire → *élément 10.* R двоичная единица; бит. D Binärziffer; Bit. E elemento binario; bit. I elemento binario; bit. N binair cijfer; bit. P binarny element cyfrowy; bit. S bit. (702,721)
2. **binary digit rate** : → *rate 4*
3. **check digit** : a digit associated, according to a specified rule, with the groups of elements defined by a non-redundant code in order to change this code into an error protection code. ★ chiffre de contrôle → *chiffre 4.* R проверочный символ. D Prüfziffer. E dígito de control. I cifra di controllo. N controlecijfer. P element zabezpieczający. S kontrollsiffra. (721)
4. **digit** (in telecommunication) : a member of a finite set of integers used to represent information. *Note.* — A digit may be represented by a signal element. ★ élément numérique → *élément 63.* R цифровой элемент (в электросвязи). D Ziffer (in der Telekommunikation). E elemento numérico; dígito (en telecomunicación). I elemento numerico. N cijfer. P cyfra (w telekomunikacji). S siffra. (702)
5. **digit** (in telecommunication signalling) : an element of address or other information that can be represented by a number less than the radix. *Note.* — In some signalling systems, members of the set of digits may be represented by symbols normally associated with alphabetic characters. ★ chiffre → *chiffre 2.* R цифра (в сигнализации электросвязи). D Waehlziffer. E cifra (en señalización de telecomunicación); dígito (en señalisación de telecomunicación). I cifra. N cijfer. P cyfra (w sygnalizacji telekomunikacyjnej). S siffra. (714)
6. **digit** : a member of a finite set of integers used to represent information. *Notes. 1* — A digit may be represented by a signal element. *2* — In equipment used in digital transmission, a digit may be represented by a specified physical condition, e.g. a binary magnetic condition of a ferrite core. *3.* — The English term "digit" is translated in French by "chiffre" when used in decimal numeration system to represent 1, 2, ..., 9, 0. ★ élément numérique → *élément 64.* R цифра; символ. D Ziffer. E elemento numérico; dígito. I elemento numerico. N cijfer. P element cyfrowy. S siffra. (721)
7. **digit absorption** : → *absorption 17*
8. **digit deletion** : → *deletion 1*

9. **digit error ratio** : → *ratio 28*
10. **digit position** : → *position 6*
11. **digit rate** : → *rate 21*
12. **digit sequence integrity** : → *integrity 1*
13. **digit time-slot** : → *time-slot 2*
14. **effective digit rate** : → *rate 25*
15. **erroneous binary digit** : binary digit which has been changed by a mutilation. ★ élément binaire erroné → *élément 11.* R ошибочная двоичная цифра. D fehlerhafes Bit. E elemento binario erróneo. I bit errato. N fout binair digit. P bit błędny. S felbit. (721)
16. **erroneous digit** : digit which has been changed by a mutilation. ★ élément numérique erroné → *élément 67.* R ошибочный символ. D fehlerhafte Ziffer. E dígito erróneo. I bit errato. N foutdigit. P element błędny. S felsiffra. (721)
17. **housekeeping digits** (*Syn.* service digits) : → *digit 26*
18. **justifiable digit time-slot** : → *time-slot 4*
19. **justification service digit** (*Syn.* stuffing service digit) : a digit that transmits information concerning the action taken at a justification instant. ★ élément (numérique) de service de justification → *élément 66.* R служебный символ цифрового выравнивания. D Justierungsbetriebsziffer; Füllungs-Betriebziffer. E elemento (numérico) de servicio de justificación. I elemento (numerico) di servizio di giustificazione. N justeerdienstcijfer. P cyfra dopełniająca służbowa. S statussiffra för taktanpassning. (704)
20. **justifying digit** (*Syn.* stuffing digit) : an arbitrary digit inserted in a justifiable digit time-slot when the prevailing timing relationship does not require the transmission of a digit of the original digital signal at that instant. ★ élément (numérique) de justification → *élément 65.* R выравнивающий символ. D Justierungsziffer; Füllziffer. E elemento (numérico) de justificación. I elemento (numerico) di giustificazione. N justeercijfer. P cyfra dopełniająca. S taktanpassningssiffra. (704)
21. **line digit rate** : → *rate 49*
22. **n-ary digit** : a member selected from a n-ary set. ★ élément n-aire → *élément 61.* R H - ичная цифра. D Ziffer der Stufenzahl n; n-stufige Ziffer. E elemento n-ario. I cifra multipla. N n-tallig getal. P element (cyfrowy) n-tkowy. S n-när siffra. (702,721)
23. **n-ary digit rate** : → *rate 59*
24. **overhead digits** (*Syn.* service digits) : → *digit 26*
25. **parity digit** : an n-ary digit appended to an array of n-ary digits to make the sum modulo n of all the digits always equal to zero or to any predetermined digit. *Note.* — In the binary case the parity digit becomes parity bit. ★ élément de parité → *élément 34.* R символ проверки на четность (нечетность). D Paritätsziffer. E dígito de paridad. I bit di parità. N pariteitscontrolecijfer. P element parzystościowy. S paritetssiffra. (721)
26. **service digits** (*Syn.* housekeeping digits; overhead digits (USA)) : ancillary signal elements, normally added at regular intervals to a digital signal at the sending end and removed at the receiving end of a transmission path, mainly used to ensure that when the sending equipment carries out a process on the digital signal, particularly an aperiodic process, the receiving equipment carries out the corresponding complementary process. ★ éléments numériques de service → *élément 78.* R служебные разряды; дополнительные разряды; вспомогательные разряды. D Service-Bits; Service-Symbole; Betriebsziffer. E elementos numéricos de servicio; dígitos de servicio. I elementi numerici di servizio; bit di servizio. N dienstcijfers. P cyfry służbowe. S tjänstesiffra. (704,721)
27. **speech digit signalling** : → *signalling 58*
28. **stuffable digit time-slot** (*Syn.* justifiable digit time-slot) : → *time-slot 4*
29. **stuffing digit** (*Syn.* justifying digit) : → *digit 20*
30. **stuffing service digit** (*Syn.* justification service digit) : → *digit 19*
31. **ternary digit rate** : → *rate 88*

digital

1. **binary (digital) signal** : → *signal 25*
2. **composite (digital) coding** : → *coding 3*
3. **digital ammeter** : → *ammeter 2*
4. **digital block** : → *block 14*
5. **(digital) component coding** : → *coding 4*
6. **digital compression** : → *compression 10*
7. **digital demultiplexer** : → *demultiplexer 2*
8. **digital distribution frame** : → *frame 6*
9. **digital error** : → *error 21*
10. **digital filling** : → *filling 1*
11. **digital line link** : → *link 8*
12. **digital line section** : → *section 5*
13. **digital line system** : → *system 42*
14. **digital link** : → *link 9*
15. **digital (measuring) instrument** : → *measuring instrument 5*

51. **standardized digital signal** : → *signal 216*
52. **standardized 64 kbit/s digital signal** : → *signal 217*
53. **ternary (digital) signal** : → *signal 239*
54. **tertiary digital group** : → *group 55*
55. **(uniform) multivalue digital signal** : → *signal 246*

digital-to-analogue

1. **digital-to-analogue conversion** : → *conversion 17*

digroup

1. **digroup** (*Syn.* primary digital group) : → *group 50*

dihedral

1. **dihedral corner reflector** : → *reflector 4*

dim

1. **dim** : adjective used to describe low levels of brightness. ★ obscur → *obscur 1.* R тусклый. D dunkel. E ténue. I fioco. N donker. P przyćmiony. S mörk. (845)

dimension

1. **effective dimensions** (of a magnetic circuit) : for a magnetic core operating within the Rayleigh region, and having given geometry and material properties, the magnetic path length, the cross-sectional area and the volume that a

hypothetical toroidal core of the same material properties and of radially thin uniform cross-section should possess to be magnetically equivalent to the given core. *Notes. 1* — The effective dimensions are : effective cross-sectional area

$$A_e = \frac{C_1}{C_2}$$

effective magnetic path length,

$$l_e = \frac{C_1^2}{C_2}$$

effective volume,

$$V_e = \frac{C_1^3}{C_2^2}$$

where C_1 and C_2 are the appropriate core factors hence:

$$C_1 = \frac{l_e}{A_e}$$

$$C_2 = \frac{l_e}{A_e^2}$$

$$V_e = l_e A_e$$

2 — These formulae can also apply to a magnetic circuit operating outside the limit of the Rayleigh region provided the magnetization can be assumed to be uniform, for example as in an Epstein square. ★ dimensions équivalentes → *dimension 3.* R эффективные размеры магнитной цепи. D effektive Abmessungen (eines magnetischen Kreise). E dimensiones equivalentes (de un circuito magnético); dimensiones efectivas (de un circuito magnético). I dimensioni equivalenti (di un circuito magnetico); dimensioni effettive (di un circuito magnetico). N effectieve afmetingen van een magnetisch circuit. P wymiary równoważne magnetowodu. S effektiva dimensioner hos magnetisk krets. (221)

dimensional

1. **dimensional output** : → *output 4*

dimensioned

1. **standard dimensioned motor** : → *motor 99*

diminution

1. **field strength diminution factor** : → *factor 79*

dimmer

1. **dimmer** : a device in the electric circuit for varying the luminous flux from lamps in a lighting installation. ★ gradateur → *gradateur 2.* R регулятор. D Lichtsteuergerät. E regulador (de luz). I variatore di luce. N dimmer; lichtregelaar. P ściemniacz. S ljusregulator. (845)

diode

1. **bidirectional diode thyristor** : → *thyristor 1*
2. **Burrus diode** (*Syn.* surface emitting light emitting diode) : → *diode 22*
3. **diode** : an electronic tube containing only an anode and a cathode. ★ diode → *diode 3.* R диод. D Diode. E diodo. I diodo. N diode. P dioda. S diod. (531)
4. **diode characteristic** : → *characteristic 32*
5. **diode gun** : → *gun 3*
6. **diode laser** (*Syn.* injection laser diode) : → *diode 11*
7. **diode perveance** : → *perveance 1*
8. **edge-emitting light emitting diode** (*Syn.* ELED (abbreviation)) : a light emitting diode which emits its optical radiation parallel to the plane of the junction. ★ diode électroluminescente à émission longitudinale → *diode 13.* R светодиод с торцевым излучением. D kanten-emittierende LED; ELED (Abkürzung). E diodo emisor de luz con emisión longitudinal; ELED (abreviatura). I LED ed emissione di spigolo. N zijwaarts lichtgevende diode. P dioda (elektroluminescencyjna) krawędziowa. S kantemitterande lysdiod. (731)
9. **ideal diode** : a 2-terminal ideal circuit element defined by zero resistance for one direction of current and infinite resistance for the reverse direction. ★ diode idéale → *diode 15.* R идеальный диод. D ideale Diode. E diodo ideal. I diodo ideale. N ideale diode. P dioda idealna. S ideal diod. (131)
10. **ideal noise diode** : a diode that has an infinite internal impedance and in which the current exhibits full shot-noise fluctuations. ★ diode idéale de bruit → *diode 16.* R идеальный шумовой диод. D ideale Rauschdiode. E diodo ideal de ruido. I diodo ideale di rumore. N ideale ruisdiode. P dioda szumowa idealna. S ideal brusdiod. (531)
11. **injection laser diode** (*Syn.* ILD (abbreviation); semiconductor laser; diode laser) : a laser device fabricated using semiconductor materials with a PN junction. ★ laser semiconducteur → *laser 5.* R инжекционный лазер; полупроводниковый лазер. D Halbleiterlaser; ILD (Abkürzung). E diodo láser de inyección; ILD (abreviatura); láser semiconductor; diodo láser. I diodo laser a iniezione; laser a semiconduttore; diodo laser. N injectie-laserdiode; halfgeleiderlaser; laserdiode. P laser półprzewodnikowy; dioda laserowa; laser złączowy. S diodlaser. (731)
12. **light emitting diode** (*Syn.* LED (abbreviation)) : a PN junction semiconductor device that, by spontaneous emission, emits incoherent optical radiation by injecting electrons and/or holes across the PN junction. ★ diode électroluminescente → *diode 11.* R светодиод; СИД (сокращение). D lichtemittierende Diode; LED (Abkürzung). E diodo emisor de luz; LED (abreviatura). I diodo emettitore di luce; diodo elettro-luminescente; LED (abbreviazione). N lichtgevende diode. P dioda elektroluminescencyjna. S lysdiod. (731,845)
13. **mixer diode** : a semiconductor diode designed for frequency conversion of signals by means of a local oscillator. ★ diode mélangeuse → *diode 18.* R смесительный диод. D Mischdiode. E diodo mezclador. I diodo miscelatore. N mengdiode. P dioda mieszająca. S blandardiod. (521)
14. **noise-generator diode** : a diode in which the wanted noise power is intentionally generated by shot effect, this noise power being a definite function of cathode current. ★ diode génératrice de bruit → *diode 14.* R шумовой генераторный диод. D Rauschdiode. E diodo generador de ruido. I diodo generatore di rumore. N ruisgeneratordiode. P dioda szumowa. S brusdiod. (531)
15. **reverse blocking diode thyristor** : → *thyristor 5*
16. **reverse conducting diode thyristor** : → *thyristor 7*
17. **semiconductor diode** : a semiconductor device having two electrodes and exhibiting an asymmetrical voltage-current characteristic. *Note.* — Unless otherwise qualified, this term usually means a device with the voltage-current characteristic typical of a single PN junction. ★ diode à semiconducteurs → *diode 5.* R полупроводниковый диод. D Halbleiterdiode. E diodo semiconductor. I diodo a semiconduttore. N halfgeleiderdiode. P dioda półprzewodnikowa. S halvledardiod. (521)
18. **semiconductor frequency-multiplication diode** : a semiconductor diode designed for multiplying the frequency of a signal. ★ diode à semiconducteurs pour multiplication de fréquence → *diode 6.* R полупроводниковый умножительный диод. D Frequenzvervielfacher-Diode. E diodo semiconductor para multiplicación de frecuencia. I diodo per moltiplicazione di frequenza. N frequentievermenigvuldigingsdiode. P dioda mnożnika częstotliwości. S frekvensmultipliceringsdiod. (521)
19. **semiconductor rectifier diode** : a diode designed for rectification. ★ diode de redressement à semiconducteurs → *diode 8.* R полупроводниковый выпрямительный диод. D Gleichrichterdiode; Halbleiter-Gleichrichterdiode. E diodo semiconductor rectificador. I diodo raddrizzatore a semiconduttore. N gelijkrichterdiode. P dioda (półprzewodnikowa) prostownicza. S likriktardiod. (521)
20. **signal diode** : a semiconductor diode used for detecting or processing electrical signals. ★ diode de signal → *diode 9.* R импульсный диод. D Signaldiode. E diodo de señal. I diodo per segnale. N signaaldiode. P dioda sygnałowa. S signaldiod. (521)
21. **superradiant diode** (*Syn.* superluminescent LED) : → *LED 2*
22. **surface emitting light emitting diode** (*Syn.* Burrus diode) : a light emitting diode which emits optical radiation normal to the plane of the junction. ★ diode électroluminescente à émission frontale → *diode 12.* R светодиод с поверхностным излучением; диод Барраса. D flächen-emittierende LED; Burrus-Diode. E diodo emisor de luz de emisión superficial; diodo Burrus. I diodo luminescente

ad emissione di superfici; diodo Burrus. N lichtgevend-oppervlakdiode; Burrus-diode. P dioda (elektroluminecsencyjna) powierzchniowa; dioda Burrusa. S ytemitterande lysdiod. (731)

23. **switching diode** : a semiconductor diode designed for a fast transition from a high-impedance state to a low-impedance state and vice versa, depending on the polarity of the applied voltage. ★ diode de commutation → *diode 7.* R переключательный диод. D Schaltdiode. E diodo de conmutación. I diodo per commutazione. N schakeldiode. P dioda komutacyjna; dioda przełączająca. S switchdiod. (521)
24. **tunnel diode** : a semiconductor diode having a PN junction in which tunnel action occurs in forward direction giving rise to negative differential conductance in a certain range of the forward direction of the current-voltage characteristic. ★ diode tunnel → *diode 21.* R туннельный диод. D Tunneldiode. E diodo túnel. I diodo tunnel. N tunneldiode. P dioda tunelowa. S tunneldiod. (521)
25. **unitunnel diode** : a tunnel diode whose peak and valley point currents are approximately equal. ★ diode unitunnel → *diode 22.* R унитуннельный диод. D Backward-Diode; Unitunneldiode. E diodo unitúnel. I diodo unitunnel. N unitunneldiode. P dioda jednotunelowa. S backdiod. (521)
26. **variable-capacitance diode** : a semiconductor diode used as a voltage-controlled capacitor. ★ diode à capacité variable → *diode 4.* R параметрический диод (варикап). D Kapazitäts-(Variations-) Diode. E diodo de capacidad variable. I diodo a capacità variabile. N varactor. P dioda zmiennopojemnościowa; warykap. S kapacitansdiod. (521)
27. **voltage reference diode** : a semiconductor diode which develops across its terminals a reference voltage of specified accuracy when biased to operate within a specified current range. ★ diode de tension de référence → *diode 10.* R опорный диод. D Referenzdiode; Spannungsreferenzdiode. E diodo de tensión de referencia. I diodo per tensione di riferimento. N referentiespanningsdiode. P dioda odniesienia napięciowa. S (spännings)referensdiod. (521)
28. **voltage regulator diode** : a semiconductor diode which develops across its terminals an essentially constant voltage throughout a specified current range. ★ diode régulatrice de tension → *diode 19.* R стабилитрон. D Stabilisatordiode; Spannungsstabilisatordiode. E diodo regulador de tensión. I diodo regolatore di tensione. N spanningsregelingsdiode. P dioda stabilizująca napięcie; dioda Zenera. S (spännings)reglerdiod. (521)

dip

1. **dip counter tube** : → *counter tube 6*
2. **index dip** : a depression in the refractive index at the centre of the core. *Note.* — An index dip is an imperfection which may occur in certain fabrication techniques. ★ creux central d'indice → *creux 3.* R провал в профиле показателя преломления. D Indexeinbruch; Dip. E depresión del índice. I depressione dell'indice (di rifrazione). N lokale (brekings)indexverlaging. P depresja profilu (centralna). S indexsänka. (731)
3. **voltage dip** : a sudden reduction of the voltage at a point in an electrical system followed by voltage recovery after a short period of time from a few cycles to a few seconds. ★ creux de tension → *creux 5.* R провал напряжения; кратковременная посадка напряжения. D Spannungseinbruch. E hueco de tensión. I buco di tensione. N kortstondige spanningsdaling. P zanik napięcia. S kortvarig spänningssänkning. (161,604)

diplexer

1. **diplexer** (for an antenna) : a multiplexer for either two transmitters or groups of transmitters, or two receivers or groups of receivers. ★ diplexeur → *diplexeur 1.* R диплексер (для антенны). D Diplexer (für eine Antenne). E diplexor (de antena). I diplexer. N combinatienetwerk voor twee zenders. P diplekser (antenowy). S diplexer. (712)
2. **(vision/sound) diplexer** : a device in which the radiofrequency signals from a sound transmitter and a vision transmitter may be combined and fed to a combining unit or directly to the antenna. ★ diplexeur (image-son) → *diplexeur 2.* R (видео-звуковой) диплексер. (723)

dipole

1. **dipole (antenna)** (*Syn.* doublet (antenna)) : a symmetrical antenna composed of conductors usually rectilinear and energized by a balanced feed. *Note.* — The word "dipole" is sometimes used to describe antennas which do not conform in all respects to the above definition. In such cases, the word should be qualified, for example: "asymmetrical dipole". ★ (antenne) doublet → *doublet 1.* R симметричный вибратор. D Dipol (-antenne). E dipolo (antena). I dipolo; antenna dipolo. N dipool(antenne). P antena dipolowa. S dipol(antenn). (712)
2. **electric dipole** : an arrangement of two point-charges of equal magnitude and opposite sign separated by a distance small compared with their distance from the point of observation. ★ dipôle électrique → *dipôle 1.* R электрический диполь. D elektrischer Dipol. E dipolo eléctrico. I dipolo elettrico. N elektrische dipool. P dipol elektryczny. S elektrisk dipol. (121)
3. **electric dipole moment** : → *moment 2*
4. **(elementary) electric dipole** (*Syn.* hertzian (electric) dipole) : → *dipole 10*
5. **(elementary) magnetic dipole** (*Syn.* hertzian magnetic dipole) : → *dipole 11*
6. **folded dipole** (antenna) : an antenna composed of two or more parallel closely-spaced conductors usually connected together at their ends, with one of the conductors fed across a gap at its centre, the other conductors being without a gap. *Note.* — The term "folded dipole", when used without qualification, implies in most cases the use of two conductors. ★ doublet replié → *doublet 11.* R петлевой симметричный вибратор. D Faltdipol (-Antenne). E dipolo plegado (antena). I dipolo ripiegato. N gevouwen dipool(antenne). P dipol pętlowy. S vikt dipol. (712)
7. **full-wave dipole** : a rectilinear dipole antenna whose total electrical length is about one wavelength. ★ doublet (en) onde entière → *doublet 8.* R волновый симметричный вибратор. D Ganzwellendipol. E dipolo de onda completa. I dipolo in onda intera. N hele golfdipool. P dipol całofalowy. S helvågsantenn. (712)
8. **half dipole** (*Syn.* half doublet) : one of two geometrically symmetrical parts of a dipole antenna. ★ demi-doublet → *demi-doublet 1.* R плечо симметричного вибратора. D Halbdipol. E medio dipolo; medio doblete. I semi-polo. N halve dipool. P półdipol. S dipolhälft. (712)
9. **half-wave dipole** : a rectilinear dipole antenna whose total electrical length is about a half wavelength. ★ doublet (en) demi-onde → *doublet 7.* R полуволновый симметричный вибратор. D Halbwellendipol. E dipolo de media onda. I dipolo in mezz'onda. N halve golfdipool. P dipol półfalowy. S halvvågsdipol. (712)
10. **hertzian (electric) dipole** (*Syn.* (elementary) electric dipole; infinitesimal dipole) : an hypothetical radiating element consisting of a conductor of vanishingly small length traversed by a time-varying electric current having at any instant the same value at all points. *Note.* — The continuity conditions relating current to charges require that opposite ends of the current element be terminated by equal and opposite electric charges, these charges being also time-varying. The field of the hertzian dipole can be computed either from the current or from the charges. ★ doublet (électrique) élémentaire → *doublet 6.* R (электрический) диполь Герца; (элементарный) электрический диполь; бесконечно малый диполь. D Hertzscher (elektrischer) Dipol; elektrischer (Elementar-) Dipol; Infinitesimaldipol. E dipolo herciano; dipolo eléctrico; dipolo infinitesimal. I dipolo elettrico elementare. N (elektrische) dipool; (elementaire) elektrische dipool. P dipol (elektryczny) Hertza; dipol elektryczny (elementarny). S elementardipol. (712)
11. **hertzian magnetic dipole** (*Syn.* (elementary) magnetic dipole) : an hypothetical radiating element consisting of a closed loop of vanishingly small dimensions traversed by a time-varying current having at any instant the same value at all points. *Note.* — The radiation from this element is the same as that from a fictitious time-varying magnetic current element perpendicular to the plane of the loop. ★ doublet magnétique → *doublet 10.* R магнитный диполь Герца; (элементарный) магнитный диполь. D Hertzscher Magnetdipol; magnetischer (Elementar-) Dipol. E dipolo magnético herciano; dipolo magnético. I dipolo magnetico elementare. N (magnetische) dipool; (elementaire) magnetische dipool. P dipol magnetyczny Hertza; dipol magnetyczny (elementarny). S magnetisk elementardipol. (712)
12. **infinitesimal dipole** (*Syn.* hertzian (electric) dipole) : → *dipole 10*

13. **loaded folded dipole** : a folded dipole modified by the addition in the centre of the unfed conductors of a circuit element, usually resistive, to reduce input impedance changes with frequency. ★ doublet replié chargé → *doublet 12.* R нагруженный петлевой симметричный вибратор. D belasteter Faltdipol. E dípolo plegado cargado. I dipolo ripiegato caricato. N belaste gevouwen dipool. P dipol pętlowy obciążony. S belastad vikt dipol. (712)
14. **magnetic dipole moment** : → *moment 4*
15. **magnetic dipole (1)** : an entity which, in terms of its magnetic field, can be represented by an infinitesimal current loop. ★ dipôle magnétique (élémentaire) → *dipôle 4.* R магнитный диполь (1). D magnetischer Dipol (1). E dípolo magnético (elemental); doblete magnético. I dipolo magnetico elementare. N magnetische dipool. P dipol magnetyczny elementarny. S magnetisk dipol. (221)
16. **magnetic dipole (2)** : an entity which, in terms of its magnetic field at all points at distances sufficiently large compared with its dimensions, can be replaced by a plane current loop. *Note.* — A magnetic dipole may be any current loop, orbital or spinning charged particles, or any combination of these, such as a magnetized body. ★ dipôle magnétique → *dipôle 3.* R магнитный диполь (2). D magnetischer Dipol (2). E dípolo magnético. I dipolo magnetico. N magnetische dipool. P dipol magnetyczny. S magnetisk dipol. (221)
17. **multiple folded dipole** : a folded dipole consisting of three or more conductors. ★ doublet replié multiple → *doublet 13.* R многопетлевой симметричный вибратор. D Mehrfach-Faltdipol. E dípolo plegado múltiple. I dipolo ripiegato multiplo. N meervoudiggevouwen dipool. P dipol wielopętlowy. S ..... (712)
18. **panel of radiating dipoles** : → *panel 10*

dipole-curtain

1. **dipole-curtain antenna** : → *antenna 40*

dipped-beam

1. **dipped-beam headlight** : → *headlight 1*

dip-solder

1. **dip-solder contact** : → *contact 64*

Dirac

1. **Dirac function** (*Syn.* unit pulse) : → *pulse 88*

direct

1. **direct access** : → *access 6*
2. **direct access store** : → *store 2*
3. **direct a.c.(power) convertor** : → *convertor 13*
4. **direct acting instrument** : → *instrument 3*
5. **direct actinic effect** : → *effect 11*
6. **direct address** : → *address 10*
7. **direct arc furnace** : → *arc furnace 33*
8. **direct arc heating** : → *heating 7*
9. **direct calculation of efficiency** : → *efficiency 15*
10. **direct call** (*Syn.* call without selection signals) : → *call 30*
11. **direct commutation** : → *commutation 16*
12. **direct component** : → *component 16*
13. **direct contact** : → *contact 65*
14. **direct control** : → *control 89*
15. **direct d.c. convertor** : → *convertor 14*
16. **direct distribution by satellite** : → *distribution 9*
17. **direct drive** (*Syn.* gearless drive) : → *drive 12*
18. **direct electric heating** : → *heating 8*
19. **direct entry** : → *entry 1*
20. **direct fission yield** (*Syn.* primary fission yield) : → *fission 19*
21. **direct flux** : → *flux 4*
22. **direct glare** : → *glare 1*
23. **direct heating** : → *heating 9*
24. **direct incoming selection** : → *selection 4*
25. **direct incoming selection with integrated numbering** : → *incoming 2*
26. **direct incoming selection with two-stage selection** : → *incoming 3*
27. **direct lighting** : → *lighting 5*
28. **direct lightning strike** : → *strike 1*
29. **direct line filter** (*Syn.* direct through-connection filter) : → *filter 14*
30. **direct (method of) measurement** : → *measurement 5*
31. **direct orbit** : → *orbit 2*
32. **direct outgoing selection** : → *selection 5*
33. **direct over-current release** : → *release 5*
34. **direct printer** : → *printer 1*
35. **direct ratio** : → *ratio 29*
36. **direct ray path** : → *path 3*
37. **direct reading pocket dosemeter** : → *dosemeter 3*
38. **direct reading pocket exposure meter** : → *exposure meter 1*
39. **direct resistance furnace** : → *furnace 14*
40. **direct resistance heating** : → *heating 10*
41. **direct resistance heating equipment** : → *heating 11*
42. **direct service area** : → *area 14*
43. **direct solar radiation** : → *radiation 18*
44. **direct through-connection filter** : → *filter 14*
45. **direct through-connection point** : → *point 10*
46. **direct transfer filter** (*Syn.* direct through-connection filter) : → *filter 14*
47. **direct transmission** (*Syn.* regular transmission) : → *transmission 55*
48. **direct wave** : → *wave 9*

direct current

1. **biased direct current amplifier** : → *amplifier 3*
2. **bipolar d.c. link** : → *link 3*
3. **d.c. braking** (*Syn.* d.c. injection braking) : → *braking 21*
4. **d.c. chopper convertor** (*Syn.* direct d.c. convertor) : → *convertor 14*
5. **DC component** : → *component 13*
6. **d.c. conversion factor** : → *factor 34*
7. **d.c. convertor** : → *convertor 12*
8. **d.c. filter** : → *filter 11*
9. **d.c. form factor** : → *factor 35*
10. **(d.c.) high-speed circuit-breaker** : → *circuit-breaker 9*
11. **d.c. injection braking** : → *braking 21*
12. **(d.c.) main generator** : → *generator 10*
13. **d.c. motor vehicle** : → *vehicle 3*
14. **d.c. power** : → *power 28*
15. **DC restoration** : → *restoration 1*
16. **d.c. ripple factor** : → *factor 36*
17. **d.c. steady-state recovery voltage** : → *recovery voltage 1*
18. **d.c. traction** : → *traction 5*
19. **direct current** : a current that is independent of time.By extension, a current in which the direct component is of primary importance. ★ courant continu → *courant continu 11.* R постоянный ток. D Gleichstrom. E corriente continua. I corrente continua. N gelijkstroom. P prąd stały. S likström. (131)
20. **direct current amplifier** : → *amplifier 10*
21. **direct current amplitude discriminator** : → *discriminator 4*
22. **direct current balancer** : → *balancer 1*
23. **direct current commutator machine** : → *machine 8*
24. **direct current generator** : → *generator 11*
25. **direct current measuring transductor** : → *transductor 3*
26. **direct current motor** : → *motor 23*
27. **direct current signalling** : → *signalling 13*
28. **direct current system** : → *system 46*
29. **direct current transmission** : → *transmission 20*
30. **direct d.c. convertor** : → *convertor 14*
31. **electrode d.c. resistance** : → *resistance 17*
32. **(electronic) d.c. convertor** : → *convertor 19*
33. **electronic d.c. power controller** : → *controller 4*
34. **electronic d.c. (power) switch** : → *switch 18*
35. **(electronic) d.c.(power) conversion** : → *conversion 18*
36. **high-voltage d.c. link** : → *link 14*
37. **indirect d.c. convertor** : → *convertor 29*

38. **linear direct current amplifier** : → *amplifier 14*
39. **logarithmic direct current amplifier** : → *amplifier 16*
40. **regenerative braking of a d.c. machine** : → *machine 22*
41. **standing DC component** : → *component 54*
42. **(volume) d.c. resistance** : → *resistance 74*
43. **(volume) d.c. resistivity** : → *resistivity 4*

direct voltage

1. **controlled conventional no-load direct voltage** : the mean value of the direct voltage which would be obtained by extrapolating the direct voltage/current characteristic from the region of continuous flow of direct current to zero current with phase control. ★ tension continue conventionnelle à vide avec réglage → *tension continue 6.* R условное постоянное напряжение холостого хода при фазовом управлении. D gesteuerte konventionelle Leerlauf-Gleichspannung. E tensión contínua convencional en vacío con regulación. I tensione continua convenzionale a vuoto con regolazione. N conventionele, gestuurde nullastgelijkspanning. P napięcie wyprostowane stanu jałowego przy wysterowaniu umowne. S extrapolerad tomgångslikspänning vid fasstyrning. (551)
2. **controlled ideal no-load direct voltage** : the theoretical no-load direct voltage of a rectifier or inverter with phase control assuming no threshold voltages of electronic valve devices and no voltage rise at small loads. ★ tension continue fictive à vide avec réglage → *tension continue 8.* R постоянное напряжение идеального холостого хода при фазовом управлении. D gesteuerte ideelle Gleichspannung. E tensión contínua ideal en vacío con regulación. I tensione continua ideale a vuoto con regolazione. N ideële, gestuurde nullastgelijkspanning. P napięcie wyprostowane stanu jałowego przy wysterowaniu idealne. S ideal tomgångslikspänning vid fasstyrning. (551)
3. **conventional no-load direct voltage** : the mean value of the direct voltage which would be obtained by extrapolating the direct voltage/current characteristic from the region of continuous flow of direct current to zero current at zero current delay angle (i.e.without phase control). ★ tension continue conventionnelle à vide → *tension continue 5.* R условное постоянное напряжение холостого хода. D konventionelle Leerlauf-Gleichspannung. E tensión contínua convencional en vacío. I tensione continua convenzionale a vuoto. N conventionele nullastgelijkspanning. P napięcie wyprostowane stanu jałowego umowne. S extrapolerad tomgångslikspänning. (551)
4. **direct voltage** : a voltage that is independent of time.By extension, a voltage in which the direct component is of primary importance. ★ tension continue → *tension continue 4.* R постоянное напряжение. D Gleichspannung. E tensión contínua. I tensione continua. N gelijkspanning. P napięcie stałe. S likspänning. (131)
5. **direct voltage regulation** : → *regulation 3*
6. **ideal no-load direct voltage** : the theoretical no-load direct voltage of a rectifier or inverter assuming no reduction by phase control, no threshold voltages of electronic valve devices and no voltage rise at small loads. ★ tension continue fictive à vide → *tension continue 7.* R идеальное постоянное напряжение холостого хода. D ideelle Gleichspannung. E tensión contínua ideal en vacío. I tensione continua ideale a vuoto. N ideële nullastgelijkspanning. P napięcie wyprostowane stanu jałowego idealne. S ideal tomgångslikspänning. (551)
7. **inductive direct voltage regulation** : → *regulation 5*
8. **inherent direct voltage regulation** : → *regulation 6*
9. **real no-load direct voltage** : the actual mean direct voltage at zero direct current. ★ tension continue réelle à vide → *tension continue 9.* R реальное постоянное напряжение холостого хода. D tatsächliche Leerlauf-Gleichspannung. E tensión contínua real en vacío. I tensione continua reale a vuoto. N werkelijke nullastgelijkspanning. P napięcie wyprostowane stanu jałowego rzeczywiste. S verklig tomgångslikspänning. (551)
10. **resistive direct voltage regulation** : → *regulation 13*
11. **total direct voltage regulation** : → *regulation 15*

direct-axis

1. **direct-axis component of current** : → *component 17*
2. **direct-axis component of magnetomotive force** : → *component 18*
3. **direct-axis component of synchronous generated voltage** : → *component 19*
4. **direct-axis component of voltage** : → *component 20*
5. **direct-axis sub-transient open-circuit time constant** : → *time constant 3*
6. **direct-axis sub-transient reactance** : → *reactance 4*
7. **direct-axis sub-transient short-circuit time constant** : → *time constant 4*
8. **direct-axis sub-transient voltage** : → *voltage 50*
9. **direct-axis synchronous reactance** : → *reactance 5*
10. **direct-axis transient open-circuit time constant** : → *time constant 5*
11. **direct-axis transient reactance** : → *reactance 6*
12. **direct-axis transient short-circuit time constant** : → *time constant 6*
13. **direct-axis transient voltage** : → *voltage 51*

direct-exposure

1. **direct-exposure film** (*Syn.* non-screen film) : → *film 9*

direction

1. **conducting direction** (of a valve or arm) : the direction in which a valve or arm is capable of conducting current. ★ sens de conduction → *sens 13.* R проводящее направление (вентиля или плеча). D Durchlaßrichtung (eines Zweigelements oder Zweiges). E sentido de conducción (de una válvula o brazo). I senso di conduzione (di una valvola o di un ramo). N doorlaatrichting (van een ventiel of tak). P kierunek przewodzenia (zaworu lub ramienia). S ledriktning. (551)
2. **conducting direction** (of a rectifier element) : the normal direction of load current in a rectifier element, i.e. from anode to cathode. ★ sens de conduction → *sens 14.* R направление проводимости. D Durchlaßrichtung (eines Gleichrichterelementes). E sentido de conducción (de un elemento). I senso diretto (d'una valvola o d'un ramo) (d'un raddrizzatore); senso di conduzione (d'una valvola o d'un ramo) (d'un raddrizzatore). N doorlaatrichting van een gelijkrichtelement. P kierunek przewodzenia (elementu prostowniczego). S ledriktning; framrikting. (811)
3. **direction indicator light** : → *light 11*
4. **direction light** : → *light 12*
5. **direction of lay** : the direction of rotation of a component of a cable in relation to the longitudinal axis of the cable. *Note.* — The lay is said to be right-hand when the visible portion of the helix, together with the two cross-sections limiting it form the shape of a letter Z, and left-hand when they form the shape of a letter S. ★ sens d'assemblage → *sens 11.* R направление скрутки. D Schlagrichtung. E sentido de cableado. I senso di riunione. N spoedrichting; slagrichting. P kierunek skrętu. S stigningsriktning; slagningsriktning. (461)
6. **direction of lay** : the direction of twist of a layer of wires of a stranded conductors as viewed from the end. *Note.* — A "right-hand lay" is a clockwise direction and a "left-hand lay" is an anti-clockwise direction. ★ sens de câblage → *sens 12.* R направление полива. D Schlagrichtung. E sentido de cableado. I senso di cordatura. N slagrichting. P kierunek skrętu. S slagriktning. (466)
7. **direction of polarization** (in a waveguide) : *1.* The direction of the electric field strength vector, if this direction is constant in a transverse cross-section of a waveguide. *2.* The direction of the electric field strength vector of a mode at, or close to the intersection of two axes of symmetry, if these axes are the only axes of symmetry at right angles of the mode in any transverse cross-section. ★ direction de polarisation → *direction 5.* R направление поляризации (в волноводе). D Polarisationsrichtung (in einem Wellenleiter). E dirección de polarización (en una guíaonda). I direzione di polarizzazione (in una guida d'onda). N polarisatierichting. P kierunek polaryzacji (w falowodzie). S polarisationsriktning. (726)
8. **direction of propagation** (of a wave) : the normal to the wavefront at a given point, positive in the direction of increasing phase. *Notes. 1* — The direction of propagation at a point is that of the real component of the wave vector. *2* — The direction of propagation of a wave may differ from the direction of propagation of energy for this wave. ★ direction de propagation → *direction 6.* D Ausbreitungsrichtung (einer Welle). P kierunek propagacji (fali). (705,726)
9. **direction of propagation (of energy)** : the time average direction of the flow of energy of an electromagnetic wave.

Notes. 1 — With certain reservations, the direction of propagation of energy is that of the time average of the Poynting vector. *2* — The direction of propagation of energy of an electromagnetic wave may differ from the direction of propagation of the wave. In practice, if the medium is not too absorbent, nor too anisotropic, nor too dispersive, the direction of propagation of energy is identical to the direction of the group velocity vector. ★ direction de propagation de l'énergie → *direction 7.* D Energieausbreitungsrichtung. P kierunek propagacji (energii). (705)

10. **direction of propagation of energy** (in a transmission line) : the direction of the time-average Poynting vector at a fixed point in a transmission line. *Notes. 1* — In a uniform transmission line, the direction of propagation of energy is often taken along the longitudinal axis. *2* — In a uniform lossless waveguide, the direction of propagation of energy at every point of a transverse cross-section is parallel to the longitudinal axis. ★ direction de propagation de l'énergie → *direction 8.* R направление распространения энергии (в линии передачи). D Ausbreitungsrichtung der Energie (in einer Übertragungsleitung). E sentido de propagación de la energía (en una línea de transmisión). I direzione di propagazione dell'energia (in una linea di trasmissione). N voortplantingsrichting van de energie. P kierunek propagacji energii (w linii przesyłowej). S energins transportriktning. (726)
11. **forward direction** (of an isolator or a circulator) : that direction of a transmission path between two ports of a microwave isolator or a circulator in which energy propagates with much lower attenuation than in the opposite (reverse) direction. ★ sens direct → *sens 17.* R прямое направление (в вентиле или циркуляторе). D Vorwärtsrichtung (einer Richtungsleitung oder eines Zirkulators). E sentido directo (de un aislador o de un circulador). I senso diretto (di un isolatore o di un circolatore). N doorlaatrichting. P kierunek przepustowy. S framriktning. (221,726)
12. **forward direction** (of a junction) : the direction of continuous (direct) current flow in which a junction has its lowest resistance and the current is mainly due to movement of majority charge carriers. ★ sens direct → *sens 18.* R прямое направление (перехода). D Leitrichtung (eines Überganges). E sentido directo (de una unión). I senso diretto (di una giunzione). N doorlaatrichting (v.e. grenslaag). P kierunek przewodzenia (złącza). S framriktning. (391,531)
13. **forward direction** (of a PN junction) : the direction of current that results when the P-type semiconductor region is at a positive voltage relative to the N-type region. ★ sens direct → *sens 19.* R прямое направление (P-N перехода). D Vorwärtsrichtung (bei einem PN-Übergang). E sentido directo (de una unión PN). I senso diretto (di una giunzione PN). N doorlaatrichting (van een PN-junctie). P kierunek przewodzenia (złącza PN). S framriktning. (521)
14. **inverse direction** (of a rectifier element) : the direction opposite to the conducting direction. ★ sens de non-conduction → *sens 16.* R обратное направление. D Sperrichtung (eines Gleichrichterelementes). E sentido de no conducción (de un elemento rectificador). I senso inverso d'una valvola o di un ramo) (d'un raddrizzatore); senso di non conduzione (d'una valvola o di un ramo) (d'un raddrizzatore). N sperrichting (van een gelijkrichtelement). P kierunek nieprzewodzenia (elementu prostowniczego). S backriktning. (811)
15. **inverse direction of operation** : a mode of operating a bipolar junction transistor in which the collector acts as an emitter and in which the net flow of minority carriers is from the collector region to the base region. ★ sens inverse de fonctionnement → *sens 25.* R инверсный режим работы. D inverser Betrieb. E sentido inverso de funcionamiento. I senso inverso di funzionamento. N omgekeerde bedrijfstoestand. P kierunek działania wsteczny. S inverterad arbetsriktning. (521)
16. **non-conducting direction** (of a valve or arm) : the reverse of the conducting direction. ★ sens de non-conduction → *sens 15.* R непроводящее направление (вентиля или плеча). D Sperrichtung (eines Zweigelements oder Zweiges). E sentido de no conducción (de una válvula o brazo). I senso di non conduzione (di una valvola e di un ramo). N sperrichting (van een ventiel of tak). P kierunek nieprzewodzenia (zaworu lub ramienia); kierunek wsteczny (zaworu lub ramienia). S spärriktning. (551)
17. **reverse direction** (of an isolator or a circulator) : that direction of a transmission path between two ports of a microwave isolator or a circulator in which energy propagates with much higher attenuation than in the opposite (forward) direction. ★ sens inverse → *sens 20.* R обратное направление (в вентиле или циркуляторе). D Rückwärtsrichtung (einer Richtungsleitung oder eines Zirkulators). E sentido inverso (de un aislador o de un circulador). I senso inverso (di un isolatore o di un circolatore). N keerrichting. P kierunek zaporowy. S backriktning. (221,726)
18. **reverse direction** (of a junction) : the direction of continuous (direct) current flow in which a junction has its highest resistance and the current is mainly due to movement of minority charge carrier. ★ sens inverse → *sens 21.* R обратное направление (перехода). D Sperrichtung (eines Überganges). E sentido inverso (de una unión). I senso inverso (di una giunzione). N sperrichting (v.e. grenslaag). P kierunek zaporowy (złącza). S backriktning. (391)
19. **reverse direction** (of a PN junction) : the direction of current that results when the N-type semiconductor region is at a positive voltage relative to the P-type region. ★ sens inverse → *sens 22.* R обратное направление (P-B перехода). D Rückwärtsrichtung (bei einem PN-Übergang). E sentido inverso (de una unión PN). I senso inverso (di una giunzione PN). N sperrichting (van een PN-junctie). P kierunek zaporowy (złącza PN). S backriktning. (521)
20. **reverse direction** : the direction opposite to the forward direction. ★ sens inverse → *sens 23.* R обратное направление. D Sperrichtung. E sentido inverso. I senso inverso. N tegenrichting. P kierunek wsteczny; kierunek zaporowy. S backriktning. (531)

directional

1. **directional antenna** : → *antenna 41*
2. **directional comparison protection system** : → *system 47*
3. **directional coupler** : → *coupler 10*
4. **directional coupler** : → *coupler 11*
5. **directional effect** (*Syn.* Stiles-Crawford effect (of the first kind)) : → *effect 79*
6. **directional emissivity** : → *emissivity 1*
7. **directional gain** : → *gain 9*
8. **directional lighting** : → *lighting 6*
9. **directional microphone** : → *microphone 8*
10. **directional null** : → *null 1*
11. **directional pattern** : → *pattern 5*
12. **directional relay** : → *relay 9*

directional-null

1. **directional-null antenna** : → *antenna 42*

directivity

1. **directivity** (of an antenna, in a given direction) : the ratio, generally expressed in decibels, of the radiation intensity produced by an antenna in a given direction, to the value of the radiation intensities averaged in all directions in space. *Notes. 1* — If no direction is specified, the direction of maximum radiation intensity from the given antenna is implied. *2* — The directivity is independent of antenna losses and equal to the absolute gain in the same direction if the antenna is lossless. ★ directivité → *directivité 4.* R коэффициент направленного действия антенны; КНД антенны. D Richtfaktor (einer Antenne in eine bestimmte Richtung); Richtwirkung. E directividad (de una antena, en una dirección dada). I direttività (in una data direzione). N richteffect (van een antenne, in een gegeven richting). P kierunkowość (anteny). S direktivitet. (712)
2. **directivity** (of a directional coupler) : the ratio, usually expressed in decibels, of the power output measured at the appropriate port of one of the transmission lines of a directional coupler, when power is fed into the other transmission line in the preferred direction, to the power output measured at the same place when the same power is fed into the same line in the opposite direction, matched terminations being connected to all ports. ★ facteur de découplage → *facteur 57.* R направленность (направленного ответвителя). D Richtverhältnis (eines Richtkopplers). E directividad (de un acoplador direccional). I fattore di disaccoppiamento (di un accoppiatore direzionale); fattore di direttività (di un accoppiatore direzionale). N richtingsvoorkeur. P kierunkowość (sprzęgacza). S direktivitet. (726)
3. **directivity factor** : → *factor 45*

4. **directivity index** (*Syn.* directional gain) : → *gain 9*

directivity-pattern

1. **sonar dome loss directivity-pattern** : sonar dome insertion loss as a function of direction of sound transmission. ★ diagramme de directivité de la perte par insertion du dôme (du sonar) → *diagramme 14.* R характеристика направленности звукопрозрачности обтекателя гидроакустической станции. D Sonardom-Dämmungscharakteristik. E diagrama de directividad de la pérdida por inserción de la bóveda del sonar. I diagramma di direttività dell'attenuazione della cupola del sonar. N richtingsdiagram van de tussenschakeldemping. P wykres kierunkowości tłumienia kopuły sonaru. S riktningskarakteristik för sonardomdämpning. (801)

directly

1. **directly controlled equipment** : → *equipment 24*
2. **directly heated cathode filament** : → *filament 3*
3. **directly ionizing particle** : → *particle 4*
4. **directly ionizing particles** (*Syn.* directly ionizing radiation) : → *radiation 19*
5. **directly ionizing radiation** : → *radiation 19*
6. **directly irradiated area** : → *area 15*

directly-fired

1. **directly-fired boiler** : → *boiler 4*

directly-powered

1. **directly-powered (repeater) station** : → *station 9*

direct-on-line

1. **direct-on-line starter** : → *starter 2*
2. **direct-on-line starting** : → *starting 7*

director

1. **director element** : → *element 13*

directory

1. **directory number** : → *number 8*

disability

1. **disability glare** : → *glare 2*

disabled

1. **disabled state** : → *state 9*
2. **disabled state** : → *state 10*
3. **disabled time** : → *time 47*
4. **external disabled state** : → *state 14*
5. **external disabled time** : → *time 53*
6. **internal disabled state** (*Syn.* down state) : → *state 11*

disabling

1. **disabling** (in echo control) : the action of preventing an echo control device from carrying out its echo control functions. *Note.* — The associated verb is "to disable". ★ neutralisation → *neutralisation 2.* R нейтрализация (при управлении эхо-сигналом). D Außerbetriebsetzen (in der Echoregulierung). E neutralización (en protección contra los ecos). I disabilitazione (nel controllo dell'eco). N uitschakelen (bij echo-beheersing). P blokowanie (tłumienia echa). S blockering. (704)

disaccommodation

1. **disaccommodation coefficient (of permeability)** : → *coefficient 17*
2. **disaccommodation factor (of permeability)** : → *factor 46*
3. **disaccommodation (of permeability)** : → *permeability 9*

disadvantage

1. **disadvantage factor** : → *factor 47*

disassembly

1. **packet disassembly** : a user facility offered by a data network which enables packets to be delivered to a non-packet mode terminals in the appropriate form. ★ désassemblage de paquets → *désassemblage 1.* R разборка пакетов. D Depaketierung. E desmontaje de paquetes. I disassemblaggio dei pacchetti. N ..... P rozkładanie pakietów. S paketuppdelning. (721)

discharge

1. **arc discharge** : a gas discharge with a cathode drop which is small compared with that of a glow discharge. *Note.* — Electrons are released from the cathode mainly by thermionic emission and high field emission, acting simultaneously or separately. Emission of electrons released by ion bombardment plays only a small part. ★ décharge en arc → *décharge 14.* R дуговой разряд. D Bogenentladung. E descarga en arco. I scarica ad arco. N boogontlading. P wyładowanie łukowe. S bågurladdning. (531,845)
2. **arc discharge tube** : → *tube 3*
3. **compact-source arc discharge lamp** (*Syn.* short-arc lamp) : → *lamp 58*
4. **corona discharge** : a discharge with slight luminosity produced in the neighbourhood of a conductor, without greatly heating it, and limited to the region surrounding the conductor in which the electric field exceeds a certain value. *Note.* — In a corona stabilizer tube, this usually occurs in a high-voltage, low-current (of the order of microamperes) region, between two unheated electrodes immersed in a gas at a pressure above a few millimetres of mercury. ★ effluve → *effluve 1.* R коронный разряд. D Koronaentladung. E descarga por efecto corona; efluvios. I effluvi; scarica corona. N corona-ontlading. P wyładowanie koronowe. S korona. (121,531)
5. **corona discharge tube** : → *tube 18*
6. **discharge** (of a cell or battery) : an operation during which a battery delivers current to an external circuit by the conversion of chemical energy to electric energy. ★ décharge → *décharge 4.* R разрядка (аккумулятора или батареи). D Entladen. E descarga (de una batería). I scarica (d'una batteria). N ontladen (van een cel of accubatterij). P wyładowanie. S urladdning. (811)
7. **discharge current (of an arrester)** : → *current 69*
8. **discharge device of a capacitor** : → *device 19*
9. **discharge energy test** : → *test 25*
10. **discharge inception test** : → *test 26*
11. **discharge lamp** : → *lamp 13*
12. **discharge (of a battery)** (*Syn.* discharging (of a battery)) : an operation during which a battery delivers current to an external circuit by the conversion of chemical energy into electric energy. ★ décharge (d'un accumulateur) → *décharge 9.* R разряд (батареи); разрядка (батареи). D Entladung. E descarga (de una batería). I scarica (di un accumulatore). N ontladen (van een batterij). P wyładowanie (akumulatora). S urladdning. (486)
13. **discharge rate** : → *rate 22*
14. **disruptive discharge** (*Syn.* flashover; sparkover) : passage of an arc following dielectric breakdown. *Note.* — The term "sparkover" (in French : "armorçage") is used when a disruptive discharge occurs in a gaseous or liquid dielectric. The term "flashover" (in French : "contournement") is used when a disruptive discharge occurs over the surface of a solid dielectric surrounded by a gaseous or liquid medium. The term "puncture" (in French : "perforation") is used when a disruptive discharge occurs through a solid dielectric. ★ amorçage → *amorçage 3.* R разряд; перекрытие изоляции. D Durchschlag. E cebado; descarga disruptiva. I adescamento; scarica disruptiva. N overslag; doorslag. P przeskok; przebicie. S överslag; genomslag. (604)
15. **electric discharge (in a gas)** : the passage of an electric current through gases and vapours by the production and movements of charge carriers under the influence of an electric field. *Note.* — The phenomenon results in the emission of electromagnetic radiation which plays an essential part in all its applications in lighting. ★ décharge électrique (dans un gaz) → *décharge 12.* R электрический разряд. D Gasentladung. E descarga eléctrica (en gas). I scarica elettrica. N elektrische gasontlading. P wyładowanie elektryczne. S elektrisk urladdning. (845)
16. **(electrical) discharge** : a discontinuous movement of electrical charges through an insulating medium, initiated by electron avalanches and supplemented by secondary processes. ★ décharge (électrique) → *décharge 11.* R электрический разряд. D (elektrische) Entladung. E descarga (eléctrica). I scarica (elettrica). N (elektrische) ontlading. P wyładowanie (elektryczne). S urladdning. (212)
17. **electrical discharge time constant** : → *time constant 8*
18. **electrostatic discharge** (*Syn.* ESD (abbreviation)) : a transfer of electric charge between bodies of different

electrostatic potential in proximity or through direct contact. ★ décharge électrostatique → *décharge 13.* R электростатический разряд. D elektrostatische Entladung; ESD (Abkürzung). E descarga electrostática. I scarica elettrostatica. N elektrostatische ontlading; ESD. P wyładowanie elektrostatyczne. S elektrostatisk urladdning. (161)

19. **fifty per cent disruptive discharge voltage** : → *voltage 66*
20. **gas discharge** : the passage of electric current through a gas or vapour. ★ décharge dans un gaz → *décharge 6.* R газовый разряд. D Gasentladung. E descarga en un gas. I scarica in un gas. N gasontlading. P wyładowanie elektryczne w gazie. S gasurladdning. (531)
21. **glow discharge** : a gas discharge in an electronic tube with a cold cathode from which the electrons are released mainly by the bombardment by positive ions or photons, and which results in a luminous glow, typical of the gas. ★ décharge luminescente → *décharge 18.* R тлеющий разряд. D Glimmentladung. E descarga luminiscente. I scarica luminescente. N glimontlading. P wyładowanie jarzeniowe. S glimurladdning. (531)
22. **glow discharge** : electric discharge in which the secondary emission from the cathode is much greater than the thermionic emission. *Note.* — This discharge is characterized by a considerable cathode fall (typically 70 V or more) and by low current density at the cathode (some 10 $A \cdot m^{-2}$). ★ décharge luminescente → *décharge 19.* R тлеющий разряд. D Glimmentladung. E descarga luminiscente. I scarica a bagliore. N glimontlading. P wyładowanie świetlące. S glimurladdning. (845)
23. **glow discharge tube** : → *tube 38*
24. **grid-controlled arc discharge tube** : → *tube 40*
25. **high intensity discharge lamp** : → *lamp 22*
26. **internal discharge** : a partial discharge in a cavity in an insulating medium, possibly adjacent to a conductor. ★ décharge interne → *décharge 17.* R внутренний разряд. D innere Entladung. E descarga interna. I scarica interna (parziale). N inwendige ontlading. P wyładowanie wewnętrzne. S inre urladdning. (212)
27. **non-self-maintained discharge** : a discharge that ceases in the absence of an external ionizing agent. ★ décharge non autonome → *décharge 20.* R несамостоятельный разряд. D unselbständige Entladung. E descarga no autónoma. I scarica non autonoma. N niet-zelfstandige ontlading. P wyładowanie niesamodzielne. S icke självunderhållande urladdning. (531)
28. **partial discharge** : a discharge which only partially bridges the insulation between conductors. It may occur inside the insulation or adjacent to a conductor. *Note* — The term ionization describes any process producing ions and should not be used to denote partial discharges. ★ décharge partielle → *décharge 22.* R частичный разряд. D Teilentladung. E descarga parcial. I scarica parziale. N deelontlading. P wyładowanie niezupełne. S partiell urladdning. (212)
29. **partial discharge inception test** : → *test 58*
30. **partial discharge intensity** : → *intensity 12*
31. **self-maintained discharge** : a discharge that continues after removal of the external ionizing agent. ★ décharge autonome → *décharge 5.* R самостоятельный разряд. D selbständige Entladung. E descarga autónoma. I scarica autonoma. N zelfstandige ontlading. P wyładowanie samodzielne. S självunderhållande urladdning. (531)
32. **surface discharge** : a partial discharge on to, or along, the surface of an insulation. ★ décharge superficielle → *décharge 23.* R поверхностный разряд. D Oberflächenentladung. E descarga superficial. I scarica superficiale (parziale). N oppervlakteontlading. P wyładowanie powierzchniowe. S yturladdning. (212)
33. **(to) discharge** : to extract all or part of the energy stored in a device. ★ décharger → *décharger 4.* R разряжать. D entladen. E descargar. I scaricare. N ontladen. P wyładować; rozładować. S urladda. (151)

discharged

1. **discharged drained (secondary) battery** : → *battery 28*
2. **dry discharged (secondary) battery** : → *battery 31*
3. **filled discharged (secondary) battery** : → *battery 38*

discharging

1. **discharging current of a capacitor** : → *current 70*
2. **discharging (of a battery)** (*Syn.* discharge (of a battery)) : → *discharge 12*
3. **discharging of a capacitor** : the release of all or part of the energy stored in a capacitor. ★ décharge d'un condensateur → *décharge 10.* R разрядка конденсатора; разряд конденсатора. D entladen eines Kondensators. E descarga de un condensador. I scarica di un condensatore. N het ontladen van een condensator. P rozładowanie kondensatora. S urladdning. (436)
4. **fuel discharging machine** : → *machine 13*

discomfort

1. **discomfort glare** : → *glare 3*

discone

1. **discone** : an antenna, in general axially symmetric, consisting of a conductive cone and a disc with the vertex of the cone close to the centre of the disc with the antenna being fed across this gap. ★ (antenne) discône → *discône 1.* R диск-конусная антенна. D Scheibenkonusantenne. E discono. I antenna discono. N schijfconusantenne. P antena dyskowostożkowa. S skivkonantenn. (712)

disconnect

1. **lanyard disconnect connector** : → *connector 34*
2. **loop/disconnect signalling** : → *signalling 25*

disconnectable

1. **disconnectable busbar** : → *busbar 8*

disconnected

1. **disconnected position** : → *position 7*

disconnecting

1. **disconnecting switch reverser** : → *reverser 1*

disconnection

1. **supply disconnection** : the interruption of supply over a significantly long period of time due to the opening of a switching device. ★ coupure (de la fourniture) → *coupure 10.* R нарушение электроснабжения. D ausgeschalteter Zustand. E corte (del suministro). I interruzione (della fornitura). N onderbreking van de voorziening. P wyłączenie zasilania; przerwa w zasilaniu. S leveransbortfall. (604)

disconnector

1. **busbar section disconnector** : a disconnector which is connected in series between two busbar sections, in order to disconnect them from each other. ★ sectionneur de sectionnement de barres → *sectionneur 11.* R секционирующий разъединитель. D Sammelschienen-Längstrennschalter. E seccionador de seccionamiento longitudinal de barras. I sezionatore di divisione sbarre. N raillangsscheider. P odłącznik sekcjonujący. S sektioneringsfrånskiljare. (605)
2. **centre-break disconnector** : a disconnector in which both contacts of each pole are movable and engage at a point substantially midway between their supports. *Note.* — This term applies to high-voltage disconnectors only. ★ sectionneur à coupure centrale → *sectionneur 4.* R разъединитель с центральным размыканием. D Drehtrennschalter. E seccionador de corte central. I sezionatore a interruzione centrale. N scheider met centrale onderbreking. P odłącznik z obu stykami ruchomymi. S tvåpelarfrånskiljare. (441)
3. **disconnector** : a mechanical switching device which provides, in the open position, an isolating distance in accordance with specified requirements. *Note.* — A disconnector is capable of opening and closing a circuit when either negligible current is broken or made, or when no significant change in the voltage across the terminals of each of the poles of the disconnector occurs. It is also capable of carrying currents under normal circuit conditions and carrying for a specified time currents under abnormal conditions such as those of short circuit. ★ sectionneur → *sectionneur 3.* R разъединитель. D Trennschalter. E seccionador. I sezionatore. N scheider. P odłącznik. S frånskiljare. (441,811)
4. **divided support disconnector** : a disconnector in which the fixed and moving contacts of each pole are not supported by a common base or frame. *Notes. 1* — A typical example is the pantograph or semi-pantograph disconnector. *2* — This term applies to high-voltage disconnectors only. ★ sectionneur à

éléments séparés → *sectionneur 6.* R разъединитель с разделенными опорами. D geteilter Trennschalter. E seccionador de elementos separados. I sezionatore a elementi separati. N scheider zonder gemenschappelijke grondplaat. P odłącznik o rozdzielonej podstawie. S enpelarfrånskiljare. (441)

5. **double-break disconnector** : a disconnector that opens a circuit at two points. ★ sectionneur à double coupure → *sectionneur 5.* R разъединитель с двойным размыканием. D Zweifach-Trennschalter. E seccionador de doble corte. I sezionatore a doppia interruzione. N scheider met dubbele onderbreking. P odłącznik dwuprzerwowy. S trepelarfrånskiljare. (441)
6. **feeder disconnector** : a disconnector which is located in series at the end of a feeder, within a substation bay, in order to isolate the feeder from the system. ★ sectionneur de ligne → *sectionneur 9.* R линейный разъединитель. D Leitungstrennschalter. E seccionador de línea. I sezionatore di linea. N lijn- of kabelscheider. P odłącznik liniowy. S ledningsfrånskiljare. (605)
7. **four-switch mesh substation with mesh opening disconnectors** : → *substation 6*
8. **overpressure disconnector for a capacitor** : a disconnecting device designed to interrupt the current path in the event of abnormal increase of the internal pressure. ★ déconnecteur à surpression d'un condensateur → *déconnecteur 1.* R прерыватель избыточного давления для конденсатора. D Überdruckabschalter eines Kondensators. E desconectador de sobrepresión de un condensador. I interruttore a sovrapressione di un condensatore. N onderbreker reagerend op overdruk in een condensator. P odłącznik nadciśnieniowy kondensatora. S övertrycksskydd. (436)
9. **selector with disconnector** : in a double or triple busbar substation, a disconnector which is intented to connect a primary circuit (line, transformer, etc.) to one of the busbars. ★ sectionneur d'aiguillage → *sectionneur 8.* R шинный разъединитель. D Sammelschienentrennschalter (bei Mehrfachsammelschienen). E seccionador selector de barras. I sezionatore di smistamento. N railkeuzescheider. P odłącznik szynowy. S samlingsskenefrånskiljare. (605)

disconnector-fuse

1. **disconnector-fuse** : a disconnector in which one or more poles have a fuse in series in a composite unit. ★ sectionneur à fusibles → *sectionneur 7.* R разъединитель-предохранитель. D Trennschalter mit Sicherungen. E seccionador con fusibles. I sezionatore oppure combinato con fusibile. N scheider met aangebouwde smeltveiligheden. P odłącznik z bezpiecznikami. S frånskiljare med säkringar. (441)

discontinuity

1. **blanking level discontinuity** (in a field waveform) : a difference in level between the blanking level during the field blanking interval and that obtained during the remainder of the field period. ★ discontinuité du niveau de suppression → *discontinuité 1.* R разрывность уровня гашения. (723)

discontinuous

1. **discontinuous furnace** : → *furnace 15*
2. **discontinuous interference** : → *interference 2*

discrepancy

1. **control discrepancy switch** : → *switch 6*
2. **discrepancy switch** : → *switch 12*

discrete

1. **incorrect (discrete) signal** : → *signal 103*
2. **perfect (discrete) signal** : → *signal 138*

discretely

1. **discretely timed signal** : → *signal 74*

discriminating

1. **coinbox discriminating tone** : → *tone 6*
2. **discriminating selector** : → *selector 4*
3. **special coinbox discriminating tone** : → *tone 30*

discrimination

1. **cross polarization discrimination** (of a radio wave) : for a radio wave transmitted with a given polarization, the ratio at the reception point of the power received with the expected polarization to the power received with the orthogonal polarization. *Note.* — The cross polarization discrimination depends both on the characteristics of the antennas and on the propagation medium. ★ discrimination de polarisation → *discrimination 2.* D Kreuzpolarisationsentkopplung (einer elektromagnetischen Welle). P dyskryminacja polaryzacji skrośnej. (705)
2. **discrimination** (*Syn.* separating capability) : → *capability 6*
3. **discrimination ratio** : → *ratio 30*
4. **over-current discrimination** : co-ordination of the operating characteristics of two or more over-current protective devices such that, on the incidence of over-currents within stated limits, the device intended to operate within these limits does so, while the other(s) does(do) not. *Note.* — Distinction is made between series discrimination, involving different over-current protective devices passing substantially the same over-current, and network discrimination involving identical protective devices passing different proportions of the over-current. ★ sélectivité lors d'une surintensité → *sélectivité 4.* R селективность при сверхтоках. D Überstromselektivität. E selectividad con sobreintensidad. I selettività in caso di sovracorrente. N overstroomselectiviteit. P wybiorczość działania; selektywność działania. S överströmsselektivitet. (441)

discriminator

1. **amplitude discriminator** (nuclear) : a discriminator designed to provide an output signal for each input signal the amplitude of which exceeds a predetermined threshold value. ★ discriminateur d'amplitude → *discriminateur 3.* R амплитудный дискриминатор. D Amplitudendiskriminator. E discriminador de amplitud. I discriminatore di ampiezza. N pulshoogtediscriminator; amplitude discriminator. P dyskryminator amplitudy. S pulshöjdsdiskriminator. (391)
2. **amplitude discriminator** : a device which gives an output signal only for input signals whose instantaneous values lie between two specified thresholds. ★ sélecteur d'amplitude → *sélecteur 5.* R амплитудный дискриминатор. D Amplitudendiskriminator. E selector de amplitud. I selettore d'ampiezza. N amplitudediscriminator. P dyskryminator amplitudy (międzyprogowy). S amplituddiskriminator. (702)
3. **charge discriminator** : a discriminator designed to provide an output signal when the electrical charge exceeds a predetermined threshold value or, alternatively, is less than a predetermined threshold value within a specified time interval. ★ discriminateur de charge → *discriminateur 5.* R дискриминатор заряда. D Ladungsdiskriminator. E discriminador de carga. I discriminatore di carica. N ladingsdiscriminator. P dyskryminator ładunkowy. S laddningsdiskriminator. (391)
4. **direct current amplitude discriminator** : an amplitude discriminator designed to provide an output signal when the input current (voltage) exceeds a predetermined threshold value even when the frequency of this current (voltage) approaches zero. ★ discriminateur d'amplitude pour courant continu → *discriminateur 4.* R дискриминатор постоянного тока. D gleichstromgekoppelter Amplitudendiskriminator. E discriminador de amplitud de corriente continua. I discriminatore di ampiezza per corrente continua. N amplitude discriminator voor gelijkstroom. P stałoprądowy dyskryminator amplitudy. S pulshöjdsdiskriminator för likström. (391)
5. **discriminator** : a sub-assembly designed to provide an output signal for each input signal of which a specified characteristic (amplitude, rise time, duration, etc.) meets a specified condition. ★ discriminateur → *discriminateur 1.* R дискриминатор. D Diskriminator. E discriminador. I discriminatore. N discriminator. P dyskryminator. S diskriminator. (391)
6. **discriminator curve** : → *curve 12*
7. **frequency discriminator** : a frequency demodulator based on electric circuits having a linear sloping amplitude/frequency characteristic in the useful frequency band. ★ discriminateur de fréquence → *discriminateur 8.* R частотный дискриминатор. D Frequenzdiskriminator. E discriminador de

frecuencia. I discriminatore di frequenza. N frequentiediscriminator. P dyskryminator częstotliwości. S (frekvens)diskriminator. (702)

8. **pulse duration discriminator** : a discriminator designed to provide an output signal for each input pulse the duration of which exceeds a predetermined value or alternatively is less than a predetermined value. ★ discriminateur de durée → *discriminateur 6.* R дискриминатор импульсов по длительности. D Impulsdauerdiskriminator. E discriminador de duración. I discriminatore di durata. N pulsduurdiscriminator. P dyskryminator szerokości impulsów. S pulslängdsdiskriminator. (391)
9. **pulse fall time discriminator** : a discriminator designed to provide an output signal for each input pulse of which the fall time exceeds or alternatively is less than a given value. ★ discriminateur de temps de descente → *discriminateur 10.* R дискриминатор импульсов по времени спада. D Abfallzeitdiskriminator. E discriminador de tiempo de bajada. I discriminatore di tempo di discesa. N discriminator voor de pulsdaaltijd. P dyskryminator czasu opadania impulsów. S (puls)falltidsdiskriminator. (391)
10. **pulse rise time discriminator** : a discriminator designed to provide an output signal for each input pulse of which the rise time exceeds or alternatively is less than a given value. ★ discriminateur de temps de montée → *discriminateur 11.* R дискриминатор импульсов по времени нарастания. D Anstiegszeitdiskriminator. E discriminador de tiempo de subida. I discriminatore di tempo di salita. N discriminator voor de pulsstijgtijd. P dyskryminator czasu narastania impulsów. S stigtidsdiskriminator. (391)
11. pulse shape discriminator (deprecated) : see: Pulse shape selector. ★ discriminateur de forme → *discriminateur 7.* R дискриминатор формы импульсов. D Impulsformdiskriminator. E discriminador de forma. I discriminatore di forma. N pulsvormdiscriminator. P dyskryminator kształtu impulsów. S pulsformsdiskriminator. (391)
12. **telegraph discriminator** : a discriminator for converting frequency shift telegraphy signals into direct current transmission signals. ★ discriminateur télégraphique → *discriminateur 12.* R телеграфный дискриминатор. D Telegrafendiskriminator. E discriminador telegráfico. I discriminatore telegrafico. N telegraafdiscriminator. P dyskryminator telegraficzny. S telegrafdiskriminator. (721)
13. **time discriminator** : a discriminator designed to provide an output signal for each input pulse which appears before a specified reference time, or alternatively, after a specified reference time. ★ discriminateur de temps → *discriminateur 9.* R временной дискриминатор. D Zeitdiskriminator. E discriminador de tiempo. I discriminatore di tempo. N tijddiscriminator. P dyskryminator czasowy. S tidsdiskriminator. (391)
14. window discriminator (deprecated) : see (Pulse) Selector. ★ discriminateur à fenêtre → *discriminateur 2.* R дискриминатор с окном. D Fensterdiskriminator. E discriminador de ventana. I discriminatore a finestra. N vensterdiscriminator. P dyskryminator okienkowy. S ..... (391)

disengage

1. **to disengage** (for an electrical relay) (see Figure 446-1) : to terminate a function previously effected in a given output circuit. ★ dégager → *dégager 1.* R трогаться при возврате (для электрического реле). D rückfallen. E liberar (para un relé eléctrico). I disimpegnare. N afvallen. P przełączyć do stanu spoczynku. S slå från. (446)

disengaging

1. **disengaging percentage** : → *percentage 2*
2. **disengaging ratio** : → *ratio 31*
3. **disengaging time** : → *time 48*
4. **disengaging value** : → *value 8*
5. **disengaging value of the characteristic quantity** : → *value 9*

disintegration

1. **beta disintegration** : radioactive transformation of a nuclide or a neutron, in which the atomic number changes by ±1, and the mass number remains constant. ★ désintégration bêta → *désintégration 2.* D Betazerfall. E desintegración beta. I disintegrazione beta. N bêtadesintegratie; bêtaverval. P rozpad β. S betasönderfall. (026)
2. **disintegration energy** : energy balance of a nuclear disintegration. ★ énergie de désintégration → *énergie 35.* D Zerfallsenergie. E energía de desintegración. I energia di disintegrazione. N desintegratie-energie. P energia rozpadu. S sönderfallsenergi. (026)
3. **nuclear disintegration** : transformation of the nucleus, involving a splitting into two or more nuclei or particles, with the emission of energy; this transformation can be spontaneous, or induced by a nucleus or a particle. ★ désintégration nucléaire → *désintégration 3.* D Kernzerfall. E desintegración nuclear. I disintegrazione nucleare. N kerndesintegratie. P rozpad jądra. S kärnsönderfall. (026,881)

disk

1. **Corbino disc** : a disc-shaped magnetoresistor whose two electrodes are a conductive region in the geometric centre of the disc and a concentric conductive strip around the outer perimeter of the disc. ★ disque de Corbino → *disque 4.* R диск корбино. D Corbino-Scheibe. E disco de Corbino. I disco di Corbino. N Corbinoschijf. P magnetorezystor tarczowy. S corbinoskiva. (521)
2. **cutting on disk** : → *cutting 5*
3. **disc attenuator** : → *attenuator 7*
4. **disc insulator** (*Syn.* suspension insulator) : → *insulator 36*
5. **disc recorder** : → *recorder 2*
6. **disk** (*Syn.* record) : a piece of plastic material in the form of a disk on which a modulation is mechanically recorded. ★ disque → *disque 3.* R диск с механической записью. D Schallplatte. E disco. I disco. N plaat. P płyta (gramofonowa). S grammofonskiva. (806)
7. **disk and wiper lubricated bearing** : → *bearing 13*
8. **disk recorder** : → *recorder 3*
9. **lacquer disk** : a disk intended for recording, consisting of a solid substrate coated with a plasticized cellulose nitrate lacquer. ★ laque → *laque 4.* R лаковый диск. D Lackfolie. E disco de laca. I lacca; disco di lacca. N lakplaat. P płyta lakierowa surowa. S lackskiva. (806)
10. **magnetic disk** : a recording magnetic medium in the form of a disk. ★ disque magnétique → *disque 11.* R магнитный диск. D Magnetplatte. E disco magnético. I disco magnetico. N magnetische schijf. P płyta magnetyczna. S magnetisk skiva. (806)
11. **processed disk record** : → *record 7*
12. **Rayleigh disk** : a disk on a torsion suspension designed to measure the sound particle velocity in a fluid. ★ disque de Rayleigh → *disque 9.* R диск Рэлея. D Rayleigh-Scheibe. E disco de Rayleigh. I disco di Rayleigh. N schijf van Rayleigh. P krążek Rayleigha. S Rayleigh-skiva. (801)
13. **rotating disc electrode** : → *electrode 81*
14. **warp of a disk** : → *warp 1*

disk-seal

1. **disk-seal tube** : → *tube 20*

dislocation

1. **dislocation** : a geometrical defect in the normal lattice arrangement of atoms in a crystalline medium. ★ dislocation → *dislocation 1.* R дислокация. D Versetzung. E dislocación. I dislocazione. N dislokatie. P przemieszczenie. S strukturfel. (561)

disordering

1. **disordering** : displacement of an atom, due to radiation, from the position it occupies in a crystal lattice. ★ création de défaut → *création 1.* D Fehlstellenerzeugung. E desordenación. I creazione di difetto. N (rooster)verstoring. P zaburzenie sieci. S störning. (026)

disparity

1. **disparity** : the digital sum of one or more consecutive signal elements forming a defined group. ★ disparité → *disparité 2.* R небаланс. D Ungleichheit. E disparidad. I disparità. N dispariteit. P niezrównoważenie elementów kodu. S ..... (704)

dispenser

1. **dispenser cathode** : → *cathode 21*

dispersion

1. **chromatic dispersion** (*Syn.* dispersion) : → *dispersion 3*
2. **dispersion** (of an electromagnetic wave) : the relatively significant variation with frequency, in a given frequency band, of certain properties such as the phase velocity of an electromagnetic wave propagating in a dispersive medium. ★ dispersion → *dispersion 2.* D Dispersion (einer elektromagnetischen Welle). P rozpraszanie (fali elektromagnetycznej). (705)
3. **dispersion** (*Syn.* chromatic dispersion (redundant term)) : the dependence of a propagation parameter on wavelength. *Notes. 1* — Dispersion will result in distortion of the transmitted signal. *2* — In singlemode optical fibres dispersion can arise as a result of : material dispersion, waveguide dispersion, profile dispersion. ★ dispersion → *dispersion 3.* R дисперсия; хроматическая дисперсия. D Dispersion; chromatische Dispersion. E dispersión; dispersión cromática (término redundante). I dispersione (cromatica). N dispersie; kleurschifting; chromatische dispersie. P dyspersja; dyspersja chromatyczna. S dispersion. (731)
4. **dispersion** : separation of the sinusoidal components of a wave that results from change of speed of sound with frequency. ★ dispersion acoustique → *dispersion 5.* R акустическая дисперсия. D Dispersion. E dispersión acústica. I dispersione acustica. N dispersie. P dyspersja. S dispersion. (801)
5. **dispersion** : 1. Phenomenon of change in the velocity of propagation of monochromatic radiations in a medium as a fuction of the frequency of these radiations. 2. Property of a medium giving rise to this phenomenon. 3. Property of an optical system resulting in the separation of the monochromatic components of a radiation, obtained for example by means of prisms or gratings. ★ dispersion → *dispersion 4.* R дисперсия. D Dispersion. E dispersión. I dispersione. N kleurschifting; dispersie. P rozszczepienie; dyspersja. S dispersion. (845)
6. **material dispersion** : that dispersion attributable to the wavelength dependence of the refractive index of material used to form the fibre. ★ dispersion du matériau → *dispersion 11.* R дисперсия в материале. D Material-Dispersion. E dispersión del material. I dispersione di materiale. N materiaaldispersie. P dyspersja materiałowa. S materialdispersion. (731)
7. **material dispersion parameter** : → *parameter 4*
8. **profile dispersion** : in an optical fibre, that dispersion attributable to the variation of refractive index profile with wavelength. *Note.* — The profile variation has two contributors: variation in refractive index contrast, and variation in profile parameter. ★ dispersion de profil → *dispersion 9.* R дисперсия профиля. D Profildispersion. E dispersión del perfil. I dispersione di profilo. N (brekingsindex)profieldispersie. P dyspersja profilu. S profildispersion. (731)
9. **profile dispersion parameter** : → *parameter 6*
10. **pulse dispersion** (*Syn.* pulse broadening) : → *broadening 3*
11. **waveguide dispersion** : that dispersion in a signal attributable to the dependence of the phase and group velocities on wavelength due to the geometric properties of the fibre. *Note.* — For optical fibres the dependence is on the ratio (a/λ), where a is core radius and λ is wavelength. ★ dispersion de guidage → *dispersion 7.* R дисперсия в волноводе. D Wellenleiter-Dispersion. E dispersión de guíaonda. I dispersione di guida. N golfgeleiderdispersie. P dyspersja falowodowa. S vågledardispersion. (731)

dispersive

1. **dispersive medium** : → *medium 9*
2. **dispersive medium** : → *medium 10*

displacement

1. **displacement current density** : → *current-density 3*
2. **displacement factor** : → *factor 48*
3. **displacement factor** : → *factor 49*
4. **electrical spot displacement** (*Syn.* leakage spot displacement) : displacement of the spot caused by self-bias resulting from a leakage current or a beam current passing through a resistor in the circuit of a deflecting electrode. ★ déplacement électrique du spot → *déplacement 9.* R электрическое смещение пятна. D elektrische Punktabweichung. E desplazamiento eléctrico del spot. I spostamento elettrico della macchia. N elektrische stipverplaatsing. P przemieszczenie plamki elektryczne. S elektrisk punktförskjutning. (531)
5. **field displacement** : the production by a gyromagnetic effect in a uniform waveguide of two waves of entirely different modes propagating in opposite directions, for instance in a rectangular waveguide partially and asymmetrically filled with a ferrite longitudinal plate. ★ déplacement de champ → *déplacement 4.* R смещение поля. D ..... E desplazamiento del campo. I deflessione di campo. N veldverschuiving. P przemieszczenie pola. S fältändring. (726)
6. **instantaneous particle displacement** : in an elastic medium, vector whose extremity is the position of the particle at a given instant, and whose origin is at the equilibrium position of the particule. ★ élongation instantanée → *élongation 3.* R мгновенное колебательное смещение (частицы). D Augenblickswert der Teilchenauslenkunge. E elongación instantánea. I ampiezza di spostamento istantanea. N momentele uitwijking van het deeltje. P przesunięcie akustyczne chwilowe; wychylenie akustyczne chwilowe. S momentanvärde av partikelförskjutning. (801)
7. **leakage spot displacement** (*Syn.* electrical spot displacement) : → *displacement 4*
8. **mechanical spot displacement** (*Syn.* mechanical spot misalignment) : displacement of the spot with respect to a stated reference point on the screen, with all the deflecting electrodes connected directly to the accelerating electrode and with no other deflecting fields applied. ★ excentrage mécanique du spot → *excentrage 1.* R механическое смещение пятна. D mechanische Punktabweichung. E descentrado mecánico del spot. I eccentricità meccanica della macchia. N mechanische stipverplaatsing. P przemieszczenie plamki mechaniczne. S mekanisk punktförskjutning. (531)
9. **neutral point displacement voltage** : → *voltage 123*
10. **particle displacement** : root-mean-square of instantaneous displacement over a given time interval, unless otherwise specified. ★ élongation → *élongation 1.* R колебательное смещение (частицы). D Teilchenauslenkung. E elongación. I ampiezza di spostamento. N uitwijking van het deeltje. P przesunięcie akustyczne. S partikelförskjutning. (801)
11. **peak particle displacement** : greatest instantaneous particle displacement during a given time interval. ★ élongation de crête → *élongation 2.* R пиковое колебательное смещение (частицы). D Spitzenwert der Teilchenauslenkung. E elongación de cresta. I spostamento di picco. N topwaarde van de uitwijking van het deeltje. P wartość szczytowa przesunięcia akustycznego. S toppväde av partikelförskjutningen. (801)
12. **phase displacement** : the difference in phase between the primary and secondary currents (or voltages), the positive direction of the primary and secondary currents (or voltages) being so chosen that this difference is zero for a perfect transformer. *Note.* — The phase displacement is said to be positive when the secondary current (voltage) leads the primary current. ★ déphasage → *déphasage 4.* R угловая погрешность. D Fehlwinkel. E error de fase. I errore d'angolo. N hoekfout. P błąd kątowy. S vinkelfel. (321)
13. **phase displacement** (*Syn.* phase difference (for a transformer)) : the angular difference between the phasors representing the voltages between the neutral point (real or imaginary) and the corresponding terminals of two windings, a positive-sequence voltage system being applied to the high-voltage terminals, following each other in alphabetical sequence if they are lettered, or in numerical sequence if they are numbered. The phasors are assumed to rotate in a counter-clockwise sense. ★ déphasage → *déphasage 6.* R смещение фаз (для трансформатора). D Phasenverschiebung (für einen Transformator). E desfase (para un transformador). I sfasamento (per un trasformatore). N faseverschuiving (voor een transformator). P przesunięcie fazowe (dla transformatora). S fasläge. (421)

display

1. **display gamma** : → *gamma 2*
2. **display primaries** : → *primary 3*
3. **display storage tube** : → *tube 21*
4. **liquid crystal display** (*Syn.* LCD (abbreviation)) : a display device which uses certain liquid crystals whose reflectance or transmittance can be changed by applying an

electric field. ★ affichage à cristaux liquides → *affichage 1.* R индикатор на жидких кристаллах. D Flüssigkristallanzeige. E visualizador de cristal líquido. I visualizzatore a cristalli liquidi. N beeldscherm gemaakt met vloeibare kristallen; LCD. P wyświetlacz ciekłokrystaliczny. S vätskekristalltablå. (845)

5. **quality of display** : → *quality 6*
6. **visual display unit** : → *unit 85*

disruptive

1. **disruptive breakdown** : → *breakdown 10*
2. **disruptive discharge** : → *discharge 14*
3. **disruptive electric field strength** : → *field strength 2*
4. **fifty per cent disruptive discharge voltage** : → *voltage 66*

dissector

1. **image dissector** (obsolete) : a photo-emissive camera tube, having a semi-transparent photocathode and a point anode in which an optical image gives rise to an electron image that is swept across the point anode to effect scanning. ★ dissecteur d'image → *dissecteur 1.* R диссектор с полупрозрачным фотокатодом. (723)

dissipation

1. **dielectric dissipation factor** : → *factor 41*
2. **dielectric dissipation factor** : → *factor 42*
3. **dissipation** : conversion of sound energy into heat. ★ dissipation → *dissipation 1.* R диссипация. D Dissipation. E disipación. I dissipazione. N dissipatie. P rozpraszanie (energii akustycznej). S förlust. (801)
4. **dissipation factor** : → *factor 50*
5. **dissipation factor test** (*Syn.* loss tangent test) : → *test 49*
6. **electrode dissipation** : the power dissipated in the electrode in the form of heat, as a result of electron and/or ion bombardment. ★ dissipation d'électrode → *dissipation 2.* R мощность, рассеиваемая электродом. D Elektroden-Verlustleistung. E disipación de electrodo. I dissipazione elettrodica. N elektrodedissipatie. P moc wydzielana w elektrodzie. S elektrodförlust(effekt). (531)

dissipative

1. **dissipative medium** (*Syn.* absorbing medium) : → *medium 1*

dissociated

1. **fully dissociated signalling** : → *signalling 19*

distance

1. **accelerated distance protection system** : → *system 3*
2. **arcing distance** : the shortest distance in air outside the insulator between the metallic parts to which the voltage is normally applied. *Note.* — The term "dry arcing distance" is also used. ★ distance d'arc → *distance 9.* R разрядное расстояние. D Schlagweite. E distancia de arco. I distanza d'arco. N slagwijdte. P droga przeskoku. S överslagsavstånd. (471)
3. **blocking overreach distance protection system** : → *system 18*
4. **co-ordination distance** : the distance from a radio station in a given direction beyond which interference to, or from, other radio stations sharing the same frequency band can be neglected for planning purposes. ★ distance de coordination → *distance 11.* D Koordinierungsentfernung. P odległość koordynacyjna. (705)
5. **creepage distance** : the shortest distance along the surface of an insulator between two conductive parts. *Note.* — The surface of cement or of any other non-insulating jointing material is not considered as forming part of the creepage distance. If high resistance coating is applied to parts of the insulating part of an insulator such parts are considered to be effective insulating surfaces and the distance over them is included in the creepage distance. ★ ligne de fuite → *ligne 89.* R длина пути утечки. D Kriechweg. E línea de fuga. I linea di fuga. N kruipweg. P droga upływu. S krypsträcka. (151,471)
6. **diffuse-field distance** : that distance from the acoustic center of a sound source at which the mean-square sound pressure of the direct sound, in a specified direction, is equal to the mean-square sound pressure of the reverberant sound in the room containing the source. ★ distance caractéristique de champ diffus → *distance 7.* R расстояние диффузного поля. D Diffus-Feld-Abstand (bei Kugelstrahler, Hallradius). E distancia de campo difuso. I distanza minima di campo diffuso. N galmstraal. P odstęp charakterystyczny pola dyfuzyjnego. S efterklangsradie. (801)
7. **distance factor** (*Syn.* (ionospheric) transmission factor) : → *factor 101*
8. **distance protection system** : → *system 48*
9. **distance technique** : → *technique 7*
10. **effective deceleration (as a function of distance)** : → *deceleration 1*
11. **gear centre distance** : the distance between two parallel shafts carrying gears, generally between the traction motor shaft and the axle it drives. ★ entraxe → *entraxe 1.* R межосевое расстояние. D Zentrale. E entreeje. I interasse; centrale. N asafstand. P odległość osi wałów. S växels centrumavstånd. (811)
12. **Hamming distance** : the number of digit positions in which the corresponding digits of two n-bit bytes of the same length are different. ★ distance de Hamming → *distance 12.* R расстояние Хемминга. D Hamming-Abstand. E distancia de Hamming. I distanza di Hamming. N Hamming-afstand. P odstęp Hamminga. S Hamming-avstånd. (721)
13. **isolating distance** (of a pole of a mechanical switching device) : the clearance between open contacts meeting the safety requirements specified for disconnectors. ★ distance de sectionnement d'un pôle → *distance 15.* R изолирующий промежуток (полюса контактного коммутационного аппарата). D Trennstrecke (eines Schalterpoles). E distancia de seccionamiento (de un polo de un aparato mecánico de conexión). I distanza di sezionamento di un polo (di un apparecchio meccanico di manovra). N scheidingsafstand (van een pool van een mechanische schakelaar). P przerwa biegunowa bezpieczna. S frånskiljningsavstånd. (441)
14. **isolating distance** (for a fuse) : the shortest distance between the fuse-base contacts or any conductive parts connected thereto, measured on a fuse with the fuse-link or fuse-carrier removed. ★ distance de sectionnement → *distance 14.* R изолирующий промежуток для предохранителя. D Trennstrecke (einer Sicherung). E distancia de seccionamiento (para un fusible). I distanza di isolamento (per un fusibile). N scheidingsweg (van een smeltveiligheid). P przerwa biegunowa bezpiecznika bezpieczna. S frånskiljningsavstånd. (441)
15. **overreaching (for a distance protection system)** : → *overreaching 1*
16. **permissive overreach distance protection system** : → *system 141*
17. **permissive underreach distance protection system** : → *system 143*
18. **protected creepage distance** : That part of the creepage distance on the illuminated side of the insulator which would lie in shadow if light were projected on to the insulator at 90° (or 45° in special cases) to the longitudinal axis of the insulator. ★ ligne de fuite protégée → *ligne 90.* R защищенная длина пути утечки. D geschützter Kriechweg. E línea de fuga protegida. I linea di fuga protetta. N beschermde kruipweg. P droga upływu chroniona. S skyddad krypsträcka. (471)
19. **radio horizon distance** (*Syn.* radio horizon range) : the distance between a source of radio waves and the radio horizon in a given direction. ★ distance à l'horizon radioélectrique → *distance 3.* D Abstand zum Radiohorizont. P odległość horyzontu radiowego; zasięg horyzontu radiowego. (705)
20. **skip distance** : the minimum distance from a transmission point and in a given direction at which a radio wave of given frequency can be received following ionospheric reflection. ★ distance de saut → *distance 13.* D Sprungentfernung. P odległość skokowa. (705)
21. **skip distance focussing** : → *focusing 15*
22. **stopping distance** : the distance travelled by a train or vehicle between the point at which application of the brake is initiated and that at which the train comes to a standstill. ★ distance d'arrêt → *distance 10.* R тормозной путь. D Bremsweg. E distancia de parada. I spazio d'arresto. N remweg. P droga hamowania. S bromssträcka. (811)
23. **test distance** (for photometric measurements) : distance from the light centre to the surface of the detector. ★ distance d'essai → *distance 17.* R расстояние фотометрирования. D Messabstand (für photometrische Messungen). E distancia de

ensayo. I distanza di prova. N meetafstand. P odległość pomiarowa. S mätavstånd. (845)

24. **underreaching (for a distance protection system)** : → *underreaching 1*

distance-velocity

1. **distance-velocity lag** : → *lag 1*

distortion

1. **amplitude/amplitude distortion** (*Syn.* amplitude distortion) : a type of non-linearity distortion characterized by an undesired variation of the ratio of the amplitude of the fundamental component of the output oscillation to the amplitude of the corresponding sinusoidal input oscillation as a function of the input amplitude. ★ distorsion amplitude-amplitude → *distorsion 15.* R амплитудное искажение. D Amplituden-Amplitudenverzerrung; Amplitudenverzerrung. E distorsión amplitud/amplitud; distorsión de amplitud. I distorsione ampiezza/ampiezza. N amplitude/amplitudevervorming. P zniekształcenie (nielinearne) amplitudowe. S amplitud-amplituddistorsion. (702)
2. **amplitude distortion** (*Syn.* amplitude/amplitude distortion) : → *distortion 1*
3. **amplitude/frequency distortion** (*Syn.* attenuation/frequency distortion) : a type of linear distortion occurring when the amplitude/frequency characteristic of a transmission channel or two-port device deviates from the ideal form in the useful frequency band. *Notes. 1* — The ideal form of the amplitude/frequency characteristic is a straight line of constant ordinate. 2 — In some fields such as line transmission "distorsion d'affaiblissement" in French and "attenuation/frequency distortion" in English are the preferred terms. ★ distorsion amplitude-fréquence → *distorsion 16.* R амплитудно-частотные искажения. D Amplituden-Frequenzverzerrung; Dämpfungs-Frequenzverzerrung. E distorsión amplitud/frecuencia; distorsión de atenuación. I distorsione ampiezza/frequenza; distorsione d'attenuazione. N amplitude/frequentievervorming; demping/frequentievervorming. P zniekształcenie tłumieniowe. S amplituddistorsion. (702)
4. **amplitude modulation distortion** : the defects of the envelope of the amplitude modulated signal when compared with the waveform of the modulating signal. ★ distorsion de modulation d'amplitude → *distorsion 40.* R искажение амплитудной модуляции. D Amplitudenmodulations-Verzerrung. E distorsión de modulación de amplitud. I distorsione della modulazione d'ampiezza. N AM-vervorming. P zniekształcenie modulacji amplitudowej. S amplitudmoduleringsdistorsion. (303)
5. **aperture distortion** : an effect due to the finite dimensions of the scanning spot in facsimile transmission and reception ; contours are blurred, and details, smaller than this scanning spot, are suppressed. ★ distorsion d'ouverture → *distorsion 54.* R апертурное искажение. D Aperturverzerrung. E distorsión de apertura. I distorsione di apertura. N apertuurvervorming. P zniekształcenie otworowania. S aperturdistorsion. (721)
6. **aperture distortion** : distortion produced by the finite size of the scanning spot and by imperfections in the associated optical paths, giving the effect of a reduction in the high frequency components of the video signal. ★ distorsion d'ouverture → *distorsion 55.* R апертурные искажения. (723)
7. **attenuation/frequency distortion** (*Syn.* amplitude/frequency distortion) : → *distortion 3*
8. **barrel distortion** : a geometric distortion of a rectangular raster causing its boundaries to appear convex. ★ distorsion en barillet → *distorsion 58.* R бочкообразное искажение. D Tonnenverzeichnung. E distorsión en barrilete. I distorsione a barile. N tonvormige vertekening. P zniekształcenie beczkowe. S konvex (avböjnings) distorsion. (531)
9. **bias distortion** : the time distortion affecting a two-conditions discrete signal when the mean degrees of individual distortion are different for the two directions of change-over at the significant instants. ★ distorsion biaise → *distorsion 17.* R искажение преобладания. D einseitige Verzerrung. E distorsión de polaridad. I distorsione di dissimetria. N ingestelde vervorming. P zniekształcenie jednostronne. S sneddistorsion. (721)
10. **characteristic distortion** : the time distortion caused by transients which are produced by the transmission of the signal in a transmission channel of specified characteristics. ★ distorsion caractéristique → *distorsion 18.* R характеристическое искажение. D charakteristische Verzerrung; Einschwingverzerrung. E distorsión característica. I distorsione caratteristica. N karakteristieke vervorming. P zniekształcenie charakterystyczne; zniekształcenie właściwe. S karakteristisk distorsion. (721)
11. **chromatic distortion** (*Syn.* intramodal distortion) : → *distortion 49*
12. **colorimetric distortion** : a noticeable difference between the colours of the object and those of the corresponding reproduced picture. ★ distorsion colorimétrique → *distorsion 19.* R цветовые искажения. (723)
13. **conventional degree of distortion** : → *degree 1*
14. **cyclic distortion** : a time distortion which is due to events having a periodic character such that the degrees of individual distortion themselves show a periodic character in the sequence of the significant instants. ★ distorsion cyclique → *distorsion 23.* R циклическое искажение. D zyklische Verzerrung. E distorsión cíclica. I distorsione ciclica. N cyclische vervorming. P zniekształcenie cykliczne. S cyklisk distorsion. (721)
15. **degree of bias distortion** : → *degree 2*
16. **degree of early anisochronous parallel distortion** : → *degree 4*
17. **degree of gross start-stop distortion** : → *degree 6*
18. **degree of individual distortion** : → *degree 7*
19. **degree of isochronous distortion** : → *degree 9*
20. **degree of late anisochronous parallel distortion** : → *degree 10*
21. **degree of standardized test distortion** : → *degree 14*
22. **degree of start-stop distortion** : → *degree 15*
23. **degree of start-stop distortion at the actual mean modulation rate** (*Syn.* degree of synchronous start-stop distortion) : → *degree 17*
24. **degree of synchronous start-stop distortion** : → *degree 17*
25. **differential amplitude distortion** (*Syn.* differential gain distortion) : for an input signal including a sinusoidal oscillation of small amplitude superimposed on a d.c. component, a type of non-linearity distortion characterized by an undesired variation of the ratio of the amplitude of the fundamental component of the output oscillation to the amplitude of the input oscillation as a function of the value of the input d.c. component. ★ distorsion d'amplitude différentielle → *distorsion 25.* R дифференциальное амплитудное искажение. D differenzielle Amplitudenverzerrung; differenzielle Verstärkungsverzerrung. E distorsión de amplitud diferencial; distorsión de ganancia diferencial. I distorsione d'ampiezza differenziale; distorsione di guadagno differenziale. N differentiële amplitudevervorming. P zniekształcenie wzmocności różnicowe. S ..... (702)
26. **differential gain distortion** (*Syn.* differential amplitude distortion) : → *distortion 25*
27. **differential phase distortion** : for a signal including a sinusoidal oscillation of small amplitude superimposed on a d.c. component, a type of non-linearity distortion characterized by an undesired variation of the phase difference between the fundamental component of the output oscillation and the corresponding sinusoidal input oscillation as a function of the value of the input d.c. component. ★ distorsion de phase différentielle → *distorsion 45.* R разностное фазовое искажение. D differenzielle Phasenverzerrung. E distorsión de fase diferencial. I distorsione di fase differenziale. N differentiële fasevervorming. P zniekształcenie (nielinearne) fazowe różnicowe. S ..... (702)
28. **distortion** (of a signal) : any unintentional and generally undesired change of the form of a signal occurring in a two-port network or transmission medium. *Note.* — In optical fibres there are several attenuation and dispersion mechanisms which can give rise to a distorted received signal. ★ distorsion → *distorsion 12.* R искажение (сигнала). D Verzerrung (eines Signals). E distorsión (de una señal). I distorsione (di un segnale). N vervorming (van een signaal). P zniekształcenie (sygnału). S distorsion. (731)
29. **distortion** : undesired change of waveform. *Note.* — Distortion may result from *a)* non-linear relation between input and output. *b)* non-uniform transmission at different frequencies. *c)* phase shift not proportional to frequency. ★ distorsion

→ *distorsion 13.* R искажение. D Verzerrung. E distorsión. I distorsione. N vervorming. P zniekształcenie. S distorsion; förvrängning. (702,801)

30. **distortion factor** (*Syn.* harmonic factor) : → *factor 89*

31. **distortion limited operation** : → *operation 23*

32. **distortion of envelope delay time** (in an electrical network) : an unwanted variation of the envelope delay time of a signal in an electrical network as a function of frequency. ★ distorsion du temps de propagation de groupe → *distorsion 56.* R искажение времени задержки огибающей (в электрическом четырехполюснике). D Gruppenlaufzeit-Verzerrungen (in einem elektrischen Netzwerk). E distorsión del tiempo de propagación de grupo (de una red eléctrica). I distorsione del tempo di propagazione di gruppo (in una rete elettrica). N dispersie, groeplooptijdvervorming. P zniekształcenie opóźności obwiedniowej (w układzie elektrycznym). S löptidsdistorsion. (561)

33. **distortion of long duration** (of a picture) : distortion of a picture, the effects of which are evident during several frames. ★ distorsion de longue durée → *distorsion 34.* R искажение (изображения) больших времен. (723)

34. **distortion of short duration** (of a picture) : distortion of a picture, the effects of which are evident over a duration distinctly less than the line period. ★ distorsion de courte durée → *distorsion 29.* R искажение (изображения) малых времен. (723)

35. **dynamic distortion** : a type of distortion which occurs when the stylus tip, due to its mechanical impedance, deforms the record material and therefore does not accurately trace the groove shape. ★ distorsion dynamique → *distorsion 57.* R динамические искажения. D Abtastverzerrung. E distorsión dinámica. I distorsione dinamica. N dynamische vervorming. P ..... S dynamisk distorsion. (806)

36. **envelope delay distortion** (*Syn.* group delay/frequency distortion) : → *distortion 43*

37. **field-time luminance distortion** : variation in the luminance, in a vertical direction, of the image of an object of uniform luminance. ★ distorsion de luminance verticale → *distorsion 37.* R искажения яркости по вертикали. (723)

38. **foldover distortion** (*Syn.* aliasing) : → *aliasing 1*

39. **fortuitous distortion** : the time distortion resulting from random events affecting the channel or equipments and such that the degree of individual distortion at any significant instant is unpredictable. ★ distorsion fortuite → *distorsion 63.* R случайное искажение. D unregelmäßige Verzerrung. E distorsión fortuita. I distorsione fortuita. N toevallige vervorming. P zniekształcenie przypadkowe. S slumpdistorsion. (721)

40. **frequency modulation distortion** : the defect of the waveform of the difference between the instantaneous frequency and the mean frequency when compared with the waveform of the modulating signal. ★ distorsion de modulation de fréquence → *distorsion 41.* R искажение частотной модуляции. D Frequenzmodulations-Verzerrung. E distorsión de modulación de frecuencia. I distorsione della modulazione di frequenza. N FM-vervorming. P zniekształcenie modulacji częstotliwościowej. S frekvensmoduleringsdistorsion. (303)

41. **geometric distortion** : alteration of the geometric shapes of reproduced objects, including stationary objects. *Examples :* trapezoidal, S-shape, barrel, bowing, pin cushion distortion, etc... ★ distorsion géométrique → *distorsion 64.* R геометрические искажения. (723)

42. **grey scale distortion** : the incorrect reproduction of different levels of the grey scale. ★ distorsion (de l'échelle) des gris → *distorsion 33.* R искажение серой шкалы. (723)

43. **group delay/frequency distortion** (*Syn.* envelope delay distortion) : a type of linear distortion occurring when the group delay from input to output of a transmission channel or two-port device varies over the useful frequency band. *Note.* — The group delay/frequency distortion is a phase/frequency distortion characterized by the fact that the phase/frequency characteristic is not a straight line for the frequencies of the significant spectral components of the signal. ★ distorsion de temps (de propagation) de groupe → *distorsion 50.* R частотные искажения, обусловленные групповым временем запаздывания. D Gruppenlaufzeit-Frequenzverzerrung; Umhüllungs-Laufzeitverzerrung. E distorsión de tiempo (de propagación) de grupo. I distorsione di tempo (di propagazione) di gruppo. N vervorming door looptijdverschil van de omhullende. P zniekształcenie opóźnieniowe grupowe. S löptidsdistorsion. (702)

44. **harmonic distortion** (*Syn.* relative harmonic content) : → *content 7*

45. **harmonic distortion** : a type of non-linearity distortion characterized by the production of output components with frequencies which are integral multiples of the frequency of the sinusoidal input signal. ★ distorsion harmonique → *distorsion 66.* R гармоническое искажение. D harmonische Verzerrung. E distorsión armónica. I distorsione armonica. N harmonische vervorming. P zniekształcenie harmoniczne. S harmonisk distorsion. (702)

46. **inherent distortion** (of a transmission channel) : the time distortion of a received signal at the output of a transmission channel when the signal at the input is a perfect discrete signal. *Notes. 1* — The inherent distortion includes all the distortions produced in the channel such as bias distortion, characteristic distortion and fortuitous distortion. *2* — The concept of inherent distortion can be extended to the constituents such as a telegraph relay, telegraph repeater or exchange. ★ distorsion propre → *distorsion 76.* R собственное искажение (канала передачи). D Eigenverzerrung (eines Übertragungskanals). E distorsión propia (de un canal de transmisión). I distorsione propria. N eigen vervorming (van een transmissiekanaal). P zniekształcenie własne (kanału transmisyjnego). S egendistorsion. (721)

47. **intermodulation distortion** : the distortion resulting from the combination within the filter of two independent input signals. ★ distorsion d'intermodulation → *distorsion 52.* R интермодуляционное искажение. D Intermodulations-Verzerrungen. E distorsión de intermodulación. I distorsione di intermodulazione. N intermodulatievervorming. P zniekształcenie intermodulacyjne. S intermodulationsdistorsion. (561)

48. **intermodulation distortion** : a form of non-linearity distortion characterized by the presence of intermodulation products in the signal at the output of a non-linear device or transmission medium. *Note.* — Intermodulation distortion can be expressed quantitatively as the ratio of the amplitude of intermodulation products of various orders to the amplitude of two or more sinusoidal input oscillations of specified amplitude and frequency. ★ distorsion d'intermodulation → *distorsion 53.* R интермодуляционные искажения. D Intermodulationsverzerrung. E distorsión de intermodulación. I distorsione di intermodulazione. N intermodulatievervorming. P zniekształcenie intermodulacyjne. S intermodulationsdistorsion. (702)

49. **intramodal distortion** (*Syn.* chromatic distortion) : in an optical fibre, that distortion due to dispersion for a given mode. ★ distorsion intramodale → *distorsion 68.* R внутримодовое искажение; хроматическое искажение. D intramodale Dispersion; chromatische Verzerrung. E distorsión intramodal; distorsión cromática. I distorsione intramodale; dispersione cromatica. N intramodale vervorming; chromatische vervorming. P zniekształcenia chromatyczne. S kromatisk distorsion. (731)

50. **ionospheric distortion** : the undesired change of a radio signal, produced during ionospheric propagation either because of unequal transmission of the various spectral components of the signal, or as a result of non-linear phenomena. ★ distorsion ionosphérique → *distorsion 69.* D ionosphärische Verzerrung. P zakłócenie jonosferyczne. (705)

51. **linear distortion** : the distortion produced by a linear two-port device or a linear transmission medium when, in the useful frequency band, the amplitude/frequency characteristic is not a constant or the phase/frequency characteristic is not represented by a straight line for which the zero frequency intercept on the phase axis is zero or a multiple of π radians. ★ distorsion linéaire → *distorsion 70.* R линейные искажения. D Linearverzerrung; lineare Verzerrung. E distorsión lineal. I distorsione lineare. N lineaire vervorming. P zniekształcenie linearne. S linjär distorsion. (702)

52. **line-time luminance distortion** : variation in the horizontal direction of the luminance of the image of an object of uniform luminance. ★ distorsion de luminance horizontale → *distorsion 36.* R искажения яркости по горизонтали. (723)

53. **modal distortion** : in a multimode optical fibre, that distortion resulting from the propagation of different modes having

different properties. *Note.* — Modal distortion arises as a result of differential mode delay and differential mode attenuation, under given launch conditions. ★ distorsion modale → *distorsion 71.* R модовое искажение; модовая дисперсия. D intermodale Dispersion. E distorsión modal. I distorsione modale; dispersione modale. N intermodale vervorming. P zniekształcenia propagacji wielomodowej. S moddistorsion. (731)

54. non-linear distortion (*Syn.* non-linearity distortion) : → *distortion 55*

55. non-linearity distortion (*Syn.* non-linear distortion) : distortion of a signal which occurs when a transmission line or a two-port device is non-linear between input and output. ★ distorsion de non-linéarité → *distorsion 42.* R нелинейное искажение. D Nichtlinearitätsverzerrung; nichtlineare Verzerrung. E distorsión de no linealidad; distorsión no-lineal. I distorsione di non linearità; distorsione non lineare. N niet-lineariteitsvervorming. P zniekształcenie nielinearne. S olinjaritetsdistorsion. (702)

56. overload distortion (in quantizing) : the distortion of a signal resulting from peak limiting in quantizing. ★ distorsion d'écrêtage → *distorsion 51.* R искажение вследствие перегрузки (в основной ИКМ). D Übersteuerungsverzerrung (bei Pulscodemodulation). E distorsión de sobrecarga (en cuantificación); distorsión de cresta. I distorsione da sovraccarico (nella quantizzazione). N vervorming door overbelasting (in basispulscodemodulatie). P zniekształcenie przeciążeniowe (w kwantowaniu). S överbelastningsdistorsion. (704)

57. phase/amplitude distortion : a type of non-linearity distortion characterized by an undesired variation of the phase difference between the fundamental component of the output oscillation and the corresponding sinusoidal input oscillation as a function of the input amplitude. ★ distorsion phase-amplitude → *distorsion 74.* R фазоамплитудное искажение. D Phasen-Amplitudenverzerrung. E distorsión fase/amplitud. I distorsione fase/ampiezza. N fase/amplitudevervorming. P zniekształcenie (nielinearne) fazowe. S fas-amplituddistorsion. (702)

58. phase distortion (in an electrical network) : an unwanted variation of phase difference in an electrical network as a function of frequency. ★ distorsion de phase → *distorsion 43.* R фазовое искажение (в электрическом четырехполюснике). D Phasenverzerrung (in einem elektrischen Netzwerk). E distorsión de fase (en una red eléctrica). I distorsione di fase (in una rete di elettrica). N vervorming door variatie in fase en frequentie; fasevervorming. P zniekształcenie fazowe (w układzie elektrycznym). S fasdistorsion. (561)

59. phase/frequency distortion : a type of linear distortion occurring when the phase/frequency characteristic of a transmission line or two-port device deviates from the ideal form over the useful frequency band. *Notes. 1* — The ideal form of the phase/frequency characteristic is a straight line for which the zero-frequency intercept on the phase axis is zero or an integral multiple of π radians. *2* — The phase/frequency distortion differs from group delay/frequency distortion by the addition of a constant phase angle to all significant spectral components of the signal. If the zero-frequency phase intercept is an integral multiple of radians, this addition does not change the signal, or only reverses its sign. ★ distorsion phase-fréquence → *distorsion 75.* R фазочастотные искажения. D Phasen-Frequenzverzerrung. E distorsión fase/frecuencia; distorsión de fase. I distorsione fase/frequenza; distorsione di fase. N fase/frequentievervorming. P zniekształcenie fazowe. S fasdistorsion. (702)

60. pin-cushion distortion : a geometric distortion of a rectangular raster causing its boundaries to appear concave. ★ distorsion en coussin → *distorsion 59.* R подушкообразное искажение. D Kissenverzeichnung. E distorsión cóncava. I distorsione a cuscino. N kussenvormige vertekening. P zniekształcenie poduszkowe. S konkav (avböjnings)-distorsion. (531)

61. quantizing distortion (*Syn.* quantizing noise) : the distortion of a signal resulting from the process of quantizing an original signal when the values to be quantized are within the working range of the quantizer. *Note.* — The term "quantizing noise" may be used when the quantized signal appears as an information conveying signal with superimposed random noise. ★ distorsion de quantification → *distorsion 46.* R искажение квантования; шум квантования. D Quantisierungsverzerrung; Quantisierungsgeräusch. E distorsión de cuantificación; ruido de cuantificación. I distorsione di quantizzazione; rumore di quantizzazione. N vervorming bij het kwantificerent; kwantificeerruis. P szum kwantowania. S kvantiseringsdistorsion. (702,704)

62. recording/reproducing harmonic distortion : the harmonic distortion of an output signal obtained under stated conditions when reproducing a tape recorded under specified conditions. ★ distorsion harmonique en enregistrement-lecture → *distorsion 67.* R гармонические искажения в канале записи воспроизведения. D harmonische Verzerrung bei Aufnahme/Wiedergabe; Klirrgrad. E distorsión armónica en registro-lectura. I distorsione armonica in registrazione-reproduzione. N opneem/weergeef-harmonischenvervorming. P zniekształcenie harmoniczne zapis-odczyt. S övertonsdistorsion vid in- och avspelning. (806)

63. S distortion : a geometric distortion that causes a straight line to take the form of a letter "S". ★ distorsion en «S» → *distorsion 61.* R *S*-образное искажение. D S-Verzeichnung. E distorsión en S. I distorsione a «S». N "S"-vertekening. P zniekształcenie esowe. S S-distorsion. (531)

64. slope overload distortion (in DPCM) : the distortion due to peak limiting in a DPCM quantizer. *Note.* — Slope overload distortion arises from the inability of the quantizer to respond adequately to large differences among a succession of samples applied to the input of the DPCM system. ★ distorsion de dépassement de pente → *distorsion 31.* R искажение за счет перегрузки по крутизне (в дифференциальной ИКМ). D Flankenübersteuerungsverzerrung (bei DPCM). E pendiente de distorsión de sobrecarga. I distorsione di superamento di pendenza (nel DPCM). N vervorming door hellingsoverbelasting (bij DPCM). P zniekształcenie przeciążeniowe (w modulacji impulsowo-kodowej różnicowej). S nivåbegränsningsdistorsion. (704)

65. spot distortion : undesired asymmetry or defect in the undeflected spot shape or size which may be caused by astigmatism, spherical aberration, coma or other undesired effects. ★ distorsion de spot → *distorsion 48.* R искажение пятна. D Leuchtfleckverzerrung. E distorsión del spot. I distorsione della macchia. N stipvervorming. P zniekształcenie plamki. S fokuseringsfel. (531)

66. time distortion : the undesired effect on a discretely-timed signal, when the significant instants do not coincide with the corresponding ideal instants. ★ distorsion temporelle → *distorsion 77.* R временное искажение. D Zeitverzerrung. E distorsión temporal. I distorsione temporale. N tijdsvervorming. P zniekształcenie czasowe (sygnału z czasem dyskretnym). S tiddistorsion. (702,721)

67. total harmonic distortion : the total harmonic factor at the output of a transmission channel or two-port device producing harmonic distortion, when the input signal is a sinusoidal oscillation of specified frequency and amplitude. ★ taux de distorsion harmonique → *taux 16.* R общее гармоническое искажение. D Klirrfaktor. E tasa de distorsión armónica; distorsión armónica total. I tasso di distorsione armonica. N totale harmonische vervorming. P zniekształcenie harmoniczne całkowite. S total harmonisk distorsion. (702)

68. tracing distortion : a type of distortion due to the difference in the geometrical forms of the recording stylus tip and the reproducing stylus tip. ★ distorsion de contact → *distorsion 26.* R искажения огибания. D Spurverzerrung wegen Nichtidentität der Form von Aufzeichnungs-und Abtastnadel. E distorsión de contacto. I distorsione di contatto. N aftastvervorming. P zniekształcenie śladowe. S spårningsdistorsion. (806)

69. transmitter distortion : the time distortion of a transmitter measured at the output under specified standard conditions. ★ distorsion à l'émission → *distorsion 14.* R искажение передатчика. D Sendeverzerrung. E distorsión en la emisión. I distorsione di trasmissione. N zendervervorming. P zniekształcenie własne nadajnika. S sändardistorsion. (721)

70. trapezium distortion : a geometric distortion that causes a rectangular raster to take the form of a trapezium. ★ distorsion en trapèze → *distorsion 62.* R трапецеидальное искажение. D Trapezverzeichnung. E distorsión en trapecio. I distorsione a trapezio. N trapeziumvormige vertekening. P zniekształcenie trapezowe. S trapetsdistorsion. (531)

distributed

1. **distributed circuit** : → *circuit 55*
2. **distributed control** : → *control 90*
3. **distributed frame alignment signal** : → *signal 75*
4. **distributed winding** : → *winding 21*

distribution

1. **balancing of a distribution network** : → *balancing 4*
2. **cable (distribution system) receiver** : → *receiver 1*
3. **cabled distribution** : a form of telecommunication for the distribution of television or sound programmes over networks of cables to a number of users. *Note.* — Some systems may transmit other signals and provide return channels. ★ télédistribution → *télédistribution 9.* R распределение по кабелю. D Kabelrundfunk. E distribución por cable. I diffusione via cavo. N kabelomroep. P telekomunikacja rozsiewcza przewodowa. S kabelsändning. (701,723)
4. **(cabled distribution) sub-system** : → *sub-system 1*
5. **cabled distribution system** : → *system 24*
6. **combined distribution frame** : → *frame 5*
7. **cumulative distribution** (*Syn.* probability distribution) : → *probability 7*
8. **digital distribution frame** : → *frame 6*
9. **direct distribution by satellite** : use of satellite links of the fixed-satellite service to relay programme signals from one or more points of origin to terrestrial broadcast transmitting stations or the head-ends of cabled distribution systems, through earth stations located at the same place. *Note.* — The fixed-satellite is defined by : the use of radiocommunication to link earth stations at given position via one or more satellite. ★ distribution directe par satellite → *distribution 8.* R непосредственное спутниковое распределение. (723)
10. **distribution amplifier** (*Syn.* spur amplifier) : → *amplifier 28*
11. **distribution cable** : → *cable 25*
12. **distribution circuit** (*Syn.* distribution link) : → *link 11*
13. **distribution circuit** : → *circuit 57*
14. **distribution factor** (*Syn.* spread factor) : → *factor 169*
15. **distribution feeder** (*Syn.* spur feeder) : → *feeder 20*
16. **distribution frame** : → *frame 8*
17. **distribution line** : → *line 26*
18. **distribution link** : → *link 11*
19. **distribution losses** : → *loss 21*
20. **distribution of electricity** : the transfer of electricity to consumers within an area of consumption. ★ distribution d'énergie électrique → *distribution 7.* R распределение электрической энергии. D Verteilung elektrischer Energie. E distribución de energía eléctrica. I distribuzione d'energia elettrica. N distributie van elektrische energie. P rozdział energii elektrycznej. S distribution (av elkraft); eldistribution. (601)
21. **distribution point** : → *point 11*
22. **distribution point** : → *point 12*
23. **distribution temperature** : → *temperature 15*
24. **distribution undertaking** : → *undertaking 1*
25. **equilibrium mode distribution** (*Syn.* steady state condition) : the condition of propagation in a multimode optical fibre in which the relative power distribution among the bound modes is independent of length. ★ équilibre des modes → *équilibre 5.* R равномерное распределение мод; условие стационарного режима. D Moden-Gleichgewichts-Verteilung. E distribución de equilibrio modal; condición de equilibrio. I distribuzione modale d'equilibrio; condizioni di stato stazionario. N evenwichts-modusverdeling; evenwichtstoestand. P stan modowy ustalony. S modjämvikt. (731)
26. **equilibrium mode distribution length** (*Syn.* equilibrium length) : → *length 13*
27. **group distribution frame** : → *frame 31*
28. **high-frequency repeater distribution frame** : → *frame 33*
29. **intermediate distribution frame** : → *frame 34*
30. **main distribution frame** : → *frame 38*
31. **non-equilibrium mode distribution** : that distribution of modes prevailing in a length of multimode optical fibre which is shorter than the equilibrium length. ★ répartition des modes hors équilibre → *répartition 19.* R неравномерное распределение мод. D Nichtgleichgewichts-Modenverteilung. E distribución de modos no equilibrada. I distribuzione modale di non equilibrio. N niet-evenwichts modusverdeling. P stan modowy nieustalony. S outjämnad modfördelning. (731)
32. **optical fibre distribution system** : → *system 131*
33. **probability distribution** : → *probability 7*
34. **relative spectral distribution** (of a radiant, luminous or photon quantity $X(\lambda)$) ($S(\lambda)$) : ratio of the spectral distribution $X_\lambda(\lambda)$ of the quantity $X(\lambda)$ to a fixed reference value R which can be an average value, a maximum value or an arbitrarily chosen value of this distribution.

$$S(\lambda) = \frac{X_\lambda(\lambda)}{R}$$

Unit : 1. ★ répartition spectrale relative → *répartition 31.* R относительное спектральное распределение (энергетической, световой или фотонной величины $X(\lambda)$). D relative spektrale Verteilung (einer Strahlungs-, Licht- oder Photonen-größe $X(\lambda)$); Strahlungsfunktion. E concentración espectral relativa. I distribuzione spettrale relativa. N relatieve spectrale verdeling. P rozkład widmowy względny. S relativ spektralfördelning. (845)
35. **repeater distribution frame** : → *frame 40*
36. **rotationally symmetrical luminous intensity distribution** (of a source) : distribution of luminous intensity which may be represented by rotating around an axis a polar luminous intensity distribution curve in a plane containing that axis. ★ répartition de révolution de l'intensité lumineuse → *répartition 16.* R круглосимметричное светораспределение (источника). D rotationssymmetrische Lichtstärkeverteilung (einer Lichtquelle). E distribución de revolución de la intensidad luminosa. I ripartizione a simmetria di rotazione dell'intensità luminosa. N rotatiesymmetrische lichtsterkteverdeling (van een bron). P rozsył światłości obrotowo-symetryczny. S rotationssymmetrisk ljusfördelning. (845)
37. **signal distribution** : transmission of signals from a common control to various functional units. ★ distribution de signaux → *distribution 6.* R распределение сигналов. D Signalverteilung. E distribución de señales. I distribuzione di segnali. N signaaldistributie. P rozprowadzanie sygnałów. S signaldistribution. (714)
38. **sinusoidal distribution** (of a current in an antenna) : for an antenna where each radiating element may be considered to be a single wire, an hypothetical distribution of current along the wire such that the current amplitude is a sinusoidal function of the distance. ★ répartition sinusoïdale → *répartition 27.* R синусоидальное распределение (тока в антенне). D sinusförmige Verteilung (eines Stromes in einer Antenne). E distribución senoidal (de una corriente en una antena). I distribuzione sinusoidale. N sinusvormige verdeling (van een antennestroom). P rozkład sinusoidalny (prądu anteny). S sinusformad strömfördelning. (712)
39. **(spatial) distribution of luminous intensity** (of a source) : display, by means of curves or tables, of the value of the luminous intensity of the source as a function of direction in space. ★ répartition (spatiale) de l'intensité lumineuse → *répartition 29.* R (пространственное) светораспределение (источника света). D (räumliche) Verteilung der Lichtstärke (einer Lichtquelle). E distribución (espacial) de la intensidad luminosa. I ripartizione dell'intensità luminosa. N (ruimtelijke) lichtsterkteverdeling (van een bron). P rozsył światłości (przestrzenny). S ljusfördelning. (845)
40. **spectral distribution** (*Syn.* spectral concentration) : → *concentration 9*
41. **symmetrical luminous intensity distribution** (of a source) : distribution of luminous intensity having an axis of symmetry or at least one plane of symmetry. ★ répartition symétrique de l'intensité lumineuse → *répartition 32.* R симметричное светораспределение (источника света). D symmetrische Lichtstärkeverteilung (einer Lichtquelle). E distribución simétrica de la intensidad luminosa. I ripartizione simmetrica dell'intensità luminosa. N symmetrische lichtsterkteverdeling (van een bron). P rozsył światłości symetryczny. S symmetrisk ljusfördelning. (845)
42. **tapered distribution** (of a field over an aperture) : a distribution of the electromagnetic field over an aperture such that the magnitude of the aperture illumination decreases from the centre to the edges. ★ répartition en cloche → *répartition 22.* R спадающее распределение (поля в раскрыве). D zum Rand abfallende Belegung (eines Feldes über

eine Apertur). E distribución en campana (del campo sobre una apertura). I distribuzione rastremata (tapered). N niet-uniforme belichting. P rozkład malejący (pola nad apertura). S avtagande fältfördelning. (712)

43. **traffic distribution imbalance** (*Syn.* traffic load imbalance) : → *imbalance 2*

distributor

1. **fully automatic reperforator transmitter distributor** (*Syn.* coupled reperforator and tape reader) : → *reperforator 1*

disturbance

1. **continuous disturbance** : electromagnetic disturbance the effects of which on a particular device or equipment cannot be resolved into a succession of distinct effects. ★ perturbation continue → *perturbation 4.* R непрерывная (гладкая) помеха. D Dauerstörung. E perturbación contínua. I disturbo continuo. N continue storing. P zaburzenie ciągłe. S ihållande störning. (161)
2. **disturbance** : undesired and most frequently unpredictable change in an input variable, other than the reference variable. ★ perturbation → *perturbation 3.* R возмущение. D Störgröße. E perturbación. I disturbo. N storing; stoorgrootheid. P zakłócenie. S störning. (351)
3. **disturbance field strength** : → *field strength 3*
4. **disturbance power** : → *power 31*
5. **disturbance recorder** : → *recorder 4*
6. **disturbance suppression** : → *suppression 1*
7. **disturbance voltage** : → *voltage 52*
8. **electromagnetic disturbance** : any electromagnetic phenomenon which may degrade the performance of a device, equipment or system, or adversely affect living or inert matter. *Note.* — An electromagnetic disturbance may be an electromagnetic noise, an unwanted signal or a change in the propagation medium itself. ★ perturbation électromagnétique → *perturbation 5.* R электромагнитное возмущение. D elektromagnetische Störung. E perturbación electromagnética; parásito. I disturbo elettromagnetico. N elektromagnetische storing. P zaburzenie elektromagnetyczne. S elektromagnetisk störning. (161,702)
9. **impulsive disturbance** : electromagnetic disturbance which, when incident on a particular device or equipment, manifests itself as a succession of distinct pulses or transients. ★ perturbation impulsive → *perturbation 6.* R импульсная помеха. D Impulsstörung. E perturbación impulsiva. I disturbo impulsivo. N impulsstoring. P zaburzenie impulsowe. S impulsstörning. (161)
10. **ionospheric disturbance** : variation in the ionization of the ionosphere significantly exceeding the usual daily variations at the place, time of year and time of day in question. ★ perturbation ionosphérique → *perturbation 7.* D ionosphärische Störung. P zaburzenie jonosferyczne. (705)
11. **limit of disturbance** : → *limit 9*
12. **mains-borne disturbance** : electromagnetic disturbance conducted to a device via the lead connecting it to a power supply. ★ perturbation transmise par l'alimentation → *perturbation 11.* R сетевая помеха. D leitungsgebundene Störung. E perturbación transmitida por la alimentación. I disturbo condotto dell'alimentazione. N netstoring. P zaburzenie sieciowe. S nätstörning. (161)
13. **radio (frequency) disturbance** : electromagnetic disturbance having components in the radio frequency range. ★ perturbation radioélectrique → *perturbation 10.* R радиочастотное возмущение. D hochfrequente Störung. E perturbación radioeléctrica. I disturbo radioelettrico. N radio(frequente) storing. P zaburzenie radioelektryczne. S radiostörning. (161,702)
14. **recurrent disturbance** (*Syn.* recurrent (impulsive) noise) : → *noise 68*
15. **sudden ionospheric disturbance** (*Syn.* SID (abbreviation)) : ionospheric disturbance with a duration of from a few minutes to a few hours, characterized by the sudden increase in the ionization of the D region in the daylight hemisphere. ★ perturbation ionosphérique à début brusque → *perturbation 8.* D plötzliche ionosphärische Störung; SID (Abkürzung). P zaburzenie jonosferyczne. (705)

disturbed

1. **disturbed channel** : → *channel 23*

disturbing

1. **disturbing channel** : → *channel 24*

divergence

1. **beam divergence** : 1 — The increase in the cross section of a beam with increasing distance from the source. 2 — In the far-field region, angle subtended by two diametrically opposed points in a plane perpendicular to the optical axis, at which points the irradiance is a specified fraction of the beam's peak irradiance. *Note.* — Generally, only the maximum and minimum divergencies (corresponding to the major and minor diameters of the far-field irradiance) need be specified. ★ divergence → *divergence 6.* R расходимость пучка. D Strahldivergenz. E divergencia del haz. I divergenza del fascio. N bundeldivergentie; bundelspreiding. P rozbieżność wiązki. S strålknippsdivergens. (731)
2. **divergence** : growth of a reaction rate with time. ★ divergence → *divergence 3.* D Divergenz. E divergencia. I divergenza. N divergentie. P rozbieżność reakcji łańcuchowej. S divergens. (026)
3. **divergence** (of a vector field) : the scalar quantity equal to the limit of the flux which emerges from a closed surface, divided by the volume contained by the surface when all its dimensions become infinitesimal.

$$\operatorname{div} \boldsymbol{f} = \nabla \cdot \boldsymbol{f} = \lim_{\int \mathrm{d}\tau \to 0} \frac{\int \boldsymbol{n} \cdot \boldsymbol{f} \mathrm{d}A}{\int \mathrm{d}\tau}$$

★ divergence → *divergence 4.* R дивергенция (векторного поля). D Divergenz (eines Vektorfeldes). E divergencia (de un campo vectorial). I divergenza (di un campo vettoriale). N divergentie. P dywergencja; rozbieżność. S divergens. (101)
4. **divergence** : the decrease of the amplitude of a specified electromagnetic wave at a point, due to the curvature of reflecting surfaces or to the space variations of refractive index, on the propagation path of the wave. ★ divergence → *divergence 5.* D Divergenz; Defokussierung. P rozbieżość; diwergencja. (705)
5. **divergence factor** : → *factor 55*
6. **divergence loss** : → *loss 22*
7. **divergence loss** : → *loss 23*
8. **half-peak divergence** (of a projector, in a specified plane) (*Syn.* one-half-peak spread (USA)) : angular extent of all the radius vectors of the polar curve of luminous intensity in the specified plane having lengths greater than 50% of the maximum. *Note.* — In British practice beam spread relates to the total angle within which the illuminance on a plane normal to the axis of the beam exceeds 10% of the maximum. ★ largeur angulaire de faisceau à mi-intensité → *largeur 6.* R угловая ширина пучка (прожектора, в заданной плоскости); ограниченного половинной силой света. D Halbstreuwinkel (eines Scheinwerfers, in einer definierten Ebene). E anchura del haz para intensidad media. I apertura angolare a semi-intensità del fascio luminoso; visiblità. N halveringshoek van een bundel. P kąt rozwarcia użyteczny $0{,}5I_{max}$. S halvvärdesspridning. (845)
9. **zero divergence field** : → *field 62*

diversity

1. **diversity factor** : → *factor 56*
2. **diversity factor (for welding)** : → *factor 57*
3. **diversity of a signalling module** : procedures for allocating signal messages to signalling links in a signalling module under any specified condition, particularly when link failure or excessive queue times occur. ★ diversité de module sémaphore → *diversité 1.* R заполнение модуля сигнализации. D ..... E diversidad de módulo de señalización. I diversità di un modulo di segnalazione. N ..... P zmiana modułu sygnalizacyjnego. S moduluppdelning. (714)

diverter

1. **diverter switch** : → *switch 13*
2. **surge diverter** (*Syn.* lightning arrester) : → *arrester 3*

divided

1. **divided support disconnector** : → *disconnector 4*
2. **divided support earthing switch** : → *switch 14*
3. **function divided control** : → *control 110*
4. **time divided control** : → *control 192*
5. **traffic load divided control** : → *control 195*

divider

1. **capacitor voltage divider** : a voltage divider consisting only of capacitors. ★ diviseur (de tension) capacitif → *diviseur 6.* R емкостный делитель напряжения. D kapazitiver (Spannungs-) Teiler. E divisor (de tensión) capacitivo. I divisore di tensione capacitivo. N capacitieve spanningsdeler. P dzielnik napięciowy pojemnościowy. S kondensatorspänningsdelare. (321)
2. **capacitor voltage divider** : a capacitor stack forming an alternating voltage divider. ★ diviseur capacitif → *diviseur 1.* R емкостной делитель напряжения. D kapazitiver Spannungsteiler. E divisor capacitivo. I divisore di tensione capacitivo. N capacitieve spanningsdeler. P dzielnik napięcia kondensatorowy. S (kapacitiv) spänningsdelare. (436)
3. **frequency divider** : a non-linear device for producing oscillations having frequencies which are integral sub-multiples of the input frequency. ★ diviseur de fréquence → *diviseur 2.* R делитель частоты. D Frequenzteiler. E divisor de frecuencia. I divisore di frequenza. N frequentiedeler. P dzielnik częstotliwości. S frekvensdelare. (702)
