2. **steady state** : the state of a system in which the characteristic parameters remain constant. *Note.* — For example, characteristic parameters of a sinusoidal quantity are r.m.s. value, frequency and initial phase. ★ régime établi → *régime 24.* R установившийся режим. D stationärer Zustand. E régimen permanente. I regime permanente. N stationaire toestand. P stan ustalony. S fortfarighet; stationärt tillstånd. (101)
3. **steady state** : qualifies a value determined for conditions of an item when characteristic parameters of the item remain constant. ★ en régime établi → *régime 6.* R стационарный. D stationär. E ... en régimen permanente.... I stato stazionario. N stationaire toestand. P stan ustalony. S fortfarighet. (191)
4. **steady state condition** (*Syn.* equilibrium mode distribution) : → *distribution 25*
5. **steady state of a system** : the operating conditions of a network in which the system state variables are considered to be sensibly constant. ★ régime établi d'un réseau → *régime 25.* R установившийся режим электрической сети. D stationärer Zustand eines Netzes. E régimen estático de una red. I regime stabilizzato di una rete. N stationaire toestand van een systeem. P stan ustalony systemu elektroenergetycznego. S stationärt tillstånd. (603)
6. **steady state stability of a power system** : → *stability 19*
7. **steady state tape tension** : → *tension 4*
8. **(steady-state) availability** : → *availability 7*
9. **steady-state deviation** : → *deviation 18*
10. **steady-state deviation of the *n*th order** : → *deviation 19*
11. **steady-state load characteristic** : → *characteristic 88*
12. **steady-state oscillation** : → *oscillation 17*
13. **(steady-state) unavailability** : → *unavailability 5*

stealing

1. **bit stealing** (*Syn.* speech digit signalling) : → *signalling 58*

steam

1. **condensing steam turbine** : → *turbine 1*
2. **condensing steam turbine with bleeding** : → *turbine 2*
3. **steam turbine** : → *turbine 10*
4. **superheated steam** : steam which is at a temperature higher than the temperature of saturation at the given pressure. ★ vapeur surchauffée → *vapeur 14.* R перегретый пар. D überhitzter Dampf. E vapor sobrecalentado. I vapore surriscaldato. N oververhitte stoom. P para przegrzana. S överhettad ånga. (602)

steel

1. **aluminium clad steel reinforced aluminium conductor** : → *conductor 4*
2. **electrical steel** : magnetically soft steel intended for magnetic applications. *Note.* — The French term "tôle magnétique" is only used for sheets of electrical steel. ★ tôle magnétique → *tôle 2.* R электротехническая сталь. D weichmagnetischer Stahl. E chapa magnética. I lamierino magnetico. N koudgewalste (elektro)plaat. P stal magnetycznie miękka. S elektroplåt. (221)
3. **semi-processed electrical steel** : electrical steel that has not been subjected to the final annealing process. *Note.* — The French term "tôle magnétique semi-finie" is only used for sheets of semi-processed electrical steel. ★ tôle magnétique semi-finie → *tôle 3.* R полуобработанная электротехническая сталь. D nicht schlußgeglühter, weichmagnetischer Stahl. E chapa magnética semiacabada. I lamierino magnetico semilavorato. N koudgewalste (ongegloeide) (elektro)plaat. P stal (magnetycznie miękka) niewykończona. S oglödgad elektroplåt. (221)

4. **steel reinforced aluminium alloy conductor** : → *conductor 68*
5. **steel reinforced aluminium conductor** : → *conductor 69*

steerable

1. **multiple-unit steerable array** : → *array 13*

steerable-beam

1. **steerable-beam antenna** : → *antenna 111*

Stefan-Boltzmann

1. **Stefan-Boltzmann's law** : → *law 12*

step

1. **equivalent step index profile** : → *profile 3*
2. **(Heaviside) unit step** : a function, zero for all negative values of the independent variable and equal to unity for all positive values. ★ échelon unité → *échelon 7.* R единичная функция; единичная функция Хевисайда. D Einheitssprung; Heaviside-Funktion. E escalón unidad función de Heaviside. I gradino unitario; funzione di Heaviside. N eenheidsstapfunctie. P funkcja Heaviside'a; skok jednostkowy. S enhetssprång. (101)
3. **maximum rated step voltage** : → *voltage 108*
4. **neutral step wedge** : → *wedge 1*
5. ***n*-step starter** : → *starter 4*
6. **rated step voltage** : → *voltage 165*
7. **regulating step command** : → *command 17*
8. **step** (*Syn.* notch) : → *notch 2*
9. **step action** : → *action 23*
10. **step index fibre** : → *fibre 26*
11. **step index profile** : → *profile 16*
12. **step motion** : → *motion 5*
13. **step response** : → *response 21*
14. **step response time** : → *response time 7*
15. **step stress test** : → *test 80*
16. **step tariff** : → *tariff 39*
17. **step twist** : → *twist 2*
18. **tapping step** : the difference between the tapping factors, expressed as a percentage, of two adjacent tappings. ★ échelon de réglage → *échelon 6.* R ступень регулирования. D Anzapfungsstufe. E escalón de regulación. I gradino di regolazione. N aftakkingstrap. P stopień regulacji przekładni. S reglersteg. (421)
19. **whole step** (*Syn.* tempered whole tone) : → *tone 35*

step-by-step

1. **step by step adjusting command** (*Syn.* regulating step command) : → *command 17*
2. **step-by-step control** : → *control 176*
3. **step-by-step selector** : → *selector 17*

step-down

1. **step-down substation** : → *substation 27*

step-like

1. **step-like filter** (*Syn.* wedge filter) : → *filter 43*

stepped

1. **stepped lens** (*Syn.* zone lens) : → *lens 19*
2. **stepped start-stop system of data transmission** : → *system 203*
3. **stepped start-stop system of telegraphy** : → *system 204*

stepped-impedance

1. **stepped-impedance transformer** : → *transformer 63*

stepping

1. **hot-cathode stepping tube** : → *tube 42*

step-up

1. **step-up substation** : → *substation 28*

steradian

1. **steradian** (sr) : SI unit of solid angle : Solid angle that, having its vertex at the centre of a sphere, cuts off an area of the surface of the sphere equal to that of a square with sides of length equal to the radius of the sphere. (ISO, 31/1-2.1, 1978). ★ stéradian → *stéradian 1.* R стерадиан. D Steradiant. E estereorradián. I steradiante. N steradiaal. P steradian. S steradian. (845)

stereo

1. **pseudo stereo** (*Syn.* spatial effect) : → *effect 74*

stereofluoroscopy

1. **stereofluoroscopy** : the production of a pair of fluoroscopic images of an object from two slightly different angles in order that they may be viewed stereoscopically. ★ stéréoradioscopie → *stéréoradioscopie 1.* R стереофлюороскопия. D Röntgen-Stereodurchleuchtung. E estereorradioscopía. I stereofluoroscopia; stereoradioscopia. N stereoscopische doorlichting. P stereofluoroskopia. S stereogenomlysning. (881)

stereophonic

1. **left (stereophonic) signal** : → *signal 111*
2. **polar-modulation system (for stereophonic broadcasting)** : → *system 148*
3. **right (stereophonic) signal** : → *signal 162*
4. **stereophonic broadcasting** : → *broadcasting 13*
5. **stereophonic decoder** : → *decoder 4*
6. **stereophonic encoder** : → *encoder 4*
7. **stereophonic (multiplex) signal** : → *signal 224*
8. **stereophonic receiver** : → *receiver 13*
9. **stereophonic record** : → *record 15*
10. **stereophonic recording** : → *recording 46*
11. **stereophonic reproduction** : → *reproduction 7*
12. **stereophonic sound system** : → *system 205*
13. **stereophonic television** : → *television 30*

stereophony

1. **stereophony** : a sound control, recording, transmission, or reproduction technique capable of providing the listener with a sensation of spatial distribution of sound sources. *Note.* — Stereophony can be obtained for instance by using two separate microphones or groups of microphones, and two loudspeakers or groups of loudspeakers in different locations. ★ stéréophonie → *stéréophonie 1.* R стереофония. (723)

stereoradiography

1. **stereoradiography** : the production of a pair of radiographs of an object from two different angles, in order that they may be viewed or measured stereoscopically, so that the viewer sees a three-dimensional image. ★ stéréoradiographie → *stéréoradiographie 1.* R стереорадиография. D Röntgen-Stereoaufnahme. E estereorradiografía. I stereoradiografia. N stereoscopische radiografie. P stereoradiografia. S stereoradiografi. (881)

stereoscopic

1. **stereoscopic cassette changer** : → *changer 10*
2. **stereoscopic television** : → *television 31*

stern

1. **stern light** : → *light 67*

stick

1. **hand stick** (*Syn.* hand pole) : → *pole 7*
2. **hot stick working** (*Syn.* safe clearance working) : → *working 7*
3. **working stick** (*Syn.* working pole) : → *pole 45*

sticking

1. **picture sticking** (*Syn.* after image) : → *image 1*

stiffened

1. **stiffened mode (of piezoelectric vibration)** : → *mode 74*

stiffness

1. **acoustic stiffness** : in a system in which friction and inertia are negligible, quotient of sound pressure by the resulting in-phase volume displacement during sinusoidal motion. ★ raideur acoustique → *raideur 3.* R акустическая жесткость. D akustische Steifigkeit; Volumensteifigkeit. E rigidez acústica. I rigidezza acustica. N akoestische stijfheid. P sztywność akustyczna. S akustisk styvhet. (801)
2. **stiffness** : in a system in which friction and inertia are negligible, quotient of force at a point by the in-phase displacement at the point, caused by the force, during sinusoidal

motion. *Note.* — In the case of torsional stiffness, "force" and "displacement" respectively are replaced by "torque" and "angular displacement". ★ raideur → *raideur 1.* R жесткость. D Steifigkeit. E rigidez. I rigidezza. N stijfheid. P sztywność. S mekanisk styvhet. (801)

3. **stiffness** : the reciprocal of compliance. It is expressed in newtons per millimetre. ★ raideur → *raideur 2.* R упругость. D Auslenkkraft. E rigidez. I rigidità. N stijfheid. P sztywność (mechaniczna). S styvhet. (806)

Stiles-Crawford

1. **Stiles-Crawford effect (of the first kind)** : → *effect 79*

still

1. **still frame** : → *frame 46*
2. **still framing** (*Syn.* freeze framing) : → *framing 2*
3. **still picture video-telephony** : → *video-telephony 1*

stillage

1. **battery stillage** (*Syn.* battery rack) : → *rack 1*

still-picture

1. **still-picture television** : → *television 32*

stimulated

1. **stimulated emission** : → *emission 30*

stimulus

1. **achromatic stimulus** : a stimulus that, under the prevailing conditions of adaptation, gives rise to an achromatic perceived colour. *Note.* — In the colorimetry of object-colours, the colour of the perfect reflecting or transmitting diffuser is usually considered to be an achromatic stimulus for all illuminants, except those whose light sources appear to be highly chromatic. ★ stimulus achromatique → *stimulus 5.* R ахроматический стимул. D unbunter Farbreiz. E estímulo (de color) acromático. I stimolo acromatico. N achromatische (kleur)prikkel. P bodziec achromatyczny. S akromatisk stimulus. (845)
2. **additive mixture of colour stimuli** : → *mixture 1*
3. **chromatic stimulus** : a stimulus that, under the prevailing conditions of adaptation, gives rise to a chromatic perceived colour. *Note.* — In the colorimetry of object-colours, stimuli having purities greater than zero are usually considered to be chromatic stimuli. ★ stimulus chromatique → *stimulus 6.* R хроматический стимул. D bunter Farbreiz. E estímulo (de color) cromático. I stimolo cromatico. N (chromatische) kleurprikkel. P bodziec chromatyczny. S kromatisk stimulus. (845)
4. **colour stimulus** : visible radiation entering the eye and producing a sensation of colour, either chromatic or achromatic. ★ stimulus de couleur → *stimulus 7.* R цветовой стимул. D Farbreiz. E estímulo de color. I stimolo di colore. N kleurprikkel; kleurstimulans. P bodziec barwowy. S färgstimulus. (723,845)
5. **colour stimulus function** : → *function 6*
6. **complementary colour stimuli** : two colour stimuli are complementary when it is possible to reproduce the tristimulus values of a specified achromatic stimulus by a suitable additive mixture of these two stimuli. ★ stimulus de couleur complémentaires → *stimulus 8.* R дополнительные цветовые стимулы. D komplementäre Farbreize. E estímulos (de color) complementarios. I stimoli di colore complementari. N complementaire kleurprikkels. P bodziec barwowy dopełniający. S komplementära färgstimuli. (845)
7. **light stimulus** : visible radiation entering the eye and producing a sensation of light. ★ stimulus lumineux → *stimulus 13.* R световой стимул. D Lichtreiz. E estímulo luminoso. I stimolo luminoso. N lichtprikkel; lichtstimulus. P bodziec świetlny. S ljusstimulus. (845)
8. **metameric colour stimuli** (*Syn.* metamers) : spectrally different colour stimuli that have the same tristimulus values. *Notes. 1* — The corresponding property is called metamerism. 2 — In German, colour ("Farbvalenzen") consisting of spectrally identical colour stimuli are described as "unbedingt-gleich". ★ stimulus de couleur métamères → *stimulus 10.* R метамерные цветовые стимулы; метамеры. D bedingt-gleiche Farbreize; metamere Farbreize. E estímulos (de color) metámeros. I stimoli di colore metamerici; metameri. N metamere kleurprikkel. P bodźce barwowe metameryczne; metamery. S metamera färgstimuli; metamerer. (845)
9. **monochromatic stimulus** (*Syn.* spectral stimulus) : a stimulus consisting of a monochromatic radiation. ★ stimulus monochromatique → *stimulus 14.* R монохроматический стимул; спектральный стимул. D spektraler Farbreiz. E estímulo (de color) espectral. I stimolo monocromatico. N monochromatische kleurprikkel; spectrale prikkel. P bodziec monochromatyczny; bodziec widmowy. S monokromatisk stimulus. (845)
10. **optimal colour stimuli** : object-colour stimuli corresponding to objects whose luminance factors have maximum possible values for each chromaticity when their spectral luminance factors do not exceed 1 for any wavelength. *Notes. 1* — These stimuli correspond, in general, to objects whose spectral luminance factors have values of either unity or zero, with not more than two transitions between them. *2* — The luminance factors and chromaticity coordinates of these stimuli define the boundaries of a colour solid corresponding to non-fluorescent objects. *3* — For a given luminance factor, these colour stimuli define the maximum purity possible for non-fluorescent objects. ★ stimulus de couleur optimaux → *stimulus 11.* R оптимальный цветовой стимул. D Optimalfarben. E estímulos (de color) óptimos. I stimoli di colore ottimali. N optimale kleurprikkels. P bodźce barwowe optymalne. S optimalfärgstimuli. (845)
11. **purple stimulus** : stimulus that is represented in a chromaticity diagram by a point lying within the triangle defined by the point representing the specified achromatic stimulus and the two ends of the spectrum locus which correspond approximately to the wavelengths 380 nm and 780 nm. ★ stimulus pourpre → *stimulus 15.* R пурпурный стимул. D Purpurfarben. E estímulo (de color) púrpura. I stimolo porpora. N purperprikkel. P bodziec purpurowy. S purpurstimulus. (845)
12. **reference colour stimuli** : the set of three colour stimuli on which a trichromatic system is based. *Notes. 1* — These stimuli are either real colour stimuli or theoretical stimuli which are defined by linear combinations of real colour stimuli ; the magnitude of each of these three reference colour stimuli is expressed in terms of either photometric or radiometric units, or more commonly by specifying the ratios of their magnitudes or by stating that a specified additive mixture of these three stimuli matches a specified achromatic stimulus. *2* — In the CIE standard colorimetric systems, the reference colour stimuli are represented by the symbols [X], [Y], [Z] and [X_{10}], [Y_{10}], [Z_{10}]. ★ stimulus de couleur de référence → *stimulus 9.* R основные цветовые стимулы. D Primärvalenzen. E estímulos (de color) de referencia. I stimoli primari di colore. N referentiekleurprikkels. P bodźce barwowe odniesieniowe. S referensfärgstimuli. (845)
13. **relative colour stimulus function** : → *function 27*
14. **spectral stimulus** (*Syn.* monochromatic stimulus) : → *stimulus 9*
15. **stimulus** (*Syn.* excitation) : external force, or other input, applied to a system. ★ stimulus → *stimulus 4.* R стимул; возбуждение. D Anregung; Erregung. E estímulo; excitación. I stimolo; eccitazione. N stimulus; excitatie. P bodziec. S excitering; drivning; retning. (801)

stirrer

1. **arc furnace stirrer** : an induction device comprising a winding which generates an electromagnetic field, causing the circulation of a melted charge in the furnace. ★ brasseur électromagnétique d'un four à arc → *brasseur 2.* R устройство для перемешивания расплава в дуговой печи. D Lichtbogenofen-Rührspule. E agitador electromagnético de un horno de arco. I agitatore elettromagnetico di un forno ad arco. N inductief roersysteem voor boogoven. P mieszalnik elektromagnetyczny (pieca łukowego). S induktiv omrörare. (841)

stitch

1. **stitch wire** : → *wire 27*

stitched

1. **stitched catenary suspension** : → *suspension 8*

stochastic

1. **stochastic effects** : → *effect 80*
2. **stochastic quantity** : → *quantity 32*

stochiometric

1. **stochiometric composition** : → *composition 1*

stock

1. **rolling stock** : a general term covering all vehicles with or without motors. ★ matériel roulant → *matériel 15.* R подвижной состав. D Fahrzeugpark. E material rodante. I materiale rotabile. N rollend materieel. P tabor. S fordonspark; rullande materiel. (811)

stop

1. **automatic stop** : a device for automatically stopping the turntable rotation on reproducing equipment at the end of the groove. ★ arrêt automatique → *arrêt 1.* R автостоп. D automatische Abschaltung. E parada automática. I arresto automatico. N automatische stop. P automatyczny stop. S automatiskt stopp. (806)
2. **average speed between stops** : → *speed 4*
3. **end stop** : a device of a component to limit travel, e.g. to prevent a rotary switch spindle from rotating beyond a fixed point. ★ butée de fin de course → *butée 1.* R упор. D Endanschlag. E fin de carrera. I fermo di fine corsa. N eindstop; aanslag. P ogranicznik obrotu. S ändlägesstopp. (581)
4. **mechanical end stop** : a device which physically prevents operation of the tap-changer beyond either end position but allows operation towards the opposite direction. ★ fin de course mécanique → *fin de course 2.* R механический концевой упор. D mechanische Endbegrenzung. E final de carrera mecánico. I fine corsa meccanico. N mechanische eindstandvergrendeling. P ogranicznik ruchu mechaniczny. S ändlägestopp. (421)
5. **stop bandwidth** : → *bandwidth 9*
6. **stop command** : → *command 27*
7. **stop element** : → *element 54*
8. **stop joint** : → *joint 24*
9. **stop light** (*Syn.* brake light) : → *light 6*
10. **stop (quarter-wave) filter** : → *filter 38*
11. **stop signal** : → *signal 225*

stop-band

1. **stop-band** : a frequency band throughout which the attenuation is greater than a specified value. ★ bande atténuée → *bande 10.* R полоса затухания. D Sperrband. E banda atenuada. I banda attenuata. N onderdrukte band. P pasmo tłumieniowe. S spärrband. (151,561)

stopping

1. **collision mass stopping power** : → *power 21*
2. **emergency stopping** : emergency switching intended to stop a movement which has become dangerous. ★ arrêt d'urgence → *arrêt 3.* R аварийная остановка. D Not-Halt. E parada de emergencia. I arresto d'emergenza. N schakelen ten einde een noodstop te bereiken; noodstopschakeling. P zatrzymanie awaryjne. S nödstopp. (826)
3. **linear collision stopping power** : → *power 77*
4. **linear radiative stopping power** : → *power 78*
5. **maximum stopping time from maximum spooling speed** : → *time 89*
6. **maximum stopping time from record/reproduce speed** : → *time 90*
7. **radiative mass stopping power** : → *power 155*
8. **restricted linear collision stopping power** (*Syn.* linear energy transfer) : → *transfer 14*
9. **stopping brake** : → *brake 25*
10. **stopping distance** : → *distance 22*
11. **total linear stopping power** : → *power 190*
12. **total linear stopping power** : → *power 191*
13. **total mass stopping power** : → *power 192*

storage

1. **carrier storage time** : → *time 16*
2. **cathode-ray storage tube** : → *cathode-ray tube 2*
3. **charge carrier storage** (in a semiconductor) : a local increase in the concentration of charge carriers with respect to that which would exist under equilibrium in the zero-bias state. ★ accumulation de porteurs de charge → *accumulation 3.* R накопление заряда (в полупроводнике). D Ladungsträger-Speicherung (in einem Halbleiter). E acumulación de portadores de carga (en un semiconductor). I accumulo di portatori di carica (in un semiconduttore). N opslag van ladingdragers (in een halfgeleider). P akumulacja nośników ładunku (w półprzewodniku). S laddningsbärarlagring. (521)
4. **compressed air storage** : the operation whereby air is compressed, cooled and stored in a natural reservoir. ★ accumulation d'air comprimé → *accumulation 2.* R аккумулирование сжатого воздуха. D Druckluftspeicherung. E acumulación de aire comprimido. I accumulazione d'aria compressa. N persluchtopslag. P akumulowanie sprężonego powietrza. S fyllning av tryckluftsmagasin. (602)
5. **display storage tube** : → *tube 21*
6. **electrical-signal storage tube** : → *tube 25*
7. **energy storage capacitor** : → *capacitor 34*
8. **inertia storage vehicle (by a flywheel)** : → *vehicle 8*
9. **limiting values for storage** : → *value 23*
10. **pumped storage** : the operation whereby water is raised by means of pumps and stored for later use in one or more hydroelectric installations for the generation of electricity. ★ accumulation par pompage → *accumulation 4.* R гидроаккумулирование. D Pumpspeicherung. E acumulación por bombeo. I accumulazione per pompaggio. N pompopslag. P akumulowanie wody przez pompowanie. S magasinpumpning. (602)
11. **pumped storage power station** : → *power station 18*
12. **storage** (*Syn.* store) : → *store 8*
13. **storage assembly** : → *assembly 26*
14. **storage battery** (*Syn.* (secondary) battery) : → *battery 60*
15. **storage camera tube** : → *camera tube 11*
16. **storage element** : → *element 55*
17. **storage installation** : → *installation 14*
18. **storage keyboard** : → *keyboard 7*
19. **storage life** (*Syn.* shelf life) : → *life 11*
20. **storage of call content** : the storage for a specified length of time by the network at the subscriber's request of the contents of some or all of his calls sent or received. ★ archivage des messages → *archivage 1.* R запись содержания вызовов. D Speicherung der Sendungen im Netz. E archivo de mensajes. I archiviazione messaggi. N opslag van gespreksinhoud. P magazynowanie wiadomości. S lagring av meddelande. (721)
21. **storage oscilloscope** : → *oscilloscope 7*
22. **storage surface** : → *surface 28*
23. **storage target** : → *target 2*
24. **storage temperature range** : → *range 67*
25. **storage tube** : → *tube 80*

store

1. **buffer store** : a store between two other devices for the temporary storage of data. ★ mémoire-tampon → *mémoire-tampon 1.* R буферное ЗУ. D Puffer-Speicher. E memoria tampón. I memoria tampone. N buffergeheugen. P pamięć buforowa. S buffertminne. (714)
2. **direct access store** : a store that provides direct access to data. ★ mémoire à accès sélectif → *mémoire 7.* R ЗУ с избирательным достнпом; ЗУ с прямым достнпом. D Direktzugriff-Speicher. E memoria de acceso directo. I memoria ad accesso diretto. N schrijf/lees-geheugen. P pamięć o dostępie bezpośrednim. S direktminne. (714)
3. **electrically alterable store** : an erasable store whose contents are modified by electrical means. ★ mémoire électriquement modifiable → *mémoire 10.* R ЗУ с возможностью изменения электрическими средствами. D elektrisch veraenderbarer Speicher. E memoria eléctricamente modificable. I memoria alterabile elettricamente. N ..... P pamięć wymazywalna elektrycznie. S elektriskt ändringsbart minne. (714)
4. **erasable store** : a store whose contents can be modified. ★ mémoire effaçable → *mémoire 9.* R стираемая память (ЗУ). D loeschbarer Speicher. E memoria borrable. I memoria cancellabile. N wisbaar geheugen. P pamięć wymazywalna. S raderbart minne. (714)
5. **nonvolatile store** : a store whose contents are retained when power is removed. ★ mémoire rémanente → *mémoire 15.* R энергонезависимое ЗУ; СУ, сохраняющее информацию

при отключении питания. D nicht-fluechtiger Speicher. E memoria no volátil. I memoria non volatile. N niet-vluchtig geheugen. P pamięć nieprzelotna. S beständigt minne. (714)

6. **permanent store** : a store whose contents cannot be modified. ★ mémoire permanente → *mémoire 14.* R постоянное ЗУ. D Permanent-Speicher. E memoria permanente. I memoria permanente. N permanent geheugen. P pamięć stała. S permanent minne. (714)
7. **read-only store** : a store whose contents cannot be modified, except by a particular user, or when operating under particular conditions. *Example :* A store in which writing is prevented by a lockout. ★ mémoire fixe → *mémoire 11.* R выделенная постоянная память. D Nur-Lese-Speicher. E memoria fija. I memoria a sola lettura. N leesgeheugen. P pamięć tylko do odczytu. S läsminne. (714)
8. **store** (*Syn.* storage) : a functional unit, into which data can be placed, in which data can be retained, and from which data can be retrieved. ★ mémoire → *mémoire 5.* R запоминающее устройство; память. D Speicher. E memoria. I unità di memoria. N geheugen. P pamięć. S minne. (714)
9. **store and forward switched network** (*Syn.* message switching network) : → *network 41*
10. **subscriber store** : a store in which basic data for each subscriber are stored, for example line category, classes of service, accumulated call charges. ★ mémoire d'abonné → *mémoire 8.* R абонентцкое ЗУ. D Teilnehmer-Speicher. E memoria de abonado. I memoria dei dati d'abbonato. N ..... P pamięć abonencka. S abonnentminne. (714)
11. **volatile store** : a store whose contents are lost when power is removed. ★ mémoire non rémanente → *mémoire 13.* R энергозависимое ЗУ; ЗУ с разрушением данных при выключении электропитания. D fluechtiger Speicher. E memoria volátil. I memoria volatile. N vluchtig geheugen. P pamięć przelotna. S obeständigt minne. (714)

store-and-forward

1. **store-and-forward** : the process of storing messages or parts of messages and their subsequent transmission to the designated address or addresses. ★ enregistrement et retransmission → *enregistrement 19.* R промежуточное накопление. D Teilstreckenverfahren. E registro y retransmisión. I memorizzazione e ritrasmissione; store-and-forward. N ..... P zapamiętaj i przekaż. S mellanlagrad överföring. (721)

stored

1. **retrieval of stored call content** : → *retrieval 2*
2. **stored energy operation** : → *operation 68*
3. **stored heat** : → *heat 20*
4. **stored kinetic energy traction** : → *traction 11*
5. **(stored) network map** : → *network 90*
6. **stored program control** : → *control 177*
7. **stored program control** : → *control 178*

stored-energy

1. **stored-energy apparatus** : → *apparatus 17*
2. **stored-energy constant** : → *constant 31*
3. **stored-energy constant of a set** : → *constant 32*
4. **stored-energy generator** (*Syn.* stored-energy apparatus) : → *apparatus 17*

storm

1. **ionospheric storm** : ionospheric disturbance lasting one or more days and generally associated with a magnetic storm. ★ orage ionosphérique → *orage 1.* D ionosphärischer Sturm. P burza jonosferyczna. (705)
2. **magnetic storm** : a disturbance of the Earth's magnetic field, generally lasting one or more days, and characterized by significant changes in the strength of this field relative to its usual value. ★ orage magnétique → *orage 2.* D magnetischer Sturm. P burza magnetyczna. (705)

straight

1. **straight filament** : → *filament 11*
2. **straight seated bearing** : → *bearing 34*

straight-cut

1. **straight-cut fabric** : → *fabric 8*

straight-joint

1. **straight-joint** : an accessory making a connection between two cables to form a continuous circuit. ★ jonction (simple) → *jonction 30.* R соединительная муфта. D Verbindungsmuffe. E empalme. I giunzione (semplice). N verbindingsmof. P mufa (kablowa) przelotowa. S rak skarv. (461)

strain

1. **strain** : deformation produced in a body as the result of stress. ★ déformation → *déformation 1.* R деформация. D Verformung. E deformación. I deformazione. N vervorming. P odkształcenie. S deformation. (111)
2. **strain insulator** : → *insulator 33*
3. **strain insulator** : → *insulator 34*
4. **strain support** (*Syn.* tension support) : → *support 28*

strand

1. **strand** (*Syn.* wire) : → *wire 33*
2. **strand or lamination insulation** : → *insulation 52*

stranded

1. **concentrically stranded circular conductor** : → *conductor 10*
2. **multiple stranded conductor** : → *conductor 49*
3. **stranded conductor** : → *conductor 70*
4. **stranded conductor** : → *conductor 71*

strap

1. **suspension straps (of a suspension clamp)** : that part of a suspension clamp which supports the body of the fitting. ★ lanterne (de pince de suspension) → *lanterne 1.* R корпус поддерживающего зажима. D Aufhängelasche (einer Tragklemme). E estribo (de grapa en suspensión). I forcella (di morsa di sospensione). N ophangstrippen (van een ophangklem). P wieszak (uchwytu przelotowego). S upphängningslänk. (466)

stratopause

1. **stratopause** : the upper boundary of the stratosphere. ★ stratopause → *stratopause 1.* D Stratopause. P stratopauza. (705)

stratosphere

1. **stratosphere** : that part of the Earth's atmosphere located above the troposphere and in which the temperature remains constant or increases slightly with increasing height ; this part of the atmosphere extends to a height of around 50 km. ★ stratosphère → *stratosphère 1.* D Stratosphäre. P stratosfera. (705)

stratovision

1. **stratovision** : television broadcasting from transmitters on board aircraft or high-altitude balloons. ★ stratovision → *stratovision 1.* R стратовидение. (723)

stray

1. **stray currents** : → *current 200*
2. **stray emission** : → *emission 31*
3. **stray radiation** : → *radiation 111*

streak

1. **streak test pattern** : → *pattern 28*

streaking

1. **streaking** (luminance or colour) : bands of luminance or colour beyond the normal boundaries of the images of an object in the direction of the line scan. ★ traînage → *traînage 4.* R повтор. (723)

streaming

1. **acoustic streaming** : unidirectional current in a fluid due to the presence of acoustic waves. ★ jet acoustique → *jet 3.* R акустическое течение; акустический ветер. D akustische Gleichströmung. E flujo acústico. I soffio unidirezionale. N akoestische stroming. P przepływ akustyczny. S akustisk strömning. (801)

street-car

1. **street-car** (*Syn.* (electric) tramcar) : → *tramcar 1*

strength

1. **electric strength** : the quotient of the maximum voltage without breakdown and the distance between the conducting parts between which the voltage is applied under prescribed test conditions. The term is also used to describe the corresponding property of a material. ★ rigidité diélectrique → *rigidité 1.* R электрическая прочность диэлектрика. D Durchschlagfestigkeit. E rigidez dieléctrica. I rigidità dielettrica. N elektrische doorslagvastheid. P wytrzymałość elektryczna. S elektrisk hållfasthet. (212)
2. **ionic strength** (of a solution) (*I*) : the half-sum of the products of the molalities b_i of all ions by the squares of the numbers of their respective elementary charges z_i:

$$I = \frac{1}{2} \sum b_i z_i^2$$

★ force ionique d'une solution → *force 19.* R ионная сила (раствора). D Ionenstärke (einer Lösung). E fuerza iónica de una solución. I forza ionica di una soluzione. N ionsterkte. P siła jonowa. S jonstyrka. (111)

3. **magnetic field strength anisotropy factor** : → *factor 113*
4. **source strength** : number of particles emitted by a radiation source per unit time. ★ intensité d'une source → *intensité 15.* R сила источника. D Quellstärke. E intensidad de una fuente. I intensità di una sorgente. N bronsterkte. P intensywność źródła. S källstyrka. (881)
5. **spectral source strength** : number of particles with an energy between E and $(E+dE)$ emitted by a radiation source per unit time. ★ intensité spectrale de source → *intensité 22.* R спектральная сила источника. D spektrale Quellstärke. E intensidad espectral de fuente. I intensità spettrale di una sorgente. N spectrale bronsterkte. P intensywność widmowa źródła. S spektral källstyrka. (881)
6. **strength of a monopole** (*Syn.* strength of a simple sound source) : → *strength 7*
7. **strength of a simple sound source** (of a simple sound source) (*Syn.* strength of a monopole) : maximum instantaneous volume velocity produced by a simple source small compared with wavelength, emitting a wave with sinusoidal variation with time. ★ valeur maximale du flux de vitesse d'une source simple → *valeur 58.* R сила простого источника звука; сила монополя. D Scheitelwert des Schallflusses eines Kugelstrahlers. E valor máximo del flujo de velocidad acústica de una fuente sonora simple. I valore massimo del flusso dovuto a una sorgente puntiforme. N amplitude van de volumesnelheid van een monopool. P natężenie źródła dźwięku. S toppvärde av hastighetsflödet hos en enkel ljudkälla. (801)
8. **surface or bottom scattering strength** (*Syn.* surface or bottom backscattering differential) : → *differential 37*
9. **target strength** (*Syn.* object backscattering differential) : → *backscattering 5*
10. **volume scattering strength** (*Syn.* volume backscattering differential) : → *backscattering 7*

strength-distance

1. **field strength-distance product** : → *product 3*
2. **specific field strength-distance product** : → *product 9*

stress

1. **step stress test** : → *test 80*
2. **stress** : the force per unit area acting upon a body which tends to change the dimensions of the latter. ★ contrainte → *contrainte 4.* R напряжение (механическое). D (mechanische) Spannung. E tensión. I sforzo. N spanning. P napięcie. S påkänning. (111)
3. **stress analysis** : → *analysis 10*
4. **stress model** : → *model 3*
5. **stress relieving** : → *relieving 1*

stretcher

1. **line stretcher** : a section of transmission line having an adjustable physical length. ★ extenseur de ligne → *extenseur 2.* R раздвижка. D Ausziehleitung (Posaune). E extensor de línea. I estensore di linea. N schuiflijn. P linia (przesyłowa) o zmiennej długości fizycznej. S längdändrare. (726)

strike

1. **direct lightning strike** : lightning striking a component of the network, e.g. : conductor, tower, substation equipment, etc. ★ coup de foudre direct → *coup 4.* R прямой удар молнии. D direkter Blitzeinschlag. E caída directa del rayo. I fulminazione diretta; impacto directo del rayo. N directe blikseminslag. P bezpośrednie uderzenie pioruna. S direkt blixtinslag. (604)
2. **indirect lightning strike** : lightning strike that does not strike directly any part of the network but that induces an overvoltage in that network. ★ coup de foudre indirect → *coup 5.* R удар молнии, индуктирующий перенапряжение. D indirekter Blitzeinschlag. E caída indirecta del rayo; impacto indirecto del rayo. I fulminazione indiretta. N indirecte blikseminslag. P pośrednie uderzenie pioruna. S indirekt blixtinslag. (604)

striker

1. **striker** : a mechanical device forming part of a fuse-link which, when the fuse operates, releases the energy required to cause operation of other apparatus or indicators or to provide interlocking. ★ percuteur → *percuteur 2.* R ударник. D Schlagvorrichtung. E percutor. I percussore. N slagstift. P wskaźnik zadziałania wybijakowy (wkładki topikowej). S slagstift. (441)
2. **striker fuse** : → *fuse 8*

striking

1. **arc striking device** (*Syn.* arc initiation device) : → *device 9*

string

1. **call string** : all the call attempts related to a given call intent. ★ chaîne d'appels → *chaîne 3.* D Anruffolge. P współczynnik powtarzalności (wywołań). (715)
2. **insulator string** : two or more string insulator units coupled together and intended to give flexible support to overhead line conductors. An insulator string is stressed mainly in tension. ★ chaîne isolante → *chaîne 18.* R изолирующая подвеска без арматуры. D Strang einer Isolatorkette. E cadena de aisladores. I catena di isolatori; catena isolante. N isolatorenstreng. P łańcuch izolatorów. S isolatorsträng. (466)
3. **insulator string** : two or more string insulator units coupled together and intended to give flexible support to overhead line conductors and stressed mainly in tension. ★ chaîne d'isolateurs → *chaîne 15.* R гирлянда изоляторов. D Isolatorstrang. E cadena de aisladores. I catena di isolatori. N isolatorketting. P łańcuch izolatorów. S isolatorsträng. (471)
4. **lighting string** (*Syn.* lighting chain) : → *chain 7*
5. **string galvanometer** : → *galvanometer 5*
6. **string insulator unit** : → *unit 61*

strip

1. **contact strips** (*Syn.* wearing strips) : the replaceable parts of the pantograph head in contact with the contact wire. ★ bandes de frottement → *bande 48.* R контактные накладки. D Schleifstücke. E platinas de frotamiento. I strisciante. N slijtstrip van pantograaf. P nakładki stykowe. S slitskenor. (811)
2. **earth strip** (*Syn.* ground strip (USA)) : an earth electrode consisting of a metal strip buried in the ground. ★ ruban de terre → *ruban 12.* R шинный заземлитель. D Banderder. E pletina de tierra. I nastro di terra. N stripaardelektrode. P uziom taśmowy. S jordningsband. (604)
3. **ground strip** (*Syn.* earth strip) : → *strip 2*
4. **starting strip** (*Syn.* starting stripe) : narrow conducting strip placed longitudinally on the internal or external wall of a tubular discharge lamp for assisting in starting. *Note.* — The strip may be connected to one or both of the shells of the caps or, possibly, to an electrode. ★ bande d'amorçage → *bande 14.* R полоска зажигания. D Zündstrich. E banda de cebado. I striscia d'innesco. N ontsteekstrip. P wstęga zapłonowa. S tändstrimla. (845)
5. **strip chart recorder** : → *recorder 18*
6. **strip lamp** (*Syn.* tungsten ribbon lamp) : → *lamp 69*
7. **strip line** : → *line 152*

8. **strip terminals** : → *terminal 33*
9. **wearing strips** (*Syn.* contact strips) : → *strip 1*

stripe

1. **starting stripe** (*Syn.* starting strip) : → *strip 4*

stripline

1. **stripline** : a terminated transmission line consisting of two parallel plates between which a wave is propagated in the transverse electromagnetic mode to produce a specified field for testing purposes. ★ ligne TEM à plaques → *ligne 138.* R симметричная полосковая линия. D Streifenleitung. E línea TEM con placas. I linea TEM a piastre parallele. N striplijn. P linia paskowa. S parallellplansledning. (161)

stripper

1. **cladding mode stripper** (*Syn.* mode stripper) : a device which encourages the conversion of cladding modes to radiation modes. *Notes. 1* — It usually comprises a material having a refractive index equal to or greater than that of the fibre cladding. *2* — The English term "mode stripper" is often used imprecisely to mean "cladding mode stripper". ★ extracteur de modes de gaine → *extracteur 1.* R фильтр оболочечных мод. D Mantelmodenabstreifer; Modenabstreifer. E eliminador de modos del revestimiento; eliminador de modos. I estrattore di modi del mantello. N mantelmodusuitkoppelaar. P pułapka modowa. S mantelmodavskiljare. (731)
2. **mode stripper** (*Syn.* cladding mode stripper) : → *stripper 1*

strip-wound

1. **strip-wound (magnetic) core** : → *core 37*

strobe

1. **strobe effect** : → *effect 81*

Strowger

1. **Strowger selector** : → *selector 18*

structural

1. **structural protective barrier** : → *barrier 15*

structure

1. **electrode supporting structure** : an electrode supporting device comprising the mast, the arm and the clamp. ★ potence d'électrode de four à arc → *potence 3.* R опорная конструкция электрода. D Elektroden-Tragkonstruktion. E estructura soporte de electrodo de un horno de arco. I struttura di sostegno degli elettrodi. N elektrodehefinrichting. P zespół zawieszenia elektrod. S elektrodinfästning. (841)
2. **loose cable structure** : an optical cable in which each optical fibre with only a primary coating is fitted loosely in a cell or a tube. ★ câble à structure lâche → *câble 20.* R кабель со свободной укладкой. D Hohlader-Aufbau. E cable de estructura holgada. I struttura cablata a fibre lasche. N losse kabelstructuur. P kabel swobodny. S ..... (731)
3. **portal structure** (in electric traction) : a support consisting of a transverse beam and masts situated on either side of the tracks. ★ portique → *portique 2.* R жесткая поперечина (в электрической тяге). D Querjochtragwerk. E pórtico (en tracción eléctrica). I portale (rigido). N portaal. P bramka. S ledningsbrygga. (811)
4. **slow wave structure** : a structure that can support a slow wave. ★ structure à onde lente → *structure 6.* R структура медленной волны. D Verzögerungs-Wellenleiter. E estructura de onda lenta. I struttura a onda lenta. N vertragingsstructuur. P układ opóźniający; struktura opóźniająca. S fördröjningsstruktur. (726)
5. **slow-wave structure** : an internal transmission line designed to guide an electromagnetic wave at a phase velocity close to the velocity of the electrons in the beam. ★ structure de retard → *retard 27.* R замедляющее устройство. D Verzögerungsleitung. E estructura de retardo. I struttura di ritardo. N inwendige transmissieleiding met wisselwerking. P linia opóźniająca. S fördröjningsledning. (531)
6. **structure (of an overhead line)** (*Syn.* support) : → *support 24*
7. **structures** (*Syn.* supports) : → *support 27*
8. **structures** (*Syn.* supports) : → *support 27*
9. **substation structures** : the assembly of rigid frameworks either for hanging conductors or for supporting conductors or switchgear and other apparatus. ★ charpentes de poste → *charpente 1.* R несущие конструкции подстанции. D Gerüste. E estructura de la subestación. I carpenteria di stazione. N ..... P stacyjne konstrukcje wsporcze. S ställverksstål; stativ, stolpar och reglar. (605)
10. **super structure** (*Syn.* top hamper) : → *hamper 1*

stub

1. **matching stub** : a portion of a transmission line an end of which is connected to the feed line of an antenna and such that its length and location is adjusted to match the antenna impedance to that of its feed line. ★ ligne d'adaptation → *ligne 73.* R согласующий шлейф. D Anpaßstichleitung. E línea de adaptación. I spezzone (di linea) d'adattamento. N aanpassingsarm. P odcinek dopasowujący. S anpassningsledning. (712)
2. **Pawsey stub balun** (*Syn.* folded balun) : → *balun 2*
3. **sleeve stub (antenna)** (*Syn.* sleeve monopole (antenna)) : → *monopole 5*
4. **stub** (*Syn.* stub tuner) : → *tuner 4*
5. **stub end** : → *end 19*
6. **stub (of a support)** : an element used to connect the leg of a support with the foundation (see fig. 4.1). ★ embase d'un support → *embase 4.* R закладной уголок. D Mastfuß eines Stützpunktes. E anclaje de la torre. I montante di fondazione. N ingestorte hoekstijl. P kotew słupa. S ..... (466)
7. **stub shaft** : → *shaft 10*
8. **stub tuner** : → *tuner 4*

stuck

1. **stuck bias-cut fabric** : → *fabric 9*

stud

1. **arc stud welding gun** : → *gun 1*
2. **road stud** (*Syn.* raised pavement marker) : small device secured to, and projecting slightly above, a road surface as a road marking. It may incorporate a retroreflector. ★ plot → *plot 2.* R маркер; встраиваемый в мостовую. D Markierungsknopf. E marca empotrada. I inserto; chiodo. N wegdekreflector; katteoog. P ..... S vägbanereflektor. (845)
3. **stud terminals** : → *terminal 34*

studio

1. **continuity studio** : a small studio adjacent to a continuity control room from which an announcer makes announcements, inserts interlude material when necessary, and may, in some cases supervise and control the running of the programme. ★ studio tête de programme → *studio 4.* R дикторская студия. (723)
2. **recording studio** : a room containing the equipment required to record sound or vision programme signals and to monitor the recording. ★ cellule d'enregistrement → *cellule 3.* R студия записи. (723)
3. **special studio floodlight** : → *floodlight 2*
4. **studio** : a specially designed room equipped for the production of television or sound programmes. By extension, can include the studio proper together with its associated technical and production areas. ★ studio → *studio 3.* R студия. (723)
5. **studio floodlight** : → *floodlight 3*
6. **studio monitor** (*Syn.* picture monitor) : → *monitor 10*

stuffable

1. **stuffable digit time-slot** (*Syn.* justifiable digit time-slot) : → *time-slot 4*

stuffing

1. **maximum stuffing rate** (*Syn.* justification capacity) : → *capacity 12*
2. **maximum stuffing ratio** (*Syn.* maximum justification ratio) : → *ratio 54*
3. **minimum stuffing ratio** (*Syn.* minimum justification ratio) : → *ratio 56*
4. **negative pulse stuffing** (*Syn.* negative justification) : → *justification 10*
5. **nominal stuffing rate** (*Syn.* nominal justification rate) : → *rate 61*
6. **nominal stuffing ratio** (*Syn.* nominal justification ratio) : → *ratio 60*

7. **positive pulse stuffing** (*Syn.* positive justification) : → *justification 13*
8. **positive/zero/negative pulse stuffing** (*Syn.* positive/zero/negative justification) : → *justification 14*
9. **pulse stuffing** (*Syn.* justification) : → *justification 1*
10. **stuffing capacity** (*Syn.* justification capacity) : → *capacity 12*
11. **stuffing character** : → *character 16*
12. **stuffing digit** (*Syn.* justifying digit) : → *digit 20*
13. **stuffing instant** (*Syn.* justification instant) : → *instant 5*
14. **stuffing rate** (*Syn.* justification rate) : → *rate 46*
15. **stuffing ratio** (*Syn.* justification ratio) : → *ratio 46*
16. **stuffing service digit** (*Syn.* justification service digit) : → *digit 19*

style

1. **connector style** : → *connector 17*
2. **flange style "C"** : → *flange 8*
3. **flange style "P"** : → *flange 9*
4. **flange style "U"** : → *flange 10*

stylus

1. **camber of a stylus** : → *camber 1*
2. **cutting stylus** (*Syn.* recording stylus) : a specially-shaped tool, made of a very hard material, used to cut the modulated spiral groove on a lacquer or wax disk. ★ burin de gravure → *burin 1.* R резец. D Schneidstichel; Aufnahmestichel. E buril de grabación; aguja de grabación. I punta di incisione. N snijnaald. P rylec. S gravernål. (806)
3. **electronic stylus** : a pen containing an electronic circuit, which an operator can use to draw upon a graphics tablet. ★ crayon électronique → *crayon 1.* R электронный карандаш. (723)
4. **list of a stylus** (*Syn.* camber of a stylus) : → *camber 1*
5. **rake of stylus** : → *rake 1*
6. **recording stylus** (*Syn.* cutting stylus) : → *stylus 2*
7. **stylus drag** : → *drag 3*
8. **stylus force** : → *force 32*
9. **stylus recorder** : → *recorder 19*

stylus tip

1. **effective mass of the stylus tip** : → *mass 11*
2. **effective stylus tip radius** : the radius of a circle formed by the intersection of the stylus tip and a plane parallel to the record surface, located at the points of contact between the stylus tip and the groove walls. *Note.* — In the case of an elliptic stylus tip, it is the radius of curvature of the portions of the stylus tip in contact with the groove sidewalls in a plane parallel to the record surface. ★ rayon effectif de la pointe de lecture → *rayon 13.* R эффективный радиус иглы. D effektiver Verrundungsradius einer Abspielnadel. E radio efectivo de la aguja de lectura. I raggio effettivo della puntina di riproduzione. N effectieve naaldpuntradius. P promień prowadzenia igły. S effektiv nålspetsradie. (806)
3. **elliptic reproducing stylus tip** : a stylus tip having an elliptic cross section. The major axis of the ellipse is at right angles to the direction of the groove travel. ★ pointe de lecture à section droite elliptique → *pointe de lecture 4.* R эллиптическая игла. D elliptische Abspielnadel. E aguja de lectura de sección elíptica. I puntina di riproduzione con sezione ellittica. N elliptische naaldpunt. P wierzchołek igły eliptyczny. S elliptisk nålspets för avspelning. (806)
4. **included angle of a reproducing stylus tip** : → *angle 32*
5. **reproducing stylus tip** : a mechanical transmission element consisting of a suitable tip to follow the modulation of a recorded groove and a means for transferring the resultant vibrations to the pick-up head. *Note.* — The above expression is commonly applied to a unit composed of a stylus tip and its mounting. ★ pointe de lecture → *pointe de lecture 3.* R игла. D Abspielnadel. E aguja de lectura. I puntina di riproduzione. N afspeelnaald. P wierzchołek igły. S nålspets för avspelning. (806)
6. **spherical reproducing stylus tip** : a stylus tip having the form of part of a sphere. ★ pointe de lecture sphérique → *pointe de lecture 5.* R сферическая воспроизводящая игла. D kugelförmige Abtastnadelspitze. E punta de lectura esférica. I estremità della puntina di riproduzione sferica. N bolvormige weergavenaaldpunt. P kulisty wierzchołek igły. S sfärisk nålspets. (806)
7. **spherical reproducing stylus tip radius** : → *radius 5*
8. **stylus tip radius** : → *radius 6*

subcadmium

1. **subcadmium neutrons** : → *neutron 32*

subcarrier

1. **chrominance subcarrier** (*Syn.* colour subcarrier) : → *subcarrier 2*
2. **colour subcarrier** (*Syn.* chrominance subcarrier) : the carrier that is modulated by the components of the chrominance signal. ★ sous-porteuse couleur → *sous-porteur 3.* R цветовая поднесущая. (723)
3. **sub-carrier** : a carrier modulated in an intermediate modulation process generating a modulated signal which is then applied, together with other signals, to modulate another carrier. ★ sous-porteuse → *sous-porteur 1.* R поднесущая. D Zwischenträger. E subportadora. I sottoportante. N hulpdraaggolf. P pod-nośna. S underbärvåg. (702)
4. **subcarrier dot pattern** : → *pattern 29*

sub-centre

1. **sub-centre** : a switching centre which serves a group of terminals and concentrates the traffic from this group towards a larger parent switching centre on which it is dependent for the routing of the whole of its traffic. ★ sous-centre → *sous-centre 2.* R подстанция. D Teilvermittlungsstelle. E sub-centro. I sottocentrale. N dataconcentrator. P centrala zbiorcza. S koncentrator. (721)

sub-channel

1. **sub-channel** : a transmission channel obtained by time-division and which is allocated a submultiple of an actual character transfer rate of a standard channel. ★ sous-voie → *sous-voie 2.* R подканал. D Teilkanal; Unterkanal. E subcanal. I canale sottomultiplo. N subkanaal; deelkanaal. P podkanał. S delkanal. (721)
2. **sub-channel phase transmission** : → *transmission 64*

sub-conductor

1. **sub-conductor (of a bundle)** : any one of the individual conductors in a conductor bundle. ★ sous-conducteur (d'un faisceau) → *sous-conducteur 1.* R составляющий провод расщепленной фазы. D Teilleiter (eines Bündels). E subconductor. I sub-conduttore (di un fascio). N deelgeleider (van een bundel). P przewód składowy (wiązki przewodowej). S delledare. (466)

subcritical

1. **multiplication (subcritical)** : → *multiplication 8*

sub-frame

1. **sub-frame** : a fixed number of non-contiguous channel time-slots within a frame that together provide a digital channel having a specified digit rate higher than that of a single channel time-slot. ★ sous-trame → *sous-trame 1.* R подцикл. D Teilraster; Unterraster. E subtramo; sector de tramo. I sottotrama. N ..... P podramka. S subram. (704,721)

subgroup

1. **circuit subgroup** : a part of a circuit group with similar characteristics such as type of signalling, type of transmission path. ★ sous-faisceau → *sous-faisceau 1.* D Teilbündel. P wiązka łączy cząstkowa. (715)
2. **sub-group** : an assembly, obtained by frequency division multiplexing, of a specified number of FDM telephone channels in adjacent positions in a frequency band of specified width, and normally used as an intermediate stage in the formation of a group. The number of channels in a sub-group is a sub-multiple of the number of channels in a group. *Note.* — A sub-group may sometimes be transmitted without subsequent formation into a complete group. ★ sous-groupe → *sous-groupe 1.* R подгруппа. D Untergruppe. E subgrupo. I sottogruppo. N subgroep. P grupa wstępna. S förgrupp. (704)

subharmonic

1. **sub-harmonic** : a periodic quantity varying at a frequency that is an integral submultiple of a frequency of excitation. ★ sous-harmonique → *sous-harmonique 2.*

R субгармоника. D Unterschwingung; Subharmonisch. E subarmónico. I sub-armonica. N subharmonische; onderharmonische. P podharmoniczna. S harmonisk underton. (101)

2. **subharmonic response** : → *response 22*

submaster

1. **submaster station** : → *station 35*

submerged

1. **salt bath furnace with submerged electrodes** : → *furnace 49*
2. **submerged arc furnace** : → *arc furnace 44*
3. **submerged arc heating** : → *heating 52*
4. **submerged resistance furnace** (*Syn.* submerged arc furnace) : → *arc furnace 44*

submersible

1. **submersible** : applied to a machine so constructed that it is capable of operation when submerged under specified conditions for an indefinitely long period. ★ machine submersible → *machine 71.* R погружная машина. D überflutbare Maschine. E máquina sumergible. I macchina sommergibile. N geschikt voor onderdompeling. P maszyna głębinowa. S dränkbar. (411)
2. **submersible connector** : → *connector 49*

sub-reflector

1. **sub-reflector** : a reflector other than the main reflector of a multiple reflector antenna. ★ réflecteur secondaire → *réflecteur 30.* R вспомогательный рефлектор. D Hilfsreflektor. E subreflector. I sub-riflettore. N subreflector. P reflektor pomocniczy. S subreflektor. (712)

sub-refraction

1. **sub-refraction** : refraction for which the refractivity vertical gradient is greater than the standard refractivity gradient. ★ infraréfraction → *infraréfraction 1.* D Subrefraktion. P załamanie obniżone. (705)

subroutine

1. **subroutine** : a sequenced set of statements that may be used in one or more programs and at one or more points in a program. ★ sous-programme → *sous-programme 1.* R стандартная подпрограмма. D Unterroutine; Unterprogramm. E subprograma; subrutina. I sottoprogramma; subroutine. N subroutine. P podprogram (rutynowy). S underprogram. (714)

subscribed

1. **subscribed demand** : → *demand 21*

subscriber

1. **absent subscriber service** : → *service 1*
2. **national subscriber's telex number** : → *number 17*
3. **out-of-area subscriber's line** : → *line 118*
4. **priority for called subscriber** : → *priority 4*
5. **subscriber loop** (*Syn.* subscriber's line) : → *line 154*
6. **subscriber loop** (*Syn.* subscriber's (telephone) line) : → *line 159*
7. **subscriber number** : → *number 31*
8. **subscriber serving exchange** : → *exchange 24*
9. **subscriber store** : → *store 10*
10. **subscriber system** : → *system 206*
11. **subscriber usage meter** (*Syn.* subscriber's check meter) : → *meter 59*
12. **(subscriber's) channel selector** : → *selector 19*
13. **subscriber's check meter** : → *meter 59*
14. **subscriber's convertor** : → *convertor 43*
15. **subscriber's extension station** (*Syn.* extension) : → *extension 4*
16. **subscribers feeder** : → *feeder 21*
17. **subscriber's installation** : → *installation 15*
18. **subscriber's lead-in** : → *lead-in 3*
19. **subscriber's line** : → *line 154*
20. **subscriber's line** (*Syn.* connection line) : → *line 14*
21. **(subscriber's line) flexible network** : → *network 91*
22. **(subscriber's line) rigid network** : → *network 92*
23. **subscriber's loop** (*Syn.* connection line) : → *line 14*
24. **subscriber's main station** : → *station 37*
25. **subscriber's meter** : → *meter 60*
26. **subscriber's outlet** : → *outlet 5*
27. **subscriber's service line** (*Syn.* subscriber's lead-in) : → *lead-in 3*
28. **subscriber's (telephone) line** : → *line 159*
29. **subscriber's (telephone) station** : → *station 38*
30. **subscriber's uniselector** (*Syn.* preselector) : → *preselector 1*
31. **(telephone) subscriber** : a person or body provided with telephone service by means of a telephone station or a private telephone installation connected to a public switched telephone network and permanently assigned for its use. ★ abonné (au téléphone) → *abonné 2.* R (телефонный) абонент. D (Fernsprech-)Teilnehmer. E abonado (al teléfono). I abbonato (telefonico). N (telefoon)abonnee. P abonent (telefoniczny). S (telefon)abonnent. (722)

subscriber-busy

1. **subscriber-busy signal** : → *signal 226*

subscription

1. **subscription television** (*Syn.* pay television) : → *television 22*

subsequent

1. **subsequent address message** : → *message 16*
2. **subsequent signal unit** : → *unit 62*

subspan

1. **subspan oscillation** : → *oscillation 18*

substance

1. **antiferromagnetic substance** : a substance in which the predominant magnetic phenomenon is antiferromagnetism. *Note.* — Its susceptibility is small, positive and increases with temperature. ★ substance antiferromagnétique → *substance 3.* R антиферромагнитное вещество. D antiferromagnetischer Werkstoff. E sustancia antiferromagnética. I sostanza antiferromagnetica. N antiferromagnetische stof. P substancja antyferromagnetyczna. S antiferromagnetiskt material. (121)
2. **diamagnetic substance** : a substance in which the predominant magnetic phenomenon is diamagnetism. *Note.* — Its susceptibility is small and negative. ★ substance diamagnétique → *substance 4.* R диамагнитное вещество. D diamagnetischer Werkstoff. E sustancia diamagnética. I sostanza diamagnetica. N diamagnetische stof. P substancja diamagnetyczna. S diamagnetiskt material. (121)
3. **ferrimagnetic substance** : a substance in which the predominant magnetic phenomenon is ferrimagnetism. *Note.* — Its susceptibility is relatively large and positive. ★ substance ferrimagnétique → *substance 7.* R ферримагнитное вещество. D ferrimagnetischer Werkstoff. E sustancia ferrimagnética. I sostanza ferrimagnetica. N ferrimagnetische stof. P substancja ferrimagnetyczna. S ferrimagnetiskt material. (121)
4. **ferromagnetic substance** : a substance in which the predominant magnetic phenomenon is ferromagnetism. *Note.* — Its magnetic susceptibility is large and positive. ★ substance ferromagnétique → *substance 8.* R ферромагнитное вещество. D ferromagnetischer Werkstoff. E sustancia ferromagnética. I sostanza ferromagnetica. N ferromagnetische stof. P substancja ferromagnetyczna. S ferromagnetiskt material. (121)
5. **magnetic substance** : a substance in which magnetization can be induced or changed by a magnetic field. ★ substance magnétique → *substance 10.* R магнитное вещество. D magnetischer Werkstoff. E sustancia magnética. I sostanza magnetica. N magnetische stof. P substancja magnetyczna. S magnetiskt material. (121)
6. **magnetically anisotropic substance** : a substance having magnetic anisotropy. ★ substance magnétique anisotrope → *substance 11.* R магнитоанизотропный материал. D magnetisch anisotrope Substanz. E sustancia magnética anisótropa. I materiale magnetico anisotropo. N magnetisch anisotroop medium. P substancja magnetycznie anizotropowa. S magnetiskt anisotropt material. (221)

7. **magnetically isotropic substance** : a substance having no significant magnetic anisotropy. ★ substance magnétique isotrope → *substance 12.* R магнитоизотропный материал. D magnetisch isotrope Substanz. E sustancia magnética isótropa. I materiale magnetico isotropo. N magnetisch isotroop medium. P substancja magnetycznie izotropowa. S magnetiskt isotropt material. (221)
8. **paramagnetic substance** : a substance in which the predominant phenomenon is paramagnetism. *Note.* — Its susceptibility is small, positive and decreases with increasing temperature. ★ substance paramagnétique → *substance 14.* R парамагнитное вещество. D paramagnetischer Werkstoff. E sustancia paramagnética. I sostanza paramagnetica. N paramagnetische stof. P substancja paramagnetyczna. S paramagnetiskt material. (121)

substation

1. **attended substation** : a substation which is operated by personnel during the normal working hours and otherwise as necessary. ★ poste gardienné → *poste 44.* R посещаемая подстанция. D zeitweise besetzte Station. E subestación asistida. I stazione con guardiaccia diurna. N ..... P stacja z obsługą jednozmianową. S tidvis bemannad station. (605)
2. **auto-transformer substation** (in electric traction) : a substation equipped with an auto-transformer supplied at twice contact line voltage from a line feeder, allowing energy to be injected into the contact line. *Note.*—This station may in addition provide some or all of the functions of a track sectioning or track paralleling cabin. ★ poste d'injection → *poste 37.* R автотрансформаторная подстанция (в электрической тяге). D Spartransformator-Unterwerk. E subestación de inyección; subestación autotransformador (en tracción eléctrica). I sottostazione ausiliaria (di alimentazione). N ..... P podstacja autotransformatorowa. S ..... (811)
3. **bay (of a substation)** : → *bay 2*
4. **converter substation** : a substation including converters and the main function of which is to convert alternating current into direct current or vice versa. ★ poste de conversion → *poste 28.* R преобразовательная подстанция. D Umrichterstation. E subestación convertidora. I stazione di conversione. N omzetterstation. P stacja przekształtnikowa. S omformarstation. (605)
5. **double busbar substation** : a substation in which the lines and transformers are connected via two busbars by means of selectors. ★ poste à deux jeux de barres → *poste 8.* R подстанция с двумя системами шин. D Doppel-Sammelschienen-Station. E subestación con dos juegos de barras. I stazione a due sistemi di sbarre. N dubbelrailstation. P rozdzielnia o dwóch systemach szyn zbiorczych. S ställverk med två samlingsskenor. (605)
6. **four-switch mesh substation with mesh opening disconnectors** : a mesh substation, the busbar of which comprises both circuit-breakers and disconnectors (see Figure 605-2). ★ poste à jeu de barres en anneau à quatre appareils de coupure avec sectionneurs de sectionnement → *poste 11.* R подстанция с кольцевой системой шин и четырьмя выключателями. D Vier-Schalter-Ringsammelschienen-Station mit zusätzlicher Längstrennung. E subestación con un juego de barras en anillo con cuatro aparatos de corte y seccionnadores de seccionamiento de barras. I stazione con sistema di sbarre ad anello con quattro interruttori e sezionatori di sezionamento. N ..... P rozdzielnia czworobokowa z odłącznikami sekcjonującymi. S ..... (605)
7. **four-switch substation** : a mesh substation having a busbar of square configuration with a switch or a circuit-breaker within each side. ★ poste à jeu de barres en anneau à quatre appareils de coupure → *poste 10.* R подстанция по схеме четырехугольника. D Vier-Schalter-Ringsammelschienen-Station. E subestación con un juego de barras en anillo con cuatro aparatos de corte. I stazione con sistema di sbarre ad anello con quattro interruttori. N ..... P rozdzielnia czworobokowa. S ..... (605)
8. **frequency converter substation** : a substation in which an a.c. current at a given frequency is converted into an a.c. current at another frequency. ★ poste de conversion de fréquence → *poste 29.* R подстанция, преобразующая частоту. D Frequenz-Umformerstation. E subestación convertidora de frecuencia. I stazione di conversione di frequenza. N ..... P stacja przetwarzania częstotliwości. S frekvensomformarstation. (605)
9. **gas insulated metal-enclosed substation** : a substation which is made up with only gas insulated metal enclosed switchgear. ★ poste sous enveloppe métallique à isolation gazeuse → *poste 54.* R бронированная подстанция с газовой изоляцией. D gasisolierte metallgekapselte Station. E subestación blindada con aislamiento gaseoso; subestación bajo envolvente metálica con aislamiento gaseoso. I stazione con involuro metallico a isolamento gassoso. N metaalomsloten met gas geïsoleerd station. P rozdzielnia osłonięta o izolacji gazowej. S gasisolerat ställverk. (605)
10. **indoor substation** : a substation sheltered from external weather conditions by being installed within a building. ★ poste intérieur → *poste 45.* R закрытая подстанция. D Innenraumstation. E subestación interior. I stazione all'interno. N station voor binnenopstelling. P rozdzielnia wnętrzowa. S inomhusställverk. (605)
11. **kiosk substation** : a compact substation, often prefabricated and used only for distribution purposes. ★ poste en cabine → *poste 40.* R комплектное распределительное устройство. D Kompaktstation. E subestación en cabina; subestación compacta. I cabina. N ..... P stacja kioskowa. S kioskstation. (605)
12. **manned substation** : a substation which is locally operated by personnel working within the substation. ★ poste avec personnel de conduite → *poste 18.* R подстанция с обслуживающим персоналом. D besetzte Station. E subestación con personal de operación. I stazione presidiata. N bemand station. P stacja z obsługą. S bemannad station. (605)
13. **master substation** : a manned substation from which remotely controlled substations are controlled. ★ poste de conduite centralisé → *poste 27.* R опорная подстанция. D Leitstation. E subestación central de operación. I stazione pilota. N ..... P stacja centralna; stacja "matka". S huvudstation. (605)
14. **mesh substation** : a single busbar substation in which the busbar is formed as a closed loop with circuit breakers in series within the loop. ★ poste à jeu de barres en anneau à disjoncteurs → *poste 9.* R подстанция с кольцевой системой шин, секционированной выключателями. D Ringsammelschienen-Station mit Leistungsschaltern. E subestación con un juego de barras en anillo con interruptores automáticos. I stazione con sistema di sbarre ad anello con interruttore. N ..... P rozdzielnia wielobokowa. S brytarsektionerat ringställverk. (605)
15. **mobile substation** (*Syn.* movable substation) : a substation mounted on a vehicle capable of being moved on a railway or road, to supply the contact line at sites where connection to a main supply system is provided. ★ sous-station mobile → *sous-station 5.* R передвижная подстанция. D fahrbares Unterwerk. E subestación móvil. I sottostazione mobile. N gelijkrichterwagen. P podstacja przewoźna. S mobil omformarstation. (811)
16. **movable substation** (*Syn.* mobile substation) : → *substation 15*
17. **open-type substation** : a substation in which the insulation to earth and between phase conductors is mainly provided by air at atmospheric pressure and in which some live parts are not enclosed. *Note.* — An open-type substation may be indoor or outdoor. ★ poste ouvert → *poste 47.* R подстанция с воздушной изоляцией. D Station in offener Bauweise. E subestación abierta. I stazione in aria. N open station. P rozdzielnia otwarta. S öppet ställverk. (605)
18. **outdoor substation** : a substation which is designed and installed to withstand external weather conditions. ★ poste extérieur → *poste 43.* R открытая подстанция. D Freiluftstation. E subestación exterior. I stazione all'esterno. N station voor buitenopstelling. P rozdzielnia napowietrzna. S utomhusställverk. (605)
19. **permanently manned substation** : a substation which is continuously controlled by personnel who are stationed at the substation. ★ poste à quart permanent → *poste 14.* R подстанция с дежурным персоналом. D ständig besetzte Station. E subestación con personal de turno permanente. I stazione con turni completi. N ..... P stacja ze stałą obsługą. S ständigt bemannad station. (605)
20. **pole-mounted substation** : an outdoor distribution substation mounted on one or more poles. ★ poste sur poteau → *poste 56.* R мачтовая подстанция. D Maststation. E subestación sobre poste. I cabina da palo. N ..... P stacja słupowa. S stolpstation. (605)

21. **receptive substation** : a substation at which the energy recovered from regenerative braking of trains can be returned to the main supply system. ★ sous-station à récupération → *sous-station 1.* R принимающая подстанция. D Netzrückspeisungsunterwerk. E subestación de recuperación. I sottostazione reversibile. N onderstation met recuperatiemogelijkheden. P podstacja odzyskowa. S ..... (811)
22. **rectifier substation** : a substation at which alternating current, generally three-phase, is converted to direct current to supply the contact line. ★ sous-station de redressement → *sous-station 2.* R выпрямительная подстанция. D Gleichrichterunterwerk. E subestación de rectificación. I sottostazione di conversione. N gelijkrichterstation. P podstacja prostownikowa. S likriktarstation. (811)
23. **remotely controlled substation** : an unmanned substation which is controlled by means of telecontrol devices. ★ poste téléconduit → *poste 57.* R подстанция с дистанционным управлением. D fernbediente Station. E subestación telecontrolada. I stazione telecomandata. N van verre bediend station. P stacja stelemechanizowana. S fjärrkontrollerad station. (605)
24. **ring substation** : a single busbar substation in which the busbar is formed as a closed loop with only disconnectors in series whithin the loop. ★ poste à jeu de barres en anneau à sectionneurs → *poste 12.* R подстанция с кольцевой системой шин, секционированной разъединителями. D Ringsammelschienen-Station. E subestación con un juego de barras en anillo con seccionadores. I stazione con sistema di sbarre ad anello con sezionatori. N ..... P rozdzielnia pierścieniowa. S frånskiljarsektionerat ringställverk. (605)
25. **satellite substation** : one of the remotely controlled substations, controlled by a master substation. ★ poste satellite → *poste 53.* R подстанция группового дистанционного управления. D Unterstation. E subestación satélite. I stazione satellite. N ..... P stacja satelitarna; stacja podporządkowana. S understation. (371,605)
26. **single busbar substation** : a substation in which the lines and transformers are connected to one busbar only. ★ poste à un jeu de barres → *poste 16.* R подстанция с одной системой шин. D Einfach-Sammelschienen-Station. E subestación con un juego de barras. I stazione a un sistema di sbarre. N enkelrailstation. P rozdzielnia o jednym systemie szyn zbiorczych. S ställverk med en samlingsskena. (605)
27. **step-down substation** : a transformer substation in which the outgoing power from the transformers is at a lower voltage than the incoming power. ★ poste abaisseur (de tension) → *poste 17.* R понижающая подстанция. D Abspannstation. E subestación reductora (de tensión). I stazione abbassatrice (di tensione). N ..... P stacja obniżająca (napięcie) (napięcie). S station för nedtransformering. (605)
28. **step-up substation** : a transformer substation in which the outgoing power from the transformers is at a higher voltage than the incoming power. ★ poste élévateur (de tension) → *poste 39.* R повышающая подстанция. D Aufspannstation. E subestación elevadora (de tensión). I stazione elevatrice (di tensione). N ..... P stacja podwyższająca (napięcie). S station för upptransformering. (605)
29. **substation** (of a power system) : a part of an electrical system, confined to a given area, mainly including ends of transmission or distribution lines, electrical switchgear and controlgear, buildings and transformers. A substation generally includes safety or control devices (for example protection). *Note.* — The substation can be qualified according to the designation of the system of which it forms a part. Examples: transmission, substation (transmission system), distribution substation, 400 kV or 20 kV substation. ★ poste → *poste 7.* R электрическая подстанция. D Station (eines Netzes). E subestación (de una red eléctrica). I stazione, cabina (di una rete elettrica); cabina (di una rete elettrica). N onderstation. P stacja elektroenergetyczna. S transformatorstation. (601,605)
30. **substation control room** : → *room 18*
31. **(substation) local back-up protection** : → *protection 53*
32. **substation relay building** : → *building 2*
33. **substation relay kiosk** (*Syn.* substation relay building) : → *building 2*
34. **substation relay room** : → *room 19*
35. **substation structures** : → *structure 9*
36. **substation telecontrol room** : → *room 20*
37. **switching substation** : a substation which includes switchgear and usually busbars, but no power transformers. ★ poste de sectionnement → *poste 33.* R электрическое распределительное устройство. D Schaltstation. E subestación de seccionamiento; subestación de maniobra. I stazione di smistamento. N schakelstation. P rozdzielnia. S kopplingsstation. (605)
38. **tapped (tee off) substation** : a single supply substation fed from a single branch line. ★ poste en dérivation → *poste 41.* R тупиковая подстанция; подстанция на ответвлении. D Abzweigstation. E subestación en derivación. I cabina in derivazione. N aftakstation. P stacja w pojedynczym odczepie. S påsticksstation. (601)
39. **three-switch mesh substation with bypass** : a mesh substation with usually two feeders and two transformers, the fourth circuit-breaker of the fourswitch mesh substation is replaced by a bypass with one or two disconnectors (see Figure 605-1). ★ poste à jeu de barres en anneau à trois appareils de coupure avec shuntage → *poste 13.* R подстанция с кольцевой системой шин и тремя выключателями. D Drei-Schalter-Ringsammelschienen-Station mit Umgehung. E subestación con un juego de barras en anillo con tres aparatos de corte, con paso directo. I stazione con sistema di sbarre ad anello con 3 apparecchi di interruzione a bypass. N ..... P rozdzielnia w układzie "H" z poprzeczką obejściową. S ..... (605)
40. **(traction) substation** : a substation the main function of which is to supply a traction system. ★ sous-station (de traction) → *sous-station 3.* R (тяговая) подстанция. D (Bahn-) Unterwerk. E subestación (de tracción). I sottostazione. N onderstation. P podstacja (elektryczna). S omformarstation. (605,811)
41. **transformer substation** : a substation containing power transformers interconnecting two or more networks of different voltages. ★ poste de transformation → *poste 35.* R трансформаторная подстанция. D Umspannstation. E subestación de transformación. I stazione di trasformazione. N transformatorstation. P stacja transformatorowa. S transformatorstation. (605)
42. **transformer substation** : a substation at which the electric energy of a primary supply system is transformed to the voltage of the contact line. ★ sous-station de transformation → *sous-station 4.* R трансформаторная подстанция. D Transformator-Unterwerk. E subestación de transformación. I sottostazione di trasformazione. N transformatorstation. P podstacja transformatorowa. S transformatorstation. (811)
43. **triple busbar substation** : a substation in which the lines and transformers are connected via three busbars by means of selectors. ★ poste à trois jeux de barres → *poste 15.* R подстанция с тремя системами шин. D Dreifach-Sammelscheinen-Station. E subestación con tres juegos de barras. I stazione a tre sistemi di sbarre. N station met drievoudig railsysteem. P rozdzielnia o trzech systemach szyn zbiorczych. S ställverk med tre samlingsskenor. (605)
44. **underground substation** (*Syn.* vault substation) : a substation which is built to operate underground. ★ poste souterrain → *poste 55.* R подземная подстанция. D Unterflurstation. E subestación subterránea. I cabina sotterranea. N ..... P stacja podziemna. S underjordsstation. (605)
45. **unmanned substation** : a substation which is operated by personnel who are not stationed at the substation. ★ poste sans personnel de conduite → *poste 52.* R подстанция без обслуживающего персонала. D unbesetzte Station. E subestación sin personal de operación. I stazione non presidiata. N onbemand station. P stacja bez stałej obsługi. S obemannad station. (605)
46. **vault substation** (*Syn.* underground substation) : → *substation 44*

substitute

1. **substitute character** : → *character 17*

substitution

1. **substitution (method of) measurement** : → *measurement 12*

substitutional

1. **substitutional braking** : → *braking 42*

substrate

1. **substrate** : a base material on or in which electrical or electronic elements are placed or formed. ★ substrat

→ *substrat 1.* R подложка. D Substrat. E soporte. I substrato. N substraat; onderlaag; ondergrond. P podłoże. S substrat. (212,521)

subsynchronous

1. **subsynchronous reluctance motor** : → *motor 100*
2. **subsynchronous resonance** : → *resonance 19*

sub-system

1. **(cabled distribution) sub-system** : part of a cabled distribution system serving a particular group of subscribers or having particular technical characteristics. ★ sous-réseau (de télédistribution) → *sous-réseau 1.* R подсистема кабельного разпределения. (723)

sub-telephone

1. **sub-telephone frequency** : → *frequency 184*
2. **sub-telephone transmission** : → *transmission 65*

subtractive

1. **subtractive process** : → *process 7*

sub-transient

1. **direct-axis sub-transient open-circuit time constant** : → *time constant 3*
2. **direct-axis sub-transient reactance** : → *reactance 4*
3. **direct-axis sub-transient short-circuit time constant** : → *time constant 4*
4. **direct-axis sub-transient voltage** : → *voltage 50*
5. **quadrature-axis sub-transient open-circuit time constant** : → *time constant 12*
6. **quadrature-axis sub-transient reactance** : → *reactance 13*
7. **quadrature-axis sub-transient short-circuit time constant** : → *time constant 13*
8. **quadrature-axis sub-transient voltage** : → *voltage 158*
9. **sub-transient current** : → *current 201*

successful

1. **successful call** (*Syn.* effective call) : → *call 35*
2. **successful call attempt** : → *attempt 10*
3. **successful call attempt** : → *attempt 11*
4. **successful call attempt** : → *attempt 12*
5. **successful reclosing** : → *reclosing 10*

sudden

1. **sudden failure** : → *failure 48*
2. **sudden ionospheric disturbance** : → *disturbance 15*
3. **sudden short-circuit test** : → *test 82*

suffix

1. **suffix** (in ac signalling) : the portion of a multi-component signal which is transmitted immediately after the prefix and which has the function of conveying the signalling information. ★ suffixe → *suffixe 1.* R суффикс (в сигнализации переменным током). D Nachtrags-Begleitzeichen. E sufijo (en señalización en corriente alterna). I suffisso di segnale (nella segnalazione in c.a.). N ..... P sufiks (sygnału wieloelementowego). S suffix. (714)

suite

1. **continuity suite** : a suite of rooms containing a continuity studio and a continuity control room. ★ bloc studio → *bloc 13.* R аппаратно-программный блок. (723)

sulphocarbonitriding

1. **sulphocarbonitriding** : a thermochemical treatment applied to a ferrous alloy, in which holding is carried out in a suitable medium to increase the surface concentration of sulphur, carbon and nitrogen, which diffuse into the workpiece. ★ sulfocarbonitruration → *sulfocarbonitruration 1.* R сульфонитроцементация. D Schwefelkohlenstoff-Nitrieren. E sulfocarbonitruración. I sulfocarbonitrurazione. N sulfocarbonitreren. P siarkowęgloazotowanie. S sulfokarbonitrering. (841)

sulphur

1. **corrosive sulphur** : the free sulphur and corrosive sulphur compounds detected by subjecting copper to contact with an insulating liquid under standardized conditions. ★ soufre corrosif → *soufre 2.* R коррозионная сера. D korrosiver Schwefel. E azufre corrosivo. I zolfo corrosivo. N corrosieve zwavel. P siarka korozyjna. S korrosivt svavel. (212)
2. **sulphur content meter for hydrocarbons** : → *content meter 6*
3. **sulphur hexafluoride circuit-breaker** : → *circuit-breaker 18*

sum

1. **digital sum** : the algebraic sum of the notional values of a sequence of consecutive signal elements. ★ somme numérique → *somme 3.* R цифровая сумма. D Digitalsumme. E suma numérica. I somma numerica. N digitale som. P suma cyfrowa. S ..... (704)
2. **digital sum variation** : → *variation 3*
3. **sum signal** : → *signal 228*

summation

1. **calculation of efficiency from summation of losses** : → *efficiency 4*
2. **summation current transformer** : → *transformer 64*
3. **summation instrument** : → *instrument 30*

sump

1. **oil leakage sump** : a receptacle which is intended to receive the oil of a transformer or other oil filled equipment in case of leakage. ★ fosse de récupération d'huile → *fosse 2.* R маслоприемник. D Ölauffangwanne. E foso de recogida de aceite. I fossa per l'olio. N olieopvangbak. P misa olejowa. S oljegrop. (605)

sun

1. **sun phantom** : → *phantom 6*

sunburn

1. **sunburn** : injury to the skin, accompanied by erythema, caused by over-exposure to optical radiation. ★ coup de soleil → *coup 7.* R солнечный ожог. D Sonnenbrand. E quemadura solar. I eritema solare. N zonnebrand. P rumień słoneczny; oparzenie słoneczne. S solbränna. (845)

sunlight

1. **sunlight** : visible part of direct solar radiation. *Note.* — When dealing with actinic effects of optical radiations, this term is commonly used for radiations extending beyond the visible region of the spectrum. ★ lumière solaire → *lumière 18.* R солнечный свет. D Sonnenlicht. E luz solar. I luce solare. N zonlicht. P oświetlenie słoneczne bezpośrednie. S solljus. (845)

sunshine

1. **astronomical sunshine duration** : → *duration 1*
2. **possible sunshine duration** : → *duration 29*
3. **relative sunshine duration** : → *duration 35*
4. **sunshine duration** : → *duration 41*

sunspot

1. **international relative sunspot number** : → *number 12*
2. **twelve-month running-mean sunspot number** : → *number 33*

suntan

1. **suntan** : darkening of the skin caused by optical radiation. ★ bronzage → *bronzage 2.* R солнечный загар. D Sonnebräunung. E bronceado. I abbronzatura. N bruining. P opalenizna. S solbrunhet. (845)

super-audio

1. **super-audio transmission** (*Syn.* super-telephone transmission) : → *transmission 67*

superconductor

1. **superconductor** : a substance that, for sufficiently low temperature and sufficiently weak magnetic fields, has zero resistivity. ★ supraconducteur → *supraconducteur 1.* R сверхпроводник. D Supraleiter. E superconductor. I superconduttore. N supergeleider. P nadprzewodnik. S supraledare. (121)

superdirectivity

1. **superdirectivity** : a condition that occurs when the directivity of an antenna significantly exceeds that obtained from an aperture of the same dimension as that of the actual antenna but with uniform aperture illumination or, in the case of an array, from the array with elements uniformly excited. *Note.* — Most frequently superdirectivity can be obtained only when amplitude and phase of currents, or field on the aperture, vary rapidly over distances short compared to the wavelength, which may lead to a very poor efficiency and usually renders the use of this property impractical. ★ superdirectivité → *superdirectivité 1.* R сверхнаправленность антенны. D Superrichtfaktor. E superdirectividad. I superdirettività. N verhoogd richteffect. P kierunkowość nadzwyczyjna (anteny). S överdirektivitet. (712)

superficial

1. **superficial X-ray therapy** : → *therapy 10*

supergroup

1. **basic supergroup** : a supergroup occupying the standardized frequency band 312-552 kHz. ★ groupe secondaire de base → *groupe 64.* R основная вторичная группа. D Basissekundärgruppe. E grupo secundario de base. I gruppo secondario di base. N basissupergroep. P grupa wtórna podstawowa. S grundsextiogrupp. (704)
2. **basic 15-supergroup assembly** : → *assembly 6*
3. **basic (15-supergroup) hypergroup** (*Syn.* basic 15-supergroup assembly) : → *assembly 6*
4. **supergroup** : 1. An assembly, obtained by frequency division multiplexing of a specified number of groups, normally 5, in adjacent positions in a frequency band of specified width. 2. A frequency band of standardized width, 240 kHz, in a multichannel carrier system and occupying one of a number of specified positions in the spectrum. *Note. 1* — A supergroup is normally an assembly of 60 FDM telephone channels. *2* — Signals, other than those derived from an assembly of groups but having specified characteristics, may occupy the whole or a part of a frequency band assigned to a supergroup. ★ groupe secondaire → *groupe 63.* R вторичная группа. D Sekundärgruppe. E grupo secundario. I gruppo secondario; supergruppo; Gr. II (abbreviazione). N supergroep. P grupa wtórna. S sextiogrupp. (704)
5. **supergroup bank** (*Syn.* supergroup translating equipment) : → *equipment 75*
6. **supergroup modulating equipment** : → *equipment 74*
7. **supergroup translating equipment** : → *equipment 75*
8. **15-supergroup assembly** : → *assembly 32*
9. **15-supergroup assembly modulating equipment** : → *equipment 86*
10. **15-supergroup assembly translating equipment** : → *equipment 87*
11. **(15-supergroup) hypergroup** (*Syn.* 15-supergroup assembly) : → *assembly 32*

superheated

1. **superheated steam** : → *steam 4*

superheater

1. **superheater** : the part of the boiler where the produced steam is superheated. ★ surchauffeur → *surchauffeur 1.* R пароперегреватель. D Überhitzer. E sobrecalentador. I surriscaldatore. N oververhitter. P przegrzewacz. S överhettare. (602)

superheating

1. **superheating** : *a)* The heating of the molten metal to a higher temperature to satisfy requirements for production. *b)* The difference between the metal temperature and its liquidus. ★ surchauffe → *surchauffe 1.* R перегрев. D Überhitzen. E sobrecalentamiento. I surriscaldamento. N oververhitting. P przegrzewanie. S överhettning. (841)

supericonoscope

1. **supericonoscope** : a high-electron-velocity image camera tube. ★ supericonoscope → *supericonoscope 1.* R супериконоскоп. (723)

superimposed

1. **superimposed arc plasma torch** : → *torch 6*

superimposition

1. **superimposition** : the overlaying of a short message on a broadcast programme. ★ surimpression → *surimpression 1.* R накладка. (723)

superluminescence

1. **superluminescence** (*Syn.* superradiance) : amplification of spontaneous emission in a gain medium, characterized by moderate line narrowing and moderate directionality. *Note.* — This process is generally distinguished from lasing action by the absence of feedback and hence the absence of well-defined modes of oscillation. ★ superluminescence → *superluminescence 1.* R сверхизлучение. D Superstrahlung. E superluminiscencia; superradiación. I super luminescenza; superradianza. N superluminescentie; superstraling. P superluminescencja. S superluminiscens. (731)

superluminescent

1. **superluminescent LED** : → *LED 2*

supermastergroup

1. **basic supermastergroup** : a supermastergroup occupying the standardized frequency band 8 516-12 388 kHz. ★ groupe quaternaire de base → *groupe 60.* R основная четверичная группа. D Basisquartärgruppe. E grupo cuaternario de base. I gruppo quaternario di base. N basissuperhoofdgroep. P grupa czwórna podstawowa. S grund-900-grupp. (704)
2. **supermastergroup** : 1. An assembly, obtained by frequency division multiplexing, of a specified number of mastergroups, normally 3, in adjacent positions in a frequency band of specified width with guard bands between adjacent mastergroups. 2. A frequency band of standardized width, 3 872 kHz, in a multichannel carrier system and occupying one of a number of specified positions in the spectrum. *Notes. 1* — A supermastergroup is normally an assembly of 900 FDM telephone channels. *2* — Signals, other than those derived from an assembly of mastergroups but having specified characteristics, may occupy the whole or a part of a frequency band normally assigned to a supermastergroup. ★ groupe quaternaire → *groupe 59.* R четверичная группа. D Quartärgruppe. E grupo cuaternario. I gruppo quaternario; Gr. IV (abbreviazione). N superhoofdgroep. P grupa czwórna. S 900-grupp. (704)
3. **supermastergroup translating equipment** : → *equipment 76*

superposed

1. **superposed circuit** : → *circuit 169*

superradiance

1. **superradiance** (*Syn.* superluminescence) : → *superluminescence 1*

superradiant

1. **superradiant diode** (*Syn.* superluminescent LED) : → *LED 2*

super-refraction

1. **super-refraction** : refraction for which the refractivity vertical gradient is less than the standard refractivity gradient. ★ supraréfraction → *supraréfraction 1.* D Superrefraktion. P załamanie podwyższone. (705)

super-telephone

1. **super-telephone frequency** : → *frequency 185*
2. **super-telephone transmission** : → *transmission 67*

supertelex

1. **supertelex (service)** (*Syn.* high speed telex) : a telex service working faster than the standard rate of 50 bauds. ★ (service) supertélex → *service 59.* R служба супертелекс; высокоскоростной телекс. D Hochgeschwindigkeits-Telex(-Dienst). E (servicio) supertélex. I supertelex; telex ad alta velocità. N snelle-telexdienst. P usługa superteleksowa. S supertelextjänst. (721)

super-turnstile

1. **super-turnstile antenna** : → *antenna 112*

supervised

1. **supervised area** : → *area 39*

supervision

1. **supervision** (*Syn.* monitoring) : activity, performed either manually or automatically, intended to observe the state of an item. *Note.* — Automatic supervision may be performed internally or externally to the item. ★ surveillance → *surveillance 5.* **R** технический надзор; технический осмотр. **D** Überwachung; Kontrolle. **E** supervisión; vigilancia. **I** supervisione. **N** toezicht; bewaking. **P** nadzór (stanu obiektu). **S** övervakning. (191)
2. **supervision** : the function of indicating the status of and of controlling a call, a system or a network. ★ supervision → *supervision 4.* **R** контроль. **D** ueberwachen; verwalten. **E** supervisión. **I** supervisione. **N** bewaking. **P** nadzorowanie połączenia. **S** övervakning. (714)

supervisor

1. **sound supervisor** : operator responsible for sound control. ★ preneur de son → *preneur 1.* **R** контролер звука. (723)
2. **supervisor** (*Syn.* supervisory program) : → *program 9*

supervisory

1. **supervisory circuit** (*Syn.* control line) : → *line 17*
2. **supervisory processor** : → *processor 3*
3. **supervisory program** : → *program 9*
4. **supervisory signal** : → *signal 229*
5. **supervisory tone** : → *tone 33*

supplementary

1. **CIE 1964 supplementary standard colorimetric observer** : → *observer 3*
2. **CIE 1964 supplementary standard colorimetric system** (X_{10} Y_{10} Z_{10}) : → *system 27*
3. **permanent supplementary artificial lighting** : → *lighting 24*
4. **SI supplementary unit** : → *unit 56*
5. **supplementary load loss** : → *loss 97*
6. **supplementary tariff** : → *tariff 40*

supplied

1. **cost of kWh not supplied** : → *cost 9*
2. **energy not supplied** : → *energy 37*

supplier

1. **supplier** (*Syn.* supply undertaking) : → *undertaking 2*

supply

1. **anode supply power** : → *power 6*
2. **auxiliary power supply contactor** (*Syn.* heating contactor) : → *contactor 10*
3. **auxiliary power supply line** (*Syn.* heating train line) : → *line 44*
4. **auxiliary supply generator** (*Syn.* train power supply generator) : → *generator 40*
5. **continuity of supply** : → *continuity 4*
6. **duplicate supply** : a supply to a load by two circuits which are considered to be independent of each other in terms of security supply. ★ alimentation double → *alimentation 4.* **R** двустороннее питание. **D** Zweifachversorgung. **E** alimentación doble. **I** alimentazione doppia. **N** dubbele voeding. **P** zasilanie podwójne. **S** dubbelmatning. (601)
7. **electricity supply system** (*Syn.* electrical power system) : → *system 56*
8. **electro-dynamic braking dependent on line supply** : → *braking 27*
9. **electro-dynamic braking independent of line supply** : → *braking 28*
10. **interruption of supply** : → *interruption 5*
11. **maximum rated supply current** : → *current 125*
12. **point of supply** : → *point 34*
13. **pre-conditioning supply** (*Syn.* energy-supply station) : → *station 12*
14. **pre-heating supply** (*Syn.* energy-supply station) : → *station 12*
15. **quality of supply** : → *quality 9*
16. **single supply** : a supply given to a load by one circuit only. ★ alimentation simple → *alimentation 6.* **R** одностороннее питание. **D** Einfachversorgung. **E** alimentación simple. **I** alimentazione semplice. **N** enkelvoudige voeding. **P** zasilanie pojedyńcze. **S** enkelmatning. (601)
17. **stabilized supply apparatus** : → *apparatus 15*
18. **stand-by supply** : a supply which can be used when the normal supply becomes an unavailable or inadequate. ★ alimentation de réserve → *alimentation 3.* **R** резервное питание. **D** Reserveversorgung. **E** alimentación de reserva; alimentación de socorro. **I** alimentazione di riserva. **N** noodvoeding. **P** zasilanie rezerwowe; zasilanie awaryjne. **S** reservmatning. (601)
19. **standby supply system** : → *system 196*
20. **supply** (of electricity) : a public service provided by a distribution undertaking to any consumer and determined according to technical and commercial criteria such as frequency, voltage, continuity, maximum demand, point of supply, tariffs. *Note.* — In French, in a restrictive sense, electricity supplied to a consumer, groups of consumers and/or to other utilities. ★ fourniture → *fourniture 3.* **R** электроснабжение. **D** Versorgung; Elektrizitätsversorgung. **E** suministro (de energía eléctrica). **I** fornitura. **N** (elektriciteits)voorziening. **P** obsługa odbioru energii elektrycznej. **S** elleverans. (604)
21. **supply agreement** : → *agreement 1*
22. **(supply) continuity criterion** : → *criterion 2*
23. **supply detection circuit** : → *circuit 171*
24. **supply disconnection** : → *disconnection 1*
25. **supply noise** (*Syn.* hum) : → *hum 3*
26. **supply service** : → *service 47*
27. **supply spool** : → *spool 3*
28. **supply system for safety services** : → *system 207*
29. **supply system impedance** : → *impedance 57*
30. **supply undertaking** : → *undertaking 2*
31. **supply voltage** : → *voltage 197*
32. **supply voltage** : → *voltage 198*
33. **train power supply circuit** : → *circuit 187*
34. **train power supply contactor** (*Syn.* heating contactor) : → *contactor 10*
35. **train power supply generator** : → *generator 40*
36. **train power supply jumper** (*Syn.* heating jumper) : → *jumper 1*
37. **train power supply line** (*Syn.* heating train line) : → *line 44*
38. **welding supply cable** : → *cable 75*

supply-interruption

1. **supply-interruption costs** : → *cost 22*

support

1. **angle support** : a support located at a point where the route of the line, in the horizontal plane, changes substantially in direction. ★ support d'angle → *support 18.* **R** угловая опора. **D** Winkelstützpunkt. **E** apoyo de ángulo. **I** sostegno d'angolo. **N** hoekmast. **P** słup narożny. **S** vinkelstolpe. (466)
2. **angle support** (*Syn.* tension support) : → *support 28*
3. **brush holder support** : → *brush 5*
4. **cable support sleeve** : → *sleeve 1*
5. **divided support disconnector** : → *disconnector 4*
6. **divided support earthing switch** : → *switch 14*
7. **double lacing redundant support** (*Syn.* double warren redundant support) : → *support 8*
8. **double warren redundant support** (*Syn.* double lacing redundant support) : a bracing system executed according to figure 2.5. ★ triangulation en losange → *triangulation 4.* **R** перекрестная шпренгельная решетка. **D** Ausfachung mit gekreuzten Diagonalen und Sekundärfachwerk. **E** celosía doble con relleno. **I** tralicciatura doppia con rompitratta. **N** kruisverband met knikverkorters. **P** zakratowanie podwójne nadmiarowe. **S** dubbel diagonalvandring med knäckavstyvning. (466)
9. **flexible support** : a method of attaching an overhead contact line to its supports by means of one or more intermediate

transverse wires or other flexible devices. ★ fixation flexible → *fixation 2.* R гибкое крепление. D elastische Fahrdrahtaufhängung. E fijación flexible. I sospensione elastica. N flexible bovenleidingophanging. P zawieszenie elastyczne. S elastisk upphängning. (811)

10. **flying angle support** (*Syn.* running angle support) : a support used on small or medium angles of deviation of the route, the conductors being attached by suspension-type insulator sets. ★ support d'angle souple → *support 19.* R промежуточная угловая опора. D Winkeltragstützpunkt. E apoyo de ángulo en suspensión. I sostegno d'angolo in sospensione. N hoeksteunmast. P słup narożny (o ruchomym zawieszeniu przewodów). S vinkelstolpe med hängkedjor. (466)
11. **guyed support** (*Syn.* stayed support) : → *support 21*
12. **insulation support** : the part of a terminal end which accomodates but does not secure the cable insulation. ★ support isolant → *support 34.* R опора кабеля. D Isolationsunterstützung. E soporte aislante. I supporto isolante. N isolatieondersteuning. P obejma izolacji (kabla). S stöd för ledarisolering. (581)
13. **intermediate support** : a support located on an essentially straight line portion of an overhead line route, where the conductors are attached by suspension, pin or line post insulators. ★ support d'alignement → *support 16.* R промежуточная опора. D Tragstützpunkt in gerader Linie. E apoyo de alineación. I sostegno di rettifilo. N steunmast. P słup przelotowy. S raklinjestolpe. (466)
14. **maintenance support performance** : → *performance 4*
15. **pivot support frame** : → *frame 39*
16. **portal support** (*Syn.* "H" pole; "H" frame (USA)) : a H shaped support comprising two spaced vertical main legs with a horizontal crossarm near the top. ★ portique → *portique 1.* R портальная опора. D Portalstützpunkt; H-förmiger Mast. E pórtico; apoyo en «H». I portale; sostegno ad «H». N portaal(mast); H-portaal. P słup portalowy. S portalstolpe. (466)
17. **rigid support** : a method of attaching an overhead contact line rigidly to its support. ★ fixation rigide → *fixation 3.* R жесткое крепление. D starre Fahrdrahtaufhängung. E fijación rígida. I fissaggio rigido. N ..... P zawieszenie sztywne. S stum upphängning. (811)
18. **running angle support** (*Syn.* flying angle support) : → *support 10*
19. **self-supporting support** : a support having intrinsic stability, without the use of stays. ★ support autostable → *support 14.* R свободностоящая опора. D selbsttragender Stützpunkt. E apoyo autoportante. I sostegno autoportante. N niet-getuide mast. P słup wolnostojący. S ostagad stolpe. (466)
20. **service support performance** : → *performance 15*
21. **stayed support** (*Syn.* guyed support (USA)) : a support whose stability is ensured by stays. ★ support haubané → *support 32.* R опора с оттяжками. D abgespannter Stützpunkt. E apoyo atirantado. I sostegno strallato. N getuide mast. P słup z odciągami. S stagad stolpe. (466)
22. **strain support** (*Syn.* tension support) : → *support 28*
23. **stub (of a support)** : → *stub 6*
24. **support** (*Syn.* structure (of an overhead line)) : a device designed to carry, through insulators, a set of conductors of a line. ★ support (de ligne aérienne) → *support 22.* R опора; конструкция (воздушной линии электропередачи). D Stützpunkt (einer Freileitung). E apoyo. I sostegno (di linea aerea). N steunpunt (van een bovengrondse lijn). P konstrukcja wsporcza; słup. S stolpe. (466)
25. **support pole** : → *pole 43*
26. **support type current transformer** : → *transformer 65*
27. **supports** (in electric traction) (*Syn.* structures; structures) : those parts which support the conductors and the associated insulators of an overhead contact line. ★ supports → *support 42.* R опоры (контактной сети). D Träger; Stütze. E apoyos (en tracción eléctrica); estructura (en tracción eléctrica). I sostegno. N bovenleidingdraagconstructie. P wsporniki. S bärande konstruktioner. (811)
28. **tension support** (*Syn.* angle support; strain support (USA)) : a support to which the conductors or bundles are attached through tension insulator sets. *Note.* — The loads due to the adjacent spans are considered as being applied independently to the attachment points. ★ support d'ancrage → *support 17.* R анкерная опора. D Abspannstützpunkt. E apoyo de anclaje. I sostegno di amarro. N trekmast. P słup odporowo-narożny. S avgränsningsstolpe. (466)
29. **terminal support** : a support designed to terminate the line tension of conductors on one side. ★ support d'arrêt → *support 20.* R концевая опора. D Endstützpunkt. E apoyo de fin de línea. I capolinea. N eindmast. P słup krańcowy. S ändstolpe. (466)
30. **tooth support** : that part of the structure of each end of a core which applies axial pressure to the tooth. ★ griffe de serrage → *griffe 3.* R нажимной палец. D Druckfingerplatte. E soporte de diente. I dita pressapacco. N drukvinger. P palec dociskowy. S tryckfinger. (411)
31. **transposition support** : a support designed to permit the change of the relative position of the phases along the route of a line. ★ support de transposition → *support 28.* R транспозиционная опора. D Verdrillungsstützpunkt. E apoyo de transposición. I sostegno di trasposizione. N wisselmast. P słup przepleceniowy. S skruvstolpe. (466)
32. **tube support** : a device on which the X-ray tube housing is mounted, for radiography, fluoroscopy or therapy. ★ porte-tube → *porte-tube 1.* R штатив трубки. D Röntgenröhrenstativ. E portatubo. I stativo. N buisstatief. P statyw lampy. S rörstativ. (881)
33. **winding overhang support** : a structure for the support of a winding overhang. *Note.* — This structure may be of insulating material or may carry winding overhang support insulation. ★ support de tête de bobine → *support 26.* R опорный кронштейн лобовых частей обмотки. D Wickelkopf-Abstützung. E soporte de cabeza de bobina. I sostegni delle testate. N spoelkopsteun. P podzwojnik. S lindningsstöd. (411)
34. **winding overhang support insulation** : → *insulation 58*

supported

1. **magnetically supported vehicle** : → *vehicle 9*

supporting

1. **electrode supporting structure** : → *structure 1*

suppressed

1. **instrument with suppressed zero** : → *instrument 19*
2. **suppressed carrier** : → *carrier 30*
3. **suppressed traffic** : → *traffic 21*

suppression

1. **disturbance suppression** : action which reduces or eliminates electromagnetic disturbance. ★ antiparasitage → *antiparasitage 1.* R подавление возмущения. D Entstörung. E supresión de perturbación; antiparasitado. I soppressione di disturbo. N storingsonderdrukking. P tłumienie zaburzenia (elektromagnetycznego). S avstörning. (161)
2. **echo suppression** : a method of echo control effected by the insertion of loss in the transmission path(s) under the control of the voice signals being transmitted. ★ suppression d'écho → *suppression 12.* R эхозаграждение. D Echosperre. E supresión de eco. I soppressione dell'eco. N echo-onderdrukking. P tłumienie echa. S ekoundertryckning. (704)
3. **interference suppression** : action which reduces or eliminates electromagnetic interference. ★ antibrouillage → *antibrouillage 2.* R подавление помехи. D Beeinflussungsunterdrückung. E antiinterferencia; supresión de interferencia. I soppressione di interferenza. N storingsonderdrukking. P tłumienie zakłócenia. S avstörning. (161)
4. **rated current of an arc suppression coil** : → *current 157*
5. **side lobe suppression** : any process, action or adjustment to reduce the side lobe levels. ★ réduction des lobes secondaires → *réduction 9.* R подавление боковых лепестков. D Nebenkeulenunterdrückung; Nebenzipfelunterdrückung. E supresión de lóbulo lateral. I riduzione dei lobi secondari; riduzione dei lobi laterali. N zijlobonderdrukking; zijlusonderdrukking. P tłumienie listka bocznego. S sidlobsundertryckning. (712)
6. **suppression component** (*Syn.* suppressor) : → *suppressor 7*
7. **suppression state** : → *state 42*

suppressor

1. **acoustic shock suppressor** (in telephony) : a device associated with a telephone station and intended to prevent acoustic shocks, by setting an upper limit to the absolute values of the instantaneous electrical voltage that can be applied to the telephone earphone. ★ anti-choc → *anti-choc 1.* R устройство подавления акустических ударов (в телефонии). D Gehörschutzgleichrichter. E antichoque (en telefonía). I soppressore di impulsi acustici. N antiklikschakeling. P urządzenie przeciwtrzaskowe (telefoniczne). S chockskydd. (722)
2. **echo suppressor** : a device placed in a telecommunication circuit for effecting echo suppression. ★ suppresseur d'écho → *suppresseur 1.* R эхозаградитель. D Echounterdrücker. E amortiguador de eco. I soppressore d'eco. N echo-onderdrukker. P tłumik echa. S ekospärr. (704)
3. **full echo suppressor** : an echo suppressor in which voice signals in one transmission path control the insertion of a large loss in the other transmission path, and vice versa. ★ suppresseur d'écho complet → *suppresseur 2.* R полный эхозаградитель. D Vollechounterdrücker. E amortiguador de eco completo. I soppressore totale d'eco. N volledige echo-onderdrukker. P tłumik echa pełny. S tvåvägs ekospärr. (704)
4. **half echo suppressor** (*Syn.* split echo suppressor (USA)) : an echo suppressor in which the voice signals in one transmission path control the insertion of a large loss in the other transmission path. *Note.* — These echo suppressors are normally used in pairs in telecommunication circuits. ★ demi-suppresseur d'écho → *demi-suppresseur 1.* R полукомплект эхозаградителя. D Halbechounterdrücker; Splitechounterdrücker. E semiamortiguador de eco. I semisoppressore d'eco. N halve echo-onderdrukker. P tłumik echa połówkowy. S envägs ekospärr. (704)
5. **inverse suppressor** : a rectifier in the primary circuit of a transformer used with a self-rectifying tube with the purpose of lessening inverse voltage. ★ limitateur d'onde inverse → *limitateur 1.* R ограничитель обратного напряжения. D (Gegenspannungs-)Sperrglied. E limitador de onda inversa. I soppressore di onda inversa. N ..... P ogranicznik napięcia zwrotnego. S primärlikriktare. (881)
6. **split echo suppressor** (*Syn.* half echo suppressor) : → *suppressor 4*
7. **suppressor** (*Syn.* suppression component) : a component specially designed for disturbance suppression. ★ dispositif d'antiparasitage → *dispositif 35.* R помехоподавляющее устройство; помехоподавляющий элемент. D Entstörer; Entstörelement. E dispositivo de antiparasitado. I dispositivo soppressore di disturbo. N onderdrukker; onderdrukkingsonderdeel. P tłumik; człon tłumiący. S avstörningsdon. (161)
8. **suppressor grid** : → *grid 29*

supraaural

1. **supraaural earphone** : → *earphone 4*

surface

1. **active surface of an electrode** : the interface between the electrolyte and the electrode where the electrode reaction takes place. ★ surface active d'une électrode → *surface 31.* R активная поверхность электрода. D aktive Oberfläche einer Elektrode. E superficie activa de un electrodo. I superficie attiva di un elettrodo. N actief oppervlak van een elektrode. P powierzchnia czynna elektrody. S effektiv elektrodyta. (111)
2. **average reference surface diameter** : → *diameter 4*
3. **convergence surface** : the surface generated by the point of intersection of electron beams during the scanning process. ★ surface de convergence → *surface 34.* R поверхность сходимости. D Konvergenzfläche. E superficie de convergencia. I superficie di focalizzazione. N convergentie-oppervlak. P pole zbieżności (wiązki). S konvergensyta. (531)
4. **core/reference surface concentricity error** : → *error 18*
5. **electric surface heating** : → *heating 13*
6. **equi-amplitude surface** : a set of points, if it exists, where each of the vectors of a travelling sinusoidal electromagnetic wave has the same magnitude at the same instant. *Note.* — For a uniform plane wave, an equi-amplitude surface is orthogonal at each point to the imaginary part of the wave vector relative to this point. ★ surface équiamplitude → *surface 47.* D Amplitudenfläche; Fläche gleicher Amplitude. P płaszczyzna równoamplitudowa. (705)
7. **equiphase surface** : the set of points at which a specified component of one of the vectors of a travelling sinusoidal electromagnetic wave has the same phase at the same time. ★ surface équiphase → *surface 48.* D Phasenfläche; Fläche gleicher Phase. P powierzchnia równofazowa. (705)
8. **flexible surface heater** : → *heater 3*
9. **heating conductor surface rating** : → *rating 6*
10. **inner diameter of the recorded surface** : → *diameter 12*
11. **isodose surface** : a surface on which the absorbed dose is constant. ★ surface isodose → *surface 50.* R изодозная поверхность. D Isodosenfläche. E superficie de isodosis. I superficie isodose. N isodosisoppervlak. P powierzchnia izodoz. S isodosyta. (881)
12. **isoexposure surface** : a surface on which exposure is constant. ★ surface isoexposition → *surface 51.* R изодозная (экспозиционная) поверхность. D Fläche gleicher Standardionendosis. E superficie de isoexposición. I superficie di isoesposizione. N isoexposieoppervlak. P powierzchnia izoekspozycji. S isoexpositionsyta. (881)
13. **Lambertian surface** : ideal surface for which the radiation coming from that surface is distributed angularly according to Lambert's cosine law. *Note.* — For a Lambertian surface, $M = \pi L$ where M is the radiant or luminous exitance, and L the radiance or luminance. ★ surface lambertienne → *surface 53.* R поверхность Ламберта. D Lambertfläche; vollkommen matte Fläche. E superficie lambertiana. I superficie di Lambert. N ideaal mat oppervlak. P powierzchnia lambertowska. S lambertyta. (845)
14. **maximum surface temperature** : → *temperature 26*
15. **non circularity of reference surface** : → *circularity 3*
16. **outer diameter of the recorded surface** : → *diameter 14*
17. **recorded surface** (*Syn.* modulated section) : the portion of the surface of a disk containing modulation. ★ surface gravée → *surface 49.* R зона записи. D bespielte Oberfläche; Spielfeld. E superficie grabada; zona modulada. I superficie modulata. N bespeeld gedeelte. P powierzchnia zapisu. S inspelad yta (del). (806)
18. **reference surface** (of an optical fibre) : the cylindrical surface of an optical fibre to which reference is made for jointing purposes. *Note.* — The reference surface is typically the cladding or primary coating surface. In rare circumstances it could be the core surface. ★ surface de référence → *surface 37.* R опорная поверхность (оптического волокна). D Bezugsoberfläche (einer optischen Faser). E superficie de referencia (de una fibra óptica). I superficie di riferimento (di una fibra ottica). N referentieoppervlak van een optische vezel. P powierzchnia odniesienia. S referensyta. (731)
19. **reference surface** : surface on which illuminance is measured or specified. ★ surface de référence → *surface 38.* R расчётная плоскость. D Bezugsfläche; Meßfläche. E superficie de referencia. I superficie di riferimento. N referentievlak. P płaszczyzna odniesieniowa. S mätplan. (845)
20. **reference surface centre** : → *centre 18*
21. **reference surface diameter** : → *diameter 15*
22. **reference surface diameter tolerance** : → *tolerance 13*
23. **reference surface tolerance field** : → *field 55*
24. **reflecting surface** (*Syn.* reflector) : → *reflector 19*
25. **rigid surface heater** : → *heater 15*
26. **rough surface** : a surface separating two media which is large compared to the wavelength of the incident wave and the irregularities of which are randomly located and cause diffuse reflection. ★ surface rugueuse → *surface 55.* D rauhe Grenzfläche. P powierzchnia chropowata. (705)
27. **specular surface** : a surface separating two media which is large compared to the wavelength of the incident wave and the irregularities of which are sufficiently small to cause specular reflection. ★ surface lisse → *surface 54.* D spiegelnde Grenzfläche. P powierzchnia zwierciadlana. (705)
28. **storage surface** : an insulating or semiconducting layer on which a charge pattern is stored and from which information can be extracted. ★ surface de mémoire → *surface 36.* R накопительная поверхность. D Speicherschicht. E superficie de memoria. I superficie di memoria. N geheugenlaag. P ..... S minnesyta. (531)
29. **surface activity** : → *activity 17*

30. **surface band** : → *band 31*
31. **surface barrier semiconductor detector** : → *semiconductor detector 10*
32. **surface burnishing facet** : → *facet 1*
33. **surface colour** : → *colour 79*
34. **surface contamination meter** : → *meter 61*
35. **surface discharge** : → *discharge 32*
36. **surface dose** : → *dose 41*
37. **surface duct** (*Syn.* ground based duct) : → *duct 9*
38. **surface (electric) charge density** : → *charge-density 3*
39. **surface emitting light emitting diode** : → *diode 22*
40. **surface impedance** : → *impedance 58*
41. **surface induction** : → *induction 33*
42. **surface integral** : → *integral 7*
43. **surface level** : → *level 95*
44. **surface mounting** : → *mounting 7*
45. **surface noise** : → *noise 85*
46. **surface or bottom backscattering differential** : → *differential 37*
47. **surface or bottom scattering coefficient** : → *coefficient 67*
48. **surface or bottom scattering strength** (*Syn.* surface or bottom backscattering differential) : → *differential 37*
49. **surface passivation** : → *passivation 1*
50. **surface recombination velocity** : → *velocity 20*
51. **surface resistance** : → *resistance 69*
52. **surface resistivity** : → *resistivity 3*
53. **surface transfer impedance** : → *impedance 59*
54. **surface wave** : → *wave 62*
55. **surface wave** : → *wave 63*
56. **(surface) wave tilt** : → *tilt 4*
57. **surface wavefront** : → *wavefront 3*
58. **surface waveguide** (*Syn.* surface-wave waveguide) : → *waveguide 16*

surface-charge

1. **surface-charge effect** (*Syn.* S effect) : → *effect 68*

surface-wave

1. **surface-wave antenna** : → *antenna 113*
2. **surface-wave waveguide** : → *waveguide 16*

surge

1. **filament or heater starting (surge) current** : → *current 89*
2. **surge arrester** (*Syn.* lightning arrester) : → *arrester 3*
3. **surge current of an electrode** : → *current 204*
4. **surge diverter** (*Syn.* lightning arrester) : → *arrester 3*
5. **surge impedance of a line** : → *impedance 60*
6. **surge shaft** (*Syn.* surge tank) : → *tank 5*
7. **surge tank** : → *tank 5*
8. **voltage surge** : a transient voltage wave propagating along a line or a circuit and characterized by a rapid increase followed by a slower decrease of the voltage. ★ tension de choc (progressive) → *tension de choc 10.* R импульс напряжения при распространении волны; скачок напряжения. D Stoßspannungswelle. E impulso de tensión (progresivo). I sovratensione transitoria. N stootspanning. P podskok napięcia. S spänningsvåg. (161)
9. **voltage surge** : a transient voltage wave propagating along a line or a circuit and characterized by a rapid increase followed by a slower decrease of the voltage. ★ tension de choc → *tension de choc 7.* R импульс напряжения при распространении волны. D Stoßspannungswelle. E impulso de tensión (progresivo). I onda di tensione. N stootspanning. P fala udarowa napięcia. S spänningsvåg. (604)

surveillance

1. **reliability and maintainability surveillance** : the continuing observation of the status of procedures, methods, conditions, products, processes and services and analysis of records to assure that reliability performance and maintainability performance requirements will be met. *Note.* — Reliability and maintainability surveillance is often carried out by the customer or third parties to ensure that the contractual requirements are being met. ★ surveillance de la fiabilité et de la maintenabilité → *surveillance 7.* R контроль за обеспечением безотказности и ремонтопригодности. D Zuverlässigkeits-Überwachung. E supervisión de la fiabilidad y de la mantenibilidad. I sorveglianza dell'affidabilità e manutenibilità. N bewaking van betrouwbaarheid en onderhoudbaarheid. P nadzór nad niezawodnością i obsługiwalnością. S tillförlitlighetsövervakning. (191)

survey

1. **protection survey** (*Syn.* radiation survey) : a single, comprehensive procedure for the evaluation of the radiation hazards incidental to the production, use, release, disposal, or existence of radioactive materials or other sources of radiation under a specific set of conditions. *Note.* — Such evaluation customarily includes: - a physical survey of the disposition of materials, equipment, and barriers ; - measurements or estimates of the levels of radiation that may be involved ; - a sufficient knowledge of processes using or affecting these materials to estimate dose equivalents resulting from expected or possible changes in materials, equipment, production processes, and modes of operation. ★ contrôle de protection → *contrôle 8.* R радиационный контроль. D Strahlenschutz-Überwachungsmassnahmen. E control de protección; control de radiación. I sorveglianza della protezione; sorveglianza delle radiazioni. N stralingsverkenning. P pomiar ochrony przed promieniowaniem. S strålskyddstillsyn. (881)
2. **radiation survey** (*Syn.* protection survey) : → *survey 1*

survival

1. **survival curve** : → *curve 38*

susceptance

1. **electrode susceptance** : the imaginary component of the electrode admittance. ★ susceptance d'électrode → *susceptance 2.* R реактивная проводимость электрода. D innerer Elektrodenblindleitwert. E susceptancia de electrodo. I suscettanza di elettrodo. N elektrodesusceptantie. P susceptancja elektrody. S elektrodsusceptans. (531)
2. **susceptance** : the imaginary part of a complex admittance. ★ susceptance → *susceptance 1.* R реактивная проводимость. D Suszeptanz; Blindleitwert. E susceptancia. I suscettanza. N susceptantie. P susceptancja. S susceptans. (131)

susceptibility

1. **electric susceptibility** : the scalar or matrix quantity whose product by the electric field strength is the electric polarization. ★ susceptibilité électrique → *susceptibilité 2.* R электрическая восприимчивость. D elektrische Suszeptibilität. E susceptibilidad eléctrica. I suscettività elettrica. N elektrische susceptibiliteit. P podatność elektryczna; susceptywność elektryczna. S elektrisk susceptibilitet. (121)
2. **(electromagnetic) susceptibility** : the inability of a device, equipment or system to perform without degradation in the presence of an electromagnetic disturbance. *Note.* — Susceptibility is a lack of immunity. ★ susceptibilité (électromagnétique) → *susceptibilité 3.* R (электромагнитная) восприимчивость. D (elektromagnetische) Störempfindlichkeit. E susceptibilidad (electromagnética). I suscettibilità (elettromagnetica). N (elektromagnetische) storingsgevoeligheid. P podatność (elektromagnetyczna). S (störnings)känslighet. (161)
3. **initial susceptibility** (κ_i) : the limiting value of the magnetic susceptibility when the magnetic field strength and magnetic flux density both tend to zero. ★ susceptibilité initiale → *susceptibilité 4.* R начальная магнитная восприимчивость. D Anfangssuszeptibilität. E susceptibilidad inicial. I suscettibilità iniziale. N aanvangssusceptibiliteit. P podatność magnetyczna początkowa. S initialsusceptibilitet; begynnelsesusceptibilitet. (221)
4. **magnetic susceptibility** : the scalar or matrix quantity whose product by the magnetic field strength is the magnetization. ★ susceptibilité magnétique → *susceptibilité 5.* R магнитная восприимчивость. D magnetische Suszeptibilität. E susceptibilidad magnética. I suscettività magnetica. N magnetische susceptibiliteit. P podatność magnetyczna; susceptywność magnetyczna. S magnetisk susceptibilitet. (121)

susceptor

1. **induction furnace susceptor lining** : → *lining 5*

suspended

1. **suspended luminaire** (*Syn.* pendant luminaire) : → *luminaire 17*
2. **suspended roof** : → *roof 6*

suspension

1. **body (of a suspension clamp)** : → *body 3*
2. **counterweight (to a suspension insulator set)** (*Syn.* suspension set weight) : → *weight 4*
3. **head-span suspension** : a portal arrangement in which the beam is replaced by an arrangement of cross-span wires. ★ suspension transversale par câble → *suspension 21.* R гибкая поперечина. D Querseilaufhängung. E suspensión transversal por cable. I portale elastico. N draadjuk. P zawieszenie poprzeczne elastyczne. S linbrygga. (811)
4. **motor suspension bearing (for nose-suspended motor)** : → *bearing 21*
5. **overhead contact line with catenary suspension** : → *line 120*
6. **overhead contact line with longitudinal suspension** (*Syn.* overhead contact line with catenary suspension) : → *line 120*
7. **pivot-type suspension clamp** : → *clamp 13*
8. **stitched catenary suspension** : a catenary suspension in which the contact wire is suspended by one or more droppers from a short continuous auxiliary wire which is attached to the main catenary at one point one each side of the main catenary support. ★ suspension en Y → *suspension 20.* R цепная подвеска с рессорной струной. D Y-Ausführung. E suspensión en Y. I sospensione a Y. N bovenleiding met Y-draad. P podwieszenie pomocnicze Y. S Y-upphängning. (811)
9. **suspension assembly** (*Syn.* suspension set) : → *set 51*
10. **suspension bracket** : → *bracket 4*
11. **suspension clamp** : → *clamp 14*
12. **suspension clamp** : → *clamp 15*
13. **suspension factor** : → *factor 171*
14. **suspension insulator** : → *insulator 36*
15. **suspension length** : → *length 32*
16. **suspension set** : → *set 51*
17. **suspension set weight** : → *weight 4*
18. **suspension straps (of a suspension clamp)** : → *strap 1*
19. **trunnion (of a pivot-type suspension clamp)** : → *trunnion 1*

sustained

1. **sustained short-circuit test** : → *test 83*

swarf

1. **swarf** (*Syn.* chip) : → *chip 1*

sway

1. **pantograph sway** : the lateral movement of the pantograph head due to the motion of the vehicle and flexing of the pantograph frame. ★ ..... → . R поперечное колебание пантографа. D Schlingern (des Scheren- oder Einholmstromabnehmers). E inclinación del pantógrafo. I spostamento laterale dell'archetto. N uitzwaai van de pantograaf. P przesuw poprzeczny ślizgacza. S strömavtagarsvaj. (811)

swaying

1. **swaying** (*Syn.* rolling) : → *rolling 1*

sweep

1. **horizontal sweep** (*Syn.* line scan) : → *scan 2*
2. **horizontal sweep frequency** (*Syn.* line frequency) : → *frequency 122*
3. **single sweep operation** : → *operation 65*
4. **sweep** : a spot displacement produced by the time base. ★ balayage → *balayage 2.* R развертка. D Zeitablenkung. E barrido. I scansione. N tijdbasis. P rozciąg. S svep. (303)
5. **sweep expansion** : → *expansion 9*
6. **sweep rate** : → *rate 87*
7. **sweep signal** : → *signal 230*
8. **synchronized sweep** : the mode of operation of a free-running time base in which the recurrent sweep is synchronized to maintain the sweep period equal to the period (or a multiple of the period) of the displayed quantity, thus producing a stable display. *Note.* — Synchronization is normally retained for small changes in the period of the observed quantity. ★ balayage (relaxé) synchronisé → *balayage 15.* R синхронизированная развертка. D synchronisierte Zeitablenkung. E barrido sincronizado. I scansione sincronizzata. N gesynchroniseerde tijdbasis. P rozciąg synchronizowany. S synkroniserat svep. (303)
9. **triggered sweep** : the mode of operation of a triggered time base in which the beginning of every sweep coincides with a pre-determined point of the displayed quantity thus producing a stable display. *Note.* — In triggered sweep modes, the internal trigger signal can be produced to correspond with any pre-determined value of the displayed quantity on either negative or positive going slopes. ★ balayage déclenché → *balayage 10.* R ждущая развертка. D getriggerte Zeitablenkung. E barrido con disparo. I scansione a comando. N getriggerde tijdbasis. P rozciąg wyzwalany. S triggat svep. (303)

SWF

1. **SWF** (*Syn.* short-wave fade-out) : → *fade-out 3*

swing

1. **arc furnace roof lift and swing aside** : → *roof 2*
2. **frequency swing** (*Syn.* peak-to-peak (frequency) deviation) : → *deviation 14*
3. **swing curve** : → *curve 39*

swinging

1. **phase swinging** : a form of hunting in which the fluctuation are periodic variations in the speed of a synchronous machine above and below the normal speed. ★ oscillations pendulaires → *oscillation 14.* R колебания фазы. D Polradpendelungen. E oscilaciones pendulares. I oscillazioni pendolari. N slingeren. P kołysania okresowe. S varvtalspendling. (411)
2. **swinging bracket** (*Syn.* dropper) : → *dropper 1*

swish

1. **swish** (*Syn.* cyclic noise) : → *noise 11*

switch

1. **adjustable thermostatic switch** : a thermostatic switch whose operating temperature may be varied by the user by adjusting the actuating mechanism, the position of which can be readily identified. ★ interrupteur thermostatique réglable → *interrupteur 23.* R выключатель термостатический с регулируемой установкой рабочей температуры. D einstellbarer Thermoschalter. E contactor termostático regulable. I interruttore termostatico regolabile. N instelbare thermostaat. P łącznik termostatowy nastawny. S inställbar termostatströmställare. (581)
2. **ambient thermostatic switch** : a thermostatic switch which responds to changes in the temperature of the space into which its sensing element penetrates or is housed. ★ interrupteur thermostatique d'ambiance → *interrupteur 22.* R выключатель термостатический пространственный. D umgebungstemperaturgesteuerter Thermoschalter. E contactor termostático de ambiente. I interruttore termostatico d'ambiente. N ruimtethermostaat. P łącznik termostatowy (wrażliwy na temperaturę otoczenia). S omgivningstemperaturstyrd termostatströmställare. (581)
3. **auxiliary switch** (of a mechanical switching device) : a switch containing one or more control and/or auxiliary contacts mechanically operated by a switching device. ★ interrupteur auxiliaire → *interrupteur 10.* R выключатель вспомогательных цепей (контактного коммутационного аппарата). D Hilfsschalter (eines mechanischen Schaltgerätes). E interruptor auxiliar (de un aparato mecánico de conexión). I interruttore ausiliario (di un apparecchio meccanico di manovra). N hulpschakelaar (van een mechanische schakelaar). P łącznik pomocniczy (łącznika mechanizmowego). S hjälpkontaktblock. (441)
4. **basic switch connection** : → *connection 6*
5. **change-over switch** (*Syn.* selector switch) : a device for changing the connections of one or more electric circuits. ★ commutateur → *commutateur 3.* R переключатель. D Umschalter; Wahlschalter. E conmutador. I commutatore. N omschakelaar. P przełącznik. S omkopplare. (151)

6. **control discrepancy switch** : a discrepancy switch incorporating a control function. ★ commutateur de commande à discordance → *commutateur 16.* R ключ управления с указателем несоответствия. D Steuerquittierschalter. E conmutador de control de discordancia. I commutatore di comando a discordanza. N stuurkwiteerschakelaar. P sterownik. S manöverställare. (605)
7. **control switch** (for control and auxiliary circuits) : a mechanical switching device which serves the purpose of controlling the operation of switchgear or controlgear, including signalling, electrical interlocking, etc. *Note.* — A control switch consists of one or more contact elements with a common actuating system. ★ auxiliaire de commande → *auxiliaire 2.* R выключатель цепей управления (и вспомогательных цепей). D Hilfsstromschalter. E auxiliar de mando (para circuitos auxiliares de mando). I interruttore di comando (per circuiti di comando e ausiliari). N stuurstroomschakelaar. P łącznik pomocniczy. S manöverkopplare. (441)
8. **cradle switch** (*Syn.* switch hook) : → *hook 2*
9. **crossbar switch** : a switch composed of a matrix of electromechanically operated mechanical crosspoints having separate activation means common to crosspoints in each row and each column. ★ commutateur crossbar → *commutateur 13.* R координатный соединитель. D Koordinaten-Koppler. E conmutador de barras cruzadas; conmutador "crossbar". I multiselettore crossbar; multiselettore a barre incrociate. N ..... P łącznik krzyżowy. S koordinatväljare. (714)
10. **cycle of operation of a thermal time-delay switch** : → *cycle 7*
11. **disconnecting switch reverser** : → *reverser 1*
12. **discrepancy switch** : a switched indicator, with an acknowledgement facility, which shows any discrepancy between the actual and indicated state of the equipment being monitored. ★ commutateur à discordance → *commutateur 11.* R указатель несоответствия. D Quittierschalter. E conmutador indicador de discordancia. I commutatore a discordanza. N kwiteerschakelaar. P wskaźnik położenia. S lägesvisare. (605)
13. **diverter switch** : a switching device used in conjunction with a tap selector to carry, make and break currents in circuits which have already been selected. ★ commutateur → *commutateur 4.* R контактор. D Lastumschalter. E conmutador. I interruttore di commutazione. N lastomschakelaar. P przełącznik obciążenia. S lastkopplare. (421)
14. **divided support earthing switch** : an earthing switch in which the fixed and moving contacts of each pole are not supported by a common base or frame. *Notes. 1* — A typical example is the pantograph or semi-pantograph disconnector. *2* — This term applies to high-voltage disconnectors only. ★ sectionneur de terre à éléments séparés → *sectionneur 13.* R заземлитель с разделенными опорами. D Erdungsschalter. E seccionador de tierra de elementos separados. I sezionatore di terra a elementi separati. N aarder zonder gemeenschappelijke grondplaat. P uziemnik o rozdzielonej podstawie. S enpelarjordningskopplare. (441)
15. **earthing switch** : a mechanical switching device for earthing parts of a circuit, capable of withstanding for a specified time currents under abnormal conditions such as those of short circuit, but not required to carry current under normal conditions of the circuit. *Note.* — An earthing switch may have a short-circuit making capacity. ★ sectionneur de terre → *sectionneur 12.* R заземлитель. D Erdungsschalter. E seccionador de puesta a tierra; seccionador de tierra. I sezionatore di terra. N aarder. P uziemnik. S jordningskopplare. (441)
16. **earthing switch** : in a substation, a special disconnector which is intended to connect phase conductors to earth for safety purposes. ★ sectionneur de mise à la terre → *sectionneur 10.* R заземляющий разъединитель. D Erdungsschalter. E seccionador de puesta a tierra. I sezionatore di (messa a) terra. N aarder. P uziemnik. S jordningskopplare. (605)
17. **electronic a.c. (power) switch** : an electronic power switch capable of switching a.c. ★ contacteur électronique à courant alternatif → *contacteur 14.* R электронный (силовой) коммутационный аппарат переменного тока. D (leistungs)elektronischer Wechselstromschalter. E contactor electrónico (de potencia) de corriente alterna. I contattore elettronico (di potenza) a corrente alternata. N elektronische wisselstroom (vermogen)schakelaar. P łącznik mocy elektroniczny przemiennoprądowy. S elektronisk vs-elkopplare. (551)
18. **electronic d.c. (power) switch** : an electronic power switch capable of switching d.c. ★ contacteur électronique (de puissance) à courant continu → *contacteur 16.* R электронный (силовой) коммутационный аппарат постоянного тока. D (leistungs)elektronischer Gleichstromschalter. E contactor electrónico (de potencia) de corriente continua. I contattore elettronico (di potenza) a corrente continua. N elektronische gelijkstroom (vermogen)-schakelaar. P łącznik mocy elektroniczny stałoprądowy. S elektronisk ls-elkopplare. (551)
19. **electronic (power) switch** : an operative unit for electronic power switching comprising at least one controllable electronic valve device. ★ contacteur électronique (de puissance) → *contacteur 15.* R электронный (силовой) коммутационный аппарат. D (leistungs)elektronischer Schalter. E contactor electrónico (de potencia). I contattore elettronico (di potenza). N elektronische (vermogen)schakelaar. P łącznik mocy elektroniczny. S elektronisk elkopplare. (551)
20. **foot switch** : a control switch having an actuator intended to be operated by foot. ★ interrupteur à pédale → *interrupteur 7.* R педальный выключатель. D Fussschalter. E interruptor de pedal. I interruttore a pedale. N voetschakelaar. P łącznik nożny. S trampkontakt. (441)
21. **gas evolving switch** : a switch in which the gas is evolved and moved by the thermal action of the arc. ★ interrupteur à autoformation de gaz → *interrupteur 3.* R автогазовый выключатель нагрузки. D Hartgaslastschalter. E interruptor con formación de gas. I interruttore di manovra autosoffiante. N hardgaslastschakelaar. P rozłącznik gazowydmuchowy. S lastbrytare med gasavgivande släckmaterial. (441)
22. **gravity switch** (*Syn.* switch hook) : → *hook 2*
23. **limit switch** : an electromechanical device preventing operation of the tap-changer beyond an end position but allowing operation towards the opposite direction. ★ interrupteur de fin de course → *interrupteur 11.* R конечный выключатель. D Endschalter. E indicador final de carrera. I interruttore di fine corsa. N eindschakelaar. P ograniczniki ruchu elektromechaniczne. S ändlägebrytare. (421)
24. **limit switch** : a position switch having positive opening operation. ★ interrupteur de fin de course → *fin de course 4.* R концевой выключатель. D Positionsschalter mit Sicherheitsfunktion. E interruptor de final de carrera. I interruttore di fine corsa. N eindschakelaar. P łącznik krańcowy. S gränslägeskopplare. (441)
25. **(mechanical) switch** : a mechanical switching device capable of making, carrying andbreaking currents under normal circuit conditions which may include specified operating overload conditions and also carrying for a specified time currents under specified abnormal circuit conditions such as those of short circuit. *Note.* — A switch may be capable of making but not breaking short-circuit currents. ★ interrupteur (mécanique) → *interrupteur 16.* R выключатель нагрузки (контактный). D Lastschalter. E interruptor (mecánico). I interruttore di manovra (meccanico). N lastschakelaar. P rozłącznik mechanizmowy. S lastbrytare. (441)
26. **mechanical system of a push-button switch** : → *mechanical system 10*
27. **multi-cell switch** : a frame assembly containing two or more basic cells, each of which may have any mechanical systems. Frames may be stacked in both a horizontal or vertical sense. Interaction will be mechanical and/or electromagnetic. *Note :* this term applies to grouped cells. The same switch may comprise several distinct groups of interdependent basic cells. The above definition is valid only within the same group. ★ interrupteur multi-élément → *interrupteur 17.* R переключатель многомодульный. D Mehreinheiten-Schalter. E interruptor multicélula. I interruttore multi-cella. N meervoudige schakelaar. P łącznik segmentowy. S flersektionsströmställare. (581)
28. **non-adjustable thermostatic switch** : a thermostatic switch whose operating temperature is determined by a permanent setting carried out by the manufacturer. ★ interrupteur thermostatique à réglage fixe → *interrupteur 21.* R выключатель термостатический с нерегулируемой установкой температуры срабатывания. D fest eingestellter Thermoschalter. E contactor termostático de regulación fija.

I interruttore termostatico a regolazione fissa. N niet-instelbare thermostaat. P łącznik termostatowy nienastawny. S termostatströmställare för fast temperatur. (581)

29. **operation of a push-button switch** : → *operation 44*

30. **pilot switch** : a non-manual control with actuated in response to specified conditions of an actuating quantity. *Note.* — The actuating quantity may be pressure, temperature, velocity, liquid level, elapsed time, etc. ★ auxiliaire automatique de commande → *auxiliaire 1.* R автоматический выключатель цепей управления. D Hilfsstromschalter als Begrenzer, Regler, Wächter. E auxiliar automático de mando. I interruttore automatico di comando. N volgschakelaar. P łącznik czujnikowy. S vakt. (441)

31. **position of a push-button switch** : → *position 22*

32. **position of a rotary switch** : → *position 23*

33. **position of a toggle switch** : → *position 24*

34. **position switch** : a pilot switch the actuating system of which is operated by a moving part of a machine, when this part reaches a predetermined position. ★ interrupteur de position → *interrupteur 13.* R позиционный выключатель. D Positionsschalter. E interruptor de posición. I interruttore di posizione. N standschakelaar. P łącznik drogowy (sterowniczy). S lägeskopplare. (441)

35. **power/brake changeover switch** : a switchgroup for altering the connections of power circuits when changing from motoring to electric braking and vice versa. ★ commutateur traction-freinage → *commutateur 37.* R переключатель режимов тяги и торможения. D Fahr-Bremsumschalter. E conmutador tracción-frenado. I combinatore marcia-frenatura. N rijremgroeperingsschakelaars. P przestawnik trakcja-hamowanie. S fart-bromsomkopplare. (811)

36. **pressure switch** : a switch in which the contacts are operated at a predetermined liquid or gas pressure. ★ manostat → *manostat 1.* R выключатель давления. D Druckschalter. E interruptor de presión. I pressostato. N drukschakelaar. P łącznik ciśnieniowy. S tryckvakt. (811)

37. **proximity switch** : a position switch which is operated without mechanical contact with the moving part. ★ interrupteur de proximité → *interrupteur 14.* R сенсорный выключатель. D Näherungsschalter. E interruptor de proximidad. I interruttore di prossimità. N naderingsschakelaar. P łącznik zbliżeniowy. S beröringsfri lägeskopplare. (441)

38. **relay switch** : a switch with a matrix of electrically operated mechanical crosspoints having activation means individual to each crosspoint. ★ commutateur tout-à-relais → *commutateur 36.* R релейный коммутатор. D Relais-Koppler. E conmutador de relés. I multiselettore a relè; matrice. N ..... P łącznik przekaźnikowy. S relävåljare. (714)

39. **reversing switch** : a device for changing the direction of a current in part of an electric circuit. ★ inverseur → *inverseur 1.* R реверсирующее устройство. D Umkehrschalter. E inversor. I invertitore. N omkeerschakelaar. P łącznik inwersyjny. S omkastare. (151)

40. **rotary (control) switch** : a control switch having an actuator intended to be operated by rotation. ★ commutateur rotatif (de commande) → *commutateur 26.* R поворотный выключатель (цепей управления). D Drehschalter. E conmutador rotativo (de mando). I commutatore rotativo (di comando). N draai(hulp)schakelaar. P przełącznik pokrętny (sterowniczy). S vridkopplare. (441)

41. **selector switch** (*Syn.* change-over switch) : → *switch 5*

42. **selector switch** : a switching device capable of making, carrying and breaking current, combining the duties of a tap selector and a diverter switch. ★ sélecteur en charge → *sélecteur 15.* R переключатель нагрузки. D Lastwähler. E selector en carga. I seleruttore. N lastschakelaartrappenkiezer. P wybierak zaczepów podobciążeniowy. S brytväljare. (421)

43. **selector with disconnector** : → *disconnector 9*

44. **sensitive switch** : a switch having a snap-action, micro-gap, mechanism which is operated directly by a defined force through a defined travel. The resulting indirect contacting action may be such that the speed of the contacting is independent of the speed of the actuation. ★ interrupteur sensible → *interrupteur 18.* R микропереключатель. D Schnappschalter. E interruptor sensible. I interruttore sensibile. N microschakelaar. P łącznik czuły. S mikroströmställare. (581)

45. **switch** : a component fitted with an actuator and contacts to make and break a connection. ★ interrupteur → *interrupteur 2.* R переключатель. D Schalter. E interruptor. I interruttore. N schakelaar. P łącznik. S strömställare. (151,581)

46. **switch** (in a switching network) : an assembly of crosspoints consisting of a plurality of inlets and a plurality of outlets, in which a number of independent paths may be established. *Note.* — In French and Spanish the corresponding terms "commutateur" and "conmutador" are also used with the meaning of exchange. ★ commutateur → *commutateur 6.* R коммутатор (в коммутационном поле). D Koppler; Koppelvielfach. E conmutador (en una red de conmutación). I organo di selezione. N schakelaar. P łącznik (w sieci komutacyjnej). S väljare. (714)

47. **switch arm** : → *arm 16*

48. **switch (circuit)** (*Syn.* circuit switching exchange) : → *exchange 2*

49. **switch connection** : → *connection 57*

50. **switch hook** : → *hook 2*

51. **switch (message)** (*Syn.* message switching exchange) : → *exchange 14*

52. **system changeover switch** : a switchgroup for altering the connections of the power circuits and auxiliary circuits when the type of power supply to a motor vehicle changes. ★ commutateur de régime → *commutateur 21.* R переключатель для двух систем питания. D Betriebsartumschalter; Stromartumschalter. E conmutador de régimen. I combinatore d'alimentazione. N groeperingsschakelaars. P przełącznik pojazdowy systemu zasilania. S systemomkopplare. (811)

53. **temperature compensated thermal time-delay switch** : a thermal time-delay switch in which the time-delay is substantially independent of changes in ambient temperature. ★ interrupteur à retard thermique compensé en température → *interrupteur 9.* R термовыключатель с задержкой времени с температурной компенсацией. D umgebungstemperaturunabhängiger temperaturgesteuerter Zeitschalter. E interruptor con retardo térmico de temperatura compensada. I interruttore a ritardo termico compensato. N thermische tijdschakelaar met temperatuurcompensatie. P łącznik zwłoczny cieplny kompensowany. S temperaturkompenserad termisk tidsfördröjningsströmställare. (581)

54. **thermal time-delay switch** : a switch whose contacts control a load circuit and are delayed from operating for a predetermined time interval. Operation of the contacts is by the effect of heat generated by the flow of current through a heater. ★ interrupteur à retard thermique → *interrupteur 8.* R термовыключатель с задержкой времени. D temperaturgesteuerter Zeitschalter. E interruptor con retardo térmico. I interruttore a ritardo termico. N thermische tijdschakelaar. P łącznik zwłoczny cieplny. S termisk tidsfördröjningsströmställare. (581)

55. **thermostatic switch** : a switch whose function is controlled by variations of temperature and whose contacts make or break automatically a load circuit when the temperature of the ambient space in which its sensing element is placed or the temperature of the surface on which it is fixed reaches a predeterminated value. ★ interrupteur thermostatique → *interrupteur 20.* R выключатель термостатический. D Thermoschalter. E contactor termostático. I interruttore termostatico. N thermostaat. P łącznik termostatowy. S termostatströmställare. (581)

56. **to switch** (for an electrical relay) (see Figure 446-1) : to complete the designated function in a given output circuit. ★ commuter → *commuter 1.* R завершать срабатывание (для электрического реле). D ansprechen. E conmutar (para un relé eléctrico). I commutare. N schakelen. P przełączyć do stanu pracy. S slå till. (446)

57. **toggle switch** : a switch having a lever (toggle), the movement of which results either directly or indirectly in the connection or disconnection of the switch terminations in a specified manner. Any indirect action through an actuating mechanism shall be such that the speed of connection and/or disconnection is independent of the speed of lever movement. ★ interrupteur à levier → *interrupteur 6.* R переключатель типа «тумблер». D Kipphebelschalter. E contactor de palanca. I interruttore a levetta. N tuimelschakelaar. P łącznik dźwigniowy migowy. S vippströmställare. (581)

58. **T-R switch** (*Syn.* transmit-receive switch; radar duplexer) : a device comprising one or more T-B cells or T-R cells for automatically connecting a common antenna to the transmitter during the transmitting period and to the receiver during the receiving period no matter what the transmitter impedance may be, the receiver also being protected from the high power of the transmitter. ★ duplexeur automatique → *duplexeur 2.* R T-R-переключатель; антенный переключатель; радиолокационный дуплексер. D T-R-Schalter; Sende-Empfangsschalter. E conmutador T-R; duplexor de radar. I duplicatore automatico. N zend/ontvangschakelaar. P przełącznik NO. S SM-växlare. (726)
59. **traction motor isolating switch** : a switchgroup to isolate one or more traction motors while allowing the vehicle to operate in service in traction or braking with the other motors remaining in circuit. ★ interrupteur d'isolement de moteur de traction → *interrupteur 15.* R разъединитель тяговых двигателей. D Fahrmotoren-Trennschalter. E interruptor de aislamiento de motor de tracción. I escluditore (dei motori). N tractiemotorscheider. P przełącznik separacyjny silników. S motorfrånskiljare. (811)
60. **transmit-receive switch** (*Syn.* T-R switch) : → *switch 58*
61. **unit switch equipment** (*Syn.* individual contactor equipment) : → *equipment 44*
62. **variable thermal time-delay switch** : a thermal time-delay switch in which the time delay is variable within predetermined intervals. ★ interrupteur temporisé à retard thermique variable → *interrupteur 19.* R термовыключатель с задержкой времени регулируемый. D einstellbarer temperaturgesteuerter Zeitschalter. E interruptor temporizado con retardo térmico variable. I interruttore temporizzato a ritardo termico. N instelbare thermische tijdschakelaar. P łącznik cieplny o zmiennej zwłoce. S variabel termisk tidsfördröjningsströmställare. (581)
63. **waveguide switch** : a device in a waveguide system for stopping or diverting electromagnetic waves as desired. ★ commutateur → *commutateur 8.* R волноводный переключатель. D Hohlleiterschalter. E conmutador (de guíaonda). I commutatore (di guida d'onda). N golfgeleiderschakelaar. P przełącznik falowodowy. S vågledaromkopplare. (726)

switchable

1. **switchable busbar** : → *busbar 15*

switchboard

1. **auxiliary switchboard** : a panel (or a cubicle) on which are fixed the devices necessary to control, to protect and to distribute auxiliary a.c. and d.c. supplies within a substation. ★ tableau de distribution des services auxiliaires → *tableau 2.* R распределительный щит собственных нужд. D Eigenbedarfsverteilung. E cuadro de servicios auxiliares. I quadro dei servizi ausiliari. N ..... P rozdzielnia potrzeb własnych. S kontrolltavla för lokalkraft. (605)
2. **cordless switchboard** : a switchboard at which interconnection is effected by manually operated keys instead of cords, plugs and jacks. ★ meuble manuel sans cordon → *meuble 3.* R бесшнуровое ручное оборудование. D schnurlose Abfrageeinrichtung; schnurlose Handbedienung. E cuadro manual sin cordón. I tavolo a chiavi. N ..... P łącznica bezsznurowa. S snörlöst växelbord. (714)
3. **switchboard** : part of a manual or manually supervised exchange at which the interconnection of circuits is manually controlled. ★ meuble manuel → *meuble 1.* R ручное оборудование (коммутации). D Abfrageeinrichtung; Vermittlungspult. E cuadro (de conexión) manual; consola manual (de conmutación). I tavolo di commutazione manuale. N ..... P łącznica ręczna. S växelbord. (714)
4. **switchboard position** : → *position 34*

switch-disconnector

1. **switch-disconnector** : a switch which, in the open position, satisfies the isolating requirements specified for a disconnector. ★ interrupteur-sectionneur → *interrupteur-sectionneur 1.* R выключатель нагрузки-разъединитель. D Lasttrennschalter. E interruptor seccionador. I interruttore di manovra-sezionatore. N lastscheider. P rozłącznik izolacyjny. S lastfrånskiljare. (441)

switch-disconnector-fuse

1. **switch-disconnector-fuse** : a switch-disconnector in which one or more poles have a fuse in series in a composite unit. ★ interrupteur-sectionneur à fusibles → *interrupteur-sectionneur 2.* R выключатель нагрузки-разъединитель-предохранитель. D Lasttrennschalter mit Sicherungen. E interruptor-seccionador con fusibles. I interruttore di manovra-sezionatore combinato con fusibile. N lastscheider met aangebouwde smeltveiligheden. P rozłącznik izolacyjny z bezpiecznikami. S lastfrånskiljare med säkringar. (441)

switched

1. **circuit switched connection** : → *connection 12*
2. **circuit switched network** : → *network 13*
3. **packet switched network** : → *network 64*
4. **(public) switched (telephone) network** : → *network 76*
5. **store and forward switched network** (*Syn.* message switching network) : → *network 41*
6. **switched busbar circuit-breaker** : → *circuit-breaker 19*
7. **switched current** : → *current 205*
8. **switched network** : → *network 93*

switched-star

1. **switched-star network** (*Syn.* switched-star system) : → *system 209*
2. **switched-star system** : → *system 209*

switch-fuse

1. **switch-fuse** : a switch in which one or more poles have a fuse in series in a composite unit. ★ interrupteur à fusibles → *interrupteur 5.* R выключатель нагрузки-предохранитель. D Lastschalter mit Sicherungen. E interruptor con fusibles. I interruttore di manovra oppure combinato con fusibile. N lastschakelaar met aangebouwde smeltveiligheden. P rozłącznik z bezpiecznikami. S lastbrytare med säkringar. (441)

switchgear

1. **gas-insulated metal-enclosed switchgear** : metal-enclosed switchgear in which the insulation is obtained, at least partly, by an insulating gas other than air at atmospheric pressure. *Note.* — This term generally applies to hig-voltage switchgear and controlgear. ★ appareillage sous enveloppe métallique à isolation gazeuse → *appareillage 9.* R коммутационная аппаратура и аппаратнра управления в металлической оболочке с газовой изоляцией. D gasisolierte, metallgekapselte Schaltanlage. E aparamenta bajo envolvente metálica con aislamiento gaseoso. I apparecchiatura in involucro metallico con isolamento in gas. N metaalomsloten met gas geïsoleerde schakelinstallatie. P rozdzielnica z izolacją gazową. S gasisolerat ställverk. (441)
2. **indoor switchgear and controlgear** : switchgear and controlgear designed solely for installation within a building or other housing, where the switchgear and controlgear is protected against wind, rain, snow, abnormal dirt deposits, abnormal condensation, ice and hoar frost. ★ appareillage pour l'intérieur → *appareillage 6.* R коммутационная аппаратура и аппаратура управления внутренней установки. D Innen(raum)-Schaltanlagen und/oder-Schaltgeräte. E aparamenta para interior. I apparecchiatura per interno. N schakelmaterieel voor binnenopstelling. P aparatura wnętrzowa. S inomhusställverk. (441)
3. **insulation-enclosed switchgear and controlgear** : switchgear and controlgear assemblies with an external insulation enclosure and complete except for external connections. *Note.* — This term generally applies to high-voltage switchgear and controlgear. ★ appareillage sous enveloppe isolante → *appareillage 7.* R коммутационная аппатура и аппаратура управления в изоляционной оболочке. D isolierstoffgekapselte Schaltanlagen. E aparamenta bajo envolvente aislante. I apparecchiatura in involucro isolante. N kunststofomsloten schakelmaterieel. P rozdzielnica i sterownica w osłonie izolacyjnej. S isolerkapslat ställverk. (441)
4. **metal-enclosed switchgear and controlgear** : switchgear and controlgear assemblies with an external metal enclosure intended to be earthed, and complete except for external connections. *Note.* — This term generally applies to high-voltage switchgear and controlgear. ★ appareillage sous enveloppe

métallique → *appareillage 8.* R коммутационная аппаратура и аппаратура управления в металлической оболчке. D metallgekapselte Schaltanlagen. E aparamenta bajo envolvente metálica. I apparecchiatura in involucro metallico. N metaalomsloten schakelmaterieel. P rozdzielnica i sterownica w osłonie metalowej. S metallkapslat ställverk. (441)

5. **outdoor switchgear and controlgear** : switchgear and controlgear suitable for installation in the open air, i.e. capable of withstanding wind, rain, snow, dirt deposits, condensation, ice and hoar frost. ★ appareillage pour l'extérieur → *appareillage 5.* R коммутационная аппаратура и аппаратура управления напужной установки. D Freiluft-Schaltanlagen und/oder-Schaltgeräte. E aparamenta para exterior. I apparecchiatura per esterno. N schakelmaterieel voor buitenopstelling. P aparatura napowietrzna. S utomhusställverk. (441)
6. **switchgear** : a general term covering switching devices and their combination with associated control, measuring, protective and regulating equipment, also assemblies of such devices and equipment with associated interconnections, accessories, enclosures and supporting structures, intended in principe for use in connection with generation, transmission, distribution and conversion of electric energy. ★ appareillage de connexion → *appareillage 4.* R коммутационная аппаратура. D Schaltanlagen und/oder Schaltgeräte für Energieverteilung. E aparamenta de conexión. I apparecchiatura di manovra (o accoppiamento). N schakelmaterieel voor verdeling. P aparatura rozdzielcza. S ..... (441)
7. **switchgear and controlgear** : a general term covering schwitching devices and their combination with associated control, measuring, protective and regulating equipment, also assemblies of such devices and equipment with associated interconnections, accessories, enclosures and supporting structures. ★ appareillage → *appareillage 1.* R коммутационная аппаратура и аппаратура управления. D Schaltanlagen und/oder Schaltgeräte. E aparamenta. I apparecchiatura. N schakelmaterieel. P aparatura. S kopplingsutrustning; elkopplare. (441)
8. **switchgear and controlgear** : equipment provided to be connected to an electrical circuit for the purpose of carrying out one or more of the following functions: protection, control, isolation, switching. *Note.* — The French and English terms can be considered as equivalent in most cases. However the French term has a broader meaning than the English term and includes for example connecting devices, plugs and socket-outlets etc. In English, these latter devices are known as accessories. ★ appareillage → *appareillage 2.* R аппаратура защиты и управления. D Schalt- und Steuergeräte. E aparamenta. I apparecchiatura. N schakel-, beveiligings- en besturingsmaterieel. P rozdzielnice i aparatura rozdzielcza. S ..... (826)

switchgroup

1. **control switchgroup** : a switchgroup effecting various connections in the control circuit. ★ combinateur de commande → *combinateur 6.* R групповой переключатель управления. D Steuerschalter. E combinador de control. I combinatore di comando. N stuurstroomschakelaars. P przełącznik obwodu sterowniczego. S manöverapparatutrustning. (811)
2. **field-weakening switchgroup** : a power switchgroup used to reduce traction motor excitation. ★ shunteur → *shunteur 1.* R переключатель ослабления поля. D Feldschwächungsschalter. E shuntador. I combinatore d'indebolimento campo. N veldverzwakkingsschakelaars. P przełącznik osłabienia wzbudzenia. S fältförsvagningsomkopplare. (811)
3. **interlocking switchgroup** : a control switchgroup mechanically connected to a power switchgroup for interlocking purposes. ★ combinateur d'asservissement → *combinateur 5.* R блокировочный групповой переключатель. D Verriegelungsschaltwerk. E combinador enclavamiento. I combinatore ausiliario (di blocco). N mechanisch vergrendelde schakelaars. P nastawnik pomocniczy blokujący. S förreglingsdon. (811)
4. **manual switchgroup** : a switchgroup operated by hand or foot, either directly or by shafting. ★ combinateur manuel → *combinateur 9.* R ручной групповой переключатель. D handbetätigter Schaltwerksantrieb. E combinador manual. I combinatore manuale. N handschakelaars. P nastawnik pojazdowy ręczny. S handmanövrerad apparatutrustning. (811)
5. **motor-driven switchgroup** : a switchgroup operated by a motor, which may be pneumatic, electro-pneumatic, hydraulic, electro-magnetic or electric. ★ combinateur à moteur → *combinateur 3.* R групповой переключатель с сервоприводом. D motorisch betätigter Schaltwerksantrieb. E combinador de motor. I combinatore a comando indiretto. N servo-bediende schakelaarbatterij. P nastawnik o napędzie silnikowym. S motormanövrerad apparatutrustning. (811)
6. **power switchgroup** : a switchgroup effecting various connections in the power circuit. ★ combinateur de puissance → *combinateur 7.* R силовой групповой переключатель. D Leistungsschalterkombination. E combinador de potencia. I combinatore di potenza. N vermogenschakelbatterij. P przełącznik obwodu trakcyjnego. S huvudapparatutrustning. (811)
7. **resistance switchgroup** : a switchgroup for cutting out starting resistance. ★ éliminateur → *éliminateur 1.* R реостатный контроллер. D Widerstands-Stufenschaltwerk. E eliminador. I combinatore d'avviamento. N aanzet(rij)weerstandschakelaarbatterij. P przełącznik rezystorów. S motståndsomkopplare. (811)
8. **switchgroup** : equipment used to make various connections. ★ combinateur → *combinateur 1.* R групповой переключатель. D Schalterkombination. E combinador. I combinatore. N schakelbatterij. P przełącznik grupowy; nastawnik. S apparatutrustning. (811)
9. **transition switchgroup** : a power switchgroup used to change the motor combination, e.g. from series to parallel. ★ combinateur de transition → *combinateur 8.* R переходной переключатель. D Übergangsschalter. E combinador de transición. I combinatore di transizione. N motorgroeperingsschakelaars. P przełącznik układu silników. S överkopplingsutrustning. (811)

switching

1. **analogue switching** : switching applied to analogue signals. ★ commutation analogique → *commutation 16.* R аналоговая коммутация. D analoge Vermittlung (-Durchschaltung). E conmutación analógica. I commutazione analogica. N analoog schakelen. P komutacja analogowa. S analog koppling. (714)
2. **antenna switching matrix** : → *matrix 2*
3. **automatic switching** : an operating method in which a *connection* can be established without operators. *Note.* — In automatic switching, the detection of call attempts, address reception, routing and the necessary switching operations required to establish, supervise and release connections are performed automatically. ★ commutation automatique → *commutation 17.* R автоматическая коммутация. D waehlvermitteln (-Vermittlung); automatische Vermittlung. E conmutación automática. I commutazione automatica. N automatisch schakelen. P komutacja automatyczna. S automatisk koppling. (714)
4. **automatic switching control equipment** : → *equipment 9*
5. **automatic switching off** : the property of an equipment having a forced characteristic such that the equipment is switched off automatically. ★ déclenchement automatique → *déclenchement 7.* R автоматическое выключение. D selbsttätige Ausschaltung. E desconexión automática. I disinserzione automatico. N automatische uitschakeling. P wyłączanie samoczynne. S frånslagsautomatik. (551)
6. **automatic switching on** : the property of an equipment having a forced characteristic such that the equipment is switched on automatically. ★ enclenchement automatique → *enclenchement 4.* R автоматическое включение. D selbsttätige Einschaltung. E conexión automática. I inserzione automatico. N automatische inschakeling. P włączanie samoczynne. S tillslagsautomatik. (551)
7. **auxiliary switching unit** : → *unit 7*
8. **change-over switching** : the transfer of connections from one set of conductors to another. ★ commutation → *commutation 10.* R переключение. D Umschalten. E conmutación. I commutazione. N omschakeling. P komutacja; przełączanie. S omkoppling. (151)
9. **character switching** : the temporary connection of two or more terminals upon request using a process of storing and transferring character by character from one line to another. ★ commutation de caractères → *commutation 20.* R коммутация знаков. D Zeichenvermittlung. E conmutación

de caracteres. I commutazione di caratteri. N ..... P komutacja znaków. S teckenförmedling. (721)

10. **circuit switching** : switching, consisting of the interconnection of terminals, transmission channels or telecommunication circuits to provide a connection for exclusive use of the users for the duration of a call or service. ★ commutation de circuits → *commutation 21.* R коммутация каналов. D Durchschaltevermittlung; Leitungsvermittlung; Leitungsvermitteln. E conmutación de circuitos. I commutazione di circuito. N circuitschakelen. P komutacja łączy. S kretskoppling. (714,715,721)
11. **circuit switching exchange** : → *exchange 2*
12. **circuit switching unit** : → *unit 13*
13. **coil switching link** : → *link 4*
14. **compound switching** : switching, using a combination of two or more of the techniques of space, time or frequency division switching. ★ commutation mixte → *commutation 29.* R смешанная коммутация. D Hybridvermittlung; vermitteln mit verschiedenen Verfahren. E conmutación mixta. I commutazione con tecnica mista. N hybridisch schakelen. P komutacja mieszana. S sammansatt koppling. (714)
15. **cyclic on/off switching control** : → *control 87*
16. **data switching exchange** : → *exchange 4*
17. **digital switching** : a switching process applied to digital signals in which connections are established by operations on the digital signals, without converting them to analogue signals. ★ commutation numérique → *commutation 31.* R цифровая коммутация. D digitale Vermittlung (-durchschaltung). E conmutación digital. I commutazione numerica. N digitaal schakelen. P komutacja cyfrowa. S digital koppling. (714)
18. **digital switching delay** : → *delay 17*
19. **(electronic)(power) switching** : switching an electric power circuit by means of electronic valve devices. ★ ouverture et fermeture (électronique) d'un circuit (de puissance) → *ouverture 20.* R (электронное) переключение в силовой цепи. D (leistungs)elektronisches Schalten. E maniobra (electrónica) (de un circuito de potencia). I apertura e chiusura (elettronica) di un circuito (di potenza). N elektronisch schakelen (van vermogen). P łączenie elektroniczne (mocy). S elktronisk omkoppling. (551)
20. **emergency switching** : an operation intended to remove as quickly as possible danger which may have occurred unexpectedly. ★ coupure d'urgence → *coupure 12.* R аварийное отключение. D Not-Ausschaltung. E desconexión de emergencia. I interruzione d'emergenza. N schakelen in geval van nood; nooduitschakeling. P łączenie zapobiegające zagrożeniu. S nödbrytning. (826)
21. **forward switching signal** : → *signal 93*
22. **four-wire switching** : switching using a separate transmission path, frequency band or time interval for each direction of transmission. ★ commutation à quatre fils → *commutation 15.* R четырехпроводная коммутация. D Vierdrahtvermittlung; Vierdrahtdurchschaltung. E conmutación a cuatro hilos. I commutazione a quattro fili. N vierdraads schakelen. P komutacja dwutorowa. S fyrtrådskoppling. (714)
23. **frequency division switching** : switching, acting on frequency division multiplexed signals by transferring information from one frequency band to another. ★ commutation en fréquence → *commutation 25.* R частотная коммутация. D Frequenzvielfachvermittlung. E conmutación en frecuencia. I commutazione a divisione di frequenza. N frequentieverdeeld schakelen. P komutacja częstotliwościowa. S frekvensdelningskoppling. (714)
24. **functional switching** : an operation intended to switch "on" or "off" or vary the sup ply of electrical energy to all or part of an installation for normal operating purposes. ★ commande fonctionnelle → *commande 74.* R коммутация. D betriebsmäßiges Schalten. E maniobra funcional. I comando funzionale. N schakelen ten behoeve van bediening; bedieningsschakeling. P łączenie operacyjne. S funktionsmanövrering. (826)
25. **link connected switching stage** : → *stage 2*
26. **local switching centre** : → *centre 13*
27. **local switching entity** : → *entity 2*
28. **local switching exchange** (*Syn.* serving connection exchange) : → *exchange 23*
29. **local (switching) exchange** (*Syn.* local switching centre) : → *centre 13*
30. **main switching contacts** : → *contact 81*
31. **manual switching** : an operating method in which a connection is established with the aid of one or more operators. *Note.* — The operators detect and receive call attempts and perform necessary switching operations to complete, supervise and release connections. ★ commutation manuelle → *commutation 28.* R ручная коммутация. D Handvermittlung; handvermitteln. E conmutación manual. I commutazione manuale. N handverkeer; handbediening. P komutacja ręczna. S manuell koppling. (714)
32. **message switching** : the process of routing complete messages within a telecommunication network by receiving, storing if necessary and forwarding the messages. ★ commutation de messages → *commutation 22.* R коммутация сообщений. D Nachrichtenvermittlung. E conmutación de mensajes. I commutazione di messaggio. N berichtschakelen. P komutacja wiadomości. S meddelandeförmedling. (714,715,721)
33. **message switching exchange** : → *exchange 14*
34. **message switching network** : → *network 41*
35. **network switching** (*Syn.* programme switching centre) : → *centre 17*
36. **packet switching** : the process of routing messages in a telecommunication network, where the messages are first cut into addressed packets ; in certain nodes of the network, these packets are received, stored and forwarded onto the appropriate transmission channels ; at the receiving end, the message is reconstituted from the received packets. *Note.* — A packet occupies a channel only for its duration of transmission ; at other times the channel is available for the transmission of other packets belonging to the same message or to other messages. ★ commutation de paquets → *commutation 23.* R коммутация пакетов. D paketvermitteln; Paketvermittlung. E conmutación de paquetes. I commutazione di pacchetto. N pakketschakelen. P komutacja pakietów. S paketförmedling. (714,715,721)
37. **programme switching centre** : → *centre 17*
38. **protection ratio against switching impulses** : → *ratio 72*
39. **reperforator switching** : a tape relay system in which the tape from a reperforator feeds directly into a permanently associated automatic transmitter which can be switched to an outgoing channel. *Note.* — This switching may be manual, automatic or semi-automatic. ★ commutation avec retransmission par bande perforée → *commutation 18.* R реперфораторный переприем с кодовой коммутацией. D Lochstreifenvermittlung. E conmutación con retrasmisión por cinta perforada. I commutazione a banda perforata. N ..... P retransmisja dziurawkowa. S reperforatorförmedling. (721)
40. **return switching signal** : → *signal 161*
41. **semi-automatic switching** : an operating method in which the establishment of a complete connection requires at least one operator, but where part of the connection is set up by automatic switching. ★ commutation semi-automatique → *commutation 35.* R полуавтоматическая коммутация. D halbautomatisch vermitteln. E conmutación semiautomática. I commutazione semi-automatica. N half-automatisch schakelen. P komutacja półautomatyczna. S ..... (714)
42. **space division switching** : switching performed using separate physical paths. ★ commutation spatiale → *commutation 36.* R пространственная коммутация. D Raumvielfachvermittlung. E conmutación espacial. I commutazione a divisione di spazio. N ruimteverdeeld schakelen. P komutacja przestrzenna. S rumsdelningskoppling. (714)
43. **switching** (in telecommunication) : the process of temporarily associating functional units, transmission channels or telecommunication circuits for the purpose of providing a desired telecommunication facility. ★ commutation → *commutation 13.* R коммутация. D Vermittlung (in der Telekommunikation). E commutación (en telecomunicaciones). I commutazione. N schakelen (bij telecommunicatie). P komutacja. S uppkoppling. (701,714,715)
44. **switching centre** : → *centre 20*
45. **switching command** : → *command 28*
46. **switching control pilot** : → *pilot 17*
47. **switching diode** : → *diode 23*
48. **switching entity** (*Syn.* exchange) : → *exchange 5*

49. **switching entity** : → *entity 5*
50. **switching entity area** : → *area 40*
51. **(switching) exchange area** (*Syn.* switching entity area) : → *area 40*
52. **switching impulse** : → *impulse 17*
53. **switching impulse protective level** : → *level 96*
54. **switching matrix** : → *matrix 11*
55. **switching network** : → *network 95*
56. **switching node** : → *node 13*
57. **switching noise** : → *noise 86*
58. **switching office** (*Syn.* exchange) : → *exchange 5*
59. **switching overvoltage** : → *overvoltage 13*
60. **(switching) path** : → *path 26*
61. **switching pilot** (*Syn.* switching control pilot) : → *pilot 17*
62. **switching signal** : → *signal 231*
63. **switching signal telex-data** : → *signal 232*
64. **switching stage** : → *stage 5*
65. **switching substation** : → *substation 37*
66. **switching tone** : → *tone 34*
67. **switching value** : → *value 66*
68. **switching value** : → *value 67*
69. **switching voltage** : → *voltage 199*
70. **telegraph switching exchange** : → *exchange 26*
71. **time division switching** : switching acting on time division multiplexed signals and including at least one time-slot interchange. ★ commutation temporelle → *commutation 37.* R временная коммутация. D Zeitvielfachvermittlung. E conmutación temporal. I commutazione a divisione di tempo. N tijdverdeeld schakelen. P komutacja czasowa. S tidsdelningskoppling. (714)
72. **time to crest (of a switching impulse)** : → *time 205*
73. **transposition** : → *transposition 3*
74. **two-wire switching** : switching using the same transmission path, frequency band and time interval for both directions of transmissions. ★ commutation à deux fils → *commutation 14.* R двухпроводная коммутация. D Zweidrahtvermittlung ; -durchschalten. E conmutación a dos hilos. I commutazione a due fili. N tweedraads schakelen. P komutacja jednotorowa. S tvåtrådskoppling. (714)

switching device

1. **fixed trip mechanical switching device** : a mechanical switching device which cannot be released except when it is in the closed position. ★ appareil mécanique de connexion à déclenchement conditionné → *appareil 46.* R контактный коммутационный аппарат с фиксированным расцеплением. D mechanisches Schaltgerät mit bedingter Auslösung. E aparato mecánico de conexión con disparo condicionado. I apparecchio meccanico di manovra ad apertura condizionata. N schakelaar, slechts vanuit de gesloten stand uit te schakelen. P łącznik mechanizmowy o wyzwalaniu ograniczonym. S mekanisk elkopplare med spärrad utlösning. (441)
2. **mechanical switching device** : a switching device designed to close and open one or more electric circuits by means of separable contacts. *Note.* — Any mechanical switching device may be designated according to the medium in which its contacts open and close, e.g. air, SF_6, oil. ★ appareil mécanique de connexion → *appareil de connexion 1.* R контакный коммутационный аппарат. D mechanisches Schaltgerät; mechanischer Schalter. E aparato mecánico de conexión. I apparecchio meccanico di manovra. N (mechanische) schakelaar. P łącznik mechanizmowy. S mekanisk elkopplare. (441)
3. **pole of a switching device** : → *pole 26*
4. **semiconductor switching device** : a switching device designed to make the current in an electric circuit by means of the controlled conductivity of a semiconductor. ★ appareil de connexion à semiconducteur → *appareil 25.* R полупроводниковый коммутационный аппарат. D Halbleiterschaltgerät. E aparato de conexión de semiconductor. I apparecchio di manovra a semiconduttore. N halfgeleider schakeltoestel. P łącznik półprzewodnikowy. S halvledarelkopplare. (441)
5. **switching device** : a device designed to make or break the current in one or more electric circuits. ★ appareil de connexion → *appareil 24.* R коммутационный аппарат. D Schaltgerät. E aparato de conexión. I apparecchio di manovra. N schakeltoestel. P łącznik. S elektrisk kopplingsapparat; elkopplare. (441)
6. **trip-free mechanical switching device** : a mechanical switching device, the moving contacts of which return to and remain in the open position when the opening operation is initiated after the initiation of the closing operation, even if the closing command is maintained. *Note.* — To ensure proper breaking of the current which may have been established, it may be necessary that the contacts momentarily reach the closed position. ★ appareil mécanique de connexion à déclenchement libre → *appareil de connexion 2.* R контактный коммутационный аппарат со свободным расцеплением. D mechanisches Schaltegerät mit Freiauslösung. E aparato mecánico de conexión con disparo libre. I apparecchio meccanico di manovra ad apertura libera. N schakelaar met vrijloop. P łącznik mechanizmowy o wyzwalaniu swobodnym. S mekanisk elkopplare med friutlösning. (441)

switching-off

1. **switching-off for mechanical maintenance** : an operation intended to inactivate an item or items of electrically powered equipment for the purpose of preventing danger, other than due to electric shock or to arcing, during non-elctrical work on this equipment. ★ coupure pour entretien mécanique → *coupure 13.* R отключение для обслуживания механической части. D Ausschalten für mechanische Wartung. E desconexión para mantenimiento mecánico. I interruzione per manutenzione meccanica. N stroomloos maken ten behoeve van niet-elektrotechnische werkzaamheden. P wyłączenie zabezpieczające przed urazami mechanicznymi. S frånkoppling föricke-elektriskt underhållsarbete. (826)

switch-start

1. **switch-start fluorescent lamp** : → *lamp 63*

swivel

1. **arc furnace swivel gantry** : → *gantry 1*
2. **tower swivel clevis** : → *clevis 2*

SWR

1. **SWR** (*Syn.* standing-wave ratio) : → *ratio 95*
2. **SWR trip** : → *trip 2*

syllabic

1. **syllabic companding** : → *companding 3*

syllable

1. **syllable articulation** : → *articulation 7*

symbol

1. **connection symbol** : a conventional notation indicating the connections of the high-voltage, intermediate-voltage (if any) and low-voltage windings and their relative phase displacement(s) expressed as a combination of letters and clock-hour figure(s). ★ symbole de couplage → *symbole 2.* R обозначение группы соединений. D Schaltgruppe. E símbolo de acoplamiento. I simbolo di collegamento. N symbool voor de schakeling. P symbol układu połączeń. S beteckning för kopplingsart. (421)

symmetric

1. **symmetric (characteristic circuit) element** : → *element 56*
2. **symmetric frequency of a monolithic bipole vibrator** : → *frequency 186*
3. **symmetric half-controlled bridge** : → *bridge 17*
4. **symmetric pair** : → *pair 16*

symmetrical

1. **initial symmetrical short-circuit current** : → *short-circuit current 4*
2. **prospective symmetrical current** : → *current 148*
3. **rotationally symmetrical luminous intensity distribution** : → *distribution 36*
4. **symmetrical (alternating) signal** : → *signal 233*
5. **symmetrical antenna** : → *antenna 114*
6. **symmetrical binary code** : → *code 49*
7. **symmetrical component of order *k*** : → *component 56*
8. **symmetrical components** : → *component 57*

9. **symmetrical control** : → *control 181*
10. **symmetrical deflection** : → *deflection 16*
11. **symmetrical fault** (*Syn.* three-phase fault) : → *fault 76*
12. **symmetrical fractional slot winding** : → *winding 80*
13. **symmetrical input** : → *input 36*
14. **symmetrical luminaire** : → *luminaire 24*
15. **symmetrical luminous intensity distribution** : → *distribution 41*
16. **symmetrical normalized components** : → *component 58*
17. **symmetrical output** : → *output 68*
18. **symmetrical phase control** : → *control 182*
19. **symmetrical polyphase circuit** : → *circuit 174*
20. **symmetrical polyphase (voltage) source** : → *voltage source 8*
21. **symmetrical radiating element** : → *element 57*
22. **symmetrical terminal voltage** : → *voltage 200*
23. **symmetrical two-port network** : → *network 96*
24. **symmetrical voltage** (*Syn.* differential mode voltage) : → *voltage 47*

sync

1. **field sync pulse** (*Syn.* field synchronizing signal) : → *signal 89*
2. **line sync pulse** (*Syn.* line synchronizing signal) : → *signal 116*
3. **(short-term) sync pulling** : → *pulling 7*
4. **sync pulling** : → *pulling 8*

synchronism

1. **element synchronism** : in synchronous transmission, the condition in which an element of the local time scale coincides completely with a received signal element. ★ synchronisme élémentaire → *synchronisme 9.* R синхронизм элементов. D Schrittsynchronismus. E sincronismo elemental. I sincronismo base. N synchroniciteit van elementen. P synchronizm elementów. S elementsynkronism. (721)
2. **pulling into synchronism** (of a synchronous machine) : the process of attaining synchronism by changing from asynchronous speed to synchronous speed. ★ accrochage → *accrochage 1.* R втягивание в синхронизм. D Intrittziehen. E enganche. I entrata in sincronismo. N in de pas komen; in de pas trekken. P wpadanie w synchronizm. S indragning i synkronism. (411)
3. **pulling out of synchronism** : the process of losing synchronism by changing from synchronous speed to a lower asynchronous speed. ★ décrochage → *décrochage 5.* R выпадение из синхронизма с понижением скорости. D Außertrittfallen. E desenganche. I uscita dal sincronismo. N uit de pas vallen. P wypadanie ze synchronizmu w dół. S fall ur synkronism. (411)
4. **rising out of synchronism** : the process of losing synchronism by changing from synchronous speed to a higher asynchronous speed. ★ dépassement de vitesse synchrone → *dépassement 4.* R выпадение из синхронизма с повышением скорости. D Außertrittziehen. E paso de la velocidad sincrona. I ipersincronismo. N uit de pas springen. P wypadanie ze synchronizmu w górę. S utdragning ur synkronism. (411)
5. **synchronism** (of periodic quantities) : the condition where two or more periodic quantities of one or more devices have the same frequency. ★ synchronisme → *synchronisme 7.* R синхронизм (периодических величин). D Synchronismus (periodischer Größen). E sincronismo (de magnitudes periódicas). I sincronismo (di grandezze periodiche). N synchronisme. P synchronizm. S synkronism. (151)
6. **synchronism** : the state in which two time-varying phenomena, time-scales, or signals are synchronous. ★ synchronisme → *synchronisme 8.* R синхронизм. D Synchronismus. E sincronismo. I sincronismo. N synchronisme. P synchronizm. S synkronism. (702,704)
7. **synchronism restoration** : → *restoration 4*
8. **synchronism voltage** (*Syn.* synchronous voltage) : → *voltage 204*

synchronization

1. **double-ended synchronization** : a method of synchronizing clocks at a synchronization node with respect to a distant synchronization node by means of both locally-derived synchronization signals and remotely-derived synchronization signals relating to that particular distant node. ★ synchronisation locale et distante → *synchronisation 40.* R двусторонняя синхронизация. D Paarsynchronisation; Zwei-end-Synchronisation. E sincronización local y distante. I sincronizzazione locale e remota. N ..... P synchronizacja obustronna. S tvåändssynkronisering. (704)
2. **element synchronization** : the action of adjustment of element synchronism. ★ synchronisation élémentaire → *synchronisation 35.* R синхронизация элементов. D Schrittsynchronisierung. E sincronización elemental. I sincronizzatore base. N synchroniseren van elementen. P synchronizacja elementów. S elementsynkronisering. (721)
3. **external synchronization** : the synchronization obtained when the signal which controls the time base is applied externally. ★ synchronisation extérieure → *synchronisation 37.* R внешний синхронизация. D externe Synchronisation. E sincronización externa. I sincronizzazione esterna. N externe synchronisatie. P synchronizowanie zewnętrzne. S extern synkronisering. (303)
4. **flywheel synchronization circuit** : → *circuit 81*
5. **internal synchronization** : the synchronization obtained when the signal which controls the time base is supplied by an internal circuit affected by the observed quantity. ★ synchronisation intérieure → *synchronisation 38.* R внутренний синхронизация. D interne Synchronisation. E syncronización interna. I sincronizzazione interna. N interne synchronisatie. P synchronizowanie wewnętrzne. S intern synkronisering. (303)
6. **locally-derived synchronization signal** : → *signal 117*
7. **loss of synchronisation** : → *loss 53*
8. **remotely-derived synchronization signal** : → *signal 158*
9. **single-ended synchronization** : a method of synchronizing clocks at a synchronization node with respect to a distant synchronization node solely by means of locally-derived synchronization signals relating to that particular distant node. ★ synchronisation locale → *synchronisation 39.* R односторонняя синхронизация. D Ortssynchronisation; Einendsynchronisation. E sincronización local; sincronización unilateral. I sincronizzazione locale. N ..... P synchronizacja jednostronna. S enändssynkronisering. (704)
10. **synchronisation** (sound broadcasting transmitters) : adjusting the carrier frequency of a sound broadcasting transmitter so that it may form part of a synchronised network. *Note.* — Associated term : to synchronise. ★ synchronisation → *synchronisation 30.* R синхронизация (звуковых радиовещательных передатчиков). (723)
11. **synchronisation bay** : → *bay 4*
12. **synchronisation control** : → *control 183*
13. **synchronization** : the process of adjusting clock frequencies to achieve synchronism of two time-varying phenomena, time-scales or signals. *Note.* — The associated verb is "to synchronize". ★ synchronisation → *synchronisation 28.* R синхронизация. D Synchronisation. E sincronización. I sincronizzazione. N synchronisatie. P synchronizacja. S synkronisering. (704)
14. **synchronization** (in facsimile) : the establishment of equal scanning line frequencies at the transmitter and receiver. ★ synchronisation → *synchronisation 29.* R синхронизация (в факсимильной связи). D Synchronisation (bei Faksimile). E sincronización (en telecopia). I sincronizzazione (in facsimile). N synchronisatie (bij facsimile). P synchronizacja (w symilografii). S linjesynkronisering. (721)
15. **synchronization bit** : → *bit 16*
16. **synchronization link** : → *link 39*
17. **synchronization network** : → *network 98*
18. **synchronization network** : → *network 99*
19. **synchronization node** : → *node 14*
20. **synchronization of two systems** : the matching of two systems with respect to their frequency and to their voltage magnitude and voltage phase for interconnection purposes. ★ synchronisation de deux réseaux → *synchronisation 34.* R синхронизация двух энергосистем. D Synchronisierung zweier Netze. E sincronización de dos redes. I sincronizzazione di due reti. N synchronisatie van twee systemen. P synchronizacja dwóch

systemów elektroenergetycznych. S synkronisering av två system. (603)

21. **synchronization pulse separator** : → *separator 6*
22. **synchronization signal** : → *signal 234*
23. **synchronization signal unit** : → *unit 63*

synchronize

1. **(to) synchronize** : to bring two or more devices or circuits into synchronism. ★ synchroniser → *synchroniser 9.* R синхронизировать. D synchronisieren. E sincronizar. I sincronizzare. N synchroniseren. P synchronizować. S synkronisera. (151)

synchronized

1. **democratic mutually synchronized network** : → *network 19*
2. **hierarchic mutually synchronized network** : → *network 29*
3. **hierarchic synchronized network** : → *network 30*
4. **mutually synchronized network** : → *network 43*
5. **synchronised network** : → *network 97*
6. **synchronized network** : → *network 100*
7. **synchronized satellite** : → *satellite 19*
8. **synchronized sweep** : → *sweep 8*
9. **synchronized transmitter** : → *transmitter 15*

synchronizing

1. **coarse synchronizing** : synchronizing a machine by applying excitation to it after it has been accelerated to near-synchronous speed but before it has been connected to the supply. ★ synchronisation brute → *synchronisation 33.* R грубая синхронизация. D Grobsynchronisieren. E sincronización bruta. I ..... N ..... P synchronizacja zgrubna. S grovsynkronisering. (411)
2. **field synchronizing signal** : → *signal 89*
3. **ideal synchronizing** : synchronizing a machine by adjusting the voltage, frequency and phase angle, such that the conditions of that machine are as close as possible to those of the machine or system with which it is being synchronized. ★ synchronisation précise → *synchronisation 42.* R точная синхронизация. D Feinsynchronisieren. E sincronización precisa. I sincronizzazione precisa. N fijn synchroniseren. P synchronizacja dokładna. S finsynkronisering. (411)
4. **line synchronizing signal** : → *signal 116*
5. **luminance/synchronizing ratio** : → *ratio 51*
6. **motor synchronizing** : synchronizing a machine by applying excitation to it after it has been accelerated to near synchronous speed and after it has been connected to the supply. ★ synchronisation en moteur → *synchronisation 36.* R синхронизация в режиме двигателя. D Motorsynchronisieren (Intrittziehen durch Erregen). E sincronización en motor. I sincronizzazione con rotore eccitato. N synchroniseren in motorbedrijf. P samosynchronizacja. S motorsynkronisering. (411)
7. **random synchronizing** : synchronizing a machine by adjusting its voltage to be of the same order as that of another machine or system, but without adjusting the frequency and phase angle of the incoming machine to be as close as possible to those of the machine or system with which it is being synchronized. ★ synchronisation approchée → *synchronisation 31.* R включение без контроля синхронизма. D angenähertes Synchronisieren. E sincronización aproximada. I sincronizzazione approssimata. N grof synchroniseren. P synchronizacja przypadkowa. S slumpsynkronisering. (411)
8. **reluctance synchronizing** : synchronizing by bringing the speed of a salient pole synchronous machine to near-synchronous speed, but without applying excitation to it. ★ synchronisation par réluctance → *synchronisation 41.* R синхронизация за счет момента явнополюсности. D Reluktanz-Synchronisieren. E sincronización por reluctancia. I sincronizzazione a riluttanza. N synchroniseren met behulp van het reluctantiekoppel. P samosynchronizacja reluktancyjna. S reluktanssynkronisering. (411)
9. **synchronizing** (of rotating machines) : the process or sequence of processes whereby a synchronous machine, after accelerating, is brought into synchronism with another synchronous machine or a system. ★ synchronisation → *synchronisation 27.* R синхронизация. D Synchronisieren. E sincronización. I sincronizzazione. N synchroniseren. P synchronizacja. S synkronisering; fasning. (411)
10. **synchronizing coefficient** : → *coefficient 68*
11. **synchronizing level** : → *level 97*
12. **synchronizing power coefficient** : → *coefficient 69*
13. **synchronizing pulse generator** : → *generator 37*
14. **synchronizing pulse regenerator** : → *regenerator 4*
15. **synchronizing signal** : → *signal 236*

synchronous

1. **angular variation in synchronous generators** : → *variation 1*
2. **asynchronous operation of a synchronous machine** : → *operation 3*
3. **cage synchronous motor** : → *motor 11*
4. **degree of synchronous start-stop distortion** : → *degree 17*
5. **deviation of synchronous time** : → *deviation 7*
6. **direct-axis component of synchronous generated voltage** : → *component 19*
7. **direct-axis synchronous reactance** : → *reactance 5*
8. **double wound synchronous generator** : → *generator 12*
9. **effective synchronous reactance** : → *reactance 7*
10. **hunting of interconnected synchronous machines** : → *hunting 5*
11. **inductor type synchronous motor** : → *motor 39*
12. **linear synchronous motor** : → *motor 41*
13. **margin of a synchronous receiver** : → *margin 10*
14. **permanent magnet synchronous motor** : → *motor 74*
15. **quadrature-axis component of synchronous generated voltage** : → *component 46*
16. **quadrature-axis synchronous reactance** : → *reactance 14*
17. **salient pole synchronous induction motor** : → *induction motor 7*
18. **solid pole synchronous motor** : → *motor 95*
19. **synchronous** : repetitive, coincidental in time with a specified phenomenon or quantity. ★ synchrone → *synchrone 35.* R синхронный. D synchron. E síncrono. I sincrono. N synchroon. P synchroniczny. S synkron. (101)
20. **synchronous** : qualifying two time-varying phenomena, time-scales, or signals characterized by corresponding significant instants which are separated by time intervals of a constant desired duration. *Notes. 1* — In practice, any variations of the time intervals are constrained within specified limits. *2* — Two phenomena, time-scales, or signals may be synchronous without being isochronous. *3* — For periodic phenomena, time-scales or signals, the corresponding significant instants occur at the same average rate. ★ synchrone → *synchrone 36.* R синхронный. D synchron. E síncrono. I sincrono. N synchroon. P synchroniczny. S synkron. (702,704,721)
21. **synchronous compensator** (*Syn.* synchronous condenser) : → *condenser 3*
22. **synchronous condenser** : → *condenser 3*
23. **synchronous correction** : → *correction 18*
24. **synchronous coupling** : → *coupling 39*
25. **synchronous data network** : → *network 101*
26. **synchronous data transmission** : → *transmission 68*
27. **synchronous demodulation** (*Syn.* coherent demodulation) : → *demodulation 2*
28. **synchronous generated voltage** : → *voltage 203*
29. **synchronous generator** : → *generator 38*
30. **synchronous impedance** : → *impedance 61*
31. **synchronous induction motor** : → *induction motor 9*
32. **synchronous machine** : → *machine 27*
33. **synchronous motor** : → *motor 101*
34. **synchronous multicycle control** : → *control 184*
35. **synchronous network** (*Syn.* synchronized network) : → *network 100*
36. **synchronous operation** : → *operation 69*

37. **synchronous operation of a machine** : → *operation 70*
38. **synchronous operation of a system** : → *operation 71*
39. **synchronous pull-out torque** : → *torque 26*
40. **synchronous recording** : → *recording 47*
41. **synchronous satellite** : → *satellite 20*
42. **synchronous signalling** : → *signalling 59*
43. **synchronous speed** : → *speed 53*
44. **synchronous speed (of a linear traction motor)** : → *speed 54*
45. **synchronous (start-stop) margin** : → *margin 16*
46. **synchronous telecontrol transmission** : → *transmission 69*
47. **synchronous telegraphy** : → *telegraphy 14*
48. **synchronous time** : → *time 170*
49. **synchronous transmission** : → *transmission 70*
50. **synchronous voltage** : → *voltage 204*

synchroscope

1. **synchroscope** : an instrument intended to indicate if two a.c. voltages or polyphase voltage systems have the same frequency and are in phase. ★ synchronoscope → *synchronoscope 1.* R синхроноскоп. D Synchronoskop. E sincronoscopio. I sincronoscopio. N synchronoscoop. P wskaźnik synchronizmu; synchronoskop. S synkroskop. (302)

synchrotron

1. **synchrotron** : an accelerator in which the particles are guided by an increasing magnetic field while they are accelerated several times (in an approximately circular path) by electric fields produced by a high-frequency generator. ★ synchrotron → *synchrotron 2.* R синхротрон. D Synchrotron. E sincrotrón. I sincrotrone. N synchrotron. P synchrotron. S synkrotron. (881)
2. **synchrotron radiation** : → *radiation 112*

syntax

1. **syntax** : the relationship among characters or groups of characters, independent of their meanings or the manner of their interpretation and use. ★ syntaxe → *syntaxe 1.* R синтаксис. D Syntax. E sintaxis. I sintassi. N syntaxis. P składnia. S syntax. (714)

synthesis

1. **network synthesis** : the determination of the topology of a network and of the values of its circuit elements to achieve a specified performance. ★ synthèse d'un réseau → *synthèse 6.* R синтез схем. D Netzwerksynthese. E síntesis de una red. I sintesi di una rete. N netwerksynthese. P synteza układu. S nätsyntes. (131)

synthesizer

1. **frequency synthesizer** : an apparatus based on a master oscillator of fixed frequency for producing oscillations of adjustable frequency and of high stability and accuracy, by combination, filtering and interpolation effected on oscillations from frequency multipliers and frequency dividers. ★ synthétiseur de fréquences → *synthétiseur 4.* R синтезатор частоты. D Frequenzsynthesizer. E sintetizador de frecuencias. I sintetizzatore di frequenza. N frequentiesynthesizer. P syntezator częstotliwości. S frekvenssyntetiserare. (702)

synthetic

1. **lumbered synthetic quartz crystal** (*Syn.* pre-dimensioned bar) : → *bar 10*
2. **orientation of a synthetic quartz crystal** : → *orientation 4*
3. **synthetic aromatic hydrocarbons** : → *hydrocarbon 2*
4. **synthetic mica** : → *mica 12*
5. **synthetic organic ester** : → *ester 1*
6. **synthetic quartz crystal** : → *crystal 14*
7. **synthetic quartz crystal batch** : → *batch 2*

system

1. **absolutely selective protection system** (*Syn.* unit protection system) : a protection system the operation and selectivity of which are solely dependent on the comparison of electrical quantities at each end of the protected section. ★ système de protection à sélectivité absolue → *système 54.* R система защиты с абсолютной селективностью. D Schutzsystem mit absoluter Selektivität. E sistema de protección con selectividad absoluta. I sistema di protezione a selettività assoluta. N zonebeveiligingssysteem. P zabezpieczenia o absolutnej wybiorczości ;; zabezpieczenie odcinkowe. S absolut selektivt reläskyddssystem. (448)
2. **a.c. system** (*Syn.* alternating current system) : → *system 7*
3. **accelerated distance protection system** : a permissive underreach distance protection system in which the overreach zone measurement, which is normally carried out after a time delay, is accelerated on receipt of a signal from the remote end. ★ système de protection de distance à accélération de zone → *système 60.* R система дистанционной защиты с ускорением. D Distanzschutzsystem mit Staffelzeitverkürzung. E sistema de protección de distancia con aceleración de zona. I sistema di protezione a distanza a zona ridotta di tipo accelerato. N distantiebeveiliging met vrijgave van meetgebiedverlenging via overdracht. P zabezpieczenie odległościowe ze zdalnym przyśpieszeniem wyłączenia. S distansskyddssytem med zonaccelerering. (448)
4. **acoustical system** : system capable of receiving, transmitting or generating acoustic signals. ★ système acoustique → *système 21.* R акустическая система. D akustisches System. E sistema acústico. I sistema acustico. N akoestisch systeem. P układ akustyczny. S akustiskt system. (801)
5. **actuating system** (of a control switch) : all the operating means of a control switch which transmits the actuating force to the contact elements. *Note.* — The operating means of an actuating system may be mechanical, electromagnetic, hydraulic, pneumatic, thermal, etc. ★ mécanisme transmetteur → *mécanisme 12.* R приводной механизм (выключателя цепей управления). D Betätigungssystem (eines Hilfsstromschalters). E sistema de mando (de un auxiliar de mando). I sistema di azionamento (di un apparecchio di comando). N aandrijving (van een stuurstromschakelaar). P system napędowy (łącznika sterowniczego). S manöversystem. (441)
6. **adaptive antenna system** : an antenna system incorporating active circuits associated with radiating elements whereby one or more of the characteristics of the antenna are automatically modified in a prescribed manner as a function of the received signal or changes in the electromagnetic environment. ★ antenne adaptative → *antenne 49.* R адаптивная антенная система. D adaptives Antennensystem. E sistema de antenas adaptativas. I antenna adattativa. N adaptief antennesysteem. P zestrój antenowy przystosowany. S adaptiv antenn. (712)
7. **alternating current system** (*Syn.* a.c. system) : an electrical system fed by alternating voltage. ★ réseau à tension alternative → *réseau 72.* R электрическая сеть переменного тока. D Wechselstromnetz. E red de corriente alterna. I rete a corrente alternata. N wisselspanningsnet. P sieć prądu przemiennego. S växelströmsnät. (601)
8. **analog system** (*Syn.* analogue system) : → *system 9*
9. **analogue system** (*Syn.* analog system (USA)) : a system permitting the representation of physical quantities by means of continuously variable values of physical quantities of another system. ★ système analogique → *système 22.* R аналоговая система. D Analogsystem. E sistema analógico. I sistema analogico. N analoog systeem. P system analogowy. S analogt system. (101)
10. **antenna system** : an antenna together with those mechanical and electrical parts necessary for its proper functioning. *Notes. 1* — In French, the term "système d'antenne" is used only in some cases where the mechanical and electrical parts are very important. *2* — In English, the term "antenna system" is used for one antenna as well as for a collection of antennas. ★ antenne → *antenne 5.* R антенная система. D Antennensystem. E sistema de antena. I sistemi d'antenna. N antennesysteem. P zestrój antenowy. S antennsystem. (712)
11. **approach lighting system** : system of aeronautical ground lights which is sited in front of the threshold of an aerodrome runway and designed to provide guidance to aircraft making an approach to land on the runway. ★ dispositif lumineux d'approche → *dispositif 74.* R система огней зоны подхода. D Anflugbefeuerungssystem. E sistema de luces de aproximación. I dispositivo luminoso di avvicinamento. N naderingslichtsysteem. P system świateł zbliżnia. S inflygningsljus. (845)

12. **arc furnace tilting system** : a hydraulic or electric mechanism to tilt the furnace for pouring or slagging off. ★ système de basculement d'un four à arc → *système 33.* R система наклона дуговой печи. D Kippsystem. E sistema basculante de un horno de arco. I sistema di ribaltamento di un forno ad arco. N boogovenkipmechanisme. P mechanizm przechyłowy (pieca łukowego). S tippningssystem. (841)
13. **arc-suppression-coil-earth (neutral) system** (*Syn.* resonant earthed (neutral) system) : → *system 175*
14. **automatic repetition Verdan system** : a telegraph system in which each signal is automatically sent more than once, the duplicated signal being separated from the initial transmission by a constant delay. ★ procédé Verdan → *procédé 12.* R система Вердана с автоматическим повторением. D Verdan-System. E procedimiento Verdan. I ripetizione automatica Verdan. N ..... P system Verdana. S Verdan-system. (721)
15. **balanced polyphase system** : a system with balanced polyphase sources and symmetrical polyphase circuits. ★ système polyphasé équilibré → *système 124.* R уравновешенная многофазная система. D symmetrisch gebautes und betriebenes Mehrphasensystem. E sistema polifásico equilibrado. I sistema polifase simmetrico. N gebalanceerd meerfasenstelsel. P układ wielofazowy zrównoważony; układ wielofazowy symetryczny. S ..... (131)
16. **bin-and-feeder system boiler** : → *boiler 1*
17. **binary logic system** : system in which binary signals are transmitted, processed or stored. ★ système logique binaire → *système 117.* R логическая система; логическое устройство. D binäres Schaltsystem. E sistema lógico binario. I sistema logico binario. N binair logicasysteem. P układ logiczny dwójkowy; układ binarny. S binärt logiskt system. (351)
18. **blocking overreach distance protection system** : an overreach distance protection system in which a signal is transmitted from one end which detects an external fault ; the receipt of that signal at the other end blocks the locally initiated tripping. ★ système de protection de distance à zone étendue et à verrouillage → *système 62.* R система дистанционной защиты с расширенной зоной и блокирующим сигналом. D Distanzschutzsystem (mit erweitertem Meßbereich) mit Sperrverfahren. E sistema de protección de distancia con zona ampliada y con enclavamiento. I sistema di protezione a distanza a zona estesa del tipo a blocco. N distantiebeveiliging met verlengd meetgebied en blokkering via overdracht. P zabezpieczenie odległościowe z wydłużoną strefą i zdalnym blokowaniem wyłączenia. S blockerande överräckande distansskyddssystem. (448)
19. **blocking protection system** : a protection system associated with signalling system (typically distance protection system) in which the receipt of a signal blocks the locally initiated tripping. ★ système de protection à verrouillage → *système 56.* R система защиты с блокирующим сигналом. D Schutzsystem mit Sperrverfahren. E sistema de protección con enclavamiento. I sistema di protezione a blocco. N beveiligingssysteem met blokkering via overdracht. P zabezpieczenie ze zdalnym blokowaniem wyłączenia. S blockerande reläskyddssystem. (448)
20. **bracing system** (*Syn.* lacing system) : arrangement of the members in a lattice support. ★ triangulation → *triangulation 1.* R тип решетки. D Diagonalausfachung. E celosía. I tralicciatura. N verband. P zakratowanie. S diagonalvandring. (466)
21. **braking system** : a set of equipment fitted on vehicles to hold or reduce speed or to stop a vehicle or train. ★ système de freinage → *système 37.* R система торможения. D Bremssystem. E sistema de frenado. I sistema di frenatura. N remsysteem. P system hamowania. S bromssystem. (811)
22. **busbar trunking system** : a factory-built assembly in the form of a conductor system comprising busbars which are spaced and supported by insulating material in a duct, trough or similar enclosure. *Note.* — This term generally applies to low-voltage systems. ★ canalisation préfabriquée → *canalisation 4.* R комплектный шинопровод. D Schienenverteiler. E canalización prefabricada. I condotto prefabbricato. N railkokersysteem. P system szyn prefabrykowany wnętrzowy. S kanalskenfördelning. (441)
23. **cable (distribution system) receiver** : → *receiver 1*
24. **cabled distribution system** : a network of non-radiating cables and associated equipment, intended for conveying sound and television programmes and perhaps other types of signal to a number of users. ★ réseau de télédistribution → *réseau 100.* R кабельная система распределения. (723)
25. **channel selecting telecontrol system** (*Syn.* common diagram telecontrol system) : a telecontrol system in which the control centre or master station selects any one of a number of outstations by means of switching the receiver and if necessary the command sender from one circuit to another. ★ système de téléconduite à sélection de voie → *système 81.* R система с выбором канала. D Kanalwähler-System. E sistema de telecontrol de selección de canal. I sistema di telecontrollo a selezione di canale. N systeem (van afstandsbesturing) met kanaalkeuze. P system wyboru kanału. S kanalvalssystem; snurra. (371)
26. **CIE 1931 standard colorimetric system (X Y Z)** : a system for determining the tristimulus values of any spectral power distribution using the set of reference colour stimuli [X], [Y], [Z] and the three CIE colour-matching functions $\bar{x}(\lambda)$, $\bar{y}(\lambda)$, $\bar{z}(\lambda)$ adopted by the CIE in 1931 (see CIE Publication No.15). *Notes. 1* — $\bar{y}(\lambda)$ is identical to $V(\lambda)$ and hence the tristimulus values Y are proportional to luminances. *2* — This standard colorimetric system is applicable to centrally-viewed fields of angular subtense between about 1° and about 4° (0.017 and 0.07 rad). ★ système de référence colorimétrique CIE 1931 (X Y Z) → *système 71.* R стандартная колориметрическая система МКО 1931 г.(X Y Z). D CIE-Normvalenzsystem 1931 (X Y Z). E sistema colorimétrico patrón CIE 1931. I sistema colorimetrico CIE 1931. N trichromatisch stelsel van de CIE 1931. P układ kolorymetryczny CIE 1931 normalny. S CIE 1931 standardsystem för kolorimetri. (845)
27. **CIE 1964 supplementary standard colorimetric system (X_{10} Y_{10} Z_{10})** : a system for determining the tristimulus values of any spectral power distribution using the set of reference colour stimuli [X_{10}], [Y_{10}], [Z_{10}] and the three CIE colour-matching functions $\bar{x}_{10}(\lambda)$, $\bar{y}_{10}(\lambda)$, $\bar{z}_{10}(\lambda)$ adopted by the CIE in 1964 (see CIE Publication No.15). *Notes. 1* — This standard colorimetric system is applicable to centrally-viewed fields of angular subtenses greater than about 4° (0.07 rad). *2* — When this system is used, all symbols that represent colorimetric measures are distinguished by use of the subscript 10. *3* — Values of Y_{10} are not proportional to luminances. ★ système de référence colorimétrique supplémentaire CIE 1964 (X_{10} Y_{10} Z_{10}) → *système 72.* R дополнительная стандартная колориметрическая система МКО 1964 г.(X_{10} Y_{10} Z_{10}). D 10°-CIE-Normvalenzsystem 1964 ; CIE-Großfeld-Normvalenzsystem 1964 (X_{10} Y_{10} Z_{10}). E sistema colorimétrico patrón CIE 1964. I sistema colorimetrico supplementare CIE 1964. N aanvullend trichromatisch stelsel van de CIE 1964. P układ kolorymetryczny CIE 1964 dodatkowy normalny. S CIE 1964 standardsystem för kolorimetri. (845)
28. **circuit-breaker failure protection system** : a protection system which is designed to clear a system fault by tripping other circuit-breaker(s) in case of failure of the appropriate circuit-breaker to trip. ★ système de protection contre la défaillance de disjoncteur → *système 57.* R система защиты от повреждения выключателя. D Schalterversager-Schutzsystem. E sistema de protección contra el fallo del interruptor automático. I sistema di protezione contro la mancanza di funzionamento dell'interruttore appropriato. N schakelaarreservebeveiliging. P zabezpieczenie przed nie działaniem wyłącznika. S brytarfelsskyddssystem. (448)
29. **coherent system (of units)** : a system of units such that the numerical value equations and the corresponding quantity equations are the same. ★ système cohérent (d'unités) → *système 24.* R связанная система (единиц). D kohärentes Einheitensystem. E sistema coherente (de unidades). I sistema coerente (di unità). N coherent eenhedenstelsel. P układ jednostek (miar) spójny. S samstämt enhetssystem. (111)
30. **colorimetric system** (in television) : the set of the three primary colours, and a reference white. ★ système colorimétrique → *système 25.* R колориметрическая система (в телевидении). (723)
31. **combined braking system** : combination of different brake types. ★ freinage mixte → *freinage 25.* R комбинированное торможение. D gemischtes Bremssystem. E frenado mixto. I frenatura mista. N gecombineerd remsysteem. P typ hamulców mieszany. S kombinerat bromssystem. (811)
32. **common diagram telecontrol system** (*Syn.* channel selecting telecontrol system) : → *system 25*

33. **component colour television system** : colour television system in which the complete video signal is in the form of several separate components. ★ système (de télévision en couleur) à composantes → *système 87.* R компонентная система цветного телевидения. (723)
34. **component (in a colour television system)** : → *component 12*
35. **composite braking system** : a braking system comprising more than one brake type, operated manually or automatically, separately or together. ★ juxtaposition (de modes de freinage) → *juxtaposition 1.* R система смешанного торможения. D kombinierte Bremsung. E yustaposición (sistema de frenado). I sovrapposizione. N remsysteem met verschillende remtypen. P system hamowania złożony. S blandat bromssystem. (811)
36. **conditional stability of a power system** : → *stability 4*
37. **control characteristic of a controlled system** : → *characteristic 26*
38. **control system** : system constituted by a controlled system and its controlling system (equipment). ★ système de commande → *système 35.* R система управления. D Regelungssystem; Steuerungssystem. E sistema de control. I sistema con controllo regolazione, asservimento. N regelsysteem. P układ sterowania; system sterowania. S styr- (eller regler-) system. (351)
39. **controlled system** : system on which control is exerted. ★ système commandé → *système 26.* R управляемая система; управляемый объект. D Regelstrecke; Steuerstrecke. E sistema controlado. I sistema controllato; sistema regolato. N geregeld systeem. P obiekt sterowany. S styrt (eller reglerat) system. (351)
40. **controlling system** (*Syn.* controlling equipment) : system comprising all the elements which control the controlled system. *Note.* — In feedback control, this includes also any elements in the feedback path. ★ équipement de commande → *équipement 10.* R управляющая система; управляющее устройство. D Regeleinrichtung; Steuereinrichtung. E equipo de control. I sistema controllante; sistema regolante. N regelend systeem. P urządzenie sterujące; układ sterujący. S styr- (eller regler-) utrustning. (351)
41. **d.c. system** (*Syn.* direct current system) : → *system 46*
42. **digital line system** : a digital transmission system providing a digital line section. ★ système de ligne numérique → *système 39.* R цифровая линейная система. D digitales Leitungssystem. E sistema de línea numérica. I sistema di linea numerica. N digitale lijnsysteem. P system liniowy cyfrowy. S digitalt linjesystem. (704)
43. **digital radio system** : a digital transmission system providing a digital radio section. ★ système radioélectrique numérique → *système 127.* R цифровая радиосистема. D digitales Funksystem. E sistema radioeléctrico numérico. I sistema radio numerico. N digitale radiosysteem. P system radiowy cyfrowy. S digitalt radiosystem. (704)
44. **digital system** : a system permitting the representation of physical quantities by means of discrete values of physical quantities of another system. ★ système numéral → *système 121.* R цифровая система. D Digitalsystem. E sistema digital; sistema numérico. I sistema numerale; sistema numerico. N digitaal systeem. P system cyfrowy. S digitalt system. (101)
45. **digital transmission system** : 1. An organized set of principles defining a particular method of digital transmission. 2. A particular implementation of a digital section comprising the transmission medium, the terminal equipments, any necessary intermediate equipments and any equipments provided for such ancillary purposes as power feeding, supervision, testing, etc. ★ système de transmission numérique → *système 99.* R цифровая система передачи. D digitales Nachrichtenübertragungssystem. E sistema de transmisión numérico. I sistema di trasmissione numerica. N digitaal transmissiesysteem. P system transmisji cyfrowej. S digitalt överföringssystem. (704)
46. **direct current system** (*Syn.* d.c. system) : an electrical system fed by unidirectional voltage. ★ réseau à tension continue → *réseau 73.* R электрическая сеть постоянного тока. D Gleichstromnetz. E red de corriente continua. I rete a corrente continua. N gelijkspanningsnet. P sieć prądu stalego. S likströmsnät. (601)
47. **directional comparison protection system** : a protection system in which the directions of current flow, using a locally derived voltage or current as a reference, are compared at each end of the protected section. ★ système de protection à comparaison de directions → *système 47.* R система направленной защиты. D Richtungsvergleich-Schutzsystem. E sistema de protección por comparación de direcciones. I sistema di protezione direzionale del tipo a confronto. N beveiliging met richtingsvergelijking. P zabezpieczenie porównawczo-kierunkowe. S riktningsjämförelseskyddssystem. (448)
48. **distance protection system** : a relatively selective protection system the operation and selectivity of which depend on local measurement of parameters (impedance, reactance, direction) from which the equivalent distance of fault is evaluated by comparing with zone settings. ★ système de protection de distance → *système 59.* R система дистанционной защиты. D Distanzschutzsystem. E sistema de protección de distancia. I sistema di protezione a distanza. N distantiebeveiligingssysteem. P zabezpieczenie odległościowe. S distansskyddssystem. (448)
49. **dot sequential colour television system** : colour television system in which signals derived from the primary colours are transmitted in rotation, each sequence within a very small proportion of the duration of each line. ★ système (de télévision en couleur) séquentiel de points → *système 94.* R точечно-поочередная система цветного телевидения. (723)
50. **double-sided field system** : a linear traction motor field system with two faces surrounding the armature, which itself comprises a sheet in the air gap between the two field elements. ★ inducteur double → *inducteur 11.* R двусторонний индуктор. D zweiseitiger Feldmagnet (Erregerfeld). E inductor doble. I induttore doppio. N dubbel magneetgestel. P wzbudnik obustronny. S dubbelsidigt fältsystem. (811)
51. **droop of a system** : → *droop 2*
52. **dual system motor vehicle** : → *vehicle 6*
53. **dual system track** : → *track 5*
54. **earth system** (*Syn.* ground system) : → *system 76*
55. **earthing system** (*Syn.* grounding system (USA)) : an arrangement of connections and devices necessary to earth equipment or a system separately or jointly. ★ installation de mise à la terre → *installation 10.* R заземляющее устройство. D Erdungsanlage. E instalación de puesta a tierra. I impianto di messa a terra. N aardingsinstallatie. P system uziemiający. S jordledarsystem. (604)
56. **electrical power system** (*Syn.* electricity supply system (in a broad sense)) : all installations and plant provided for the purpose of generating, transmitting and distributing electricity. ★ réseau d'énergie électrique → *réseau 109.* R система электроснабжения (в широком смысле). D Elektrizitätsversorgungs-system (en sentido amplio). E red de energía eléctrica (en sentido amplio); sistema de energía eléctrica (en sentido amplio). I rete elettrica (in senso lato). N elektrisch energiesysteem. P system elektroenergetyczny. S elkraftsystem. (601)
57. **electrical power system** (*Syn.* electrical power network) : particular installations, substations, lines or cables for the transmission and distribution of electricity. *Note.* — The boundaries of the different parts of this network are defined by appropriate criteria, such as geographical situation, ownership, voltage, etc. ★ réseau d'énergie électrique → *réseau 110.* R электрическая сеть. D Elektrizitätsversorgungsnetz. E red (sistema) de energía eléctrica (en sentido restringido). I rete elettrica (in senso stretto). N elektriciteitsnet; elektriciteitsbedrijf. P sieć elektroenergetyczna. S elnät. (601)
58. **electricity supply system** (*Syn.* electrical power system) : → *system 56*
59. **electrode system** : an assembly comprising electrode supporting and regulating devices to control the arc length in order to provide the furnace with optimum arc power during operation. ★ système d'électrodes → *système 102.* R система электродов. D Elektrodensystem. E sistema de electrodos. I sistema degli elettrodi. N elektroderegelsysteem. P zespół elektrod. S elektrodsystem. (841)
60. **electron beam deflection system** : an electromagnetic coil(s) or electrostatic plates which creates a field to change the direction of the electron beam. ★ dispositif de déflexion → *dispositif 47.* R система отклонения электронного луча. D Elektronenstrahl-Ablenksystem. E dispositivo de desviación. I dispositivo di deflessione. N (elektronenstraal)afbuigsysteem. P układ odchylający. S avböjningssystem. (841)
61. **electron beam scanning system** : an electromagnetic device for regulating the movement of the electron beam over the

surface area of the workpiece to be heated. ★ dispositif de balayage → *dispositif 39.* R система сканирования электронного луча. D Elektronenstrahl-Abtastsystem. E dispositivo de barrido. I dispositivo di scansione del fascio elettronico. N (elektronenstraal)aftastsysteem. P układ sterujący ruchem wiązki. S svepsystem. (841)

62. **emergency power system** (*Syn.* supply system for safety services) : → *system 207*

63. **emergency shut-down system** (*Syn.* safety shut-down system) : that part of the protection system which initiates the rapid shutdown of the reactor for safety purposes. ★ système d'arrêt d'urgence (de sécurité) → *système 31.* R канал аварийной защиты (ядерного реактора). D Schnellabschaltsystem. E sistema de parada de emergencia (de seguridad). I apparecchiatura di protezione per arresto di emergenza. N noodstopsysteem. P układ wyłączania awaryjnego. S nödstoppssystem. (392)

64. **enhanced television (system)** : → *television 10*

65. **error detecting and feedback system** (*Syn.* ARQ (abbreviation)) : error correction using an error detecting code in which every mutilation discovered at the receiving end causes the sending to the transmitting end over the return channel of a function signal which orders the repetition of a fixed sequence of the last signals sent. ★ correction d'erreurs par détection et répétition → *correction 21.* R система с обнаружением ошибок и обратной связью; система с решающей обратной связью. D Fehlererkennung und automatische Wiederholung; AAQ-verfahren. E corrección de errores por detección y repetición. I rivelazione d'errore con richiesta di ritrasmissione; ARQ. N foutendetectie-en-terugkoppelsysteem. P korekcja błędów przez powtarzanie. S signalstyrd felkorrigering. (721)

66. **excitation system stability** : → *stability 5*

67. **extended definition television (system)** : → *television 11*

68. **feeding system** : the feeding system is defined by the nominal characteristics of the electrical energy and power supplied to the contact line such as the voltage, number of phases and frequency of alternating current, or voltage alone of direct current. ★ système d'alimentation → *système 28.* R система питания. D Stromversorgungssystem. E sistema de alimentación. I sistema di alimentazione. N voedingssysteem. P system zasilania. S matningssystem. (811)

69. **field sequential colour television system** : sequential colour television system in which the components of the signal derived from the primary colours are transmitted in rotation, field by field. ★ système (de télévision en couleur) séquentiel de trames → *système 95.* R полево-поочередная система цветного телевидения. (723)

70. **field system** : that portion of a d.c. or synchronous machine which produces the excitation flux. ★ inducteur → *inducteur 5.* R система возбуждения. D Feldsystem. E inductor. I induttore. N magneetgestel (stilstaand); poolrad; poolwiel (draaiend). P magneśnica. S magnetsystem. (411,811)

71. **field system (of a linear traction motor)** : the wound part of the motor providing the excitation flux. ★ inducteur (d'un moteur de traction linéaire) → *inducteur 13.* R индуктор (линейного тягового двигателя). D Feldmagnet (Erregerfeld). E inductor (de un motor de tracción lineal). I induttore (d'un motore lineare). N magneetgestel. P wzbudnik; induktor. S fältsystem. (811)

72. **forced air circulation system** : system comprising a fan to force distribution of the air within the furnace chamber. ★ système à ventilation forcée → *système 18.* R система принудительной циркуляции атмосферы. D verstärkte Luftumwälzung. E sistema de ventilación forzada. I sistema a ventilazione forzata. N systeem met gedwongen luchtcirculatie. P obieg powietrza wymuszony. S system med forcerad luftcirkulation. (841)

73. **frame leakage protection system** : a protection system in which the input energizing quantity is a current flowing through the path connecting the framework of the stated equipment in the protected zone to earth. *Example :* A frame leakage protection system of a transformer tank. ★ système de protection de masse → *système 64.* R защита от замыкания на корпус. D Gestell-(Kessel)-Erdschlußschutzsystem. E sistema de protección de masa. I sistema di protezione contro i contatti a massa. N gestelsluitingsbeveiliging. P zabezpieczenie od zwarć z konstrukcją (kadziowe). S stomskyddssystem. (448)

74. **fundamental reference system of the CCITT** : a high quality and stable telephone transmission system provided with means for calibrating, in terms of absolute units, its sending, transmitting and receiving parts ; certain characteristics of the system can be adjusted to any desired value. ★ système de référence du CCITT → *système 73.* R основная эталонная система МККТТ. D CCITT-Bezugssystem. E sistema de referencia del CCITT. I sistema campione di riferimento del CCITT. N CCITT-referentiesysteem. P układ odniesienia CCITT. S CCITTs referenssystem. (722)

75. **generation system** : the total means of generation in a system. *Note.* — One can also consider only one given subgroup (thermal generation system for example). ★ parc de production → *parc 1.* R электрогенерирующая система. D Kraftwerkspark. E parque de generación. I parco di produzione. N produktiepark. P system wytwarzania. S produktionssystem. (602)

76. **ground system** (of an antenna) (*Syn.* earth system) : a system of conductors, located on or in the ground, to enhance the conductivity of the ground in the vicinity of an antenna. ★ réseau de terre → *réseau 107.* R система заземления антенны. D Erdungssystem (einer Antenne). E sistema de tierra (de una antena). I sistema di terra. N aardsysteem. P zestrój uziemienia. S jordnät. (712)

77. **grounding system** (*Syn.* earthing system) : → *system 55*

78. **Hell system** (*Syn.* Hellschreiber system) : a form of mosaic telegraphy using a telegraph code in which each character is represented by a fixed number of unit elements. The forming of the received characters is accomplished by a rotating spiral, continuously inked, being brought into contact with a travelling paper tape under the control of the signal elements. ★ télégraphie Hell → *télégraphie 14.* R система Хелла. D Hallschreibersystem. E telegrafía Hell. I telegrafia Hell. N Hell-systeem. P system telegraficzny Hella. S Hell-telegrafi. (721)

79. **Hellschreiber system** (*Syn.* Hell system) : → *system 78*

80. **high definition television (system)** : → *television 14*

81. **highest voltage of a system** : → *high-voltage 11*

82. **house telephone system** (*Syn.* internal (telephone) system) : → *system 94*

83. **hybrid system** : a system comprising analogue and digital subsystems. ★ système hybride → *système 112.* R гибридная система. D Hybridsystem. E sistema híbrido. I sistema ibrido. N hybride systeem. P system hybrydowy. S hybridsystem. (101)

84. **Ilgner system** : a Ward-Léonard system using an Ilgner generator set. ★ commande Ilgner → *commande 76.* R маховичная система генератор-двигатель; система Илгнера. D Ilgner-Umformer. E sistema Ilgner. I azionamento Ilgner. N Ilgner-aandrijving. P układ Ilgnera. S Ilgnersystem. (411)

85. **impedance earthed (neutral) system** : a system whose neutral point(s) is (are) earthed through impedances to limit earth fault currents. ★ réseau à neutre non directement à la terre → *réseau 67.* R электрическая сеть с заземлением нейтрали через сопротивления. D Netz mit Impedanz-Sternpunkterdung. E red de neutro no rígidamente a tierra. I sistema con neutro non direttamente a terra. N net met indirect geaard sterpunt. P sieć o punkcie zerowym pośrednio uziemionym. S impedansjordat system. (601)

86. **inherent characteristic of a system** : → *characteristic 46*

87. **inherent stability of a power system** : → *stability 7*

88. **initial excitation system response** : → *response 8*

89. **input signal (of a transmission system)** : → *signal 105*

90. **insulated return system** : a system in which the conductors forming the return circuit are insulated from the track. ★ système à retour isolé → *système 15.* R система с изолированной обратной цепью. D isolierte Stromrückleitung. E sistema de retorno aislado. I ritorno isolato. N systeem waarbij het retourstroomcircuit geïsoleerd is van de spoorstaven. P obwód powrotny izolowany. S system med separat återledning. (811)

91. **insulated shield cable system** : a cable system in which the shield of each cable is individually insulated throughout its length except where any necessary earthing or inter-shield connections are made. ★ circuit de câbles à écrans isolés → *circuit 21.* R система изоляции экранированных кабелей. D Kabelsystem mit isoliertem Schirm. E circuito de cables con pantallas aisladas. I sistema di cavi con schermi isolati. N ..... P układ kabli o żyłach powrotnych (powłokach metalowych) izolowanych. S ..... (461)

92. **interconnected systems** : systems connected together by means of one or more interconnection links. *Note.* — This term is also used in the singular for a system whose elements are interconnected. ★ réseaux interconnectés → *réseau 150.* R объединенные энергосистемы. D Verbundnetze. E redes interconectadas; sistemas interconectadas. I reti interconnesse. N gekoppelde netten. P połączone systemy elektroenergetyczne. S sammankopplade nät. (601)

93. **intermediate reference system** (*Syn.* IRS (abbreviation)) : a stable telephone transmission system intended for measurement of loudness ratings and provided with: a sending system and a receiving system with handsets the defined sensitivity/frequency responses of which are restricted in bandwith to typify those of sending and receiving systems of a complete telephone connection; a device for calibrating, in terms of absolute units, the above sending and receiving systems; an attenuator capable of adjustment to any desirable value. *Note.* — The CCITT intermediate reference system is described in the CCITT Recommendation P48 from the Volume V of the Blue Book, 1989. ★ système de référence intermédiaire → *système 74.* R промежуточная эталонная система. D IRS. E sistema de referencia intermedia; SRI (abreviación). I sistema di riferimento intermedio. N IRS. P wzorzec pośredni; SRI. S IRS. (722)

94. **internal (telephone) system** (*Syn.* house telephone system) : a private telephone installation for providing direct communication between telephone stations in the installation without the use of central switching equipment. *Note.* — An internal telephone system may or may not have access to the public switched telephone network. ★ installation d'intercommunication → *installation 17.* R система внутренней (телефонной) связи. D Haustelefonanlage. E instalación de intercomunicación. I impianto telefonico intercomunicante. N huistelefooninstallatie. P zespół aparatów (telefonicznych) wewnętrznych bezcentralowy. S ..... (722)

95. **International System of Units (SI)** : a system of units comprising: — the SI units, which form a coherent set, — the SI prefixes used for the formation of decimal multiples and submultiples of SI units. ★ Système International d'Unités (SI) → *système 114.* R международная система единиц (СИ). D Internationales Einheitensystem (SI). E Sistema Internacional de Unidades (SI). I Sistema Internazionale di Unità (SI). N Internationaal Eenhedenstelsel (SI). P Międzynarodowy Układ Jednostek Miar (SI); układ SI. S internationella enhetssystemet SI. (111)

96. **interrogative telecontrol system** (*Syn.* polling telecontrol system) : → *system 149*

97. **interrogative telecontrol system** (*Syn.* polling telecontrol system) : → *system 149*

98. **isolated neutral system** : a system where the neutral point is not intentionnally connected to earth, except for high impedance connections for protection or measurement purposes. ★ réseau à neutre isolé → *réseau 66.* R электрическая сеть с изолированной нейтралью. D Netz mit isoliertem Sternpunkt. E red de neutro aislado. I sistema con neutro isolato. N net met geïsoleerd sterpunt. P sieć o punkcie zerowym izolowanym. S system med isolerad nollpunkt. (601)

99. **jack-screw system** : → *jack-screw 1*

100. **Kraemer system** : a system of speed control below synchronous speed for wound-rotor induction motors giving constant power output over the speed range. Slip power is recovered through the medium of an independently mounted rotary convertor electrically connected between the secondary winding of the induction motor and a direct current auxiliary motor which is directly coupled to the induction motor shaft. ★ commande Kraemer → *commande 79.* R система электромеханического каскада; система Кремера. D Krämer-Kaskade. E sistema Kraemer. I sistema Kraemer. N Kraemer-aandrijving. P układ Kraemera. S Kraemersystem. (411)

101. **lacing system** (*Syn.* bracing system) : → *system 20*

102. **line sequential colour television system** : sequential colour television system in which the components of the signal derived from the primary colours are transmitted in rotation, line by line. ★ système (de télévision en couleur) séquentiel de lignes → *système 93.* R строчно—поочередная система цветного телевидения. (723)

103. **linear system** : system which can be described by a set of linear equations. *Note.* — In this vocabulary, the linear systems are considered to be also time-invariant. ★ système linéaire → *système 115.* R линейная система. D lineares System. E sistema lineal. I sistema lineare. N lineair systeem. P układ liniowy; układ linearny. S linjärt system. (351)

104. **link in a system** : → *link 25*

105. **link system** : a telecommunication switching system having switching stages of the link connected type. ★ système à mailles → *système 14.* R звеньевая система. D Link-System. E sistema de mallas. I sistema di commutazione a rete multistadio. N verschalmd systeem; schalmsysteem. P system wielodrożny. S länksystem. (714)

106. **load in a system** : → *load 42*

107. **logic system** : a system with a finite number of inputs and outputs each of which can take only one state of a finite set at one time, the states of the outputs being a function of the states of the inputs. ★ système logique → *système 116.* R логическая система. D logisches System. E sistema lógico. I sistema logico. N logicasysteem. P układ logiczny. S logiksystem. (101)

108. **(longitudinal) differential protection system** : an absolutely selective protection system the operation and selectivity of which depend on the comparison of the magnitude or the phase and magnitude of the currents at the ends of the protected section. ★ système de protection différentielle (longitudinale) → *système 66.* R система продольной дифференциальной защиты. D (Längs-) Differentialschutzsystem. E sistema de protección diferencial (longitudinal). I sistema di protezione differenziale (longitudinale). N (langs)differentiaalbeveiligingssysteem. P zabezpieczenie różnicowe wzdłużne. S längsdifferentialskyddssystem. (448)

109. **loop system** (*Syn.* ring system) : a system wherein the terminal devices or other functional units, are connected in a common loop circuit. ★ réseau en boucle → *réseau 117.* R шлейфовая система; кольцевая система. D Ring-System; Ringnetz. E red en bucle; red en anillo. I collegamento ad anello. N lussysteem; ringsysteem. P system pętlowy. S slingsystem. (714)

110. **looped system outlet** : → *outlet 2*

111. **lowest voltage of a system** : → *voltage 103*

112. **MAC (colour television) system** (*Syn.* MAC (abbreviation)) : colour television system in which the baseband colour video signal is obtained by time multiplexing, during the period of one scanning line, the various components, generally the luminance signal and one or two chrominance components, the components having previously been subject to analogue temporal compression. *Notes. 1* — Currently, the resultant MAC picture signal is broadcast in analogue form. *2* — In most MAC systems, any associated sound channels are time multiplexed with the components of the colour video signal. *3* — MAC is an abbreviation of "Multiplexed Analogue Components". ★ système (de télévision en couleur) MAC → *système 88.* R система (цветного телевидения) MAC; MAC. (723)

113. **management forecast of a system** : → *forecast 5*

114. **measuring system** : a set of independent elements constituted to achieve a given objective by performing specified measurements. ★ système de mesurage → *système 40.* R измерительная система. D Messsystem. E sistema de medida; sistema de medición. I sistema di misura. N meetsysteem. P zestaw pomiarowy. S mätsystem. (301)

115. **meshed system** : a system or part of system consisting of multiple meshes. ★ réseau maillé → *réseau 128.* R сложно-замкнутая электрическая сеть. D vermaschtes Netz. E red mallada. I rete magliata. N vermaasd net. P sieć oczkowa. S maskнät. (601)

116. **microwave pilot protection system** : a protection system associated with signalling system using a microwave link. ★ système de protection à liaison radio-électrique → *système 53.* R система защиты с радиосвязью. D Schutzsystem mit Richtfunk. E sistema de protección con conexión radioeléctrica. I sistema di protezione con collegamento a ponte radio. N beveiligingssysteem met microgolfoverdracht. P zabezpieczenie z łączem mikrofalowym. S sträckskyddssystem med radioförbindelse. (448)

117. **modified Kraemer system** : a system of speed control below synchronous speed for wound-retor induction motors. Slip power is recovered though the medium of a converting device electrically connected between the secondary of the induction motor and a direct current auxiliary motor. The auxiliary motor may be directly coupled to the induction motor shaft or may form part of a motor generator set which can return slip power to the supply system. ★ commande Kraemer modifiée

→ *commande 80.* R ..... D geänderte Krämer-(Scherbius-) Kaskade. E sistema Kraemer modificado. I sistema Kraemer modificato. N gemodificeerde Kraemer-aandrijving. P zmodyfikowany układ Kraemera. S modifierat Kraemersystem. (411)

118. mounting system (of a piezoelectric vibrator) : the means by which the piezoelectric vibrator is supported in its enclosure. ★ système de monture → *système 42.* R держатель (пьезоэлектрического вибратора). D Innenaufbau (eines piezoelektrischen Resonators). E sistema de montaje (de un vibrador piezoeléctrico). I sistema di montatura (di vibratore piezoelettrico). N montagesysteem. P konstrukcja wsporcza. S monteringsanordning. (561)

119. *m*-phase system (*Syn.* polyphase system) : → *system 150*

120. (multiple) antenna system : a collection of antennas together with those mechanical and electrical parts necessary for their proper functioning. *Notes. 1* — These mechanical and electrical parts may be, for example, switches or common feed lines. *2* — In English, the term "antenna system" is used for one antenna as well as for a collection of antennas. ★ système d'antennes → *système 30.* R (многоэлементная) антенная система. D (Mehrfach-)Antennensystem. E sistema de antenas. I sistema d'antenne. N (meervoudig) antennesysteem. P zespół antenowy. S antennanläggning. (712)

121. multi-star system (*Syn.* multi-star network) : cabled distribution system, in which groups of subscribers feeders originate from more than one point. ★ réseau (de télédistribution) multiétoile → *réseau 104.* R многорадиальная сеть распределения. (723)

122. multitrack recording system : a system which provides on a medium such as a magnetic tape two or more recording paths, parallel to each other and which may carry either related or unrelated programme material. ★ système d'enregistrement multipiste → *système 104.* R многодорожечное устройство магнитной записи. D Mehrspuraufzeichnungssystem. E sistema de registro multipista. I sistema di registrazione con molte piste. N meersporenopneemsysteem. P sposób zapisu wielościeżkowy. S flerspårs magnetiskt inspelningssystem. (806)

123. neutral point in a polyphase system : → *point 28*

124. new fondamental system for the determination of reference equivalents (*Syn.* NOSFER (abbreviation)) : a fundamental reference system of CCITT used in the CCITT laboratory for the determination of reference equivalents and obtained by some modifications to the reference apparatus for the determination of transmission performance ratings or ARAEN. *Note.* — The NOSFER is described in the CCITT Recommendation P42 from the Volume V of the Red Book, 1985. ★ nouveau système fondamental pour la détermination des équivalents de référence → *système 5.* R новая основная система для определения эквивалента затухания NOSFER. D NOSFER. E nuevo sistema fundamental para la determinación de equivalentes de referencia; NOSFER (abreviación). I nuovo sistema campione per la determinazione degli equivalenti di riferimento. N NOSFER. P nowy podstawowy układ dla określania tłumienności odniesienia; NOSFER. S NOSFER. (722)

125. nominal excitation system ceiling voltage : → *voltage 125*

126. nominal voltage of a system : → *voltage 128*

127. non-quantized system (of particles) : system of particles whose energies are assumed to be capable of varying in a continuous manner and in which the number of microscopic states defined by the positions and velocities of the particles at a given instant is then unlimited. ★ système non quantifié → *système 120.* R неквантованная система (частиц). D nichtquantisiertes System (von Teilchen); klassisches System. E sistema no cuantificado (de partículas); sistema clásico. I sistema non quantico (di particelle). N niet-gequantiseerd stelsel. P układ niekwantowany (cząstek). S icke kvantiserat system. (521)

128. non-unit protection system (*Syn.* relatively selective protection system) : → *system 172*

129. NTSC (colour television) system (*Syn.* NTSC (abbreviation)) : a simultaneous colour television system using, in baseband, a composite colour signal comprising a luminance signal and two chrominance components, which are transmitted as quadrature amplitude modulation of a subcarrier. *Notes. 1* — In most actual applications of NTSC, the scanning system uses 525 lines and 60 fields/second. The colour signal is transmitted using vestigial side band amplitude modulation, and the sound is transmitted as frequency modulation of a separate radio frequency carrier. *2* — The term NTSC is an abbreviation of "National Television System Committee". ★ système (de télévision en couleur) NTSC → *système 89.* R система (цветного телевидения) NTSC. (723)

130. operating system : software that controls the management and the execution of users' programs in a computer. ★ système d'exploitation → *système 105.* R операционная система. D Betriebssystem. E sistema de operación. I sistema operativo. N bedrijfssysteem. P system operacyjny; logistyka operacji. S operativsystem. (714)

131. optical fibre distribution system : cabled distribution system using the technique of transmission by optical fibres. ★ réseau de télédistribution par fibres optiques → *réseau 105.* R волоконнооптическая система распределения. (723)

132. optical link pilot protection system : a protection system associated with signalling system using an optical fibre link. ★ système de protection à liaison par fibre optique → *système 52.* R система защиты со связью посредством световода. D Schutzsystem mit Lichtwellenleiter. E sistema de protección con conexión por fibra óptica. I sistema di protezione con collegamento a fibre ottiche. N beveiligingssysteem met optische overdracht. P zabezpieczenie z łączem światłowodowym. S sträckskyddssystem med optisk förbindelse. (448)

133. optical viewing system : a means for viewing the point of beam impingement on the workpiece. ★ système de visée → *système 101.* R оптическая система наблюдения. D optisches Betrachtungssystem. E sistema visor. I sistema di visualizzazione. N vizier. P układ wziernikowy. S optisk tittglugg. (841)

134. output signal (of a transmission system) : → *signal 137*

135. overhead system : a system consisting essentially of overhead lines. ★ réseau aérien → *réseau 75.* R воздушная электрическая сеть. D Freileitungsnetz. E red aérea. I rete aerea. N bovengronds net. P sieć napowietrzna. S luftledningsnät. (601)

136. overload protection system : a protection system which is designed to provide either an alarm or a tripping signal in case of overload in the protected circuit. ★ système de protection de surcharge → *système 65.* R система защиты от перегрузки. D Überlastschutzsystem. E sistema de protección de sobrecarga. I sistema di protezione contro i sovraccarichi. N overbelastingsbeveiligingssysteem. P zabezpieczenie od przeciążeń. S överbelastningsskyddssystem. (448)

137. overreaching (for a distance protection system) : → *overreaching 1*

138. overvoltage (in a system) : → *overvoltage 6*

139. pair gain system : any system that enables a given number of pairs to provide service to more subscribers than there are pairs. ★ système à gain de paires → *système 13.* R ..... D Vorfeldeinrichtung. E sistema de ganancia de pares. I sistemi a concentrazione di linee. N ..... P system zwiększonego wykorzystania torów. S multiplexsystem. (722)

140. PAL (colour television) system (*Syn.* PAL (abbreviation)) : a simultaneous colour television system using, in baseband, a composite colour signal comprising a luminance signal and two chrominance components which are transmitted as quadrature amplitude modulation of a subcarrier, and in which, on each line, the polarity of one of the chrominance signals is inverted. *Notes. 1* — In most actual applications of PAL the scanning system uses 625 lines and 50 fields/second. The colour signal is transmitted using vestigial sideband amplitude modulation, and the sound is transmitted as frequency modulation of a separate radio frequency carrier. *2* — PAL is derived from "Phase Alternation Line". *3* — There are different versions of PAL, defined in CCIR Report 624. ★ système (de télévision en couleur) PAL → *système 90.* R система (цветного телевидения) PAL. (723)

141. permissive overreach distance protection system : an overreach distance protection system in which a signal is transmitted from one end which detects an internal fault ; the receipt of that signal at the other end permits the locally initiated tripping. ★ système de protection de distance à zone étendue et à autorisation → *système 61.* R система дистанционной защиты с расширенной зоной и разрешающим сигналом. D Distanzschutzsystem (mit erweitertem Meßbereich) mit Freigabeverfahren. E sistema de protección de distancia con zona ampliada y con autorización. I sistema di protezione a distanza a zona estesa del tipo a

consenso. N distantiebeveiliging met verlengd meetgebied en vrijgave via overdracht. P zabezpieczenie odległościowe z wydłużoną strefą i zdalnym przyzwalaniem wyłączenia. S tillåtande överräckande distansskyddssystem. (448)

142. **permissive protection system** : a protection system associated with signalling system (typically distance protection system) in which the receipt of a signal permits the locally initiated tripping. ★ système de protection à autorisation → *système 46.* R система защиты с разрешающим сигналом. D Schutzsystem mit Freigabeverfahren. E sistema de protección con autorización. I sistema di protezione a consenso. N beveiligingssysteem met vrijgave via overdracht. P zabezpieczenie ze zdalnym przyzwoleniem wyłączenia. S tillåtande reläskyddssystem. (448)

143. **permissive underreach distance protection system** : a distance protection system associated with a signalling system and at least two zones, for which an underreach zone from one end provides the tripping at the other end, even if the fault is detected within the overreach zone from that end. ★ système de protection de distance à zone réduite et à autorisation → *système 63.* R система дистанционной защиты с сокращенной зоной и разрешающим сигналом. D Distanzschutzsystem in Mitnahmeschaltung mit Abfrage. E sistema de protección de distancia con zona reducida y con autorización. I sistema di protezione a distanza a zona ridotta del tipo a consenso. N distantiebeveiliging met verkort meetgebied en vrijgave via overdracht. P zabezpieczenie odległościowe ze strefą skróconą ze zdalnym wyłączeniem. S tillåtande underräckande distansskyddssystem. (448)

144. **phase comparison protection system** : an absolutely selective protection system the operation and selectivity of which depend on the comparison of the phase of the currents at each end of the protected zone. *Note.* — The principle of this protection system is also applied to the comparison of the phase of the voltages. ★ système de protection à comparaison de phases → *système 48.* R система дифференциально-фазной защиты. D Phasenvergleich-Schutsystem. E sistema de protección por comparación de fases. I sistema di protezione a confronto di fase. N beveiliging met fasehoekvergelijking. P zabezpieczenie porównawczo-fazowe. S fasjämförelseskyddssystem. (448)

145. **pilot protection system** (*Syn.* protection system associated with signalling system) : → *system 162*

146. **pilot wire protection system** : a protection system associated with signalling system using pilot wires. ★ système de protection à fil pilote → *système 49.* R система защиты с контрольными проводами. D Schutzsystem mit Hilfsadern. E sistema de protección con connexión por hilo piloto. I sistema di protezione con collegamento a filo pilota. N beveiligingssysteem via hulpaders. P zabezpieczenie z łączem przewodowym. S sträckskyddssystem med hjäptrådsförbindelse. (448)

147. **pilot-tone system** (in stereophonic broadcasting) : a system for use with frequency-modulated transmitters for stereophonic broadcasting, in which the modulating signal of the main carrier is a multiplexed signal comprising a pre-emphasised sum signal, a double-sideband suppressed carrier amplitude modulated by a pre-emphasised difference signal, and a pilot-tone which allows stereophonic receivers to recover the difference signal. ★ système (de radiodiffusion stéréophonique) à fréquence pilote → *système 68.* R система с пилот-тоном (в стереофоническом радиовещании). (723)

148. **polar-modulation system (for stereophonic broadcasting)** : a system for use with frequency-modulated transmitters for stereophonic broadcasting in which the modulating signal of the main carrier is a multiplexed signal comprising a pre-emphasised sum signal and the signal resulting from the amplitude modulation of a reduced carrier by the pre-emphasised difference signal. ★ système (de radiodiffusion stéréophonique) à modulation polaire → *système 69.* R система с полярной модуляцией (для стереофонического радиовещания). (723)

149. **polling telecontrol system** (*Syn.* interrogative telecontrol system; interrogative telecontrol system) : a telecontrol system in which the monitored information is obtained upon request from the control centre or master station to outstations. ★ système de téléconduite à interrogation sélective → *système 79.* R система телемеханики по запросу. D Abfrage-System. E sistema de telecontrol por interrogación; sistema de telecontrol por escrutinio; sistema de telecontrol por exploración. I sistema di telecontrollo ad interrogazione. N systeem (van afstandsbesturing) met keuze-oproep. P system z przepytywaniem. S avfrågningssystem. (371)

150. **polyphase system** (*Syn. m*-phase system) : a system corresponding to a polyphase or *m*-phase circuit. ★ système polyphasé → *système 123.* R многофазная система (-фазная система). D Mehrphasensystem; m-Phasensystem. E sistema polifásico. I sistema polifase di ordine *m*. N meerfasenstelsel; m-fasenstelsel. P układ wielofazowy; układ m-fazowy. S flerfassystem; m-fassystem. (131)

151. **power demand from the system** : → *demand 20*

152. **power line carrier pilot protection system** : a protection system associated with signalling system using power line carrier link. ★ système de protection à liaison par courant porteur sur ligne d'énergie → *système 51.* R система защиты с высокочастотной связью по линии электропередачи. D Schutzsystem mit TFH (Trägerfrequenzübertragung auf Hochspannungsleintungen). E sistema de protección con conexión por corriente portadora sobre línea de energia. I sistema di protezione con collegamento a onda portante in linea. N beveiligingssysteem met overdracht via de hoogspanningsverbinding. P zabezpieczenie łączowe wykorzystujące linie energetyczne. S sträckskyddssystem med bärfrekvensförbindelse på kraftledning. (448)

153. **power system management** : → *management 2*

154. **power system planning** : → *planning 1*

155. **power system stability** : → *stability 11*

156. **primary system for the determination of reference equivalents** : a working standard system which is a copy of the new fundamental system for the determination of reference equivalents or NOSFER exact enough to give values very close to the reference equivalent. ★ système primaire pour la détermination des équivalents de référence → *système 125.* R первичная система для определения эквивалентов затухания. D Hauptbezugssystem zur Bestimmung der Bezugsdämpfung. E sistema primario para la determinación de los equivalentes de referencia. I sistema primario per la determinazione degli equivalenti di riferimento. N primaire standaard. P wzorzec pierwszego rzędu do określania równoważności odniesienia. S NOSFER-arbetslikare. (722)

157. **program (of a control system)** : → *program 6*

158. **programming system** : one or more programming languages and the necessary software, for using these languages with particular automatic data processing equipment. ★ système de programmation → *système 43.* R система программирования. D Programmiersystem; Programmsystem. E sistema de programación. I sistema di programmazione. N programmeringssysteem. P system programowania. S programmeringssystem. (714)

159. **protection (of a power system component)** : → *protection 38*

160. **protection system** : the system which acts only to prevent the reactor conditions from exceeding specified safe limits or to reduce the consequences of their being exceeded. The protection system may include various subsystems: emergency shut-down system, interlock system, power cutback system, alarm system, containment isolation system, emergency cooling system, etc. ★ système de protection → *système 44.* R система радиационного контроля, управления и защиты ядерного реактора. D Reaktorschutzsystem. E sistema de protección. I sistema di protezione. N beschermingssysteem. P system zabezpieczeń. S (reaktor)skyddssystem. (392)

161. **protection system** : a complete arrangement of protection equipment and other devices required to achieve a specified function based on one protection principle. *Examples :* A phase comparison protection system, a differential protection system. *Note.* — A protection system is all embracing and includes not only the protection equipment but also the necessary measuring transformers, communication links, tripping circuits, auxiliary supplies. Depending on the principle of the protection system, it may include one end or all ends of the protected circuit and possibly automatic reclosing equipment. ★ système de protection → *système 45.* R система защиты. D Schutzsystem. E sistema de protección. I sistema di protezione. N beveiligingssysteem. P układ zabezpieczeń, zabezpieczenie. S reläskyddssystem. (448)

162. **protection system associated with signalling system** (*Syn.* pilot protection system) : a protection system requiring a communication link between the ends of the protected circuit. ★ système de protection à liaison de transmission

→ *système 50.* **R** системы защиты, использующие каналы связи; системы защиты с контрольными сигналами. **D** Schutzsystem mit Informationsübertragung. **E** sistema de protección con conexión por transmisión. **I** sistema di protezione con collegamento a distanza. **N** beveiligingssysteem met overdracht. **P** zabezpieczenie z łączem; zabezpieczenie pilotowe; zabezpieczenie zdalne. **S** sträckskyddssystem. (448)

163. quadruplex system : a system of telegraphy arranged for the simultaneous independant transmission of two messages in each direction over a single telegraph circuit. ★ télégraphie quadruplex → *télégraphie 19.* **R** система квадруплекс. **D** Quadruplexsystem. **E** telegrafía cuádruplex. **I** sistema quadruplex. **N** quadruplex systeem. **P** system poczwórny. **S** kvadruplexsystem. (721)

164. quantized systems (of particles) : a system of particles the energies of which can have discrete values only. ★ système quantifié → *système 126.* **R** квантованная система (частиц). **D** quantisiertes System (von Teilchen). **E** sistema cuantificado (de partículas). **I** sistema quantico (di particelle). **N** gequantiseerd stelsel. **P** układ kwantowany (cząstek). **S** kvantiserat system. (521)

165. quiescent telecontrol system : a telecontrol transmission system in which equipment is normally alert but inactive and where information is transmitted only upon events. ★ système de téléconduite déclenché → *système 82.* **R** ждущая система телемеханики. **D** Fernwirksystem mit Spontanbetrieb. **E** sistema de telecontrol en reposo. **I** sistema di telecontrollo quiescente. **N** spontaan afstandsbesturingssysteem. **P** system (sterowania zdalnego) w gotowości (na rozkaz). **S** beredskapssystem. (371)

166. radial system : a system or part of a system consisting of single feeders supplied from a single source of supply. ★ réseau radial → *réseau 137.* **R** радиальная электрическая сеть. **D** Strahlennetz. **E** red radial. **I** rete radiale. **N** sternet. **P** sieć promieniowa. **S** radialnät. (601)

167. receiving system (of a complete telephone connection) : that part of a complete connection which consists of a telephone set used for receiving and the associated subscriber's telephone line, feeding bridge and circuits from a specified point. ★ système récepteur → *système 128.* **R** приемная часть (полного телефонного соединения). **D** Empfangsseite des Teilnehmersystems (einer vollständigen fersprechverbindung). **E** sistema receptor (de una cadena de conexión completa). **I** sistema ricevente (di un collegamento telefonico completo). **N** ontvangsysteem. **P** część odbiorcza (łańcucha telefonicznego). **S** mottagningssystem. (722)

168. recording system : apparatus whereby the state or configuration of a suitable recording medium can be changed in conformity with signals, in such a way that these signals can be reproduced. ★ système d'enregistrement → *système 103.* **R** устройство записи; записывающее устройство. **D** Aufzeichnungssystem. **E** sistema de registro. **I** sistema di registrazione. **N** opneemapparatuur. **P** urządzenie zapisujące; urządzenie rejestrujące. **S** inspelningssystem. (806)

169. reference system for the determination of AEN (*Syn.* SRAEN (abbreviation)) : a fundamental reference system of the CCITT comprising : the reference apparatus for the determination of transmission performance ratings or ARAEN ; a band-pass filter cutting off at 300 and 3400 Hz ; a device allowing specified electrical background noise to be injected at the input of the receiving system of the ARAEN. *Note.* — The SRAEN is described in the CCITT Recommendation P44 from the Volume V of the Yellow Book, 1981. ★ système de référence pour la détermination des affaiblissements équivalents pour la netteté → *système 75.* **R** эталонная система для определения эквивалента затухания по разборчивости; SRAEN. **D** SRAEN. **E** sistema de referencia para la determiación de atenuaciones equivalentes para la nitidez; SRAEN (abreviación). **I** sistema di riferimento per la determinazione dell'AEN. **N** SREAN. **P** układ odniesienia dlo określenia równoważnej wyrazistości. **S** SRAEN. (722)

170. regulating energy of a system : → *energy 71*

171. reinforcement of a system : → *reinforcement 2*

172. relatively selective protection system (*Syn.* non-unit protection system) : a protection system the operation and selectivity for which are solely dependent on the measurement, at one end of the protected section, of electrical quantities associated with time. ★ système de protection à sélectivité relative → *système 55.* **R** система защиты с относительной селективностью. **D** Schutzsystem mit relativer Selektivität. **E** sistema de protección con selectividad relativa. **I** sistema di protezione a selettività relativa. **N** niet-zonebeveiligingssysteem. **P** zabezpieczenie o względnej wybiórczości. **S** relativt selektivt reläskyddssystem. (448)

173. reproducing system : equipment for recreating signals embodied in a recording medium. ★ système de lecture → *système 38.* **R** устройство воспроизведения; воспроизводящее устройство. **D** Wiedergabesystem. **E** sistema de lectura. **I** sistema di riproduzione. **N** weergeefapparatuur. **P** urządzenie odczytujące; urządzenie odgrywające; urządzenie odtwarzające. **S** avspelningssystem; återgivningssystem. (806)

174. reserve power of a system : → *power 167*

175. resonant earthed (neutral) system (*Syn.* arc-suppression-coil-earth (neutral) system) : a system in which one or more neutral points are connected to earth through reactances which approximately compensate the capacitive component of a single-phase-to-earth fault current. ★ réseau compensé par bobine d'extinction → *réseau 80.* **R** электрическая сеть с дугогасящей катушкой. **D** gelöschtes Netz; Netz mit Erdschlusskompensation. **E** red compensada por bobina de extinción. **I** rete compensata con bobina d'estinzione. **N** door blusspoel gecompenseerd net. **P** sieć skompensowana (dławikiem). **S** spoljordat system. (601)

176. ring system (*Syn.* loop system) : → *system 109*

177. (safety) alarm system : → *alarm 7*

178. (safety) interlock system : → *interlock 4*

179. (safety) power cutback system : that part of the protection system which controls or provides for control of a limited decrease of power according to a programme. ★ système de réduction de puissance (de sécurité) → *système 70.* **R** канал снижения мощности. **D** Leistungssenkungssystem (Sicherheits-). **E** sistema de reducción de potencia (de seguridad). **I** apparecchiatura di protezione a programma. **N** vermogenterugschakelsysteem (veiligheid). **P** układ awaryjnego obniżania mocy. **S** programmerat säkerhetssystem. (392)

180. safety shut-down system (*Syn.* emergency shut-down system) : → *system 63*

181. satellite system : a space system using one or more artificial earth satellites. ★ système à satellites → *système 17.* **R** спутниковая система. **D** Satelliten-System. **E** sistema de satélites. **I** sistema a satelliti. **N** satellietsysteem. **P** system satelitarny. **S** satellitkommunikationssystem. (725)

182. SECAM (colour television) system (*Syn.* SECAM (abbreviation)) : a simultaneous line sequential colour television system using, in baseband, a composite colour signal comprising a luminance signal and two chrominance components each of which is transmitted sequentially, as frequency modulation of a separate subcarrier. The receiver is provided with a line period delay line to permit the simultaneous display of the three colour components. *Notes. 1* — In most applications of SECAM, the scanning system uses 625 lines and 50 fields/second. The colour signal is transmitted using vestigial sideband amplitude modulation, and the sound is transmitted as amplitude or frequency modulation of a separate radio frequency carrier. *2* — SECAM is derived from "Sequentiel Couleur à mémoire". *3* — There are different versions of SECAM defined in CCIR Report 624. ★ système (de télévision en couleur) SECAM → *système 91.* **R** система (цветного телевидения) SECAM. (723)

183. selectivity (for a protection system) : → *selectivity 5*

184. sending system (of a complete telephone connection) : that part of a complete connection which consists of a telephone set used for sending and the associated subscriber's telephone line, feeding bridge and circuits up to a specified point. ★ système émetteur → *système 109.* **R** передающая система (полного телефонного соединения). **D** Sendeseite des Teilnehmersystems (einer vollständigen Fersprechverbindung). **E** sistema emisor (de una cadena de conexión completa). **I** sistema emittente (di un collegamento telefonico completo). **N** zendsysteem. **P** część nadawcza (łańcucha telefonicznego). **S** sändningssystem. (722)

185. sequential colour television system : colour television system in which the components of the signal derived from the three primary colours are transmitted sequentially. ★ système (de télévision en couleur) séquentiel → *système 92.* **R** поочередная система цветного телевидения. (723)

186. signalling system : the repertoire of signals and the procedures for their interpretation and use, together with the hardware and software needed for the generation, transmission and reception of the signals. ★ système de signalisation

→ *système 77.* R система сигнализации. D Zeichengabesystem. E sistema de señalización. I sistema di segnalazione. N signaleringssysteem. P system sygnalizacji. S signalsystem. (714)

187. simultaneous colour television system : colour television system in which the components of the signal derived from the three primary colours are transmitted simultaneously. ★ système (de télévision en couleur) simultané → *système 97.* R одновременная система цветного телевидения. (723)

188. simultaneous line sequential colour television system : colour television system in which the luminance signal is continuously transmitted, whilst the chrominance is made up of two signals which are transmitted alternately, line by line but simultaneously with the luminance signal. ★ système (de télévision en couleur) séquentiel simultané → *système 96.* R одновременная строчно-поочередная система цветного телевидения. (723)

189. single-sided field system : a linear traction motor field system with only one face, adjacent to the armature. ★ inducteur simple → *inducteur 16.* R односторонний индуктор. D einseitiger Feldmagnet (Erregerfeld). E inductor simple. I induttore semplice. N enkel magneetgestel. P wzbudnik jednostronny. S enkelsidigt fältsystem. (811)

190. solidly bonded single-core cable system : a system of shielded single-core cables in which the shields of each phase are electrically bonded together and to earth at each end of the route and, if necessary, at intermediate positions. ★ circuit de câbles unipolaires à écran en court-circuit → *circuit 22.* R одножильные кабельные системы с глухим соединением. D festverbundenes einadriges Kabelsystem. E circuito de cables unipolares con pantalla en cortocircuitos. I sistema di cavi unipolari con schermi in corto circuito. N tweezijdig star geaard systeem van eenaderige kabels. P układ kabli jednożyłowych o żyłach powrotnych (powłokach metalowych) zwartych i/lub uziemionych. S slutna skärmar. (461)

191. solidly earthed (neutral) system : a system whose neutral point(s) is (are) earthed directly. ★ réseau à neutre directement à la terre → *réseau 65.* R электрическая сеть с глухозаземленной нейтралью. D Netz mit starrer Sternpunkterdung. E red de neutro rígidamente a tierra. I sistema con neutro direttamente a terra. N net met star geaard sterpunt. P sieć o punkcie zerowym bezpośrednio uziemionym. S direktjordat system. (601)

192. space system : any combination of earth stations, space stations and exceptionally reflecting satellites cooperating to provide space radiocommunications for specific purposes. ★ système spatial → *système 130.* R космическая система. D Weltraum-Funksystem. E sistema espacial. I sistema spaziale. N ruimtecommunicatiesysteem. P system kosmiczny. S rymdkommunikationssystem. (725)

193. spinning reserve of a system : → *reserve 7*

194. stability limit of a system state variable : → *limit 18*

195. stability margin of a system state variable : → *margin 15*

196. standby supply system : a supply system intended to maintain the functioning of the installation or parts or part thereof, in case of interruption of the normal supply, for reasons other than safety of persons. ★ alimentation de remplacement → *alimentation 2.* R система резервного питания. D Ersatzstromversorgungsanlage. E sistema de doble alimentación. I alimentazione di riserva. N noodstroominstallatie. P układ rezerwowego zasilania; zasilanie rezerwowe. S reservkraftsystem. (826)

197. star system (*Syn.* star network) : cabled distribution system, in which all the subscribers feeders originate from the same point. ★ réseau (de télédistribution) en étoile → *réseau 103.* R радиальная сеть распределения. (723)

198. start-stop system of data transmission : a system of data transmission using start-stop transmission. ★ transmission de données arythmique → *transmission 78.* R стартстопная передача данных. D Start-Stop-System (in der Datenübertragung). E transmisión de datos arrítmica. I sistema di trasmissione dati a start e stop. N start/stop-systeem van datatransmissie. P system arytmiczny teledacyjny. S start-stoppsystem för dataöverföring. (721)

199. start-stop system of telegraphy : a system of alphabetic telegraphy using start-stop transmission. ★ télégraphie arythmique → *télégraphie 8.* R стартстопное телеграфирование. D Start-Stop-System (in der Telegraphie). E telegrafía arrítmica. I sistema telegrafico a start e stop. N start/stop-systeem van telegraaf. P system arytmiczny telegraficzny. S start-stoppsystem för telegrafi. (721)

200. static Kraemer system : a system of speed control below synchronous speed for wound-rotor induction motors. Slip power is recovered through the medium of a static convertor equipment electrically connected between the secondary winding of the induction motor and a power system. ★ commande Kraemer statique → *commande 81.* R статическая система регулирования скорости вращения асинхронного двигателя с фазным ротором. D Stromrichterkaskade. E sistema Kraemer estático. I sistema Kraemer statico. N Kraemer-aandrijving met statische omzetter voor terugvoeding in het net. P układ Kraemera ze statycznym przekształtnikiem. S strömriktarkaskad. (411)

201. steady state of a system : → *steady-state 5*

202. steady state stability of a power system : → *stability 19*

203. stepped start-stop system of data transmission : a start-stop system of data transmission in which the character signals occur at regular intervals. ★ transmission de données arythmique cadencée → *transmission 79.* R циклическая стартстопная передача данных. D gleichförmiges Start-Stop-System (in der Datenüberstragung). E transmisión de datos arrítmica con cadencia. I sistema di trasmissione dati cadenzato. N vast start/stop-systeem van datatransmissie. P system arytmiczny krokowy teledacyjny. S stegat start-stoppsystem för dataöverföring. (721)

204. stepped start-stop system of telegraphy : a start-stop system of telegraphy in which the character signals occur at regular intervals. ★ télégraphie arythmique cadencée → *télégraphie 9.* R циклическое стартстопное телеграфирование. D gleichförmiges Start-Stop-System (in der Telegrafie). E telegrafía arrítmica con cadencia. I sistema telegrafico cadenzato. N vast start/stop-systeem van telegraaf. P system arytmiczny krokowy telegraficzny. S stegat start-stoppsystem för telegrafi. (721)

205. stereophonic sound system : sound system in which a plurality of microphones, transmission channels, and loudspeakers or earphones are arranged so as to provide a listener with a sensation of the spatial distribution of the sound sources. ★ système électroacoustique stéréophonique → *système 108.* R стереофоническая система воспроизведения звука. D stereophone Übertragungsanlage. E sistema estereofónico. I sistema stereofonico. N stereofonisch geluidssysteem. P układ stereofoniozny. S stereofoniskt ljudsystem. (801)

206. subscriber system (in transmission planning) : a subscriber's line associated with that part of a private telephone installation connected to this line during a telephone call. *Note.* — This term is used in the context of transmission planning and performance. ★ système d'abonné → *système 27.* R абонентская система (в планировании передачи). D Teilnehmersystem. E sistema de abonado. I impianto d'abbonato. N abonnee-aansluiting. P układ abonencki. S abonnentsystem. (722)

207. supply system for safety services (*Syn.* emergency power system (USA)) : a supply system intended to maintain the functioning of equipment essential for safety of persons. *Note.* — The supply system is intended to include the source and the circuits up to the terminals of the current using equipment. In certain cases it may also include the current using equipment. ★ alimentation pour services de sécurité → *alimentation 5.* R питание систем обеспечения безопасности. D Sicherheitsstromversorgungsanlage. E sistema de alimentación para servicios de seguridad. I alimentazione per servizi di sicurezza. N noodstroominstallatie voor veiligheidsdoeleinden. P układ zasilania obwodów bezpieczeństwa; układ awaryjnego zasilania. S reservkraftsystem för personsäkerhet. (826)

208. supply system impedance : → *impedance 57*

209. switched-star system (*Syn.* switched-star network) : a star or multi-star system in which subscribers feeders can be individually switched. ★ réseau (de télédistribution) commuté → *réseau 101.* R радиальная сеть распределения с подключением. (723)

210. synchronization of two systems : → *synchronization 20*

211. synchronous operation of a system : → *operation 71*

212. system : set of interdependent elements constituted to achieve a given objective by performing a specified function. *Note.* — The system is considered to be separated from the environment and other external systems by an imaginary surface which cuts

the links between them and the considered system. Through these links, the system is affected by the environment, is acted upon by the external systems, or acts itself on the environment or the external systems. ★ système → *système 11.* R система. D System. E sistema. I sistema. N systeem. P układ; system. S system. (351)

213. **system changeover switch** : → *switch 52*
214. **system configuration** : → *configuration 18*
215. **system constants** (*Syn.* system parameters) : → *parameter 9*
216. **system control station** : → *station 39*
217. **system demand control** : → *control 186*
218. **system deviation** : → *deviation 20*
219. **system diagram** : → *diagram 20*
220. **system dynamic range** (*Syn.* dynamic range) : → *range 17*
221. **(system) gamma** : → *gamma 12*
222. **system height** : → *height 6*
223. **system impedance ratio** : → *ratio 98*
224. **system incident** : → *incident 5*
225. **system loss** : → *loss 98*
226. **system of units** : a set of base units and derived units for a specified group of quantities. ★ système d'unités → *système 107.* R система единиц. D Einheitensystem. E sistema de unidades. I sistema di unità. N eenhedenstelsel. P układ jednostek (miar). S enhetssystem. (111)
227. **system operational diagram** : → *diagram 21*
228. **system outlet** : → *outlet 6*
229. **system parameters** : → *parameter 9*
230. **system pattern** : → *pattern 30*
231. **system state variables** : → *variable 9*
232. **tape transport system** : a mechanical part driven by one or more motors, the rotation of which determines the tape speed. ★ dispositif d'entraînement de la bande magnétique → *dispositif 64.* R движущий механизм. D Bandtransportsystem. E sistema de arrastre de la cinta. I dispositivo di trascinamento del nastro magnetico. N bandtransportsysteem. P mechanizm przesuwu (taśmy). S bandtransportsystem. (806)
233. **"target" system** : an anticipated model of a power system, designed to ensure the sipply of long-term foreseeable loads (including power as well as location) and which constitutes a guide for the choice of a method of reinforcement in the short term. ★ réseau cible → *réseau 77.* R перспективная модель энергосистемы. D Zielnetz. E red modelo. I rete obiettivo. N streefsysteem. P system «docelowy». S modellnät. (603)
234. **telecommunication system** (*Syn.* telecommunication network) : → *network 103*
235. **television system** : specification completely defining the permanent features of a television signal. In particular these specifications define the following : the scanning system, the form of the synchronizing signals, the class of vision and sound modulation, the RF channel bandwidth and the relative positions of the vision and sound carriers within the channel. ★ système de télévision → *système 83.* R телевизионная система. (723)
236. **three-phase system diagram** : → *diagram 22*
237. **track return system** : a system in which the running rails of the track form a part of the return circuit for the traction current. ★ système à retour par la voie → *système 16.* R система возврата тока через ходовые рельсы. D Schienenrückleitung. E sistema de retorno por la vía. I ritorno attraverso le rotaie. N systeem waarin de spoorstaven deel uitmaken van het retourstroomcircuit. P obwód powrotny szynowy. S system med rälåterledning. (811)
238. **transient stability of a power system** : → *stability 21*
239. **transient state of a system** : → *state 46*
240. **transmission system** : 1. The set of principles defining a particular method of transmission. 2. The whole of the means of transmission between two points, comprising thetra nsmission medium, terminal equipment, any necessary intermediate equipment and any equipment provided for such ancillary purposes as power feeding, supervision and testing. ★ système de transmission → *système 98.* R система передачи. D Übertragungssystem. E sistema de transmisión. I sistema di trasmissione. N transmissiesysteem. P system teletransmisyjny; zestrój teletransmisyjny. S transmissionssystem. (704)
241. **transverse differential protection system** : a relatively selective protection system applied to parallel connected circuits and in which operation depends on unbalanced distribution of currents between them. ★ système de protection différentielle transversale → *système 67.* R система поперечной дифференциальной защиты. D Quer-Differentialschutzsystem. E sistema de protección diferencial transversal. I sistema di protezione differenziale trasversale. N dwarsdifferentiaalbeveiligingssysteem. P zabezpieczenie różnicowe poprzeczne. S tvärdifferentialskyddssystem. (448)
242. **tree and branch system** : cabled distribution system having one or more feeders from which subscribers feeders branch at different points. ★ réseau (de télédistribution) en arbre → *réseau 102.* R разветвленная сеть распределения. (723)
243. **tree'd system** : a modified radial system to which spurs have been added. ★ réseau arborescent → *réseau 76.* R радиально-магистральная электрическая сеть. D verzweigtes Netz. E red arborescente. I rete ad albero. N vertakt net. P sieć promieniowa rozgałęziona. S förgrenat nät. (601)
244. **trichromatic system** : system for specifying colour stimuli in terms of tristimulus values, based on matching colours by additive mixture of three suitably chosen reference colour stimuli. ★ système trichromatique → *système 132.* R трёхцветная колориметрическая система. D trichromatisches System. E sistema tricromático. I sistema tricromatico; sistema colorimetrico. N trichromatisch stelsel. P układ kolorymetryczny. S trikromatiskt system. (845)
245. **underground system** : a system consisting essentially of underground cables. ★ réseau souterrain → *réseau 140.* R кабельная электрическая сеть. D Kabelnetz. E red subterránea. I rete sotterranea. N ondergronds net; kabelnet. P sieć kablowa. S jordkabelnät. (601)
246. **underreaching (for a distance protection system)** : → *underreaching 1*
247. **unit protection system** (*Syn.* absolutely selective protection system) : → *system 1*
248. **Van Duuren radiotelegraph system** (*Syn.* TOR (abbreviation)) : a radiotelegraphy error detecting and feedback system in general a time-division multiplex assembling two or four channels using the Van Duuren code. *Notes. 1* — The main characteristics of the system are defined in CCIR Recommendation 342, which also defines concepts specific to this procedure. *2* — TOR is for "Teleprinting Over Radiocircuits". ★ radiotélégraphie Van Duuren → *radiotélégraphie 1.* R радиотелеграфная система Ван Дюрена; система TOP. D van-Duuren-Funktelegrafiesystem. E radiotelegrafía Van Duuren. I sistema radiotelegrafico di Van Duuren. N Van-Duuren-radiotelegrafiesysteem. P system radiotelegraficzny Van Duurena. S van Duuren-radiotelegrafi. (721)
249. **Ward-Léonard system** : a method of controlling the speed and direction of rotation of a direct current motor by varying and if necessary reversing its armature voltage by the control of the field current of a direct current generator supplying the motor armature. ★ commande Ward-Léonard → *commande 112.* R система генератор-двигатель; система Вард-Леонарда. D Ward-Léonard-Steuerung. E sistema Ward-Léonard. I azionamento Ward-Léonard. N Ward-Léonard-aandrijving. P układ Warda-Leonarda. S Ward-Leonardsystem. (411)
250. **Wheatstone automatic system** : a Morse telegraphy system in which signals are transmitted automatically using a previously prepared perforated tape, and recorded automatically either in the form of a perforated tape for automatic printing or in the form of an inked tape for translation by an operator. ★ télégraphie automatique Morse → *télégraphie 10.* R автоматическая система Уитстона. D automatisches Wheatstone-System. E telegrafía automática Morse. I sistema di trasmissione automatica Wheatstone. N Wheatstone automatisch systeem. P system automatyczny Wheatstone'a. S automatiskt Wheatstone-system. (721)
251. **wiring system** : an assembly made up of a cable or cables or busbars and the parts which secure and, if necessary, enclose the cable(s) or busbars. ★ canalisation (électrique) → *canalisation 3.* R система электропроводки. D Kabel- und Leitungsanlage. E canalización (eléctrica). I conduttura (elettrica). N elektrische leidingen en bijbehoren. P oprzewodowanie. S ledningssystem. (826)

252. X-ray television system : apparatus serving to analyze an X-ray image and to transform it into a video signal. *Note.* — Two usages are to be distinguished: *1.*Fluoroscopic: in which the image on the output phosphor of an image intensifier tube is transmitted for direct observation to a television monitor. *2.*Radiographic: in which the signal is recorded in a suitable manner. ★ appareil de télévision radiologique → *appareil 35.* **R** рентгеновская телевизионная система. **D** Röntgen-Fernseheinrichtung. **E** aparato de televisión de rayos X. **I** catena televisiva per radiologia. **N** röntgentelevisiesysteem. **P** rentgenowski system telewizyjny. **S** röntgen-TV. (881)

systematic

1. **systematic failure** : → *failure 49*
2. **systematic fault** : → *fault 75*

SYU

1. **SYU** (*Syn.* synchronization signal unit) : → *unit 63*

T

T

1. **tesla, T** : → *tesla 1*

table

1. **horizontal table** : a device for holding the patient, with the body axis horizontal, for radiography and/or fluoroscopy. ★ table horizontale → *table 4.* **R** горизонтальный стол. **D** (Horizontal-)Durchleuchtungstisch. **E** mesa horizontal. **I** trocoscopio. **N** horizontale tafel. **P** stół do zdjęć rentgenowskich. **S** undersökningsbord. (881)
2. **table lamp** : → *lamp 64*
3. **tilting table** : a device for holding the patient for radiography and/or fluoroscopy so that the surface on which the patient is placed can be inclined from the vertical to the horizontal or beyond by hand or by motor drive. ★ table basculante → *table 3.* **R** наклонный стол. **D** umlegbares Durchleuchtungsgerät; (Kipptisch). **E** mesa basculante. **I** tavolo ribaltabile. **N** omlegbare tafel. **P** ścianka rentgenowska zwodzona. **S** fällbord. (881)

tablet

1. **graphics tablet** : electronic surface upon which an operator can draw with an appropriate device, which provides a digital signal which can be converted to a complete video signal. ★ tablette graphique → *tablette 2.* **R** графическое табло. (723)

tabulation

1. **horizontal tabulation** : a format effector which advances the printing or display position to the next predetermined character position of the same line. ★ tabulation horizontale → *tabulation 1.* **R** горизонтальное табулирование. **D** Horizontal-Tabulator. **E** tabulación horizontal. **I** tabulazione orizzontale. **N** horizontale tab. **P** tabulacja pozioma. **S** horisontaltabulering. (721)
2. **vertical tabulation** : a format effector which advances the printing or display position to the same character position on the next predetermined line. ★ tabulation verticale → *tabulation 2.* **R** вертикальное табулирование. **D** Vertikal-Tabulator. **E** tabulación vertical. **I** tabulazione verticale. **N** verticale tab. **P** tabulacja pionowa. **S** vertikaltabulering. (721)

tacho-generator

1. **tacho-generator** : a generator which produces an output voltage proportional to the rotor angular speed. ★ génératrice tachymétrique → *générateur 44.* **R** тахогенератор. **D** Tacho-Generator. **E** generador tacométrico. **I** generatore tachimetro. **N** tachogenerator. **P** prądnica tachometryczna. **S** takometergenerator. (811)

tachograph

1. **tachograph** : an instrument which produces a record of speed, usually the train speed, as a function of time or distance travelled. ★ tachygraphe → *tachygraphe 1.* **R** тахограф. **D** Fahrtenschreiber. **E** tacógrafo. **I** tachigrafo. **N** tachograaf. **P** rejestrator prędkości. **S** färdskrivare. (811)

tachometer

1. **tachometer** : an instrument for measuring the speed of rotation of a rotating body. ★ compteur de tours → *compteur 15.* **R** тахометр. **D** Drehzahlmesser. **E** cuento-vueltas; tacómetro. **I** tachimetro (della velocità di rotazione). **N** toerenteller. **P** obrotomierz; miernik prędkości obrotowej. **S** varvräknare. (811)

tagged

1. **tagged** (*Syn.* labelled) : → *labelled 1*

tagging

1. **time tagging** (*Syn.* absolute chronology) : → *chronology 1*

tail

1. **cold tail** (*Syn.* cold lead) : → *lead 2*
2. **comet tail** : impairment appearing as a tail following bright areas of moving objects, due to image retention. ★ traînage dynamique → *traînage 7.* **R** хвост кометы. (723)
3. **impulse chopped on the tail** : → *impulse 8*
4. **tail light** (*Syn.* rear position light) : → *light 57*
5. **tail of a voltage impulse** : that part of an impulse which occurs after the peak. ★ queue d'une tension de choc → *queue 4.* **R** хвост импульса напряжения. **D** Rücken einer Stoßspannung. **E** cola de la onda de un impulso de tensión. **I** coda di una tensione a impulso. **N** rug van een stootspanning. **P** grzbiet udaru napięcia. **S** rygg hos spänningsstöt; stötrygg. (604)
6. **tail water reservoir** : → *reservoir 8*

tailing

1. **tailing** : a defect in facsimile reproduction whereby a sudden variation in luminance, e.g. from black to white, on the original document, is shifted irregularly, in the scanning direction on the received document. *Note.* — In document facsimile, tailing does not apply to the reproduction of details which are smaller than the picture element and which may sometimes be systematically prolonged at the transmitter. ★ traînage → *traînage 3.* **R** затягивание; образование хвостов. **D** nachziehen. **E** arrastre. **I** effetto coda. **N** achterblijven. **P** rozmycie. **S** eftersläpning. (721)

take-over

1. **take-over current** : → *current 206*

take-up

1. **take-up spool** : → *spool 4*

taking

1. **taking** (*Syn.* shooting) : → *shooting 1*

Talbot

1. **Talbot's law** : → *law 13*

talk-back

1. **talk-back circuit** : → *circuit 175*

tandem

1. **tandem** : mode of operation in which the traffic coming from exchanges is switched to other exchanges, in a telecommunications network. ★ transit → *transit 7.* **R** транзит. **D** Tandem; Vermittlungsstelle. **E** tránsito. **I** transito. **N** transiet. **P** tranzyt. **S** tandem. (714)
2. **tandem motor** : → *motor 103*

tandem-compound

1. **tandem-compound set** : → *set 53*

tangent

1. **(dielectric) loss tangent** (*Syn.* dielectric dissipation factor) : → *factor 42*
2. **loss tangent** (*Syn.* dielectric dissipation factor) : → *factor 41*
3. **loss tangent test** : → *test 49*
4. **tangent of the loss angle (of a capacitor)** (*Syn.* tan δ (abbreviation)) : the ratio between the equivalent series resistance and the capacitive reactance of the capacitor at specified sinusoidal alternating voltage and frequency. ★ tangente de l'angle de pertes (d'un condensateur) → *tangente 5.* **R** тангенс угла потерь (конденсатора); T (конденсатора). **D** Tangens des Verlustwinkels (eines Kondensators); tan δ (eines Kondensators). **E** tangente del ángulo de pérdidas (de un condensador); tan δ (de un condensador). **I** tangente dell'angolo di perdita (di un condensatore); tan δ (di un condensatore). **N** verliesfactor van een condensator; tan δ van een condensator. **P** tangens kąta strat kondensatora; tgδ (kondensatora). **S** förlustfaktor. (436)

5. **tan δ** (*Syn.* dielectric dissipation factor) : → *factor 41*
6. **tan δ** (*Syn.* tangent of the loss angle (of a capacitor)) : → *tangent 4*

tangential

1. **tangential junction** : → *junction 19*
2. **tangential projection** : → *projection 10*
3. **tangential therapy** : → *therapy 11*
4. **tangential tracking control** : → *control 187*

tank

1. **dead tank circuit-breaker** : → *circuit-breaker 10*
2. **expansion tank** (*Syn.* oil conservator) : → *conservator 1*
3. **live tank circuit-breaker** : → *circuit-breaker 14*
4. **pressure tank** (*Syn.* pressure reservoir) : a reservoir intended to accomodate changes in the volume of the oil in oil-filled cable. ★ réservoir de pression → *réservoir 6.* R бак давления; резервуар давления. D Drucktank. E depo'sito de presio'n. I serbatoio a pressione. N oliedrukvat. P zbiornik ciśnieniowy (wyrównawczy). S expansionskärl. (461)
5. **surge tank** (*Syn.* surge shaft) : an open-surface reservoir of water decreasing the effects of shock pressure waves in the penstock. ★ cheminée d'équilibre → *cheminée 2.* R уравнительный резервуар. D Wasserschloss. E chimenea de equilibrio. I pozzo piezometrico. N waterslot. P komora wyrównawcza. S svallgalleri. (602)
6. **tank** : the vessel in which the core, yoke and windings of a transformer or reactor are contained. ★ cuve → *cuve 1.* R бак. D Kessel. E cuba. I cassa; cassone. N bak. P kadź. S kärl. (811)

tap

1. **tap** (*Syn.* tapping) : → *tapping 11*
2. **tap** : a passive device inserted in a feeder to divert a small portion of the signal power into another feeder. ★ dérivateur → *dérivateur 2.* R ответвитель. (723)
3. **tap position indicator** : → *indicator 25*
4. **tap selector** : → *selector 20*

tap-change

1. **tap-change in progress indicator** : → *indicator 26*
2. **tap-change operation** : → *operation 72*

tap-changer

1. **on-load tap-changer** (*Syn.* load-tap-changer (USA)) : a device for changing the tapping connections of a winding, suitable for operation while the transformer is energized or on load. ★ changeur de prises en charge → *changeur 5.* R устройство переключения ответвлений обмоток трансформатора под нагрузкой. D Stufenschalter. E cambiador de tomas en carga. I commutatore sotto carico. N regelschakelaar. P przełącznik zaczepów podobciążeniowy. S lindningskopplare. (421)
2. **(on-load) tap-changer** : a switchgroup allowing transformer tappings to be changed without interrupting the traction circuits. ★ graduateur → *graduateur 1.* R переключатель ступеней (под нагрузкой). D Stufenschaltwerk. E cambiador de tomas de carga; graduador. I graduatore. N regelschakelaar (onder belasting). P przełącznik zaczepów pod obciążeniem. S lindningskopplare. (811)

tape

1. **adhesive tape** : a tape which adheres to itself or other materials with or without treatment immediately before application. ★ ruban adhésif → *ruban 10.* R липкая лента. D Klebeband. E cinta adhesiva. I nastro adesivo. N plakband. P taśma klejąca. S tejp; klisterremsa. (212)
2. **blank magnetic tape** : a tape which has never been magnetized. ★ bande magnétique vierge → *bande 41.* R магнитная лента, не использованная после изготовления. D nicht magnetisiertes Band, Leerband; jungfräuliches Band. E cinta magnética virgen. I nastro magnetico vergine. N maagdelijke magnetische band. P taśma magnetyczna czysta. S nyband. (806)
3. **calibration tape** : a magnetic tape on which signals have been recorded, corresponding to a specified characteristic, used to calibrate a reproducing chain. *Note.* — A different calibration tape is required for each tape speed. ★ bande étalon → *bande 34.* R измерительная магнитная лента. D Meßband; Testband. E cinta de calibración; cinta patrón. I nastro campione. N kalibreerband. P taśma wzorcowa. S (magnetiskt) kalibreringsband. (806)
4. **frequency tape** : a calibration (test) tape on which signals have been recorded at fixed or gliding frequencies under specified conditions. ★ bande de fréquences → *bande 18.* R измерительная магнитная лента для определения амплитудно-частотной характеристики. D Frequenzband. E cinta de frecuencias. I nastro di frequenza. N frequentietestband. P taśma pomiarowa częstotliwościowa. S referensfrekvensband. (806)
5. **heating tape unit** : → *unit 30*
6. **insulated tape heating element** : → *heating element 4*
7. **line-up tape** : a calibration (test) tape on which signals have been recorded at a specified level and at the reference frequency. *Note.* — It provides a reference for the adjustment of the gain of the reproducing chain. ★ bande de niveau → *bande 21.* R измерительная магнитная лента для определения уровня записи. D Pegeltonband. E cinta de nivel. I nastro di livello. N oplijnband. P taśma pomiarowa. S referensnivåband. (806)
8. **magnetic tape** : a recording medium in the form of a ribbon, made of a non-magnetic base, coated with a magnetizable material in a suitable binder. ★ bande magnétique → *bande 40.* R магнитная лента. D Magnetband. E cinta magnética. I nastro magnetico. N magnetische band. P taśma magnetyczna. S magnetband. (806)
9. **pressure-sensitive adhesive tape** : an adhesive tape which requires no prior treatment and adheres on being pressed into place. ★ ruban adhésif par pression → *ruban 11.* R липкая лента чувствительная к давлению. D selbstklebendes Isolierband. E cinta adhesiva sensible a la presión. I nastro autoadesivo. N zelfklevend band. P taśma klejąca dociskowa. S självhäftande tejp. (212)
10. **reference tape** : an unrecorded magnetic tape with specified characteristics, selected as a reference, to enable a comparison to be made with other magnetic tapes or to measure characteristics of magnetic recorders. ★ bande de référence → *bande 24.* R типовая магнитная лента. D Bezugsband. E cinta de referencia. I nastro di riferimento. N referentieband. P taśma odniesienia. S (magnetiskt) referensband. (806)
11. **reverse relative tape efficiency** : → *efficiency 38*
12. **short-circuit flux of a magnetic tape** : → *flux 23*
13. **spiral binder tape** : a metallic tape wound in an open helix on wire armour to keep it in place. ★ contre-spire → *contre-spire 1.* R спиральная скрепляющая лента. D Halbewendel. E contraespira. I nastro metallico controspirale. N tegenspiraal. P spirale przeciwkrętne. S motspiral. (461)
14. **steady state tape tension** : → *tension 4*
15. **tape** : film or sheeting of arbitrarily limited maximum width and in long continuous lengths, generally supplied in roll form. *Note.* — The maximum limiting width is typically about 100 mm. ★ bande → *bande 9.* R лента. D Band. E cinta; banda. I banda; nastro. N band. P taśma. S plastband. (212)
16. **tape curvature** : → *curvature 1*
17. **tape deck** : → *deck 1*
18. **tape editing** : → *editing 4*
19. **tape guide** : → *guide 7*
20. **(tape) perforator** : → *perforator 4*
21. **tape printer** : → *printer 2*
22. **tape speed** : → *speed 55*
23. **tape teleprinter** : → *teleprinter 2*
24. **tape tension** : → *tension 5*
25. **tape transport system** : → *system 232*
26. **telerecording equipment for magnetic tape** (*Syn.* video tape recorder) : → *tape recorder 6*
27. **video tape reproducer** : → *reproducer 2*

tape recorder

1. **helical video tape recorder** : a video tape recorder wherein the tape follows a helical path, resulting in the video tracks being oblique with respect to the edges of the magnetic tape. ★ magnétoscope à enregistrement hélicoïdal → *magnétoscope 2.* R видеомагнитофон с наклонностроочной записью; одноголовочный видеомагнитофон; двухголовочный видеомагнитофон. D Videobandgerät mit Schrägspuraufzeichnung; Schrägspuraufzeichnungsanlage. E magnetoscopio de registro helicoidal. I video-registratore con registrazione elicoidale. N beeldbandopnemer met diagonale registratie. P magnetowid

helikalnozapisowy. S videobandspelare för spiralspårsinspelning. (806)

2. **longitudinal video tape recorder** : a video tape recorder wherein one or several tracks parallel to the edges of the magnetic tape are traced by the video head(s). ★ magnétoscope à enregistrement longitudinal → *magnétoscope 3.* R видеомагнитофон с продольной записью. D Videobandgerät mit Längsspuraufzeichnung; Längsspuraufzeichnungsanlage. E magnetoscopio de registro longitudinal. I video-registratore con registrazione longitudinale. N beeldbandopnemer met langsregistratie. P magnetowid wzdłużnozapisowy. S videobandspelare för längsspårsinspelning. (806)
3. **signal to noise ratio of a tape recorder** : → *ratio 86*
4. **tape recorder** : a magnetic recording/reproducing apparatus in which the recording medium is in the form of a magnetic tape. ★ magnétophone → *magnétophone 1.* R магнитофон. D Magnetbandgerät. E magnetófono. I magnetofono. N bandopnemer/weergever. P magnetofon taśmowy. S bandspelare. (806)
5. **transverse video tape recorder** : a video tape recorder wherein one or several tracks approximately perpendicular to the edges of the magnetic tape are traced by the video head(s). ★ magnétoscope à enregistrement transversal → *magnétoscope 4.* R видеомагнитофон с поперечнострочной записью; четырехголовочный видеомагнитофон. D Videobandgerät mit Querspuraufzeichnung; Querspuraufzeichnungsanlage. E magnetoscopio de registro transversal. I video-registratore con registrazione trasversale. N beeldbandopnemer met dwarsregistratie. P magnetowid poprzecznozapisowy. S videobandspelare för tvärsspårsinspelning. (806)
6. **video tape recorder** (*Syn.* telerecording equipment for magnetic tape; magnetoscope (instrument)) : an equipment for recording and reproducing video and audio signals on magnetic tape. ★ magnétoscope → *magnétoscope 1.* R видеомагнитофон. D Videobandgerät. E magnetoscopio. I video-registratore. N beeldbandopnemer/weergever. P magnetowid taśmowy. S videobandspelare. (723,806,881)

taped

1. **taped components** : → *component 59*

tape-feed

1. **automatic transmitter with controlled tape-feed mechanism** : → *transmitter 3*

tape-reader

1. **coupled reperforator and tape reader** : → *reperforator 1*
2. **tape-reader** (*Syn.* tape-reading head) : → *head 27*

tape-reading

1. **tape-reading head** : → *head 27*

tapered

1. **tapered distribution** : → *distribution 42*
2. **tapered fibre** : → *fibre 27*
3. **tapered waveguide** : → *waveguide 17*

tapped

1. **tapped line** : → *line 161*
2. **tapped (tee off) substation** : → *substation 38*
3. **tapped transformer** : → *transformer 66*

tapping

1. **electrode tapping for submerged arc furnace** : an auxiliary electrode supplied by low power source which is used to burn out the tapping hole stopper. ★ électrode de coulée d'un four à arc submergé → *électrode 39.* R электрод для прожигания летки в дуговой печи с погруженной дугой. D Abstichelektrode für Öfen mit unterdrücktem Lichtbogen. E electrodo de colada de un horno de arco. I elettrodo di colata di un forno ad arco sommerso. N aftaphulpelektrode. P elektroda spustowa (pieca łukowego) o **elektrodach zanurzanych.** S tapphålselektrod. (841)
2. **field (weakening by) tapping** : a method of field-weakening in which regulation of field strength is effected by varying the number of turns in circuit without appreciably varying the current. ★ affaiblissement de champ par variation du nombre de spires → *affaiblissement 10.* R ослабление поля секционированием обмотки возбуждения. D Feldschwächung durch Anzapfung. E debilitamiento de campo por variación del número de espiras. I indebolimento di campo con variazione (del numero) di spire. N veldverzwakking door minder windingen. P osłabianie wzbudzenia zaczepowe. S fältförsvagning genom lindningsomkoppling. (811)
3. **full-power tapping** : a tapping whose tapping power is equal to the rated power. ★ prise à pleine puissance → *prise 21.* R ответвление с полной мощностью. D Anzapfung für volle Leistung. E toma de plena potencia. I presa a piena potenza. N aftakking voor vol vermogen. P zaczep o pełnej mocy. S fulleffektläge. (421)
4. **impedance voltage at rated current (for the principal tapping)** : → *voltage 86*
5. **minus tapping** : a tapping whose tapping factor is lower than 1. ★ prise soustractive → *prise 37.* R отрицательное ответвление обмотки. D Minus-Anzapfung. E toma sustractiva. I presa sottrattiva. N minaftakking. P zaczep ujemny. S minusreglerläge. (421)
6. **number of inherent tapping positions** : → *number 19*
7. **number of service tapping positions** : → *number 21*
8. **plus tapping** : a tapping whose tapping factor is higher than 1. ★ prise additive → *prise 23.* R положительное ответвление обмотки. D Plus-Anzapfung. E toma aditiva. I presa additiva. N plusaftakking. P zaczep dodatni. S plusreglerläge. (421)
9. **principal tapping** : the tapping to which the rated quantities are related. ★ prise principale → *prise 36.* R основное ответвление обмотки. D Hauptanzapfung. E toma principal. I presa principale. N hoofdaftakking. P zaczep znamionowy. S huvudreglerläge. (421)
10. **reduced-power tapping** : a tapping whose tapping power is lower than the rated power. ★ prise à puissance réduite → *prise 22.* R ответвление со сниженной мощностью. D Anzapfung für verringerte Leistung. E toma de potencia reducida. I presa a potenza ridotta. N aftakking voor verminderd vermogen. P zaczep o zmniejszonej mocy. S reglerläge med reducerad effekt. (421)
11. **tapping** (*Syn.* tap) : a connection made at some intermediate point in a winding. ★ prise → *prise 18.* R ответвление обмотки. D Anzapfung. E toma. I presa. N aftakking. P zaczep. S reglerläge. (411,421)
12. **tapping** : a transformer terminal connected to the end of one of the sections of the regulating winding. ★ prise de réglage → *prise 26.* R зажим вывода. D Anzapfung. E toma de regulación. I presa di regolazione. N aftakking. P zaczep regulacyjny. S regleruttag. (811)
13. **tapping contactor** : → *contactor 15*
14. **tapping current of a winding** : → *current 207*
15. **tapping duty** : → *duty 14*
16. **tapping factor** : → *factor 172*
17. **tapping power of a winding** : → *power 185*
18. **tapping quantities** : → *quantity 33*
19. **tapping range** : → *range 69*
20. **tapping step** : → *step 18*
21. **tapping voltage of a winding** : → *voltage 206*
22. **tapping voltage ratio (of a pair of windings)** : → *ratio 99*

tare

1. **tare mass (of a vehicle)** : → *mass 31*

target

1. **reflection target** (of X-ray tube) : a target of an X-ray tube in which the X-ray beam is emitted from the surface struck by the electron beam. ★ cible de réflexion → *cible 5.* R отражающая мишень (рентгеновской трубки). D Reflexionsanode (einer Röntgenröhre). E blanco de reflexión (di un tubo a raggi X). I anticatodo a riflessione. N reflectietrefplaat (van een röntgenbuis). P anoda (lampy rentgenowskiej); typu odbiciowego. S reflektionsfokus. (881)
2. **storage target** (*Syn.* target) : the storage surface and its immediate supporting structure. ★ cible de mémoire → *cible 4.* R накопительная мишень. D Speicherplatte. E blanco; blanco de memoria. I bersaglio di memoria. N trefplaat. P ..... S mål. (531)
3. **target** (*Syn.* storage target) : → *target 2*

4. **target** : the electrode in a camera tube that is scanned by the electron beam. ★ cible → *cible 2.* R мишень. (723)
5. **target** (of an X-ray tube) : that part of the anode of an X-ray tube that includes the focal spot. ★ cible → *cible 3.* R мишень (рентгеновской трубки). D Auffangelektrode (einer Röntgenröhre). E blanco (de un tubo de rayos X). I anticatodo (di un tubo a raggi X). N trefplaat; trefmateriaal (van een röntgenbuis). P tarcza (lampy rentgenowskiej). S träffyta. (881)
6. **target angle** : → *angle 55*
7. **target element** (*Syn.* storage element) : → *element 55*
8. **target language** (*Syn.* object language) : → *language 8*
9. **target program** (*Syn.* object program) : → *program 4*
10. **target strength** (*Syn.* object backscattering differential) : → *backscattering 5*
11. **"target" system** : → *system 233*
12. **target theory** : → *theory 1*
13. **transmission target** (of X-ray tube) : a target of an X-ray tube in which the X-ray beam is emitted from the surface opposite to that struck by the electron beam. ★ cible de transmission → *cible 6.* R пронизываемая мишень (рентгеновской трубки). D Transmissionsanode (einer Röntgenröhre). E blanco de transmisión (de un tubo de rayos X). I anticatodo a trasmissione (di un tubo a raggi X). N transmissietrefplaat (van een röntgenbuis). P anoda (lampy rentgenowskiej); typu transmisyjnego. S transmissionsfokus. (881)

tariff

1. **all-in tariff** : a tariff applicable to electricity supplies where no distinction is made between the purposes for which the supply is given, e.g., an installation comprising lighting, power, heating, cooking, etc. ★ tarif mixte → *tarif 39.* R универсальный тариф. D Einheitstarif; Zählertarif. E tarifa para usos múltiples; tarifa de contador único. I tariffa per usi promiscui. N gemengd tarief. P taryfa uniwersalna. S diversetariff. (691)
2. **block tariff** : a tariff in which the charge is based on a series of different kilowatthour rates applying to successive kilowatthour blocks of given size, supplied during a specified period. ★ tarif à tranches → *tarif 15.* R блочный тариф. D Zonentarif; Blocktarif; Regelverbrauchstarif. E tarifa de bloques. I tariffa a scaglioni. N bloktarief; schijventarief. P taryfa blokowa. S blocktariff; polygontariff. (691)
3. **catering tariff** : a tariff applicable to electricity supplies taken for a specific use, such as catering. ★ tarif cuisine → *tarif 22.* R тариф для общественного питания. D Preisregelung für Sonderzwecke. E tarifa de cocina. I tariffa per usi particolari. N tarief voor koken enz.. P taryfa komunalna. S gatubelysningstariff etc. (691)
4. **commercial tariff** : a tariff applicable particularly or exclusively to professional, commercial and other similar consumers. ★ tarif commercial → *tarif 21.* R коммерческий тариф. D Gewerbetarif. E tarifa comercial; tarifa profesional. I tariffa per utenti commerciali; tariffa per attività professionali. N winkeltarief; bedrijfstarief. P taryfa handlowa. S affärs-, kontorstariff etc.. (691)
5. **day/night tariff** (*Syn.* two-rate time-of-day tariff) : → *tariff 48*
6. **demand tariff** : a tariff comprising demand rate(s) and one or several kilowatthour rates. ★ tarif à prime fixe → *tarif 12.* R тариф с оплатой за присоединенную мощность. D Leistungspreistarif. E tarifa con término de potencia. I tariffa a corrispettivo di potenza. N kW/kWh-vastrechttarief. P taryfa z opłatą za moc. S effekttariff. (691)
7. **domestic tariff** : a tariff applicable particularly or exclusively to domestic consumers. ★ tarif domestique → *tarif 29.* R бытовой тариф. D Haushalt-Tarif. E tarifa doméstica. I tariffa per utenti domestici. N woonhuistarief. P taryfa domowa bytowa. S hushållstariff. (691)
8. **farm tariff** : a tariff applicable particularly or exclusively to farm premises. ★ tarif agricole → *tarif 16.* R сельскохозяйственный тариф. D Landwirtschafts-Tarif. E tarifa agrícola. I tariffa per utenti agricoli. N boerderijtarief. P taryfa rolnicza. S jordbrukstariff. (691)
9. **fixed payment tariff** : a tariff comprising only a fixed amount to be paid for a specified period (year, quarter, month, etc.) irrespective of the consumption and of the demand set up within the limits specified in the tariff or supply agreement. ★ tarif à forfait → *tarif 9.* R тариф с фиксированной платой. D Pauschaltarif. E tarifa a tanto alzado. I tariffa a cottimo. N abonnementstarief. P taryfa ryczałtowa. S ackordtariff. (691)
10. **flat rate tariff** : a tariff comprising a uniform kilowatthour rate. ★ simple tarif → *tarif 4.* R простой тариф. D Einfachtarif. E tarifa de precio único. I tariffa semplice. N enkel tarief. P taryfa jednostawkowa. S enkeltariff. (691)
11. **heating tariff** : a tariff applicable to electricity supplies taken for space heating and for other heating applications. ★ tarif chauffage → *tarif 20.* R тариф на электроотопление. D Wärmetarif. E tarifa de calefacción. I tariffa per usi termici. N (ruimte)verwarmingstarief. P taryfa grzejna. S värmetariff. (691)
12. **high load factor tariff** : a tariff applicable to high load-factor consumers. ★ tarif pour fortes utilisations → *tarif 47.* R тариф для высокой нагрузки. D Preisregelung für hohe Benutzungsdauer. E tarifa para altas utilizaciones. I tariffa per alte utilizzazioni. N tarief voor lange bedrijfstijd van het maximum. P taryfa dla dużych odbiorców. S tariff för kort utnyttjningstid. (691)
13. **high voltage tariff** : a tariff applicable to supplies given at high voltage. *Note.* — The ranges of high, medium and low voltage are defined differently in each country. ★ tarif haute tension → *tarif 34.* R тариф для высокого напряжения. D Preisregelung für Hochspannung. E tarifa en alta tensión. I tariffa alta tensione. N hoogspanningstarief. P taryfa dla zasilania wysokim napięciem. S högspänningstariff. (691)
14. **industrial tariff** : a tariff applicable particularly or exclusively to industrial consumers. ★ tarif industriel → *tarif 38.* R промышленный тариф. D Preisregelung für die Industrie. E tarifa industrial. I tariffa per utenti industriali. N industrietarief. P taryfa przemysłowa. S industritariff. (691)
15. **lighting tariff** : a tariff applicable to electricity supplies taken mainly for lighting. ★ tarif éclairage → *tarif 30.* R осветительный тариф. D Lichttarif. E tarifa de alumbrado. I tariffa per illuminazione. N lichttarief. P taryfa oświetleniowa. S belysningstariff. (691)
16. **load/rate tariff** : a tariff in which there is an increase in the rates when the demand used by the consumer exceeds a limit fixed by agreement. ★ tarif à dépassement → *tarif 7.* R тариф, дифференцированный по мощности. D Überverbrauchstarif. E tarifa de exceso de potencia. I tariffa a eccedenza di potenza. N overschrijdingstarief. P taryfa zależna od obciążenia. S effektgränstariff. (691)
17. **low load factor tariff** : a tariff applicable to low load-factor consumers. ★ tarif pour faibles utilisations → *tarif 46.* R тариф для низкой нагрузки. D Preisregelung für niedrige Benutzungsdauer. E tarifa para bajas utilizaciones. I tariffa per basse utilizzazioni. N tarief voor korte bedrijfstijd van het maximum. P taryfa dla drobnych odbiorców. S tariff för lång utnyttjningstid. (691)
18. **low voltage tariff** : a tariff applicable to supplies given at low voltage. *Note.* — The ranges of high, medium and low voltage are defined differently in each country. ★ tarif basse tension → *tarif 17.* R тариф для низкого напряжения. D Preisregelung für Niederspannung. E tarifa en baja tensión. I tariffa bassa tensione. N laagspanningstarief. P taryfa dla zasilania niskim napięciem. S lågspänningstariff. (691)
19. **low-load tariff** (*Syn.* off-peak tariff) : → *tariff 27*
20. **medium voltage tariff** : a tariff applicable to supplies given at medium voltage. *Note.* — The ranges of high, medium and low voltage are defined differently in each country. ★ tarif moyenne tension → *tarif 41.* R тариф для среднего напряжения. D Preisregelung für Mittelspannung. E tarifa en media tensión. I tariffa media tensione. N middenspanningstarief. P taryfa dla zasilania średnim napięciem. S medelspänningstariff. (691)
21. **motive power tariff** : a tariff applicable to electricity supplies taken mainly for motive power. ★ tarif force motrice → *tarif 32.* R тариф для силовой нагрузки. D Krafttarif. E tarifa de fuerza motriz. I tariffa per forza motrice. N krachttarief. P taryfa siłowa. S motortariff. (691)
22. **multi-part tariff** : a tariff comprising several components in the price structure for the supply. ★ tarif polynôme → *tarif 44.* R многоставочный тариф. D mehrgliedriger Tarif. E tarifa polinomia. I tariffa polinomia. N meercomponententarief. P taryfa wielocłonowa. S flerledad tariff. (691)
23. **multiple tariff** : a tariff comprising several kilowatthour rates. ★ tarif multiple → *tarif 42.* R многоступенчатый тариф. D Mehrfachtarif. E tarifa de precio múltiple. I tariffa multipla.

N meervoudig tarief. P taryfa wielostawkowa. S multipeltariff. (691)

24. **multiple tariff** (*Syn.* time-of-day tariff) : → *tariff 45*
25. **night tariff** : a restricted hour tariff applicable where consumption is permitted only during the night hours. ★ tarif de nuit → *tarif 25.* R ночной тариф. D Nachttarif. E tarifa de noche. I tariffa per ore notturne. N nachttarief. P taryfa nocna. S natt-tariff. (691)
26. **normal tariff** (*Syn.* published tariff) : a tariff based upon the average characteristics of electricity supplies afforded to the class of consumers for which the tariff is designed. ★ tarif général → *tarif 33.* R средний тариф. D allgemeiner Tarif; allgemeine Tarifpreise. E tarifa general. I tariffa generale. N algemeen tarief. P taryfa podstawowa. S normaltariff. (691)
27. **off-peak tariff** (*Syn.* low-load tariff) : a restricted hour tariff applicable where consumption is permitted only during low-load hours. ★ tarif d'heures creuses → *tarif 28.* R тариф для периодов низкой нагрузки. D Schwachlast-Tarif. E tarifa de horas valle. I tariffa per ore vuote. N daltarief. P taryfa pozaszczytowa w okresie małego obciążenia. S låglasttariff. (691)
28. **off-peak tariff** : a restricted hour tariff applicable where consumption is only permitted outside the hours of peak demand. ★ tarif hors pointe → *tarif 37.* R внепиковый тариф. D Sperrzeittarif. E tarifa «fuera de las horas punta». I tariffa per ore non di punta. N tarief buiten de piekuren. P taryfa pozaszczytowa. S tidspärrtariff för icketopplasttid. (691)
29. **one-part tariff** : a tariff comprising one component only in the price structure for the supply. ★ tarif monôme → *tarif 40.* R одноставочный тариф. D eingliedriger Tarif. E tarifa monomia. I tariffa monomia. N eencomponententarief. P taryfa jednoczłonowa. S enledad tariff. (691)
30. **peak-load tariff** : a restricted hour tariff applicable for supply during peak-load hours only. ★ tarif de pointe → *tarif 26.* R пиковый тариф. D Preisregelung für die Spitzenzeit. E tarifa de punta. I tariffa per ore di punta. N piekuurtarief. P taryfa szczytowa. S topplasttariff. (691)
31. **public lighting tariff** : a tariff applicable to electricity supplies taken for a specific use, such as public lighting. ★ tarif éclairage public → *tarif 31.* R тариф для насосных. D Preisregelung für Sonderzwecke. E tarifa de alumbrado público. I tariffa per usi particolari. N tarief voor openbare verlichting. P taryfa komunalna. S gatubelysningstariff etc. (691)
32. **published tariff** (*Syn.* normal tariff) : → *tariff 26*
33. **pumping tariff** : a tariff applicable to electricity supplies taken for a specific use, such as water pumping. ★ tarif pompage → *tarif 45.* R тариф для общественного освещения. D Preisregelung für Sonderzwecke. E tarifa de bombeo. I tariffa per usi particolari. N tarief voor bemaling. P taryfa komunalna. S gatubelysningstariff etc. (691)
34. **restricted hour tariff** : a tariff applicable to supplies afforded only during specified hours. *Note.* — The supply is generally disconnected by a time-switch outside the specified hours. ★ tarif à horaire restreint → *tarif 10.* R тариф для определенных промежутков времени. D ..... E tarifa de horario restringido. I tariffa ad orario limitato. N tarief tijdens bepaalde uren. P taryfa dla ustalonych godzin użytkowania; taryfa ograniczona. S tidspärrtariff. (691)
35. **seasonal tariff** : a tariff comprising different rates applicable according to the season of the year or a tariff applicable to supplies restricted to specified seasons of the year. ★ tarif saisonnier → *tarif 49.* R сезонный тариф. D Saisontarif. E tarifa estacional o de temporada. I tariffa stagionale. N seizoentarief. P taryfa sezonowa. S säsongtariff. (691)
36. **seasonal time-of-day tariff** : a tariff comprising different rates applicable according to the period of the day and the season of the year. ★ tarif horo-saisonnier → *tarif 36.* R сезонный суточный тариф. D Saisontarif mit Zeitzonen. E tarifa horario estacional. I tariffa oraria stagionale. N meervoudig seizoentarief. P taryfa sezonowo-dobowa. S säsong- och tidgränstariff. (691)
37. **standby tariff** : a tariff applicable in certain cases to electricity supplies afforded to consumers having their own generating plant, against the event of breakdown or maintenance of their own installation. ★ tarif de secours → *tarif 27.* R тариф для установок с резервом мощности. D Preisregelung für Reserveversorgung. E tarifa de socorro. I tariffa di soccorso e tariffa per riserva programmata. N reservestroomtarief. P taryfa rezerw mocy. S maskinskade-effekttariff; maskinrenoverings-effekttariff. (691)
38. **standing charge tariff** : a tariff comprising a standing charge and one or several kilowatthour rates. *Note.* — The standing charge and kilowatthour rates may vary according to the magnitude of the electricity supply. ★ tarif à redevance d'abonnement → *tarif 13.* R тариф с постоянной платой. D Grundpreistarif. E tarifa con cuota de servicio. I tariffa a quota fissa. N vastrechttarief. P taryfa z opłatą stałą. S grundavgiftstariff. (691)
39. **step tariff** : a tariff in which the kilowatthour rate applicable to all the kilowatthours consumed varies according to the level of consumption during the period specified in the tariff. ★ tarif à échelons → *tarif 8.* R ступенчатый тариф. D Staffeltarif. E tarifa escalonada. I tariffa a prezzi degressivi. N getrapt tarief. P taryfa schodkowa. S stegrabatt-tariff. (691)
40. **supplementary tariff** : a tariff applicable in certain cases to electricity supplies required to supplement the output from a consumer's own generating plant. ★ tarif d'appoint → *tarif 23.* R дополнительный тариф. D Preisregelung für Zusatzversorgung. E tarifa de suministro complementario. I tariffa di integrazione. N suppletietarief. P taryfa uzupełniająca. S stödeffekttariff; kompletteringseffekttariff. (691)
41. **tariff** : a statement setting out the components to be taken into account and the methods to be employed in calculating the amounts to be paid to the supply undertaking by the consumer, according to the characteristics of the supply. ★ tarif → *tarif 5.* R тариф. D Preisregelung; Tarif. E tarifa. I tariffa. N tarief. P taryfa. S tariff; taxa. (691)
42. **three-part tariff** : a tariff comprising three components in the price structure for the supply. *Example :* a component corresponding to the payment of a fixed charge (price p_1 per month), a component related to the demand (price p_2 per kW and per month), a component related to the energy (price p_3 per kWh). ★ tarif trinôme → *tarif 51.* R трехставочный тариф. D dreigliedriger Tarif. E tarifa trinomia. I tariffa trinomia. N driecomponententarief. P taryfa trójczłonowa. S treledad tariff. (691)
43. **three-rate tariff** : a tariff comprising three different kilowatthour rates. ★ triple tarif → *tarif 53.* R трехступенчатый тариф. D Dreifachtarif. E tarifa de precio triple. I tariffa tripla. N drievoudig tarief. P taryfa trójstawkowa. S trippeltariff. (691)
44. **three-rate time-of-day tariff** : a time-of-day tariff comprising three different kilowatthour rates applicable according to the hours of the day. ★ tarif trihoraire → *tarif 50.* R трехставочный суточный тариф. D Dreifachtarif. E triple tarifa horaria. I tariffa trioraria; tariffa tripla. N drievoudig tarief. P taryfa trójstawkowa dobowa. S trippeltariff. (691)
45. **time-of-day tariff** (*Syn.* multiple tariff) : a tariff comprising different rates according to the periods of the day (e.g., rates for peak-load hours, for day hours, for low-load hours). ★ tarif horaire → *tarif 35.* R суточный тариф; многоставочный тариф. D Zeitzonentarif. E tarifa horaria. I tariffa oraria; tariffa multipla. N meervoudig tarief. P taryfa dobowa wielokrotna. S tidgränstariff. (691)
46. **two-part tariff** : a tariff comprising two components in the price structure for the supply. *Example :* a component related to demand (kilowatt or kilovoltampere) a component related to energy (kilowatthour). ★ tarif binôme → *tarif 19.* R двухставочный тариф. D zweigliedriger Tarif. E tarifa binomia. I tariffa binomia. N tweecomponententarief. P taryfa dwuczłonowa. S tvåledad tariff. (691)
47. **two-rate tariff** : a tariff comprising two different kilowatthour rates. ★ double tarif → *tarif 2.* R двухступенчатый тариф. D Doppeltarif. E tarifa de precio doble. I tariffa doppia. N dubbel tarief. P taryfa dwustawkowa. S dubbeltariff. (691)
48. **two-rate time-of-day tariff** (*Syn.* day/night tariff) : a time-of-day tariff comprising two different kilowatthour rates applicable according to the hours of the day. ★ tarif bihoraire → *tarif 18.* R двухставочный тариф; дневноночной тариф. D Zweifachtarif; Doppeltarif. E doble tarifa horaria. I tariffa bioraria; tariffa doppia. N dubbel tarief. P taryfa dwustawkowa dobowa. S dubbeltariff. (691)

task

1. **maintenance task** (*Syn.* maintenance action) : → *action 11*

taxiing

1. **taxiing light** : → *light 71*

TCXO

1. **TCXO** (*Syn.* temperature compensated crystal oscillator) : → *oscillator 7*

TDM

1. **TDM** (*Syn.* time division multiplexing) : → *multiplexing 6*
2. **TDM** (*Syn.* time division multiplexing) : → *multiplexing 7*

TE

1. **TE mode** (*Syn.* transverse electric mode) : → *mode 88*

tearing

1. **line tearing** (*Syn.* tearing) : → *tearing 2*
2. **tearing** (*Syn.* line tearing) : intermittent or static shearing of one or more parts of the picture due to a line synchronisation fault. ★ déchirement → *déchirement 1.* R разрывы строк. (723)

TEC

1. **TEC** (*Syn.* total electron content) : → *content 11*

technical

1. **technical delay** : → *delay 40*

technician

1. **isotope technician** : a technical assistant in the practical application of radionuclides. ★ manipulateur de radio-isotopes → *manipulateur 2.* R техник по радионуклидам. D Medizinisch-Technische(r) Radiologieassistent(in) (Nuklearmedizin). E técnico en isotopos. I tecnico di medicina nucleare. N isotopentechnicus. P technik izotopowy. S isotoptekniker. (881)
2. **radiation protection technician** : a person carrying out work for radiation protection. ★ responsable de la radioprotection → *responsable 1.* R техник по радиационной защите. D Strahlenschutztechniker. E jefe de radioprotección. I tecnico di radioprotezione. N radiologische laborant. P organizator ochrony przed promieniowaniem. S strålskyddstekniker. (881)
3. **X-radiation technician** : a technical assistant in the practical application of X-radiation, diagnostic or therapeutic ; or industrial or scientific. ★ manipulateur en röntgenologie → *manipulateur 5.* R рентгенотехник. D Röntgentechniker. E técnico en rayos X. I tecnico delle radiazioni. N röntgentechnicus. P technik rentgenowski. S röntgentekniker. (881)

technique

1. **air-gap technique** (*Syn.* distance technique) : → *technique 7*
2. **alloy technique** : the formation of a PN junction by fusing a donor or acceptor substance into the surface of a semiconductor crystal. *Notes. 1* — The re-crystallized region formed on cooling contains impurity atoms which give rise to N-type, or P-type conductivity, which differs from that of the host crystal. *2* — PNP orNPN junctions are usually formed by alloying from opposite sides of the host crystal. ★ procédé par alliage → *procédé 5.* R сплавная технология. D Legierungstechnik. E técnica de aleación. I processo per lega di fusione. N legéringstechniek. P technika stopowa. S legeringsteknik. (521)
3. **backscattering technique** (*Syn.* optical time domain reflectometry) : → *reflectometry 1*
4. **chemical vapour deposition technique** (*Syn.* CVD (abbreviation)) : a process for manufacturing preforms by which vapours and gases react chemically to produce deposits at the surface of a substrate. ★ dépôt chimique en phase vapeur → *dépôt 5.* R метод химического парофазного осаждения. D chemische Gasphasen-Abscheide-Technik; CVD (Abkürzung). E procedimiento por deposición química en fase de vapor; CVD (abreviatura). I tecnica di deposizione chimica in fase vapore; CVD (abbreviazione). N chemische opdamptechniek. P metoda osadzania z fazy gazowej; metoda CVD. S CVD-teknik. (731)
5. **cutback technique** : a technique for measuring certain optical fibre transmission characteristics, such as attenuation and bandwidth, by performing two transmission measurements ; one measurement is made at the output of the full length of the fibre and the other is made at the output of a short length of the same fibre, access being gained by "cutting back" the fibre being measured, without changing the launching conditions. ★ méthode de la fibre coupée → *méthode 5.* R метод обрыва. D Abschneideverfahren. E método de corte. I tecnica del "Cutback"; tecnica del confronto. N terugsnijtechniek. P metoda obcięcia (światłowodu). S avkapningsteknik. (731)
6. **diffusion technique** : the formation of the region of P-type or N-type conductivity in a semiconductor crystal by diffusing impurity atoms into the crystal. ★ procédé par diffusion → *procédé 6.* R диффузионная технология. D Diffusionstechnik. E técnica de difusión. I tecnica di diffusione. N diffusietechniek. P technika dyfuzyjna. S diffusionsteknik. (521)
7. **distance technique** (*Syn.* air-gap technique) : the placement of the irradiated object so that its surface nearer the X-ray film is separated from the film holder by a distance of air. *Note.* — By this procedure, part of the scattered radiation from the object does not impinge on the film beneath the object. However, the use of a distance technique makes enlarged radiographs and increases the unsharpness of shadows of the object. ★ grille d'air → *grille 14.* R дистанционный метод; метод воздушного зазора. D Abstandstechnik; (Groedeltechnik). E rejilla de aire. I tecnica ad air-gap. N afstandtechniek. P technika szczeliny powietrznej. S luftgapsteknik. (881)
8. **double crucible technique** : a manufacturing process in which the core and the cladding materials are melted in two concentric crucibles and drawn to form an optical fibre. ★ procédé du double creuset → *procédé 3.* R метод двух тиглей. D Doppeltiegel-Methode. E procedimiento del doble crisol. I tecnica del doppio crogiolo. N dubbele-kroes-techniek. P metoda dwutyglowa. S dubbeldegelteknik. (731)
9. **implantation technique** (*Syn.* interstitial technique) : radiotherapy whereby one or more closed radioactive sources are implanted within, or fixed close to, the diseased tissue. ★ radiothérapie intratissulaire → *radiothérapie 9.* R метод имплантации; метод внедрения. D Implantationstechnik. E técnica de implantación; radioterapia de implantacion. I tecnica di infissione; radioterapia interstiziale. N implantatietechniek; interstitiële techniek. P terapia implantacyjna. S implantationsteknik. (881)
10. **interstitial technique** (*Syn.* implantation technique) : → *technique 9*
11. **ion exchange technique** : a manufacturing process in which a graded index fibre is fabricated by means of an ion exchange process. ★ procédé par échange d'ions → *procédé 7.* R метод ионного обмена. D Ionenaustausch-Methode. E procedimiento del intercambio iónico. I tecnica dello scambio ionico. N ionenuitwisselingstechniek. P metoda wymiany jonowej. S jonbytesteknik. (731)
12. **mesa technique** : the formation of a junction in the shape of a raised plateau by successive impurity diffusions or alloying and then etching away material in the regions surrounding the plateau. ★ procédé mesa → *procédé 4.* R меза-технология. D Mesatechnik. E técnica mesa. I tecnica mesa. N mesatechniek. P technika «mesa». S mesateknik. (521)
13. **micro-alloy technique** : the formation of small PN junction by alloying after depositing the acceptor or donor materials in small area pits by a process of electroplating. ★ procédé par micro-alliage → *procédé 8.* R микросплавная технология. D Mikrolegierungstechnik. E técnica de microaleación. I tecnica per micro-lega. N microlegéringstechniek. P technika mikrostopu. S mikrolegeringsteknik. (521)
14. **near-field scanning technique** : the technique for measuring the refractive index profile of an optical fibre by illuminating the entrance face with an extended source and measuring the point-by-point radiant emittance of the exit face. ★ exploration en champ proche → *exploration 5.* R метод сканирования ближнего поля. D Nahfeld-Abtastmethode. E técnica de exploración en campo cercano. I tecnica di scansione in campo vicino. N nabij-veld aftasttechniek. P metoda analizy pola bliskiego. S transmittiv närfältsmetod. (731)
15. **planar technique** : the formation of P-type or N-type regions or both in a semiconductor crystal by diffusion technique through apertures in a protective surface layer on the crystal. ★ procédé planaire → *procédé 9.* R планарная технология. D Planartechnik. E técnica planar. I tecnica planare. N planaire techniek. P technika planarna. S planarteknik. (521)

16. **rod-in-tube technique** : a manufacturing process in which a rod placed in a tube is used as a preform. ★ procédé de la tige dans le tube → *procédé 2.* R метод использования стержня в трубке. D Stab-Rohr-Methode. E procedimiento de la varilla en tubo. I tecnica della barra in tubo. N staaf-in-buistechniek. P metoda pręt w rurze. S stav-rörteknik. (731)
17. **vapour phase axial deposition technique** (*Syn.* VAD (abbreviation)) : A CVD process for manufacturing preforms by which vapours are axially deposited to form a preform. ★ dépôt axial en phase vapeur → *dépôt 4.* R метод осевого парофазного осаждения. D Gasphasen-Abscheide-Technik; VAD (Abkürzung). E procedimiento por deposición axial en fase de vapor; VAD (abreviatura). I tecnica di deposizione assiale in fase vapore; VAD (abbreviazione). N axiale opdamptechniek. P metoda osadzania osiowego; metoda VAD. S VAD-teknik. (731)

technologist

1. **radiological technologist** (USA) : a technical assistant to the radiologist in the practical applications of radiation to medical use. ★ technicien en radiologie médicale → *technicien 3.* R техник-радиолог. D Radiologischer Techniker (USA). E técnico en radiología médica. I tecnico di radiologia medica. N radiologietechnicus. P technik radiolog. S ..... (881)

technology

1. **electro-heat technology** : → *electro-heat 5*
2. **information technology equipment** : → *equipment 45*
3. **lighting technology** (*Syn.* illuminating engineering) : applications of lighting considered under their various aspects. *Note.* — In Russian, besides the term "tehnika osveščenija", the more general term "svetotehnika" designates in a wider sense the science of the production and application of optical radiations. ★ éclairagisme → *éclairagisme 1.* R техника освещения. D Lichttechnik; Beleuchtungstechnik. E luminotecnia. I illuminotecnica. N verlichtingstechniek; verlichtingskunde. P technika oświetlania. S belysningsteknik. (845)

tee

1. **E-H tee** (*Syn.* hybrid T) : → *tee 2*
2. **hybrid T** (*Syn.* E-H tee) : a hybrid junction composed of an E plane T junction and an H plane T junction wherein the side arms intersect at a common point in the main guide. ★ té hybride → *té 7.* R гибридное Т-соединение; Е-Н-тройник. D Hybrid-T-Verzweigung; E-H-Verzweigung. E T híbrida; T plano E-H. I T ibrido; T piano E-H. N hybride T. P rozgałęzienie T podwójne; rozgałęźnik szeregowo-równoległy. S differentialgrening. (726)
3. **magic T** : a hybrid T provided with internal matching elements making it reflectionless for an incident wave at any port when the remaining ports have matched terminations. ★ té magique → *té 8.* R магическое Т-соединение. D magisches T. E T mágica. I T magico. N tover-T. P sprzęgacz magiczne T; magiczne T. S magiskt T. (726)
4. **tapped (tee off) substation** : → *substation 38*
5. **Tee** (*Syn.* T junction) : → *junction 18*
6. **tee coupler** : → *coupler 22*
7. **tee joint** : → *joint 25*
8. **Tee junction** (*Syn.* T junction) : → *junction 18*

teed

1. **teed line** (*Syn.* tapped line) : → *line 161*

teeing

1. **multiple teeing** : a method of providing flexibility in a local line network by making individual cable pairs accessible at more than one distribution point. ★ raccordement en T multiple → *raccordement 13.* R многократное ответвление. D Ausgleichschaltung. E conexión en T múltiple. I raccordo derivato. N ringleidingsysteem. P dołączenie mieszane. S multipelåtkomlighet. (722)

teleadjusting

1. **teleadjusting** : the telecommand of operational equipment having more than two states. *Note.* — Teleadjusting can be achieved by repetitive single or double commands or transmission of setpoint commands. ★ télécommande de position → *télécommande 7.* R телеустановка (телеуправление многопозиционное). D Ferneinstellen. E teleposicionamiento. I telecomando di organi a più posizioni. N afstandsinstelling. P nastawianie zdalne. S fjärrinställning. (371)

teleautograph

1. **teleautograph** (*Syn.* telewriter) : → *telewriter 2*

telecine

1. **camera telecine** : telecine where the image from a film projector is projected directly into a television camera. ★ télécinéma à caméra → *télécinéma 3.* R телекинодатчик с камерой. (723)
2. **CCD line telecine** : telecine using a scanner in which the film passes continuously over a line of charge coupled device sensors for each of the primary colours which electronically scan the image to produce the television signal. ★ télécinéma à barettes CCD → *télécinéma 2.* R ..... (723)
3. **flying-spot telecine** : telecine using a flying spot scanner. ★ télécinéma à spot lumineux → *télécinéma 4.* R телекинодатчик с бегущим лучом. (723)
4. **telecine** : equipment permitting a programme recorded on cinematograhic film to be converted into a television signal. ★ télécinéma → *télécinéma 1.* R телекинодатчик. (723)

telecommand

1. **telecommand** : the use of telecommunication techniques to cause a change in the status of operational equipment. ★ télécommande → *télécommande 3.* R телеуправление. D Fernsteuern. E telemando. I telecomando. N afstandsbediening. P rozkazywanie zdalne. S fjärrmanövrering. (371)
2. **telecommand** : the transmission of signals to initiate, modify or terminate functions of distant equipment. ★ télécommande → *télécommande 5.* R телемеханика. D Fernsteuern. E telemando. I telecomando. N besturen op afstand; afstandsbesturing. P teleprowadzenie. S telekommando; fjärrmanövrering. (701)

telecommunication

1. **architecture of a telecommunication network** : → *network 3*
2. **private telecommunication network** : → *network 73*
3. **public telecommunication network** : → *network 77*
4. **telecommunication** : 1) Communication by wire, radio, optical or other electromagnetic systems. 2) Any transmission, emission or reception of signs, signals, writing, images and sounds or intelligence of any nature by wire, radio, optical or other electromagnetic systems.International Telecommunication Convention (Nairobi, 1982). ★ télécommunication → *télécommunication 7.* R электросвязь. D Telekommunikation; Informationsübertragung. E telecomunicación. I telecomunicazione. N telecommunicatie. P telekomunikacja. S telekommunikation. (701,714)
5. **(telecommunication) circuit** : → *circuit 176*
6. **(telecommunication) circuit** : → *circuit 177*
7. **telecommunication network** : → *network 103*
8. **telecommunication security** : → *security 6*
9. **telecommunication system** (*Syn.* telecommunication network) : → *network 103*
10. **(telecommunication) terminal** : → *terminal 36*

teleconference

1. **teleconference** : a conference between more than two participants located in two or more different places and utilizing telecommunication facilities. ★ téléconférence → *téléconférence 1.* R конференцсвязь. D Telekonferenz. E teleconferencia. I teleconferenza. N telefonisch vergaderen. P telekonferencja wizyjna. S telekonferens. (701)

telecontrol

1. **asynchronous telecontrol transmission** (*Syn.* start-stop telecontrol transmission) : → *transmission 61*
2. **centralized telecontrol** (of loads) : installations for the purpose of switching groups of either deferrable or interruptible loads by means of telecontrol exercised from a central point. ★ télécommande centralisée → *télécommande 6.* R централизованное телеуправление нагрузкой. D zentrale Laststeuerung. E telemando centralizado (de cargas). I telecomando centralizzato (dei carichi). N centrale

afstandsbediening (van belastingen). P zdalne sterowanie poborem mocy. S rundstyrning. (604)

3. **channel selecting telecontrol system** : → *system 25*
4. **common diagram telecontrol system** (*Syn.* channel selecting telecontrol system) : → *system 25*
5. **interrogative telecontrol system** (*Syn.* polling telecontrol system) : → *system 149*
6. **interrogative telecontrol system** (*Syn.* polling telecontrol system) : → *system 149*
7. **polling telecontrol system** : → *system 149*
8. **quiescent telecontrol system** : → *system 165*
9. **series injection of a centralized telecontrol signal** : → *injection 6*
10. **shunt injection of a centralized telecontrol signal** : → *injection 7*
11. **start-stop telecontrol transmission** : → *transmission 61*
12. **substation telecontrol room** : → *room 20*
13. **synchronous telecontrol transmission** : → *transmission 69*
14. **telecontrol** : the control of operational equipment at a distance using the transmission of information by telecommunication techniques. *Note.* — Telecontrol may comprise any combination of command, alarm, indication, metering, protection and tripping facilities, without any use of speech messages. ★ téléconduite → *téléconduite 6.* R телемеханика. D Fernwirken. E telecontrol. I telecontrollo. N afstandsbesturing. P sterowanie zdalne; telesterowanie. S fjärrstyrning. (371,701)
15. **telecontrol configuration** : → *configuration 19*
16. **telecontrol transfer time** : → *time 171*

telecopy

1. **telecopy** (*Syn.* facsimile) : → *facsimile 7*

telecounting

1. **telecounting** (*Syn.* transmission of integrated totals) : the transmission of the values of measurable quantities which are integrated over a specified parameter, such as time, using telecommunication techniques. *Note.* — The integration may take place before or after transmission. If integration takes place before transmission the expression "transmission of integrated totals" is used. ★ télécomptage → *télécomptage 1.* R телесчет; передача интегральных значений. D Fernzählen. E telecuenta. I teleconteggio; trasmissione di valori integrati. N afstandstelling. P zliczanie zdalne. S fjärrmätning av ackumulerade pulsvärden. (371)

teledistortion

1. **teledistortion** : the time distortion of a specific signal at the input of a transmission channel estimated from observations made at the output of this channel. ★ télédistorsion → *télédistorsion 1.* R телеискажение. D Fernverzerrung. E teledistorsión. I teledistorsione. N vervorming op afstand. P zniekształcenie po stronie nadawczej. S fjärrdistorsion. (721)

telefax

1. **telefax** : public facsimile transmission service between subscribers terminals on the public switched telephone network. ★ téléfax → *téléfax 1.* R телефакс. D Telefax. E telefax. I telefax. N telefax. P telefaks. S telefax. (721)

telegrah

1. **(telegraph) terminal** : → *terminal 37*

telegram

1. **access to the public telegram network** : → *network 1*
2. **document facsimile telegram** : a telegram transmitted by document facsimile. ★ télégramme télécopié → *télégramme 3.* R документальная факсимильная телеграмма. D Schwarz-Weiß-Faksimile-Telegramm. E telegrama telecopiado. I telegramma per facsimile. N faxpost. P symilogram. S dokumentfaxtelegram. (721)
3. **photograph facsimile telegram** : a telegram transmitted by phototelecopy. ★ phototélégramme → *phototélégramme 1.* R фототелеграмма; фотографическая факсимильная телеграмма. D Fototelegramm. E fototelegrama. I telegramma per foto-facsimile. N ..... P fototelegram. S fotofaxtelegram. (721)
4. **public telegram network** : → *network 78*
5. **public telegram service** (*Syn.* telegram service) : → *service 49*
6. **telegram** : documentary matter in written, printed or pictorial form entrusted to a telegraph service for transmission and delivery to the addressee. *Note.* — The telegram includes the document entrusted to the telegraph service or delivered to the addressee. ★ télégramme → *télégramme 2.* R телеграмма. D Telegramm. E telegrama. I telegramma. N telegram. P telegram. S telegram. (721)
7. **telegram service** : → *service 49*

telegraph

1. **complete telegraph channel** : → *channel 18*
2. **Desieter telegraph translation** : → *translation 1*
3. **International Telegraph Alphabet No.1** : → *alphabet 2*
4. **International Telegraph Alphabet No.2** : → *alphabet 3*
5. **International Telegraph Alphabet No.3** : → *alphabet 4*
6. **International Telegraph Alphabet No.4** : → *alphabet 5*
7. **set of voice-frequency multiplex (telegraph) circuits** : → *set 47*
8. **(telegraph) alphabet** : → *alphabet 7*
9. **telegraph channel** : → *channel 50*
10. **telegraph circuit** : → *circuit 178*
11. **telegraph code** : → *code 50*
12. **telegraph demodulator** : → *demodulator 3*
13. **telegraph discriminator** : → *discriminator 12*
14. **telegraph junction circuit** : → *circuit 179*
15. **telegraph modulation** : → *modulation 59*
16. **telegraph modulator** : → *modulator 3*
17. **telegraph multiplex** : → *multiplex 14*
18. **telegraph noise** : → *noise 87*
19. **telegraph regenerative repeater** : → *repeater 18*
20. **telegraph relay** : → *relay 47*
21. **telegraph repeater** : → *repeater 19*
22. **telegraph service** : → *service 50*
23. **telegraph signal** : → *signal 237*
24. **telegraph switching exchange** : → *exchange 26*
25. **telegraph transit exchange** : → *exchange 27*
26. **telegraph transmitter** : → *transmitter 16*
27. **telegraph trunk circuit** : → *circuit 180*

telegraphy

1. **alphabetic telegraphy** (*Syn.* character telegraphy) : telegraphy applicable to texts, where coded signals are used, each signal or group of signal elements corresponding to a character such as a letter, a figure or a punctuation mark. ★ télégraphie alphabétique → *télégraphie 7.* R алфавитная телеграфия; знаковая телеграфия. D Zeichentelegrafie. E telegrafía alfabética. I alfabeto telegrafico. N karaktertelegrafie. P telegrafia alfabetowa; telegrafia znakowa. S teckentelegrafi. (721)
2. **Baudot telegraphy** : synchronous telegraphy generally, a character interleaved telegraphy, using the International Telegraph Alphabet N°1. ★ télégraphie Baudot → *télégraphie 11.* R система телеграфирования Бодо. D Baudot-Telegrafie. E telegrafía Baudot. I telegrafia Baudot. N Baudot-telegrafie. P system Baudota. S Baudot-telegrafi. (721)
3. **bit-interleaved telegraphy** : time-division multiplex telegraphy in which the signal elements of each character signal are transmitted on the common channel separated by signal elements belonging to other characters coming from different channels. ★ télégraphie multiplex à moments entrelacés → *télégraphie 17.* R телеграфирование с чередованием битов. D bitverschachtelte Telegrafie. E telegrafía múltiplex con momentos entrelazados. I multiplex telegrafico per bit. N ..... P telegrafia z przeplotem bitów. S bitindelad multiplextelegrafi. (721)
4. **character interleaved telegraphy** : time-division multiplex telegraphy in which characters are transmitted sequentially on a common channel, the characters coming from each independent channel in turn without separation of the unit elements of each character. ★ télégraphie multiplex à caractères entrelacés → *télégraphie 16.* R телеграфирование с чередованием знаков. D zeichenverschachtelte Telegrafie. E telegrafía múltiplex con caracteres entrelazados. I multiplex telegrafico

per carattere. N ..... P telegrafia z przeplotem znaków. S teckenindelad multiplextelegrafi. (721)

5. **character telegraphy** (*Syn.* alphabetic telegraphy) : → *telegraphy 1*
6. **four-frequency duplex telegraphy** (*Syn.* twinplex (USA)) : frequency-shift telegraphy in which each of the four possible combinations of signal elements corresponding to two telegraph channels is represented by a separate frequency. *Note.* — Four-frequency duplex telegraphy is used in radiotelegraphy. ★ télégraphie duplex à quatre fréquences → *télégraphie 12.* R четырехчастотное дуплексное телеграфирование. D Vierfrequenz-Duoplextelegrafie. E telegrafía dúplex con cuatro frecuencias. I telegrafia duplex a quattro frequenze. N ..... P telegrafia dwukrotna czteroczęstotliwościowa; twinpleks. S fyrfrekvensduoplextelegrafi. (721)
7. **frequency shift telegraphy** (*Syn.* frequency shift keying; FSK (abbreviation)) : telegraphy by frequency modulation in which each significant condition is represented under steady-state conditions by a sinusoidal signal of specified frequency. ★ télégraphie à déplacement de fréquence → *télégraphie 3.* R телеграфирование с частотной модуляцией. D Frequenzumtastungstelegrafie. E telegrafía con desplazamiento de frecuencia. I telegrafia a modulazione di frequenza. N frequentiemodulatie-telegrafie. P telegrafia z kluczowaniem częstotliwości. S frekvensskiftstelegrafi. (721)
8. **Morse telegraphy** : alphabetic telegraphy using the Morse code. ★ télégraphie Morse → *télégraphie 15.* R телеграфирование кодом Морзе. D Morsetelegrafie. E telegrafía Morse. I telegrafia Morse. N Morse-telegraaf. P system (telegraficzny) Morse'a. S morsetelegrafi. (721)
9. **mosaic telegraphy** : alphabetic telegraphy in which the characters are formed as mosaics made up from units transmitted as individual signal elements. ★ télégraphie à mosaïque → *télégraphie 6.* R мозаичная телеграфия. D Mosaiktelegrafie. E telegrafía con mosaico; telegrafía por descomposición de señales. I telegrafia a mosaico. N mozaïktelegrafie. P telegrafia mozaikowa. S mosaiktelegrafi. (721)
10. **printing telegraphy** : alphabetic telegraphy in which the received character signals are automatically recorded as printed characters. ★ télégraphie à impression → *télégraphie 5.* R буквопечатающая телеграфия. D Drucktelegrafie; Schreibtelegrafie. E telegrafía con impresión. I telegrafia a stampa. N telegrafie met afdrukken. P system telegraficzny drukujący. S fjärrskrift. (721)
11. **signal recording telegraphy** : telegraphy in which the received signals are recorded automatically for subsequent translation by an operator. ★ télégraphie à enregistrement de signaux → *télégraphie 4.* R телеграфирование с записью сигналов. D Umsetzungstelegrafie. E telegrafía con registro de señales. I telegrafia a registrazione. N telegrafie met signaalopslag. P system telegraficzny rejestracyjny. S registrerande telegrafi. (721)
12. **start-stop system of telegraphy** : → *system 199*
13. **stepped start-stop system of telegraphy** : → *system 204*
14. **synchronous telegraphy** : a system of alphabetic telegraphy using synchronous transmission. ★ télégraphie synchrone → *télégraphie 21.* R синхронное телеграфирование. D synchrone Telegrafie. E telegrafía síncrona. I telegrafia sincrona. N synchrone telegraaf. P system telegraficzny synchroniczny. S synkron telegrafi. (721)
15. **telegraphy** : a form of telecommunication in which the transmitted information is intended to be recorded on arrival as a graphic document ; the transmitted information may sometimes be presented in an alternative form or may be stored for subsequent use. *Notes. 1* — A graphic document records information in a permanent form and is capable of being filed and consulted ; for example it may take the form of written or printed matter or a fixed image. *2* — This is the definition given in the International Telecommunication Convention (Nairobi, 1982). *3* — Telegraphy does not include television or videography. ★ télégraphie → *télégraphie 2.* R телеграфия, телеграфная связь. D Telegrafie. E telegrafía. I telegrafia. N telegrafie. P telegrafia. S telegrafi. (701,721)
16. **voice-frequency multiplex telegraphy** (*Syn.* VFT (abbreviation)) : a telegraph transmission within a telephone type channel using frequency-division multiplexing. ★ télégraphie harmonique → *télégraphie 13.* R многоканальное тональное телеграфирование; TT (сокращение). D Wechselstromtelegrafie; WT. E telegrafía armónica. I telegrafia armonica. N telegrafie met spraakfrequentiemultiplex. P telegrafia nośna rozmównopasmowa wielokrotna. S tontelegrafi. (721)

teleguidance

1. **teleguidance** : the guidance and control of distant mobile craft by telecommunication. ★ téléguidage → *téléguidage 1.* R телеуправление подвижным объектом. D Fernbedienen. E teleguiase; teleguiaje; teleguía; teledirigido. I teleguida. N geleider op afstand. P alarmowanie zdalne. S fjärrstyrning av fordon. (701)

teleindication

1. **teleindication** : the telemonitoring of status information such as alarm conditions, or switch positions, or valve positions. ★ télésignalisation → *télésignalisation 1.* R телесигнализация. D Fernanzeigen. E teleseñalización. I telesegnalazione. N afstandssignalering. P wskazywanie zdalne; teleindykacja. S fjärrindikering. (371)

teleinstruction

1. **teleinstruction** : the transmission, using telecommunication techniques, of switching and/or adjusting instructions to a station for manual operation. *Note.* — Teleinstructions are usually presented by visual means. ★ téléinstruction → *téléinstruction 1.* R телекомандование. D Fernanweisen. E teleinstrucción. I teleordine. N afstandsintructie. P instruktowanie zdalne. S fjärrinstruktion. (371)

telematics

1. **telematics (services)** : → *service 51*

telemeasuring

1. **telemeasuring equipment** : → *equipment 77*

telemetering

1. **telemetering** (*Syn.* telemetry) : → *telemetry 1*

telemetry

1. **telemetry** (*Syn.* telemetering) : a process in which measurements are made at some remote location and the results are transmitted by telecommunication. ★ télémesure → *télémesure 2.* R телеизмерения. D Fernmessen. E telemedida. I telemisura. N telemetrie; verremeten. P telesterowanie. S fjärrmätning. (371,701)

telemonitoring

1. **telemonitoring** : the observation at a distance by telecommunication of industrial processes, operational equipment, natural phenomena or individuals. ★ télésurveillance → *télésurveillance 1.* R телеконтроль. D Fernüberwachen. E telesupervisión. I telesorveglianza. N bewaken op afstand. P radiokomunikacja. S fjärrövervakning. (371,701)

telephone

1. **automatic (telephone) exchange** : → *exchange 1*
2. **automatic (telephone) operation** : → *operation 5*
3. **automatic (telephone) service** : → *service 2*
4. **automatic (telephone) set** : → *set 2*
5. **capsule (telephone) microphone** (*Syn.* (telephone) microphone) : → *microphone 34*
6. **carbon (telephone) transmitter** : → *transmitter 5*
7. **european master reference for telephone transmission** : → *reference 9*
8. **explosion proof (telephone) set** : → *set 15*
9. **(FDM telephone) channel** : → *channel 25*
10. **hands free (telephone) set** : → *set 22*
11. **harmonic telephone ringer** : → *ringer 1*
12. **house telephone system** (*Syn.* internal (telephone) system) : → *system 94*
13. **internal (telephone) system** : → *system 94*
14. **key pad (telephone) set** (*Syn.* push-button (telephone) set) : → *set 38*
15. **key telephone set** : → *set 30*
16. **local (telephone) circuit** : → *circuit 109*
17. **long line (telephone) set** : → *set 31*

18. **loudspeaking (telephone) set** : → *set 32*
19. **magneto (telephone) bell** : → *bell 4*
20. **main (telephone) station** (*Syn.* subscriber's main station) : → *station 37*
21. **manual (telephone) exchange** : → *exchange 13*
22. **manual (telephone) operation** : → *operation 33*
23. **(PCM) (telephone) channel** : → *channel 35*
24. **private (telephone) exchange** : → *exchange 22*
25. **private (telephone) installation** : → *installation 12*
26. **private telephone network** : → *network 74*
27. **private wire (telephone) circuit** : → *circuit 146*
28. **(public) switched (telephone) network** : → *network 76*
29. **public telephone network** : → *network 79*
30. **public telephone station** (*Syn.* public call office) : → *office 1*
31. **push-button (telephone) set** : → *set 38*
32. **regulated (telephone) set** : → *set 39*
33. **rotary dial (telephone) set** : → *set 41*
34. **semi-automatic (telephone) operation** : → *operation 60*
35. **semi-automatic (telephone) operation** : → *operation 61*
36. **subscriber's (telephone) line** : → *line 159*
37. **subscriber's (telephone) station** : → *station 38*
38. **telephone answering and recording set** : → *set 54*
39. **telephone answering set** : → *set 55*
40. **(telephone) bell** : → *bell 5*
41. **telephone booth** : → *booth 2*
42. **(telephone) circuit** : → *circuit 181*
43. **(telephone) earcap** : → *earcap 1*
44. **(telephone) earphone** : → *earphone 5*
45. **telephone earphone** : → *earphone 6*
46. **(telephone) earphone capsule** (*Syn.* (telephone) earphone) : → *earphone 5*
47. **telephone frequency** : → *frequency 188*
48. **telephone instrument** (*Syn.* telephone set) : → *set 56*
49. **(telephone) line density** : → *density 36*
50. **(telephone) loudspeaker** : → *loudspeaker 19*
51. **(telephone) microphone** : → *microphone 34*
52. **telephone network** : → *network 104*
53. **(telephone) penetration** (*Syn.* (telephone) line density) : → *density 36*
54. **telephone plug** : → *plug 5*
55. **telephone receiver** : → *receiver 14*
56. **telephone set** : → *set 56*
57. **telephone stall** : → *stall 1*
58. **telephone station** : → *station 40*
59. **(telephone) subscriber** : → *subscriber 31*
60. **(telephone) transmitter** : → *transmitter 17*
61. **tuned telephone ringer** (*Syn.* harmonic telephone ringer) : → *ringer 1*
62. **visual telephone** (*Syn.* video-telephony) : → *video-telephony 2*

telephone-type

1. **telephone-type channel** : → *channel 51*
2. **telephone-type circuit** : → *circuit 182*

telephonometry

1. **telephonometry** : the technique of making objective electro-acoustical measurements and subjective voice-ear measurements to assess the transmission performance of telephone connections. ★ téléphonométrie → *téléphonométrie 1.* R телефонометрия. D Telefonometrie. E telefonometría. I telefonometria. N telefonometrie. P telefonometria. S telefonometri. (722)

telephony

1. **central battery feeding (telephony)** (*Syn.* common battery feeding (telephony)) : a telephone system in which the switching entity supplies feeding current but not signalling current to the telephone stations. *Note.* — Call signal generators are required for signalling purposes. ★ (téléphonie à) batterie centrale limitée à l'alimentation → *batterie 32.* R питание от центральной батареи (телефония). D ZB-Speisung. E telefonía con batería central de alimentación. I alimentazione a batteria centrale; BC. N ..... P system telefoniczny o zasilaniu centralnym. S centralbatterisystem; CB-system. (722)
2. **central battery signalling (telephony)** : → *signalling 5*
3. **common battery feeding (telephony)** (*Syn.* central battery feeding (telephony)) : → *telephony 1*
4. **common battery signalling (telephony)** (*Syn.* central battery signalling (telephony)) : → *signalling 5*
5. **telephony** : a form of telecommunication primarily intended for the exchange of information in the form of speech. International Telecommunication Convention (Nairobi, 1982). ★ téléphonie → *téléphonie 1.* R телефония; телефонная связь. D Fernsprechen; Telefonie. E telefonía. I telefonia. N telefonie. P telefonia. S telefoni. (701,722)

teleprinter

1. **page teleprinter** : a teleprinter which prints characters in page formation. ★ téléimprimeur à (impression sur) page → *téléimprimeur 4.* R рулонный телетайп. D Blattschreiber. E teleimpresor con (impresión sobre) página. I telescrivente a pagine. N bladschrijver. P dalekopis arkuszowy. S blankettskrivare. (721)
2. **tape teleprinter** : a teleprinter which prints characters in a single line on a continuous paper tape. ★ téléimprimeur à (impression sur) bande → *téléimprimeur 3.* R ленточный телетайп. D Streifenschreiber. E teleimpresor con (impresión sobre) banda. I telescrivente a nastro. N bandschrijver. P dalekopis taśmowy. S remsskrivare. (721)
3. **teleprinter** (*Syn.* teletypewriter (USA)) : a start-stop apparatus comprising an alphanumeric keyboard transmitter and a printing character receiver. ★ téléimprimeur → *téléimprimeur 2.* R телетайп. D Fernschreibmaschine; Fernschreiber. E teleimpresor; teletipo. I telescrivente (ricezione). N telextoestel. P dalekopis. S fjärrskrivmaskin. (721)
4. **(teleprinter) control unit** : → *unit 65*

teleprocessing

1. **teleprocessing** : the association of telecommunication and data processing techniques to process information at a distance. ★ téléinformatique → *téléinformatique 1.* R телеобработка данных. D (Daten-) Fernverarbeitung. E teleinformática; teleproceso. I teleinformatica. N gegevensverwerking op afstand. P telematyka. S teleinformatik. (701,721)

telerecording

1. **telerecording equipment for film** : → *equipment 78*
2. **telerecording equipment for magnetic tape** (*Syn.* video tape recorder) : → *tape recorder 6*

teleregulation

1. **teleregulation** : the combination of telemonitoring and telecommand facilities in a closed loop, generally including an automatic decision making part. ★ télérégulation → *télérégulation 1.* R телерегулирование. D Fernregeln. E teleregulación. I teleregolazione. N afstandsregeling. P regulacja zdalna. S fjärreglering. (371)

teleswitching

1. **teleswitching** : the telecommand of operational equipment having two determined states. *Note.* — Some equipments can only be controlled to one of their two determined states, e.g. resetting of tripping relays. ★ télécommutation → *télécommutation 1.* R телепереключение (телеуправление двухпозиционное). D Fernschalten. E teleconmutación. I telecomando di organi a due posizioni. N afstandsschakeling. P przełączanie zdalne. S fjärr(om)koppling. (371)

teletex

1. **teletex (service)** : a telematics service for text transmission offering additionnal facilities to the telex service, in particular further typewriter functions and remote text processing facilities. *Note.* - the terms "teletex" and "*teletext*" refer to two different concepts. ★ (service) télétex → *télétex 1.* R телетекс (служба). D Bürofernschreiben; (Teletex). E (servicio) teletex. I teletex. N teletex. P telekonferencja. S teletex. (701,721)

teletext

1. **field blanking teletext** : teletext in which information is broadcast at the same time as the normal television pictures, generally during part of the field blanking interval. ★ vidéographie diffusée à temps partiel → *vidéographie 4.* R телетекст в интервале гашения полей. (723)
2. **full-field teletext** : teletext in which information is broadcast in the absence of television picture signals, and during the whole time that would be occupied by these signals. ★ vidéographie diffusée à plein temps → *vidéographie 3.* R телетекст в полном поле. (723)
3. **teletext** (*Syn.* broadcast videography) : videography in which information is broadcast utilizing the means of transmission used for normal television broadcasting and the desired part of this information may be selected by any user having suitable equipment. *Notes. 1* — Information may be transmitted simultaneously with normal television pictures. *2* — The terms "teletext" and "*teletex*" refer to two different concepts. ★ vidéographie diffusée → *vidéographie 2.* R вемательная видеографя; телетекст. D Fernsehtext. E videografía radiodifundida; teletexto. I televideo. N teletekst. P teleteks. S text-TV. (701,723)

teletherapy

1. **teletherapy** : radiotherapy with a source-skin distance that is large compared to the dimensions of the irradiated tissue being treated. ★ téléradiothérapie → *téléradiothérapie 1.* R телетерапия. D Teletherapie. E teleterapia. I teleradioterapia. N teletherapie. P teleterapia. S teleterapi. (881)

teletrack

1. **teletrack** : special effect in which the successive images of a moving object are highlighted and the path traced by the object appears superimposed upon the picture. ★ effet de trace → *effet 45.* R эффект следа. (723)

teletraffic

1. **teletraffic** : a domain of study which deals with telecommunication traffic. ★ télétrafic → *télétrafic 1.* D Nachrichtenverkehr. P inżynieria ruchu (telekomunikacyjnego); teletrafik. (715)

teletypewriter

1. **teletypewriter** (*Syn.* teleprinter) : → *teleprinter 3*

televise

1. **to televise** (*Syn.* to broadcast) : → *broadcast 16*

television

1. **black and white television** (*Syn.* monochrome television) : television in which only the luminance of a scene is reproduced and not the colour. ★ télévision en noir et blanc → *télévision 46.* R черно-белое телевидение; монохромное телевидение. (723)
2. **cable television** : the distribution of television programmes by cable. ★ télévision par câble → *télévision 48.* R кабельное телевидение. (723)
3. **cathode ray tube (television) projector** : → *projector 1*
4. **closed-circuit television** (*Syn.* CCTV (abbreviation)) : television allowing the transmission of images over a relatively short distance, generally by cable, intended for a particular group of users. *Examples :* Surveillance of public places or places which are dangerous or difficult access ; study of surgical operations, etc. ★ télévision en circuit fermé → *télévision 44.* R замкнутое телевидение. (723)
5. **colour television** (*Syn.* CTV (abbreviation)) : television in which the reproduced picture simulates both the colour and the luminance of the object. ★ télévision en couleur → *télévision 45.* R цветное телевидение; ЦТВ. (723)
6. **component colour television system** : → *system 33*
7. **component (in a colour television system)** : → *component 12*
8. **conditional access television** : scrambled television in which the programmes are intended for certain specialised groups. *Example :* special programmes for the medical profession. ★ télévision à accès conditionnel → *télévision 39.* R телевидение с условным доступом. (723)
9. **dot sequential colour television system** : → *system 49*
10. **enhanced television (system)** : television system which retains the scanning standards of the existing 625 line 50 field or 525 line 60 field systems, whilst providing various improvements in the quality of the picture and additional features as a result of new processes of analysis, synthesis, and signal processing, with or without modification of the transmission standards. ★ (système de) télévision améliorée → *télévision 26.* R телевидение повышенного качества; ТВПК. (723)
11. **extended definition television (system)** : enhanced television system, which may include a change in the transmission standards, to obtain effectively greater resolution than existing systems. ★ (système de) télévision à résolution étendue → *télévision 25.* R телевидение повышенной четкости; ТВПЧ. (723)
12. **field sequential colour television system** : → *system 69*
13. **GE (television) projector** : → *projector 4*
14. **high definition television (system)** (*Syn.* HDTV (abbreviation)) : television system in which the scanning standards are improved over those of the existing 625 line 50 field or 525 line 60 field systems, and in particular the number of scanning lines per image is appreciably higher than in these existing systems and, in principle, higher than 1000. ★ (système de) télévision à haute définition → *télévision 24.* R телевидение высокой четкости; ТВВЧ. (723)
15. **inverted television channels** : → *channel 32*
16. **light-valve (television) projector** : → *projector 5*
17. **line sequential colour television system** : → *system 102*
18. **MAC (colour television) system** : → *system 112*
19. **monochrome television** (*Syn.* black and white television) : → *television 1*
20. **NTSC (colour television) system** : → *system 129*
21. **PAL (colour television) system** : → *system 140*
22. **pay television** (*Syn.* toll television; subscription television) : television for which payment is necessary in order to receive certain programmes. *Note.* — This payment is independent of the fees charged for permission to operate television receivers in certain countries. ★ télévision payante → *télévision 49.* R платное телевидение. (723)
23. **projection television receiver** : → *receiver 7*
24. **rostrum television camera** (*Syn.* electronic animation bench) : → *bench 1*
25. **scrambled television** : television in which the original picture may only be reproduced by receivers with appropriate decoders. ★ télévision embrouillée → *télévision 43.* R скремблированное телевидение. (723)
26. **SECAM (colour television) system** : → *system 182*
27. **sequential colour television system** : → *system 185*
28. **simultaneous colour television system** : → *system 187*
29. **simultaneous line sequential colour television system** : → *system 188*
30. **stereophonic television** : television in which the associated sounds are transmitted in stererophony. ★ télévision stéréophonique → *télévision 50.* R стереофоническое телевидение. (723)
31. **stereoscopic television** : television in which separate pictures are presented to each eye so as to reproduce the three — dimensional appearance of the object. ★ télévision en relief → *télévision 47.* R стереоскопическое телевидение; объемное телевидение. (723)
32. **still-picture television** (*Syn.* SPTV (abbreviation)) : television in which the time interval between a displayed picture and the display of either an updated version of the same picture, or a new picture forming part of a sequence, exceeds, generally by an appreciable factor, the usual frame period. ★ télévision à images fixes → *télévision 40.* R телевидение с малоподвижным изображением. (723)
33. **subscription television** (*Syn.* pay television) : → *television 22*
34. **television** : a form of telecommunication for the transmission of signals representing scenes, images of the scenes being reproduced on a screen as they are received. *Notes. 1* — The received signals may be stored for subsequent display of the images on a screen. *2* — This form of telecommunication finds major application in television broadcasting and the word "television" is often used without qualification to describe this application. The same technique is also used for industrial, scientific, medical and other applications; such applications are

often referred to as "closed circuit television". ★ télévision → *télévision 38.* R телевидение. D Fernsehen. E televisión. I televisione. N televisie. P wizjografia. S television. (701,723)

35. **television broadcasting** : → *broadcasting 14*
36. **television broadcasting (service)** : → *broadcasting 15*
37. **television broadcasting transmitter** : → *transmitter 18*
38. **television camera** : → *camera 6*
39. **television channel** : → *channel 52*
40. **television programme** : → *programme 13*
41. **television projector** : → *projector 8*
42. **television receiver** : → *receiver 15*
43. **(television) screen** : → *screen 20*
44. **television signal** : → *signal 238*
45. **television standard** : → *standard 45*
46. **television standards converter** : → *converter 18*
47. **television system** : → *system 235*
48. **television test card** (*Syn.* television test pattern) : → *pattern 31*
49. **television test pattern** : → *pattern 31*
50. **television tube** (*Syn.* picture tube) : → *tube 66*
51. **television viewer** : → *viewer 1*
52. **(television) wall-mounted screen** : → *screen 21*
53. **toll television** (*Syn.* pay television) : → *television 22*
54. **video tuner** : → *demodulator 5*
55. **X-ray television system** : → *system 252*

televisual

1. **televisual** : relating to television pictures. ★ télévisuel → *télévisuel 2.* R телевизуальный. (723)

telewriter

1. **telewriter** (1) : an apparatus which permits writings to be conveyed over a distance by some method. ★ téléscripteur → *téléscripteur 1.* R аппарат дистанционной записи. D Fernzeichengerät. E teleinscriptor. I telescrivente (trasmissione). N ..... P urządzenie teleskrypcyjne. S teleautograf. (721)
2. **telewriter** (2) (*Syn.* teleautograph) : telewriting equipment in which the manually controlled movements of a pen over a plane surface electrically cause a similar trace to appear at the receiving end. ★ appareil de téléécriture → *appareil 34.* R аппарат телерукописи; телеавтограф. D Fernzeichengerät. E aparato de teleinscripción. I tavoletta per telescrittura. N verreschrijver; teleplotter. P urządzenie teleskrypcyjne. S teleautograf. (721)

telewriting

1. **telewriting** : a form of telecommunication for the purpose of transmitting graphical information as it is being manually written or drawn and for simultaneously generating a reproduction at the distant terminal either on a screen or in some other form. *Note.* — In cases where the reproduction at the receiving end is in the form of a graphic document the term "téléautographie" can be employed in French. ★ téléécriture → *téléécriture 2.* R телерукопись. D Bildfernschreiben. E teleescritura. I telescrittura. N scribofoon. P dane. S ..... (701,721)

telex

1. **high speed telex** (*Syn.* supertelex (service)) : → *supertelex 1*
2. **local telex number** : → *number 13*
3. **national subscriber's telex number** : → *number 17*
4. **prefix giving access to the intercontinental telex network** : → *prefix 2*
5. **prefix giving access to the international telex network** : → *prefix 3*
6. **prefix giving access to the long-distance telex network** : → *prefix 4*
7. **public telex booth** : → *booth 1*
8. **(telex) call** : → *call 59*
9. **telex conversation mode** : → *mode 79*
10. **telex (service)** : a telegraph service enabling subscribers to communicate directly and temporarily with each other by means of start-stop apparatus and telecommuication circuits of public networks. ★ (service) télex → *service 64.* R телекс (служба). D Telex (dienst). E télex (servicio). I ..... N telex. P faksymilografia; telekopiografia. S telex. (701,721)

telex-data

1. **switching signal telex-data** : → *signal 232*

TEM

1. **TEM cell** : → *cell 37*
2. **TEM mode** (*Syn.* transverse electromagnetic mode) : → *mode 90*
3. **TEM wave** (*Syn.* transverse (electromagnetic) wave) : → *wave 68*

temperature

1. **ambient air temperature** : the temperature, determined under prescribed conditions, of the air surrounding the complete switching device or fuse. *Note.* — For switching devices or fuses installed inside an enclosure, it is the temperature of the air outside the enclosure. ★ température de l'air ambiant → *température 43.* R температура окружающего воздуха. D Umgebungstemperatur. E temperatura del aire ambiente. I temperatura dell'aria ambiente. N omgevingstemperatuur. P temperatura otoczenia. S omgivningstemperatur. (441)
2. **ambient air temperature** : the temperature, determined under prescribed conditions, of the air surrounding the complete motor or apparatus (e.g. for a totally enclosed motor, it is the temperature of the air outside the motor). ★ température ambiante → *température 27.* R температура окружающей среды. D Umgebungstemperatur. E temperatura ambiente. I temperatura ambiente. N omgevingstemperatuur. P temperatura otoczenia. S omgivningstemperatur. (811)
3. **ambient temperature** : the temperature of the air or other medium where the equipment is to be used. ★ température ambiante → *température 28.* R температура окружающей среды. D Umgebungstemperatur. E temperatura ambiente. I temperatura ambiente. N omgevingstemperatuur. P temperatura otoczenia. S omgivningstemperatur. (826)
4. **ambient temperature (of a cell or battery)** : the temperature of the medium in the immediate vicinity of a cell or battery. ★ température ambiante (d'un accumulateur) → *température 29.* R температура окружающей среды (вторичного химического источника тока). D Umgebungstemperatur (einer Zelle oder Batterie). E temperatura ambiente (de un elemento o batería). I temperatura ambiente. N omgevingstemperatuur. P temperatura otoczenia (akumulatora). S omgivningstemperatur. (486)
5. **auto-ignition temperature** : the temperature of spontaneous ignition of a product in the absence of a flame, determined under standardized conditions. ★ température d'auto-inflammation → *température 33.* R температура самовоспламенения. D Selbstentzündungstemperatur. E punto de autoinflamación. I temperatura di autoaccensione. N zelfontbrandingstemperatuur. P temperatura samozapłonu. S tändtemperatur. (212)
6. **clad temperature computer** : → *computer 1*
7. **colour temperature** (T_c) : the temperature of a Planckian radiator whose radiation has the same chromaticity as that of a given stimulus. Unit: K *Note.* — The "reciprocal colour temperature" is also used. Unit: K^{-1}. ★ température de couleur → *température 38.* R цветовая температура. D Farbtemperatur. E temperatura de color. I temperatura di colore. N kleurtemperatur. P temperatura barwowa. S färgtemperatur. (845)
8. **condensation temperature** : at a given pressure, the temperature at which an insulating gas begins to deposit as a liquid. ★ température de condensation → *température 37.* R температура конденсации. D Kondensationstemperatur. E temperatura de condensación. I temperatura di condensazione. N condensatietemperatuur. P temperatura skraplania. S kondensationstemperatur. (212)
9. **condensed-mercury temperature** : the temperature measured at a stated point on a metal envelope or at a point on a glass envelope in the region where the mercury is condensing. ★ température du mercure condensé → *température 55.* R температура конденсированной ртути. D Temperatur des kondensierten Quecksilbers. E temperatura del mercurio condensado. I temperatura del mercurio condensato. N temperatuur van het gecondenseerde kwik. P temperatura skroplonej rtęci. S temperatur hos kvicksilverkondens. (531)

10. **(correlated) colour temperature** : the temperature of a black body (Planckian) radiator whose perceived colour most closely resembles that of a given stimulus at the same brightness and under specified viewing conditions. ★ température de couleur (proximale) → *température 39.* R (коррелированная) цветовая температура. (723)

11. **correlated colour temperature** (T_{cp}) : the temperature of the Planckian radiator whose perceived colour most closely resembles that of a given stimulus at the same brightness and under specified viewing conditions. Unit: K *Notes. 1* — The recommended method of calculating the correlated colour temperature of a stimulus is to determine on a chromaticity diagram the temperature corresponding to the point on the Planckian locus that is intersected by the agreed isotemperature line containing the point representing the stimulus (see CIE Publication No.15). *2* — Reciprocal correlated colour temperature is used rather than reciprocal colour temperature whenever correlated colour temperature is appropriate. ★ température de couleur proximale → *température 40.* R коррелированная цветовая температура. D ähnlichste Farbtemperatur. E temperatura de color correlacionada. I temperatura di colore prossimale. N toegevoegde kleurtemperatuur. P temperatura barwowa najbliższa. S korrelerad färgtemperatur. (845)

12. **critical temperature (of a cell or battery)** : the temperature at which an abrupt change of characteristic occurs. ★ température critique (d'un accumulateur) → *température 32.* R критическая температура (вторичного химического источника тока). D kritische Temperatur (einer Zelle oder Batterie). E temperatura crítica (de un elemento o batería). I temperatura critica. N kritische temperatuur. P temperatura krytyczna (akumulatora). S kritisk temperatur. (486)

13. **curing temperature** : the temperature specified as appropriate for curing a material for use or for test. ★ température de traitement → *température 50.* R температура отверждения. D Härtungstemperatur. E temperatura de curado. I temperatura di trattamento; temperatura di cottura. N uithardingstemperatuur. P temperatura utwardzania. S härdningstemperatur. (212)

14. **differential temperature** (of a thermostatic switch) : the difference between the operating temperature and the restoring temperature of a thermostatic switch. ★ température différentielle → *température 53.* R дифференциал температурный (термостатический выключатель). D Temperaturdifferenz (eines Thermoschalters). E temperatura diferencial (de un contactor termostático). I temperatura differenziale di un interruttore termostatico. N schakeltemperatuurverschil (van een thermostaat). P różnica temperatur zwrotna. S skillnadstemperatur (hos termostatströmställare). (581)

15. **distribution temperature** (T_D) : temperature of the Planckian radiator whose relative spectral distribution $S(\lambda)$ is the same or nearly the same as that of the radiation considered in the spectral range of interest.Unit: K. ★ température de répartition → *température 48.* R температура распределения. D Verteilungstemperatur. E temperatura de distribución. I temperatura di distribuzione. N verdelingstemperatur. P temperatura rozkładu. S fördelningstemperatur. (845)

16. **equivalent (spot) noise temperature** (of a linear two-port device) ($T(f)$) : the amount by which at a given frequency the noise temperature of a one-port device connected to the input of a given linear two-port device would have to be increased, if the noise due to this two-port device was temporarily suppressed, in order to cause the noise power spectral density at the output frequency corresponding to input frequency, to be the same as that of the total noise of the one-port and the given two-port devices. *Notes. 1* — This definition assumes that quantum phenomena are negligible. *2* — The equivalent spot noise temperature of a two-port device is dependent on the impedance of the one-port device connected to its input. ★ température équivalente de bruit → *température 56.* R эквивалентная шумовая температура (линейного четырехполюсника). D äquivalente Rauschtemperatur (eines linearen Zweitors). E temperatura equivalente de ruido (de un dispositivo bipuerta lineal). I temperatura equivalente di rumore (di un elemento lineare a due porte). N vervangende (punt)ruistemperatuur (van een lineaire tweepoort). P temperatura szumu równoważna (dwuwrotnika linearnego). S ekvivalent brustemperatur. (702)

17. **frequency tolerance (over a temperature range)** : → *tolerance 11*

18. **holding temperature** : the temperature of molten metal retained in a furnace to satisfy requirements for production. ★ température de maintien → *température 45.* R температура выдержки. D Warmhaltetemperatur. E temperatura de mantenimiento. I temperatura di mantenimento. N warmhoudtemperatuur. P temperatura utrzymywana (roztopionego metalu). S hålltemperatur. (841)

19. **ignition temperature of an explosive gas atmosphere** : the lowest temperature of a heated surface at which, under specified conditions, the ignition of a flammable substance in the form of a gas or vapour mixture with air will occur. *Note.* — IEC Publication 79-4 standardizes a method for the determination of this temperature. ★ température d'inflammation d'une atmosphère explosive gazeuse → *température 54.* R температура воспламенения взрывоопасной газовой среды. D Zündtemperatur einer explosionsfähigen Gasatmosphäre. E temperatura de inflamación de una atmósfera explosiva gaseosa. I temperatura di accensione di una atmosfera esplosiva per la presenza di gas. N ontstekingstemperatuur van een ontplofbare gasatmosfeer. P temperatura zapłonu atmosfery gazowej wybuchowej. S tändtemperatur. (426)

20. **initial temperature (of a cell or battery)** : the temperature of a cell or battery at the beginning of a discharge or charge. ★ température initiale (d'un accumulateur) → *température 59.* R начальная температура (вторичного химического источника тока). D Anfangstemperatur (einer Zelle oder Batterie). E temperatura inicial (de un elemento batería). I temperatura iniziale. N begintemperatuur. P temperatura początkowa (akumulatora). S begynnelsetemperatur. (486)

21. **internal equivalent temperature** (*Syn.* virtual temperature) : → *temperature 67*

22. **limiting temperature** (of increased safety electrical apparatus) : the maximum permissible temperature for apparatus or parts of apparatus equal to the lower of the two temperatures determined by : a) the danger of ignition of the explosive gas atmosphere ; b) the thermal stability of the materials used. ★ température limite → *température 60.* R предельная температура (электрооборудования с защитой вида "e"). D Grenztemperatur. E temperatura límite (de un material eléctrico con seguridad aumentada). I temperatura limite (per costruzioni elettriche a sicurezza aumentata). N grenstemperatuur (van elektrisch materieel met verhoogde veiligheid). P temperatura graniczna (urządzenia elektrycznego budowy wzmocnionej). S högsta tillåtna temperatur. (426)

23. **limiting temperature** : the recommended permitted maximum temperature in service for a class of insulation. ★ température limite → *température 61.* R предельная температура. D Grenztemperatur. E temperatura límite. I temperatura ammissibile. N maximale toegestane temperatuur. P temperatura dopuszczalna. S gränstemperatur. (811)

24. **low temperature antenna** (*Syn.* low noise antenna) : → *antenna 70*

25. **maximum continuous operating temperature** : the highest temperature at which an electro-heat equipment can be operated continuously. ★ température maximale en régime continu → *température 63.* R максимальная рабочая температура при непрерывной эксплуатации оборудования. D höchste dauernd zulässige Betriebs-Temperatur. E temperatura máxima en régimen continuo. I temperatura massima a regime continuo. N maximale temperatuur voor continu bedrijf. P temperatura maksymalna pracy ciągłej. S maximal kontinuerlig drifttemperatur. (841)

26. **maximum surface temperature** : the highest temperature attained in service under the most adverse operating conditions within the rating of the electrical apparatus by any part or any surface of the apparatus which could produce an ignition of the surrounding explosive atmosphere. *Note.* — The most adverse operating conditions include recognized overloads and any fault condition recognized in the specific standard for the type of protection concerned. ★ température maximale de surface → *température 62.* R максимальная температура поверхности. D maximale Oberflächentemperatur. E temperatura máxima de superficie. I temperatura massima superficiale. N maximale oppervlaktetemperatuur.

P temperatura powierzchni maksymalna. S högsta yttemperatur. (426)

27. **mean (equivalent) noise temperature** (of a linear two-port device) (T) : for a given linear two-port device the average in a specified frequency band of the equivalent noise temperature. ★ température (équivalente) moyenne de bruit → *température 58.* R средняя (эквивалентная) шумовая температура (линейного четырехполюсника). D mittlere (äquivalente) Rauschtemperatur (eines linearen Zweitors). E temperatura (equivalente) media de ruido (de un dispositivo bipuerta lineal). I temperatura (equivalente) media di rumore (di un elemeto lineare a due porte). N gemiddelde (vervangende) ruistemperatuur (van een lineaire tweepoort). P temperatura szumu (równoważna) przeciętna. S ..... (702)

28. **mean noise temperature** (of a one-port device) : for a given one-port device, the average in a specified frequency band of the spot noise temperature. ★ température de bruit moyenne → *température 36.* R средняя шумовая температура (двухполюсника). D mittlere Rauschtemperatur (eines Eintors). E temperatura de ruido medio (de un dispositivo monopuerta). I temperatura di medio rumore (di un elemento a una porta). N gemiddelde ruistemperatuur (van een eenpoort). P temperatura szumu przeciętna (jednowrotnika). S medelbrustemperatur. (702)

29. **(monochromatic) radiance temperature** (of a thermal radiator, for a specified wavelength) : temperature of the Planckian radiator for which the radiance at the specified wavelength has the same spectral concentration as for the thermal radiator considered.Unit: K. ★ température de luminance (monochromatique) → *température 44.* R (монохроматическая) яркостная температура (теплового излучателя для определенной длины волны). D spektrale Strahlungstemperatur (eines temperaturstrahlers für eine gegebene wellenlänge). E temperatura de radiancia (monocromática). I temperatura di radianza (monocromatica). N radiantietemperatuur; luminantietemperatuur. P temperatura luminancyjna. S radianstemperatur; svart temperatur. (845)

30. **noise temperature** (of a receiving antenna) : the temperature, usually expressed in kelvins, of a resistor having an available thermal noise power per unit bandwith equal to that at the output port of a given antenna at a specified frequency and in specified conditions of installation and operation. *Note.* — The noise temperature of an antenna depends on the intrinsic noise of the antenna and on noise from external sources. ★ température de bruit → *température 35.* R шумовая температура (приемной антенны). D Rauschtemperatur (einer Empfangsantenne). E temperatura de ruido (de un antena receptora). I temperatura di rumore (di un'antenna ricevente). N ruistemperatuur (van een ontvangantenne). P temperatura szumów (anteny odbiorczej). S brustemperatur. (712)

31. **ocean or sea temperature gradient power station** : → *power station 15*

32. **offset temperature** (of a thermostatic switch) : the difference between the operating or restoring temperature of a thermostatic switch when no current flows through the contacts in the closed position, and the operating or restoring temperature when the contacts are carrying a specified current. ★ température compensée → *température 31.* R изменение температуры срабатывания (термостатический выключатель). D Temperatur-Unterschied (eines Thermoschalters). E temperatura compensada (de un contactor termostático). I temperatura compensata di un interruttore termostatico. N temperatuurverschuiving bij stroomdoorgang. P zakres temperatury (łącznika termostatowego). S temperaturförskjutning (hos termostatströmställare). (581)

33. **operable temperature range** : → *range 49*

34. **operable temperature range** : → *range 50*

35. **operating temperature** (of a thermostatic switch) : the temperature which causes a thermostatic switch to make or break the circuit under specified conditions. ★ température de fonctionnement → *température 42.* R температура срабатывания (термостатический выключатель). D Ansprechtemperatur (eines Thermoschalters). E temperatura de funcionamiento (de un contactor termostático). I temperatura di funzionamento di un interruttore termostatico. N schakeltemperatuur. P temperatura działania (łącznika termostatowego). S kopplingstemperatur (hos termostatströmställare). (581)

36. **operating temperature** : the temperature at which an electro-heat equipment operates. ★ température d'exploitation → *température 52.* R эксплуатационная температура. D Betriebstemperatur. E temperatura de funcionamiento. I temperatura di esercizio. N bedrijfstemperatuur. P temperatura pracy. S drifttemperatur. (841)

37. **operating temperature range** : → *range 53*

38. **operating temperature range** : → *range 54*

39. **plasma temperature** : temperature of the ionized gas which may be expressed as local or as spatially averaged values. *Note.* — The maximum temperature of the plasma being at the centre of the jet. ★ température de plasma → *température 46.* R температура плазмы. D Plasmatemperatur. E temperatura de plasma. I temperatura di plasma. N plasmatemperatuur. P temperatura plazmy. S plasmatemperatur. (841)

40. **rated temperature** : the temperature normally used for which the furnace or electro-heating equipment is designed. ★ température assignée → *température 30.* R номинальная температура. D Nenntemperatur. E temperatura asignada. I temperatura nominale. N nominale temperatuur. P temperatura znamionowa. S märktemperatur. (841)

41. **rated temperature category of a capacitor** : the range of temperature of the ambient air or of the cooling medium for which the capacitor has been designed. ★ catégorie de température assignée d'un condensateur → *catégorie 2.* R номинальная температурная категория конденсатора. D Nenntemperaturklasse eines Kondensators. E categoría de temperatura asignada de un condensador. I classe di temperatura nominale di un condensatore. N toegekende temperatuurklasse van een condensator. P zakres temperatur kategorii kondensatora. S märktemperaturområde. (436)

42. **reactivity temperature coefficient** : → *coefficient 50*

43. **reference temperature** (of a piezoelectric resonator) : the temperature, as measured on the enclosure, at which certain measurements are made on a piezoelectric resonator. ★ température de référence → *température 47.* R температура эталонирования (пьезоэлектрического резонатора). D Bezugstemperatur (eines piezoelektrischen Resonators). E temperatura de referência (de un resonador piezoeléctrico). I temperatura di riferimento (di un risuonatore piezoelettrico). N referentietemperatuur. P temperatura odniesienia. S referenstemperatur. (561)

44. **relative temperature index** : → *index 37*

45. **restoring temperature** (of a thermostatic switch) : the temperature at which the contacts of a thermostatic switch reset to their original condition (normally open or normally closed) after having carried out the specified operation. ★ température de rétablissement → *température 49.* R температура восстановления первоначального состояния контактов (термостатический выключатель). D Rückstelltemperatur (eines Thermoschalters). E temperatura de restablecimiento (de un contactor termostático). I temperatura di ristabilimento di un interruttore termostatico. N hersteltemperatuur. P temperatura powrotu (łącznika termostatowego). S återställningstemperatur (hos termostatströmställare). (581)

46. **softening temperature** : the temperature, measured according to some specified procedure, at which a material shows an agreed amount of softening. ★ point de ramollissement → *point 36.* R температура размягчения. D Erweichungstemperatur. E punto de reblandecimiento. I punto di rammollimento. N verwekingstemperatuur. P temperatura mięknienia. S mjukningstemperatur. (212)

47. **spot noise temperature** (of a one-port device) : the exchangeable noise power spectral density at a given frequency of a one-port device divided by Boltzmann's constant. *Notes. 1* — This definition assumes that quantum effects are negligible. *2* — The spot noise temperature has the sign of the real part of the device impedance. *3* — If the device has an impedance with a positive real part, its noise temperature at a given frequency equals the thermodynamic temperature to which a resistor equal in value to the real part of the impedance should be brought in order to obtain an available power of thermal noise equal to the available power of noise of the device at the same frequency. *4* — A receiving antenna can be regarded as a one-port device when viewed from its output port. ★ température de bruit → *température 34.* R шумовая температура (двухполюсника). D Rauschtemperatur (eines Eintors).

E temperatura de ruido (de un dispositivo monopuerta). I temperatura di rumore (di un elemento a una porta). N puntruistemperatuur (van een eenpoort). P temperatura szumu (jednowrotnika). S brustemperatur. (702)

48. **storage temperature range** : → *range 67*
49. **temperature class** : → *class 12*
50. **temperature coefficient of capacity (of a cell or battery)** : → *coefficient 70*
51. **temperature coefficient of effective permeability** : → *coefficient 71*
52. **temperature coefficient of inductance** : → *coefficient 72*
53. **temperature coefficient of open-circuit voltage** : → *coefficient 73*
54. **temperature coefficient of permeability** : → *coefficient 74*
55. **temperature coefficient of the Geiger-Müller threshold** : → *coefficient 75*
56. **temperature compensated crystal oscillator** : → *oscillator 7*
57. **temperature compensated power bridge** : → *bridge 18*
58. **temperature compensated thermal time-delay switch** : → *switch 53*
59. **temperature factor (of reluctivity)** : → *factor 173*
60. **temperature index** : → *index 44*
61. **temperature inversion** : → *inversion 11*
62. **temperature limited state** (*Syn.* saturation state) : → *state 33*
63. **(thermodynamic) temperature** (*T*) : a state variable proportional to the thermal energy of a given body at equilibrium. ★ température (thermodynamique) → *température 64.* R температура (термодинамическая). D (thermodynamische) Temperatur. E temperatura (termodinámica). I temperatura termodinamica. N (thermodynamische) temperatuur. P temperatura. S (termodynamisk) temperatur. (111)
64. **tubular clear emitter (high temperature)** : → *emitter 13*
65. **tubular clear emitter (low temperature)** : → *emitter 14*
66. **virtual (equivalent) junction temperature** : the virtual temperature of the junction of a semiconductor device. ★ température virtuelle (équivalente) de jonction → *température 66.* R эффективная (эквивалентная) температура перехода. D Ersatzsperrschichttemperatur. E temperatura actual de unión. I temperatura virtuale (equivalente) di giunzione. N virtuele junctietemperatuur. P temperatura pozorna złącza. S virtuell skikttemperatur. (521)
67. **virtual temperature** (of a semiconductor device) (*Syn.* internal equivalent temperature (of a semiconductor device)) : a theoretical temperature which is based on a simplified representation of the thermal electrical behaviour of the semiconductor device. *Notes. 1* — The virtual temperature is not necessarily the highest temperature in the device. *2* — Based on the power dissipation and the thermal resistance or impedance, that corresponds to the mode of operation, the virtual junction temperature can be calculated using a specified relationship. ★ température virtuelle → *température 65.* R эффективная температура (полупроводникового прибора); внутренняя эквивалентная температура (полупроводникового прибора). D innere Ersatztemperatur; innere Temperatur (eines Halbleiterbauelements). E temperatura virtual (de un dispositivo semiconductor); temperatura equivalente interna (de un dispositivo semiconductor). I temperatura virtuale (di un dispositivo a semiconduttore); temperatura equivalente interna (di un dispositivo a semiconduttore). N virtuele (inwendige equivalente) temperatuur (van een halfgeleider). P temperatura pozorna (przyrządu półprzewodnikowego). S virtuell temperatur. (521)
68. **working temperature** : the temperature which is required for treatment of the charge material. ★ température de travail → *température 51.* R рабочая температура. D Arbeitstemperatur. E temperatura de trabajo. I temperatura di lavoro. N werktemperatuur. P temperatura robocza. S arbetstemperatur. (841)

temperature-rise

1. **temperature rise** : the difference between the temperature of the part under consideration and the temperature of the cooling air or of the water at the intake of the cooling equipment, for air-cooled or water-cooled transformers or reactors respectively. ★ échauffement → *échauffement 2.* R превышение температуры. D Übertemperatur. E calentamiento. I sovratemperatura. N temperatuurverhoging. P przyrost temperatury. S temperaturstegring. (421)
2. **temperature rise limit** : → *limit 19*
3. **temperature-rise test** : → *test 86*

tempered

1. **equally tempered scale** : → *scale 2*
2. **tempered semitone** : → *semitone 1*
3. **tempered whole tone** : → *tone 35*

tempering

1. **tempering** : a heat treatment generally performed on a metal alloy, usually after hardening, to give it more favourable mechanical properties for its subsequent use, for example: reduced brittleness. ★ revenu → *revenu 1.* R отпуск. D Anlassen. E templado. I tempra. N ontlaten. P odpuszczanie. S anlöpning. (841)

template

1. **four concentric circle near-field template** : a template comprising four concentric circles applied to a near-field radiation pattern from a fibre. *Note.* — The template is normally used as a global check of the acceptability of the various geometrical properties of the optical fibre in one simple process. ★ gabarit des quatre cercles concentriques en champ proche → *gabarit 5.* R модель четырех концентрических кругов ближнего поля. D Vier-Kreis-Methode. E plantilla de cuatro círculos concéntricos en campo cercano. I maschera di tolleranza a quattro anelli concentrici per il campo vicino. N vier-concentrische-cirkels-nabij-veld-sjabloon. P szablon czterokołowy pola bliskiego; wzornik czterokołowy pola bliskiego. S fyrcirkelmall för närfält. (731)
2. **four concentric circle refractive index template** : a template comprising four concentric circles applied to a complete refractive index profile of the fibre. *Note.* — The template is normally used as a global check of the acceptability of the various geometrical properties of the fibre in one simple process. ★ gabarit d'indice de réfraction à quatre cercles concentriques → *gabarit 6.* R модель четырех концентрических кругов показателя преломления. D Vier-Kreis-Brechungsindexmethode. E plantilla de índice de refracción en cuatro círculos concéntricos. I maschera di tolleranza a quattro anelli concentrici per il profilo d'indice di rifrazione. N brekingsindexsjabloon met vier concentrische cirkels. P szablon czterokołowy rozkładu współczynnika załamania; wzornik czterokołowy rozkładu współczynnika załamania. S fyrcirkelmall för indexprofil. (731)

temporal

1. **(analogue) temporal compression** : → *compression 1*
2. **(analogue) temporal expansion** : → *expansion 1*
3. **temporal coherence** (*Syn.* time coherence) : → *coherence 9*

temporary

1. **temporary overvoltage** : → *overvoltage 14*

tensile

1. **conductor tensile force** : → *force 8*

tension

1. **dead-end tension joint** : → *joint 6*
2. **interfacial tension** : the molecular attractive forces between unlike molecules at a liquid/liquid interface. ★ tension interfaciale → *tension 213.* R межфазное натяжение. D Grenzflächenspannung. E tensión interfásica. I tensione interfacciale. N grensvlakspanning. P napięcie międzypowierzchniowe. S gränsytspänning. (212)
3. **mid-span tension joint** : → *joint 17*
4. **steady state tape tension** : the tension of the tape, when it is travelling at uniform speed. ★ tension de la bande en régime permanent → *tension 154.* R натяжение ленты в установившемся режиме. D stationärer Bandzug. E tensiónde la cinta en régimen premanente. I tensione del nastro. N stationaire bandspanning. P naciąg taśmy w stanie ustalonym. S bandspänning vid drift. (806)
5. **tape tension** : the force exerted in the longitudinal direction on the tape, either when starting, moving or stopping by the various mechanical components of the transport system. ★ tension de

la bande → *tension 153.* R натяжение ленты. D Bandzug. E tensión de la cinta. I tensione del nastro. N bandspanning. P naciąg taśmy. S bandspänning. (806)

6. **tension clamp** (*Syn.* anchor clamp) : → *clamp 2*
7. **tension set** : → *set 57*
8. **tension support** : → *support 28*

tensioner

1. **automatic tensioner** : a device used in tensioning equipment to maintain automatically, within certain temperature limits, constant mechanical tension in the conductors. ★ tendeur automatique → *tendeur 4.* R автоматическое натяжное устройство. D selbsttätige Nachspannvorrichtung. E tensor automático. I tenditore automatico. N automatische afspanner, naspanner. P naprężnik samoczynny. S automatiskt spänndon. (811)
2. **balance weight tensioner** : an automatic tensioner attached to a mast, and ensuring constant tension in the conductors by means of balance weights. ★ tendeur à contrepoids → *tendeur 3.* R натяжное устройство с противовесом. D Nachspannvorrichtung mit Stellgewichten. E tensor con contrapesos. I tenditore a contrappeso. N afspanner (met gewichten). P naprężnik ciężarowy. S viktspänndon. (811)
3. **tensioner** (*Syn.* tensioning equipment) : → *equipment 80*

tensioning

1. **tensioning device** (*Syn.* tensioning equipment) : → *equipment 80*
2. **tensioning equipment** : → *equipment 80*

tensor

1. **Polder's tensor permeability** : → *permeability 18*
2. **tensor permeability** : → *permeability 29*
3. **tensor permeability for a magnetostatically saturated medium** (*Syn.* Polder's tensor permeability) : → *permeability 18*

tensoresistive

1. **tensoresistive effect** (*Syn.* piezoresistive effect) : → *effect 59*

tenth-value

1. **tenth-value layer** : → *layer 21*
2. **tenth-value thickness** (*Syn.* tenth-value layer) : → *layer 21*

teratogenic

1. **teratogenic effects** : → *effect 84*

terminal

1. **accounts for shared terminal** : → *account 1*
2. **asymmetrical terminal voltage** : → *voltage 11*
3. **centre terminal** (of a pair of arms) : in a pair of arms, the common terminal of the two principal arms. ★ borne centrale → *borne 9.* R средний вывод (пары плеч). D Mittelanschluß (eines Zweigpaares). E borne central (de un par de brazos). I terminale comune (di una coppia di rami). N middenklem (van een takkenpaar). P końcówka środkowa (pary ramion). S mittuttag. (551)
4. **control current terminals** (of a Hall generator) : the terminals of a Hall generator through which the control current flows. ★ bornes de commande → *borne 24.* R токовые выводы (генератора Холла). D Steueranschlüsse (eines Hallgenerators). E bornes de control de corriente (de un generador de Hall). I terminali della correnti di comando (di un generatore di Hall). N stuurstroomklemmen (van een Hallgenerator). P końcówki prądu sterującego hallotronu. S styr(ströms)uttag. (521)
5. **corresponding terminals** : terminals of different windings of a transformer, marked with the same letter or corresponding symbol. ★ bornes homologues → *borne 29.* R одноименные выводы. D entsprechende Anschlüsse. E bornes homólogos. I terminali omologhi. N overeenkomstige aansluitklemmen. P zaciski wzajemnie sobie odpowiadające. S samhörande uttag. (421)
6. **data terminal equipment** : → *equipment 20*
7. **earth terminal** : a terminal connected to the accessible metal parts of a machine, liable to be energized by accident, and which is designed for the connection of an earth conductor. ★ borne de terre → *borne 12.* R вывод для заземления. D Erdungsklemme. E borne de tierra. I morsetto di terra. N aardingsklem. P zacisk uziomowy. S jordningsuttag. (411)
8. **earth terminal** : a terminal intended for connection to earth. ★ borne de terre → *borne 13.* R заземляющий вывод. D Erdklemme. E borne de tierra. I terminale di terra. N aardklem. P końcówka uziemieniowa. S jordningsuttag. (436,604)
9. **fibre optic terminal device** : → *device 25*
10. **Hall terminals** : the terminals of a Hall generator between which the Hall voltage appears. ★ bornes Hall → *borne 28.* R выводы Холла. D Hallanschlüsse. E bornes de Hall (de un generador de Hall). I terminali di Hall. N Hallklemmen. P końcówki hallotronu. S hall(spännings)uttag. (521)
11. **high voltage terminal** : terminal intended to be connected to the power line. ★ borne à haute tension → *borne 7.* R вывод высокого напряжения. D Hochspannungsanschluß. E borne de alta tensión. I terminale di alta tensione. N hoogspanningsaansluitklem. P zacisk wysokiego napięcia. S högspänningsuttag. (321)
12. **incoming only terminal** : a terminal that can receive incoming calls from the network but which is prevented from making outgoing calls. ★ terminal spécialisé en arrivée → *terminal 17.* R только входящая оконечная установка. D Endstelle, nur ankommend. E terminal especializado en llegadas. I terminale solo ricevente. N aansluiting voor inkomend verkeer. P stacja z możliwością wejścia. S mottagningsterminal. (721)
13. **input terminals of a network** : the terminals of a network, connected to an external circuit or device capable of supplying electric energy or an electric signal. ★ bornes d'entrée d'un réseau → *borne 26.* R входные зажимы схемы. D Eingangspole; Eingangsklemmen eines Netzes. E terminales de entrada de una red. I terminali (morsetti) di ingresso di una rete. N ingangsklemmen van een netwerk. P końcówki wejściowe (układu). S ingångspoler. (131)
14. **intermediate voltage terminal** (of a capacitor divider) : a terminal intended for connection to an intermediate circuit such as the electromagnetic unit of a capacitor voltage transformer. ★ borne intermédiaire → *borne 16.* R вывод промежуточного напряжения (емкостного делителя). D Unterspannungsanschlußklemme (eines kapazitiven Spannungsteilers). E borne intermedio (de un divisor capacitivo). I terminale a tensione intermedia (di un divisore capacitivo). N middenspanningsklem van een capacitieve deler. P końcówka napięcia pośredniego (dzielnika kondensatorowego). S mellanspänningsuttag. (321,436)
15. **jumper terminal** : the termination of a conductor which permits an electrical continuity with a jumper lug (flag). ★ cosse de dérivation → *cosse 2.* R ответвительный зажим. D Stromschlaufenendklemme. E terminal de derivación. I capocorda di derivazione. N bretelklem. P końcówka (przewodu mostkującego). S slackhållare. (466)
16. **line terminal** : a terminal intended for connection to a line conductor of a network. ★ borne de ligne → *borne 11.* R линейный вывод. D Leiteranschluß. E borne de línea. I terminale di linea. N faseklem. P zacisk liniowy. S fasuttag. (421,436)
17. **low voltage terminal** (of a capacitor divider) : a terminal intended for connection to earth either directly or via an impedance of negligible value at network frequency. *Note.* — In a coupling capacitor, this terminal is connected to the signal transmitting device. ★ borne basse tension → *borne 8.* R низковольтный вывод (емкостного делителя). D Niederspannungsanschlußklemme (eines kapazitiven Spannungsleiters). E borne de baja tensión (de un divisor capacitivo). I terminale di bassa tensione (di un divisore capacitivo). N laagspanningsklem van een capacitieve deler. P końcówka niskonapięciowa (dzielnika kondensatorowego). S lågspänningsuttag. (321,436)
18. **main earthing terminal** (*Syn.* main earthing bar) : a terminal or bar provided for the connection of protective conductors, including equipotential bonding conductors, and conductors for functional earthing if any, to the means of earthing. ★ borne principale de terre → *borne 22.* R главная клемма заземления; главная шина заземления. D Haupterdungsklemme; Haupterdungsschiene. E borne principal de tierra; barra principal de tierra. I collettore (o nodo) principale di terra. N hoofdaardklem; hoofdaardrail. P szyna uziemiająca główna. S huvudjordningsplint; huvudjordningsskena. (826)

19. **main terminals** : the voltage between the main terminals. ★ bornes maîtresses → *borne 30.* R основные выводы. D Hauptanschlüsse. E bornes principales. I terminali principali. N stroomvoerende aansluitingen. P końcówki główne. S huvud(ströms)uttag. (521)
20. **negative terminal** : the terminal of a cell or battery connected to the negative electrode(s). ★ borne négative → *borne 17.* R отрицательный вывод. D negativer Pol. E terminal negativo. I polo negativo. N negatieve (eind)pool. P końcówka ujemna. S negativ pol; minuspol. (486)
21. **neutral terminal** : a) For polyphase transformers or reactors and polyphase banks of single-phase transformers or reactors : The terminal(s) connected to the common point (the neutral point) of a star-connected or zigzag-connected winding. b) For single-phase transformers or reactors : The terminal intended for connection to a neutral point of a network. ★ borne neutre → *borne 18.* R нейтральный вывод. D Sternpunktanschluß. E borne neutro. I terminale di neutro. N sterpuntklem. P zacisk zerowy. S nollutag. (421)
22. **n-terminal circuit** : → *circuit 126*
23. **n-terminal-pair network** (*Syn. n*-**port network**) : → *network 59*
24. **outer terminal** (of a pair of arms) : in a pair of arms one of the two terminals other than the centre terminal. ★ borne extérieure → *borne 15.* R крайний вывод (пары плеч). D äußerer Anschluß (eines Zweigpaares). E borne exterior (de un par de brazos). I terminale esterno (di un paio di rami). N buitenklem (van een takkenpaar). P końcówka zewnętrzna (pary ramion). S ytteruttag. (551)
25. **outgoing only terminal** : a terminal that can make outgoing calls to the network but which is prevented from receiving incoming calls. ★ terminal spécialisé en départ → *terminal 18.* R только исходящая оконечная установка. D Endstelle, nur gehend. E terminal especializado en salidas. I terminale solo trasmittente. N aansluiting voor uitgaand verkeer. P stacja z możliwością wyjścia. S sändningsterminal. (721)
26. **output terminals of a network** : the terminals of a network, connected to an external circuit or device capable of receiving electric energy or an electric signal. ★ bornes de sortie d'un réseau → *borne 25.* R выходные зажимы схемы. D Ausgangspole; Ausgangsklemmen eines Netzes. E terminales de salida de una red. I terminali (morsetti) di uscita di una rete. N uitgangsklemmen van een netwerk. P końcówki wyjściowe (układu). S utgångspoler. (131)
27. **packet mode terminal** : a data terminal equipment which can control, format, transmit and receive packets. ★ terminal en mode paquet → *terminal 16.* R пакетный терминад; оконечное оборудование пакетного типа. D paketfähige Endeinrichtung. E terminal en modo paquete. I terminale a pacchetto. N eindstation met pakketontvangstmogelijkheid. P urządzenie końcowe pakietowe. S datapaketsterminal. (721)
28. **positive terminal** : the terminal of a cell or battery connected to the positive electrode(s). ★ borne positive → *borne 19.* R положительный вывод. D positiver Pol. E terminal positivo. I polo positivo. N positieve (eind)pool. P końcówka dodatnia. S positiv pol; pluspol. (486)
29. **pre-insulated terminal end** : → *end 15*
30. **receive fibre optic terminal device** : → *device 47*
31. **separate terminal enclosure** : → *enclosure 11*
32. **shared terminal** : a facility offered to certain subscribers permitting the use of the same terminal, sharing the corresponding costs and charges. ★ poste partagé → *poste 48.* R оконечная установка совместного пользования. D gemeinschaftliche Endstelle. E terminal común; centro compartido. I terminale condiviso. N ..... P stacja towarzyska. S delad terminal. (721)
33. **strip terminals** : a form of termination in which the terminals are strips mounted integral with the machine frame or assembly. ★ bornes plates → *borne 31.* R выводы в виде шин. D Klemmenleisten. E bornes planos. I terminali a piastra. N aansluitstrippen. P zacisk szynowy. S uttagsskenor. (411)
34. **stud terminals** : a form of termination in which the terminals are studs mounted integral with the machine frame or assembly. ★ bornes à tige → *borne 23.* R выводы в виде штифтов. D Klemmenbolzen. E bornes de vástago. I terminali a bullone. N aansluitbouten. P zacisk sworzniowy. S uttagsbultar. (411)
35. **symmetrical terminal voltage** : → *voltage 200*
36. **(telecommunication) terminal** : an equipment connected to a telecommunication network to provide access to one or more specific services. *Note.* — The term may be qualified to indicate the type of service or user, e.g. "data terminal", "subscriber's terminal". ★ terminal (de télécommunication) → *terminal 15.* R оконечная установка. D Endstelle. E terminal (de telecomunicación). I linea d'abbonato - raccordo d'abbonato. N (telecommunicatie) toestel; (telecommunicatie) station. P linia telckomunikacyjna. S terminal. (701,715)
37. **(telegraph) terminal** : pertaining to or designating equipments connected to the end of a subscriber's line or telegraph circuit, which can either establish or receive calls, or store and retransmit signals, and which can be uniquely identified. ★ terminal (télégraphique) → *terminal 19.* R (телеграфное) оконечное оборудование; терминал. D (Telegrafen-)Endstelle. E terminal (telegráfico). I terminale telegrafico. N (telegraaf)eindstation. P urządzenie końcowe (telegraficzne); stacja (telegraficzna). S terminal. (721)
38. **terminal** : a point of an electric circuit, intended for making a connection. ★ borne → *borne 4.* R зажим (не рекомендуется применять в этом смысле). D Anschlußpunkt; Pol. E borne; terminal. I morsetto; terminale. N (aansluit)klem. P końcówka. S uttag; pol. (131)
39. **terminal** (as a component) : a component provided for the connection of a device to external conductors. ★ borne → *borne 5.* R зажим (рассматриваемый как компонент). D Klemme (als Geräteteil). E borne (considerado como componente); terminal. I morsetto; terminale; polo (come componente). N aansluitklem. P końcówka. S tag (uttag, intag). (151)
40. **terminal** : a conducting element of a winding intended for connection to an external electrical conductor. ★ extrémité sortie → *extrémité 11.* R вывод. D Klemme. E salida de devanado. I terminale di uscita. N wikkelingseinde; uitloper. P wyprowadzenie, końcówka, zacisk. S uttag. (411)
41. **terminal** (of a cell or battery) : a conductive part provided for the connection of a cell or battery to external conductors. ★ borne → *borne 6.* R вывод (вторичного химического источника тока). D Pol (eines Akkumulators). E terminal. I polo (di un accumulatore). N (eind)pool. P końcówka (akumulatorowa). S pol. (486)
42. **terminal** : a conductor that serves to connect an electrode or element to its external circuit. ★ connexion → *connexion 11.* R вывод. D Anschluß. E conexión de electrodo; salida; terminal. I connessione; uscita. N aansluiting. P końcówka. S uttag. (531)
43. **terminal** : a part of a component which provides a re-usable connection. ★ cosse → *cosse 1.* R вывод компонента. D Anschlußstück. E terminal. I terminale. N aansluiting. P końcówka. S uttag. (581)
44. **terminal block** : → *block 19*
45. **terminal board** : → *board 23*
46. **terminal connection method** : → *method 25*
47. **terminal connector** : → *connector 50*
48. **terminal end** : → *end 20*
49. **terminal installation for data transmission** (*Syn.* data station) : → *station 7*
50. **terminal of a network** : a node of a network allowing connection to other circuits. ★ borne d'un réseau → *borne 14.* R зажим схемы. D Anschlußpol; Anschlußklemme eines Netzes. E terminal de una red; borne de una red. I terminale (morsetto) di una rete. N (aansluit)klem van een netwerk. P końcówka układu. S pol. (131)
51. **terminal pair** (*Syn.* port) : → *port 4*
52. **terminal point** : → *point 47*
53. **terminal support** : → *support 29*
54. **transmit fibre optic terminal device** : → *device 58*

terminal box

1. **air insulated terminal box** : a terminal box so designed that the protection of phase conductors against electrical failure within the terminal box is by adequately spacing bare conductors with appropriate insulated supports. ★ boîte de connexions dans l'air → *boîte de connexions 9.* R соединительная коробка с воздушной изоляцией. D Klemmenkasten mit Luftisolation. E caja de conexiones sin aislamiento de fases. I morsettiera con isolamento in aria. N aansluitkast met fase-isolatie door lucht. P skrzynka zaciskowa z izolacją powietrzną. S uttagslåda med luftavstånd mellan uttag. (411)

2. **flameproof terminal box** : a terminal box so designed that it may form part of a flameproof enclosure. ★ boîte de connexions antidéflagrante → *boîte de connexions 8.* R взрывонепроницаемая соединительная коробка. D explosionsgeschützter Klemmenkasten. E caja de conexiones antideflagrante. I morsettiera antideflagrante. N ontploffingsveilige aansluitkast. P skrzynka zaciskowa ognioszczelna. S explosionssäker uttagslåda. (411)
3. **open terminal box** : a terminal box which is, normally, open only to the interior of the machine. ★ boîte de connexions ouverte → *boîte de connexions 10.* R открытая соединительная коробка. D offener Klemmenkasten. E caja de conexiones abierta. I morsettiera aperta. N aansluitkast in open verbinding met de machine. P otwarta skrzynka zaciskowa. S normal uttagslåda. (411)
4. **phase insulated terminal box** : a terminal box so designed that the protection of phase conductors against electrical failure within the terminal box is mainly by solid insulation. ★ boîte de connexions à isolation de phases → *boîte de connexions 3.* R соединительная коробка с изолированными фазами. D Klemmenkasten mit Phasenisolation. E caja de conexiones con aislamiento de fases. I morsettiera con isolamento tra le fasi. N aansluitkast met fase-isolatie door vaste stof. P skrzynka zaciskowa z odizolowanymi fazami. S uttagslåda med fast isolering mellan uttag. (411)
5. **phase segregated terminal box** : a terminal box so designed that the protection of phase conductors against electrical failure within the terminal box is mainly by solid insulation, and additionally by earthed metallic barriers forming completely distinct individual phase compartments so as to restrict any electrical breakdown to an earth fault. ★ boîte de connexions à phases compartimentées → *boîte de connexions 6.* R соединительная коробка с отдельными камерами для каждой фазы. D Klemmenkasten mit abgeteilten Phasen. E caja de conexiones con fases compartimentadas. I morsettiera a fasi isolate. N aansluitkast met gescheiden fasecompartimenten. P skrzynka zaciskowa z oddzielnymi komorami dla poszczególnych faz. S uttagslåda med skilda fasrum. (411)
6. **phase separated terminal box** : a terminal box so designed that the protection of phase conductors against electrical failure within the single compartment terminal box is mainly by solid insulation, and additionally by earthed metal so as to restrict any electrical breakdown to an earth fault. ★ boîte de connexions à séparation de phases → *boîte de connexions 7.* R соединительная коробка с разделенными фазами. D Klemmenkasten mit Phasentrennung. E caja de conexiones con separación de fases. I morsettiera a fasi separate. N aansluitkast met fase-isolatie door vaste stof en aardschermen. P skrzynka zaciskowa z oddzielonymi fazami. S uttagslåda med fast isolering och metallskärm mellan uttag. (411)
7. **pressure containing terminal box** : a terminal box so designed that the products of an electrical breakdown within the box are completely contained inside the box. ★ boîte de connexions à l'épreuve de la pression → *boîte de connexions 4.* R соединительная коробка под давлением. D druckfester Klemmenkasten. E caja de conexiones a prueba de presión. I morsettiera stagna. N drukvaste aansluitkast. P skrzynka zaciskowa ciśnieniowa. S trycksäker uttagslåda. (411)
8. **pressure relief terminal box** : a terminal box so designed that the products of an electrical breakdown within the box are relieved through a pressure relief diaphragm. ★ boîte de connexions à membrane → *boîte de connexions 5.* R соединительная коробка с диафрагмой. D Klemmenkasten mit Druckausgleich. E caja de conexiones con membrana. I morsettiera elastica. N aansluitkast met membraan. P skrzynka zaciskowa z przeponą. S sprängsäker uttagslåda. (411)
9. **terminal box** : a form of termination in which the terminals are connected to the incoming supply leads inside a box which virtually encloses the connections, and is of a minimum size consistent with adequate access and with clearance and creepage distance requirements. The box is provided with a removable cover plate for access. ★ boîte de connexions → *boîte de connexions 1.* R соединительная коробка. D Klemmenkasten. E caja de conexiones. I scatola terminali, morsettiera. N aansluitkast. P skrzynka zaciskowa. S uttagslåda. (411)
10. **terminal box** : a box constructed to house cable terminations. ★ coffret d'extrémité → *coffret 3.* R кабельный ввод. D Abschlußkasten. E caja terminal. I cassetta di terminazione. N klemmenkast. P skrzynka kablowa. S kabelbox. (461)
11. **terminal box** (*Syn.* motor connection box) : → *box 10*

terminating

1. **data circuit terminating equipment** : → *equipment 19*
2. **(four-wire) terminating set** : → *set 17*
3. **terminating** : pertaining to traffic in a network, to indicate that the destinations of the traffic are located within this network. ★ d'arrivée → *arrivée 3.* R оконечный входящий. D End-. E de llegada; de terminación. I di arrivo. N eindigend. P końcowy. S avslutande. (714)
4. **terminating immittance of a port** : → *immittance 8*
5. **terminating impedance** : → *impedance 63*
6. **terminating traffic** : → *traffic 22*
7. **4W/2W terminating set** (*Syn.* (four-wire) terminating set) : → *set 17*
8. **4-wire terminating set** (*Syn.* (four-wire) terminating set) : → *set 17*

termination

1. **fixed termination conductor** : → *conductor 36*
2. **matched termination** (*Syn.* matched load) : a transmission line termination which does not reflect any energy. ★ terminaison adaptée → *terminaison 3.* R согласованная оконечная нагрузка; согласованная нагрузка. D angepasster Abschluss. E terminación adaptada; carga adaptada. I terminazione adattata; carico adattato. N aangepaste afsluiting; aangepaste belasting. P obciążenie dopasowane. S anpassad avslutning. (726)
3. **mismatched termination** : a transmission line termination which reflects a specified amount of energy. ★ terminaison non adaptée → *terminaison 7.* R несогласованная оконечная нагрузка. D fehlangepasster Abschluss. E terminación desadaptada; carga desadaptada. I terminazione non adattata; terminazione disadattata; carico non adattato. N niet aangepaste afsluiting. P obciążenie niedopasowane. S missanpassad avslutning. (726)
4. **network termination unit** : → *unit 46*
5. **open circuit termination** : an essentially non-radiating transmission line termination which provides an infinite impedance or zero admittance in a specified reference plane. ★ terminaison à circuit ouvert → *terminaison 2.* R нагрузка холостого хода. D Leerlaufabschluss. E terminación en circuito abierto. I terminazione a circuito aperto. N open afsluiting. P rozwora; rozwarcie. S öppen ledning. (726)
6. **plug-in termination** : a termination of a cable permitting the connection or the disconnection of the cable to other equipment, with or without voltage, generally in the absence of load current. ★ prise embrochable → *prise 33.* R концевое устройство со штепсельным контактом. D steckbarer Endverschluß. E conectador enchufable. I terminazione sezionabile. N stekeraansluiting. P głowica (kablowa) wtykowa. S avslutning av instickstyp. (461)
7. **section termination** : a conventional interface selected to be the boundary between the physical transmission medium and its associated equipment, such as repeaters. *Note.* — The location of the section termination in relation to the associated accessories, such as splices, connectors, and flexible connecting cables, may differ for different transmission systems, different manufacturers and different administrations. ★ extrémité de section → *extrémité 8.* R окончание участка. D Abschnittsabschluß. E terminal de sección. I terminazione di sezione. N aansluitpunt van een sectie. P zakończenie odcinka kablowego. S sektionsgränssnitt. (704)
8. **short-circuit termination** : an essentially non-radiating transmission line termination which provides a zero impedance or infinite admittance in a specified reference plane. ★ terminaison en court-circuit → *terminaison 6.* R нагрузка короткого замыкания. D Kurzschlussabschluss. E terminación en cortocircuito. I terminazione in cortocircuito. N kortgesloten afsluiting. P zwora. S kortslutning. (726)
9. **termination** : the arrangement provided for making the connections between the machine terminals and the external conductors. ★ connexions de sortie → *connexion 38.* R выводные устройства. D Anschluß. E conexiones de salida. I collegamenti di uscita. N aansluitklemmen. P zaciski. S ..... (411)

10. **termination** : a device fitted to the end of a cable to ensure electrical connection with other parts of the system and to maintain the insulation up to the point of connection. ★ extrémité (de câble) → *extrémité 7.* R концевая муфта. D Endenabschluß. E terminal (de cable). I terminazione. N termination/aansluiting. P głowica kablowa prosta. S avslutning. (461)
11. **termination** : 1) A permanent connection. 2) The part of a contact, terminal or terminal end to which a conductor is normally connected. ★ raccordement → *raccordement 12.* R ..... D Anschluß. E unión. I connessione. N draadaansluiting. P ..... S anslutning. (581)
12. **termination fitting** : → *fitting 2*
13. **termination phase control** : → *control 189*
14. **termination point** : → *point 48*

ternary

1. **ternary digit rate** : → *rate 88*
2. **ternary (digital) signal** : → *signal 239*

tertiary

1. **tertiary digital group** : → *group 55*

tesla

1. **tesla, T** (T) : SI unit of magnetic flux density. ★ tesla, T → *tesla 1.* (100)

test

1. **accelerated test** : a test in which the applied stress level is chosen to exceed that stated in the reference conditions in order to shorten the time duration required to observe the stress response of the item, or to magnify the response in a given time duration. *Note.* — To be valid, an accelerated test shall not alter the basic fault modes and failure mechanisms, or their relative prevalence. ★ essai accéléré → *essai 16.* R ускоренное испытание. D zeitraffende Prüfung. E ensayo acelerado. I prova accelerata. N versnelde proef. P próba przyspieszona. S accelererad provning. (191)
2. **acceptance test** : a contractual test to prove to the customer that the device meets certain conditions of its specification. ★ essai de réception → *essai 41.* R приемо-сдаточное испытание. D Abnahme (prüfung). E ensayo de recepción; ensayo de aceptación. I prova di accettazione. N afnameproef. P próba odbiorcza. S acceptansprovning. (151,411,811)
3. **alternative test method** : → *method 1*
4. **artificial pollution test** : dielectric test of an insulating surface in air, this surface being covered through a defined process with artificial pollution of specified characteristics. ★ essai sous pollution artificielle → *essai 76.* R испытание изоляции с загрязнением. D Fremdschichtprüfung. E ensayo bajo contaminación artificial. I prova d'isolamento con inquinamento artificiale. N diëlektrische beproeving onder kunstmatige vervuiling. P próba wytrzymałości przy zabrudzeniu (sztucznym). S provning med konstgjord försmutsning. (604)
5. **balance test** : a test taken to ascertain that a rotor is balanced within specified limits. ★ essai d'équilibrage → *essai 57.* R балансировочное испытание ротора. D Laufruheprüfung. E ensayo de equilibrado. I controllo dell'equilibratura. N controle op onbalans. P próba wyważenia. S balanseringsprov. (411)
6. **bar-to-bar test** : a test in which the resistance between adjacent commutator segments is measured in order to check that the winding is satisfactory. ★ essai entre lames → *essai 72.* R определение сопротивления между коллекторными пластинами. D Prüfung zwischen Stromwenderstegen. E ensayo entre delgas. I prova tra le lamelle. N weerstandsmeting tussen opeenvolgende lamellen. P pomiar rezystancji międzywycinkowej. S mätning av lamellspänning. (411)
7. **black-band test** : a commutation test to determine the limits of the range of variation of commutating field strength between which the commutation is practically sparkless for a specified range of loads. ★ essai de bande noire → *essai 23.* R опыт по определению зоны безыскровой работы. D Aufnahme der Kommutierungsgrenzkurven. E ensayo de banda negra. I prova per determinazione della banda nera. N bepaling van de zwarte band. P wyznaczenie obszaru bezisкrowej komutacji. S bestämning av gnistgränser. (411,811)
8. **brake test** (*Syn.* braking test) : → *test 9*
9. **braking test** (UK) (*Syn.* brake test (USA)) : a test in which the mechanical power output of a machine acting as a motor is determined by the measurement of the shaft torque, by means of a brake or dynamometer, together with the rotational speed. Alternatively, a test performed on a machine acting as a generator, by means of a dynamometer to determine the mechanical power input. ★ essai au frein → *essai 17.* R испытание торможением. D Bremsversuch. E ensayo al freno. I prova al freno. N beproeving met behulp van een rem. P pomiary z zastosowaniem urządzenia hamulcowego. S bromsningsprov. (411)
10. **busy test** : a procedure for determining whether a traffic carrying device or a traffic circuit is free. ★ test d'occupation → *test 3.* R проверка на занятость. D Besetztpruefung. E ensayo de ocupación. I prova di occupato. N bezet testen. P próba zajętości. S upptagetprov. (714)
11. **calibrated driving machine test** : a test in which the mechanical input or output of an electrical machine is calculated from the electrical output or input of a calibrated machine mechanically coupled to the machine on test. ★ essai avec machine auxiliaire tarée → *essai 19.* R испытание по способу тарированного двигателя. D Prüfung mit geeichter Hilfsmaschine. E ensayo con máquina auxiliar tarada. I prova con macchina tarata. N beproeving met behulp van een geijkte hulpmachine. P pomiary z zastosowaniem wywzorcowanej maszyny. S hjälpmaskinsprov. (411)
12. **calorimetric test** : a test in which the losses in a machine are deduced from the heat produced by them. The losses are calculated from the heat absorbed by the coolant and the heat dissipated in the surrounding media, if any. ★ essai calorimétrique → *essai 20.* R калориметрическое испытание. D kalorimetrische Verlustmessung. E ensayo calorimétrico. I prova calorimetrica. N calorimetrische bepaling der verliezen. P pomiary kalorymetryczne. S kalorimetriskt prov. (411)
13. **commissioning test** : a test on a device or equipment carried out on site, to prove the correctness of installation and operation. ★ essai de mise en service → *essai 37.* R приемочное испытание. D Inbetriebnahme (prüfung). E ensayo de puesta en servicio. I prova di servizio. N inbedrijfsstellingsproef. P próba rozruchu. S provning vid idrifttagning. (151)
14. **commissioning tests** : tests applied to a machine on site under normal service conditions to show that the machine has been erected and connected in a correct manner and is able to work satisfactorily. ★ essais de recette → *essai 79.* R пусковые испытания. D Prüfungen bei Inbetriebnahme. E ensayos de conformidad. I prove di collaudo. N beproeving vóór inbedrijfstelling. P badania uruchomieniowe. S provning i drift. (411)
15. **commutation test** : a test on a machine with a commutator to assess the commutating properties under specified conditions. ★ essai de commutation → *essai 25.* R оценка качества коммутации. D Stromwendungsprüfung. E ensayo de conmutación. I prova di commutazione. N commutatieproef. P próba komutacji. S kommuteringsprov. (411)
16. **compliance test** : a test used to show whether or not a characteristic or a property of an item complies with the stated requirements. ★ essai de conformité → *essai 26.* R контрольное испытание. D Nachweisprüfung. E ensayo de conformidad. I prova di rispondenza; prova di conformità. N conformiteitsproef. P próba zgodności. S kontroll. (191)
17. **conversation test** : a process for evaluating the transmission performance of a complete connection in which the operators at each end speak and listen one after the other trying to exchange information suitable for the execution of a given task. ★ essai de conversation → *essai 27.* R испытания разговором. D Konversationstest. E ensayo de conversación. I prove di conversazione. N spreektest. P próba rozmowy. S konversationsprovning. (722)
18. **core test** : a test taken on a laminated, usually unwound, core of a machine to determine its loss characteristic or the effectiveness of the lamination insulation. ★ essai de circuit magnétique → *essai 24.* R испытание сердечника. D Eisenprobe. E ensayo de circuito magnético. I prova del circuito magnetico. N controlemeting aan een plaatpakket. P badanie rdzenia. S kärnprov. (411)
19. **cut-through test** (of enamelled wire) : a test determining the maximum temperature at which no penetration of the enamel takes place under specified conditions. ★ essai de thermoplasticité → *essai 50.* R испытание на

продавливание (эмалированного провода). D Prüfung der Erweichungungstemperatur (an einem Lackdraht). E ensayo de plasticidad térmica (de un hilo esmaltado); ensayo de termoplasticidad (de un hilo esmaltado). I prova di termoplasticità (di un filo smaltato). N doorsnijdingsproef. P próba termoplastyczności (drutu emaliowanego). S genomtrycksprovning. (212)

20. **degree of standardized test distortion** : → *degree 14*

21. **determination test** : a test used to establish the value of a characteristic or a property of an item. ★ essai de détermination → *essai 32.* R определительное испытание. D Bestimmungsprüfung. E ensayo de determinación. I prova di determinazione. N meetproef. P próba określająca. S provning. (191)

22. **dielectric dry test** : dielectric test of an insulating surface in air, this surface being effectively dry and clean. ★ essai diélectrique à sec → *essai 61.* R испытание изоляции в сухом состоянии. D dielektrische Trockenprüfung. E ensayo dieléctrico en seco. I prova d'isolamento a secco. N diëlektrische beproeving in droge toestand. P próba wytrzymałości elektrycznej na sucho. S torrprov. (604)

23. **dielectric wet test** : dielectric test of an insulating surface in air, this surface being submitted to artificial rain of specified characteristics. ★ essai diélectrique sous pluie → *essai 62.* R испытание увлажненной изоляции. D dielektrische Regenprüfung. E ensayo dieléctrico bajo lluvia. I prova d'isolamento sotto pioggia. N diëlektrische beproeving onder kunstmatige regen. P próba wytrzymałości elektrycznej pod deszczem. S våtprov. (604)

24. **digital test sequence** : → *sequence 3*

25. **discharge energy test** : a test for determining the magnitude of the energy dissipated by a discharge or discharges within the insulation at a predetermined value of voltage. ★ essai d'énergie de décharge → *essai 56.* R опыт по определению энергии разряда. D Messung der Entladungsenergie. E ensayo de energía de descarga. I misura dell'energia di scarica. N meting van de ontladingsenergie. P pomiar energii jonizacji. S mätning av energi i partiella urladdningar. (411)

26. **discharge inception test** : a test for measuring the lowest voltage at which discharges of a specified magnitude recur in successive cycles when an increasing alternating voltage of working frequency is applied to the insulation. ★ essai de seuil de décharge → *essai 46.* R опыт по определению порога разряда. D Bestimmung des Entladungseinsatzes. E ensayo de umbral de descarga. I misura della soglia di scarica. N ionisatieproef. P pomiar progu jonizacji. S mätning av tändspänning för partiella urladdningar. (411)

27. **dissipation factor test** (*Syn.* loss tangent test) : → *test 49*

28. **duplicate tests** : the tests applied to a machine of the same design and construction as a machine previously subjected to type-tests, with the object of demonstrating that the machine is in accordance with the original design. ★ essais de série → *essai 80.* R повторные типовые испытания. D Nachbauprüfungen. E ensayos de serie. I prove di serie. N vergelijkende beproeving. P powtórne badanie typu. S dubblettkontroll. (411)

29. **dynamometer test** : a braking test in which an electrical dynamometer is used. ★ essai dynamométrique → *essai 65.* R динамометрическое испытание. D Bremsversuch mit einer Pendelmaschine. E ensayo dinamométrico. I prova al dinamometro. N beproeving met behulp van een dynamometer. P pomiary z zastosowaniem maszyny dynamometrycznej. S momentvågsprov. (411)

30. **electrical back-to-back test** : a test in which two identical machines are mechanically coupled together and are both connected electrically to a power system. The total losses of both machines are taken as the power input drawn from the system. ★ essai en opposition avec marche en parallèle sur un réseau → *essai 70.* R испытания по способу электрической взаимной нагрузки. D Rückarbeitsverfahren parallel am Netz. E ensayo en oposición con acoplamiento en paralelo sobre una red. I prova in opposizione a recupero in rete. N bepaling der verliezen in tegenschakeling. P pomiary w układzie elektrycznej pracy zwrotnej. S elektriskt återarbetsprov. (411)

31. **endurance test** : a test carried out over a time interval to investigate how the properties of an item are affected by the application of stated stresses and by their time duration or repeated application. ★ essai d'endurance → *essai 55.* R испытание длительным нагружением. D Dauerprüfung. E ensayo de endurancia. I prova di durata. N duurproef. P próba trwałości. S uthållighetsprov. (151,191)

32. **Epstein test frame** (*Syn.* Epstein square) : → *square 2*

33. **explosive test mixture** : → *mixture 2*

34. **field test** : a compliance test or determination test made in the field where operating, environmental, maintenance and measurement conditions present at the time of the test are recorded. ★ essai sur site → *essai 77.* R эксплуатационное испытание. D Einsatzprüfung. E ensayo de campo. I prova in campo. N veldproef. P próba w miejscu użytkowania. S fältprov. (191)

35. **geometry test chart** : → *chart 2*

36. **harmonic test** : a test to determine directly the value of one or more harmonics of the waveform or a periodic quantity associated with a machine relative to the fundamental of that quantity. ★ essai d'harmoniques → *essai 58.* R гармонический анализ. D Ermittlung des Oberschwingungsgehaltes. E ensayo de armónicas. I analisi delle armoniche. N directe bepaling van harmonische componenten. P pomiar harmonicznych. S bestämning av övertoner. (411)

37. **high voltage test** : a test applied to insulation made by applying a high voltage across the insulation to determine the adequacy of its dielectric strength. ★ essai diélectrique → *essai 59.* R испытание на электрическую прочность. D Wicklungsprüfung. E ensayo dieléctrico. I prova dielettrica. N spanningsproef. P próba wytrzymałości elektrycznej. S spänningsprov. (411)

38. **impulse test** : a test for applying to an insulated component an aperiodic transient voltage having predetermined polarity, amplitude and waveform. ★ essai aux ondes de choc → *essai 18.* R импульсное испытание. D Stoßspannungsprüfung. E ensayo con ondas de choque. I prova ad impulso. N stootspanningsproef. P próba napięciem udarowym. S stötspänningsprov. (411)

39. **insertion test signal** : → *signal 108*

40. **insulation resistance test** : a test for measuring the resistance of insulation under specified conditions. ★ mesure de la résistance d'isolation → *mesure 19.* R измерение сопротивления изоляции. D Messung des Isolationswiderstandes. E medida de resistencia de aislamiento. I misura della resistenza di isolamento. N meting van de isolatieweerstand. P pomiar rezystancji izolacji. S mätning av isolationsresistans. (411)

41. **insulation test voltage** : → *voltage 91*

42. **interturn test** (UK) (*Syn.* turn-to-turn test (USA)) : a test for applying, or more often inducing between adjacent turns of an insulated component, a voltage of predetermined amplitude, for the purpose of checking the integrity of the interturn insulation. ★ essai entre spires → *essai 73.* R испытание междувитковой изоляции. D Windungsprüfung. E ensayo entre espiras. I prova tra le spire. N beproeving van de windingsisolatie. P próba izolacji zwojów. S spänningsprov av varvisolering. (411)

43. **investigation test** : a special test of an optional character carried out in order to obtain additional information. ★ essai d'investigation → *essai 63.* R исследовательское испытание. D Ermittlungsprüfung. E ensayo de investigación. I prova di tipo facoltativa. N onderzoeksbeproeving. P próba (dodatkowa) badawcza. S specialprovning. (811)

44. **laboratory test** : a compliance test or a determination test made under prescribed and controlled conditions which may or may not simulate field conditions. ★ essai en laboratoire → *essai 67.* R испытание в управляемых условиях. D Laborprüfung. E ensayo de laboratorio. I prova di laboratorio. N laboratoriumproef. P próba laboratoryjna. S laboratorieprov. (191)

45. **life test** : a test to ascertain the probable life, under specified conditions, of a component or device. ★ essai de vieillissement → *essai 53.* R испытание на долговечность. D Lebensdauerprüfung. E ensayo de fin de vida. I prova di vita. N levensduurproef. P próba trwałości. S livslängdsprovning. (151)

46. **life test** : test in which lamps are operated under specified conditions for a specified time or to the end of life and during which photometric and electrical measurements may be made at specified intervals. ★ essai de durée → *essai 33.* R испытание на срок службы. D Lebensdauerprüfung. E ensayo de vida. I prova di vita. N levensduurproef. P próba trwałości. S livslängdsprovning. (845)

47. **light load test** : a test on a machine connected to its normal driven or driving member in which (a) as a motor, its shaft power is restricted to the no-load loss of the driven member, (b) as a generator, it provides a reduced power output at its terminals. ★ essai à charge réduite → *essai 10.* R испытание при неполной нагрузке. D Prüfung bei Schwachlast. E ensayo con carga reducida. I prova a carico ridotto. N beproeving met geringe belasting. P badanie przy zredukowanym obciążeniu. S prov vid dellast. (411)

48. **locked-rotor test** : a test on an energized machine with the rotor held stationary for the purpose of determining the locked-rotor torque. ★ essai à rotor bloqué → *essai 14.* R опыт при заторможенном ротоpe. D Prüfung mit festgebremstem Läufer. E ensayo con rotor bloqueado. I prova a rotore bloccato. N proef met geblokkeerde rotor. P pomiary przy zahamowanym wirniku. S provning med fastbromsad rotor. (411)

49. **loss tangent test** (UK) (*Syn.* dissipation factor test (USA)) : a test for measuring the dielectric loss of insulation at predetermined values of temperature, frequency, and voltage or dielectric stress. *Note.* — The dielectric loss is expressed in terms of the tangent of the complement of the insulation power-factor angle. ★ mesure de la tangente de l'angle de pertes → *mesure 21.* R определение тангенса угла потерь. D Verlustfaktormessung. E medida de la tangente de pérdidas. I misura della tangente dell'angolo di perdita. N tangens-deltameting. P pomiar współczynnika strat dielektrycznych. S förlustfaktormätning. (411)

50. **low-frequency high voltage test** : a high-voltage test performed at a low frequency between 0.1 Hz and 1.0 Hz. ★ essai diélectrique à basse fréquence → *essai 60.* R испытание высоким напряжением низкой частоты. D Wicklungsprüfung bei niedriger Frequenz. E ensayo dieléctrico en baja frecuencia. I prova dielettrica a bassa frequenza. N spanningsproef bij lage frequentie. P próba wytrzymałości elektrycznej napięciem małej częstotliwości. S spänningsprov vid lågfrekvens. (411)

51. **maintenance test** : a test carried out periodically on a device or equipment to ascertain and, if necessary, make certain adjustments to ensure that its performance remains within specified limits. ★ essai de maintenance → *essai 36.* R эксплуатационное испытание. D Wartung (sprüfung). E ensayo de mantenimiento. I prova di mantenimento. N onderhoudsproef. P próba eksploatacyjna. S underhållskontroll. (151)

52. **mechanical back-to-back test** : a test in which two identical machines are mechanically coupled together and the total losses of both machines are calculated from the difference between the electrical input to one machine and the electrical output of the other machine. ★ essai en opposition → *essai 69.* R испытание по способу механической взаимной нагрузки. D Rückarbeitsverfahren. E ensayo en oposición. I prova in opposizione. N bepaling der verliezen in motor-generatorschakeling. P pomiary w układzie mechanicznej pracy zwrotnej. S mekaniskt återarbetsprov. (411)

53. **NBS test chart** : → *chart 3*

54. **noise-level test** : a test taken to determine the noise level produced by a machine under specified conditions of operation and measurement. *Note.* — This applies to acoustic noise only. ★ essai de niveau de bruit → *essai 38.* R определение уровня шума. D Messung der Geräuschstärke. E ensayo de nivel de ruido. I misura delle rumorosità. N geluidsproef. P pomiar poziomu dźwięku. S ljudmätning. (411)

55. **no-load test** : a test in which the machine is run as a motor providing no useful mechanical output from the shaft. ★ essai à vide → *essai 15.* R опыт холостого хода (двигателя). D Leerlaufversuch (als Motor). E ensayo en vacío. I prova a vuoto. N nullastproef (als motor). P pomiary przy silnikowym biegu jałowym. S tomgångsprov. (411)

56. **open-circuit test** : a test in which a machine is run as a generator with its terminals open-circuited. ★ essai à circuit ouvert → *essai 11.* R опыт холостого хода (генератора). D Leerlaufversuch (als Generator). E ensayo en circuito abierto. I prova a circuito aperto. N nullastproef (als generator). P pomiary przy prądnicowym biegu jałowym. S prov med öppen lindning. (411)

57. **overspeed test** : a test on a machine rotor to demonstrate that it complies with specified overspeed requirements. ★ essai de survitesse → *essai 48.* R испытание при повышенной скорости вращения. D Schleuderprüfung. E ensayo de sobrevelocidad. I prova di sovravelocità. N snelheidsproef. P próba przy zwiększonej prędkości. S rusningsprov. (411)

58. **partial discharge inception test** : a test for measuring the lowest voltage at which partial discharges occur at the surface of the conductors or outside their insulation. *Note.* — this test is sometimes called corona inception test. ★ essai de seuil de décharge partielle → *essai 47.* R опыт по определению порога частичного разряда. D Glimmeinsatzprüfung (Teilentladungs-Einsatzprüfung). E ensayo de umbral de descarga parcial. I misura della soglia delle scariche parziali. N ionisatieproef voor deelontladingen. P pomiar progu wyładowań niezupełnych. S mätning av tändspänning för yttre urladdningar. (411)

59. **performance tests** : the tests required to determine the characteristics of a machine and to show that the machine complies with its specification. ★ essais de qualification → *essai 78.* R промышленные испытания. D Eignungsprüfungen. E ensayos de calificación. I prove di qualificazione. N beproeving. P badania prototypu. S provning; kontroll. (411)

60. **phase-sequence test** : a test taken to determine that the phase sequence of a polyphase winding is correct. ★ essai d'ordre des phases → *essai 64.* R опыт по проверке порядка следования фаз. D Prüfung der Phasenfolge. E ensayo de orden de fases. I controllo della sequenza delle fasi. N bepaling van de fasevolgorde. P sprawdzenie kolejności faz. S fasföljdsprov. (411)

61. **polarity test** : a test taken on a machine to demonstrate that the relative polarities of the windings or permanent magnet poles are correct. ★ essai de polarité → *essai 39.* R опыт по проверке полярности. D Prüfung der Polarität. E ensayo de polaridad. I controllo della polarità. N bepaling van de polariteit. P sprawdzenie biegunowości. S polaritetsprov. (411)

62. **practical test method** (*Syn.* alternative test method) : → *method 1*

63. **pull-in test** : a test on a synchronous machine which is pulling into synchronism from a specified slip and with a specified inertia for the purpose of determining the pull-in torque. ★ essai d'accrochage → *essai 22.* R опыт втягивания в синхронизм. D Intrittfallversuch. E ensayo de enganche. I prova di sincronizzazione. N intrekproef. P próba wciągania w synchronizm. S synkroniseringsprov. (411)

64. **pull-out test** (UK) (*Syn.* breakdown (USA)) : a test to determine the conditions under which an a.c. machine develops maximum torque while running at specified voltage and frequency. ★ essai de décrochage → *essai 30.* R опыт опрокидывания. D Kippversuch. E ensayo de desenganche. I prova di uscita passo. N kipproef. P próba wypadnięcia z synchronizmu. S maximimomentprov. (411)

65. **(radiation) test site** : → *site 1*

66. **reference test method** : → *method 17*

67. **resistance test** : a test to measure the resistance of a winding, using direct current. ★ mesure de la résistance en courant continu → *mesure 20.* R опытное определение сопротивления при постоянном токе. D Widerstandsmessung. E medida de resistencia en corriente continua. I misura della resistenza in corrente continua. N weerstandsmeting. P pomiar rezystancji prądem stałym. S resistansmätning. (411)

68. **resolution test chart** : → *chart 6*

69. **retardation test** : a test in which the losses in a machine are obtained by plotting the slowing down of the machine when only losses are present. ★ essai de ralentissement → *essai 40.* R испытание по способу самоторможения. D Auslaufversuch. E ensayo de deceleración. I prova di rallentamento. N uitloopproef. P pomiary sposobem wybiegu. S utlöpningsprov. (411)

70. **rotation test** : a test to determine that the rotor rotates in the specified direction, and that the terminal marking is correct. ★ essai de sens de rotation → *essai 44.* R опыт по проверке направления вращения. D Prüfung des Drehsinns. E ensayo de sentido de rotación. I controllo del senso di rotazione. N bepaling van de draairichting. P sprawdzenie kierunku wirowania. S kontroll av rotationsriktning. (411)

71. **routine check tests** : the tests applied to a machine to show that it is able to withstand the appropriate high-voltage tests, and is in correct working order both electrically and mechanically. ★ essais individuels → *essai 82.* R контрольные испытания. D Stückprüfungen. E ensayos de rutina. I prove

individuali. N routinebeproeving. P badanie wyrobu. S allprovning. (411)

72. **routine test** : a test made on each individual device during or after manufacture to check if it complies with the requirements of the standard concerned or the criteria specified. ★ essai individuel de série → *essai 74.* R программное испытание. D Stückprüfung. E ensayo individual. I prova di serie (individuale). N stukproef. P próba wyrobu. S rutinprovning. (151,426,811,851)
73. **running test** : a test carried out on a motor vehicle running on the railway. ★ essai en ligne → *essai 68.* R эксплуатационное испытание. D Probefahrt. E ensayo de línea. I prova in linea. N proefrit. P próba ruchowa; próba liniowa. S driftprov. (811)
74. **sampling test** : a test on a number of devices taken at random from a batch. ★ essai (de série) sur prélèvement → *essai 45.* R выборочное испытание. D Stichprobenprüfung. E ensayo por muestreo. I prova (di serie) con campionamento. N ..... P próba wyrywkowa. S sampelprovning. (151,411,811)
75. **screening test** : a test or a set of tests intended to remove or detect defective items or those likely to exhibit early failures. ★ essai de sélection → *essai 43.* R отбраковочные испытания. D Sortierprüfung. E ensayo de selección. I prova per l'eliminazione dei difetti potenziali. N sorteerproef. P selekcja przez narażanie. S gallringsprov. (191)
76. **shaft-voltage test** : a test taken on an energized machine to detect the voltage induced which is capable of producing shaft-currents. ★ essai de tension dans l'arbre → *essai 49.* R измерение электрического напряжения между концами вала. D Messung der Wellenspannung. E ensayo de tensión en el árbol. I misura della tensione d'albero. N bepaling van de asspanning. P pomiar napięcia między końcami wału. S mätning av elektrisk spänning i axel. (411)
77. **spark test apparatus (for intrinsically-safe circuits)** : → *apparatus 14*
78. **starting test** : a test taken on a machine while it is accelerating from standstill under specified conditions for the purpose of determining the starting torque. ★ essai de démarrage → *essai 31.* R испытание машины при пуске. D Anlaufversuch. E ensayo de arranque. I prova di avviamento. N aanloopproef. P badanie rozruchu. S startningsprov. (411)
79. **stationary test** : a test carried out on the test-bed or on a stationary vehicle. ★ essai en plate-forme → *essai 71.* R стендовое испытание. D Standprüfung. E ensayo en plataforma. I prova al banco. N beproeving bij stilstand. P próba stacjonarna. S stationär provning. (811)
80. **step stress test** : a test consisting of several increasing stress levels applied sequentially for periods of equal time duration to an item. ★ essai sous contrainte échelonnée → *essai 75.* R испытание ступенчатым нагружением. D Beanspruchbarkeitsfeststellung. E ensayo de esfuerzo escalonado. I prova con sollecitazione a gradini. N proef onder stapsgewijs toenemende belasting. P próba ze stopniowanym narażaniem. S stegvis accelererad provning. (191)
81. **streak test pattern** : → *pattern 28*
82. **sudden short-circuit test** : a test in which a short-circuit is suddenly applied to the primary winding of a machine under specified operating conditions. ★ essai de court-circuit brusque → *essai 28.* R опыт внезапного короткого замыкания. D Stoßkurzschlußversuch. E ensayo en cortocircuito brusco. I prova di cortocircuito istantaneo. N stootkortsluitproef. P próba zwarcia udarowego. S prov vid plötslig kortslutning. (411)
83. **sustained short-circuit test** : a test in which a machine is run as a generator with its terminals short-circuited. ★ essai de court-circuit permanent → *essai 29.* R опыт установившегося короткого замыкания. D Dauerkurzschlußversuch. E ensayo en cortocircuito permanente. I prova di cortocircuito permanente. N kortsluitproef. P pomiary w stanie zwarcia ustalonego. S prov vid stationär kortslutning. (411)
84. **television test card** (*Syn.* television test pattern) : → *pattern 31*
85. **television test pattern** : → *pattern 31*
86. **temperature-rise test** : a test undertaken to determine the temperature-rise of one or more parts of a machine under specified operating conditions. ★ essai d'échauffement → *essai 54.* R испытание на нагрев. D Erwärmungsprüfung (Temperaturlauf). E ensayo de calentamiento. I prova di riscaldamento. N verwarmingsproef. P próba nagrzewania. S värmeprov. (411)
87. **test** : an experiment carried out in order to measure, quantify or classify a characteristic or a property of an item. ★ essai → *essai 9.* R испытание. D Prüfung. E ensayo. I prova. N proef. P próba; badanie. S provning. (191)
88. **test data** : → *data 37*
89. **test distance** : → *distance 23*
90. **test load** : → *load 78*
91. **test pattern generator** (*Syn.* pattern generator) : → *generator 26*
92. **test position** : → *position 36*
93. **test probe proof** : → *proof 3*
94. **test signal** : → *signal 240*
95. **test value** : → *value 68*
96. **turn-to-turn test** (*Syn.* interturn test) : → *test 42*
97. **type test** : a test of one or more devices made to a certain design to show that the design meets certain specifications. ★ essai de type → *essai 51.* R типовое испытание. D Typ (en) prüfung. E ensayo de tipo. I prova di tipo. N typeproef. P próba typu. S typprovning. (151,426,811,851)
98. **type-tests** : the performance tests taken on one of the first machines of each type of design. ★ essais de type → *essai 81.* R типовые испытания. D Typenprüfungen. E ensayos de tipo. I prove di tipo. N typebeproeving. P badanie typu. S typprovning. (411)
99. **unity power-factor test** : a test in which a synchronous machine is operated as a motor under specified operating conditions with its excitation adjusted to give unity power-factor. ★ essai à facteur de puissance unité → *essai 13.* R опыт при коэффициенте мощности, равном единице. D Versuch mit Leistungsfaktor eins. E ensayo con factor de potencia uno. I prova a cosfi uno. N belastingsproef bij cos Φ = 1. P pomiary przy współczynniku mocy równym jedności. S prov vid effektfaktorn ett. (411)
100. **vibration test** : a test taken on a machine to measure the vibration of any part of the machine under specified conditions. ★ essai de vibration → *essai 52.* R измерение вибрации. D Messung mechanischer Schwingungen. E ensayo de vibración. I misura delle vibrazioni. N trillingsproef. P pomiar drgań. S vibrationsprov. (411)
101. **waveform test** : a test in which the waveform of any variable quantity associated with a machine is recorded. ★ essai de forme d'onde → *essai 35.* R определение формы кривой. D Aufnahme der Kurvenform. E ensayo de forma de onda. I controllo della forma d'onda. N bepaling van de golfvorm. P badanie kształtu krzywej. S kurvformsprov. (411)
102. **zero power-factor test** : a no-load test in which a synchronous machine is over-excited and operated as a motor at a power-factor very close to zero. ★ essai à facteur de puissance nul → *essai 12.* R опыт при коэффициенте мощности, равном нулю. D Übererregungsversuch. E ensayo con factor de potencia cero. I prova a cosfi zero. N blindlastproef. P pomiary w kompensatorowym stanie pracy. S prov vid effektfaktorn noll. (411)

tested

1. **tested RQ** : → *RQ 3*

testing

1. **battery testing** : the process of identifying the state of a circuit by checking whether a test wire has a potential different from earth, usually the potential of the exchange battery. ★ test de batterie → *test 1.* R батарейная проба свободной линии. D Batteriepruefung. E ensayo de batería. I prova di batteria. N ..... P próba na baterię. S lystring mot minus. (714)
2. **earth testing** : the process of identifying the state of a circuit or device by checking whether a test wire is at earth potential. ★ test de terre → *test 2.* R проба землей. D Erdpotentialpruefung. E ensayo de tierra. I prova su terra. N aardtest. P próba na ziemię. S lystring mot jord. (714)
3. **testing repetition cycle** : → *cycle 21*

tetrode

1. **tetrode** : a four-electrode electronic tube containing an anode, a cathode, a control electrode, and one additional electrode, usually a screen grid. ★ tétrode → *tétrode 1.* R тетрод. D Tetrode. E tetrodo. I tetrodo. N tetrode. P tetroda. S tetrod. (531)

text

1. **end of text signal** : → *signal 78*
2. **start of text signal** : → *start 10*

texture

1. **magnetic texture** : a structural ordering of a polycrystalline magnetic material that produces magnetic anisotropy. ★ texture magnétique → *texture 1.* R магнитная текстура. D magnetische Textur. E textura magnética. I struttura magnetica. N magnetische structuur. P tekstura magnetyczna. S magnetisk textur. (221)

theoretical

1. **maximum theoretical numerical aperture** : → *aperture 16*
2. **theoretical duration of a significant interval** : → *duration 42*
3. **theoretical margin** : → *margin 17*

theory

1. **target theory** : a theory explaining the biological effects of radiation on the basis of ionization or other energy deposition occurring in one or more sensitive regions such as macro-molecules in a cell. ★ théorie de la cible → *théorie 1.* R теория мишени. D Treffertheorie. E teoría del choque; teoría del blanco. I teoria dell'urto. N treffertheorie. P teoria zderzeniowa. S träffteori. (881)

therapeutic-type

1. **therapeutic-type protective tube housing** : → *housing 9*

therapy

1. **contact X-ray therapy** : X-ray therapy with specially constructed tubes in which the target-skin distance is very short (usually not more than 5 cm). *Note.* — The X-ray tube voltage is usually less than 60 kV, but sometimes as high as 100 kV. ★ plésiothérapie → *plésiothérapie 1.* R контактная рентгенотерапия. D (Röntgen-)Kontakttherapie(-nahbestrahlung). E radioterapia de contacto. I plesioroentgenterapia. N röntgencontacttherapie. P terapia rentgenowska kontaktowa. S närbestrålning. (881)
2. **deep X-ray therapy** : X-ray therapy directed towards lesions situated within the depths of the body, using voltages of 200 kV or more. ★ radiothérapie transcutanée → *radiothérapie 11.* R глубокая рентгенотерапия. D (Röntgen-)Tiefentherapie. E radioterapia transcutánea. I roentgenterapia profonda. N diepe röntgentherapie. P terapia rentgenowska głęboka. S djupterapi. (881)
3. **electron therapy** : radiotherapy using electrons. ★ électronothérapie → *électronothérapie 1.* R электронная терапия. D Elektronentherapie. E electronoterapia. I terapia con elettroni. N elektronentherapie. P terapia elektronowa. S elektronstrålebehandling. (881)
4. **moving-beam therapy** : radiotherapy using one or more radiation beams whose axes move in relation to the patient during treatment. ★ radiothérapie cinétique → *radiothérapie 3.* R терапия движущимся пучком. D Bewegungsbestrahlung(-stherapie). E radioterapia de movimiento. I radioterapia di movimento. N therapie met bewegende straal. P terapia ruchomą wiązką. S behandling med rörligt strålknippe. (881)
5. **multi-field therapy** (*Syn.* cross firing) : radiotherapy in which a lesion is subjected to radiation entering the body through several portals. ★ radiothérapie à feux croisés → *radiothérapie 2.* R многополевая терапия; перекрестное облучение. D Mehrfelderbestrahlung(-stherapie). E radioterapia de fuegos cruzados. I radoterapia a campi multipli; radioterapia a campi convergenti. N therapie met meer stralen. P terapia krzyżowa. S flerfältsbehandling. (881)
6. **neutron therapy** : radiotherapy using neutrons. ★ neutronothérapie → *neutronothérapie 1.* R нейтронная терапия. D Neutronentherapie. E neutronoterapia. I terapia con neutroni. N neutronentherapie. P terapia neutronowa. S neutronbehandling. (881)
7. **opposite-field therapy** : special case of multi-field therapy using two beams of radiation that are coaxial but opposite in direction. ★ radiothérapie en opposition de champ → *radiothérapie 7.* R терапия встречными пучками. D Gegenfeldbestrahlung(-stherapie). E radioterapia en oposición de campo. I radioterapia a campi contrapposti. N tegenveldtherapie. P terapia przeciwległa. S motfältsterapi. (881)
8. **radionuclide therapy** : radiotherapy using radionuclides. ★ curiethérapie → *curiethérapie 1.* R радионуклидная терапия. D Radionuklidtherapie. E terapia por radionucleidos; curioterapia. I radioisotopoterapia. N radionuclidetherapie. P terapia promieniotwórcza. S radionuklidterapi. (881)
9. **rotation therapy** : radiotherapy during which either the patient rotates, or the source of radiation revolves around the patient. ★ cycloradiothérapie → *cycloradiothérapie 1.* R ротационная терапия. D Rotationsbestrahlung(-stherapie). E radioterapia de rotación; cicloterapia. I radioterapia rotatoria. N rotatietherapie. P terapia obrotowa. S rotationsbehandling. (881)
10. **superficial X-ray therapy** : X-ray therapy directed to lesions on or near the surface of the body usually with low-energy radiation. ★ radiothérapie superficielle → *radiothérapie 10.* R поверхностная рентгенотерапия. D (Röntgen-)Oberflächentherapie. E radioterapia superficial. I roentgenterapia superficiale. N röntgenoppervlaktetherapie. P terapia rentgenowska powierzchniowa. S ytterapi. (881)
11. **tangential therapy** : the procedure of directing a beam of radiation nearly tangential to a curved surface of tissue, thereby irradiating a relatively small volume of tissue near the surface. ★ thérapie tangentielle → *thérapie 2.* R тангенциальная терапия. D tangentiale Bestrahlung(-stherapie). E terapia tangencial. I radioterapia tangenziale. N tangentiële therapie. P terapia styczna. S tangentialterapi. (881)
12. **X-ray therapy** : radiotherapy using X-radiation. ★ röntgenothérapie → *röntgenothérapie 1.* R рентгенотерапия. D Röntgentherapie. E terapia por rayos X; roentgenoterapia. I roentgenterapia. N röntgentherapie. P terapia rentgenowska. S röntgenbehandling; röntgenterapi. (881)

thermal

1. **absolute thermal detector** : → *detector 1*
2. **anode thermal capacity** : → *capacity 1*
3. **cold start-up of a thermal generating set** : → *start-up 1*
4. **conventional thermal power station** : → *power station 4*
5. **cycle of operation of a thermal time-delay switch** : → *cycle 7*
6. **effective thermal cross-section** : → *cross-section 11*
7. **gross thermal efficiency of a unit** : → *efficiency 25*
8. **hot start-up of a thermal generating set** : → *start-up 2*
9. **limiting continuous thermal withstand value of an energizing quantity** : → *value 17*
10. **limiting short-time thermal withstand value of an energizing quantity** : → *value 19*
11. **low thermal mass furnace** : → *furnace 34*
12. **magneto-hydro-dynamic thermal power station** : → *power station 9*
13. **net thermal efficiency of a unit** : → *efficiency 31*
14. **nuclear (thermal) power station** : → *power station 14*
15. **rated continuous thermal current** : → *current 154*
16. **rated short time thermal current** : → *current 162*
17. **secondary limiting thermal current** : → *current 180*
18. **self-calibrating thermal detector** (*Syn.* absolute thermal detector) : → *detector 1*
19. **temperature compensated thermal time-delay switch** : → *switch 53*
20. **thermal breakdown** : → *breakdown 15*
21. **thermal capacitance** : → *capacitance 16*
22. **thermal conduction** : → *conduction 20*
23. **thermal conductivity** : → *conductivity 8*
24. **thermal convection** : → *convection 2*
25. **thermal cross-section** : → *cross-section 27*
26. **thermal cutting** : → *cutting 9*
27. **thermal detector of radiation** : → *detector 38*
28. **thermal diffusivity** : → *diffusivity 1*
29. **thermal electrical relay** : → *relay 48*
30. **thermal electrical relay with partial memory function** : → *relay 49*
31. **thermal electrical relay with total memory function** : → *relay 50*

32. **thermal endurance** : → *endurance 5*
33. **thermal endurance graph** : → *graph 4*
34. **thermal energy** : → *energy 77*
35. **thermal equilibrium** : → *equilibrium 10*
36. **thermal fission** : → *fission 20*
37. **thermal forced convection** : → *convection 3*
38. **thermal generating set** : → *set 58*
39. **thermal inelastic scattering** : → *scattering 40*
40. **thermal inelastic scattering cross-section** : → *cross-section 28*
41. **thermal instrument** : → *instrument 32*
42. **thermal insulation** : → *insulation 53*
43. **thermal insulation** : → *insulation 54*
44. **thermal losses** : → *loss 100*
45. **thermal microphone** : → *microphone 35*
46. **thermal natural convection** : → *convection 4*
47. **thermal neutrons** : → *neutron 33*
48. **thermal noise** : → *noise 88*
49. **thermal overload release** : → *release 31*
50. **thermal power station** : → *power station 22*
51. **thermal power unit** : → *unit 66*
52. **thermal radiation** : → *radiation 114*
53. **thermal (radiation) detector** (*Syn.* thermal detector of radiation) : → *detector 38*
54. **thermal radiator** : → *radiator 10*
55. **thermal reactor** : → *reactor 43*
56. **thermal recorder** : → *recorder 20*
57. **thermal resistance** : → *resistance 70*
58. **thermal resistance** : → *resistance 71*
59. **thermal runaway** : → *runaway 2*
60. **thermal shield** : → *shield 22*
61. **thermal stability** : → *stability 20*
62. **thermal time-delay switch** : → *switch 54*
63. **variable thermal time-delay switch** : → *switch 62*

thermally

1. **thermally activated luminescence** : → *luminescence 5*
2. **thermally neutralized state** : → *state 45*

thermionic-emission

1. **thermionic emission** : electron emission due to thermal agitation. ★ émission thermoélectronique → *émission 38.* R термоэлектронная эмиссия. D thermische Emission; Glühemission. E emisión termoelectrónica. I emissione termoelettrica. N thermische emissie. P emisja termoelektronowa. S termisk emission. (111,531,881)
2. **thermionic-emission efficiency** : → *efficiency 42*

thermistor

1. **thermistor** : a resistor having a large non-linear (generally negative) temperature coefficient of resistance. ★ thermistance → *thermistance 1.* R терморезистор. D Heissleiter; Thermistor. E termistancia. I termistore. N thermistor. P termistor. S termistor. (151,521,726)
2. **thermistor mount** (*Syn.* bolometer mount) : → *mount 2*

thermochemical

1. **thermochemical treatment** : → *treatment 5*

thermocline

1. **thermocline** : ocean layer near the surface within which the water temperature changes rapidly with depth. ★ couche thermocline → *couche 27.* R слой скачка. D Temperatursprungschicht. E capa termoclinal. I strato superficiale di variabilità termica. N thermoklien. P termoklina. S temperaturskikt. (801)

thermocouple

1. **(radiation) thermocouple** : thermal detector of optical radiation in which the electromotive force produced in a single thermoelectric junction is used to measure the heating effect produced by the absorbed radiation. ★ couple thermoélectrique → *couple 28.* R термопара; термоэлемент. D Strahlungsthermoelement. E termopar. I coppia termoelettrica. N thermo-element; thermokoppel. P ogniwo termoelektryczne; termoelement. S termoelement för strålning. (845)
2. **thermocouple contact** : → *contact 114*
3. **thermocouple instrument** : → *instrument 33*

thermodynamic

1. **(thermodynamic) temperature** : → *temperature 63*

thermo-electric

1. **nominal power of a thermo-electric vehicle** : → *power 92*
2. **specific fuel consumption of a thermo-electric vehicle** : → *consumption 3*
3. **thermoelectric** : applies to an interaction between a thermal phenomenon and an electric phenomenon. ★ thermoélectrique → *thermoélectrique 12.* R термоэлектрический эффект. D thermoelektrisch. E termoeléctrico. I termoelettrico. N thermo-elektrisch. P termoelektryczny. S termoelektrisk. (121)
4. **thermoelectric power meter** : → *meter 62*
5. **thermo-electric traction** : → *traction 13*
6. **traction output (of a thermo-electric vehicle)** : → *output 69*
7. **transmission efficiency (of a thermo-electric vehicle)** : → *efficiency 45*

thermoelement

1. **semiconductor thermoelement** : a semiconductor device based on the Seebeck or Peltier effect and designed for direct conversion of heat into electric energy or vice versa. ★ thermoélément à semiconducteurs → *thermoélément 1.* R полупроводниковый термоэлемент. D Thermoelement; Halbleiterthermoelement. E termoelemento semiconductor. I termoelemento a semiconduttore. N halfgeleidend thermo-element. P termoelement (półprzewodnikowy). S halvledartermoelement. (521)

thermoluminescence

1. **thermoluminescence** (*Syn.* thermally activated luminescence) : → *luminescence 5*
2. **thermoluminescence** : luminescence released by heating a substance previously irradiated. ★ thermoluminescence → *thermoluminescence 7.* R термолюминесценция. D Thermolumineszenz. E termoluminiscencia. I termoluminescenza. N thermoluminescentie. P termoluminescencja. S termoluminiscens. (881)
3. **thermoluminescence detector** : → *detector 40*

thermoluminescent

1. **reader for thermoluminescent dosemeter** : → *reader 5*
2. **reader of thermoluminescent exposure meter** : → *reader 6*
3. **thermoluminescent personal dosemeter** : → *dosemeter 17*
4. **thermoluminescent personal exposure meter** : → *exposure meter 13*

thermophone

1. **thermophone** : electroacoustic transducer in which sound waves of calculable magnitude result from the expansion and contraction of the air adjacent to a conductor whose temperature varies in response to a current input. ★ thermophone → *thermophone 1.* R термофон. D Thermophon. E termófono. I termofono. N thermofoon. P termofon; pobudnik cieplny. S termofon. (801)

thermopile

1. **neutron thermopile** : a neutron detector in which the hot junctions of thermocouples are in thermal contact with a material which is heated by absorption of particles resulting from neutron-induced reactions. ★ thermopile à neutrons → *thermopile 2.* R термоэлектрический детектор нейтронов. D Thermoelementsäule zum Neutronennachweis. E termopila de neutrones. I termopila a neutroni. N thermozuil voor neutronen. P termoelektryczny stos neutronowy. S neutrontermostapel. (391)
2. **(radiation) thermopile** : thermal detector of optical radiation in which the electromotive force produced in several thermoelectric junctions is used to measure the heating effect produced by the absorbed radiation. ★ thermopile

→ *thermopile 1.* R термобатарея. D Strahlungsthermosäule. E termopila. I pila termoelettrica. N thermozuil. P stos termoelektryczny. S termostapel för strålning. (845)

thermoplastic

1. **thermoplastic** (noun) : a plastic capable of being repeatedly softened by heating and hardened by cooling through a temperature range characteristic of the plastic and, in the softened state, capable of being repeatedly shaped by flow into articles by moulding, extrusion or forming. ★ thermoplastique → *thermoplastique 1.* R термопласт. D Thermoplast. E termoplástico. I termoplastico (sostantivo). N thermoplastische kunststof. P tworzywo termoplastyczne. S termoplast. (212)

thermoset

1. **thermoset** (noun) : a plastic which, when cured by heat or other means, changes into a substantially infusible and insoluble product. *Note.* — Thermosets are often called thermosetting before curing and thermoset after cure. ★ thermodurci → *thermodurci 1.* R реактопласт. D Duromer; Duroplast. E termoestable; termoendurecido. I termoindurente (sostantivo). N thermohardende kunststof. P tworzywo termoutwardzalne. S härdplast. (212)

thermosphere

1. **thermosphere** : that part of the Earth's atmosphere located above the mesosphere in which temperature increases and then remains constant with increasing height and from which there is virtually no further escape of particles to free space. *Note.* — The thermosphere extends to a height of 500 to 600 km. ★ thermosphère → *thermosphère 1.* D Thermosphäre. P termosfera. (705)

thermostatic

1. **adjustable thermostatic switch** : → *switch 1*
2. **ambient thermostatic switch** : → *switch 2*
3. **non-adjustable thermostatic switch** : → *switch 28*
4. **thermostatic switch** : → *switch 55*

thick-film

1. **thick-film integrated circuit** : → *integrated circuit 4*

thickness

1. **beta back-scatter thickness meter** : → *back-scatter 5*
2. **duct thickness** : the difference in height between the upper and lower boundaries of a tropospheric radio-duct. ★ épaisseur du conduit → *épaisseur 1.* D Dicke eines Ducts. P grubość duktu. (705)
3. **gamma back-scatter thickness meter** : → *meter 24*
4. **half-value thickness** (*Syn.* half-value layer) : → *layer 13*
5. **optical thickness** : the product of the physical thickness of a homogeneous isotropic optical element, and its refractive index. ★ épaisseur optique → *épaisseur 3.* R оптическая толщина. D optische Dicke. E espesor óptico. I spessore ottico. N optische dikte. P grubość optyczna. S optisk tjocklek. (731)
6. **optical thickness of the atmosphere** ($\delta(\varepsilon)$) : quantity defined by the formula $\delta(\varepsilon) = -\ln(\varphi'_e/\varphi_e)$ where φ_e is the radiant flux of a collimated beam entering the upper limit layers of the atmosphere at an angle ε to the vertical, and Φ'_e the attenuated radiant flux of that beam reaching the surface of the Earth. Unit: 1. *Note.* — In English, the term optical depth is sometimes used instead of optical thickness. ★ épaisseur optique de l'atmosphère → *épaisseur 4.* R оптическая толщина атмосферы. D optische Dicke der Atmosphäre. E espesor óptico de la atmósfera. I spessore ottico verticale dell'atmosfera. N optische dichtheid van de atmosfeer. P gęstość optyczna atmosfery. S atmosfärens optiska täthet. (845)
7. **spectral optical thickness** (of a medium, for a given length) (*Syn.* spectral optical depth) ($\delta(\lambda)$) : quantity used in atmospheric physics and physical oceanography : for a monochromatic component of wavelength λ of the radiation of a collimated beam propagating along the given length from the point x_1 to the point x_2 on its path through a homogeneous or non-homogeneous diffusing medium, the spectral optical thickness $\delta(\lambda)$ of the medium between x_1 and x_2 is defined by the formula

$$\delta(\lambda) = \int_{x1}^{x2} \mu(x, \lambda)\, dx$$

where $\mu(x,\lambda)$ is the spectral linear attenuation coefficient at the location of dx.Unit : 1 *Notes. 1* — The spectral radiant flux $\Phi_{e,\lambda}(x_1,\lambda)$ of the beam at the point x_1 is reduced to the value of $\Phi_{e,\lambda}(x_2,\lambda)$ at the point x_2 according to the formula

$$\Phi_{e,\lambda}(x_2, \lambda) = \Phi_{e,\lambda}(x_1, \lambda) \cdot e^{-\delta(\lambda)}$$

so that

$$\delta(\lambda) = -\ln \frac{\Phi_{e,\lambda}(x_2, \lambda)}{\Phi_{e,\lambda}(x_1, \lambda)}$$

2 — For a homogeneous non-diffusing layer, $\delta(\lambda)$ is the Napierian spectral internal transmittance density. ★ épaisseur optique spectrale → *épaisseur 5.* R спектральная оптическая толщина (среды, для данной длины хода лучей); спектральная оптическая глубина. D spektrale optische Dicke (eines Mediums, für eine gegebene Weglänge); spektrale optische Tiefe. E espesor óptico espectral. I spessore ottico spettrale. N spectrale optische dikte. P grubość optyczna widmowa; głębokość optyczna widmowa. S optiskt djup. (845)

8. **tenth-value thickness** (*Syn.* tenth-value layer) : → *layer 21*
9. **thickness meter** : → *meter 63*
10. **transmission thickness meter** : → *meter 68*
11. **X-ray fluorescence thickness meter** : → *meter 79*

thimble

1. **thimble ionization chamber** : → *ionization chamber 20*

thin

1. **thin film optical waveguide** : → *waveguide 18*

thin-film

1. **thin-film integrated circuit** : → *integrated circuit 5*

thin-wall

1. **thin-wall counter tube** : → *counter tube 26*

third

1. **third rail** (*Syn.* conductor rail) : → *rail 3*
2. **third rail collector** (*Syn.* shoegear) : → *shoegear 1*

third-voltage

1. **third-voltage motor** : → *motor 104*

Thomson

1. **Thomson (double) bridge** (*Syn.* Kelvin (double) bridge) : → *bridge 13*
2. **Thomson effect** : → *effect 85*

Thoraeus

1. **Thoraeus filter** : → *filter 39*

thoriated-tungsten

1. **thoriated-tungsten cathode** : → *cathode 35*

thorium

1. **thorium content meter** : → *content meter 7*

threaded

1. **threaded coupling** : → *coupling 40*

three-conductor

1. **three-conductor bundle** (*Syn.* triple bundle) : → *bundle 9*

three-dimensional

1. **three-dimensional computer generated image** : → *image 22*

three-part

1. **three-part costing** : → *costing 1*
2. **three-part tariff** : → *tariff 42*

three-phase

1. **three phase automatic reclosing control equipment** (*Syn.* three pole automatic reclosing control equipment) : → *equipment 82*

2. **three-phase a.c. motor vehicle** : → *vehicle 27*
3. **three-phase a.c. traction** : → *traction 14*
4. **three-phase apparatus** : → *apparatus 18*
5. **three-phase bridge (rectifier)** : → *bridge 20*
6. **three-phase concentric neutral cable** : → *cable 67*
7. **three-phase earthing transformer** : → *transformer 67*
8. **three-phase fault** : → *fault 76*
9. **three-phase motor** : → *motor 106*
10. **three-phase neutral reactor** : → *reactor 44*
11. **three-phase system diagram** : → *diagram 22*
12. **3-phase (voltage) source** : → *voltage source 10*

three-rate

1. **three-rate tariff** : → *tariff 43*
2. **three-rate time-of-day tariff** : → *tariff 44*

three-step

1. **positive-negative three-step action** : → *action 17*

three-switch

1. **three-switch mesh substation with bypass** : → *substation 39*

threshold

1. **detection threshold** (*Syn.* sensitivity) : the minimum optical power required to achieve a specified quality of performance. *Notes. 1* — Output signal to noise ratio, error rate, etc, are typical performance measures. *2* — Sensitivity is sometimes used as an imprecise synonym for responsivity. ★ seuil de détection → *seuil 15.* R порог детектирования. D Empfindlichkeitsschwelle. E umbral de detección; sensibilidad. I soglia di rivelazione; sensibilità. N detectiedrempel; gevoeligheid. P czułość graniczna. S detekteringströskel. (731)
2. **Geiger threshold** : the lowest voltage that must be applied to a counter tube to enable it to operate in the Geiger region. ★ seuil de Geiger → *seuil 17.* R порог Гейгера. D Geiger-Müller-Schwelle. E umbral de Geiger. I soglia di Geiger. N Geigerdrempelspanning. P próg Geigera-Müllera. S geigertröskel. (531)
3. **Geiger-Müller threshold** : under specified conditions, the minimum applied voltage for a counter tube to operate in the Geiger-Müller region. ★ seuil de Geiger-Müller → *seuil 18.* R порог Гейгера-Мюллера. D Schwelle des Auslösebereiches (Geiger-Müller-Bereiches). E umbral de Geiger-Müller. I soglia di Geiger-Müller. N Geigerdrempel. P próg Geigera-Müllera. S Geiger-Müller-tröskel. (391)
4. **hearing threshold level** : → *level 28*
5. **lasing threshold** : the lowest excitation input power level at which the output of a laser is dominated by stimulated emission rather than spontaneous emission. ★ seuil d'effet laser → *seuil 26.* R порог генерации лазера. D Laserschwelle. E umbral del láser. I soglia di generazione (di luce). N drempel voor laserwerking. P pobudzenie progowe. S tröskeleffekt. (731)
6. **level above threshold** (*Syn.* sensation level) : → *level 82*
7. **luminance difference threshold** (ΔL) : smallest perceptible difference in luminance. *Note.* — The value depends on the luminance and on the viewing conditions, including the state of adaptation. ★ seuil différentiel de luminance → *seuil 27.* R пороговая разность яркостей. D Unterschiedsschwelle für Leuchtdichten. E umbral diferencial de luminancia. I soglia differenziale di luminanza. N verschildrempel voor luminanties. P próg różnicy luminancji. S luminansskillnadströskel. (845)
8. **luminance threshold** : lowest luminance of a stimulus which enables it to be perceived. *Note.* — The value depends on field size, surround, state of adaptation, and other viewing conditions. ★ seuil de luminance → *seuil 20.* R порог яркости. D Wahrnehmungsschwelle. E umbral de luminancia. I soglia di luminanza. N luminantiedrempel. P próg luminancji. S luminanströskel. (845)
9. **masked threshold** : threshold of audibility for a specified sound in the presence of another (masking) sound. ★ seuil d'audition masquée → *seuil 12.* R порог маскировки. D Mithörschwelle. E umbral de audición enmascarada. I soglia di mascheramento. N gemaskeerde gehoordrempel. P próg słyszalności maskowany. S maskeringströskel. (801)
10. **normal threshold of hearing** : modal value of the thresholds of hearing for a large number of listeners between 18 and 30 years of age with otologically normal ears. ★ seuil normal d'audition → *seuil 34.* R нормальный порог слышимости. D Normalhörschwelle. E umbral normal de audición. I soglia uditiva normale. N normale gehoordrempel. P próg słyszalności normalny. S normal hörtröskel. (801)
11. **normal threshold of pain** : the modal value of the thresholds of pain for a large number of otologically normal listeners between 18 and 30 years of age. ★ seuil normal d'audition douloureuse → *seuil 35.* R нормальный болевой порог. D Normalschmerzschwelle. E umbral normal de audición dolorosa. I soglia di dolore normale. N normale pijngrens. P próg słyszenia bolesnego normalny; próg bólu normalny. S normal smärtgräns. (801)
12. **plateau threshold voltage** : → *voltage 143*
13. **standard threshold of hearing** : a normal threshold of hearing adopted as a standard. *Note.* — Such a standard threshold is given in ISO Standard 389-1985. ★ seuil d'audition normalisé → *seuil 13.* R стандартный порог слуха. D Standardhörschwelle. E umbral de audición normalizado. I soglia uditiva normalizzata. N standaard gehoordrempel. P próg słyszalności normowy. S normerad hörtröskel. (801)
14. **temperature coefficient of the Geiger-Müller threshold** : → *coefficient 75*
15. **threshold current** : → *current 208*
16. **threshold current** : → *current 209*
17. **threshold dose** : → *dose 42*
18. **threshold erythema dose** : → *dose 43*
19. **threshold frequency** : → *frequency 189*
20. **threshold luminous flux** (*Syn.* sensitivity) : → *sensitivity 24*
21. **threshold of audibility** (*Syn.* threshold of hearing) : → *threshold 24*
22. **threshold of flicker irritability** : the maximum value of a fluctuation of luminance or of spectral distribution which gives rise to a flicker tolerated without discomfort by a specified sample of the population. ★ seuil d'irritabilité du papillotement → *seuil 32.* R порог раздражения фликера. D Flickerreizbarkeitsschwelle. E umbral de irritabilidad del parpadeo. I soglia di disturbo al flicker. N irritiegrens voor flikkeren. P próg drażliwości migotania. S irritationsgräns för flimmer. (161)
23. **threshold of flicker perceptibility** : the minimum value of a fluctuation of luminance or of spectral distribution which gives rise to a flicker perceptible to a specified sample of the population. ★ seuil de perceptibilité du papillotement → *seuil 21.* R порог восприятия фликера. D Flickerwahrnehmbarkeitsschwelle. E umbral de la perceptibilidad del parpadeo. I soglia di percettibilità del flicker. N waarnemingsdrempel voor flikkeren. P próg dostrzegania migotania. S flimmertröskel. (161)
24. **threshold of hearing** (*Syn.* threshold of audibility) : for a given listener, the minimum sound pressure level of a specified sound that is capable of evoking an auditory sensation. The sound reaching the ears from other sources is assumed to be negligible. *Note.* — The general conditions of the measurement are to be specified: listening by one ear, two ears, in free field, with earphone, method of constant stimulus or with interrupted sound, number of trials, etc. ★ seuil d'audition → *seuil 10.* R порог слуха; порог слышимости. D Hörschwelle. E umbral de audición. I soglia uditiva. N gehoordrempel. P próg słyszalności. S hörtröskel. (801)
25. **threshold of illuminance** (in point vision) (*Syn.* visual threshold) : smallest illuminance (point brilliance), produced at the eye of an observer by a light source seen in point vision, which renders the source perceptible against a background of given luminance ; the illuminance is considered on a surface-element that is normal to the incident rays at the eye. *Note.* — For visual signalling, the light source must be rendered recognizable, and hence a higher threshold of illuminance is to be expected. ★ seuil d'éclairement → *seuil 25.* R пороговая освещенность (от точечного источника). D Schwellenbeleuchtungsstärke (beim Punktsehen). E umbral de visión puntual. I soglia di illuminamento. N visuele drempel voor puntzien. P natężenie oświetlenia progowe. S syntröskel. (845)
26. **threshold of pain** (in electroacoustics) : for a given listener the minimum sound pressure level of a specified sound which will stimulate the ear to a sensation of definite pain. *Note.* — The conditions of the measure are to be specified, similarly to the

threshold of hearing. ★ seuil d'audition douloureuse → *seuil 11.* R болевой порог (в электроакустике). D Schmerzschwelle. E umbral de audición dolorosa. I soglia di dolore. N pijngrens. P próg słyszenia bolesnego; próg bólu. S smärtgräns. (801)

27. **threshold of response** (to pulses) : the minimum amplitude of a pulse required for a given circuit associated with the detector to perform its function in response to that pulse. ★ seuil de réponse → *seuil 23.* R порог чувствительности (к импульсам). D Ansprechschwelle (für Impulse). E umbral de respuesta (a los impulsos). I soglia di risposta (agli impulsi). N drempelwaarde (voor pulsen). P próg czułości (impulsowy). S pulströskel. (391)
28. **threshold of speech intelligibility** : sound pressure level of speech measured in a stated frequency band, using Fast (F) exponential time weighting, at which 50% of relatively easy words can be clearly recognized. *Note.* — See F exponential time weighting in IEC Publication 651 (1979). ★ seuil d'intelligibilité vocale → *seuil 31.* R порог разборчивости речи. D Verständlichkeitsschwelle. E umbral de inteligibilidad vocal. I soglia di intellegibilità. N spraakverstaanbaarheidsdrempel. P próg zrozumiałości mowy. S uppfattbarhetströskel för tal. (801)
29. **threshold voltage** : → *voltage 209*
30. **threshold voltage** : → *voltage 210*
31. **threshold wavelength** : → *wavelength 13*
32. **visual contrast threshold** : smallest contrast, produced at the eye of an observer by a given object, which renders the object perceptible against a given background. *Note.* — For meteorological observations, the object must be rendered recognizable, and hence a higher threshold is to be expected. The value of 0.05 has been adopted as the basis for the measurement of meteorological optical range. ★ seuil de contraste visuel → *seuil 14.* R пороговый контраст. D Schwellenkontrast. E umbral de contraste visual. I soglia di contrasto visivo. N visuele contrastdrempel. P kontrast progowy optyczny. S kontrasttröskel. (845)
33. **visual threshold** (*Syn.* threshold of illuminance) : → *threshold 25*

throat

1. **nozzle throat** (of a plasma torch) : the region of the nozzle of the plasma torch in which the arc is constricted. ★ col de la tuyère → *col 2.* R горловина сопла (плазменной горелки). D Düseneinschnürung. E garganta de tobera (de una antorcha de plasma). I gola dell'ugello di una torcia a plasma. N straalpijpopening (van een plasmatoorts). P gardziel dyszy. S dysöppning. (841)
2. **throat depth** : → *depth 12*
3. **throat gap** : → *gap 20*
4. **throat height** (*Syn.* throat gap) : → *gap 20*
5. **throat microphone** : → *microphone 36*

through

1. **conduction through** : → *conduction 9*
2. **through fault current** : → *current 210*
3. **through flange** : → *flange 17*
4. **through heating** : → *heating 53*

through-connection

1. **direct through-connection filter** : → *filter 14*
2. **direct through-connection point** : → *point 10*
3. **through connection** : an electrical connection between conductive patterns on opposite sides of a printed board. ★ connexion transversale → *connexion 36.* R сквозное соединение. D Durchverbindung. E conexión transversal. I connessione trasversale. N doorverbinding. P połączenie przelotowe; połączenie skrośne. S genomförbindning. (541)
4. **through-connection delay** : → *delay 41*

through-current

1. **maximum rated through-current** : the rated through-current for which both the temperature rise of the contacts and the service duty test apply. ★ courant traversant assigné maximal → *courant 165.* R номинальный максимальный сквозной ток. D höchster Bemessungs-Durchgangsstrom. E corriente de paso asignada máxima. I corrente massima di impiego. N maximale toegekende doorgaande stroom. P prąd przechodni maksymalny znamionowy. S högsta märkström. (421)
2. **rated through-current** : the current flowing through the tap-changer towards the external circuit, which the apparatus is capable of transferring from one tapping to the other at the relevant rated step voltage and which can be carried continuously. ★ courant traversant assigné → *courant 164.* R номинальный сквозной ток. D Bemessungs-Durchgangsstrom. E corriente de paso asignada. I corrente nominale di impiego. N toegekende doorgaande stroom. P prąd przechodni znamionowy. S märkström (för lindningskopplare). (421)

through-group

1. **through-group connection point** : → *point 49*
2. **through-group filter** : → *filter 40*

throw

1. **split throw winding** : → *winding 74*

thrower

1. **oil thrower** : a peripheral ring or ridge on a shaft adjacent to the journal and which is intended to break any flow of oil along the shaft. ★ déflecteur d'huile → *déflecteur 2.* R маслоотражатель. D Ölspritzring. E deflector de aceite. I anello rompi olio. N (olie)slingerschijf; (olie)slingerkraag. P odrzutnik oleju. S oljeavkastare. (411)

thrust

1. **side thrust** : the radial component of the force of a pick-up arm due to the friction between the stylus tip and the groove wall. ★ poussée latérale → *poussée 4.* R скатывающая сила. D Skating-Kraft. E empuje lateral. I spinta laterale. N dwarskracht. P nacisk boczny. S sidkraft. (806)
2. **thrust bearing** : → *bearing 35*
3. **thrust (of a linear traction motor)** : the tractive or braking force provided by the interaction between motor field and armature. ★ poussée (d'un moteur de traction linéaire) → *poussée 3.* R сила тяги (линейного тягового двигателя). D Schub. E empuje (de un motor de tracción lineal). I forza di trazione o di frenatura. N overbrengingskracht. P ciąg (silnika liniowego). S kraft (hos linjär motor). (811)

thyratron

1. **thyratron** : a hot-cathode grid-controlled arc discharge tube. ★ thyratron → *thyratron 1.* R тиратрон. D Thyratron; Stromtor. E tiratrón. I tiratron. N thyratron. P tyratron. S tyratron. (531)

thyristor

1. **bidirectional diode thyristor** (*Syn.* diac (abbreviation)) : a two-terminal thyristor having substantially the same switching behaviour in the first and third quadrants of the current voltage characteristic. ★ thyristor diode bidirectionnel → *thyristor 3.* R симметричный диодный тиристор; диак (сокращение). D Zweirichtungs-Thyristordiode; Diac (Abkürzung). E tiristor diodo bidireccional; diac (en abreviatura). I tiristore a diodo bidirezionale; diac (abbreviato). N diac. P tyrystor diodowy obukierunkowy; tyrystor diodowy dwukierunkowy. S dubbelriktad diodtyristor; diac. (521)
2. **bidirectional triode thyristor** (*Syn.* triac (abbreviation)) : a three-terminal thyristor having substantially the same switching behaviour in the first and third quadrants of the current voltage characteristic. ★ thyristor triode bidirectionnel → *thyristor 8.* R симметричный триодный тиристор; триак (сокращение). D Zweirichtungs-Thyristortriode; Triac (Akürzung). E tiristor triodo bidireccional; triac (en abreviatura). I tiristore a triodo bidirezionale; triac (abbreviato). N triac. P tyrystor triodowy obukierunkowy; triak. S dubbelriktad triodtyristor; triac. (521)
3. **N-gate thyristor** : a unidirectional thyristor in which the gate terminal is connected to the N-region nearest the anode and which is normally switched to the on-state by applying a negative signal to the gate terminal with respect to the anode terminal. ★ thyristor N → *thyristor 6.* R тиристор с управляющим электродом N-типа. D anodenseitig steuerbarer Thyristor. E tiristor N. I tiristore N. N thyristor met N-stuurelektrode. P tyrystor o bramce typu N. S N-tyristor. (521)
4. **P-gate thyristor** : a unidirectional thyristor in which the gate terminal is connected to the P-region nearest the cathode and which is normally switched to the on-state by applying a positive

signal to the gate terminal with respect to the cathode terminal. ★ thyristor P → *thyristor 7.* R тиристор с управляющим электродом P-типа. D kathodenseitig steuerbarer Thyristor. E tiristor P. I tiristore P. N thyristor met P-stuurelektrode. P tyrystor o bramce typu P. S P-tyristor. (521)

5. **reverse blocking diode thyristor** : a two-terminal unidirectional thyristor that switches for positive anode voltage and exhibits a reverse-blocking state for negative anode voltage. ★ thyristor diode bloqué en sens inverse → *thyristor 4.* R диодный тиристор, непроводящий в обратном направлении. D rückwärts sperrende Thyristordiode. E tiristor diodo bloqueado en inversa. I tiristore a diodo che blocca in senso inverso. N in sperrichting blokkerende diode-thyristor. P tyrystor blokujący wstecznie diodowy. S diodtyristor med spärrförmåga. (521)
6. **reverse blocking triode thyristor** : a three-terminal unidirectional thyristor that switches for positive anode voltage and exhibits a reverse-blocking state for negative anode voltage. ★ thyristor triode bloqué en sens inverse → *thyristor 9.* R триодный тиристор, непроводящий в обратном направлении. D rückwärts sperrende Thyristortriode. E tiristor triodo bloqueado en inversa. I tiristore a triodo che blocca in senso inverso. N in sperrichting blokkerende triode-thyristor. P tyrystor blokujący wstecznie triodowy. S triodtyristor med spärrförmåga. (521)
7. **reverse conducting diode thyristor** : a two-terminal unidirectional thyristor that switches only for positive anode voltage and conducts large currents at negative anode voltages comparable in magnitude to the on-state voltage. ★ thyristor diode passant en sens inverse → *thyristor 5.* R диодный тиристор, проводящий в обратном направлении. D rückwärts leitende Thyristordiode. E tiristor diodo conductor en inversa. I tiristore a diodo con conduzione inversa. N in sperrichting geleidende diode-thyristor. P tyrystor przewodzący wstecznie diodowy. S diodtyristor utan spärrförmåga. (521)
8. **reverse conducting triode thyristor** : a three-terminal unidirectional thyristor that switches only for positive anode voltage and conducts large currents at negative anode voltages comparable in magnitude to the on-state voltage. ★ thyristor triode passant en sens inverse → *thyristor 10.* R триодный тиристор, проводящий в обратном направлении. D rückwärts leitende Thyristortriode. E tiristor triodo conductor en inversa. I tiristore a triodo con conduzione inversa. N in sperrichting geleidende triode-thyristor. P tyrystor przewodzący wstecznie triodowy. S triodtyristor utan spärrförmåga. (521)
9. **thyristor** : a bi-stable semiconductor device comprising three or more junctions which can be switched from the off-state to the on-state, or vice versa. ★ thyristor → *thyristor 1.* R тиристор. D Thyristor. E tiristor. I tiristore. N thyristor. P tyrystor. S tyristor. (521)
10. **turn-off thyristor** : a thyristor which can be switched from the on-state to the off-state, and vice-versa, by applying control signals of appropriate polarity to the gate terminal. *Note.* — The ratio of triggering power to triggered power must be appreciably less than one. ★ thyristor bloquable → *thyristor 2.* R запираемый тиристор. D Abschaltthyristor. E tiristor bloqueable. I tiristore bloccabile. N uitschakelbare thyristor. P tyrystor przełączalny. S släckbar tyristor. (521)

TI

1. **TI** (*Syn.* temperature index) : → *index 44*

tidal

1. **tidal power station** : → *power station 23*

tie

1. **tie line** : → *line 164*
2. **tie trunk** (*Syn.* tie line) : → *line 164*

tier

1. **tier** : a concentric winding is said to have one, two or more tiers according to whether the peripheral extremities of the end windings of groups of coils at each end of the machine form one, two or more solids of revolution around the axis of the machine. ★ plan → *plan 22.* R разноплоскостные обмотки. D Ebenen (der Stirnverbindungen einer Etagenwicklung). E plano. I strato. N vlak; etage. P piętro. S plan. (411)

TIG

1. **TIG gun** (*Syn.* TIG torch) : → *torch 7*
2. **TIG torch** : → *torch 7*

tight

1. **tight jacketed cable** : → *cable 68*

tilt

1. **arc furnace tilt rockers** : → *rocker 1*
2. **arc furnace tilt roller track** : → *track 1*
3. **signal tilt** : the difference in level deliberately established between specified signals or groups of signals at a given point in a cabled distribution system. ★ dénivellement → *dénivellement 1.* R наклон. (723)
4. **(surface) wave tilt** : at a point in a perfect dielectric medium close to the surface separating this medium from a medium of finite conductivity, the angle between the major axis of the polarization ellipse of a surface wave and the normal to the separating surface. *Notes. 1* — In this case, the plane of the polarization ellipse contains the direction of propagation. *2* — In the case of a surface wave travelling over plane ground, the tangent of the angle between the major axis of the polarization ellipse and the normal to the surface is not very different from the ratio of the moduli of the longitudinal and transverse components of the electric field, which may be used as another measure of the wave tilt. ★ inclinaison d'une onde de surface → *inclinaison 3.* D Wellenneigung; Wellenfrontwinkel (einer Oberflächenwelle). P fala (powierzchniowa) nachylona. (705)

tilting

1. **arc furnace tilting system** : → *system 12*
2. **tilting cradle** : → *cradle 2*
3. **tilting furnace** : → *furnace 56*
4. **tilting pad bearing** : → *bearing 36*
5. **tilting table** : → *table 3*

timbre

1. **timbre** : that attribute of auditory sensation which enables a listener to judge that two non-identical sounds having the same loudness and pitch, are dissimilar. *Note.* — Timbre depends primarily upon the wave form, but also the sound pressure and the temporal characteristics of the sound. ★ timbre → *timbre 1.* R тембр. D Klangfarbe. E timbre. I timbro. N timbre; klankkleur. P barwa dźwięku. S klangfärg. (801)

time

1. **accumulated down time** : the accumulated time during which an item is in a down state over a given time interval. ★ durée cumulée d'indisponibilité → *durée 16.* R суммарная продолжительность неработоспособности по внутренним причинам. D addierte Unklardauer. E tiempo de indisponibilidad acumulado. I tempo accumulato di indisponibilità. N totale duur van onbruikbare toestand door interne oorzaak. P czas niezdatności wewnętrznej skumulowany. S ackumulerad hindertid. (191)
2. **accumulated time** : the sum of time durations characterized by given conditions over a given time interval. ★ durée cumulée → *durée 15.* R суммарное время; суммарная продолжительность. D addierte Zeit. E duración acumulada. I tempo accumulato. N totale tijd. P przedział czasu skumulowany. S ackumulerad tid. (191)
3. **active corrective maintenance time** : that part of the active maintenance time during which actions of corrective maintenance are performed on an item. ★ temps de maintenance corrective active → *temps 82.* R оперативная продолжительность неплановогo ремонта. D Dauer der aktiven Instandsetzung. E tiempo de mantenimiento correctivo activo; tiempo de reparación activo. I tempo attivo di manutenzione correttiva. N werkelijke duur van correctief onderhoud. P czas obsługi naprawczej bezpośredniej. S tid för aktivt avhjälpande underhåll. (191)
4. **active maintenance time** : that part of the maintenance time during which a maintenance action is performed on an item, either automatically or manually, excluding logistic delays. *Note.* — A maintenance action may be carried out while the item is performing a required function. ★ temps de maintenance active → *temps 80.* R оперативная продолжительность технического обслуживания и (или) ремонта. D aktive Instandhaltungsdauer. E tiempo de

mantenimiento activo. I tempo di manutenzione attiva. N werkelijke duur van onderhoud. P czas obsługi bezpośredniej. S tid för aktivt underhåll. (191)

5. **active preventive maintenance time** : that part of the active maintenance time, during which actions of preventive maintenance are performed on an item. ★ temps d'entretien actif → *temps 131.* R оперативная продолжительность технического обслуживания. D Dauer der aktiven Wartung. E tiempo de mantenimiento preventivo activo. I tempo attivo di manutenzione preventiva. N werkelijke duur van preventief onderhoud. P czas obsługi zapobiegawczej bezpośredniej. S tid för aktivt förebyggande underhåll. (191)
6. **alloying and refining time** (of a melting cycle) : the interval of time during which the molten metal is alloyed and refined prior to pouring. ★ temps de mise à la nuance et d'affinage → *temps 84.* R период рафинирования и легирования в цикле плавки. D Feinungs- und/oder Legierungszeit des Schmelzzyklus. E tiempo de aleación y refino (de un ciclo de fusión). I tempo di aggiunta delle leghe e dell'affinazione (di un ciclo di fusione). N legeer-en/of raffineertijd (van een smeltperiode). P czas wprowadzania składników stopowych i oczyszczania (w cyklu topienia). S legerings- och raffineringstid. (841)
7. **(analogue) time compression** (*Syn.* (analogue) temporal compression) : → *compression 1*
8. **arcing time** (of a pole or a fuse) : the interval of time between the instant of the initiation of the arc in a pole or a fuse and the instant of final arc extinction in that pole or that fuse. ★ durée d'arc → *durée 21.* R время дуги (полюса или предохранителя). D Lichtbogenzeit (eines Poles eines Schaltgerätes oder einer Sicherung). E tiempo de arco (de un polo o de un fusible). I durata d'arco (di un polo o di un fusibile). N boogtijd (van een pool of een smeltveiligheid). P czas łukowy wyłączeniowy bieguna. S ljusbågstid för en pol. (441)
9. **arcing time** (of a multipole switching device) : the interval of time between the instant of the first initiation of an arc and the instant of final arc extinction in all poles. ★ durée d'arc → *durée 22.* R время дуги (многополюсного коммутационного аппарата). D Lichtbogenzeit eines mehrpoligen Schaltgerätes. E tiempo de arco (de un aparato de conexión multipolar). I durata d'arco (di un apparecchio di manovra multipolare). N boogtijd (van een meerpolig schakeltoestel). P czas łukowy wyłączeniowy łącznika wielobiegunowego. S ljusbågstid för flerpolig elkopplare. (441)
10. **automatic date and time indication** : → *indication 2*
11. **average transfer time** (in telecontrol) : the average of the transfer time for every case of input of the primary signal with respect to the telecontrol system. ★ temps moyen de transfert → *temps de transfert 6.* R среднее время телепередачи (в телемеханике). D mittlere Übermittlungszeit (beim Fernwirken). E tiempo medio de transferencia (en telecontrol). I tempo medio di trasferimento (nel telecontrollo). N gemiddelde transmissietijd. P czas przesyłu średni. S medelöverföringstid. (371)
12. **averaging time** : the time interval over which a varying quantity is averaged. ★ temps d'intégration → *temps 136.* R время усреднения. D Integrationszeit. E tiempo de integración. I durata di integrazione. N middeltijd. P czas uśredniania. S integrationstid. (531)
13. **bounce time** : for a contact which is closing (opening) its circuit, the time interval between the instant when the contact circuit first closes (opens) and the instant when the circuit is finally closed (opened). ★ temps de rebondissement → *temps 100.* R время дребезга. D Prellzeit. E tiempo de rebote. I tempo di rimbalzo. N dendertijd; kaatstijd. P czas występowania odskoków. S studstid. (446)
14. **bridging time** : for a change-over make-before-break contact, the time interval which elapses between the instant one contact circuit is closed and the instant the other opens. ★ temps de chevauchement → *temps 46.* R время перекрывания. D Überlappungszeit. E tiempo de solape. I tempo di ricoprimento. N overbruggingstijd. P czas współstyczności. S överbryggningstid. (446)
15. **call set-up time** : the interval of time between the sending of the calling signal by the calling party and the reception of the call-connect signal. *Note.* — It is the sum of the preselection delay, selection time and post-selection time. ★ temps d'établissement d'une communication → *temps d'établissement 7.* R время установления соединения. D Verbindungsaufbauzeit. E tiempo de establecimiento de una comunicación. I tempo per stabilire un collegamento. N verbindingsopbouwtijd. P czas zestawienia połączenia. S uppkopplingstid. (721)
16. **carrier storage time** (of a switching transistor) : the time interval between the beginning of the fall of the pulse applied to the input terminals of a semiconductor device and the beginning of the fall of the pulse generated by charge carriers at the output terminals. ★ retard à la décroissance → *retard 17.* R время рассасывания. D Speicherzeit; Entladeverzug. E retardo de caída. I ritardo alla discesa. N opslagduur van ladingdragers. P czas gromadzenia ładunku (w tranzystorze przełączającym). S efterledningstid. (521)
17. **cathode heating time** : the time required for the cathode current to attain a stated fraction of its nominal value under stated conditions. ★ durée de chauffage de la cathode → *durée 26.* R время разогрева катода по катодному току. D Kathodenanheizzeit. E tiempo de calentamiento del cátodo. I durata di riscaldamento del catodo. N kathode-opwarmtijd. P czas nagrzewania katody. S uppvärmningstid för katod. (531)
18. **cathode preheating time** : the minimum period of time during which the heater or filament voltage should be applied before the application of electrode voltage. ★ durée de préchauffage de la cathode → *durée 58.* R время предварительного разогрева катода. D Vorheizzeit. E tiempo de precalentamiento del cátodo. I durata di preriscaldamento del catodo. N kathode-voorverwarmtijd. P czas nagrzewania wstępnego katody. S förvärmningstid för katod. (531)
19. **charge collection time** (of a semiconductor detector) : by convention, the time interval for the integrated current due to the charge collected in the semiconductor detector, after the passage of an ionizing particle, to increase from 10% to 90% of its final value. ★ temps de collection des charges → *temps 47.* R время собирания зарядов (полупроводникового детектора). D Sammelzeit der Ladungsträger (in einem Halbleiter detektor). E tiempo de captación de las cargas (de un detector semiconductor). I tempo di raccolta delle cariche (di un semiconduttore). N ladingsvergaartijd (v.e. halfgeleiderdetector). P czas zbierania ładunku (detektora półprzewodnikowego). S uppsamlingstid. (391)
20. **charging time** : the time from beginning of providing free access for the entry of the charge to the closure of access in order to start processing. ★ temps total de chargement → *temps 158.* R время загрузки. D Beschickungszeit. E tiempo de carga. I tempo di caricamento. N laadtijd. P czas załadowania wsadu. S chargeringstid. (841)
21. **check-out time** : that part of active corrective maintenance time during which function check-out is performed. ★ temps de vérification du fonctionnement → *temps 124.* R продолжительность контроля; продолжительность проверки. D Dauer der Funktionsprüfung. E tiempo de verificación de funcionamiento. I tempo di verifica (del funzionamento). N duur van de functionele controle. P czas sprawdzenia działania (ponaprawczego). S funktionskontrolltid. (191)
22. **close-open time** : the interval of time between the instant when the contacts touch in the first pole during a closing operation and the instant when the arcing contacts have separated in all poles during the subsequent opening operation. ★ durée de fermeture-ouverture → *durée 41.* R время замкнутого состояния. D Ein-Ausschalteigenzeit; Schliess-Öffnungszeit. E tiempo de cierre-apertura. I durata di chiusura-apertura. N sluit-openingstijd. P czas przestawieniowy cyklu ZW. S till-frântid. (441)
23. **closing time** : the interval of time between the initiation of the closing operation and the instant when the contacts touch in all poles. ★ durée de fermeture → *durée 40.* R собственное время включения. D Einschalteigenzeit; Schliesszeit. E tiempo de cierre. I durata di chiusura. N sluittijd. P czas zamykania. S tillslagstid. (441)
24. **closing time of a break contact** : for a relay which is in an operate condition, the time interval between the instant the input energizing quantity is removed under specified conditions and the instant when the break contact first closes. ★ temps d'établissement d'un contact de repos → *temps d'établissement 5.* R время замыкания размыкающего контакта. D Rückfallzeit eines Relais mit Öffner. E tiempo de cierre de un contacto de reposo. I tempo di chiusura di un contatto di riposo. N maaktijd van een verbreekcontact. P czas zamykania zestyku rozwiernego. S sluttid hos brytkontakt. (446)
25. **closing time of a make contact** : for a relay which is in the release condition, the time interval between the instant a

specified value of the input energizing quantity is applied under specified conditions and the instant when the make contact first closes. ★ temps d'établissement d'un contact de travail → *temps d'établissement 6.* R время замыкания замыкающего контакта. D Ansprechzeit eines Relais mit Schliesser. E tiempo de cierre de un contacto de trabajo. I tempo di chiusura di un contatto di lavoro. N maaktijd van een maakcontact. P czas zamykania zestyku zwiernego. S sluttid hos slutkontakt. (446)

26. closing time of a output-break circuit : for a relay which is in an operate condition, the time interval between the instant the input energizing quantity is removed under specified conditions and the instant when the output-break circuit first closes. ★ temps d'établissement d'un circuit de sortie de repos → *temps d'établissement 3.* R время замыкания размыкающей выходной цепи. D Rückfallzeit eines Relais mit Öffnerfunktion im Ausgangskreis. E tiempo de cierre de un circuito de salida de reposo. I tempo di chiusura di un circuito d'uscita di riposo. N maaktijd van een uitgangsverbreekschakeling. P czas zamykania wyjścia rozwiernego. S sluttid hos brytande utgångskrets. (446)

27. closing time of a output-make circuit : for a relay which is in the release condition, the time interval between the instant a specified value of the input energizing quantity is applied under specified conditions and the instant when the output-make circuit first closes. ★ temps d'établissement d'un circuit de sortie de travail → *temps d'établissement 4.* R время замыкания замыкающей выходной цепи. D Ansprechzeit eines Relais mit Schliesserfunktion im Ausgangskreis. E tiempo de cierre de un circuito de salida de trabajo. I tempo di chiusura di un circuito di uscita di lavoro. N maaktijd van een uitgangsmaakschakeling. P czas zamykania wyjścia zwiernego. S sluttid hos slutande utgångskrets. (446)

28. coherence time : the time over which propagating optical radiation may be considered to be coherent radiation. *Notes. 1* — The coherence time is equal to coherence length divided by the phase velocity in a medium. *2* — The coherence time is given approximately by $\lambda_0^2/c.\Delta\lambda$ where λ_0 is the central wavelength, $\Delta\lambda$ is the spectral linewidth and c is the velocity of light in vacuo. ★ durée de cohérence → *durée 28.* R время когерентности. D Kohärenzzeit. E tiempo de coherencia. I tempo di coerenza. N coherentietijd. P czas spójności; czas koherencji. S koherenstid. (731)

29. coincidence resolving time : the maximum time interval which can elapse between the occurrence of pulses at each of two or more specified inputs of a coincidence selector allowing the pulses to be recognized as a coincidence. ★ temps de résolution de coïncidence → *temps 113.* R разрешающее время совпадений. D Koinzidenzauflösungszeit. E tiempo de resolución de coincidencia. I tempo di risoluzione di coincidenza. N scheidingstijd (v.e. coïncidentieschakeling). P czas rozdzielczy koincydencji. S koincidenstid. (391)

30. contact time difference : → *difference 8*

31. conversation time : that portion of the call duration available for information transfer between calling and called parties. ★ durée de conversation → *durée 31.* R продолжительность разговора. D Sprechzeit. E duración de conversación. I durata della conversazione. N gespreksduur; spreektijd. P czas trwania rozmowy. S samtalstid. (722)

32. cooling time (of a heat treatment) : the duration of cooling period at determined temperature levels to meet specific heat treatment requirements. ★ temps de refroidissement → *temps 105.* R время охлаждения при термообработке. D Abkühlungsperiode (einer Wärmebehandlung). E tiempo de enfriamiento (de un tratamiento térmico). I tempo di raffreddamento (di un trattamento termico). N afkoeltijd. P czas chłodzenia (w obróbce cieplnej). S kylningstid. (841)

33. corrective maintenance time : that part of the maintenance time, during which corrective maintenance is performed on an item, including technical delays and logistic delays inherent in corrective maintenance. ★ temps de maintenance corrective → *temps 81.* R продолжительность непланового ремонта. D Instandsetzungsdauer. E tiempo de mantenimiento correctivo; tiempo de reparación. I tempo di manutenzione correttiva. N duur van correctief onderhoud. P czas obsługi naprawczej. S tid för avhjälpande underhåll. (191)

34. curing time : the time required for a material to cure to a specified state under specified conditions. ★ temps de traitement → *temps 123.* R время отверждения. D Härtungszeit. E tiempo de curado. I tempi di trattamento; tempi di colata. N uithardingstijd. P czas utwardzania. S härdningstid. (212)

35. cyclic time (in telecontrol) : the time interval between consecutive appearances of any information that is transmitted periodically. ★ durée du cycle → *durée 90.* R длительность цикла (в телемеханике). D Zykluszeit (beim Fernwirken). E duración del ciclo (en telecontrol). I tempo di ciclo (nel telecontrollo). N cyclustijd. P czas trwania cyklu. S periodtid. (371)

36. dead time (in regulation) (*Syn.* delay (in regulation)) : time interval between the instant when a variation of an input variable is produced and the instant when the consequent variation of the output variable starts. ★ retard → *retard 15.* R время чистого запаздывания; запаздывание. D Totzeit; Verzögerungszeit. E retardo; tiempo muerto. I tempo morto. N dode tijd. P czas opóźnienia. S dödtid. (351)

37. dead time (of a Geiger-Müller counter tube) : the time interval after the initiation of a pulse caused by an ionizing event, during which a Geiger-Müller counter tube cannot respond to a further ionizing event. ★ temps mort → *temps 150.* R мертвое время (счетчика Гейгера-Мюллера). D Totzeit (eines Auslösezählrohres). E tiempo muerto (de un tubo contador Geiger-Müller). I tempo morto (di un tubo contatore di Geiger-Müller). N dode tijd (v.e. geiger-müller-telbuis). P czas martwy (licznika Geigera-Müllera). S dödtid (för GM-rör). (391,531)

38. dead time (during auto-reclosing) : the interval of time between final arc extinction in all poles on the opening operation and the first reestablishment of current in any pole on the subsequent closing operation. ★ durée de coupure-établissement → *durée 33.* R бестоковая пауза (при автоматическом повторном включэнии). D Pausenzeit (beim selbsttätigen Wiederschliessen). E tiempo muerto (de un reenganche automático). I intervallo di attesa (durante una richiusura automatica). N stroomloze tijd (bij automatische herinschakeling). P czas bezprądowy (przy SPZ). S strömlöst intervall. (441)

39. dead time correction (*Syn.* resolving time correction) : → *correction 16*

40. dead time correction : → *correction 7*

41. dead time (for automatic reclosing equipment) : the time between the instant that current is interrupted and the instant the contacts of the circuit-breaker close as the result automatic recloser operation. *Note.* — The reclosing setting value is that time between the instant the circuit-breaker is tripped and the instant its closing is initiated from the automatic reclosing control equipment. ★ temps de pause (d'un réenclencheur) → *temps 90.* R время паузы (для устройства автоматического повторного включения). D Pausenzeit. E tiempo de pausa (de un reenganchador) ; tiempo muerto (de un reenganchador). I tempo d'attesa (di un dispositivo di richiusura automatica). N spanningsloze pauze. P przerwa ; pauza ; czas przerwy (przy SPZ). S paustid (för automatisk återinkoppling). (448)

42. decay time : the time during which the stored information decays to a stated fraction of its initial value. ★ temps de déclin → *temps 57.* R время затухания. D Abklingzeit. E tiempo de decadencia. I tempo di decadimento. N vervaltijd. P czas zanikania (informacji). S nedtoningstid. (531)

43. decay time (of a pulse) (*Syn.* fall time (of a pulse)) : the time interval between the instants at which the instantaneous value of a pulse again reaches a specified upper value and then a specified lower value. *Note.* — Unless otherwise specified, the upper and lower values are fixed at 90 % and 10 % of the pulse magnitude. ★ temps de descente → *temps de descente 2.* R время спада (импульса). D Abfallzeit (eines Impulses); Anstiegszeit. E tiempo de bajada (de un impulso). I tempo di discesa (di un impulso). N afvaltijd (van een puls); vervaltijd. P czas opadania impulsu. S falltid. (702)

44. deviation of synchronous time : → *deviation 7*

45. dialling time : the duration of the time interval between the reception of dial tone and the end of diallng by the calling user. ★ durée de numérotation → *durée 50.* D Wählzeit. P czas wybierania numeru. (715)

46. digital time converter : → *converter 6*

47. disabled time : the time interval during which an item is in a disabled state. ★ temps d'incapacité → *temps 132.* R продолжительность неработоспособности. D Unbrauchbarkeitsdauer. E tiempo de incapacidad. I tempo di

incapacità. N duur van onbruikbare toestand. P czas niezdatności. S hindertid. (191)

48. **disengaging time** (for a given function) : the time interval between the instant a specified change is made in the value of the input energizing quantity (the characteristic quantity for a measuring relay) which will cause the relay to disengage and the instant it disengages. ★ temps de dégagement → *temps 61.* R время трогания при возврате (для рассматриваемой функции). D Rückfallzeit (bei einer gegebenen Funktion). E tiempo de liberación (para una función dada). I tempo di disimpegno (per una data funzione). N niet-operationele tijd (voor een gegeven functie). P ..... S frånslagstid (för en given funktion). (446)

49. **down time** : the time interval during which an item is in a down state. ★ temps d'indisponibilité → *temps 134.* R продолжительность неработоспособности по внутренним причинам. D Unklardauer. E tiempo de indisponibilidad. I tempo di indisponibilità. N duur van onbruikbare toestand door interne oorzaak. P czas niezdatności wewnętrznej. S (intern) hindertid. (191)

50. **efficiency factor in time** : → *factor 65*

51. **electrode dead time** : the time taken from receipt of a signal to the electrode regulator to either raise or lower an electrode to the time of commencement of movement. ★ temps mort d'une électrode → *temps 151.* R время запаздывания механизма перемещения электрода. D Elektroden-Totzeit. E tiempo muerto de un electrodo. I tempo morto di un elettrodo. N dode tijd van een elektrode. P czas martwy elektrody. S dödtid. (841)

52. **electron collection time** : the time interval between the formation of ion pairs at a given point by ionizing radiation and the collection of the corresponding electrons on the collecting electrode. ★ temps de collection électronique → *temps 48.* R время собирания электронов. D Elektronensammelzeit. E tiempo de captación electrónico. I tempo di raccolta elettronica. N elektronenvergaartijd. P czas zbierania elektronów. S elektronuppsamlingstid. (391)

53. **external disabled time** (*Syn.* external loss time) : the time interval during which an item is in an external disabled state. ★ temps d'incapacité externe → *temps 133.* R продолжительность неработоспособности по внешним причинам. D extern bedingte Unbrauchbarkeitsdauer. E tiempo de incapacidad externa. I tempo di incapacità per cause esterne. N duur van onbruikbare toestand door externe oorzaak. P czas niezdatności z przyczyn zewnętrznych. S extern hindertid. (191)

54. **external loss time** (*Syn.* external disabled time) : → *time 53*

55. **fading time** (*Syn.* fading duration) : → *duration 15*

56. **fall time** : the time interval between the instants at which the magnitude of the pulse at the output terminals reaches specified upper and lower limits respectively when a semiconductor device is being switched from its conducting to its non-conducting state. *Note.* — The upper and lower limits are usually 90% and 10% respectively of the initial amplitude of the output pulse. ★ temps de décroissance → *temps 58.* R время спада. D Abfallzeit. E tiempo de caída. I tempo di discesa. N daaltijd. P czas opadania (w tranzystorze przełączającym). S falltid. (521)

57. **fall time** (*Syn.* decay time) : → *time 43*

58. **fall time** (of a detector) : time required for a detector output to fall from a stated high percentage to a stated lower percentage of the maximum value when a steady input is instantaneously removed. *Note.* — It is usual to consider a high percentage of 90% and a low percentage of 10%. ★ temps de descente → *temps de descente 3.* R время спада (приёмника). D Abfallzeit (eines Empfängers). E tiempo de caída. I tempo di discesa. N afvaltijd. P czas opadania. S falltid. (531,845)

59. **fault clearance time** : the time interval between the occurence of a fault and the fault clearance. ★ temps d'élimination d'un défaut → *temps 129.* R время отключения замыкания. D Fehlerbeseitigungsdauer. E tiempo de eliminación del defecto. I tempo di eliminazione di un guasto. N foutherstelтijd. P czas trwania zwarcia. S felbortkopplingstid. (604)

60. **fault correction time** : that part of active corrective maintenance time during which fault correction is performed. ★ temps de correction de panne → *temps 52.* R продолжительность устранения (существенной) неисправности. D Dauer der Fehlerbehebung. E tiempo de corrección de una avería. I tempo di correzione di avaria. N defectherstelтijd. P czas usuwania przyczyny niezdatności. S felavhjälpningstid. (191)

61. **fault diagnosis time** : the time during which fault diagnosis is performed. ★ temps de diagnostic de panne → *temps 63.* R продолжительность диагностирования (существенной) неисправности. D Dauer der Fehlerdiagnose. E tiempo de diagnóstico de una avería. I tempo di diagnosi dell'avaria. N tijd nodig voor de diagnose van het defect. P czas diagnozy przyczyny niezdatności. S felsökningstid. (191)

62. **fault localization time** : that part of active corrective maintenance time during which fault localization is performed. ★ temps de localisation de panne → *temps 78.* R продолжительность поиска (существенной) неисправности. D Dauer der Fehlerlokalisierung. E tiempo de localización de una avería. I tempo di localizzazione dell'avaria. N tijd nodig voor het lokaliseren van het defect. P czas lokalizacji przyczyny niezdatności. S fellokaliseringstid. (191)

63. **firing time** : the time interval between application of radio frequency power and firing of the blocking tube, under stated conditions. ★ durée d'allumage → *durée 18.* R время зажигания. D Zündverzug. E tiempo de encendido. I durata di accensione. N ontsteektijd (blokkeerbuizen). P ..... S tändtid. (531)

64. **forward recovery time** : the time required for the current or voltage to recover to a specified value after instantaneous switching from an applied voltage of zero or a specified reverse voltage to a specified forward bias condition. ★ temps de récupération direct → *temps 102.* R время прямого восстановления. D Durchlaßverzögerungszeit. E tiempo de recuperación directa. I tempo di ripristino nel senso di conduzione. N hersteltijd in doorlaattoestand. P czas odzyskania przewodnictwa. S återhämtningstid (i framriktning). (521)

65. **frame alignment recovery time** : the time that elapses between a valid frame alignment signal being available at the receive terminal equipment and frame alignment being established. *Note.* — The frame alignment recovery time includes the time required for replicated verification of the validity of the frame alignment signal. ★ temps de reprise du verrouillage de trame → *temps 110.* R вхождение в цикловый синхронизм. D Rastergleichlaufwiedergewinnungszeit. E tiempo de restablecimiento del cerramiento de trama. I tempo di recupero dell'allineamento trama. N ..... P czas ustalania zgodności ramki. S ramlåsningstid. (704,721)

66. **frame time** (*Syn.* frame duration (in switching)) : the time taken to perform one cycle of polling or scanning. ★ durée de trame → *durée 70.* R длительность цикла. D Rahmendauer. E duración de trama. I durata di trama. N cyclusduur; rasterduur. P czas trwania ramki. S ramtid. (714)

67. **free time** (*Syn.* idle time) : → *time 76*

68. **free-running time base** : → *base 18*

69. **gel time** : the time required for a liquid material to reach the gel point under specified conditions. ★ temps de gélification → *temps 72.* R время гелеобразования. D Gelierzeit. E tiempo de gelificación. I tempo di gelificazione. N geleertijd. P czas żelowania. S geltid. (212)

70. **generation time** : the mean time required for neutrons arising from fission to produce other fissions. ★ temps de génération → *temps 73.* D Generationsdauer. E tiempo de generación. I tempo di generazione. N generatietijd. P czas życia pokolenia neutronów. S generationstid. (026)

71. **half amplitude recovery time** : recovery time corresponding to 50% amplitude. ★ temps de restitution à 50% → *temps 116.* R время восстановления половины амплитуды. D Erholzeit bis zur halben Amplitude. E tiempo de restitución al 50%. I tempo di ricupero a 50%. N hersteltijd tot halve amplitude. P połówkowy czas regeneracji. S tid för återhämtning till halva pulshöjden. (391)

72. **heater warm-up time** : the time required for the heater voltage to attain a stated fraction of its nominal value under stated conditions. ★ durée de chauffage du filament → *durée 27.* R время установления напряжения подогревателя (накала). D Heizeranheizzeit. E tiempo de calentamiento del filamento. I durata di riscaldamento del filamento. N gloeidraadopwarmtijd. P czas nagrzewania grzejnika. S uppvärmningstid för glödtråd (vid indirekt upphettad katod). (531)

73. **heating time** (of a heat treatment) : the duration of heating period at determined temperature levels to meet specific heat treatment requirements. ★ temps de chauffage

→ *temps 45.* R время нагрева при термообработке. D Erwärmungsperiode (einer Wärmebehandlung). E tiempo de calentamiento (de un tratamiento térmico). I tempo di riscaldamento (di un trattamento termico). N opwarmtijd. P czas nagrzewu (w obróbce cieplnej). S värmningstid. (841)

74. **holding time** : the time elapsed between the seizure of a resource and its release. ★ durée d'occupation → *durée 88.* D Belegungsdauer. P czas zajętości. (715)

75. **H.T. warm-up time** : the time interval between the start of application of the high tension and the instant at which a stated value of one of the following characteristics is obtained: frequency rate of drift of frequency output power anode current. ★ durée de mise en fonctionnement haute tension → *durée 49.* R время готовности по высокому напряжению. D Einlaufzeit. E tiempo de puesta en funcionamiento en alta tensión. I durata di avviamento in alta tensione. N hoogspanning-opwarmtijd. P czas nagrzewania wstępnego. S funktionsfördröjning efter inkoppling av högspänning. (531)

76. **idle time** (*Syn.* free time) : the time interval during which an item is in a free state. ★ temps mort → *temps 148.* R продолжительность планового простоя работоспособного объекта. D Dauer des betriebsfreien Klarzustands; Leerlaufdauer. E tiempo de reposo; tiempo muerto; tiempo libre. I tempo libero. N duur van vrije toestand. P czas nieobciążenia. S tomgångstid. (191)

77. **ignition time** : the total time interval from the application of the stated conditions to initiate the discharge to the establishment of conduction at some stated value of the tube voltage drop. ★ durée d'amorçage → *durée 19.* R время зажигания. D Zündzeit. E tiempo de cebado. I durata di innesco. N ontsteektijd. P czas zapłonu. S tändningstid. (531)

78. **instant of time** : → *instant 4*

79. **ion collection time** : the time interval between the formation of ion pairs at a given point by ionizing radiation and the collection of the corresponding ions on the collecting electrode. ★ temps de collection ionique → *temps 49.* R время собирания ионов. D Ionensammelzeit. E tiempo de captación iónico. I tempo di raccolta ionica. N ionenvergaartijd. P czas zbierania jonów. S jonuppsamlingstid. (391)

80. **ionization time** : the time interval between the initiation of conditions for, and the establishment of, conduction at some stated value of tube voltage drop under stated conditions. ★ durée d'ionisation → *durée 87.* R время ионизации. D Ionisierungszeit. E tiempo de ionización. I durata di ionizzazione. N ionisatietijd. P czas jonizacji. S joniseringstid. (531)

81. **latency time** : the time which elapses between the arrival of a particle at the detector and the moment when the pulse characteristic quantity reaches the threshold of response of the circuit associated with the detector. ★ temps de latence → *temps 74.* R время запаздывания. D Ansprechverzögerung. E tiempo de latencia. I tempo di latenza. N latentietijd; opkomtijd. P czas utajenia. S latenstid. (391)

82. **lost time** : the portion of the scanning line period which cannot be used for picture signal transmission. *Note.* — With a drum facsimile transmitter the lost time is the dead sector scanning time. ★ temps perdu → *temps 156.* R потерянное время. D Verlustzeit. E tiempo perdido. I tempo perduto. N verliestijd. P czas stracony. S förlorad tid. (721)

83. **maintenance time** : the time interval during which a maintenance action is performed on an item either manually or automatically, including technical delays and logistic delays. *Note.* — Maintenance may be carried out while the item is performing a required function. ★ temps de maintenance → *temps 79.* R продолжительность технического обслуживания и ремонта. D Instandhaltungsdauer. E tiempo de mantenimiento. I tempo di manutenzione. N onderhoudsduur. P czas obsługi. S tid för underhåll. (191)

84. **make-break time** : the interval of time between the instant when the current begins to flow in a pole and the instant of final arc extinction in all poles, with the opening release energized at the instant when current begins to flow in the main circuit. ★ durée d'établissement-coupure → *durée 78.* R минимальное время тока в главной цепи. D Ein-Ausschaltzeit. E tiempo de establecimiento-corte. I durata di stabilimento d'interruzione. N in-uitschakeltijd. P czas prądowy cyklu ZW. S slut-bryttid. (441)

85. **maximum fast spooling time** : the time taken for a full maximum diameter reel of a specified tape to be spooled, at maximum speed, onto an empty reel. ★ temps maximal de bobinage rapide → *temps 144.* R максимальная длительность ускоренной перемотки. D maximale Umspulzeit. E tiempo máximo de bobinado rápido. I tempo massimo di avvolgimento rapido. N maximale snelspoeltijd. P czas szybkiego przewijania maksymalny. S snabbomspolningstid. (806)

86. **maximum resetting time** : for a given function, the maximum time between the instant when the conditions of energization permit the relay to reset and the instant it resets. ★ temps maximal de retour → *temps 147.* R максимальное время возврата. D maximale Rückkehrzeit. E tiempo máximo de reposición. I tempo massimo di ripristino; tempo massimo di ritorno. N maximale terugzettijd. P ..... S maximal återvändstid. (446)

87. **maximum retention time** : the maximum time duration between writing information into a storage tube and reading it at an acceptable output level. ★ temps maximal de mémoire → *temps 146.* R максимальное время памяти. D Abfrageverzögerung. E tiempo máximo de memoria. I massimo tempo di memoria. N houdtijd. P czas zapamiętania maksymalny. S maximal läsbarhetstid. (531)

88. **maximum start time to record/reproduce speed** : the maximum time that has elapsed between the operation of the starting device and the tape speed being increased from zero to a reproduce speed that gives a wow and flutter reading which is twice the steady state value. ★ temps maximal de démarrage pour la vitesse de défilement en enregistrement et lecture → *temps 145.* R максимальная длительность пуска. D maximale Startzeit für Aufnahme/Wiedergabegeschwindigkeit. E tiempo máximo de arranque para la velocidad de la cinta en registro y lectura. I tempo massimo per raggiungere la velocità di regime in registrazione/riproduzione. N maximale aanlooptijd tot opname/weergavesnelheid. P czas startu maksymalny (przy zapisywaniu i odczytywaniu). S starttid vid in-/avspelning. (806)

89. **maximum stopping time from maximum spooling speed** : the maximum time that has elapsed between the operation of the stopping device and the tape speed being reduced from maximum spooling speed to zero. ★ temps maximal d'arrêt à partir de la vitesse maximale de bobinage → *temps 143.* R максимальная длительность останова в режиме, соответствующем скорости перемотки. D maximale Stopzeit aus maximaler Umspulgeschwindigkeit. E tiempo máximo de parada a partir de la velocidad máxima de bobinado. I tempo massimo di arresto dalla massima velocità di avvolgimento. N maximale uitlooptijd vanuit snelspoelen. P czas zatrzymania maksymalny przy maksymalnej prędkości przewjania. S stopptid vid snabbspolning. (806)

90. **maximum stopping time from record/reproduce speed** : the maximum time that has elapsed between the operation of the stopping device and the tape speed being reduced to zero. ★ temps maximal d'arrêt à partir de la vitesse de défilement en enregistrement et lecture → *temps 142.* R максимальная длительность останова. D maximale Stopzeit aus Aufnahme/Wiedergabegeschwindigkeit. E tiempo máximo de parada a partir de la velocidad de la cinta en registro y lectura. I tempo massimo di arresto dalla velocità di registrazione/riproduzione. N maximale uitlooptijd vanuit opname/weergavesnelheid. P czas zatrzymania maksymalny (przy zapisywaniu i odczytywaniu). S stopptid vid in-/avspelning. (806)

91. **maximum transfer time** (in telecontrol) : the transfer time for the case in which the primary signal to the telecontrol transmitter is input at the most unfavourable moment with respect to the telecontrol system. *Note.* — The maximum transfer time may occur within a cyclic system if information is input just after scanning the corresponding input element or within a quiescent system if information is input just after the start of transmission of another signal block. ★ temps maximal de transfert → *temps de transfert 5.* R максимальное время телепередачи (в телемеханике). D maximale Übermittlungszeit (beim Fernwirken). E tiempo máximo de transferencia (en telecontrol). I tempo massimo di trasferimento (nel telecontrollo). N maximale transmissietijd. P czas przesyłu maksymalny. S maximal överföringstid. (371)

92. **maximum usable reading time** : the maximum time during which a storage element, line or surface can be read, under stated conditions and without rewriting, before a stated degree of decay has occurred. ★ temps de lecture maximal utilisable → *temps 76.* R максимальное время считывания.

D maximale nutzbare Lesezeit. E tiempo de lectura máximo utilizable. I massimo tempo di lettura utilizzabile. N maximum bruikbare leesduur. P czas odczytywania użyteczny maksymalny. S maximal användbar avläsningstid. (531)

93. **maximum usable viewing time** : → *viewing 1*

94. **mean accumulated down time** (*Syn.* MADT (abbreviation)) : the expectation of the accumulated down time over a given time interval. ★ durée cumulée moyenne d'indisponibilité → *durée 17.* R среднее суммарное время неработоспособности по внутренним причинам. D mittlere addierte Unklardauer. E tiempo medio acumulado de indisponibilidad; TMAI (abreviatura). I tempo medio accumulato di indisponibilità. N onbruikbare toestand door interne oorzaak; MADT (afkorting). P czas niezdatności wewnętrznej średni skumulowany. S medelvärde för ackumulerad hindertid. (191)

95. **mean active corrective maintenance time** : the expectation of the active corrective maintenance time. ★ durée moyenne de maintenance corrective active → *durée 112.* R средняя оперативная продолжительность непланового ремонта. D mittlere Dauer der aktiven Instandsetzung. E tiempo medio de mantenimiento conectivo activo. I tempo medio attivo di riparazione correttiva. N gemiddelde werkelijke duur van correctief onderhoud. P czas obsługi naprawczej bezpośredniej średni. S medeltid för aktivt avhjälpande underhåll. (191)

96. **mean deceleration (as a function of time)** : → *deceleration 2*

97. **mean down time** (*Syn.* MDT (abbreviation)) : the expectation of the down time. ★ temps moyen d'indisponibilité → *temps 153.* R среднее время неработоспособности по внутренним причинам. D mittlere Unklardauer. E tiempo medio de indisponibilidad; TMI (abreviatura). I tempo medio di indisponibilità. N onbruikbare toestand door interne oorzaak; MDT (afkorting). P czas niezdatności wewnętrznej średni. S medelhindertid. (191)

98. **mean operating time between failures** : → *operating 5*

99. **mean repair time** (*Syn.* MRT (abbreviation)) : the expectation of the repair time. ★ durée moyenne de réparation → *durée 114.* R среднее время активного ремонта. D mittlere Instandhaltungsdauer. E tiempo medio de reparación; MRT (abreviatura). I tempo medio di riparazione. N gemiddelde reparatieduur; MRT (afkorting). P czas naprawy średni. S medelreparationstid. (191)

100. **mean service provisioning time** : the expectation of the duration between the instant of time a potential user requests that an organization provides the necessary means for a service, and the instant of time when these means are furnished. ★ délai moyen de fourniture → *délai 6.* R среднее время предоставления услуги. D mittlere Wartedauer (auf einen Dienst). E tiempo medio de espera (de un servicio). I tempo medio di fornitura di un servizio. N gemiddelde wachttijd (bij dienstverlening). P opóźnienie rozpoczęcia serwisu średnie. S medeltid för tillhandahållande av tjänst. (191)

101. **mean time between failures** : the expectation of the time between failures. *Note.* — In English, the use of the abbreviation MTBF in this sense is now deprecated. ★ temps moyen entre défaillances → *temps 154.* R среднее время между отказами. D mittlerer Ausfallabstand. E tiempo medio entre fallos. I tempo medio tra guasti. N gemiddelde tijd tussen storingen. P czas między uszkodzeniami średni. S medeltid mellan fel. (191)

102. **mean time between interruptions** : the expectation of the time between interruptions. ★ durée moyenne entre interruptions → *durée 121.* R среднее время между прерываниями. D mittlerer Unterbrechungsabstand. E tiempo medio entre interrupciones. I tempo medio tra interruzioni. N gemiddelde tijd tussen onderbrekingen. P czas między przerwami średni. S medeltid mellan avbrott. (191)

103. **mean time to failure** (*Syn.* MTTF (abbreviation)) : the expectation of the time to failure. ★ durée moyenne de fonctionnement avant défaillance → *durée 110.* R средняя наработка до отказа. D mittlere Zeitspanne bis zum Ausfall. E tiempo medio hasta el fallo; MTTF (abreviatura). I tempo medio al guasto. N gemiddelde tijd tot aan een storing; MTTF (afkorting). P czas do uszkodzenia średni. S medeltid till fel. (191)

104. **mean time to first failure** (*Syn.* MTTFF (abbreviation)) : the expectation of the time to first failure. ★ durée moyenne de fonctionnement avant la première défaillance → *durée 111.* R средняя наработка до первого отказа. D mittlere Zeitspanne bis zum ersten Ausfall. E tiempo medio hasta el primer fallo; MTTFF (abreviatura). I tempo medio al primo guasto. N gemiddelde tijd tot aan de eerste storing; MTTFF (afkorting). P czas do pierwszego uszkodzenia średni. S medeltid till första fel. (191)

105. **mean time to recovery** (*Syn.* mean time to restoration) : → *time 106*

106. **mean time to restoration** (*Syn.* mean time to recovery; MTTR (abbreviation)) : the expectation of the time to restoration. ★ durée moyenne de panne → *durée 113.* R среднее время восстановления. D mittlere Zeit bis zur Wiederherstellung. E tiempo medio hasta el restablecimiento; MTTR (abreviatura); duración media de la avería. I tempo medio al ripristino. N gemiddelde tijd tot aan herstel; MTTR (afkorting). P czas przywrócenia zdatności średni. S medeltid till återställning. (191)

107. **mean up time** (*Syn.* MUT (abbreviation)) : the expectation of the up time. ★ temps moyen de disponibilité → *temps 152.* R среднее время работоспособности. D mittlere Klardauer. E tiempo medio de disponibilidad; TMD (abreviatura). I tempo medio di disponibilità. N gemiddelde duur van de beschikbare toestand; MUT (afkorting). P czas zdatności średni. S medelklartid. (191)

108. **median lethal time** (*Syn.* MLT (abbreviation)) : the time following administration of a specified absorbed dose of a specified radiation in which 50 per cent of the individuals of a large group of animals or living organisms are killed. ★ temps létal moyen → *temps 140.* R среднелетальное время. D mediane Letalzeit. E tiempo letal medio; TLM (abreviatura). I tempo letale mediano. N letale-tijdmediaan. P czas dawki śmiertelnej. S medianletaltid. (881)

109. **melt-down time** (of a melting cycle) (*Syn.* melting time (of a melting cycle)) : the period of time from switching on power to commencement of the refining process. ★ temps de fusion → *temps 71.* R время расплавления (в цикле плавки); время плавки (в цикле плавки). D Einschmelzzeit (Bruttoeinschmelzzeit). E tiempo de fusión (de un ciclo de fusión). I tempo di fusione (di un ciclo di fusione). N insmelttijd (van een smeltperiode). P czas topienia (w cyklu topienia). S nedsmältningstid. (841)

110. **melting time** (*Syn.* pre-arcing time) : → *time 132*

111. **melting time** (*Syn.* melt-down time) : → *time 109*

112. **minimum usable erasing time** : the minimum time required to reduce stored information from one stated level to another, under stated operating conditions and without rewriting. ★ temps d'effacement minimal utilisable → *temps 127.* R минимальное время стирания. D minimale nutzbare Löschzeit. E tiempo de borrado mínimo utilizable. I minimo tempo di cancellazione utilizzabile. N minimum bruikbare wistijd. P czas kasowania użyteczny minimalny. S minsta användbara släckningstid. (531)

113. **nominal acceleration time** : the time which would be required to bring the rotating parts of a machine from rest to rated speed if the accelerating torque were constant and equal to the quotient of rated active power and rated angular velocity. ★ temps d'accélération nominal → *temps 39.* R номинальное время ускорения. D Nenn-Anlaufzeit. E tiempo de aceleración nominal. I tempo di accelerazione nominale. N nominale versnellingstijd. P umowny czas rozruchu. S nominell accelerationstid. (411)

114. **non-operating time** : the time interval during which an item is in a non-operating state. ★ temps de non-fonctionnement → *temps 85.* R продолжительность простоя объекта. D Nichtbetriebsdauer. E tiempo de no funcionamiento. I tempo di non funzionamento. N buiten-gebruiktoestand; buiten-gebruikduur. P czas niefunkcjonowania. S vilotid. (191)

115. **non-required time** : the time interval during which the user does not require the item to be in a condition to perform a required function. ★ période non requise → *période 27.* R продолжительность планового простоя. D Betriebspause. E período no requerido. I tempo non richiesto. N niet-vereiste beschikbaarheidsduur. P czas niewymagany. S ej krävd tid. (191)

116. **opening time** (of a mechanical switching device) : the interval of time between the specified instant of initiation of the opening operation and the instant when the arcing contacts have separated in all poles. *Note.* — The instant of initiation of the opening operation, i.e. the application of the opening command (e.g. energizing the release, etc.) is given in the relevant specifications. ★ durée d'ouverture → *durée 89.* R собственное время отключения (контактного

коммутационного аппарата). D Ausschalteigenzeit (eines mechanischen Schaltgerätes); Öffnungszeit (eines mechanischen Schaltgerätes). E tiempo de apertura (de un aparato mecánico de conexión). I durata di apertura (di un apparecchio meccanico di manovra). N openingstijd (van een mechanische schakelaar). P czas własny łącznika przy otwieraniu. S öppningstid. (441)

117. opening time of a break contact : for a relay wich is in the release condition, the time interval between the instant a specified value of the input energizing quantity is applied under specified conditions and the instant when the break contact first opens. ★ temps de rupture d'un contact de repos → *temps de rupture 3.* R время размыкания размыкающего контакта. D Ansprechzeit eines Relais mit Öffner. E tiempo de apertura de un contacto de reposo. I tempo d'apertura di un contatto di riposo. N maaktijd van een verbreekcontact. P czas otwierania zestyku rozwiernego. S bryttid hos brytkontakt. (446)

118. opening time of a make contact : for a relay which is in an operate condition, the time interval between the instant the input energizing quantity is removed under specified conditions and the instant when the make contact first opens. ★ temps de rupture d'un contact de travail → *temps de rupture 4.* R время размыкания замыкающего контакта. D Rückfallzeit eines Relais mit Schliesser. E tiempo de apertura de un contacto de trabajo. I tempo d'apertura di un contatto di lavoro. N openingstijd van een maakcontact. P czas otwierania zestyku zwiernego. S bryttid hos slutkontakt. (446)

119. opening time of a output-break circuit : for a relay which is in the release condition, the time interval between the instant a specified value of the input energizing quantity is applied under specified conditions and the instant when the output-break circuit first opens. ★ temps de rupture d'un circuit de sortie de repos → *temps de rupture 1.* R время размыкания размыкающей выходной цепи. D Ansprechzeit eines Relais mit Öffnerfunktion im Ausgangskreis. E tiempo de apertura de un circuito de salida de reposo. I tempo d'apertura di un circuito d'uscita di riposo. N maaktijd van een uitgangsverbreekschakeling. P czas otwierania wyjścia rozwiernego. S bryttid hos brytande utgångskrets. (446)

120. opening time of a output-make circuit : for a relay which is in an operate condition, the time interval between the instant the input energizing quantity is removed under specified conditions and the instant when the output-make circuit first opens. ★ temps de rupture d'un circuit de sortie de travail → *temps de rupture 2.* R время размыкания замыкающей выходной цепи. D Rückfallzeit eines Relais mit Schliesserfunktion im Ausgangskreis. E tiempo de apertura de un circuito de salida de trabajo. I tempo d'apertura di un circuito d'uscita di lavoro. N openingstijd van een uitgangsmaakschakeling. P czas otwierania wyjścia zwiernego. S bryttid hos slutande utgångskrets. (446)

121. operate time : for a relay which is in the release condition (initial condition) the time interval between the instant a specified value of the input energizing quantity (characteristic quantity) is applied under specified condition and the instant when the relay switches. *Note.* — This term is used only when the relay has output circuits of the same type and no precision is required according to contact time difference. ★ temps de fonctionnement → *temps 70.* R время срабатывания. D Ansprechzeit. E tiempo de funcionamiento; tiempo de actuación (para relés de todo o nada). I tempo di funzionamento. N opkomtijd; aantrektijd. P czas załączania. S funktionstid. (446)

122. operating time : the time interval during which an item is in an operating state. ★ temps de fonctionnement → *temps 69.* R наработка. D Betriebsdauer. E tiempo de funcionamiento. I tempo di funzionamento. N duur van de werktoestand; gebruikduur. P czas funkcjonowania. S funktionstid. (191)

123. operating time (*Syn.* total clearing time) : the sum of the pre-arcing time and the arcing time. ★ durée de fonctionnement → *durée 42.* R время срабатывания; полное время отключения. D Ausschaltzeit; Gesamtausschaltzeit. E tiempo de funcionamiento; tiempo de corte. I durata di funzionamento. N onderbrekingstijd. P czas wyłączania (bezpiecznika topikowego). S bryttid. (441)

124. operating time between failures : total time duration of operating time between two consecutive failures of a repaired item. ★ durée de bon fonctionnement → *durée 25.* R наработка между отказами. D Betriebsdauer zwischen Ausfällen. E tiempo de buen funcionamiento; tiempo de funcionamiento entre fallos. I tempo di funzionamento tra due guasti. N gebruikduur tussen storingen. P czas funkcjonowania między uszkodzeniami. S funktionstid mellan fel. (191)

125. optical time domain reflectometry : → *reflectometry 1*

126. out-of-frame-alignment time : the time during which frame alignment is effectively lost. *Note.* — The out-of-frame-alignment time includes both the time taken to detect loss of frame alignment and the frame alignment recovery time. ★ durée de perte du verrouillage de trame → *durée 55.* R время отсутствия циклового синхронизма. D Rastergleichlauf-Auszeit. E duración de pérdida de cerramiento de trama. I durata del disallineamento di trama. N ..... P czas utraty zgodności ramki. S ramförlusttid. (704)

127. overall transfer time (in telecontrol) : the time duration by which information is delayed after the actual event in the sending station and until presentation at the receiving station. *Note.* — The overall transfer time includes the delays due to the input peripheral device in the sending station and the corresponding peripheral output device at the receiving station. ★ temps de transfert total → *temps de transfert 4.* R полное время передачи (в телемеханике). D Gesamtübermittlungszeit (beim Fernwirken). E tiempo de transferencia total (en telecontrol). I tempo di trasferimento totale (nel telecontrollo). N totale transmissietijd. P czas przesyłu całkowity. S total överföringstid. (371)

128. paralysis time : constant predetermined value imposed on the resolving time by a paralysis circuit, usually in order to make the resolving time correction more accurate. ★ temps de paralysie → *temps 89.* R время нечувствительности. D Totzeit. E tiempo de parálisis. I tempo di paralisi. N blokkeringstijd. P czas martwy. S blockeringstid. (391)

129. p-fractile repair time : the p-fractile value of the repair time. ★ fractile d'ordre p de la durée de réparation → *fractile 2.* R П - квантиль времени активного ремонта. D Quantil der Instandhaltungsdauer. E cuantil p del tiempo de reparación. I p-frattile del tempo di riparazione. N p-fractiel van de reparatieduur. P kwantyl rzędu p czasu naprawy. S p-fraktil för reparationstid. (191)

130. post-selection time : the interval of time between the end of the sending of the selection signals by the calling party and the reception of the call-connect signal. ★ temps de sélection → *temps 118.* R время "после набора". D Durchschaltezeit. E tiempo de selección. I ritardo post selezione. N wachttijd op kiesbevestiging. P opóźnienie powybiercze. S svarstid. (721)

131. pouring time (of a melting cycle) : the interval of time when the finally prepared melt is poured out of the furnace. ★ temps de coulée → *temps 53.* R время разливки (в цикле плавки). D Giesszeit (eines Schmelzzyklus). E tiempo de colada (de un ciclo de fusión). I tempo di colata (di un ciclo di fusione). N giettijd. P czas wlewania (w cyklu topienia). S tappningstid. (841)

132. pre-arcing time (*Syn.* melting time) : the interval of time between the beginning of a current large enough to cause a break in the fuse-element(s) and the instant when an arc is initiated. ★ durée de préarc → *durée 56.* R преддуговое время; время плавления. D Ansprechzeit; Schmelzzeit. E tiempo de prearco; tiempo de fusión. I durata di prearco; durata di fusione. N smelttijd. P czas przedłukowy (bezpiecznika topikowego). S smälttid. (441)

133. preconditioning time : the time between the instant when a specified value of the measured quantity is applied to the internal measuring circuit and the instant when the instrument is intended to comply with the accuracy requirements. ★ durée de mise en circuit préalable → *durée 48.* R время предварительного включения. D Messvorbereitungszeit. E tiempo de preacondicionamiento. I tempo di precondizionamento. N reactietijd. P czas ustalania wskazania. S förbehandlingstid. (301)

134. preventive maintenance time : that part of the maintenance time during which preventive maintenance is performed on an item, including technical delays and logistic delays inherent in preventive maintenance. ★ temps d'entretien → *temps 130.* R продолжительность технического обслуживания. D Wartungsdauer. E tiempo de mantenimiento preventivo. I tempo di manutenzione preventiva. N duur van preventief onderhoud. P czas obsługi zapobiegawczej. S tid för förebyggande underhåll. (191)

135. pulse fall time discriminator : → *discriminator 9*

136. **pulse time modulation** : → *modulation 55*

137. **queuing time** (*Syn.* waiting time) : → *time 225*

138. **rate time** : for an element with proportional and derivative action (PD-action), the input variable of which is given a ramp-wise variation, the rate time is the time required for the output-variable variation to reach twice the value of the variation that occurred immediately after the ramp was applied. ★ temps de dosage de dérivation → *temps 66.* R коэффициент усиления по скорости. D Vorhaltzeit. E tiempo de acción derivada. I tempo caratteristico dell'azione proporzionale più derivativa. N differentiatietijd. P czas wyprzedzania. S derivationstid; D-tid. (351)

139. **rated short time thermal current** : → *current 162*

140. **readout time** : the time interval during which the output signal is available for reading when the instrument is under continuous operation. *Note.* — Generally, the readout time is specified at maximum conversion rate. ★ temps de lecture → *temps 75.* R время считывания. D Auslesezeit. E tiempo de lectura. I durata per la lettura. N presentatietijd. P czas odczytu. S avläsningstid. (303)

141. **real time** : pertaining to the processing of data by a computer in connection with another process outside the computer according to time requirements imposed by the outside process. ★ en temps réel → *temps 19.* R реальный масштаб времени (в реальном масштабе времени). D Echtzeit. E en tiempo real. I tempo reale. N ogenblikkelijk, tijdsgetrouw. P czas rzeczywisty. S realtids-. (714)

142. **recovery time** : the minimum time interval from the start of a counted pulse to the instant a succeeding pulse can attain a specified percentage of the maximum amplitude of the counted pulse. ★ temps de restitution → *temps 114.* R время восстановления. D Erholzeit. E tiempo de restitución. I tempo di ricupero. N hersteltijd. P czas regeneracji. S återhämtningstid. (391,881)

143. **recovery time** : for a given function and under specified conditions, the time needed by a relay to recover from an operate condition so that the following operating time is within a given percentage of the previous measuring time. ★ temps de récupération → *temps 101.* R время повторной готовности. D Wiederbereitschaftszeit. E tiempo de recuperación. I tempo di ricupero. N hersteltijd. P czas regeneracji. S återhämtningstid. (446)

144. **recovery time** : the time required for the control electrode of a multi-electrode tube to regain control after an interruption of anode current under stated conditions. ★ durée de désionisation → *durée 36.* R время восстановления. D Freiwerdezeit; Erholzeit. E tiempo de desionización. I durata di deionizzazione. N hersteltijd. P czas dejonizacji. S återhämtningstid. (531)

145. **recovery time** : the minimum time interval, after the initiation of a discharge resulting in a normal pulse, before the next discharge resulting in a normal pulse can be initiated. ★ temps de restitution → *temps 115.* R время восстановления. D Erholzeit. E tiempo de restitución. I tempo di ricupero. N hersteltijd (stralingstelbuizen). P czas restytucji. S återhämtningstid. (531)

146. **refreshment time** (*Syn.* updating time) : → *time 222*

147. **release time** : for a relay which is in the operate condition (final condition) the time interval between the instant a specified value of the input energizing quantity (characteristic quantity) is applied under specified conditions and the instant when the relay resets. *Notes. 1* — This term is used only when the relay has output circuits of the same type and no precision is required for contact time difference. *2* — Depending on the method of measurement, the disengaging time may be taken as the release time. ★ temps de relâchement → *temps 106.* R время возврата. D Rückfallzeit. E tiempo de desactivación. I tempo di rilascio. N afvaltijd. P czas zwalniania. S återgångstid. (446)

148. **repair time** : that part of active corrective maintenance time during which repair actions are performed on an item. ★ temps de réparation → *temps 107.* R продолжительность активного ремонта. D Instandhaltungsdauer. E tiempo de reparación. I tempo di riparazione. N reparatietijd. P czas naprawy. S reparationstid. (191)

149. **required time** : the time interval during which the user requires the item to be in a condition to perform a required function. ★ période requise → *période 29.* R требуемая продолжительность работоспособности. D geforderte Anwendungsdauer. E período requerido. I tempo richiesto. N vereiste beschikbaarheidsduur. P czas wymagany. S krävd tid. (191)

150. **reset time** : for an element with proportional and integral action (PI-action), the input variable of which is given a step-wise variation, the reset time is the time required for the output variable to reach twice the value of the variation that occurred immediately after the step was applied. ★ temps de dosage d'intégration → *temps 67.* R постоянная времени изодрома. D Nachstellzeit. E tiempo de acción integral. I tempo caratteristico dell'azione proporzionale più integrale. N integratietijd. P czas zdwojenia. S integrationstid; I-tid. (351)

151. **resetting time** (for a given function) : the time interval between the instant a specified change is made in the value of the input energizing quantity (the characteristic quantity for a measuring relay) which will cause the relay to return, and the instant it resets. ★ temps de retour → *temps 117.* R время возврата (для рассматриваемой функции). D Rückkehrzeit (bei einer gegebenen Funktion). E tiempo de reposición (para una función dada). I tempo di ripristino (per una data funzione); tempo di ritorno (per una data funzione). N hersteltijd. P ..... S återvändstid (för en given funktion). (446)

152. **resolving time** : the smallest time interval which must elapse between the occurrence of two consecutive pulses or ionizing events and still be recognized as separate pulses or events. ★ temps de résolution → *temps 112.* R время разрешения. D Auflösungszeit. E tiempo de resolución. I tempo di risoluzione. N scheidingstijd. P czas rozdzielczy. S upplösningstid. (391,881)

153. **resolving time correction** : → *correction 16*

154. **restart time** (in telecontrol) : the time taken for a telecontrol system to become fully operational after a loss of supply. ★ temps de redémarrage → *temps 104.* R время повторного пуска (в телемеханике). D Wiederanlaufzeit (beim Fernwirken). E tiempo de reposición (en telecontrol). I tempo di ripartenza (nel telecontrollo). N herstarttijd. P czas rozruchu poawaryjny. S återstart(nings)tid. (371)

155. **reverberation time** (*Syn.* RT (abbreviation)) : period of time taken for a specified decrease (usually 60 dB) in sound pressure level at a given frequency and point in an enclosed or partly enclosed space, after the sound signal from an acoustic source is interrupted. ★ durée de réverbération → *durée 66.* R время реверберации. (723)

156. **reverberation time** : of an enclosure, for a sound of a given frequency or frequency band, the time that would be required for the sound pressure level in the enclosure to decrease by 60 decibels, after the source has been stopped. ★ durée de réverbération → *durée 67.* R время реверберации. D Nachhallzeit. E tiempo de reverberación. I tempo di riverberazione. N nagalmtijd. P czas pogłosu. S efterklangstid. (801)

157. **reverse recovery time** : the time required for the current or voltage to recover to a specified value after instantaneous switching from a specified forward (on-state) current condition to a specified reverse bias condition. ★ temps de récupération inverse → *temps 103.* R время обратного восстановления. D Sperrverzögerungszeit. E tiempo de recuperación inversa. I tempo di ripristino in senso inverso. N hersteltijd in spertoestand. P czas odzyskania blokowania. S återhämtningstid (backriktning). (521)

158. **rise-time broadening** (*Syn.* leading-edge broadening) : → *broadening 2*

159. **scintillation decay time** : the time required for the rate of the emission of photons after a single excitation to fall to $1/e$ of its initial value (e= 2.718...). ★ temps de décroissance d'une scintillation → *temps 60.* R время высвечивания. D Abklingzeit der Szintillation. E tiempo de decaimiento de un centelleo. I tempo di decadimento di una scintillazione. N vervaltijd (v.e. scintillatie). P ..... S avklingningstid för scintillation. (391)

160. **scintillation fall time** : the time required for the rate of the emission of photons after a single excitation to decrease from 90% to 10% of its maximum value. ★ temps de descente d'une scintillation → *temps de descente 4.* R время спада сцинтилляции. D Abfallzeit der Szintillation. E tiempo de bajada de un centelleo. I tempo di discesa di una scintillazione. N daaltijd (v.e. scintillatie). P czas zanikania scyntylacji. S scintillationsfalltid. (391)

161. **selection time** : the interval of time between the reception by the calling party of the proceed-to-select signal and the end of reception by the exchange of the selection signals. ★ temps de

numérotation → *temps 86.* R время набора. D Wahlverzugszeit. E tiempo de numeración. I tempo di selezione. N kiestijd. P opóźnienie wybierania. S söktid. (721)

162. sensitive time (of a track chamber) : duration of the sensitive state suitable for ionization track formation in certain track chambers as Wilson chambers or bubble chambers. ★ temps de sensibilité → *temps 119.* R время чувствительности (трековой камеры). D empfindliche Zeit (einer Spurkammer). E tiempo de sensibilidad (de una cámara de traza). I tempo di sensibilità (di una camera a traccia). N gevoelige tijd (v.e. sporenvat). P okres czułości (komory śladowej). S känslig tid (för spårkammare). (391)

163. service time : the total accumulated time that a resource attends to a given demand. *Note.* — If the service time is uninterrupted, then it coincides with the holding time. ★ temps de service → *temps 120.* D Bedienungsdauer; Bediendauer. P czas usługi. (715)

164. setting-up time : the calling duration for a successful call attempt. ★ durée d'établissement → *durée 76.* R продолжительность установления соединения. D Aufbauzeit. E duración de establecimiento. I durata della chiamata a buon fine. N opbouwtijd van een geslaagde oproep. P czas ustanowienia połączenia. S uppkopplingstid. (722)

165. soaking time (of a heat treatment) : the duration of time at which the whole charge dwells at a uniform temperature to satisfy the heat treatment requirements. ★ temps d'égalisation → *temps 128.* R время выдержки при термообработке. D Haltezeit. E tiempo de uniformización (de un tratamiento térmico). I tempo di ugualizzazione (di un trattamento termico). N doorwarmtijd. P czas wygrzewania (w obróbce cieplnej). S hålltid. (841)

166. stabilization time : the time, measured from the initial application of power, required for a crystal controlled oscillator to stabilize its operation within specified limits. ★ temps de stabilisation → *temps 121.* R время установления частоты. D Einlaufdauer. E tiempo de estabilización. I tempo di stabilizzazione. N stabilisatietijd. P czas stabilizacji. S stabiliseringstid. (561)

167. standby time : the time interval during which an item is in a standby state. ★ période d'attente → *période 6.* R продолжительность нахождения в резерве. D Dauer des Bereitschaftszustands. E tiempo de espera (en reserva). I tempo di attesa. N duur van parate toestand. P czas gotowości. S tid i funktionsberedskap. (191)

168. start time (in telecontrol) : the time taken for a telecontrol system to become fully operational after switching-on. ★ temps de démarrage → *temps 62.* R время пуска (в телемеханике). D Anlaufzeit (beim Fernwirken). E tiempo de arranque (en telecontrol). I tempo di partenza (nel telecontrollo). N opstarttijd. P czas rozruchu. S starttid. (371)

169. starting time (of an arc discharge lamp) : the time required for an arc discharge lamp to develop an electrically stable arc discharge, the lamp being operated under specified conditions and the time being measured from the moment its circuit is energized. *Note.* — There is a time delay in the starting device between the time when power is applied to this device and the time when power is applied to the lamp electrodes. The starting time is measured from the latter moment. ★ temps d'amorçage → *temps 40.* R время зажигания (дуговой разрядной лампы). D Zündzeit (einer Entladungslampe). E tiempo de encendido. I tempo d'innesco. N ontsteektijd. P czas rozruchu. S starttid. (845)

170. synchronous time : the time indicated by a synchronous clock. ★ temps synchrone → *temps 157.* R синхронное время. D Synchronzeit. E tiempo síncrono. I tempo sincrono. N synchrone tijd. P czas synchroniczny. S synkrontid. (603)

171. telecontrol transfer time : the time duration from the input signal from the peripheral equipment to the telecontrol equipment at the sending station, to the output signal from the telecontrol equipment to its peripheral equipment at the receiving station. *Note.* — The telecontrol transfer time includes time delay for signal conversion, coding, etc..., in the telecontrol transmitter, signal delay on the transmission channel and time delay for reconversion, decoding, checking, etc..., in the telecontrol receiver. However it does not include the response time of peripheral input and output devices, such as interposing relays, signal lamps, transducers, indicating instruments, etc... ★ temps de transfert propre → *temps de transfert 3.* R время телепередачи. D Fernwirkübermittlungszeit. E tiempo de transferencia del telecontrol. I tempo di trasferimento del telecontrollo. N transmissietijd van de afstandsbesturing. P czas przesyłu własny. S systembetingad överföringstid. (371)

172. time acceleration factor : → *factor 174*

173. time average sound pressure level : → *average 18*

174. time base : → *base 26*

175. time base : → *base 27*

176. time base jitter : → *jitter 5*

177. time between failures : the time duration between two consecutive failures of a repaired item. ★ temps entre défaillances → *temps 138.* R продолжительность времени между отказами. D Ausfallabstand. E tiempo entre fallos. I tempo tra guasti. N duur tussen storingen. P czas między uszkodzeniami. S tid mellan fel. (191)

178. time between interruptions : the time duration between the end of one interruption and the beginning of the next. ★ temps entre interruptions → *temps 139.* R время между прерываниями. D Unterbrechungsabstand. E tiempo entre interrupciones. I tempo tra interruzioni. N tijd tussen onderbrekingen. P czas między przerwami. S tid mellan avbrott. (191)

179. time coefficient : → *coefficient 76*

180. time coherence : → *coherence 9*

181. time congestion : → *congestion 5*

182. time consistent busy hour : → *hour 9*

183. time discriminator : → *discriminator 13*

184. time distortion : → *distortion 66*

185. time divided control : → *control 192*

186. time division : → *division 10*

187. time division multiplex transmission : → *transmission 72*

188. time division multiplexing : → *multiplexing 6*

189. time division multiplexing : → *multiplexing 7*

190. time division switching : → *switching 71*

191. (time) duration : → *duration 43*

192. time interval : → *interval 20*

193. time interval analyzer : → *analyzer 7*

194. time interval error : → *error 59*

195. time t_E (for increased safety electrical apparatus) : the time taken for a.c. windings, when carrying the starting current I_A, to be heated up from the temperature reached in rated service and at maximum ambient temperature, to the limiting temperature. ★ durée t_E → *durée 101.* R время t_E (для электрооборудования с защитой вида "e"). D Zeit t_E. E tiempo t_E (para un material eléctrico con seguridad aumentada). I tempo t_E di riscaldamento (per costruzioni elettriche a sicurezza aumentata). N tijd t_E (van elektrisch materieel met verhoogde veiligheid). P czas nagrzewania t_E (dla urządzenia elektrycznego budowy wzmocnionej). S uppvärmningstid. (426)

196. time of persistence : the time that elapses between the instant of reduction or removal of the excitation and the instant at which the luminance reaches a stated fraction of its value at the instant of reduction or cessation of excitation. ★ durée de persistance → *durée 54.* R время послесвечения. D Nachleuchtdauer. E duración de persistencia. I durata di persistenza. N nalichttijd. P czas poświaty. S efterlysningstid. (531)

197. time resolution : → *resolution 9*

198. time response : → *response 24*

199. time selector : → *selector 21*

200. time sharing (*Syn.* time divided control) : → *control 192*

201. time sharing : → *sharing 5*

202. time slicing : → *slicing 2*

203. time tagging (*Syn.* absolute chronology) : → *chronology 1*

204. time to chopping : the time interval between the conventional beginning of the impulse and the instant when it is chopped. ★ durée jusqu'à la coupure → *durée 102.* R время среза импульса напряжения. D Dauer bis zum Abschneiden. E duración hasta el corte. I durata fino all'interruzione. N kaptijd. P czas do ucięcia udaru. S tid till stympning. (604)

205. time to crest (of a switching impulse) : the time interval between the actual origin of a switching impulse and the instant when the voltage has reached its maximum value. ★ durée jusqu'à la crête (d'une tension de choc de manœuvre) → *durée 103.* R длина фронта коммутационного импульса.

D Dauer bis zum Scheitel (einer Schaltstoßspannung). E duración hasta la cresta (de un impulso tipo maniobra). I durata fino alla cresta (di una tensione a impulso di manovra). N tijd tot de top. P czas trwania czoła udaru łączeniowego. S fronttid. (604)

206. time to failure : total time duration of operating time of an item, from the instant it is first put in an up state, until failure or, from the instant of restoration until next failure. ★ durée de fonctionnement avant défaillance → *durée 44.* R наработка до отказа. D Zeitspanne bis zum Ausfall. E tiempo hasta el fallo. I tempo al guasto. N tijd tot aan een storing. P czas do uszkodzenia. S tid till fel. (191)

207. time to first failure : total time duration of operating time of an item, from the instant it is first put in an up state, until failure. ★ durée de fonctionnement avant la première défaillance → *durée 45.* R наработка до первого отказа. D Zeitspanne bis zum ersten Ausfall. E tiempo hasta el primer fallo. I tempo al primo guasto. N tijd tot aan de eerste storing. P czas do pierwszego uszkodzenia. S tid till första fel. (191)

208. time to half value (of an impulse) : the time interval between the origin and the instant on the tail when the voltage has decreased to half of the peak value. ★ durée jusqu'à la mi-valeur (d'une tension de choc) → *durée 104.* R длительность импульса. D Rückenhalbwertdauer einer Stoßspannung. E duración hasta el valor mitad (de un impulso de tensión). I durata fino al semivalore (di una tensione a impulso). N halfwaardetijd (van een stootspanning). P czas do półszczytu udaru napięcia. S halvvärdestid. (604)

209. time to recovery (*Syn.* time to restoration) : → *time 210*

210. time to restoration (*Syn.* time to recovery) : the time interval during which an item is in a down state due to a failure. ★ temps de panne → *temps 87.* R время восстановления. D Zeitspanne bis zur Wiederherstellung. E tiempo de avería. I tempo al ripristino. N hersteltijd. P czas do odzyskania zdatności. S tid till återställning. (191)

211. time to stable closed condition : the time interval between the instant when a specified value of the input energizing quantity is applied and the instant when a contact is closed and fulfils specified requirements. ★ temps de fermeture stable → *temps 68.* R время устойчивого замыкания. D Ansprechzeit (für einen bestimmten Kontakt). E tiempo de cierre estable. I tempo di chiusura stabile. N tijd tot stabiele gesloten toestand. P czas do ustalonego stanu zamknięcia (styku). S tid till stabilt slutet läge. (446)

212. time to stable open condition : the time interval between the instant when a specified value of the input energizing quantity is applied and the instant when a contact is open and fulfils specified requirements. ★ temps d'ouverture stable → *temps 137.* R время устойчивого размыкания. D Rückfallzeit (für einen bestimmten Kontakt). E tiempo de apertura estable. I tempo d'apertura stabile. N tijd tot stabiele open toestand. P czas do ustalonego stanu otwarcia (styku). S tid till stabilt brutet läge. (446)

213. total clearing time (*Syn.* operating time) : → *time 123*

214. (total) conversion time : the time interval required to perform a complete conversion operation. ★ temps de conversion (total) → *temps 51.* R время преобразования. D (gesamte) Umsetzungszeit. E tiempo de conversión (total). I durata della conversione. N (totale) omzettijd. P czas przetwarzania (całkowity). S omvandlingstid. (303)

215. total starting time : the time interval between the start of application of heater or filament voltage and the instant at which a stated value of one of the following characteristics is obtained: frequency rate of drift of frequency output power anode current. . ★ durée totale de démarrage → *durée 127.* R общее время готовности. D Gesamteinlaufzeit. E tiempo total de arranque. I durata totale di avviamento. N totale aanlooptijd. P czas rozruchu całkowity. S total startningstid. (531)

216. transfer time (of a gas discharge) : the time interval from the establishment of a glow discharge passing a stated current between two given electrodes to the establishment of a glow discharge between one of these electrodes and a third electrode or between another pair of electrodes in the same tube. ★ durée de transfert → *durée 71.* R время переноса (разряда в газе). D Übernahmezeit (bei einer Gasentladung). E tiempo de transferencia (de una descarga en un gas). I durata di trasferimento (di una scarica in un gas). N overneemtijd (van een gasontlading). P ..... S kopplingstid. (531)

217. transfer time : the time that elapses between the initial offering of a unit of the users data to a network by transmitting data terminal equipment and the complete delivery of that unit to receiving data terminal equipment. ★ temps de transfert → *temps de transfert 2.* R время передачи. D Transferzeit. E tiempo de transferencia. I tempo di trasferimento. N overdrachttijd. P opóźnienie przesyłania. S överföringstid. (721)

218. triggered time base : → *base 29*

219. tube starting time : the period of time required for a stated parameter to attain a stated level under stated conditions. ★ durée de démarrage du tube → *durée 35.* R время готовности электронной лампы. D Röhreneinlaufzeit. E tiempo de arranque del tubo. I durata di avviamento del tubo. N buis-aanlooptijd. P czas rozruchu lampy. S startningstid för rör. (531)

220. undetected fault time : the time interval between failure and recognition of the resulting fault. ★ temps de panne latente → *temps 88.* R продолжительность необнаруженной неработоспособности. D Dauer eines unentdeckten Fehlzustands. E tiempo de no detección de una avería. I tempo di avaria non rivelata. N storingsherkenningstijd. P czas do stwierdzenia niezdatności. S felupptäcktstid. (191)

221. up time : the time interval during which an item is in an up state. ★ temps de disponibilité → *temps 65.* R продолжительность работоспособности. D Klardauer. E tiempo de disponibilidad. I tempo di disponibilità. N duur van beschikbare toestand. P czas zdatności. S klartid. (191)

222. updating time (*Syn.* refreshment time (in telecontrol)) : the time between a change of state in an outstation and its registration in the control centre or master station. *Note.* — In cyclic systems, the average updating time is equal to one half of the cycle time plus the overall response time. ★ temps de mise à jour → *temps 83.* R время обновления принимаемой информации (в телемеханике). D Aktualisierungszeit (beim Fernwirken). E tiempo de actualización (en telecontrol). I tempo di aggiornamento (nel telecontrollo). N verversingstijd. P czas odnowy. S uppdateringstid. (371)

223. utilization time : the quotient, expressed in hours, of the consumption within a specified period (e.g., year, month, day, etc.), and the maximum or other specified demand occurring within the same period. *Note.* — This term should not be used without specifying the demand and the period to which it relates. ★ durée d'utilisation → *durée 94.* R число часов использования. D Benutzungsdauer. E duración de utilización. I durata di utilizzazione. N bedrijfstijd van het maximum. P czas wykorzystania. S utnyttjningstid. (691)

224. utilization time of power losses : the quotient of energy losses and the peak value of the power losses within a specified period of time. ★ durée d'utilisation des pertes → *durée 97.* R продолжительность максимума потерь. D Verluststundenzahl. E tiempo de utilización de las pérdidas. I durata equivalente delle perdite. N bedrijfstijd van de vermogensverliezen. P czas trwania strat maksymalnych. S förlusternas utnyttjningstid. (603)

225. waiting time (*Syn.* queuing time) : in delay mode of operation, the duration of the time interval between the bid for a resource and the seizure or the abandonment of the bid. ★ délai d'attente → *délai 2.* D Wartezeit. P czas oczekiwania. (715)

226. warm-up time : the interval between the energising of the auxiliary circuit and the instant when the instrument may be used, specified in the manufacturer's instructions. ★ durée de préchauffage → *durée 57.* R время прогрева. D Anwärmzeit. E tiempo de precalentamiento. I tempo di regime; durata di preris-caldamento. N opwarmtijd. P czas nagrzewania wstępnego. S uppvärmningstid. (301)

227. weld cycle time : the time taken for the succession of operations carried out by the machine for the making of a weld and the return to the initial position. ★ durée de cycle de soudage → *durée 34.* R длительность цикла сварки. D Zeit für einen Schweißzyklus (Taktzeit). E duración del ciclo de soldadura. I durata del ciclo di saldatura. N lascyclusduur. P czas trwania cyklu zgrzewania. S svetscykeltid. (851)

228. X-ray tube exposure cycle time : the time elapsing between the start of two consecutive X-ray tube exposures in a series of regular ones. ★ période de charge → *période 7.* R длительность цикла периода включения рентгеновской трубки. D Belastungsperiode (einer Röntgenröhre). E tiempo del ciclo de exposición de un tubo de rayos X; período de exposición de un tubo de rayos X. I intervallo fra esposizioni cicliche di un tubo a raggi X. N periodeduur van de röntgenbuisbelasting. P cykl ekspozycji. S repeteringstid. (881)

time constant

1. **aperiodic time constant** : the time constant of an aperiodic component when it is practically exponential or of the exponential which envelops it when it shows an appreciable periodicity. ★ constante de temps apériodique → *constante de temps 3.* R постоянная времени апериодической составляющей. D aperiodische Zeitkonstante. E constante de tiempo aperiódica. I costante di tempo aperiodica. N tijdconstante van de aperiodieke component. P stała czasowa aperiodyczna. S aperiodisk tidkonstant. (411)
2. **derivative-action time constant** : for an element with pure derivative action, the derivative action time constant is equal to the derivative action coefficient if the input and output variables have the same dimensions. ★ constante de temps de dérivation → *constante de temps 4.* R постоянная времени воздействия по производной. D Differenzierzeit. E constante de tiempo de acción derivada. I tempo caratteristico dell'azione derivativa. N tijdconstante van de differentiërende werking. P stała czasowa różniczkowania. S ..... (351)
3. **direct-axis sub-transient open-circuit time constant** : the time required for the rapidly changing component present during the first few cycles of the open-circuit primary winding voltage which is due to direct-axis flux, following a sudden change in operating conditions, to decrease to 1/e, i.e. 0.368 of its initial value, the machine running at rated speed. ★ constante de temps subtransitoire longitudinale à circuit ouvert → *constante de temps 14.* R сверхпереходная постоянная времени по продольной оси при разомкнутой первичной обмотке. D Subtransient-Leerlauf-Zeitkonstante der Längsachse. E constante de tiempo subtransitoria longitudinal en circuito abierto. I costante di tempo subtransitoria diretta a circuito aperto. N aanvangstijdconstante van de langscomponent van de open-ketenspanning. P stała czasowa podprzejściowa podłużna biegu jałowego. S subtransient tidkonstant i längsled vid tomgång. (411)
4. **direct-axis sub-transient short-circuit time constant** : the time required for the rapidly changing component, present during the first few cycles in the direct-axis short-circuit primary current, following a sudden change in operating conditions, to decrease to 1/e, i.e. 0.368 its initial value, the machine running at rated speed. ★ constante de temps subtransitoire longitudinale en court-circuit → *constante de temps 15.* R сверхпереходная постоянная времени по продольной оси при замкнутой накоротко первичной обмотке. D Subtransient-Kurzschluß-Zeitkonstante der Längsachse. E constante de tiempo subtransitoria longitudinal en cortocircuito. I costante di tempo subtransitoria diretta in cortocircuito. N aanvangstijdconstante van de langscomponent van de kortsluitstroom. P stała czasowa podprzejściowa podłużna stanu zwarcia. S subtransient tidkonstant i längsled vid kortslutning. (411)
5. **direct-axis transient open-circuit time constant** : the time required for the slowly changing component of the open-circuit primary voltage, which is due to direct-axis flux, following a sudden change in operating conditions, to decrease to 1/e, i.e. 0.368 of its initial value, the machine running at rated speed. ★ constante de temps transitoire longitudinale à circuit ouvert → *constante de temps 18.* R переходная постоянная времени по продольной оси при разомкнутой первичной обмотке. D Transient-Leerlauf-Zeitkonstante der Längsachse. E constante de tiempo transitoria longitudinal en circuito abierto. I costante di tempo transitoria diretta a circuito aperto. N overgangstijdconstante van de langscomponent van de open-ketenspanning. P stała czasowa przejściowa podłużna biegu jałowego. S transient tidkonstant i längsled vid tomgång. (411)
6. **direct-axis transient short-circuit time constant** : the time required for the slowly changing component of direct-axis short-circuit primary current following a sudden change in operating conditions, to decrease to 1/e, i.e. 0.368 of its initial value, the machine running at rated speed. ★ constante de temps transitoire longitudinale en court-circuit → *constante de temps 19.* R переходная постоянная времени по продольной оси при замкнутой накоротко первичной обмотке. D Transient-Kurzschluß-Zeitkonstante der Längsachse. E constante de tiempo transitoria longitudinal en cortocircuito. I costante di tempo transitoria diretta in cortocircuito. N overgangstijdconstante van de langscomponent van de kortsluitstroom. P stała czasowa przejściowa podłużna stanu zwarcia. S transient tidkonstant i längsled vid kortslutning. (411)
7. **electrical charge time constant** (of a detector) : the time required, after the instantaneous application of a sinusoidal input voltage, at its designed input frequency, for the output voltage of a detector to reach (1-1/e) of its steady-state value. ★ constante de temps (électrique) à la charge → *constante de temps 9.* R электрическая постоянная времени заряда (детектора). D elektrische Aufladezeitkonstante (eines Bewertungskreises). E constante de tiempo (eléctrico) a la carga (de un detector). I costante di tempo (elettrica) di carica (di un rivelatore). N elektrische laadtijdconstante (van een detector). P stała czasowa ładowania (detektora). S uppladdningstidkonstant. (161)
8. **electrical discharge time constant** (of a detector) : the time required, after the instantaneous removal of a sinusoidal input voltage, for the output voltage of a detector to fall to 1/e of its initial value. ★ constante de temps (électrique) à la décharge → *constante de temps 10.* R электрическая постоянная времени разряда (детектора). D elektrische Entladezeitkonstante (eines Bewertungskreises). E constante de tiempo (eléctrico) a la descarga (de un detector). I costante di tempo (elettrica) di scarica (di un rivelatore). N elektrische ontlaadtijdconstante (van een detector). P stała czasowa rozładowania (detektora). S urladdningstidkonstant. (161)
9. **input time constant** : the difference between the total time constant and the residual time constant. ★ constante de temps d'entrée → *constante de temps 5.* R постоянная времени цепи управления. D Eingangszeitkonstante. E constante de tiempo de entrada. I costante di tempo d'ingresso. N ingangstijdconstante. P stała czasowa wejściowa. S ingångstidkonstant. (431)
10. **integral-action time constant** : for an element with integral action, the reciprocal of the integral action coefficient, if the input and output variables have the same dimensions. ★ constante de temps d'intégration → *constante de temps 6.* R постоянная времени интегрального воздействия. D Integrierzeit. E constante de tiempo de acción integral. I costante di tempo di integrazione. N tijdconstante van de integrerende werking. P czas zdwojenia; stała czasowa całkowania. S ..... (351)
11. **mechanical time constant** (of an indicating instrument) : the quotient of the period of free oscillation of an indicating measuring instrument by 2π. *Note.* — Free oscillation characterizes the movement that would occur in the absence of any damping. ★ constante de temps mécanique → *constante de temps 13.* R механическая постоянная времени (индикатора). D mechanische Zeitkonstante (eines Anzeigeinstrumentes). E constante de tiempo mecánico (de un aparato indicador). I costante di tempo meccanica (di una apparecchio indicatore). N mechanische tijdconstante. P stała czasowa mechaniczna (instrumentu wskazującego). S mekanisk tidkonstant. (161)
12. **quadrature-axis sub-transient open-circuit time constant** : the time required for the rapidly changing component of the open-circuit primary winding voltage which is due to quadrature-axis flux, following a sudden change in operating conditions, to decrease to 1/e, i.e. 0.368 of its initial value, the machine running at rated speed. ★ constante de temps subtransitoire transversale à circuit ouvert → *constante de temps 16.* R сверхпереходная постоянная времени по поперечной оси при разомкнутой первичной обмотке. D Subtransient-Leerlauf-Zeitkonstante der Querachse. E constante de tiempo subtransitoria transversal en circuito abierto. I costante di tempo subtransitoria trasversale a circuito aperto. N aanvangstijdconstante van de dwarscomponent van de open-ketenspanning. P stała czasowa podprzejściowa poprzeczna biegu jałowego. S subtransient tidkonstant i tvärled vid tomgång. (411)
13. **quadrature-axis sub-transient short-circuit time constant** : the time required for the rapidly changing component, present during the first few cycles in the quadrature-axis short-circuit primary winding current, following a sudden change in operating conditions, to decrease to 1/e, i.e. 0.368 of its initial value, the machine running at rated speed. ★ constante de temps subtransitoire transversale en court-circuit → *constante de temps 17.* R сверхпереходная постоянная времени по поперечной оси при замкнутой накоротко первичной обмотке. D Subtransient-Kurzschluß-Zeitkonstante der Querachse. E constante de tiempo subtransitoria transversal en

cortocircuito. I costante di tempo subtransitoria trasversale in cortocircuito. N aanvangstijdconstante van de dwarscomponent van de kortsluitstroom. P stała czasowa podprzejściowa poprzeczna stanu zwarcia. S subtransient tidkonstant i tvärled vid kortslutning. (411)

14. **quadrature-axis transient open-circuit time constant** : the time required for the slowly changing component of the open-circuit primary winding voltage which is due to quadrature-axis flux, following a sudden change in operating conditions, to decrease to 1/e, i.e. 0.368 of its initial value, the machine running at rated speed. ★ constante de temps transitoire transversale à circuit ouvert → *constante de temps 20.* R переходная постоянная времени по поперечной оси при разомкнутой первичной обмотке. D Transient-Leerlauf-Zeitkonstante der Querachse. E constante de tiempo transitoria transversal en circuito abierto. I costante di tempo transitoria trasversale a circuito aperto. N overgangstijdconstante van de dwarscomponent van de open-ketenspanning. P stała czasowa przejściowa poprzeczna biegu jałowego. S transient tidkonstant i tvärled vid tomgång. (411)

15. **quadrature-axis transient short-circuit time constant** : the time required for the slowly changing component of quadrature-axis short-circuit primary winding current, following a sudden change in operating conditions, to decrease to 1/e, i.e. 0.368 of its initial value, the machine running at rated speed. ★ constante de temps transitoire transversale en court-circuit → *constante de temps 21.* R переходная постоянная времени по поперечной оси при замкнутой накоротко первичной обмотке. D Transient-Kurzschluß-Zeitkonstante der Querachse. E constante de tiempo transitoria transversal en cortocircuito. I costante di tempo transitoria trasversale in cortocircuito. N overgangstijdconstante van de dwarscomponent van de kortsluitstroom. P stała czasowa przejściowa poprzeczna stanu zwarcia. S transient tidkonstant i tvärled vid kortslutning. (411)

16. **reactor time constant** (*Syn.* reactor period) : the time required for the neutron flux density in a reactor to change by a factor of e (2.718 ...) when the flux density is rising or falling exponentially. *Note.* — the term "Reactor time constant" is preferred to "Re actor period". ★ constante de temps d'un réacteur → *constante de temps 8.* D Reaktorzeitkonstante; Reaktorperiode. E constante de tiempo de un reactor; periodo de un reactor. I costante di tempo di un reattore; periodo di un reattore. N tijdconstante van een reactor. P stała czasowa reaktora; okres reaktora. S reaktortidkonstant. (026)

17. **residual time constant** : the time constant of the response of an output quantity of a transductor to a sudden small change of the control current at specified load and operating conditions. ★ constante de temps interne de sortie → *constante de temps 12.* R добавочная постоянная времени. D Eigenzeitkonstante. E constante de tiempo interna de salida. I costante di tempo residua. N inwendige tijdconstante. P stała czasowa szczątkowa; stała czasowa wyjściowa. S resttidkonstant; gränstidkonstant. (431)

18. **short-circuit time constant of primary windings** : the time required for the d.c. component present in the short-circuit primary winding current, following a sudden change in operating conditions, to decrease to 1/e, i.e. 0.368 of its initial value, the machine running at rated speed. ★ constante de temps du courant de court-circuit → *constante de temps 7.* R постоянная времени замкнутой накоротко первичной обмотки. D Gleichstrom-Zeitkonstante der Wechselstromwicklung. E constante de tiempo de corriente de cortocircuito. I costante di tempo della corrente di cortocircuito. N tijdconstante van de gelijkstroomcomponent van de kortsluitstroom. P stała czasowa aperiodyczna. S tidkonstant för kortsluten primärlindning. (411)

19. **time constant** : time required for the amplitude of that component of a field quantity which decays exponentially with time to change by the factor 1/e=0.3679. ★ constante de temps → *constante de temps 1.* R постоянная времени. D Zeitkonstante. E constante de tiempo. I costante di tempo. N tijdconstante. P stała czasowa. S tidskonstant. (801)

20. **time constant** (of a detector whose output varies exponentially with time) : time required for the detector output to vary, after a step variation from a steady input to another steady input, from its initial value by the fraction (1-1/e) of its final change. ★ constante de temps → *constante de temps 2.* R постоянная времени (приёмника, у которого величина на выходе изменяется со временем по экспоненциальному закону). D Zeitkonstante (eines Empfängers, dessen Ausgangsgröße sich exponentiell mit der Zeit ändert). E constante de tiempo. I costante di tempo. N tijdconstante. P stała czasowa. S tidkonstant. (845)

21. **time constant range** : → *range 70*

22. **total time constant** : the time constant of the response of an output quantity of a transductor to a sudden small change of the control voltage at specified load and operating conditions. ★ constante de temps globale → *constante de temps 11.* R суммарная постоянная времени. D Gesamtzeitkonstante. E constante de tiempo global. I costante di tempo globale. N totale tijdconstante. P stała czasowa ogólna. S total tidkonstant. (431)

time-average

1. **time average sound pressure level** : → *average 18*
2. **time-average sound level** : → *level 99*

time-current

1. **time-current characteristic** : → *characteristic 90*
2. **time-current zone** : → *zone 15*
3. **time-current zone limits** : → *limit 20*

timed

1. **discretely timed signal** : → *signal 74*

time-delay

1. **cycle of operation of a thermal time-delay switch** : → *cycle 7*
2. **definite time-delay over-current release** : → *release 4*
3. **inverse time-delay over-current release** : → *release 12*
4. **temperature compensated thermal time-delay switch** : → *switch 53*
5. **thermal time-delay switch** : → *switch 54*
6. **time-delay contactor relay** : → *contactor 16*
7. **variable thermal time-delay switch** : → *switch 62*

time-of-day

1. **seasonal time-of-day tariff** : → *tariff 36*
2. **three-rate time-of-day tariff** : → *tariff 44*
3. **time-of-day tariff** : → *tariff 45*
4. **two-rate time-of-day tariff** : → *tariff 48*

time-of-flight

1. **time-of-flight** (of a particle) : time taken by a particle to move between two specified points. ★ temps de vol → *temps 126.* R время пролета (частицы). D Flugzeit (eines Teilchens). E tiempo de vuelo (de una partícula). I tempo di volo (di una particella). N looptijd (v.e. deeltje). P czas przelotu (cząstki). S löptid. (391)
2. **time-of-flight analyzer** : → *analyzer 8*
3. **time-of-flight neutron spectrometer** : → *spectrometer 11*

time-programme

1. **time programme** : for a specified-time relay, an intended sequence of output circuit operations (making and/or breaking) with respect to time. ★ programme de temporisation → *programme 17.* R программа выдержек времени. D Zeitprogramm. E programa de temporización. I programma di temporizzazione. N tijdprogramma. P program sekwencyjny czasowy. S tidprogram. (446)
2. **time-programme** : a plan which prescribes the actions on a system as a function of time only. ★ programme temporel → *programme 25.* R временная программа. D Zeitplan. E programa temporal. I programma (temporale). N programma. P program czasowy. S tidsprogram. (351)

time-scale

1. **cyclic time-scale** : a time-scale consisting of a periodic repetition of cycles each of which is a succession of time intervals. *Note.* — The individual time intervals comprising a single cycle need not all have the same duration, but, ideally, all the cycles are identical. ★ trame temporelle cyclique → *trame 27.* R циклическая шкала времени. D zyklischer Zeitmaßstab. E trama temporal cíclica; escala cíclica de tiempo. I sequenza; trama temporale ciclica. N periodieke tijdschaal. P podziałka czasowa cykliczna. S cyklisk tidskala. (702,704,721)
2. **time-scale** : a succession of contiguous predetermined time intervals. *Note.* — The time intervals in a time-scale need not all

have the same duration. ★ trame temporelle → *trame 26.* R шкала времени. D Zeitmaßstab. E trama temporal; escala de tiempo. I sequenza; trama temporale. N tijdschaal. P podziałka czasowa. S tidskala. (702,704,721)

time-slot

1. **channel time-slot** : a time-slot occupying a specific position in a frame and permanently allocated to a particular time-derived channel. *Notes. 1* — A channel time-slot may be qualified by its usage, for example, telephone channel time-slot. *2* — In digital TDM systems, a channel time-slot, in addition to its main functions, may also be used for in-slot signalling or for transmitting other information. ★ créneau temporel de voie → *créneau 4.* R канальный интервал; канальный временной интервал. D Kanalzeitschlitz. E pista temporal de vía. I intervallo di tempo di canale. N tijdslot van een kanaal. P szczelina (czasowa) kanałowa. S kanallucka. (704)
2. **digit time-slot** : a time-slot allocated to a signal element of a digital signal. ★ créneau temporel élémentaire → *créneau 5.* R цифровой временной интервал. D digitaler Zeitschlitz. E intervalo de tiempo elemental; intervalo de tiempo por elemento numérico. I intervallo di tempo elementare. N cijfer-tijdslot; tijdslot voor een cijfer. P szczelina czasowa elementu sygnału czasowego. S signalelementlucka. (704)
3. **frame alignment time-slot** : a time-slot, occupying the same relative position in every frame, used to transmit the frame alignment signal. *Notes. 1* — The frame alignment time-slot may be used permanently or periodically for transmitting the frame alignment signal ; when it is not occupied by this signal, it may be used foor the transmission of other information. *2* — In digital TDM systems, the frame alignment time-slot consists of one or more digit time-slots. ★ créneau temporel de verrouillage de trame → *créneau 3.* R интервал циклового синхросигнала. D Rastergleichlaufzeitschlitz. E marco temporal de cerramiento de trama. I intervallo di tempo del segnale di allineamento trama. N ..... P szczelina (czasowa) sygnału fazowania ramki. S ramlåsningslucka. (704)
4. **justifiable digit time-slot** (*Syn.* stuffable digit time-slot) : a digit time-slot provided at regular time intervals for justification of a digital signal. ★ créneau temporel (élémentaire) justifiable → *créneau 6.* R тактовый интервал цифрового выравнивания. D digitaler Justierungszeitschlitz; füllbarer digitaler Zeitschlitz. E intervalo temporal (elemental) justificable. I intervallo di tempo elementare giustificabile. N justeerbaar cijfertijdslot. P szczelina czasowa dopełnieniowa. S tidslucka för taktanpassning. (704)
5. **signalling time-slot** : a time-slot occupying a specific position in a frame and permanently allocated for the transmission of signalling. ★ créneau temporel de signalisation → *créneau 2.* R временной интервал сигнализации. D Signalzeitschlitz. E pista temporal de señalización. I intervallo di tempo di segnalazione. N tijdslot voor signalering. P szczelina (czasowa) sygnalizacji. S signaleringslucka. (704)
6. **stuffable digit time-slot** (*Syn.* justifiable digit time-slot) : → *time-slot 4*
7. **time-slot** (*Syn.* TS (abbreviation)) : any cyclic time interval that can be recognized and defined uniquely. *Note.* — In French, the expression "intervalle de temps", which is equivalent to the English term "time interval", is deprecated when used to convey the concept of "time-slot". ★ créneau temporel → *créneau 1.* R временной интервал. D Zeitschlitz; ZS (Abkürzung). E intervalo de tiempos; pista de tiempos. I intervallo di tempo; IT (abbreviazione). N tijdslot; TS (verkorting). P szczelina czasowa. S tidslucka. (704)
8. **time-slot interchange** : → *interchange 1*

time-to-amplitude

1. **time-to-amplitude converter** : → *converter 19*

time-to-track

1. **time-to-track** : the time in a tracking test until tracking reaches a specified end-point criterion. ★ temps d'initiation du cheminement → *temps 135.* R время трекингообразования. D Zeit bis zur Kriechwegbildung. E tiempo de iniciación de caminos conductores. I tempo di formazione di traccia. N tijd voor kruipspoorvorming. P czas wytworzenia ścieżek pełznych. S ..... (212)

timing

1. **cyclic timing signal** : → *signal 65*
2. **timing information** : → *information 33*
3. **timing recovery** : → *recovery 17*
4. **timing signal** : → *signal 241*

tinned

1. **tinned conductor** : → *conductor 72*

tinsel

1. **tinsel conductor** : → *conductor 73*

tip

1. **cathode tip angle** : → *angle 15*
2. **contact tip** (*Syn.* contact point (see Figure 446-3)) : that part of a contact member at which the contact circuit closes or opens. ★ pièce de contact → *pièce 3.* R контакт-деталь. D Kontaktstück. E cabeza de contacto. I parte di contatto. N contactpunt. P styczka. S kontaktelement. (446)
3. **electrode tip** : the electrode part which is nearest to the adjacent electrode or charge. ★ pointe d'électrode → *pointe 15.* R конец электрода. D Elektrodenspitze. E punta de electrodo. I punte di elettrodo. N elektrode-eind. P kieł elektrody. S elektrodspets. (841)
4. **pole tips** : the extremities of the pole shoe in the circumferential direction. ★ cornes polaires → *corne 4.* R кромки полюсного наконечника. D Polhörner. E extremidades polares. I corna polari. N poolpunt. P krańce nabiegunnika. S polspets. (411)
5. **pole tips** : those parts of the magnetic circuit of the video heads which protrude from the head wheel and make contact with the tape; each head has two pole pieces separated by the gap. ★ pièces polaires → *pièce 11.* R полюсные наконечники. D Kopfspiegel; Polschuhspitzen. E piezas polares. I espansioni polari. N tips. P nabiegunniki. S polskor. (806)
6. **tip** (*Syn.* pip) : a small protuberance of the envelope resulting from the sealing of the envelope during pumping. ★ queusot → *queusot 1.* R отпай. D Pumpspitze. E punta. I codetta. N afsmeltpunt. P koniuszek (bańki). S pumprörsspets. (531)
7. **tip engagement** : → *engagement 3*
8. **tip projection** : → *projection 11*

tissue

1. **Japanese tissue paper** : → *paper 7*
2. **tissue activity meter** : → *meter 64*
3. **tissue equivalent ionization chamber** : → *ionization chamber 21*
4. **tissue equivalent material** : → *material 40*

TM

1. **TM mode** (*Syn.* transverse magnetic mode) : → *mode 92*

toggle

1. **position of a toggle switch** : → *position 24*
2. **toggle switch** : → *switch 57*

tolerance

1. **adjustment tolerance** (of a piezoelectric resonator) : the maximum permissible deviation of the working frequency of a piezoelectric resonator from its nominal frequency at the reference temperature under specified conditions. ★ tolérance de calage → *tolérance 4.* R допуск на точность настройки (пьезоэлектрического резонатора). D Abgleichtoleranz (eines piezoelektrischen Resonators). E tolerancia de ajuste (de un resonador piezoeléctrico). I tolleranza di aggiustaggio (di un risuonatore piezoelettrico). N insteltolerantie. P tolerancja wykonania (rezonatora piezoelektrycznego). S justertolerans. (561)
2. **capacitance tolerance (of a capacitor)** : the permissible difference between the actual capacitance and the rated capacitance under specified conditions. ★ tolérance de capacité (d'un condensateur) → *tolérance 5.* R допускаемое отклонение емкости (конденсатора). D Kapazitätstoleranz (eines Kondensators). E tolerancia de capacidad (de un condensador). I tolleranza sulla capacità (di un condensatore). N tolerantie in capaciteit. P tolerancja pojemności. S kapacitanstolerans. (436)
3. **cladding diameter tolerance** : the maximum permitted deviation from the nominal values of the cladding diameter. ★ tolérance sur le diamètre de la gaine → *tolérance 11.* R допустимое отклонение диаметра оболочки.

D Manteldurchmesser-Toleranz. E tolerancia del diámetro del revestimiento. I tolleranza sul diametro del mantello. N tolerantie van de manteldiameter. P tolerancja średnicy płaszcza. S manteldiametertolerans. (731)

4. **cladding tolerance field** : → *field 1*
5. **core diameter tolerance** : the maximum permitted deviation from the nominal values of the core diameter. ★ tolérance sur le diamètre du cœur → *tolérance 13.* R допустимое отклонение диаметра сердцевины. D Kerndurchmesser-Toleranz. E tolerancia del diámetro del núcleo. I tollerenza sul diametro del nucleo. N tolerantie van de kerndiameter. P tolerancja średnicy rdzenia. S kärndiametertolerans. (731)
6. **core tolerance field** : → *field 3*
7. **fault tolerance** : the attribute of an item that makes it able to perform a required function in the presence of certain given sub-item faults. ★ tolérant aux pannes → *tolérant 1.* R устойчивость к неисправности. D Fehlertoleranz. E tolerancia a las averías. I tolleranza all'avaria. N bestendigheid tegen defecten. P niezdatność dopuszczalna. S feltolerans. (191)
8. **frequency tolerance** (of a crystal controlled oscillator) : the maximum permissible deviation of the oscillator frequency from a specified nominal value when operating under specified conditions. ★ tolérance de fréquence → *tolérance 6.* R допуск по частоте (кварцевого генератора). D Frequenztoleranz (eines Quarz-Oszillators). E tolerancia de frecuencia (de un oscilador controlado por resonador de cuarzo). I tolleranza di frequenza (di un oscillatore pilotato de risuonatore a quarzo). N frequentietolerantie. P tolerancja częstotliwości (generatora). S frekvenstolerans. (561)
9. **frequency tolerance (due to ageing)** (of a piezoelectric resonator) : the maximum permissible deviation of the working frequency of a piezoelectric resonator from its initial frequency which is observed with the passage of time under specified conditions. ★ tolérance de fréquence (due au vieillissement) → *tolérance 8.* R допуск по частоте (на старение) (пьезоэлектрического резонатора). D Alterungsfrequenztoleranz (eines piezoelektrischen Resonators). E tolerancia de frecuencia (debida al envejecimiento) (de un resonador piezoeléctrico). I tolleranza di frequenza (dovuta all'invecchiamento) (di un risuonatore piezoelettrico). N frequentietolerantie (als gevolg van veroudering). P tolerancja częstotliwości (rezonatora piezoelektrycznego starzeniowa). S åldringstolerans. (561)
10. **frequency tolerance (due to variations in level of drive)** (of a piezoelectric resonator) : the maximum permissible deviation in the working frequency of a piezoelectric resonator resulting from specified variations in level of drive. ★ tolérance de fréquence (en présence de variations du niveau d'excitation) → *tolérance 9.* R допуск по частоте (при изменениях уровня возбуждения) (пьезоэлектрического резонатора). D zulässige Lastabhängigkeit der Frequenz (eines piezoelektrischen Resonators). E tolerancia de frecuencia (en presencia de variaciones del nivel de excitación) (de un resonador piezoeléctrico). I tolleranza di frequenza (in presenza di variazioni del livello di eccitazione) (di un risuonatore piezoelettrico). N frequentietolerantie (als gevolg van het vermogen). P tolerancja częstotliwości (rezonatora piezoelektrycznego przy zmianach poziomu wzbudzenia). S drivnivåberoende frekvenstolerans. (561)
11. **frequency tolerance (over a temperature range)** (of a piezoelectric resonator) : the maximum permissible deviation of the working frequency of a piezoelectric resonator within a specified temperature range from its working frequency at the reference temperature. ★ tolérance de fréquence (dans un intervalle de températures) → *tolérance 7.* R допуск по частоте (в интервале температур) (пьезоэлектрического резонатора). D zulässiger Temperaturgang der Frequenz (eines piezoelektrischen Resonators). E tolerancia de frecuencia (en un intervalo de temperatura) (de un resonador piezoeléctrico). I tolleranza di frequenza (in un intervallo di temperatura) (di un oscillatore piezoelettrico). N frequentietolerantie (over een temperatuurgebied). P tolerancja częstotliwości (rezonatora piezoelektrycznego w zakresie temperatury). S temperaturberoende frekvenstolerans. (561)
12. **overall frequency tolerance** (of a piezoelectric resonator) : the maximum permissible deviation of the working frequency of a piezoelectric resonator from its nominal frequency, for any cause. ★ tolérance totale de fréquence → *tolérance 14.* R общий допуск по частоте (пьезоэлектрического резонатора). D Gesamtfrequenztoleranz (eines piezoelektrischen Resonators). E tolerancia total de frecuencia (de un resonador piezoeléctrico). I tolleranza totale di frequenza (di un risuonatore piezoelettrico). N totale frequentietolerantie. P tolerancja częstotliwości (rezonatora piezoelektrycznego całkowita). S total frekvenstolerans. (561)
13. **reference surface diameter tolerance** : the maximum permitted deviation from the nominal values of the reference surface diameter. ★ tolérance sur le diamètre de la surface de référence → *tolérance 12.* R допустимое отклонение диаметра опорной поверхности. D Bezugsoberflächendurchmesser-Toleranz. E tolerancia del diámetro de la superficie de referencia. I tolleranza sul diametro della superficie di riferimento. N tolerantie van de referentie-oppervlakdiameter. P tolerancja średnicy powierzchni odniesienia. S referensytas diametertolerans. (731)
14. **reference surface tolerance field** : → *field 55*
15. **tolerance of setting** (of a thermostatic switch) : the tolerance of the value to which the operating temperature of a thermostatic switch can be adjusted to meet the required temperature setting. This is expressed in degrees of temperature. ★ tolérance de réglage → *tolérance 10.* R допуск на установку температуры срабатывания (термостатический выключатель). D Einstellgenauigkeit (eines Thermoschalters). E tolerancia de regularización (de un contactor termostático). I tolleranza di regolazione di un interruttore termostatico. N insteltolerantie. P tolerancja nastawienia (łącznika termostatowego). S inställningstolerans (hos termostatströmställare). (581)

toll

1. **toll television** (*Syn.* pay television) : → *television 22*

tomography

1. **computed tomography** (*Syn.* CT (abbreviation)) : tomography by a technique that involves the recording and storage of information about the attenuation of narrow beams of radiation transmitted through the predetermined layer, and the reconstruction by computer of an image of that layer. ★ tomographie par ordinateur → *tomographie 2.* R томография с применением ЭВМ. D Computertomographie. E tomografía por ordenador. I tomografia computerizzata; TC (abbreviazone). N computertomografie. P tomografia komputerowa. S datortomografi. (881)
2. **tomography** : a technique of making radiographs of predetermined layers within objects, the sharp image of the chosen layer and the blurred images of other layers being produced by coordinated motion of any two of : X-ray tube, object, film. ★ tomographie → *tomographie 1.* R томография. D Tomographie. E tomografía. I tomografia; stratigrafia. N tomografie. P tomografia. S tomografi. (881)

tone

1. **busy tone** (*Syn.* line-busy tone (USA)) : a tone which indicates that the called number is busy. ★ tonalité d'occupation → *tonalité 21.* R зуммерный сигнал занятости. D Besetztton. E tono de ocupación. I tono di occupato. N bezettoon. P sygnał tonowy zajętości. S upptagetton. (714)
2. **call-waiting tone** : a tone which indicates to a user already engaged on a call that another user is attempting to call his/her number. ★ tonalité d'indication d'appel en instance → *tonalité 17.* R сигнал ожидающего вызова. D Anklopfen. E tono de llamada en espera. I tono di annuncio chiamata in attesa. N gespreksaankondigingstoon. P sygnał tonowy oczekiwania. S samtal-väntarton. (714)
3. **channel-busy tone** (*Syn.* congestion tone) : → *tone 11*
4. **class-of-service tone** : a tone which indicates to an operator that a certain class-of-service is applicable to the calling party. ★ tonalité de classe de service → *tonalité 6.* R тональный сигнал категории обслуживания. D Hinweiston (Benutzerklasse). E tono de clase de servicio. I tono di classe di servizio. N ..... P sygnał tonowy kategorii. S kategoriton. (714)
5. **coin tone** (*Syn.* coinbox discriminating tone) : → *tone 6*
6. **coinbox discriminating tone** (*Syn.* coin tone (USA)) : a tone which indicates to an operator that the call has originated from a public coinbox. ★ tonalité de discrimination des postes à encaissement → *tonalité 8.* R сигнал различения монетного телефона-автомата.

D Muenztelefon-Unterscheidungston. E tono de discriminación de (equipos) terminales de monedas. I tono di caratterizzazione apparecchio speciale a moneta. N ..... P sygnał tonowy aparatu wrzutowego. S myntapparatton. (714)

7. **coinbox identification tone** : a tone which indicates to an operator that the call is being made to a coinbox. ★ tonalité d'identification de poste à encaissement → *tonalité 16.* R сигнал опознавания монетного телефона-автомата. D Muenztelefon-Identifizierungston. E tono de identificación de equipo terminal de monedas. I tono d'identificazione della moneta. N ..... P sygnał tonowy identyfikacji aparatu wrzutowego. S ..... (714)
8. **coin-denomination tone** (*Syn.* coin-value tone) : → *tone 9*
9. **coin-value tone** (*Syn.* coin-denomination tone (USA)) : a tone which indicates to an operator the value of the coin inserted in a coinbox. ★ tonalité de discrimination de monnaie → *tonalité 7.* R сигнал различения достоинства монеты. D Hinweiston (Muenzwert). E tono de discriminación de monedas. I tono di caratterizzazione chiamate verso apparecchi a moneta. N ..... P sygnał tonowy wartości monety. S myntvärdeston. (714)
10. **combination tone** (*Syn.* combination frequency) : → *frequency 20*
11. **congestion tone** (*Syn.* channel-busy tone (USA)) : a tone which indicates that the called number cannot be reached because of congestion within the network. *Note.* — In some systems, busy tone may be used for this purpose. ★ tonalité d'encombrement → *tonalité 13.* R тональный сигнал перегрузки. D Gassenbesetzt-Ton. E tono de congestión. I tono di congestione. N congestietoon. P sygnał tonowy natłoku. S spärrton. (714)
12. **counterweight of a tone arm** : → *counterweight 1*
13. **dial tone** : a tone which indicates that the exchange is ready to receive the address information from the calling party. ★ tonalité d'invitation à numéroter → *tonalité 20.* R сигнал ответа станции. D Hoerton. E tono de numeración. I tono di centrale. N kiestoon. P sygnał tonowy zgłoszenia. S kopplingston. (714)
14. **dial tone delay** : → *delay 14*
15. **fundamental tone** (*Syn.* fundamental) : sinusoidal component of a periodic sound having the same frequency as the periodic wave. ★ son fondamental → *son 17.* R основной тон. D Grundton. E tono fundamental. I fondamentale. N grondtoon. P ton podstawowy. S grundton. (801)
16. **half tone picture** : → *picture 6*
17. **information tone** : a tone preceding a recorded announcement on a national call. ★ tonalité d'information → *tonalité 18.* R информационный сигнал. D Hinweiston (Information). E tono de información. I tono di informazione. N informatietoon. P sygnał tonowy zapowiedzi nagrywania. S ..... (714)
18. **intrusion tone** : an intermittent tone which indicates to both parties in a call that a third party has intruded into the communication. ★ tonalité d'intrusion → *tonalité 19.* R сигнал вмешательства. D Aufschalteton. E tono de intrusión; tono de entrada en línea. I tono di inclusione. N tikker; opschakeltoon. P sygnał tonowy ostrzegawczy. S inbrytningssignal. (714)
19. **line-busy tone** (*Syn.* busy tone) : → *tone 1*
20. **number-unobtainable tone** (*Syn.* vacant-code tone (USA)) : a tone which indicates that the calling party has dialled a number which has not been allocated or which is barred to him. ★ tonalité de numéro non accessible → *tonalité 9.* R сигнал недоступности номера. D Hinweiston (falsche Rufnummer). E tono de número no accesible. I tono di numero non ottenibile. N informatietoon. P sygnał tonowy nieosiągalności. S hänvisningston. (714)
21. **partial tone reversal** : → *reversal 1*
22. **pay tone** : a tone which indicates to the user of a pay-on-answer coinbox that the called party has answered and that money should now be inserted in the coinbox. ★ tonalité d'encaissement → *tonalité 12.* R сигнал оплаты. D Zaehlton. E tono de pago. I tono di invito a inserire monete. N ..... P sygnał tonowy zaliczania. S betalton. (714)
23. **pure tone** (*Syn.* pure sound) : → *sound 16*
24. **pure tone audiogram** : → *audiogram 3*
25. **recorder-warning tone** (*Syn.* recording tone) : → *tone 26*
26. **recording tone** (*Syn.* recorder-warning tone) : an intermittent tone which indicates to both parties in a call that the conversation is being recorded. ★ tonalité d'enregistrement → *tonalité 14.* R тональный сигнал записи разговора. D Aufzeichnungston. E tono de registro. I tono di avviso registratore inserito. N ..... P sygnał tonowy nagrywania. S registreringston. (714)
27. **ringback tone** (*Syn.* ringing tone) : → *tone 28*
28. **ringing tone** (*Syn.* ringback tone (USA)) : a tone which indicates that a call arrival signal is being applied to the called network terminal. ★ tonalité de retour d'appel → *tonalité 10.* R зуммерный сигнал контроля посылки вызова. D Freiton. E tono de envío de llamada. I tono di controllo chiamata. N vrijtoon. P sygnał tonowy zwrotny wywołania. S rington. (714)
29. **SI tone** (*Syn.* special information tone) : → *tone 32*
30. **special coinbox discriminating tone** : a tone which indicates to an operator that the call has originated from a customer's coinbox. ★ tonalité spéciale de discrimination des postes à encaissement → *tonalité 22.* R специальный сигнал различения монетного телефона-автомата. D besonderer Muenztelefon-Unterscheidungston. E tono especial de discriminación de (equipos) terminales de monedas. I tono di identificazione della moneta. N ..... P sygnał tonowy aparatu wrzutowego specjalnego. S ..... (714)
31. **special dial tone** : an audibly distinct form of dial tone which has the subsidiary function of reminding the calling party that some form of supplementary service is in operation, e.g. a service which prevents the line and number being used for receiving incoming calls. ★ tonalité spéciale d'invitation à numéroter → *tonalité 24.* R специальный сигнал ответа станции. D Sonderwaehlton. E tono especial de numeración. I tono speciale di centrale. N speciale kiestoon. P sygnał tonowy specjalny. S speciell kopplingston. (714)
32. **special information tone** (*Syn.* SI tone) : a tone, preceding an announcement on an incoming international call, which invites the caller to refer to an operator in the country from which he is calling if he has difficulty in understanding the announcement. ★ tonalité spéciale d'information → *tonalité 23.* R специальный информационный сигнал. D besonderer Hinweiston. E tono especial de información. I tono speciale di informazione. N informatietoon. P sygnał tonowy (specjalny) przyłączenia telefonistki. S ..... (714)
33. **supervisory tone** : a tone which indicates that a particular state in a call has been reached, and which may signify that an appropriate action should now be taken. ★ tonalité de supervision → *tonalité 11.* R контрольный тональный сигнал. D Hinweiston. E tono de supervisión. I toni di supervisione. N voortgangstoon; signaleringstoon. P sygnał tonowy nadzoru. S övervakningston. (714)
34. **switching tone** : a tone which indicates that a required special function has been successfully performed. ★ tonalité d'accusé de réception → *tonalité 5.* R подключаемый тональный сигнал. D Quittungston. E tono de acuse de recepción. I tono di conferma. N ..... P sygnał tonowy potwierdzenia odbioru. S ..... (714)
35. **tempered whole tone** (*Syn.* whole step) : logarithmic frequency interval between two sounds whose fundamental-frequency ratio is the sixth root of two. *Notes. 1* — One octave is equal to 6 tempered whole tones. *2* — The tempered whole tone is used as a unit of logarithmic frequency interval. ★ ton tempéré → *ton 1.* R темперированный полный тон, полный маг. D temperierter Ganzton; Ganztonschritt. E tono templado. I tono temperato. N hele toon (in de evenredig zwevende stemming). P ton cały temperowany. S tempererad delton. (801)
36. **tone** (in signalling) : an audible signal transmitted over the telecommunication network for signalling purposes. ★ tonalité → *tonalité 3.* R тональный сигнал (в сигнализации). D Ton (bei Zeichengabe). E tono (en señalización). I tono. N signaleringstoon. P sygnał tonowy (w sygnalizacji). S ton. (714)
37. **tone arm** (*Syn.* pick-up arm) : → *arm 11*
38. **tone control aperture** : → *aperture 19*
39. **tone ringer** : → *ringer 4*
40. **tone wedge** : → *wedge 4*
41. **vacant-code tone** (*Syn.* number-unobtainable tone) : → *tone 20*
42. **warble tone** : sound whose frequency varies periodically about a mean value. ★ son ululé → *son 19.* R воющий тон.

D Wobbelton. E sonido ululado. I suono ululato. N wobbeltoon; janktoon. P dźwięk wibrujący; ton wibrujący. S svajton. (801)

tone-corrected

1. **tone-corrected perceived noise level** : → *level 100*

tongue

1. **clevis and tongue coupling** : → *coupling 5*

tonne

1. **gross charge per tonne** : → *charge 33*

tool

1. **crimping tool** : a mechanical device used to make a crimp. ★ outil de sertissage → *outil 4.* R инструмент обжимной. D Crimpwerkzeug. E útil de engaste. I attrezzo per la crimpatura; utensile per crimpare; pinza per crimpare. N wurggereedschap. P zagniatak. S kontaktpressningsverktyg. (581)
2. **extraction tool** : a device for extracting removable contacts from a component. ★ outil d'extraction → *outil 5.* R инструмент для извлечения контактов. D Löse-Werkzeug. E útil de extracción. I attrezzo per l'estrazione. N uitdrukgereedschap. P wysuwak styków. S uttagningsverktyg. (581)
3. **insertion tool** : a device used to insert contacts into a component. ★ outil d'insertion → *outil 6.* R инструмент для вставления контактов. D Einsetz-Werkzeug. E útil de introducción. I attrezzo di montaggio; attrezzo per l'inserzione. N insteekgereedschap. P wsuwak styków. S insättningsverktyg. (581)
4. **insulated tool** : a tool made of conductive material and fully or partly covered by insulating materials. ★ outillage isolé → *outillage 2.* R изолированный инструмент. D isoliertes Werkzeug. E herramienta aislada. I utensile isolato. N geïsoleerd gereedschap. P narzędzie izolowane. S isolerande verktyg. (604)
5. **insulating tool** : a tool essentially made of insulating material. ★ outillage isolant → *outillage 1.* R изолирующий инструмент. D Werkzeug aus Isoliermaterial. E herramienta aislante. I utensile di materiale isolante. N isolerend gereedschap. P narzędzie izolacyjne. S verktyg av isolermaterial. (604)
6. **locator of a crimping tool** : → *locator 2*
7. **positioner of a crimping tool** : → *positioner 1*
8. **sizing tool** : a tool simulating a specified maximum size male contact or a specified minimum size female contact. ★ calibre individuel → *calibre 4.* R инструмент мерительный. D Aufweit-Werkzeug. E calibre individual. I calibro per contatto singolo. N kaliber. P szablon; sprawdzian. S tolk för kontaktelement. (581)
9. **universal tool attachment** : a tool designed to be fixed at the end of a hand pole. ★ outil adaptable → *outil 1.* R сменная насадка. D auswechselbarer Arbeitskopf. E herramienta adaptable. I utensile adattabile su asta. N aanzetbaar stuk. P narzędzie z uniwersalną końcówką mocującą. S fästbart verktyg. (604)
10. **unwrapping tool** : a tool to remove a wrapped connection by unwrapping. ★ outil de démontage d'une connexion enroulée → *outil 2.* R инструмент для демонтажа навивного соединения. D Abwickel-Werkzeug. E útil de desmontaje de una conexión enrollada. I attrezzo di smontaggio per connessioni avvolte. N afwikkelgereedschap. P odkrętak. S avvirningsverktyg. (581)
11. **wrapping tool** : a tool used to make a wrapped connection. ★ outil pour connexion enroulée → *outil 7.* R инструмент для навивки. D Wickel-Werkzeug. E útil para conexión enrollada. I attrezzo per connessioni avvolte. N wikkelgereedschap. P okrętak. S virningsverktyg. (581)

tooth

1. **tooth** : that part of a core included between two consecutive slots. ★ dent → *dent 1.* R зубец. D Zahn. E diente. I dente. N tand. P ząb. S tand. (411)
2. **tooth pitch** : → *pitch 14*
3. **tooth support** : → *support 30*

top

1. **mode top** (*Syn.* mode centre) : → *centre 14*
2. **top hamper** : → *hamper 1*

top-loaded

1. **top-loaded antenna** : → *antenna 116*

topological

1. **topological diagram of a network** : → *diagram 23*

topology

1. **topology of networks** : study of the relative positions of ideal elements representing an electric network. ★ topologie des réseaux → *topologie 1.* R топология схем. D Topologie der Netze. E topología de las redes. I topologia delle reti. N netwerktopologie. P topologia układów (elektrycznych). S topologi. (131,603)

topping

1. **hot topping** : the complementary heating by electric arc or exothermic material to control the rate of cooling at the top of the ingot and to ensure a perfect shape by reducing the shrinkages and the extent of the stub end. ★ réchauffage de la masselotte → *réchauffage 1.* R нагрев верхней части слитка. D Blockkopferwärmung. E recalentamiento de la mazarota. I riscaldamento della materozza. N verloren-kopverwarming. P nagrzewanie korygujące koniec wlewka. S göttoppsvärmning. (841)

top-side

1. **top-side ionospheric sounding** : → *sounding 8*

TOR

1. **TOR** (*Syn.* Van Duuren radiotelegraph system) : → *system 248*

torch

1. **laminar plasma torch** : a plasma torch whose operation is characterized by a laminar flow of the plasma jet. ★ torche à plasma laminaire → *torche 7.* R плазменная горелка с ламинарным потоком плазмы. D Brenner mit laminarem Plasma. E antorcha de plasma laminar. I torcia a plasma laminare. N laminaire plasmatoorts. P plazmotron laminarny. S plasmabrännare med laminärt gasflöde. (841)
2. **MIG/MAG torch** (*Syn.* MIG/MAG gun) : → *gun 11*
3. **non-transferred arc plasma torch** : a plasma torch in which the main arc is maintained between two or more internal electrodes. ★ torche à plasma à arc interne → *torche 3.* R плазменная горелка косвенного нагрева. D Plasmabrenner mit nichtübertragenem Bogen. E antorcha de plasma de arco no transferido; antorcha de plasma de arco interno. I torcia a plasma ad arco interno; torcia a plasma ad arco non trasferito. N plasmatoorts met niet overgedragen boog. P plazmotron o łuku wewnętrznym. S plasmabrännare med icke överförd ljusbåge. (841)
4. **plasma torch** : an appliance in which a gas is changed into plasma by electrical energy transfer prior to its ejection. ★ torche à plasma → *torche 2.* R плазменная горелка. D Plasmabrenner. E antorcha de plasma. I torcia a plasma. N plasmatoorts. P plazmotron. S plasmabrännare. (841)
5. **plasma torch** (*Syn.* plasma gun) : a torch or gun using a non-consumable arc welding electrode and having a gas nozzle producing a constricted plasma arc. ★ torche plasma → *torche 10.* R плазменная горелка; плазменный пистолет. D Plasmabrenner. E soplete de plasma; pistola de plasma. I torcia a plasma; pistola a plasma. N plasmatoorts. P uchwyt prosty plazmowy; uchwyt pistoletowy plazmowy. S plasmabrännare; plasmapistol. (851)
6. **superimposed arc plasma torch** : a non transferred arc plasma torch in which the emitted plasma carries a superimposed electric current between the nozzle and the workpiece which constitutes an external electrode. ★ torche à plasma à arc superposé → *torche 5.* R плазменная горелка с вынесенной дугой. D Plasmabrenner mit überlagertem Bogen. E antorcha de plasma de arco superpuesto. I torcia a plasma ad arco sovrapposto. N plasmatoorts met gesuperponeerde boog. P plazmotron o łuku nałożonym. S plasmabrännare med överlagrad ljusbåge. (841)
7. **TIG torch** (*Syn.* TIG gun) : a torch or gun using a non-consumable arc welding electrode. *Note.* — TIG is the abbreviation of "tungsten inert gas". ★ torche TIG → *torche 11.* R горелка для ТИГ-сварки; пистолет для ТИГ-сварки. D TIG-Brenner. E soplete TIG; pistola TIG. I torcia TIG; pistola TIG. N TIG-toorts. P uchwyt prosty TIG; uchwyt pistoletowy TIG. S TIG-brännare; TIG-pistol. (851)

8. **torch** (*Syn.* flashlight (USA)) : portable luminaire fed by a built-in source, usually a dry battery or an accumulator, sometimes a manual generator. *Note.* — In French, the term "lampe torche" refers to a torch with a cylindrical container. ★ lampe de poche → *lampe 39.* R фонарь. D Taschenleuchte. E linterna. I apparecchio di illuminazione tascabile. N zaklantaarn. P latarka kieszonkowa. S ficklampa. (845)
9. **torch** (*Syn.* gun) : → *gun 6*
10. **transferred arc plasma torch** : a plasma torch in which the main arc is maintained between the workpiece which constitutes an external electrode. ★ torche à plasma à arc transféré → *torche 6.* R плазменная горелка прямого нагрева. D Plasmabrenner mit übertragenem Bogen. E antorcha de plasma de arco transferido. I torcia a plasma ad arco trasferito. N plasmatoorts met overgedragen boog. P plazmotron o łuku przenoszonym. S plasmabrännare med överförd ljusbåge. (841)
11. **turbulent plasma torch** : a plasma torch whose operation is characterized by a turbulent flow of the plasma jet. ★ torche à plasma turbulent → *torche 8.* R плазменная горелка с турбулентным потоком плазмы. D Brenner mit turbulentem Plasma. E antorcha de plasma turbulenta. I torcia a plasma turbolento. N turbulente plasmatoorts. P plazmotron turbulentny. S plasmabrännare med turbulent gasflöde. (841)

toroïdal

1. **toroidal reflector** : → *reflector 29*

torque

1. **accelerating torque** : the difference between the electromagnetic starting torque and the total load torque, available for accelerating the rotating parts. ★ couple d'accélération → *couple 6.* R избыточный момент. D Beschleunigungsmoment. E par de aceleración. I coppia di accelerazione. N versnellend moment. P moment dynamiczny. S accelerationsmoment. (411)
2. **braking torque** (of an integrating instrument) : the torque resulting from the interaction of the field of a fixed permanent magnet with the currents induced by it in the rotor and opposing its rotation. ★ couple de freinage → *couple 16.* R тормозной момент (интегрирующего прибора). D Bremsmoment (eines integrierenden Messgerätes). E par de freno (de un aparato integrador). I coppia frenante. N remkoppel (van een integrerend instrument). P moment hamujący. S bromsande moment. (302)
3. **braking torque** : any torque exerted by a motor, in the same direction as the load torque, so as to reduce its speed. ★ couple de freinage → *couple 17.* R тормозной момент. D Bremsmoment. E par de frenado. I coppia frenante. N remmend moment. P moment hamujący. S bromsande moment. (411)
4. **braking torque** (of a traction motor) : the torque exerted on its shaft by a traction motor when operating in electrodynamic braking. ★ couple de freinage → *couple 18.* R тормозной момент (тягового двигателя). D Motor-Bremsmoment. E par de frenado (de un motor de tracción). I coppia frenante (d'un motore di trazione). N remkoppel. P moment hamujący. S bromsmoment. (811)
5. **breakaway torque** (of an a.c. motor) : the smallest torque developed by the motor when at rest, and when it is supplied at the rated voltage and frequency. *Note.* — This breakaway torque is a design value, transient phenomena being ignored. ★ couple initial de démarrage → *couple 22.* R момент трогания (электродвигателя переменного тока). D Anzugsmoment (eines Wechselstrommotors Rechenwert). E par inicial de arranque (de un motor de corriente alterna). I coppia di spunto iniziale. N lostrekmoment (van een wisselstroommotor). P początkowy moment rozruchowy-wartość obliczona. S startmoment. (411)
6. **breakaway torque** : the minimum torque which must be applied to an internal combustion engine to enable it to turn slowly over the first compression stroke under the most unfavourable conditions of temperature encountered in service. ★ couple de décollage → *couple 10.* R пусковой крутящий момент. D Losbrechdrehmoment. E par de reposición. I coppia di spunto. N startkoppel. P moment uruchamiający. S startmoment. (811)
7. **breakdown torque** (*Syn.* pull-out torque) : → *torque 18*
8. **coupling torque** : the force needed to rotate a coupling ring or jackscrew to fully engage a mating set of connectors. ★ couple de serrage → *couple 21.* R момент крутящий при сочленении. D Kupplungsdrehmoment. E par de apriete. I coppia di serraggio. N vastdraaikoppel. P moment sprzęgający. S kopplingsmoment. (581)
9. **damping torque** : a torque which tends to reduce unwanted oscillations of the moving element. ★ couple d'amortissement → *couple 9.* R успокаивающий момент. D Dämpfungsmoment. E par de amortiguamiento. I coppia di smorzamento. N dempkoppel. P moment tłumiący. S dämpande moment. (302)
10. **deflecting torque** (*Syn.* driving torque) : a torque resulting from e.g. electrostatic or electromagnetic effects on the moving element. ★ couple moteur → *couple 25.* R отклоняющий момент; вращающий момент. D die Auslenkung verursachendes Drehmoment; Auslenkmoment. E par motor. I coppia motrice. N afbuigkoppel; aandrijfkoppel. P moment odchylający. S drivmoment. (302)
11. **driving torque** (*Syn.* deflecting torque) : → *torque 10*
12. **firing torque** : the average torque required to maintain an internal combustion engine at its minimum firing speed. ★ couple d'allumage → *couple 8.* R крутящий момент зажигания. D Zünddrehmoment. E par de encendido. I coppia d'accensione. N ontsteekkoppel. P moment zapłonowy. S tändmoment. (811)
13. **locked-rotor torque** : the minimum measured torque which the motor will develop with the rotor locked and rated voltage applied at rated frequency. ★ couple à rotor bloqué → *couple 3.* R начальный пусковой момент. D Drehmoment bei festgebremstem Läufer. E par con rotor bloqueado. I coppia a rotore bloccato. N lostrekmoment. P początkowy moment rozruchowy. S vridmoment i stillestånd. (411)
14. **motoring torque** : the torque exerted on its shaft by a traction motor when motoring. ★ couple moteur → *couple 26.* R вращающий момент тягового двигателя. D Motor(isches) Drehmoment. E par motor. I coppia (motrice). N motorkoppel. P moment silnika. S motormoment. (811)
15. **nominal pull-in torque** : the torque of a synchronous motor develops as an induction motor when running at 95 per cent of synchronous speed with rated voltage applied at rated frequency, the excitation winding being short-circuited. ★ couple conventionnel d'accrochage → *couple 5.* R номинальный входной момент. D Nenn-Intrittfallmoment. E par convencional de enganche. I coppia di sincronizzazione convenzionale. N nominaal intrekmoment. P umowny moment wpadowy. S nominellt synkroniseringsmoment. (411)
16. **peak torque** : the motor torque corresponding to the peak current during the starting period. ★ couple de pointe → *couple 19.* R максимальный вращающий момент. D Motor-Spitzendrehmoment. E par de punta. I coppia di punta. N piekkoppel. P moment szczytowy. S maximimoment. (811)
17. **pull-in torque** : the maximum torque against which a synchronous motor will pull its connected load into synchronism at rated voltage and frequency, when the field excitation, if used, is applied. *Note.* — The pull-in torque depends on the total inertia of rotating parts. ★ couple d'accrochage → *couple 7.* R входной момент. D Intrittfallmoment. E par de enganche. I coppia di sincronizzazione. N intrekmoment (van een synchrone motor). P moment wpadowy. S kritiskt synkroniseringsmoment. (411)
18. **pull-out torque** (of an a.c. motor) (UK) (*Syn.* breakdown torque (USA)) : the highest torque that the motor can develop while running at rated voltage and frequency. ★ couple de décrochage → *couple 12.* R максимальный вращающий момент (электродвигателя переменного тока). D Kippmoment. E par de desenganche (de un motor de corriente alterna); par máximo (de un motor de corriente alterna). I coppia massima di rovesciamento. N kipmoment (van een wisselstroommotor). P moment krytyczny. S maximimoment. (411)
19. **pull-out torque** (*Syn.* synchronous pull-out torque) : → *torque 26*
20. **pull-up torque (of an a.c. motor)** : the smallest torque developed by the motor between zero speed and the speed which corresponds to the pull-out torque (breakdown torque) when the motor is supplied at the rated voltage and frequency. *Note.* — This definition does not apply to motors of which the torque continually decreases with increase in speed. ★ couple minimal pendant le démarrage → *couple 24.* R минимальный момент при пуске (электродвигателя переменного тока). D Sattelmoment (eines Wechselstrommotors). E par mínimo durante el arranque (de un

motor de corriente alterna). I coppia minima durante l'avviamento. N zadelmoment. P moment rozruchowy minimalny (silnika prądu przemiennego). S minimimoment. (411)

21. **rated load torque** : the shaft torque of a motor corresponding to rated output and speed. ★ couple normal → *couple 27.* R номинальный вращающий момент. D Nenndrehmoment. E par normal. I coppia nominale. N nominaal (draai)moment. P moment (obrotowy) znamionowy. S märkvridmoment. (411)
22. **restoring torque** : the torque which tends to bring the moving element back to the mechanical zero of the instrument. ★ couple antagoniste → *couple 4.* R противодействующий момент. D die Rückstellung verursachendes Drehmoment; Rückstellmoment. E par antagonista. I coppia antagonista. N terugdrijfkoppel. P moment zwracający. S återföringsmoment. (302)
23. **specified breakaway torque** : the torque which a motor is required to develop to breakaway its load from rest to rotation. ★ couple de décollage spécifié → *couple 11.* R момент трогания. D erforderliches Anzugsmoment. E par inicial de arranque especificado. I coppia di spunto richiesta. N (voor aandrijving) vereist lostrekmoment. P moment obciążenia spoczynkowy. S erforderligt startmoment. (411)
24. **starting torque** : the electromagnetic torque exerted by a motor during the starting period. *Note.* — This torque is not a single value and the complete torque-speed curve of the motor is needed to express it. ★ couple de démarrage → *couple 14.* R момент при пуске. D Anlaufmoment. E par de arranque. I coppia di avviamento. N aanloopmoment. P moment rozruchowy. S startningsmoment. (411)
25. **starting torque** (of a traction motor) : the motor torque corresponding to the mean current during the starting period. ★ couple de démarrage → *couple 15.* R пусковой вращающий момент (тягового двигателя). D Motor-Anfahrdrehmoment. E par de arranque (de un motor de tracción). I coppia d'avviamento. N aanzetkoppel. P moment rozruchowy. S startmoment. (811)
26. **synchronous pull-out torque** (UK) (*Syn.* pull-out torque (USA)) : the maximum torque that a synchronous machine can develop without loss of synchronism while operating at rated voltage, frequency and excitation. ★ couple de décrochage synchrone → *couple 13.* R максимальный вращающий момент синхронной машины. D Synchron-Kippmoment. E par de desenganche síncrono. I coppia di uscita dal sincronismo (di rovesciamento). N synchroon kipmoment. P maksymalny moment synchroniczny. S synkront maximimoment. (411)
27. **torque** (about a point) (*T*) : the sum of the moments of a set of forces about a point. *Note.* — If the resultant of the forces is zero, the torque is independent of the point chosen. ★ couple → *couple 1.* R момент системы сил (в какой-то точке). D Drehmoment (um einen Punkt). E par (en un punto). I coppia (in un punto). N (draai)moment (om een punt). P moment obrotowy. S vridmoment (i en punkt). (111)
28. **torque motor** : → *motor 108*
29. **torque shaft** : → *shaft 12*
30. **torque variator** : → *variator 2*

torsional

1. **critical torsional speeds** : → *speed 11*

torus

1. **parabolic torus reflector** : → *reflector 13*

total

1. **calculation of efficiency from total loss** : → *efficiency 5*
2. **specific total loss** (*Syn.* total loss (mass) density) : → *density 38*
3. **thermal electrical relay with total memory function** : → *relay 50*
4. **total absorption detection efficiency** : → *efficiency 43*
5. **total absorption detector efficiency** : → *efficiency 44*
6. **total absorption peak** : → *peak 46*
7. **total angular momentum quantum number** : → *number 32*
8. **total clearing time** (*Syn.* operating time) : → *time 123*
9. **total cloud amount** : → *amount 1*
10. **(total) conversion time** : → *time 214*
11. **total cross-section** : → *cross-section 29*
12. **total current** : → *current 211*
13. **total current density** : → *current-density 5*
14. **total depletion voltage** : → *voltage 211*
15. **total direct voltage regulation** : → *regulation 15*
16. **total earthing resistance** : → *resistance 72*
17. **(total) effective area** : → *area 42*
18. **total electron content** : → *content 11*
19. **total energy density** (*Syn.* sound energy density) : → *density 30*
20. **total (energy) transmittance** (*Syn.* solar factor) : → *factor 166*
21. **total filtration** : → *filtration 3*
22. **total flux** : → *flux 25*
23. **total gross load (of a train)** : → *load 80*
24. **total gross traffic** : → *traffic 23*
25. **total harmonic distortion** : → *distortion 67*
26. **(total) harmonic factor** : → *factor 175*
27. **(total) harmonic factor** : → *factor 176*
28. **total ionization** : → *ionization 18*
29. **total leakage power** : → *power 189*
30. **total linear stopping power** : → *power 190*
31. **total linear stopping power** : → *power 191*
32. **total loss** : → *loss 101*
33. **total loss (mass) density** : → *density 38*
34. **total loss (of a radio link)** : → *loss 103*
35. **total loss (volume) density** : → *density 39*
36. **total losses** : → *loss 105*
37. **total mass stopping power** : → *power 192*
38. **total over-travel force** : → *force 33*
39. **total reflection** : → *reflection 31*
40. **total reflection** : → *reflection 32*
41. **total reflector current** : → *current 212*
42. **total scanning line length** : → *length 33*
43. **total starting time** : → *time 215*
44. **total time constant** : → *time constant 22*
45. **total (train) resistance** : → *resistance 73*
46. **total turbidity factor** : → *factor 177*
47. **transmission of integrated totals** (*Syn.* telecounting) : → *telecounting 1*

totalizer

1. **totalizer** (*Syn.* summation instrument) : → *instrument 30*

totally-enclosed

1. **totally-enclosed** : applied to a machine with an integral enclosure which is constructed so that while it is not necessarily air-tight the enclosed air has no deliberate connection with the external air except for the provision for draining and breathing. ★ machine fermée → *machine 49.* R закрытая машина. D völlig geschlossene Maschine. E máquina cerrada. I macchina chiusa. N gesloten. P maszyna zamknięta. S helkapslad. (411)
2. **totally-enclosed fan-ventilated** : → *fan-ventilated 3*
3. **totally-enclosed fan-ventilated air-cooled** : → *fan-ventilated 4*
4. **totally-enclosed motor** : → *motor 109*
5. **totally-enclosed separately fan-ventilated** : → *fan-ventilated 5*
6. **totally-enclosed separately fan-ventilated air-cooled** : → *fan-ventilated 6*
7. **totally-enclosed water-cooled** : → *water-cooled 2*
8. **ventilated totally-enclosed motor** : → *motor 121*

total-travel

1. **total travel** : the distance which is the sum of pre-travel and over-travel. ★ course totale → *course 4.* R ход полный. D Gesamtweg. E carrera total. I corsa totale. N totale weg. P droga całkowita. S total rörelse. (581)
2. **total-travel position** : → *position 37*

touch

1. **conventional touch voltage limit** : → *voltage 37*

2. **prospective touch voltage** : → *voltage 150*
3. **touch voltage** : → *voltage 212*

toughened

1. **toughened glass** : → *glass 9*

tower

1. **cooling tower** : a water/air heat exchanger which cools the condenser cooling water in closed circuit. ★ réfrigérant atmosphérique → *réfrigérant 2.* R градирня. D Kühlturm. E torre de refrigeración. I refrigerante atmosferico. N koeltoren. P chłodnia. S kyltorn. (602)
2. **dry cooling tower** : a structure in which the condenser cooling water is not in direct contact with air. ★ réfrigérant atmosphérique sec → *réfrigérant 5.* R теплообменная градирня. D Trockenkühlturm. E torre de refrigeración seca. I refrigerante atmosferico secco. N droge koeltoren. P chłodnia sucha. S torrt kyltorn. (602)
3. **forced draught cooling tower** : a cooling tower in which the air flow is artificially increased. ★ réfrigérant atmosphérique à tirage forcé → *réfrigérant 3.* R вентиляторная градирня. D Kühlturm mit Zwangskühlung. E torre de refrigeración de tiro forzado. I refrigerante atmosferico a tiraggio forzato. N koeltoren met geforceerde ventilatie. P chłodnia z chłodzeniem wymuszonym. S fläktkyltorn. (602)
4. **lattice tower** : a compound structure resulting from an assembly of structural members. ★ pylône à treillis → *pylône 5.* R решетчатая опора. D Gittermast. E torre de celosía. I sostegno a traliccio. N vakwerkmast. P słup kratowy. S fackverksstolpe. (466)
5. **tower** : a support which may be made of such material as steel, wood, concrete, and comprising a body which is normally four-sided, and cross-arms. ★ pylône → *pylône 4.* R башенная опора. D mehrstieliger Mast. E torre. I sostegno. N mast. P słup wieżowy. S stolpe. (466)
6. **tower body** : → *body 14*
7. **tower swivel clevis** : → *clevis 2*
8. **wet cooling tower** : a structure in which the condenser cooling water is in direct contact with air. ★ réfrigérant atmosphérique humide → *réfrigérant 4.* R испарительная градирня. D Nasskühlturm. E torre de refrigeración húmeda. I refrigerante atmosferico umido. N natte koeltoren. P chłodnia mokra. S vått kyltorn. (602)

Townsend

1. **Townsend avalanche** : → *avalanche 6*

T.R.

1. **A.T.R. tube** : → *tube 5*
2. **pre T.R. tube** : → *tube 68*
3. **T.R. tube** : → *tube 83*

trace

1. **trace** (*Syn.* line; scan) : the visible or recordable path traced on the screen or target by the moving spot. ★ trace → *trace 6.* R линия. D Strahlspur; Spur-Zeile; Linie; Abtastspur. E traza (del spot); línea; barrido. I traccia (della macchia luminosa); linea; spazzolamento. N lijn. P linia. S spår. (531)

tracer

1. **radioactive tracer** : a radionuclide used to follow biological, chemical or other processes. *Note.* — Since the stable nuclides and radionuclides of an element have essentially the same chemical properties, and the radioactive ones are readily detected, the movement and behaviour of the stable atoms can be traced by following the radioactive atoms. ★ traceur radioactif → *traceur 2.* R радиоактивный индикатор. D radioaktives Indikatornuklid. E radiotrazador; trazador radiactivo. I tracciante radioattivo. N radioactieve merkstof; radioactieve klikstof. P znacznik radioaktywny. S radioaktiv spårare. (881)
2. **tracer** : a nuclide —stable or radioactive— that can be detected at several stages of a biological, chemical, or other process. ★ traceur → *traceur 1.* R индикатор. D Indikatornuklid. E trazador. I tracciante. N merkstof; klikstof. P znacznik. S spårare; spårningsämne. (881)

tracing

1. **call tracing** : a means of identifying the terminal equipments associated with a call to ascertain the path of the connection through the various switching stages. ★ pistage d'appel → *pistage 1.* R трассировка вызова. D fangen; Verbindungsverfolgen. E pista de llamada. I individuazione dei percorsi di un collegamento. N ..... P trasowanie połączenia. S samtalsspårning. (714)
2. **circuit tracing** : a means of identifying all the traffic-carrying devices and circuits forming a particular connection. ★ pistage de circuit → *pistage 2.* R трассировка канала. D Durchschaltung verfolgen. E pista de circuito. I individuazione dei circuiti di un collegamento. N ..... P trasowanie drogi połączeniowej. S kretsspårning. (714)
3. **tracing distortion** : → *distortion 68*

track

1. **arc furnace tilt roller track** : generally toothed metal plate track on which the tilt rockers roll. ★ chemin de roulement des berceaux de basculement d'un four à arc → *chemin 5.* R опорная балка наклона дуговой печи. D Lichtbogenofen-Rollbahn. E via de rodamiento de las cunas basculantes de un horno de arco. I basamenti delle culle di ribaltamento di un forno ad arco. N wiegbasis. P tor ruchu kołyski (pieca łukowego). S ..... (841)
2. **audio track** : the track containing the audio signal information. ★ piste audio → *piste 7.* R дорожка звукового канала. D Tonspur. E pista de sonido. I pista sonora. N geluidsspoor. P ścieżka foniczna. S ljudspår. (806)
3. **control track** : the track containing the recorded servo-control signals of the video tape recorder; it also contains the edit pulses. ★ piste d'asservissement → *piste 8.* R дорожка канала управления. D Steuerspur. E pista de control. I pista di asservimento. N regelspoor. P ścieżka sterowania. S styrspår. (806)
4. **cue track** : the track containing information relating to production requirements, electronic editing, or possibly a second programme audio signal. ★ piste d'ordres → *piste 9.* R дорожка режиссерского канала. D Merkspur. E pista de órdenes. I pista di servizio. N hulpspoor. P ścieżka dyspozycji. S orderspår. (806)
5. **dual system track** : track on which the contact line can be fed with one or another system of electric energy. ★ voie commutable → *voie 29.* R переключаемый путь. D Gleisabschnitt für Systemwechsel. E vía conmutable. I binario commutabile. N spoor met omschakelbaar voedingssysteem. P tor dwusystemowy. S ..... (811)
6. **electro-magnetic track brake** : → *brake 14*
7. **focal track** : the area of the surface of a rotating anode struck by the electron beam during one revolution of the anode. ★ foyer thermique → *foyer 3.* R фокальный трек. D Brennfleckbahn. E foco térmico. I traccia focale. N focusbaan. P ognisko termiczne. S fokusbana. (881)
8. **full track recording** : → *recording 4*
9. **independence of tracks** : → *independence 2*
10. **ionization track** : a part of the path of an ionizing particle which is visible in a track chamber, a nuclear emulsion, etc. ★ trace d'ionisation → *trace 7.* R трек. D Spur. E traza de ionización. I traccia di ionizzazione. N ionisatiespoor. P ślad jonizacji. S (partikel)spår. (391)
11. **magnetic track** : the magnetized area traced out on a magnetic tape by a recording head. ★ piste magnétique → *piste 10.* R дорожка магнитной записи. D Magnetspur. E pista magnética. I pista magnetica. N magnetisch spoor. P ślad magnetyczny; ścieżka magnetyczna. S magnetiskt spår. (806)
12. **specific resistance on inclined track (gradient)** : → *resistance 64*
13. **track** : a line of positions on a recording medium which in turn are influenced by, or influence, the same writing or reading device respectively. *Examples :* The ring-shaped portion of the surface of a magnetic drum associated with one head. The line of positions on a tape which could be perforated by a given punch or read by a given reading element. ★ piste → *piste 6.* R дорожка. D Spur. E pista. I traccia. N spoor. P ścieżka. S spår. (721)
14. **track chamber** : → *chamber 16*
15. **track configuration** : → *configuration 20*
16. **track (etch) detector** : → *detector 42*
17. **(track) jumper cable** : → *cable 69*
18. **track negative cable** (*Syn.* return cable) : → *cable 56*

19. **track paralleling cabin** (*Syn.* track sectioning cabin) : → *cabin 2*
20. **track return system** : → *system 237*
21. **track sectioning cabin** : → *cabin 2*
22. **video track** : the track containing the video signal information. ★ piste vidéo → *piste 11.* R строчка записи. D Videospur. E pista de imagen. I pista video. N beeldspoor. P ścieżka wizyjna. S videospår. (806)

tracking

1. **comparative tracking index** : → *index 6*
2. **grey scale tracking** : adjustment of the proportions and the gamma correction of the primary colour signals to obtain an achromatic picture over the luminance range. ★ réglage des gris → *réglage 41.* R выравнивание серой шкалы. (723)
3. **lateral tracking angle error** : → *error 47*
4. **proof tracking index** : → *index 32*
5. **radial tracking control** : → *control 151*
6. **slave tracking operation** : → *operation 67*
7. **(space) tracking** : determination of the orbit, velocity or instantaneous position of an object in space by means of radiodetermination for the purpose of following the movements of the object; by extension, any way of following the movements of an object in space. ★ poursuite (spatiale) → *poursuite 2.* R (космическое) слежение. D Bahnverfolgung (im Weltraum). E seguimiento (espacial). I inseguimento (spaziale). N volgen (in de ruimte). P śledzenie (kosmiczne). S följning; spårning. (725)
8. **tangential tracking control** : → *control 187*
9. **tracking** : the progressive degradation of the surface of a solid insulating material by local discharges to form conducting or partially conducting paths. *Note* — Tracking usually occurs due to surface contamination. ★ cheminement → *cheminement 1.* R трекинг. D Kriechwegbildung. E formación de caminos conductores. I formazione di traccia. N kruipspoorvorming. P tworzenie ścieżek pełznych. S krypspårsbildning. (212)
10. **tracking ability** : → *ability 1*
11. **vertical tracking angle error** : → *error 64*

traction

1. **air gap (of a linear traction motor)** : → *air-gap 3*
2. **armature (of a linear traction motor)** : → *armature 3*
3. **automatic traction control equipment** : → *equipment 10*
4. **battery-electric traction** : a traction system in which the energy is supplied by electric batteries carried on the motor vehicle or a trailer. ★ traction par accumulateurs électriques → *traction 23.* R аккумуляторная электрическая тяга. D batterieelektrischezugförderung. E tracción por acumuladores eléctricos. I trazione ad accumulatori. N accumulatorentractie. P trakcja akumulatorowa elektryczna. S elbatteridrift. (811)
5. **d.c. traction** : a traction system in which electric energy is supplied to motor vehicles from external direct current sources. ★ traction à courant continu → *traction 21.* R тяга на постоянном токе. D Gleichstrom-Zugförderung. E tracción a corriente continua. I trazione a corrente continua. N gelijkstroomtractie. P trakcja prądu stałego. S likströmsdrift. (811)
6. **electric traction** : a traction system in which electric energy is supplied to traction motors. ★ traction électrique → *traction 22.* R электрическая тяга. D elektrische Zugförderung. E tracción eléctrica. I trazione elettrica. N elektrische tractie. P trakcja elektryczna. S elektrisk fordonsdrift; eltraktion. (811)
7. **field system (of a linear traction motor)** : → *system 71*
8. **linear (traction) motor** : → *motor 42*
9. **single-phase a.c. traction** : a traction system in which electric energy is supplied to motor vehicles from external single-phase alternating current sources. *Note.* — The single-phase current supplied to the motor vehicle may be either at the frequency of the national distribution system (industrial frequency) or at the particular frequency of the railway system (special frequency). ★ traction à courant (alternatif) monophasé → *traction 19.* R тяга на однофазном переменном токе. D Einphasen-Wechselstrom-Zugförderung. E tracción a corriente (alterna) monofásica. I trazione (a corrente alternata) monofase. N eenfasewisselstroomtractie. P trakcja prądu (przemiennego) jednofazowego. S enfasdrift. (811)
10. **slip (of a linear traction asynchronous motor)** : → *slip 7*
11. **stored kinetic energy traction** : a traction system in which the energy is supplied by flywheels carried on the motor vehicle or a trailer. ★ traction par énergie cinétique accumulée → *traction 24.* R тяга от накопленной кинетической энергии. D energiegespeicherte Zugförderung. E tracción por energía cinética acumulada. I trazione ad accumulo d'energia cinetica. N vliegwieltractie. P trakcja akumulacyjna kinetyczna. S svänghjulsdrift. (811)
12. **synchronous speed (of a linear traction motor)** : → *speed 54*
13. **thermo-electric traction** : a traction system in which the energy supplied by prime movers on motor vehicles is electrically transmitted to the driving axles. ★ traction thermoélectrique → *traction 25.* R теплоэлектрическая тяга. D thermoelektrische-Zugförderung. E tracción termoeléctrica. I trazione termoelettrica. N thermo-elektrische tractie. P trakcja spalinowo-elektryczna. S termoelektrisk drift. (811)
14. **three-phase a.c. traction** : a traction system in which electric energy is supplied to motor vehicles from external three-phase alternating current sources. ★ traction à courant (alternatif) triphasé → *traction 20.* R тяга на трехфазном переменном токе. D Drehstrom-Zugförderung. E tracción a corriente (alterna) trifásica. I trazione (a corrente alternata) trifase. N draaistroomtractie. P trakcja prądu (przemiennego) trójfazowego. S trefasdrift. (811)
15. **thrust (of a linear traction motor)** : → *thrust 3*
16. **traction circuit** (*Syn.* power circuit) : → *circuit 139*
17. **traction fleet** : → *fleet 1*
18. **traction motor** : → *motor 110*
19. **traction motor isolating switch** : → *switch 59*
20. **traction output (of a thermo-electric vehicle)** : → *output 69*
21. **(traction) substation** : → *substation 40*
22. **traction unit** : → *unit 67*

tractive

1. **tractive effort (at the wheel rim)** : → *effort 1*

tractor

1. **barge tractor** : a motor vehicle intended for hauling ships or barges on canals. ★ locomotive de halage → *locomotive 5.* R буксирный локомотив. D Treidellokomotive. E tractor para sirga. I locomotiva di alaggio. N sleeptractor. P lokomotywa holownicza : ciągnik holowniczy. S ..... (811)

traffic

1. **abandoned traffic** : the part of the blocked traffic which does not result in repeated call attempts. *Note.* — This term should not be designated as "lost traffic" in view of the possible confusion with the general definition of loss mode of operation. ★ trafic abandonné → *trafic 23.* D abgewiesener Verkehr. P ruch zaniechany. (715)
2. **alternative traffic routing** : → *routing 3*
3. **average daily peak hour traffic intensity** : → *intensity 1*
4. **blocked traffic** : the part of the overflow traffic that is not carried by other resources. *Note.* — The term "lost traffic" should not be considered as a synonym because it is restricted to the loss mode of operation. ★ trafic bloqué → *trafic 24.* D blockierter Verkehr. P ruch tracony. (715)
5. **effective traffic** : the traffic corresponding only to the conversational portion of successful calls. ★ trafic efficace → *trafic 34.* D effektiver Verkehr. P ruch skuteczny. (715)
6. **equivalent random traffic intensity** : → *intensity 6*
7. **gross traffic hauled** : the product of the length of a journey and the gross load hauled over that distance during a certain period. ★ trafic brut remorqué → *trafic 25.* R объем перевозок поезда. D Bruttoverkehr. E tráfico bruto remolcado. I traffico lordo rimorchiato. N bruto vervoer. P praca przewozowa pociągowa brutto. S bruttotrafik exklusive dragfordon. (811)
8. **incoming traffic** : traffic generated by sources outside a given network but using resources of that network. *Note.* — The destinations may be located outside or inside the given network, which corresponds respectively to transit traffic and terminating incoming traffic. ★ trafic entrant → *trafic 35.* D ankommender Verkehr. P ruch przychodzący. (715)

9. **internal traffic** : traffic from sources and to destinations located within a given network. ★ trafic interne → *trafic 36.* D Internverkehr; interner Verkehr. P ruch wewnętrzny. (715)
10. **local traffic** : internal traffic within the same local service area or within an elementary tariff zone. ★ trafic local → *trafic 37.* D Ortsverkehr. P ruch miejscowy. (715)
11. **net traffic** : the product of the length of a journey and the payload conveyed over that distance during a certain period. ★ trafic utile → *trafic 45.* R полезный объем перевозок. D Nettoverkehr. E tráfico neto. I traffico netto. N netto verkeer; nuttig verkeer. P praca przewozowa netto. S nettotrafik. (811)
12. **normal (traffic) routing** : → *routing 5*
13. **originating traffic** : traffic generated by sources within a given network, whatever its destination. ★ trafic de départ → *trafic 30.* D entspringender Verkehr; Quellverkehr. P ruch źródłowy. (715)
14. **outgoing traffic** : traffic which has used the resources of a given network but is for destinations outside. *Note.* — The sources may be located outside or inside the network, which corresponds respectively to transit traffic or originating outgoing traffic. ★ trafic sortant → *trafic 43.* D abgehender Verkehr. P ruch wychodzący. (715)
15. **overflow traffic** : the part of the traffic offered to a pool of resources which is not carried by it, and is offered to other resources. ★ trafic de débordement → *trafic 29.* D Überlaufverkehr. P ruch przelewowy. (715)
16. **peaked traffic** : a traffic characterized by a peakedness factor greater than one. ★ trafic survariant → *trafic 44.* D spitziger Verkehr. P ruch o dużych wahaniach. (715)
17. **point-to-point traffic** (*Syn.* traffic parcel) : → *parcel 1*
18. **Poisson traffic** (*Syn.* random traffic) : traffic for which the bids for resources obey a Poisson process. *Note.* — The Poisson traffic is characterized by a peakedness factor equal to one. ★ trafic poissonien → *trafic 41.* D Poisson-Verkehr. P ruch puasonowski. (715)
19. **random traffic** (*Syn.* Poisson traffic) : → *traffic 18*
20. **smooth traffic** : a traffic characterized by a peakedness factor less than one. ★ trafic régularisé → *trafic 42.* D geglätteter Verkehr. P ruch wygładzony. (715)
21. **suppressed traffic** (*Syn.* hidden demand) : the traffic that is withheld by users when they anticipate a poor quality of service at a particular time. ★ trafic non exprimé → *trafic 38.* D unterdrückter Verkehr. P ruch odłożony. (715)
22. **terminating traffic** : traffic to destinations located within a given network, whatever its source. ★ trafic d'arrivée → *trafic 28.* D endender Verkehr; Endverkehr. P ruch ujściowy. (715)
23. **total gross traffic** : the product of the length of a journey and the total gross load, including motor vehicles, run over that distance during a certain period. ★ trafic brut total → *trafic 26.* R полный объем перевозок. D Gesamtbruttoverkehr. E tráfico bruto total. I traffico lordo totale. N totaal bruto verkeer. P praca przewozowa całkowita brutto. S total bruttotrafik. (811)
24. **traffic** (in telecommunication) : an aggregate of call attempts, calls or messages in a telecommunication network or a part thereof. *Note.* — When the part considered is a particular pool of resources, the traffic phenomenon reduces to an evolution process of the states of the resources relating to the bids for one resource, the seizure of it and its occupancy until its release, or the vanishing of the unsuccessful bids. ★ trafic → *trafic 21.* D Fernmeldeverkehr. P ruch (telekomunikacyjny); trafik. (715)
25. **traffic** : the total data defining the amount of traffic running over one or more lines during a certain period. The distance covered or the combined distance covered and load conveyed may be taken into consideration. *Note.* — The amount of traffic is generally expressed in train-miles, ton-miles, train-kilometres, tonne-kilometres or passenger-kilometres. ★ trafic → *trafic 22.* R объем перевозок. D Verkehr. E tráfico. I traffico. N verkeer; vervoer. P przebieg; praca przewozowa. S trafik(volym). (811)
26. **(traffic) bollard** : → *bollard 1*
27. **traffic carried** (*Syn.* traffic load) : the traffic served by a particular pool of resources. ★ trafic écoulé → *trafic 33.* D Verkehrsbelastung. P natężenie ruchu. (715)
28. **traffic carried (intensity)** : → *intensity 21*
29. **traffic circuit** : → *circuit 184*
30. **traffic circuit** : → *circuit 185*
31. **traffic distribution imbalance** (*Syn.* traffic load imbalance) : → *imbalance 2*
32. **traffic intensity** : → *intensity 22*
33. **traffic light** : → *light 72*
34. **traffic load** (*Syn.* traffic carried) : → *traffic 27*
35. **traffic load** (*Syn.* traffic carried (intensity)) : → *intensity 21*
36. **traffic load control** : → *control 194*
37. **traffic load divided control** : → *control 195*
38. **traffic load imbalance** : → *imbalance 2*
39. **traffic matrix** : → *matrix 12*
40. **traffic meter** : → *meter 65*
41. **traffic offered** : the traffic that would have been generated by the users of a pool of resources if their use had not been limited by the size of the pool. ★ trafic offert → *trafic 39.* D Verkehrsangebot. P ruch oferowany. (715)
42. **traffic parcel** : → *parcel 1*
43. **traffic routing** (*Syn.* routing) : → *routing 6*
44. **traffic routing** : → *routing 10*
45. **traffic routing plan** : → *plan 3*
46. **traffic sign** : → *sign 3*
47. **traffic volume** : → *volume 10*
48. **transit traffic** : traffic which uses the resources of a given network and is generated by sources outside it and destined for destinations outside it. ★ trafic de transit → *trafic 32.* D Durchgangsverkehr; durchgehender Verkehr; Transitverkehr. P ruch tranzytowy. (715)

trafficability

1. **trafficability performance** : → *performance 17*

traffic-carrying

1. **traffic-carrying device** : → *device 57*

trailer

1. **control trailer** (*Syn.* driving trailer) : → *trailer 2*
2. **driving trailer** (*Syn.* control trailer) : a trailer provided with a driver's cab from which it is possible to drive the train-unit or push-pull train of which the trailer forms part. ★ voiture-pilote → *voiture-pilote 1.* R прицепной вагон с кабиной управления; (прицепной) вагон управления. D Steuerwagen. E remolque con cabina. I rimorchio pilota. N aanhangrijtuig met stuurstand. P wagon sterowniczy. S manövervagn. (811)
3. **trailer** (*Syn.* leader) : → *leader 1*
4. **trailer** : a vehicle without motors, forming part of a train unit. ★ remorque → *remorque 1.* R прицепной вагон. D Beiwagen. E remolque. I rimorchio. N aanhangrijtuig. P wagon doczepny. S löpvagn; släpvagn. (811)

trailing

1. **trailing load** (*Syn.* (gross) load hauled) : → *load 18*

trailing-edge

1. **trailing-edge broadening** : → *broadening 5*

train

1. **automatic train operation** : → *operation 6*
2. **control train line** : → *line 18*
3. **crush load (of a train unit)** : → *load 9*
4. **heating train line** : → *line 44*
5. **multiple unit train** (*Syn.* (reversible) motorcoach train) : a train comprising one or more train units which can be controlled simultaneously from one cab and able to operate at normal speed in either direction without re-marshalling. ★ train à unités multiples → *train 12.* R поезд, управляемый по системе многих единиц; моторвагонный поезд (челночного движения). D mehrfachgekuppelte Triebwagenzugeinheit. E tren de unidades múltiples; composición automotriz reversible. I treno automotore (a comando multiplo). N trein met aan beide einden een stuurstand. P pociąg z zespołów nawrotnych. S motorvagnståg. (811)
6. **normal load (of a train unit)** : → *load 68*
7. **payload (of a train)** : → *payload 1*

8. **pulse train** : a discrete sequence of a finite number of similar pulses. ★ train d'impulsions → *train 14.* R серия импульсов. D Impulszug. E tren de impulsos. I treno di impulsi. N pulstrein. P ciąg impulsów. S pulståg. (702)
9. **push-pull train** : a train generally having a locomotive at one end and a driving trailer at the other, able to operate at normal speed in either direction without re-marshalling. ★ train poussé → *train 16.* R поезд, совершающий челночное движение. D Wendezug. E tren reversible. I treno navetta; treno reversibile. N trekduwtrein. P pociąg nawrotny. S push-pulltåg. (811)
10. **(reversible) motorcoach train** (*Syn.* multiple unit train) : → *train 5*
11. **specific train resistance** : → *resistance 66*
12. **square pulse train** : a rectangular pulse train with a pulse duty factor of 1/2. ★ train d'impulsions carrées → *train 15.* R серия прямоугольных импульсов. D Rechteckimpuls. E tren de impulsos cuadrados; tren de señales cuadradas. I treno di impulsi quadrati. N vierkantspulstrein. P ciąg impulsów kwadratowych. S rektangelpulståg. (702)
13. **total gross load (of a train)** : → *load 80*
14. **total (train) resistance** : → *resistance 73*
15. **train auxiliary circuit** (*Syn.* train power supply circuit) : → *circuit 187*
16. **(train) heating winding** : → *winding 85*
17. **train line** : → *line 166*
18. **train power supply circuit** : → *circuit 187*
19. **train power supply contactor** (*Syn.* heating contactor) : → *contactor 10*
20. **train power supply generator** : → *generator 40*
21. **train power supply jumper** (*Syn.* heating jumper) : → *jumper 1*
22. **train power supply line** (*Syn.* heating train line) : → *line 44*

training

1. **training reactor** : → *reactor 45*

train-unit

1. **(motor) train-unit** : a group of vehicles including at least one motor vehicle and forming the smallest self-contained unit, indivisible in service, of a multiple-unit train. ★ élément automoteur → *élément 9.* R моторвагонная секция. D Triebwagenzugeinheit. E unidad motora. I unità di trazione. N treinstel. P zespół pociągowy trakcyjny. S motorvagnssätt. (811)

tramcar

1. **(electric) tramcar** (*Syn.* street-car (USA)) : a motor vehicle running alone or with trailers on tracks of which the rails are often embedded in the public highway. ★ tramway (électrique) → *tramway 4.* R электрический трамвай (единица подвижного состава). D Straßenbahntriebwagen. E tranvía (vehículo). I tram o veicolo tranviario. N (elektrische) tram. P tramwaj. S spårvagn. (811)

tramway

1. **double tramway equipment** : → *equipment 29*
2. **(electric) tramway** : a transport system using motor vehicles running on rails embedded in the public highway or on an independent route. ★ tramway (électrique) → *tramway 5.* R (электрический) трамвай. D Straßenbahn. E tranvía (modo de transporte). I sistema tranviario; tranvia. N (elektrische) tramweg. P komunikacja tramwajowa. S spårvåg. (811)
3. **single tramway-type equipment** : → *equipment 70*

transadmittance

1. **transadmittance** : at a stated operating point and frequency, the quotient of the fundamental frequency component of the short-circuit current into the accessible terminal of an electrode by the sinusoidal voltage applied to the terminal of another electrode to cause the current, all other terminal potentials being maintained constant. ★ transadmittance → *transadmittance 1.* R проходная проводимость. D Übertragungsadmittanz; Steilheit (komplex, beliebige Bezugselektrode). E transadmitancia. I transammettenza. N transadmittantie. P admitancja wzajemna; transadmitancja. S transadmittans. (531)

transcoder

1. **transcoder** (*Syn.* code converter) : → *converter 3*
2. **transcoder** : equipment for transcoding colour television signals. ★ transcodeur → *transcodeur 2.* R транскодер. (723)

transcoding

1. **transcoding** (in pulse code modulation) : the conversion of a succession of PCM words, in a given pulse code, into the corresponding succession of PCM words representing the equivalent succession of quantized values in another pulse code. *Notes. 1* — The term may be qualified to indicate the particular pulse codes concerned. *2* — The corresponding device is designated as "transcoder". ★ transcodage → *transcodage 1.* R транскодирование (в импульсно-кодовой модуляции). D Umcodieren (in Pulscodemodulation). E transcodificación (en modulación por impulsos y codificación). I transcodifica (nella modulazione a impulsi codificati). N transcoderen (bij pulscodemodulatie). P transkodowanie (w modulacji impulsowo-kodowej). S pulskodsomvandling. (704)
2. **transcoding** (in colour television) : conversion of a colour picture signal coded in accordance with a given colour television system into a signal which is coded in another system which has the same line and field frequencies. *Note.* — Associated term : to transcode. ★ transcodage → *transcodage 3.* R транскодирование (в цветном телевидении). (723)

transconductance

1. **conversion transconductance** : under stated operating conditions, the quotient of a stated single frequency component of the short-circuit current through the output terminal by the sinusoidal voltage of different frequency (not an integral multiple) applied to the input terminal to cause the output current, the applied voltages to all other terminals being maintained constant. ★ pente de conversion → *pente 5.* R средняя крутизна преобразования. D Mischsteilheit. E transconductancia de conversión; pendiente de conversión. I pendenza di conversione. N conversiesteilheid. P nachylenie przemiany (częstotliwości). S blandningsbranthet. (531)
2. **transconductance** (of a field-effect transistor) : the ratio of the increment in the drain current to a corresponding incremental change of the gate-source voltage with the drain-source voltage held constant. ★ transconductance → *transconductance 1.* R крутизна (полевого транзистора). D Steilheit (eines Feldeffekttransistors). E transconductancia (de un transistor de efecto de campo). I transconduttanza (di un transistore ad effetto di campo). N steilheid; transconductantie (van een veldeffecttransistor). P transkonduktancja (tranzystora polowego). S branthet. (521)
3. **transconductance** : the real component of the transadmittance. ★ transconductance → *transconductance 2.* R активная составляющая проходной проводимости. D Übertragungswirkleitwert; Steilheit (reell, beliebige Bezugselektrode). E transconductancia. I transconduttanza. N transconductantie. P konduktancja wzajemna; transkonduktancja. S transkonduktans. (531)

transducer

1. **active transducer** : transducer such that the energy of the output signal is derived, at least in part, from sources other than the input signal. ★ transducteur actif → *transducteur 9.* R активный преобразователь. D aktiver Wandler. E transductor activo. I trasduttore attivo. N actieve transducent. P przetwornik czynny. S aktiv omvandlare. (801)
2. **electric energy transducer** : a device for converting or transferring energy, in which at least one of the forms of energy is electrical. ★ convertisseur d'énergie électrique → *convertisseur 33.* R преобразователь электрической энергии. D elektrischer Energiewandler; elektrischer Energieübertrager. E convertidor de energía eléctrica. I convertitore di energia elettrica. N (elektrische) energieomzetter. P przetwornik elektryczny energii. S energiomvandlare; energiomformare. (151)
3. **electric signal transducer** : a device for converting or transferring signals and in which at least one of the forms of signals is electrical. ★ transducteur électrique → *transducteur 15.* R электрический преобразователь сигналов. D elektrischer Signalwandler; elektrischer Signalumsetzer. E transductor eléctrico. I trasduttore elettrico. N (elektrische) signaalomzetter. P przetwornik (elektryczny)

sygnału. S transor (1. signalomvandlare 2. signalomformare). (151)

4. **electroacoustic transducer** : transducer designed to receive an electric input signal and to furnish an acoustic output signal, or vice versa. ★ transducteur électroacoustique → *transducteur 16.* R электроакустический преобразователь. D elektroakustischer Wandler. E transductor electroacústico. I trasduttore elettroacustico. N elektro-akoestische transducent. P przetwornik elektroakustyczny. S elektroakustisk omvandlare. (801)
5. **electromechanical transducer** : transducer designed to receive an electric input signal and to furnish a mechanical output signal, or vice versa. ★ transducteur électromécanique → *transducteur 17.* R электромеханический преобразователь. D elektromechanischer Wandler. E transductor electromecánico. I trasduttore elettromeccanico. N elektromechanische transducent. P przetwornik elektromechaniczny. S elektromekanisk omvandlare. (801)
6. **ideal transducer** : a transducer, the losses of which are negligible. ★ transducteur idéal → *transducteur 18.* R идеальный преобразователь; идеальная головка. D idealer Wandler. E transductor ideal. I trasduttore ideale. N ideale weergever. P przetwornik idealny. S ideell transor. (806)
7. **(measuring) transducer** : device which accepts information in the form of a physical quantity (its input variable) and converts it to information in the form of the same or another physical quantity, according to a definite law. *Note.* — There are many different types of measuring transducers, with different names, according to the nature of the physical phenomenon on which they are based: displacement, angle, ve locity, acceleration measuring transducers, flow measuring trasducers or flowmeters, measuring transducers for electrical quantities, temperature measuring transducers, force and torque measuring transducers, pressure measuring transducers, deformation measuring transducers, level measuring transducers , analytical elements for chemical and physical measurements. ★ transducteur → *transducteur 4.* R датчик; измерительный преобразователь. D Meßumformer. E transductor (de medida). I trasduttore. N transductor (meet). P przetwornik (pomiarowy). S ..... (351,702,801)
8. **measuring transducer (with electric output)** : a device intended to transform, with a specified accuracy and according to a given law, the measured quantity, or a quantity already transformed therefrom, into an electrical quantity. *Notes. 1* — if the input quantit y is electrical, the input and output quantities may or may not be of the same kind. *2* — in certain cases, measuring transducers also have a specific name in respect of their function e.g. amplifier, converter, transformer etc. ★ transducteur de mesurage (à sortie électrique) → *transducteur 11.* R измерительный преобразователь (с электрическим выходом). D Messumformer (mit elektrischem Ausgang). E transductor de medida (con salida eléctrica); transductor de medición (con salida eléctrica). I trasduttore di misura (con uscita elettrica). N meetwaarde-omzetter. P przetwornik pomiarowy (o wyjściu elektrycznym). S mätgivare (med elektrisk utgång); mätomvandlare. (301)
9. **orthomode transducer** : a device which enable a dual-polarization antenna to be fed simultaneously from two feed lines which correspond to the two orthognonal polarizations. *Note.* — In French the use of the term "duplexeur de polarisation" is recommended only when the antenna is connected both to one or more transmitters and one or more receivers. ★ coupleur de polarisation → *coupleur 8.* R поляризационный селектор; поляризационный дуплексер. D Polarisationsweiche. E transductor ortomodo; acoplador de polarización. I trasduttore ortomodale; OMT. N orthomode koppelaar. P układ ortomodowy. S ortogonalmodsövergång. (712)
10. **passive transducer** : transducer such that the energy of the output signal is derived exclusively from the input signal. ★ transducteur passif → *transducteur 23.* R пассивный преобразователь. D passiver Wandler. E transductor pasivo. I trasduttore passivo. N passieve transducent. P przetwornik bierny. S passiv omvandlare. (801)
11. **reciprocal transducer** : linear, passive, reversible electromechanical or electroacoustic transducer such that the coupling coefficients are equal for transduction in either direction. ★ transducteur réciproque → *transducteur 25.* R взаимно обратимый преобразователь. D reziproker Wandler. E transductor recíproco. I trasduttore reciproco. N reciproke transducent. P przetwornik wzajemny. S reciprok omvandlare. (801)
12. **reversible transducer** : transducer capable of transforming an electric signal into an acoustic or mechanical signal, and the converse. ★ transducteur réversible → *transducteur 26.* R обратимый преобразователь. D reversibler Wandler. E transductor reversible. I trasduttore reversibile. N omkeerbare transducent. P przetwornik odwracalny. S reversibel omvandlare. (801)
13. **shaded transducer** : transducer whose directional response has been modified through control of the distribution of phase and amplitude over the active face. ★ transducteur pondéré → *transducteur 24.* R акустическая антенна. D gerichteter Schallstrahler. E transductor apantallado. I trasduttore ponderato. N gewogen transducent. P przetwornik ważony. S riktad transor; riktad ljudstrålare. (801)
14. **transducer attenuation** : → *attenuation 35*
15. **transducer cartridge** : → *cartridge 4*
16. **transducer gain** : → *gain 34*
17. **transducer loss** : → *loss 106*
18. **transducer phase** : → *phase 107*

transductor

1. **auto self-excited transductor** : a self-excited transductor, the self-excitation of which is obtained by means of valves in series with the power winding of each transductor element. ★ transducteur à auto-saturation → *transducteur 6.* R магнитный усилитель с самоподмагничиванием. D Transduktor mit direkter Selbsterregung. E transductor de autoexcitación directa. I trasduttore con autosaturazione. N spaartransductor met zelfbekrachtiging. P autotransduktor zaworowy. S sparsjälvmagnetiserad transduktor. (431)
2. **current controlling transductor** : a transductor which acts as a current source in the power circuit. ★ transducteur de réglage en courant → *transducteur 13.* R магнитный усилитель — управляемый источник тока. D stromsteuernder Transduktor. E transductor de control de corriente. I trasduttore regolatore di corrente. N stroomtransductor. P transduktor sterowany prądowo. S strömstyrande transduktor. (431)
3. **direct current measuring transductor** : a measuring transductor utilized to measure a direct current in a circuit. ★ transducteur magnétique de mesure en courant continu → *transducteur 22.* R измерительный магнитный усилитель постоянного тока (трансформатор). D Gleichstrom-Wandler. E transductor de medida para corriente continua. I trasduttore magnetico di misura in corrente continua. N gelijkstroommeettransductor. P transduktor miernikowy prądu stałego. S ls-mättransduktor. (431)
4. **excitation of a transductor** : → *excitation 5*
5. **half-cycle transductor** : 1) a transductor, the control of which during each half-cycle is entirely determined by the value of the control quantity during the immediately preceding half-cycle. 2) a transductor such that the delay from a change of the control quantity to the subsequent change of the controlled quantity is one half-period. ★ transducteur magnétique à demi-période → *transducteur 20.* R быстродействующий магнитный усилитель. D Transduktordrossel. E transductor de semiperiodo. I trasduttore magnetico a mezzo periodo. N halveperiodetransductor. P transduktor półokresowy. S halvperiodtransduktor. (431)
6. **measuring transductor** : a transductor utilized to measure a voltage or current in one circuit by producing a voltage or current in another circuit at a determined ratio to the quantity measured. ★ transducteur magnétique de mesure → *transducteur 21.* R измерительный магнитный усилитель (магнитный модулятор). D Transduktor-Wandler. E transductor de medida. I trasduttore magnetico di misura. N meettransductor. P transduktor miernikowy. S mättransduktor. (431)
7. **parallel transductor** : a transductor in which the corresponding power windings of the transductor elements belonging to one phase are connected in parallel. ★ transducteur à couplage parallèle → *transducteur 7.* R магнитный усилитель с параллельным соединением рабочих обмоток. D Transduktor in Parallelschaltung. E transductor paralelo. I trasduttore con accoppiamento parallelo. N paralleltransductor. P transduktor równoległy. S paralleltransduktor. (431)
8. **series transductor** : a transductor in which the corresponding power windings of the transductor elements belonging to one

phase are connected in series. ★ transducteur à couplage série → *transducteur 8.* R магнитный усилитель с последовательным соединением рабочих обмоток. D Transduktor in Reihenschaltung. E transductor serie. I trasduttore con accoppiamento serie. N serietransductor. P transduktor szeregowy. S serietransduktor. (431)

9. **transductor** : a device consisting of one or more ferromagnetic cores with windings, by means of which an alternating or direct current or voltage can be varied by an independent voltage or current, utilizing saturation phenomena in the magnetic circuit. ★ transducteur (magnétique) → *transducteur 19.* R магнитный усилитель. D vormagnetisierte Regeldrossel; Transduktor. E transductor (magnético). I trasduttore. N transductor. P transduktor. S transduktor. (431,811)
10. **transductor element** : → *element 59*
11. **transductor fault limiting coupling** : → *coupling 41*
12. **transductor reactor** : → *reactor 46*
13. **transductor regulator** : → *regulator 3*
14. **voltage controlling transductor** : a transductor which acts as a voltage source in the power circuit. ★ transducteur de réglage en tension → *transducteur 14.* R магнитный усилитель — управляемый источник электродвижущей силы. D spannungssteuernder Transduktor. E transductor de control de tensión. I trasduttore regolatore di tensione. N spanningstransductor. P transduktor sterowany napięciowo. S spänningsstyrande transduktor. (431)

transfer

1. **accidental voltage transfer** : an overvoltage at supply frequency occurring following contact or flashover between elements of systems at different voltages. ★ transfert accidentel de tension → *transfert 43.* R аварийный переход напряжения. D fehlerbedingter Spannungsübertritt. E transferencia accidental de tensión. I trasferimento accidentale di tensione. N ongewilde spanningsoverdracht. P wypadkowy przerzut napięcia. S spänningshöjning genom överledning. (604)
2. **actual transfer rate** : → *rate 2*
3. **average transfer time** : → *time 11*
4. **baseband transfer function** : → *function 3*
5. **data transfer phase** : → *phase 5*
6. **direct transfer filter** (*Syn.* direct through-connection filter) : → *filter 14*
7. **effective transfer rate** : → *rate 26*
8. **energy transfer** : energy transferred by a particle to an atom or molecule during a single interaction. ★ transfert d'énergie → *transfert 45.* R передача энергии. D Energieübertragung. E transferencia de energía. I trasferimento di energia. N energieoverdracht. P jednostkowe przekazanie energii. S överförd energi. (881)
9. **frequency of unity current transfer ratio** : → *ratio 40*
10. **group transfer scattering cross-section** : → *cross-section 15*
11. **information transfer efficiency** : → *efficiency 27*
12. **information transfer rate** : → *rate 41*
13. **light-signal transfer characteristic** : → *characteristic 50*
14. **linear energy transfer** (*Syn.* LET (abbreviation); restricted linear collision stopping power) (L_Δ) : of a charged particle in a medium ; the quotient of dE by dl where dl is the distance traversed by a particle and dE is the energy loss due to collisions with energy transfer less than a specified value Δ usually expressed in electron volts $L_\Delta = (dE/dl)_\Delta$ *Note.* — although the definition specifies an energy cutoff and not a range cutoff the energy losses are sometimes called "energy locally imparted". Examples : L_{100} means linear energy transfer for collisions with energy transfers less than 100 eV ; L_∞ means linear energy transfer when all possible energy transfers are included.

$$L_\infty = S_{col}$$

★ transfert linéique d'énergie → *transfert 46.* R линейное преобразование энергии; ЛПЭ (сокращенно). D lineare Energieübertragung; LET (Abkürzung). E transferencia lineal de energía; TLE (en abreviatura). I trasferimento lineare di energia; LET (abbreviazione); potere frenante lineare ristretto per collisione. N lineaire energie-overdracht; lineair energietransport. P liniowe przekazanie energii. S längdenergiöverföring. (391,881)
15. **load transfer** : a redistribution of load flow within similar components of the network due to the failure, or risk of failure, of a part of the network. ★ report de charge → *report 1.* R переключение нагрузки. D Lastverlagerung. E reparto de cargas. I trasferimento di carico. N belastingsherverdeling. P awaryjne przełączenie obciążenia. S lastomläggning. (604)
16. **load transfer** : the transfer of signalling traffic from one signalling link to one or more other links. ★ transfert de charge → *transfert 44.* R перевод нагрузки (в сигнализации по общему каналу). D Last-Transfer. E transferencia de carga (en señalización por canal común). I trasferimento del carico. N ..... P przekazywanie obciążenia. S lastöverflyttning. (714)
17. **mass energy transfer coefficient** : → *coefficient 37*
18. **maximum transfer time** : → *time 91*
19. **message transfer part** : → *part 6*
20. **modulation transfer function** (*Syn.* square-wave response characteristic) : → *characteristic 79*
21. **modulation transfer function** : → *function 25*
22. **overall transfer time** : → *time 127*
23. **request data transfer** : a call control character sent by the data terminal equipment to the data circuit terminating equipment to request the transfer of data in leased circuit service. ★ (signal de) demande de transfert de données → *demande 7.* R запрос передачи данных. D Datentransferaufforderung. E (señal de) petición de transferencia de datos. I richiesta di trasferimento dati. N vraag om toegang voor dataoverdracht. P żądanie wymiany danych. S dataöverföringsbegäran. (721)
24. **signal transfer point** : → *point 43*
25. **small-signal short-circuit forward current transfer ratio** : → *ratio 92*
26. **starter transfer current** : → *current 196*
27. **static forward current transfer ratio** : → *ratio 96*
28. **surface transfer impedance** : → *impedance 59*
29. **telecontrol transfer time** : → *time 171*
30. **transfer admittance** : → *admittance 16*
31. **transfer busbar** : → *busbar 17*
32. **transfer characteristic** : → *characteristic 91*
33. **transfer current** : → *current 213*
34. **transfer curve** (*Syn.* static characteristic) : → *characteristic 85*
35. **transfer electrode** (*Syn.* guide electrode) : → *electrode 65*
36. **transfer factor** : → *factor 178*
37. **transfer function** : → *function 33*
38. **transfer function** : → *function 34*
39. **transfer function (2)** : → *function 35*
40. **transfer immittance** : → *immittance 9*
41. **transfer impedance** : → *impedance 64*
42. **transfer impedance** : → *impedance 65*
43. **transfer impedance** : → *impedance 66*
44. **transfer rate** (*Syn.* actual transfer rate) : → *rate 2*
45. **transfer ratio** : → *ratio 100*
46. **transfer time** : → *time 216*
47. **transfer time** : → *time 217*
48. **transfer tripping** (*Syn.* intertripping) : → *intertripping 1*
49. **weight transfer** : a change in the static load of an axle on the rails, due to the application of tractive or braking effort. *Note.* — It may be expressed as an absolute or relative value. ★ cabrage → *cabrage 1.* R перераспределение нагрузки. D Radsatzentlastung. E reducción de la carga de un eje. I cabraggio. N asontlasting; asdrukontlasting. P odciążenie osi. S axelomlastning. (811)
50. **weight transfer compensation device** : → *device 60*

transferred

1. **transferred arc plasma torch** : → *torch 10*

transform

1. **Fourier transform** : the transform of a function $f(t)$ to a function $F(j\omega)$ of the real variable ω, given by

$$F(j\omega) = \int_{-\infty}^{+\infty} f(t)\, e^{-j\omega t}\, dt$$

★ transformée de Fourier → *transformée 1.* R преобразование Фурье. D Fourier-Transformation. E transformada de Fourier. I trasformata di Fourier.

N Fouriertransformatie. P transformata Fouriera. S Fourier-transform. (101)

2. **inverse Fourier transform** (*Syn.* Fourier integral) : → *integral 1*
3. **inverse Laplace transform** : the representation of a function $f(t)$ by an integral of the form

$$f(t) = \frac{1}{2\pi j}\int_{\sigma-j\infty}^{\sigma+j\infty} F(s)\,e^{st}\,ds$$

where $\sigma \geqslant \sigma_0$ the abscissa of convergence of $F(s)$. ★ intégrale de Mellin-Fourier → *intégrale 5.* R обратное преобразование Лапласа. D inverse Laplace-Transformation. E integral de Mellin-Fourier; transformada inversa de Laplace. I trasformata inversa di Laplace. N inverse Laplacetransformatie. P transformata Laplace'a odwrotna. S invers Laplace-transform. (101)

4. **Laplace transform** : the transform of a function $f(t)$ to a function $F(s)$ of complex variable s, given by

$$F(s) = \int_0^{+\infty} f(t)\,e^{-st}\,dt$$

★ transformée de Laplace → *transformée 2.* R преобразование Лапласа. D Laplace-Transformation. E transformada de Laplace. I trasformata di Laplace. N Laplacetransformatie. P transformata Laplace'a. S Laplace-transform. (101)

transformation

1. **actual transformation ratio of a current transformer** : → *ratio 2*
2. **actual transformation ratio of a voltage transformer** : → *ratio 3*
3. **delta-star transformation** (*Syn.* delta-wye conversion) : → *conversion 16*
4. **network transformation** (*Syn.* network conversion) : → *conversion 27*
5. **rated transformation ratio of a current transformer** : → *ratio 73*
6. **rated transformation ratio of a voltage transformer** : → *ratio 74*
7. **star-polygon transformation** (*Syn.* star-polygon conversion) : → *conversion 31*
8. **transformation of electricity** : → *electricity 6*

transformer

1. **actual transformation ratio of a current transformer** : → *ratio 2*
2. **actual transformation ratio of a voltage transformer** : → *ratio 3*
3. **arc furnace transformer** : the transformer feeding the arc furnace from the high voltage network and providing a voltage range suitable for the furnace operation. ★ transformateur de four à arc → *transformateur 42.* R трансформатор дуговой печи. D Lichtbogenofen-Transformator. E transformador de horno de arco. I trasformatore di forno ad arco. N boogoventransformator. P transformator pieca łukowego. S transformator för ljusbågsugn. (841)
4. **auto-compound current transformer** : a current transformer having an auxiliary winding in series with the secondary of the transformer, especially intended to reduce the phase displacement between the primary and secondary currents. ★ transformateur de courant autocompoundé → *transformateur 30.* R автокомпенцированный трансформатор тока. D Stromwandler mit Selbstkompensation. E transformador de intensidad autocompensado. I trasformatore di corrente autocompensato. N zelfgecompoundeerde stroomtransformator. P przekładnik prądowy z uzwojeniem korekcyjnym zasilanym prądem wtórnym. S (själv)förmagnetiserad strömtransformator. (321)
5. **auxiliary transformer** : in a substation, a transformer intended to provide supply to the auxiliary equipment. ★ transformateur auxiliaire → *transformateur 14.* R трансформатор собственных нужд. D Eigenbedarfstransformator. E transformador auxiliar. I trasformatore ausiliario. N eigenbedrijfstransformator. P transformator potrzeb własnych. S lokaltransformator. (605)
6. **auxiliary transformer of a power station** : a transformer supplying auxiliaries of a power station. ★ transformateur d'auxiliaires d'une centrale → *transformateur 19.* R трансформатор собственных нужд электростанции. D Eigenbedarfstransformator eines Kraftwerks. E transformador de auxiliares de una central. I trasformatore ausiliario di centrale. N eigenbedrijfstransformator van een centrale. P transformator potrzeb własnych elektrowni. S lokaltransformator. (602)
7. **auxiliary transformer of a unit** : a transformer supplying auxiliaries of a unit. ★ transformateur d'auxiliaires d'une tranche → *transformateur 20.* R трансформатор собственных нужд блока. D Eigenbedarfstransformator eines Blockes. E transformador de auxiliares de un grupo. I trasformatore ausiliario di unità. N eigenbedrijfstransformator van een produktie-eenheid. P transformator potrzeb własnych bloku. S lokaltransformator. (602)
8. **auxiliary transformer regulation** : → *regulation 2*
9. **bar and post transformer** (*Syn.* crossbar transformer) : → *transformer 22*
10. **bar primary bushing type current transformer** : a current transformer so constructed that it can be used as a bushing. ★ transformateur de courant type traversée → *transformateur 41.* R проходной стержневой трансформатор тока. D Durchführungsstromwandler. E transformador de intensidad de tipo pasamuros. I trasformatore di corrente con primario a passante. N stroomtransformator met een geïsoleerde staafvormige primaire geleider. P przekładnik prądowy prętowy typu przepustowego. S strömtransformator av genomföringstyp. (321)
11. **bar primary type current transformer** : a transformer in which the primary conductor is made up of a bar or a set of bars in parallel. ★ transformateur de courant à barre incorporée → *transformateur 22.* R стержневой трансформатор тока. D Schienenstromwandler. E transformador de intensidad de barra incorporada. I trasformatore di corrente con primario a barra. N stroomtransformator met een staafvormige primaire geleider. P przekładnik prądowy prętowy. S strömtransformator av stavtyp. (321)
12. **booster transformer** (*Syn.* series transformer (USA)) : a transformer of which one winding is intended to be connected in series with a circuit in order to alter its voltage and the other winding is an energizing winding. ★ transformateur survolteur-dévolteur → *transformateur 71.* R линейный регулировочный трансформатор. D Zusatztransformator. E transformador adicionador-sustractor. I trasformatore surdevoltore. N serietransformator; opjaagtransformator. P transformator dodawczy. S tillsatstransformator. (421,811)
13. **booster transformer** : a transformer with a ratio of unity having one of its windings connected in series with the contact line and the other in series with an insulated return conductor. *Note.*—Booster transformers are positioned at intervals along the track to force current out of the rails and earth into the return conductor with the object of reducing stray currents. ★ transformateur suceur → *transformateur 70.* R отсасывающий трансформатор. D Saugtransformator. E transformador auxiliar de retorno. I trasformatore succhiatore. N serietransformator. P transformator ssący. S sugtransformator. (811)
14. **bus type current transformer** : a current transformer without primary conductor, but with primary insulation, which can be fitted directly over a conductor or busbar. ★ transformateur de courant pour passage de barre → *transformateur 34.* R шинный трансформатор тока. D vollisolierter Aufsteckstromwandler. E transformador de intensidad para paso de barras. I trasformatore di corrente a barra passante. N railstroomtransformator. P przekładnik prądowy szynowy. S skenströmtransformator. (321)
15. **bushing type current transformer** : a current transformer without primary conductor and primary insulation of its own which can be fitted directly over an insulated bushing or conductor. ★ transformateur de courant pour traversée → *transformateur 36.* R встроенный трансформатор тока. D Aufsteckstromwandler. E transformador de intensidad para pasatapas. I trasformatore di corrente incorporato nel passante. N doorvoerstroomtransformator. P przekładnik prądowy przepustowy. S genomföringsströmtransformator. (321)
16. **cable type current transformer** : a current transformer without primary conductor and primary insulation of its own, which can be mounted over an insulated cable. ★ transformateur de courant pour câble

→ *transformateur 32.* R кабельный трансформатор тока. D Kabelumbauwandler. E transformador de intensidad para cables. I trasformatore di corrente a cavo passante. N kabelstroomstransformator. P przekładnik prądowy kablowy. S kabelströmtransformator. (321)

17. **capacitor voltage transformer** : a voltage transformer comprising a capacitor divider unit and an electromagnetic unit so designed and interconnected that the secondary voltage of the electromagnetic unit is substantially proportional to the primary voltage, and differs in phase from it by an angle which is approximately zero for an appropriate direction of the connections. ★ transformateur condensateur de tension → *transformateur 16.* R емкостный трансформатор напряжения. D kapazitiver Spannungswandler. E transformador de tensión capacitivo. I trasformatore di tensione capacitivo. N capacitieve spanningstransformator. P przekładnik napięciowy pojemnościowy. S kondensatorspänningstransformator. (321)

18. **cascade (inductive) voltage transformer** : a voltage transformer in which the primary winding is equally distributed over two or more insulated magnetic cores suitably electromagnetically coupled. Power is thereby transmitted to the secondary winding which is placed on the core on which are disposed the windings at the potential nearest to earth. ★ transformateur de tension (à induction) en cascade → *transformateur 51.* R каскадный (электромагнитный) трансформатор напряжения. D (induktiver) Kaskadenspannungswandler. E transformador de tensión (inductivo) en cascada. I trasformatore di tensione (induttivo) in cascata. N (inductieve) cascadespanningstransformator. P prekładnik napięciowy kaskadowy. S kaskadkopplad (magnetisk) spänningstransformator. (321)

19. **combined transformer** : an instrument transformer consisting of a current and a voltage transformer in the same case. ★ transformateur combiné → *transformateur 15.* R комбинированный трансформатор. D kombinierter Meßwandler. E transformador combinado. I trasformatore combinato. N gecombineerde meettransformator. P przekładnik kombinowany. S kombinerad mättransformator. (321)

20. **compound-wound current transformer** : a current tranformer having an auxiliary winding with an independent supply especially intended to reduce the phase displacement between the primary and secondary currents. ★ transformateur de courant compoundé → *transformateur 31.* R компенсированный трансформатор. D Stromwandler mit Zusatzmagnetisierung. E transformador de intensidad compensado. I trasformatore di corrente con avvolgimento compensatore. N gecompoundeerde stroomtransformator. P przekładnik prądowy z uzwojeniem korekcyjnym zasilanym z obcego źródła. S (separat) förmagnetiserad strömtransformator. (321)

21. core-type transformer (deprecated) : a transformer in which the magnetic circuit takes the form of columns (legs). *Notes. 1* — Generally, core-type transformers incorporate concentric windings. *2* — Since there are types of transformer which do not come clearly within the categories of "core-type" and "shell-type", the use of these terms is deprecated. Generally they can be avoided by indicating the type of windings, i.e. "concentric" or "sandwich", and/or whether or not the magnetic circuit has unwound magnetic return paths. ★ transformateur à colonnes → *transformateur 10.* R стержневой трансформатор (нерекомендуемый). D Kerntransformator. E transformador de columnas (desaconsejado). I trasformatore con nucleo a colonna. N transformer van het kerntype. P transformator rdzeniowy. S kärntransformator. (421)

22. **crossbar transformer** (*Syn.* bar and post transformer; crossbar transition) : a transition from a coaxial line to a rectangular waveguide in which the outer conductor of the coaxial line terminates in a circular hole in one of the broad walls of the waveguide, and the inner conductor partially traverses the waveguide to connect with a metal rod perpendicular to and connected to each of the narrow walls. ★ transition à barre transversale → *transition 9.* R коаксиально-волноводный переход с поперечной перемычкой; трансформатор с перемычкой и стержнем; переход с поперечной перемычкой. D ..... E transición en T. I trasformatore a barra trasversale; trasformatore (di modo) a stelo e barra. N dwarsstaaftransformator. P przejście krzyżowe. S tvärpinneövergång. (726)

23. **current matching transformer** : a current transformer for matching the rated secondary current of the main current transformer to the rated current of the burden, or for reducing the instrument security factor. ★ transformateur de courant adaptateur → *transformateur 29.* R промежуточный трансформатор тока. D Zwischenstromwandler. E transformador de intensidad adaptador. I trasformatore di corrente adattatore. N aanpassingsstroomtransformator. P przekładnik prądowy wyrównawczy. S mellanströmtransformator. (321)

24. **current transformer** : an instrument transformer in which the secondary current, in normal conditions of use, is substantially proportional to the primary current and differs in phase from it by an angle which is approximately zero for an appropriate direction of the connections. ★ transformateur de courant → *transformateur 21.* R трансформатор тока. D Stromwandler. E transformador de intensidad. I trasformatore di corrente. N stroomtransformator. P przekładnik prądowy. S strömtransformator. (321)

25. **differential transformer** (*Syn.* induction coil) : → *coil 25*

26. **door-knob transformer** : a transition form a coaxial line to a rectangular waveguide in which the outer conductor of the coaxial line terminates in a circular hole in one of the broad walls of the waveguide and the inner conductor traverses the waveguide with a progressive increase in diameter and terminates in the opposite side. ★ transition en bouton de porte → *transition 12.* R коаксиально-волноводный переход с закороченным штырем. D ..... E transizione a pomello di porta; trasformatore (di modo) a pomello di porta. I transizione a pomello di porta; trasformatore (di modo) a pomello di porta. N deurknoptransformator. P przejście grzybowe. S lökövergång. (726)

27. **dry-type transformer** : a transformer of which the magnetic circuit and windings are not immersed in an insulating liquid. ★ transformateur de type sec → *transformateur 58.* R сухой трансформатор. D Trockentransformator. E transformador de tipo seco. I trasformatore a secco. N droge transformator. P transformator suchy. S torrisolerad transformator. (421,811)

28. **dual purpose voltage transformer** : a voltage transformer having one magnetic core intended to serve the dual purpose of measuring and protection. It may have one or more secondary windings. ★ transformateur de tension à double fonction → *transformateur 50.* R трансформатор напряжения двойного назначения. D Spannungswandler für Meß- und Schutzzwecke. E transformador de tensión de doble función. I trasformatore di tensione a doppia funzione. N spanningstransformator voor twee doeleinden. P przekładnik napięciowy uniwersalny. S spänningstransformator för mätning och reläskydd. (321)

29. **earthed voltage transformer** (*Syn.* grounded voltage transformer (USA)) : a single-phase voltage transformer which is intended to have one end of its primary winding directly earthed, or a three-phase voltage transformer which is intended to have the star point of its primary winding directly earthed. ★ transformateur de tension mis à la terre → *transformateur 53.* R заземляемый трансформатор напряжения. D einpolig isolierter Spannungswandler. E transformador de tensión puesto a tierra. I trasformatore di tensione messo a terra. N primair eenzijdig geaarde spanningstransformator. P przekładnik napięciowy z izolowanym jednym zaciskiem uzwojenia pierwotne go. S jordad spänningstransformator. (321)

30. **encapsulated-winding dry-type transformer** : a dry-type transformer having one or more windings encapsulated with solid insulation. ★ transformateur de type sec à enroulement(s) encapsulé(s) → *transformateur 59.* R сухой трансформатор с обмотками, покрытыми оболочкой. D Gießharztransformator. E transformador de tipo seco con arrollamientos cubiertos. I trasformatore a secco con avvolgimento(i) incapsulato(i). N droge transformator met omsloten wikkelingen. P transformator suchy z uzwojoniem w izolacji monolitycznej. S torrisolerad transformator med inkapslade lindningar. (421)

31. **extended rating type current transformer** : a current transformer having a rated continuous thermal current higher than rated primary current and for which accuracy requirements are prescribed at that current. ★ transformateur de courant à gamme étendue → *transformateur 24.* R трансформатор тока расширенного диапазона. D Stromwandler mit erweitertem Meßbereich

(Großbereichsstromwandler). E transformador de intensidad de gama extendida. I trasformatore di corrente a gamma estesa. N stroomtransformator met vergroot werkgebied. P przekładnik prądowy o rozszerzonym zakresie. S strömtransformator med utökat mätområde. (321)

32. **fully insulated current transformer** : a current transformer having as an integral part of its construction, insulation suitable for its rated insulation level. ★ transformateur de courant à isolation totale → *transformateur 25.* R полностью изолированный трансформатор тока. D vollisolierter Stromwandler. E transformador de intensidad con aislamiento total. I trasformatore di corrente a isolamento completo. N volledig geïsoleerde stroomtransformator. P przekładnik prądowy z pełną izolacją. S fullisolerad strömtransformator. (321)

33. **grounded voltage transformer** (*Syn.* earthed voltage transformer) : → *transformer 29*

34. **grounding transformer** (*Syn.* three-phase earthing transformer) : → *transformer 67*

35. **hybrid transformer** (*Syn.* hybrid coil) : a differential coupler comprising a transformer with several windings. ★ transformateur différentiel → *transformateur 61.* R гибридный трансформатор. D Hybridtransformator; Hybridspule. E transformador diferencial. I trasformatore differenziale. N vork; hybride transformator. P transformator różnicowy. S delningstransformator. (702)

36. **hybrid transformer** (*Syn.* induction coil) : → *coil 25*

37. **ideal transformer** : a reciprocal passive two-port network, maintaining the instantaneous power, in which the instantaneous voltage at one port is proportional to the instantaneous voltage at the other port. *Note.* — The impedance seen at one port is a fixed positive multiple of the terminating impedance at the other port. ★ transformateur idéal → *transformateur 65.* R идеальный трансформатор. D idealer Transformator; idealer Übertrager. E transformador ideal. I trasformatore ideale. N ideale transformator. P transformator idealny. S ideal transformator. (131)

38. **instrument transformer** : a transformer intended to transmit an information signal to measuring instruments, meters and protective or control devices. *Note.* — The term "instrument transformer" encompasses both current transformers and voltage transformers. ★ transformateur de mesure → *transformateur 44.* R измерительный трансформатор. D Meßwandler. E transformador de medida. I trasformatore di misura. N meettransformator. P przekładnik. S mättransformator. (321)

39. **interphase transformer** : an electromagnetic device enabling the operation in parallel of two or more commutating groups not in phase through inductive coupling between the windings placed on the same core. ★ transformateur interphase → *transformateur 67.* R уравнительный реактор. D Saugdrossel. E transformador interfase. I trasformatore interfasico; bobina di assorbimento. N koppeltransformator. P dławik wyrównawczy. S strömsugare. (551)

40. **matching transformer** : a transformer designed for insertion between two circuits having different impedances to optimize the power of the signal transferred. ★ transformateur d'adaptation → *transformateur 18.* R согласующий трансформатор. D Anpassungstransformator; Übertrager. E transformador de adaptación. I trasformatore d'adattamento. N aanpassingstransformator. P transformator dopasowujący. S anpassningstransformator. (151)

41. **measuring current transformer** : a current transformer intended to transmit an information signal to measuring instruments and meters. ★ transformateur de courant pour mesures → *transformateur 33.* R трансформатор тока для измерений. D Stromwandler für Meßzwecke. E transformador de intensidad para medida. I trasformatore di corrente per misura. N meetstroomtransformator. P przekładnik prądowy do promiarów. S strömtransformator för mätning. (321)

42. **measuring voltage transformer** : a voltage transformer intended to transmit an information signal to measuring instruments and meters. ★ transformateur de tension pour mesures → *transformateur 55.* R трансформатор напряжения для измерений. D Spannungswandler für Meßzwecke. E transformador de tensión para medida. I trasformatore di tensione per misura. N meetspanningstransformator. P przekładnik napięciowy do pomiarów. S spänningstransformator för mätning. (321)

43. **multi-core type current transformer** : a current transformer comprising a number of magnetically separated cores with individual secondary windings and a common primary winding. ★ transformateur de courant à plusieurs noyaux → *transformateur 27.* R трансформатор тока с несколькими магнитопроводами. D Mehrkernstromwandler. E transformador de intensidad de varios núcleos. I trasformatore di corrente a più nuclei. N stroomtransformator met meer dan één kern. P przekładnik prądowy wielordzeniowy. S flerkärnig strömtransformator. (321)

44. **non-encapsulated-winding dry-type transformer** : a dry-type transformer having none of the windings encapsulated with solid insulation. ★ transformateur de type sec à enroulements non encapsulés → *transformateur 60.* R сухой трансформатор с обмотками, не покрытыми оболочкой. D Trockentransformator außer Gießharztransformator. E transformador de tipo seco con arrollamientos no cubiertos. I trasformatore a secco con avvolgimenti non incapsulati. N droge transformator met niet-omsloten wikkelingen. P transformator suchy bez uzwojenia w izolacji monolitycznej. S ..... (421)

45. **oil-immersed type transformer** : a transformer of which the magnetic circuit and windings are immersed in oil. ★ transformateur immergé dans l'huile → *transformateur 66.* R масляный трансформатор. D Öltransformator. E transformador sumergido en aceite. I trasformatore in olio. N olietransformator. P transformator olejowy. S oljeisolerad transformator. (421,811)

46. **power rating of an arc furnace transformer** : → *rating 10*

47. **power transformer** : a static piece of apparatus with two or more windings which, by electro-magnetic induction, transforms a system of alternating voltage and current into another system of voltage and current usually of different values and at the same frequency for the purpose of transmitting electrical power. ★ transformateur de puissance → *transformateur 47.* R силовой трансформатор. D Transformator. E transformador de potencia. I trasformatore. N energietransformator. P transformator. S krafttransformator. (421,811)

48. **protective current transformer** : a current transformer intended to transmit an information signal to protective and control devices. *Note.* — The accuracy class of a protective current transformer is designated by its class index followed by the letter P (standing for "Protection"). The class index gives the limit of the absolute value of composite error at the rated accuracy limit primary current for the class concerned, as a percentage of this current. ★ transformateur de courant pour protection → *transformateur 35.* R трансформатор тока для защиты. D Stromwandler für Schutzzwecke. E transformador de intensidad para protección. I trasformatore di corrente per protezione. N beveiligingsstroomtransformator. P przekładnik prądowy do zabezpieczeń. S strömtransformator för reläskydd. (321)

49. **protective voltage transformer** : a voltage transformer intended to transmit an information signal to protective and control devices. *Note.* — The accuracy class of a protective voltage transformer is designated by its class index followed by the letter "P" (standing for "Protection"). The class index gives the limit of absolute value of the voltage error from 5% of rated voltage to a voltage corresponding to the rated voltage factor. ★ transformateur de tension pour protection → *transformateur 56.* R трансформатор напряжения для защиты. D Spannungswandler für Schutzzwecke. E transformador de tensión para protección. I trasformatore di tensione per protezione. N beveiligingsspanningstransformator. P przekładnik napięciowy do zabezpieczeń. S spänningstransformator för reläskydd. (321)

50. **quarter-wave transformer** : a quarter-wave length of transmission line that serves as an impedance transformer. ★ transformateur quart d'onde → *transformateur 69.* R четвертьволновый трансформатор. D $\lambda/4$-Transformator. E transformador en cuarto de onda. I trasformatore in quarto d'onda. N $1/4\lambda$-transformator. P transformator ćwierćfalowy. S kvartvågstransformator. (726)

51. **rated transformation ratio of a current transformer** : → *ratio 73*

52. **rated transformation ratio of a voltage transformer** : → *ratio 74*

53. **regulating transformer** : a transformer with a special winding divided into several sections enabling the voltage to be varied at will. ★ transformateur de réglage → *transformateur 48.* R регулирующий трансформатор.

D Regeltransformator. E transformador de regulación. I trasformatore di regolazione. N regeltransformator. P transformator regulacyjny. S reglerbar transformator. (811)

54. residual current transformer : a single, or a group of three, current transformer(s) so connected as to transform only the residual current. ★ transformateur de courant résiduel → *transformateur 37.* R трансформатор тока нулевой последовательности. D Stromwandler für Nullstromerfassung. E transformador de intensidad residual. I trasformatore per corrente residua. N homopolaire stroomtransformator. P przekładnik prądowy ziemnozwarciowy. S nollföljdsströmtransformator. (321)

55. residual voltage transformer : a three-phase voltage transformer or a group of three single-phase voltage transformers having secondary windings connected in broken delta so as to produce between the appropriate terminals a voltage representative of the residual voltage existing in the three-phase voltages applied to the primary terminals. ★ transformateur de tension résiduelle → *transformateur 57.* R трансформатор напряжения нулевой последовательности. D Spannungswandler zur Erfassung der Verlagerungsspannung. E transformador de tensión residual. I trasformatore per tensione residua. N homopolaire spanningstransformator. P przekładnik napięciowy ziemnozwarciowy. S summaspänningtransformator. (321)

56. sealed transformer : a transformer which is non-breathing, that is, so sealed that there can be no significant interchange between its contents and the external atmosphere. *Notes. 1* — In the case of oil-immersed transformers, these may or may not have a cushion of air (or other gas). *2* — Sealed transformers fall into two categories : a) transformers in which the total volume of oil, together with air (or other gas), or any combination thereof, remains constant over the temperature range. b) transformers in which the total volume of oil, air (or other gas), or any combination thereof, varies over the temperature range and this variation is accommodated by a sealed flexible container or a flexible membrane. ★ transformateur hermétique → *transformateur 64.* R герметичный трансформатор. D Hermetik-Transformator. E transformador hermético. I trasformatore sigillato. N hermetische gesloten transformator. P transformator hermetyczny. S (hermetiskt) sluten transformator. (421)

57. separate winding transformer : a transformer having windings with no common parts. *Note.* — A separate winding transformer having two windings may be designated a "double wound transformer". ★ transformateur à enroulements séparés → *transformateur 11.* R трансформатор с отдельными обмотками. D Transformator mit getrennten Wicklungen; Volltransformator. E transformador de arrollamientos separados. I trasformatore con avvolgimenti separati. N transformator met gescheiden wikkelingen. P transformator z oddzielnymi uzwojeniami. S fulltransformator. (421)

58. series transformer (*Syn.* booster transformer) : → *transformer 12*

59. set transformer (*Syn.* unit generator transformer) : → *transformer 77*

60. shell-type transformer (deprecated) : a transformer where the packets of laminations forming the core and yokes surround the windings and enclose generally the major parts of them. *Notes. 1* — Generally, shell-type transformers incorporate sandwich windings. *2* — Since there are types of transformer which do not come clearly within the categories of "core-type" and "shell-type", the use of these terms is deprecated. Generally they can be avoided by indicating the type of windings, i.e. "concentric" or "sandwich", and/or whether or not the magnetic circuit has unwound magnetic return paths. ★ transformateur cuirassé → *transformateur 17.* R броневой трансформатор (нерекомендуемый). D Manteltransformator. E transformador acorazado (desaconsejado). I trasformatore con nucleo corazzato. N transformator van het manteltype. P transformator płaszczowy. S manteltransformator. (421)

61. single-core type current transformer : a current transformer in which only one magnetic core with one secondary winding and one primary winding are provided. ★ transformateur de courant à noyau unique → *transformateur 26.* R трансформатор тока с одним магнитопроводом. D Einkernstromwandler. E transformador de intensidad de núcleo único. I trasformatore di corrente a nucleo singolo. N stroomtransformator met één kern. P przekładnik prądowy jednordzeniowy. S enkärnig strömtransformator. (321)

62. split core type current transformer : a current transformer without primary conductor, and primary insulation of its own, the magnetic circuit of which can be hinged open (or otherwise separated into two parts) and then closed around the insulated conductor carrying the current to be measured. ★ transformateur de courant à circuit magnétique ouvrant → *transformateur 23.* R разъемный трансформатор тока. D Zangenstromwandler; Anlegestromwandler. E transformador de intensidad abrible. I trasformatore di corrente a nucleo apribile. N stroomtransformator met gedeelde kern. P przekładnik prądowy z otwieranym rdzeniem. S öppningsbar strömtransformator. (321)

63. stepped-impedance transformer : a waveguide whose transverse cross-section dimensions change abruptly in a number of steps with each section between steps usually being a quarter-wave length long. ★ transformateur d'impédance à échelons → *transformateur 63.* R ступенчатый трансформатор полных сопротивлений. D Stufenübergang. E transformador de impedancias escalonado; transformador de impedancias telescópico. I trasformatore d'impedenza a gradini. N getrapte impedantietransformator. P transformator impedancji. S flerstegstransformator. (726)

64. summation current transformer : a transformer for the measurement of the sum of the instantaneous values of currents having the same frequency within a power system. ★ transformateur de courant sommateur → *transformateur 38.* R суммирующий трансформатор тока. D Summenstromwandler. E transformador de intensidad sumador. I trasformatore di corrente sommatore. N sommeringsstroomtransformator. P przekładnik prądowy sumujący. S summaströmtransformator. (321)

65. support type current transformer : a current transformer so arranged that it acts as a support for the conductor in the primary circuit. ★ transformateur de courant type support de conducteur primaire → *transformateur 40.* R опорный трансформатор тока. D Stützerstromwandler. E transformador de intensidad de tipo soporte. I trasformatore di corrente di tipo portante. N steunstroomtransformator. P przekładnik prądowy wsporczy. S ..... (321)

66. tapped transformer : a transformer comprising a tapped primary or secondary winding to obtain a variable secondary voltage. ★ transformateur à gradins → *transformateur 12.* R трансформатор с ответвлениями. D Stufentransformator. E transformador de tomas. I trasformatore a prese. N transformator met aftakking. P transformator zaczepowy. S transformator med lindningskopplaruttag. (811)

67. three-phase earthing transformer (*Syn.* grounding transformer (USA)) : a three-phase transformer intended for connection in a network without a neutral, to provide an artificial neutral. ★ transformateur triphasé de mise à la terre → *transformateur 72.* R трехфазный заземляющий трансформатор. D Sternpunktbildner-Transformator. E transformador trifásico de puesta a tierra. I trasformatore di messa a terra. N driefasensterpunttransformator. P transformator trójfazowy uziemiający. S jordningstransformator. (421)

68. transformer : a static electric energy transducer that transfers electric energy without change of frequency. ★ transformateur → *transformateur 9.* R трансформатор. D Transformator; Umspanner. E transformador. I trasformatore. N transformator. P transformator. S transformator. (151)

69. transformer bridge : → *bridge 21*

70. transformer circuit-breaker : → *circuit-breaker 20*

71. transformer e.m.f. : → *e.m.f. 7*

72. transformer substation : → *substation 41*

73. transformer substation : → *substation 42*

74. transformer with radially laminated core : a transformer in which the radially laminated central core is surrounded by the windings, in the form of concentric cylinders, and the shell is in the form of a number of external yokes arranged radially round the core and built up of radial laminations having negligible air gap to the core. ★ transformateur à noyau radial → *transformateur 13.* R трансформатор с радиально шихтованным сердечником. D Transformator mit radial

geblechtem Kern. E transformador de núcleo radial. I trasformatore a mantello. N transformator met radiaal gelamineerde kern. P transformator o rdzeniu pakietowanym. S transformator med radiellt laminerad kärna. (811)

75. **unearthed voltage transformer** (*Syn.* ungrounded voltage transformer (USA)) : a voltage transformer which has all parts of its primary winding, including terminals, insulated from earth at a level corresponding to its rated insulation level. ★ transformateur de tension non mis à la terre → *transformateur 54.* R незаземляемый трансформатор напряжения. D zweipolig isolierter Spannungswandler. E transformador de tensión no puesto a tierra. I trasformatore di tensione non messo a terra. N primair volledig geïsoleerde spanningstransformator. P przekładnik napięciowy z izolowanymi dwoma zaciskami uzwojenia pierwotnego. S ojordad spänningstransformator. (321)
76. **ungrounded voltage transformer** (*Syn.* unearthed voltage transformer) : → *transformer 75*
77. **unit generator transformer** (*Syn.* set transformer) : a transformer connected to the generator terminals through which output power of the generating set is transmitted to the system. ★ transformateur (principal) de tranche → *transformateur 68.* R генераторный трансформатор. D Maschinentransformator. E transformador principal; transformador de grupo. I trasformatore principale di unità. N transformator van de produktie-eenheid. P transformator blokowy. S aggregattransformator. (602)
78. **voltage matching transformer** : a voltage transformer for matching the rated secondary voltage of the main voltage transformer to the rated voltage of the burden. ★ transformateur de tension adaptateur → *transformateur 52.* R согласующий трансформатор напряжения. D Zwischenspannungswandler. E transformador de tensión adaptador. I trasformatore di tensione adattatore. N spanningstransformator voor aanpassingsdoeleinden. P przekładnik napięciowy wyrównawczy. S mellanspänningstransformator. (321)
79. **voltage transformer** : an instrument transformer in which the secondary voltage, in normal conditions of use, is substantially proportional to the primary voltage and differs in phase from it by an angle which is approximately zero for an appropriate direction of the connections. ★ transformateur de tension → *transformateur 49.* R трансформатор напряжения. D Spanungswandler. E transformador de tensión. I trasformatore di tensione. N spanningstransformator. P przekładnik napięciowy. S spänningstransformator. (321)
80. **wound primary type current transformer** : a current transformer in which the primary winding consists of a single or multi-turn coil. ★ transformateur de courant à primaire bobiné → *transformateur 28.* R катушечный трансформатор тока. D Wickelstromwandler. E transformador de intensidad de primario bobinado. I trasformatore di corrente con primario avvolto. N stroomtransformator met gewikkelde primaire geleider. P przekładnik prądowy zwojnicowy. S strömtransformator av spoltyp. (321)

trans-horizon

1. **trans-horizon propagation** : → *propagation 32*

transient

1. **direct-axis transient open-circuit time constant** : → *time constant 5*
2. **direct-axis transient reactance** : → *reactance 6*
3. **direct-axis transient short-circuit time constant** : → *time constant 6*
4. **direct-axis transient voltage** : → *voltage 51*
5. **prospective transient recovery voltage** : → *recovery voltage 3*
6. **quadrature-axis transient open-circuit time constant** : → *time constant 14*
7. **quadrature-axis transient reactance** : → *reactance 15*
8. **quadrature-axis transient short-circuit time constant** : → *time constant 15*
9. **quadrature-axis transient voltage** : → *voltage 159*
10. **transient** (adjective and noun) : pertaining to or designating a phenomenon or a quantity which varies between two consecutive steady states during a time interval short compared with the time-scale of interest. ★ transitoire → *transitoire 17.* R переходный (процесс). D transient; Transient (Adjektiv und Substantiv). E transitorio. I transitorio (aggetivo e nome). N overgangsverschijnsel; transiënt. P przejściowy. S transient. (101,161,351,702)
11. **transient current** : → *current 214*
12. **transient fault** (*Syn.* intermittent fault) : → *fault 48*
13. **transient fault** : → *fault 80*
14. **transient information** (*Syn.* fleeting information) : → *information 8*
15. **transient load characteristic** : → *characteristic 92*
16. **transient oscillation** : → *oscillation 19*
17. **transient overshoot** (*Syn.* overshoot) : → *overshoot 3*
18. **transient overvoltage** : → *overvoltage 15*
19. **transient recovery voltage** : → *recovery voltage 6*
20. **transient stability of a power system** : → *stability 21*
21. **transient state of a system** : → *state 46*

transient-decay

1. **transient-decay current** : → *current 215*

trans-ionospheric

1. **trans-ionospheric propagation** : → *propagation 33*

transistor

1. **bidirectional transistor** : a bipolar junction transistor (or field-effect transistor) that has substantially the same electrical characteristics when the electrodes normally designated as emitter (or source) and collector (or drain) are interchanged. ★ transistor bilatéral → *transistor 2.* R симметричный транзистор. D Zweirichtungs-Transistor; bidirektionaler Transistor. E transistor bidireccional. I transistore bidirezionale. N tweerichtingstransistor. P tranzystor obukierunkowy. S dubbelriktad transistor. (521)
2. **bipolar junction transistor** : a transistor having at least two junctions and whose functioning depends on both minority carriers and majority carriers. ★ transistor bipolaire à jonctions → *transistor 3.* R биполярный плоскостной транзистор. D bipolarer Sperrschicht-Transistor; Flächentransistor. E transistor bipolar de unión. I transistore bipolare a giunzione. N bipolaire junctietransistor. P tranzystor złączowy bipolarny. S bipolär skikttransistor. (521)
3. **depletion type field-effect transistor** : a field-effect transistor which has appreciable channel conductivity at zero gate-to-source voltage and whose channel conductivity may be increased or decreased according to the polarity of the applied gate-to-source voltage. ★ transistor à effet de champ à appauvrissement → *transistor à effet de champ 2.* R полевой транзистор, работающий в режиме обеднения. D Verarmungs-Isolierschicht-Feldeffekttransistor. E transistor de efecto de campo de agotamiento. I transistore a effetto di campo a impoverimento. N veldeffecttransistor van het verarmingstype. P tranzystor polowy o kanale zubożanym. S fälteffekttransistor av utarmningstyp. (521)
4. **enhancement type field-effect transistor** : a field-effect transistor which has approximately zero channel conductivity at zero gate-to-source voltage and whose channel may be made conductive by the application of a gate-to-source voltage of appropriate polarity. ★ transistor à effet de champ à enrichissement → *transistor à effet de champ 5.* R полевой транзистор, работающий в режиме обогащения. D Anreicherungs-Isolierschicht-Feldeffekttransistor. E transistor de efecto de campo de enriquecimiento. I transistore a effetto di campo ad arricchimento. N veldeffecttransistor van het verrijkingstype. P tranzystor polowy o kanale wzbogacanym. S fälteffekttransistor av anrikningstyp. (521)
5. **field-effect transistor** : a unipolar transistor in which the current flowing through a conduction channel is controlled by an electric field oriented in the direction perpendicular to that of the current. ★ transistor à effet de champ → *transistor à effet de champ 1.* R полевой транзистор. D Feldeffekttransistor. E transistor de efecto de campo. I transistore a effetto di campo. N veldeffecttransistor. P tranzystor polowy. S fälteffekttransistor. (521)
6. **insulated-gate field-effect transistor** : a field-effect transistor having one or more gate electrodes which are electrically insulated from the channel. ★ transistor à effet de champ à grille isolée → *transistor à effet de champ 6.* R полевой транзистор с изолированным затвором. D Isolierschicht-Feldeffekttransistor. E transistor de efecto de campo de rejilla aislada. I transistore a effetto di campo (a porta isolata) e a terminale di comando isolato (a porta isolata).

N veldeffecttransistor met geïsoleerde stuurelektrode. P tranzystor polowy o bramce izolowanej. S fälteffekttransistor med isolerat styre. (521)

7. **junction-gate field-effect transistor** : a field-effect transistor having one or more gate regions which form PN junction(s) with the channel. ★ transistor à effet de champ à jonction de grille → *transistor à effet de champ 7.* R полевой транзистор с затвором на основе перехода. D Feldeffekttransistor mit PN-Übergang; Sperrschicht-Feldeffekttransistor. E transistor de efecto de campo de unión de rejilla. I transistore a effetto di campo con terminale di comando a giunzione. N veldeffecttransistor met junctiestuurelektrode. P tranzystor polowy o bramce złączowej. S fälteffekttransistor med PN-styre. (521)
8. **metal-oxide-semiconductor field-effect transistor** (*Syn.* MOSFET (abbreviation)) : an insulated-gate field-effect transistor in which the insulating layer between each gate electrode and the channel is oxide material. ★ transistor à effet de champ «métal-oxyde semiconducteurs» → *transistor à effet de champ 8.* R полевой транзистор типа металл-окисел-полупроводник; полевой МОП-транзистор. D Feldeffekttransistor mit Metall-Oxid-Halbleiter-Aufbau; MOSFET. E transistor de efecto de campo «metal-óxido-semiconductor». I transistore a effetto di campo «metallo-ossido-semiconduttori» (abbreviazione); MOSFET (abbreviazione). N MOS-transistor. P tranzystor polowy tlenkowy; tranzystor (polowy) MOS. S fälteffekttransistor med oxidisolerat styre; MOS-transistor. (521)
9. **N-channel field-effect transistor** : a field-effect transistor which has an N-type conduction channel. ★ transistor à effet de champ à canal N → *transistor à effet de champ 3.* R N-канальный полевой транзистор. D N-Kanal-Feldeffekttransistor. E transistor de efecto de campo de canal N. I transistore a effetto di campo a canale N. N veldeffecttransistor met N-kanaal. P tranzystor polowy o kanale N. S N-kanal (fälteffekt)transistor. (521)
10. **P-channel field-effect transistor** : a field-effect transistor which has a P-type conduction channel. ★ transistor à effet de champ à canal P → *transistor à effet de champ 4.* R P-канальный полевой транзистор. D P-Kanal-Feldeffekttransistor. E transistor de efecto de campo de canal P. I transistore a effetto di campo a canale P. N veldeffecttransistor met P-kanaal. P tranzystor polowy o kanale P. S P-kanal (fälteffekt)transistor. (521)
11. **transistor** : a semiconductor device capable of providing amplification and having at least three electrodes. ★ transistor → *transistor 1.* R транзистор. D Transistor. E transistor. I transistore. N transistor. P tranzystor. S transistor. (521)
12. **unipolar transistor** : a transistor in which the current flow mechanism is predominantly by majority carriers. ★ transistor unipolaire → *transistor 4.* R униполярный транзистор. D Unipolartransistor. E transistor unipolar. I transistore unipolare. N unipolaire transistor. P tranzystor unipolarny. S unipolärtransistor. (521)

transit

1. **telegraph transit exchange** : → *exchange 27*
2. **transit** : 1) Pertaining to traffic in a network, to indicate that the sources generating the traffic and the destinations of the traffic are located outside this network. 2) Pertaining to an exchange or a switching centre used primarily as a switching point for traffic between other exchanges. ★ de transit → *transit 4.* R транзитный. D Transit; Durchgangs-. E de tránsito. I di transito. N transiet-. P tranzytowy. S transiterande. (714)
3. **transit angle** : → *angle 56*
4. **transit centre** (*Syn.* transit exchange) : → *exchange 28*
5. **transit exchange** : → *exchange 28*
6. **transit station** : → *station 41*
7. **transit traffic** : → *traffic 48*

transition

1. **balanced bridge transition** : bridge transition in which the difference between the currents in the motors and in the resistors is reduced to a minimum before the opening of the bridge connections. ★ transition par pont équilibré → *transition 17.* R сбалансированный переход по мостовой схеме. D Brückenschaltung im abgeglichenen Zustand. E transición por puente equilibrado. I transizione a ponte equilibrato. N gebalanceerde brugovergang. P przełączanie mostkowe zrównoważone. S överkoppling medelst balanserad brygga. (811)
2. **bridge transition** : transition comprising the two following characteristic phases : 1) Placing in parallel with each motor or motor group a resistor of equal value in such a way that the connection(s) between motors, termed "bridge connection(s)" carry the difference between the currents in the motors and in the resistors. 2) Opening the bridge connection(s). ★ transition par pont → *transition 16.* R переход по мостовой схеме. D Brückenschaltung. E transición por puente. I transizione a ponte. N brugovergang. P przełączanie mostkowe. S bryggöverkoppling. (811)
3. **closed circuit transition auto-transformer starting** (*Syn.* closed transition auto-transformer starting) : → *starting 6*
4. **closed transition auto-transformer starting** : → *starting 6*
5. **crossbar transition** (*Syn.* crossbar transformer) : → *transformer 22*
6. **impurity concentration transition zone** : → *zone 7*
7. **nuclear isomeric transition** : the spontaneous (radioactive) transition of one nuclear isomeric state into another, with the emission of a gamma-ray photon or a conversion electron. ★ transition isomérique nucléaire → *transition 13.* R ядерный изомерный переход. D isomere Kernumwandlung. E transicion isomérica nuclear. I transizione isomerica (nucleare). N nucleaire isomere overdracht. P izomeryczne przejście jądrowe. S isomer övergång. (881)
8. **open circuit transition auto-transformer starting** (*Syn.* open transition auto-transformer starting) : → *starting 12*
9. **open transition auto-transformer starting** : → *starting 12*
10. **short circuit transition** (*Syn.* shunt transition) : → *transition 11*
11. **shunt transition** (*Syn.* short circuit transition) : transition during which a shunt connection is used to maintain a number of motors in circuit whilst the current to the other motors is cut off. ★ transition par dérivation → *transition 15.* R переход методом шунтирования; переход методом короткого замыкания. D Nebenschlußumschaltung. E transición por derivación; transición por cortocircuito. I transizione in cortocircuito. N ..... P przełączanie bocznikowane. S shuntöverkoppling. (811)
12. **transition** : a transient phenomenon separating two successive signal elements having different significant conditions in a discretely-timed signal. ★ transition → *transition 7.* R переход. D Übergang. E transición. I transizione. N overgang. P przejście. S övergångsförlopp. (721)
13. **transition** : passage from one combination to another without total interruption of the motor current. ★ transition → *transition 8.* R переход. D Umschaltvorgang. E transición. I transizione. N overgang. P przełączanie silników. S överkoppling. (811)
14. **transition band** : → *band 32*
15. **transition contactor** : → *contactor 18*
16. **transition contacts** : → *contact 115*
17. **transition current** : → *current 216*
18. **transition frequency** : → *frequency 190*
19. **transition impedance** : → *impedance 67*
20. **transition joint** : → *joint 26*
21. **transition reactor** : → *reactor 47*
22. **transition region** : → *region 26*
23. **transition resistor** : → *resistor 26*
24. **transition switchgroup** : → *switchgroup 9*

transit-time

1. **charge transit time** : the time taken by a charge carrier in traversing a stated space. ★ temps de transit d'un porteur de charge → *temps de transit 5.* R время пролета носителя заряда. D Ladungsträgerlaufzeit. E tiempo de paso de un portador de carga. I tempo di transito di un portatore di carica. N ladingslooptijd. P czas przelotu. S löptid. (531)
2. **signal transit time** : the time interval between the arrival of a delta light pulse of a stated amplitude at the entrance window of the device and the time at which the output pulse reaches a stated value. ★ temps de transit du signal → *temps de transit 4.* R время прохождения сигнала. D Signallaufzeit.

E tiempo de paso de la señal. I tempo di transito del segnale. N impulsvertraging. P czas przejścia (sygnału). S signallöptid. (531)

3. **transit time** (in a photomultiplier tube) : the time between the arrival at the photocathode of a light pulse having a finite flux and infinitesimal duration, and the occurrence of a stated point (peak amplitude for instance) on the output current pulse. ★ temps de transit → *temps de transit 3.* R время пролета (в фотоумножителе). D Laufzeit (in einem SEV mit Photokathode). E tiempo de tránsito (en un tubo fotomultiplicador). I tempo di transito (in un tubo fotomoltiplicatore). N looptijd (in een fotomultiplicatorbuis). P czas przelotu (w fotopowielaczu). S löptid. (391)
4. **transit time** : for a break-before-make change-over contact, the time interval during with both contact circuits are open. ★ temps de transfert → *temps de transfert 1.* R время переключения. D Umschlagzeit. E tiempo de tránsito. I tempo di trasferimento. N overslagtijd. P czas przerwy przy przełączaniu. S övergångstid. (446)
5. **transit time** (of a switch with two terminations per pole) : 1) The time interval between the instant when the snap action mechanism operates and the instant when the contact is made. For switches of more than one pole, transit time shall be calculated to the last make. 2) The time interval between the instant when contact is broken and the instant when the moving contact reaches the end stop. ★ durée de parcours → *durée 52.* R время срабатывания (выключатель с двумя выводами на полюс). D Umschlagzeit (für einen Schalter mit 2 Anschlüssen pro Pol). E duración de recorrido (de un interruptor con dos terminales por polo). I tempo di commutazione. N looptijd. P czas przejścia (w łączniku o zestykach dwustykowych). S omslagstid (hos mikroströmställare). (581)
6. **transit time** (of a changeover switch with three or four terminations per pole) : the time interval between the instant when the moving contact leaves one fixed contact and the instant when it reaches the next fixed contact. For switches of more than one pole, transit time shall be calculated from the first break to the last make. ★ durée de parcours → *durée 53.* R время срабатывания (переключатель с тремя или четырьмя выводами на полюс). D Umschlagzeit (für einen Schalter mit 3 oder 4 Anschlüssen pro Pol). E duración de recorrido (de un conmutador con tres o cuatro terminales por polo). I tempo di commutazione. N looptijd. P czas przejścia (w łączniku o zestykach przełącznych). S omslagstid (hos mikroströmställare). (581)
7. **transit time jitter** : → *jitter 6*
8. **transit-time spread** : the variation in the times of occurrence of a stated point on the output current pulses arising from the application of delta light pulses to the entrance window of the device. ★ étalement du temps de transit → *étalement 3.* R разброс времени прохождения сигнала. D Signallaufzeitunterschied. E dispersión del tiempo de paso. I dispersione del tempo di transito. N impulsverbreding. P rozrzut czasu przejścia. S löptidsspridning. (531)

translating

1. **channel translating equipment** : → *equipment 12*
2. **group translating equipment** : → *equipment 37*
3. **hypergroup translating equipment** (*Syn.* 15-supergroup assembly translating equipment) : → *equipment 87*
4. **mastergroup translating equipment** : → *equipment 48*
5. **supergroup translating equipment** : → *equipment 75*
6. **supermastergroup translating equipment** : → *equipment 76*
7. **15-supergroup assembly translating equipment** : → *equipment 87*

translation

1. **Desieter telegraph translation** : a device providing on two conductors two transmission channels working independently in opposite directions with direct current transmission. *Note.* — This device has been designed to avoid the necessity of earth-return in telex urban networks. ★ translation Desieter → *translation 3.* R телеграфная трансляция Дезитера. D ..... E traslación de supresión de tierra; traslación Desieter. I traslazione Desieter. N Desieter-telegraaftranslatie. P translacja telegraficzna Desietera. S Desieter-överdrag. (721)
2. **frequency translation** : the transfer of all the spectral components of a signal from one position in the frequency spectrum to another, in such a way that the frequency difference for each pair of components is preserved as well as their relative amplitude and relative phase. *Notes. 1* — Frequency translation may be accompanied by frequency inversion, in which case the sign of the frequency difference between any pair of components is reversed. *2* — A composite signal produced by frequency division multiplexing may itself be subjected to further frequency translation. ★ transposition en fréquence → *transposition 17.* R преобразование частоты; частотное преобразование. D Frequenzumsetzung; Frequenzversatz. E transposición en frecuencia. I trasposizione di frequenza. N frequentieomzetting. P przemiana częstotliwości. S frekvenstransponering. (702,704)
3. **translation** (in switching) : the conversion of address information into an alternative form necessary for routing and charging. ★ traduction → *traduction 2.* R преобразование (в коммутации). D Umwandlung. E traducción (en conmutación). I traduzione. N conversie; vertaling. P przeliczanie (w komutacji). S översättning. (714)
4. **translation** (in telegraphy and data transmission) : function of a telegraph receiver in reestablishing the text of a message from the received signal, including the recording of the text. ★ traduction → *traduction 3.* R прием; дешифровка (в телеграфии и передаче данных). D Übersetzung (in der Telegrafie und Datenübertragung). E traducción (en telegrafía y transmisión de datos). I traduzione. N translatie (bij telegrafie en datatransmissie). P odtwarzanie (w telegrafii i teledacji). S översättning. (721)

translator

1. **translator** (in switching) : a functional unit that performs the translation of address information. ★ traducteur → *traducteur 2.* R преобразователь (в коммутации). D Umwerter. E traductor (en conmutación). I traduttore. N nummeronderzoeker. P przelicznik (w komutacji). S översättare. (714)

translucent

1. **translucent medium** : → *medium 29*

transmission

1. **(amplitude) transmission factor** : → *factor 10*
2. **analogue carrier transmission** (*Syn.* multichannel carrier transmission) : → *transmission 42*
3. **analogue transmission** : the transmission of an analogue signal. ★ transmission analogique → *transmission 64.* R аналоговая передача. D analoge Übertragung. E transmisión analógica. I trasmissione analogica. N analoge transmissie. P transmisja analogowa. S analog överföring. (704)
4. **anisochronous transmission** : a transmission such that between any two significant instants in the same block or character, there is always an integral number of unit intervals. Between two significant instants located in a different block or character, there is not always an integral number of unit intervals. ★ transmission anisochrone → *transmission 66.* R анизохронная передача. D anisochrone Übertragung. E transmisión anisócrona. I trasmissione asincrona. N anisochrone transmissie; anisochrone overdracht. P transmisja anizochroniczna. S anisokron överföring. (721)
5. **asynchronous telecontrol transmission** (*Syn.* start-stop telecontrol transmission) : → *transmission 61*
6. **basic transmission loss (of a radio link)** : → *loss 7*
7. **beam transmission line** : → *line 6*
8. **bilateral transmission** : a transmission in which the output of each motor is transmitted from both ends of its shaft. ★ transmission bilatérale → *transmission 70.* R двухсторонний привод. D zweiseitiger Antrieb. E transmisión bilateral. I trasmissione bilaterale. N symmetrische aandrijving. P przekładnia obustronna. S dubbelsidig kraftöverföring. (811)
9. **burst transmission** : a method of transmission in which information from a given source is transferred in a series of short time-intervals. *Note.* — The active periods are known as bursts. ★ transmission par rafales → *transmission 115.* R передача пачками. D Burstübertragung. E transmisión a ráfagas. I trasmissione a burst. N lawinetransmissie. P transmisja (izochronicznie) przerywana; transmisja (izochronicznie) wtrąceniowa. S skuröverföring. (704,721)
10. **byte-serial transmission** : transmission in which successive n-bit bytes follow one another in sequence; the elements of each

byte may be transmitted serially or in parallel. ★ transmission multiplet-série → *transmission 99.* R последовательная передача байтов. D byte-serielle Übertragung. E transmisión multiplete-serie. I trasmissione seriale di byte. N seriële transmissie van bytes. P transmisja szeregowa bajtowa. S serieöverföring av bitgrupper. (721)

11. **carrier transmission** : a form of transmission in which the transmitted signal is the result of the modulation of one or more carriers by one or more signals. *Notes. 1* — This term is usually qualified by the method of modulation, e.g. "single sideband (carrier) transmission". *2* — A transmission system using carrier transmission is known as a "carrier system". ★ transmission par courant porteur → *transmission 111.* R передача на несущей частоте. D Trägerfrequenzübertragung. E transmisión por corriente portadora. I trasmissione a frequenze vettrici. N draaggolftransmissie. P transmisja nośna. S bärfrekvensöverföring. (704,721)
12. **character-serial transmission** : transmission in which successive characters follow one another in sequence; the elements of each character may be transmitted serially or in parallel. ★ transmission caractère-série → *transmission 71.* R последовательная передача знаков. D zeichenserielle Übertragung. E transmisión carácter-serie. I trasmissione seriale di caratteri. N seriële transmissie van karakters. P transmisja szeregowa znakowa. S serieöverföring av tecken. (721)
13. **combined heat transmission** : a mode of heat transmission in which the propagation of heat takes place simultaneously by conduction, convection and radiation, or by two of these phenomena. ★ transmission combinée → *transmission 73.* R комбинированная теплопередача. D kombinierte Wärmeübertragung. E transmisión de calor combinada. I trasmissione combinata. N gecombineerd warmtetransport. P przenikanie ciepła złożone. S kombinerad värmeöverföring. (841)
14. **cyclic transmission** (in telecontrol) : a transmission method in which the message sources are scanned and messages are transmitted cyclically according to a definite sequence. ★ transmission cyclique → *transmission 75.* R циклическая передача (в телемеханике). D zyklische Übertragung. E transmisión cíclica (en telecontrol). I trasmissione ciclica (nel telecontrollo). N cyclische transmissie. P transmisja cykliczna (w sterowaniu zdalnym). S cyklisk överföring. (371)
15. **data transmission** : the conveying of data from one place to another by telecommunication. ★ transmission de données → *transmission 77.* R передача данных. D Datenübertragung. E transmisión de datos. I ..... N gegevensoverdracht; datatransmissie. P telewizja. S dataöverföring. (701,721)
16. **diffuse transmission** : diffusion by transmission in which, on the macroscopic scale, there is no regular transmission. ★ transmission diffuse → *transmission 85.* R диффузное пропускание. D gestreute Transmission; diffuse Transmission. E transmisión difusa. I trasmissione diffusa. N diffuse doorlating. P przepuszczanie rozproszone. S diffus transmission. (845)
17. **digital transmission** : the transmission of a digital signal. ★ transmission numérique → *transmission 105.* R цифровая передача. D digitale Übertragung. E transmisión numérica. I trasmissione numerica. N digitale transmissie. P transmisja cyfrowa. S digital överföring. (704)
18. **digital transmission** (of a discretely-timed signal) : transmission of a digital signal representing a discretely-timed signal after sampling at a frequency greater than the converse of its minimum significant interval and quantization. ★ transmission numérique → *transmission 106.* R цифровая передача (дискретного во времени сигнала). D digitale Übertragung. E transmisión digital (de una señal discreta). I trasmissione numerica. N digitale transmissie (van een tijd-discreet signaal). P transmisja cyfrowa (sygnału dyskretnego czasowego). S digital överföring. (721)
19. **digital transmission system** : → *system 45*
20. **direct current transmission** : a form of transmission of discretely-timed signals where significant conditions are effected by applying to conductors voltages supplied from direct current sources. ★ transmission par courant continu → *transmission 110.* R передача постоянным током. D Gleichstromübertragung. E transmisión por corriente continua. I trasmissione in corrente continua. N gelijkstroomtransmissie. P transmisja sygnałem naturalnym. S likströmsöverföring. (721)
21. **direct transmission** (*Syn.* regular transmission) : → *transmission 55*
22. **double current transmission** : a form of two-conditions direct current transmission effected by applying two voltages in opposite polarity, producing currents in opposite directions. ★ transmission par double courant → *transmission 112.* R передача двухполюсным током. D Doppelstromübertragung. E transmisión por doble corriente. I trasmissione bipolare. N dubbelstroomtransmissie. P transmisja zwrotem prądu. S dubbelströmsöverföring. (721)
23. **electric transmission** : a transmission system in which the mechanical output of a prime mover is converted to electric traction power to provide the drive. ★ transmission électrique → *transmission 90.* R электрическая передача. D elektrische Übertragung. E transmisión eléctrica. I trasmissione elettrica. N mechanisch-elektrische vermogensomzetting. P przekładnia elektryczna. S elektrisk transmission. (811)
24. **electron-beam transmission efficiency** : → *efficiency 21*
25. **end of transmission signal** : → *signal 79*
26. **european master reference for telephone transmission** : → *reference 9*
27. **exponential transmission line** : → *line 35*
28. **flanking transmission** : transmission of sound from a source room to an adjacent receiving room but not via the common partition. ★ transmission indirecte → *transmission 91.* R косвенная передача. D Flanken-Übertragung. E transmisión indirecta. I trasmissione indiretta. N flankerende overdracht. P transmisja pośrednia. S flanktransmission. (801)
29. **four-wire transmission** (*Syn.* 4-wire transmission) : a method of transmission in which the go and return channels use separate paths, or separate frequency bands, or separate time intervals, or other means of separation throughout. ★ transmission à quatre fils → *transmission 62.* R четырехпроводная передача. D Vierdraht-Übertragung; 4-Draht-Übertragung. E transmisión por cuatro hilos. I trasmissione a quattro fili. N vierdraadstransmissie; vierdraadsoverdracht. P transmisja dwutorowa. S fyrtrådsöverföring. (704)
30. **free-space basic transmission loss** : → *loss 33*
31. **heat transmission** : a phenomenon of natural or forced heat transfer by conduction, convection and/or radiation from one temperature level to a lower temperature level. ★ transmission de chaleur → *transmission 76.* R теплопередача. D Wärmeübertragung. E transmisión de calor. I trasmissione di calore. N warmtetransport. P przenikanie ciepła. S värmeöverföring. (841)
32. **heat transmission coefficient** : → *coefficient 27*
33. **input signal (of a transmission system)** : → *signal 105*
34. **interband transmission** : a form of carrier transmission in which the transmission channel is in a narrow frequency band between two bands used to constitute telephone channels. ★ transmission inter-bandes → *transmission 94.* R межполосная передача. D Zwischenbandübertragung. E transmisión interbanda. I trasmissione interbande. N interbandtransmissie. P transmisja międzypasmowa. S mellanbandsöverföring. (721)
35. **interruption of transmission** (*Syn.* (transmission) break) : → *break 11*
36. **intraband transmission** : a carrier transmission in a narrow band of frequencies appropriated inside the frequency band of a telephone channel to permit simultaneously a telephone transmission and a transmission by a discretely-timed signal. ★ transmission intrabande → *transmission 95.* R внутриполосная передача. D Einlagerungsübertragung. E transmisión intrabanda. I trasmissione intrabanda. N binnen-de-bandtransmissie. P transmisja współrozmówna. S inlagringsöverföring. (721)
37. **(ionospheric) transmission curve** : → *curve 16*
38. **(ionospheric) transmission factor** : → *factor 101*
39. **isotropic diffuse transmission** : diffuse transmission in which the spatial distribution of the transmitted radiation is such that the radiance or luminance is the same in all directions in the hemisphere into which the radiation is transmitted. ★ transmission diffuse isotrope → *transmission 86.* R изотропное диффузное пропускание. D vollkommen gestreute Transmission; isotrope diffuse Transmission.

E transmisión difusa isótropa. I trasmissione diffusa isotropa. N isotrope diffuse doorlating. P przepuszczanie rozproszone równokierunkowe. S likformigt diffus transmission. (845)

40. **magnetic transmission** (*Syn.* magnetic coupling) : → *coupling 31*

41. **mixed transmission** : partly regular and partly diffuse transmission. ★ transmission mixte → *transmission 96.* R смешанное пропускание. D gemischte Transmission. E transmisión mixta. I trasmissione mista; trasmissione semidiffusa; trasmissione semiregolare. N gemengde doorlating. P przepuszczanie kierunkowo-rozproszone. S blandad transmission. (845)

42. **multichannel carrier transmission** (*Syn.* multichannel FDM transmission; analogue carrier transmission) : a form of carrier transmission on a common path provided for several independent signals by a combination of single or double sideband transmission and frequency division multiplexing. *Notes. 1* — The carriers may be transmitted or suppressed. *2* — CCITT normally uses the term "analogue carrier transmission". *3* — A transmission system using multichannel carrier transmission is known as a "multichannel carrier system", or a "multichannel FDM system", or an "analogue carrier system". ★ transmission (multiplex) à courants porteurs → *transmission 101.* R многоканальная передача с ЧПК; многоканальная передача на несущей частоте; аналоговая передача на несущей частоте. D Mehrkanalträgerfrequenzübertragung; Mehrkanal-TF-Übertragung; Analogträgerübertragung. E transmisión (múltiplex) por corrientes portadoras; transmisión analógica por corrientes portadoras. I trasmissione multicanale a frequenze vettrici; trasmissione FDM multicanale; trasmissione analogica multicanale. N draaggolftransmissie met meer kanalen; analoge draagolf-transmissie met meer kanalen. P transmisja nośna wielokanałowa. S flerkanals frekvensmultiplex. (704)

43. **multichannel FDM transmission** (*Syn.* multichannel carrier transmission) : → *transmission 42*

44. **multichannel PCM transmission** : a form of transmission on a common path provided for several independent signals by a combination of pulse code modulation and time division multiplexing. *Note.* — A transmission system using multichannel PCM transmission is known as a "multichannel PCM system". ★ transmission multiplex MIC → *transmission 102.* R многоканальная передача с ИКМ. D Mehrkanal-PCM-Übertragung. E transmisión múltiplex MIC; transmisión múltiplex por impulsiones y codificación. I trasmissione multicanale a impulsi codificati (PCM); trasmissione PCM multicanale. N multiplex PCM-transmissie. P transmisja wielokanałowa impulsowo-kodowa. S flerkanals pulskodsmultiplex. (704)

45. **multiplex transmission** (*Syn.* multiplexed transmission) : a method of transmission employing multiplexing at the input terminal of a transmission path and complementary demultiplexing at the output terminal. *Note.* — A transmission system using multiplex transmission is known as a "multiplex system". ★ transmission multiplex → *transmission 100.* R многоканальная передача. D Multiplexübertragung. E transmisión múltiplex; (transmisión por) multiplexado. I trasmissione multiplex; trasmissione multiplata. N multiplextransmissie. P transmisja krotna. S multiplexöverföring. (704)

46. **multiplexed transmission** (*Syn.* multiplex transmission) : → *transmission 45*

47. **on-off transmission** : a two-conditions single current transmission where one significant condition is represented by applied zero voltage and no current in the circuit. ★ transmission par tout ou rien → *transmission 117.* R передача токовыми-бестоковыми посылками; передача включением-выключением. D Ein-Aus-Übertragung. E transmisión por todo o nada. I trasmissione per tutto o niente. N aan/uit-transmissie. P transmisja przerwowa. S slut-brytöverföring. (721)

48. **output signal (of a transmission system)** : → *signal 137*

49. **parallel (digital) transmission** : the simultaneous transmission of a group of signal elements over the appropriate number of parallel paths between two points. ★ transmission (numérique) (en) parallèle → *transmission 107.* R параллельная (цифровая) передача. D parallele (digitale) Nachrichtenübertragung. E transmisión (numérica) en paralelo. I trasmissione (numerica) parallela. N paralleltransmissie. P transmisja (cyfrowa) równoległa. S parallellöverföring. (704)

50. **parallel transmission** : the simultaneous transmission of the signal elements of a character signal or block signal on separate channels. ★ transmission parallèle → *transmission 118.* R параллельная передача. D Parallelübertragung. E transmisión paralelo. I trasmissione parallela. N parallel-transmissie. P transmisja równoległa. S parallellöverföring. (721)

51. **power transmission factor** : → *factor 138*

52. **radial transmission line** : → *line 128*

53. **ray path transmission loss** : → *loss 79*

54. **reference apparatus for the determination of transmission performance ratings** : → *apparatus 13*

55. **regular transmission** (*Syn.* direct transmission) : transmission in accordance with the laws of geometrical optics, without diffusion. ★ transmission régulière → *transmission 119.* R направленное пропускание. D gerichtete Transmission. E transmisión regular. I trasmissione regolare. N gerichte doorlating. P przepuszczanie kierunkowe. S reguljär transmission. (845)

56. **serial (digital) transmission** : the successive transmission of signal elements over a single path between two points. ★ transmission (numérique) (en) série → *transmission 108.* R последовательная (цифровая) передача. D serielle (digitale) Nachrichtenübertragung. E transmisión (numérica) en serie. I trasmissione (numerica) seriale. N serietransmissie. P transmisja (cyfrowa) szeregowa. S serieöverföring. (704)

57. **serial transmission** : transmission of the signal elements of a character signal or block signal at successive time intervals, either contiguous or not. ★ transmission série → *transmission 122.* R последовательная передача. D Serienübertragung. E transmisión serie. I trasmissione seriale. N serietransmissie. P transmisja szeregowa. S serieöverföring. (721)

58. **single current transmission** : direct current transmission effected by applying voltages of the same polarity, producing currents of the same direction. ★ transmission par simple courant → *transmission 116.* R передача однополюсным током. D Einfachstromübertragung. E transmisión por corriente simple. I trasmissione unipolare. N enkelstroomtransmissie. P transmisja wartością prądu. S enkelströmsöverföring. (721)

59. **spontaneous transmission** : a transmission method in which messages are transmitted only when an event occurs at the sending station. ★ transmission spontanée → *transmission 123.* R спорадическая передача. D spontane Übertragung. E transmisión espontánea. I trasmissione spontanea. N spontane transmissie. P transmisja spontaniczna. S spontan överföring. (371)

60. **start-stop system of data transmission** : → *system 198*

61. **start-stop telecontrol transmission** (*Syn.* asynchronous telecontrol transmission) : a telecontrol transmission method which uses groups of isochronous signals elements separated by time intervals of arbitrary durations. ★ transmission de téléconduite arythmique → *transmission 81.* R асинхронная телемеханическая передача. D Start-Stop-Fernwirkübertragung; asynchrone Fernwirkübertragung. E sistema de telecontrol asíncrono. I trasmissione di telecontrollo start-stop; trasmissione di telecontrollo asincrona. N asynchroon afstandsbesturingssysteem. P system (sterowania zdalnego) asynchroniczny. S asynkron överföring. (371)

62. **start-stop transmission** : transmission using start-stop signals in which each equal length group of signal elements representing a character or a block is preceded by a start signal and is followed by a stop signal. ★ transmission arythmique → *transmission 67.* R стартстопная передача. D Start-Stop-Übertragung. E transmisión arrítmica. I trasmissione start-stop. N start/stop-transmissie; start/stop-overdracht. P transmisja arytmiczna; transmisja start-stopowa. S start-stoppöverföring. (721)

63. **stepped start-stop system of data transmission** : → *system 203*

64. **sub-channel phase transmission** : the condition in which a character transmitted on a particular sub-channel is received on the correct sub-channel. ★ (état de) sous-voie en phase → *sous-voie 1.* R передача с фазированием подканалов. D ..... E (estado de) subcanal de fase. I canale sottomultiplo in fase. N fasetransmissie via subkanaal. P zsynfazowanie podkanałów. S delkanalfas. (721)

65. **sub-telephone transmission** : a transmission on a telephone line using one or more frequency channels below that occupied by the telephone signals. ★ transmission infra-téléphonique → *transmission 93.* R подтональная передача. D Unterlagerungsübertragung. E transmisión infratelefónica. I trasmissione sotto la banda fonica. N onder-de-telefoonband-transmissie. P transmisja podakustyczna. S underlagringsöverföring. (721)
66. **super-audio transmission** (*Syn.* super-telephone transmission) : → *transmission 67*
67. **super-telephone transmission** (*Syn.* super-audio transmission) : a form of transmission using an alternating current, or currents, having a frequency or frequencies above those in the telephone frequency channel, generally above 3400 Hz. ★ transmission supra-téléphonique → *transmission 125.* R надтональная передача. D Überlagerungsübertragung. E transmisión supratelefónica. I trasmissione fuori banda; trasmissione sopra la banda fonica. N boven-de-telefoonband-transmissie. P transmisja nadrozmówna. S överlagringsöverföring. (721)
68. **synchronous data transmission** : a system of data transmission using synchronous transmission. ★ transmission de données synchrone → *transmission 80.* R синхронная передача данных. D synchrone Datenübertragung. E transmisión de datos síncrona. I trasmissione dati sincrona. N synchrone datatransmissie. P system teledacyjny synchroniczny. S synkron dataöverföring. (721)
69. **synchronous telecontrol transmission** : a telecontrol transmission method which uses isochronous signals the elements of which are separated by time intervals whose durations are equal to or multiple of a unit time interval and in which telecontrol equipments are operating continuously at substantially the same rate. ★ transmission de téléconduite synchrone → *transmission 83.* R синхронная телемеханическая передача. D synchrone Fernwirkübertragung. E sistema de telecontrol síncrono. I trasmissione di telecontrollo sincrona. N synchroon afstandsbesturingssysteem. P system (sterowania zdalnego) synchroniczny. S synkron överföring. (371)
70. **synchronous transmission** : transmission using isochronous signals in which the sending and receiving instruments are operating continuously in a constant time difference between homologous significant instants. ★ transmission synchrone → *transmission 126.* R синхронная передача. D Synchronübertragung. E transmisión síncrona. I trasmissione sincrona. N synchrone transmissie; synchrone overdracht. P transmisja synchroniczna. S synkron överföring. (721)
71. **terminal installation for data transmission** (*Syn.* data station) : → *station 7*
72. **time division multiplex transmission** : a transmission using a time-division multiplexing technique. ★ transmission multiplex temporelle → *transmission 104.* R передача с временным разделением каналов. D Zeitmultiplexübertragung. E transmisión múltiple temporal. I trasmissione a divisione di tempo. N transmissie met tijdverdelings multiplex. P transmisja wielokrotna czasowa. S tidsmultiplexöverföring. (721)
73. **transmission** : the transfer of information from one point to one or more other points by means of signals. *Notes. 1* — Transmission can be effected directly or indirectly, with or without intermediate storage. *2* — The use of the English word "transmission" in the sense of "emission" in radiocommunication is deprecated. ★ transmission → *transmission 53.* R передача. D Übertragung. E transmisión. I trasmissione. N transmissie; informatie-overdracht. P transmisja. S transmission. (701,704)
74. **transmission** (in broadcasting) (*Syn.* emission) : 1) Radio waves or signals produced by a broadcasting transmitter. 2) A programme, or a defined part of a programme. ★ émission → *émission 19.* R передача (в радиовещании). (723)
75. **transmission** : passage of radiation through a medium without change of frequency of its monochromatic components. ★ transmission → *transmission 54.* R пропускание. D Transmission. E transmisión. I trasmissione. N transmissie; doorlating. P przepuszczanie. S transmission. (841,845)
76. **(transmission) break** : → *break 11*
77. **transmission bridge** : → *bridge 22*
78. **transmission capacity of a link** : → *capacity 29*
79. **(transmission) channel** : → *channel 53*
80. **transmission control (function)** : → *control 196*
81. **transmission curve** (*Syn.* attenuation curve) : → *curve 3*
82. **transmission density meter** : → *meter 66*
83. **transmission efficiency** (of a thermo-electric vehicle) : → *efficiency 45*
84. **transmission error alarm** : → *alarm 8*
85. **transmission frequency meter** : → *meter 67*
86. **transmission line** : → *line 168*
87. **transmission line** : → *line 169*
88. **(transmission line) adapter** : → *adapter 2*
89. **transmission loss** : → *loss 107*
90. **transmission loss** : → *loss 108*
91. **transmission loss** : → *loss 109*
92. **transmission loss** (*Syn.* sound reduction index) : → *index 40*
93. **transmission loss (of a radio link)** : → *loss 111*
94. **transmission losses** : → *loss 112*
95. **transmission medium** : → *medium 30*
96. **transmission mode** (*Syn.* mode of propagation) : → *mode 56*
97. **transmission of electricity** : → *electricity 7*
98. **transmission of integrated totals** (*Syn.* telecounting) : → *telecounting 1*
99. **transmission on demand** : a transmission method in which messages are transmitted as a result of a request such as an interrogation command from a control centre or masterstation. ★ transmission dirigée → *transmission 88.* R передача по запросу. D Übertragung auf Abfrage. E transmisión a petición. I trasmissione a richiesta. N transmissie op verzoek. P transmisja na żądanie. S begärd överföring; avfrågad överföring. (371)
100. **(transmission) path** : → *path 27*
101. **transmission performance** : → *performance 18*
102. **transmission performance** : → *performance 19*
103. **transmission performance rating** : → *rating 17*
104. **transmission primaries** : → *primary 43*
105. **transmission semiconductor detector** : → *semiconductor detector 12*
106. **transmission system** : → *system 240*
107. **transmission target** : → *target 13*
108. **transmission thickness meter** : → *meter 68*
109. **transmission wavemeter** (*Syn.* transmission frequency meter) : → *meter 67*
110. **transmission with decision feedback** : a transmission method in which the receiving station transmits positive or negative acknowlegement to the initiating station. ★ transmission avec accusé de réception → *transmission 68.* R передача с решающей обратной связью. D Übertragung mit Empfangsbestätigung. E transmisión con confirmación. I trasmissione con conferma di ricezione. N transmissie met ontvangstmelding. P transmisja ze sprzężeniem zwrotnym decyzji. S överföring med kvittering. (371)
111. **transmission with information feedback** : a transmission method in which the receiving station retransmits the complete information to the initiating station where it is compared to verify that the information content is the same as originally transmitted. ★ transmission avec contrôle par retour → *transmission 69.* R передача с информационной обратной связью. D Echobetrieb. E transmisión con devolución para confirmación. I trasmissione con eco. N transmissie met terugmelding. P transmisja ze sprzężeniem zwrotnym informacji. S överföring med dubbeltelegram. (371)
112. **two-wire transmission** (*Syn.* 2-wire transmission) : a method of transmission in which the go and return channels use the same path and the same frequency band at the same time. ★ transmission à deux fils → *transmission 59.* R двухпроводная передача. D Zweidraht-Übertragung; 2-Draht-Übertragung. E transmisión por dos hilos. I trasmissione a due fili. N tweedraadstransmissie; tweedraadsoverdracht. P transmisja jednotorowa. S tvåtrådsöverföring. (704)
113. **uniform transmission line** : → *line 172*
114. **unilateral transmission** : a transmission in which the output of each motor is transmitted from one end of its shaft.

★ transmission unilatérale → *transmission 127.* R односторонний привод. D einseitiger Antrieb. E transmisión unilateral. I trasmissione unilaterale. N asymmetrische aandrijving. P przekładnia jednostronna. S enkelsidig kraftöverföring. (811)

115. **video transmission** : transmission of television images to specific destinations, sometimes with the associated sound. ★ vidéotransmission → *vidéotransmission 1.* R видеопередача. (723)
116. **2-wire transmission** (*Syn.* two-wire transmission) : → *transmission 112*
117. **4-wire transmission** (*Syn.* four-wire transmission) : → *transmission 29*

transmissivity

1. **atmospheric transmissivity** (T) : regular luminous transmittance of the atmosphere over a path of a specified length d_o. *Note.* — In German, the terms "Transmissionsfaktor" and "Sichtwert" refer respectively to lengths of one kilometre and one nautical mile. ★ transmissivité atmosphérique → *transmissivité 1.* R удельный коэффициент пропускания атмосферы. D atmosphärische Transmissivität. E transmisividad atmosférica. I coefficiente di trasmissione atmosferico. N atmosferische transmissiegraad. P przepuszczalność właściwa atmosferyczna. S atmosfärisk transmissivitet. (845)
2. **spectral transmissivity** (of an absorbing material) ($\tau_{i,o}(\lambda)$) : spectral internal transmittance of a layer of the material such that the path of the radiation is of unit length, and under conditions in which the boundary of the material has no influence.Unit : 1 *Note.* — The unit length must be specified. If a new unit length is used that is k times the magnitude of the original one, then the value of $\tau_{i,0}(\lambda)$ will change to

$$\tau'_{i,o}(\lambda) = [\tau_{i,o}(\lambda)]^k$$

★ transmissivité spectrale → *transmissivité 2.* R удельный спектральный коэффициент пропускания (поглощающего вещества). D spektrale Transmissivität (für ein absorbierendes Medium). E transmisividad espectral. I ..... N specifieke spectrale transmissiviteit. P przepuszczalność widmowa. S transmissivitet. (845)

transmit

1. **transmit channel** (*Syn.* go channel) : → *channel 29*
2. **transmit channel** : → *channel 55*
3. **transmit fibre optic terminal device** : → *device 58*
4. **transmit flow control** : → *control 197*

transmit-receive

1. **transmit/receive tube** (*Syn.* T.R. tube) : → *tube 83*
2. **transmit-receive cell** (*Syn.* T-R cell) : → *cell 39*
3. **transmit-receive switch** (*Syn.* T-R switch) : → *switch 58*

transmittance

1. **diffuse transmittance** (τ_d) : ratio of the diffusely transmitted part of the (whole) transmitted flux, to the incident flux.Unit *Notes. 1* — $\tau = \tau_r + \tau_d$. *2* — The results of the measurements of τ_r and τ_d depend on the instruments and the measuring techniques used. ★ facteur de transmission diffuse → *facteur 166.* R коэффициент диффузного пропускания. D Grad der gestreuten Transmission. E transmitancia difusa. I fattore di trasmissione diffusa. N diffuse doorlatingsfactor. P współczynnik przepuszczania rozproszonego. S diffus transmittans. (845)
2. **Napierian spectral internal transmittance density** : → *density 16*
3. **regular transmittance** (τ_r) : ratio of the regularly transmitted part of the (whole) transmitted flux, to the incident flux.Unit: 1. ★ facteur de transmission régulière → *facteur 169.* R коэффициент направленного пропускания. D Grad der gerichteten Transmission. E transmitancia regular. I fattore di trasmissione regolare. N gerichte doorlatingsfactor. P współczynnik przepuszczania kierunkowego. S reguljär transmittans. (845)
4. **spectral internal transmittance** (of a homogeneous non-diffusing layer) ($\tau_i(\lambda)$) : ratio of the spectral radiant flux reaching the exit internal surface of the layer to the spectral flux that enters into the layer after crossing the entry surface.Unit: 1 *Note.* — For a given layer the spectral intern al transmittance *depends on the path length of the radiation in the layer, and* hence, in particular, on the angle of incidence. ★ facteur de transmission interne spectral → *facteur 168.* R спектральный коэффициент внутреннего пропускания (однородного нерассеивающего слоя). D spektraler Reintransmissionsgrad (einer homogenen, nicht streuenden Schicht). E transmitancia interna espectral. I fattore spettrale di trasmissione interna. N inwendige spectrale doorlatingsfactor. P współczynnik przepuszczania wewnętrznego widmowy. S inre transmittans. (845)
5. **spectral internal transmittance density** : → *density 33*
6. **total (energy) transmittance** (*Syn.* solar factor) : → *factor 166*
7. **transmittance** (*Syn.* transfer function (2)) : → *function 35*
8. **transmittance** : the ratio of transmitted power to incident power for given conditions of spectral composition, polarization and geometrical distribution. *Note.* — In optics, frequently expressed as transmittance density or as a percentage. In communication applications, generally expressed in decibels. ★ facteur de transmission → *facteur 163.* R коэффициент пропускания. D Übertragungsverhältnis. E transmitancia. I trasmittanza. N doorlatingsfactor. P współczynnik przepuszczania. S transmittans. (731)
9. **transmittance** (for incident radiation of given spectral composition, polarization and geometrical distribution) (τ) : ratio of the transmitted radiant or luminous flux to the incident flux in the given conditions.Unit : 1. ★ facteur de transmission → *facteur 164.* R коэффициент пропускания (τ) (для падающего излучения данного спектрального состава, поляризации и геометрического распределения). D Transmissionsgrad (für auftreffende Strahlung mit gegebener spektraler Verteilung, Polarisation und geometrischer Verteilung). E transmitancia. I fattore di trasmissione. N doorlatingsfactor. P współczynnik przepuszczania. S transmittans; transmissionsfaktor. (845)
10. **transmittance density** : → *density 41*
11. **transmittance (optical) density** : → *density 42*

transmitted

1. **transmitted source signal** (*Syn.* input signal (of a transmission system)) : → *signal 105*
2. **transmitted wave** : → *wave 66*
3. **transmitted wave** : → *wave 67*

transmitter

1. **automatic numbering transmitter** : an automatic transmitter in which provision is made for automatically transmitting a serial number before each message. ★ émetteur à numérotation automatique (des messages) → *émetteur 8.* R трансмиттер с автоматической нумерацией. D automatisch numerierender Sender. E emisor con numeración automática (de mensajes). I trasmettitore con numerazione automatica. N automatische nummerzender. P nadajnik automatyczny liczący. S automatisk löpnummersändare. (721)
2. **automatic transmitter** : telegraph transmitter in which the forming of the signals is not controlled by any operator, but is actuated from a signal recording medium. ★ émetteur automatique → *émetteur 14.* R автоматический трансмиттер. D automatischer Sender. E emisor automático. I trasmettitore automatico. N automatische zender. P nadajnik automatyczny. S autosändare. (721)
3. **automatic transmitter with controlled tape-feed mechanism** : an automatic transmitter in which the movement of the perforated tape is controlled by pulses from an external synchronizing device, for example, in the case of a time-division multiplex system. ★ émetteur automatique à commande par impulsions → *émetteur 15.* R автоматический трансмиттер с внешним управлением. D automatischer Weitersender mit gesteuerter Streifenzuführung. E emisor automático con control por impulsos. I ritrasmettitore automatico con controllo di nastro. N ..... P nadajnik retransmisyjny krokowy. S autosändare med styrd remsmatning. (721)
4. **broadcast transmitter network** : → *network 10*
5. **carbon (telephone) transmitter** (*Syn.* carbon microphone) : a telephone transmitter which depends for its operation on variations in contact resistance, between carbon granules. ★ microphone à charbon → *microphone 4.* R угольный микрофон. D Kohlemikrofon. E micrófono de

carbón. I microfono a carbone. N koolmicrofoon. P mikrofon węglowy. S kolkornsmikrofon. (722,801)

6. **drum facsimile transmitter** : a facsimile transmitter in which the original document is fastened to a rotating drum and scanned helically by a reading-head. ★ émetteur de télécopie à cylindre → *émetteur 19.* R передатчик с барабанной разверткой. D Trommelsender. E emisor de telecopia de cilindro. I trasmettitore a tamburo. N trommelzender. P nadajnik bębnowy. S trumsändare. (721)
7. **flat bed facsimile transmitter** : a facsimile transmitter in which the original document is placed flat and scanned line by line. ★ émetteur de télécopie à plat → *émetteur 20.* R передатчик с плоскостной разверткой. D Flachbettsender. E emisor de telecopia plano. I trasmettitore piatto. N plat-vlakzender. P nadajnik o rozwinięciu płaskim. S plansändare. (721)
8. **fully automatic reperforator transmitter distributor** (*Syn.* coupled reperforator and tape reader) : → *reperforator 1*
9. **keyboard transmitter** : a telegraph transmitter controlled by an alphanumeric keyboard. ★ émetteur à clavier → *émetteur 5.* R клавиатурный трансмиттер. D Tastatursender. E emisor con teclado. I trasmettitore a tastiera. N zender uitgerust met toetsenbord. P nadajnik klawiaturowy. S tangentbordssändare. (721)
10. **(measuring) transmitter** : measuring transducer whose output is a standardized signal. ★ transmetteur (de mesure) → *transmetteur 2.* R измерительный преобразователь. D Meßumformer mit standardisiertem Ausgangssignal. E transmisor (de medida). I trasmettitore (di misura). N (meet)zender. P przetwornik pomiarowy. S ..... (351)
11. **pirate transmitter** (in broadcasting) : broadcasting transmitter operating without appropriate official authorisation. ★ émetteur pirate → *émetteur 26.* R пиратский передатчик (в радиовещании). (723)
12. **rebroadcast transmitter** (*Syn.* relay station) : a receiver-transmitter unit intended for rebroadcasting. ★ réémetteur → *réémetteur 1.* R ретранслятор. (723)
13. **sound broadcasting transmitter** : radio transmitter in which the modulating signals represent sound broadcasting programmes for direct reception by the general public. The antenna system is often considered as part of the transmitter. ★ émetteur de radiodiffusion (sonore) → *émetteur 18.* R звуковой радиовещательный передатчик. (723)
14. **sound transmitter** (television) : part of a television broadcasting transmitter used for producing radio frequency signals carrying the sound content of a television programme. ★ émetteur-son → *émetteur-son 1.* R радиопередатчик звукового сопроводцения. (723)
15. **synchronized transmitter** (sound broadcasting) : sound broadcasting transmitter forming part of a synchronised network. ★ émetteur synchronisé → *émetteur 27.* R синхронизированный передатчик (в звуковом радиовещании). (723)
16. **telegraph transmitter** : a device for transmitting telegraph signals over a telegraph channel. ★ émetteur (télégraphique) → *émetteur 28.* R телеграфный трансмиттер. D Telegrafensender. E emisor (telegráfico). I trasmettitore telegrafico. N telegrafiezender. P nadajnik telegraficzny. S telegrafsändare. (721)
17. **(telephone) transmitter** (*Syn.* microphone (in telephony)) : an electro-acoustic transducer used in a telephone set to convert acoustic signals to speech currents. ★ microphone → *microphone 1.* R (телефонный) **передатчик; микрофон (в телефонии).** D Telefon-Sender; Mikrofon. E micrófono (en telefonía). I microfono; capsula microfonica. N microfoon; microfoonkapsel. P mikrofon. S mikrofon. (722)
18. **television broadcasting transmitter** : radio transmitter modulated by signals representing television broadcasting programmes for direct reception by the general public. The antenna system is often considered as part of the transmitter. ★ émetteur de télévision → *émetteur 21.* R телевизионный радиовещательный передатчик. (723)
19. **transmitter blocker cell** (*Syn.* T-B cell) : → *cell 36*
20. **transmitter distortion** : → *distortion 69*
21. **vision transmitter** (television) : part of a television broadcasting transmitter used for producing radio frequency signals carrying the visual content of a television programme. ★ émetteur-image → *émetteur-image 1.* R радиопередатчик изображения. (723)

transmitting

1. **broadcast transmitting station** : → *station 1*
2. **perfect transmitting diffuser** : → *diffuser 4*

transmultiplexing

1. **transmultiplexing** : the conversion of a frequency division multiplexed signal, such as a group or a supergroup, into a corresponding digital multiplexed signal which has the same structure and channels as if it were derived from PCM multiplex equipment, and the complementary process in the opposite direction of transmission. *Note.* — The associated device is known as "transmultiplexer". ★ transmultiplexage → *transmultiplexage 1.* R трансмультиплексирование. D Transmultiplexen. E transmultiplexado. I transmultiplazione. N transmultiplexen. P przetwarzanie częstotliwościowo-czasowe. S ..... (704)

transmutation

1. **transmutation** : the transformation of a nuclide of one element to a nuclide of another element, by means of a nuclear reaction. ★ transmutation → *transmutation 1.* R превращение. D Transmutation. E transmutación. I trasmutazione. N transmutatie. P transmutacja. S transmutation. (881)

transparency

1. **transparency** (in telegraphy and data transmission) : the capability of a network to transmit signals with any type of binary elements sequence on the sole condition that the modulation rate for which equipments were designed is not exceeded. ★ transparence → *transparence 1.* R прозрачность (в телеграфии и передаче данных); независимость от кода и скорости. D Transparenz (in der Telegrafie und Datenübertragung). E transparencia (en telegrafía o transmisión de datos); independencia del código y de la velocidad. I trasparenza. N transparantie (bij telegrafie en datatransmissie). P przezroczystość (w telegrafii i teledacji). S transparens. (721)

transparent

1. **transparent medium** : → *medium 31*

transport

1. **limiting values for transport** : → *value 24*
2. **tape transport system** : → *system 232*
3. **transport cross-section** : → *cross-section 30*
4. **transport mean free path** : → *free path 4*

transposer

1. **transposer** : a rebroadcast transmitter in which the frequency of the incoming signal is changed before retransmission, without the signal being demodulated. ★ (réémetteur) transposeur → *réémetteur 7.* R ретранслятор-преобразователь. (723)

transposition

1. **transposition** : an arrangement of the strands or laminations of a conductor or of the conductors comprising a turn or coil whereby they take different relative positions in a slot for the purpose of redecing eddy-current losses. ★ transposition → *transposition 13.* R транспозиция. D Verdrillung. E transposición. I trasposizione. N transpositie. P przeplecenie (transpozycja). S partförflyttning. (411)
2. **transposition** : a change of the relative positions of the phase conductors of a line. *Note.* — The transposition is carried out in order to establish adequate electrical symmetry of the conductors one to another or with respect to earth or with respect to neighbouring systems. ★ transposition → *transposition 14.* R транспозиция. D Verdrillung. E transposición. I trasposizione. N fasewisseling. P przeplecenie. S skruvning. (466)
3. **transposition** (in switching) : the ordered permutation of the pattern of the multiple of a switching stage to improve traffic carrying characteristics and reduce crosstalk. ★ transposition → *transposition 15.* R перемещение. D Transposition. E transposición. I trasposizione. N transpositie. P transpozycja (w komutacji). S omflyttning; skruvning. (714)
4. **transposition interval** : → *interval 23*

5. **transposition (of insulated cables)** : *a*) in relation to power cables : the practice of laying single-core cables so that each phase cable successively occupies, over approximately equal lengths of the route, each geometrical position in the laying formation. *b*) in relation to shielding conductors : the practice of laying a shielding conductor alongside an elementary section of untransposed power cables so that, in relation to the plane of symmetry of the cable laying formation, the conductor over one half of the section length occupies one position and over the other half occupies a symmetrically opposite position. ★ transposition (de câbles isolés) → *transposition 16.* R транспозиция (цзолированных кабелей). D Auskreuzen (von Kabeln). E transposicio'n (de cables aislados). I trasposizione (di cavi isolati). N ligging boven elkaar. P transpozycja; przeplatanie (kabli izolowanych). S korskoppling. (461)
6. **transposition support** : → *support 31*

transverse

1. **transverse component** : → *component 60*
2. **transverse curl** (*Syn.* cupping) : → *cupping 1*
3. **transverse differential protection system** : → *system 241*
4. **transverse electric mode** (*Syn.* TE mode) : → *mode 75*
5. **transverse electric mode** : → *mode 88*
6. **transverse electromagnetic mode** (*Syn.* TEM mode) : → *mode 80*
7. **transverse electromagnetic mode** : → *mode 90*
8. **transverse (electromagnetic) wave** : → *wave 68*
9. **transverse flux heating** : → *heating 55*
10. **transverse interferometry** : → *interferometry 3*
11. **transverse judder** : → *judder 2*
12. **transverse load** : → *load 88*
13. **transverse magnetic mode** (*Syn.* TM mode) : → *mode 82*
14. **transverse magnetic mode** : → *mode 92*
15. **transverse magnetization** : → *magnetization 14*
16. **transverse offset loss** (*Syn.* lateral offset loss) : → *loss 42*
17. **transverse profile** : → *profile 17*
18. **transverse propagation** : → *propagation 34*
19. **transverse resolution** : → *resolution 10*
20. **transverse resolution** : → *resolution 11*
21. **transverse video tape recorder** : → *tape recorder 5*
22. **transverse wave** : → *wave 69*
23. **transverse wave** : → *wave 70*

trap

1. **ion trap** : a structure that prevents ions from reaching the screen. ★ piège à ions → *piège 5.* R ионная ловушка. D Ionenfalle. E trampa iónica. I trappola ionica. N ionenval. P pułapka jonowa. S jonfälla. (531)
2. **luminance trap** : a filter inserted in the luminance path with the aim of reducing the crossluminance in the decoder or the crosscolour in the encoder. ★ trappe de luminance → *trappe 1.* R режектор яркости. (723)
3. **trap** : a crystal lattice imperfection or impurity whose energy level is situated in the forbidden band of the semiconductor and which acts as a centre for the capture or recombination of electrons and holes. ★ piège → *piège 3.* R ловушка. D (Störstellen-) Haftstelle. E trampa. I trappola. N ..... P pułapka (domieszkowa). S (störämnes)fälla. (521)

trapezium

1. **trapezium distortion** : → *distortion 70*

trapezoidal

1. **trapezoidal modulation** : → *modulation 60*

trapped

1. **trapped energy mode** : → *mode 93*

travel

1. **release travel** : the distance between the release position and the free position. ★ course de retour → *course 2.* R ход обратный. D Rücklaufweg. E carrera de retorno. I corsa di ritorno. N uitgeschakelde terugweg. P droga zwalniania. S frigöringsrörelse. (581)
2. **travel** (of a mechanical switching device or a part thereof) : the displacement (translation or rotation) of a point on a moving element. *Note.* — Distinction may be made between pre-travel, over-travel, etc. ★ course → *course 1.* R ход (контактного коммутационного аппарата или его части). D Weg. E carrera (de un aparato mecánico de conexión o de una de sus partes). I corsa (di un apparecchio meccanico di manovra o di una parte dello stesso). N weg (van een mechanische schakelaar of een deel daarvan). P skok (łącznika mechanizmowego lub jego części). S rörelse. (441)

travelling wave

1. **travelling plane wave** : an electromagnetic wave which is both a homogenous plane wave and a travelling wave. *Note.* — In the case of a sinusoidal travelling plane wave, in a homogeneous medium in the direction of propagation and for each component of the wave, the phase varies linearly with the distance and the amplitude is constant or, if the medium is dissipative, decreases exponentially with distance. ★ onde plane progressive → *onde 95.* D ebene Wanderwelle. P płaszczyzna fali bieżąca. (705)
2. **(travelling) wave** : a modification of the physical state of a medium, propagated as a result of a local action. ★ onde (progressive) → *onde 99.* R волна (распространяющаяся). D Wanderwelle; Welle. E onda (progresiva). I onda (progressiva). N (lopende) golf. P fala bieżąca; fala wędrowna. S (gående) våg; vandringsvåg. (101)
3. **travelling wave** (in a transmission line) : an electromagnetic wave propagating in a transmission line in a mode such that any sinusoidal field component has a linear variation of phase and an exponential decrease in magnitude due to losses, as a function of distance in the direction of propagation. ★ onde progressive → *onde 100.* R бегущая волна (в линии передачи). D Wanderwelle; fortschreitende Welle (in einer Übertragungsleitung). E onda progresiva (en una línea de transmisión). I onda progressiva (in una linea di trasmissione). N lopende golf. P fala bieżąca. S gående våg. (705,726)
4. **travelling wave antenna** : → *antenna 117*
5. **travelling wave heating** : → *heating 56*
6. **travelling-wave tube** : → *tube 85*

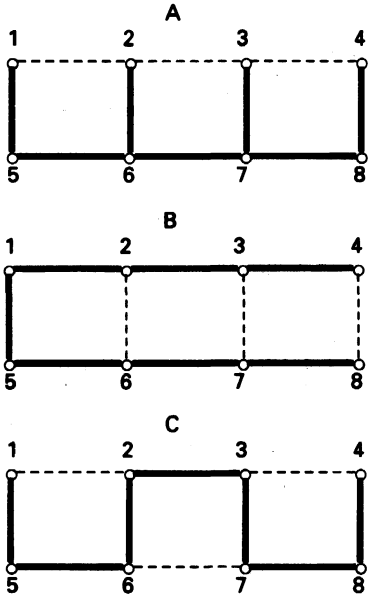
tray

1. **battery tray** : a container with complete walls for holding several cells or batteries. ★ caisse de groupement → *caisse 1.* R батарейный поддон. D Batterietrog. E cubeta de (la) batería. I cassone. N batterijtrog. P skrzynia bateryjna. S batteritråg. (486)
2. **charging tray** : an equipment to support and convey the charge into the furnace, withdrawn with the charge after processing. ★ plateau de chargement → *plateau 6.* R загрузочный поккон. D Beschickungsplatte. E bandeja de carga. I piattaforma di caricamento. N laadplaat; laadblad. P paleta wsadowa. S chargeringsbricka. (841)

treated

1. **treated insulating liquid** : → *liquid 12*
2. **treated mica paper** : → *paper 18*

treatment



1. **acid treatment** : a refining process in which mineral insulating oil is contacted with sulphuric acid to improve certain properties. ★ traitement à l'acide → *traitement 6.* R кислотная очистка. D Säurebehandlung. E tratamiento al ácido. I trattamento all'acido. N behandeling met zuur. P obróbka kwasowa. S syraraffinering. (212)
2. **heat treatment** : the sequence of operations, for example heating, temperature holding, cooling, to which a solid metal or alloy is subjected in order to promote a change in its properties. ★ traitement thermique → *traitement 14.* R термическая обработка. D Wärmebehandlung. E tratamiento térmico. I trattamento termico. N warmtebehandeling. P obróbka cieplna. S värmebehandling. (841)
3. **hydrogen treatment** : a refining process in which mineral insulating oil is reacted with hydrogen gas at elevated temperatures and pressures in the presence of a catalyst, to improve certain properties. ★ traitement à l'hydrogène → *traitement 7.* R гидрогенизация. D Hydrierung. E hidrogenación. I trattamento all'idrogeno. N behandeling met waterstof. P obróbka wodorem. S väteraffinering. (212)
4. **solid adsorbant treatment** : a process for purification of used insulating liquid by percolation through or contact with a particulate adsorbant solid. ★ traitement au solide adsorbant → *traitement 8.* R обработка твердым

абсорбентом. D Behandlung mit festen Adsorptionsmitteln. E tratamiento con sólidos absorbentes. I trattamento con absorbenti solidi. N behandeling met een vast adsorptiemiddel. P obróbka adsorbentem stałym. S adsorptionsrening. (212)

5. **thermochemical treatment** : a heat treatment carried out in a suitably chosen medium to alter the chemical composition at the metal surface. ★ traitement thermochimique → *traitement 15.* R химико-термическая обработка. D thermochemische Behandlung. E tratamiento termoquímico. I trattamento termochimico. N thermochemische behandeling. P obróbka cieplochemiczna. S termokemisk behandling. (841)
6. **vacuum treatment** : a process of reducing the gas and water content of an insulating liquid by subjecting it to reduced pressure and elevated temperature in thin layer or spray. ★ traitement sous vide → *traitement 13.* R вакуумная обработка. D Vakuumbehandlung. E tratamiento al vacío. I trattamento sotto vuoto. N behandeling onder vacuüm. P obróbka w próżni. S vacuumbehandling. (212)

tree

1. **fault tree** : a logic diagram showing which fault modes of subitems or external events, or combinations thereof, result in a given fault mode of the item. ★ arbre de panne → *arbre 5.* R граф (существенных) неисправностей. D Fehlerbaum. E árbol de averías. I albero delle avarie. N defectenboom. P schemat rozgałęziony niezdatności; drzewo niezdatności. S felträd. (191)
2. **fault tree analysis** : → *analysis 8*
3. **maintenance tree** : a logic diagram showing the pertinent alternative sequences of elementary maintenance activities to be performed on an item and the conditions for their choice. ★ arbre de maintenance → *arbre 4.* R граф технического обслуживания и ремонта. D Instandhaltungsbaum. E árbol de mantenimiento. I albero di manutenzione. N onderhoudsboom. P schemat rozgałęziony obsługiwania; drzewo obsługiwania. S underhållsträd. (191)
4. **tree** : a connected set of branches joining all the nodes of a network without forming a loop.

★ arbre → *arbre 2.* R дерево. D Baum. E árbol. I albero. N boom. P drzewo (układu). S träd; trädnät. (131)

5. **tree and branch system** : → *system 242*
6. **tree'd system** : → *system 243*

trefoil

1. **trefoil formation** : → *formation 3*

trembler

1. **trembler bell** : → *bell 6*

triac

1. **triac** (*Syn.* bidirectional triode thyristor) : → *thyristor 2*

triad

1. **colour triad** : group of three coloured phosphor elements, generally red, green and blue, used in certain types of colour picture tube, corresponding to a picture element. ★ triplet (de luminophores) → *triplet 3.* R цветовая триада. (723)

trial

1. **trial record** : → *record 16*

triangular

1. **triangular configuration** : → *configuration 21*
2. **triangular noise** : → *noise 90*

triboluminescence

1. **triboluminescence** : luminescence caused by the action of mechanical forces. ★ triboluminescence → *triboluminescence 1.* R триболюминесценция. D Tribolumineszenz. E triboluminiscencia. I triboluminescenza. N wrijvingsluminescentie. P try boluminescencja. S mekanisk luminiscens. (845)

tributary

1. **tributary station** : → *station 42*

trichromatic

1. **trichromatic system** : → *system 244*

trickle

1. **trickle charge** : → *charge 46*
2. **trickle resin** : → *resin 5*

trifluoride

1. **boron trifluoride counter tube** : → *counter tube 2*
2. **boron trifluoride ionization chamber** : → *ionization chamber 2*

trifurcating

1. **trifurcating box** : → *box 12*
2. **trifurcating joint** : → *joint 27*

trifurcator

1. **trifurcator** (*Syn.* trifurcating box) : → *box 12*

trigger

1. **bistable trigger circuit** : → *circuit 11*
2. **gate trigger current** : → *current 98*
3. **gate trigger voltage** : → *voltage 75*
4. **monostable trigger circuit** : → *circuit 121*
5. **trigger circuit** : → *circuit 188*
6. **trigger electrode** (*Syn.* starting electrode) : → *electrode 92*
7. **trigger gap** (*Syn.* starter gap) : → *gap 19*
8. **trigger hold off** : a circuit incorporated in the time base which prevents the sweep from being re-triggered until the spot has returned to its rest position and the circuit elements have completely relaxed. ★ blocage du déclenchement → *blocage 4.* R схема блокировки запуска. D Triggersperre. E bloqueo de disparo. I circuito di blocco. N triggerblokkering. P układ podtrzymania (postawy czasu). S trigghållkrets. (303)
9. **trigger tube** : → *tube 86*

triggered

1. **triggered sweep** : → *sweep 9*
2. **triggered time base** : → *base 29*

triggering

1. **external triggering** : the triggering obtained when the signal which controls the time base is applied externally. ★ déclenchement extérieur → *déclenchement 9.* R внешний запуск. D externe Triggerung. E disparo externo. I ..... N externe triggering. P wyzwalanie zewnętrzne. S extern triggning. (303)
2. **internal triggering** : the triggering obtained when the signal which controls the time base is supplied by an internal circuit affected by the observed quantity. ★ déclenchement intérieur → *déclenchement 10.* R внутренний запуск.

D interne Triggerung. E disparo interno. I ..... N interne triggering. P wyzwalanie wewnętrzne. S intern triggning. (303)

3. **triggering** : the control action to achieve firing of a controllable valve or arm. ★ commande d'amorçage → *commande 30.* R включение по управляющему электроду. D Ansteuern. E control de cebado. I comando di innesco; comando di accensione. N ontsteekcommando. P sterowanie zapłonem. S triggning. (551)

trihedral

1. **trihedral corner reflector** : → *reflector 31*

triode

1. **bidirectional triode thyristor** : → *thyristor 2*
2. **reverse blocking triode thyristor** : → *thyristor 6*
3. **reverse conducting triode thyristor** : → *thyristor 8*
4. **triode** : a three-electrode electronic tube containing an anode, a cathode, and a control electrode, usually a grid. ★ triode → *triode 5.* R триод. D Triode. E triodo. I triodo. N triode. P trioda. S triod. (531)
5. **triode gun** : → *gun 16*

trip

1. **fixed trip mechanical switching device** : → *switching device 1*
2. **SWR trip** : a protective device placed at the output stage of a radio transmitter so as to interrupt the transmitter's operation when the standing wave ratio on the feed line exceeds a pre-determined value. ★ gardien d'antenne → *gardien 1.* R устройство антенно-фидерной защиты; КСВ - разъединитель. D Antennenschutzschalter. E protector de ondas estacionarias. I rivelatore di disadattamento. N staande-golfbeveiliging. P ogranicznik fali stojącej. S ståendevågskydd. (712)
3. **trip lamp** (*Syn.* paddy lamp) : → *lamp 43*

trip-free

1. **trip-free mechanical switching device** : → *switching device 6*

triple

1. **triple bundle** : → *bundle 9*
2. **triple busbar substation** : → *substation 43*
3. **triple error** : → *error 61*
4. **triple lacing** (*Syn.* triple warren) : → *warren 4*
5. **triple motor vehicle** : → *vehicle 30*
6. **triple point** : → *point 50*
7. **triple warren** : → *warren 4*

triplet

1. **flux triplet** (of a source) : set of the values of the cumulative downward flux proportions of the source for the solid angles $\pi/2$, π and $3\pi/2$ steradians, representative for the relative downward flux distribution of the source, used in the calculation of the direct ratio of installations of that source. ★ triplet de flux → *triplet 2.* R ..... D ..... (einer lichtquelle). E triplete de flujo. I terna di flusso. N lichtstroomtriplet (van een bron). P wskaźniki strumienia podstawowe. S ..... (845)
2. **triplet (byte)** : → *byte 8*

tripping

1. **automatic loss-of-voltage tripping equipment** : → *equipment 6*
2. **conventional tripping current** : → *current 38*
3. **emergency tripping device** : → *device 24*
4. **final tripping** (*Syn.* lock-out) : the disconnection of faulty equipment or part of the network after a predetermined number of unsuccessful reclosures. ★ déclenchement définitif → *déclenchement 8.* R окончательное отключение. D endgültige Ausschaltung. E desconexión definitiva. I apertura definitiva. N definitieve uitschakeling. P wyłączenie definitywne. S definitiv frånkoppling. (604)
5. **transfer tripping** (*Syn.* intertripping) : → *intertripping 1*
6. **tripping** (*Syn.* opening) : → *opening 3*
7. **tripping force** : → *force 34*

tristimulus

1. **tristimulus values** : → *value 69*

triton

1. **triton** : the nucleus of tritium, which is the hydrogen isotope of mass number 3. ★ triton → *triton 1.* R тритон. D Triton. E tritón. I tritone. N triton. P tryt. S triton. (881)

troffer

1. **troffer** : long recessed luminaire usually installed with the opening flush with the ceiling. ★ chemin lumineux encastré → *chemin 6.* R встроенная световая полоса, троффер. D Muldenleuchte. E luminaria lineal empotrada. I canale luminoso da incasso. N plafondinbouwarmatuur. P pas świetlny wbudowany. S takinfälld ramp. (845)

troland

1. **troland** (Td) : unit used to express a quantity proportional to retinal illuminance produced by a light stimulus. When the eyes is viewing a surface of uniform luminance, the number of trolands is equal to the product of the area in square millimetres of the limiting pupil, natural or artificial, by the luminance of the surface in candelas per square metre. *Notes. 1* — In computing effective retinal illuminance, absorption, scattering, and reflection losses and the dimensions of the particular eye under consideration must be taken into account as well as the Stiles-Crawford effect. *2* — In German, "Pupillenlichtstärke" designates the retinal illuminance. ★ troland → *troland 1.* R троланд. D Troland. E troland. I troland. N troland. P troland. S troland. (845)

trolley

1. **trolley** : apparatus for collecting current from a contact wire by means of a grooved wheel or contact slipper mounted on a pole which is movable in any direction. ★ trolley → *trolley 7.* R штанговый токоприемник. D Stangenstromabnehemer. E trole. I presa (di corrente) ad asta. N trolley. P odbierak drążkowy. S strömavtagare för trådbuss. (811)
2. **trolley wire** (*Syn.* single tramway-type equipment) : → *equipment 70*
3. **trolley wire** (*Syn.* contact wire) : → *wire 1*

trolley-base

1. **trolley-base** : equipment used to mount the trolley-pole and its springs on the vehicle. ★ base de trolley → *base 5.* R опора штанги токоприемника. D Stromabnehmerbock. E base de trole. I base (della presa ad asta). N trolleyvoetstuk. P podstawa odbieraka drążkowego. S fotplatta för strömavtagare. (811)

trolleybus

1. **trolleybus** : 1. An electrically driven pneumatic-tyred vehicle running without rails on public roads, alone or with a trailer, and drawing its power from an overhead contact line. 2. A transport system using trolleybuses. ★ trolleybus → *trolleybus 4.* R троллейбус. D Obus. E trolebús. I filobus; sistema filoviario; filovia. N trolleybus. P trolejbus. S trådbuss. (811)

trolley-head

1. **trolley-head** (*Syn.* current collector) : equipment comprising either the trolley-shield and wheel or the slipper and support and allowing the necessary movement of the slipper or wheel. ★ tête de trolley → *tête 19.* R головка штангового токоприемника. D Stromabnehmerkopf. E cabeza de trole. I testa (di contatto). N trolley stroomafnemerkop. P głowica odbieraka (drążkowego). S kontakthuvud. (811)

trolley-pivot

1. **trolley-pivot** : a vertical axis on which the trolley-base may turn. ★ pivot de trolley → *pivot 2.* R шкворень штангового токоприемника. D Drehachse des Stangenstromabnehmers. E pivote de trole. I perno (della presa ad asta). N boomvoetlager. P czop odbieraka drążkowego. S vridtapp. (811)

trolley-pole

1. **trolley-pole** (*Syn.* boom) : a tube or rod having limited flexibility supporting the trolley-head and transmitting to the trolley-wheel or slipper the pressure produced by the springs. ★ perche de trolley → *perche 4.* R штанга токоприемника. D Stromabnehmerstange. E pértiga de trole. I asta. N trolley stroomstang. P drążek odbieraka. S strömavtagarstång. (811)

trolley-shield

1. **trolley-shield** (*Syn.* globe; trolley-wheel harp) : the support for the spindle of the trolley-wheel. ★ chape de trolley → *chape 2.* R вилка штангового токоприемника. D Rollengabel. E armadura de trole. I supporto della rotella. N trolleywielvork. P uchwyt rolki. S rullhållare. (811)

trolley-wheel

1. **trolley-wheel** : a grooved wheel bearing against the contact wire. ★ roulette de trolley → *roulette 1.* R ролик штангового токоприемника. D Stangenstromabnehmer-Kontaktrolle. E polea de trole. I rotella (a gola). N trolleywiel. P rolka. S kontakttrissa. (811)
2. **trolley-wheel harp** (*Syn.* trolley-shield) : → *trolley-shield 1*

tropical

1. **tropical (broadcasting) band** : → *band 33*

tropopause

1. **tropopause** : the upper boundary of the troposphere. ★ tropopause → *tropopause 1.* D Tropopause. P tropopauza. (705)

troposphere

1. **troposphere** : the lower part of the Earth's atmosphere, extending upwards from the Earth's surface, in which the temperature decreases with height except in certain local layers of temperature inversion ; this part of the atmosphere extends to an altitude of about 9 km at the poles and 17 km at the equator. ★ troposphère → *troposphère 1.* D Troposphäre. P troposfera. (705)

tropospheric

1. **(tropospheric) layer** : → *layer 22*
2. **tropospheric propagation** : → *propagation 35*
3. **tropospheric (radio-)duct** : → *radio-duct 1*
4. **tropospheric scatter (propagation)** : → *scatter 5*
5. **tropospheric wave** : → *wave 71*

trouble

1. **trouble lamp** (*Syn.* hand-lamp) : → *hand-lamp 1*

trough

1. **cable trough** (in a substation) : a channel intended to enable secondary, auxiliary and control cables to be laid within a substation. ★ caniveau à câbles → *caniveau 2.* R кабельный канал подстанции. D Kabelkanal. E zanja de cables (en una subestación); canal de cables (en una subestación). I cunicolo cavi (in una stazione). N ..... P kanał kablowy (w stacji). S kabelkanal. (605)

true

1. **conventional true value** : → *value 4*
2. **true** : qualifies the ideal value which characterizes a quantity perfectly defined in the conditions which exist at the moment when that quantity is observed, or the subject of a determination. *Note.* — This value could be arrived at only if all causes of measurement error were eliminated and the population was infinite. In the case of a finite population, the complete population must be considered. ★ vrai → *vrai 4.* R действительный; истинный. D wahr. E ... verdadero. I vero. N werkelijk. P rzeczywisty. S sann. (191)
3. **true coincidence** : → *coincidence 7*
4. **true value** : → *value 70*

trunk

1. **super trunk feeder** : → *feeder 22*
2. **telegraph trunk circuit** : → *circuit 180*
3. **tie trunk** (*Syn.* tie line) : → *line 164*
4. **trunk concentrator** : → *concentrator 9*
5. **trunk feeder** : → *feeder 23*
6. **trunk group** (*Syn.* circuit group) : → *group 3*

trunking

1. **air trunking** : any separate structure mounted on a machine to guide cooling air to or from a heat exchanger, filter, fan or other device mounted on the machine. ★ manchette → *manchette 1.* R воздухопровод. D Luftstutzen. E conducción de aire. I raccordo di ventilazione. N verbindingsstuk. P króciec powietrzny. S kylluftskapsling. (411)
2. **busbar trunking system** : → *system 22*
3. **re-entrant trunking** : the provision of a switching path from outlet to inlet in the same switching stage, in order to access equipment associated with special services such as those provided by operators. *Note.* — Not to be confused with an entraide where the purpose of re-entering the call is to attempt to reduce the probability of switching congestion on a given call by allowing a new possibility of choice of path from the new inlet to a trunk in the desired route. ★ (technique du) double passage → *passage 11.* R двойное прохождение. D Koppelanordnung mit Rueck-(ueber-)Lauf. E (técnica del) doble paso (en un conmutador). I instradamento con doppio passaggio. N ..... P podwójne przejście. S omtrunkering. (714)

trunnion

1. **trunnion (of a pivot-type suspension clamp)** : the circular projection from the body of the clamp which acts as an axis of rotation within the straps, permitting some oscillation of the clamp. ★ tourillon (d'une pince de suspension oscillante) → *tourillon 3.* R цапфы качающегося поддерживающего зажима. D Drehzapfen (einer Tragklemme mit Gelenk). E tetón (de una grapa de suspensión oscilante). I perno (di una morsa di sospensione oscillante). N schommelas (van een scharnierende ophangklem). P czop (uchwytu przelotowego wahliwego). S tapp. (466)

TRV

1. **TRV** (*Syn.* transient recovery voltage) : → *recovery voltage 6*

TS

1. **TS** (*Syn.* time-slot) : → *time-slot 7*

tube

1. **aligned-grid tube** : a space-charge-controlled tube in which the wires of at least two of the grids are substantially aligned so that one is in the shadow of the other. ★ tube à grilles alignées → *tube 41.* R лампа с совмещенными сетками. D Röhre mit Gitterabschattung. E tubo de rejillas alineadas. I tubo con griglie allineate. N buis met geschaduwde roosters. P lampa o siatkach posobnych. S skuggallerrör. (531)
2. **anti-transmit/receive tube** (*Syn.* A.T.R. tube) : → *tube 5*
3. **arc discharge tube** : a gas-filled tube in which the required current is that of an arc discharge. ★ tube à décharge en arc → *tube 31.* R прибор дугового разряда. D Bogenentladungsröhre. E tubo de descarga en arco. I tubo con scarica ad arco. N boogontladingsbuis. P lampa o wyładowaniu łukowym. S bågurladdningsrör. (531)
4. **arc tube** : the enclosure in which the arc of the lamp is confined. ★ tube à décharge → *tube 30.* R ..... D Entladungsrohr; Brenner. E tubo de descarga. I tubo di scarica. N ontladingsbuis. P jarznik. S urladdningsrör. (845)
5. **A.T.R. tube** (*Syn.* anti-transmit/receive tube) : a blocking tube that during the reception period, directs the wanted signals from the antenna to the receiver only, by isolating the transmitter; and during the transmission period, connects the transmitter to the antenna. ★ tube A.T.R. → *tube 63.* R разрядник блокировки передатчика; РБП. D Sendersperröhre. E tubo A.T.R (antitransmite/recibe). I tubo A.T.R. (anti-trasmissione/ricezione). N anti-zend/ontvangbuis. P zwierak ANO; zwierak anty-NO. S S-blockeringsrör. (531)
6. **attenuator tube** : an extended-interaction plasma tube, designed for use in a transmission line, to enable adjustment of the attenuation of radio-frequency energy. ★ tube atténuateur → *tube 64.* R аттенюатор. D Dämpfungsröhre. E tubo atenuador. I tubo attenuatore. N dempbuis. P tłumik plazmowy. S dämpningsrör. (531)
7. **backward-wave tube** : a space-charge-wave tube the functioning of which is based on interaction of the space-charge-wave with a travelling electromagnetic wave whose direction of group velocity is opposite to the direction of electron velocity. ★ tube à onde régressive → *tube 53.* R лампа обратной волны. D Rückwärtswellenröhre. E tubo de onda regresiva. I tubo a onda regressiva. N tegemoetlopende-golfbuis. P lampa o fali wstecznej. S backvågsrör. (531)
8. **beam deflection tube** : an electron-beam tube in which the output current is controlled by the position of the electron beam. ★ tube à déviation de faisceau → *tube 34.* R электроннолучевая трубка с поперечным управлением.

D Elektronenstrahlschaltröhre; Ablenkverstärkerröhre. E tubo de desviación de haz. I tubo con deflessione di fascio. N bundelrichtbuis. P lampa o wiązce odchylanej. S elektronstrålerör. (531)

9. **beam-power tube** : an aligned-grid tube in which the effects of secondary emission from the anode are suppressed by concentrating electron current into high-density beams. ★ tube de puissance à faisceau dirigé → *tube 74.* R мощная лучевая лампа. D Strahltetrode. E tubo de potencia de haz dirigido. I tubo di potenza a fascio. N eindbuis met elektronenbundeling. P lampa wiązkowa. S strålrör. (531)
10. **black-and-white picture tube** : a picture tube that reproduces only the luminances. ★ tube (à) image en noir et blanc → *tube 44.* R приемная трубка для воспроизведения черно-белого изображения. D Schwarz-Weiß-Bildröhre. E tubo de imagen en blanco y negro. I cinescopio in bianco e nero. N zwart-wit beeldbuis. P kineskop czarno-biały; kineskop achromatyczny. S svartvitt bildrör. (531)
11. **blocking tube** : a gas-filled microwave tube using a locally established plasma discharge to control the passage or reflection of radio-frequency energy. ★ tube de commutation → *tube 71.* R газовый разрядник. D Sperröhre. E tubo de conmutación (en hiperfrecuencias). I tubo di commutazione (in iperfrequenze). N blokkeerbuis. P zwierak (mikrofalowy). S blockeringsrör. (531)
12. **cathode ray tube (television) projector** : → *projector 1*
13. **Chaoul tube** (*Syn.* hollow-anode tube) : one type of X-ray tube, with hollow anode and a transmission target, used for therapy operating at low voltage (usually not more than 100 kV) with an anode-object distance usually not more than 5 cm. ★ tube de Chaoul → *tube 70.* R трубка Шауля; трубка с полым анодом. D Chaoul-Röhre; (Hohlanoden-Röhre). E tubo de Chaoul. I tubo di Chaoul; tubo ad anodo cavo. N Chaoulbuis; holle-anodebuis. P lampa z wgłębioną anodą. S Chaoul-rör. (881)
14. **character indicator tube** : a glow indicator tube in which the glow forms or illuminates the shape of a letter, numeral or symbol. ★ tube indicateur de caractères → *tube 84.* R знаковый индикаторный прибор. D Zeichenanzeigeröhre. E tubo indicador de caracteres. I tubo indicatore di caratteri. N tekenindicatorbuis. P wskaźnik jarzeniowy alfanumeryczny. S teckenindikatorrör. (531)
15. **charge-storage tube** (*Syn.* electrostatic memory tube) : a storage tube in which information is retained on the storage surface in the form of a pattern of electric charges. ★ tube à mémoire électrostatique → *tube 49.* R запоминающая трубка с накоплением заряда. D Ladungsspeicherröhre. E tubo de memoria electrostática. I tubo a memoria elettrostatica. N ladingsgeheugenbuis. P lampa pamięciowa ładunkowa. S elektrostatiskt minnesrör. (531)
16. **cold cathode counting tube** : a glow discharge tube having several main gaps with or without associated auxiliary gaps and in which the main discharge has two or more stable positions and can be made to step in sequence by application of a suitably shaped signal to an input electrode or a group of input electrodes. ★ tube-compteur à cathode froide → *tube compteur 19.* R счетная лампа с холодным катодом. D Glimmzählröhre. E tubo contador de cátodo frío. I tubo contatore con catodo freddo. N telbuis met koude kathode. P lampa zliczająca o zimnej katodzie. S kallkatodräknerör. (531)
17. **colour picture tube** : a picture tube that reproduces both the luminances and the colours. ★ tube (à) image en couleur → *tube 43.* R приемная трубка для воспроизведения цветного изображения. D Farbbildröhre. E tubo de imagen en color. I cinescopio in colore. N kleurenbeeldbuis. P kineskop kolorowy. S färgbildrör. (531)
18. **corona discharge tube** : a low current gas-filled tube utilizing the properties of a corona discharge. ★ tube à effluve → *tube 37.* R прибор коронного разряда. D Koronaentladungsröhre. E tubo de descarga corona; tubo de efluvios. I tubo a scarica corona (a effluvio). N corona-ontladingsbuis. P lampa o wyładowaniu koronowym. S koronarör. (531)
19. **diagnostic-type protective tube housing** : → *housing 4*
20. **disk-seal tube** : an electronic tube in which one or more electrodes are mounted on pierced disks arranged in parallel planes sealed to, and usually extending beyond, the envelope. ★ tube à disques scellés → *tube 35.* R лампа с дисковыми впаями. D Scheibenröhre. E tubo de discos. I tubo a dischi sigillati. N schijfbuis. P lampa tarczowa. S skivfogsrör. (531)
21. **display storage tube** : a storage tube into which the information can be introduced in the form of an electric signal and reproduced later in the form of an image. ★ tube à mémoire à sortie image → *tube 48.* R запоминающая трубка с видимым изображением. D Sichtspeicherröhre. E tubo de memoria de salida imagen. I tubo a memoria con uscita visiva. N signaal-beeld geheugenbuis. P lampa obrazowa pamięciowa. S informationsminnesrör. (531)
22. **double focus tube** : an X-ray tube with two focal spots, usually of different size and power input. ★ tube à double foyer → *tube 36.* R двухфокусная трубка. D Doppelfokus-Röhre. E tubo de doble foco. I tubo a doppio fuoco. N dubbelfocusbuis. P lampa z podwójnym ogniskiem. S dubbelfokusrör. (881)
23. **double tube** : see "multiple tube". ★ double tube → *tube 7.* R двойная лампа. D Zweifachröhre. E doble tubo; tubo doble. I tubo doppio. N duobuis. P lampa podwójna. S dubbelrör. (531)
24. **duration of X-ray tube exposure series** : → *duration 13*
25. **electrical-signal storage tube** : a storage tube into which the information is introduced in the form of an electric signal and reproduced later also in the form of an electric signal. ★ tube à mémoire à sortie électrique → *tube 47.* R запоминающая трубка для преобразования сигналов. D Signalspeicherröhre. E tubo de memoria de salida eléctrica. I tubo a memoria con uscita elettrica. N signaal-signaal geheugenbuis. P lampa pamięciowa sygnał-sygnał. S signalminnesrör. (531)
26. **electrometer tube** : a vacuum tube designed to have a very high input impedance to allow detection, amplification and measurement of very small currents in circuits having a very high internal impedance. ★ tube électromètre → *tube 79.* R электрометрическая лампа. D Elektrometerröhre. E tubo electrómetro. I tubo elettrometrico. N elektrometerbuis. P lampa elektrometryczna. S elektrometerrör. (531)
27. **electron-beam tube** : an electronic tube, the performance of which depends on the formation and control of one or more electron beams. ★ tube à faisceau électronique → *tube 38.* R электроннолучевой прибор. D Elektronenstrahlröhre. E tubo de haz electrónico. I tubo a fascio elettronico. N elektronenbundelbuis. P lampa (elektronowa) wiązkowa. S elektronstrålerör. (531)
28. **electronic tube** : an electronic device in which conduction takes place by electrons or ions between electrodes through a vacuum or gaseous medium within a gas-tight envelope, but excluding devices used only for lighting. ★ tube électronique → *tube 80.* R электронная лампа; электровакуумный прибор. D Elektronenröhre. E tubo electrónico. I tubo elettronico. N elektronenbuis. P lampa elektronowa. S elektronrör. (151,531)
29. **electrostatic memory tube** (*Syn.* charge-storage tube) : → *tube 15*
30. **emission characteristic of a multielectrode tube** (*Syn.* diode characteristic) : → *characteristic 32*
31. **extended-interaction plasma tube** : a gas-filled microwave tube using a distributed plasma discharge. ★ tube à plasma à interaction étendue → *tube 56.* R плазменный газоразрядный прибор с распределенным взаимодействием. D Plasma-Wanderfeldröhre. E tubo de plasma de interacción extendida. I tubo a plasma con interazione estesa. N plasmabuis met verlengde wisselwerking. P lampa plazmowa. S plasmarör med utökat urladdningsområde. (531)
32. **field emission tube** : a X-ray tube in which electrons are ejected from the cathode by a sufficiently strong electric field. ★ tube d'émission par champ électrique → *tube 77.* R трубка с холодной эмиссией электронов. D Feldemissionsröhre. E tubo de emisión por campo eléctrico. I tubo di emissione di campo. N veldemissiebuis; koudekthodebuis. P lampa z emisją polową. S fältemissionsrör. (881)
33. **flash tube** (*Syn.* electronic-flash lamp) : discharge lamp to be operated with an electronic equipment in order to give a high light output for a very brief period, capable of repetition. *Note.* — This type of lamp may be used for lighting objects to be photographed, for stroboscopic observation or for signalling purposes. ★ lampe à éclats → *lampe 10.* R импульсная лампа. D Blitzröhre. E lámpara destello electrónica. I lampada lampo a scarica. N elektronenflitslamp. P lampa błyskowa wyładowcza. S elektronblixt. (845)
34. **flying-spot scanner tube** : a cathode-ray tube used to produce a point light source that is moved to scan a physical object such as a transparency. ★ tube analyseur de type «flying spot»

→ *tube analyseur 10.* R развертывающая трубка с бегущим пятном. D Lichtpunktabtaströhre. E tubo analizador del tipo «Explorador». I tubo analizzatore «flying spot». N lichtpunt aftastbuis. P ..... S sökstrålerör. (531)

35. **forward-wave tube** : a space-charge-wave tube the functioning of which is based on interaction of the space-charge wave with a travelling electromagnetic wave whose direction of group velocity is the same as the direction of electron velocity. ★ tube à onde directe → *tube 51.* R лампа прямой волны. D Vorwärtswellenröhre. E tubo de onda directa. I tubo a onda diretta. N meelopende-golfbuis. P lampa o fali postępującej. S framvågsrör. (531)

36. **frequency converter tube** : an electronic tube that contains both the mixer and local-oscillator electrode systems required for frequency conversion. ★ tube convertisseur de fréquence → *tube 67.* R частотопреобразовательная лампа. D Misch- und Oszillatorröhre. E tubo convertidor de frecuencia. I tubo convertitore di frequenza. N mengbuis. P lampa przemiany. S blandarrör med oscillatorsystem. (531)

37. **gas-filled tube** : an electronic tube in which the electrical characteristics are substantially established by the ionization of deliberately-introduced vapour or gas. ★ tube à gaz → *tube à gaz 1.* R газовая лампа. D gasgefüllte Röhre. E tubo de gas. I tubo a gas. N met gas gevulde buis. P lampa gazowana. S jonrör. (151,531)

38. **glow discharge tube** : a gas-filled tube in which the required current is that of a glow discharge. ★ tube à décharge luminescente → *tube 33.* R прибор тлеющего разряда. D Glimmentladungsröhre. E tubo de descarga luminiscente. I tubo a scarica luminescente. N glimontladingsbuis. P jarzeniówka; lampa o wyładowaniu jarzeniowym. S glimrör. (531)

39. **glow indicator tube** : a glow discharge tube in which the cathode glow is used for indicating purposes, e.g. the presence of a voltage, the magnitude of a current. ★ tube indicateur à luminescence → *tube 82.* R индикаторная лампа тлеющего разряда. D Glimmanzeigeröhre. E tubo indicador luminiscente. I tubo indicatore a luminescenza. N glimindicatorbuis. P wskaźnik jarzeniowy. S glimindikatorrör. (531)

40. **grid-controlled arc discharge tube** : an arc discharge tube in which one or more electrodes are employed exclusively to control the starting of the discharge. ★ tube à décharge en arc à grille de commande → *tube 32.* R прибор дугового разряда с сеточным управлением. D gittergesteuerte Bogenentladungsröhre. E tubo de descarga en arco por rejilla de control. I tubo con scarica ad arco con griglia di comando. N boogontladingsbuis met roosterbesturing. P lampa o wyładowaniu łukowym z elektrodą zapłonową. S gallerstyrt bågurladdningsrör. (531)

41. **hollow-anode tube** (*Syn.* Chaoul tube) : → *tube 13*

42. **hot-cathode stepping tube** : an electron-beam tube in which the beam has two or more stable positions and can be made to step in sequence when a suitably shaped signal is applied to an input electrode or a group of input electrodes. ★ tube-compteur à cathode chaude → *tube compteur 18.* R шаговая трубка с горячим катодом. D Schrittschaltröhre (Vakuum-Zählröhre). E tubo contador de cátodo caliente. I tubo contatore con catodo caldo. N trochotron. P lampa wiązkowa komutacyjna. S stegexiteringsrör. (531)

43. **hot-cathode tube** : a high-vacuum X-ray tube with an incandescent cathode. ★ tube Coolidge → *tube 69.* R трубка с горячим катодом. D Glühkathodenröhre. E tubo de catodo caliente; tubo de Coolidge. I tubo a catodo caldo. N gloeikathodebuis. P lampa z żarzoną katodą. S glödkatodrör. (881)

44. **image intensifier tube** : an electronic tube in which an image projected on to a photoemissive surface produces a corresponding intensified image on a luminescent surface. ★ tube intensificateur d'image → *tube 85.* R усилитель яркости изображения. D Bildverstärkerröhre. E tubo intensificador de imagen; tubo amplificador de imagen. I tubo intensificatore di immagine; tubo amplificatore di immagine. N beeldversterkbuis. P wzmacniacz obrazu. S bildförstärkarrör. (531)

45. **image pick-up tube** (*Syn.* camera tube) : → *camera tube 2*

46. **image-converter tube** : a vacuum tube in which an image (usually of non-visible radiation) is projected on to a photoemissive surface which then produces a corresponding visible image on a luminescent surface. ★ tube convertisseur d'image → *tube 68.* R электронный преобразователь изображения. D Bildwandlerröhre. E tubo convertidor de imagen. I tubo convertitore di immagine. N beeldomzetbuis. P przetwornik obrazowy. S bildomvandlarrör. (531)

47. **interval between X-ray tube exposures** : → *interval 11*

48. **line focus tube** : an X-ray tube in which a rectangular focal spot on the surface of the anode is projected as a square effective focal spot in the direction of the beam axis. ★ tube à foyer linéaire → *tube 40.* R трубка с линейчатым фокусом. D Strickfokus-Röhre. E tubo de foco lineal. I tubo a fuoco lineare. N buis met lijnfocus. P lampa z liniowym ogniskiem. S streckfokusrör. (881)

49. **linear-beam tube** (O-type tube) : a space-charge-wave tube in which the directions of the electron beam, the electric field and the static magnetic field, if any, are parallel. ★ tube à faisceau linéaire → *tube 39.* R лампа с прямолинейным электронным потоком (лампа О-типа). D Linearstrahlröhre (O-Typ-Röhre). E tubo de haz lineal (tubo tipo O). I tubo con fascio lineare (tipo O). N lineaire bundelbuis (O-type buis). P lampa typu O. S carcinotronrör (O-typsrör). (531)

50. **loose tube cable** : → *cable 42*

51. **maximum rated X-ray tube load** : → *load 64*

52. **maximum rated X-ray tube voltage** : → *voltage 110*

53. **mercury vapour tube** : a gas-filled tube in which the active gas is mercury vapour. ★ tube à vapeur de mercure → *tube 59.* R ртутный прибор. D Quecksilberdampf-Entladungsröhre. E tubo de vapor de mercurio. I tubo a vapore di mercurio. N kwikdampbuis. P lampa rtęciowa. S kvicksilverjonrör. (531)

54. **mixer tube** : an electronic tube which, when associated with an external oscillator, achieves the frequency conversion function. ★ tube mélangeur → *tube 87.* R смесительная лампа. D Mischröhre. E tubo mezclador. I tubo mescolatore. N mengbuis. P lampa mieszająca. S blandarrör. (531)

55. **multi-electrode voltage stabilizing tube** : a multi-electrode voltage stabilizing tube designed to operate as a voltage divider having several outputs. ★ tube stabilisateur de tension à plusieurs électrodes → *tube 103.* R многоэлектродная лампа-стабилизатор напряжения. D Mehrstrecken-Stabilisatorröhre. E tubo estabilizador de tensión de varios electrodos. I tubo stabilizzatore di tensione con molti elettrodi. N stabilisatiebuis met meer dan twee elektroden. P jarzeniówka stabilizacyjna wieloelektrodowa. S flerelektrodsstabilisatorrör. (531)

56. **multiple tube** : an electronic tube containing within one envelope two or more units or groups of electrodes associated with independent electron streams though sometimes with one or more common electrodes. *Example :* double diode, double triode, triode-heptode, etc. ★ tube multiple → *tube 88.* R комбинированная лампа. D Verbundröhre. E tubo múltiple. I tubo multiplo. N meervoudige buis. P lampa kombinowana. S multipelrör. (531)

57. **multi-stage (X-ray) tube** : an X-ray tube in which the electrons are accelerated through a series of hollow electrodes at progressively higher potentials. ★ tube à plusieurs étages → *tube 57.* R многокаскадная (рентгеновская) трубка. D Mehrstufen-(Röntgen-) Röhre. E tubo de varias etapas. I tubo a raggi X a più stadi. N meertraps(röntgen)buis. P lampa rentgenowska wielostopniowa. S flerstegsrör. (881)

58. **neon indicator tube** : a glow indicator tube containing neon. ★ tube indicateur à néon → *tube 83.* R неоновый индикаторный прибор. D Neonanzeigeröhre. E tubo indicador de neón. I tubo indicatore al neon. N neonindicatorbuis. P wskaźnik neonowy. S neonindikatorrör. (531)

59. **noise-generator plasma tube** : an extended-interaction plasma tube designed to generate white noise over a stated band. ★ tube générateur de bruit à plasma → *tube 81.* R плазменный генератор шума. D gasgefüllte Rauschröhre. E tubo generador de ruido de plasma. I tubo generatore di rumore a plasma. N ruisgeneratorbuis (met gas gevulde). P lampa plazmowa szumowa. S brusplasmarör. (531)

60. **oscillograph tube** (*Syn.* oscilloscope tube) : → *tube 61*

61. **oscilloscope tube** (*Syn.* oscillograph tube) : a cathode-ray tube used to produce a visible pattern, which is the graphical representation of the relation between electric signals. ★ tube oscilloscope → *tube 89.* R осциллографическая трубка. D Oszillographenröhre. E tubo osciloscopio. I tubo oscilloscopico. N oscilloscoopbuis. P lampa oscyloskopowa. S oscilloskoprör; oscillografrör. (531)

62. **phase-shifter tube** : an extended-interaction plasma tube, designed for use in a transmission line, to enable adjustment of the effective electrical length of the line. ★ tube déphaseur → *tube 78.* R газоразрядный фазовращатель. D Phasenschieberröhre. E tubo desfasador. I tubo sfasatore. N faseverschuivingsbuis. P przesuwnik fazy plazmowy. S fasskiftningsrör. (531)

63. **photoelectric tube** (*Syn.* photosensitive tube) : → *tube 65*

64. **photomultiplier tube** (*Syn.* multiplier photocube (USA)) : a vacuum tube intended to convert light into an electrical signal and which essentially contains a photocathode and an electron multiplier. ★ (tube) photomultiplicateur → *photomultiplicateur 3.* R фотоэлектронный умножитель; фотоумножитель. D Sekundärelektronenvervielfacher mit Photokathode; Photovervielfacher. E tubo fotomultiplicador. I tubo fotomoltiplicatore. N fotomultiplicatorbuis. P powielacz fotoelektronowy; fotopowielacz. S fotomultiplikator(rör). (391,531,881)

65. **photosensitive tube** (*Syn.* photoelectric tube) : a tube the fonctioning of which is determined by the photoelectric effect. ★ tube photosensible → *tube 94.* R фоточувствительный прибор. D photoelektronische Röhre. E tubo fotosensible; tubo fotoeléctrico. I tubo fotosensibile; tubo fotoelettrico. N lichtgevoelige buis. P lampa fotoelektryczna. S fotorör. (531)

66. **picture tube** (*Syn.* television tube) : a cathode-ray tube used for the reproduction of television images. ★ tube (à) image → *tube 42.* R приемная телевизионная трубка. D Bildröhre; Fernsehbildröhre. E tubo de imagen; tubo de televisión. I tubo per televisione (cinescopio). N beeldbuis. P kineskop. S bildrör. (531,723)

67. **pool rectifier tube** : a gas-filled rectifier tube with a pool cathode. ★ tube redresseur à cathode liquide → *tube 100.* R выпрямительный прибор с жидкометаллическим катодом. D Gleichrichterröhre mit Quecksilberkathode. E tubo rectificador de cátodo líquido. I tubo raddrizzatore con catodo liquido. N gelijkrichtbuis met vloeibare kathode. P lampa prostownicza o katodzie ciekłej. S likriktarrör med vätskekatod. (531)

68. **pre T.R. tube** (*Syn.* pre-transmit/receive tube) : a T.R. tube, having a low-Q, that precedes another T.R. tube and produces a preliminary reflection to reduce the power level at the second T.R. tube. ★ tube pré T.R. → *tube 95.* R разрядник предварительной защиты приемника; предварительный РЗП. D Vorsperröhre. E tubo P.T.R. (pretransmite/recibe). I tubo pre-T.R. (pre-trasmissione/ricezione). N pre-zend/ontvangbuis. P zwierak pre-NO. S anpassningsväxlare. (531)

69. **pre-transmit/receive tube** (*Syn.* pre T.R. tube) : → *tube 68*

70. **projection tube** : a cathode-ray tube used with an optical system to produce a projected image. ★ tube de projection → *tube 73.* R проекционная трубка. D Projektionsröhre. E tubo de proyección. I tubo di proiezione. N projectiebuis. P kineskop projekcyjny. S projektionsbildrör. (531)

71. **rectifier tube** : an electronic tube designed to rectify alternating current. ★ tube redresseur → *tube 98.* R выпрямительный прибор. D Gleichrichterröhre. E tubo rectificador. I tubo raddrizzatore. N gelijkrichtbuis. P lampa prostownicza. S likriktarrör. (531)

72. **remote cut-off tube** (*Syn.* variable-mu tube) : → *tube 95*

73. **rotating-anode tube** : an X-ray tube in which the anode rotates, bringing a continually changing area of its target into the electron beam, and thereby permitting higher power input per unit area of the effective focal spot. ★ tube à anode tournante → *tube 24.* R трубка с вращающимся анодом. D Drehanoden-Röhre. E tubo de anodo giratorio. I tubo ad anodo rotante. N draaianodebuis. P lampa z wirującą anodą. S rör med roterande anod. (881)

74. **self-rectifying (X-ray) tube** : a hot-cathode X-ray tube which acts as its own rectifying device to obtain unidirectional flow of current. ★ tube autoredresseur → *tube 65.* R самовыпрямляющая (рентгеновская) трубка. D selbstgleichrichtende Röntgenröhre. E tubo autorrectificador. I tubo (a raggi X) autoraddrizzante. N zelfgelijkrichtende (röntgen)buis. P lampa rentgenowska samoprostująca. S självlikriktande rör. (881)

75. **shadow-mask tube** : a three-gun, colour picture tube in which a perforated, electrically conductive masking sheet ensures that each of the electron beams is directed only to the phosphors of the corresponding primary colour. ★ tube à masque → *tube 45.* R кинескоп с теневой маской. (723)

76. **sharp-cut-off tube** : a space-charge-controlled tube designed so that the amplification factor, and therefore the mutual conductance, are sensibly constant and not appreciably varied by a change in the operating point. ★ tube à blocage rapide → *tube 26.* R лампа постоянной крутизны. D Röhre ohne Regelkennlinie. E tubo de bloqueo rápido; tubo de pendiente fija. I tubo con pendenza fissa (interdizione ripida). N buis met constante steilheid. P lampa o ostrym odcięciu. S konstant-branthetsrör. (531)

77. **single X-ray tube exposure** : → *exposure 18*

78. **space-charge-controlled tube** : an electronic tube whose mode of operation is based on the control of space-charge-limited current by electrode voltages. ★ tube à charge d'espace → *tube 29.* R электронноуправляемая лампа; лампа с электростатическим управлением. D raumladungsgesteuerte Röhre. E tubo de carga de espacio. I tubo a carica spaziale. N buis met gestuurde ruimteladingsstroom. P lampa o elektrodzie sterującej. S rymdladdningsstyrt rör. (531)

79. **space-charge-wave tube** : a vacuum tube the functioning of which is based on the conversion of energy by interaction of electromagnetic fields with space-charge waves of an electron beam. ★ tube à onde de charge d'espace → *tube 50.* R электронноволновая лампа, прибор свч. D Laufzeitröhre. E tubo de onda de carga de espacio. I tubo a onda di carica spaziale. N ruimteladingsgolfbuis. P lampa o fali ładunku przestrzennego. S rymdladdningsvågrör. (531)

80. **storage tube** : an electron-beam tube into which information may be introduced at a stated moment and read later. ★ tube à mémoire → *tube 46.* R запоминающая трубка. D Speicherröhre. E tubo de memoria. I tubo a memoria. N geheugenbuis. P lampa pamięciowa. S minnesrör. (531)

81. **television tube** (*Syn.* picture tube) : → *tube 66*

82. **therapeutic-type protective tube housing** : → *housing 9*

83. **T.R. tube** (*Syn.* transmit/receive tube) : a blocking tube that during the reception period, allows passage of the low-power signals from the antenna to the receiver; and during the transmission period, protects the receiver from the high-power signals of the transmitter. ★ tube T.R. → *tube 104.* R разрядник защиты приемника (РЗП); РЗП. D Empfängersperröhre. E tubo T.R. (transmite/recibe). I tubo T.R. (trasmissione/ricezione). N zend/ontvangbuis. P zwierak NO; zwierak nadawanie-odbiór. S S-M-växlare. (531)

84. **transmit/receive tube** (*Syn.* T.R. tube) : → *tube 83*

85. **travelling-wave tube** : a linear-beam forward-wave tube designed to operate as an amplifier. ★ tube à onde progressive → *tube 52.* R лампа бегущей волны. D Wanderfeldröhre. E tubo de onda progresiva. I tubo a onda progressiva. N lopende-golfbuis. P lampa o fali bieżącej. S vandringsvågrör. (531)

86. **trigger tube** : a cold cathode gas-filled tube in which one or more electrodes are employed exclusively to control the starting of the discharge. ★ tube relais → *tube 101.* R тригатрон. D Glimmrelaisröhre; Relaisröhre. E tubo relé; tubo de disparo. I tubo trigger (di innesco). N relaisbuis. P lampa spustowa. S triggerrör. (531)

87. **tube** (*Syn.* tubing) : a hollow, cylindrical body, usually of circular cross section, and of arbitrarily limited maximum diameter, which is small in proportion to its length. *Notes. 1* — The maximum limiting diameter is typically about 100 mm. *2* — In North America *tubing* usually designates a flexible tube. See also, *sleeving.* ★ tube → *tube 23.* R трубка; тюбинг. D Rohr; flexibles Rohr. E tubo. I tubo; tubo flessibile. N buis. P rurka. S rör. (212)

88. **tube efficiency** : → *efficiency 46*

89. **tube load** : → *load 89*

90. **tube noise** : → *noise 91*

91. **tube starting time** : → *time 219*

92. **tube support** : → *support 32*

93. **tube voltage drop** : → *voltage drop 2*

94. **vacuum tube** : an electronic tube evacuated to such a degree that its electrical characteristics are essentially unaffected by the ionization of any residual vapour or gas. ★ tube à vide → *tube 60.* R вакуумная лампа. D Vakuumröhre. E tubo de vacío. I tubo a vuoto. N vacuümbuis. P lampa próżniowa. S vacuumrör. (151,531,881)

95. **variable-mu tube** (*Syn.* remote cut-off tube) : a space-charge-controlled tube designed so that the amplification factor, and therefore the mutual conductance, can be varied over a wide range by means of a change in the operating point. ★ tube à pente réglable → *tube 55.* R лампа переменной крутизны. D Regelröhre. E tubo de pendiente variable; tubo de bloqueo remoto. I tubo con pendenza variabile (interdizione lontana). N buis met regelbare steilheid. P lampa regulacyjna. S variabelt-my-rör; reglerrör. (531)

96. **voltage reference tube** : a voltage stabilizing tube designed to have a maintaining voltage constant with time within a range of current and temperature that is usually narrow. ★ tube de référence de tension → *tube 75.* R лампа опорного напряжения. D Vergleichsspannungsröhre. E tubo de referencia de tensión. I tubo di riferimento di tensione. N spanningsreferentiebuis. P wzorzec napięcia jarzeniówkowy. S spänningsreferensrör. (531)

97. **voltage regulator tube** (*Syn.* voltage stabilizing tube) : → *tube 98*

98. **voltage stabilizing tube** (*Syn.* voltage regulator tube (U.S.A.)) : a glow-discharge or corona-discharge tube designed to have a maintaining voltage substantially constant over a specified range of operating conditions, such as current, temperature and time. ★ tube stabilisateur de tension → *tube 102.* R лампа-стабилизатор напряжения. D Stabilisatorröhre. E tubo estabilizador de tensión. I tubo stabilizzatore di tensione. N spanningsstabilisatiebuis. P jarzeniówka stabilizacyjna. S spänningsstabilisatorrör. (531)

99. **windowless photomultiplier tube** (*Syn.* windowless multiplier phototube (USA)) : a photomultiplier tube in which no material is interposed between the source of photons and the target used as photocathode. A particular application is the detection of ultra-violet radiation of short wavelength. ★ tube photomultiplicateur sans fenêtre → *tube 93.* R безоконный фотоумножитель. D offener Sekundärelektronenvervielfacher mit Photokathode; offener Photovervielfacher; offener SEV mit Photokathode. E tubo fotomultiplicador sin ventana. I tubo fotomoltiplicatore senza finestra. N vensterloze fotomultiplicatorbuis. P bezokienkowy powielacz fotoelektronowy; fotopowielacz bezokienkowy. S fönsterlös fotomultiplikator. (391)

100. **X-ray tube** : an evacuated tubular structure with two or more electrodes that are insulated from each other : a cathode from which electrons are emitted ; an anode at which the deceleration of the electrons causes the emission of X-radiation and, in some cases, one or more pierced electrodes between the cathode and anode to accelerate, to focus, or to control the electon beam. ★ tube radiogène → *tube 97.* R рентгеновксая трубка. D Röntgenröhre. E tubo de rayos X. I tubo a raggi X. N röntgenbuis. P lampa rentgenowska. S röntgenrör. (881)

101. **X-ray tube assembly** : → *assembly 30*

102. **X-ray tube current** : → *current 223*

103. **X-ray tube exposure** : → *exposure 21*

104. **X-ray tube exposure cycle time** : → *time 228*

105. **X-ray tube exposure frequency** : → *frequency 197*

106. **X-ray tube exposure series** : → *series 33*

107. **X-ray tube housing** : → *housing 10*

108. **X-ray tube voltage** : → *voltage 269*

tubing

1. **tubing** (*Syn.* tube) : → *tube 87*

tubular

1. **tubular clear emitter (high temperature)** : → *emitter 13*
2. **tubular clear emitter (low temperature)** : → *emitter 14*
3. **tubular plate** : → *plate 31*

tundish

1. **charging tundish** : a device of conical shape to receive liquid metal to supply a continuous casting installation. ★ répartiteur → *répartiteur 3.* R промежуточный разливочный ковш. D Zwischenpfanne. E repartidor (de carga). I *(–Tundish–*) di caricamento. N vulconus. P kadź pośrednia. S tapplåda; tundish. (841)

tuned

1. **tuned telephone ringer** (*Syn.* harmonic telephone ringer) : → *ringer 1*

tuner

1. **E-H tuner** : a waveguide tuner comprising an hybrid T whose E plane and H plane arms are terminated by adjustable short circuits. ★ élément d'accord E-H → *élément 13.* R волноводный согласующий тройник. D E-H-Abgleichvorrichtung. E sintonizador E-H. I elemento d'accordo E-H. N E-H-afstemmer. P stroik E-H. S E-H-anpassare. (726)
2. **slide screw tuner** : a tuning screw adjustable in position along the longitudinal axis of a transmission line. ★ vis d'accord mobile → *vis 6.* R подвижный настроечный винт. D Gleitstift-Abgleicher. E tornillo de sintonización deslizante. I vite di adattamento mobile. N verschuifbare schroefafstemmer. P stroik śrubowy przesuwny. S skjutbar pinnanpassare. (726)
3. **slug tuner** : an impedance transformer comprising one or more longitudinally adjustable pieces of metal or dielectric in a transmission line. ★ manchon de réglage → *manchon 9.* R настроечное устройство со вставками. D ..... E sintonizador de varillas. I manicotto di regolazione. N propafstemmer. P stroik wkładkowy. S plugganpassare. (726)
4. **stub tuner** (*Syn.* stub) : an adjustable length of transmission line shorted or open-circuited, connected electrically in parallel or in series with the main line. ★ bras de réactance → *bras 6.* R настроечный шлейф; шлейф. D Abstimm-Stichleitung. E rama de sintonización; rama. I adattatore. N stub-afstemmer. P sęk strojeniowy. S stubbanpassare. (726)
5. **tuner** : a radio receiver capable of reproducing sound programmes, providing only a low-level audio frequency output. ★ récepteur audiofréquence → *récepteur 5.* R тюнер. (723)
6. **video demodulator** (*Syn.* video tuner) : → *demodulator 5*
7. **waveguide tuner** : an adjustable waveguide impedance transformer. ★ régleur de guide d'ondes → *régleur 2.* R волноводное согласующее устройство. D Hohlleiterabgleichvorrichtung. E sintonizador en guiaonda. I adattatore di guida d'onda. N golfgeleideraanpasser. P stroik falowodowy; strojnik falowodowy. S anpassare. (726)

tungsten

1. **tungsten filament lamp** : → *lamp 67*
2. **tungsten halogen lamp** : → *lamp 68*
3. **tungsten ribbon lamp** : → *lamp 69*

tuning

1. **antenna tuning housing** : → *housing 1*
2. **electronic tuning range** : → *range 21*
3. **frequency tuning range** : → *range 30*
4. **frequency tuning range** : → *range 31*
5. **mechanical tuning range** : → *range 42*
6. **optimum mechanical tuning range** : → *range 56*
7. **standard tuning frequency** : → *frequency 183*
8. **tuning** (of a device) : the process of adjusting one of the resonance frequencies of a device by varying the value of one or more of its parameters. ★ accord → *accord 1.* R настройка. D Abstimmen (eines Gerätes oder eines Bauteiles). E sintonización (de un dispositivo). I accordo (di un dispositivo). N afstemmen. P strojenie. S avstämma till resonans. (151)
9. **tuning fork contact** : → *contact 116*
10. **tuning probe** (*Syn.* tuning screw) : → *screw 5*
11. **tuning screw** : → *screw 5*
12. **tuning sensitivity** : → *sensitivity 32*
13. **tuning slug** : → *slug 3*

tunnel

1. **cable tunnel** : a construction of corridor or tunnel configuration intended to include numerous cables which are arranged on cable racks or shelves. ★ galerie à câbles → *galerie 1.* R кабельный туннель. D Kabelstollen. E galería de cables. I galleria cavi. N ..... P tunel kablowy. S kabeltunnel. (605)
2. **tunnel breakdown** (*Syn.* Zener breakdown) : → *breakdown 17*
3. **tunnel diode** : → *diode 24*
4. **tunnel effect** : → *effect 86*
5. **tunnel furnace** : → *furnace 57*

tunnelling

1. **Giaever (normal electron) tunnelling** : the passage of single electrons through a thin barrier separating two superconductors, or a superconductor and a normal conductor, when a potential difference is maintained between the two. ★ effet de tunnel Giaever → *effet 47.* R туннельный эффект Гиавера; туннельный эффект нормальных электронов. D Giaever-Tunneleffekt. E efecto de túnel Giaever; efecto de túnel normal (de electrón). I effetto tunnel Giaever; effetto tunnel normale d'elettrone. N tunneleffect van Giaever; normaal tunneleffect (van een elektron). P zjawisko tunelowe Giaevera. S tunneleffekt. (121)
2. **tunnelling mode** (*Syn.* leaky mode) : → *mode 34*
3. **tunnelling ray** (*Syn.* leaky ray) : → *ray 12*

turbidity

1. **total turbidity factor** : → *factor 177*

turbine

1. **condensing steam turbine** : a steam turbine using a water cooled condenser to cool the exhaust steam. ★ turbine à vapeur à condensation → *turbine 5.* R конденсационная паровая турбина. D Kondensationsturbine. E turbina de vapor de condensación. I turbina a vapore a condensazione. N condensatiestoomturbine. P turbina parowa kondensacyjna. S kondensturbin. (602)
2. **condensing steam turbine with bleeding** : a condensing steam turbine from which a significant part of steam is extracted for needs other than the generation of electricity. ★ turbine à vapeur, à condensation avec soutirage → *turbine 7.* R конденсационная турбина с отборами пара. D Entnahme-Kondensationsturbine. E turbina de vapor de condensación con extracción. I turbina a vapore a condensazione con spillamento. N aftapcondensatiestoomturbine. P turbina parowa kondensacyjno-upustowa. S kondensturbin med avtappning. (602)
3. **Francis turbine** : a hydraulic reaction type turbine with fixed runner blades usually operated from a medium or low head source with medium flow rate. ★ turbine Francis → *turbine 8.* R радиально-осевая гидротурбина; турбина Френсиса. D Francisturbine. E turbina Francis. I turbina Francis. N Francisturbine. P turbina Francisa. S Francisturbin. (602)
4. **gas turbine set** : → *set 19*
5. **impulse type turbine** : a turbine in which a fluid acts chiefly by its kinetic energy. ★ turbine à action → *turbine 2.* R активная гидротурбина. D Aktionsturbine. E turbina de acción. I turbina ad azione. N impulsturbine. P turbina akcyjna. S aktionsturbin. (602)
6. **Kaplan turbine** : an axial hydraulic reaction type turbine with adjustable runner blades operated with a high flow rate. ★ turbine Kaplan → *turbine 9.* R поворотно-лопастная гидротурбина; турбина Каплана. D Kaplanturbine. E turbina Kaplan. I turbina Kaplan. N Kaplanturbine. P turbina Kaplana. S Kaplanturbin. (602)
7. **Pelton turbine** : a hydraulic impulse type turbine usually operated from a high head source with small flow rate. ★ turbine Pelton → *turbine 10.* R ковшовая гидротурбина; турбина Пельтона. D Peltonturbine. E turbina Pelton. I turbina Pelton. N Peltonturbine. P turbina Peltona. S Peltonturbin. (602)
8. **propeller turbine** : a Kaplan type turbine with non-adjustable runner blades suitable for non-varying head sources. ★ turbine-hélice → *turbine-hélice 1.* R пропеллерная гидротурбина. D Propellerturbine. E turbina hélice. I turbina ad elica. N schroefturbine. P turbina śmigłowa. S propellerturbin. (602)
9. **reaction type turbine** : a turbin in which a fluid acts both by its kinetic energy and by its pressure. ★ turbine à réaction → *turbine 3.* R реактивная гидротурбина. D Reaktionsturbine. E turbina de reacción. I turbina a reazione. N reactieturbine. P turbina reakcyjna. S reaktionsturbin. (602)
10. **steam turbine** : a turbine whose driving fluid is steam. ★ turbine à vapeur → *turbine 4.* R паровая турбина. D Dampfturbine. E turbina de vapor. I turbina a vapore. N stoomturbine. P turbina parowa. S ångturbin. (602)
11. **turbine motor vehicle** : → *vehicle 31*
12. **turbine-type** : applied to synchronous machines designed for high-speed operation and having an excitation winding embedded in slots in a cylindrical steel rotor made from forgings or thick discs. ★ ..... → . R турбогенератор. D Turbogenerator (-motor). E turbomáquina síncrona. I tipo-turbo. N turbomachine. P maszyna turbinowa synchroniczna. S av turbotyp; turbo-. (411)
13. **turbine-type alternating current generator** : → *generator 41*

turbo-generator

1. **turbo-generator set** : → *set 60*

turbulence

1. **scale of turbulence** : → *scale 19*
2. **turbulence** : random variations in velocity within a liquid or gaseous medium which may induce heterogeneous values of certain characteristics of the medium, such as refractive index. ★ turbulence → *turbulence 2.* D Turbulenz. P turbulencja. (705)

turbulent

1. **turbulent plasma torch** : → *torch 11*

turn

1. **area turns** (of a search coil) : the product of the effective area of a search coil and the number of turns. ★ produit du nombre de spires par la section effective → *produit 5.* R площадь витков (пробной катушки). D Windungsfläche (einer Suchspule). E producto del número de espiras por la sección efectiva (de una bobina de exploración). I prodotto del numero di spire per la sezione effettiva (di una bobina d'esplorazione). N produkt van effectieve oppervlakte en aantal windingen (van een zoekspoel). P powierzchniozwoje (cewki probierczej). S areavarvprodukt. (221)
2. **effective turns per phase** : the product of the number of series turns of each coil by the number of coils connected in series per phase and the winding factor. ★ spires effectives par phase → *spire 12.* R число эффективных витков на фазу. D wirksame Windungen je Phase. E espiras efectivas por fase. I spire effettive per fase. N effectief windingstal per fase. P efektywna liczba zwojów w fazie. S effektiva lidningsvarv per fas. (411)
3. **turn** : a conductor or group of conductors formed into a loop. ★ spire → *spire 10.* R виток. D Windung. E espira. I spira. N winding. P zwój. S varv. (151)
4. **turn** : the basic coil element which forms a single conducting loop comprising one insulated conductor. *Note.* — The conductor may consist of a number of strands or laminations. Each strand or lamination is in the form of wire, rod, strip or bar, depending on its cross-section, and may be either uninsulated or insulated for the sole purpose of reducing eddy currents. ★ spire → *spire 11.* R виток. D Windung. E espira. I spira. N winding. P zwój. S lindningsvarv. (411)
5. **turn insulation** : → *insulation 55*
6. **turns correction** : → *correction 19*

turning

1. **turning gear** (*Syn.* barring gear) : → *barring 1*

turn-off

1. **turn-off arm** : → *arm 18*
2. **turn-off thyristor** : → *thyristor 10*

turn-signal

1. **turn-signal light** (*Syn.* direction indicator light) : → *light 11*

turnstile

1. **turnstile antenna** : → *antenna 118*

turntable

1. **turntable** : a circular plate rotated by a driving mechanism and supporting a disk which is being used for reproduction or recording. ★ plateau → *plateau 4.* R диск проигрывателя; планшайба станка записи. D Plattenteller. E plato. I piastra. N draaitafel. P talerz. S skivtallrik. (806)
2. **vacuum chuck turntable** : a turntable which holds a disk by means of a suction device so that it will remain as flat as possible. ★ plateau à succion → *plateau 5.* R планшайба с вакуумным присосом. D Ansaugplattenteller. E plato de vacío. I piastra ad aspirazione. N vacuümplateau. P talerz podciśnieniowy. S vakuumskivtallrik. (806)

turn-to-turn

1. **turn-to-turn fault** : → *fault 81*
2. **turn-to-turn test** (*Syn.* interturn test) : → *test 42*

TV

1. **TV** (*Syn.* television broadcasting) : → *broadcasting 14*
2. **TV set** (*Syn.* television receiver) : → *receiver 15*

TVL

1. **TVL** (*Syn.* tenth-value layer) : → *layer 21*

TVT

1. **TVT** (*Syn.* tenth-value layer) : → *layer 21*

twelve-month

1. **twelve-month running-mean sunspot number** : → *number 33*

twelve-peak

1. **twelve-peak generator** : → *generator 42*

twice

1. **twice minimum power points** : → *point 51*

twin

1. **simple (catenary) equipment with twin contact wires** : → *equipment 67*
2. **twin bundle** : → *bundle 10*
3. **twin motor vehicle** : → *vehicle 32*

twinning

1. **twinning** (*Syn.* line pairing) : → *pairing 1*

twinplex

1. **twinplex** (*Syn.* four-frequency duplex telegraphy) : → *telegraphy 6*

twin-post

1. **bound twin-post connection** : → *connection 9*

twin-T

1. **twin-T network** : → *network 109*

twist

1. **binomial twist** : a step twist such that the amplitude reflection factor of each step is proportional in magnitude to a coefficient of a binomial series. *Note.* — The exponent of the binomial will be $(n\text{-}1)$ where n is the number of abrupt rotations. ★ (guide en) torsade binômiale → *torsade 1.* R биноминальная скрутка. D binomisch in Stufen tordierter Hohlleiter. E transición de torsión binomial. I guida con frangiatura binomiale. N golfgeleider met binomiale torsie. P skręt dwumianowy. S binomialvred. (726)
2. **step twist** : a device formed by abruptly rotating about the waveguide longitudinal axis, one or more waveguide sections each normally a quarter wavelength long. ★ torsade à paliers → *torsade 2.* R ступенчатая скрутка. D in Stufen tordierter Hohlleiter. E transición de torsión escalonada. I torsione localizzata. N golfgeleider met verspringende torsie. P skręt skokowy. S stegvred. (726)
3. **waveguide twist** : a section of waveguide in which there is progressive rotation of the transverse cross-section about the longitudinal axis. ★ torsade progressive → *torsade 3.* R волноводная скрутка. D Hohlleitertwist; tordierte Hohlleiter. E transición de torsión progresiva. I torsione continua. N golfgeleider met geleidelijke torsie. P skręt falowodowy. S vågledarvred. (726)

twist-on

1. **twist-on connector** : → *connector 51*

twitter

1. **twitter** (*Syn.* interline flicker) : → *flicker 9*

two-breaker

1. **two-breaker arrangement** : → *arrangement 7*

two-conductor

1. **two-conductor bundle** (*Syn.* twin bundle) : → *bundle 10*

two-control-point

1. **two-control-point method** : → *method 26*

two-dimensional

1. **two-dimensional computer generated image** : → *image 23*

two-layer

1. **two-layer winding** : → *winding 86*

two-motion

1. **two-motion selector** : → *selector 22*

two-part

1. **two-part costing** : → *costing 2*
2. **two-part tariff** : → *tariff 46*

two-party

1. **two-party line** (*Syn.* shared-service line) : → *line 141*

two-peak

1. **two-peak generator** (*Syn.* full-wave apparatus) : → *apparatus 8*

two-phase

1. **2-phase (voltage) source** : → *voltage source 9*

two-phase-to-earth

1. **two-phase-to-earth fault** : → *fault 82*

two-port

1. **balanced two-port network** : → *network 6*
2. **input immittance of a two-port network** : → *immittance 5*
3. **output immittance of a two-port network** : → *immittance 7*
4. **reciprocal two-port network** : → *network 81*
5. **symmetrical two-port network** : → *network 96*
6. **two-port** : pertaining to an electrical network or device with two separate terminations through which signals can enter or leave. *Examples :* a waveguide section ; a two-terminal-pair network. ★ biporte → *biporte 2.* R четырехполюсный. D Zweitor. E bipuerta. I a due porte; a due accessi; biporta. N tweepoort. P dwuwrotnikowy. S tvåport. (702)
7. **two-port network** : → *network 110*

two-rate

1. **two-rate charge** (*Syn.* two-step charge) : → *charge 48*
2. **two-rate tariff** : → *tariff 47*
3. **two-rate time-of-day tariff** : → *tariff 48*

two-sample

1. **two-sample variance** (*Syn.* Allan variance) : → *variance 1*

two-signal

1. **two-signal method** : → *method 27*

two-stage

1. **international two-stage selection** : → *selection 9*

two-step

1. **two-step action** : → *action 24*
2. **two-step charge** : → *charge 48*

two-terminal

1. **linear 2-terminal circuit element** : → *circuit element 5*
2. **two-terminal** : pertaining to a one-port electrical network or device the termination of which is a pair of terminals. ★ bipôle → *bipôle 3.* R двухполюсник. D Zweipol. E bipolo. I bipolo. N een netwerk met een dubbelpolig aansluitpunt. P dwukońcówkowy. S tvåpol. (702)
3. **two-terminal network** (*Syn.* one-port network) : → *network 61*
4. **2-terminal circuit** : → *circuit 195*
5. **2-terminal circuit element** : → *circuit element 7*

two-terminal-pair

1. **two-terminal-pair** : pertaining to a two-port electrical network or device in which each port is a pair of terminals. ★ quadripôle → *quadripôle 1.* **R** четырехполюсник. **D** Vierpol. **E** cuadripolo. **I** quadripolo. **N** een netwerk met twee dubbelpolige aansluitingen. **P** o dwóch parach końcówek. **S** fyrpol. (702)
2. **two-terminal-pair network** (*Syn.* two-port network) : → *network 110*

two-value

1. **two-value capacitor motor** : → *motor 115*

two-way

1. **two-way** (*Syn.* both-way) : → *both-way 1*
2. **two-way circuit** (*Syn.* both-way circuit) : → *circuit 12*

two-wire

1. **two-wire switching** : → *switching 74*

type

1. **bar primary bushing type current transformer** : → *transformer 10*
2. **bar primary type current transformer** : → *transformer 11*
3. **brake type** : a term indicating how the braking force is produced : electrodynamic, electromagnetic, mechanical, etc. ★ mode de freinage → *mode 32.* **R** способ торможения. **D** Bremsmethode. **E** tipos de freno. **I** modo di frenatura. **N** remtype. **P** typ hamulca. **S** bromstyp. (811)
4. **bus type current transformer** : → *transformer 14*
5. **bushing type current transformer** : → *transformer 15*
6. **cable type current transformer** : → *transformer 16*
7. **cartridge type bearing** : → *bearing 12*
8. **commutator type frequency convertor** : → *convertor 6*
9. **connector type** : connector within a particular sub-family. *Example :* edge-socket connector, a mated set comprising a board-mounted connector and its counter-part, etc. ★ type de connecteur → *type 26.* **R** тип соединителя. **D** Steckverbinder-Bauart. **E** tipo de conector. **I** tipo di connettore. **N** connectortype. **P** typ. **S** anslutningsdonstyp. (581)
10. **depletion type field-effect transistor** : → *transistor 3*
11. **enhancement type field-effect transistor** : → *transistor 4*
12. **expulsion type arrester** : → *arrester 2*
13. **extended rating type current transformer** : → *transformer 31*
14. **flange type** : a waveguide flange characterization determined by the flange outline. ★ type de bride → *type 25.* **R** тип фланца. **D** Flanschtyp. **E** tipo de brida; clase de brida. **I** tipo di flangia. **N** flenstype. **P** typ kołnierza. **S** flänstyp. (726)
15. **grid type plate** (*Syn.* pasted plate) : → *plate 15*
16. **impulse type turbine** : → *turbine 5*
17. **inductor type synchronous motor** : → *motor 39*
18. **multi-core type current transformer** : → *transformer 43*
19. **non-linear resistor type arrester** : → *arrester 4*
20. **oil-immersed type reactor** : → *reactor 23*
21. **oil-immersed type transformer** : → *transformer 45*
22. **pad type bearing** : → *bearing 24*
23. **pin type bond** : → *bond 1*
24. **plug-in type bearing** : → *bearing 26*
25. **pocket type plate** : → *plate 24*
26. **reaction type turbine** : → *turbine 9*
27. **single-core type current transformer** : → *transformer 61*
28. **split core type current transformer** : → *transformer 62*
29. **support type current transformer** : → *transformer 65*
30. **type of action of an element** (of an element) : for an element, the way in which the input variable affects the output variable. *Note.* — Distinction is made between persistent and intermittent action. ★ mode d'action → *mode 29.* **R** тип действия элемента. **D** wirkungsmäßiges Verhalten eines Gliedes. **E** modo de acción de un elemento. **I** modo di azione di un elemento. **N** werking van een element. **P** rodzaj działania członu; rodzaj pracy członu. **S** verkningssätt (hos ett element). (351)
31. **type of control** : → *control 198*
32. **type of protection** (of an electrical apparatus for explosive atmospheres) : the specific measures applied to electrical apparatus to avoid ignition of a surrounding explosive atmosphere by such apparatus. ★ mode de protection → *mode 40.* **R** вид взрывозащиты (взрывозащищенного электрооборудования). **D** Zündschutzart. **E** modo de protección (de un material eléctrico para atmósferas explosivas). **I** modo di protezione (di una costruzione elettrica per atmosfere esplosive). **N** beschermingswijze (tegen ontsteking). **P** środek ochrony. **S** utföringsform. (426)
33. **type test** : → *test 97*
34. **type-tests** : → *test 98*
35. **wound primary type current transformer** : → *transformer 80*

U

U-bolt

1. **U-bolt** : a fitting in the form of a U attached to a support. (see figure 466-6). ★ étrier → *étrier 1.* R U-образный болт. D U-Bügel. E estribo. I cavallotto. N U-beugel. P wieszak kabłąkowy śrubowy; strzemię. S regelbygel. (466)

UCS

1. **CIE 1976 UCS diagram** (*Syn.* CIE 1976 uniform-chromaticity-scale diagram) : → *diagram 6*
2. **UCS diagram** (*Syn.* uniform-chromaticity-scale diagram) : → *diagram 25*

UEL

1. **UEL** (*Syn.* upper explosive limit) : → *limit 21*

Ulbricht

1. **Ulbricht sphere** (*Syn.* integrating sphere) : → *sphere 1*

ultimate

1. **ultimate consumer** : → *consumer 9*
2. **ultimate design load** : → *load 90*

ultrasound

1. **ultrasound** : acoustic oscillation whose frequency is above the high-frequency limit of audible sound (about 16 kHz). ★ ultrason → *ultrason 1.* R ультразвук. D Ultraschall. E ultrasonido. I ultrasuono. N ultrageluid. P ultradźwięk. S ultraljud. (801)

ultraviolet

1. **ultraviolet lamp** : → *lamp 70*
2. **ultraviolet radiation** : → *radiation 116*

ultrawhite

1. **ultrawhite** : zone where the level of a picture signal, is beyond the white level, outside the normal black to white range of levels. ★ ultrablanc → *ultrablanc 1.* R белее белого. (723)

umbilical

1. **umbilical connector** : → *connector 52*

umbrella

1. **umbrella antenna** : → *antenna 119*
2. **umbrella reflector antenna** : → *antenna 120*

unabsorbed

1. **standard unabsorbed field strength** : → *field strength 13*

unavailability

1. **asymptotic mean unavailability** $\bar{U}$: for modelling purposes, the limit, if this exists, of the mean unavailability over a time interval (t_1, t_2) when t_2 tends to infinity. *Notes. 1* — The asymptotic mean unavailability $\bar{U}(t_1, t_2)$ is related to the mean unavailability as

$$\bar{U} = \lim_{t_2 \to \infty} \bar{U}(t_1, t_2)$$

2 — When such a limit exists it is not dependent on t_1. ★ indisponibilité moyenne asymptotique → *indisponibilité 15.* R асимптотически средний коэффициент простоя. D asymptotische mittlere Nichtverfügbarkeit. E indisponibilidad media asintótica. I indisponibilità media asintotica. N asymptotische gemiddelde niet beschikbaarheid. P niedyspozycyjność asymptotyczna średnia. S asymptotisk medelotillgänglighet. (191)

2. **asymptotic unavailability** (U) : for modelling purposes, the limit, if this exists, of the instantaneous unavailability when the time tends to infinity. *Note.* — Under certain conditions, for instance constant failure rate and constant repair rate, the asymptotic unavailability may be expressed by the ratio of the mean down time to the sum of the mean up time and mean down time. ★ indisponibilité asymptotique → *indisponibilité 10.* R стационарный коэффициент простоя. D asymptotische Nichtverfügbarkeit. E indisponibilidad asintótica. I indisponibilità asintotica. N asymptotische niet-beschikbaarheid. P niedyspozycyjność asymptotyczna. S asymptotisk otillgänglighet. (191)

3. **instantaneous unavailability** ($U(t)$) : the probability that an item is not in state to perform a required function under given conditions at a given instant of time, assuming that the required external resources are provided. ★ indisponibilité (instantanée) → *indisponibilité 13.* R нестационарный коэффициент простоя. D momentane Nichtverfügbarkeit. E indisponibilidad instantánea. I indisponibilità istantanea. N momentele niet-beschikbaarheid. P niedyspozycyjność (obiektu) chwilowa. S momentan otillgänglighet. (191)

4. **mean unavailability** $\bar{U}(t_1, t_2)$: the mean of the instantaneous unavailability over a given time interval (t_1, t_2). *Note.* — The mean unavailability is related to the instantaneous unavailability $U(t)$, as

$$\bar{U}(t_1, t_2) = \frac{1}{t_2 - t_1} \int_{t_1}^{t_2} U(t)\,\mathrm{d}t$$

★ indisponibilité moyenne → *indisponibilité 14.* R средний коэффициент простоя. D mittlere Nichtverfügbarkeit. E indisponibilidad media. I indisponibilità media. N gemiddelde niet-beschikbaarheid. P niedyspozycyjność średnia. S medelotillgänglighet. (191)

5. **(steady-state) unavailability** : the mean of the instantaneous unavailability under steady-state conditions over a given time interval. *Note.* — Under certain conditions, for instance constant failure rate and constant repair rate, the steady-state unavailability may be expressed by the ratio of the mean down time to the sum of the mean up time and mean down time. ★ indisponibilité en régime établi → *indisponibilité 11.* R стационарный на интервале времени коэффициент простоя. D stationäre Nichtverfügbarkeit. E indisponibilidad en régimen permanente. I indisponibilità stazionaria. N niet-beschikbaarheid (in stationaire toestand). P niedyspozycyjność (w stanie ustalonym). S otillgänglighet (vid fortfarighet). (191)

6. **unavailability** (*Syn.* outage) : → *outage 2*
7. **unavailability factor** : → *factor 179*

unavailable

1. **unavailable** (*Syn.* parked) : → *parked 1*

unavoidable

1. **unavoidable energy** : → *energy 81*

unbalance

1. **overall channel unbalance** : the difference, expressed in decibels, of the output levels of two or more channels when recording and reproducing a signal of frequency identical to that obtained from the "level" section of the specified calibration tape. ★ déséquilibre des voies en enregistrement lecture → *déséquilibre 4.* R рассогласование каналов записи-воспроизведения. D Überalles-Kanalungleichheit. E desequilibrio de los canales de registro y de lectura. I sbilanciamento totale dei canali. N totale kanaalonbalans. P niezrównoważenie torów (zapisu i odczytywania) całkowite. S kanalobalans vid in- och avspelning. (806)
2. **reproduce channel unbalance** : the difference, expressed in decibels, of the output levels of two or more channels when reproducing a signal of frequency identical to that obtained from the "level" section of the specified calibration tape. ★ déséquilibre des voies en lecture → *déséquilibre 5.* R рассогласование каналов воспроизведения. D Wiedergabe-Kanalungleichheit. E desequilibrio de los canales de lectura. I sbilanciamento dei canali di riproduzione. N onbalans tussen de weergeefkanalen. P niezrównoważenie toru odczytywania. S kanalobalans vid avspelning. (806)
3. **unbalance factor** : → *factor 180*
4. **unbalance protection for a capacitor bank** : → *protection 56*
5. **voltage unbalance** (*Syn.* voltage imbalance) : in a polyphase system, a condition in which the r.m.s. values of the

phase voltages or the phase angles between consecutive phases are not all equal. ★ déséquilibre de tension → *déséquilibre 1.* R неуравновешенность напряжений; разбаланс напряжений. D Spannungsunsymmetrie. E desequilibrio de tensión. I squilibrio di tensione. N spanningsonbalans. P nierównowaga napięciowa. S spänningsobalans. (161)

6. **voltage unbalance** : phenomenon due to the differences between voltage deviations on the various phases, at a point of a polyphase system, resulting from differences between the phase currents or geometrical asymmetry in the line. ★ déséquilibre des tensions d'un réseau → *déséquilibre 3.* R несимметрия напряжений. D Spannungsunsymmetrie. E desequilibrio de tensiones de una red. I squilibrio delle tensioni di una rete. N spanningsonbalans. P asymetria napięcia. S spänningsosymmetri. (604)

unbalanced

1. **unbalanced metallic circuit** : → *circuit 191*
2. **unbalanced state of a polyphase network** : → *state 47*

unblocking

1. **unblocking signal** : → *signal 244*

unbound

1. **unbound mode** : → *mode 95*

unconnected

1. **unconnected network** : → *network 114*

uncontrolled

1. **uncontrolled slip** : → *slip 10*

uncoupled

1. **uncoupled mode** : → *mode 96*

undamped

1. **undamped natural frequency** : → *frequency 192*

under-compounded

1. **under-compounded** : applied to a compound generator to denote that the series winding is so proportioned that the terminal voltage at rated load is less than at no load. ★ génératrice à excitation hypocompound → *générateur 33.* R генератор недокомпаундированного возбуждения. D Generator mit Unter-Verbunderregung. E generador con excitación «hipocompound». I generatore ad eccitazione sottocompensata. N ondergecompoundeerde machine. P prądnica z niedowzbudzeniem szeregowym. S underkompounderad. (411)

undercut

1. **undercut** (*Syn.* bell) : → *bell 1*

underframe-mounted

1. **underframe-mounted motor** : → *motor 116*

underground

1. **underground cable** : → *cable 72*
2. **underground substation** : → *substation 44*
3. **underground system** : → *system 245*

underlap

1. **underlap** : a defect in facsimile reproduction due to the fact that the width of the scanning line is less than the scanning pitch. ★ interlignage → *interlignage 1.* R недокрытие; межстрочные просветы. D sperren. E interlineación. I interlineatura. N onderlap (bij facsimile). P międzylinia. S underlappning. (721)

under-modulation

1. **under-modulation** : the condition in which the peak values of the modulating signal stay for a long period of time well below the maximum value permitted by the transmission system or equipment considered. ★ sous-modulation → *sous-modulation 1.* R недомодуляция. D Untermodulation. E submodulación. I sottomodulazione. N ondermodulatie. P niedomodulowanie. S undermodulering. (702)

underneath

1. **clearance underneath the gear case** : → *clearance 7*

underreach

1. **permissive underreach distance protection system** : → *system 143*

underreaching

1. **underreaching (for a distance protection system)** : the condition of a distance protection system when the shortest zone setting corresponds to an equivalent distance shorter than the length of the protected circuit. ★ zone réduite (pour un système de protection de distance) → *zone 53.* R сокращенная зона (для системы дистанционной защиты). D Unterreichweite (eines Distanzschutzsystems). E zona reducida (para un sistema de protección de distancia). I zona ridotta (per un dispositivo di protezione a distanza). N verkort meetgebied. P strefa skrócona (zabezpieczenia odległościowego). S underräckning (för distansskyddssystem). (448)

under-reamed

1. **under-reamed pile** (*Syn.* expanded pile) : → *pile 5*

undertaking

1. **distribution undertaking** : an organization supplying electricity to a group of consumers by means of a distribution system. ★ distributeur → *distributeur 2.* R электроснабжающее предприятие. D Elektrizitätsversorgungsunternehmen. E distribuidor. I distributore. N distributiebedrijf. P dostawca energii elektrycznej. S eldistributör. (604,691)
2. **supply undertaking** (*Syn.* supplier) : the party supplying electricity to distribution undertakings or to consumers. ★ fournisseur → *fournisseur 1.* R электроснабжающая организация; поставщик. D Elektrizitätsversorgungsunternehmen; Lieferer. E suministrador. I fornitore. N elektriciteitsbedrijf. P dostawca. S kraftleverantör. (691)

under-voltage

1. **under-voltage** : a voltage of a value falling below the lowest rated value. ★ subtension → *subtension 1.* R недонапряжение. D Unterspannung. E subtensión. I sotto tensione. N onderspanning. P napięcie obniżone. S underspänning. (151)
2. **under-voltage release** : → *release 33*

underwater

1. **underwater sound projector** : → *projector 9*

undesired

1. **undesired signal** (*Syn.* unwanted signal) : → *signal 247*

undetected

1. **undetected error-rate** (*Syn.* residual error-rate) : → *error-rate 1*
2. **undetected fault time** : → *time 226*

undulate

1. **undulate resistor** : → *resistor 27*

undulating

1. **undulating current motor** : → *motor 117*
2. **undulating voltage** : → *voltage 213*

undulator

1. **Morse undulator** : a receiver used in Morse system in which a two-position stylus feeds ink to a continuously moving paper tape in conformity with two conditions of the incoming signals, thus creating a legible record. ★ ondulateur Morse → *ondulateur 1.* R ондулятор Морзе. D Morse-Schreiber; Morse-Registrierer. E registrador morse de cinta. I registratore Morse. N Morse-ondulator. P undulator Morse'a. S undulator. (721)

unearthed

1. **unearthed voltage transformer** : → *transformer 75*

unfill

1. **unfill** (*Syn.* blow-hole) : a fault of the upper part of the groove edges caused by lack of material during moulding.

★ manque d'impression → *manque 3.* R недопрессовка. D unausgepresste Rillen («Silber»). E falta de impresión. I perdita di incisione. N lucht. P rwanie konturu. S grop. (806)

unformed

1. **unformed dry (secondary) battery** : → *battery 67*

ungrounded

1. **ungrounded voltage transformer** (*Syn.* unearthed voltage transformer) : → *transformer 75*

unguarded

1. **unguarded interval** : → *interval 24*

unhooking

1. **unhooking** (*Syn.* offhooking) : the action of connecting the line to the speech circuit of a telephone station, usually by lifting the handset. ★ décrochage → *décrochage 7.* R снятие трубки. D Abheben. E descolgar. I sollevamento del gancio commutatore. N (telefoon) opnemen. P podniesienie mikrotelefonu. S avlyftande (av telefonlur). (722)

unidirectional

1. **unidirectional** : pertaining to a link where the transfer of user's information is possible in one preassigned direction only. *Note.* — This term should not be used to describe the direction of call set-up. ★ unilatéral → *unilatéral 4.* R односторонний. D einseitig gerichtet. E unilateral; unidireccional. I unidirezionale. N in één richting. P (droga przesyłowa) jednokierunkowa. S enkelriktad. (701,704,714,715,721)
2. **unidirectional (electronic) valve** : → *valve 10*
3. **unidirectional microphone** : → *microphone 37*
4. **unidirectional pulse** : → *pulse 87*

uniform

1. **uniform colour space** : → *space 28*
2. **uniform connection** : → *connection 60*
3. **uniform ice loading** : → *loading 10*
4. **uniform insulation of a winding** : → *insulation 56*
5. **uniform major section** : → *section 27*
6. **(uniform) multivalue digital signal** : → *signal 246*
7. **uniform plane wave** : → *wave 72*
8. **uniform quantizing** : → *quantizing 7*
9. **uniform transmission line** : → *line 172*
10. **uniform waveguide** : → *waveguide 19*

uniform-chromaticity-scale

1. **CIE 1976 uniform-chromaticity-scale diagram** : → *diagram 6*
2. **uniform-chromaticity-scale diagram** : → *diagram 25*

uniformity

1. **deflection uniformity factor** : → *factor 38*
2. **uniformity of luminance** : → *luminance 23*
3. **uniformity ratio of illuminance** : → *ratio 101*

unilateral

1. **unilateral control** : → *control 199*
2. **unilateral gearing** : → *gearing 7*
3. **unilateral transmission** : → *transmission 114*

uninhibited

1. **uninhibited insulating oil** : → *oil 16*

unintelligible

1. **unintelligible crosstalk** : → *crosstalk 16*

uninterrupted

1. **uninterrupted duty** : → *duty 15*

unipolar

1. **unipolar transistor** : → *transistor 12*

unipole

1. **folded unipole (antenna)** (*Syn.* folded monopole (antenna)) : → *monopole 2*
2. **unipole (antenna)** (*Syn.* monopole (antenna)) : → *monopole 4*
3. **vertical unipole (antenna)** (*Syn.* vertical monopole (antenna)) : → *monopole 7*

unique

1. **unique hue** (*Syn.* unitary hue) : → *hue 4*

uniselector

1. **motor uniselector** : a uniselector which derives its wiper driving power from an individual electric motor. ★ sélecteur rotatif à moteur → *sélecteur 20.* R моторный вращательный искатель. D Motordrehwaehler. E selector rotativo motorizado. I selettore a motore. N motorkiezer. P wybierak (jednoruchowy) motorowy. S motordriven väljare. (714)
2. **subscriber's uniselector** (*Syn.* preselector) : → *preselector 1*
3. **uniselector** (*Syn.* rotary selector) : an electromechanical selector having only rotary motion. ★ sélecteur rotatif → *sélecteur 19.* R вращательный искатель. D Drehwaehler. E selector rotativo. I selettore rotativo. N draaikiezer. P wybierak jednoruchowy obrotowy. S roterande väljare. (714)

unit

1. **acknowledgement signal unit** (*Syn.* ACU (abbreviation)) : a signal unit which carries information pertaining to the correct or erroneous reception of one or more signal units or signal messages. ★ unité de signalisation d'accusé de réception → *unité 23.* R сигнальная единица подтверждения приема. D Quittungs-Zeichengabe-Element. E unidad de señalización de acuse de recepción. I unità di segnalazione di riscontro. N kwijtingssignaaleenheid. P jednostka sygnału potwierdzajaca. S kvittensenhet. (714)
2. **(american) volume unit** (vu) : the unit in which the vu meters are graduated such that the separation between two consecutive graduations corresponds to a variation of 1 dB for a sinusoidal signal of frequency 1000 Hz. ★ unité (américaine) de volume → *unité 15.* R (американская) единица волюма. D (amerikanische) Volumeneinheit. E unidad (americana) de volumen. I unità di volume (simbolo). N (Amerikaanse) eenheid van volume. P jednostka (amerykańska) wolumenu. S vu-enhet. (722)
3. **answer-back unit** : that part of a telegraph terminal or data terminal equipment which transmits automatically its answer-back code on receipt of the "Who are you" signal. ★ émetteur automatique d'indicatif → *émetteur 16.* R автоответчик. D Kennungsgeber. E emisor automático de indicativo. I unità di risposta automatica. N antwoordcodezender/zendeenheid. P znamiennik. S svarsenhet. (721)
4. **answer-back unit simulator** : → *simulator 1*
5. **articulated unit** : a group of vehicles in which the adjacent ends of adjoining vehicles are carried on a common bogie. ★ rame articulée → *rame 2.* R сочлененная секция. D Gelenktriebwagen. E unidad articulada. I automotrice (se elettrica) **articolata; elettromotrice articolata.** N gelede trein -of tramstel. P pociąg zespołowy przegubowy. S boggiledat tågsätt. (811)
6. **atomic mass unit** (u) : the mass of an atom fo carbon 12 divided by 12. ★ unité de masse atomique → *unité 19.* R атомная единица массы. D atomare Masseneinheit. E unidad de masa atómica. I unita di massa atomica. N eenheid van atoommassa (ame). P jednostka masy atomowej. S atommassenhet; atomär massenhet. (881)
7. **auxiliary switching unit** : a switching device to which are connected the connection lines of a given set with a view to using a smaller number of traffic circuits between this device and the serving connection exchange. *Note.* — An auxiliary switching unit can be a private branch exchange, a line cocentrator or a line sharing device. ★ commutateur auxiliaire → *commutateur 12.* D vermittlungstechnischen Hilfseinrichtung; Vorfeldeinrichtung. P łącznica pomocnicza. (715)
8. **auxiliary transformer of a unit** : → *transformer 7*
9. **available capacity of a unit** : → *capacity 3*
10. **base unit** : the unit of measurement of a base quantity. ★ unité de base → *unité 16.* R основная единица. D Basiseinheit. E unidad base. I unità fondamentale.

N grondeenheid. P jednostka (miary) podstawowa. S grundenhet. (111)

11. **bulb-type unit** : a hydroelectric set with its casing containing the generator and turbine immersed in the water flow. ★ groupe bulbe → *groupe 29.* R капсульный гидроагрегат. D Rohrturbinensatz. E grupo bulbo. I turbina a bulbo. N bulbturbine. P turbozespół rurowy. S rörturbin. (602)
12. **(capacitor) unit** : an assembly of one or more capacitor elements in the same container with terminals brought out. ★ condensateur unitaire → *condensateur 41.* R (конденсаторная) единица. D Kondensatoreinheit. E condensador unitario; unidad (de un condensador). I unità; unità capacitiva. N condensatoreenheid. P człon pojemnościowy; kondensatorowy zespół. S kondensatorenhet. (436)
13. **circuit switching unit** : a switching unit working in circuit switching mode. ★ commutateur de circuits → *commutateur 14.* D Leitungsvermittlungseinheit. P łącznica o komutacji łączy. (715)
14. **coherent system (of units)** : → *system 29*
15. **combining unit** : a device which permits television signals from several transmitters operating in different channels, to be combined for transmission from a common antenna. ★ multiplexeur de programmes → *multiplexeur 9.* R блок объединения. (723)
16. **compressor unit** : equipment comprising a compressor and its driving motor, and usually including the governor, silencer, strainer, safety valve, etc. ★ groupe (moteur) compresseur → *groupe 48.* R компрессорная установка (мотор-компрессора). D Kompressor-Einheit (Satz). E grupo (motor) compresor; motocompresor. I (gruppo) motocompressore. N compressoraggregaat. P zespół sprężarkowy. S kompressoraggregat. (811)
17. **crush load (of a train unit)** : → *load 9*
18. **derived unit** : the unit of measurement of a derived quantity. ★ unité dérivée → *unité 30.* R производная единица. D abgeleitete Einheit. E unidad derivada. I unità derivata. N afgeleide eenheid. P jednostka (miary) pochodna. S härledd enhet. (111)
19. **economical load of a unit** : → *load 15*
20. **electromagnetic unit** (of a capacitor voltage transformer) : the component of a capacitor voltage transformer, connected between the intermediate voltage terminal and the low voltage terminal of the capacitor divider or the earth, and which produces the secondary voltage. ★ élément électromagnétique → *élément 54.* R электромагнитное устройство (емкостного трансформатора напряжения). D induktiver Teil (eines kapazitiven Spannungswandlers). E elemento electromagnético (de un transformador de tensión capacitivo). I unità elettromagnetica (di un trasformatore di tensione capacitivo). N elektromagnetisch deel (van een capacitieve spanningstransformator). P człon indukcyjny (przekładnika napięciowego pojemnościowego). S mellanspänningsenhet hos kondensatorspänningstransformator. (321)
21. **electrostatic unit of charge (deprecated)** : a unit of electric charge equal approximately to 0.333 56 nC. ★ unité électrostatique de charge → *unité 31.* R электростатическая единица заряда (не рекомендуется). D elektrostatische Ladungseinheit (veralteter Begriff). E unidad electrostática de carga (desaconsejado). I unità elettrostatica di carica (sconsigliata). N elektrostatische ladingseenheid. P jednostka elektrostatyczna ładunku (nie zalecana). S elektrostatisk enhetsladdning. (881)
22. **final signal unit** (*Syn.* FSU (abbreviation)) : the last signal unit in a multi-unit message. *Note.* — In some systems, no provision is made for distinguishing final signal units from subsequent signal units. ★ unité de signalisation finale → *unité 26.* R конечная сигнальная единица. D Ende-Zeichengabe-Element. E unidad de señalización final. I unità di segnalazione finale. N afsluitende signaaleenheid. P jednostka sygnału końcowa. S avslutande signaleringsenhet. (714)
23. **functional unit** (of an assembly) : a part of an assembly of switchgear and controlgear comprising all the components of the main circuits and auxiliary circuits that contribute to the fulfilment of a single function. *Note.* — Functional units may be distinguished according to the function for which they are intended e.g.: incoming unit, through which electrical energy is normally fed into the assembly, outgoing unit through which electrical energy is normally supplied to one or more external circuits. ★ unité fonctionnelle → *unité 32.* R функциональный элемент (комплекта). D Schaltfeld; Funktionseinheit. E unidad funcional (de un conjunto). I unità funzionale (di un complesso). N functionele eenheid (van een inrichting). P blok funkcjonalny. S funktionsenhet. (441)
24. **functional unit** : an entity of hardware or software, or both together, capable of accomplishing a specified purpose. ★ unité fonctionnelle → *unité 33.* R функциональный элемент. D funktionale Einheit. E unidad funcional. I unità funzionale. N functionele eenheid. P zespół funkcjonalny. S funktionsenhet. (702,714)
25. **fuse-combination unit** : a combination of a mechanical switching device and one or more fuses in a composite unit, assembled by the manufacturer or in accordance with his instructions. *Note.* — Some fuse-combination units may be provided with a striker release such that the operation of any striker causes all poles of the associated mechanical switching device to open. ★ combiné-fusibles → *combiné-fusibles 1.* R комбинация предохранитель-коммутационный аппарат. D Schalter-Sicherungs-Einheit. E combinado con cortacircuitos fusibles; combinado-fusibles. I unità di combinato con fusibile. N met smeltveiligheden samengestelde eenheid. P zestaw łącznika mechanizmowego z bezpiecznikami. S elkopplare med säkring. (441)
26. **gross average heat rate of a unit** : → *rate 40*
27. **gross thermal efficiency of a unit** : → *efficiency 25*
28. **head unit** (*Syn.* skull unit) : specialized apparatus for skull radiography in accurately determinable multiple directions. ★ craniographe → *craniographe 1.* R головной агрегат; черепной агрегат. D Schädel-Aufnahmegerät. E craneógrafo. I craniostato. N schedeltoestel. P aparat rentgenowski do zdjęć czaszki. S skallbord. (881)
29. **heating cable unit** : a terminated heating cable designed to produce a particular heat output at a designated voltage and temperature, with or without cold leads. ★ dispositif à câble chauffant → *dispositif 4.* R кабельное устройство для нагрева. D Heizkabeleinheit. E dispositivo de cable de calentamiento. I dispositivo a cavo riscaldante. N verwarmingskabelelement. P odcinek kabla grzejnego. S värmekabel(element). (841)
30. **heating tape unit** : a terminated heating tape designed to produce a particular heat output at a designated voltage and temperature with or without cold leads. ★ dispositif à ruban chauffant → *dispositif 8.* R устройство с нагревателем в форме ленты. D Heizbandeinheit. E dispositivo de cinta de calentamiento. I dispositivo a nastro riscaldante. N verwarmingslintelement. P odcinek taśmy grzejnej. S värmebands(element). (841)
31. **(Heaviside) unit step** : → *step 2*
32. **idle signal unit** (*Syn.* IDU (abbreviation)) : a signal unit which is sent over a signalling link when no signal messages are available for transmission. *Note.* — In some systems, the functions of the idle and synchronization signal units are combined. ★ unité de signalisation de repos → *unité 24.* R заполняющая сигнальная единица. D Ruhe-Zeichengabe-Element. E unidad de señalización de reposo. I unità di segnalazione di riempimento. N ..... P jednostka sygnału swobody. S vilotillståndsenhet. (714)
33. **impairment unit** (*Syn.* imp) : → *imp 1*
34. **initial signal unit** (*Syn.* ISU (abbreviation)) : the first signal unit of a multi-unit message. ★ unité de signalisation initiale → *unité 27.* R начальная сигнальная единица. D Initial-Zeichengabe-Element. E unidad de señalización inicial. I unità di segnalazione iniziale. N leidende signaaleenheid. P jednostka sygnału początkowa. S inledande signaleringsenhet. (714)
35. **International System of Units (SI)** : → *system 95*
36. **isolation of a unit** : → *isolation 3*
37. **load factor of a unit** : → *load-factor 3*
38. **lone signal unit** (*Syn.* LSU (abbreviation)) : a signal unit for carrying a single-unit message. ★ unité de signalisation solitaire → *unité 28.* R одиночная сигнальная единица. D ..... E unidad de señalización solitaria. I unità di segnalazione isolata. N enkelvoudige signaaleenheid. P jednostka sygnału samotna. S enstaka signaleringsenhet. (714)
39. **loudspeaker unit** : → *loudspeaker 10*
40. **maximum capacity of a unit** : → *capacity 19*

41. **minimum safe output of the unit** : → *output 24*
42. **multiple unit operation** : → *operation 34*
43. **multiple unit train** : → *train 5*
44. **net average heat rate of a unit** : → *rate 60*
45. **net thermal efficiency of a unit** : → *efficiency 31*
46. **network termination unit** : the form of data circuit terminating equipment used when the data circuit is provided in a specialized data network. ★ appareil terminal sur le réseau → *appareil 48.* R блок окончания сети. D Netzabschlußeinheit. E aparato terminal sobre la red. I terminazione di rete. N eindstation van een netwerk. P urządzenie zakończenia sieciowego. S datanätsterminal. (721)
47. **normal load (of a train unit)** : → *load 68*
48. **phase-to-earth overvoltage per unit** : → *overvoltage 10*
49. **phase-to-phase overvoltage per unit** : → *overvoltage 11*
50. **plug-in unit** : a removable part of an instrument which, when fitted within it by plug and socket connection, enables the instrument to perform a particular function. ★ tiroir → *tiroir 2.* R сменный блок. D Einschub. E unidad enchufable. I unità intercambiabile. N inschuif-/insteekeenheid. P zespół wtykowy. S insatsenhet. (303)
51. **post insulator unit** : → *insulator 26*
52. **representation unit** : the minimum difference between two successive output states. ★ unité de représentation → *unité 21.* R единица представления. D Auflösung. E unidad de representación. I unità di rappresentazione. N ..... P jednostka (stanu wyjściowego). S informationsenhet. (303)
53. **rumble in a record player unit** : → *rumble 1*
54. **SI base unit** : one of the units on which SI is based. ★ unité SI de base → *unité 39.* R основная единица СИ. D SI-Basiseinheit. E unidad SI base. I unità SI fondamentale. N SI-grondeenheid. P jednostka SI podstawowa. S SI-grundenhet. (111)
55. **SI derived unit** : one of the derived units in SI. ★ unité SI dérivée → *unité 40.* R производная единица СИ. D abgeleitete SI-Einheit. E unidad SI derivada. I unità SI derivata. N afgeleide SI-eenheid. P jednostka SI pochodna. S härledd SI-enhet. (111)
56. **SI supplementary unit** : an SI unit which may be treated either as a base unit or as a derived unit. ★ unité SI supplémentaire → *unité 41.* R дополнительная единица СИ. D ergänzende SI-Einheit. E unidad SI suplementaria. I unità SI supplementare. N aanvullende SI-eenheid. P jednostka SI uzupełniająca. S SI-supplementenhet. (111)
57. **SI unit** : any of the base, supplementary or derived units in the SI. ★ unité SI → *unité 38.* R единица СИ. D SI-Einheit. E unidad SI. I unità SI. N SI-eenheid. P jednostka SI. S SI-enhet. (111)
58. **signal unit** : a group of bits used for the transfer of signalling information, including any associated check bits, which is encompassed by a single error check in a common-channel signalling system. *Note.* — In French, the term "unité de signalisation" is used in CCITT signalling system No. 6 and the term "trame sémaphore" in system No. 7. ★ unité de signalisation → *unité 22.* R сигнальная единица. D Zeichengabe-Element. E unidad de señalización. I unità di segnalazione. N signaaleenheid. P jednostka sygnału. S signaleringsenhet. (714)
59. **signal unit indicator** : → *indicator 23*
60. **skull unit** (*Syn.* head unit) : → *unit 28*
61. **string insulator unit** : a cap and pin insulator or long rod insulator of which the fixing devices are suitable for flexible attachment to other similar string insulator units or to connecting accessories. ★ élément de chaîne d'isolateurs → *élément 21.* R элемент гирлянды изолятора. D Kettenisolator. E elemento de cadena de aisladores. I elemento di catena. N isolatorkettingelement. P ogniwo łańcucha izolatorów. S kedjeisolatorelement. (471)
62. **subsequent signal unit** (*Syn.* SSU (abbreviation)) : a signal unit, other than the first, in a multi-unit message. *Note.* — In some systems, the last signal unit of a multi-unit message is not regarded as a subsequent signal unit. ★ unité de signalisation subséquente → *unité 29.* R последующая сигнальная единица. D Folge-Zeichengabe-Element. E unidad de señalización posterior. I unità di segnalazione successiva. N vervolgsignaaleenheid. P jednostka sygnału kolejna. S efterföljande signaleringsenhet. (714)
63. **synchronization signal unit** (*Syn.* SYU (abbreviation)) : a signal unit containing a bit pattern designed to facilitate rapid synchronisation, which is sent over a signalling link to establish bit, signal unit or block synchronism, as appropriate, between the transmitting and receiving terminals, and possibly sent subsequently to maintain synchronism when no signal messages are available for transmission. ★ unité de signalisation de synchronisation → *unité 25.* R сигнальная единица синхронизации. D Synchronisations-Zeichengabe-Element. E unidad de señalización de sincronización. I unità di segnalazione di sincronizzazione. N synchronisatiesignaaleenheid. P jednostka sygnału synchronizacyjna. S synkroniseringsenhet. (714)
64. **system of units** : → *system 226*
65. **(teleprinter) control unit** : unit associated with a teleprinter and containing the necessary auxiliary equipment for operating this instrument on a switched network. ★ coffret de commande (d'un téléimprimeur) → *coffret 2.* R управляющий блок (телетайпа). D (Fernschreiber-)Steuereinheit (Fernschreiber-). E unidad de control (teleimpresor). I unità di comando (della telescrivente). N (telex)besturingseenheid. P wzywak (dalekopisowy). S styrenhet. (721)
66. **thermal power unit** : a group forming a functional entity usually consisting of a boiler, a thermal generating set, a transformer and their auxiliaries. ★ tranche d'une centrale (électrique) thermique → *tranche 17.* R энергоблок тепловой электростанции. D Dampf-Kraftwerksblock; Block. E grupo de una central térmica. I unità di un impianto termoelettrico. N thermische produktie-eenheid. P blok w elektrowni cieplnej. S värmekraftsblock. (602)
67. **traction unit** : a general term denoting a locomotive, motor-coach or train-unit. ★ unité motrice → *unité 36.* R тяговая единица. D Triebfahrzeugeinheit. E unidad motriz. I mezzo di trazione. N krachtvoertuigeenheid. P zespół trakcyjny. S dragfordonsenhet. (811)
68. **unit auxiliaries** : → *auxiliary 35*
69. **unit doublet** : → *doublet 4*
70. **unit element** : → *element 61*
71. **unit equation** : → *equation 7*
72. **unit generator transformer** : → *transformer 77*
73. **unit impulse** (*Syn.* unit pulse) : → *pulse 88*
74. **unit impulse response** (*Syn.* unit pulse response) : → *response 26*
75. **unit interval** : → *interval 25*
76. **unit (of measurement)** : the value of a quantity chosen by convention as a reference for measuring quantities of the same kind. ★ unité (de mesure) → *unité 20.* R единица (измерения). D Einheit (Maßeinheit). E unidad (de medida). I unità (di misura). N eenheid (meet-). P jednostka (miary). S (mått)enhet. (111)
77. **unit protection system** (*Syn.* absolutely selective protection system) : → *system 1*
78. **unit pulse** : → *pulse 88*
79. **unit pulse response** : → *response 26*
80. **unit ramp** : → *ramp 2*
81. **unit switch equipment** (*Syn.* individual contactor equipment) : → *equipment 44*
82. **utilisation factor of the maximum capacity of a unit** : → *factor 182*
83. **utilisation period at maximum capacity of more units** : → *period 34*
84. **utilisation period at maximum capacity of one unit** : → *period 35*
85. **visual display unit** : a unit comprising devices which are necessary to display information required and, possibly to include acknowledgement facility. ★ console de visualisation → *console 7.* R блок визуальной информации. D Anzeigeeinheit. E consola de visualización. I quadro di visualizzazione. N ..... P tablica wizualizacji; konsola wizualizacji. S bildskärm. (605)
86. **wire feed unit** : a device designed to feed wire into an arc at a rate which can be adjusted to the relevant welding conditions to provide filler metal. ★ dévidoir → *dévidoir 1.* R механизм подачи проволоки. D Drahtvorschubeinrichtung. E alimentador de alambre. I unita di alimentazione del filo.

N draadaanvoereenheid. P podajnik drutu spawalniczego. S trådmatarenhet. (851)

unitary

1. **unitary hue** : → *hue 4*

unitunnel

1. **unitunnel diode** : → *diode 25*

unity

1. **frequency of unity current transfer ratio** : → *ratio 40*
2. **unity power-factor test** : → *test 99*

universal

1. **universal motor** : → *motor 118*
2. **universal tool attachment** : → *tool 9*

unmanned

1. **unmanned substation** : → *substation 45*

unoperated

1. **unoperated state** : → *state 48*

unperturbed

1. **unperturbed orbit** : → *orbit 10*

unreasonable

1. **unreasonable message** : → *message 18*

unrelated

1. **unrelated (perceived) colour** : → *colour 81*

unscheduled

1. **unscheduled maintenance** : → *maintenance 43*

unspillable

1. **unspillable (secondary) cell** : → *cell 42*

unsprung

1. **unsprung mass** : → *mass 34*

unstable

1. **unstable characteristic** : → *characteristic 93*

unstiffened

1. **unstiffened mode (of piezoelectric vibration)** : → *mode 97*

unsuccessful

1. **unsuccessful call** : → *call 60*
2. **unsuccessful reclosing** : → *reclosing 13*

unused

1. **unused insulating liquid** : → *liquid 13*

unwanted

1. **unwanted operation** : → *operation 73*
2. **unwanted operation (of a protection equipment)** : → *operation 74*
3. **unwanted resonance** : → *resonance 20*
4. **unwanted response** (*Syn.* unwanted resonance) : → *resonance 20*
5. **unwanted signal** : → *signal 247*

unwrapping

1. **unwrapping tool** : → *tool 10*

updating

1. **updating time** : → *time 222*

upper

1. **upper explosive limit** : → *limit 21*
2. **upper range limit** : → *range 71*
3. **upper range value** : → *value 71*
4. **upper sideband** : → *sideband 8*

up-shaft

1. **up-shaft insulation** : → *insulation 57*

upstream

1. **upstream** : pertaining to locations on the tape longitudinally displaced from a given reference point in the opposite direction to tape motion. ★ partie en amont → *partie 8.* R смещение против хода ленты. D gegen Bandlaufrichtung. E parte pasada. I parte a monte. N stroomopwaarts. P w kierunku przeciwnym do przesuwu. S ..... (806)

uptake

1. **uptake** (*Syn.* retention) : → *retention 6*

upward

1. **upward flux** : → *flux 27*

uranium

1. **natural uranium reactor** : → *reactor 20*
2. **uranium content meter** : → *content meter 8*

ursigram

1. **ursigram** : a message containing solar and geophysical data and solar activity predictions, distributed world wide by one of the prediction centres approved by the International Union of Radio-Science. *Note.* — The term "ursigram is derived from the acronym of the Union Radio-Scientifique Internationale. ★ ursigramme → *ursigramme 1.* D Ursigramm. P ursigram. (705)

usable

1. **maximum usable read number** : → *read 1*
2. **maximum usable reading time** : → *time 92*
3. **maximum usable viewing time** : → *viewing 1*
4. **maximum usable writing speed** : → *speed 25*
5. **minimum usable erasing time** : → *time 112*
6. **minimum usable field strength** : → *field strength 9*
7. **minimum usable reading speed** : → *speed 27*
8. **nominal usable field strength** : → *field strength 10*
9. **reference usable field strength** (*Syn.* nominal usable field strength) : → *field strength 10*
10. **usable field strength** : → *field strength 14*
11. **usable scanning line length** : → *length 34*

usage

1. **high usage circuit group** : → *group 42*
2. **subscriber usage meter** (*Syn.* subscriber's check meter) : → *meter 59*

use

1. **nominal range of use** : → *range 48*
2. **use factor** : → *factor 181*

useful

1. **lowest useful frequency** : → *frequency 126*
2. **useful area** : → *area 43*
3. **useful beam** : → *beam 26*
4. **useful heat** : → *heat 21*
5. **useful life** : → *life 13*
6. **useful life** : → *life 14*
7. **useful output power** : → *power 200*
8. **useful service output** : → *output 71*
9. **useful water capacity of a reservoir** : → *capacity 30*
10. **useful water reserve of a reservoir** : → *reserve 8*

user

1. **closed user group** : → *group 4*
2. **partially closed user group** : → *group 47*
3. **service user abandonment probability** : → *probability 13*
4. **service user mistake probability** : → *probability 14*
5. **user** (in common channel signalling) : a specific type of telecommunication service, among several possible types, which may use the message transfer facilities provided by a common-channel signalling system. ★ utilisateur → *utilisateur 2.* R пользователь (в сигнализации по общему каналу). D Anwender. E usuario (en señalización por canal común). I utilizzatore. N gebruiker. P użytkownik. S användare. (714)
6. **user** : any person or machine external to a telecommunication network which utilizes a service of this network for

communication. ★ usager → *usager 8.* D Benutzer. P użytkownik; abonent. (715)

7. **user class of service** : → *class 13*
8. **(user) class of service signal** : → *class 14*
9. **user facility** : → *facility 2*
10. **user part** : → *part 12*

utilance

1. **reduced utilance** (of an installation, for a reference surface) : ratio of the average illuminance at the reference surface to the installation flux density. ★ utilance réduite → *utilance 2.* R частный коэффициент использования светового потока светильников (осветительной установки, для расчётной плоскости). D spezifischer Raumwirkungsgrad (einer Beleuchtungsanlage, für eine Bezugsfläche). E utilancia reducida. I fattore di utilizzazione ridotto degli apparecchi di illuminazione. N gereduceerde utilantie. P sprawność pomieszczenia zredukowana. S relativ rumsverkningsgrad. (845)
2. **utilance** (of an installation, for a reference surface) (*U*) : ratio of the luminous flux received by the reference surface to the sum of the individual total fluxes of the luminaires of the installation. ★ utilance → *utilance 1.* R коэффициент использования светового потока светильников (осветительной установки, для расчётной плоскости). D Raumwirkungsgrad (einer Beleuchtungsanlage, für eine Bezugsfläche). E utilancia. I fattore di utilizzazione degli apparecchi di illuminazione. N utilantie. P sprawność pomieszczenia. S rumsverkningsgrad. (845)

utilization

1. **coefficient of utilization** (*Syn.* utilization factor) : → *factor 184*
2. **reduced utilization factor** : → *factor 151*
3. **utilisation factor of the maximum capacity of a unit** : → *factor 182*
4. **utilisation period at maximum capacity of more units** : → *period 34*
5. **utilisation period at maximum capacity of one unit** : → *period 35*
6. **utilization category** : → *category 6*
7. **utilization factor** (*Syn.* load-factor) : → *load-factor 4*
8. **utilization factor** : → *factor 184*
9. **utilization factor** : → *factor 185*
10. **utilization time** : → *time 223*
11. **utilization time of power losses** : → *time 224*

V

V

1. **volt, V** : → *volt 1*

vacant-code

1. **vacant-code tone** (*Syn.* number-unobtainable tone) : → *tone 20*

vacant-number

1. **vacant-number signal** : → *signal 250*

vacuum

1. **absolute permeability of vacuum** (*Syn.* magnetic constant) : → *constant 24*
2. **absolute permittivity of vacuum** (*Syn.* electric constant) : → *constant 18*
3. **characteristic impedance of vacuum** : → *impedance 10*
4. **cold wall vacuum furnace** : → *furnace 9*
5. **high vacuum valve device** : → *valve device 3*
6. **hot wall vacuum furnace** : → *furnace 21*
7. **vacuum arc furnace mould** : → *mould 2*
8. **vacuum brake** : → *brake 26*
9. **vacuum chuck turntable** : → *turntable 2*
10. **vacuum circuit-breaker** : → *circuit-breaker 21*
11. **vacuum exhauster** (*Syn.* exhauster) : → *exhauster 1*
12. **vacuum factor** : → *factor 186*
13. **vacuum furnace** : → *furnace 58*
14. **vacuum guide** : → *guide 8*
15. **vacuum gun** (*Syn.* internal gun) : → *gun 9*
16. **vacuum (incandescent) lamp** : → *lamp 71*
17. **vacuum melting** : → *melting 13*
18. **vacuum meter with alpha emitter** : → *meter 69*
19. **vacuum remelting** : → *remelting 2*
20. **vacuum remelting arc furnace** : → *arc furnace 46*
21. **vacuum spectrograph** : → *spectrograph 5*
22. **vacuum treatment** : → *treatment 6*
23. **vacuum tube** : → *tube 94*

VAD

1. **VAD** (*Syn.* vapour phase axial deposition technique) : → *technique 17*

valance

1. **valance lighting** : → *lighting 31*

valence

1. **valence band** : → *band 34*
2. **valence electron** : → *electron 29*

valley

1. **valley point** : → *point 52*
2. **valley value** : → *value 72*

value

1. **actual value of a specified time** : the value of a time interval obtained under specified conditions. ★ valeur mesurée d'une temporisation → *valeur 60.* R действительное значение выдержки времени. D Istwert der Zeitverzögerung. E valor medido de una temporización. I valore misurato (effettivo) di una temporizzazione. N gedefinieerde schakeltijd. P rzeczywista wartość nastawy czasowej. S verkligt värde för specificerad tid. (446)
2. **code value** (*Syn.* code combination) : → *combination 2*
3. **comparison value** : can be, as appropriate, the true value, the conventional true value or a value traced either to national standards or to standards agreed upon between the parties concerned. ★ valeur de comparaison → *valeur 16.* R сравнительное значение. D Vergleichswert. E valor de comparación. I valore di confronto. N vergelijkingswaarde. P wartość porównawcza. S jämförelsevärde. (301)
4. **conventional true value** (of a quantity) : a value approximating to the true value of a quantity such that, for the purpose for which that value is used, the difference between the two values can be neglected. *Notes. 1* — The conventional true value of a quantity is generally determined by means of methods and by the use of instruments of an accuracy suitable for each particular case. *2* — Since the true value cannot be known exactly, for the sake of simplicity and where no ambiguity exists, the term "true value" may be used when "conventional true value" is meant. ★ valeur conventionnellement vraie → *valeur 11.* R действительное значение (величины). D bestimmungsgemäss richtiger Wert. E valor convencionalmente verdadero (de una magnitud). I valore convenzionale vero (di una grandezza). N benaderde werkelijke waarde. P wartość rzeczywista (wielkości) umowna. S konventionellt sant värde. (301)
5. **conventional value** : a standardized value that is used as a measure of a parameter for the purposes of comparison, calibration, testing, etc. *Note.* — Conventional values do not necessarily apply during the actual process. ★ valeur conventionnelle → *valeur 10.* R условная величина. D Normwert. E valor convencional. I valore convenzionale. N genormaliseerde waarde. P wartość umowna. S normerat värde. (851)
6. **decision value** : a value defining the boundary between two adjacent quantizing intervals. ★ valeur de décision → *valeur 23.* R порог квантования. D Entscheidungswert. E valor de decisión; amplitud de decisión. I valore di decisione. N besliswaarde. P wartość decyzyjna. S beslutsgräns. (704)
7. **desired value** : the value of a variable wanted at a given instant, under specified conditions. ★ valeur prescrite → *valeur 69.* R заданное значение. D Sollwert. E valor especificado. I valore desiderato. N gewenste waarde. P wartość żądana. S börvärde. (351)
8. **disengaging value** : the value of the input energizing quantity (or characteristic quantity) at which a relay disengages under specified conditions.. ★ valeur de dépassement → *valeur 27.* R значение величины трогания при возврате. D Rückfallwert. E valor de liberación. I valore di disimpegno. N afvalwaarde. P wartość przełączająca (do stanu spoczynku). S frånslagsvärde. (446)
9. **disengaging value of the characteristic quantity** : the threshold value of the characteristic quantity at which the relay disengages under specified conditions. ★ valeur de dégagement de la grandeur caractéristique → *valeur 24.* R значение трогания при возврате характеристической величины. D Rückfallwert der charakteristischen Grösse. E valor de liberación de la magnitud característica. I valore di disimpegno della grandezza caratteristica. N drempelwaarde van de karakteristieke grootheid waarbij het relais afvalt. P ..... S frånslagsvärde för karakteristisk storhet. (446)
10. **fiducial value** : a clearly specified conventional value to which reference is made in order to define the fiducial error. *Note.* — This value can be (e.g.) the upper limit of the measuring range, the scale length or another clearly stated value. ★ valeur conventionnelle → *valeur 9.* R нормирующее значение. D Bezugswert. E valor convencional. I valore convenzionale. N referentiewaarde. P wartość charakterystyczna. S basvärde för noggrannhet. (301)
11. **final endurance value** : a value which is required throughout the life of a relay or a specified number of cycles.. ★ valeur finale d'endurance → *valeur 47.* R гарантируемое значение величины. D Kennwert (während der Lebensdauer). E valor final de endurancia. I valore finale di durata. N waarde bij het einde van de levensduur. P trwałość eksploatacyjna. S ...-värde under livslängd. (446)
12. ***G*-value** : the quotient of the mean number N of specified elementary entities (ions, radicals, or molecules) produced, destroyed or changed, and the mean value E_D of energy imparted to matter : $G = N/E_D$ The unit of the G value is $(100\ \mathrm{eV})^{-1}$. ★ nombre G → *nombre 12.* R величина G. D G-Wert. E número G. I valore G. N G-waarde. P liczba G. S G-värde. (881)

13. **indicated value** : — for a measuring instrument: the indicated or recorded value. — for a material measure: the nominal or stated value. — for a supply device: the set or nominal value. ★ valeur indiquée → *valeur 48.* R указанное значение. D angezeigter Wert. E valor indicado. I valore indicato. N aangegeven waarde. P wartość wskazana. S visat värde. (301)
14. **instantaneous value** : the value, at a given instant, of a time-dependent variable quantity. ★ valeur instantanée → *valeur 49.* R мгновенное значение. D Augenblickswert; Momentanwert. E valor instantáneo. I valore istantaneo. N ogenblikswaarde. P wartość chwilowa. S momentanvärde. (101,351)
15. **instantaneous value (of a wave)** : at a given time, the space dependent value of a quantity varying with time and position. ★ valeur instantanée (d'une onde) → *valeur 50.* R мгновенное значение (волны). D Augenblickswert; Momentanwert (einer Welle). E valor instantáneo (de una onda). I valore istantaneo (di un'onda). N ogenblikswaarde. P wartość chwilowa (fali). S momentanvärde. (101)
16. **just value** : a value which is measured on a given relay, at a given instant for a specified function.. ★ valeur mesurée → *valeur 59.* R замеренное значение величины. D Ist-(Wert). E valor medido. I valore misurato; valore effettivo. N werkelijke waarde. P wartość charakterystyczna. S verkligt ...-värde. (446)
17. **limiting continuous thermal withstand value of an energizing quantity** : the highest value (r.m.s. if a.c.) of the energizing quantity that a relay can carry continuously and under specified conditions, while satisfying the temperature requirements. ★ valeur limite thermique de service continu d'une grandeur d'alimentation → *valeur 55.* R предельное значение воздействующей величины по термической стойкости в продолжительном режиме работы. D thermische Dauerbelastbarkeit durch eine Erregungsgrösse. E valor límite térmico de servicio continuo de una magnitud de alimentación. I valore limite termico di servizio continuo di una grandezza d'alimentazione. N thermisch toelaatbare continubekrachtiging. P wytrzymałość cieplna długotrwała obwodu wejściowego. S termiskt gränsvärde för kontinuerlig matningsstorhet. (446)
18. **limiting dynamic value of an energizing quantity** : the highest value of an energizing quantity that a relay can withstand under specified conditions of waveform and duration without permanent degradation of the specified characteristics due to the resultant dynamic effect. ★ valeur limite dynamique d'une grandeur d'alimentation → *valeur 53.* R предельное значение воздействующей величины по динамической стойкости. D dynamischer Grenzwert einer Erregungsgrösse. E valor límite dinámico de una magnitud de alimentación. I valore limite dinamico di una grandezza d'alimentazione. N maximaal toelaatbare dynamische bekrachtiging. P wytrzymałość dynamiczna obwodu wejściowego. S dynamiskt gränsvärde för matningsstorhet. (446)
19. **limiting short-time thermal withstand value of an energizing quantity** : the highest value (r.m.s. if a.c.) of an energizing quantity that a relay can withstand under specified conditions for a specified short time without permanent degradation of the specified characteristics due to overheating. ★ valeur limite thermique de courte durée d'une grandeur d'alimentation → *valeur 54.* R предельное значение воздействующей величины по термической стойкости в кратковременном режиме работы. D thermische Kurzzeitbelastbarkeit durch eine Erregungsgrösse. E valor límite térmico de corta duración de una magnitud de alimentación. I valore limite termico di breve durata di una grandezza d'alimentazione. N thermisch toelaatbare kortstondige bekrachtiging. P wytrzymałość cieplna krótkotrwała obwodu wejściowego. S termiskt gränsvärde för kortvarig matningsstorhet. (446)
20. **limiting value** : in a specification, the greatest or smallest admissible value of one of the quantities. ★ valeur limite → *valeur 51.* R граничная величина. D Grenzwert. E valor límite. I valore limite. N grenswaarde. P wartość graniczna. S gränsvärde. (151)
21. **limiting value of the characteristic quantity** : one of the limiting values of the characteristic quantity applicable to a relay, under specified conditions, without changing its conditions and without causing damage to it. ★ valeur limite de la grandeur caractéristique → *valeur 52.* R предельное значение характеристической величины. D Grenzwert der charakteristischen Grösse. E valor límite de la magnitud característica. I valore limite della grandezza caratteristica. N grenswaarde van de karakteristieke grootheid. P wartość dopuszczalna wielkości charakterystycznej. S gränsvärde för karakteristisk storhet. (446)
22. **limiting values for operation** : the extreme values which an influence quantity can assume during operation without damaging the instrument so that it no longer meets its performance requirements when it is subsequently operated under reference conditions. *Note.* — The limiting values may depend on the duration of their application. ★ domaine de fonctionnement → *domaine 6.* R предельные условия работы. D Grenzwerte im Betrieb. E valores límites para funcionamiento. I valori limiti di funzionamento. N grenswaarden voor gebruik. P zakres użytkowy (wielkości wpływającej). S gränsvärden för funktion. (302)
23. **limiting values for storage** : the extreme values which an influence quantity can assume during storage without damaging the instrument so that it no longer meets its performance requirements when it is subsequently operated under reference conditions. *Note.* — The limiting values may depend on the duration of their application. ★ domaine de stockage → *domaine 12.* R предельные условия хранения. D Grenzwerte bei Lagerung. E valores límites para almacenamiento. I valori limiti per il deposito di magazzino. N grenswaarden voor opslag. P warunki magazynowania. S gränsvärden för lagring. (302)
24. **limiting values for transport** : the extreme values which an influence quantity can assume during transport without damaging the instrument so that it no longer meets its performance requirements when it is subsequently operated under reference conditions. *Note.* — The limiting values may depend on the duration of their application. ★ domaine de transport → *transport 3.* R предельные условия транспортирования. D Grenzwerte beim Transport. E valores límites para transporte. I valori limiti per il trasporto. N grenswaarden voor transport. P warunki transportu. S gränsvärden för transport. (302)
25. **local value (of a wave)** : at a given point, the time-dependent value of a quantity varying with time and position. ★ valeur locale (d'une onde) → *valeur 56.* R локальное значение (волны). D örtlicher (lokaler) Wert (einer Welle). E valor local (de una onda). I valore locale (di un'onda). N lokale waarde. P wartość lokalna (fali). S lokalt värde. (101)
26. **lower range value** : lowest value of the variable that a measuring device is adjusted to measure within the specified accuracy; for multirange devices, the upper range value and the lower range value refer to the particular range that the measuring device is set to measure. ★ portée minimale → *portée 15.* R нижнее значение диапазона. D Meßbereichs-Endwert. E valor inferior del margen. I valore inferiore del campo di misura. N minimale meetwaarde. P dolna granica zakresu pomiarowego. S mätområdets undre gräns. (351)
27. **mean value** : the arithmetic mean of the instantaneous values of a quantity taken over a specified time interval, equal to a period for a periodic quantity. ★ valeur moyenne → *valeur 61.* R среднее значение. D (arithmetischer) Mittelwert. E valor medio. I valore medio. N gemiddelde waarde. P wartość średnia. S (aritmetiskt) medelvärde. (101)
28. **must value** (*Syn.* test value) : → *value 68*
29. **neutralization value** (*Syn.* acid number) : → *number 1*
30. **nominal value** : a suitable approximate quantity value used to designate or identify a component, device or equipment. ★ valeur nominale → *valeur 63.* R номинальная величина. D ..... E valor nominal. I valore nominale. N nominale waarde. P wartość znamionowa; wartość nominalna. S nominellt värde. (151,811,851)
31. **nominal value of an energizing quantity** : a suitable approximate value of an energizing quantity used to designate or identify a relay. ★ valeur nominale d'une grandeur d'alimentation → *valeur 65.* R номинальное значение воздействующей величины. D Nennwert einer Erregungsgrösse. E valor nominal de una magnitud de alimentación. I valore nominale di una grandezza d'alimentazione. N nominale waarde van de bekrachtiging. P wartość znamionowa wielkości zasilającej; wartość znamionowa wielkości sterującej. S nominellt värde för matningsstorhet. (446)
32. **non-operate value** : the value of the input energizing quantity (or characteristic quantity) at which a relay does not operate under specified conditions.. ★ valeur de non-fonctionnement → *valeur 30.* R значение величины

несрабатывания. D Nichtarbeitswert. E valor de no funcionamiento; valor de no actuación (para relés de todo o nada). I valore di non funzionamento. N niet-opkomwaarde. P wartość niedziałania; wartość nie powodująca działania. S värde för icke-funktion. (446)

33. **non-release value** : the value of the input energizing quantity (or characteristic quantity) at which a relay does not release under specified conditions.. ★ valeur de non-relâchement → *valeur 32.* R значение величины невозврата. D Haltewert. E valor de no desactivación. I valore di non rilascio. N houdwaarde. P wartość niezwalniania. S värde för icke-återgång. (446)

34. **non-revert value** : for a certain type of polarized (d.c.) relay, the value of the input energizing quantity at which the relay, being in an operate condition, does not release by increasing the value of this energizing quantity under specified conditions.. ★ valeur de non-relâchement par suralimentation → *valeur 33.* R значение величины невозврата возбуждения. D Nichtwiederrückfallwert (durch Übererregung). E valor de no desactivación por sobrealimentación. I valore di non rilascio per sovralimentazione. N waarde groter dan de aantrekwaarde waarbij het relais niet opnieuw afvalt. P ..... S värde för icke-återgång vid övermatning. (446)

35. **non-revert-reverse value** : for a certain type of polarized (d.c.) relay, the value of the input energizing quantity at which the relay, being in a release condition by an appropriate energization, does not operate by increasing the value of this energizing quantity under specified conditions.. ★ valeur de non-fonctionnement par suralimentation → *valeur 31.* R значение величины несрабатывания реверсивным возбуждением. D Nichtwiederansprechwert (durch Übererregung). E valor de no funcionamiento por sobrealimentación. I valore di non funzionamento per sovralimentazione. N waarde groter dan de bekrachtigingswaarde waarbij het relais niet opnieuw opkomt. P ..... S värde för icke-funktion vid övermatning. (446)

36. **notional value** (of a uniform multivalue digital signal) : the value of a signal element of a uniform multivalue digital signal, with the unit of value being so chosen that adjacent values differ by one unit according to the following rules : a) for all unbalanced signals, the lowest notional value is zero ; b) for balanced signals having an even number of permitted discrete values, the notional values are symmetrical about, but omit zero ; c) for balanced signals having an odd number of permitted discrete values, the notional values are symmetrical about, and include zero. *Note.* — Examples of the notional values of uniform multivalue digital signals are as follows :

Unbalanced signals

binary	0	1			
ternary	0	1	2		
quaternary	0	1	2	3	
quinary	0	1	2	3	4

Balanced signals

binary			− 1/2	+ 1/2		
ternary		− 1		0	+ 1	
quaternary	− 3/2		− 1/2	+ 1/2		+ 3/2
quinary	− 2	− 1		0	+ 1	+ 2

★ valeur réduite → *valeur 72.* R величина представления (равномерного многоуровневого цифрового сигнала). D Wert (eines Mehrwertdigitalsignales). E valor reducido (de una señal numérica multivalente uniforme). I valore nozionale (di un segnale numerico multivalore uniforme). N begripswaarde (van een uniform meerwaardig signaal). P wartość zapisowa (sygnału cyfrowego wielowartościowego jednolitego). S ..... (704)

37. **numerical value equation** : → *equation 5*

38. **numerical value (of a quantity)** (*Syn.* measure (of a quantity)) : the ratio of the value of the quantity to the chosen unit of measurement. ★ valeur numérique (d'une grandeur) → *valeur 67.* R численное значение (величины). D Zahlenwert (einer Größe). E valor numérico (de una magnitud); medida (de una magnitud) (de una magnitud). I valore numerico (di una grandezza); misura (di una grandezza). N getalwaarde (van een grootheid). P wartość (wielkości) liczbowa. S mätetal. (111)

39. **operate value** : the value of the input energizing quantity (or characteristic quantity) at which a relay operates under specified conditions.. ★ valeur de fonctionnement → *valeur 28.* R значение величины срабатывания. D Arbeitswert. E valor de funcionamiento (para relés de todo o nada); valor de actuación (para relés de todo o nada). I valore di funzionamento. N aantrekwaarde; opkomwaarde. P wartość działania. S funktionsvärde. (446)

40. **peak value** : the greatest value of a time-dependent quantity during a specified time interval equal to a period for a periodic quantity. ★ valeur de crête → *valeur 18.* R максимальное значение; пиковое значение. D Größtwert; größter Augenblickswert (Momentanwert); Spitzenwert. E valor de cresta. I valore di picco. N topwaarde. P wartość szczytowa; wartość górna. S toppvärde. (101)

41. **peak value** (in electric traction) : on motor vehicles where the control includes a definite number of notches or positions for starting and regulation of speed, the term "peak" applies to the value of the quantity concerned immediately after taking a notch. *Note.* — This term applies especially to current and tractive effort at the wheel rim. ★ valeur de pointe → *valeur 34.* R пиковое значение (в электрической тяге). D obere Spitze. E valor de entrada (en tracción eléctrica). I valore di punta. N piekwaarde (bij elektrische tractie); topwaarde (bij elektrische tractie). P wartość szczytowa (w trakcji elektrycznej). S maximivärde. (811)

42. **peak-to-valley value** : the difference between the peak and valley values during a specified time interval, equal to a period for a periodic quantity. ★ valeur de crête à creux → *valeur 19.* R полное изменение величины. D Schwingungsbreite; Schwankung. E valor de cresta a valle. I valore da picco a valle. N top-dalwaarde. P rozpiętość szczytowodolinowa. S topp-till-botten-värde. (101)

43. **present value of cost losses** (USA) (*Syn.* present worth of cost of losses (USA)) : the sum of annual costs of losses calculated to present values. ★ coûts actualisés des pertes → *coût 8.* R приведенная стоимость потерь. D Barwert der Verlustkosten. E costos actualizados de pérdidas. I costi capitalizzati delle perdite. N constante waarde van verlieskosten. P zaktualizowany koszt strat. S nuvärde av förlustkostnader. (603)

44. **quantized value** : the single discrete value used to represent any value in a particular quantizing interval. ★ valeur quantifiée → *valeur 70.* R квантованное значение. D quantisierter Wert. E valor de cuantificación; amplitud cuantificada. I valore quantizzato. N kwantificeerwaarde. P wartość kwantowa. S kvantiserat värde. (704)

45. **rated value** : a quantity value assigned, generally by a manufacturer, for a specified operating condition of a component, device or equipment. ★ valeur assignée → *valeur 6.* R расчетная величина. D ..... E valor asignado. I valore assegnato. N toegekende waarde. P wartość znamionowa. S märkvärde. (151,811,851)

46. **rated value** : the numerical value of a quantity included in the rating. ★ valeur nominale → *valeur 64.* R номинальное значение. D Nennwert. E valor nominal. I valore nominale. N nominale waarde. P wartość znamionowa. S märkvärde. (411)

47. **rated value of an energizing quantity** : that value of an energizing quantity which is assigned either by the standard or the manufacturer, for a specified condition. ★ valeur assignée d'une grandeur d'alimentation → *valeur 8.* R установленное значение воздействующей величины. D Bemessungswert einer Erregungsgrösse. E valor asignado de una magnitud de alimentación. I valore specificato di una grandezza d'alimentazione. N toegekende waarde van een bekrachtigingsgrootheid. P wartość klasyfikacyjna wielkości zasilającej; wartość klasyfikacyjna wielkości sterującej. S märkvärde för matningsstorhet. (446)

48. **rectified (mean) value** (of an alternating voltage or current) : the mean value, taken over one period, of the instantaneous absolute values of the alternating quantity.

$$U_r = |\overline{u}| = \frac{1}{T}\int_0^T |u|\,dt$$

$$I_r = |\overline{i}| = \frac{1}{T}\int_0^T |i|\,dt$$

★ valeur redressée → *valeur 71.* R среднее по модулю значение (переменного напряжения или тока). D Gleichrichtwert. E valor rectificado (de una tensión o corriente alterna). I valore medio (di una tensione o corrente alternata). N gelijkgerichte waarde. P wartość wyprostowana. S medelbelopp. (101,131)

49. reference value : a specified value of one of a set of reference conditions. ★ valeur de référence → *valeur 36.* R нормальное значение. D Referenzwert. E valor de referencia. I valore di riferimento. N referentiewaarde. P wartość odniesienia. S referensvärde. (302)

50. reference value of an influencing factor : the specified value of an influencing factor to which are referred the characteristics of a relay. In the case of measuring relays and specified-time all-or-nothing relays, these characteristics particularly include the errors and their limits. ★ valeur de référence d'un facteur d'influence → *valeur 37.* R нормальное значение влияющей фактора. D Bezugswert eines Einflussfaktors. E valor de referencia de un factor de influencia. I valore di riferimento di un fattore d'influenza. N referentiewaarde van een beïnvloedende factor. P czynnik wpływający odniesienia. S referensvärde för påverkande faktor. (446)

51. reference value of an influencing quantity : the specified value of an influencing quantity to which are referred the characteristics of a relay. In the case of measuring relays and specified-time all-or-nothing relays, these characteristics particularly include the errors and their limits. ★ valeur de référence d'une grandeur d'influence → *valeur 38.* R нормальное значение влияющей величины. D Bezugswert einer Einflussgrösse. E valor de referencia de una magnitud de influencia. I valore di riferimento di una grandezza d'influenza. N referentiewaarde van een beïnvloedende grootheid. P wielkość wpływająca odniesienia. S referensvärde för påverkande storhet. (446)

52. reference-value method : → *method 18*

53. reflectometer value (R') : value measured by means of a particular reflectometer. *Note.* — The reflectometer employed should be specified. The measured reflectometer value depends on the geometric characteristics of the reflectometer, on the illuminant, on the spectral sensitivity of the detector (even when equipped with filters) and on the reference standard used. ★ valeur réflectométrique → *valeur 73.* R рефлектометрическая величина [Гъ]. D Reflektometerwert. E valor reflectométrico. I valore riflettometrico. N reflectometerwaarde. P wartość reflektometryczna. S reflektometervärde. (845)

54. release value : the value of the input energizing quantity (or characteristic quantity) at which a relay releases under specified conditions.. ★ valeur de relâchement → *valeur 39.* R значение величины возврата. D Rücksetzwert. E valor de desactivación. I valore di rilascio. N afvalwaarde. P wartość zwalniania powrotowa. S återgångsvärde. (446)

55. resetting value : the value of the input energizing quantity (or characteristic quantity) at which a relay resets under specified conditions[1]. ★ valeur de retour → *valeur 42.* R значение величин завершения возврата. D Rückkehrwert. E valor de reposición; valore di ritorno. I valore di ripristino. N herstelwaarde. P wartość powrotna. S återvändsvärde. (446)

56. revert value : for a certain type of polarized (d.c.) relay, the value of the input energizing quantity at which the relay, being in an operate condition, releases by increasing the value of this energizing quantity under specified conditions.. ★ valeur de relâchement par suralimentation → *valeur 40.* R значение величины возврата возбуждением. D Wiederrückfallwert (durch Übererregung). E valor de desactivación por sobrealimentación. I valore di rilascio per sovralimentazione. N waarde groter dan de aantrekwaarde waarbij het relais afvalt. P ..... S återgångsvärde vid övermatning. (446)

57. revert-reverse value : for a certain type of polarized (d.c.) relay, the value of the input energizing quantity at which the relay being in a release condition by an appropriate energization operates by increasing the value of this energizing quantity under specified conditions.. ★ valeur de fonctionnement par suralimentation → *valeur 29.* R значение величины срабатывания реверсивным возбуждением. D Wiederansprechwert (durch Übererregung). E valor de funcionamiento por sobrealimentación. I valore di funzionamento per sovralimentazione. N waarde groter dan de bekrachtigingswaarde waarbij het relais opnieuw opkomt. P ..... S funktionsvärde vid övermatning. (446)

58. r.m.s. value (*Syn.* root-mean-square value) : → *value 59*

59. root-mean-square value (*Syn.* r.m.s. value (abbreviation)) : the square root of the mean of the squares of the instantaneous values of a quantity taken over a specified time interval, equal to a period for a periodic quantity. ★ valeur efficace → *valeur 46.* R действующее значение. D Effektivwert. E valor eficaz. I valore efficace. N middelbare waarde; effectieve waarde. P wartość skuteczna. S effektivvärde. (101)

60. selected value (*Syn.* set value) : on motor vehicles on which certain quantities are automatically controlled, the value chosen and set by the driver or by a different automatic system. ★ valeur de consigne → *valeur 17.* R заданное значение. D Sollwert. E valor seleccionado. I valore di consegna; valore assegnato. N ingestelde waarde. P wartość zadana; wartość zaprogramowana. S inställningsvärde. (811)

61. set value (*Syn.* selected value) : → *value 60*

62. setting value of a specified time : the intended value of the time interval under specified conditions. ★ valeur d'ajustement d'une temporisation → *valeur 13.* R уставка выдержки времени. D Einstellwert der Zeitverzögerung. E valor de ajuste de una temporización. I valore di regolazione di una temporizzazione. N instelwaarde van een gespecificeerde tijd. P wartość zadana nastawy czasowej. S inställningsvärde för specificerad tid. (446)

63. setting value of the characteristic quantity (or of its setting parameters) : the threshold value of the characteristic quantity at which the relay shall operate under specified conditions. ★ valeur d'ajustement de la grandeur caractéristique → *valeur 12.* R уставка по характеристической величине (или по ее составляющим). D Einstellwert der charakteristischen Grösse (oder deren Einstellparameter). E valor de ajuste de la magnitud característica (o de sus parámetros de ajuste). I valore di regolazione della grandezza caratteristica (o dei suoi parametri di regolazione). N instelwaarde van de karakteristieke grootheid. P wartość charakterystyczna nastawcza. S inställningsvärde för karakteristisk storhet (eller för dess inställningsparametrar). (446)

64. standardized value : A value specified in a recognized standard: IEC, ISO, etc. ★ valeur normalisée → *valeur 66.* R стандартизованная велцикина«ГФ960· D genormte Werte. E valor normalizado. I valore normalizzato. N genormaliseerde waarde. P wartość. S normerat värde. (151)

65. starting value : the value of the input energizing quantity (or characteristic quantity) at which a relay starts under specified conditions. ★ valeur de démarrage → *valeur 25.* R значение величины трогания при срабатывании. D Startwert. E valor de arranque. I valore di spunto. N startwaarde. P wartość rozruchowa. S startvärde. (446)

66. switching value : for an element with step action, any value of the input variable at which the value of the output variable changes. *Note.* — The value of the output variable may change between two steps for two different switching values (upper and lower value) according to the sense of the variation of the input variable. A nominal switching value is then often used. ★ valeur de commutation → *valeur 14.* R точка переключения. D Umschaltwert. E valor de conmutación. I valore di commutazione. N schakelpunt. P wartość przełączająca. S omslagsvärde. (351)

67. switching value : the value of the input energizing quantity (or characteristic quantity) at which a relay switches under specified conditions. ★ valeur de commutation → *valeur 15.* R значение величины завершения срабатывания. D Ansprechwert. E valor de conmutación. I valore di commutazione. N schakelwaarde. P wartość przełączająca (do stanu pracy). S tillslagsvärde. (446)

68. test value (*Syn.* must value) : a value for which the relay shall comply with a given action during a test.. ★ valeur d'essai → *valeur 43.* R испытательное значение величины. D Soll-(Wert). E valor de ensayo; must value. I valore di prova. N testwaarde; gegarandeerde waarde. P wartość normowana. S specificerat ...-värde. (446)

69. tristimulus values (of a colour stimulus) : amounts of the three reference colour stimuli, in a given trichromatic system, required to match the colour of the stimulus considered. *Note.* — In the CIE standard colorimetric systems, the tristimulus values are represented by the symbols *X, Y, Z,* and

X_{10}, Y_{10}, Z_{10}. ★ composantes trichromatiques → *composante 41.* R координаты цвета (цветового стимула). D Farbwerte (einer Farbvalenz). E valores triestímulos. I componenti tricromatiche. N trichromatische componenten. P składowe trójchromatyczne. S tristimulusvärden. (845)

70. **true value** (of a quantity) : the value which characterizes a quantity perfectly defined, in the conditions which exist when that value is examined. *Note.* — The true value of a quantity is an ideal concept and, in general, it cannot be known. ★ valeur vraie → *valeur 78.* R истинное значение (величины). D wahrer Wert. E valor verdadero (de una magnitud). I valore vero (di una grandezza). N werkelijke waarde. P wartość rzeczywista (wielkości). S sant värde. (301)
71. **upper range value** : highest value of the variable that a measuring device is adjusted to measure within the specified accuracy; for multirange devices, the upper range value and the lower range value refer to the particular range that the measuring device is set to measure. ★ portée maximale → *portée 14.* R верхнее значение диапазона. D Meßbereichs-Anfangswert. E valor superior del margen. I valore superiore del campo di misura. N maximale meetwaarde. P górna granica zakresu pomiarowego. S mätområdets övre gräns. (351)
72. **valley value** : the least value of a time-dependent quantity during a specified time interval, equal to a period for a periodic quantity. ★ valeur de creux → *valeur 22.* R минимальное значение. D Kleinstwert; kleinster Augenblickswert (Momentanwert); Talwert. E valor de valle. I valore di valle. N dalwaarde. P wartość dolinowa; wartość dolna. S bottenvärde. (101)
73. **value before notching** : on motor vehicles, where the control includes a definite number of notches or positions for starting and regulation of speed, the value of the quantity concerned immediately before taking a notch. *Note.* — This term applies especially to current and tractive effort at the wheel rim. ★ valeur de reprise → *valeur 41.* R значение величины ступенчатого пуска. D untere Spitze. E valor de recuperación. I valore di ripresa. N waarde voor doorschakeling. P wartość przednastawcza. S värde före uppkoppling. (811)
74. **value (of a quantity)** : a quantitative determination of a quantity expressible as the product of a number and a unit of measurement. *Note.* — The value of a quantity is independent of the choice of unit. ★ valeur (d'une grandeur) → *valeur 45.* R значение (величины). D Größenwert; Wert (einer Größe). E valor (de una magnitud). I valore (di una grandezza). N waarde (van een grootheid). P wartość wielkości. S storhetsvärde. (111)
75. **virtual decision value** : each of the two values obtained by extrapolation from the actual decision values. *Note.* — These values are taken to represent hypothetical outer bounds for the two extreme quantizing intervals of the quantizing law. ★ valeur virtuelle de décision → *valeur 77.* R виртуальный порог квантования. D virtueller Entscheidungswert. E valor virtual de decisión; amplitud virtual de decisión. I valore virtuale di decisione. N virtuele besliswaarde. P wartość decyzyjna wirtualna. S virtuell beslutsgräns. (704)

valve

1. **anti-slip magnet valve** : a magnet valve used to control the anti-slip brake. ★ électrovalve d'antipatinage → *électrovalve 2.* R противобуксовочный электромагнитный клапан. D Schleuderschutzventil. E electroválvula antipatinaje. I elettrovalvola antipattinaggio. N antislipmagneetventiel. P zawór hamulca przeciwpoślizgowego. S magnetventil för slirbroms. (811)
2. **auto self-excitation valve** : a valve connected in series with a power winding of a transductor to obtain self-excitation. ★ valve d'auto-saturation → *valve 5.* R вентиль самоподмагничивания. D (Selbst-) Sättigungsgleichrichter. E válvula de autoexcitación directa. I valvola di autosaturazione. N ventiel voor directe zelfbekrachtiging. P zawór (elektryczny) samowzbudzeniowy. S sparsjälvmagnetiseringsventil. (431)
3. **bidirectional (electronic) valve** : an electronic valve having the property of bidirectional conduction. ★ valve (électronique) bidirectionnelle → *valve 7.* R двухнаправленный (электронный) вентиль. D Zwei-Richtungs-Ventil. E válvula (electrónica) bidireccional. I valvola (elettronica) bidirezionale. N (elektronisch) tweerichtingsventiel. P zawór obukierunkowy (elektroniczny). S tvåvägsventil. (551)
4. **(circuit) valve** : a part of the circuit bounded by two principal valve terminals having the property of non-controllable or bistable controllable conduction in only one direction. *Note.* — In a physical sense a valve may comprise one or more valves connected together. ★ valve → *valve 4.* R вентиль (в схеме). D Zweigelement. E válvula (en un circuito). I vavola (in un circuito). N (stroomkring)ventiel. P zawór (układu). S (krets)ventil. (551)
5. **control valve** : mechanical device which modifies the rate of flow of a fluid. *Note.* — The control of the moving part of the valve can be manual or carried out by an electric, hydraulic or pneumatic motor, either in a continuous or in a step-wise manner. ★ vanne de commande → *vanne 2.* R регулирующий клапан. D Ventil. E válvula de control. I valvola di comando. N regelventiel. P zawór sterujący. S styrventil; reglerventil. (351)
6. **(electronic) valve** : an operational array consisting of one or more electronic valve devices with auxiliaries, if any, and bounded by two principal terminals. ★ valve (électronique) → *valve 6.* R (электронный) вентиль. D (elektronisches) Ventil. E válvula (electrónica). I valvola (elettronica). N (elektronisch) ventiel. P zawór (elektroniczny). S (elektronisk) ventilgrupp. (551)
7. **electro-pneumatic valve** (*Syn.* magnet valve) : → *valve 8*
8. **magnet valve** (*Syn.* electro-pneumatic valve) : an electrically operated valve which controls a compressed-air or vacuum line. ★ électrovalve → *électrovalve 1.* R электромагнитный клапан; электропневматический клапан. D Magnetventil; elektropneumatisches Ventil. E electroválvula; válvula electro-neumática. I elettrovalvola. N magneetventiel; elektropneumatisch ventiel. P zawór elektropneumatyczny. S magnetventil. (811)
9. **rectifying valve** : a rectifier using the thermionic emission from a hot cathode in vacuum. ★ tube redresseur → *tube 99.* R выпрямительная лампа. D Gleichrichterröhre. E rectificador; tubo rectificador. I valvola raddrizzatrice. N gelijkrichtbuis. P lampa prostownicza. S likriktarrör. (881)
10. **unidirectional (electronic) valve** : an electronic valve having the property of unidirectional conduction. ★ valve (électronique) unidirectionnelle → *valve 8.* R однонаправленный (электронный) вентиль. D Ein-Richtungs-Ventil. E válvula (electrónica) unidireccional. I valvola (elettronica) unidirezionale. N (elektronisch) eenrichtingsventiel. P zawór jednokierunkowy (elektroniczny). S envägsventil. (551)
11. **(valve) arm** : → *arm 19*
12. **valve blocking** : → *blocking 19*
13. **valve positioner** : → *positioner 2*
14. **valve reactor** : → *reactor 48*
15. **variable magnet valve** : a form of magnet valve in which the pressure of the compressed air delivered by the valve is directly or inversely proportional to the current flowing in the solenoid. ★ électrovalve modérable de freinage → *électrovalve 3.* R регулируемый электромагнитный клапан. D Regelmagnetventil. E electroválvula variable de frenado. I elettrovalvola moderabile (di frenatura). N regelbaar magneetventiel. P zawór elektropneumatyczny regulowany. S ..... (811)
16. **vent valve** : a part which permits the escape of gas in the case of excess internal pressure but which does not allow the entry of air. ★ soupape → *soupape 2.* R предохранительный клапан. D Zellenventil. E válvula de ventilación. I valvola. N ventiel. P korek zaworowy (akumulatorowy). S övertrycksventil; reglerventil. (486)

valve device

1. **(electronic) valve device** : an indivisible component (cell), comprising one or more non-controllable or bistably controlled unidirectionally conducting paths. ★ élément de valve (électronique) → *élément de valve 6.* R (электронный) вентильный прибор. D (elektronisches) Ventilbauelement. E elemento de válvula (electrónica) (electrónica). I elemento di valvola (elettronica). N (elektronisch) ventielelement. P człon zaworowy (elektroniczny). S (elektronisk) ventil. (551)
2. **gas-filled valve device** (*Syn.* ionic valve device) : → *valve device 4*
3. **high vacuum valve device** : a valve device in which the degree of vacuum is so high that the effects of ionization are negligible.

★ élément de valve à vide poussé → *élément de valve 5.* R высоковакуумный вентильный прибор. D Hochvakuum-Ventilbauelement. E elemento de válvula de alto vacío. I elemento di valvola a vuoto spinto. N hoogvacuümventielelement. P element zaworowy wysokopróżniowy. S högvakuumventil. (551)

4. **ionic valve device** (*Syn.* gas-filled valve device) : a valve device in which the effects of the ionization of the gas play an important role. ★ élément de valve ionique → *élément de valve 7.* R газоразрядный вентильный прибор. D Ionen-Ventilbauelement. E elemento de válvula iónica; elemento de válvula de gas. I dispositivo a valvola ionica; dispositivo a valvola a gas. N ionenventielelement; met gas gevuld ventielelement. P element zaworowy jonowy; element zaworowy gazowany. S jonventil. (551)
5. **mercury-arc valve device** : a mercury vapour ionic valve device with a cold cathode. ★ élément de valve à vapeur de mercure → *élément de valve 4.* R ртутный вентильный прибор. D Quecksilberdampf-Stromrichtergefäß. E elemento de válvula de vapor de mercurio. I dispositivo a valvola a vapore di mercurio. N kwikdampventielelement. P element zaworowy rtęciowy. S kvicksilverbågventil. (551)
6. **multi-anode valve device** : a valve device having two or more main anodes in the same envelope. ★ élément de valve polyanodique → *élément de valve 9.* R многоанодный вентильный прибор. D Mehranoden-Ventilbauelement (Mehranoden-Stromrichtergefäß). E elemento de válvula multiánodo. I dispositivo a valvola polianodica. N meeranodenventielelement. P element zaworowy wieloanodowy. S fleranodsventil. (551)
7. **semiconductor valve device** : a valve device which is a semiconductor device. ★ élément de valve à semiconducteur → *élément de valve 3.* R полупроводниковый вентильный прибор. D Halbleiter-Ventilbauelement. E elemento de válvula de semiconductor. I elemento di valvola a semiconduttore. N halfgeleiderventielelement. P element zaworowy półprzewodnikowy. S halvledarventil. (551)
8. **single-anode valve device** : a valve device having a single main anode. ★ élément de valve monoanodique → *élément de valve 8.* R одноанодный вентильный прибор. D Einanoden-Ventilbauelement (Einanoden-Stromrichtergefäß). E elemento de válvula de ánodo único. I dispositivo a valvola monoanodica. N eenanodeventielelement. P element zaworowy jednoanodowy. S enanodsventil. (551)
9. **(valve device) assembly** : → *assembly 28*
10. **(valve device) stack** : → *stack 2*

valve-regulated

1. **valve-regulated sealed (secondary) cell** : → *cell 43*

van

1. **motor luggage van** (*Syn.* motor baggage car (USA)) : a motor coach specially fitted for the conveyance of parcels and luggage or baggage. ★ fourgon automoteur → *fourgon 1.* R багажный моторный вагон. D Gepäcktriebwagen. E furgón automotor. I automotrice-bagagliaio. N motorrijtuig voor het vervoer van goederen. P wagon silnikowy bagażowy. S resgodsmotorvagn. (811)

Van Duuren

1. **Van Duuren code** : → *code 52*
2. **Van Duuren radiotelegraph system** : → *system 248*

vane

1. **rotary vane attenuator** : → *attenuator 17*
2. **vane attenuator** : → *attenuator 18*
3. **vane wattmeter** : → *wattmeter 1*

vapour

1. **chemical vapour deposition technique** : → *technique 4*
2. **high pressure mercury (vapour) lamp** : → *lamp 23*
3. **high pressure sodium (vapour) lamp** : → *lamp 24*
4. **low pressure mercury (vapour) lamp** : → *lamp 36*
5. **low pressure sodium (vapour) lamp** : → *lamp 37*
6. **mercury vapour tube** : → *tube 53*
7. **vapour phase axial deposition technique** : → *technique 17*
8. **water vapour permeability** : → *permeability 31*

vapour-proof

1. **gas or vapour-proof** : applied to a machine so constructed that the entry of a specified gas or vapour under prescribed conditions cannot interfere with satisfactory operation of the machine. ★ machine étanche aux gaz ou vapeurs → *machine 47.* R газонепроницаемая машина. D Maschine, dicht gegen Gas und Dämpfe. E máquina estanca a gases o vapores. I macchina a tenuta di gas o vapori. N gasdicht. P maszyna gazoszczelna. S gas- eller ångtät. (411)

var

1. **var** (var) : unit of reactive power. ★ var → *var 1.* (100)

var-hour

1. **var-hour meter** : → *meter 70*

variability

1. **(magnetic) variability** : the changes in the magnetic properties of a material or magnetic circuit with time or operating conditions. ★ variabilité (magnétique) → *variabilité 1.* R (магнитная) нестабильность. D (magnetische) Variabilität. E variabilidad (magnética). I variabilità magnetica. N (magnetische) variabiliteit. P zmienność magnetyczna. S (magnetisk) variabilitet. (221)

variable

1. **controlled variable** : output variable of the controlled system. ★ grandeur commandée → *grandeur 9.* R управляемая величина; регулируемая величина. D Regelgröße; gesteuerte Größe. E variable controlada. I grandezza controllata; grandezza regolata. N geregelde grootheid; stoorgrootheid. P wielkość sterowana. S styrd (eller reglerad) storhet. (351)
2. **input variable** : variable applied to a system and which is independent of the other variables of the system. ★ grandeur d'entrée → *grandeur 22.* R входная величина. D Eingangsgröße. E variable de entrada. I grandezza di ingresso. N ingangsgrootheid. P wielkość wejściowa. S instorhet. (351)
3. **magnetic variable reluctance pick-up head** : → *pick-up head 5*
4. **manipulated variable** : output variable of the controlling system, which is also an input variable of the controlled system. ★ grandeur de commande → *grandeur 17.* R управляющая величина. D Stellgröße. E variable de control; variable manipulada. I grandezza manipolata. N regelgrootheid. P wielkość sterująca. S styrstorhet; ställstorhet. (351)
5. **output variable** : variable delivered by a system. ★ grandeur de sortie → *grandeur 20.* R выходная величина. D Ausgangsgrösse. E variable de salida. I grandezza di uscita. N uitgangsgrootheid. P wielkość wyjściowa. S utstorhet. (351)
6. **reference variable** : constant or time-dependent input variable of a control system, which variable the controlled variable desirably should reproduce. ★ grandeur de conduite → *grandeur 18.* R задающая величина. D Führungsgröße. E variable de referencia. I grandezza di riferimento. N referentiegrootheid. P wielkość zadana. S referensstorhet. (351)
7. **stability limit of a system state variable** : → *limit 18*
8. **stability margin of a system state variable** : → *margin 15*
9. **system state variables** : the variable quantities associated with the electrical state of a system. *Examples :* voltages, currents, powers, electric charges, magnetic fluxes. ★ variables d'état → *variable d'état 3.* R параметр режима электрической сети. D Netzvariable. E variables de estado (de una red). I variabili di stato (di una rete). N toestandsvariabelen van een systeem. P wielkości zmienne stanu systemu elektroenergetycznego. S tillståndsvariabler. (603)
10. **variable** (substantive) : a quantity or condition whose value may be subject to change and can usually be measured. ★ grandeur (variable) → *grandeur 37.* R (переменная) величина. D Größe. E variable (sustantivo). I grandezza (variabile). N grootheid. P zmienna. S (variabel) storhet. (351)
11. **variable frequency convertor** : → *convertor 45*
12. **variable groove depth** : → *depth 13*
13. **variable groove pitch** : → *pitch 15*
14. **variable magnet valve** : → *valve 15*
15. **variable voltage control** : → *control 200*

variable-capacitance

1. **variable-capacitance diode** : → *diode 26*

variable-mu

1. **variable-mu tube** : → *tube 95*

variance

1. **Allan variance** (*Syn.* two-sample variance) : a measure of random frequency fluctuations from the mean frequency of an oscillator in the time domain. *Note.* — The variance is calculated from a series of consecutive data, with no dead time, using two samples at a time. ★ variance d'Allan → *variance 2.* R дисперсия Аллана; дисперсия с двумя выборками. D Allan-Varianz; Varianz zweier aufeinanderfolgender Messwerte. E varianza de Allan; varianza de dos muestras. I varianza di Allan; varianza di due esemplari. N Allanvariatie. P wariancja Allana; wariancja dwupróbkowa. S Allan-varians. (561)
2. **two-sample variance** (*Syn.* Allan variance) : → *variance 1*
3. **variance** (of n samples) : the product of $n/(n-1)$ and the arithmetic mean of the squares of the deviations from the arithmetic mean. ★ variance → *variance 1.* R дисперсия (*n* дискретных значений). D Varianz (von *n* Proben). E varianza (de *n* muestras). I varianza (di *n* campioni). N variantie. P wariancja. S varians. (101)

variant

1. **connector variant** : → *connector 19*

variation

1. **angular variation in synchronous generators** : the angular displacement, expressed in electrical angle measure, of the pole axes, from their on-load to their no-load position, with frequency remaining constant. ★ variation angulaire dans un alternateur synchrone → *variation 10.* R изменение угла нагрузки в синхронных генераторах. D Polradwinkeländerungen eines Synchrongenerators. E variación angular en un alternador síncrono; ángulo interno. I angolo di carico. N lasthoekverandering in synchrone generatoren. P kąt obciążenia. S vinkelvridning i synkrongenerator. (411)
2. **cyclic voltage variation** : slow and pseudo-periodic changes, on a daily, weekly or yearly scale, of the voltage at a point on the system, due to changes of the load, and to the operation of voltage regulation equipment. ★ variation cyclique de tension → *variation 11.* R циклические изменения напряжения. D zyklische Spannungsänderung. E variación cíclica de tensión. I variazione ciclica di tensione. N cyclische spanningsvariatie. P okresowe wahania napięcia. S långsam spänningsvariation. (604)
3. **digital sum variation** (of a line code) : the difference between the theoretical maximum possible digital sum and the theoretical minimum possible digital sum of consecutive signal elements of a uniform multivalue digital signal produced by encoding, in accordance with a given line code, for all permitted sequences of signal elements in the original signal. ★ variation de la somme numérique → *variation 12.* R вариация цифровой суммы (линейного кода). D Digitalsummenvariation (eines Leitungscodes). E variación de la suma numérica. I variazione della somma numerica (di un codice di linea). N variatie van de digitale som (van een lijncodering). P zmiana sumy cyfrowej (kodu liniowego). S ..... (704)
4. **frequency tolerance (due to variations in level of drive)** : → *tolerance 10*
5. **variation (due to influence quantity)** : the difference between the indicated values for the same value of the measured quantity of an indicating instrument or the true values of a material measure when an influence quantity assumes successively two different values. ★ variation (due à une grandeur d'influence) → *variation 18.* R изменение показания (вызываемое влияющей величиной). D Einflusseffekt (einer Einflussgrösse). E variación (debida a la magnitud de influencia). I variazione. N variatie (onder invloed van een andere grootheid). P zmiana (powodowana wielkością wpływającą). S tilläggsfel (förorsakat av influensstorhet). (302)
6. **variation of the mean error** : the algebraic difference between a mean error and the reference mean error. The variations may be expressed as an absolute value, relative value or percentage of a specified value. ★ variation de l'erreur moyenne → *variation 13.* R дополнительная погрешность. D Differenz der Abweichungsmittelwerte. E variación del error medio. I variazione dell'errore medio. N variatie van de gemiddelde fout. P odchyłka błędu średniego. S medelfelsändring. (446)

variator

1. **speed variator** (*Syn.* torque variator) : → *variator 2*
2. **torque variator** (*Syn.* speed variator) : a coupling device which can be acted on in order to vary the ratio of the angular velocities of a driving shaft and of a driven shaft (or the ratio of the available torques on these shafts). ★ variateur de couple → *variateur 2.* R вариатор момента вариатор скорости. D stellbares Getriebe. E variador de par; variador de velocidad. I variatore di coppia; variatore di velocità. N elektromagnetisch regelorgaan. P przekładnia. S momentvariator; hastighetsvariator. (351)

varistor

1. **varistor** : a resistor having a very large variation of resistance with applied voltage. ★ varistance → *varistance 1.* R варистор. D Varistor. E varistancia. I variatore. N spanningsafhankelijke weerstand; varistor. P warystor. S varistor. (151)

varmeter

1. **varmeter** (*Syn.* reactive power meter) : an instrument intended to measure reactive power. ★ varmètre → *varmètre 1.* R варметр. D Blindleistungs-Messgerät. E vármetro; aparato de medida de potencia reactiva. I varmetro misuratore di potenza reattiva. N varmeter. P waromierz; miernik mocy biernej. S varmeter. (301)

varnish

1. **conducting varnish** : a varnish which after solidification has sufficient electrical conductivity to be used for electrical stress control over a surface coated with it. ★ vernis conducteur → *vernis 2.* R электропроводящий лак. D Leitlack. E barniz conductor. I vernice conduttrice. N geleidende lak. P lakier przewodzący. S ledande lack. (212)
2. **varnish** (noun) : a liquid, with or without solvent, with or without pigments or dyes, which solidifies after application, and which provides protection or improves appearance. See also, *impregnating resin.* ★ vernis → *vernis 1.* R лак. D Lack; Tränklack; Überzugslack. E barniz. I vernice. N vernis. P lakier (bezbarwny); pokost. S fernissa. (212)

varnished

1. **varnished fabric** : → *fabric 10*

varying

1. **adjustable varying speed motor** : → *motor 3*
2. **varying duty** : → *duty 16*
3. **varying speed motor** : → *motor 119*

vault

1. **vault substation** (*Syn.* underground substation) : → *substation 44*

V-curve

1. **V-curve characteristic** : the characteristic of a synchronous machine giving the relationship between the primary winding current and the excitation current for constant values of active load and primary winding voltage. ★ caractéristique en V → *caractéristique 54.* R V-образная характеристика. D V-Kurven. E característica en V. I caratteristica a V. N V-kromme (van een synchrone machine). P krzywa V. S V-kurva. (411)

VCXO

1. **VCXO** (*Syn.* voltage controlled crystal oscillator) : → *oscillator 8*

vector

1. **chrominance (vector)** : → *chrominance 6*
2. **complex Poynting vector** : for a sinusoidal wave of angular frequence ω, the vector product :

$$\frac{1}{2}\underline{\vec{E}} \times \underline{\vec{H}}^*$$

when the electric field vector $\vec{E}(t)$ and the magnetic field

vector $\vec{H}(t)$ are represented at the same point, in complex notation, by the equations :

$$\vec{E}(t) = \mathrm{Re}\,(\vec{\underline{E}}\,e^{j\omega t})$$

$$\vec{H}(t) = \mathrm{Re}\,(\vec{\underline{H}}\,e^{j\omega t})$$

where $\vec{\underline{E}}$ and $\vec{\underline{H}}$ are not time-dependent and are generally complex, $\underline{H}$ being the complex conjugate of $\underline{H}$. *Notes. 1* — The real part of the complex Poynting vector is the average of the Poynting vector during one cycle. *2* — The imaginary part of the complex Poynting vector is a vector of which, with certain reservations, the direction may be considered as being that of reactive energy propagation, and the magnitude may be regarded as the reactive power flux per unit surface area perpendicular to this direction, with a sign assigned conventionally. ★ vecteur de Poynting complexe → *vecteur 5.* D komplexer Poynting-Vektor. P wektor Poyntinga zespolony. (705)

3. **flux of a vector quantity** : → *flux 11*
4. **group velocity (vector)** : → *velocity 8*
5. **illuminance vector** (at a point) : vector quantity equal to the maximum difference between the illuminances on opposite sides of an element of surface through the point considered, that vector being normal to and away from the side with the greater illuminance. ★ vecteur d'éclairement → *vecteur 6.* R световой вектор (в точке). D Lichtvektor (in einem Punkt). E vector de iluminación. I vettore d'illuminamento. N verlichtingssterktevector. P wektor natężenia oświetlenia. S belysningsvektor. (845)
6. **magnetic vector potential** : → *potential 8*
7. **phase velocity (vector)** : → *velocity 17*
8. **Poynting vector** ($\boldsymbol{S}$) : the vector product of the electric field strength by the magnetic field strength

$$\boldsymbol{S} = \boldsymbol{E} \times \boldsymbol{H}$$

Note. — Its flux through a closed surface is the instantaneous electromagnetic power through that surface. ★ vecteur de Poynting → *vecteur 4.* R вектор Пойтинга. D Poynting-Vektor. E vector de Poynting. I vettore di Poynting. N vector van Poynting. P wektor Poyntinga. S Poyntingvektor. (121,705)

9. **vector potential** : → *potential 14*
10. **vector product** : → *product 10*
11. **vector quantity** : → *quantity 36*
12. **vector scanning** : → *scanning 35*
13. **velocity (vector) of propagation** : → *velocity 24*
14. **wave vector** : a complex vector

$$\vec{K} = \vec{K'} + j\,\vec{K''}$$

which characterizes a sinusoidal electromagnetic wave relative to a point in space when each of the electromagnetic field vectors can be represented, in a domain of space in the neighbourhood of this point, by an expression such as :

$$\underline{\vec{V}}_i = \vec{V}_{oi}\,e^{j(kt - k\cdot r)}$$

in which : — vectors $\vec{V}_{oi}$, generally complex, are independent of time and practically constant in the domain considered, — K vector is practically constant in the domain considered, — ω is the angular frequency, — t is time, — r is the vector joining the origin of coordinates to the point of interest the domain. *Notes. 1* — If the wave can be characterized by a wave vector at every point in a domain, there exists a wave front containing the point and orthogonal to the real part K' of the wave vector. The magnitude of K' is 2π divided by the wavelength. *2* — The wave has an elliptical polarization if the imaginary part of each vector V_{oi} is neither zero nor collinear with its real part ; the wave has a linear polarization in the other cases. ★ vecteur d'onde → *vecteur 7.* D Wellenvektor. P wektor fali. (705)

vehicle

1. **air-cushion vehicle** : a vehicle which, in normal service, does not roll on wheels, but is supported and guided by streams of low pressure compressed air produced on the vehicle. ★ véhicule à coussin d'air → *véhicule 13.* R единица подвижного состава на воздушной подушке. D Luftkissenfahrzeug. E vehículo de sustentación neumática. I veicolo a cuscino d'aria. N luchtkussenvoertuig. P pojazd na poduszce powietrznej. S luftkuddefordon; svävare. (811)
2. **battery-electric road vehicle** : an electrically powered road vehicle to which the energy is supplied from a battery carried on the vehicle. ★ électrobus → *électrobus 1.* R электробус. D batterieelektrischer Bus. E electrobus. I veicolo (stradale) ad accumulatori. N accumulatorwegvoertuig. P samochód akumulatorowy. S batteridrivet vägfordon. (811)
3. **d.c. motor vehicle** : a motor vehicle to which electric power is supplied from an external source of direct current. ★ véhicule moteur à courant continu → *véhicule moteur 2.* R тяговая единица подвижного состава постоянного тока. D Gleichstromtriebfahrzeug. E vehículo motor de corriente continua. I mezzo di trazione a corrente continua. N gelijkstroom krachtvoertuig. P pojazd (silnikowy) prądu stałego. S likströmsfordon. (811)
4. **diesel-electric motor vehicle** : a motor vehicle obtaining traction power from a diesel engine and d.c. generator or alternator carried on the vehicle. ★ véhicule moteur diesel-électrique → *véhicule moteur 8.* R дизель - электрическая тяговая единица подвижного состава. D dieselelektrisches Triebfahrzeug. E vehículo motor diesel-eléctrico. I mezzo di trazione diesel elettrico. N diesel-elektrisch krachtvoertuig. P pojazd (silnikowy) spalinowo-elektryczny. S dieselelektriskt fordon. (811)
5. **dual frequency motor vehicle** : a motor vehicle to which electric power may be supplied by one or other of two external sources of alternating current of different frequencies. ★ véhicule moteur bi-fréquence → *véhicule moteur 6.* R тяговая единица подвижного состава двойной частоты. D Zweifrequenztriebfahrzeug. E vehículo motor bi-frecuencia. I mezzo di trazione bifrequenza. N krachtvoertuig voor twee frequenties. P pojazd (silnikowy) na dwie częstotliwości. S tvåfrekvensfordon. (811)
6. **dual system motor vehicle** : a motor vehicle to which electric power may be supplied by one or other of two external sources of different current types. ★ véhicule moteur bi-courant → *véhicule moteur 5.* R тяговая единица подвижного состава на два рода тока. D Zweisystemtriebfahrzeug. E vehículo motor bi-corriente. I mezzo di trazione bicorrente. N krachtvoertuig voor twee voedingssystemen. P pojazd (silnikowy) dwusystemowy. S tvåsystemsfordon. (811)
7. **dual voltage motor vehicle** : a motor vehicle to which electric power may be supplied by one or other of two external sources of the same current type and frequency but of different voltages. ★ véhicule moteur bi-tension → *véhicule moteur 7.* R тяговая единица подвижного состава на два напряжения. D Zweispannungstriebfahrzeug. E vehículo motor bitensión. I mezzo di trazione bitensione. N krachtvoertuig voor twee spanningssystemen. P pojazd (silnikowy) na dwa napięcia. S tvåspänningsfordon. (811)
8. **inertia storage vehicle (by a flywheel)** : a vehicle using the energy stored in a flywheel for its propulsion. ★ véhicule à volant d'inertie → *véhicule 16.* R гиробус. D Schwungradfahrzeug. E vehículo de volante de inercia. I veicolo (con propulsione) a volano. N vliegwielvoertuig. P pojazd z kołem zamachowym. S svängdjulsdrivet fordon. (811)
9. **magnetically supported vehicle** (*Syn.* maglev) : a vehicle which, in normal service, does not roll on wheels, but is supported and guided by magnetic forces. ★ véhicule à sustentation et guidage (électro)magnétiques → *véhicule 14.* R единица подвижного состава с магнитным подвесом. D Magnetschwebefahrzeug. E vehículo de sustentación magnética. I veicolo a sospensione e guida (elettro) magnetica. N magneetkussenvoertuig. P pojazd o zawieszeniu magnetycznym. S maglev. (811)
10. **maximum load of a motor vehicle** : → *load 63*
11. **maximum speed (of a vehicle)** : → *speed 21*
12. **motor vehicle** : a general term denoting any vehicle fitted with one or more traction motors. ★ véhicule moteur → *véhicule moteur 1.* R тяговая единица подвижного состава. D Triebfahrzeug. E vehículo motor. I veicolo motore. N krachtvoertuig. P pojazd silnikowy; ciągnik. S dragfordon. (811)
13. **multi-system motor vehicle** : a motor vehicle to which electric power may be supplied from more than two external sources of different current type, voltage or frequency, any one of which may be selected. ★ véhicule moteur polycourant → *véhicule moteur 11.* R тяговая единица подвижного состава на несколько систем тока. D Mehrsystemtriebfahrzeug. E vehículo motor policorriente. I mezzo di trazione policorrente. N krachtvoertuig voor meer dan één voedingssysteem. P pojazd (silnikowy) wielosystemowy. S flersystemsfordon. (811)

14. **nominal power of a thermo-electric vehicle** : → *power 92*
15. **non-driving motor vehicle** : a motor vehicle without a driver's cab. ★ motrice sans cabine de conduite → *motrice 2.* R прицепная тяговая единица подвижного состава. D Triebfahrzeug ohne Führerraum. E vehículo motor sin cabina de conducción. I automotrice (se elettrica) **senza cabina di guida; elettromotrice senza cabina di guida.** N krachtvoertuig zonder bestuurderscabine. P wagon silnikowy niesterowniczy. S ..... (811)
16. **normal load of a motor vehicle** : → *load 67*
17. **output of a motor vehicle** : → *output 47*
18. **outside broadcast vehicle** : vehicle specially equipped to make outside broadcasts, having recording equipment and equipment for communicating via contribution links or distribution links. *Note.* — The outside broadcast vehicle may be a van, a car, a motorcycle, a helicopter, etc. ★ véhicule de reportage → *véhicule 17.* R подвижная радиовещательная станция. (723)
19. **pre-heating (of a vehicle)** : → *preheating 3*
20. **rack motor vehicle** : a motor vehicle on which all or part of the tractive effort is transferred by means of gearing to a rack fitted between the rails. ★ véhicule moteur à crémaillère → *véhicule moteur 3.* R тяговая единица подвижного состава для зубчатой железной дороги. D Zahnradtriebfahrzeug. E vehículo motor cremallera. I mezzo di trazione a cremagliera. N tandradkrachtvoertuig. P pojazd o napędzie zębatkowym. S kuggstångsfordon. (811)
21. **rating of an electric vehicle** : → *rating 13*
22. **single-phase a.c. motor vehicle** : a motor vehicle to which electric power is supplied from an external source of single-phase alternating current. ★ véhicule moteur monophasé → *véhicule moteur 10.* R тяговая единица подвижного состава однофазного переменного тока. D Einphasen-Wechselstromtriebfahrzeug. E vehículo motor monofásico. I mezzo di trazione monofase. N eenfasekrachtvoertuig. P pojazd (silnikowy) prądu jednofazowego. S enfasfordon. (811)
23. **specific energy consumption of an electric vehicle** : → *consumption 2*
24. **specific fuel consumption of a thermo-electric vehicle** : → *consumption 3*
25. **speed (of a vehicle)** : → *speed 45*
26. **tare mass (of a vehicle)** : → *mass 31*
27. **three-phase a.c. motor vehicle** : a motor vehicle to which electric power is supplied from an external source of three-phase alternating current. ★ véhicule moteur triphasé → *véhicule moteur 12.* R тяговая единица подвижного состава трехфазного переменного тока. D Drehstromtriebfahrzeug. E vehículo motor trifásico. I mezzo di trazione trifase. N draaistroomkrachtvoertuig. P pojazd (silnikowy) prądu trójfazowego. S trefasfordon. (811)
28. **traction output (of a thermo-electric vehicle)** : → *output 69*
29. **transmission efficiency (of a thermo-electric vehicle)** : → *efficiency 45*
30. **triple motor vehicle** : a traction unit made up of three motor vehicles coupled together, no one of which can run separately in normal service. ★ véhicule moteur triple → *véhicule moteur 13.* R строенная тяговая единица подвижного состава. D Dreifachtriebfahrzeug. E vehículo motor triple. I mezzo di trazione triplo. N drievoudig krachtvoertuig. P pojazd silnikowy ukrotniony potrójny. S trippellok. (811)
31. **turbine motor vehicle** (electric transmission) : a motor vehicle obtaining traction power from a turbine and d.c. generator or alternator carried on the vehicle. ★ véhicule moteur à turbine → *véhicule moteur 4.* R турбовоз (с электрической передачей). D Turbinentriebfahrzeug. E vehículo motor a turbina (transmisión eléctrica). I mezzo di trazione a turbina (a trasmissione elettrica). N turbine-elektrisch-krachtvoertuig. P pojazd turbinowy. S turboelektriskt fordon. (811)
32. **twin motor vehicle** : a traction unit made up of two motor vehicles coupled together, no one of which can run separately in normal service. ★ véhicule moteur double → *véhicule moteur 9.* R сдвоенная тяговая единица подвижного состава. D Doppeltriebfahrzeug. E vehículo motor doble. I mezzo di trazione doppio. N dubbel krachtvoertuig. P pojazd silnikowy ukrotniony podwójny. S dubbellok. (811)
33. **vehicle** : a general term denoting any single item of rolling stock, e.g. a locomotive, a coach or a wagon. ★ véhicule → *véhicule 12.* R единица подвижного состава. D Fahrzeug. E vehículo. I veicolo. N voertuig. P pojazd. S fordon. (811)

veil

1. **seed veil** : the array of inclusions or voids at the surface of the seed upon which a crystal has been grown. ★ voile de germe → *voile 3.* R вуаль затравки. D Schleier am Kristallkeim. E velo de germen. I velo di germe. N entkluster. P zasłona zarodka. S groddslöja. (561)

veiling

1. **equivalent veiling luminance** : → *luminance 5*
2. **veiling reflections** : → *reflection 33*

velocity

1. **constant velocity recording** : → *recording 2*
2. **envelope velocity** : the quotient of a path length by the envelope delay for that path length. ★ vitesse de signal → *vitesse 71.* R скорость огибающей. D Signalgeschwindigkeit. E velocidad de señal; velocidad de envolvente. I velocità di segnale. N snelheid van de omhullende. P prędkość obwiedniowa (sygnału). S envelopphastighet. (702,726)
3. **group velocity** : the derivative of the frequency with respect to the repetency. ★ vitesse de groupe → *vitesse 53.* R групповая скорость. D Gruppengeschwindigkeit. E velocidad de grupo. I velocità di gruppo. N groepssnelheid. P prędkość grupowa. S grupphastighet. (101)
4. **group velocity** (symb. : $\vec{v}_g$) : the velocity vector at a point, in a propagation medium, of a signal which may be ideally represented by two superimposed sinusoidal waves of equal amplitude and slightly different frequencies approaching a common limiting value. *Note.* — In the most general case the reciprocal of the magnitude $|\vec{v}_g|$ of the group velocity vector is equal to the derivative of the reciprocal of the wavelength λ with respect to the frequency f:

$$\frac{1}{|\vec{v}_g|} = \frac{\mathrm{d}(\lambda^{-1})}{\mathrm{d}f}$$

★ vitesse de groupe → *vitesse 54.* R групповая скорость. D Gruppengeschwindigkeit. E velocidad de grupo. I velocità di gruppo. N groepsnelheid. P prędkość grupowa. S grupphastighet. (702)
5. **group velocity** : the ratio of the path length to the group delay for that path length. ★ vitesse de groupe → *vitesse 55.* R групповая скорость. D Gruppengeschwindigkeit. E velocidad de grupo. I velocità di gruppo. N groepssnelheid. P prędkość grupowa. S grupphastighet. (726)
6. **group velocity** : the velocity vector at a point, in a propagation medium, of a signal which may be ideally represented by two superimposed sinusoidal waves of equal amplitude and slightly different frequencies approaching a common limiting value. *Notes 1* — The magnitude of the group velocity is equal to the derivative of frequency with respect to the reciprocal of the wavelength. *2* — In an isotropic medium the group velocity equals the phase velocity if the phase constant is a linear function of the angular frequency. *3* — Each waveguide mode has its own particular group velocity. ★ vitesse de groupe → *vitesse 56.* R групповая скорость. D Gruppengeschwindigkeit. E velocidad de grupo. I velocità di gruppo. N groepsnelheid. P prędkość grupowa. S grupphastighet. (731)
7. **group velocity** : velocity in the direction of propagation of a characteristic feature of the envelopes of a non-sinusoidal disturbance. *Notes. 1* — Group velocity differs from phase velocity only in a dispersive medium. *2* — Group velocity is ordinarily the velocity of propagation of the energy associated with the disturbance. ★ vitesse de groupe → *vitesse 57.* R групповая скорость. D Gruppengeschwindigkeit. E velocidad de grupo. I velocità di gruppo. N groepssnelheid. P prędkość grupowa. S grupphastighet. (801)
8. **group velocity (vector)** : the velocity vector, at a point in a propagation medium, of a signal which may be ideally represented by two superimposed sinusoidal waves of equal amplitude and slightly different frequencies approaching a common frequency limit. *Note.* — In the most general case, the magnitude of the group velocity vector equals the derivative of the frequency with respect to the reciprocal of the wavelength,

and the components of the group velocity along the coordinate axes equal the partial derivatives of the angular frequency with respect to the components of the real part $\underline{K}'$ of the wave vector $\underline{K}$. ★ (vecteur) vitesse de groupe → *vitesse 32.* D Gruppengeschwindigkeit(svektor). P prędkość grupowa. (705)

9. **instantaneous particle velocity** : derivative with respect to time, of the instantaneous particle displacement. ★ vitesse instantanée d'une particule → *vitesse 85.* R мгновенная колебательная скорость (частицы). D Augenblickswert der Schallschnelle. E velocidad instantánea de una partícula. I velocità di spostamento istantanea. N momentele deeltjessnelheid. P wartość chwilowa prędkości akustycznej. S momentanvärde av partikelhastighet. (801)
10. **particle velocity** : root-mean-square of instantaneous particle velocity, unless otherwise specified. ★ vitesse acoustique d'une particule → *vitesse 36.* R колебательная скорость (частицы). D Schallschnelle. E velocidad acústica de una partícula. I velocità di spostamento. N deeltjessnelheid. P wartość skuteczna prędkości akustycznej; prędkość akustyczna. S partikelhastighet. (801)
11. **particle velocity level** : → *level 64*
12. **peak particle velocity** : greatest instantaneous particle velocity during a given time interval. ★ vitesse de crête d'une particule → *vitesse 48.* R пиковая колебательная скорость (частицы). D Spitzenwert der Schallschnelle. E velocidad de cresta de una partícula. I velocità di spostamento di picco. N topwaarde van de deeltjessnelheid. P wartość szczytowa prędkości akustycznej. S toppvärde av partikelhastigheten. (801)
13. **phase velocity** : the quotient of the frequency by the repetency. ★ vitesse de phase → *vitesse 62.* R фазовая скорость. D Phasengeschwindigkeit. E velocidad de fase. I velocità di fase. N fasesnelheid. P prędkość fazowa. S fashastighet. (101)
14. **phase velocity** (symb. : $\vec{v}_\varphi$) : the velocity vector in a given direction of a moving point associated with a sinusoidal travelling wave and defined by a fixed phase of a field quantity. *Note.* — In the direction of propagation, the magnitude of the phase velocity has its minimum value ; if no direction is specified, the phase velocity is that in the direction of propagation. ★ vitesse de phase → *vitesse 63.* R фазовая скорость. D Phasengeschwindigkeit. E velocidad de fase. I velocità di fase. N fasesnelheid. P prędkość fazowa. S fashastighet. (702)
15. **phase velocity** (in a transmission line) : for a given mode of propagation at a single frequency, the velocity of an equiphase surface along a transmission line. ★ vitesse de phase → *vitesse 64.* R фазовая скорость (в линии передачи). D Phasengeschwindigkeit (in einer Übertragungsleitung). E velocidad de fase (en una línea de transmisión). I velocità di fase (in una linea di trasmissione). N fasesnelheid. P prędkość fazowa (w linii przesyłowej). S fashastighet. (726)
16. **phase velocity** : velocity in the direction of propagation of a surface of constant phase. ★ vitesse de phase → *vitesse 65.* R фазовая скорость. D Phasengeschwindigkeit. E velocidad de fase. I velocità di fase. N fasesnelheid. P prędkość fazowa. S fashastighet. (801)
17. **phase velocity (vector)** : the velocity vector at a given point and in a given direction of the movement of a wavefront of a sinusoidal travelling wave, defined by a specified phase. *Notes. 1* — If no direction is specified, the phase velocity to be considered is that in the direction of propagation. *2* — In the direction of propagation, the magnitude of the phase velocity has a minimum value equal to the angular frequency divided by the absolute value of the real component of the wave vector. ★ (vecteur) vitesse de phase → *vitesse 33.* D Phasengeschwindigkeit(svektor). P prędkość fazowa. (705)
18. **recorded velocity** : the alternating velocity which would be imparted to a stylus tip of negligible dimensions, fitted to a pick-up head having no mechanical impedance when tracing the groove of a record rotating with a constant angular velocity. It is represented by a vector with a lateral and a vertical component for records with stereophonic recording. *Note.* — The recorded velocity may be measured by the Buchmann-Meyer method (light bandwidth method). It should always be stated whether r.m.s. or peak values are implied. ★ vélocité du signal enregistré → *vélocité 2.* R колебательная скорость записи. D aufgezeichnete Schnelle. E velocidad de la señal registrada. I velocità del segnale registrato. N naaldpuntsnelheid. P prędkość zapisu. S tvärhastighet. (806)
19. **sound wave velocity** : vector that specifies the speed and direction with which a sound wave travels. ★ vitesse d'onde acoustique → *vitesse 80.* R скорость волны. D Wellengeschwindigkeit. E velocidad de una onda acústica. I velocità dell'onda. N golfsnelheid. P prędkość fali akustycznej. S våghastighet. (801)
20. **surface recombination velocity** : the velocity with which minority carriers would have to drift to the surface of the semiconductor material in order to account for the rate at which they tend to combine there and are thus lost. *Note.* — The surface recombination velocity is equal to the quotient of the number of recombinations taking place at the surface per unit time and area, by the excess minority carrier concentration directly below the surface. ★ vitesse de recombinaison en surface → *vitesse 69.* R скорость поверхностной рекомбинации. D Oberflächen-Rekombinationsgeschwindigkeit. E velocidad de recombinación en superficie. I velocità di ricombinazione in superficie. N oppervlakterecombinatiesnelheid. P prędkość rekombinacji powierzchniowej. S ytrekombineringshastighet. (521)
21. **velocity error** : → *error 63*
22. **velocity modulation** : → *modulation 61*
23. **velocity of light** (c_0) : the speed of propagation of light in a vacuum. ★ vitesse de la lumière → *vitesse 58.* R скорость света. D Lichtgeschwindigkeit. E velocidad de la luz. I velocità della luce. N lichtsnelheid. P szybkość światła. S ljushastighet i fri rymd. (881)
24. **velocity (vector) of propagation** (of a wave) : for wave propagation, the limit at a given instant and point in space of the vector representing the displacement of a given characteristic of the field during a given interval, divided by the duration of this time interval when it approaches zero. *Note.* — Depending on the choice of the characteristic, different types of velocities can be defined, such as phase velocity vector, group velocity vector, with magnitudes depending on the considered point and direction. ★ (vecteur) vitesse de propagation → *vitesse 34.* D Ausbreitungsgeschwindigkeit(svektor) (einer Welle). P prędkość propagacji fali. (705)
25. **volume velocity** : integral, over a vibration surface, of the product of the component of particle velocity normal to the surface and the differential surface area. ★ flux de vitesse acoustique → *flux 13.* R объемная колебательная скорость. D Schallfluß. E flujo de velocidad acústica. I flusso di velocità acustica. N volumesnelheid; debiet. P prędkość objętościowa. S hastighetsflöde; volymström. (801)

velocity-distribution

1. **Fermi-Dirac-Sommerfeld velocity distribution law** : → *law 3*
2. **Maxwell-Boltzmann velocity-distribution law** : → *law 8*

vent

1. **flame-arrester vent plug** : → *plug 2*
2. **vent plug** : → *plug 6*
3. **vent valve** : → *valve 16*

vented

1. **vented (secondary) cell** : → *cell 44*

ventilated

1. **ventilated motor** : → *motor 120*
2. **ventilated totally-enclosed motor** : → *motor 121*

ventilating

1. **ventilating duct** (*Syn.* air duct) : → *duct 2*

ventilation

1. **axial ventilation** : ventilation in which the cooling air enters the motor at one end and passes longitudinally through the motor before being discharged at the other end. ★ ventilation axiale → *ventilation 12.* R осевая вентиляция. D Axial-Belüftung. E ventilación axial. I ventilazione assiale. N axiale ventilatie; langsventilatie. P przewiew wzdłużny. S axiell kylning. (811)
2. **forced ventilation** : a cooling system in which the air is moved by external power. ★ ventilation forcée → *ventilation 13.* R принудительная вентиляция. D Fremdbelüftung. E ventilación forzada. I ventilazione forzata. N geforceerde ventilatie. P przewietrzanie wymuszone. S forcerad ventilation. (811)

3. **general artificial ventilation** : the movement of air and its replacement with fresh air by artificial means, for example fans, and applied to a general area. ★ ventilation artificielle générale → *ventilation 10.* R общая принудительная вентиляция. D allgemeine technische Belüftung. E ventilación artificial general. I ventilazione artificiale generale. N kunstmatige ventilatie. P przewietrzanie sztuczne ogólne. S allmän mekanisk ventilation. (426)
4. **local artificial ventilation** : the movement of air and its replacement with fresh air by artificial means applied to a particular source of release or local area. ★ ventilation artificielle locale → *ventilation 11.* R местная принудительная вентиляция. D örtliche technische Belüftung. E ventilación artificial local. I ventilazione artificiale locale. N plaatselijke kunstmatige ventilatie. P przewietrzanie sztuczne lokalne. S lokal mekanisk ventilation. (426)
5. **motor with combined ventilation** : → *motor 65*
6. **natural ventilation** : the movement of air and its replacement with fresh air due to the effects of wind and/or temperature gradients. ★ ventilation naturelle → *ventilation 14.* R естественная вентиляция. D natürliche Belüftung. E ventilación natural. I ventilazione naturale. N natuurlijke ventilatie. P przewietrzanie naturalne. S naturlig ventilation. (426)
7. **natural ventilation** : a cooling system in which the movement of the air takes place by convection or by the movement of the vehicle, without the aid of a fan. ★ ventilation naturelle → *ventilation 15.* R естественная вентиляция. D natürliche Belüftung. E ventilación natural. I ventilazione naturale. N natuurlijke ventilatie. P przewietrzanie naturalne. S naturlig ventilation. (811)
8. **radial ventilation** : ventilation in which the cooling air inside the motor flows radially. ★ ventilation radiale → *ventilation 16.* R радиальная вентиляция. D Radial-Belüftung. E ventilación radial. I ventilazione radiale. N radiale ventilatie. P przewiew promieniowy. S radiell kylning. (811)

Verdan

1. **automatic repetition Verdan system** : → *system 14*

verification

1. **maintainability verification** : a procedure applied for the purpose of determining whether the requirements for maintainability performance measures for an item have been achieved or not. *Note.* — The procedure may range from analysis of appropriate data to a maintainability demonstration. ★ vérification de la maintenabilité → *vérification 4.* R подтверждение ремонтопригодности. D Instandhaltbarkeitsnachweis. E verificación de la mantenibilidad. I verifica della manutenibilità. N onderhoudbaarheidsverificatie. P sprawdzenie obsługiwalności. S verifiering av underhållsmässighet. (191)

vermin-proof

1. **vermin-proof** : applied to a machine so constructed as to prevent ingress of specified vermin to parts where they might cause damage to, or interference with, the machine sufficiently to impair its satisfactory operation. ★ machine protégée contre la faune nuisible → *machine 64.* R машина, защищенная от проникновения насекомых. D gegen Ungeziefer geschützte Maschine. E máquina protegida contra la fauna perjudicial. I macchina protetta contro gli animali parassiti. N beveiligd tegen ongedierte. P maszyna zabezpieczona przed szkodnikami. S insektssäker. (411)

vertex

1. **vertex** (*Syn.* node) : → *node 4*
2. **vertex plate** : → *plate 32*

vertical

1. **double circuit vertical configuration** : → *configuration 7*
2. **vertical configuration** : → *configuration 22*
3. **vertical elasticity** : → *elasticity 2*
4. **vertical examination stand** : → *stand 2*
5. **vertical force** : → *force 35*
6. **vertical incidence ionosonde** : → *ionosonde 2*
7. **vertical incidence ionospheric recorder** (*Syn.* vertical incidence ionosonde) : → *ionosonde 2*
8. **vertical incidence ionospheric sounder** (*Syn.* vertical incidence ionosonde) : → *ionosonde 2*
9. **vertical incidence ionospheric sounding** : → *sounding 9*
10. **vertical ionization gradient** : → *gradient 10*
11. **vertical load** : → *load 91*
12. **vertical modulation angle** : → *angle 57*
13. **vertical monopole (antenna)** : → *monopole 7*
14. **vertical picture slip** : → *slip 11*
15. **vertical polarization** : → *polarization 44*
16. **vertical recording** : → *recording 49*
17. **vertical resilience** (*Syn.* vertical elasticity) : → *elasticity 2*
18. **vertical scan** (*Syn.* field scan) : → *scan 1*
19. **vertical tabulation** : → *tabulation 2*
20. **vertical tracking angle error** : → *error 64*
21. **vertical unipole (antenna)** (*Syn.* vertical monopole (antenna)) : → *monopole 7*

vessel

1. **induction vessel heating** : → *heating 43*
2. **light vessel** (*Syn.* lightship) : vessel designated to carry a signal light of high luminous intensity, and moored or anchored at a designated geographical location to assist maritime navigation. ★ bateau-feu → *bateau-feu 1.* R плавучий маяк. D Feuerschiff. E barco de señalización. I faro galleggiante. N lichtschip. P latarniowiec. S fyrskepp. (845)
3. **reactor vessel** : the principal vessel surrounding at least the reactor core. ★ caisson de réacteur → *caisson 1.* D Reaktorbehälter. E vasija del reactor. I contenitore del reattore. N reactorvat. P zbiornik reaktora. S reaktortank. (026)

vestibule

1. **vestibule** : an unheated chamber through which the charge passes prior to entry to the main furnace heating chamber. ★ vestibule → *vestibule 1.* R форкамера ненагреваемая. D Vorkammer. E vestíbulo. I vestibolo. N ovenhals. P przedsionek. S förrum. (841)

vestigial

1. **vestigial sideband** : → *sideband 9*
2. **vestigial sideband** : → *sideband 10*
3. **vestigial sideband filter** : → *filter 41*

VF

1. **VF channel** (*Syn.* voice-frequency channel) : → *channel 57*

VFT

1. **VFT** (*Syn.* voice-frequency multiplex telegraphy) : → *telegraphy 16*

vibrating

1. **vibrating capacitor amplifier** : → *amplifier 29*
2. **vibrating reed instrument** : → *instrument 34*
3. **vibrating relay** : → *relay 54*

vibration

1. **aeolian vibration** : the periodic motion of a conductor induced by the wind predominantly in a vertical plane, of relatively high frequency of the order of ten or tens Hz and small amplitude, of the order of the conductor diameter. ★ vibration éolienne → *vibration 11.* R вибрация от ветра. D winderregte Schwingung. E vibración eólica. I vibrazione eolica. N eolische trilling. P drgania (wiatrowe) eolskie. S linvibration. (466)
2. **conductor vibration** : the periodic motion of a conductor. ★ vibration d'un conducteur → *vibration 10.* R вибрация провода; колебания провода. D Leiterschwingung. E vibración de un conductor. I vibrazione di un conduttore. N geleidertrilling. P drgania przewodu. S linsvängning. (466)
3. **mode of vibration** : → *mode 58*
4. **stiffened mode (of piezoelectric vibration)** : → *mode 74*
5. **unstiffened mode (of piezoelectric vibration)** : → *mode 97*
6. **vibration** (*Syn.* acoustical oscillation) : → *oscillation 1*
7. **vibration damper** : → *damper 4*
8. **vibration galvanometer** : → *galvanometer 6*

9. **vibration meter** : → *meter 71*
10. **vibration test** : → *test 100*

vibrato

1. **vibrato** : family of tonal effects in music that depend on periodic variations of one or more characteristics of a sound wave such as frequency and or phase, and amplitude, at a rate in the vicinity of six hertz. *Note.* — A tremolo is primarily an amplitude variation. ★ vibrato → *vibrato 1.* R вибрато. D Vibrato. E vibrato. I vibrato. N vibrato. P wibrato. S vibrato. (801)

vibrator

1. **antisymmetric frequency of a monolithic bipole vibrator** : → *frequency 9*
2. **bone-conduction vibrator** : electromechanical transducer that transforms electric oscillations into mechanical vibrations and is intended to be coupled to the bony structure of the head, generally the mastoid apophysis. ★ ossivibrateur → *ossivibrateur 1.* R телефон костной проводимости. D Knochenleitungshörer. E osteófono; vibrador de conducción ósea. I osteofono; ricevitore a conduzione ossea. N botgeleidingsvibrator. P słuchawka kostna. S benledningstelefon. (801)
3. **monolithic bipole vibrator** : piezoelectric vibrator with two mechanically coupled vibrating regions on a single piezoelectric crystal element or a piezoelectric ceramic element. ★ vibrateur monolithique bipolaire → *vibrateur 6.* R монолитный двухполюсный вибратор. D monolithischer Zweifachvibrator. E vibrador monolítico bipolar. I vibratore monolitico bipolare. N tweepolige monolithische resonator. P wibrator monolityczny dwubiegunowy. S tvåpolig monolitisk vibrator. (561)
4. **monolithic multiple pole vibrator** : piezoelectric vibrator with more than two mechanically coupled vibrating regions on a single piezoelectric crystal element or a piezoelectric ceramic element. ★ vibrateur monolithique multipolaire → *vibrateur 7.* R монолитный многополюсный вибратор. D monolithischer Mehrfachvibrator. E vibrador monolítico multipolar. I vibratore monolitico multipolare. N meerpolige monolithische resonator. P wibrator monolityczny wielobiegunowy. S flerpolig monolitisk vibrator. (561)
5. **piezoelectric crystal or ceramic vibrator** : a piezoelectric crystal or ceramic element, with electrodes, which can be made to vibrate in a specific mode. *Note.* — Leads may be attached to the electrodes. ★ vibrateur en cristal ou en céramique piézoélectrique → *vibrateur 5.* R пьезоэлектрический кристаллический или керамический вибратор. D piezoelektrischer Quarzvibrator oder keramischer Vibrator. E vibrador de cristal o de cerámica piezoeléctrica. I vibratore di un cristallo o di ceramica piezoelettrica. N piëzo-elektrische of keramische resonator. P wibrator piezokrystaliczny lub piezoceramiczny. S piezoelektrisk vibrator. (561)
6. **symmetric frequency of a monolithic bipole vibrator** : → *frequency 186*

vibratory

1. **(vibratory) acceleration level** : → *level 101*
2. **vibratory conveyor** (*Syn.* vibratory feed) : → *feed 17*
3. **vibratory feed** : → *feed 17*

video

1. **colour video signal** : → *signal 54*
2. **complete video signal** : → *signal 56*
3. **helical video tape recorder** : → *tape recorder 1*
4. **longitudinal video tape recorder** : → *tape recorder 2*
5. **negative video signal** : → *signal 131*
6. **positive video signal** : → *signal 142*
7. **television demodulator** (*Syn.* video tuner) : → *demodulator 5*
8. **transverse video tape recorder** : → *tape recorder 5*
9. **video demodulator** (*Syn.* video tuner) : → *demodulator 5*
10. **video frequency** : → *frequency 194*
11. **video head assembly** : → *assembly 29*
12. **video record current** : → *current 218*
13. **video signal** : → *signal 251*
14. **video signal source gamma** : → *gamma 13*
15. **video tape recorder** : → *tape recorder 6*
16. **video tape reproducer** : → *reproducer 2*
17. **video track** : → *track 22*
18. **video transmission** : → *transmission 115*

videoconference

1. **videoconference** : a teleconference in which participants are connected by television circuits providing for the transmission of animated images in addition to that of speech and graphic documents. ★ visioconférence → *visioconférence 1.* R видеоконференцсвязь. D Videokonferenz. E videoconferencia. I video conferenza. N telefonisch vergaderen met beeldtelefoon. P telemanipulacaja. S videokonferens. (701)

videodisk

1. **magnetic videodisk** : a videodisk, the video and associated audio information of which, is read out magnetically. ★ vidéodisque magnétique → *vidéodisque 2.* R магнитный видеодиск. D magnetische Bildplatte. E videodisco magnético. I videodisco magnetico. N magnetische beeldplaat. P płyta wizyjna do odczytu magnetycznego; płyta wizyjna magnetyczna. S magnetisk videoskiva. (806)
2. **mechanical videodisk** : a videodisk, the video and associated audio information of which is read-out using a disk player attachment, operating by mechanical contact with the surface of the disk. ★ vidéodisque mécanique → *vidéodisque 3.* R механический видеодиск. D mechanische Bildplatte. E videodisco mecánico. I videodisco meccanico. N mechanische beeldplaat. P płyta wizyjna do odczytu mechanicznego; płyta wizyjna mechaniczna. S mekanisk videoskiva. (806)
3. **optical videodisk** : a videodisk the video and associated audio information of which is read-out using an optical scanning system, and in which there is no mechanical contact between the read-out device and the surface of the disk. ★ vidéodisque optique → *vidéodisque 4.* R оптический видеодиск. D optische Bildplatte. E videodisco óptico. I videodisco ottico. N optische beeldplaat. P płyta wizyjna do odczytu optycznego (bezdotykowego); płyta wizyjna optyczna. S optisk videoskiva. (806)
4. **videodisk** : a disk, on which video and associated audio informatic have been recorded along a spiral groove or track, for reproduction on a TV screen, by means of a disk player attachment. ★ vidéodisque → *vidéodisque 1.* R видеодиск. D Bildplatte. E videodisco. I videodisco. N beeldplaat. P płyta wizyjna; płyta gramowidowa. S videoskiva. (806)

videography

1. **broadcast videography** (*Syn.* teletext) : → *teletext 3*
2. **interactive videography** (*Syn.* videotex) : → *videotex 1*
3. **videography** : a form of telecommunication in which information generally in the form of digital data is transmitted primarily in order to permit the selection and display of textual or pictorial information to a user on a visual display unit, for instance on the screen of a television receiver. *Note.* — Teletex service and various forms of telegraphy are not forms of videography. ★ vidéographie → *vidéographie 1.* R видеография. D Videografie. E videografía. I videografia. N videomatica. P wizjografia porozumiewawcza. S videografi. (701,723)

videophone

1. **videophone** (*Syn.* viewphone set) : → *set 61*

videorecorder

1. **videorecorder** : equipment for the recording and reproduction of television signals. ★ enregistreur vidéo → *enregistreur 20.* R видеорекордер. (723)

video-telephony

1. **still picture video-telephony** : a video-telephony in which the time interval between a displayed picture and the display of either an updated version of the same picture, or a new picture forming part of a sequence, exceeds, generally by an appreciable factor, the usual time interval between pictures. ★ visiophonie à images fixes → *visiophonie 2.* R видеотелефония с неподвижным изображением. D Festbildtelefonie. E videotelefonía de imágenes fijas. I video lento. N beeldtelefonie met stilstaande beelden. P wizjotelefonia obrazów nieruchomych. S stillbildstelefoni. (722)

2. **video-telephony** (*Syn.* viewphone; visual telephone) : an association of telephone and television techniques which allows users to see each other during their telephone conversation. ★ visiophonie → *visiophonie 1.* R видеотелефония. D Bildfernsprechen; Bildtelefonie; Videotelefonie. E videofonía; videoteléfono. I video telefono. N beeldtelefonie. P telekonferencja rozmówcza. S bildtelefoni. (701,722)

videotex

1. **videotex** (*Syn.* interactive videography) : videography in which a telecommunication network is used for transmission of the user's requirements as well as the answers to his requests. ★ vidéotex → *vidéotex 1.* R видеотекс; интерактивная видеография. D Bildschirmtext. E videotex; videografía interactiva. I videotel. N videotex. P wizjotelefonia. S teledata. (701)

vidicon

1. **vidicon** : a photoconductive camera tube in which the electron image is stored on the photoconductive surface and scanned by an electron beam, usually of low-velocity electrons. ★ vidicon → *vidicon 1.* R видикон. D Vidikon. E vidicón. I vidicon. N vidicon. P widikon. S vidikon. (531)
2. **vidicon** (trade mark) : a low-electron-velocity camera tube whith a the photo-conductive layer based on antimony sulphide. ★ vidicon → *vidicon 2.* R видикон. (723)

viewer

1. **television viewer** : person watching and listening to a broadcast television programme. ★ téléspectateur → *téléspectateur 1.* R телезритель. (723)

viewing

1. **maximum usable viewing time** : the maximum time during which the visible output information can be seen, under stated conditions and without rewriting, before a stated degree of decay has occurred. ★ temps de vision maximal utilisable → *temps 125.* R максимальное время воспроизведения. D maximale nutzbare Betrachtungszeit. E tiempo de visión máximo utilizable. I massimo tempo di visione utilizzabile. N maximum bruikbare beeldduur. P czas widoczności użyteczny maksymalny. S maximal användbar betraktningstid. (531)
2. **optical viewing system** : → *system 133*

viewphone

1. **viewphone** (*Syn.* video-telephony) : → *video-telephony 2*
2. **viewphone set** : → *set 61*

violation

1. **alternate mark inversion violation** (*Syn.* AMI violation; bipolar violation) : a non-zero signal element, in an alternate mark inversion signal, having the same polarity as the previous non-zero signal element. ★ violation de bipolarité → *violation 1.* R нарушение биполярности. D Bipolaritätsverletzung; AMI-Verletzung; bipolare Verletzung. E violación de bipolaridad. I violazione di bipolarità; violazione AMI. N bipolaire breuk. P naruszenie obubiegunowości. S AMI-avvikelse. (704)
2. **AMI violation** (*Syn.* alternate mark inversion violation) : → *violation 1*
3. **bipolar violation** (*Syn.* alternate mark inversion violation) : → *violation 1*

virgin

1. **virgin state** (*Syn.* thermally neutralized state) : → *state 45*

virtual

1. **permanent virtual circuit** : → *circuit 135*
2. **virtual acoustic centre** (*Syn.* effective acoustic centre) : → *centre 9*
3. **virtual call** : → *call 61*
4. **virtual circuit** : → *circuit 192*
5. **virtual contact width** : → *contact 117*
6. **virtual decision value** : → *value 75*
7. **virtual (equivalent) junction temperature** : → *temperature 66*
8. **virtual front duration (of a lightning impulse)** : → *duration 45*
9. **virtual height** : → *height 8*
10. **virtual temperature** : → *temperature 67*

viscosity

1. **dynamic viscosity** : a property of a liquid resulting from internal flow resistance opposing the relative movement of adjacent layers. *Note.* — Dynamic viscosity is expressed as the quotient of the shear stress and the velocity gradient. ★ viscosité dynamique → *viscosité 2.* R динамическая вязкость. D dynamische Viskosität. E viscosidad dinámica. I viscosità dinamica. N dynamische viscositeit. P lepkość dynamiczna. S dynamisk viskositet. (212)
2. **kinematic viscosity** : the quotient of the dynamic viscosity and the density, both measured at the same temperature. ★ viscosité cinématique → *viscosité 1.* R кинематическая вязкость. D kinematische Viskosität. E viscosidad cinemática. I viscosità cinematica. N kinematische viscositeit. P lepkość kinematyczna. S kinematisk viskositet. (212)
3. **magnetic viscosity** : a magnetic after-effect resulting from a change in the applied static magnetic field. ★ viscosité magnétique → *viscosité 3.* R магнитная вязкость. D magnetische Viskosität. E viscosidad magnética. I viscosità magnetica. N magnetische viscositeit. P lepkość magnetyczna. S magnetisk viskositet. (221)

viscous

1. **viscous damping** : → *damping 9*

visibility

1. **line visibility** : a condition in which the line scan structure is visible to a normally positioned viewer. ★ visibilité des lignes → *visibilité 4.* R заметность строк. (723)

visible

1. **(visible) image** : → *image 24*
2. **visible radiation** (*Syn.* light) : → *light 25*
3. **visible radiation** : → *radiation 118*
4. **visible speech apparatus** : → *apparatus 19*

vision

1. **defective colour vision** : anomaly of vision in which there is a reduced ability to discriminate between some or all colours. ★ vision anormale des couleurs → *vision 2.* R аномальное цветовое зрение. D Farbenfehlsichtigkeit. E visión de color anómala. I anomalia della visione dei colori. N afwijking in het kleurenzien. P widzenie barwne nieprawidłowe; dyschromatopsja. S defekt färgseende. (845)
2. **mesopic vision** : vision intermediate between photopic and scotopic vision. *Note.* — In mesopic vision, both the cones and the rods are active. ★ vision mésopique → *vision 3.* R сумеречное зрение. D Dämmerungssehen; Übergangssehen; mesopisches Sehen. E visión mesópica. I visione mesopica. N mesopisch zien. P widzenie mezopowe. S mesopiskt seende; skymningsseende. (845)
3. **photopic vision** : vision by the normal eye when it is adapted to levels of luminance of at least several candelas per square metre. *Note.* — The cones are the principal active photoreceptors in photopic vision. ★ vision photopique → *vision 4.* R дневное зрение. D Tagessehen; photopisches Sehen. E visión fotópica. I visione fotopica. N fotopisch zien. P widzenie fotopowe. S fotopiskt seende; dagseende. (845)
4. **point vision** : mode of vision, of an apparently small source of light, in which the luminous sensation is determined only by the illuminance that is produced by the source at the eye of the observer. ★ vision ponctuelle → *vision 5.* R наблюдение точечных источников (света). D Punktsehen. E visión puntual. I visione di una sorgente puntiforme. N puntzien. P widzenie punktowe. S ..... (845)
5. **radio frequency vision signal** : → *signal 153*
6. **scotopic vision** : vision by the normal eye when it is adapted to levels of luminance less than some hundredths of a candela per square metre. *Note.* — The rods are the principal active photoreceptors in scotopic vision. ★ vision scotopique → *vision 6.* R ночное зрение. D Nachtsehen; skotopisches Sehen. E visión escotópica. I visione scotopica. N scotopisch zien. P widzenie skotopowe. S skotopiskt seende; nattseende. (845)
7. **sound on vision** : → *sound 44*
8. **vision carrier** : → *carrier 31*

9. **vision signal** (*Syn.* radio frequency vision signal) : → *signal 153*
10. **(vision/sound) diplexer** : → *diplexer 2*
11. **vision transmitter** : → *transmitter 21*

visual

1. **visual acuity** : → *acuity 2*
2. **visual approach slope indicator** : → *indicator 27*
3. **visual colorimetry** : → *colorimetry 3*
4. **visual contrast threshold** : → *threshold 32*
5. **visual display unit** : → *unit 85*
6. **visual performance** : → *performance 21*
7. **visual photometry** : → *photometry 3*
8. **visual range** : → *range 73*
9. **visual resolution** (*Syn.* visual acuity) : → *acuity 2*
10. **visual signal** : → *signal 254*
11. **visual telephone** (*Syn.* video-telephony) : → *video-telephony 2*
12. **visual threshold** (*Syn.* threshold of illuminance) : → *threshold 25*

vitreous

1. **vitreous enamel** : → *enamel 3*
2. **vitreous silica** (*Syn.* fused silica) : → *silica 1*

V-network

1. **V-network** : an artificial mains network enabling the voltages between each conductor and earth to be measured separately. *Note.* — The V-network may be designed for application to networks of any number of conductors. ★ réseau (fictif) en V → *réseau 123.* R V-образный эквивалент сети; фазный эквивалент сети. D V-Netznachbildung. E red en V. I rete (fittizia) a V. N V-netwerk. P sieć sztuczna typu V. S V-nät. (161)

vocoder

1. **vocoder** : apparatus for a particular kind of analysis of speech signals followed by the corresponding synthesis. *Note.* — The name was formed from VOice CODER.There are various types of vocoders, such as channel vocoders and formant vocoders. ★ vocodeur → *vocodeur 1.* R вокодер (с английского). D Vocoder. E vocoder. I vocoder. N vocoder. P wokoder. S vocoder. (801)

voice

1. **artificial voice** (*Syn.* voice simulator) : a complex sound, usually emitted by an artificial mouth, whose spectrum corresponds to that of the average human voice. ★ voix artificielle → *voix 1.* R искусственный голос; модель голоса. D künstliche Stimme. E voz artificial. I voce artificiale. N stemsimulator. P głos sztuczny. S artificiell röst; mätröst. (722,801)
2. **voice simulator** (*Syn.* artificial voice) : → *voice 1*

voice-ear

1. **normal speech power for voice-ear measurements** : → *power 93*

voice-frequency

1. **set of voice-frequency multiplex (telegraph) circuits** : → *set 47*
2. **voice-frequency** : the frequency of any acoustic oscillation which may be produced by the normal human voice. ★ fréquence vocale → *fréquence 134.* R тональная частота. D Sprachfrequenz. E frecuencia vocal. I frequenza vocale. N spraakfrequentie. P częstotliwość sygnału mowy. S talfrekvens. (722)
3. **voice-frequency channel** : → *channel 57*
4. **voice-frequency multiplex telegraphy** : → *telegraphy 16*
5. **voice-frequency signal** : → *signal 255*
6. **voice-frequency signalling** : → *signalling 61*

volatile

1. **volatile fault** (*Syn.* intermittent fault) : → *fault 48*
2. **volatile store** : → *store 11*

volt

1. **volt, V (V)** : SI unit used for measuring electric potential, voltage or electromotive force. ★ volt, V → *volt 1.* (100)

voltage

1. **absolute voltage level** : → *level 2*
2. **absorbed voltage** : the voltage which is absorbed by a transductor in a circuit. ★ tension absorbée → *tension 104.* R падение напряжения на магнитном усилителе. D aufgenommene Spannung. E tensión absorbida. I tensione assorbita. N opgenomen spanning. P napięcie pochłonięte. S upptagen spänning. (431)
3. **accidental voltage transfer** : → *transfer 1*
4. **actual transformation ratio of a voltage transformer** : → *ratio 3*
5. **alternating voltage** : a periodic voltage having a mean value zero. *u*~ . ★ tension alternative → *tension 105.* R переменное напряжение. D Wechselspannung. E tensión alterna. I tensione alternata. N wisselspanning. P napięcie przemienne. S växelspänning. (131)
6. **applied voltage** (for a switching device) : the voltage which exists across the terminals of a pole of a switching device just before the making of the current. ★ tension appliquée → *tension 109.* R приложенное напряжение (коммутационного аппарата или предохранителя). D anstehende Spannung (für ein Schaltgerät). E tensión aplicada (para un aparato de conexión). I tensione applicata (per un apparecchio di manovra). N aangelegde spanning (van een schakeltoestel). P napięcie załączeniowe. S förspänning. (441)
7. **arc voltage** (of a fuse) : the instantaneous value of voltage which appears across the terminals of a fuse during the arcing time. ★ tension d'arc → *tension 124.* R напряжение на дуге (предохранителя). D Lichtbogenspannung (einer Sicherung). E tensión de arco (de un fusible). I tensione d'arco (di un fusibile). N boogspanning (van een smeltveiligheid). P napięcie łuku (bezpiecznika topikowego). S ljusbågsspänning. (441)
8. **arc voltage** : the voltage drop between the contact of the arc with the electrode tip and the charge or another electrode tip. *Note.* — Anode and cathode voltage drop are included. ★ tension d'arc → *tension 125.* R напряжение дуги. D Lichtbogenspannung. E tensión de arco. I tensione d'arco. N boogspanning. P napięcie łuku. S ljusbågsspänning. (841)
9. **arc voltage** : the voltage across the arc, including the anode and cathode voltage drop, measured as near as possible to the arc. ★ tension d'arc → *tension 126.* R напряжение дуги. D Lichtbogenspannung. E tensión de arco. I tensione d'arco. N boogspanning. P napięcie łuku (elektrycznego). S bågspänning. (851)
10. **arc-drop (voltage)** : the tube voltage drop of an arc discharge tube. ★ chute (de tension) dans l'arc → *chute de tension 2.* R падение напряжения в дуге. D Bogenspannung. E caída (de tensión) en el arco. I caduta (di tensione) dell'arco. N boogspanning. P spadek napięcia na łuku. S bågspänningsfall. (531)
11. **asymmetrical terminal voltage** : common mode voltage measured by means of a delta network at specified terminals. ★ tension en mode commun aux bornes → *tension 204.* R общее несимметричное напряжение на зажимах. D asymmetrische Klemmenspannung. E tensión de modo común en los bornes. I tensione di modo comune ai morsetti. N asymmetrische klemspanning. P napięcie fazowe na końcówkach. S asymmetrisk klämspänning. (161)
12. **asymmetrical voltage** (*Syn.* common mode voltage) : → *voltage 30*
13. **avalanche voltage** : the applied reverse voltage at which avalanche breakdown occurs. ★ tension d'avalanche → *tension 131.* R лавинное напряжение. D Durchbruchspannung. E tensión de avalancha. I tensione di valanga. N lawinespanning. P napięcie przebicia lawinowego. S lavinspänning. (391)
14. **beam accelerating voltage** : the potential difference between the cathode and the anode to generate an electric field for acceleration of the electrons. ★ tension d'accélération du faisceau → *tension 117.* R ускоряющее напряжение луча. D Strahlbeschleunigungsspannung (für den Elektronenstrahl). E tensión de aceleración del haz. I tensione di accelerazione del fascio. N versnellingsspanning. P napięcie przyspieszające wiązki. S accelerationsspänning. (841)
15. **breakdown voltage** : the voltage at which breakdown occurs under prescribed test conditions, or in use. ★ tension de claquage → *tension 137.* R пробивное напряжение. D Durchschlagspannung. E tensión de ruptura dieléctrica.

I tensione di scarica. N doorslagspanning. P napięcie przebicia. S sammanbrottsspänning. (212)

16. **capacitor voltage divider** : → *divider 1*
17. **capacitor voltage divider** : → *divider 2*
18. **capacitor voltage transformer** : → *transformer 17*
19. **cascade (inductive) voltage transformer** : → *transformer 18*
20. **ceiling voltage** : the maximum voltage that a generator, under operating conditions, is required to supply at its terminals for a limited time. ★ tension de plafond → *tension 162.* R предельное напряжение генератора. D Deckenspannung. E tensión tope. I tensione massima istantanea. N plafondspanning. P pułap napięcia. S toppspänning. (411)
21. **(cell) source voltage** : the cell voltage measured at zero current. ★ tension de source → *tension 178.* R напряжение на зажимах источника. D (Zellen) Quellenspannung. E tensión de fuente (de un elemento electroquímico); f.e.m. de un elemento. I forza elettromotrice di un elemento (elettrochimico). N bronspanning (van een cel). P napięcie źródła. S vilspänning. (111)
22. **cell voltage** : the voltage measured at the terminals of a cell. ★ tension d'un élément → *tension 199.* R напряжение электрохимического элемента. D Zellenspannung. E tensión de un elemento (electroquímico). I tensione di un elemento (elettrochimico). N celspanning. P napięcie ogniwa. S cellspänning. (111)
23. **circuit crest working off-state voltage** : the highest instantaneous value of the off-state voltage developed across a controllable valve or arm, excluding all repetitive and non-repetitive transients. ★ tension de crête à l'état bloqué (dans le sens direct) → *tension 144.* R амплитудное значение напряжения в (прямом) закрытом состоянии. D Vorwärts-Scheitelsperrspannung (am Zweig). E tensión de cresta en estado bloqueado (en sentido directo) (en un circuito). I tensione di lavoro, in stato di blocco diretto, di cresta (del circuito). N topblokkeerspanning (in doorlaatrichting) (in een stroomkring). P napięcie pracy szczytowe (w obwodzie) w stanie blokowania. S ren toppblockspänning. (551)
24. **circuit crest working reverse voltage** : the highest instantaneous value of the reverse voltage developed across a valve or arm, excluding all repetitive and non-repetitive transient voltages. ★ tension inverse de crête → *tension 217.* R амплитудное значение обратного напряжения. D Rückwärts-Scheitelsperrspannung (am Zweig). E tensión inversa de cresta (en un circuito). I tensione lavoro inversa di cresta (del circuito). N topsperspanning (in een stroomkring). P napięcie pracy szczytowe wsteczne (w obwodzie). S ren toppspärrspänning. (551)
25. **circuit insulation voltage** : the voltage with respect to frame or chassis of a circuit of an instrument and for which the instrument has been designed. ★ tension nominale d'isolement → *tension 231.* R напряжение, допускаемое изоляцией цепи. D Isolationsspannung. E tensión nominal de aislamiento de un circuito. I tensione d'isolamento. N isolatiespanning van de schakeling. P napięcie izolacji toru (przyrządu pomiarowego). S kretsisolationsspänning. (302)
26. **circuit non-repetitive peak off-state voltage** : the highest instantaneous value of any non-repetitive transient off-state voltage developed across a controllable valve or arm. ★ tension de pointe non répétitive à l'état bloqué (dans le sens direct) → *tension 163.* R максимальное значение неповторяющегося напряжения в (прямом) закрытом состоянии. D Vorwärts-Stoßspitzenspannung (am Zweig). E tensión de cresta no repetitiva en estado bloqueado (en sentido directo) (en un circuito). I tensione, in stato di blocco diretto, non ripetitiva di picco (del circuito). N eenmalige piekblokkeerspanning (in doorlaatrichting) (in een stroomkring). P napięcie blokowania szczytowe niepowtarzalne (w obwodzie). S transient toppblockspänning. (551)
27. **circuit non-repetitive peak reverse voltage** : the highest instantaneous value of any non-repetitive transient reverse voltage developed across a valve or arm. ★ tension inverse de pointe non répétitive → *tension 218.* R максимальное значение неповторяющегося обратного напряжения. D Rückwärts-Stoßspitzenspannung (am Zweig). E tensión inversa de cresta no repetitiva (en un circuito). I tensione inversa non ripetitiva di picco (del circuito). N eenmalige piekspersspanning (in een stroomkring). P napięcie wsteczne szczytowe niepowtarzalne (w obwodzie). S transient toppspärrspänning. (551)
28. **circuit repetitive peak off-state voltage** : the highest instantaneous value of the off-state voltage developed across a controllable valve or arm, including all repetitive transient voltages but excluding all non-repetitive transient voltages. ★ tension de pointe répétitive à l'état bloqué (dans le sens direct) → *tension 164.* R максимальное значение повторяющегося напряжения в (прямом) закрытом состоянии. D periodische Vorwärts-Spitzensperrspannung (am Zweig). E tensión de cresta repetitiva en estado bloqueado (en sentido directo) (en un circuito). I tensione, in stato di blocco diretto, ripetitiva di picco (del circuito). N periodieke piekblokkeerspanning (in doorlaatrichting) (in een stroomkring). P napięcie blokowania szczytowe powtarzalne (w obwodzie). S periodisk toppblockspänning. (551)
29. **circuit repetitive peak reverse voltage** : the highest instantaneous value of a reverse voltage developed across a valve or arm, including all repetitive transient voltages but excluding all non-repetitive transient voltages. ★ tension inverse de pointe répétitive → *tension 219.* R максимальное значение повторяющегося обратного напряжения. D periodische Rückwärts-Spitzensperrspannung (am Zweig). E tensión inversa de cresta repetitiva (en un circuito). I tensione inversa ripetitiva di picco (del circuito). N periodieke piekspersspanning (in een stroomkring). P napięcie wsteczne szczytowe powtarzalne (w obwodzie). S periodisk toppspärrspänning. (551)
30. **common mode voltage** (*Syn.* asymmetrical voltage) : the mean of the phasor voltages appearing between each conductor and a specified reference, usually earth or frame. ★ tension en mode commun → *tension 203.* R общее несимметричное напряжение. D asymmetrische Spannung. E tensión en modo común; tensión asimétrica. I tensione di modo comune; tensione asimmetrica. N in-fase spanning. P napięcie fazowe; napięcie niesymetryczne. S asymmetrisk spänning. (161)
31. **common mode voltage** : that part of the input voltages for which the amplitude and phase (or the polarity) are the same, which exists between each of the input terminals and a reference point. *Note.* — This reference point may be the frame terminal or the measuring earth terminal, or it may be an inaccessible point. ★ tension de mode commun → *tension 156.* R напряжение общего вида (синфазное напряжение). D Gleichtaktspannung. E tensión de modo común. I tensione di modo comune. N in-fase-spanning. P napięcie wspólne; napięcie synfazowe. S gemensammodspänning. (303)
32. **commutating voltage** : the voltage which causes the current to commutate. ★ tension de commutation → *tension 140.* R коммутирующее напряжение. D Kommutierungsspannung. E tensión de conmutación. I tensione di commutazione. N commutatiespanning. P napięcie komutacyjne. S kommuteringsspänning. (551)
33. **constant voltage charge** : → *charge 23*
34. **constant voltage/constant current crossover** : → *cross-over 1*
35. **control voltage** : the voltage across the control terminals of a transductor. ★ tension de commande → *tension 138.* R напряжение управления. D Steuerspannung. E tensión de control. I tensione di comando. N stuurspanning. P napięcie sterownicze. S styrspänning. (431)
36. **conventional impulse withstand voltage** : the peak value of an impulse test voltage at which insulation does not show any disruptive discharge when subjected to a specified number of applications of impulses of this value, under specified conditions. ★ tension de tenue conventionnelle aux chocs → *tension 182.* R импульсная прочность изоляции. D konventionelle Steh-Stoßspannung. E tensión soportada convencional a los impulsos. I tensione convenzionale di tenuta a impulso. N conventionele stoothoudspanning. P napięcie udarowe wytrzymywane określone metodą konwencjonalną. S konventionell hållspänning vid stöt. (604)
37. **conventional touch voltage limit** (U_L) : maximum value of the touch voltage which is permitted to be maintained indefinitely. *Note* : the value permitted depends on conditions of external influences. ★ tension limite conventionnelle de contact → *tension de contact 3.* R нормированное длительное предельное напряжение прикосновения. D vereinbarte Grenze der Berührungsspannung. E tensión de contacto convencional límite. I tensione di contatto limite (convenzionale). N grenswaarde van de aanrakingsspanning. P napięcie dotykowe bezpieczne; napięcie bezpieczne. S beröringsspänningsgräns. (826)
38. **critical anode voltage** : the minimum value of the anode voltage at which anode ignition occurs for a stated grid voltage.

★ tension critique d'anode → *tension 115.* R критическое анодное напряжение. D Anodenzündspannung. E tensión crítica de ánodo. I tensione critica anodica. N kritische anodespanning. P napięcie anody zapłonowe. S kritisk anodspänning. (531)

39. **critical grid voltage** (of a gas-filled tube) : the minimum magnitude of negative grid voltage or the maximum positive grid voltage that prevents anode ignition at a stated anode voltage. ★ tension critique de grille → *tension 116.* R критическое напряжение сетки. D kritische Gitterspannung. E tensión crítica de rejilla. I tensione critica di griglia. N kritische roosterspanning. P napięcie siatki zapłonowe. S kritisk gallerspänning. (531)
40. **critical rate of rise of off-state voltage** : → *rate 15*
41. **cut off voltage** (*Syn.* end (point) voltage) : → *point 14*
42. **cut-off voltage** (*Syn.* final voltage) : → *voltage 68*
43. **cut-off voltage** (of a depletion type field-effect transistor) : the gate-source voltage at which the magnitude of the drain current reaches a specified low value. ★ tension de blocage → *tension 132.* R напряжение отсечки (полевого транзистора, работающего в режиме обеднения). D Abschnürspannung (eines Verarmungs-Feldeffekttransistors). E tensión de bloqueo (de un transistor de efecto de campo de agotamiento). I tensione di blocco (di un transistore a effetto di campo a svuotamento). N afsnijspanning (van een veldeffecttransistor van het verarmingstype). P napięcie odcięcia (tranzystora polowego zubożanego). S strypspänning. (521)
44. **cut-off voltage** : that electrode voltage which reduces the value of a dependent variable e.g. anode current to a stated low value. *Note.* — For cathode-ray tubes, the dependent variable may be either the electron-beam current or the spot luminance. ★ tension de blocage → *tension 133.* R напряжение запирания. D Sperrspannung; Einsatzspannung. E tensión de bloqueo. I tensione di interdizione. N afknijpspanning. P napięcie odcięcia. S strypspänning. (531)
45. **cyclic voltage variation** : → *variation 2*
46. **deflection voltage** : voltage applied between a pair of deflecting electrodes. ★ tension de déviation → *tension 148.* R отклоняющее напряжение. D Ablenkspannung. E tensión de desviación. I tensione di deflessione. N afbuigspanning. P napięcie odchylające. S avböjningsspänning. (531)
47. **differential mode voltage** (*Syn.* symmetrical voltage) : the voltage between any two of a specified set of active conductors. ★ tension en mode différentiel → *tension 205.* R симметричное напряжение. D symmetrische Spannung. E tensión en modo diferencial; tensión simétrica; tensión diferencial. I tensione di modo differenziale; tensione simmetrica. N verschilspanning. P napięcie międzyprzewodowe; napięcie symetryczne. S symmetrisk spänning. (161)
48. **direct-axis component of synchronous generated voltage** : → *component 19*
49. **direct-axis component of voltage** : → *component 20*
50. **direct-axis sub-transient voltage** : the direct-axis component of the terminal voltage which appears immediately after the sudden opening of the external circuit when the machine is running at a specified load, before any flux variation in the excitation and damping circuits has taken place. ★ force électromotrice subtransitoire longitudinale → *force électromotrice 12.* R сверхпереходное напряжение по продольной оси. D subtransiente Längsspannung. E fuerza electromotriz subtransitoria longitudinal. I tensione subtransitoria longitudinale. N langscomponent van de aanvangsspanning. P napięcie indukowane podprzejściowe podłużne. S längskomponent av subtransient spänning. (411)
51. **direct-axis transient voltage** : the direct-axis component of the terminal voltage which appears immediately after the sudden opening of the external circuit when the machine is running at a specified load, if no account is taken of the components with very rapid damping which may exist during the first periods. ★ force électromotrice transitoire longitudinale → *force électromotrice 15.* R переходное напряжение по продольной оси. D transiente Längsspannung. E fuerza electromotriz transitoria longitudinal. I tensione transitoria longitudinale. N langscomponent van de overgangsspanning. P napięcie indukowane przejściowe podłużne. S längskomponent av transient spänning. (411)
52. **disturbance voltage** : voltage produced between two points on two separate conductors by an electromagnetic disturbance, measured under specified conditions. ★ tension perturbatrice → *tension 235.* R напряжение возмущения. D Störspannung. E tensión perturbadora. I tensione di disturbo. N storingsspanning. P napięcie zaburzenia. S störningsspänning. (161)
53. **dual purpose voltage transformer** : → *transformer 28*
54. **dual voltage motor vehicle** : → *vehicle 7*
55. **duration of a voltage change** : → *duration 11*
56. **dynamic voltage of an arc furnace installation** : the value of voltage expressed as a percentage of the open-circuit voltage for conditions when the arc is stable. ★ tension dynamique d'une installation de four à arc → *tension 200.* R динамическое напряжение установки дуговой печи. D dynamische Spannung im Lichtbogenofen. E tensión dinámica de una instalación de horno de arco. I tensione dinamica di una installazione di forno ad arco. N boogspanningsfactor (van een boogoveninstallatie). P napięcie dynamiczne urządzenia elektrotermicznego łukowego. S relativ dynamisk spänning. (841)
57. **earthed voltage transformer** : → *transformer 29*
58. **electrode voltage** : the voltage between the electrode and a stated reference point, usually on the cathode. *Note.* — Unless otherwise stated, an electrode voltage is measured at the available terminals. ★ tension d'électrode → *tension 188.* R напряжение электрода. D Elektrodenspannung. E tensión de electrodo. I tensione elettrodica. N elektrodespanning. P napięcie elektrody. S elektrodspänning. (531)
59. **(electronic) a.c. voltage convertor** : → *convertor 16*
60. **end (point) voltage** : → *point 14*
61. **end-of-charge voltage (of a cell or battery)** : the voltage of a cell or battery during charging at a specified constant current when a cell or battery has become completely charged. ★ tension de fin de charge (d'un accumulateur) → *tension 149.* R конечное напряжение заряда (вторичного химического источника тока). D Lade-Schlußspannung (einer Zelle oder Batterie). E tensión del final de carga (de un elemento o batería). I tensione finale di carica. N eindlaadspanning. P napięcie końcowe ładowania (akumulatora). S laddningsslutspänning. (486)
62. **equivalent constant voltage** : the constant voltage which must be applied to an X-ray tube to produce radiation having an attenuation curve in a given material closely similar to that of the beam under consideration. ★ potentiel constant équivalent → *potentiel 8.* R эквивалентный постоянный потенциал. D effektive Röntgenröhrenspannung. E potencial constante equivalente. I tensione costante equivalente. N equivalente constante spanning. P równoważne napięcie stałe. S ekvivalent likspänning. (881)
63. **equivalent flicker voltage fluctuation** : → *fluctuation 2*
64. **equivalent noise voltage** (of a one-port device) (*Syn.* noise electromotive force (of a one-port device)) (E_n) : the root mean square open circuit voltage at the output of a one-port device due solely to its sources of noise. *Note.* — A receiving antenna can be regarded as a one-port device when viewed from its output port. ★ force électromotrice de bruit → *force électromotrice 6.* R эквивалентное напряжение шума (двухполюсника). D äquivalente Rauschspannung (eines Eintors); elektromotorische Kraft des Rauschens. E fuerza electromotriz de ruido; tensión equivalente de ruido (de un dispositivo monopuerta). I forza elettromotrice di rumore (di un elemento a una porta). N vervangende ruisspanning; elektromotorische kracht van de ruis. P SEM równoważna szumu (jednowrotnika). S ekvivalent brusspänning. (702)
65. **extinction voltage** : the value of a gap voltage at which the discharge ceases in this gap when the voltage is decreasing. ★ tension d'extinction → *tension 192.* R потенциал деионизации. D Löschspannung. E tensión de extinción. I tensione di estinzione. N doofspanning. P napięcie gaśnięcia. S släckspänning. (531)
66. **fifty per cent disruptive discharge voltage** : the peak value of an impulse test voltage having a 50 per cent probability of initiating a disruptive discharge each time the dielectric testing is performed. ★ tension de cinquante pour cent de décharge disruptive → *tension 136.* R 50 %-ное разрядное напряжение. D 50 %-Durchschlagspannung. E tensión disruptiva 50 %; tensión de choque del 50%. I tensione di tenuta 50 % alla scarica disruttiva. N 50 % door of overslagspanning. P 50 % napięcie udarowe przeskoku. S 50 % sammanbrottsspänning. (604)

67. filament voltage : the voltage between the terminals of the filament. ★ tension de chauffage → *tension 134.* R напряжение накала. D Heizspannung (einer direkt geheizten Kathode). E tensión de caldeo (cátodo de caldeo directo). I tensione di riscaldamento (catodo a riscaldamento diretto). N gloeispanning (direct verhitte kathode). P napięcie żarzenia. S glödspänning (hos direkt upphettad katod). (531)

68. final voltage (*Syn.* cut-off voltage) : the specified voltage at which a discharge of a battery is considered finished. ★ tension finale → *tension 209.* R конечное напряжение. D Entladeschlußspannung. E tensión final. I tensione finale. N eindontlaadspanning. P napięcie końcowe wyładowania. S slutspänning. (486)

69. flicker voltage range : → *range 25*

70. floating voltage : the voltage between an open-circuited terminal and a reference point when specified voltages are applied to all other terminals. ★ tension flottante → *tension 210.* R плавающий потенциал. D schwebende Spannung. E tensión flotante. I tensione mobile, variabile, flottante. N zwevende spanning. P napięcie pływące. S frispänning. (521)

71. forward voltage (of a junction) : applied voltage such that the current flows in the forward direction. ★ tension directe → *tension 196.* R прямое напряжение (перехода). D Vorspannung in Leitrichtung (eines Überganges). E tensión directa (de una unión). I tensione diretta (di una giunzione). N spanning in doorlaatrichting (v.e. grenslaag). P napięcie (na złączu) w kierunku przewodzenia. S framspänning. (391)

72. front of a voltage impulse : → *front 3*

73. full voltage motor : → *motor 34*

74. gate non-trigger voltage : the highest gate voltage which will not cause the thyristor to switch from the off-state to the on-state. ★ tension de non-amorçage par la gâchette → *tension 159.* R неотпирающее напряжение на управляющем электроде. D höchste nichtzündende Steuerspannung. E tensión de no disparo de puerta. I tensione di non-innesco di comando. N niet-ontstekende stuurspanning. P napięcie bramki nieprzełączające. S icke-tändande styrspänning. (521)

75. gate trigger voltage : the gate voltage required to produce the gate trigger current. ★ tension d'amorçage par la gâchette → *tension 122.* R отпирающее напряжение на управляющем электроде. D Zündspannung. E tensión de disparo de puerta. I tensione di innesco di comando. N stuurspanning voor ontsteking. P napięcie bramki przełączające. S tänd(styr)spänning. (521)

76. grid bias voltage : the average value of the grid voltage, under stated conditions, which determines the operating point. ★ tension de polarisation de grille → *tension 165.* R напряжение сеточного смещения. D Gittervorspannung. E tensión de polarización de rejilla. I tensione di polarizzazione di griglia. N roostervoorspanning. P napięcie polaryzacji siatki. S gallerförspänning. (531)

77. grid bias voltage : the average value of the grid voltage, under stated conditions, which determines the value of the beam current or the operating point. ★ polarisation de grille → *polarisation 32.* R напряжение смещения модулятора. D Gittervorspannung. E polarización de rejilla. I polarizzazione di griglia. N roostervoorspanning (kathodestraalbuizen). P napięcie polaryzacji siatki. S gallerförspänning. (531)

78. grid/cathode driving voltage (*Syn.* modulation voltage) : the value of the varying voltage that must be applied between the grid and the cathode to increase the beam current or the spot luminance from the cut-off value to a stated value. ★ tension d'attaque grille-cathode → *tension 130.* R напряжение модуляции. D Hellsteuerspannung. E tensión de ataque rejilla/cátodo; tensión de modulación. I tensione griglia/catodo di comando; tensione di modulazione. N modulatiespanning. P napięcie modulujące. S (galler)styrspänning. (531)

79. grid driving voltage (*Syn.* grid input voltage) : → *voltage 80*

80. grid input voltage (*Syn.* grid driving voltage) : the varying voltage applied to a control grid. ★ tension d'attaque de grille → *tension 129.* R входное напряжение сетки. D Gitter-Eingangsspannung. E tensión de ataque de rejilla. I tensione applicata alla griglia. N roosterstuurspanning. P napięcie wejściowe. S gallerstyrspänning; gallerdrivspänning. (531)

81. grounded voltage transformer (*Syn.* earthed voltage transformer) : → *transformer 29*

82. Hall voltage : the voltage generated in a Hall plate due to the Hall effect. ★ tension de Hall → *tension 152.* R напряжение Холла. D Hallspannung. E tensión de Hall. I tensione di Hall. N Hallspanning. P napięcie Halla. S hallspänning. (521)

83. heater voltage : the voltage across the terminals of the heater. ★ tension de chauffage → *tension 135.* R напряжение подогревателя. D Heizspannung (einer indirekt geheizten Kathode). E tensión de caldeo (cátodo de caldeo indirecto). I tensione di riscaldamento (catodo a riscaldamento indiretto). N gloeispanning (indirect verhitte kathode). P napięcie żarzenia. S glödspänning (hos indirekt upphettad katod). (531)

84. ignition voltage : the lowest direct voltage that, when applied to a stated gap under stated conditions, will cause ignition in that gap. ★ tension d'amorçage → *tension 119.* R напряжение зажигания. D Zündspannung. E tensión de cebado. I tensione di innesco. N ontsteekspanning. P napięcie zapłonu. S tändspänning. (531)

85. image focus voltage : the photocathode voltage necessary to focus the photoelectrons at the target. ★ tension de concentration d'image → *tension 141.* R фокусирующее напряжение. D Fokussierspannung (des Bildwandlerteils). E tensión de concentración de imagen. I tensione di focalizzazione di immagine. N beeldfocusspanning. P napięcie ogniskujące. S bildfokuseringsspänning. (531)

86. impedance voltage at rated current (for the principal tapping) : a) of two-winding transformers: The voltage required to be applied at rated frequency to the line terminals of a winding of a polyphase transformer, or to the terminals of a winding of a single-phase transformer, to cause the rated current to flow through these terminals when the terminals of the other winding are short-circuited. *Note.* — The value is normally related to the appropriate reference temperature. b) of multi-winding transformers, related to a certain pair of windings: The voltage required to be applied at rated frequency to the line terminals of one of the windings of a pair for a polyphase transformer, or to the terminals of such a winding for a single-phase transformer, to cause a current to flow through these terminals corresponding to the smaller of the rated power values of both windings of that pair, the terminals of the other winding of the pair being short-circuited and the remaining winding(s) being open-circuited. *Notes. 1* — The various values for the different pairs are normally related to the appropriate reference temperature. *2* — The impedance voltage at rated current is usually expressed as a percentage of the rated voltage of the winding to which the voltage is applied. ★ tension de court-circuit à courant assigné (pour la prise principale) → *tension 143.* R напряжение короткого замыкания при номинальном токе (основное ответвление обмотки). D Bemessungs-Kurzschlußspannung (für die Hauptanzapfung). E tensión de cortocircuito a la corriente asignada (para la toma principal). I tensione di cortocircuito a corrente nominale (per la presa principale). N kortsluitspanning bij toegekende stroom (voor de hoofdaftakking). P napięcie zwarcia przy prądzie znamionowym (zaczep znamionowy). S kortslutningsspänning vid märkström. (421)

87. induced control voltage (of a Hall-effect device) : the voltage induced in the loop formed by the control current leads and the current path through a Hall plate caused by a varying magnetic flux density. ★ tension de commande induite → *tension 139.* R индуцированное управляющее напряжение (прибора на основе эффекта Холла). D induzierte Steuerspannung (bei einem Halleffektbauelement). E tensión de control inducida (de un dispositivo de efecto Hall). I tensione di comando isolata (di un dispositivo a effetto Hall). N geïnduceerde stuurspanning (van een Hallelement). P napięcie sterujące indukowane (hallotronu). S inducerad styrspänning. (521)

88. induced voltage : the voltage, in a closed path, produced by variation of the magnetic flux linking that path. ★ tension induite → *tension 211.* R индуктированное напряжение. D induzierte (Umlauf-) Spannung. E tensión inducida. I tensione indotta. N geïnduceerde spanning. P napięcie indukowane. S inducerad spänning. (121)

89. initial voltage (of a cell or battery) : the on-load voltage of a cell or battery after closing the external circuit, as soon as the transient polarization effects have subsided. ★ tension initiale (d'un accumulateur) → *tension 212.* R начальное напряжение (вторичного химического источника тока).

D Entlade-Anfangsspannung (einer Zelle oder Batterie). E tensión inicial (de un elemento o batería). I tensione iniziale. N beginontlaadspanning. P napięcie początkowe (akumulatora). S begynnelsespänning. (486)

90. in-phase (voltage) control : → *control 117*

91. insulation test voltage : the voltage at which the insulation test on an instrument is made. ★ tension d'essai diélectrique → *tension 190.* R испытательное напряжение изоляции цепи. D Prüfspannung. E tensión de ensayo dieléctrico. I tensione di prova per l'isolamento. N isolatiebeproevingsspanning. P napięcie probiercze izolacji. S isolationsprovspänning. (302)

92. inverse voltage : the voltage between the electrodes of an X-ray tube or rectifier when the anode is negatively charged with respect to the cathode. ★ différence de potentiel inverse → *différence 15.* R обратное напряжение. D Gegenspannung. E diferencia de potencial inversa. I tensione inversa. N sperspanning. P napięcie zwrotne. S backspänning. (881)

93. knee point voltage : the r.m.s. value of the sinusoidal voltage at rated frequency applied to the secondary terminals of the transformer, all other windings being open-circuited, which when increased bye 10% causes the r.m.s. value of the exciting current to increase by 50%. ★ tension du point de coude → *tension 198.* R напряжение точки излома. D Kniepunktspannung. E tensión de codo. I tensione di gionocchio. N kniepuntsspanning. P napięcie punktu kolanowego. S knäpunktsspänning. (321)

94. lamp voltage (of a discharge lamp) : the voltage between the electrodes of the lamp during stable operating conditions (the root mean square value in the case of alternating current). ★ tension de fonctionnement → *tension 150.* R рабочее напряжение (разрядной лампы). D Brennspannung (einer Eintladungslampe). E tensión de lámpara (de una lámpara de descarga). I tensione di lampada. N lampspanning. P napięcie wyładowania. S lampspänning. (845)

95. limiting voltage of a capacitor : the maximum peak voltage which can be applied periodically or occasionally to the terminals of the capacitor. ★ tension limite d'un condensateur → *tension 224.* R предельное напряжение конденсатора. D Grenzspannung eines Kondensators. E tensión límite de un condensador. I tensione limite di un condensatore. N grensspanning van een condensator (U_{lim}). P napięcie graniczne kondensatora. S gränstoppspänning. (436)

96. line to ground voltage (*Syn.* phase to earth voltage) : → *voltage 140*

97. line to line voltage (*Syn.* phase to phase voltage) : → *voltage 142*

98. line to neutral voltage (*Syn.* phase to neutral voltage) : → *voltage 141*

99. live voltage detector : → *detector 15*

100. load voltage (*Syn.* output voltage) : → *voltage 136*

101. load voltage (of a welding power source) : the voltage between the output terminals of a welding power source, when it is delivering current. ★ tension en charge (d'une source de courant de soudage) → *tension 201.* R напряжение под нагрузкой (сварочного источника питания). D Arbeitsspannung (einer Schweißstromquelle). E tensión en carga (de una fuente de alimentación para soldadura). I tensione sotto carico. N spanning tijdens belasting. P napięcie obciążeniowe (źródła prądu). S belastningsspänning. (851)

102. loss of voltage : a condition in which the voltage is zero or near zero, at the supply point or points. ★ manque de tension → *manque 2.* R исчезновение напряжения. D Spannungslosigkeit. E fallo de tensión. I mancanza di tensione. N ontbreken van spanning. P zanik napięcia. S spänningsbortfall. (604)

103. lowest voltage of a system : the lowest value of operating voltage which occurs under normal operating conditions at any time and any point in the system. *Note.* — Transient overvoltages due e.g. to switching operations and abnormal temporary variations of voltage, are not taken into account. ★ tension la plus basse d'un réseau → *tension 220.* R минимальное напряжение электрической сети. D niedrigste Betriebsspannung eines Netzes. E tensión más baja de una red. I tensione minima di una rete; tensione minima di un sistema. N laagste spanning van een net. P napięcie sieci najniższe. S lägsta driftspänning. (601)

104. magnitude of a voltage fluctuation : → *magnitude 2*

105. maintaining voltage : the tube voltage drop within the range of current over which the voltage drop is substantially independent of current. ★ tension de maintien → *tension 155.* R рабочее напряжение. D Brennspannung. E tensión de mantenimiento. I tensione di mantenimento. N brandspanning. P napięcie stabilizacji. S hållspänning. (531)

106. matched output voltage : the value of the voltage at the specified output terminal of the generator across a load impedance. *Note.* — The value of the voltage is expressed as an r.m.s. value for sinewaves and as a peak-to-peak value for intentionally non sinusoidal waveforms. ★ tension de sortie adaptée → *tension 177.* R напряжение на согласованной нагрузке. D Ausgangsspannung an der Nennlast. E tensión de salida adaptada. I tensione d'uscita sul carico adattato. N uitgangsspanning bij aanpassing. P napięcie wyjściowe obciążeniowe. S utspänning vid anpassning. (303)

107. maximum permissible a.c. voltage of a capacitor : the maximum r.m.s. alternating voltage which the capacitor can sustain for a given time in specified conditions. ★ tension alternative maximale admissible d'un condensateur → *tension 106.* R максимальное допустимое напряжение конденсатора переменного тока. D höchste zulässige Wechselspannung eines Kondensators. E tensión alterna máxima admisible de un condensador. I massima tensione alternata ammissibile di un condensatore. N maximaal toelaatbare spanning van een condensator. P napięcie przemienne maksymalne dopuszczalne kondensatora. S högsta driftspänning. (436)

108. maximum rated step voltage : the highest value of the rated step voltage for which the tap-changer is designed. ★ tension d'échelon assignée maximale → *tension 186.* R номинальное максимальное напряжение ступени. D höchste Bemessungs-Stufenspannung. E tensión de escalón asignada máxima. I tensione nominale massima di gradino. N maximale toegekende trapspanning. P napięcie stopniowe maksymalne znamionowe. S högsta märkstegspänning. (421)

109. maximum rated voltage : maximum usable peak voltage of an X-ray generator, X-ray tube housing or X-ray tube indicated by the manufacturer for the operating conditions specified. For a single peak generator the rated voltage always refers to the on-load half cycle. ★ haute tension assignée → *haute tension 12.* R предельное номинальное напряжение. D maximale Röntgenröhren-Betriebsspannung. E tensión máxima asignada. I massima tensione nominale. N maximale toegekende spanning. P maksymalne napięcie znamionowe. S högsta märkspänning. (881)

110. maximum rated X-ray tube voltage : the highest operating voltage for an X-ray tube specified by the manufacturer for the operating conditions (e.g., 2.5 h operation) and the high-voltage waveform (e.g., single-peak generator) under consideration. In the case of single-peak generators the maximum rated tube voltage is measured during the load period. *Notes. 1* — Indication of the maximum rated tube voltage, unless stated to the contrary, always refers to the peak value. *2* — For different operating conditions for example continuous, intermittent, and short time (radiographic operation) it is possible to have different maximum rated tube voltage. *3* — In the case of single-peak generators the value of the voltage during the load period (which determines the radiation emitted) and the inverse voltage (which determines the maximum voltage to which the tube will be subjected during operation) can be different. ★ potentiel d'accélération maximal d'un tube radiogène → *potentiel 10.* R предельное номинальное напряжение на трубке. D Röntgenröhren-Nennspanung. E potencial de aceleración máximo asignado de un tubo de rayos X. I massima tensione nominale di un tubo a raggi X. N maximale toegekende röntgenbuisspanning. P maksymalne znamionowe napięcie lampy rentgenowskiej. S maximal rörspänning. (881)

111. maximum voltage : the specified voltage at which motors or apparatus must operate normally, corresponding to the highest supply voltage at any point in the traction system under no-load conditions, taking into account the effects of regenerative braking. ★ tension maximale → *tension 225.* R максимальное напряжение. D Höchstspannung. E tensión máxima. I tensione massima. N maximale spanning. P napięcie maksymalne. S maximispänning. (811)

112. maximum voltage between segments (in a commutator machine) : the maximum voltage between two adjacent commutator segments under any conditions found in normal service. ★ tension maximale entre lames → *tension 226.* R максимальное напряжение между пластинами (в

коллекторном двигателе). D maximale Lamellenspannung. E tensión máxima entre segmentos (en una máquina de colector). I differenza di potenziale massima tra lamelle (di una macchina a collettore). N maximale lamelspanning. P napięcie międzydziałkowe maksymalne. S maximal lamellspänning. (811)

113. **mean voltage between segments** (in a commutator machine) : the voltage between adjacent brush boxes divided by the corresponding number of commutator separators not situated under the brushes. ★ tension moyenne entre lames → *tension 229.* R среднее значение напряжения между пластинами (в коллекторной машине). D mittlere Lamellenspannung. E tensión media entre segmentos (en una máquina de colector). I differenza di potenziale media tra lamelle (di una macchina a collettore). N gemiddelde lamelspanning. P napięcie międzydziałkowe średnie. S medellamellspänning. (811)

114. **mean voltage (of a cell or battery)** : the mean value of the voltage of a cell or battery during a period of charge or of discharge. ★ tension moyenne (d'un accumulateur) → *tension 228.* R среднее напряжение (вторичного химического источника тока). D mittlere Spannung (einer Zelle oder Batterie). E tensión media (de un elemento o batería). I tensione media. N gemiddelde spanning. P napięcie średnie (akumulatora). S medelspänning. (486)

115. **measuring voltage transformer** : → *transformer 42*

116. **medium voltage** (not used in the UK in this sense, nor in Australia) (*Syn.* MV (abbreviation)) : any set of voltage levels lying between low and high voltage. *Note.* — The boundaries between medium and high voltage levels overlap and depend on local circumstances and history or common usage. Nevertheless the band 30 kV to 100 kV frequently contains the accepted boundary. ★ moyenne tension → *tension 67.* R среднее напряжение. D Mittelspannung. E media tensión; M.T. (abreviatura). I media tensione; MT (abbreviazione). N middenspanning; MS (afgekort). P napięcie średnie. S mellanspänning. (601)

117. **medium voltage consumer** : → *consumer 8*

118. **medium voltage tariff** : → *tariff 20*

119. **minimum voltage** : the specified voltage corresponding to the lowest traction system voltage at which motors or apparatus must work. ★ tension minimale → *tension 227.* R минимальное напряжение. D Mindestspannung. E tensión mínima. I tensione minima. N minimale spanning. P napięcie minimalne. S minimispänning. (811)

120. **modified constant voltage charge** : → *charge 38*

121. **modulation voltage** (*Syn.* grid/cathode driving voltage) : → *voltage 78*

122. **multi-electrode voltage stabilizing tube** : → *tube 55*

123. **neutral point displacement voltage** : the voltage between the real or virtual neutral point and the earth. ★ tension de déplacement du point neutre → *tension 146.* R напряжение смещения нейтрали. D Sternpunktspannung. E tensión de desplazamiento del punto neutro. I tensione di spostamento del punto neutro (rispetto alla terra). N sterpuntsspanning. P napięcie przesunięcia punktu zerowego. S nollpunktsspänning. (601)

124. **no-load voltage (in arc welding and cutting)** : the voltage, exclusive of any arc striking or arc stabilizing voltage, between the output terminals of a welding power source when the external circuit is open and when the rated supply voltage is applied to the input terminals. ★ tension à vide (en soudage et coupage à l'arc) → *tension 103.* R напряжение холостого хода (при дуговой сварке и резке). D Leerlaufspannung (beim Lichtbogenschweißen und -schneiden). E tensión en vacío (en soldadura y corte por arco). I tensione a vuoto. N nullastspanning. P napięcie stanu jałowego (na zaciskach). S tomgångsspänning. (851)

125. **nominal excitation system ceiling voltage** : the ceiling voltage of the excitation system loaded with a resistor having an ohmic value equal to the resistance of the field winding to be excited, with this field winding at its maximum specified operating temperature. ★ tension d'excitation de plafond conventionnelle → *tension 191.* R предельное установившееся напряжение системы возбуждения. D Nenndeckenspannung der Erregerstromquelle. E tensión tope convencional de un sistema de excitación. I tensione massima convenzionale di eccitazione. N nominale plafondspanning van een bekrachtigingsbron. P pułap napięcia układu wzbudzającego. S toppspänning i magnetiseringssystem. (411)

126. **nominal voltage** (of an installation) : voltage by which an installation or part of an installation is designated. *Note.* — The actual voltage may differ from the nominal voltage by a quantity within permitted tolerances. ★ tension nominale → *tension 230.* R номинальное напряжение установки. D Nennspannung (einer Anlage). E tensión nominal (de una instalación). I tensione nominale (di esercizio) (di un sistema). N nominale spanning. P napięcie znamionowe (instalacji). S nominell spänning (i en installation). (826)

127. **nominal voltage of a cell or battery** : a suitable approximate value of voltage used to identify the voltage of a cell or battery. ★ tension nominale d'un accumulateur → *tension 232.* R номинальное напряжение вторичного химического источника тока. D Nennspannung der Zelle oder Batterie. E tensión nominal de un elemento o batería. I tensione nominale di un accumulatore o di una batteria. N nominale (batterij)spanning. P napięcie znamionowe akumulatora. S nominell spänning. (486)

128. **nominal voltage of a system** : a suitable approximate value of voltage used to designate or identify a system. ★ tension nominale d'un réseau → *tension 233.* R номинальное напряжение электрической сети. D Nennspannung eines Netzes. E tensión nominal de una red. I tensione nominale di una rete; tensione nominale di un sistema. N nominale spanning van een net. P napięcie znamionowe sieci. S nominell spänning. (601)

129. **off-load voltage** (*Syn.* open circuit voltage) : → *voltage 132*

130. **on-load voltage (of a cell or battery)** : the voltage between the terminals of a cell or battery while delivering current. ★ tension en décharge (d'un accumulateur) → *tension 202.* R напряжение под нагрузкой (вторичного химического источника тока). D Last-Spannung. E tensión en carga (de un elemento o batería). I tensione di scarica. N ontlaadspanning. P napięcie pod obciążeniem (akumulatora). S urladdningsspänning. (486)

131. **open circuit voltage** (*Syn.* source e.m.f.) : → *e.m.f. 6*

132. **open circuit voltage** (*Syn.* off-load voltage) : the potential difference that exists between the positive battery terminal or termination and the negative battery terminal or termination on open circuit. ★ tension à circuit ouvert → *tension 102.* R напряжение разомкнутой цепи; НРЦ (сокращение); напряжение без нагрузки. D Leerlaufspannung. E tensión en circuito abierto; tensión sin carga. I tensione a circuito aperto. N open spanning; nullastspanning. P napięcie bez obciążenia. S vilospänning. (486)

133. **open-circuit intermediate voltage** : → *intermediate-voltage 5*

134. **open-circuit intermediate voltage (of a capacitor divider)** : → *intermediate-voltage 6*

135. **operating voltage** (in a system) : the value of the voltage under normal conditions, at a given instant and a given point of the system. *Note.* — This value may be expected, estimated or measured. ★ tension de service → *tension 172.* R рабочее напряжение электрической сети. D Betriebsspannung. E tensión de servicio (de una red); tensión de explotación (de una red). I tensione di esercizio (di una rete o di un sistema). N bedrijfsspanning. P napięcie robocze (sieci). S driftspänning. (601)

136. **output voltage** (*Syn.* load voltage) : the voltage which is transferred to the load impedance in a circuit which includes a transductor. ★ tension de sortie → *tension 176.* R напряжение нагрузки. D Ausgangsspannung. E tensión de salida. I tensione di uscita. N uitgangsspanning. P napięcie wyjściowe. S utspänning; belastningsspänning. (431)

137. **peak arc voltage** (of a mechanical switching device) : the maximum instantaneous value of voltage which under prescribed conditions appears across the terminals of a pole of a switching device during the arcing time. ★ tension d'arc → *tension 123.* R пик напряжения на дуге. D Lichtbogenspannung (Spitzenwert). E tensión de arco (de un aparato de conexión) (valor de cresta). I tensione d'arco (di un apparecchio di manovra) (in valore di cresta). N boogspanningspiek (van een mechanische schakelaar). P napięcie łuku (łącznika zestykowego). S ljusbågsspänning (toppvärde). (441)

138. **peak forward anode voltage** : the maximum instantaneous positive anode-to-cathode voltage. ★ tension anodique directe de crête → *tension 107.* R максимальное прямое напряжение анода. D Anodenspitzenspannung. E tensión

anódica directa de cresta. I tensione anodica diretta di cresta. N positieve anodetopspanning. P napięcie anody szczytowe (dodatnie). S maximal anodspänning. (531)

139. peak negative anode voltage : the magnitude of the maximum instantaneous negative anode-to-cathode voltage. ★ tension anodique négative de crête → *tension 108.* R максимальное обратное напряжение анода. D Anodenspitzenspannung in Sperrichtung. E tensión anódica negativa de cresta. I tensione anodica negativa di cresta. N negatieve anodetopspanning. P napięcie anody wsteczne szczytowe. S maximal negativ anodspänning. (531)

140. phase to earth voltage (*Syn.* line to ground voltage (USA)) : the voltage between phase and earth. ★ tension phase-terre → *tension 237.* R напряжение относительно земли. D Spannung Aussenleiter-Erde. E tensión entre fase y tierra; tensión fase-tierra. I tensione fase-terra (tensione verso terra). N fasespanning naar aarde. P napięcie faza-ziemia; napięcie przewód-ziemia. S (fas)spänning till jord. (601)

141. phase to neutral voltage (*Syn.* line to neutral voltage (USA)) : the voltage between a phase in a polyphase system and the neutral point. ★ tension phase-neutre → *tension 236.* R фазное напряжение. D Sternspannung. E tensión simple; tensión fase-neutro. I tensione fase-neutro; tensione di fase. N fasespanning. P napięcie fazowe. S fasspänning. (601)

142. phase to phase voltage (*Syn.* line to line voltage (USA)) : the voltage between phases. ★ tension entre phases → *tension 206.* R линейное напряжение. D Aussenleiterspannung. E tensión compuesta (de una red trifásica); tensión entre fases. I tensione fra le fasi; tensione concatenata (di una rete o di un sistema trifase). N gekoppelde spanning. P napięcie międzyfazowe; napięcie międzyprzewodowe. S huvudspänning. (601)

143. plateau threshold voltage : the lowest applied voltage that corresponds to the start of the plateau for a stated sensitivity of the measuring circuit. ★ tension de début du plateau → *tension 145.* R пороговое напряжение плато. D Geiger-Müller-Schwelle. E tensión de principio de meseta. I tensione iniziale del pianerottolo. N plateau-drempelspanning. P napięcie progowe plato; napięcie progowe równi. S platåtröskelspänning. (531)

144. power frequency withstand voltage : the r.m.s. value of sinusoidal power frequency voltage that the equipement can withstand during tests made under specified conditions and for a specified time. ★ tension de tenue à fréquence industrielle → *tension 181.* R электрическая прочность при напряжении промышленной частоты. D Steh-Wechselspannung. E tensión soportada a frecuencia industrial. I tensione di tenuta a frequenza industriale. N houdspanning van netfrequentie. P napięcie przemienne wytrzymywane. S hållspänning vid växelspänningsprov. (604)

145. primary voltage (of a voltage transformer) : the voltage which is applied to the primary winding of a voltage transformer. ★ tension primaire → *tension 238.* R первичное напряжение (трансформатора напряжения). D Primärspannung (eines Spannungswandlers). E tensión primaria (de un transformador de tensión). I tensione primaria (di un trasformatore di tensione). N primaire spanning (van een spanningstransformator). P napięcie pierwotne (przekładnika napięciowego). S primärspänning (hos spänningstransformator). (321)

146. primer voltage (for TR and pre TR tubes) : the d.c. or pulse voltage applied to the primer electrode negative with respect to the body of the tube. ★ tension d'amorçage → *tension 120.* R напряжение вспомогательного разряда (для РЗП и предварительного РЗП). D Vorionisatorspannung (bei Empfänger- und Vorsperröhren). E tensión de cebado (tubos T.R. y P.T.R.). I tensione di innesco (tubi TR e pre-TR). N activeringsspanning (blokkeerbuizen). P napięcie elektrody pomocniczej. S (hjälp)tändarspänning. (531)

147. principal voltage : the voltage between the main terminals. ★ tension principale → *tension 240.* R основное напряжение. D Hauptspannung. E tensión principal. I tensione principale. N hoogspanning. P napięcie główne. S huvudspänning. (521)

148. probe voltage : the voltage applied to, or developed at, an electrode when it does not form a part of the main gap. ★ tension de sonde → *tension 175.* R зондовое напряжение. D Sondenspannung. E tensión de sonda. I tensione di sonda. N sondespanning. P napięcie sondy. S hjälpelektrodspänning; tändelektrodspänning. (531)

149. proof voltage (*Syn.* withstand voltage) : a voltage to be applied to a specimen under prescribed test conditions which does not cause breakdown and/or flashover of a satisfactory specimen. ★ tension d'épreuve → *tension 189.* R испытательное напряжение. D Prüfspannung; Spannungsfestigkeit. E tensión de ensayo. I tensione di prova; tensione di tenuta. N proefspanning. P napięcie probiercze. S hållspänning. (212)

150. prospective touch voltage : the highest touch voltage liable to appear in the event of a fault of negligible impedance in the electrical installation. ★ tension de contact présumée → *tension de contact 2.* R расчетное напряжение прикосновения. D zu erwartende Berührungsspannung. E tensión de contacto prevista. I tensione di contatto presunta. N hoogste te verwachten aanrakingsspanning. P napięcie dotykowe spodziewane. S beräknad beröringsspänning. (826)

151. protective voltage transformer : → *transformer 49*

152. psophometric voltage : the voltage, at a specified point in a channel or telephone set, which is equal to the square root of the sum of the squares of the effective voltages of the spectral components of a disturbance induced in the channel or set, each voltage being weighted to take account of the corresponding frequency. *Note.* — For telephony, the conventional weighting is given in the CCITT Recommendation O.41 from the Fascicle IV-4 of the Blue Book, 1989. ★ tension psophométrique → *tension 241.* R псофометрическое напряжение. D Geräuschspannung; psophometrisch bewertete Fremdspannung. E tensión psofométrica. I tensione psofometrica. N psofometrische spanning. P napięcie psofometryczne. S psofometrisk spänning. (722)

153. pulsating voltage : a periodic voltage having a mean value which is not zero.

$$u = U_0 + u\sim$$

★ tension pulsatoire → *tension 242.* R пульсирующее напряжение. D Mischspannung. E tensión pulsatoria. I tensione pulsante. N pulserende spanning. P napięcie tętniące. S pulserande spänning. (131)

154. pulsed voltage : an undulating voltage, the alternating component of which has a value such that the voltage is periodically reduced to zero. ★ tension pulsée → *tension 243.* R импульсное напряжение. D Stromstellerspannung; pulsierende Spannung. E tension pulsatoria. I tensione pulsante. N pulserende spanning. P napięcie pulsujące. S pulserande spänning. (811)

155. quadrature (voltage) control : → *control 150*

156. quadrature-axis component of synchronous generated voltage : → *component 46*

157. quadrature-axis component of voltage : → *component 47*

158. quadrature-axis sub-transient voltage : the quadrature-axis component of the terminal voltage which appears immediately after the sudden opening of the external circuit when the machine is running at a specified load, before any flux variation in the excitation and damping circuits has taken place. ★ force électromotrice subtransitoire transversale → *force électromotrice 13.* R сверхпереходное напряжение по поперечной оси. D subtransiente Querspannung. E fuerza electromotriz subtransitoria transversal. I tensione subtransitoria trasversale. N dwarscomponent van de aanvangsspanning. P napięcie indukowane podprzejściowe poprzeczne. S tvärkomponent av subtransient spänning. (411)

159. quadrature-axis transient voltage : the quadrature-axis component of the terminal voltage which appears immediately after the sudden opening of the external circuit when the machine is running at a specified load, if no account is taken of the components with very rapid damping which may exist during the first periods. ★ force électromotrice transitoire transversale → *force électromotrice 16.* R переходное напряжение по поперечной оси. D transiente Querspannung. E fuerza electromotriz transitoria transversal. I tensione transitoria trasversale. N dwarscomponent van de overgangsspanning. P napięcie indukowane przejściowe poprzeczne. S tvärkomponent av transient spänning. (411)

160. quenching voltage : the voltage which causes quenching of the current. ★ tension d'extinction sans commutation → *tension 193.* R выключающее напряжение. D Verlöschspannung. E tensión de extinción sin conmutación. I tensione d'estinzione senza commutazione. N doofspanning. P napięcie gaszenia. S kvässpänning. (551)

161. rate of occurrence of voltage changes : → *rate 77*

162. rated input voltage : the root-mean-square input supply voltage for which the equipment has been designed. Several rated input voltages may be specified for one equipment. ★ tension assignée à l'appareil → *tension 110.* R номинальное входное напряжение. D Nenn-Anschlusspannung. E tension de entrada asignada del equipo. I tensione nominale di ingresso. N toegekende ingangsspanning. P znamionowe napięcie zasilania. S nätspänning. (881)

163. rated primary voltage (of a voltage transformer) : the value of the primary voltage which appears in the designation of a voltage transformer and on which its performance is based. ★ tension primaire assignée → *tension 239.* R номинальное первичное напряжение (трансформатора напряжения). D primäre Bemessungsspannung (eines Spannungswandlers). E tensión primaria asignada (de un transformador de tensión). I tensione nominale primaria (di un trasformatore di tensione). N toegekende primaire spanning (van een spanningstransformator). P napięcie znamionowe pierwotne (przekładnika napięciowego). S primär märkspänning. (321)

164. rated secondary voltage (of a voltage transformer) : the value of the secondary voltage which appears in the designation of a voltage transformer and on which its performance is based. ★ tension secondaire assignée → *tension 250.* R номинальное вторичное напряжение (трансформатора напряжения). D sekundäre Bemessungsspannung (eines Spannungswandlers). E tensión secundaria asignada (de un transformador de tensión). I tensione nominale secondaria (di un trasformatore di tensione). N toegekende secundaire spanning (van een spanningstransformator). P napięcie znamionowe wtórne (przekładnika napięciowego). S sekundär märkspänning. (321)

165. rated step voltage : for each value of rated through-current, the highest permissible voltage between terminals which are intended to be connected to successive tappings of a transformer. ★ tension d'échelon assignée → *tension 185.* R номинальное напряжение ступени. D Bemessungs-Stufenspannung. E tensión de escalón asignada. I tensione nominale di gradino. N toegekende trapspanning. P napięcie stopniowe znamionowe. S märkstegspänning. (421)

166. rated transformation ratio of a voltage transformer : → *ratio 74*

167. rated voltage factor : → *factor 149*

168. rated voltage of a capacitor : the r.m.s. value of the alternating voltage for which the capacitor has been designed. ★ tension assignée d'un condensateur → *tension 111.* R номинальное напряжение конденсатора. D Nennspannung eines Kondensators. E tensión asignada de un condensador. I tensione nominale di un condensatore. N toegekende spanning van een condensator (Q_N). P napięcie znamionowe kondensatora. S märkspänning. (436)

169. rated voltage of a winding : the voltage assigned to be applied, or developed at no-load, between the line terminals of a winding of a polyphase transformer or reactor, or between the terminals of a winding of a single-phase transformer or reactor. ★ tension assignée d'un enroulement → *tension 112.* R номинальное напряжение обмотки. D Bemessungsspannung einer Wicklung. E tensión asignada de un arrollamiento. I tensione nominale di un avvolgimento. N toegekende spanning van een wikkeling. P napięcie uzwojenia znamionowe. S märkspänning. (421)

170. rated voltage ratio : → *ratio 75*

171. reactive-power voltage control : → *control 153*

172. re-ignition voltage : the ignition voltage during the deionization period following an interruption of anode current. ★ tension de rallumage → *tension 167.* R напряжение повторного зажигания. D Wiederzündspannung. E tensión de reencendido. I tensione di riaccensione. N herontsteekspanning. P napięcie zapłonu powtórnego. S återtändspänning. (531)

173. relative voltage change : → *change 7*

174. resetting voltage : the voltage applied to a main cathode to transfer the discharge directly to it from any other cathode. ★ tension de rappel → *tension 168.* R напряжение переноса. D Rückstellspannung. E tensión de redisposición. I tensione di richiamo. N overneemspanning. P napięcie przerzutu. S återställningsspänning. (531)

175. residual voltage : the sum of the instantaneous values of all three line-to-earth voltages, in a three-phase system. ★ tension résiduelle → *tension 244.* R напряжение нулевой последовательности. D Verlagerungsspannung. E tensión residual. I tensione residua. N sterpuntspanning; homopolaire spanning. P napięcie zerowe. S summaspänning; nollföljdsspänning. (321)

176. residual voltage for zero current control (of a Hall effect probe) : the Hall voltage which exists when a time varying magnetic field is present when the control current is zero. ★ tension résiduelle pour un courant de commande nul → *tension 247.* R остаточное напряжение при нулевом управляющем токе (зонда Холла). D Restspannung bei Steuerstrom null (bei einer Hallsonde). E tensión residual para una corriente de control nula (de un dispositivo de efecto Hall). I tensione residua per tensione di comando nulla (d'una sonda di Hall). N restspanning bij nulstuurstroom (van een Hallsonde). P napięcie szczątkowe przy prądzie sterującym zerowym (sondy Halla). S restspänning för nollstyrström. (521)

177. residual voltage for zero magnetic field (of a Hall-effect device) : the voltage which exists at the Hall terminals when control current flows under the conditions of no applied magnetic field. ★ tension résiduelle pour un champ magnétique nul → *tension 246.* R остаточное напряжение при нулевом магнитном поле (прибора на основе эффекта Холла). D Restspannung bei Magnetfeld null (bei einem Halleffektbauelement). E tensión residual para un campo magnético nulo (de un dispositivo de efecto Hall). I tensione residua per un campo magnetico nullo (di un dispositivo a effetto Hall). N restspanning bij nulveld (van een Hallelement). P napięcie szczątkowe przy polu magnetycznym zerowym (hallotronu). S restspänning för nollmagnetfält. (521)

178. residual voltage (of an arrester) : the voltage that appears between the terminals of an arrester during the passage of the discharge current. ★ tension résiduelle (d'un parafoudre) → *tension 245.* R остающееся напряжение разрядника. D Restspannung eines Überspannungsableiters. E tensión residual (de un pararrayos). I tensione residua (di uno scaricatore). N restspanning (van een afleider). P napięcie wyładowcze odgromnika. S avledningsspänning. (604)

179. residual voltage transformer : → *transformer 55*

180. residual voltage winding : → *winding 56*

181. reverse voltage (of a junction) : applied voltage such that the current flows in the reverse direction. ★ tension inverse → *tension 216.* R обратное напряжение (перехода). D Sperrspannung (eines Überganges). E tensión inversa (de una unión). I tensione inversa (di una giunzione). N sperspanning (v.e. grenslaag). P napięcie zwrotne (na złączu). S backspänning. (391)

182. ripple voltage (on the d.c. side) : the alternating voltage component of the voltage on the d.c. side of a convertor. ★ tension d'ondulation → *tension 197.* R пульсация напряжения (на стороне постоянного тока). D überlagerte Wechselspannung. E tensión de ondulación (lado continua). I ondulazione della tensione (lato corrente continua). N rimpelspanning (aan de gelijkstroomkant). P napięcie tętnień (po stronie prądu stałego). S pulsationsspänning. (551,811)

183. saturation voltage (of an ionization chamber) : under a given irradiation, the minimum voltage necessary to obtain saturation current in an ionization chamber. *Note.* — By extension, terms such as "95% [90%] saturation voltage" are used in practice to design the voltage necessary to obtain 95% [90%] saturation current. ★ tension de saturation → *tension 169.* R напряжение насыщения (ионизационной камеры). D Sättigungsspannung. E tensión de saturación (de una cámara de ionización). I tensione di saturazione (di camera di ionizzazione). N verzadigingsspanning (v.e. ionisatievat). P napięcie nasycenia (komory jonizacyjnej). S mättnadsspänning. (391)

184. saturation voltage : that electrode voltage above which there is no significant change in cathode current when the voltage is increased. ★ tension de saturation → *tension 170.* R напряжение насыщения. D Sättigungsspannung. E tensión de saturación. I tensione di saturazione. N verzadigingsspanning. P napięcie nasycenia. S mättningsspänning. (531)

185. saturation voltage : the minimum value of applied voltage required to produce saturation current. ★ tension de saturation → *tension 171.* R разность потенциалов при насыщении. D Sättigungsspannung. E tension de saturacion. I tensione di saturazione. N verzadigingsspanning. P napięcie nasycenia. S mättnadsspänning. (881)

186. secondary no-load voltage (in resistance welding) : the voltage measured between the electrodes when the rated supply voltage is applied to the terminals of the machine at its various settings, with the secondary circuit open. ★ tension secondaire à vide → *tension 249.* R вторичное напряжение холостого хода (при контактной сварке). D Sekundärleerlaufspannung (beim Widerstandsschweißen). E tensión secundaria en vacío (en soldadura por resistencia). I tensione secondaria a vuoto (saldatura a resistenza). N secundaire nullastspanning. P napięcie wtórne stanu jałowego (międzyelektrodowe). S tomgångsspänning. (851)

187. secondary voltage (of a voltage transformer) : the voltage which occurs at the terminals of the secondary winding of a voltage transformer when a voltage is applied to the primary winding. ★ tension secondaire → *tension 248.* R вторичное напряжение (трансформатора напряжения). D Sekundärspannung (eines Spannungswandlers). E tensión secundaria (de un transformador de tensión). I tensione secondaria (di un trasformatore di tensione). N secundaire spanning (van een spanningstransformator). P napięcie wtórne (przekładnika napięciowego). S sekundärspänning (hos spänningstransformator). (321)

188. sensitivity to voltage : → *sensitivity 31*

189. series mode voltage : an unwanted part of the input voltage which is superimposed on the voltage initiated by the quantity to be measured. *Note.* — Typical examples of a series mode voltage are induced voltages, e.g. an a.c. ripple on a d.c. signal, or thermo-potentials. ★ tension de mode série → *tension 157.* R напряжение последовательного вида. D Serientaktspannung. E tensión de modo serie. I tensione di modo serie. N ..... P napięcie szeregowe. S seriemodspänning. (303)

190. shield standing voltage : the voltage to earth appearing on the shield of a specially bonded cable when balanced full load currents are flowing in the cable conductors, normally quoted at the points along the cable length at which it is maximum (i.e. at the unearthed extremity of an elementary section in the case of single point bonding and at a cross-bonding point in the case of cross-bonding). When the voltages differ for cables of the three phases, the highest value is normally taken into account. ★ tension d'écran en régime permanent → *tension 187.* R остаточное напряжение. D Schirmspannung. E tensio'n de pantalla en régimen permanente. I tensione permanente dello schermo. N potentiaal van het aardingsscherm. P napięcie doziemne żył powrotnych (powłok metalowych). S ..... (461)

191. shield voltage limiter : → *limiter 5*

192. source of harmonic voltage : → *source 37*

193. source voltage : the terminal voltage of an ideal voltage source. ★ tension de source → *tension 179.* R напряжение источника. D ..... E tensión de fuente. I sorgente di tensione. N bronspanning. P napięcie źródłowe. S källspänning. (131)

194. stabilized voltage characteristic : → *characteristic 83*

195. starting voltage (of a discharge lamp) : the voltage between the electrodes which is needed to start the discharge in the lamp. ★ tension d'amorçage → *tension 121.* R напряжение зажигания (разрядной лампы). D Zündspannung (einer Eintladungslampe). E tensión de cebado (de una lámpara de descarga). I tensione d'innesco. N ontsteekspanning. P napięcie zapłonu. S tändspänning. (845)

196. statistical impulse withstand voltage : the peak value of an impulse test voltage at which insulation exhibits, under specified conditions, a probability of withstand which is equal to a specified reference probability, for example 90 per cent. *Note.* — This concept is applicable to self-restoring insulation. ★ tension de tenue statistique aux chocs → *tension 183.* R статистическая электрическая прочность. D statistische Steh-Stoßspannung. E tensión probabilística a los impulsos; tensión soportada estadística a los impulsos. I tensione percentuale di tenuta a impulso. N statistische stoothoudspanning. P napięcie udarowe wytrzymywane określone metodą statystyczną. S statistik hållspänning vid stöt. (604)

197. supply voltage : the voltage, excluding signal voltage, applied to the circuit of an electrode by an external source. ★ tension d'alimentation → *tension 118.* R напряжение питания. D Speisespannung. E tensión de alimentación. I tensione di alimentazione. N voedingsspanning. P napięcie zasilające. S matningsspänning. (531)

198. supply voltage : the voltage which a distribution undertaking maintains at the consumer's point of supply. *Note.* — If a supply voltage is specified, for instance in the supply contact, then it is called "declared (supply) voltage". ★ tension de fourniture → *tension 151.* R напряжение у потребителя. D Versorgungsspannung. E tensión de suministro. I tensione di fornitura. N voedingsspanning. P napięcie zasilania. S leveransspänning. (604)

199. switching voltage : the maximum instantaneous value of voltage which appears across the terminals of a fuse during its operation. *Note.* — The switching voltage may be the arc voltage or may occur during the time of transient recovery voltage. ★ tension de coupure → *tension 142.* R напряжение отключения. D Schaltspannung. E tensión de corte. I tensione di interruzione. N schakelspanning. P napięcie wyłączeniowe. S brytspänning. (441)

200. symmetrical terminal voltage : differential mode voltage, measured by means of a delta network at specified terminals. ★ tension différentielle aux bornes → *tension 195.* R симметричное напряжение на зажимах. D symmetrische Klemmenspannung. E tensión diferencial en los bornes. I tensione differenziale ai morsetti. N symmetrische klemspanning. P napięcie międzyprzewodowe na końcówkach. S symmetrisk klämspänning. (161)

201. symmetrical voltage (*Syn.* differential mode voltage) : → *voltage 47*

202. synchronism voltage (*Syn.* synchronous voltage) : → *voltage 204*

203. synchronous generated voltage : the voltage which would be generated in the primary windings on open-circuit, in the absence of saturation, by the excitation current for the conditions under consideration. ★ force électromotrice synchrone → *force électromotrice 14.* R синхронная э.д.с.. D Polradspannung (oder deren Anteil). E fuerza electromotriz síncrona. I forza elettromotrice sincrona. N synchrone geïnduceerde spanning. P napięcie indukowane wewnętrzne (maszyny synchronicznej). S inducerad spänning vid omättad maskin. (411)

204. synchronous voltage (*Syn.* synchronism voltage) : the voltage necessary to accelerate an electron from rest to a velocity equal to the phase velocity of a component of the electromagnetic wave, in the absence of the electron beam. ★ tension de synchronisme → *tension 180.* R напряжение синхронизма. D Synchronspannung. E tensión de sincronismo. I tensione di sincronismo. N synchrone spanning. P napięcie synchronizmu. S synk(roniserings)spänning. (531)

205. tail of a voltage impulse : → *tail 5*

206. tapping voltage of a winding : the voltage assigned to be applied, or developed at no load, between the line terminals of a winding of a polyphase transformer or between the terminals of a winding of a single-phase transformer, for the relevant tapping of the transformer. ★ tension de prise d'un enroulement → *tension 166.* R напряжение ответвления обмотки. D Anzapfungsspannung einer Wicklung. E tensión de toma de un arrollamiento. I tensione di presa di un avvolgimento. N aftakkingsspanning van een wikkeling. P napięcie zaczepowe uzwojenia. S reglerlägesspänning. (421)

207. tapping voltage ratio (of a pair of windings) : → *ratio 99*

208. temperature coefficient of open-circuit voltage : → *coefficient 73*

209. threshold voltage (of a diode or thyristor) : the value of the voltage at the intersection of the straight line approximation of the forward (on-state) current-voltage characteristic and the voltage axis. ★ tension de seuil → *tension 173.* R пороговое напряжение (диода или тиристора). D Schwellenspannung (einer Diode oder eines Thyristors). E tensión de umbral (de un diodo o tiristor). I tensione di soglia (di un diodo o tiristore). N drempelspanning. P napięcie progowe (diody lub tyrystora). S tröskelspänning (för diod eller transistor). (521,551)

210. threshold voltage (of an enhancement type field-effect transistor) : the gate-source voltage at which the magnitude of the drain current reaches a specified low value. ★ tension de seuil → *tension 174.* R пороговое напряжение (полевого транзистора, работающего в режиме обогащения). D Schwellenspannung (eines Anreicherungs-Feldeffekttransistors). E tensión de umbral (de un transistor de efecto de campo de enriquecimiento). I tensione di soglia (di un transistore ad effetto di campo ad arricchimento). N drempelspanning (van een veldeffecttransistor van het verrijkingstype). P napięcie progowe (tranzystora polowego

wzbogacanego). S tröskelspänning (för fälteffkttransistor av anrikningstyp). (521)

211. **total depletion voltage** (of a semiconductor detector) : the reverse voltage at which the depletion layer extends over essentially the whole thickness of the semiconductor. ★ tension de déplétion totale → *tension 147.* R напряжение полного обеднения (полупроводникового детектора). D ..... E tensión de agotamiento total (de un detector semiconductor). I tensione di svuotamento totale (di un semiconduttore). N spanning bij totale verarming (v.e. halfgeleiderdetector). P całkowite napięcie zaporowe (detektora półprzewodnikowego). S totalbristspänning. (391)

212. **touch voltage** : voltage appearing during an insulation fault, between simultaneously accessible parts. *Notes. 1* — By convention, this term is used only in connection with protection against indirect contacts. *2* — In certain cases, the value of the touch voltage may be appreciably influenced by the impedance of the person in contact with these parts. ★ tension de contact → *tension de contact 1.* R напряжение прикосновения. D Berührungsspannung. E tensión de contacto. I tensione di contatto. N aanrakingsspanning. P napięcie dotykowe. S beröringsspänning (vid isolationsfel). (826)

213. **undulating voltage** : the mean value of the voltage of a rectified single-phase alternating current having always the same sign. ★ tension ondulée → *tension 234.* R пульсирующее напряжение. D Gleichrichterspannung; Mischspannung. E tensión ondulada. I tensione ondulata. N gelijkspanning met rimpel. P napięcie tętniące. S vågspänning. (811)

214. **unearthed voltage transformer** : → *transformer 75*

215. **ungrounded voltage transformer** (*Syn.* unearthed voltage transformer) : → *transformer 75*

216. **variable voltage control** : → *control 200*

217. **voltage** (*U*) : the scalar quantity equal to the line integral of the electric field strength from one point to another along a specified path:

$$U_{ab} = \int_a^b E \cdot ds$$

Note. — In the case of an irrotational field, the voltage is independent of the path and equal to the potential difference between the two points: $U_{ab} = V_a - V_b$. ★ tension → *tension 101.* R напряжение. D (elektrische) Spannung. E tensión. I tensione elettrica. N spanning. P napięcie. S spänning. (121)

218. **voltage amplification** (*Syn.* voltage ratio) : → *ratio 102*

219. **voltage booster** : → *booster 4*

220. **voltage build-up** : → *build-up 7*

221. **voltage change** : → *change 9*

222. **voltage change interval** : → *interval 26*

223. **voltage circuit** : → *circuit 193*

224. **voltage collapse** : → *collapse 1*

225. **voltage control** : → *control 201*

226. **voltage controlled bus** : → *bus 14*

227. **voltage controlled crystal oscillator** : → *oscillator 8*

228. **voltage controlling transductor** : → *transductor 14*

229. **voltage depression** (*Syn.* voltage collapse) : → *collapse 1*

230. **voltage deviation** : → *deviation 21*

231. **voltage dip** : → *dip 3*

232. **voltage divider** : → *divider 6*

233. **voltage divider** (*Syn.* potentiometer) : → *potentiometer 2*

234. **voltage error** : → *error 65*

235. **voltage factor** : → *factor 187*

236. **voltage fluctuation** : → *fluctuation 6*

237. **voltage fluctuation waveform** : → *waveform 1*

238. **voltage grading** : → *grading 4*

239. **voltage imbalance** (*Syn.* voltage unbalance) : → *unbalance 5*

240. **voltage impulse** : → *impulse 25*

241. **voltage jump** : → *jump 2*

242. **voltage level** : → *level 102*

243. **voltage map** : → *map 5*

244. **voltage matching transformer** : → *transformer 78*

245. **voltage phase control** : → *control 202*

246. **voltage ratio** : → *ratio 102*

247. **voltage ratio of a capacitor divider** : → *ratio 103*

248. **voltage recovery** : → *recovery 18*

249. **voltage reducing device** : → *device 59*

250. **voltage reduction** : → *reduction 7*

251. **voltage reference diode** : → *diode 27*

252. **voltage reference tube** : → *tube 96*

253. **voltage regulation characteristic** : → *characteristic 95*

254. **voltage regulation for a specified load condition** (*Syn.* voltage drop or rise for a specified load condition) : → *voltage drop 3*

255. **voltage regulator diode** : → *diode 28*

256. **voltage regulator tube** (*Syn.* voltage stabilizing tube) : → *tube 98*

257. **voltage relay** : → *relay 55*

258. **voltage sensitivity** (*Syn.* pressure sensitivity) : → *sensitivity 17*

259. **voltage stability** : → *stability 22*

260. **voltage stabilizing tube** : → *tube 98*

261. **voltage standing-wave ratios** (*Syn.* standing-wave ratio) : → *ratio 95*

262. **voltage surge** : → *surge 8*

263. **voltage surge** : → *surge 9*

264. **voltage transformer** : → *transformer 79*

265. **voltage unbalance** : → *unbalance 5*

266. **voltage unbalance** : → *unbalance 6*

267. **V-terminal voltage** : terminal voltage, measured between a mains conductor and earth, in a V-network. ★ tension aux bornes d'un réseau en V → *tension 113.* R фазное напряжение на зажимах. D unsymmetrische Klemmenspannung. E tensión en los bornes de una red en V. I tensione ai morsetti di una rete a V. N V-klemspanning. P napięcie w układzie sieci typu V. S V-uttagsspänning. (161)

268. **withstand voltage** (*Syn.* proof voltage) : → *voltage 149*

269. **X-ray tube voltage** : the voltage between the anode and cathode of an X-ray tube, usually specified by its peak value in kV or MV. *Note.* — Sometimes neither anode nor cathode are at earth potential. ★ potentiel d'accélération d'un tube radiogène → *potentiel 9.* R ускоряющий потенциал рентгеновской трубки. D Röntgenröhren-Spannung. E potencial de aceleracion de un tubo de rayos X. I tensione a un tubo a raggi X. N röntgenbuisspanning. P napięcie na lampie rentgenowskiej. S rörspänning. (881)

voltage drop

1. **line voltage drop** : the difference at a given instant between the voltages measured at two given points along a line. ★ chute de tension en ligne → *chute de tension 4.* R потеря напряжения в линии. D Spannungsfall. E caída de tensión en línea. I caduta di tensione in linea. N spanningsval over een leiding. P spadek napięcia (w linii). S spänningsfall i ledning. (604)

2. **tube voltage drop** : the anode-cathode voltage during conduction. ★ chute de tension du tube → *chute de tension 3.* R падение напряжения на лампе. D Spannungsabfall an einer Röhre. E caída de tensión del tubo. I caduta di tensione del tubo. N spanning over de buis. P spadek napięcia w lampie. S anod-katodspänningsfall. (531)

3. **voltage drop or rise for a specified load condition** (*Syn.* voltage regulation for a specified load condition) : the arithmetic difference between the no-load voltage of a winding and the voltage developed at the terminals of the same winding at a specified load and power factor, the voltage supplied to (one of) the other winding(s) being equal to : — its rated value if the transformer is connected on the principal tapping (the no-load voltage of the former winding is then equal to its rated value) ; — the tapping voltage if the transformer is connected on another tapping. This difference is generally expressed as a percentage of the no-load voltage of the former winding. *Note.* — For multi-winding transformers, the voltage drop or rise depends not only on the load and power factor of the winding itself, but also on the load and power factor of the other windings. ★ chute ou augmentation de tension pour une condition de charge spécifiée → *chute de tension 6.* R падение или повышение напряжения для заданного режима нагрузки. D Spannungsänderung bei einer bestimmten Belastung. E caída o aumento de tensión para una condición de carga especificada. I caduta (o aumento) di tensione per una condizione di carico specificata. N spanningsdaling of -verhoging (-verandering) bij

een bepaalde belastingstoestand. P spadek (lub wzrost) napięcia w określonych warunkach obciążenia (lub wzrost). S spänningsändring. (421)

voltage rise

1. **voltage drop or rise for a specified load condition** : → *voltage drop 3*

voltage source

1. **controlled voltage source** : a voltage source controlled by a voltage or current from another part of the circuit. ★ source de tension dépendante → *source de tension 2.* R зависимый источник напряжения. D gesteuerte (geregelte) Spannungsquelle. E fuente de tensión dependiente. I generatore di tensione dipendente. N gestuurde spanningsbron. P źródło napięciowe zależne. S styrd spänningskälla. (131)
2. **ideal voltage source** : an active element whose terminal voltage is independent of the current through it. ★ source idéale de tension → *source de tension 12.* R идеальный источник напряжения (э д с.). D ideale Spannungsquelle. E fuente ideal de tensión. I sorgente ideale di tensione. N ideale spanningsbron. P źródło napięciowe idealne. S ideal spänningskälla. (131)
3. **(independent) voltage source** : an active element which can be represented by an ideal voltage source independent of all currents and voltages in the circuit, in series with a passive circuit element. ★ source de tension (indépendante) → *source de tension 6.* R (независимый) источник напряжения (э.д.с.). D (unabhängige) Spannungsquelle. E fuente de tensión (independiente). I generatore di tensione (indipendente). N (onafhankelijke) spanningsbron. P źródło napięciowe niezależne. S spänningskälla. (131)
4. ***m*-phase (voltage) source** : a polyphase source supplying *m* alternating voltages. ★ source (de tension) *m*-phasée → *source de tension 5.* R *m*-фазный источник напряжения. D *m*-Phasen- (Spannungs-) Quelle. E fuente (de tensión) de *m* fases. I generatore (di tensione) *m*-fase. N *m*-fasenspanningsbron; *m*-fasenvoeding. P źródło (napięciowe) *m*-fazowe. S *m*-fasig (spännings)källa. (151)
5. **polyphase (voltage) source** : a source supplying a set of two or more interrelated alternating voltages that have a common frequency but normally differ by a constant time-lag; they generally have similar amplitudes and waveforms. ★ source (de tension) polyphasée → *source de tension 8.* R многофазный источник напряжения. D Mehrphasen-(Spannungs-) Quelle. E fuente (de tensión) polifásica. I generatore (di tensione) polifase. N meerfasenspanningsbron; meerfasevoeding. P źródło (napięciowe) wielofazowe. S flerfasig (spännings)källa. (151)
6. **quarter-phase (voltage) source** : a polyphase source supplying two alternating voltages of the same amplitude, with a time-lag equal to one-quarter of a period. ★ source (de tension) diphasée → *source de tension 3.* R источник напряжения с 90-градусным сдвигом фаз. D Zweiphasen-(Spannungs-) Quelle mit $\pi/2$ Phasenverschiebungswinkel. E fuente (de tensión) bifásica. I generatore (di tensione) bifase. N ..... P źródło (napięciowe) ćwierćfalowe. S ..... (151)
7. **single-phase (voltage) source** : 1. A source supplying a single alternating voltage. 2. By extension, a set of alternating voltages having constant ratios of their instantaneous values. ★ source (de tension) monophasée → *source de tension 7.* R однофазный источник (напряжения). D Einphasen-(Spannungs-) Quelle. E fuente (de tensión) monofásica. I generatore (di tensione) monofase. N eenfasespanningsbron; eenfasevoeding. P źródło (napięciowe) jednofazowe. S enfasig (spännings)källa. (151)
8. **symmetrical polyphase (voltage) source** : a polyphase source whose *m* alternating voltages have the same waveform and the same amplitude and whose successive time-lags are equal to the same whole multiple of the fraction $1/m$ of the period. *Note.* — The set of *m* voltages of a symmetrical polyphase source can be represented by:

$$u_i(t) = u\left(t + (1 - i)\frac{kT}{m}\right)$$
$$i = 1, 2 \ldots m$$

where T is the period and k is an integer, usually 1. ★ source (de tension) polyphasée symétrique → *source de tension 9.* R симметричный многофазный источник напряжения. D symmetrische Mehrphasen-(Spannungs-) Quelle. E fuente (de tensión) polifásica simétrica. I generatore (di tensione) polifase simmetrico. N symmetrische meerfasenspanningsbron; symmetrische meerfasevoeding. P źródło (napięciowe) wielofazowe symetryczne. S symmetrisk flerfasig (spännings)källa. (151)
9. **2-phase (voltage) source** : a polyphase source supplying two alternating voltages. ★ source (de tension) biphasée → *source de tension 1.* R фазный источник напряжения. D Zweiphasen- (Spannungs-) Quelle. E fuente (de tensión) de 2 fases. I generatore (di tensione) bifase. N tweefasenspanningsbron; tweefasenvoeding. P źródło (napięciowe) 2-fazowe; źródło (napięciowe) dwufazowe. S tvåfasig (spännings)källa. (151)
10. **3-phase (voltage) source** : a polyphase source supplying three alternating voltages. ★ source (de tension) triphasée → *source de tension 11.* R фазный источник напряжения. D Dreiphasen- (Spannungs-) Quelle. E fuente (de tensión) de 3 fases. I generatore (di tensione) trifase. N driefasenspanningsbron; driefasenvoeding. P źródło (napięciowe) 3-fazowe; źródło (napięciowe) trójfazowe. S trefasig (spännings)källa. (151)
11. **4-phase (voltage) source** : a polyphase source supplying four alternating voltages. ★ source (de tension) tétraphasée → *source de tension 10.* R фазный источник напряжения. D Vierphasen- (Spannungs-) Quelle. E fuente (de tensión) de 4 fases. I generatore (di tensione) tetrafase. N vierfasenspanningsbron; vierfasenvoeding. P źródło (napięciowe) 4-fazowe; źródło (napięciowe) czterofazowe. S fyrfasig (spännings)källa. (151)

voltage-current

1. **anode-to-cathode (voltage-current) characteristic** : → *characteristic 5*
2. **principal (voltage-current) characteristic** : → *characteristic 66*

voltage-multiplying

1. **voltage-multiplying generator** (*Syn.* cascade generator) : → *generator 9*

voltage-saturation

1. **voltage-saturation current** : → *current 219*

voltage-tunable

1. **voltage-tunable magnetron** (*Syn.* injected-beam magnetron) : → *magnetron 3*

volt-ampere

1. **volt-ampere meter** : → *meter 72*

volt-ampere-hour

1. **volt-ampere-hour meter** : → *meter 73*

voltmeter

1. **ARAEN speech voltmeter** : a volume meter specified by the CCITT and used for the adjustement of the test operator's acoustical speech power during articulation test measurements. *Note.* — The ARAEN speech voltmeter is described in the supplement n°10 of Volume V of the CCITT White Book, 1969. ★ volumètre de l'ARAEN → *volumètre 2.* R волюметр ARAEN. D ARAEN-Sprachvoltmeter. E volúmetro de ARAEN. I indicatore di volume dell'ARAEN. N ARAEN-(spraak)volumemeter. P wolumetr ARAEN. S ARAEN vu-meter. (722)
2. **digital voltmeter** : an instrument employing analogue-to-digital conversion, which measures the value of a voltage and provides the result in a digital form. ★ voltmètre numérique → *voltmètre 4.* R цифровой вольтметр. D Digitalvoltmeter. E voltímetro digital. I voltmetro numerico. N digitale voltmeter. P woltomierz cyfrowy. S digital voltmeter. (303)
3. **peak voltmeter** : a voltmeter intended to measure the maximum instantaneous value of a fluctuating voltage. ★ voltmètre de crête → *voltmètre 2.* R пиковый вольтметр. D Spitzenspannungs-Messgerät. E voltímetro de cresta. I voltmetro di cresta. N topspanningsmeter. P woltomierz szczytowy. S toppvoltmeter. (301)
4. **quasi-peak voltmeter** : the combination of a quasi-peak detector coupled to an indicating instrument having a specified mechanical time constant. ★ voltmètre de quasi-crête

→ *voltmètre 3.* **R** квазипиковый вольтметр. **D** Quasi-Spitzenwert-Spannungsmesser. **E** voltímetro de cuasicresta. **I** voltmetro di quasi-picco. **N** quasi-topwaarde voltmeter. **P** woltomierz quasi-szczytowy. **S** kvasitoppvoltmeter. (161)

5. **voltmeter** : an instrument intended to measure the value of a voltage. ★ voltmètre → *voltmètre 1.* **R** вольтметр. **D** Spannungs-Messgerät. **E** voltímetro. **I** voltmetro. **N** spanningsmeter; voltmeter. **P** woltomierz. **S** voltmeter. (301)

volume

1. **(american) reference volume** : the volume of a complex voice signal that gives on the vu meter connected across a 600 Ω resistance the same indication as a sinusoidal signal of 1000 Hz and at 1 mW for which the vu meter indicates 0 vu. ★ volume de référence (américain) → *volume 9.* **R** (американский) опорный волюм. **D** (amerikanisches) Bezugsvolumen. **E** volumen de referencia (americano). **I** volume di riferimento (americano). **N** (Amerikaans) vergelijkingsvolume. **P** wolumen odniesienia (amerykański). **S** vu-referensvolym. (722)
2. **(american) volume unit** : → *unit 2*
3. **apparent power (volume) density** : → *density 2*
4. **automatic volume control** (*Syn.* automatic gain control) : → *control 12*
5. **effective mode volume** : the square of the product of the diameter of the near-field pattern, at the full width half maximum and the sine of the radiation angle of the far-field pattern at half maximum intensity. *Note.* — Effective mode volume is proportional to the breadth of the relative distribution of power expressed as a number of modes in a multimode fibre. ★ volume optique des modes → *volume 12.* **R** эффективный объем мод. **D** effektives Modenvolumen. **E** volumen modal efectivo. **I** volume modale efficace. **N** effectief modusvolume. **P** skuteczna pojemność modowa. **S** effektiv modmängd. (731)
6. **mode volume** : the number of bound modes that an optical fibre is capable of supporting. *Notes. 1* — For $V<2.405$ step index fibre can only support one mode as is the case for singlemode fibre. *2* — For $V>5$, approximately given by, $V^2/2$ and $(V^2/2)\,[g/(g+2)]$, for step index and power-law profile fibres, respectively, where g is the profile parameter, and V is the normalised frequency. ★ volume des modes → *volume 11.* **R** объем мод. **D** Modenvolumen. **E** volumen modal. **I** volume modale. **N** modusvolume. **P** pojemność modowa (światłowodu). **S** modmängd. (731)
7. **sensitive volume** : that volume within a counter tube in which ionizing events may initiate discharges resulting in output pulses. ★ volume utile → *volume 13.* **R** чувствительный объем. **D** wirksames Volumen. **E** volumen útil. **I** volume utile. **N** gevoelige ruimte. **P** objętość czynna. **S** volymkänslighet. (531)
8. **sensitive volume** : that part of a physical detector, or biological organ, sensitive to radiation and therefore able to measure or react to it. ★ volume utile → *volume 14.* **R** чувствительный объем. **D** empfindliches Volumen. **E** volumen util. **I** volume sensibile. **N** gevoelig volume. **P** objętość czuła. **S** strålkänslig volym. (391,881)
9. **total loss (volume) density** : → *density 39*
10. **traffic volume** : the integral of the traffic intensity over a given time interval. *Notes. 1* — Traffic volume of a given pool of resources is equal to the sum of the holding times of the individual resources. *2* — A unit for traffic volume is the erlang-hour (symbol : Eh). ★ volume de trafic → *volume 10.* **D** Verkehrsmenge. **P** pojemność ruchów. (715)
11. **volume** (in telephony) : an average electrical quantity at a stated point in a telephone channel, related to acoustical speech power and evaluated by means of a specified instrument, the readings of which are interpreted in a specified manner. ★ volume → *volume 7.* **R** волюм (в телефонии). **D** Volumen (Fernsprechen). **E** volumen (en telefonía). **I** volume (in telefonia). **N** volume (bij telefonie). **P** wolumen. **S** (akustisk) volym. (722)
12. **volume activity** : → *activity 19*
13. **volume backscattering differential** : → *backscattering 7*
14. **volume control** : → *control 203*
15. **(volume) d.c. resistance** : → *resistance 74*
16. **(volume) d.c. resistivity** : → *resistivity 4*
17. **(volume) density of electromagnetic energy** : → *density 43*
18. **volume (electric) charge density** : → *charge density 4*
19. **volume implant** : → *implant 3*
20. **volume indicator** (*Syn.* volume meter) : → *meter 74*
21. **volume integral** : → *integral 8*
22. **volume ion density** : → *density 44*
23. **volume meter** : → *meter 74*
24. **volume resistance** : → *resistance 75*
25. **volume resistivity** : → *resistivity 5*
26. **volume scattering coefficient** : → *coefficient 77*
27. **volume scattering strength** (*Syn.* volume backscattering differential) : → *backscattering 7*
28. **volume velocity** : → *velocity 25*

von Kries

1. **(von Kries') persistence law** : → *law 14*

V-ring

1. **commutator V-ring** : → *commutator 10*
2. **commutator V-ring insulation** : → *insulation 10*

VSB

1. **VSB** (*Syn.* vestigial sideband) : → *sideband 9*

VSWR

1. **VSWR** (*Syn.* standing-wave ratio) : → *ratio 95*

V-terminal

1. **V-terminal voltage** : → *voltage 267*

vu

1. **vu meter** : → *meter 75*
2. **VU meter** : → *meter 76*

vulcanized

1. **vulcanized fibre** : → *fibre 29*

W

W

1. **watt, W** : → *watt 1*

wafer

1. **wafer** : an element of a rotary switch comprising a fixed disk (stator) and a rotating disk (rotor) capable of interconnecting terminals in predetermined combinations. A number of wafers can be mounted on a single spindle and operated simultaneously. ★ galette → *galette 1.* R галета. D Schalterebene. E galleta. I ..... N schakeldek. P segment (łącznika obrotowego). S omkopplarskiva. (581)

waist

1. **waist** : the plan bracing defining the limit between the body and the top hamper of a tower (see fig. 3.15). ★ corset → *corset 1.* R ..... D Taille (eines Mastes). E cintura. I vita. N hals. P gorset słupa; talia słupa. S midja. (466)

waiting

1. **waiting time** : → *time 225*

walking

1. **walking beam furnace** : → *furnace 59*

wall

1. **back wall** : the back (end) wall of the furnace chamber. ★ paroi arrière → *paroi 8.* R задняя стенка. D Rückwand. E pared trasera. I parete posteriore. N achterwand. P ściana tylna. S bakvägg. (841)
2. **Bloch wall** : a domain wall in which the component of a magnetic moment perpendicular to the plane of the wall is substantially constant, within, and on either side of, the wall. *Note.* — See the note for the term "Néel wall". ★ paroi de Bloch → *paroi 9.* R блоховская стенка. D Blochwand. E pared de Bloch. I regione di Bloch. N Blochwand. P ściana Blocha. S Blochvägg. (221)
3. **cold wall vacuum furnace** : → *furnace 9*
4. **cold walls** : furnace walls, usually of stainless steel, between which circulation of a coolant is possible. ★ parois froides → *paroi 12.* R холодные стенки. D Kaltwände. E paredes frías. I pareti fredde. N koelwanden. P ściany zimne. S kalla väggar. (841)
5. **domain wall** : a boundary region, many unit lattice cells in thickness, between adjacent Weiss domains, within which the orientation of the magnetic moment progressively changes from the direction in one domain to the direction in the adjacent domain. ★ paroi de domaine → *paroi 10.* R доменная граница. D Domänenwand. E pared de dominio. I regione di passaggio di campo. N domeinwand. P ściana domenowa. S domänvägg. (221)
6. **fire protection wall** : in a substation, a wall erected between two items of equipment usually oil-filled to prevent the spread of fire from one to the other. ★ mur pare-feu → *mur 1.* R противопожарная перегородка. D Feuerschutzwand. E pantalla cortafuego; muro cortafuego. I muro taglia fiamme. N brandmuur. P ściana przeciwpożarowa. S brandskyddsmur. (605)
7. **hot wall vacuum furnace** : → *furnace 21*
8. **Néel wall** : a domain wall in which the orientation of the magnetic moment varies through the wall and remains in a plane perpendicular to the plane of the wall. *Note.* — Néel walls are normally formed only in thin magnetic films below a critical thickness ; in thicker films and in bulk materials the formation of Bloch walls is energetically more favourable. ★ paroi de Néel → *paroi 11.* R стенка Нееля. D Néelwand. E pared de Néel. I regione di Néel. N Néelwand. P ściana Néela. S Néelvägg. (221)
9. **side walls** : the lateral walls of the heating chamber. ★ piédroit → *piédroit 1.* R боковые стенки. D Seitenwände. E paredes laterales. I parete laterale. N zijwanden. P ściany boczne. S sidoväggar. (841)
10. **specific wall admittance** : → *admittance 15*
11. **specific wall impedance** : → *impedance 56*
12. **wall diagram** (*Syn.* mimic diagram) : → *diagram 13*
13. **wall effect** : → *effect 87*

wall-less

1. **wall-less ionization chamber** : → *ionization chamber 22*

wall-mounted

1. **(television) wall-mounted screen** : → *screen 21*

wander

1. **wander** (in digital transmission) : long-term non-cumulative variations in the significant instants of a digital signal from their ideal positions in time. ★ dérapage → *dérapage 1.* R дрейф фазы (в цифровой передаче). D Wandern (in digitaler Nachrichtenübertragung); Auswandern. E perturbaciones oscilantes lentas. I wander (in trasmissione numerica). N verloop (bij digitale transmissie). P wędrowanie (w transmisji cyfrowej). S långtidsavvikelse. (704)

wanted

1. **wanted signal** : → *signal 256*

warble

1. **warble tone** : → *tone 42*

Ward-Léonard

1. **Ward-Léonard generator set** : → *set 62*
2. **Ward-Léonard system** : → *system 249*

warm-up

1. **heater warm-up time** : → *time 72*
2. **H.T. warm-up time** : → *time 75*
3. **warm-up time** : → *time 226*

warning

1. **aircraft warning marker** : → *marker 1*
2. **hazard warning signal** : → *signal 100*
3. **night warning light** : → *light 45*
4. **(radiation) warning assembly** : → *assembly 22*
5. **warning signal** : → *signal 257*

warp

1. **warp of a disk** : a distortion or twist in a normally flat disk. ★ voile d'un disque → *voile 4.* R коробление диска. D Verzug einer Platte. E comba de un disco. I vela di un disco. N kromtrekking. P spaczenie płyty. S skivskevhet. (806)

warren

1. **double warren** (*Syn.* double lacing) : a bracing system executed according to figure 2.2. ★ triangulation double → *triangulation 2.* R перекрестная решетка. D Ausfachung mit gekreuzten Diagonalen. E celosía doble. I tralicciatura doppia. N kruisverband. P zakratowanie podwójne. S dubbel diagonalvandring. (466)
2. **double warren redundant support** : → *support 8*
3. **single warren** (*Syn.* single lacing) : a bracing system executed according to figure 2.1. ★ triangulation simple → *triangulation 5.* R треугольная решетка. D Ausfachung mit Einfachdiagonalen. E celosía sencilla; celosía simple. I tralicciatura semplice. N slingerverband. P zakratowanie pojedyncze. S enkel diagonalvandring. (466)
4. **triple warren** (*Syn.* triple lacing) : a bracing system executed according to figure 2.3. ★ triangulation triple → *triangulation 6.* R многократная перекрестная решетка. D Ausfachung zweifach mit gekreuzten Diagonalen. E celosía triple. I tralicciatura tripla. N meervoudig verband. P zakratowanie potrójne. S tredubbel diagonalvandring. (466)

waste

1. **radioactive waste** : useless radioactive materials obtained in the processing or handling of radioactive materials. ★ déchets radioactifs → *déchet 1.* D radioaktiver Abfall. E residuos

radiactivos. I scorie radioattive. N radioactief afval. P opady promieniotwórcze. S radioaktivt avfall. (026)

2. **radioactive waste management** : → *management 3*

water

1. **quenching water** : condition of the sea encountered in shallow water or near the hull of a ship particularly in a rough sea, characterized by the presence of many air bubbles. ★ eau amortissante → *eau 4.* R аэрированный слой. D Blasenhaltiges Wasser; Blasenschleier. E aguas amortiguadoras. I acqua attenuante. N bellenhoudend water. P woda tłumiąca. S bubbelbemängt vatten. (801)
2. **tail water reservoir** : → *reservoir 8*
3. **useful water capacity of a reservoir** : → *capacity 30*
4. **useful water reserve of a reservoir** : → *reserve 8*
5. **water cumulative flows** : → *flow 13*
6. **water filled** : → *filled 7*
7. **water load** : → *load 94*
8. **water penetration** : → *penetration 5*
9. **water vapour permeability** : → *permeability 31*

water-cooled

1. **closed air-circuit water-cooled** : applied to a closed air-circuit machine having an air-to-water heat exchanger in the internal air circuit. ★ machine ventilée en circuit fermé, à refroidissement par eau → *machine 75.* R машина с замкнутой воздушноводяной системой охлаждения. D Maschine mit geschlossenem Luftkreislauf und Rückkühlung durch Wasser. E máquina ventilada en circuito cerrado, con refrigeración por agua. I macchina a ventilazione in ciclo chiuso, con refrigeranti. N met gesloten luchtomloop en lucht-waterkoeler. P maszyna z zamkniętym obiegiem powietrza i wbudowaną chłodnicą wodną. S slutet kylsystem med vattenluftkylare. (411)
2. **totally-enclosed water-cooled** : applied to a totally-enclosed machine having an air-to-water heat exchanger in the internal air circuit. ★ machine fermée à échangeur air-eau → *machine 50.* R закрытая машина с теплообменником воздух-вода. D völlig geschlossene Maschine mit Luft-Wasser-Kühlung. E máquina cerrada con intercambiador aire-agua. I macchina chiusa con refrigeranti ad acqua. N gesloten met lucht-waterkoeler. P maszyna zamknięta z chłodnicą wodną. S helkapslad vattenkyld. (411)

watertight

1. **watertight** : applied to a machine so constructed that it will exclude water under prescribed conditions, which include a limited period of immersion. ★ machine étanche à l'immersion → *machine 46.* R водонепроницаемая машина. D wasserdichte Maschine. E máquina estanca a la inmersión. I macchina a prova di immersione. N waterdicht. P maszyna wodoszczelna. S vattentät. (411)

watt

1. **watt, W** (W) : SI unit of (electric) power. ★ watt, W → *watt 1.* (100)

watthour

1. **watt-hour meter** : → *meter 77*
2. **watthour, Wh** (Wh) : unit of energy produced during 1 hour by an energy source, the power of which is 1 watt. ★ wattheure, Wh → *wattheure 1.* (100)

wattmeter

1. **vane wattmeter** : an instrument for the measurement of power flow in a waveguide making use of the electromechanical forces caused by the electromagnetic field on a metal or dielectric vane or vanes. ★ wattmètre à palette → *wattmètre 5.* R пондеромоторный ваттметр. D Feldkraft-Leistungsmesser. E vatímetro de lámina. I wattmetro a setto. N vaanwattmeter. P miernik mocy (mikrofalowy) elektromechaniczny. S ..... (726)
2. **wattmeter** (*Syn.* active power meter) : an instrument intended to measure active power. ★ wattmètre → *wattmètre 1.* R ваттметр. D Wirkleistungs-Messgerät. E vatímetro; aparato de medida de potencia activa. I wattmetro misuratore di potenza attiva. N wattmeter. P watomierz; miernik mocy czynnej. S wattmeter. (301)

wave

1. **bending wave** : transverse wave in a plate or bar, being a combination of compressional and shear wave. ★ onde de flexion → *onde 55.* R волна изгиба. D Biegewelle. E onda de flexión. I onda flessionale. N buiggolf. P fala giecia. S böjningsvåg. (801)
2. **characteristic wave impedance** : → *impedance 11*
3. **clockwise polarized wave** (*Syn.* right-hand polarized wave) : → *wave 49*
4. **compressional wave** : wave in an elastic medium that causes an element of the medium to change its volume without undergoing rotation. *Note.* — Mathematically, a compressional wave is one whose velocity field has zero curl. ★ onde de compression → *onde 53.* R волна сгущения-разрежения. D Kompressionswelle. E onda de comprensión; onda irrotacional. I onda di compressione. N drukgolf. P fala zageszczeń. S kompressionsvåg. (801)
5. **continuous wave magnetron** : → *magnetron 1*
6. **counter-clockwise polarized wave** (*Syn.* left-hand polarized wave) : → *wave 29*
7. **cylindrical wave** : wave of which the wavefronts are coaxial cylinders. ★ onde cylindrique → *onde 52.* R цилиндрическая волна. D Zylinderwelle. E onda cilíndrica. I onda cilindrica. N cylindrische golf. P fala cylindryczna; fala walcowa. S cylindrisk våg. (801)
8. **diffracted wave** : a wave caused by the scattering of an incident wave upon an obstacle. ★ onde diffractée → *onde 62.* R отклоненная волна. D gebeugte Welle. E onda difractada. I onda diffratta. N verstrooide golf. P fala ugięta. S spridd våg. (101,705)
9. **direct wave** : a radio wave propagating along a direct ray path. ★ onde (radioélectrique) directe → *onde 103.* D direkte Welle. P fala bezpośrednia. (705)
10. **duplex wave winding** : → *winding 23*
11. **electromagnetic wave** : a wave characterized by variations of the electric and magnetic fields. ★ onde électromagnétique → *onde 65.* R электромагнитная волна. D elektromagnetische Welle. E onda electromagnética. I onda elettromagnetica. N elektromagnetische golf. P fala elektromagnetyczna. S elektromagnetisk våg. (121,705)
12. **extraordinary wave** (component) : the magneto-ionic component which, at vertical incidence, is reflected at the height at which the electron density and the Earth's magnetic field are such that :

$$f_p^2 = f^2 - f \cdot f_B$$

where f_p is the plasma frequency, f is the wave frequency, and f_B is the electron gyro-frequency. *Notes. 1* — This component has left-handed or right-handed elliptical polarization depending on whether the direction of propagation is at an obtuse or acute angle to the Earth's magnetic field vector. *2* — When the direction of propagation is perpendicular to the Earth's magnetic field this component has linear polarization with the electric flux density vector perpendicular to the plane defined by the direction of propagation and the magnetic field. ★ onde extraordinaire → *onde 68.* D außerordentliche Welle. P fala nadzwyczajna (składowa). (705)
13. **fast wave** : an electromagnetic wave propagating close to the boundaries of a homogenous dielectric medium with a phase velocity greater than that of the free wave which would exist in an unbounded medium having the same electromagnetic properties. ★ onde rapide → *onde 105.* D schnelle Welle. P fala przyspieszona. (705)
14. **free progressive wave** (*Syn.* free wave) : → *wave 16*
15. **free progressive wave** : wave propagating in a medium, free from boundary effects. ★ onde progressive → *onde 101.* R бегущая волна. D freie fortschreitende Welle. E onda progresiva. I onda progressiva. N vrijlopende golf. P fala bieżąca. S fri fortskridande våg. (801)
16. **free wave** (*Syn.* free progressive wave) : an electromagnetic wave propagating in a homogeneous medium which can be considered unlimited in all directions. *Note.* — A free wave may exist in an absorbing medium. ★ onde libre → *onde 80.* D Freiraumwelle. P fala swobodna. (705)
17. **ground wave** : a radio wave which propagates in the troposphere and which is mainly due to diffraction around the Earth, basically determined by the properties of the ground. ★ onde de sol → *onde 58.* D Bodenwelle. (705)

18. **guided (electromagnetic) wave** : an electromagnetic wave the energy of which, during propagation, remains confined between surfaces or in the vicinity of surfaces by reason of a sharp or progressive variation in the electromagnetic properties of the medium in the directions normal to these surfaces. *Note.* — A guided electromagnetic wave may involve several electromagnetic modes.. ★ onde (électromagnétique) guidée → *onde 66.* D geführte (elektromagnetische) Welle. P fala prowadzona. (705)
19. **guided wave** (in a transmission line) : an electromagnetic wave that propagates along or within physical boundaries or structures. ★ onde guidée → *onde 69.* R направляемая волна (в линии передачи). D geführte Welle (in einer Übertragungsleitung). E onda guiada (en una línea de transmisión). I onda guidata (lungo una linea di trasmissione). N geleide golf. P fala prowadzona (w linii przesyłowej). S ledningsbunden våg. (726)
20. **guided wave** : an electromagnetic wave the energy of which remains confined during propagation, between surfaces, or in the vicinity of surfaces, by reason of a sharp or progressive variation in the electromagnetic properties of the medium in the directions normal to these surfaces. *Note.* — A guided wave may contain several electromagnetic modes. ★ onde guidée → *onde 70.* R направленная волна. D geführte Welle. E onda guiada. I onda guidata. N geleide golf. P fala prowadzona. S ledningsbunden våg. (731)
21. **heterogeneous plane wave** : a plane wave for which the real part and the imaginary part of the wave vector are not collinear. ★ onde plane hétérogène → *onde 93.* D heterogene ebene Welle. P fala płaska różnorodna. (705)
22. **homogeneous plane wave** : a plane wave for which the real part and the imaginary part of the wave vector are collinear. ★ onde plane homogène → *onde 94.* D homogene ebene Welle. P fala płaska jednorodna. (705)
23. **incident wave** : a wave that travels toward the surface separating two media or a discontinuity in a transmission line, or a port of an electrical network. ★ onde incidente → *onde 72.* R падающая волна. D einfallende Welle. E onda incidente. I onda incidente. N invallende golf. P fala docelowa; fala padająca. S infallande våg. (702,705)
24. **incident wave** (in a transmission line) : a wave that travels toward a discontinuity in a transmission line. ★ onde incidente → *onde 73.* R падающая волна (в линии передачи). D einfallende Welle (in einer Übertragungsleitung). E onda incidente (en una línea de transmisión). I onda incidente (in una linea di trasmissione). N invallende golf. P fala padająca. S infallande våg. (726)
25. **indirect wave** : a radio wave propagating along an indirect ray path. ★ onde (radioélectrique) indirecte → *onde 104.* D indirekte Welle. P fala pośrednia. (705)
26. **ionospheric wave** : a radio wave returned to the Earth by ionospheric reflection. ★ onde ionosphérique → *onde 75.* D ionosphärische Welle. P fala jonosferyczna. (705)
27. **lateral wave** : an electromagnetic wave which adds to the reflected wave of geometrical optics when the angle of incidence to a surface approximately equals the critical value for total reflection, producing a beam which is widened relative to the direction of propagation, and shifted parallel to the surface and to the plane of incidence. *Note.* — The lateral wave may be considered as the set of emergent waves produced in the first medium by an electromagnetic wave which propagates in the second medium close to the surface. For angles of incidence greater than the critical value, the field in the second medium is no longer propagated, and is an evanescent field. ★ onde latérale → *onde 77.* D laterale Welle. P fala uboczna. (705)
28. **leaky wave** : an electromagnetic wave associated with a fast wave guided along a surface and characterized by radiation of energy from this surface. *Note.* — In the radio frequency domain, leaky waves may be created by a periodic structure, consisting, for example, of apertures distributed along the length of a line guiding a fast wave. ★ onde de fuite → *onde 56.* D Leckwelle. P fala wyciekająca. (705)
29. **left-hand polarized wave** (*Syn.* counter-clockwise polarized wave) : an elliptically or circularly-polarized wave in which the electric field strength vector, observed in any fixed plane normal to the direction of propagation, whilst looking in this direction, rotates with time in a left-hand or counter-clockwise sense. *Note.* — For a left-hand circularly-polarized plane wave, the ends of the electric vectors drawn from any points along a straight line normal to the plane of the wave front, form, at any instant, a right-hand helix. ★ onde polarisée senestrorsum → *onde 98.* R волна с левосторонней поляризачией; волна, поляризованная против часовой стрелки. D linksdrehend polarisierte Welle; polarisierte Welle gegen den Uhrzeigersinn. E onda polarizada en sentido levógiro; onda polarizada en sentido anti-horario. I onda polarizzata sinistrorsa. N linksom gepolariseerde golf. P fala spolaryzowana lewoskrętnie. S moturs polariserad våg. (726)
30. **local value (of a wave)** : → *value 25*
31. **long wave infra-red radiation** : → *radiation 39*
32. **longitudinal wave** : a wave characterized by a vector parallel to the direction of propagation. ★ onde longitudinale → *onde 81.* R продольная волна. D longitudinale Welle. E onda longitudinal. I onda longitudinale. N longitudinale golf. P fala podłużna. S longitudinell våg. (101)
33. **longitudinal wave** : wave in which the direction of particle displacement at each point of the medium is normal to the wavefront. ★ onde longitudinale → *onde 82.* R продольная волна. D Longitudinalwelle. E onda longitudinal. I onda longitudinale. N longitudinale golf. P fala podłużna. S longitudinell våg. (801)
34. **medium wave infra-red radiation** : → *radiation 42*
35. **modulated wave** (*Syn.* modulated signal) : → *signal 122*
36. **modulating wave** (*Syn.* modulating signal) : → *signal 123*
37. **multiplex wave winding** : → *winding 40*
38. **non-reciprocal wave rotator** (*Syn.* non-reciprocal polarization rotator) : → *rotator 1*
39. **normalized complex wave amplitude** : → *amplitude 31*
40. **ordinary wave** (component) : the magneto-ionic component which, at vertical incidence, is reflected at the height at which the electron density is such that the plasma frequency is equal to the wave frequency. *Notes. 1* — This component has right-handed or left-handed elliptical polarization depending on whether the direction of propagation is at an obtuse or acute angle to the Earth's magnetic field vector. *2* — When the direction of propagation is perpendicular to the Earth's magnetic field, this component has linear polarization with the electric flux density vector in the plane defined by the direction of propagation and the magnetic field. ★ onde ordinaire → *onde 84.* D ordentliche Welle. P fala zwykła (składowa). (705)
41. **plane wave** : a wave such that the corresponding physical quantities are uniform in any plane perpendicular to the direction of propagation. ★ onde plane → *onde 91.* R плоская волна. D ebene Welle. E onda plana. I onda piana. N vlakke golf. P fala płaska. S plan våg. (101)
42. **plane wave** : wave of which the wavefronts are everywhere parallel planes normal to the direction of propagation. ★ onde plane → *onde 92.* R плоская волна. D ebene Welle. E onda plana. I onda piana. N vlakke golf. P fala płaska. S plan våg. (705,731,801)
43. **radio wave** : an electromagnetic wave propagated in space without artificial guide and having by convention a frequency lower than 3000 GHz. *Note.* — The electromagnetic waves having frequencies around 3000 GHz may be regarded either as radio waves or optical waves. ★ onde radioélectrique → *onde 102.* R радиоволна. D Funkwelle. E ondas radioeléctricas; ondas hertzianas. I onda radio - onda hertziana. N radiogolf. P fala radiowa. S radio. (701,705)
44. **(radio wave) lens** : → *lens 17*
45. **Rayleigh wave** : surface wave associated with the free boundary of a solid or liquid such that a surface particle describes an ellipse whose major axis is normal to the surface, and whose centre is situated on the initially undisturbed surface. *Notes. 1* — At maximum particle displacement away from this initially undisturbed surface the motion of the particle is opposite to that of the wave. *2* — The propagation velocity of a Rayleigh wave is slightly less than that of a shear wave in the solid. The wave amplitude of the Rayleigh wave diminishes exponentially with depth. ★ onde de Rayleigh → *onde 57.* R рэлеевская волна. D Rayleigh-Welle. E onda de Rayleigh. I onda di Rayleigh. N Rayleigh-golf. P fala Rayleigha. S Rayleigh-våg. (801)
46. **reflected wave** : a wave produced in a medium by a wave in that medium incident upon its interface with another medium. ★ onde réfléchie → *onde 106.* R отраженная волна. D reflektierte Welle. E onda reflejada. I onda riflessa. N teruggekaatste golf. P fala odbita. S reflekterad våg. (101)

47. **reflected wave** : 1. A wave which appears when a wave meets a surface separating two different media and which propagates away from the surface in the same medium as the incident wave. 2. A wave associated with an incident wave at a port of an electrical network or at a discontinuity in a transmission line, and propagating from this point in a direction opposite to that of the incident wave. ★ onde réfléchie → *onde 107.* R отраженная волна. D reflektierte Welle. E onda reflejada. I onda riflessa. N teruggekaatste golf. P fala odbita; fala powrotna. S reflekterad våg. (702,705,726)
48. **refracted wave** : a wave produced in a medium by an incident wave coming from an adjacent medium. ★ onde réfractée → *onde 108.* R преломленная волна. D gebrochene Welle. E onda refractada. I onda rifratta. N gebroken golf. P fala załamana. S bruten våg. (101,705)
49. **right-hand polarized wave** (*Syn.* clockwise polarized wave) : an elliptically or circularly-polarized wave in which the electric field strength vector, observed in any fixed plane normal to the direction of propagation, whilst looking in this direction, rotates with time in a right-hand or clockwise sense. *Note.* — For a right-hand circularly-polarized plane wave, the ends of the electric vectors drawn from any points along a straight line normal to the plane of the wave front, form, at any instant, a left-hand helix. ★ onde polarisée dextrorsum → *onde 97.* R волна с правосторонней поляризацией; волна, поляризованная по часовой стрелке. D rechtsdrehend polarisierte Welle; polarisierte Welle im Uhrzeigersinn. E onda polarizada en sentido dextrógiro; onda polarizada en sentido horario. I onda polarizzata destrorsa. N rechtsom gepolariseerde golf. P fala spolaryzowana prawoskrętnie. S medurs polariserad våg. (726)
50. **rotational wave** (*Syn.* shear wave) : wave propagating in an elastic medium that causes an element of the medium to change its shape without a change of volume. *Note.* — Mathematically, the particle velocity of a shear wave has zero divergence. ★ onde rotationnelle → *onde 110.* R волна сдвига. D Torsionswelle; Scherwelle. E onda rotacional; onda de torbellino. I onda rotazionale. N schuifspanningsgolf. P fala rotacyjna. S torsionsvåg. (801)
51. **scattered wave** : a wave which occurs in a medium when an incident wave encounters a rough surface, a set of obstacles or other irregularities which are very numerous and randomly located and which is not interpretable by geometrical optics. *Note.* — A scattered wave may be considered as the sum of the diffracted waves caused by each separate obstacle or irregularity. ★ onde diffusée → *onde 63.* D gestreute Welle. P fala rozproszona. (705)
52. **shear wave** (*Syn.* rotational wave) : → *wave 50*
53. **short wave infra-red radiation** : → *radiation 109*
54. **simplex wave winding** : → *winding 72*
55. **slow wave** : an electromagnetic wave propagating close to the boundaries of a homogeneous dielectric medium with a phase velocity less than that of the free wave which would exist in an unbounded medium having the same electromagnetic properties. ★ onde lente → *onde 78.* D langsame Welle. P fala zwolniona. (705)
56. **slow wave** : an electromagnetic wave that propagates in a bounded medium with a phase velocity below the phase velocity in the same medium when unbounded. ★ onde lente → *onde 79.* R медленная волна. D verzögerte Welle. E onda lenta. I onda lenta. N vertraagde golf. P fala opóźniona. S fasfördröjd våg. (726)
57. **slow wave structure** : → *structure 4*
58. **sound wave velocity** : → *velocity 19*
59. **spherical wave** : wave of which the wavefronts are concentric spheres. ★ onde sphérique → *onde 111.* R сферическая волна. D Kugelwelle. E onda esférica. I onda sferica. N bolvormige golf. P fala kulista. S sfärisk våg. (705,801)
60. **standing wave antenna** : → *antenna 110*
61. **standing wave detector** : → *detector 37*
62. **surface wave** : a slow wave guided along a surface. *Note.* — The guiding surface may be the surface separating two media or an imaginary surface associated with a periodic structure. The reduction of the phase velocity may be obtained, for example, by means of a dielectric layer with high permittivity covering a conductor, or by transverse grooves in a conductor, or may be the result of the finite conductivity of a conductor. ★ onde de surface → *onde 59.* D Oberflächenwelle. P fala powierzchniowa. (705)
63. **surface wave** : an electromagnetic wave which travels along the surface separating two media in a manner determined by the geometrical shape of the surface and the properties of the media near that surface. ★ onde de surface → *onde 60.* R поверхностная волна. D Oberflächenwelle. E onda de superficie. I onda di superficie; onda superficiale. N oppervlaktegolf. P fala powierzchniowa. S ytvåg. (726,731)
64. **(surface) wave tilt** : → *tilt 4*
65. **TEM wave** (*Syn.* transverse (electromagnetic) wave) : → *wave 68*
66. **transmitted wave** : the wave which appears beyond a surface separating two media, or beyond a discontinuity in a medium, when an incident wave meets this surface or discontinuity. ★ onde transmise → *onde 117.* D transmittierte Welle; durchlaufende Welle. P fala transmitowana. (705)
67. **transmitted wave** (in a transmission line) : a wave that travels away from a discontinuity in a transmission line in the same direction as the incident wave. ★ onde transmise → *onde 118.* R прошедшая волна (в линии передачи). D durchlaufende Welle (in einer Übertragungsleitung). E onda transmitida (después de una discontinuidad). I onda trasmessa (in una linea di trasmissione). N doorgelaten golf. P fala przechodząca. S transmitterad våg. (726)
68. **transverse (electromagnetic) wave** (*Syn.* TEM wave) : an electromagnetic wave for which the electric and magnetic field vectors are perpendicular to the direction of propagation. ★ onde TEM → *onde 115.* D transversale (elektromagnetische) Welle; TEM-Welle. P fala elektromagnetyczna poprzeczna; fala TEM. (705)
69. **transverse wave** : a wave characterized by vectors perpendicular to the direction of propagation. ★ onde transversale → *onde 119.* R поперечная волна. D transversale Welle. E onda transversal. I onda trasversale. N transversale golf. P fala poprzeczna. S transversell våg. (101)
70. **transverse wave** : wave in which the direction of particle displacement at each point of the medium is parallel to the wave front. ★ onde transversale → *onde 120.* R поперечная волна. D Transversalwelle. E onda transversal. I onda trasversale. N transversale golf. P fala poprzeczna. S transversell våg. (801)
71. **tropospheric wave** : a radio wave, which propagates in the troposphere and the propagation of which is basically determined by the properties of the troposphere. ★ onde troposphérique → *onde 121.* D troposphärische Welle. P fala troposferyczna. (705)
72. **uniform plane wave** : plane wave whose equi-amplitude surfaces are parallel planes. *Note.* — The real and imaginary parts respectively of the wave vector of a uniform plane wave have a fixed direction. ★ onde plane uniforme → *onde 96.* D gleichmäßige ebene Welle. P fala płaska jednolita. (705)
73. **wave** : a variation of the physical conditions of a medium, characterized by a field, and moving with a velocity defined at each point and in each direction by the properties of the medium. ★ onde → *onde 50.* R волна. D Welle. E onda. I onda. N golf. P fala. S våg. (702,705)
74. **wave** : disturbance propagated at a definitive velocity in a material medium in such a manner that at any point in the medium the quantity serving as the measure of disturbance is a function of the time, while at any instant the same quantity at a point is a function of the co-ordinates of the point. ★ onde → *onde 51.* R волна. D Welle. E onda. I onda. N golf. P fala. S våg. (801)
75. **wave analyzer** : → *analyzer 9*
76. **wave impedance** : → *impedance 68*
77. **wave interference** (*Syn.* phase interference) : → *interference 18*
78. **wave number** (*Syn.* repetency) : → *repetency 1*
79. **wave number** : → *number 36*
80. **wave number** : → *number 37*
81. **wave optics** (*Syn.* physical optics) : → *optic 6*
82. **(wave) rotation circulator** : → *circulator 11*
83. **(wave) rotation isolator** : → *isolator 8*
84. **wave vector** : → *vector 14*
85. **wave winding** : → *winding 88*
86. **Zenneck wave** : a surface wave guided along the plane surface separating a medium with finite conductivity from a perfect dielectric medium. *Note.* — This concept was introduced by Zenneck in order to represent the propagation of radio waves of

relatively long wavelengths in the immediate vicinity of the surface of the Earth and at a great distance from the transmission point. ★ onde de Zenneck → *onde 61.* D Zenneck-Welle. P fala Zennecka. (705)

waveform

1. **voltage fluctuation waveform** : the envelope of the peak voltages as a function of time. ★ (forme de la) fluctuation de tension → *fluctuation 8.* R форма колебаний напряжения. D Kurvenform der Spannungsschwankung. E forma de fluctuación de tensión. I forma della fluttuazione di tensione. N omhullende van een spanningsschommeling. P kształt fluktuacji napięcia. S spänningsenvelopp. (161)
2. **waveform** : a representation of the local or the instantaneous value of a function defining the wave. ★ forme d'onde → *forme 12.* R форма волны. D Wellenform. E forma de onda. I forma d'onda. N golfvorm. P kształt fali. S vågform. (101)
3. **waveform measurement** : → *measurement 14*
4. **waveform test** : → *test 101*

wavefront

1. **backward wavefront** : for wave propagation which originates from a source ending at a given instant, the surface separating that region of space presently affected by the wave from that portion which is no longer affected significantly by the wave. *Note.* — If propagation takes place along a surface or a line, the wavefront is defined respectively by a line or a point. ★ front d'onde arrière → *front 3.* D hintere Wellenfront. P czoło fali tylne. (705)
2. **forward wavefront** : for wave propagation which originates from a source, beginning at a given instant, the surface separating that region of space presently affected by the wave from that portion which is not yet affected significantly by the wave. *Note.* — If propagation takes place along a surface or a line, the wavefront is defined respectively by a line or a point. ★ front d'onde avant → *front 4.* D vordere Wellenfront. P czoło fali przednie. (705)
3. **surface wavefront** : locus of points of a progressive surface where the phase of a quantity characterizing the wave is the same at a given instant. ★ surface d'onde → *surface 41.* R поверхность фронта волны. D Wellenfront. E superficie de onda. I fronte d'onda. N golffront. P czoło fali. S vågfront. (731,801)
4. **wavefront** : an equiphase surface common to all the components of the vectors of an electromagnetic field, when such a surface exists. *Note.* — A wavefront is orthogonal at each point to the real part of the wave vector relative to this point. ★ surface d'onde → *surface 40.* D Wellenfront. P czoło fali. (705)

waveguide

1. **beam waveguide** : a waveguide consisting of a sequence of lenses or mirrors that can guide an electromagnetic wave. ★ guide (d'ondes) à faisceaux → *guide 16.* R лучевой волновод. D Wellenleiter für gebündelte Strahlen. E guía de ondas de haz. I guida d'onda a fasci. N bundelgolfgeleider. P falowód ogniskujący. S ..... (726)
2. **bendable waveguide** : a waveguide constructed so as to permit limited bending, twisting, stretching or any combination thereof during installation, without appreciable change of its electrical properties. ★ guide d'ondes déformable → *guide 19.* R сгибаемый волновод. D biegbarer Wellenleiter. E guía de ondas deformable. I guida d'onda deformabile. N buigbare golfgeleider. P falowód zginalny. S deformerbar vågledare. (726)
3. **circular waveguide** : a waveguide in which the transverse cross-section is circular. ★ guide circulaire → *guide 11.* R круговой волновод. D Rund-Hohlleiter. E guía de ondas circular. I guida circolare. N cirkelvormige golfgeleider. P falowód kołowy. S cirkulär vågledare. (726)
4. **dielectric waveguide** : a waveguide consisting entirely of one or more dielectric materials without metallic boundaries. ★ guide (d'ondes) diélectrique → *guide 20.* R диэлектричецкий волновод. D dielektrischer Wellenleiter. E guía de ondas dieléctrica. I guida d'onda dielettrica. N diëlektrische golfgeleider. P falowód dielektryczny. S dielektrisk vågledare. (726)
5. **elliptic waveguide** : a waveguide in which the transverse cross-section is elliptic. ★ guide elliptique → *guide 26.* R эллиптический волновод. D elliptischer Hohlleiter. E guía de ondas elíptica. I guida ellittica. N elliptische golfgeleider. P falowód eliptyczny. S elliptisk vågledare. (726)
6. **flexible waveguide** : a waveguide constructed to permit limited bending, twisting, stretching or any combination thereof during use, without appreciable change of its electrical properties. ★ guide d'ondes souple → *guide 24.* R гибкий волновод. D flexibler Wellenleiter. E guía de ondas flexible. I guida d'onda flessibile. N flexibele golfgeleider. P falowód giętki. S flexibel vågledare. (726)
7. **multimode waveguide** : a waveguide used for transmission in more than one mode of propagation at the same frequency. ★ guide multimode → *guide 33.* R многоволновый волновод. D Multimode-Wellenleiter. E guíaonda multimodo. I guida multimodale. N meermodusgolfgeleider. P falowód wielorodzajowy. S flermodsvågledare. (726)
8. **optical waveguide** : a transmission line designed to guide optical power. ★ guide d'ondes optique → *guide 22.* R оптический волновод. D Lichtwellenleiter; optischer Wellenleiter. E guía de ondas óptica. I guida d'onda ottica. N optische golfgeleider. P falowód optyczny; światłowód. S optisk vågledare. (731)
9. **over moded waveguide** : a waveguide used for transmission in a single mode of propagation but which is capable of transmission in more than one mode of propagation at the same frequency. ★ guide en mode contraint → *guide 28.* R волновод с высшими типами волн. D übermodierter Wellenleiter. E guía de ondas en modo restringido. I guida in modo obbligato oppure monomodale. N overmaatse golfgeleider. P falowód nadwymiarowy. S överdimensionerad vågledare. (726)
10. **periodically loaded waveguide** : a waveguide in which propagation is determined by periodically spaced variations of the properties of the media, the dimensions of the media, or the boundaries. ★ guide (d'ondes) à charge itérative → *guide 14.* R периодически нагруженный волновод. D periodisch belasteter Wellenleiter. E guía de ondas cargada periódicamente. I guida d'onda adattata su base iterativa. N golfgeleider met repeterende belasting. P falowód o strukturze periodycznej. S periodiskt belastad vågledare. (726)
11. **rectangular waveguide** : a waveguide in which the transverse cross-section is rectangular. ★ guide rectangulaire → *guide 34.* R прямоугольный волновод. D Rechteck-Hohlleiter. E guía de ondas rectangular. I guida rettangolare. N rechthoekige golfgeleider. P falowód prostokątny. S rektangulär vågledare. (726)
12. **ridge waveguide** : a rectangular waveguide with an interior conducting projection of one or both broad walls extending along the length of the waveguide. ★ guide (d'ondes) à moulure → *guide 17.* R гребенчатый волновод. D Steghohlleiter. E guía de ondas acanalada. I guida d'onda con modanature; guida a H; guida a V. N richelgolfgeleider. P falowód grzbietowy. S ryggvågledare. (726)
13. **septate waveguide** : a waveguide formed from two coaxial metal cylinders with a radial metal septum or fin connecting the inner to the outer cylinder along their length. ★ guide (d'ondes) cloisonné → *guide 18.* R диафрагмированный волновод. D Septum-Hohlleiter. E guía de ondas coaxial tabicada. I guida d'onda tramezzata. N schotgolfgeleider. P falowód kanalikowy. S septumvågledare. (726)
14. **slotted waveguide** (antenna) : an antenna formed by one or more slots in the walls of a waveguide. ★ guide à fente(s) → *guide 8.* R щелевая волноводная антенна. D Schlitzhohlleiterantenne; Schlitzhohlleiter. E guía de ondas ranurada (antena). I antenna a guida a fessura. N golfgeleidersleufantenne. P antena falowodowa szczelinowa. S vågledarslitsantenn. (712)
15. **surface waveguide** (*Syn.* surface-wave waveguide) : → *waveguide 16*
16. **surface-wave waveguide** (*Syn.* surface waveguide) : a waveguide in which the waves are constrained to follow a guiding surface, with the energy flow confined to the vicinity of that surface. ★ guide à onde de surface → *guide 9.* R волновод поверхностной волны; поверхностный волновод. D Oberflächenwellenleiter. E guía de onda de superficie. I guida a onde superficiali. N oppervlaktegolfgeleider. P falowód powierzchniowy. S ytvågledare. (726)
17. **tapered waveguide** : a waveguide whose transverse cross-section dimensions change progressively with distance along its longitudinal axis. ★ transition progressive

→ *transition 19.* R плавный волноводный переход. D stufenloser Hohlleiterübergang. E transición progresiva. I transizione progressiva (di guida d'onda). N tapse golfgeleider. P falowód zbieżny. S kilövergång; konövergång. (726)

18. **thin film optical waveguide** : an optical waveguide comprising a thin film which may be dielectric or semi-conductor, bounded by materials of lower refractive index. ★ guide d'ondes optique en couche mince → *guide 23.* R тонкопленочный волновод. D Dünnfilm Wellenleiter. E guía de ondas óptica de película delgada. I guida d'onda ottica a film sottile. N dunne-film-golfgeleider. P falowód optyczny cienkowarstwowy. S tunnfilmsvågledare. (731)
19. **uniform waveguide** : a waveguide in which the physical and electrical characteristics do not change with distance along the waveguide. ★ guide d'ondes uniforme → *guide 25.* R однородный волновод. D homogener Wellenleiter. E guía de ondas uniforme. I guida d'onda uniforme. N uniforme golfgeleider. P falowód jednorodny. S homogen vågledare. (726)
20. **waveguide** : a transmission line consisting of a system of material boundaries or structures for guiding electromagnetic waves. *Note.* — The most common form of waveguide is a metallic tube; other forms are dielectric rod, or a mixed structure of conducting and dielectric materials. ★ guide d'ondes → *guide 13.* R волновод. D Wellenleiter (Hohlleiter). E guía de ondas. I guida d'onda. N golfgeleider. P falowód. S vågledare. (704,726)
21. **waveguide** (of a microwave heating equipment) : a system to transmit hyperfrequency electromagnetic energy from the emitter to the applicator. ★ guide d'onde → *guide 12.* R волновод (сверхвысокочастотного нагревательного оборудования). D Wellenleiter (für Mikrowellenerwärmung). E guía de ondas (de una instalación de calentamiento por microondas). I guida d'onda (di un'installazione di riscaldamento a microonde). N golfgeleider. P falowód (urządzenia elektrotermicznego mikrofalowego). S vågledare. (841)
22. **waveguide below cut-off** : a waveguide used below the waveguide cut-off frequency. ★ guide (en régime) évanescent → *guide 30.* R запредельный волновод. D Wellenleiter im Sperrbetrieb. E guíaonda en modo evanescente. I guida in regime evanescente. N golfgeleider beneden afsnijfrequentie. P falowód nadkrytyczny. S vågledare under gränsfrekvens. (726)
23. **waveguide bend** : → *bend 5*
24. **waveguide cavity** : → *cavity 11*
25. **waveguide corner** : → *corner 9*
26. **(waveguide) cut-off frequency** : → *frequency 195*
27. **waveguide dispersion** : → *dispersion 11*
28. **waveguide filter** : → *filter 42*
29. **waveguide flange** : → *flange 18*
30. **waveguide gasket** : → *gasket 5*
31. **waveguide mode** : → *mode 98*
32. **waveguide post** : → *post 13*
33. **waveguide shim** : → *shim 3*
34. **waveguide switch** : → *switch 63*
35. **waveguide tuner** : → *tuner 7*
36. **waveguide twist** : → *twist 3*
37. **waveguide wavelength** : → *wavelength 14*
38. **waveguide window** : → *window 3*

wavelength

1. **antenna wavelength** : twice the distance between two adjacent current nodes on an antenna or a radiating element which may be considered to be a single wire on which a standing wave exists. ★ longueur d'onde sur l'antenne → *longueur d'onde 17.* R длина волны антенны. D Antennenwellenlänge. E longitud de onda de antena. I lunghezza d'onda sull'antenna. N antennegolflengte. P długość fali anteny. S antennvåglängd. (712)
2. **complementary wavelength** (of a colour stimulus) (λ_c) : wavelength of the monochromatic stimulus that, when additively mixed in suitable proportions with the colour stimulus considered, matches the specified achromatic stimulus. ★ longueur d'onde complémentaire → *longueur d'onde 5.* R дополнительная длина волны (цветовых стимулов). D kompensative Wellenlänge (eines Farbreizes). E longitud de onda complementaria. I lunghezza d'onda complementare. N complementaire golflengte. P długość fali dopełniającej. S komplementvåglängd. (845)
3. **critical wavelength** (of a mode in a waveguide) (*Syn.* mode cut-off wavelength) : that free space wavelength corresponding to the critical frequency for a mode in a waveguide. ★ longueur d'onde critique → *longueur d'onde 6.* R критическая длина волны (типа колебаний в волноводе); предельная длина волны типа колебаний. D Grenzwellenlänge (eines Modes im Wellenleiter). E longitud de onda de corte (de un modo en una guíaonda). I lunghezza d'onda critica (di un modo in una guida d'onda); lunghezza d'onda di taglio di modo. N kritische golflengte. P długość fali krytyczna (rodzaju pola w falowodzie). S gränsvåglängd för vågledarmod. (726)
4. **cut-off wavelength** (of a mode) : that wavelength in vacuum above which a given bound mode cannot exist in a waveguide. ★ longueur d'onde de coupure → *longueur d'onde 8.* R критическая длина волны (моды). D Grenzwellenlänge (einer Mode). E longitud de onda de corte (de un modo). I lunghezza d'onda di taglio (di un modo). N afsnijgolflengte (van een modus). P długość fali odcięcia (modu). S gränsvåglängd för mod. (731)
5. **cut-off wavelength** (of a singlemode optical fibre) : in a singlemode fibre, it is that wavelength in vacuum greater than which the second order LP_{11} mode ceases to propagate. *Note.* — The measured value in general depends upon the measurement conditions and in particular the sample length. ★ longueur d'onde de coupure → *longueur d'onde 9.* R критическая длина волны (одномодового оптического волокна). D Grenzwellenlänge (einer Einmodenfaser). E longitud de onda de corte (de una fibra monomodo). I lunghezza d'onda di taglio (di una fiba ottica a singolo modo). N afsnijgolflengte (van een optisch vezel). P długość fali odcięcia (światłowodu). S fibergränsvåglängd. (731)
6. **dominant wavelength** (of a colour stimulus) (λ_d) : wavelength of the monochromatic stimulus that, when additively mixed in suitable proportions with the specified achromatic stimulus, matches the colour stimulus considered. *Note.* — In the case of purple stimuli, the dominant wavelength is replaced by the complementary wavelength. ★ longueur d'onde dominante → *longueur d'onde 12.* R доминирующая длина волны (цветовых стимулов). D bunttongleiche Wellenlänge (eines Farbreizes). E longitud de onda dominante. I lunghezza d'onda dominante. N dominante golflengte. P długość fali dominującej. S dominerande våglängd. (845)
7. **effective wavelength** (*Syn.* equivalent wavelength) : → *wavelength 8*
8. **equivalent wavelength** (*Syn.* effective wavelength) : the wavelength of monoenergetic X-rays which, in some specified respect, have the same property as the heterogeneous beam under consideration. *Note.* — It may be defined with respect to half-value layer or other wavelength-dependent quantities. ★ longueur d'onde équivalente → *longueur d'onde 15.* R эквивалентная длина волны; эффективная длина волны. D äquivalente Wellenlänge. E longitud de onda equivalente; longitud de onda eficaz. I lunghezza d'onda equivalente; lunghezza d'onda efficace. N equivalente golflengte; effectieve golflengte. P równoważna długość fali; efektywna długość fali. S ekvivalent våglängd. (881)
9. **group wavelength** : the magnitude of the group velocity vector of an electromagnetic wave divided by the frequency of the wave. ★ longueur d'onde de groupe → *longueur d'onde 11.* D Gruppenwellenlänge. P długość fali grupowa. (705)
10. **minimum wavelength** : the shortest wavelength in a continuous X-ray spectrum. *Note.* — The minimum wavelength in nm for an applied peak accelerating potential U in kV is 1.2398/U approximately. ★ longueur d'onde minimale → *longueur d'onde 16.* R минимальная длина волны. D minimale Wellenlänge; (Grenzwellenlänge). E longitud de onda mínima. I lunghezza d'onda minima. N minimum golflengte. P minimalna długość fali. S minimivåglängd. (881)
11. **mode cut-off wavelength** (*Syn.* critical wavelength) : → *wavelength 3*
12. **peak intensity wavelength** : the wavelength at which the spectral radiant intensity of a source in a given direction is maximum. ★ longueur d'onde du maximum d'intensité de rayonnement → *longueur d'onde 13.* R длина волны пиковой интенсивности. D Zentralwellenlänge. E longitud de onda de un máximo de intensidad. I lunghezza d'onda

dell'intensità di picco. N golflengte bij maximale intensiteit. P prążek największej mocy. S toppeffektvåglängd. (731)

13. **threshold wavelength** : the wavelength of the incident radiant energy above which there is essentially no photoelectric effect. ★ seuil de longueur d'onde → *seuil 19.* R пороговая длина волны. D Grenzwellenlänge. E umbral de longitud de onda. I soglia di lunghezza d'onda. N drempelgolflengte. P próg falowy. S tröskelvåglängd. (531)
14. **waveguide wavelength** : for a travelling wave in a uniform waveguide at a given frequency and for a given mode, the distance along the longitudinal axis between adjacent points at which a field component differs in phase by 2π radians. ★ longueur d'onde dans un guide → *longueur d'onde 7.* R длина волны в волноводе. D Wellenlänge im Wellenleiter. E longitud de onda en una guiaonda. I lunghezza d'onda in una guida. N golflengte in een golfgeleider. P długość fali w falowodzie. S vågledarvåglängd. (726)
15. **wavelength** (in a given direction) (λ) : the ratio of the magnitude of the phase velocity of a sinusoidal wave to the frequency of the wave. *Note.* — The wavelength has its minimum value in the direction of propagation ; if no direction is specified, the wavelength is that in the direction of propagation. ★ longueur d'onde → *longueur d'onde 3.* R длина волны (в данном направлении). D Wellenlänge (in einer gegebenen Richtung). E longitud de onda (en una dirección dada). I lunghezza d'onda (in una data direzione). N golflengte (in een richting). P długość fali (w danym kierunku). S våglängd. (702,705)
16. **wavelength** (λ) : distance in the direction of propagation of a periode wave between two successive points at which the phase is the same. Unit : m *Notes. 1* — The wavelength in a medium is equal to the wavelength *in vacuo* divided by the refractive index of the medium. Unless otherwise stated, values of wavelength are generally those in air. The refractive index of standard air (for spectroscopy : t = 15°C, p = 101 325 Pa) lies between 1.000 27 and 1.000 29 for visible radiations. *2* — $\lambda = v/\nu$, where λ is the wavelength in a medium, v is the phase velocity in that medium, and ν the frequency. ★ longueur d'onde → *longueur d'onde 4.* R длина волны. D Wellenlänge. E longitud de onda. I lunghezza d'onda. N golflengte. P długość fali. S våglängd. (101,845)
17. **wavelength division multiplexing** : → *multiplexing 8*
18. **wavelength division multiplexing** : → *multiplexing 9*
19. **wavelength reduction factor** : → *factor 188*
20. **wavelength shifter** : → *shifter 1*

wavemeter

1. **absorption wavemeter** (*Syn.* absorption frequency meter) : → *meter 1*
2. **cavity wavemeter** (*Syn.* cavity frequency meter) : → *meter 15*
3. **transmission wavemeter** (*Syn.* transmission frequency meter) : → *meter 67*

wax

1. **paraffin wax** : a solid material, consisting essentially of saturated hydrocarbons, which separates spontaneously during cooling of a mineral insulating oil. ★ cire paraffinique → *cire 2.* R парафин. D Paraffin. E cera parafínica. I cere paraffiniche. N vaste paraffine. P wosk parafinowy. S paraffinvax. (212)
2. **wax** : a disk of wax on which an original mechanical recording may be inscribed. ★ cire → *cire 1.* R воск. D Aufnahmewachs. E disco de cera. I cera. N wasplaat. P płyta woskowa surowa. S vaxskiva. (806)
3. **X-wax** : a solid material which separates from a mineral insulating oil as a result of electrical discharges and which consists of polymerized fragments of the molecules of the original liquid. *Note.* — Comparable products may be formed from other liquids under similar conditions. ★ cire X → *cire 3.* R X - воск. D X-Wachs. E cera X. I cera X. N X-was. P wosk X. S X-vax. (212)

Wb

1. **weber, Wb** : → *weber 1*

WDM

1. **WDM** (*Syn.* wavelength division multiplexing) : → *multiplexing 8*
2. **WDM** (*Syn.* wavelength division multiplexing) : → *multiplexing 9*

weak

1. **weak field** : → *field 61*

weakening

1. **field (weakening by) tapping** : → *tapping 2*
2. **(field) weakening ratio** : → *ratio 38*

weakly

1. **weakly guiding fibre** : → *fibre 30*

weakness

1. **weakness failure** : → *failure 53*
2. **weakness fault** : → *fault 85*

wearing

1. **wearing strips** (*Syn.* contact strips) : → *strip 1*

wearout

1. **wearout failure** (*Syn.* ageing failure) : → *failure 1*
2. **wear-out failure period** : → *period 36*
3. **wearout fault** (*Syn.* ageing fault) : → *fault 1*

weatherproof

1. **weatherproof** : applied to a machine suitable for operation under specified weather conditions. ★ machine protégée contre les intempéries → *machine 65.* R машина, защищенная от атмосферных воздействий. D wettergeschützte Maschine. E máquina protegida contra la intemperie. I macchina protetta contro le intemperie. N voor buitenopstelling. P maszyna odporna na wpływy atmosferyczne. S utomhusutförande. (411)

weber

1. **weber, Wb** (Wb) : SI unit of magnetic flux. ★ weber, Wb → *weber 1.* (100)

wedge

1. **neutral step wedge** : non-selective filter the transmittance of which changes by steps along a straight or curved path on its surface. ★ filtre neutre à transmission échelonnée → *filtre 32.* R нейтральный ступенчатый клин. D Graustufenfilter. E cuña neutra escalonada. I filtro grigio a gradini. N neutrale stapverzwakker. P klin nieselektywny stopniowy. S neutral stegfilterkil. (845)
2. **neutral wedge** : non-selective filter the transmittance of which changes continuously along a straight or curved path on its surface. ★ coin photométrique → *coin 1.* R нейтральный клин. D Graukeil. E cuña neutra. I filtro grigio a cuneo. N neutrale wig. P klin nieselektywny. S neutralfilterkil. (845)
3. **slot wedge** : a strip of material inserted in the slot space above the winding and which, by its keying or locking action, restrains the winding against movement due to centrifugal or electromagnetic action. ★ cale d'encoche → *cale 1.* R пазовый клин. D Nutenkeil. E calzo de ranura; cuña de ranura. I bietta di cava. N groefspie; gleufspie. P klin żłobkowy. S spårkil. (411)
4. **tone wedge** : an optical step wedge containing a number of steps of optical density between black and white. ★ échelle des teintes → *échelle 13.* R полутоновый диапазон; полутоновая гамма; оптический клин. D Tonwertstufenleiter. E escala de tonos. I scala delle tonalità. N zwartingswig. P zakres cieniowania. S gråtonsskala. (721)
5. **wedge filter** : → *filter 43*

weekly

1. **annual, quarterly, monthly, weekly daily, maximum demand** : → *demand 1*

weight

1. **adhesive weight** : the total vertical force exerted on the rails by the driving and coupled axles of a stationary vehicle in working order. ★ poids adhérent → *poids 1.* R сцепной вес. D Adhaesionsgewicht; Fahrzeugreibungsgewicht. E peso adherente. I peso aderente; massa aderente. N adhesiegewicht. P masa przyczepna statyczna. S adhesionsvikt. (811)
2. **balance weight tensioner** : → *tensioner 2*
3. **maximum concentrated weight per metre** : the highest number obtained by dividing each axle load of a vehicle in

working order by the horizontal distance between centres of each axle in question and the nearest axle. ★ charge concentrée maximale par mètre → *charge 38.* R максимальный сосредоточенный вес на погонный метр. D Höchstgewicht je Meter Fahrzeuglänge. E peso máximo concentrado por metro. I carico lineico concentrato massimo; massa lineica concentrata massima. N maximale tonmetergewicht. P masa skupiona maksymalna na metr. S maximal axellast per meter. (811)

4. **suspension set weight** (*Syn.* counterweight (to a suspension insulator set)) : a mass attached to a suspension clamp to provide an increase in the vertical load applied to the clamp. *Note.* — The effect of the counterweight is to reduce the angle of swing of the suspension insulator set under the influence of wind or in the case of flying angle supports. It also prevents radio-interference caused by bad contacts between metallic parts. ★ contrepoids (de chaîne) → *contrepoids 3.* R балласт. D Belastungsgewicht (an einer Tragkette). E contrapeso (de cadena). I contrappeso (di catena). N ballastgewicht. P obciążnik. S tillsatsvikt. (466)
5. **weight per metre run between outer axles** : the weight of a vehicle in working order divided by the horizontal distance between centres of outer axles. ★ charge par mètre courant entre essieux extrêmes → *charge 76.* R вес на погонный метр по крайним осям. D Gewicht je Meter Fahrzeuglänge zwischen den Endradsätzen (Achsen). E peso por metro lineal entre ejes extremos. I carico lineico (riferito alla distanza fra gli assi estremi); massa lineica (riferita alla distanza fra gli assi estremi). N gewicht per meter tussen de eindassen. P masa na metr odległości osi skrajnych. S vikt per meter mellan ytteraxlar. (811)
6. **weight per metre run over buffers** : the weight of a vehicle in working order divided by its total length over buffers. ★ charge par mètre courant hors tampons → *charge 77.* R вес на погонный метр по буферам. D Gewicht je Meter Fahrzeuglänge (über Puffer). E peso por metro lineal entre topes. I carico lineico (riferito alla lunghezza totale); massa lineica (riferita alla lunghezza totale). N gewicht per meter over de buffers; minimum gewicht. P masa na metr długości ze zderzakami. S vikt per meter mellan buffertar. (811)
7. **weight span** : → *span 16*
8. **weight transfer** : → *transfer 49*
9. **weight transfer compensation device** : → *device 60*

weighted

1. **(load weighted) equivalent interruption duration** : → *duration 23*
2. **psophometrically weighted noise** : → *noise 60*
3. **weighted noise** : → *noise 92*
4. **weighted sound pressure level** : → *level 103*

weighting

1. **weighting function** (*Syn.* unit pulse response) : → *response 26*

Weiss

1. **(Weiss) domain** : → *domain 3*

weld

1. **weld cycle time** : → *time 227*

welded

1. **welded bond** : → *bond 4*
2. **welded connection** : → *connection 61*

welding

1. **arc stud welding gun** : → *gun 1*
2. **arc welding** : fusion welding in which the heat for welding is obtained from an electric arc or arcs. ★ soudage à l'arc → *soudage 27.* R дуговая сварка. D Lichtbogenschweißen. E soldadura por arco. I saldatura ad arco. N booglassen. P spawanie łukowe. S bågsvetsning. (851)
3. **arc welding electrode** : → *electrode 11*
4. **consumable arc welding electrode** : → *electrode 15*
5. **coupling device (in welding)** : → *device 15*
6. **diversity factor (for welding)** : → *factor 57*
7. **drooping characteristic (of an arc welding power source)** : → *characteristic 34*
8. **dynamic characteristic (of an arc welding power source)** : → *characteristic 36*
9. **electrode (for welding)** : → *electrode 41*
10. **flat characteristic (of an arc welding power source)** : → *characteristic 40*
11. **fusion welding** : welding involving localized melting without the application of pressure. ★ soudage par fusion → *soudage 28.* R сварка плавлением. D Schmelzschweißen. E soldadura por fusión. I saldatura per fusione. N smeltlassen. P spawanie. S smältsvetsning. (851)
12. **load voltage (of a welding power source)** : → *voltage 101*
13. **maximum short-circuit currents in welding** : → *short-circuit current 6*
14. **maximum welding power** : → *power 84*
15. **no-load voltage (in arc welding and cutting)** : → *voltage 124*
16. **non-consumable arc welding electrode** : → *electrode 73*
17. **resistance welding** : welding in which heat is produced by an electric current flowing through the resistance at the faces to be welded together, and in which the faces are simultaneously subjected to pressure. ★ soudage par résistance → *soudage 29.* R контактная сварка. D Widerstandsschweißen. E soldadura por resistencia. I saldatura a resistenza. N weerstandlassen. P zgrzewanie oporowe; zgrzewanie rezystancyjne. S motståndssvetsning. (851)
18. **resistance welding electrode** : → *electrode 79*
19. **static characteristic (of an arc welding power source)** : → *characteristic 87*
20. **welding** : an operation by which two or more parts of an assembly are united by means of heat or pressure or both in such a way that there is continuity of the nature of the materials to be joined (e.g. metals or plastics, etc.), either with or without a filler material having a melting temperature that is of the same order as that of the parent material. *Note.* — In French the term "soudage" is applied wrongly in the case in which a filler material is used where the temperature of fusion is lower than that of the parent materials. ★ soudage → *soudage 26.* R сварка. D Schweißen. E soldadura. I saldatura. N lassen. P spajanie. S svetsning. (851)
21. **welding cables** : → *cable 73*
22. **welding circuit** : → *circuit 194*
23. **welding current regulator** : → *regulator 6*
24. **welding current return clamp** : → *clamp 19*
25. **welding electrode** : → *electrode 96*
26. **welding equipment** : → *equipment 85*
27. **welding installation** : → *installation 17*
28. **welding output connections** : → *connection 62*
29. **welding plant** (*Syn.* welding equipment) : → *equipment 85*
30. **welding power source** : → *source 48*
31. **welding return cable** : → *cable 74*
32. **welding supply cable** : → *cable 75*

well-type

1. **well-type ionization chamber** : → *ionization chamber 23*

Westcott

1. **Westcott cross-section** (*Syn.* effective thermal cross-section) : → *cross-section 11*

wet

1. **dielectric wet test** : → *test 23*
2. **wet cooling tower** : → *tower 8*

wettability

1. **wettability** : the ability of a solid material surface to adsorb a liquid, not necessarily water. A measure of the wettability is the contact angle between the solid surface and the liquid surface of a drop of the liquid on the solid. ★ mouillabilité → *mouillabilité 1.* R смачиваемость. D Benetzbarkeit. E mojabilidad. I bagnabilità. N bevochtigingsgraad. P zwilżalność. S vätbarhet. (212)

wetted

1. **wetted contact** : → *contact 118*

Wh

1. **watthour, Wh** : → *watthour 2*

Wheatstone

1. **Wheatstone automatic system** : → *system 250*
2. **Wheatstone bridge** : → *bridge 23*

wheel

1. **head wheel** : the rotary cylindrical part of a video head assembly carrying on its periphery the magnetic head(s) used for video signal recording and reproduction. ★ disque porte-têtes → *disque 14.* R диск головок. D Videokopfrad; Head Drum. E tambor de cabeza. I tamburo porta testine. N koppenwiel. P dysk; krążek. S huvudtrumma. (806)
2. **output at the wheel rim** : → *output 35*
3. **tractive effort (at the wheel rim)** : → *effort 1*
4. **wheel slide protection device** : → *device 61*

whip

1. **whip antenna** : → *antenna 121*

whirling

1. **critical whirling speeds** : → *speed 12*

whistling

1. **whistling** (*Syn.* birdies) : → *birdies 1*

white

1. **black and white facsimile** (*Syn.* document facsimile) : → *facsimile 2*
2. **black and white television** : → *television 1*
3. **nominal white** : the value, such as level or frequency, of the signal corresponding to the brightest white that can be transmitted by a particular facsimile transmitter. ★ blanc nominal → *blanc 4.* R номинальный уровень белого. D Nominal-Weiß. E blanco nominal. I bianco nominale. N nominaal wit. P biel odniesienia. S nominellt vitt. (721)
4. **phasing on white** : phasing ensured by a phasing signal corresponding to nominal white in which a short interruption corresponding to nominal black is transmitted during the lost time. ★ mise en phase sur blanc → *mise 11.* R фазирование по белому. D Einphasen auf Weiß. E puesta en fase sobre blanco. I messa in fase su bianco. N ..... P fazowanie bieli. S fasning på vitt. (721)
5. **picture white** : the value, such as level or frequency, of the signal corresponding to the brightest part of the document to be transmitted by facsimile. ★ blanc de l'image → *blanc 1.* R уровень белого в изображении. D Bildweiß. E blanco de imagen. I bianco d'immagine. N beeldwit. P biel obrazu. S bildvitt. (721)
6. **reference white** : a stimulus of specified colour obtained by matrixing primary colours which gives the impression of white in a given lighting environment. *Note.* — Reference white is used in colour television for the alignment of equipment. ★ blanc de référence → *blanc 2.* R опорный белый цвет. (723)
7. **white crushing** : → *crushing 2*
8. **white level** : → *level 104*
9. **white noise** : → *noise 93*
10. **white zone** : → *zone 17*

whithstand

1. **short-time whithstand current** : → *current 185*

whole-body

1. **whole-body gamma spectrum analyzer** : → *analyzer 10*
2. **whole-body irradiation** : → *irradiation 10*
3. **whole-body radiation meter** : → *meter 78*

wick

1. **wick lubricated bearing** : → *bearing 37*

wide

1. **wide angle luminaire** : → *luminaire 25*

wide-band

1. **wide-band amplifier** : → *amplifier 30*
2. **wide-band antenna** (*Syn.* broadband antenna) : → *antenna 24*
3. **wideband channel** : → *channel 58*

width

1. **full width at half maximum** (*Syn.* FWHM (abbreviation)) : in a distribution curve comprising a single peak, the distance between the abscissa of two points on the curve whose ordinates are half of the ordinate of the peak. *Note.* — If the curve considered comprises several peaks, a full width at half maximum exists for each peak. ★ largeur à mi-hauteur → *largeur 4.* R ширина на половине высоты. D Halbwertsbreite. E anchura de altura media; AAM. I larghezza all'emivalore. N piekbreedte op halve hoogte. P szerokość połówkowa szczytu. S halvvärdesbredd. (391)
2. **full width half maximum** : → *maximum 5*
3. **gap width** : → *gap 13*
4. **groove width** : → *groove 15*
5. **light band width** (*Syn.* Buchmann and Meyer pattern) : → *pattern 1*
6. **pulse width** (*Syn.* pulse duration) : → *duration 30*
7. **spectral width** : a measure of the wavelength extent of a spectrum or spectral characteristic. ★ largeur spectrale → *largeur 21.* R спектральная ширина. D Spektralbreite. E ancho espectral. I larghezza spettrale. N spectrale breedte. P szerokość widma; szerokość spektralna. S spektralbredd. (731)
8. **virtual contact width** : → *contact 117*
9. **width of flameproof joint** (*Syn.* length of flameproof joint) : → *length 20*

Wien

1. **Wien's law (of radiation)** : → *law 15*

Wigner

1. **Wigner effect** : → *effect 88*

wild

1. **wild phase** : → *phase 110*

Wilson

1. **Wilson cloud chamber** : → *chamber 17*
2. **Wilson cloud chamber** : → *chamber 18*

wind

1. **wind load** : → *load 95*
2. **wind power station** : → *power station 24*
3. **wind span** : → *span 17*

winding

1. **amortisseur winding** (*Syn.* damping winding) : → *winding 19*
2. **armature winding** (UK) : a winding on the armature of a machine. ★ ..... → . R обмотка якоря (англия). D Ankerwicklung einer Kommutatormaschine. E ..... I avvolgimento di indotto. N commutatorwikkeling; ankerwikkeling. P uzwojenie twornika maszyny komutatorowej. S ankarlindning. (411)
3. **armature winding** : a winding on the armature of a machine. *Note.* — When applied to a rotating machine the UK term "armature" has a narrower meaning than the French "induit". ★ enroulement d'induit → *enroulement 45.* R обмотка якоря. D Ankerwicklung. E arrollamiento de inducido; devanado de inducido. I avvolgimento indotto. N ankerwikkeling. P uzwojenie twornika. S armaturlindning. (411,811)
4. **auxiliary starting winding** : a winding of a single-phase induction machine carried by the same core as the main winding and which in conjunction with the main winding is provided for starting purposes. *Note.* — This winding may be used for starting a synchronous motor. ★ enroulement auxiliaire de démarrage → *enroulement auxiliaire 3.* R вспомогательная пусковая обмотка. D Anlauf-Hilfswicklung. E devanado auxiliar de arranque. I avvolgimento ausiliario di avviamento. N aanloophulpwikkeling. P uzwojenie rozruchowe (silnika jednofazowego). S starthjälplindning. (411)
5. **auxiliary winding** : a winding intended only for a small load compared with the rated power of the transformer. ★ enroulement auxiliaire → *enroulement auxiliaire 1.* R вспомогательная обмотка. D Hilfswicklung.

E arrollamiento auxiliar. I avvolgimento ausiliario. N hulpwikkeling. P uzwojenie pomocnicze. S hjälplindning. (421)

6. **auxiliary winding** (of an electric traction transformer) : a winding or part of a transformer winding which supplies the auxiliary circuits. ★ enroulement auxiliaire → *enroulement auxiliaire 2.* R вспомогательная обмотка (электрического тягового трансформатора). D Hilfswicklung. E arrollamiento auxiliar. I avvolgimento ausiliario. N boordnetwikkeling (van een elektrische tractietransformator). P uzwojenie pomocnicze. S hjälpkraftlindning. (811)

7. **bias winding** : an excitation winding carrying a current used for displacing the mean operating point on the static characteristic. ★ enroulement de polarisation → *enroulement 37.* R обмотка смещения. D Vorstromwicklung. E devanado de polarización. I avvolgimento di polarizzazione. N voormagnetiseringswikkeling. P uzwojenie polaryzacyjne; uzwojenie nastawcze. S förmagnetiseringslindning. (431)

8. **bifilar winding** : a winding consisting of two contiguous insulated conductors. *Note.* — If the two conductors are connected to carry the same current in opposite directions, the inductance of such a winding is generally negligible. ★ enroulement bifilaire → *enroulement 24.* R бифилярная обмотка. D bifilare Wicklung. E devanado bifilar. I avvolgimento bifilare. N bifilaire wikkeling. P uzwojenie bifilarne. S bifilär lindning. (151)

9. **cage winding** (UK) (*Syn.* squirrel cage winding (USA)) : a winding consisting of a number of conducting bars having their extremities connected by metal rings or plates at each end. ★ (enroulement à) cage (d'écureuil) → *cage 4.* R короткозамкнутая обмотка типа (беличьей) клетки. D Käfigwicklung. E devanado en jaula. I avvolgimento a gabbia. N kooi(wikkeling). P uzwojenie klatkowe. S burlindning. (411)

10. **common winding** : the common part of the windings of an auto-transformer. ★ enroulement commun → *enroulement 25.* R общая обмотка (автотрансформатора). D Parallelwicklung. E arrollamiento común. I avvolgimento comune. N gemeenschappelijke wikkeling. P uzwojenie wspólne. S gemensam lindning. (421)

11. **commutating winding** : an excitation winding, which in a machine having a commutator carries the load current, or a current proportional thereto, and is so disposed as to assist the reversal of current in the coils undergoing commutation. ★ enroulement de commutation → *enroulement 32.* R коммутационная обмотка. D Wendepolwicklung. E devanado de conmutación. I avvolgimento di commutazione. N commutatiewikkeling; hulppoolwikkeling. P uzwojenie komutacyjne. S kommuteringslindning. (411,811)

12. **compensating winding** : a winding that carries the load current, or a current proportional thereto, and is so disposed as to oppose distortion of the magnetic field by the load current circulating in other windings. *Note.* — In d.c. and generally salient-pole machines with an armature, this winding is distributed in slots in the pole shoes. ★ enroulement de compensation → *enroulement 33.* R компенсационная обмотка. D Kompensationswicklung. E devanado de compensación. I avvolgimento di compensazione. N compensatiewikkeling. P uzwojenie kompensacyjne. S kompensationslindning. (411,811)

13. **concentrated winding** : a winding of a field system with salient poles or a winding the coil sides of which occupy one slot per pole. ★ enroulement concentré → *enroulement 26.* R сосредоточенная обмотка. D konzentrierte Wicklung. E devanado concentrado. I avvolgimento concentrato. N geconcentreerde wikkeling. P uzwojenie skupione. S koncentrerad lindning. (411)

14. **concentric winding** : a distributed winding in which the individual coils of each phase group per pole are concentric and have different coil spans. *Note.* — An excitation winding may be considered as a single-phase winding for this purpose. ★ enroulement à bobines concentriques → *enroulement 7.* R концентрическая обмотка. D Wicklungen mit konzentrischen Spulen. E devanado de bobinas concéntricas. I avvolgimento concentrico. N wikkeling met concentrische spoelen. P uzwojenie koncentryczne. S koncentrisk lindning. (411)

15. **concentric windings** : an arrangement where the windings or parts of windings are arranged concentrically. ★ enroulements concentriques → *enroulement 79.* R концентрические обмотки. D konzentrische Wicklungsanordnung. E arrollamientos concentrados. I avvolgimenti concentrici. N concentrische wikkelingen. P uzwojenia współśrodkowe; uzwojenia współosiowe. S koncentriska lindningar. (421,811)

16. **control winding** : an excitation winding which carries an adjustable current controlling the performance of a machine. ★ enroulement de commande → *enroulement 30.* R обмотка управления. D Steuerwicklung. E devanado de control. I avvolgimento di regolazione. N stuurwikkeling. P uzwojenie sterujące. S styrlindning. (411)

17. **control winding** : an excitation winding by means of which the output power is controlled from an external source. ★ enroulement de commande → *enroulement 31.* R обмотка управления. D Steuerwicklung. E devanado de control. I avvolgimento di comando. N stuurwikkeling. P uzwojenie sterownicze. S styrlindning. (431)

18. **damper winding** (*Syn.* damping winding) : → *winding 19*

19. **damping winding** (UK) (*Syn.* damper winding (USA); amortisseur winding (USA)) : a winding which is usually short-circuited and in the form of a cage, or can be short-circuited, the purpose of which is to suppress rapid changes in the flux linking it. ★ (enroulement) amortisseur → *amortisseur 3.* R успокоительная обмотка; демпферная обмотка. D Dämpferwicklung. E (devanado) amortiguador. I avvolgimento smorzatore. N dempwikkeling; demper. P uzwojenie tłumiące. S dämplindning. (411)

20. **diamond winding** : a distributed winding in which the individual coils have the same shape and coil span. ★ enroulement à bobines égales → *enroulement 8.* R равносекционная обмотка. D Wicklung mit gleichen Spulen. E devanado de bobinas iguales. I avvolgimento a diamante (a losanga). N wikkeling met gelijke spoelen. P uzwojenie o jednakowych zezwojach. S övergångslindning. (411)

21. **distributed winding** : a winding the coils of which occupy several slots per pole. ★ enroulement réparti → *enroulement 67.* R распределенная обмотка. D verteilte Wicklung. E devanado distribuido. I avvolgimento distribuito. N verdeelde wikkeling. P uzwojenie rozłożone. S utbredd lindning. (411)

22. **duplex lap winding** : a lap winding in which the number of parallel circuits is equal to twice the number of poles. ★ enroulement imbriqué parallèle double → *enroulement 53.* R двойная петлевая обмотка. D zweifache Schleifenwicklung. E devanado imbricado doble paralelo. I avvolgimento embricato in doppio parallelo. N tweevoudige luswikkeling. P uzwojenie pętlicowe dwukrotne. S dubbel parallellindning. (411)

23. **duplex wave winding** : a wave winding in which the number of parallel circuits is four, whatever the number of poles. ★ enroulement ondulé série parallèle d'ordre deux → *enroulement 59.* R двойная волновая обмотка. D zweifache Wellenwicklung. E devanado ondulado serie paralelo de orden dos. I avvolgimento ondulato doppio. N tweevoudige golfwikkeling. P uzwojenie faliste dwukrotne. S dubbel serielindning. (411)

24. **energizing winding** : the winding of a booster transformer which is intended to supply power to the series winding. ★ enroulement d'excitation → *enroulement 43.* R обмотка возбуждения. D Erregerwicklung. E arrollamiento de excitación. I avvolgimento di alimentazione. N bekrachtigingswikkeling. P uzwojenie wzbudzające. S magnetiseringslindning. (421)

25. **excitation winding** : a winding for the production of a magnetic field. *Note.* — For a salient pole machine, it consists of several field coils with their interconnections. For a non-salient pole machine, it consists of several interconnected coils constituting a distributed winding. ★ enroulement d'excitation → *enroulement 42.* R обмотка возбуждения. D Erregerwicklung. E devanado de excitación. I avvolgimento di eccitazione. N veldwikkeling; bekrachtigingswikkeling. P uzwojenie wzbudzające. S magnetlindning. (411)

26. **excitation winding** : a winding of a transductor element by means of which excitation is obtained. ★ enroulement d'excitation → *enroulement 44.* R обмотка подмагничивания. D Erregerwicklung. E devanado de excitación. I avvolgimento di eccitazione. N bekrachtigingswikkeling. P uzwojenie wzbudzeniowe. S magnetiseringslindning. (431)

27. **fed-in winding** : a winding in which the individual conductors of a coil side are fed into the slot through the slot opening. ★ enroulement à fils semés par l'entaille → *enroulement 13.* R обмотка, укладываемая в полузакрытые пазы. D Träufelwicklung. E devanado de hilos introducidos en la ranura. I avvolgimento a fili inseriti. N inlegwikkeling. P uzwojenie układane w półotwartych żłobkach. S plocklindning. (411)
28. **field winding** : an excitation winding usually carrying direct current, whose sole purpose is the production of the main magnetic field of the machine. ★ enroulement de champ → *enroulement 28.* R ..... D Feldwicklung. E devanado de campo. I avvolgimento di campo. N ..... P ..... S magnetlindning. (411,811)
29. **fractional slot winding** : a distributed winding in which neither the average number of slots per pole pair per phase nor the average number of slots per pole per phase are integers: e.g. 3 2/7 slots per pole per phase. ★ enroulement à nombre fractionnaire d'encoches par pôle et phase → *enroulement 16.* R обмотка с дробным числом пазов на полюс и фазу. D Bruchlochwicklung. E devanado de número fraccionario de ranuras por polo y fase. I avvolgimento a cave frazionarie. N breukgleufwikkeling; breukgroefwikkeling. P uzwojenie ułamkowożłobkowe. S delspårslindning. (411)
30. **frog leg winding** : a composite winding consisting of one lap winding and one wave winding, placed in the same slots and connected to the same commutator. ★ enroulement en pattes de grenouille → *enroulement 48.* R лягушачья обмотка. D Froschbeinwicklung. E devanado en pata de rana. I avvolgimento a zampa di rana. N kikkerpootwikkeling. P uzwojenie pętlicowo-faliste. S grodbenslindning. (411)
31. **full pitch winding** : a winding in which the winding pitch is 100 per cent. ★ enroulement à pas diamétral → *enroulement 18.* R обмотка с диаметральным шагом. D Durchmesserwicklung. E devanado de paso diametral. I avvolgimento a passo intero. N diameterwikkeling. P uzwojenie średnicowe. S lindning med fullt härvsteg. (411)
32. **high-voltage winding** : the winding having the highest rated voltage. ★ enroulement haute tension → *enroulement 51.* R обмотка высшего напряжения (трансформатора). D Oberspannungswicklung. E arrollamiento de alta tensión. I avvolgimento ad alta tensione. N hoogspanningswikkeling. P uzwojenie górnego napięcia. S uppspänningslindning. (421)
33. **integral slot winding** : a distributed winding in which the number of slots per pole per phase is an integer and is the same for all poles. ★ enroulement à nombre entier d'encoches par pôle et phase → *enroulement 15.* R обмотка с целым числом пазов на полюс и фазу. D Ganzlochwicklung. E devanado de número entero de ranuras por polo y fase. I avvolgimento a cave intere. N heelgleufwikkeling; heelgroefwikkeling. P uzwojenie całkowitożłobkowe. S helspårslindning. (411)
34. **intermediate-voltage winding** : a winding of a multi-winding transformer having a rated voltage intermediate between the highest and lowest winding rated voltages. ★ enroulement à tension intermédiaire → *enroulement 20.* R обмотка среднего напряжения (трансформатора). D Mittelspannungswicklung. E arrollamiento de tensión intermedia. I avvolgimento a tensione intermedia. N middenspanningswikkeling. P uzwojenie średniego napięcia. S mellanspänningslindning. (421)
35. **lap winding** : a usually multipole, distributed winding whose sequence of connections is such that it completes all its turns under one pair of main poles before proceeding to the next pair of main poles. ★ enroulement imbriqué → *enroulement 52.* R петлевая обмотка. D Schleifenwicklung. E devanado imbricado. I avvolgimento embricato. N luswikkeling. P uzwojenie pętlicowe. S slinglindning. (411)
36. **long pitch winding** : a winding in which the winding pitch is greater than 100 per cent. ★ enroulement à pas allongé → *enroulement 17.* R обмотка с удлиненным шагом. D Wicklung mit verlängertem Schritt (Sehnenwicklung). E devanado de paso alargado. I avvolgimento a passo allungato. N wikkeling met verlengde spoed. P uzwojenie cięciwowe wydłużone. S lindning med förlängt härvsteg. (411)
37. **low-voltage winding** : the winding having the lowest rated voltage. ★ enroulement basse tension → *enroulement 23.* R обмотка низшего напряжения (трансформатора). D Unterspannungswicklung. E arrollamiento de baja tensión. I avvolgimento a bassa tensione. N laagspanningswikkeling. P uzwojenie dolnego napięcia. S nedspänningslindning. (421)
38. **main winding** : the primary winding of a single-phase induction machine. ★ enroulement principal → *enroulement 66.* R ..... D ..... E devanado principal. I avvolgimento principale. N hoofdwikkeling. P uzwojenie główne. S huvudlindning. (411)
39. **multiplex lap winding** : a lap winding in which the number of parallel circuits is equal to a multiple of the number of poles. ★ enroulement imbriqué parallèle multiple → *enroulement 54.* R множественно-петлевая обмотка. D mehrfache Schleifenwicklung. E devanado imbricado paralelo múltiple. I avvolgimento embricato parallelo multiplo. N meervoudige luswikkeling. P uzwojenie pętlicowe wielokrotne. S flerdubbel parallellindning. (411)
40. **multiplex wave winding** : a wave winding in which the number of parallel circuits is equal to a multiple of two, whatever the number of poles. ★ enroulement ondulé série parallèle → *enroulement 58.* R множественно-волновая обмотка. D mehrfache Wellenwicklung. E devanado ondulado serie paralelo. I avvolgimento ondulato serie-parallelo. N meervoudige golfwikkeling. P uzwojenie faliste wielokrotne. S flerdubbel serielindning. (411)
41. **non-uniform insulation of a winding** : → *insulation 45*
42. **open windings** : phase windings of a polyphase transformer or reactor which are not interconnected within the transformer or the reactor. ★ enroulements de phase indépendants → *enroulement 80.* R независимые обмотки фазы. D offene Wicklungen. E arrollamientos de fase independientes. I avvolgimenti di fase indipendenti. N open wikkelingen. P uzwojenia otwarte. S öppna lindningar. (421)
43. **partly preformed winding** : a winding consisting of coils which are given their shape before being assembled in the machine, except for one end winding which is shaped, and the joints made to complete each coil after assembly. ★ enroulement partiellement préformé → *enroulement 60.* R частично шаблонная обмотка. D Wicklung mit Teilformspulen (Halbformspulen). E devanado parcialmente preformado. I avvolgimento parzialmente prefabbricato. N wikkeling met eenzijdig gevormde spoelen. P ..... S delvis förformad lindning. (411)
44. **phase winding** : the assembly of turns forming one phase of a polyphase winding. *Note.* — The term "phase winding" should not be used for identifying the assembly of coils on a specific leg. ★ enroulement de phase → *enroulement 36.* R обмотка фазы. D Wicklungsstrang. E arrollamiento de fase. I avvolgimento di fase. N fasewikkeling. P uzwojenie fazowe. S faslindning. (421)
45. **power winding** : a winding of a transductor element through which the load current flows. ★ enroulement de puissance → *enroulement 38.* R рабочая обмотка. D Arbeitswicklung. E devanado de potencia. I avvolgimento di potenza. N vermogenswikkeling. P uzwojenie mocowe. S huvudlindning; arbetslindning. (431)
46. **preformed winding** : a winding consisting of coils which are given their shape before being assembled in the machine. ★ enroulement sur gabarit → *enroulement 76.* R шаблонная обмотка. D Wicklung mit Formspulen. E devanado sobre horma; devanado preformado. I avvolgimento presagomato (o prefabbricato). N vormspoelwikkeling. P uzwojenie wzornikowe (szablonowe). S formlindning; förformad lindning. (411)
47. **primary winding** (of a current transformer) : the winding through which flows the current to be transformed. ★ enroulement primaire → *enroulement 62.* R первичная обмотка (трансформатора тока). D Primärwicklung (eines Stromwandlers). E arrollamiento primario (de un transformador de intensidad). I avvolgimento primario (di un trasformatore di corrente). N primaire wikkeling (van een stroomtransformator). P uzwojenie pierwotne (przekładnika prądowego). S primärlindning (hos strömtransformator). (321)
48. **primary winding** (of a voltage transformer) : the winding to which is applied the voltage to be transformed. ★ enroulement primaire → *enroulement 63.* R первичная обмотка (трансформатора напряжения). D Primärwicklung (eines Spannungswandlers). E arrollamiento primario (de un transformador de tensión). I avvolgimento primario (di un trasformatore di tensione). N primaire wikkeling (van een spanningstransformator). P uzwojenie

pierwotne (przekładnika napięciowego). S primärlindning (hos spänningstransformator). (321)

49. **primary winding** : the principal winding in the primary series circuit. ★ ..... → . R главная обмотка. D Hauptwicklung. E ..... I avvolgimento principale. N ..... P ..... S primärlindning. (411)

50. **primary winding** : a winding which, in service, receives active power from the supply network. *Note.* — In electric traction, when this power is supplied from the contact line it may be referred to as "high voltage winding". ★ enroulement primaire → *enroulement 65.* R первичная обмотка (трансформатора). D Primärwicklung. E arrollamiento primario. I avvolgimento primario. N primaire wikkeling. P uzwojenie pierwotne. S primärlindning. (421,811)

51. **pull-through winding** : a winding assembled by pulling the conductors axially through the slots. ★ enroulement à fils tirés → *enroulement 14.* R обмотка, укладываемая в протяжку. D Durchziehwicklung. E devanado cosido. I avvolgimento infilato. N trekwikkeling. P uzwojenie szyte. S sträcklindning. (411)

52. **push-through winding** : a winding in which the coil sides are pushed axially into the slots. ★ enroulement à bobines en U → *enroulement 9.* R обмотка с катушками Г5Eобразнойформы. D eingeschobene Wicklung (mit U-förmigen Spulen). E devanado de bobinas en U. I avvolgimento a bobine ad U. N insteekwikkeling. P uzwojenie z zezwojami o kształcie U. S sticklindning. (411)

53. **random winding** : a winding in which the individual conductors of a coil side occupy random positions in the slot. ★ enroulement à fils jetés → *enroulement 12.* R всыпная обмотка. D wild gewickelte Wicklung. E devanado de hilos colocados casualmente. I avvolgimento a fili alla rinfusa. N ongeordende wikkeling. P uzwojenie wsypywane. S ruslindning. (411)

54. **rated voltage of a winding** : → *voltage 169*

55. **regulating winding** : a special winding of a transformer, divided into several sections which may be switched in or out to vary the transformer terminal voltage. ★ enroulement de réglage → *enroulement 39.* R регулировочная обмотка. D Regelwicklung. E arrollamiento de regulación. I avvolgimento di regolazione. N regelwikkeling. P uzwojenie regulacyjne. S reglerlindning. (811)

56. **residual voltage winding** : the winding of a transformer between the terminals of which is produced the residual voltage or one of the three component voltages which when added together constitute the residual voltage. ★ enroulement de tension résiduelle → *enroulement 41.* R обмотка напряжения нулевой последовательности. D Wicklung für Erfassung der Verlagerungsspannung (Erdschlußerfassung). E arrollamiento de tensión residual. I avvolgimento per tensione residua. N homopolaire spanningswikkeling. P uzwojenie dodatkowe. S jordfelslindning. (321)

57. **rotor winding** : a winding on the rotor of a machine. ★ enroulement rotorique → *enroulement 68.* R обмотка ротора. D Läuferwicklung. E devanado rotórico. I avvolgimento di rotore. N rotorwikkeling. P uzwojenie wirnika. S rotorlindning. (411)

58. **sandwich windings** : an arrangement where the windings or parts of windings are arranged axially. *Note.* — Normally the windings would be subdivided. ★ enroulements alternés → *enroulement 78.* R чередующиеся обмотки. D Scheibenwicklungs-Anordnung. E arrollamientos alternados. I avvolgimenti alternati. N schijvenwikkelingen. P uzwojenia krążkowe. S blandlindningar. (421,811)

59. **secondary winding** (of a current transformer) : a winding which supplies the current circuits of measuring instruments, meters, protective or control devices. ★ enroulement secondaire → *enroulement 69.* R вторичная обмотка (трансформатора тока). D Sekundärwicklung (eines Stromwandlers). E arrollamiento secundario (de un transformador de intensidad). I avvolgimento secondario (di un trasformatore di corrente). N secundaire wikkeling (van een stroomtransformator). P uzwojenie wtórne (przekładnika prądowego). S sekundärlindning (hos strömtransformator). (321)

60. **secondary winding** (of a voltage transformer) : a winding which supplies the voltage circuits of measuring instruments, meters, protective or control devices. ★ enroulement secondaire → *enroulement 70.* R вторичная обмотка (трансформатора напряжения). D Sekundärwicklung (eines Spannungswandlers). E arrollamiento secundario (de un transformator de tensión). I avvolgimento secondario (di un trasformatore di tensione). N secundaire wikkeling (van een spanningstransformator). P uzwojenie wtórne (przekładnika napięciowego). S sekundärlindning (hos spänningstransformator). (321)

61. **secondary winding** : any winding which is not a primary winding. ★ ..... → . R ..... D ..... E ..... I avvolgimento secondario. N ..... P ..... S sekundärlindning. (411)

62. **secondary winding** : a winding which, in service, delivers active power to the load circuit. ★ enroulement secondaire → *enroulement 72.* R вторичная обмотка (трансформатора). D Sekundärwicklung; Ausgangswicklung. E arrollamiento secundario. I avvolgimento secondario. N secundaire wikkeling. P uzwojenie wtórne. S sekundärlindning. (421,811)

63. **self-excitation winding** : an excitation winding, by means of which self-excitation is obtained. ★ enroulement d'auto-excitation → *enroulement 27.* R обмотка обратной связи. D Rückkopplungswicklung. E devanado de autoexcitación. I avvolgimento di auto-eccitazione. N zelfbekrachtigingswikkeling. P uzwojenie samowzbudzeniowe. S självmagnetiseringslindning. (431)

64. **separate winding transformer** : → *transformer 57*

65. **series winding** : an excitation winding consisting of coils which are connected in the primary series circuit and carrying either the whole or a proportion of the load current. *Note.* — The use of this term is extended to a.c. machines where the excitation current is proportional to the load current. ★ enroulement série → *enroulement 73.* R последовательная обмотка. D Reihenschlußwicklung. E devanado en serie. I avvolgimento in serie. N seriewikkeling. P uzwojenie szeregowe. S serielindning. (411)

66. **series winding** : the part of the winding of an auto-transformer or the winding of a booster transformer which is intended to be connected in series with a circuit. ★ enroulement série → *enroulement 74.* R последовательная обмотка. D Reihenwicklung. E arrollamiento serie. I avvolgimento serie. N seriewikkeling. P uzwojenie szeregowe. S serielindning. (421)

67. **short pitch winding** : a winding in which the winding pitch is less than 100 per cent. ★ enroulement à pas raccourci → *enroulement 19.* R обмотка с укороченным шагом. D Wicklung mit verkürztem Schritt (Sehnenwicklung). E devanado de paso acortado. I avvolgimento a passo accorciato. N wikkeling met verkorte spoed; koordewikkeling. P uzwojenie cięciwowe skrócone. S lindning med förkortat härvsteg. (411)

68. **short-circuit impedance of a pair of windings** : → *impedance 53*

69. **short-circuit time constant of primary windings** : → *time constant 18*

70. **shunt winding** : an excitation winding consisting of coils which are connected across the whole or part of the primary series circuit of a machine. *Note.* — The use of this term is extended to a.c. machines where the excitation winding carries a current proportional to the primary voltage. ★ enroulement en dérivation → *enroulement 46.* R параллельная обмотка. D Nebenschlußwicklung. E devanado en derivación. I avvolgimento in derivazione. N shuntwikkeling. P uzwojenie bocznikowe. S shuntlindning. (411)

71. **simplex lap winding** : a lap winding in which the number of parallel circuits is equal to the number of poles. ★ enroulement imbriqué parallèle (simple) → *enroulement 55.* R простая петлевая обмотка. D einfache Schleifenwicklung. E devanado imbricado paralelo. I avvolgimento embricato parallelo semplice. N enkelvoudige luswikkeling. P uzwojenie pętlicowe proste. S enkel parallellindning. (411)

72. **simplex wave winding** : a wave winding in which the number of parallel circuits is two, whatever the number of poles. ★ enroulement ondulé série → *enroulement 57.* R простая волновая обмотка. D einfache Wellenwicklung. E devanado ondulado serie. I avvolgimento ondulato semplice. N enkelvoudige golfwikkeling. P uzwojenie faliste proste. S enkel serielindning. (411)

73. **single layer winding** : a winding in which there is only one coil side in the depth of the slot. ★ enroulement à une seule couche → *enroulement 21.* R однослойная обмотка. D Einschichtwicklung. E devanado de una capa. I avvolgimento a un lato di matassa per cava. N eenlaagswikkeling. P uzwojenie jednowarstwowe. S lindning med en härvsida per spår. (411)

74. **split throw winding** : a distributed two-layer winding wherein the conductors which constitute one complete coil side in one slot do not all appear together in another slot. ★ enroulement en escalier → *enroulement 47.* R ступенчатая обмотка. D Treppenwicklung. E devanado escalonado. I avvolgimento a gradini. N getrapte wikkeling. P uzwojenie schodkowe. S delstegslindning. (411)
75. **squirrel cage winding** (*Syn.* cage winding) : → *winding 9*
76. **stabilizing winding** : a supplementary delta-connected winding, especially provided on star-star or star-zigzag connected transformers to decrease the zero-sequence impedance of the star-connected winding. ★ enroulement de stabilisation → *enroulement 40.* R компенсационная обмотка. D Ausgleichwicklung. E arrollamiento de estabilización. I avvolgimento stabilizzatore. N stabilisatiewikkeling. P uzwojenie wyrównawcze; uzwojenie kompensacyjne. S utjämningslindning. (421)
77. **starting winding** : a winding, the purpose of which is to start a machine. ★ enroulement de démarrage → *enroulement 34.* R пусковая обмотка. D Anlaufwicklung. E devanado de arranque. I avvolgimento di avviamento. N aanloopwikkeling. P uzwojenie rozruchowe. S startlindning. (411)
78. **starting winding** : a special winding helping to start a motor having insufficient standstill torque or to start a generator acting as a motor. ★ enroulement de lancement → *enroulement 35.* R пусковая обмотка. D Anlaufwicklung. E arrollamiento de lanzamiento. I avvolgimento d'avviamento. N aanloopwikkeling. P uzwojenie rozruchowe. S startlindning. (811)
79. **stator winding** : a winding on the stator of a machine. ★ enroulement statorique → *enroulement 75.* R обмотка статора. D Ständerwicklung. E devanado estatórico. I avvolgimento di statore. N statorwikkeling. P uzwojenie stojana. S statorlindning. (411)
80. **symmetrical fractional slot winding** : a distributed winding in which the average number of slots per pole pair per phase is an odd integer (that is the average number of slots per pole per phase is not an integer), and having the slots per phase symmetrical on all pole pairs: e.g. 3 1/2 slots per pole per phase, which is seven slots per pole pair per phase. ★ enroulement symétrique à nombre fractionnaire d'encoches par pôle et phase → *enroulement 77.* R симметричная обмотка с дробным числом пазов на полюс и фазу. D symmetrische Bruchlochwicklung. E devanado simétrico de número fraccionario de ranuras por polo y fase. I avvolgimento a cave frazionarie, simmetrico. N symmetrische breukgleuf; symmetrische breukgroefwikkeling. P uzwojenie ułamkowożłobkowe symetryczne. S symmetrisk delspårslindning. (411)
81. **tapping current of a winding** : → *current 207*
82. **tapping power of a winding** : → *power 185*
83. **tapping voltage of a winding** : → *voltage 206*
84. **tapping voltage ratio (of a pair of windings)** : → *ratio 99*
85. **(train) heating winding** : a winding or part of a winding which supplies the train heating circuit. ★ enroulement de chauffage → *enroulement 29.* R обмотка, питающая отопительную цепь поезда. D Heizwicklung. E arrollamiento de calefacción. I avvolgimento per il riscaldamento (del treno). N (trein)verwarmingswikkeling. P uzwojenie grzewcze (pociągu). S tågvärmelindning. (811)
86. **two-layer winding** : a winding in which there are two coil sides in the depth of the slot. ★ enroulement à deux couches → *enroulement 11.* R двухслойная обмотка. D Zweischichtwicklung. E devanado de dos capas. I avvolgimento a due lati di matassa per cava. N tweelaagswikkeling. P uzwojenie dwuwarstwowe. S lindning med två härvsidor per spår. (411)
87. **uniform insulation of a winding** : → *insulation 56*
88. **wave winding** : a distributed winding whose sequence of connections is such that it progresses in one direction around a machine by passing successively under each main pole of the machine. ★ enroulement ondulé → *enroulement 56.* R волновая обмотка. D Wellenwicklung. E devanado ondulado. I avvolgimento ondulato. N golfwikkeling. P uzwojenie faliste. S vågslindning. (411)
89. **winding** : an assembly of coils forming a circuit or part of a circuit in a machine. ★ enroulement → *enroulement 6.* R обмотка. D Wicklung. E devanado. I avvolgimento. N wikkeling. P uzwojenie. S lindning. (151,411,421)
90. **winding factors** : → *factor 189*
91. **winding overhang** : → *overhang 2*
92. **winding overhang support** : → *support 33*
93. **winding overhang support insulation** : → *insulation 58*
94. **winding pitch** : → *pitch 16*
95. **zero-sequence impedance (of a polyphase winding)** : → *impedance 70*

window

1. **resonant window** (*Syn.* resonant iris) : → *iris 2*
2. **spectral window** (of an optical waveguide) : a wavelength region in an optical waveguide over which the transmission loss is acceptably low such that system operation can be readily achieved. ★ fenêtre spectrale → *fenêtre 9.* R спектральное окно (оптического волновода). D spektrales Fenster (eines Lichtwellenleiters). E ventana espectral (de una guía onda óptica). I finestra spettrale (di una guida d'onda ottica). N spectraalvenster. P okno transmisyjne. S spektralfönster. (731)
3. **waveguide window** : a gas or liquid tight barrier or waveguide cover designed to be essentially transparent to the transmission of electromagnetic waves. ★ fenêtre étanche → *fenêtre 7.* R волноводное окно. D Hohlleiterfenster. E ventana de guíaonda. I apertura stagna. N golfgeleidervenster. P okno falowodowe. S vågledarfönster. (726)
4. **window** (of a detector) : that portion of a detector which is designed to facilitate the penetration of the required radiation. ★ fenêtre → *fenêtre 2.* R окно (детекгора). D Fenster (eines Detektors). E ventana (de un detector). I finestra (di un rivelatore). N venster (v.e. detector). P okienko (detektora). S fönster. (391)
5. **window** (of a counter tube) : that part of the wall of a counter tube which is designed to allow the entry of the radiation to be detected. ★ fenêtre → *fenêtre 3.* R окно (счетчика излучения). D Fenster (eines Zählrohres). E ventana (de un tubo contador). I finestra (di un tubo contatore). N venster (van een telbuis). P okienko (licznika promieniowania). S fönster (hos räknerör). (531)
6. **window** : daylight opening on a vertical or nearly vertical area of a room envelope. ★ fenêtre → *fenêtre 4.* R окно. D Fenster. E ventana. I finestra. N raam. P okno. S fönster. (845)
7. **window counter tube** : → *counter tube 27*
8. **window discriminator** : → *discriminator 14*
9. **window signal** : → *signal 259*

windowless

1. **windowless multiplier phototube** (*Syn.* windowless photomultiplier tube) : → *tube 99*
2. **windowless photomultiplier tube** : → *tube 99*

wing

1. **wing bar** : → *bar 12*

wipe

1. **contact wipe** : when a contact is making, the relative rubbing movement of contact tips after they have just touched. ★ glissement des pièces de contact → *glissement 8.* R скольжение контакт-деталей. D Kontaktreiben. E deslizamiento de las piezas de contacto. I scorrimento delle parti di contatto. N glijbeweging van de contacten. P poślizg styczek. S kontaktglidning. (446)
2. **wipe** : a method of replacing one television picture by another, in which the boundary between the pictures is caused to move progressively. ★ enchaînement par volet → *enchaînement 3.* R наплыв. (723)

wiper

1. **disk and wiper lubricated bearing** : → *bearing 13*
2. **wiper** (of a selector) : the moving contact of a selector which engages with the contacts of the selector bank. ★ balai → *balai 2.* R щетка (искателя). D Schaltraum. E frotador (de un selector). I bracci. N rotor. P szczotka (stykowa). S väljarrotor. (714)

wire

1. **contact wire** (*Syn.* trolley wire (USA)) : the electric conductor of an overhead contact line with which the current collectors make contact. ★ fil de contact → *fil 20.* R контактный провод. D Fahrdraht. E hilo de contacto. I filo di contatto. N rijdraad. P przewód jezdny. S kontakttråd. (811)

2. **contact wire pre-sag** : → *pre-sag 1*
3. **contact wire range** : → *range 3*
4. **contact wire sag** : → *sag 2*
5. **contact wire splice** : → *splice 1*
6. **earth wire** (*Syn.* shield wire; overhead ground wire (USA)) : a conductor connected to earth at some or all supports, which is suspended usually but not necessarily above the line conductors to provide a degree of protection against lightning strokes. ★ câble de garde → *câble 34.* R молниезащитный трос; грозозащитный трос. D Erdseil. E cable de tierra. I corda di guardia. N bliksemdraad. P przewód odgromowy. S toppledare. (466)
7. **earth wire** (*Syn.* ground wire (USA)) : a metal wire connecting supports to earth or to rail to protect people and installations in case of an insulation fault and which may also be used as a return cable. ★ câble de terre → *câble 42.* R заземляющий провод. D Erdungsseil. E cable de tierra. I cavo di terra. N aardverbinding. P przewód uziemiający. S jordledare. (811)
8. **earth wire peak** : → *peak 6*
9. **filler wire** : filler metal in the form of a coil of wire. ★ fil d'apport → *fil 18.* R присадочная проволока. D Zusatzdraht. E alambre de metal de aportación. I filo d'apporto. N lasdraad (op rol). P drut spawalniczy. S tillsatstråd. (851)
10. **four-wire circuit** : → *circuit 82*
11. **four-wire repeater** : → *repeater 6*
12. **(four-wire) terminating set** : → *set 17*
13. **four-wire transmission** : → *transmission 29*
14. **grommet wire range** : → *range 34*
15. **ground wire** (*Syn.* earth wire) : → *wire 7*
16. **messenger wire** (*Syn.* catenary) : → *catenary 3*
17. **overhead earth wire** (*Syn.* ground-wire (USA)) : a conductor connected to earth or lightly insulated, usually installed above the phase conductors of a line or a substation to protect them from lightning strikes. ★ câble de garde → *câble 35.* R молниезащитный трос. D Erdseil. E cable de tierra. I fune di guardia. N bliksemdraad. P przewód odgromowy. S topplina. (604)
18. **overhead ground wire** (*Syn.* earth wire) : → *wire 6*
19. **overhead ground wire peak** (*Syn.* earth wire peak) : → *peak 6*
20. **pilot wire protection system** : → *system 146*
21. **private wire (telephone) circuit** : → *circuit 146*
22. **shield wire** (*Syn.* earth wire) : → *wire 6*
23. **simple (catenary) equipment with single contact wire** : → *equipment 66*
24. **simple (catenary) equipment with twin contact wires** : → *equipment 67*
25. **skid wire** : wire(s) usually D-shaped, applied with a long length of lay over the cores of a pipe-type cable, to provide mechanical protection and to facilitate sliding while the cores are being pulled into the pipe. ★ fil de glissement → *fil 21.* R проволока скольжения. D Gleitdraht. E alambre de deslizamiento. I filo di scorrimento. N skid wire/glijdraad. P drut ślizgowy. S ..... (461)
26. **span wire** (*Syn.* cross-span) : → *cross-span 1*
27. **stitch wire** : the auxiliary wire used in stitched suspension. ★ câble à Y → *câble 26.* R рессорная струна. D Y-Seil. E cable en Y. I corda ausiliaria. N Y-draad. P linka pomocnicza (do podwieszania Y). S Y-lina. (811)
28. **trolley wire** (*Syn.* single tramway-type equipment) : → *equipment 70*
29. **trolley wire** (*Syn.* contact wire) : → *wire 1*
30. **two-wire circuit** : → *circuit 190*
31. **two-wire repeater** : → *repeater 20*
32. **two-wire transmission** : → *transmission 112*
33. **wire** (*Syn.* strand) : one of the individual wires used in the manufacture of a stranded conductor. ★ fil → *fil 14.* R проволока. D Draht; Ader. E hilo; alambre. I filo elementare. N draad. P drut (przewodu wielodrutowego). S tråd. (466)
34. **wire feed unit** : → *unit 86*
35. **wire reel** : → *reel 1*
36. **wire spool** (*Syn.* wire reel) : → *reel 1*
37. **2-wire circuit** (*Syn.* two-wire circuit) : → *circuit 190*
38. **2-wire repeater** (*Syn.* two-wire repeater) : → *repeater 20*
39. **2-wire transmission** (*Syn.* two-wire transmission) : → *transmission 112*
40. **4-wire circuit** (*Syn.* four-wire circuit) : → *circuit 82*
41. **4-wire repeater** (*Syn.* four-wire repeater) : → *repeater 6*
42. **4-wire terminating set** (*Syn.* (four-wire) terminating set) : → *set 17*
43. **4-wire transmission** (*Syn.* four-wire transmission) : → *transmission 29*

wired

1. **wired program control** : → *control 204*

wiring

1. **dedicated low-voltage wiring** : the part of a substation secondary devices and wiring which is essentially associated with a given primary circuit (a line, a transformer, etc.). ★ tranche basse tension → *tranche 16.* R блок вспомогательных цепей. D Feldverdrahtung. E cableado de una celda. I sezione di cavetteria. N ..... P połączenia obwodów wtórnych pola. S fackbundna kablar. (605)
2. **installation wiring impedance** : → *impedance 30*
3. **inter-circuit wiring** : the part of a substation wiring which is intended to transmit any information between different circuits. ★ liaison intertranches → *liaison 21.* R электропроводка между цепями подстанции. D ..... E cableado de interconexión entre celdas. I collegamento fra sezioni di cavetteria. N ..... P obwody wtórne ogólne. S ..... (605)
4. **printed wiring** : wiring technique in which the connections between the components of an electrical or electronic device or part of it, including shielding parts, consist of thin conducting strips within a base material or bonded to its surface and in which all the functional components are separated from the base material. ★ câblage imprimé → *câblage 1.* R печатный монтаж. D gedruckte Verdrahtung. E cableado impreso. I collegamento stampato. N gedrukte bedrading. P połączenie drukowane. S tryckt ledningsdragning. (541)
5. **wiring** (secondary wiring) : all the wires and connections necessary to connect together and to supply all the separate protection, control and monitoring components within a substation. ★ filerie → *filerie 1.* R электропроводка вспомогательных цепей. D Verdrahtung. E cableado de control. I cavetteria. N bedrading (secundaire bedrading). P połączenia obwodów wtórnych. S kontrollkablar. (605)
6. **wiring system** : → *system 251*

withdrawable

1. **withdrawable part** : → *part 13*

withdrawal

1. **insertion or withdrawal force** : → *force 20*

withstand

1. **conventional impulse withstand voltage** : → *voltage 36*
2. **limiting continuous thermal withstand value of an energizing quantity** : → *value 17*
3. **limiting short-time thermal withstand value of an energizing quantity** : → *value 19*
4. **peak withstand current** : → *current 138*
5. **power frequency withstand voltage** : → *voltage 144*
6. **statistical impulse withstand voltage** : → *voltage 196*
7. **withstand voltage** (*Syn.* proof voltage) : → *voltage 149*

wobble

1. **spot wobble** : an oscillatory movement imparted to the scanning spot in the direction perpendicular to the line scan in order to broaden the lines and render them less distinct. *Note.* — Associated term in French : vobuler. ★ vobulation du spot → *vobulation 1.* R качание пятна. (723)

Wood

1. **Wood's glass lamp** (*Syn.* black light lamp) : → *lamp 4*

word

1. **code word** (*Syn.* code combination) : an ordered set of elements, for instance an n-bit byte, defined by a code to represent an item of data such as a character. ★ codet → *codet 1.* R кодовая комбинация; кодовое слово. D Codewort; Codekombination. E combinación de código; palabra de código. I parola di codice. N codewoord. P słowo kodowe. S kodord. (702)

2. **code word** (in pulse code modulation) (*Syn.* PCM word) : a set of digits representing a quantized value in basic pulse code modulation or differential pulse code modulation. *Note.* — A set of signal elements representing a code word is sometimes called a "character signal" by analogy with telegraphy and data communication. This usage is deprecated. ★ mot de code → *mot 3.* R кодовое слово (в импульсно-кодовой модуляции). D Codewort (in Pulscodemodulation); PCM-Wort. E palabra de código. I parola di codice (nella modulazione a impulsi codificati); parola PCM. N codewoord (bij pulscodemodulatie); PCM-woord (afkorting). P słowo kodowe (w modulacji impulsowo-kodowej). S kodord. (704)
3. **code word** : a code combination recorded as valid in a redundant code. ★ mot de code → *mot 4.* R кодовое слово. D Codewort. E palabra de código. I parola di codice. N codewoord. P słowo kodowe. S kodord. (721)
4. **PCM word** (*Syn.* code word) : → *word 2*
5. **phonetically balanced word list** : → *list 2*
6. **word articulation** : → *articulation 8*

work

1. **earthing for work** : → *earthing 6*
2. **grounding for work** (*Syn.* earthing for work) : → *earthing 6*
3. **other fixed works costs** : → *cost 17*
4. **work** (*W*) : a quantity equal to the scalar product of a force and the corresponding displacement vector. ★ travail → *travail 21.* R работа. D Arbeit. E trabajo. I lavoro. N arbeid. P praca. S arbete. (111)
5. **work coil** (*Syn.* heating inductor) : → *inductor 7*
6. **work electrode** : → *electrode 97*
7. **work function** : → *function 38*
8. **work function** : → *function 39*
9. **work plane** : → *plane 21*

worker

1. **other workers** (at an establishment using ionizing radiation) : workers at an establishment using ionizing radiation who are not radiation workers either in category A or category B. ★ autres travailleurs → *travailleur 1.* R другие работники (предприятия, использующего ионозирующие излучения). D andere beruflich Tätige. E otro personal (de un establecimiento que utiliza radiaciones ionizantes). I altri lavoratori. N andere medewerkers. P pracownicy inni (pracujący w zakładach stosujących promieniowanie jonizujące). S övrig personal. (881)
2. **radiation workers - category A** : workers who might receive an annual dose equivalent or committed dose equivalent exceeding 3/10 of the relevant dose equivalent limit. ★ travailleurs directement affectés aux travaux sous rayonnements → *travailleur 3.* R лица, работающие с излучением - категория А. D beruflich Strahlenexponierte - Kategorie A. E personal clasificado (para la radiacion). I lavoratori espositi - categoria A. N stralingsmedewerker categorie A. P pracownicy zatrudnieni w warunkach promieniowania - kategoria A. S personalkategori A. (881)
3. **radiation workers - category B** : workers who might receive an annual dose equivalent or committed dose equivalent exceeding 1/10 but which is unlikely to exceed 3/10, of the relevant dose equivalent limit. ★ travailleurs non DATR → *travailleur 4.* R лица, работающие с излучением - категория Б. D beruflich Strahlenexponierte - Kategorie B. E personal no clasificado (para la radiación). I lavoratori espositi - categoria B. N stralingsmedewerker categorie B. P pracownicy zatrudnieni w warunkach promieniowania - kategoria B. S personalkategori B. (881)

working

1. **circuit crest working off-state voltage** : → *voltage 23*
2. **circuit crest working reverse voltage** : → *voltage 24*
3. **hot stick working** (*Syn.* safe clearance working) : → *working 7*
4. **live working** : a generic term indicating the various working methods used to carry out maintenance, including connection and disconnection operations on electrical installations while in service. ★ travail sous tension → *travail 29.* R работа под напряжением. D Arbeiten an unter Spannung stehenden Teilen. E trabajo en tensión. I lavoro sotto tensione. N werken onder spanning. P praca pod napięciem. S arbete på spänningsförande anläggningsdel; AUS. (604)
5. **mass in working order** : → *mass 21*
6. **optimum working frequency** : → *frequency 141*
7. **safe clearance working** (*Syn.* hot stick working (USA)) : the method of live working by which the worker remains at a specified minimim distance from the live parts and carries out his work with exchangeable tools attached to the end of insulating poles. ★ travail à distance → *travail 23.* R работа с изолирующей штангой. D Arbeiten mit Schutzabstand. E trabajo a distancia. I lavoro a distanza. N op-afstand-werken onder spanning. P praca «na dystans». S arbete med isolerande verktyg. (604)
8. **working clearance** : → *clearance 17*
9. **working frequency** : → *frequency 196*
10. **working height** : → *height 9*
11. **working life** (*Syn.* pot life) : → *life 9*
12. **working load** : → *load 96*
13. **working photometric standard** : → *standard 47*
14. **working plane** (*Syn.* work plane) : → *plane 21*
15. **working point** : → *point 53*
16. **working point** (*Syn.* operating point) : → *point 29*
17. **working pole** : → *pole 45*
18. **working range** (*Syn.* dynamic operating range) : → *range 14*
19. **working range** : → *range 75*
20. **working standard** : → *standard 48*
21. **working standard** : → *standard 49*
22. **working standard lamp** : → *lamp 73*
23. **working stick** (*Syn.* working pole) : → *pole 45*
24. **working temperature** : → *temperature 68*

workload

1. **workload** : the average product of the tube current and the ON time per week of a radiation source such as an X-ray tube or particle accelerator. *Note.* — The workload can be specified in milliampereminutes per week, at a particular (usually maximum) X-ray tube voltage. ★ charge hebdomadaire → *charge 62.* R рабочая нагрузка. D Betriebsbelastung. E carga semanal. I carico di lavoro. N werkbelasting. P obciążenie robocze. S driftsbelastning. (881)

world

1. **round the world echo** : → *echo 19*

worm

1. **worm gear** : → *gear 7*

worth

1. **present worth of cost of losses** (*Syn.* present value of cost losses) : → *value 43*

wound

1. **double wound synchronous generator** : → *generator 12*
2. **wound core** : → *core 39*
3. **wound primary type current transformer** : → *transformer 80*

wound-rotor

1. **brushless wound-rotor induction motor** : → *induction motor 1*
2. **wound-rotor induction motor** : → *induction motor 10*

wow

1. **wow** : an undesired form of frequency modulation introduced into the recorded signal by an irregular motion of the recording medium during the recording/reproducing process, the frequency of which is included between 0,1 Hz and 10 Hz. ★ pleurage → *pleurage 1.* R детонация (низкочастотная). D langsame Tonhöhenschwankung (Wow). E gimoteo. I miagolio. N langzame zwevingen. P kołysanie. S långsam svajning. (806)

wrap

1. **wrap contact** : → *contact 119*
2. **wrap post** : → *post 14*

wrapped

1. **wrapped connection** : → *connection 63*

wrapping

1. **wrapping tool** : → *tool 11*

writing

1. **maximum usable writing speed** : → *speed 25*
2. **writing** : introducing information corresponding to the input signal, usually into some form of storage. ★ inscription → *inscription 3.* **R** запись. **D** Schreiben. **E** inscripción. **I** scrittura. **N** schrijven. **P** zapisywanie. **S** skrivning. (531)
3. **writing bar** : → *bar 13*
4. **writing edge** (*Syn.* writing bar) : → *bar 13*
5. **writing gun** : → *gun 18*
6. **writing helix** : → *helix 2*
7. **writing speed** : → *speed 57*
8. **writing speed, maximum** : → *speed 58*

WRU

1. **WRU signal** (*Syn.* "Who are you" signal (function)) : → *signal 258*

wye

1. **wye connection** (*Syn.* star connection) : → *connection 56*

X

X

1. **X emitter** : → *emitter 16*

Xenon

1. **Xenon effect** : → *effect 89*

xeroradiography

1. **xeroradiography** : a process in which X-radiation forms a latent electrostatic image, usually on a selenium-coated plate, the charged image areas attracting and holding a fine powder (toner) which can be transferred to a paper surface. ★ xéroradiographie → *xéroradiographie 1.* **R** ксерорадиография. **D** Xeroradiographie. **E** xerorradiografía. **I** xeroradiografia. **N** xeroradiografie. **P** kserografia. **S** xerografi. (881)

X-radiation

1. **X-radiation** (*Syn.* X-rays) : radiation consisting of photons, other than gamma radiation, comprising bremsstrahlung or characteristic radiation and having energies much higher than those of visible light. ★ rayons X → *rayon 30.* **R** рентгеновское излучение. **D** Röntgenstrahlung. **E** rayos X; radiación X. **I** radiazione X; raggi X. **N** röntgenstraling; röntgenstralen. **P** promieniowanie rentgenowskie; promienie rentgena. **S** röntgenstrålning. (881)
2. **X-radiation technician** : → *technician 3*

X-ray

1. **contact X-ray therapy** : → *therapy 1*
2. **continuous X-ray spectrum** : → *spectrum 9*
3. **deep X-ray therapy** : → *therapy 2*
4. **duration of X-ray tube exposure series** : → *duration 13*
5. **fixed X-ray generator** : → *generator 14*
6. **interval between X-ray tube exposures** : → *interval 11*
7. **maximum rated X-ray tube load** : → *load 64*
8. **maximum rated X-ray tube voltage** : → *voltage 110*
9. **mobile X-ray generator** : → *generator 24*
10. **multi-stage (X-ray) tube** : → *tube 57*
11. **portable X-ray generator** : → *generator 28*
12. **self-contained X-ray generator** : → *generator 30*
13. **self-rectifying (X-ray) tube** : → *tube 74*
14. **single X-ray tube exposure** : → *exposure 18*
15. **superficial X-ray therapy** : → *therapy 10*
16. **X ray spectrometer** : → *spectrometer 12*
17. **X-ray apparatus** : → *apparatus 20*
18. **X-ray department** : → *department 1*
19. **X-ray emitter** : → *emitter 17*
20. **X-ray excitation fluorimeter** (*Syn.* X-ray fluorescence content meter) : → *content meter 9*
21. **X-ray fluorescence content meter** : → *content meter 9*
22. **X-ray fluorescence thickness meter** : → *meter 79*
23. **X-ray generator** (*Syn.* X-ray apparatus) : → *apparatus 20*
24. **X-ray installation** : → *installation 18*
25. **X-ray room** : → *room 21*
26. **X-ray television system** : → *system 252*
27. **X-ray therapy** : → *therapy 12*
28. **X-ray tube** : → *tube 100*
29. **X-ray tube assembly** : → *assembly 30*
30. **X-ray tube current** : → *current 223*
31. **X-ray tube exposure** : → *exposure 21*
32. **X-ray tube exposure cycle time** : → *time 228*
33. **X-ray tube exposure frequency** : → *frequency 197*
34. **X-ray tube exposure series** : → *series 33*
35. **X-ray tube housing** : → *housing 10*
36. **X-ray tube voltage** : → *voltage 269*
37. **X-rays** (*Syn.* X-radiation) : → *X-radiation 1*

X-unit

1. X-unit (deprecated) : a unit of measurement of wavelength of radiation, approximately equal to 0.1002 pm. ★ unité X → *unité 42.* **R** X-единица (не рекомендуется). **D** X-Einheit (veralteter Begriff). **E** unidad X (desaconsejado). **I** unità X (sconsigliata). **N** röntgeneenheid. **P** jednostka X (nie zalecana). **S** X-enhet. (881)

XY

1. **XY recorder** : → *recorder 22*

Y

Y

1. **Y connection** (*Syn.* star connection) : → *connection 56*

Yagi

1. **Yagi antenna** (*Syn.* Yagi-Uda antenna) : → *antenna 124*

Yagi-Uda

1. **Yagi-Uda antenna** : → *antenna 124*

yarn

1. **yarn** : a general term covering specific types of textile structures with or without twist made of staple fibres or filaments. ★ fil → *fil 13.* R пряжа. D Garn. E hilo. I filo (multifilamentare). N garen. P nić. S garn. (212)

yellow

1. **yellow spot** : → *spot 21*

yield

1. **chain fission yield** : the fraction of fissions giving rise to isobars. ★ ..... → . D Isobarenausbeute. E rendimiento de fisión de cadena. I resa di fissione a catena. N splijtingsopbrengst in een keten. P wydajność łańcucha produktów rozszczepienia. S isobar(nuklid)utbyte. (026)
2. **cumulative fission yield** : the fraction of fissions which have resulted in the production of a given nuclide, either directly or indirectly up to a specified time. If no time is specified, the yield is considered to be the asymptotic value. ★ rendement de fission cumulé → *rendement 19.* D kumulative Spaltausbeute. E rendimiento de fisión acumulado. I resa cumulativa di fissione. N cumulatieve splijtingsopbrengst. P całkowita wydajność przy rozszczepieniu. S kumulativt klyvningsutbyte. (026)
3. **direct fission yield** (*Syn.* primary fission yield) : → *fission 19*
4. **fission yield** : the fraction of fission products of a given type. ★ rendement de fission → *rendement 18.* D Spaltausbeute. E rendimiento de fisión. I resa di fissione. N splijtingsopbrengst. P wydajność przy rozszczepieniu. S klyvningsutbyte. (026)
5. **independent fission yield** (*Syn.* primary fission yield) : → *fission 19*
6. **neutron yield per absorption** (*Syn.* eta factor) : the average number of primary fission neutrons (including delayed neutrons) emitted per neutron absorbed by a fissionable nuclide or by a nuclear fuel as specified. It is a function of the energy of the absorbed neutrons. ★ facteur êta → *facteur 196.* D Neutronenausbeute pro Absorption (Eta-Faktor). E factor eta; índice de fisión lenta. I resa neutronica per assorbimento; fattore eta. N eta-factor. P współczynnik η. S neutronutbyte vid absorption; etafaktor. (026)
7. **photoluminescence quantum yield** : ratio of the photon flux of the radiation emitted by a photoluminescent material to the photon flux of the radiation absorbed by that material. *Note.* — External photoluminescence quantum yield is the ratio of the emitted to the incident photon flux. ★ rendement quantique de photoluminescence → *rendement 41.* R квантовый выход фотолюминесценции. D Photolumineszenz-Quantenausbeute. E eficiencia cuántica de fotoluminiscencia. I rendimento fotonico di fotoluminescenza. N fotonenrendement bij fotoluminescentie. P sprawność kwantowa fotoluminescencji. S fotoluminiscent fotonutbyte. (845)
8. **photoluminescence radiant yield** : ratio of the radiant flux of the radiation emitted by a photoluminescent material to the radiant flux of the radiation absorbed by that material. *Note.* — The term photoluminescence radiant yield is also used for the elementary process with a similar meaning, namely the ratio of the energy of the emitted photon to the energy of the absorbed photon which gave rise to it. ★ rendement énergétique de photoluminescence → *rendement 35.* R энергетический выход фотолюминесценции. D Photolumineszenz-Strahlungsausbeute. E eficiencia radiante de fotoluminiscencia. I rendimento energetico di fotoluminescenza. N stralingsrendement bij fotoluminescentie. P sprawność energetyczna fotoluminescencji. S fotoluminiscent strålningsutbyte. (845)
9. **primary fission yield** : → *fission 19*
10. **yield** : the quotient of molten metal poured over the charge weight. ★ rendement de la charge → *rendement 23.* R выход годного металла. D Ausbeute. E rendimiento de la carga. I rendimento della carica. N gietrendement. P wydajność. S utbyte. (841)

yoke

1. **brush yoke** : → *brush 10*
2. **frame yoke** : the annular support for the poles of a salient pole machine. It may be laminated or of solid metal and forms part of the magnetic circuit. ★ culasse → *culasse 2.* R ярмо. D Jochgestell; Polgestell. E culata. I giogo; corona. N juk. P jarzmo. S magnetring. (411)
3. **yoke** (of a transformer electromagnet relay or other device) : a fixed ferromagnetic part, usually not surrounded by a winding, whose principal purpose is to complete the main magnetic circuit. ★ culasse → *culasse 1.* R ярмо (трансформатора, электромагнита, реле или другого устройства). D Joch (eines Transformators, Elektromagneten, Relais oder eines anderen Bauelements). E culata (de un transformador, electroimán, relé u otro dispositivo). I giogo (di un trasformatore, elettromagnete, relè o altro dispositivo). N juk. P jarzmo. S ok. (151,221,811)
4. **yoke assembly** : an external structure that provides the magnetic fields required for focusing, alignment and deflection. ★ bloc de bobinage → *bloc 3.* R фокусирующе-отклоняющая система. D Spulensatz. E bloque de bobinas. I giogo. N jukpakket. P jarzmo. S avböjningsok. (531)
5. **yoke plate** : → *plate 33*

Z

Zener

1. **Zener breakdown** : → *breakdown 17*

Zenneck

1. **Zenneck wave** : → *wave 86*

zero

1. **electrical zero** : for a measuring instrument which needs an auxiliary supply, the position to which the indicating device tends to return when the instrument is in service and when the measured quantity is zero. *Note.* — The electrical zero does not necessarily coincide with the mechanical zero. ★ zéro électrique → *zéro 14.* R электрический нуль. D elektrischer Nullpunkt. E cero eléctrico. I zero elettrico. N elektrisch nulpunt. P zero elektryczne. S elektriskt nollläge. (301)
2. **electrical zero adjuster** : → *adjuster 2*
3. **instrument with suppressed zero** : → *instrument 19*
4. **mechanical zero** : the equilibrium position to which the indicating device of a measuring instrument tends to return due only to mechanical restoring forces, when the measuring element is not energized. *Notes. 1* — In instruments with a mechanically suppressed zero, the equilibrium position is outside the scale marks. *2* — In certain instruments such as fluxmeters and quotient-meters, the mechanical zero is indeterminate. ★ zéro mécanique → *zéro 15.* R механический нуль. D mechanischer Nullpunkt. E cero mecánico. I zero meccanico. N mechanisch nulpunt. P zero mechaniczne. S mekaniskt nollläge. (301)
5. **mechanical zero adjuster** : → *adjuster 3*
6. **positive/zero/negative justification** : → *justification 14*
7. **positive/zero/negative pulse stuffing** (*Syn.* positive/zero/negative justification) : → *justification 14*
8. **residual voltage for zero current control** : → *voltage 176*
9. **residual voltage for zero magnetic field** : → *voltage 177*
10. **zero component** (*Syn.* homopolar component) : → *component 27*
11. **zero divergence field** : → *field 62*
12. **zero insertion force component** : → *component 63*
13. **zero offset** (*Syn.* absence of offset) : → *offset 1*
14. **zero phase reference** : → *reference 76*
15. **zero phase-sequence impedance** : → *impedance 69*
16. **zero phase-sequence reactance** : → *reactance 20*
17. **zero phase-sequence resistance** : → *resistance 76*
18. **zero power-factor characteristic** : → *characteristic 96*
19. **zero power-factor test** : → *test 102*
20. **zero scale mark** : → *mark 11*

zero-sequence

1. **zero-sequence impedance (of a polyphase winding)** : → *impedance 70*

zeta

1. **zeta potential** (*Syn.* diffuse layer potential) : → *layer 7*

zigzag

1. **zigzag connection** : → *connection 66*

zonal

1. **zonal flux** : → *flux 28*

zone

1. **auroral zone** : an annular region approximately situated between 60° and 70° geomagnetic latitude, North or South, in which incident particles frequently generate intense ionization phenomena, and in particular the appearance of aurorae. ★ zone aurorale → *zone 16.* D Aurora-Zone. P strefa zorzy polarnej. (705)
2. **convergence zone** : region of the sea near the surface where sound rays are concentrated at great range from the source by refraction at great depth. ★ zone de convergence → *zone 22.* R зона конвергенции. D Konvergenzzone. E zona de convergencia. I zona di convergenza. N convergentiezone. P strefa konwergencji. S konvergenszon. (801)
3. **dead zone** (*Syn.* dead band) : → *band 11*
4. **Fresnel zone** (on a reflective surface) : locus of points on a reflective surface such that the sum of the distances from each of them to the transmissions and reception antennas, assuming these antennas to be point sources, is equal to the optical path length increased by an amount contained between two consecutive integer multiples of the half wavelength. ★ zone de Fresnel → *zone 33.* D Fresnel-Zone (auf einer reflektierenden Oberfläche). P strefa Fresnela (na powierzchni odbijającej). (705)
5. **growing by zone melting** : → *growing 3*
6. **growth zone** : the region of a synthetic quartz crystal resulting from growth along a specific crystallographic direction. ★ zone de croissance → *zone 28.* R сектор роста. D Wachstumszone. E zona de crecimiento. I zona di crescita. N groeizones. P strefa wzrostu. S tillväxtzon. (561)
7. **impurity concentration transition zone** : a zone in which the impurity concentration changes from one value to another. ★ zone de transition de la concentration des impuretés → *zone 40.* R зона изменения концентрации примесей. D Übergangszone der Störstellendichte. E zona de transición de la concentración de impurezas. I zona di transizione della concentrazione di impurezze. N overgangszone in de verontreinigingsconcentratie. P obszar zmiany koncentracji domieszek. S övergångszon för störämneskoncentration. (521)
8. **neutral zone** : in a positive-negative three-step action, difference between the two switching values. ★ encadrement → *encadrement 2.* R нейтральная зона. D Totzone; Unempfindlichkeitsbereich. E zona neutra. I zona morta. N neutrale zone. P strefa zerowa. S neutralzon. (351)
9. **neutral zone** : the zone of an armature, located midway between two consecutive poles, in which the flux is sensibly zero or, by extension, the zone of the commutator in which, when the machine is running at no-load, the voltage between two consecutive bars is sensibly zero. ★ zone neutre → *zone 51.* R нейтральная линия. D neutrale Zone. E zona neutra. I zona neutra. N neutrale zone. P strefa neutralna. S neutral zon. (411)
10. **neutral zone control** : → *control 129*
11. **shadow zone** : zone of the ocean into which sound rays are unable to penetrate by reason of refraction. ★ zone d'ombre → *ombre 5.* R зона тени. D Schattenzone. E zona de sombra. I zona d'ombra. N schaduw-gebied. P strefa cienia. S skuggzon. (801)
12. **silent zone** : part of the skip zone at a distance greater than the maximum range of a radio transmitter for the ground wave. ★ zone de silence → *zone 37.* D tote Zone. P strefa ciszy. (705)
13. **skip zone** : an area of the surface of the Earth surrounding a transmission point and bounded at the skip distance in each direction. ★ zone sautée → *zone 54.* D Sprungzone. P strefa skokowa. (705)
14. **stability zone** : the operating area situated within the stability limits of the system state variables. ★ domaine de stabilité → *domaine 11.* R область устойчивости. D Stabilitätsbereich. E campo de estabilidad. I campo di stabilità. N stabiliteitsgebied. P strefa stabilności systemu elektroenergetycznego. S stabilitetsområde. (603)
15. **time-current zone** : a zone between the pre-arcing and the operating time-current characteristics determined under prescribed conditions of fuse. ★ zone temps-courant → *zone 56.* R время-токовая зона. D Zeit/Strom-Bereich. E zona tiempo-corriente (intensidad). I zona tempo-corrente. N tijd-stroomgebied. P strefa czasowo-prądowa. S tid-strömområde. (441)
16. **time-current zone limits** : → *limit 20*
17. **white zone** (in a chromaticity diagram) : the zone, in a chromaticity diagram, which may be considered to represent an appreciably achromatic sensation, under the given conditions of observation. ★ zone du blanc → *zone 45.* R зона белого (на графике цветностей). (723)

18. **zone lens** : → *lens 19*
19. **zone levelling** : → *levelling 1*
20. **zone melting and refining** : → *melting 14*
21. **zone refining** : → *refining 5*
22. **zone 0** (in the classification of hazardous areas) : an area in which an explosive gas atmosphere is present continuously, or is present for long periods. ★ zone 0 → *zone 57.* **R** зона 0 (при классификации опасных пространств). **D** Zone 0. **E** zona 0 (en la clasificación de emplazamientos peligrosos). **I** zona 0 (per la classificazione dei luoghi pericolosi). **N** zone 0 (bij gevarenzone-indeling). **P** strefa 0 (w klasyfikacji pomieszczeń niebezpiecznych). **S** zon 0. (426)
23. **zone 1** (in the classification of hazardous areas) : an area in which an explosive gas atmosphere is likely to occur in normal operation. ★ zone 1 → *zone 58.* **R** зона 1 (при классификации опасных пространств). **D** Zone 1. **E** zona 1 (en la clasificación de emplazamientos peligrosos). **I** zone 1 (per la classificazione dei luoghi pericolosi). **N** zone 1 (bij gevarenzone-indeling). **P** strefa 1 (w klasyfikacji pomieszczeń niebezpiecznych). **S** zon 1. (426)
24. **zone 2** (in the classification of hazardous areas) : an area in which an explosive gas atmosphere is not likely to occur in normal operation and if it does occur it will exist for a short period only. ★ zone 2 → *zone 59.* **R** зона 2 (при классификации опасных пространств). **D** Zone 2. **E** zona 2 (en la clasificación de emplazamientos peligrosos). **I** zona 2 (per la classificazione dei luoghi pericolosi). **N** zone 2 (bij gevarenzone-indeling). **P** strefa 2 (w klasyfikacji pomieszczeń niebezpiecznych). **S** zon 2. (426)

zone-plate

1. **zone-plate lens antenna** (*Syn.* Fresnel lens antenna) : → *antenna 56*

zonography

1. **zonography** : tomography by a technique that produces an image of a relatively thick layer. ★ zonographie → *zonographie 1.* **R** зонография. **D** Zonographie. **E** zonografía. **I** zonografia. **N** zonegrafie. **P** zonografia. **S** zonografi. (881)

Z-transform

1. **Z-transform** : the Laplace transform of a periodically sampled signal with change of variable $Z = e^{Ts}$ where T is the sampling period. ★ transformée en Z → *transformée 3.* **R** Z - преобразование. **D** Z-Transformation. **E** transformada en Z. **I** trasformata Z. **N** Z-transformatie. **P** transformata Z. **S** Z-transform. (101)

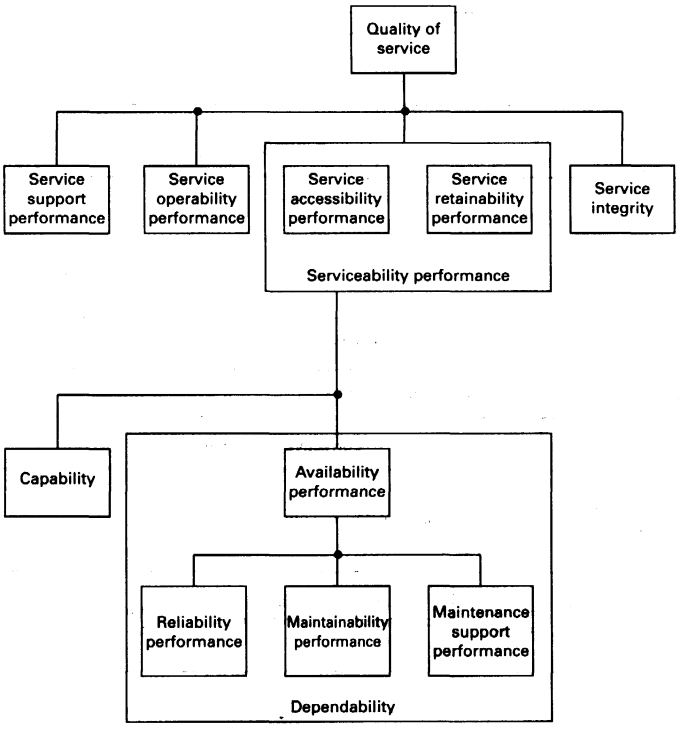


Figure 191-2 - Performance concepts

Ref. 191 : See page 432.

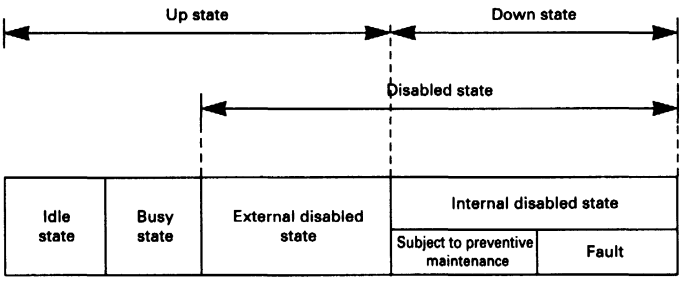

Figure 191-6 - Classification of item states

Ref. 191 : See page 771 *et al.*

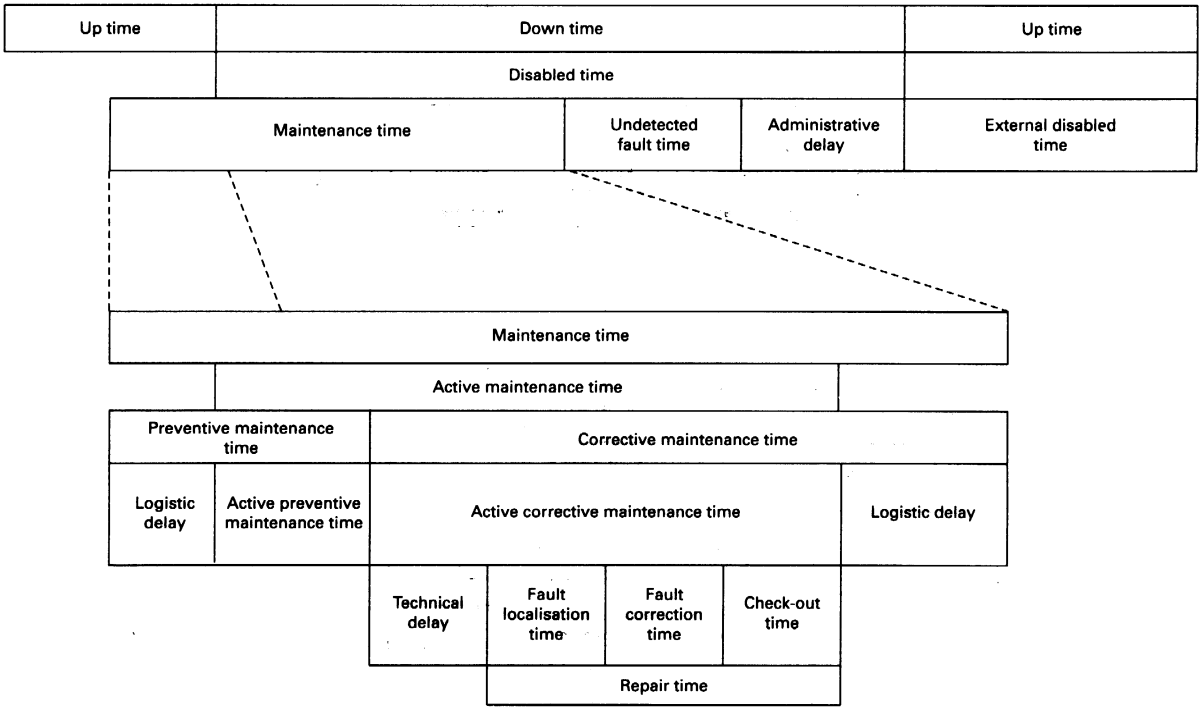

Figure 191-10 - Maintenance time diagram

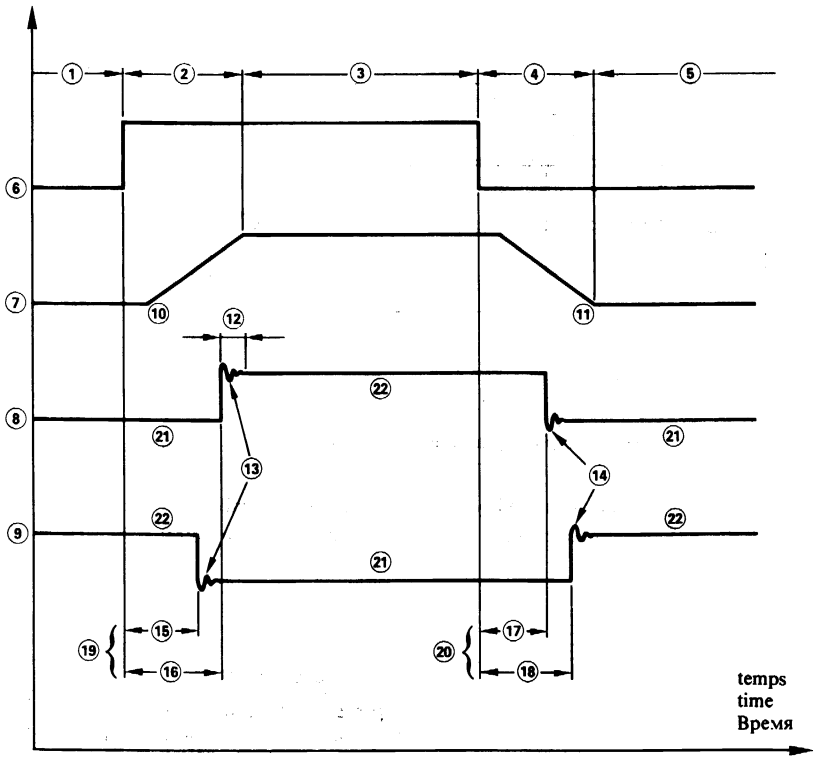
Ref. 191 : See page 842.



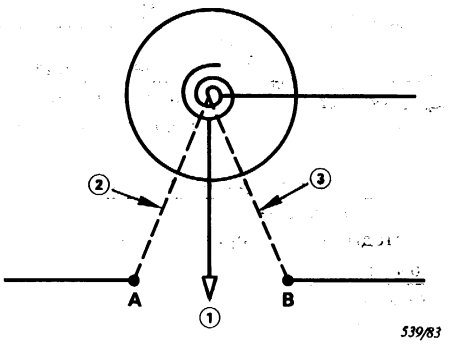


FIG. 1. — Explanatory diagram for various terms. 538/83

① Release condition
② The relay operates
③ Operate condition
④ The relay releases
⑤ Release condition
⑥ Input energizing quantity
⑦ Moving parts
⑧ Make contact
⑨ Break contact
⑩ The relay starts
⑪ The relay resets
⑫ Bounce time
⑬ The relay switches
⑭ The relay disengages
⑮ Opening time of a break contact
⑯ Closing time of a make contact
⑰ Opening time of a make contact
⑱ Closing time of a break contact
⑲ Operate time
⑳ Release time
㉑ Open
㉒ Closed

Ref. 446 : See page 678.

539/83

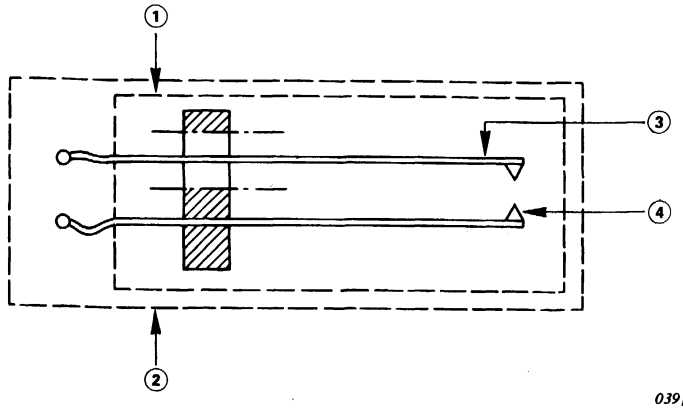
FIG. 2. — Explanatory diagram for the terms "initial condition" and "final condition" with a moving coil relay as an example.

① Initial condition
the relay is energized at the mean value of the energizing quantity.

② Final condition A
the value of the energizing quantity is such that it will cause the relay to operate towards A.

③ Final condition B
the value of the energizing quantity is such that it will cause the relay to operate towards B.

Ref. 446 : See page 149.



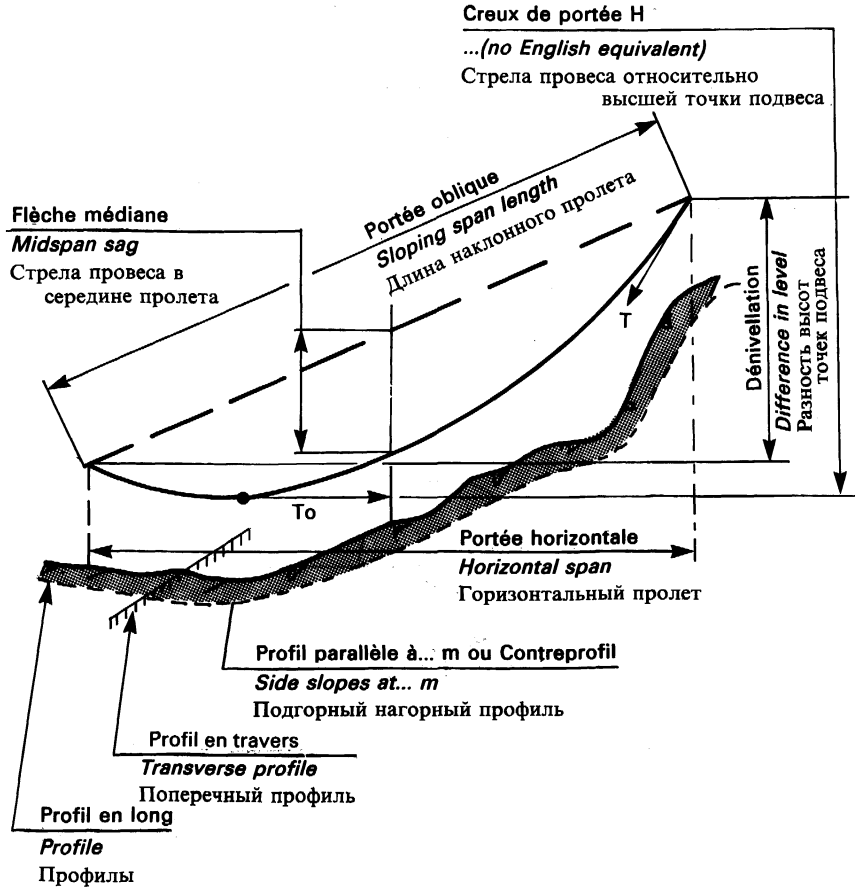


FIG. 3. — Example explaining the terms 446-16-02 to 446-16-05.

①	Contact assembly	③	Contact member
②	Contact circuit	④	Contact tip (or point)

LIST OF FIELDS COVERED

IEV chapters used as the basis for this edition of the Dictionary :

50(26)	1968	Centrales de production d'énergie électrique par voie nucléaire / Nuclear power plants for electric energy generation
50(101)	1977	Mathématiques / Mathematics
50(111-01)	1982	Physique et chimie - Notions physiques / Physics and chemistry - Physical concepts
50(111-02)	1984	Physique et chimie - Notions électrochimiques / Physics and chemistry - Electrochemical concepts
50(111-03)	1977	Physique et chimie - Notions relatives aux grandeurs et aux unités / Physics and chemistry - Concepts related to quantities and units
50(121)	1978	Électromagnétisme / Electromagnetism
50(131)	1978	Circuits électriques et magnétiques / Electric and magnetic circuits
50(131A)	1982	Premier complément à la Publication 50(131) (1978) - Circuits électriques et magnétiques - Section 131-04 : Circuits et composantes polyphasés / First supplement to Publication 50(131) (1978) - Electric and magnetic circuits - Section 131-04 : Polyphase circuits and components
50(151)	1978	Dispositifs électriques et magnétiques / Electrical and magnetic devices
50(151)	1987	Modification 1 à la Publication 50(151) / Amendment 1 to Publication 50(151)
50(161)	1990	Compatibilité électromagnétique / Electromagnetic compatibility
50(191)	1990	Sûreté de fonctionnement et qualité de service / Dependability and quality of service
50(212)	1990	Isolants solides, liquides et gazeux / Insulating solids, liquids and gases

(*) Chapters denoted by an asterisk are in the process of being printed.

50(221)	1990	Matériaux et composants magnétiques / Magnetic materials and components
50(301)	1983	Termes généraux concernant les mesures en électricité /General terms on measurements in electricity
50(302)	1983	Instruments de mesurage électriques / Electrical measuring instruments
50(303)	1983	Instruments de mesurage électroniques / Electronic measuring instruments
50(321)	1986	Transformateurs de mesure / Instrument transformers
50(351)	1975	Commande et régulation automatiques / Automatic control
50(351)	1978	Modification 1 à la Publication 50(351) / Amendment 1 to Publication 50(351)
50(371)	1984	Téléconduite / Telecontrol
50(391)	1975	Détection et mesure par voie électrique des rayonnements ionisants / Detection and measurement of ionizing radiation by electric means
50(392)	1976	Instrumentation nucléaire - Complément au chapitre 391 / Nuclear instrumentation - Supplement to Chapter 391
50(411)	1973	Machines tournantes / Rotating machines
50(421)	1990	Transformateurs de puissance et bobines d'inductance / Power transformers and reactors
50(426)	1990	Matériel électrique pour atmosphères explosives /Electrical apparatus for explosive atmospheres
50(431)	1980	Transducteurs magnétiques / Transductors
50(436)	1990	Condensateurs de puissance / Power capacitors
50(441)	1984	Appareillage et fusibles / Switchgear, controlgear and fuses
50(446)	1983	Relais électriques / Electrical relays
50(448)	1987	Protection des réseaux d'énergie / Power system protection
50(461)	1984	Câbles électriques / Electric cables

50(466)	1990	Lignes électriques / Overhead lines
50(471)	1984	Isolateurs / Insulators
50(486)	1991	Éléments et batteries d'accumulateurs / Secondary cells and batteries
50(521)	1984	Dispositifs à semiconducteurs et circuits intégrés / Semiconductor devices and integrated circuits
50(531)	1974	Tubes électroniques / Electronic tubes
50(541)	1990	Circuits imprimés / Printed circuits
50(551)	1982	Électronique de puissance /Power electronics
50(561)	1991	Dispositifs piézoélectriques pour la stabilisation des fréquences et le filtrage /Piezoelectric devices for frequency control and selection
50(581)	1978	Composants électromécaniques pour équipements électroniques / Electromechanical components for electronic equipment
50(601)	1985	Production, transport et distribution de l'énergie électrique - Généralités / Generation, transmission and distribution of electricity - General
50(602)	1983	Production, transport et distribution de l'énergie électrique - Production / Generation, transmission and distribution of electricity - Generation
50(603)	1986	Production, transport et distribution de l'énergie électrique - Planification et conduite des réseaux / Generation, transmission and distribution of electricity - Power system planning and management
50(604)	1987	Production, transport et distribution de l'énergie électrique - Exploitation / Generation, transmission and distribution of electricity - Operation
50(605)	1983	Production, transport et distribution de l'énergie électrique - Postes / Generation, transmission and distribution of electricity - Substations
50(691)	1973	Tarification de l'électricité /Tariffs for electricity
50(701)	1988	Télécommunications, voies et réseaux / Telecommunications, channels and networks
50(702)	1992	Oscillations, signaux et dispositifs associés / Oscillations, signals and related devices

50(704)	*	Transmission / Transmission
50(705)	*	Propagation des ondes radioélectriques / Radio wave propagation
50(712)	1992	Antennes / Antennas
50(714)	1992	Commutation et signalisation (en télécommunication) /Switching and signalling (in telecommunications)
50(715)	1992	Réseaux de télécommunication, télétrafic et exploitation / Telecommunication networks, teletraffic and operation
50(721)	1991	Télégraphie, télécopie et communications de données / Telegraphy, facsimile and data communication
50(722)	*	Téléphonie / Telephony
50(723)	*	Radiodiffusion et télédistribution : son, télévision, données / Broadcasting : sound, television, data
50(725)	1982	Radiocommunications spatiales / Space radiocommunications
50(726)	1982	Lignes de transmission et guides d'ondes / Transmission lines and waveguides
50(731)	1991	Télécommunications par fibres optiques / Optical fibre communication
50(801)	1984	Acoustique et électroacoustique / Acoustics and electro-acoustics (Deuxième édition en préparation / Second edition being prepared)
50(806)	1975	Enregistrement et lecture du son et des images /Recording and reproduction of sound and video
50(806A)	1984	Premier complément à la Publication 50(806) (1975) - Enregistrement et lecture du son et des images / First supplement to Publication 50(806) (1975) - Recording and reproduction of sound and video
50(811)	1991	Traction électrique / Electric traction
50(826)	1982	Installations électriques des bâtiments / Electrical installations of buildings
50(826)	1990	Modification 1 à la Publication 50(826) / Amendment 1 to Publication 50(826)

50(841)	1983	**Électrothermie industrielle /Industrial electroheating**
50(845)	1987	**Éclairage / Lighting**
50(851)	1991	**Soudage électrique / Electric welding**
50(881)	1983	**Radiologie et physique radiologique / Radiology and radiological physics**
