4. **power divider** (*Syn.* junction box) : a device with one input and two or more outputs which produces the desired distribution of power from the feed line to the driven elements of an antenna. *Note.* — The term "junction box" is generally used when a simple power divider is enclosed in a weatherproof housing. ★ répartiteur de puissance → *répartiteur 7.* R делитель мощности антенны; распределительная коробка. D Leistungsteiler; Anschlußkasten. E divisor de potencia; caja de unión. I divisore di potenza. N antenneverdeler; verbindingskast. P dzielnik mocy. S effektdelare. (712)
5. **power divider** (*Syn.* power splitter) : a multiport device where the power of a source connected to one of the ports is distributed in given proportions among the other ports. ★ répartiteur de puissance → *répartiteur 8.* R делитель мощности; расщепитель мощности. D Leistungsteiler. E divisor de potencia. I divisore di potenza. N vermogenverdeler. P dzielnik mocy. S effektdelare. (726)
6. **voltage divider** : a device comprising resistors, inductors, capacitors, transformer(s) or a combination of these components such that between two points of the device a desired fraction of the voltage applied to the device as a whole can be obtained. ★ diviseur de tension → *diviseur 4.* R делитель напряжения. D Spannungsteiler. E divisor de tensión. I divisore di tensione. N spanningsdeler. P dzielnik napięcia. S spänningsdelare. (301)
7. **voltage divider** (*Syn.* potentiometer) : → *potentiometer 2*
8. **voltage ratio of a capacitor divider** : → *ratio 103*
9. **(voltage) ratio of a capacitor divider** : → *ratio 104*

dividing

1. **dividing box** : → *box 5*

division

1. **code division** : a technique whereby orthogonal signals are used to provide distinct transmission channels, for example in multiplexing, switching or multiple access operations ; such signals being distinguishable even when they share the same frequency bands and the same time intervals. ★ répartition en code → *répartition 23.* R кодовое разделение. D Codevielfach; Codemultiplex. E división por código. I divisione a codice. N codeverdeling. P podział kodowy. S koddelning. (701,714)
2. **code division multiplexing** : → *multiplexing 1*
3. **frequency division** : a technique whereby a separate distinct frequency band is used for each transmission channel, for example in multiplexing, switching or multiple access operations. ★ répartition en fréquence → *répartition 24.* R частотное разделение. D Frequenzvielfach; Frequenzmultiplex. E división por frecuencia. I divisione di frequenza. N frequentieverdeling. P podział częstotliwościowy. S frekvensdelning. (701,714)
4. **frequency division multiplexing** : → *multiplexing 3*
5. **frequency division switching** : → *switching 23*
6. **length of a scale division** : → *length 18*
7. **scale division** : the interval between any two consecutive scale marks. ★ division (d'une échelle) → *division 1.* R деление (шкалы). D Skalenteil. E división (de una escala). I divisione. N schaaldeel. P działka elementarna. S skaldel. (301)
8. **space division** : a technique whereby a separate individual transmission path is used for each transmission channel for example in multiplexing, switching or multiple access operations. ★ répartition spatiale → *répartition 28.* R пространственное разделение. D Raumvielfach; Raummultiplex. E división por espacio. I divisione di spazio. N ruimteverdeling. P podział przestrzenny. S rumsdelning. (701,714)
9. **space division switching** : → *switching 42*
10. **time division** : a technique whereby a separate distinct recurrent time interval is used for each transmission channel, for example in multiplexing, switching or multiple access operations. ★ répartition temporelle → *répartition 33.* R временное разделение. D Zeitvielfach; Zeitmultiplex. E división por tiempo. I divisione di tempo. N tijdverdeling. P podział czasowy. S tidsdelning. (701,714)
11. **time division multiplex transmission** : → *transmission 72*
12. **time division multiplexing** : → *multiplexing 6*
13. **time division multiplexing** : → *multiplexing 7*
14. **time division switching** : → *switching 71*
15. **wavelength division multiplexing** : → *multiplexing 8*
16. **wavelength division multiplexing** : → *multiplexing 9*

DM

1. **DM** (*Syn.* delta modulation) : → *modulation 14*

document

1. **document facsimile** : → *facsimile 2*
2. **document facsimile equipment, Group 1** : → *equipment 25*
3. **document facsimile equipment, Group 2** : → *equipment 26*
4. **document facsimile equipment, Group 3** : → *equipment 27*
5. **document facsimile telegram** : → *telegram 2*

Dolph-Chebyshev

1. **Dolph-Chebyshev array** (*Syn.* Chebyshev array) : → *array 6*

domain

1. **domain wall** : → *wall 5*
2. **optical time domain reflectometry** : → *reflectometry 1*
3. **(Weiss) domain** : a region within a magnetic substance that has a spontaneous magnetization of a substantially uniform magnitude and direction. *Note.* — These domains are separated by Bloch walls. ★ domaine (de Weiss) → *domaine 17.* R домен. D Weissscher Bezirk. E dominio (de Weiss). I dominio (di Weiss). N Weissgebied; magnetisch domein. P domena Weissa. S (magnetisk) domän. (121)

dome

1. **dome loudspeaker** : → *loudspeaker 3*
2. **sonar dome** : faired acoustically transparent enclosure used to minimize noise by reduction of turbulence and cavitation arising from motion through the water. ★ dôme du sonar → *dôme 3.* R обтекатель гидроакустической станции. D Sonardom. E bóveda del sonar. I cupola del sonar. N sonarkoepel. P kopuła sonaru. S sonardom. (801)
3. **sonar dome insertion loss** : → *loss 89*
4. **sonar dome loss directivity-pattern** : → *directivity-pattern 1*

domestic

1. **domestic tariff** : → *tariff 7*

dominant

1. **dominant mode** : → *mode 19*
2. **dominant wavelength** : → *wavelength 6*

donor

1. **donor** : an imperfection in a crystal lattice which, where it is predominant, permits electron conductions by the donation of electrons. ★ donneur → *donneur 1.* R донор. D Donator. E donador. I donatore. N donor. P donor. S donator. (521)
2. **donor level** : → *level 14*
3. **ionizing energy of donor** : → *energy 57*

door

1. **arc furnace side door** : an opening in the furnace shell at 90° to the slagging door and through which access is made to the working surface of the charge, within the furnace. ★ porte latérale d'un four à arc → *porte 9.* R боковое отверстие дуговой печи. D Seitentür des Lichtbogenofens. E puerta lateral de un horno de arco. I porta laterale di un forno ad arco. N zijdeur (van een boogoven). P drzwiczki boczne (pieca łukowego). S sidolucka. (841)
2. **arc furnace slagging door** : an opening for access to the inside of the furnace shell through which additions are usually added to the melt and from which molten slag is allowed to run off, the furnace being back-tilted. ★ porte de décrassage d'un four à arc → *porte 7.* R шлаковая летка дуговой печи. D Schlackentür am Lichtbogenofen. E puerta escorificadora de un horno de arco. I porta di scorifica di un forno ad arco. N slakaftapdeur (van een boogoven). P drzwiczki żużlowe (pieca łukowego). S slagglucka. (841)
3. **door** : access or exit closure to the furnace chamber normally power-operated and often counterbalanced. ★ porte → *porte 5.* R дверца. D Tür. E puerta. I porta. N deur. P drzwi; drzwiczki. S ugnslucka. (841)
4. **door counter balance** : → *counter 3*
5. **door seal** : → *seal 3*

door-knob

1. **door-knob transformer** : → *transformer 26*

dopant

1. **dopant** : an additive used in the growth process which may change the chemical composition and affect the physical or electrical properties of the synthetic quartz batch. ★ dopant → *dopant 1.* R присадка. D Dopant. E dopante. I drogaggio. N bijmengsel. P domieszka. S dopningsämne. (561)

doping

1. **doping** (of a semiconductor) : the addition of impurities to a semiconductor to achieve a desired N type conductivity or P type conductivity. ★ dopage → *dopage 1.* R легирование (полупроводника). D dotieren (eines Halbleiters). E dopado (de un semiconductor). I drogaggio (di un semiconduttore). N dotering (van een halfgeleider). P domieszkowanie (półprzewodnika). S dopning. (521)

Doppler

1. **Doppler averaged cross-section** : → *cross-section 9*

dose

1. **absorbed dose** (in radiology) (D) : the quotient of the energy imparted to matter by ionizing radiation in a suitably small element of volume of mass d*m*.

$$D = \frac{d\varepsilon}{dm}$$

★ dose absorbée → *dose 10.* R поглощенная доза излучения; доза излучения. D Energiedosis. E dosis absorbida. I dose assorbita. N dosis; (geabsorbeerde) dosis. P dawka pochłonięta. S absorberad dos; stråldos. (391,881)
2. **absorbed dose index** : → *index 1*
3. **absorbed dose rate** : → *rate 1*
4. **accident dose** : an absorbed dose, usually exceeding that corresponding to a dose equivalent limit, which a person has received involuntarily. ★ dose exceptionnelle non concertée → *dose 29.* R случайная доза. D Unfalldosis. E dosis accidental. I dose accidentale. N schadelijke dosis. P dawka przypadkowa. S överdos. (881)
5. **actinic dose** : quantity obtained by weighting spectrally the dose according to the actinic action spectrum value at the corresponding wavelength. Unit: $J \cdot m^{-2}$ *Note.* — This definition implies that an action spectrum is adopted for the actinic effect considered, and that its maximum value is 1. When giving a quantitative amount, it is essential to specify which quantity dose or actinic dose is meant, as the unit is the same. ★ dose actinique → *dose 13.* R актиничная доза. D aktinische Dosis. E dosis actínica. I dose attinica. N actinische dosis. P dawka aktyniczna. S aktinisk dos. (845)
6. **ambient dose** : the dose equivalent or absorbed dose to soft tissue measured by an ambient dose meter at a point in an occupied area. ★ dose ambiante → *dose 14.* R доза в окружающей среде. D Ortsdosis. E dosis ambiente. I dose ambientale. N omgevingsdosis. P dawka w otoczeniu. S omgivningsdos. (881)
7. **ambient dose rate** : → *rate 3*
8. **(biologically) equivalent single dose** : that single absorbed dose, delivered in a time shorter than the intercellular recovery (about 2 to 3 hours), that would produce the same biological effect as a particular series of fractionated irradiations. ★ dose unique (biologiquement) équivalente → *dose 35.* R (биологически) эквивалентная отдельная доза. D (biologisch) äquivalente Einzeldosis. E dosis única (biológicamente) equivalente. I dose singola equivalente biologicamente. N (biologisch) equivalente eenmalige dosis. P równoważnik pojedynczej dawki (biologicznej). S biologiskt ekvivalent enkeldos. (881)
9. **collective dose equivalent** : → *equivalent 4*
10. **committed dose equivalent** : → *equivalent 5*
11. **cumulative absorbed dose** : the sum of the absorbed doses in the same region for a series of irradiations. ★ dose cumulée → *dose 19.* R суммарная поглощенная доза. D kumulative Dosis. E dosis absorbida acumulada. I dose assorbita cumulativa. N gecumuleerde geabsorbeerde dosis. P kumulacyjna dawka pochłonięta. S kumulativ dos. (881)
12. **cumulative dose** : the sum of all dose equivalents for an organ or the body of an individual, up to a specified date. ★ dose cumulée → *dose 20.* R суммарная доза. D kumulative Dosis. E dosis acumulada. I dose cumulativa. N gecumuleerde dosis. P dawka kumulacyjna. S ackumulerad dos. (881)
13. **depth dose** : the absorbed dose at a particular depth beneath the surface of the body. ★ dose en profondeur → *dose 26.* R глубинная доза. D Tiefendosis. E dosis en profundidad. I dose profonda. N dieptedosis. P dawka głębinowa. S djupdos. (881)
14. **dose** (of optical radiation of specified spectral distribution) : term used in photochemistry, phototherapy and photobiology for the quantity radiant exposure. Unit: $J \cdot m^{-2}$. ★ dose → *dose 7.* R доза (оптического излучения данного относительного спектрального распределения). D Dosis (optischer Strahlung mit vorgegebener spektraler Verteilung). E dosis. I dose. N dosis. P dawka. S dos. (845)
15. dose (deprecated) : deprecated term without a qualifier such as in "absorbed dose", "dose equivalent", etc. ★ dose → *dose 8.* R доза (не рекомендуется). D Dosis (veralteter Begriff). E dosis (desaconsejado). I dose (sconsigliato). N dosis. P dawka (termin nie zalecany). S dos. (881)
16. **dose equivalent** : → *equivalent 8*
17. **dose equivalent index** : → *index 12*
18. **dose equivalent limit** : → *limit 5*
19. **dose equivalent rate** : → *rate 23*
20. **dose fractionation** : → *fractionation 1*
21. **dose protraction** : → *protraction 1*
22. **dose rate** : → *rate 24*
23. **dose ratemeter** : → *ratemeter 2*
24. **effective dose** : that part of the dose which actually produces the actinic effects considered. Unit: $J \cdot m^{-2}$. ★ dose effective → *dose 25.* R эффективная доза. D wirksame Dosis. E dosis efectiva. I dose effettiva. N effectieve dosis. P dawka efektywna; dawka skuteczna. S effektiv dos. (845)
25. **effective dose equivalent** : → *equivalent 13*
26. **emergency dose** : an absorbed dose, exceeding that corresponding to a dose equivalent limit, knowingly received in an emergency such as : - bringing help to endangered individuals, - preventing receipt of a large collective dose equivalent, - saving a valuable installation. ★ dose exceptionnelle concertée → *dose 28.* R доза при чрезвычайных обстоятельствах. D Notfalldosis. E dosis de emergencia. I dose di emergenza. N nooddosis. P dawka niebezpieczna. S riskdos. (881)
27. **epilation dose** : the value of the skin dose that produces temporary loss of hair after a latent period. ★ dose d'épilation → *dose 23.* R эпиляционная доза. D Epilationsdosis. E dosis

de depilacion. I dose di depilazione. N epilatiedosis. P dawka epilacyjna. S epilationsdos. (881)

28. **erythema dose** : for a specified acute irradiation, the absorbed dose to the skin that produces, after a latent period of about 30 days, a specified reddening of the skin which converts to pigmentation. ★ dose (d')érythème → *dose 24.* R эритемная доза. D Erythemdosis. E dosis de eritema. I dose-eritema. N erytheemdosis. P dawka rumieniowa. S erythemdos. (881)
29. **exit dose** : the absorbed dose delivered by a beam of radiation at the surface through which the beam emerges from the body. ★ dose de sortie → *dose 22.* R доза на выходе. D Austrittsdosis. E dosis de salida. I dose emergente. N uittreedosis. P dawka wyjściowa. S utträdesdos. (881)
30. first collision dose (deprecated) : a quantity which has sometimes been used with the same meaning as kerma and sometimes with a some-what different meaning. ★ dose de première collision → *dose 21.* R доза первых столкновений (не рекомендуется). D Einfachstoss-Dosis (veralteter Begriff). E dosis de primera colisión (desaconsejado). I dose di prima collisione (sconsigliato). N dosis bij eerste botsing. P dawka pierwszego zderzenia (termin nie zalecany). S ..... (881)
31. **genetically significant dose** : the absorbed dose which, if received by every member of a population, would be expected to produce the same total genetic injury to the population as do the actual dose received by the various individuals. ★ dose annuelle génétiquement significative → *dose 15.* R генетически значимая доза. D genetisch signifikante Dosis. E dosis anual genéticamente significativa. I dose geneticamente significativa. N genetisch significante dosis. P dawka znacząca genetycznie. S genetiskt signifikant dos. (881)
32. **gonadal dose** : the dose equivalent to ovaries or testes. ★ équivalent de dose annuel génétiquement significatif → *équivalent 29.* R гонадная доза. D Gonadendosis. E dosis en las gonadas. I dose dalle gonadi. N dosis voor de gonade. P dawka na gonady. S gonaddos. (881)
33. **ion dose** : the quotient of dQ by dm where dQ is the sum of electric charges on all ions of one sign produced in air of mass dm, $J = \mathrm{d}Q/\mathrm{d}m$. The SI unit of ion dose is the coulomb per kilogram C kg^{-1}. The earlier special unit of ion dose, still in temporary use, was the roentgen 1 R = 2.58×10^{-4} C k^{-1}. ★ dose ionique → *dose 31.* R ионная доза. D Ionendosis. E dosis ionica. I dose ionica. N ionendosis. P dawka jonowa. S jondos. (881)
34. **maximum absorbed dose** (*Syn.* peak absorbed dose) : the maximum value of the absorbed dose along the beam axis. ★ dose absorbée maximale → *dose 12.* R максимальная поглощенная доза. D Maximumsdosis. E dosis absorbida máxima; dosis absorbida de cresta. I dose assorbita massima. N (geabsorbeerde) piekdosis. P maksymalna dawka pochłonięta. S dosmaximum. (881)
35. **median lethal dose** (*Syn.* MLD (abbreviation); LD_{50} (abbreviation)) : the uniform absorbed dose for a specified radiation, which kills, within a specified time, 50 per cent of individuals of a large group of animals or other living organisms. *Note.* — It is usual to write the related period as index after the LD_{50}, i.e. $LD_{50/30}$ for LD_{50} after 30 days. ★ dose létale moyenne → *dose 32.* R среднелетальная доза (доза половинной выживаемости). D mediane Letaldosis; LD_{50}. E dosis letal media (DLM o DL 50); DLM (abreviatura); DL_{50} (en abreviatura). I dose letale media; LD_{50}. N letale-dosimediaan. P dawka śmiertelna 50%; DL_{50}. S medianletaldos. (881)
36. **minimum erythema dose** (*Syn.* MED) : the actinic dose that produces a just noticeable erythema on a normal, non-exposed, "white" skin. *Note.* — This quantity corresponds to a radiant exposure of monochromatic radiation at the maximum spectral efficiency (λ = 295 nm) of roughly 100 $J \cdot m^{-2}$. ★ dose érythémale minimale → *dose 27.* R минимальная эритемная доза; МЕД (аббревиатура). D minimale Erythem-Dosis; MED (abkürzung). E dosis eritemal mínima. I dose eritemale minima. N minimum erytheemdosis; MED. P dawka minimalna wywołująca erytemę. S minimal erytemdos. (845)
37. **partial body dose** : the dose equivalent to specified parts or organs of the body of an individual. ★ dose corporelle partielle → *dose 18.* R доза, полученная какой-либо частью тела. D Teilkörperdosis. E dosis corporal parcial. I dose parziale. N dosis voor een deel van het lichaam. P dawka na część ciała. S delkroppsdos. (881)
38. **peak absorbed dose** (*Syn.* maximum absorbed dose) : → *dose 34*
39. **percentage depth dose** : the ratio, expressed as a percentage, of the absorbed dose D_x at a depth x to the absorbed dose D_0 at a fixed reference point on the beam axis. The reference point lies at the surface, at the depth of maximum absorbed d ose or at another specific depth. ★ rendement en profondeur → *rendement 31.* R процентная глубинная доза. D relative Tiefendosis. E rendimiento en profundidad; porcentaje de dosis en profundidad. I dose profonda percentuale. N procentuele dieptedosis. P procentowa dawka głębinowa. S procentuell djupdos. (881)
40. **personal dose** : the dose equivalent measured by a personal dosemeter. ★ dose individuelle → *dose 30.* R индивидуальная доза. D Personendosis. E dosis individual. I dose individuale. N persoonlijke dosis. P dawka osobista. S persondos. (881)
41. **surface dose** : the absorbed dose at a point on the skin. *Note.* — Usually it is the absorbed dose at the level of the basal layer of the epidermis which is of interest. ★ dose à la peau → *dose 9.* R поверхностная доза. D Oberflächendosis. E dosis en la piel. I dose superficiale. N oppervlaktedosis. P dawka powierzchniowa. S ytdos; huddos. (881)
42. **threshold dose** : the minimum vaue of absorbed dose that will produce a specified observable effect. ★ dose seuil → *dose 33.* R пороговая доза. D Schwellendosis. E dosis umbral. I dose-soglia. N drempeldosis. P dawka progowa. S tröskeldos. (881)
43. **threshold erythema dose** : for a specified radiation, the smallest absorbed dose to the skin that produces an observable reddening of the skin. ★ dose seuil d'érythème → *dose 34.* R пороговая эритемная доза. D Schwellen-Erythemdosis. E dosis umbral de eritema. I dose-eritema soglia. N erytheemdrempeldosis. P progowa dawka rumieniowa. S erythem tröskeldos. (881)
44. **whole body dose** : the dose equivalent to the body of an individual when uniformly irradiated. ★ dose corporelle → *dose 17.* R доза, полученная всем организмом. D Ganzkörperdosis. E dosis corporal. I dose globale. N dosis voor het hele lichaam. P dawka na całe ciało. S helkroppsdos. (881)

dosemeter

1. **calorimetric dosemeter** : an assembly for measuring the heat produced in a absorber situated in a calorimeter ; thus a calorimeter can be used to measure the energy fluence or absorbed dose of radiation, or the total energy emitted from a radioactive source. ★ dosimètre calorimétrique → *dosimètre 4.* R дозиметр калориметрического типа. D kalorimetrisches Dosimeter. E dosímetro colorimétrico. I dosimetro calorimetrico. N calorimetrische dosismeter. P dawkomierz kalorymetryczny. S kalorimetrisk dosmätare. (881)
2. **chemical dosemeter** : a dosemeter employing the radiochemical effects produced in some standard material. ★ dosimètre chimique → *dosimètre 5.* R химический дозиметр. D chemisches Dosimeter. E dosímetro químico. I dosimetro chimico. N chemische dosismeter. P dawkomierz chemiczny. S kemisk dosmätare. (881)
3. **direct reading pocket dosemeter** : a pocket dosemeter comprising a capacitor ionization chamber and an electrometer which may be read directly. ★ stylo dosimètre à lecture directe → *dosimètre 17.* R прямопоказывающий карманный дозиметр. D direkt ablesbares Taschendosimeter. E dosímetro de bolsillo de lectura directa. I stilo dosimetro a lettura diretta. N direct afleesbare zakdosismeter (pentype); pendosismeter; zakdosismeter (pentype); pendosismeter; direct afleesbare. P dawkomierz kieszonkowy z bezpośrednim odczytem. S penndosmätare med direktavläsning. (391,881)
4. **dosemeter** : a radiation meter intended to measure the absorbed dose. *Note.* — In a wider sense this term is also used in exposure measurement. This use is deprecated and the term exposure meter is more particularly applied to exposure measurement. ★ dosimètre → *dosimètre 3.* R дозиметр. D Dosimeter. E dosímetro. I dosimetro. N dosismeter. P dawkomierz. S dosmätare; dosimeter. (391,881)
5. **dosemeter charger** : → *charger 1*
6. **dosemeter charger reader** : → *reader 1*
7. **exoelectron dosemeter** : a dosemeter in which electrons are liberated from the surface of the detector material (e.g.,

beryllium oxide or lithium fluoride) by thermal stimulation. ★ dosimètre exoélectron → *dosimètre 7.* R экзоэлектронный дозиметр. D Exoelektronen-Dosimeter. E dosímetro exoelectrón. I dosimetro a esoelettroni. N ..... P dawkomierz egzoelektronowy. S exoelektrondosmätare. (881)

8. **film dosemeter** (*Syn.* film badge) : → *badge 1*
9. **Fricke dosemeter** : a chemical dosemeter involving the oxidation by radiation of ferrous ions in dilute sulphuric acid. ★ dosimètre de Fricke → *dosimètre 6.* R дозиметр Фрике. D Fricke-Dosimeter. E dosímetro de Fricke. I dosimetro di Fricke. N Frikedosismeter. P dawkomierz Fricke'a. S Fricke-dosmätare. (881)
10. **indirect reading pocket dosemeter** : pocket dosemeter comprising a capacitor ionization chamber which must be read with a separate reader. ★ stylo dosimètre à lecture indirecte → *stylo 3.* R карманный дозиметр с косвенным отсчетом показаний. D indirekt ablesbares Taschendosimeter. E dosímetro de bolsillo de lectura indirecta. I stilo dosimetro a lettura indiretta. N zakdosismeter (pentype); pendosismeter; niet direct afleesbare. P dawkomierz kieszonkowy z pośrednim odczytem. S penndosmätare med indirekt avläsning. (391,881)
11. **integrating dosemeter** : a dosemeter which indicates or records the absorbed dose by integrating the absorbed dose rate with respect to time. ★ dosimètre intégrateur → *dosimètre 11.* R интегрирующий дозиметр. D integrierendes Dosimeter. E dosímetro integrador. I dosimetro integratore. N integrerende dosismeter. P dawkomierz całkujący. S integrerande dosmätare. (881)
12. **personal dosemeter** : dosemeter of small size intended to be carried by a person in order to determine the absorbed dose received by this person. ★ dosimètre individuel → *dosimètre 8.* R индивидуальный дозиметр. D Personendosimeter. E dosímetro individual. I dosimetro individuale. N persoonlijk dosismeter. P dawkomierz indywidualny. S persondosmätare. (391,881)
13. **photoluminescent personal dosemeter** : personal dosemeter comprising a photoluminescence detector, a separate reader being used for reading. ★ dosimètre individuel à photoluminescence → *dosimètre 9.* R индивидуальный радиофотолюминесцентный дозиметр. D Photoluminiszenz-Personendosimeter. E dosímetro individual de fotoluminiscencia. I dosimetro individuale a fotoluminescenza. N persoonlijke dosismeter met fotoluminescentie. P indywidualny dawkomierz fotoluminescencyjny. S fotoluminiscenspersondosmätare. (391,881)
14. **pocket dosemeter** : personal dosemeter with the form and the dimensions of a fountain-pen. ★ stylo dosimètre → *dosimètre 16.* R карманный дозиметр. D Taschendosimeter. E dosímetro de bolsillo. I stilo dosimetro. N pendosismeter; zakdosismeter (pentype). P dawkomierz kieszonkowy. S penndosmätare; penndosimeter. (391,881)
15. **reader for photoluminescent dosemeter** : → *reader 3*
16. **reader for thermoluminescent dosemeter** : → *reader 5*
17. **thermoluminescent personal dosemeter** : personal dosemeter comprising a thermoluminescence detector, a separate reader being used for reading. ★ dosimètre individuel à thermoluminescence → *dosimètre 10.* R индивидуальный термолюминесцентый дозимер. D Thermoluminiszenz-Personendosimeter. E dosímetro individual de termoluminiscencia. I dosimetro individuale a termoluminescenza. N persoonlijke dosismeter met thermoluminescentie. P indywidualny dawkomierz termoluminescencyjny. S termoluminiscenspersondosmätare. (391,881)

dosimetry

1. **dosimetry** : all the methods either of measuring directly, or of measuring indirectly and computing, absorbed dose, absorbed dose rate, exposure, exposure rate, dose equivalent, etc. and the science associated with these methods. ★ dosimétrie → *dosimétrie 1.* R дозиметрия. D Dosimetrie. E dosimetría. I dosimetria. N dosimetrie. P dozymetria. S dosimetri. (881)

dot

1. **dot** (in Morse code) : a signal element of mark condition and of duration of one unit interval followed by a signal element of space condition having a nominal duration of one unit interval. ★ point → *point 7.* R точка (в коде Морзе). D Punkt (im Morse-Code). E punto (en código Morse). I punto. N punt (bij Morsecode). P kropka (w kodzie Morse'a). S punkt. (721)
2. **dot frequency** : → *frequency 33*
3. **dot sequential colour television system** : → *system 49*
4. **subcarrier dot pattern** : → *pattern 29*

dotted

1. **dotted line recorder** : → *recorder 5*

double

1. **convertor section of a double convertor** : → *section 4*
2. **double action mechanical system** : → *mechanical system 4*
3. **double busbar substation** : → *substation 5*
4. **double catenary equipment** : → *equipment 28*
5. **double circuit line** : → *line 28*
6. **double circuit semi-vertical configuration** : → *configuration 6*
7. **double circuit vertical configuration** : → *configuration 7*
8. **double command** : → *command 6*
9. **double commutator motor** : → *motor 24*
10. **double convertor** : → *convertor 15*
11. **double crucible technique** : → *technique 8*
12. **double current transmission** : → *transmission 22*
13. **double error** : → *error 22*
14. **double faults** : → *fault 13*
15. **double focus tube** : → *tube 22*
16. **double heading** : → *heading 1*
17. **double insulation** : → *insulation 13*
18. **double lacing** (*Syn.* double warren) : → *warren 1*
19. **double lacing redundant support** (*Syn.* double warren redundant support) : → *support 8*
20. **double line to ground fault** (*Syn.* two-phase-to-earth fault) : → *fault 82*
21. **double minimum power points** (*Syn.* twice minimum power points) : → *point 51*
22. **double motor** : → *motor 25*
23. **double phantom circuit** : → *circuit 61*
24. **double pressure locking mechanical system** : → *mechanical system 5*
25. **double seizure** : → *seizure 2*
26. **double sideband** : → *sideband 2*
27. **double tramway equipment** : → *equipment 29*
28. **double tube** : → *tube 23*
29. **double warren** : → *warren 1*
30. **double warren redundant support** : → *support 8*
31. **double wound synchronous generator** : → *generator 12*
32. **earth-return double phantom circuit** : → *circuit 64*
33. **Kelvin (double) bridge** : → *bridge 13*
34. **magneto-ionic double refraction** : → *refraction 1*
35. **Thomson (double) bridge** (*Syn.* Kelvin (double) bridge) : → *bridge 13*

double-beam

1. **double-beam cathode-ray tube** (*Syn.* split-beam cathode-ray tube) : → *cathode-ray tube 8*

double-break

1. **double-break disconnector** : → *disconnector 5*

double-emulsion

1. **double-emulsion film** : → *film 2*

double-ended

1. **double-ended synchronization** : → *synchronization 1*

double-fed

1. **double-fed asynchronous machine** : → *machine 9*

double-gun

1. **double-gun cathode-ray tube** : → *cathode-ray tube 6*

double-lapped

1. **double-lapped joint** : → *joint 7*

double-layer

1. **double-layer** : the model representing the structure of an electrolyte at the electrode interface comprising a rigid layer,

called Helmholtz layer, and a diffuse layer, called Gouy layer. ★ double-couche → *double-couche 1.* R двойной слой. D Doppelschicht. E doble capa. I doppio strato. N dubbellaag. P warstwa podwójna. S dubbelskikt. (111)

double-point

1. **double-point information** : → *information 3*

double-reduction

1. **double-reduction gearing** : → *gearing 2*

double-sided

1. **double-sided field system** : → *system 50*
2. **double-sided printed board** : → *board 3*
3. **flexible double-sided printed board** : → *board 4*
4. **flex-rigid double-sided printed board** : → *board 8*
5. **rigid double-sided printed board** : → *board 18*

doublet

1. **doublet** : an ordered set of two binary digits. ★ doublet → *doublet 2.* R дублет. D Dublette. E doblete. I doppietto. N doublet. P dublet. S tvåbitsgrupp. (702,721)
2. **doublet (antenna)** (*Syn.* dipole (antenna)) : → *dipole 1*
3. **half doublet** (*Syn.* half dipole) : → *dipole 8*
4. **unit doublet** : a distribution (generalized function) that can be considered as the derivative $\delta'(t)$ of the unit pulse. *Note.* — In the same conditions as above:

$$f'(t_0) = -\int_{t_1}^{t_2} \delta'(t - t_0) f(t) dt$$

★ doublet unité → *doublet 14.* R импульсная функция второго порядка. D Einheits-Wechselstoß. E doblete unidad. I doppietto unitario. N eenheidsdoublet. P pochodna funkcji Diraca. S enhetsdubblett. (101)

double-way

1. **double-way connection** : → *connection 26*

down-lead

1. **down-lead (of an antenna)** : a vertical or inclined feed line or segment of a feed line connected at its upper end to an antenna and its lower end to a receiver. ★ descente d'antenne → *descente 1.* R снижение антенны. D Niederführung (einer Antenne); Ableitung (einer Antenne). E bajada (de una antena). I discesa d'antenna. N antenneverbinding. P doprowadzenie do anteny. S nedledning. (712)

downlight

1. **downlight** : small luminaire concentrating the light, usually recessed in the ceiling. ★ plafonnier intensif → *plafonnier 2.* R ..... D ..... E proyector empotrado. I faretto da incasso. N inbouwspot. P ..... S smalstrålande armatur. (845)

downstream

1. **downstream** : pertaining to locations on the tape longitudinally displaced from a given reference point in the direction of tape motion. ★ partie en aval → *partie 9.* R смещение по ходу ленты. D in Bandlaufrichtung. E parte a pasar. I parte a valle. N stroomafwaarts. P w kierunku przesuwu. S ..... (806)
2. **downstream chromakey** : → *chromakey 2*

downward

1. **cumulative downward flux proportion** : → *proportion 1*
2. **downward flux** : → *flux 5*
3. **downward flux fraction** : → *fraction 3*
4. **downward light output ratio** : → *ratio 32*

DPCM

1. **DPCM** (*Syn.* differential pulse code modulation) : → *modulation 17*

DPDM

1. **DPDM** (*Syn.* digital pulse duration modulation) : → *modulation 18*
2. **DPDM** (*Syn.* bit error rate) : → *error 8*

DPSK

1. **DPSK** (*Syn.* differential phase shift keying) : → *keying 2*

drag

1. **magnetic drag** : the retarding effect caused by eddy currents in a linear motor or in a magnetic levitation system. ★ traînée magnétique → *traînée 2.* R магнитное сопротивление движению. D magnetischer Schweif; magnetische Schleppe. E galga magnética. I resistenza magnetica. N magnetische vertraging. P przeciwciąg magnetyczny. S virvelströmsbromsning. (811)
2. **needle drag** (*Syn.* stylus drag) : → *drag 3*
3. **stylus drag** (*Syn.* needle drag) : the force resulting from the friction between the surface of the disk and the reproducing stylus. ★ frottement de la pointe de lecture → *frottement 3.* R сила тяги. D Nadelreibung. E frotamiento de la aguja de lectura. I attrito della puntina di riproduzione. N naaldsleepkracht. P tarcie igły. S nåldrag. (806)

drain

1. **drain** (*Syn.* draining device) : a device which permits liquids to flow out from an enclosure and which maintains the integrity of the type of protection. ★ drain → *drain 1.* R дренаж; дренажное устройство. D Abfluß; Entwässerungseinrichtung. E drenaje; dispositivo de drenaje. I dispositivo di drenaggio. N aftap. P dren. S dräneringsdon. (426)
2. **drain** (of field-effect transistors) : a region into which majority carriers flow from the channel. ★ drain → *drain 2.* R сток (полевого транзистора). D Drain (eines Feldeffekttransistors). E sumidero (de un transistor de efecto de campo). I scarico. N afvoer(elektrode) (van een veldeffecttransistor). P dren (w tranzystorze polowym); ujście (w tranzystorze polowym). S kollektor (hos fälteffekttransistor). (521)

drained

1. **charged drained (secondary) battery** : → *battery 17*
2. **discharged drained (secondary) battery** : → *battery 28*

draining

1. **draining device** (*Syn.* drain) : → *drain 1*

draught

1. **forced draught cooling tower** : → *tower 3*

draw

1. **draw lead bushing** : → *bushing 7*

draw-bar

1. **draw-bar pull** : → *pull 1*
2. **output at the draw-bar** : → *output 34*

drawing

1. **drawing furnace** : → *furnace 16*

drier

1. **drier** : a breather containing a hygroscopic material to absorb the moisture in the air entering the transformer. ★ dessiccateur → *dessiccateur 1.* R воздухоосушитель. D Luftentfeuchter. E desecador. I essiccatore. N luchtdrogen. P odwilżacz. S avfuktare. (811)

drift

1. **drift** : a change of a stability error, generally slow, continuous and not necessarily in the same direction. ★ dérive → *dérive 3.* R дрейф. D Drift. E deriva. I deriva. N drift. P dryft. S drift. (303)
2. **drift** (in common channel signalling) : an effect caused at a signalling terminal when the two signalling channels in opposite directions in the same signalling link are not synchronized to each other, and in which there is not a one-to-one correspondence between transmitted and received signal units over a long period ; additionally, where signal units are assembled into blocks, there is not a one-to-one correspondence between transmitted and received blocks. ★ dérive → *dérive 4.* R дрейф (в сигнализации по общему каналу). D Verschiebung (in ZZG); Verzug (in ZZG). E deriva (en señalización por canal común). I deriva (nella segnalazione a canale comune). N ..... P dryft. S drift. (714)
3. **drift** : an undesired slow variation speed of the recording medium during the recording/reproducing process. ★ dérive → *dérive 5.* R дрейф скорости. D Drift, Änderung der Geschwindigkeit. E deriva. I deriva. N drift. P płynięcie prędkości. S drift. (806)

4. **drift compensation** : → *compensation 5*
5. **drift failure** (*Syn.* gradual failure) : → *failure 27*
6. **(drift) mobility** : → *mobility 1*
7. **drift space** : → *space 10*
8. **frequency drift** : an undesired progressive and slow change in frequency with time. ★ dérive de fréquence → *dérive 6.* R уход частоты. D Frequenzdrift. E deriva de frecuencia. I deriva di frequenza. N frequentiedrift. P dryft częstotliwości. S frekvensdrift. (531,702)

drifted

1. **lithium drifted semiconductor detector** : → *semiconductor detector 8*

drip-proof

1. **drip-proof** : applied to a machine so constructed that liquid or solid particles falling vertically or at a specified small angle on it cannot cause interference with satisfactory operation. ★ machine abritée → *machine 33.* R каплезащищенная машина. D tropfwassergeschützte Maschine. E máquina a prueba de goteo. I macchina protetta contro lo stillicidio. N druipwaterveilig. P maszyna kryta. S droppsäker. (411)

drive

1. **cardan-shaft drive** : a drive in which the flexible elements are universal joints or similar devices. ★ transmission à cardans → *transmission 58.* R карданный привод. D Kardanantrieb. E transmisión cardán. I trasmissione cardanica. N cardanaandrijving. P napęd przegubowy. S drivanordning med kardanaxel. (811)
2. **combined rack and adhesion drive** : transmission in which two linked gear trains are provided, giving appropriate speeds for the pinion engaged with the rack and for the wheels driving on the rails. ★ transmission combinée pour crémaillère et adhérence → *transmission 74.* R комбинированный привод для кремальеры и сцепления. D kombinierter Zahnrad-und Haftreibungsantrieb. E transmisión combinada por cremallera y adherencia. I trasmissione ad aderenza e cremagliera. N gecombineerde tandrad- en adhesie-aandrijving. P przekładnia do napędu zębatki i kół. S växel för kuggstångs- och adhesionsdrift. (811)
3. **control drive** : a device used for moving a control member in the course of reactor control. ★ mécanisme de commande → *mécanisme 3.* D Steuerantrieb. E mecanismo de control. I meccanismo di azionamento. N aandrijving (van een regellichaam). P napęd elementu sterowniczego. S drivdon för styrorgan. (026)
4. **control element drive mechanism** : → *mechanism 3*
5. **coupled axle drive** : a transmission arrangement in which one or more motors are coupled to a group of axles. ★ transmission multiple → *transmission 98.* R групповой привод. D Mehrradsatzantrieb. E transmisión múltiple. I trasmissione ad assi accoppiati. N gekoppelde asaandrijving. P napęd grupowy. S gemensam kraftöverföring. (811)
6. **direct drive** (*Syn.* gearless drive) : → *drive 12*
7. **drive mechanism** : → *mechanism 4*
8. **drive pin** : → *pin 3*
9. **flexible drive** : a device or equipment transmitting the output between motors and axles, whilst allowing for some relative displacement. ★ transmission élastique → *transmission 89.* R гибкий привод. D gefederter Antrieb; elastischer Antrieb. E transmisión elástica. I trasmissione elastica. N flexibele aandrijving. P przekładnia elastyczna. S flexibel kraftöverföring. (811)
10. **floating ring drive** : a transmission comprising a free-moving intermediate ring connected by links to both quill and axle. ★ transmission à anneau dansant → *transmission 55.* R привод с плавающим кольцом. D Antrieb mit schwebendem Ring. E transmisión por anillo flotante. I trasmissione ad anello danzante. N zwevende-ringaandrijving. P napęd o pierścieniu ruchowym. S drivanordning med länkkoppling. (811)
11. **frequency tolerance (due to variations in level of drive)** : → *tolerance 10*
12. **gearless drive** (*Syn.* direct drive) : a system in which the motor drives the axle directly, without intermediate gearing. ★ entraînement direct → *entraînement 7.* R безредукторный привод; непосредственный привод. D Direktantrieb. E arrastre directo. I comando diretto. N directe aandrijving. P napęd bezpośredni. S direktöverföring. (811)
13. **hollow shaft motor drive** : a drive in which the motor rotor is coupled to the gearing by means of a shaft coaxial with the hollow rotor shaft and connected to it by a flexible system. ★ transmission par moteur à arbre creux → *transmission 113.* R привод от двигателя с полым валом. D Ankerhohlwellenantrieb (Motor). E transmisión por motor de eje hueco. I trasmissione ad albero cavo. N holle-motorasaandrijving. P napęd silnikiem o wale drążonym. S rotorhålaxel. (811)
14. **individual axle drive locomotive** : → *locomotive 3*
15. **individual drive** : a transmission in which the driving axles are independent and in which each motor drives one axle only. ★ transmission individuelle → *transmission 92.* R индивидуальный привод. D Einzelradsatzantrieb. E transmisión individual. I comando singolo (degli assi). N individuele aandrijving. P napęd indywidualny. S individuell kraftöverföring. (811)
16. **level of drive** : → *level 49*
17. **monomotor drive** : a transmission arrangement in which one motor drives two or more axles on the same bogie. ★ transmission monomoteur → *transmission 97.* R мономоторный привод. D Einmotorenantrieb. E transmisión monomotor. I carrello monomotore. N monomotor. P napęd jednosilnikowy. S monomotordrift. (811)
18. **quill drive** : a drive comprising a hollow shaft round the axle, supported by the motor and connected to the driving wheels by a flexible system. ★ transmission à arbre creux → *transmission 57.* R привод с полым валом. D Hohlwellenantrieb. E transmisión por eje hueco. I trasmissione ad asse cavo. N holle-asaandrijving. P napęd wałem drążonym. S hålaxel. (811)
19. **right-angled drive** : gearing where the driving and driven shafts are in two planes at right angles, either as a pair of bevel gears or a reversible worm drive. ★ engrenage à pont → *engrenage 3.* R прямоугольная передача. D Winkelgetriebe. E engranaje de puente. I ingranaggi conici. N haakse overbrenging. P przekładnia zębata prostopadła. S vinkelväxel. (811)
20. **rod drive** : a coupled axle drive arrangement using side rods and cranks. ★ transmission par bielles → *transmission 109.* R шатунно-кривошипный привод. D Stangenantrieb. E transmisión por bielas. I trasmissione a bielle. N stangaandrijving. P napęd korbowy. S koppelstångsöverföring. (811)
21. **rubber spring drive** : a spring drive in which the flexible elements are made of rubber. ★ transmission à éléments de caoutchouc → *transmission 60.* R привод с резиновыми элементами. D Gummifederantrieb. E transmisión por elementos de caucho. I trasmissione ad elementi di gomma. N ..... P napęd elastyczny o wkładkach gumowych. S flexibel drivanordning med gummielement. (811)
22. **spring drive** : a flexible drive through springs mounted either in the driving wheels or in the gearing. ★ transmission à ressorts → *transmission 63.* R пружинный [упругий] привод. D Federantrieb. E transmisión por resortes. I trasmissione a molle. N flexibele aandrijving met stalen veren. P napęd elastyczny sprężynowy. S flexibel drivanordning med fjädrar. (811)

driven

1. **driven element** : → *element 14*
2. **driven pile** : → *pile 4*
3. **independently driven exciter** : → *exciter 5*
4. **positively driven operation** : → *operation 49*

driver

1. **driver's cab** : → *cab 2*
2. **driver's safety device** : → *device 21*

driving

1. **calibrated driving machine test** : → *test 11*
2. **chart driving mechanism** : → *mechanism 2*
3. **driving** : all the operations carried out on the traction and brake control equipment to start the vehicle or train, control its speed and brake it. ★ conduite (d'un train) → *conduite 7.* R управление движением. D Fahren. E conducción. I comando

(di un treno); condotta (di un treno). N besturing. P sterowanie (pociągiem). S manövrering. (811)

4. **driving mechanism** : → *mechanism 5*
5. **driving position** : → *position 8*
6. **driving power** : → *power 33*
7. **driving torque** (*Syn.* deflecting torque) : → *torque 10*
8. **driving trailer** : → *trailer 2*
9. **grid/cathode driving voltage** : → *voltage 78*
10. **grid driving power** (*Syn.* grid input power) : → *power 66*
11. **grid driving voltage** (*Syn.* grid input voltage) : → *voltage 80*

driving-point

1. **driving-point immittance of an n-port network** : → *immittance 1*
2. **driving-point impedance** : → *impedance 14*

droop

1. **droop of a set** : the ratio of the per-unit change in frequency $(\Delta f)/f_n$ (where f_n is the nominal frequency) to the per-unit change in power $(\Delta P)/P_n$ (where P_n is the nominal active power of the rotating machine). $\sigma = (\Delta f/f_n) / (\Delta P/P_n)$. ★ statisme d'un groupe → *statisme 3.* R статизм агрегата. D Statik eines Maschinensatzes. E estatismo de un grupo. I statismo di un gruppo. N statiek van een produktie-eenheid. P statyzm regulacji obrotów generatora. S maskinstatik. (603)
2. **droop of a system** : for a power system the ratio of the per-unit change in frequency to the corresponding per-unit change in active power demand. ★ statisme d'un réseau → *statisme 4.* R статизм энергосистемы. D Netzstatik. E estatismo de una red. I statismo di una rete. N netstatistiek. P statyzm charakterystyki częstotliwościowej systemu. S systemstatik. (603)

drooping

1. **drooping characteristic (of an arc welding power source)** : → *characteristic 34*

drop

1. **cathode drop** (*Syn.* cathode fall) : → *fall 2*
2. **drop** (*Syn.* subscriber's lead-in) : → *lead-in 3*
3. **impedance drop** : the product of the current and the internal impedance; this is the vectorial difference between the generated internal voltage and the terminal voltage of a machine. ★ chute de tension interne → *chute de tension 5.* R полное внутреннее падение напряжения. D innerer Spannungsabfall. E caída de tensión interna. I caduta di tensione interna. N inwendig spanningsverlies. P spadek napięcia na impedancji wewnętrznej. S impedansspänningsfall. (411)

drop-bottom

1. **drop-bottom charging basket** : → *basket 2*

drop-out

1. **drop-out** : a serious momentary reduction of the reproduced signal level. ★ perte de niveau → *perte 21.* R выпадение. D Aussetzer; Drop-out. E pérdida de nivel. I perdita di livello. N drop-out (niet aanbevolen). P zanik. S (signal)nivåfall. (806)
2. **drop-out fuse** : → *fuse 1*

dropper

1. **dropper** (*Syn.* swinging bracket (USA)) : a fitting which lowers the upper attachment point of a suspension set. (see figure 466-7). ★ V de suspension → *V 4.* R подвеска. D Schwinge. E alargadera en V. I staffa di sospensione. N ophangbeugel. P wieszak kabłąkowy wahliwy. S gunga. (466)
2. **dropper** (*Syn.* hanger (USA)) : a component used to suspend a registration span-wire, an auxiliary catenary or a contact wire from a headspan or a longitudinal catenary. ★ pendule (de ligne caténaire) → *pendule 1.* R струна. D Hänger. E péndola (de línea catenaria). I pendino. N hangdraad. P wieszak. S bärtråd. (811)

dropping

1. **pantograph dropping device** : → *device 41*

DRS

1. **DRS** (*Syn.* PCM digital reference sequence) : → *sequence 8*

drum

1. **drum controller** : → *controller 2*
2. **drum facsimile receiver** : → *receiver 3*
3. **drum facsimile transmitter** : → *transmitter 6*
4. **drum factor** : → *factor 58*
5. **drum recorder** : → *recorder 6*

dry

1. **dielectric dry test** : → *test 22*
2. **dry charged (secondary) battery** : → *battery 30*
3. **dry cooling tower** : → *tower 2*
4. **dry discharged (secondary) battery** : → *battery 31*
5. **dry-type reactor** : → *reactor 8*
6. **dry-type transformer** : → *transformer 27*
7. **encapsulated-winding dry-type reactor** : → *reactor 10*
8. **encapsulated-winding dry-type transformer** : → *transformer 30*
9. **non-encapsulated-winding dry-type reactor** : → *reactor 21*
10. **non-encapsulated-winding dry-type transformer** : → *transformer 44*
11. **unformed dry (secondary) battery** : → *battery 67*

DSB

1. **DSB** (*Syn.* double sideband) : → *sideband 2*

DSE

1. **DSE** (*Syn.* data switching exchange) : → *exchange 4*

DTE

1. **DTE** (*Syn.* data terminal equipment) : → *equipment 20*

DTS

1. **DTS** (*Syn.* digital test sequence) : → *sequence 3*

dual

1. **dual frequency motor vehicle** : → *vehicle 5*
2. **dual purpose voltage transformer** : → *transformer 28*
3. **dual system motor vehicle** : → *vehicle 6*
4. **dual system track** : → *track 5*
5. **dual voltage motor vehicle** : → *vehicle 7*

dual-polarized

1. **dual-polarized antenna** : → *antenna 45*

dubbing

1. **dubbing** (*Syn.* post dubbing) : production of a television programme sequence in which the sounds are added after vision recording and sounds are adjusted in accordance with the visual content of the programme shown on a screen. *Note.* — In French the term "doublage" is only used for dubbing in a language different from that of the original recording. ★ post-sonorisation → *post-sonorisation 1.* R окончательное озвучивание. (723)
2. **dubbing** : *a)* the combination of two or more recordings into a composite recording by re-recording. *b)* the recording so obtained. ★ montage → *montage 5.* R монтаж. D Überspielen; Abmischen. E montaje. I montaggio. N montage. P zgranie. S dubbning. (806)
3. **post dubbing** (*Syn.* dubbing) : → *dubbing 1*

duct

1. **air duct** (UK) : any passage provided beneath a machine as an integral part of the machine or its foundations to guide the inlet cooling air to the machine or the exhaust air away from the machine. ★ canalisation d'air en caniveau → *canalisation 2.* R воздушный канал (Англия). D Luftkanal. E conducto de aire. I condotto di ventilazione. N luchtkanaal. P kanał powietrzny podmaszynowy. S luftkanal. (411)
2. **air duct** (USA) (*Syn.* ventilating duct (USA)) : any passage designed to guide ventilating air. ★ ..... → . R воздушный канал вентиляционный канал (США). D Luftkanal. E ..... I condotto di ventilazione. N luchtkanaal. P kanał powietrzny. S ventilationskanal. (411)
3. **cable duct** (in a substation) : a conduit laid in the ground and intended to enable secondary, auxiliary and control cables to be drawn through within a substation. ★ buse à câble → *buse 1.*

R кабельный трубопровод подстанции. D Kabelrohr. E conducto de cables. I condotto cavi (in una stazione). N ..... P przepust kablowy (w stacji). S kabelrör. (605)

4. **core duct** : the space between or through core laminations provided to permit the radial or axial flow of coolant gas. ★ canaux de ventilation → *canal 12.* R вентиляционные каналы сердечника. D Luftschlitze (im Blechpaket). E canales de ventilación. I canali di ventilazione. N ventilatiespleten (radiaal); ventilatiekanalen (axiaal). P kanał wentylacyjny w rdzeniu. S kylkanal (i plåtkärna). (411)
5. **duct height** : → *height 1*
6. **duct spacer** : → *spacer 1*
7. **duct thickness** : → *thickness 2*
8. **elevated duct** : a tropospheric radio-duct in which the lower boundary is above the surface of the Earth. ★ conduit élevé → *conduit 5.* D hochgelegener Duct. P dukt nadziemny. (705)
9. **ground based duct** (*Syn.* surface duct) : a tropospheric radio-duct in which the lower boundary is the surface of the Earth. ★ conduit au sol → *conduit 2.* D Bodenduct; Bodenwellenleiter. P dukt powierzchniowy; dukt przyziemny. (705)
10. **surface duct** (*Syn.* ground based duct) : → *duct 9*
11. **ventilating duct** (*Syn.* air duct) : → *duct 2*

ducting

1. **ducting** : guided propagation of radio waves inside a tropospheric radio-duct. *Note.* — At sufficiently high frequencies, a number of electromagnetic modes of guided propagation can co-exist in the same tropospheric radio-duct. ★ propagation (troposphérique) guidée → *propagation 42.* D Ductausbreitung. P tworzenie duktu. (705)
2. **ducting layer** : → *layer 8*

duct-ventilated

1. **duct-ventilated** : applied to a machine which is constructed so that its cooling air can be conveyed to or from it through ducting below the machine. ★ machine à conduit de ventilation → *machine 8.* R вентилируемая машина с подводом воздуха по каналам. D Maschine für Luftkanal-Anschluß. E máquina con conducto de ventilación. I macchina con condotti di ventilazione. N met buisaansluiting aan de onderzijde. P maszyna z wentylacją przelotową i doprowadzeniem powietrza kanałami podmaszynowymi. S ventilerad med trumanslutning. (411)

due

1. **frequency tolerance (due to ageing)** : → *tolerance 9*
2. **frequency tolerance (due to variations in level of drive)** : → *tolerance 10*

dumb-bell

1. **dumb-bell shaft** : → *shaft 1*

dummy

1. **dummy antenna** (*Syn.* dummy load) : → *load 13*
2. **dummy coil** : → *coil 17*
3. **dummy lamp** : → *lamp 14*
4. **dummy load** : → *load 13*
5. **dummy load** : → *load 14*

dump

1. **to dump** : to transfer the contents of a store, or part of a store, on to an external medium. ★ vider → *vider 3.* R разгружать. D einen Speicherauszug machen. E volcar; vaciar. I trasferire la memoria; effettuare un dump. N dumpen. P zrzucanie. S dumpa. (714)

duplex

1. **bridge duplex** : designating or pertaining to a duplex system in which the neutrality of the receiving apparatus, at each end, to the currents sent from that end is secured by a balance of potentials based on the Wheatstone bridge principle. ★ duplex à pont → *duplex 3.* R мостовой дуплекс. D Brückenduplex. E dúplex de puente. I duplex bilanciato. N brugduplex. P dupleks mostkowy. S bryggduplex. (721)
2. **differential duplex** : designating or pertaining to a duplex system in which the currents divide in opposite directions so as to balance their effects in the receiving apparatus at the transmitting end, whereas the currents pass in the same direction and operate the apparatus at the receiving end. ★ duplex différentiel → *duplex 4.* R дифференциальный дуплекс. D Differentialduplex. E dúplex diferencial. I differenziale. N differentiële duplex. P dupleks różnicowy. S differentiell duplex. (721)
3. **duplex** : designating or pertaining to a mode of operation in which information can be transmitted in both directions simultaneously between two points. ★ duplex → *duplex 2.* R дуплекс. D Duplex; Vollduplex (nicht empfohlen). E dúplex. I duplex. N duplex. P (wymiana) przeciwsobna jednoczesna. S duplex. (701,721)
4. **duplex apparatus** : → *apparatus 5*
5. **duplex lap winding** : → *winding 22*
6. **duplex wave winding** : → *winding 23*
7. **four-frequency duplex telegraphy** : → *telegraphy 6*
8. **incremental duplex** : a differential duplex or a bridge duplex system in which, when both stations transmit simultaneously a similar signal element, the voltages applied to the line are additive. ★ duplex par addition → *duplex 5.* R дуплекс со сложением ЭДС. D additives Duplex. E dúplex incremental. I duplex incrementale. N incrementele-duplex. P dupleks sumacyjny; dupleks addytywny. S additiv duplex. (721)
9. **opposition duplex** : a differential duplex or a bridge duplex system in which, when both stations transmit simultaneously a similar signal element, the voltages applied to the line are in opposition. ★ duplex par opposition → *duplex 6.* R дуплекс с вычитанием ЭДС. D entgegengerichtetes Duplex. E dúplex por oposición. I duplex in opposizione. N oppositionele-duplex. P dupleks z odwróceniem potencjału. S subtraktiv duplex. (721)
10. **speech + duplex (equipment)** : → *speech 10*

duplexer

1. **duplexer** (of an antenna) : a device enabling an antenna to be used for transmitting and receiving simultaneously. ★ duplexeur → *duplexeur 1.* R дуплексер (антенны). D Duplexer (für eine Antenne); Antennenweiche. E duplexor (de antena). I duplexer. N antenne-zend/ontvangwissel; duplexer. P duplekser (antenowy). S duplexer. (712)
2. **duplexer** : a transmission line device allowing the same antenna to be used for transmission and reception. ★ duplexeur émission-réception → *duplexeur 4.* R дуплексер. D Sende-Empfangs-Weiche. E duplexor. I duplicatore emissione-ricezione. N duplexer. P układ NO; układ nadawanie-odbiór. S duplexer. (726)
3. **radar duplexer** (*Syn.* T-R switch) : → *switch 58*

duplicate

1. **duplicate supply** : → *supply 6*
2. **duplicate tests** : → *test 28*

duplicating

1. **duplicating** (*Syn.* copying) : an operation for simultaneously obtaining one or several examples of all or part of a recorded programme. *Note.* — This operation is normally carried out at higher speed than that of the original recording. ★ duplication → *duplication 1.* R копирование. D Vervielfältigung; kopieren. E duplicación; copia. I duplicazione. N kopiëren. P powielanie. S duplicering; kopiering. (806)

durability

1. **durability** : the ability of an item to perform a required function under given conditions of use and maintenance, until a limiting state is reached. *Note.* — A limiting state of an item may be characterized by the end of the useful life, unsuitability for any economic or technological reasons or other relevant factors. ★ durabilité → *durabilité 1.* R долговечность. D Haltbarkeit. E durabilidad. I longevità. N duurzaamheid. P trwałość. S hållbarhet. (191)

duration

1. **astronomical sunshine duration** : sum of the time intervals within a given time period during which the sun is above an even, unobscured horizon. ★ durée astronomique d'ensoleillement → *durée 13.* R астрономическая продолжительность солнечного света. D astronomische Sonnenscheindauer. E tiempo de insolación astronómico. I soleggiamento astronomico. N astronomische zonneschijnduur. P czas trwania nasłonecznienia astronomiczny. S astronomisk solskenstid. (845)

2. **call duration** (*Syn.* duration of a call) : the time interval between the instant at which the calling party obtains the called party or service and the release of the complete connection. ★ durée de communication → *durée 29.* R продолжительность соединения. D Gesprächsdauer. E duración de comunicación. I durata della comunicazione. N verbindingsduur. P czas trwania połączenia. S beläggningstid. (722)
3. **calling duration** : the time interval between unhooking and either receipt by the calling party of some indication of the success or failure of the call attempt or abandonment of the call attempt. *Note.* — The calling duration is the sum of the dial tone delay, the dialling duration and the post-dialling delay. ★ durée d'appel → *durée 20.* R продолжительность вызова. D Anrufdauer. E duración de llamada. I durata della chiamata. N opbouwtijd. P czas wywoływania. S anropstid. (722)
4. **cyclic duration factor** : → *factor 32*
5. **dialling duration** : the time interval between the provision of dial tone and the dialling termination. ★ durée de numérotation → *durée 51.* R продолжительность набора номера. D Wähldauer. E duración de numeración. I durata della selezione. N kiestijd. P czas wybierania. S nummertagningstid. (722)
6. **digital pulse duration modulation** : → *modulation 18*
7. **distortion of long duration** : → *distortion 33*
8. **distortion of short duration** : → *distortion 34*
9. **down duration** (*Syn.* outage duration) : within a specified period of time, the time during which an item has been incapable of performing its function. ★ durée d'indisponibilité → *durée 81.* R продолжительность неработоспособного состояния. D Nichtverfügbarkeitsdauer. E tiempo de indisponibilidad. I durata d'indisponibilità. N niet-beschikbaarheidsduur. P czas trwania niedyspozycyjności. S avbrottstid. (603)
10. **duration of a call** (*Syn.* call duration) : → *duration 2*
11. **duration of a voltage change** : interval of time for the voltage to increase or decrease from the initial value to the final value. ★ durée d'une variation de tension → *durée 93.* R длительность изменения напряжения. D Spannungsänderungszeit. E duración de una variación de tensión. I durata di una variazione di tensione. N stijg-/daaltijd van een spanningsvariatie. P czas trwania zmiany napięcia. S varaktighet av spänningsändring. (161)
12. **duration of shock pulse** : time required for the instantaneous value of an excitation to rise from some stated fraction of its maximum value and to decay to the same fractional value. ★ durée d'impulsion de choc → *durée 80.* R продолжительность ударного импульса. D Dauer eines Stoßes. E duración de un impulso de choque. I ..... N duur van een puls. P czas trwania udaru. S varaktighet hos en stöt. (801)
13. **duration of X-ray tube exposure series** : the time between the start of the first X-ray tube exposure and the end of the last one in a series. ★ durée de la série → *durée 47.* R продолжительность серии включений рентгеновской трубки. D Dauer der Aufnahmeserie; (Seriendauer). E duracion de la serie de exposición de un tubo de rayos X. I durata di una serie di esposizioni di un tubo a raggi X. N duur van een reeks röntgenbuisbelastingen. P czas trwania seryjnej ekspozycji. S exponeringsseries varaktighet. (881)
14. **effective duration of a call** : the interval of time between the reception by the calling party of the call-connect signal and the sending of the clearing signal. ★ durée d'une communication → *durée 91.* R эффективная продолжительность соединения. D effektive Verbindungsdauer. E duración de una comunicación. I durata della chiamata. N effectieve verbindingsduur. P efektywny czas trwania połączenia. S effektiv samtalstid. (721)
15. **fading duration** (*Syn.* fading time) : the time duration during which a given fading depth is exceeded. *Note.* — For a series of fading events, a statistical distribution of their durations may be considered. ★ durée d'évanouissement → *durée 79.* D Schwunddauer. P czas zaniku; trwanie zaniku. (705)
16. **forced-outage duration** : within a specified period of time, the time during which an item was incapable of performing its function because of a fault. ★ durée d'indisponibilité fortuite → *durée 82.* R продолжительность аварийного перерыва в работе. D störungsbedingte Nichtverfügbakeitsdauer. E tiempo de indisponibilidad fortuita; tiempo de indisponibilidad por avería. I durata d'indisponibilità casuale; durata d'indisponibilità per avaria. N onvoorziene niet-beschikbaarheidsduur. P czas trwania postoju awaryjnego. S feltid. (603)
17. **frame duration** (*Syn.* frame time) : → *time 66*
18. **full duration half maximum** : → *maximum 3*
19. **indication of duration** : → *indication 5*
20. **interruption duration** : the time duration of an interruption. ★ durée d'interruption → *durée 85.* R продолжительность прерывания. D Unterbrechungsdauer. E duración de interrupción. I durata di interruzione. N onderbrekingsduur. P czas trwania przerwy. S avbrottsvaraktighet. (191)
21. **interruption duration** : the time from the beginning of an interruption of supply to a consumer until supply has been restored. ★ durée d'interruption → *durée 86.* R продолжительность перерыва энергоснабжения. D Unterbrechungsdauer. E tiempo de interrupción. I durata d'interruzione. N onderbrekingsduur. P czas trwania przerwy w zasilaniu. S leveransavbrottstid. (603)
22. **load duration curve** : → *curve 25*
23. **(load weighted) equivalent interruption duration** (annual, monthly) : the duration resulting from dividing the sum of all energy not supplied in kWh due to supply interruptions experienced in a particular part of the system throughout a year or month by some corresponding annual or monthly reference demand. ★ durée moyenne de coupure équivalente → *durée 108.* R эквивалентная продолжительность перерыва. D mittlere Dauer des ausgeschalteten Zustands (jährliche, monatliche). E duración media de corte equivalente (anual o mensual). I durata media di interruzione equivalente (annuale o mensile). N equivalente onderbrekingsduur (jaarlijkse, maandelijkse). P równoważny okres trwania przerw (roczny, miesięczny). S ekvivalent avbrottstid. (604)
24. **maintenance duration** : within a specified period of time, the time during which maintenance was carried out on an item which was thus not available to perform its function. ★ durée d'entretien → *durée 73.* R продолжительность технического обслуживания. D wartungsbedingte Nichtverfügbarkeitsdauer. E tiempo de mantenimiento. I durata di manutenzione. N onderhoudsduur. P czas trwania remontu. S underhållstid. (603)
25. **mean interruption duration** : the expectation of the interruption duration. ★ durée moyenne d'une interruption → *durée 119.* R средняя продолжительность прерывания. D mittlere Unterbrechungsdauer. E duración media de una interrupción. I durata media di interruzione. N gemiddelde onderbrekingsduur. P czas trwania przerwy średni. S medelvärde för avbrottsvaraktighet. (191)
26. **operating duration** : within a specified period of time, the time during which an item has performed its required function. ★ durée de fonctionnement → *durée 43.* R продолжительность работы. D Betriebsdauer. E tiempo de funcionamiento. I durata di funzionamento. N bedrijfsduur. P okres pracy. S drifttid. (603)
27. **outage duration** (*Syn.* down duration) : → *duration 9*
28. **planned-outage duration** (*Syn.* scheduled-outage duration) : within a specified period of time, the time during which an item was not available to perform its function because it had been withdrawn from service according to program. ★ durée d'indisponibilité programmée → *durée 83.* R продолжительность планового перерыва в работе. D geplante Nichtverfügbarkeitsdauer. E tiempo de indisponibilidad programada. I durata d'indisponibilità programmata. N voorziene niet-beschikbaarheidsduur. P czas trwania postoju planowego. S planerad avbrottstid. (603)
29. **possible sunshine duration** (at a particular location) : sum of the time intervals within a given time period during which the sun is above the real horizon, which may be obscured by mountains, buildings, trees, etc. ★ durée possible d'ensoleillement → *durée 123.* R возможная продолжительность солнечного света. D mögliche Sonnenscheindauer (an einem bestimmten Ort). E tiempo de insolación posible. I soleggiamento possibile. N maximale zonneschijnduur. P czas trwania nasłonecznienia możliwy. S möjlig solskenstid. (845)
30. **pulse duration** (*Syn.* pulse width) : the interval of time between the first and last instants at which the instantaneous value of a pulse reaches a specified fraction of its pulse magnitude or a specified threshold. ★ durée → *durée 11.* R длительность импульса; ширина импульса.

D Impulsdauer. E duración (de un impulso); anchura (de un impulso). I durata (di un impulso); larghezza (di un impulso). N pulsduur; pulsbreedte. P czas trwania impulsu; szerokość impulsu. S pulslängd. (702)

31. **pulse duration control** : → *control 148*
32. **pulse duration discriminator** : → *discriminator 8*
33. **pulse duration modulation** : → *modulation 51*
34. **pulse duration selector** : → *selector 8*
35. **relative sunshine duration** : ratio of sunshine duration to possible sunshine duration within the same time period. ★ durée relative d'ensoleillement → *durée 124.* R относительная продолжительность солнечного света. D relative Sonnenscheindauer. E tiempo de insolación relativo. I soleggiamento relativo. N relatieve zonneschijnduur. P czas trwania nasłonecznienia względny. S relativ solskenstid. (845)
36. **repair duration** : the period of time needed to repair a damaged item. ★ durée de réparation → *durée 61.* R продолжительность аварийного ремонта. D Reparaturdauer. E tiempo de reparación. I durata di riparazione. N reparatieduur. P czas trwania naprawy. S reparationstid. (603)
37. **response pulse duration** (of a photomultiplier tube) : the time duration corresponding to the full width at half maximum in the curve representative of the output current pulse when the photocathode receives a light pulse having a finite flux and infinitesimal duration giving rise to a large number of photoelectrons. ★ durée de réponse impulsionnelle → *durée 63.* R длительность импульса анодного тока (фотоумножителя). D minimale Impulsdauer (eines SEV mit Photokathode). E duración de respuesta impulsional (de un tubo fotomultiplicador). I durata di risposta impulsiva (in un tubo fotomoltiplicatore). N duur van de responsiepuls. P czas trwania impulsu (fotopowielacza). S svarspulstid. (391)
38. **scheduled-outage duration** (*Syn.* planned-outage duration) : → *duration 28*
39. **scintillation duration** : the time between the instant at which 10% and the instant at which 90% of the photons of the scintillation have been emitted. ★ durée d'une scintillation → *durée 92.* R длительность сцинтилляции. D Szintillationsdauer. E duración de un centelleo. I durata di una scintillazione. N scintillatieduur. P czas trwania scyntylacji. S scintillationstid. (391)
40. **stand-by duration** : within a specified period of time, the time during which an item was capable of performing its function but was not actually called upon to do so. ★ durée de disponibilité à l'arrêt → *durée 39.* R продолжительность нахождения в резерве. D Bereitschaftsdauer. E tiempo de disponilidad en parada. I durata di disponibilità fino all'arresto. N duur van stilstaande beschikbaarheid. P okres postoju w rezerwie. S reservtid. (603)
41. **sunshine duration** (*S*) : sum of time intervals within a given time period (hour, day, month, year) during which the irradiance from direct solar radiation on a plane normal to the sun direction is equal to or greater than 200 watts per square metre. ★ durée d'ensoleillement → *durée 72.* R продолжительность солнечного света. D Sonnenscheindauer. E tiempo de insolación. I soleggiamento. N gesommeerde zonneschijnduur. P czas trwania nasłonecznienia. S solskenstid. (845)
42. **theoretical duration of a significant interval** : the exact duration prescribed by a code for a significant interval. *Note.* — In determining this duration, the standardized and, where necessary, the mean modulation rate has to be taken into account. ★ durée théorique d'un intervalle significatif → *durée 126.* R теоретическая длительность значащего интервала. D theoretische Schrittlänge. E duración teórica de un intervalo significativo. I durata teorica di un intervallo significativo. N theoretische duur van een significant interval. P odstęp charakterystyczny teoretyczny; odstęp znamienny teoretyczny. S teoretiskt intervall. (721)
43. **(time) duration** : the difference between the end points of a time interval. ★ durée → *durée 10.* R продолжительность (времени). D (Zeit) Dauer. E duración. I durata. N (tijds)duur. P długość przedziału czasu. S varaktighet. (191)
44. **up duration** : the sum of the operating duration and the stand-by duration within a specified period of time. ★ durée de disponibilité → *durée 38.* R продолжительность работоспособного состояния. D Verfügbarkeitsdauer. E tiempo de disponibilidad. I durata di disponibilità. N beschikbaarheidsduur. P czas trwania dyspozycyjności. S tillgänglighetstid. (603)
45. **virtual front duration (of a lightning impulse)** : a duration determined conventionally by replacing the actual impulse front by a straight line determined by two specified points on this front. ★ durée conventionnelle de front (d'une tension de choc de foudre) → *durée 14.* R длина фронта стандартного импульса. D vereinbarte Stirndauer (einer Blitzstoßspannung). E duración convencional del frente de onda (de un impulso tipo rayo). I durata convenzionale del fronte (di una tensione a impulso atmosferico). N virtuele fronttijd. P czas trwania czoła udaru piorunowego. S branthet. (604)

dust

1. **dust cover** : → *cover 2*
2. **dust seal** : → *seal 4*
3. **explosive dust atmosphere** : → *atmosphere 4*

dustproof

1. **dust-proof** : applied to a machine so constructed that the entry of dust of specified fineness or nature cannot cause interference with satisfactory operation of the machine. *Note.* — such a machine is not necessarily flameproof or sui table for use in atmospheres containing dust of an explosive nature. ★ machine étanche aux poussières → *machine 48.* R пылезащищенная машина. D staubdichte Maschine. E máquina a prueba de polvo. I macchina protetta contro la polvere. N stofdicht. P maszyna pyłoszczelna. S dammtät. (411)

duty

1. **continuous duty** : a duty at a substantially constant load for an indefinitely long time. ★ service continu → *service 37.* R продолжительный режим работы. D Dauerbetrieb. E servicio continuo. I funzionamento continuo. N continu bedrijf. P praca ciągła. S konstant drift. (151)
2. **duty** (*Syn.* duty cycle) : a sequence of operating conditions to which a component, device or equipment is subjected. ★ cycle de service → *cycle 17.* R рабочий цикл. D Betriebsart. E servicio; ciclo de funcionamiento. I ciclo di funzionamento. N bedrijfscyclus. P praca; cykl pracy. S arbetscykel. (151)
3. **duty** : statement of the loads, including no-load and rest and de-energized periods to which the machine is subjected, including their duration and sequence in time. ★ service → *service 32.* R режим работы. D Betrieb. E servicio. I servizio. N bedrijf. P praca. S driftförlopp. (411)
4. **duty** : a sequence of operating conditions to which a welding power source or equipment is subjected. ★ service → *service 33.* R рабочий цикл. D Betrieb. E servicio normal. I servizio. N bedrijf. P praca. S arbetscykel. (851)
5. **duty factor** : → *factor 59*
6. **duty factor** (*Syn.* duty cycle) : → *duty-cycle 3*
7. **duty ratio** : → *ratio 33*
8. **intermittent duty** : a duty with on-load intervals alternating with off-load intervals. ★ service intermittent → *service 46.* R повторно-кратковременный режим работы. D Aussetzbetrieb. E servicio intermitente. I funzionamento intermittente. N intermitterend bedrijf. P praca przerywana. S intermittent drift. (151)
9. **intermittent duty** : a duty in which the load changes regularly or irregularly with time. ★ service à charge variable → *service 35.* R режим переменной нагрузки. D Betrieb mit veränderlicher Belastung. E servicio con carga variable. I servizio a carico variabile. N bedrijf met veranderlijke belasting. P praca z obciążeniem zmiennym. S intermittent driftförlopp. (411)
10. **periodic duty** : a type of duty in which operation whether at constant or variable load is regularly repeated. ★ service périodique → *service 55.* R периодический режим работы. D periodischer Betrieb. E servicio periódico. I funzionamento periodico. N periodiek bedrijf. P praca okresowa. S periodisk drift. (151)
11. **periodic duty** : a type of intermittent duty in which the duty cycle is repeated at regular intervals. ★ service périodique → *service 56.* R режим периодической нагрузки. D Aussetzbetrieb. E servicio periódico. I servizio periodico. N bedrijf met periodiek veranderlijke belasting. P praca okresowa. S periodiskt driftförlopp. (411)
12. **pulse duty factor** : → *factor 141*
13. **short-time duty** : an intermittent duty with on-load intervals short in comparison with off-load. ★ service temporaire

→ *service 65.* R кратковременный режим работы. D Kurzzeitbetrieb. E servicio temporal. I funzionamento temporaneo. N kortstondig bedrijf. P praca dorywcza. S korttidsdrift. (151)

14. **tapping duty** : the numerical values assigned to the quantities (voltages, currents, etc.) which are used for a given tapping connection, as a basis for the manufacturer's guarantees and, in certain cases, for the tests. ★ régime de prise → *régime 20.* R режим ответвления. D Anzapfungsbetrieb. E régimen de toma. I regime di presa. N aftakkingsgegevens. P zespół parametrów zaczepowych. S reglerlägesdata. (421)
15. **uninterrupted duty** : a duty without any off-load period. ★ service ininterrompu → *service 42.* R непрерывный режим работы. D unterbrechungsfreier Betrieb. E servicio ininterrumpido. I funzionamento ininterrotto. N ononderbroken bedrijf. P praca nieprzerywana. S kontinuerlig drift. (151)
16. **varying duty** : operation at loads and for intervals of time both of which are subject to wide variations. ★ service variable → *service 68.* R переменный режим работы. D Betrieb mit wechselnder Belastung. E servicio variable. I funzionamento variabile. N wisselend bedrijf. P ..... S variabel drift. (151)

duty-cycle

1. **duty cycle** (*Syn.* duty) : → *duty 2*
2. **duty cycle** : a variation of load with time which may or may not be repeated, and in which the cycle time is too short for thermal equilibrium to be attained. ★ cycle → *cycle 2.* R рабочий шикл. D Spiel. E ciclo de servicio. I ciclo. N bedrijfscyclus. P przebieg pracy. S driftperiod. (411)
3. **duty cycle** (*Syn.* duty factor) : the ratio for a given time interval, of the on-load duration to the total time. ★ facteur de marche → *facteur 101.* R продолжительность включения. D Einschaltdauer. E factor de trabajo. I ciclo di servizio; fattore di utilizzazione. N inschakelfactor. P czas pracy względny. S intermittensfaktor. (851)
4. **duty-cycle rating** : → *rating 2*

duty-type

1. **continuous operation duty-type** : a sequence of identical duty cycles, each cycle consisting of a period of operation at constant load, and a period of operation at no-load, these periods being too short to attain thermal equilibrium during one duty cycle. ★ service ininterrompu à charge intermittente → *service 44.* R режим длительной работы при переменной нагрузке. D Durchlaufbetrieb mit Aussetzbelastung. E servicio contínuo con carga intermitente. I servizio ininterrotto con carico intermittente. N ononderbroken bedrijf met intermitterende belasting. P praca długotrwała z okresowymi przerwami jałowymi. S kontinuerlig drift med intermittent belastning. (411)
2. **continuous operation duty-type with electric braking** : a sequence of identical duty cycles, each cycle consisting of a period of starting, and a period of operation at constant load and a period of electric braking, the period of operation being too short to attain thermal equilibrium during one duty cycle. ★ service ininterrompu à démarrage et à freinage électrique → *service 45.* R режим длительной нагрузки, включая электрическое торможение. D ununterbrochener Betrieb mit Anlauf und elektrischer Bremsung. E servicio contínuo con arranque y frenado eléctrico. I servizio ininterrotto con avviamento e frenatura elettrica. N ononderbroken bedrijf met aanloop en elektrisch remmen. P praca długotrwała okresowa z hamowaniem elektrycznym. S kontinuerlig drift med intermittent belastning och elbromsning. (411)
3. **continuous operation duty-type with related load/speed changes** : a sequence of identical duty cycles, each cycle consisting of a period of acceleration, and a period of operation at constant load, corresponding to a pre-determined speed of rotation, followed by one or more periods of operation at other constant loads corresponding to different speeds of rotation, each period of operation being too short to attain thermal equilibrium during one duty cycle. ★ service ininterrompu à changement de vitesse périodique → *service 43.* R режим работы при периодическом изменении скорости и нагрузки. D ununterbrochener Betrieb mit periodischer Drehzahlstellung. E servicio contínuo con cambios de velocidad periódicos. I servizio ininterrotto con variazione periodica della velocità. N ononderbroken bedrijf met periodiek veranderlijk toerental. P praca długotrwała okresowa ze zmianą obciążenia i prędkości obrotowej. S kontinuerlig drift med intermittenta belastnings/varvtalsändringar. (411)
4. **continuous running duty-type** : operation at constant load of sufficient duration for thermal equilibrium to be reached. ★ service continu → *service 38.* R режим длительной нагрузки. D Dauerbetrieb. E servicio continuo. I servizio continuo. N continu bedrijf. P praca ciągła. S kontinuerlig drift. (411)
5. **duty-type** : a continuous or a conventional periodic duty consisting of one or more sets of loads remaining constant for the durations specified. ★ service type → *service 67.* R рабочий режим. D Betriebsart. E servicio tipo. I servizio-tipo. N bedrijfstype. P rodzaj pracy (umowny). S driftart. (411)
6. **intermittent periodic duty-type** : a sequence of identical cycles, each including a period of operation at constant load and a rest and de-energized period, these periods being too short to attain thermal equilibrium during one duty cycle, and in which the starting current does not significantly affect the temperature-rise. ★ service intermittent périodique → *service 49.* R режим повторнократковременной нагрузки. D Aussetzbetrieb ohne Einfluß des Anlaufes auf die Temperatur. E servicio intermitente periódico. I servizio intermittente periodico. N intermitterend bedrijf. P praca przerywana. S intermittent drift. (411)
7. **intermittent periodic duty-type with starting** : a sequence of identical duty cycles, each cycle consisting of a period of starting, a period of operation at constant load, and a rest and de-energized period, these periods being too short to attain thermal equilibrium during one duty-cycle. ★ service intermittent à démarrage → *service 47.* R режим повторнократковременной нагрузки, включая пуск. D Aussetzbetrieb mit Einfluß des Anlaufes auf die Temperatur. E servicio intermitente con arranque. I servizio intermittente con avviamento. N intermitterend bedrijf met aanloop. P praca przerywana z uwzględnieniem rozruchu. S intermittent drift med startningar. (411)
8. **intermittent periodic duty-type with electric braking** : a sequence of identical duty cycles, each cycle consisting of a period of starting, a period of operation at constant load, a period of rapid electric braking and a rest and de-energized period, these periods being too short to attain thermal equilibrium during one duty cycle. ★ service intermittent à démarrage et à freinage électrique → *service 48.* R режим повторнократковременной нагрузки, включая электрическое торможение. D Aussetzbetrieb mit Einfluß des Anlaufes und der elektrischen Bremsung auf die Temperatur. E servicio intermitente con arranque y frenado eléctrico. I servizio intermittente con avviamento e frenatura elettrica. N intermitterend bedrijf met aanloop en elektrisch remmen. P praca przerywana z hamowaniem elektrycznym. S intermittent drift med startningar och bromsningar. (411)
9. **short-time duty-type** : operation at constant load during a given time, less than that required to reach thermal equilibrium, followed by a rest and de-energized period of sufficient duration to re-establish equality of temperature with the coolant. ★ service temporaire → *service 66.* R режим кратковременной нагрузки. D Kurzzeitbetrieb. E servicio temporal. I servizio di breve durata. N kortstondig bedrijf. P praca dorywcza. S korttidsdrift. (411)

dynamic

1. **dynamic brake exciter** : → *exciter 2*
2. **dynamic braking** : → *braking 22*
3. **dynamic characteristic** : → *characteristic 35*
4. **dynamic characteristic (of an arc welding power source)** : → *characteristic 36*
5. **dynamic convergence** : → *convergence 9*
6. **dynamic convergence** : → *convergence 10*
7. **dynamic distortion** : → *distortion 35*
8. **dynamic *B*(*H*) loop** : → *loop 5*
9. **dynamic *J*(*H*) loop** : → *loop 6*
10. **dynamic *M*(*H*) loop** : → *loop 7*
11. **dynamic magnetization curve** : → *curve 13*
12. **dynamic misregistration** : → *misregistration 1*
13. **dynamic operating range** : → *range 14*
14. **dynamic range** : → *range 15*
15. **dynamic range** : → *range 16*
16. **dynamic range** : → *range 17*

17. **dynamic range control** : → *control 91*
18. **dynamic sensitivity** : → *sensitivity 9*
19. **dynamic viscosity** : → *viscosity 1*
20. **dynamic voltage of an arc furnace installation** : → *voltage 56*
21. **limiting dynamic value of an energizing quantity** : → *value 18*
22. **rated dynamic current** : → *current 158*
23. **system dynamic range** (*Syn.* dynamic range) : → *range 17*

dynamically

1. **dynamically neutralized state** : → *state 12*

dynamo

1. **lighting dynamo** : a generator, often axle-driven, supplying the lighting circuit of a vehicle. ★ génératrice d'éclairage → *générateur 40.* **R** генератор освещения. **D** Generator (Lichtmaschine). **E** generatriz de iluminación. **I** generatore d'illuminazione. **N** verlichtingsgenerator. **P** prądnica oświetleniowa. **S** belysningsgenerator. (811)

dynamometer

1. **dynamometer test** : → *test 29*
2. **electrical dynamometer** : an electrical generator or motor equipped with means for indicating torque. When used for determining power input (output) of a driving (driven) machine means for indicating speed is also provided. ★ dynamomètre électrique → *dynamomètre 1.* **R** электрический динамометр. **D** elektrisches Dynamometer; Pendelmaschine. **E** dinamómetro eléctrico. **I** macchina dinamometrica. **N** elektrische dynamometer. **P** maszyna dynamometryczna. **S** elektrisk momentvåg. (411)

dynamotor

1. **dynamotor** : a direct-current machine having a single field system, and two separate armature windings which can operate simultaneously, one as in a motor and the other as in a generator. ★ dynamoteur → *dynamoteur 1.* **R** совмещенный двигатель-генератор. **D** Gleichstrom-Gleichstrom Einankerumformer. **E** dinamotor. **I** dinamotore. **N** dynamotor. **P** przetwornica jednotwornikowa prądu stałego. **S** dynamotor. (411)

dynode

1. **dynode** : a secondary-emission electrode so placed and operated relative to other electrodes that the number of secondary electrons leaving its surface exceeds the number of primary electrons incident upon it. ★ dynode → *dynode 1.* **R** динод. **D** Parallelktrode; Dynode. **E** dínodo. **I** dinodo. **N** dynode. **P** katoda wtórna; dynoda. **S** dynod. (531,881)

D2-action

1. **D2-action** (*Syn.* second derivative action) : → *derivative-action 3*

E

ear

1. **artificial ear** : a device for the calibration of earphones incorporating an acoustic coupler and a calibrated transmitter for the measurement of sound pressure and having an overall acoustic impedance similar to that of the average human ear over a given frequency band. ★ oreille artificielle → *oreille 1.* R искусственное эхо. D künstliches Ohr. E oído artificial. I orecchio artificiale. N kunstoor. P ucho sztuczne. S artificiellt öra. (722,801)
2. **ear defender** (*Syn.* hearing protector) : → *protector 2*
3. **ear protector** (*Syn.* hearing protector) : → *protector 2*

earcap

1. **(telephone) earcap** : that part of a handset that a user applies to his ear. ★ pavillon d'un écouteur (téléphonique) → *pavillon 4.* R слуховая раковина (телефонной трубки). D Hörmuschel. E pabellón de un auricular (telefónico). I padiglione auricolare. N (telefoon)oorschelp. P muszla słuchawkowa. S hörtelefonlock. (722)

early

1. **degree of early anisochronous parallel distortion** : → *degree 4*
2. **early failure period** : → *period 8*

earphone

1. **circumaural earphone** : earphone having a cavity large enough to cover the region of the head including the ear. ★ écouteur circumaural → *écouteur 4.* R телефон с плотным амбушюром. D ohrumschließender Kopfhörer. E auricular circumaural. I recevitore telefonico circumauricolare. N ooromsluitende telefoon. P słuchawka wokółuszna. S ..... (801)
2. **earphone** : electroacoustic transducer by which acoustic oscillations are obtained from electric signals and intended to be closely coupled acoustically to the ear. ★ écouteur → *écouteur 2.* R телефон. D Kopfhörer; Ohrhörer. E auricular. I cuffia (telefonica). N oortelefoon. P słuchawka. S hörtelefon. (801)
3. **insert earphone** : small earphone that fits either in the outer ear or is attached directly to a connecting element, for example earmould inserted into the ear canal. ★ écouteur interne → *écouteur 5.* R вкладной телефон. D Einsteckhörer. E auricular interno. I otofono. N insteektelefoon. P słuchawka douszna. S örontelefon. (801)
4. **supraaural earphone** : earphone applied externally to the outer ear. ★ écouteur supraaural → *écouteur 6.* R наружный телефон. D ohraufliegender Kopfhörer. E auricular supraaural. I ricevitore telefonico supraauricolare. N tegen-het-oor telefoon. P słuchawka nauszna. S ..... (801)
5. **(telephone) earphone** (*Syn.* (telephone) earphone capsule) : a telephone receiver intended to be closely acoustically coupled to the ear. ★ écouteur (téléphonique) → *écouteur 7.* R (телефонный) наушник; (телефонный) капсуль. D Telefonhörer; Hörkapsel. E auricular (telefónico). I capsula ricevente. N telefoonkapsel. P wkładka słuchawkowa. S hörtelefon; örontelefon. (722)
6. **telephone earphone** : earphone designed for use in a telephone system. ★ écouteur téléphonique → *écouteur 8.* R телефон связи. D Fernhörer; Hörkapsel. E receptor telefónico. I ricevitore telefonico. N telefoon van telefoontoestel. P słuchawka telefoniczna. S hörtelefon för telefoni. (801)
7. **(telephone) earphone capsule** (*Syn.* (telephone) earphone) : → *earphone 5*

earth

1. **clearance to earth** : → *clearance 5*
2. **earth** (*Syn.* ground (except UK)) : the conducting mass of the Earth, whose electric potential at any point is conventionally taken as zero. ★ terre → *terre 43.* R земля. D Bezugserde; Erde. E tierra. I terra. N aarde. P ziemia. S jord. (151,826)
3. **earth circuit connector** : → *connector 20*
4. **earth conductor** : → *conductor 32*
5. **earth current** : → *current 72*
6. **earth dam** : → *dam 3*
7. **earth electrode** : → *electrode 23*
8. **earth electrode** : → *electrode 24*
9. **earth fault** : → *fault 15*
10. **earth fault factor** : → *factor 61*
11. **earth fault relay** : → *relay 10*
12. **earth leakage detector** : → *detector 10*
13. **earth mat** : → *mat 1*
14. **earth plate** : → *plate 4*
15. **earth resistance meter** : → *meter 18*
16. **earth return** : → *return 2*
17. **earth rod** : → *rod 5*
18. **earth station** : → *station 10*
19. **earth strip** : → *strip 2*
20. **earth system** (*Syn.* ground system) : → *system 76*
21. **earth terminal** : → *terminal 7*
22. **earth terminal** : → *terminal 8*
23. **earth testing** : → *testing 2*
24. **earth wire** : → *wire 6*
25. **earth wire** : → *wire 7*
26. **earth wire peak** : → *peak 6*
27. **effective radius of the Earth** : → *radius 2*
28. **electrically independent earth electrodes** : → *electrode 25*
29. **impedance to earth** : → *impedance 24*
30. **inductor coil earth leakage protection** : → *protection 20*
31. **overhead earth wire** : → *wire 17*
32. **parallel earth continuity conductor** : → *conductor 52*
33. **remote earth** (*Syn.* remote ground (USA)) : an earth electrode connected to equipement, and located at such a distance from this equipment that it is independent of any other earth electrode close to this equipment. ★ terre éloignée → *terre 44.* R удаленный заземлитель. D ferner Erder. E tierra lejana. I terra lontana. N afstandsaarde. P uziom bezwzględny. S fjärrjord. (604)
34. **separate earth electrodes** : → *electrode 86*
35. **to earth** (equipment, an installation or a system) (*Syn.* to ground (USA)) : to effect the necessary connections in order to maintain a given point of equipment, an installation or a system as close as practicable to earth potential. ★ mettre à la terre → *mettre 1.* R заземление оборудования электроустановки. D erden. E poner a tierra (un aparato, una instalación o una red). I messa a terra. N aarden (een toestel, een installatie, een net); aan aarde leggen. P uziemienie (urządzenia, instalacji, sieci). S jorda. (604)

earth-coupled

1. **earth-coupled interference** : → *interference 3*

earthed

1. **earthed input** : → *input 7*
2. **earthed output** : → *output 6*
3. **earthed voltage transformer** : → *transformer 29*
4. **impedance earthed (neutral) system** : → *system 85*
5. **resonant earthed (neutral) system** : → *system 175*
6. **solidly earthed (neutral) system** : → *system 191*

earthing

1. **arc furnace earthing device** : → *device 8*
2. **divided support earthing switch** : → *switch 14*
3. **earthing conductor** : → *conductor 33*
4. **earthing connector** : → *connector 21*
5. **earthing contactor** : → *contactor 7*
6. **earthing for work** (*Syn.* grounding for work (USA)) : the earthing of part of an electrical circuit of an installation

normally live but connected to earth temporarily so that work may be carried out. ★ mise à la terre pour travaux → *mise à la terre 11.* R временное заземление; ремонтное заземление. D Arbeitserdung. E puesta a tierra de trabajo. I messa a terra per lavori. N werkaarding. P uziemienie na czas pracy (ochronne). S arbetsjordning. (604)

7. **earthing inductor** : → *inductor 4*
8. **earthing network** : → *network 21*
9. **earthing position** : → *position 9*
10. **earthing reactor** : → *reactor 9*
11. **earthing switch** : → *switch 15*
12. **earthing switch** : → *switch 16*
13. **earthing system** : → *system 55*
14. **main earthing bar** (*Syn.* main earthing terminal) : → *terminal 18*
15. **main earthing terminal** : → *terminal 18*
16. **operational earthing** (*Syn.* operational grounding (USA)) : the earthing of a point in the electrical circuit of equipement (e.g. the neutral point) which is necessary of correct operation of this equipment and/or the system. ★ mise à la terre fonctionnelle → *mise à la terre 10.* R рабочее заземление. D Betriebserdung. E puesta a tierra funcional; puesta a tierra de servicio. I messa a terra di funzionamento. N bedrijfsaarding. P uziemienie robocze. S systemjordning. (604)
17. **three-phase earthing transformer** : → *transformer 67*
18. **total earthing resistance** : → *resistance 72*

Earth-radius

1. **effective Earth-radius factor** : → *factor 63*

earth-return

1. **earth-return brush** : → *brush 11*
2. **earth-return circuit** : → *circuit 63*
3. **earth-return double phantom circuit** : → *circuit 64*
4. **earth-return phantom circuit** : → *circuit 65*

eccentric

1. **eccentric groove** : → *groove 5*

eccentricity

1. **eccentricity** : the displacement of the centre of the recording groove spiral with respect to the centre of the disk centre hole. ★ excentricité → *excentricité 1.* R эксцентриситет диска. D Exzentrizität. E excentricidad. I eccentricità. N excentriciteit. P mimośrodowość. S excentricitet. (806)

echelon

1. **maintenance echelon** (*Syn.* line of maintenance) : a position in an organization where specified levels of maintenance are to be carried out on an item. *Notes. 1* — Examples of maintenance echelons are : field, repair shop, manufacturer. *2* — The maintenance echelon is characterized by the skill of the personnel, the facilities available, the location, etc. ★ échelon de maintenance → *échelon 5.* R эшелон технического обслуживания и ремонта. D Instandhaltungsstufe. E línea de mantenimiento. I linea di manutenzione. N niveau in de onderhoudsorganisatie. P podział obsługi. S underhållsnivå. (191)

echo

1. **echo** (in telecommunication) : a signal which arrives at a given point by a path differing from the normal path with sufficient magnitude and delay for it to be perceptible at this point as distinct from the signal occupying an adjacent frequency band. ★ écho → *écho 7.* R эхо (в электросвязи). D Echo (in der Telekommunikation). E eco (en telecomunicación). I eco (in telecomunicazioni). N reflectie (bij telecommunicatie); echo. P echo (w telekomunikacji). S eko. (702,704,722)
2. **echo** (sound broadcasting) : sound effect obtained by repeating a sound signal with a given delay after attenuation and, possibly, filtering. ★ écho → *écho 8.* R эхо (в звуковом вещании). (723)
3. **echo** (*Syn.* ghost) : → *ghost 2*
4. **echo** : sound wave that has been reflected and arrives with such a magnitude and time interval after the direct sound as to be distinguishable as a repetition of it. ★ écho simple → *écho 15.* R эхо. D Echo. E eco simple. I eco. N echo. P echo. S eko. (801)
5. **echo box** : → *box 6*
6. **echo cancellation** : → *cancellation 2*
7. **echo canceller** : → *canceller 1*
8. **echo control** : → *control 92*
9. **echo effect** : → *effect 13*
10. **echo reference equivalent** : → *equivalent 12*
11. **echo suppression** : → *suppression 2*
12. **echo suppressor** : → *suppressor 2*
13. **flutter echo** : rapid but nearly even succession of echoes originating from the same sound source. ★ écho flottant → *écho 10.* R порхающее эхо. D Flatterecho. E eco flotante. I eco fluttuante. N flutter-echo. P echo drżące. S fladdereko. (801)
14. **full echo suppressor** : → *suppressor 3*
15. **half echo suppressor** : → *suppressor 4*
16. **multiple echo** : successive echoes from one source which have different delays and are perceived separately. ★ écho multiple → *écho 11.* R многократное эхо. D Mehrfachecho. E eco múltiple. I eco multipla. N galm (bij telefonie). P echo zwielokrotnione. S upprepat eko. (722)
17. **multiple echo** : a succession of separate echoes originating from a single sound source. ★ écho multiple → *écho 13.* R многократное эхо. D Mehrfachecho. E eco múltiple. I eco multipla. N meervoudige echo. P echo wielokrotne. S multipeleko. (801)
18. **radio echo** : a radio signal which arrives at the reception point by a propagation path different from the shortest path, with sufficient magnitude and delay to be perceived as a distinct signal. ★ écho (radioélectrique) → *écho 14.* D Funkecho. P echo radiowe. (705)
19. **round the world echo** : a radio echo which has travelled a distance around the Earth approximately equal to the Earth's circumference or a multiple thereof. *Note.* — The concept of round the world echo is only valid if the shortest path is much shorter than half of the Earth's circumference. ★ écho tour de Terre → *écho 16.* D ..... P echo okołoziemskie. (705)
20. **split echo suppressor** (*Syn.* half echo suppressor) : → *suppressor 4*

echoplex

1. **echoplex** : a method of loop checking by which each transmitted character is displayed in-local after its return from the distant station. ★ échoplex → *échoplex 1.* R эхоплекс. D Echoverfahren. E ecoplex. I controllo per eco. N echoplex. P echopleks. S slingkontroll med teckenvisning. (721)

economic

1. **economic loading schedule** : → *schedule 1*

economical

1. **economical load of a unit** : → *load 15*

economizer

1. **electrode economizer** : an annular ring, usually air or water-cooled, through which the electrode(s) pass and which is located in or on the refractory roof. ★ économiseur d'électrode → *économiseur 1.* R экономайзер электрода. D Elektroden-Kühlringe. E economizador de electrodo. I economizzatore di elettrodo. N elektrodedoorvoering. P oszczędzacz elektrody. S elektrodtätning. (841)

economy

1. **neutron economy** : balance account, in a reactor, of the neutrons created and the neutrons lost, and problems related thereto. ★ économie des neutrons → *économie 1.* D Neutronenökonomie. E economía neutrónica. I economia neutronica. N neutroneneconomie. P bilans neutronów. S neutronekonomi. (026)

eddy

1. **eddy current loss** : → *loss 24*
2. **eddy-current braking** : → *braking 23*

edge

1. **edge diffraction** : → *diffraction 6*
2. **edge effect** : → *effect 14*
3. **edge effect** : → *effect 15*
4. **edge filter** : → *filter 16*

5. **edge flare** : → *flare 1*
6. **edge insulator** : → *insulator 9*
7. **reference edge** : the edge of the magnetic tape used as a datum for the specification of recorded track positions. It is considered as the guided edge of the magnetic tape on video tape recorders. ★ bord de référence de la bande → *bord 1.* R базовый край ленты. D Bezugskante des Bandes. E borde de referencia de la cinta. I orlo di riferimento del nastro. N referentiekant. P krawędź odniesienia taśmy. S referenskant. (806)
8. **writing edge** (*Syn.* writing bar) : → *bar 13*

edge-board

1. **edge-board contacts** : → *contact 66*

edge-emitting

1. **edge-emitting light emitting diode** : → *diode 8*

edge-socket

1. **edge-socket connector** : → *connector 22*

edit

1. **edit pulses** : → *pulse 9*

editing

1. **editing** (a programme) : the compilation of various sound and vision sequences to produce a programme. ★ montage → *montage 4.* R монтаж (программ). (723)
2. **electronic editing** : a method wherein editing is carried out by recording without physically cutting the tape, while maintaining the continuity of all tracks. ★ montage électronique → *montage 21.* R электронный монтаж. D elektronischer Bandschnitt. E montaje electrónico, I montaggio elettronico. N elektronische montage. P montaż elektroniczny. S elektronisk redigering. (806)
3. **manual editing** : a method wherein editing is carried out by physically cutting and splicing the video tape, the position of the cut being identified by an edit pulse. *Note.* — This method is contrary to USA practice, where the term "manual editing" describes an operation through which an operator causes the edits to be made in real time (without physical cutting or splicing of the tape) by use of an electronic editor in a manual mode. ★ montage manuel → *montage 29.* R ..... D mechanischer Bandschnitt. E montaje manual. I montaggio manuale. N montage met de hand. P montaż ręczny. S manuell redigering. (806)
4. **tape editing** : an operation enabling a continuous programme to be obtained from several parts. ★ montage des bandes → *montage 19.* R монтаж сигналограммы (фонограммы, видеограммы). D Bandschnitt; Schnitt. E montaje de las cintas. I montaggio dei nastri. N bandmontage. P montaż (taśmy). S bandredigering. (806)

effect

1. **acousto-optic effect** : a variation of refractive index caused by an acoustic wave. *Note.* — The acousto-optic effect is used in devices that modulate and deflect light. ★ effet acousto-optique → *effet 9.* R акустооптический эффект. D akusto-optischer Effekt. E efecto acústico-óptico. I effetto acusto-ottico. N acousto-optisch effect. P zjawisko akustooptyczne. S akustooptisk effekt. (731)
2. **artificially induced actinic effect** : chemical change caused by optical radiation under controlled conditions. *Note.* — Examples : control of plant growth by time-programmed lighting, lighting of poultry to increase egg production, therapeutic treatment by means of special lamps. ★ effet actinique produit artificiellement → *effet 13.* R искусственно вызванный актиничный эффект. D künstlich erzeugter aktinischer Effekt. E efecto actínico artificial. I effetto attinico prodotto artificialmente. N kunstmatig opgewekt actinisch effect. P skutek aktyniczny wywołany sztucznie. S artificiell aktinisk verkan. (845)
3. **Auger effect** : the return to the ground state of an atom, ionized in an inner shell, by the ejection of one or more electrons from surrounding shells. ★ effet Auger → *effet 14.* R эффект Оже. D Auger-Effekt. E efecto de Auger. I effetto Auger. N Augereffect. P efekt Augera. S Auger-effekt. (881)
4. **background effect** (of a radiation meter) : the value indicated by a radiation meter in the absence of the source whose radiation is to be measured, when the device is placed under its normal conditions of operation. ★ mouvement propre → *mouvement 4.* R фон (измерителя ионизирующих излучений). D Nulleffekt (eines Strahlungsmessgerätes). E movimiento propio (de un medidor de radiación). I effetto di fondo (di un misuratore di radiazione). N nuleffect (v.e. stralingsmeter). P bieg własny (radiometru). S bakgrund. (391)
5. **Barkhausen effect** (*Syn.* Barkhausen jumps) : a discontinuous variation of the magnetic flux density in a magnetic material as the applied magnetic field strength is continuously changed. *Note.* — In electric circuits, the Barkhausen effect will produce a noise referred to as the "Barkhausen noise". ★ effet Barkhausen → *effet 15.* R эффект Баркгаузена; скачки Баркгаузена. D Barkhauseneffekt; Barkhausen-Sprünge. E efecto Barkhausen. I effetto Barkhausen. N Barkhauseneffect; Barkhausenruis. P zjawisko Barkhausena. S Barkhauseneffekt. (221)
6. **border effect** : special effect in which only the edges of an object are highlighted. ★ image bordurée → *image 15.* R эффект бордюра. (723)
7. **Cerenkov effect** : the emission of light which arises when a charged particle moves in a medium with a velocity greater than that of light in the same medium. *Note.* — Emitted radiation has a continuous spectrum from visible light (blue) to ultra-violet. ★ effet Cerenkov → *effet 16.* R эффект Черенкова. D Tscherenkoweffekt. E efecto Čerenkov. I effetto Čerenkov. N Čerenkov-effect. P zjawisko Czerenkowa. S Čerenkov-effekt. (391)
8. **complementary picture effect** : special effect on a colour picture where colours are replaced by their complementary colours whose chrominance vectors are 180° out of phase on the vector diagram. ★ image complémentaire → *image 16.* R эффект дополнительного изображения. (723)
9. **Compton effect** : the interaction of an X-ray or gamma-ray photon and an electron, relatively loosely bound to an atom, resulting in the ejection of the electron from its atom with a certain kinetic energy and of a scattered photon carrying the remaining energy. ★ effet Compton → *effet 17.* R Комптон-эффект. D Compton-Effekt. E efecto de Compton. I effetto Compton. N Comptoneffect. P efekt Comptona. S Compton-effekt. (391,881)
10. **contour effect** : the alteration of the reproducing electrical amplitude/frequency response curve at long recorded wavelengths due to the shape of the reproducing head, the wrap angle of the tape around the head and the presence of magnetic shields close to the tape. ★ effet de contournement → *effet 23.* R эффект «змейки». D Contour Effekt. E efecto de contorneamiento. I effetto di contorno. N contoureffect. P wpływ kształtu. S kontureffekt. (806)
11. **direct actinic effect** : actinic effect that occurs at the place where the radiant energy responsible for the effect is absorbed. ★ effet actinique direct → *effet 10.* R прямой актиничный эффект. D direkter aktinischer Effekt. E efecto actínico directo. I effetto attinico diretto. N direct actinisch effect. P skutek aktyniczny bezpośredni. S direkt aktinisk verkan. (845)
12. **directional effect** (*Syn.* Stiles-Crawford effect (of the first kind)) : → *effect 79*
13. **echo effect** : a defect in facsimile reproduction due to propagation phenomena, consisting of the appearance of a second outline or several other outlines displaced in the scanning direction from the outline of the normal picture. ★ effet d'écho → *effet 49.* R эхо-эффект; эффект отражения. D Echoeffekt. E efecto de eco. I effetto eco. N echo-effekt. P echo. S ekoeffekt. (721)
14. **edge effect** : a border of incorrect luminance outlining picture information and encroaching upon neighbouring areas. ★ effet de bord → *effet 19.* R краевой эффект. D Randeffekt. E efecto de borde. I effetto di bordo. N randeffect. P zniekształcenie przykrawędziowe. S randeffekt. (531)
15. **edge effect** : the effects in a solid armature due to the edge return currents between poles, limiting the useful width of the armature and reducing the output. ★ effet de bord → *effet 20.* R краевой эффект. D Randeffekt. E efecto de borde. I effetto laterale. N randstrooieffect. P zjawisko brzegowe. S kanteffekt. (811)
16. **effects projector** : → *projector 3*
17. **electro-optic effect** : a change in the optical characteristics of a material under the influence of an electric field. *Notes. 1* — Pockels and Kerr effects are examples of electro-optic effects. *2* — Electro-optic is often erroneously used as a synonym for opto-electronic. *3* — The most common effect results in a change in refractive index. ★ effet électro-optique → *effet 55.*

R электрооптический эффект. D elektro-optischer Effekt. E efecto electro-óptico. I effetto elettro-ottico. N elektro-optisch effect. P zjawisko elektrooptyczne. S elektrooptisk effekt. (731)

18. **electrophonic effect** : rate at which sound energy is being radiated by a speech source at any given instant. ★ effet électrophonique → *effet 56.* R электрофонный эффект. D elektrophonischer Effekt. E efecto electrofónico. I effetto elettrofonico. N elektrofonisch effect. P zjawisko elektrofoniczne. S elektrofonisk effekt. (801)
19. **end effect** (of a counter tube) : an effect due to distortion of the electric field near the ends of the collecting electrode of a counter tube and consisting of a counting loss or degradation of the measured spectrum. ★ effet de bout → *effet 21.* R краевой эффект (газоразрядного счетчика). D Endeffekt (eines Zählrohres). E efecto de borde (de un tubo contador). I effetto ai bordi (di un tubo contatore). N eindeffect (v.e. telbuis). P efekt końców (licznika). S ändinverkan. (391)
20. **end effect** : electrodynamic effect at the ends of the field system of a linear traction motor operating at high speed, reducing the performance of the motor. ★ effet d'extrémité → *effet 53.* R концевой эффект. D Endeffekt. E efecto de extremidad. I effetto d'estremità. N eindstrooieffect. P zjawisko krańcowe. S randeffekt. (811)
21. **external photo-electric effect** (*Syn.* photo-emissive effect) : → *effect 55*
22. **Faraday effect** : the magneto-optical effect in which an applied magnetic field induces a double refraction in which the angle of rotation is proportional to the magnetic field strength. ★ effet Faraday → *effet 57.* R эффект Фарадея. D Faraday-Effekt. E efecto Faraday. I effetto Faraday. N Faraday-effect. P zjawisko Faradaya. S Faradayeffekt. (121)
23. **Faraday effect** (*Syn.* Faraday rotation) : the phenomenon of rotation, about the direction of propagation, of the electric flux density vector of a linearly polarized electromagnetic wave as it passes through a gyromagnetic medium subjected to a magnetostatic field having a component along the direction of propagation. ★ effet Faraday → *effet 58.* R эффект Фарадея; Фарадеевское вращение. D Faraday-Effekt; Faradaydrehung. E efecto Faraday; rotación de Faraday. I effetto Faraday; rotazione di Faraday. N Faraday-effect. P zjawisko Faradaya; rotacja Faradaya. S Faradayeffekt. (221,705,726)
24. **fault modes and effects analysis** : → *analysis 6*
25. **fault modes, effects and criticality analysis** : → *analysis 7*
26. **genetic effects** : alterations in the genetic material (genes, chromosomes, nucleic acids) of an organism. *Note.* — This term usually refers to the reproductive cells and the heritable changes thereby transmitted to the offspring. ★ effets génétiques → *effet 96.* R генетические эффекты. D genetische Wirkungen. E efectos genéticos. I effetti genetici. N genetische effecten. P działanie genetyczne (promieniowania). S genetisk strålningsverkan. (881)
27. **gyromagnetic effect** : the phenomenon by which the magnetization of a material or medium subjected to a magnetostatic field, upon disturbance, relaxes back to equilibrium by damped precessional motion about the direction of that field. ★ effet gyromagnétique → *effet 59.* R гиромагнитный эффект. D gyromagnetischer Effekt. E efecto giromagnético. I effetto giromagnetico. N gyromagnetisch effect. P zjawisko giromagnetyczne. S gyromagnetisk effekt. (221,726)
28. **Hall effect** : the production in a conductor or in a semiconductor of an electric field strength proportional to the vector product of the current density and the magnetic flux density. ★ effet Hall → *effet 60.* R эффект Холла. D Halleffekt. E efecto Hall. I effetto Hall. N Halleffect. P zjawisko Halla. S halleffekt. (121,521)
29. **Hall effect device** : → *device 28*
30. **Hall effect magnetometer** (*Syn.* Hall probe) : → *probe 4*
31. **Hall effect reproducing head** : → *head 6*
32. **heel effect** : the decrease in intensity at the anode side of an X-ray beam owing to absorption in the anode. ★ effet de talon → *effet 44.* R эффект анода. D Selbstabsorption in der Anode. E efecto de talón. I effetto anodico. N anodeschaduweffect. P efekt krawędziowy. S häleffekt. (881)
33. **indirect actinic effect** : actinic effect that occurs away from the place where the radiant energy responsible for the effect is absorbed. *Note.* — The distinction between direct and indirect actinic effect mainly applies to the biological changes. The photostimulation of endocrine glands is an example of indirect actinic effect. ★ effet actinique indirect → *effet 11.* R непрямой актиничный эффект. D indirekter aktinischer Effekt. E efecto actínico indirecto. I effetto attinico indiretto. N indirect actinisch effect. P skutek aktyniczny pośredni. S indirekt aktinisk verkan. (845)
34. **internal photo-electric effect** (*Syn.* photo-conductivity) : → *photo-conductivity 1*
35. **Josephson effect** : the macroscopic quantum effect in which paired electrons (Cooper pairs) flow without dissipation between two weakly-coupled super-conductors. ★ effet Josephson → *effet 61.* R эффект Джозефсона. D Josephson-Effekt. E efecto Josephson. I effetto Josephson. N Josephsoneffect. P zjawisko Josephsona. S Josephsoneffekt. (121)
36. **Joule effect** : the phenomenon in which a current produces heat in a material at a rate proportional to the resistivity of the material and to the square of the current density. ★ effet Joule → *effet 62.* R эффект Джоуля. D Joule-Effekt. E efecto Joule. I effetto Joule. N Joule-effect. P zjawisko Joule'a. S Jouleeffekt. (121,841)
37. **Kerr effect** : the electro-optical effect in which an applied electric field induces a double refraction in which the angle of rotation is proportional to the square of the electric field strength. ★ effet Kerr → *effet 63.* R эффект Керра. D Kerr-Effekt. E efecto Kerr. I effetto Kerr. N Kerreffect. P zjawisko Kerra. S Kerreffekt. (121)
38. **Luxembourg effect** (*Syn.* ionospheric cross modulation) : → *modulation 24*
39. **magneto-optic effect** : a change in the optical characteristics of a material under the influence of a magnetic field. *Notes. 1* — Magneto-optic materials generally are used to rotate the polarisation of a linearly polarised wave. *2* — The most common effect results in a change in refractive index. ★ effet magnéto-optique → *effet 68.* R магнитооптический эффект. D magneto-optischer Effekt. E efecto magneto-óptico. I effetto magneto-ottico. N magneto-optisch effect. P zjawisko magnetooptyczne. S magnetooptisk effekt. (731)
40. **magnetoresistive effect** : the change of the electrical resistance of a semiconductor or conductor due to a magnetic field. ★ effet magnétorésistant → *effet 69.* R магниторезистивный эффект. D Magnetowiderstandseffekt. E efecto magnetorresistente. I effetto magnetoresistivo. N magnetoweerstandseffect. P zjawisko magnetorezystywne. S magnetoresistiv effekt. (521)
41. **magnifying effect** : special effect involving the magnification of part of a picture, which overlays the original picture. ★ effet de loupe → *effet 26.* R эффект увеличения. (723)
42. **microphonic effect** (*Syn.* microphony) : → *microphony 1*
43. **mirror effect** : special effect in which the television screen is divided, so that part of the television screen carries an image which is a symmetrical copy of the image appearing on the other part. ★ effet (de) miroir → *effet 29.* R эффект зеркала. (723)
44. **mosaic effect** (*Syn.* pixelisation; pixelation) : special effect in which groups of contiguous picture elements are replaced by rectangles of uniform brightness and colour. ★ effet mosaïque → *effet 72.* R эффект мозаики. (723)
45. **Mössbauer effect** : effect which consists, for some radionuclides (such as iridium 191 or iron 57) in the crystalline form, of stimulated emission of resonance photons. The recoil energy following this emission is absorbed not only by the emitting nucleus but by the whole crystal so that the emitted photons have a very precise energy which is essentially that of the nuclear transition. ★ effet Mössbauer → *effet 73.* R эффект Мёссбауэра. D Mössbaueref fekt. E efecto Mössbauer. I effetto Mössbauer. N Mössbauer-effect. P zjawisko Mössbauera. S Mössbauer-effekt. (391)
46. **natural actinic effect** : chemical change caused by natural radiation. *Note.* — Examples : production of ozone in the atmosphere, photosynthesis, daylight vision. ★ effet actinique naturel → *effet 12.* R естественный актиничный эффект. D natürlicher aktinischer Effekt. E efecto actínico natural. I effetto attinico naturale. N natuurlijk actinisch effect. P skutek aktyniczny naturalny. S naturlig aktinisk verkan. (845)
47. **negative effect** : special effect in which the normal image is replaced by another image such that the instantaneous levels of the luminance signal are inverted symmetrically about a median grey level. ★ inversion (d'image) → *inversion 6.* R эффект негатива. (723)

48. **non-stochastic effects** : effects whose severity varies with the absorbed dose and for which a threshold may occur. ★ effets non stochastiques → *effet 97.* R нестохастические эффекты. D nichtstochastische Effekte. E efectos no estocásticos. I effetti non stocastici. N niet-stochastische effecten. P efekt niestochastyczny. S icke-stokastiska effekter. (881)

49. **outline effect** : special effect in which only the edges of a televised object are reproduced. ★ image contour → *image 18.* R эффект очерчивания. (723)

50. **Peltier effect** : the thermoelectric effect in which a current through a junction results in the production or absorption of heat at this junction at a rate proportional to the current. ★ effet Peltier → *effet 75.* R эффект Пельтье. D Peltier-Effekt. E efecto Peltier. I effetto Peltier. N Peltiereffect. P zjawisko Peltiera. S Peltiereffekt. (121)

51. **photoconductive effect** : a photoelectric effect characterized by the variation of electric conductivity. ★ effet photoconductif → *effet 76.* R фотопроводимость. D Photoleitungseffekt. E efecto fotoconductivo. I effetto fotoconduttivo. N fotogeleidingseffect. P zjawisko fotokonduktywne. S fotokonduktiv effekt. (521,531)

52. **photo-electric effect** : the phenomenon whereby the interaction of optical radiation and matter (absorption of photons) results in the consequential liberation of charge carriers. ★ effet photoélectrique → *effet photoélectrique 1.* R фотоэлектрический эффект. D photoelektrischer Effekt. E efecto foto-eléctrico. I effetto fotoelettrico. N foto-elektrisch effect. P zjawisko fotoelektryczne. S fotoelektrisk effekt. (026,391,521,531,731,881)

53. **photoemissive effect** (*Syn.* photoelectric emission) : → *emission 22*

54. **photoemissive effect** : photoelectric effect characterized by the emission of electrons. ★ effet photoémissif → *effet 78.* R фотоэлектронная эмиссия. D Photoemission. E efecto fotoemisivo. I effetto fotoemissivo; effetto fotoelettrico esterno. N foto-emissie effect. P emisja fotoelektronowa; fotoemisja. S fotoemission. (531)

55. **photo-émissive effect** (*Syn.* external photo-electric effect) : a photo-electric effect characterized by electron emission from a surface irradiated by optical radiation. ★ photoémission → *photoémission 3.* R внешний фотоэлектрический эффект. D Photoemission; externer photoelektrischer Effekt. E efecto de foto-emisión; efecto foto-eléctrico externo. I effetto foto-emissivo; effetto foto-elettrico esterno. N foto-emissie-effect. P zjawisko fotoelektryczne zewnętrzne; fotoemisja. S fotoemission. (731)

56. **photomagnetoelectric effect** : in a semiconductor subjected to a magnetic field and electromagnetic radiation, the development of an electric field perpendicular to the magnetic field and to the flow of charge carriers generated by the photoelectric effect and diffusing in the semiconductor. ★ effet photoélectromagnétique → *effet 77.* R фотомагнитоэлектрический эффект. D photomagnetoelektrischer Effekt. E efecto fotoelectromagnético. I effetto fotoelettromagnetico. N foto-elektromagnetisch effect. P zjawisko fotomagnetoelektryczne. S fotoelektromagnetisk effekt. (521)

57. **photovoltaic effect** : a photoelectric effect in which an e.m.f. is produced by the absorption of photons. ★ effet photovoltaïque → *effet 79.* R фотогальванический. D photovoltaischer Effekt. E efecto fotovoltaico. I effetto fotovoltaico. N fotospanningseffect. P zjawisko fotowoltaiczne. S fotoelektromotorisk effekt. (121,521,531,731)

58. **piezoelectric effect** : electric polarization caused by mechanical strain and conversely. ★ effet piézoélectrique → *effet 80.* R пьезоэлектрический эффект. D piezoelektrischer Effekt. E efecto piezoeléctrico. I effetto piezoelettrico. N piëzo-elektrisch effect. P zjawisko piezoelektryczne. S piezoelektrisk effekt; piezoelektricitet. (121)

59. **piezoresistive effect** (*Syn.* tensoresistive effect) : the change of the electrical resistance of a semiconductor or conductor due to mechnical stress. ★ effet piézorésistant → *effet 81.* R пьезорезистивный эффект; тензорезистивный эффект. D Piezowiderstandseffekt; Spannungswiderstandseffekt. E efecto piezorresistente; efecto tensorresistente. I effetto piezoresistivo; effetto tensoresistivo. N piëzoweerstandseffect. P zjawisko piezorezystywne; zjawisko tensorezystywne. S piezoresistiv effekt. (521)

60. **pinch effect** (of a fluid) : the phenomenon of contraction, with increasing current, of the current-carrying cross-section of a conductive fluid. ★ effet de pincement → *effet 34.* R эффект самосжатия (пинчэффект). D Pinch-Effekt. E reestricción. I effetto di contrazione. N ..... P zjawisko zagęszczenia. S pincheffekt. (121,841)

61. **pinch effect** (gramophone disk) : the vertical motion of the reproducing stylus tip due to the decrease in the included angle, between the groove walls in a plane perpendicular to the groove and the record surface at the points of the maximum modulation velocity. ★ effet de pince → *effet 33.* R пинч-эффект. D Klemmeffekt. E efecto de pinza. I effetto di strozzatura. N knijpeffect. P unoszenie (igły). S klämeffekt. (806)

62. **plastic effect** : an appearance of relief in the reproduced picture due to accidental or intentional modification of the video signal. ★ plastique → *plastique 7.* R пластика. (723)

63. **Pockels effect** : the electro-optical effect in which an applied electric field induces a double refraction in which the angle of rotation is proportional to the electric field strength. ★ effet Pockels → *effet 82.* R эффект Поккельса. D Pockels-Effekt. E efecto Pockels. I effetto Pockels. N Pockelseffect. P zjawisko Pockelsa. S Pockelseffekt. (121)

64. **print-through effect** : an undesired transfer of a recorded signal from one section to another of a recording medium when these sections are brought into contact when wound on a hub or a spool. ★ effet d'empreinte magnétique → *effet 51.* R копирэффект. D Kopier-Echo. E efecto de impresión magnética. I effetto di impronta magnetica; effetto eco. N doordrukeffect. P przekopiowywanie. S kopieringseffekt. (806)

65. **proximity effect** : the phenomenon of non-uniform distribution of current density in a conductor, attributable to neighbouring currents. ★ effet de proximité → *effet 36.* R эффект близости. D Proximityeffekt (Stromverdrängung verursacht durch benachbarte Leiter). E efecto de proximidad. I effetto di prossimità. N nabijheidseffect. P zjawisko bliskości. S närverkan. (121)

66. **rectification effect** : undesirable increase in the brightness of a black and white picture obtained from a colour signal produced by a standing DC component, due to partial rectification of the chrominance signal, resulting from the non-linear characteristics of the signal processing circuitry and the display device. ★ effet de redressement → *effet 38.* R эффект выпрямления. (723)

67. **Rocky-Point effect** (*Syn.* flash-arc) : → *flash-arc 1*

68. **S effect** (*Syn.* surface-charge effect) : modulation of an electrode current caused by variation of the electrical charge on the glass envelope or other insulating parts. ★ effet S → *effet 84.* R эффект поверхностного заряда. D S-Effekt. E efecto «S»; efecto de carga de superficie. I effetto di carica superficiale. N S-effect; oppervlakteladingseffect. P oddziaływanie ładunków powierzchniowych. S S-effekt. (531)

69. **Schottky effect** : the increase of thermionic or photoelectric emission, relative to the field-free emission, caused by an accelerating electric field at the surface of the cathode. ★ effet Schottky → *effet 85.* R эффект Шотки. D Schottky-Effekt. E efecto Schottky. I effetto Schottky. N Schottky-effect. P zjawisko Schottky'ego. S Schottkyeffekten. (531)

70. **Seebeck effect** : the thermoelectric effect in which the contact potential difference increases with temperature. ★ effet Seebeck → *effet 86.* R эффект Зеебека. D Seebeck-Effekt. E efecto Seebeck. I effetto Seebeck. N Seebeckeffect. P zjawisko Seebecka. S Seebeckeffekt. (121)

71. **skin effect** : the phenomenon in which the r.m.s. density of a time-varying current is greater nearer the surface of a conductor than in its interior. ★ effet pelliculaire → *effet 74.* R поверхностный эффект. D Skineffekt (Hautwirkung) (Stromverdrängung im Einzelleiter). E efecto pelicular. I effetto pelle. N huideffect. P zjawisko naskórkowości (ytverkan,). S strömförträngning; ytverkan. (121,841)

72. **somatic effects** (of radiation) : biological effects, other than hereditary and teratogenic effects, which are manifest in the exposed person. ★ effets somatiques → *effet 98.* R соматические эффекты (излучения). D somatische Wirkungen (einer Strahlung). E efectos somáticos (de radiaciones). I effetti somatici (di una radiazione). N somatische effecten (van straling). P działanie somatyczne (promieniowania). S somatisk strålningsverkan. (881)

73. **sound effects** : the simulation of real sounds produced in order to provide a listener with particular audible impressions or

artistic effects. *Note.* — In English, the term "sound effects" may include effects produced by radiophonic means. ★ brüitage → *bruitage 1.* R звуковые эффекты. (723)

74. **spatial effect** (*Syn.* pseudo stereo) : a sound effect resulting from an appropriate processing device which, from a single sound signal, generates two different signals each feeding a separate loudspeakers. ★ effet spatial → *effet 88.* R псевдостерео. (723)
75. **special effects** (in television) (*Syn.* SFX (abbreviation)) : production of a television image, which cannot generally be obtained directly, either by signal processing or by combination of several pictures. ★ effet spécial → *effet 89.* R специальные эффекты (в телевидении). (723)
76. **special effects generator** : → *generator 34*
77. **special effects operator** : → *operator 5*
78. **spotlight effect** : special effect in which one part of the picture is made much brighter than the rest. ★ (effet de) surbrillance → *surbrillance 1.* R эффект высвечивания. (723)
79. **Stiles-Crawford effect (of the first kind)** (*Syn.* directional effect) : decrease of the brightness of a light stimulus with increasing eccentricity of the position of entry of the light pencil through the pupil. *Note.* — If the variation is in hue and saturation instead of in brightness, the effect is called the "Stiles-Crawford effect of the second king". ★ effet Stiles-Crawford (de première espèce) → *effet 90.* R эффект Стайлса-Крауфорда (первого рода). D Stiles-Crawford-Effekt (erster Art). E efecto Stiles-Crawford. I effetto Stiles-Crawford. N effect van Stiles en Crawford. P zjawisko Stilesa-Crawforda (pierwszego rodzaju). S Stiles-Crawfords effekt. (845)
80. **stochastic effects** : effects whose probability of occurring (rather than severity) is regarded as a function of the absorbed dose without threshold. ★ effets stochastiques → *effet 99.* R стохастические эффекты. D stochastische Effekte. E efectos estocásticos. I effetti stocastici. N stochastische effecten. P efekt stochastyczny (losowy). S stokastiska effekter. (881)
81. **strobe effect** (*Syn.* freeze-update) : a rapidly presented series of still frames giving an impression of jerky movement. ★ saccade → *saccade 1.* R строб-эффект. (723)
82. **surface-charge effect** (*Syn.* S effect) : → *effect 68*
83. **tensoresistive effect** (*Syn.* piezoresistive effect) : → *effect 59*
84. **teratogenic effects** : biological effects on a fœtus tending to cause developmental malformations. ★ effets tératogènes → *effet 100.* R тератогенные эффекты. D teratogene Wirkungen. E efectos teratogenos. I effetti teratogenetici. N teratogene effecten. P działanie teratogenne. S teratogen strålningsverkan. (881)
85. **Thomson effect** : the thermoelectric effect in which an electric current causes a transport of heat in homogeneous material. ★ effet Thomson → *effet 92.* R эффект Томсона. D Thomson-Effekt. E efecto Thomson. I effetto Thomson. N Thomsoneffect. P zjawisko Thomsona. S Thomsoneffekt. (121)
86. **tunnel effect** (in a PN junction) : a process whereby conduction occurs through the potential barrier of a PN junction effect and in which electrons pass in either direction between the conduction band in the N-region and the valence band in the P-region. *Note.* — Tunnel action, unlike the diffusion of charge carriers, involves electrons only. The transit time is practically negligible. ★ effet tunnel → *effet 93.* R туннельный эффект (P-N переходе). D Tunneleffekt (in einem PN-Übergang). E efecto túnel (en una unión PN). I processo tunnel (di una giunzione PN). N tunneleffect (in een PN-junctie). P zjawisko tunelowe (w złączu PN). S tunneleffekt (i en PN-övergång). (521)
87. **wall effect** : effect on the result of the measurement due to the presence of the wall of the detector and which depends on its nature and its thickness. ★ effet de paroi → *effet 30.* R эффект стенки. D Wandeffekt. E efecto de pared. I effetto parete. N wandeffect. P efekt ścianki. S vägginverkan. (391)
88. **Wigner effect** : in reactor operation, the change in physical properties of graphite resulting from the displacement of lattice atoms by high-energy neutrons and other energetic particles. ★ effet Wigner → *effet 94.* D Wignereffekt. E efecto Wigner. I effetto Wigner. N Wignereffect. P efekt Wignera. S wigner-effekt. (026)
89. **Xenon effect** : phenomenon that takes place in thermal reactors, due to a build up of xenon, which is a very important nuclear poison. ★ effet Xénon → *effet 95.* D Xenoneffekt. E efecto Xenon. I effetto Xenon. N Xenoneffect. P efekt ksenonowy. S xenoneffekt. (026)

effective

1. **effective acoustic centre** : → *centre 9*
2. **effective area** : → *area 16*
3. **effective atomic number** : → *number 9*
4. **effective cadmium cut-off** : → *cadmium 1*
5. **effective call** : → *call 35*
6. **effective call attempt** (*Syn.* completed call attempt) : → *attempt 4*
7. **effective collision cross-section** : → *cross-section 10*
8. **effective deceleration (as a function of distance)** : → *deceleration 1*
9. **effective delayed neutron fraction** : → *neutron 4*
10. **effective demand** : → *demand 13*
11. **effective demand factor** : → *factor 62*
12. **effective digit rate** : → *rate 25*
13. **effective dimensions** : → *dimension 1*
14. **effective dose** : → *dose 24*
15. **effective dose equivalent** : → *equivalent 13*
16. **effective duration of a call** : → *duration 14*
17. **effective Earth-radius factor** : → *factor 63*
18. **effective energy** (*Syn.* equivalent energy) : → *energy 47*
19. **(effective) field ratio** : → *ratio 34*
20. **effective focal spot** : → *spot 2*
21. **effective gap length** : → *length 6*
22. **effective half-life** : → *half-life 2*
23. **effective height** (*Syn.* effective length) : → *length 7*
24. **effective induction area of the control current loop** : → *area 17*
25. **effective induction area of the output loop** : → *area 18*
26. **effective intensity** : → *intensity 5*
27. **effective length** : → *length 7*
28. **effective margin** : → *margin 1*
29. **effective mass** (*Syn.* active mass) : → *mass 2*
30. **effective mass factor** (*Syn.* active mass factor) : → *factor 4*
31. **effective mass of the stylus tip** : → *mass 11*
32. **effective mode volume** : → *volume 5*
33. **effective monopole radiated power** : → *power 36*
34. **effective noise bandwidth** : → *bandwidth 5*
35. **effective perceived noise level** : → *level 15*
36. **effective permeability** : → *permeability 10*
37. **effective radiated power** : → *power 37*
38. **effective radius of the Earth** : → *radius 2*
39. **effective range** (*Syn.* measuring range) : → *range 40*
40. **effective range** : → *range 20*
41. **effective scalar permeability** : → *permeability 11*
42. **effective selectivity** : → *selectivity 2*
43. **effective stylus tip radius** : → *stylus tip 2*
44. **effective synchronous reactance** : → *reactance 7*
45. **effective thermal cross-section** : → *cross-section 11*
46. **effective traffic** : → *traffic 5*
47. **effective transfer rate** : → *rate 26*
48. **effective turns per phase** : → *turn 2*
49. **effective wavelength** (*Syn.* equivalent wavelength) : → *wavelength 8*
50. **partial effective area** : → *area 32*
51. **temperature coefficient of effective permeability** : → *coefficient 71*
52. **(total) effective area** : → *area 42*

effectively

1. **effectively conducting output circuit** : → *circuit 66*
2. **effectively non-conducting output circuit** : → *circuit 67*

effectiveness

1. **effectiveness (performance)** : the ability of an item to meet a service demand of given quantitative characteristics. *Note.* — This ability depends on the combined aspects of the capability and the availability performance of the item. ★ efficacité

→ *efficacité 1.* R эффективность. D Wirksamkeit. E eficacia. I efficacia. N effectiviteit. P skuteczność (działania). S effektivitet. (191)

2. **relative biological effectiveness (of radiation)** (*Syn.* RBE (abbreviation)) : the ratio of the absorbed dose of a reference radiation to the absorbed dose of the radiation of interest, generally X-ray or gamma ray, that produces the same level of biological effect. *Note.* — The term should only be used in radiobiology. ★ efficacité biologique relative → *efficacité 5.* R относительная биологическая эффективность (излучения); ОБЭ (аббревиатура). D relative biologische Wirksamkeit (einer Strahlung); RBW (Abkürzung). E eficacia biológica relativa; EBR (abreviatura). I efficacia biologica relativa (di una radiazione); EBR (abbreviazione). N relatieve biologische efficiëntie (van straling). P względna biologiczna skuteczność (promieniowania); RBE. S relativ biologisk effektivitet. (881)

effector

1. **format effector** : a function control used to ensure a final lay-out of characters for printing or display. ★ commande de mise en page → *commande 45.* R знак управления форматом. D Formatsteuerzeichen. E control de puesta en página. I comando di impaginazione. N formaatgegevens. P wskaźnik formatowania. S redigering. (721)

efficacy

1. **luminous efficacy of a source** (η_s; η) : quotient of the luminous flux emitted by the power consumed by the source. Unit: $\mathrm{lm \cdot W^{-1}}$ *Note.* — See note to "radiant efficiency". ★ efficacité lumineuse d'une source → *efficacité lumineuse 2.* R световая отдача (источника). D Lichtausbeute einer Strahlungsquelle. E eficacia luminosa de una fuente. I efficienza luminosa. N specifieke lichtstroom. P skuteczność świetlna źródła. S ljusutbyte (hos ljuskälla). (845)
2. **luminous efficacy of radiation** (K) : quotient of the luminous flux Φ_v by the corresponding radiant flux Φ_e

$$K = \frac{\Phi_v}{\Phi_e}$$

Unit: $\mathrm{lm \cdot W^{-1}}$ *Note.* — When applied to monochromatic radiations, the maximum value of $K(\lambda)$ is denoted by the symbol K_m. $K_m = 683\ \mathrm{lm \cdot W^{-1}}$ for $\nu_m = 540 \times 10^{12}\ \mathrm{Hz}$ ($\lambda_m \approx 555\ \mathrm{nm}$) for photopic vision. $K'_m = 1700\ \mathrm{lm \cdot W^{-1}}$ for $\lambda'_m = 507\ \mathrm{nm}$ for scotopic vision. For other wavelengths : $K(\lambda) = K_m V(\lambda)$ and $K'(\lambda) = K'_m V'(\lambda)$. ★ efficacité lumineuse d'un rayonnement → *efficacité lumineuse 1.* R световая эффективность излучения. D photometrisches Strahlungsäquivalent. E eficacia luminosa de una radiación. I coefficiente di visibilità di una radiazione. N fotometrisch stralingsequivalent. P skuteczność świetlna promieniowania. S ljusekvivalent för strålning. (845)

efficiency

1. **anode efficiency** : the ratio of the a.c. power delivered to the load to the anode supply power. ★ rendement anodique → *rendement 8.* R анодный кпд. D Anoden-Wirkungsgrad; Nutzwirkungsgrad. E rendimiento anódico. I rendimento anodico. N anode rendement. P sprawność anodowa. S anodverkningsgrad. (531)
2. **antenna efficiency** (for an aperture-type antenna) : for an aperture-type antenna with a specified aperture illumination, the ratio of the maximum total effective area to the geometric area of the aperture. ★ rendement d'ouverture → *rendement 26.* R коэффициент использования площади раскрыва. D Antennenwirkungsgrad (einer Aperturantenne). E eficiencia de antena (para una antena del tipo de apertura); rendimiento de apertura. I efficienza dell'antenna. N antennerendement (voor een apertuurantenne). P sprawność anteny (z aperturaą). S ..... (712)
3. **aperture illumination efficiency** : for an antenna with a specified aperture illumination, the ratio of its peak directivity to the peak directivity when the aperture illumination is uniform in polarization, amplitude and phase, with the same total radiated power. ★ facteur d'illumination → *facteur 177.* R коэффициент использования раскрыва. D Aperturbelegungswirkungsgrad; Aperturausleuchtungswirkungsgrad. E eficiencia de iluminación de apertura; factor de iluminación. I efficienza d'illuminazione d'apertura. N apertuurbelichtingsfactor. P skuteczność oświetlenia apertury. S aperturverkningsgrad. (712)
4. **calculation of efficiency from summation of losses** : indirect calculation of the efficiency from the summation of the component losses measured separately. ★ mesure du rendement par détermination des pertes séparées → *mesure 23.* R определение к п д по отдельным потерям. D Ermittlung des Wirkungsgrades aus den Einzelverlusten. E medida del rendimiento a partir de las pérdidas separadas. I misura del rendimento dalla determinazione delle perdite separate. N bepaling van het rendement uit de afzonderlijke verliezen. P wyznaczanie sprawności sposobem strat poszczególnych. S beräkning av verkningsgrad genom förlustsummering. (411)
5. **calculation of efficiency from total loss** : indirect calculation of efficiency from the direct measurement of total loss. ★ mesure du rendement par détermination des pertes totales → *mesure 24.* R определение к п д через суммарные потери. D Ermittlung des Wirkungsgrades aus den Gesamtverlusten. E medida del rendimiento a partir de las pérdidas totales. I misura del rendimento dalla determinazione delle perdite totali. N bepaling van het rendement uit de totale verliezen. P wyznaczanie sprawności sposobem strat całkowitych. S beräkning av verkningsgrad från uppmätta totalförluster. (411)
6. **charge efficiency (of a cell or battery)** : the ratio of the quantity of electricity delivered during the discharge of a cell or battery to the quantity of electricity necessary to restore the initial state of charge under specified conditions. ★ rendement (de charge) en quantité (d'un accumulateur) → *rendement 12.* R отдача по емкости (вторичного химического источника тока). D Lade-Wirkungsgrad (einer Zelle oder Batterie). E rendimiento de carga (de un elemento o batería). I rendimento in quantità di elettricità. N Ah-rendement. P sprawność elektryczna (akumulatora). S kapacitetsverkningsgrad. (486)
7. **collection efficiency** (of a photomultiplier tube) : the ratio of the number of useful electrons reaching the first dynode to the number of electrons emitted by the photocathode. ★ rendement de collection → *rendement 13.* R эффективность собирания (фотоумножителя). D Sammlungsgrad (eines SEV mit Photokathode). E rendimiento de captación (de un tubo fotomultiplicador). I rendimento di raccolta (di un tubo fotomoltiplicatore). N verzamelrendement (v.e. fotomultiplicatorbuis). P sprawność zbierania (fotopowielacza). S uppsamlingsverkningsgrad. (391)
8. **conversion quantum efficiency** (of a photocathode) : the ratio of the number of electrons emitted by the photocathode to the number of incident photons. ★ rendement quantique de conversion → *rendement 40.* R квантовая эффективность (фотокатода). D Quantenausbeute (einer Photokathode). E rendimiento cuántico de conversión (de un fotocátodo). I rendimento quantico di conversione (di un fotocatodo). N elektronenopbrengst van de quantumomzetting (v.e. fotokathode). P sprawność przemiany energii (w fotokatodzie). S kvantverkningsgrad. (391)
9. **counting efficiency** : the ratio of the number of counts to the total number of ionizing particles or quanta entering the sensitive volume, when the counting rate is so low that dead-time correction is unnecessary. ★ rendement de comptage → *rendement 14.* R эффективность счета. D Zählwirkungsgrad. E rendimiento de cuenteo; rendimiento de recuento. I rendimento di conteggio. N telrendement. P sprawność zliczania. S räkneverkningsgrad. (531)
10. **coupling efficiency** : the ratio of optical power on the receive side of the coupling to the optical power on the transmit side of the coupling. ★ rendement de couplage → *rendement 15.* R эффективность ввода-вывода. D LWL-Ankoppelwirkungsgrad. E eficiencia de acoplo. I efficienza di accoppiamento. N koppelingsrendement. P sprawność sprzężenia. S kopplingsfaktor. (731)
11. **detection efficiency** : under stated conditions of detection, the ratio of the number of detected particles to the number of particles of the same type emitted by the radiation source in the same time interval. ★ rendement de détection → *rendement 16.* R эффективность регистрации. D Nachweiswahrscheinlichkeit. E rendimiento de detección. I rendimento di rivelazione. N detectierendement. P sprawność detekcji. S detekteringsverkningsgrad. (391)
12. **detection efficiency** : the ratio of the number of counts to the total number of ionizing particles or quanta falling on the useful

area, when the counting rate is so low that dead-time correction is unnecessary. ★ rendement de détection → *rendement 17.* R эффективность обнаружения. D Nachweiswirkungsgrad. E rendimiento de detección. I rendimento di rivelazione. N detectierendement. P wydajność wykrywania. S detekteringsverkningsgrad. (531)

13. **detector efficiency** : the ratio of the number of detected particles to the number of particles of the same type which are incident on the detector in the same time interval. ★ rendement d'un détecteur → *rendement 28.* R эффективность детектора. D Ansprechwahrscheinlichkeit. E rendimiento de un detector. I rendimento di un rivelatore. N detectorrendement. P sprawność detektora. S detektorverkningsgrad. (391)
14. **differential quantum efficiency** : the slope of the characteristic relating the countable elementary events at the input and output of a quantum device. ★ rendement quantique différentiel → *rendement 42.* R дифференциальная квантовая эффективность. D differentielle Quantenausbeute. E eficiencia cuántica diferencial. I efficienza quantica differenziale. N differentieel fotonenrendement. P sprawność kwantowa różnicowa. S differentiell kvantverkningsgrad. (731)
15. **direct calculation of efficiency** : calculation of the efficiency from direct measurement of input and output. ★ mesure directe du rendement → *mesure 22.* R непосредственное определение к п д. D direkte Wirkungsgradmessung. E medida directa del rendimiento. I misura diretta del rendimento. N directe bepaling van het rendement. P bezpośredni pomiar sprawności. S direkt bestämning av verkningsgrad. (411)
16. **efficiency** : the ratio of output to input, usually given as a percentage. ★ rendement → *rendement 6.* R коэффициент полезного действия. D Wirkungsgrad. E rendimiento. I rendimento. N rendement. P sprawność. S verkningsgrad. (151,411)
17. **efficiency** (*Syn.* completion ratio) : → *ratio 17*
18. **efficiency factor in time** : → *factor 65*
19. **efficiency loss in magnetic recording** : → *loss 25*
20. **efficiency of an electro-heat installation** : the ratio of the energy transformed into useful heat to the total electrical energy supplied to produce this useful heat. ★ rendement d'une installation électrothermique → *rendement 29.* R к п д электротермической установки. D Wirkungsgrad einer Elektrowärmeanlage. E rendimiento de una instalación electrotérmica. I rendimento di una installazione elettrotermica. N rendement van een elektrowarmte-installatie. P sprawność urządzenia elektrotermicznego. S (elektrotermisk) **verkningsgrad. (841)**
21. **electron-beam transmission efficiency** : the ratio, under stated conditions, of the collector current to the total electron beam current at the exit of the electron gun. ★ rendement de transmission du faisceau électronique → *rendement 25.* R коэффициент токопрохождения электронного пучка. D Strahltransmission. E rendimiento de transmisión del haz electrónico. I rendimento di trasmissione del fascio elettronico. N bundelstroomrendement. P ..... S verkningsgrad hos elektronstråle. (531)
22. **energy conversion efficiency** (of a scintillator) : the ratio of the total energy of the photons emitted by a scintillator to the incident energy absorbed by it. ★ rendement énergétique de conversion → *rendement 34.* R конверсионная эффективность (сцинтиллятора). D Wirkungsgrad der Energieumwandlung (eines Szintillators). E rendimiento energético de conversión (de un centelleador). I rendimento energetico di conversione (di uno scintillatore). N rendement van de energieomzetting (v.e. scintillator). P sprawność przemiany energii (scyntylatora). S omvandlingsverkningsgrad. (391)
23. **energy efficiency (of a cell or battery)** : the ratio of the energy delivered during the discharge of a cell or battery to the energy necessary to restore the initial state of charge under specified conditions. ★ rendement (de charge) en énergie (d'un accumulateur) → *rendement 11.* R отдача по энергии (вторичного химического источника тока). D Energie-Wirkungsgrad (einer Zelle oder Batterie). E rendimiento de energía (de un elemento o batería). I rendimento in energia. N Wh-rendement. P sprawność energetyczna (akumulatora). S energiverkningsgrad. (486)
24. **feed efficiency** (*Syn.* spill-over factor) : → *factor 167*
25. **gross thermal efficiency of a unit** : during a given period of time, the ratio of the gross electrical energy generated by a unit to the thermal energy of the fuel consumed during the same period by the same unit. ★ rendement thermique brut d'une tranche → *rendement 43.* R производство электроэнергии на единицу тепла. D thermischer Brutto-Wirkungsgrad. E rendimiento térmico bruto de un grupo. I rendimento termico lordo di una unità. N bruto thermisch rendement van een opwekeenheid. P sprawność cieplna brutto zespołu prądotwórczego. S termisk brutto-verkningsgrad för ett block. (602)
26. **indirect calculation of efficiency** : calculation of the efficiency from the measurement of losses. ★ mesure indirecte du rendement → *mesure 26.* R косвенное определение к п д. D indirekte Wirkungsgradermittlung. E medida indirecta del rendimiento. I misura indiretta del rendimento. N indirecte bepaling van het rendement. P pośrednie wyznaczanie sprawności. S indirekt bestämning av verkningsgrad. (411)
27. **information transfer efficiency** (in telecontrol) : the ratio of the information content of a message transferred from a data source and accepted as valid by a data sink to the total number of bits expended for the message transfer. ★ efficacité de transfert de l'information → *efficacité 7.* R эффективность передачи информации (в телемеханике). D Effizienz der Informationsübermittlung (beim Fernwirken). E eficiencia de transferencia de información (en telecontrol). I efficienza di trasferimento dell'informazione (nel telecontrollo). N informatietransmissierendement. P sprawność przesyłu informacji (w sterowaniu zdalnym). S meddelandeöverföringseffektivitet. (371)
28. **luminaire efficiency** (*Syn.* light output ratio) : → *ratio 49*
29. **luminous efficiency** (of radiation) (V) : ratio of radiant flux weighted according to $V(\lambda)$ to the corresponding radiant flux.

$$V = \frac{\int_0^\infty \Phi_{e\lambda}(\lambda)\cdot V(\lambda)\cdot d\lambda}{\int_0^\infty \Phi_{e\lambda}(\lambda)\cdot d\lambda} = \frac{K}{K_m}$$

Unit: *Notes. 1* — See the spectral luminous efficiency.

$$V(\lambda) = \frac{K(\lambda)}{K_m}$$

2 — For scotopic vision, the symbols in the formulae are replaced by V', Φ', K' and K'_m respectively. ★ efficacité lumineuse relative → *efficacité lumineuse 3.* R относительная световая эффективность (излучения). D visueller Nutzeffekt (einer Strahlung). E eficiencia luminosa. I fattore di visibilità. N visueel rendement. P skuteczność świetlna (promieniowania) względna. S ljustverkningsgrad. (845)
30. **magnetic medium relative efficiency** (with respect to a reference magnetic medium) : the difference, expressed in decibels, between two levels of the same signal, recorded, one on a stated magnetic medium and the other on a reference magnetic medium, by the same audio-frequency current; the biasing current has in each case an adequate value. ★ efficacité relative d'un support magnétique → *efficacité 16.* R относительная чувствительность носителя магнитной записи (по сравнению с типовым носителем). D relative Empfindlichkeit eines magnetischen Mediums. E eficiencia relativa de un soporte magnético (respecto a un soporte magnético de referencia). I resa relativa di un supporto magnetico (rispetto a un supporto magnetico di riferimento). N relatief magnetiseringsrendement. P czułość względna nośnika magnetycznego. S magnetiska mediets relativa verkningsgrad. (806)
31. **net thermal efficiency of a unit** : during a given period of time, the ratio of the net electrical energy generated by a unit to the thermal energy of the fuel consumed during the same period by the same unit. ★ rendement thermique net d'une tranche → *rendement 44.* R отпуск электроэнергии на единицу тепла. D thermischer Netto-Wirkungsgrad. E rendimiento térmico neto de un grupo. I rendimento termico netto di una unità. N netto thermisch rendement van een opwekeenheid. P sprawność cieplna netto zespołu prądotwórczego. S termisk netto-verkningsgrad för ett block. (602)

32. quantum efficiency : the ratio of countable elementary events at the input and output of a quantum device. *Notes. 1* — For an optical semiconductor source it is the ratio of the number of photons emitted to the number of electrons applied. *2* — For an optical detector it is the ratio of the number of electrons generated in the photocurrent to the number of photons applied. ★ rendement quantique → *rendement 39.* R квантовая эффективность. D Quantenausbeute. E eficiencia cuántica. I efficienza quantica. N fotonenrendement. P sprawność kwantowa. S kvantverkningsgrad. (531,731,845)

33. quantum efficiency characteristic : → *characteristic 68*

34. radiant efficiency (of a source of radiation) (η_e; η) : ratio of the radiant flux of the emitted radiation to the power consumed by the source. Unit: 1 *Note.* — It must be specified whether or not the power dissipated by auxiliary equipment such as ballasts, etc., if any, is included in the power consumed by the source. ★ rendement énergétique → *rendement 33.* R коэффициент полезного действия (источника излучения). D Strahlungsausbeute (einer Strahlungsquelle). E eficiencia radiante. I rendimento energetico. N stralingsrendement (van een stralingsbron). P sprawność energetyczna (źródła). S strålningsutbyte (hos strålkälla). (845)

35. radiation efficiency (of an antenna) : the ratio of the total power radiated by an antenna to the net power accepted by the antenna. ★ rendement → *rendement 7.* R коэффициент полезного действия антенны; к п д антенны. D Strahlungswirkungsgrad (einer Antenne). E eficiencia de radiación (de una antena); rendimiento. I efficienza d'irradiazione. N stralingsrendement (van een antenne). P sprawność promieniowania (anteny). S antennverkningsgrad. (712)

36. recording head relative efficiency : the difference, expressed in decibels, between two levels of the same signal recorded on the same magnetic tape, one by a stated recording head and the other by a reference recording head, when these heads are energized by the same audio-frequency current; the biasing current has in each case an adequate value. ★ efficacité relative d'une tête d'enregistrement → *efficacité 18.* R относительная чувствительность записывающей головки. D relative Empfindlichkeit eines Aufnahmekopfes. E eficiencia relativa de una cabeza de registro. I resa relativa di una testina di registrazione. N relatief opneemkoprendement. P czułość względna głowicy zapisującej. S inspelningshuvudets relativa verkningsgrad. (806)

37. reproducing head absolute efficiency : the electromotive force delivered by a given reproducing head when reproducing a standard level reference magnetic tape. ★ efficacité absolue d'une tête de lecture → *efficacité 3.* R абсолютная чувствительность воспроизводящей головки. D Empfindlichkeit des Wiedergabekopfes. E eficiencia absoluta de una cabeza de lectura. I resa relativa di una testina di riproduzione. N absoluut weergeefkoprendement. P czułość bezwzględna głowicy odczytującej. S avspelningshuvudets absoluta verkningsgrad. (806)

38. reverse relative tape efficiency : the difference, expressed in decibels, at a specified frequency, between the relative efficiency of a given tape obtained during the normal direction of travel and its relative efficiency obtained during the reverse direction of travel. ★ efficacité relative d'une bande lue en sens inverse → *efficacité 17.* R обратная чувствительность ленты. D Velourseffekt. E eficacia relativa de una cinta leída en sentido inverso. I sensibilità del nastro a marcia indietro. N relatief bandrendement bij tegengestelde transportrichting. P skuteczność względna taśmy wsteczna. S velureffekt. (806)

39. screen efficiency : the quotient of the luminous or radiant intensity of an excited area of the screen to the product of beam current and final accelerator voltage. ★ efficacité de l'écran → *efficacité 6.* R светоотдача экрана. D Schirmwirkungsgrad. E eficacia de la pantalla. I efficienza dello schermo. N schermrendement. P wydajność ekranu (luminescencyjna). S ljusutbyte. (531)

40. source power efficiency : the ratio of emitted optical power of an optical source to the input power (generally electrical power). ★ rendement énergétique → *rendement 32.* R эффективность источника. D Laserwirkungsgrad. E eficiencia de potencia de una fuente. I efficienza (di conversione) della sorgente. N vermogensrendement van een lichtbron. P sprawność energetyczna źródła. S emissionsverkningsgrad. (731)

41. spectral luminous efficiency (of a monochromatic radiation of wavelength λ) ($V(\lambda)$ for photopic vision; $V'(\lambda)$ for scotopic vision) : ratio of the radiant flux at wavelength λ_m to that at wavelength λ such that both radiations produce equally intense luminous sensations under specified photometric conditions and λ_m is chosen so that the maximum value of this ratio is equal to 1. *Note.* — Unless otherwise indicated, the values used for the spectral luminous efficiency in photopic vision are the values agreed internationally in 1924 by the CIE (*Compte Rendu* 6e session, p. 67), completed by interpolation and extrapolation (*Publications CIE* RNo. 18 (1970), p. 43 and No. 15 (1971), p. 93), and recommended by the International Committee of Weights and Measures (CIPM) in 1972. For scotopic vision, the CIE in 1951 adopted, for young observers, the values published in *Compte Rendu* 12e session, Vol. 3, p. 37, and ratified by the CIPM in 1976. These values define respectively the $V(\lambda)$ or $V'(\lambda)$ functions represented by the $V(\lambda)$ or $V'(\lambda)$ curves (see figure 845-1). ★ efficacité lumineuse relative spectrale → *efficacité lumineuse 4.* R относительная спектральная световбая эффективность (монохроматического излучения с длиной волны λ) ($V(\lambda)$ для днвного зрения, $V'(\lambda)$ для ночного зрения). D spektraler Hellempfindlichkeitsgrad (einer monochromatischen Strahlung der Wellenlänge λ) ($V(\lambda)$ für photopisches Sehen ; $V'(\lambda)$ für skotopisches Sehen). E eficiencia luminosa espectral relativa. I fattore spettrale di visibilità. N relatieve spectrale ooggevoeligheid. P skuteczność świetlna widmowa względna. S spektral ljustverkningsgrad. (845)

42. thermionic-emission efficiency : the quotient of the saturation thermionic-emission current to the heating power of the cathode. ★ efficacité d'émission thermoélectronique → *efficacité 8.* R эффективность термоэлектронной эмиссии. D Wirkungsgrad der thermischen Emission. E eficacia de emisión termoelectrónica. I efficienza di emissione termoelettronica. N rendement van de thermische emissie. P wydajność termoemisji. S termisk emissionsverkningsgrad. (531)

43. total absorption detection efficiency : for a given detection assembly and photon energy, the ratio of the number of photons detected in the total absorption peak to the total number of photons emitted by the radiation source in the same time interval. It is equal to the product of the photofraction and the detection efficiency. ★ rendement d'absorption totale de détection → *rendement 9.* R эффективность регистрации при полном поглощении. D Totalabsorptions-Nachweiswahrscheinlichkeit. E rendimiento de absorción total de detección. I rendimento di assorbimento totale di rivelazione. N detectierendement voor totale absorptie. P sprawność detekcji absorpcyjna całkowita. S detekteringsverkningsgrad för totalabsorption. (391)

44. total absorption detector efficiency : for a given photon energy, the ratio of the number of photons detected in the total absorption peak to the number of photons which are incident on the detector in the same time interval. It is equal to the product of the photofraction and the detector efficiency. ★ rendement d'absorption totale d'un détecteur → *rendement 10.* R эффективность детектора при полном поглощении. D Totalabsorptions-Ansprechwahrscheinlichkeit. E rendimiento de absorción total de un detector. I rendimento di assorbimento totale di un rivelatore. N detectorrendement voor totale absorptie. P sprawność detektora absorpcyjna całkowita. S detektorverkningsgrad för totalabsorption. (391)

45. transmission efficiency (of a thermo-electric vehicle) : the ratio of the output at the wheel rim to the traction output of the internal combustion engine(s). ★ rendement de la transmission (d'un véhicule thermoélectrique) → *rendement 24.* R коэффициент полезного действия (теплоэлектрического подвижного состава). D Wirkungsgrad der Kraftübertragung eines thermoelektrischen Fahrzeuges. E rendimiento de transmisión (de un vehículo termoeléctrico). I rendimento della trasmissione (d'un veicolo termoelettrico). N rendement van de aandrijving. P sprawność przekładni (pojazdu). S transmissionsverkningsgrad. (811)

46. tube efficiency : the ratio, usually expressed as a percentage, of the output power of the tube to the total input power excluding the cathode heating supply power and that part of the driving power having the same frequency as the output power or a sub-multiple thereof. ★ rendement du tube → *rendement 27.* R коэффициент полезного действия лампы. D Röhrenwirkungsgrad. E rendimiento del tubo; eficiencia del tubo. I rendimento del tubo. N buisrendement. P sprawność lampy. S verkningsgrad hos rör. (531)

effort

1. **tractive effort (at the wheel rim)** : the longitudinal force exerted at the wheel rim by the traction motors when motoring. ★ effort de traction (à la jante) → *effort 8.* R сила тяги (на ободе колеса). D Zugkraft (am Radumfang). E esfuerzo de tracción (en la llanta). I forza di trazione (ai cerchioni). N trekkracht (aan de wielomtrek). P siła pociągowa na obwodzie kół. S dragkraft vid hjulperiferi. (811)

EFP

1. **EFP** (*Syn.* electronic field production) : → *production 2*

EFS

1. **EFS** (*Syn.* error-free second) : → *error-free 1*

eggcrate

1. **eggcrate lens** (*Syn.* multicellular lens) : → *lens 14*

E-H

1. **E-H tee** (*Syn.* hybrid T) : → *tee 2*

eidophor

1. **eidophor** (trade mark) : a large-screen television projector in which the intensity of a beam of light is modulated by deformation of an oil film, which forms a reflecting and scattering surface, the deformation being caused by an electron beam modulated by a video signal. ★ eidophore → *eidophore 1.* R эйдофор (торговая марка). (723)

EIRP

1. **EIRP** (*Syn.* equivalent isotropically radiated power) : → *power 57*

elastic

1. **elastic collision** : → *collision 7*
2. **elastic scattering** : → *scattering 8*
3. **elastic scattering cross-section** : → *cross-section 12*

elasticity

1. **lateral elasticity** (*Syn.* lateral resilience) : the displacement of the contact wire horizontally in the across-track direction per unit of applied force. ★ élasticité horizontale → *élasticité 3.* R поперечная гибкость. D horizontale Elastizität. E elasticidad horizontal. I elasticità trasversale. N horizontale verplaatsing in transversale richting. P elastyczność poprzeczna. S sidoelasticitet. (811)
2. **vertical elasticity** (*Syn.* vertical resilience) : the displacement of the contact wire in the vertical plane per unit of applied force. ★ élasticité verticale → *élasticité 4.* R вертикальная гибкость. D vertikale Elastizität. E elasticidad vertical. I elasticità verticale. N verplaatsing in verticale richting. P elastyczność pionowa. S höjdelasticitet. (811)

elastomer

1. **elastomer** : a macromolecular material which returns rapidly to approximately its initial dimensions and shape after substantial deformation by a weak stress and release of the stress. *Note.* — The definition applies to room temperature test conditions. ★ élastomère → *élastomère 1.* R эластомер. D Elastomer. E elastómero. I elastomero. N kunstrubber; elastomeer. P elastomer. S elast. (212)

elbow

1. **arc furnace fume elbow** : a device for collection of fume through a hole in the furnace roof and directing to an equipment for dust removal and other processing. ★ coude d'aspiration des fumées d'un four à arc → *coude 8.* R газоотвод дуговой печи. D Rauchgasstutzen. E codo de aspiración de humos de un horno de arco. I gomito di aspirazione dei fumi di un forno ad arco. N rookgaselleboog van een boogoven. P kolanko wyciągowe. S rökgasrör. (841)
2. **elbow** (*Syn.* waveguide bend) : → *bend 5*
3. **elbow** (*Syn.* waveguide corner) : → *corner 9*

electret

1. **electret microphone** : → *microphone 9*

electric

1. **continuous operation duty-type with electric braking** : → *duty-type 2*
2. **direct electric heating** : → *heating 8*
3. **disruptive electric field strength** : → *field strength 2*
4. **electric** : containing, producing, arising from, or actuated by electricity, such as electric energy, electric lamp, electric motor. ★ électrique → *électrique 52.* R электрический (прилагательное). D elektrisch. E eléctrico (adjetivo). I elettrico. N elektrisch. P elektryczny. S el-; elektrisk. (151)
5. **(electric) actuator** : → *actuator 6*
6. **(electric) arc** : → *arc 29*
7. **electric automatic coupler** : → *coupler 12*
8. **electric braking** : → *braking 24*
9. **(electric) breakdown** : → *breakdown 11*
10. **(electric) breakdown** : → *breakdown 12*
11. **electric burn** : → *burn 3*
12. **electric charge** : → *charge 25*
13. **electric charge** : → *charge 26*
14. **electric circuit** : → *circuit 68*
15. **electric constant** : → *constant 18*
16. **electric coupler** : → *coupler 13*
17. **electric coupling** : → *coupling 22*
18. **electric device** : → *device 22*
19. **electric dipole** : → *dipole 2*
20. **electric dipole moment** : → *moment 2*
21. **electric discharge (in a gas)** : → *discharge 15*
22. **electric energy transducer** : → *transducer 2*
23. **electric field strength** : → *field strength 4*
24. **electric flux** : → *flux 7*
25. **electric flux density** : → *flux density 3*
26. **(electric) generator** : → *generator 13*
27. **electric heating** : → *heating 12*
28. **electric hysteresis** : → *hysteresis 2*
29. **electric hysteresis loop** : → *loop 10*
30. **electric induction** : → *induction 4*
31. **electric induction braking** : → *braking 25*
32. **(electric) line** : → *line 30*
33. **electric loading** : → *loading 2*
34. **electric machine** : → *machine 10*
35. **electric mark** : → *mark 5*
36. **(electric) motor** : → *motor 29*
37. **electric polarization** : → *polarization 12*
38. **electric polarization curve** : → *curve 14*
39. **electric potential** : → *potential 4*
40. **electric screen** : → *screen 4*
41. **(electric) sensor** : → *sensor 2*
42. **electric shock** : → *shock 4*
43. **(electric) shunt** : → *shunt 1*
44. **electric signal transducer** : → *transducer 3*
45. **(electric) spark** : → *spark 1*
46. **electric strength** : → *strength 1*
47. **electric surface heating** : → *heating 13*
48. **electric susceptibility** : → *susceptibility 1*
49. **electric traction** : → *traction 6*
50. **(electric) tramcar** : → *tramcar 1*
51. **(electric) tramway** : → *tramway 2*
52. **electric transmission** : → *transmission 23*
53. **elementary (electric) charge** : → *charge 30*
54. **(elementary) electric dipole** (*Syn.* hertzian (electric) dipole) : → *dipole 10*
55. **equivalent electric circuit** : → *circuit 73*
56. **hertzian (electric) dipole** : → *dipole 10*
57. **incandescent (electric) lamp** : → *lamp 27*
58. **indirect electric heating** : → *heating 38*
59. **intermittent periodic duty-type with electric braking** : → *duty-type 8*
60. **internal electric field** : → *field 47*
61. **linear (electric) charge density** : → *charge-density 2*
62. **passive (electric) circuit** : → *circuit 134*
63. **passive (electric) circuit element** : → *circuit element 6*
64. **rating of an electric vehicle** : → *rating 13*

65. **residual electric polarization** : → *polarization 41*
66. **sensitivity to electric power** : → *sensitivity 30*
67. **specific energy consumption of an electric vehicle** : → *consumption 2*
68. **surface (electric) charge density** : → *charge-density 3*
69. **transverse electric mode** (*Syn.* TE mode) : → *mode 75*
70. **transverse electric mode** : → *mode 88*
71. **volume (electric) charge density** : → *charge-density 4*

electrical

1. **associated electrical apparatus** : → *apparatus 3*
2. **bias electrical restraint** : → *restraint 1*
3. **electrical** : related to or associated with electricity, but not having its properties or characteristics, such as electrical engineer, electrical handbook. ★ ..... → . **R** ..... **D** Elektro-. **E** ..... **I** elettrotecnico. **N** elektrisch; elektrotechnisch. **P** elektryczny. **S** el-; elektrisk. (151)
4. **electrical apparatus for explosive atmospheres** : → *apparatus 6*
5. **electrical back-to-back test** : → *test 30*
6. **electrical boresight** : → *boresight 2*
7. **electrical charge time constant** : → *time constant 7*
8. **(electrical) circuit** : → *circuit 69*
9. **electrical clearance** : → *clearance 8*
10. **(electrical) coil** : → *coil 18*
11. **(electrical) discharge** : → *discharge 16*
12. **electrical discharge time constant** : → *time constant 8*
13. **electrical dynamometer** : → *dynamometer 2*
14. **(electrical) energy** : → *energy 15*
15. **electrical engagement length** : → *length 8*
16. **electrical equipment** : → *equipment 30*
17. **electrical generating station** (*Syn.* power station) : → *power station 17*
18. **electrical installation of buildings** : → *installation 4*
19. **electrical insulation** : → *insulation 14*
20. **electrical interlocks** : → *interlock 1*
21. **electrical length** : → *length 9*
22. **electrical length** : → *length 10*
23. **electrical measuring instrument** : → *measuring instrument 6*
24. **(electrical) network** : → *network 22*
25. **electrical path length difference** (*Syn.* path length difference) : → *difference 23*
26. **electrical power network** (*Syn.* electrical power system) : → *system 57*
27. **electrical power system** : → *system 56*
28. **electrical power system** : → *system 57*
29. **electrical rail joint** : → *joint 8*
30. **electrical relay** : → *relay 11*
31. **(electrical) rotating machine** : → *machine 11*
32. **electrical spot displacement** : → *displacement 4*
33. **electrical steel** : → *steel 2*
34. **electrical zero** : → *zero 1*
35. **electrical zero adjuster** : → *adjuster 2*
36. **explosion-protected electrical apparatus** (*Syn.* electrical apparatus for explosive atmospheres) : → *apparatus 6*
37. **intrinsically-safe electrical apparatus** : → *apparatus 11*
38. **origin of an electrical installation** : → *installation 11*
39. **semi-processed electrical steel** : → *steel 3*
40. **thermal electrical relay** : → *relay 48*
41. **thermal electrical relay with partial memory function** : → *relay 49*
42. **thermal electrical relay with total memory function** : → *relay 50*

electrically

1. **electrically alterable store** : → *store 3*
2. **electrically controlled brake** : → *brake 11*
3. **electrically independent earth electrodes** : → *electrode 25*
4. **electrically neutral** : → *neutral 4*
5. **electrically released spring brake** : → *brake 12*
6. **electrically separated contact elements** : → *element 15*

electrical-signal

1. **electrical-signal storage tube** : → *tube 25*

electricity

1. **conversion of electricity** : → *conversion 9*
2. **distribution of electricity** : → *distribution 20*
3. **electricity** : 1. The manifestation of a form of energy associated with static or dynamic electric charges. 2. The special field of science and technology dealing with electric phenomena. ★ électricité → *électricité 1.* **R** электричество. **D** Elektrizität. **E** electricidad. **I** elettricità. **N** elektriciteit; elektriciteitsleer; elektrotechniek. **P** elektryczność; elektryka. **S** elektricitet. (151)
4. **electricity supply system** (*Syn.* electrical power system) : → *system 56*
5. **generation of electricity** : a process whereby electrical energy is obtained from some other form of energy. ★ production d'énergie électrique → *production 8.* **R** производство электрической энергии. **D** Erzeugung elektrischer Energie. **E** producción de energía eléctrica. **I** produzione d'energia elettrica. **N** opwekking van elektrische energie. **P** wytwarzanie energii elektrycznej. **S** produktion av elenergi; elproduktion. (601)
6. **transformation of electricity** : the transfer of electricity through a power transformer. ★ transformation d'énergie électrique → *transformation 10.* **R** трансформация электрической энергии. **D** Transformierung elektrischer Energie. **E** transformación de energía eléctrica. **I** trasformazione d'energia elettrica. **N** transformatie van elektrische energie. **P** transformacja energii elektrycznej. **S** transformering (av elkraft). (601)
7. **transmission of electricity** : the transfer in bulk of electricity, from generating stations to areas of consumption. ★ transport d'énergie électrique → *transport 9.* **R** передача электрической энергии. **D** Übertragung elektrischer Energie. **E** transporte de energía eléctrica. **I** trasmissione d'energia elettrica. **N** transport van elektrische energie. **P** przesył energii elektrycznej. **S** överföring (av elkraft). (601)

electrification

1. **electrification** : the application of a voltage between electrodes. ★ électrisation → *électrisation 2.* **R** электризация. **D** Elektrisierung. **E** electrización. **I** elettrizzazione. **N** onder spanning zetten; (elektrisch) spanning aanleggen. **P** elektryzacja. **S** spänningssättning. (212)
2. **electrification clearance gauge** : → *gauge 2*
3. **electrification current** : → *current 75*

electroacoustic

1. **electroacoustic coupling coefficient (1)** : → *coefficient 18*
2. **electroacoustic coupling coefficient (2)** : → *coefficient 19*
3. **electroacoustic transducer** : → *transducer 4*

electro-acoustical

1. **recording/reproducing electro-acoustical frequency response** : → *frequency-response 9*

electrocapillarity

1. **electrocapillarity** : the change of the mechanical stress at the surface between two bodies due to the presence of charges at the interface. ★ électrocapillarité → *électrocapillarité 1.* **R** электрокапиллярность. **D** Elektrokapillarität. **E** electrocapilaridad. **I** elettrocapillarità. **N** elektrocapillariteit. **P** elektrokapilarność. **S** elektrokapillaritet. (111)

electrochemical

1. **(chemical or electrochemical) diffusion** : → *diffusion 1*
2. **(electrochemical) cell** : → *cell 10*
3. **(electrochemical) cell or battery** : → *cell 11*
4. **(electrochemical) migration** : → *migration 1*
5. **(electrochemical) oxidation** (*Syn.* anodic reaction) : → *reaction 1*
6. **(electrochemical) reduction** (*Syn.* cathodic reaction) : → *reaction 3*

electrochemistry

1. **electrochemistry** : that branch of science and technology which deals with reciprocal transformation of chemical and electric energy. ★ électrochimie → *électrochimie 1.* R электрохимия. D Elektrochemie. E electroquímica. I elettrochimica. N elektrochemie. P elektrochemia. S elektrokemi. (111)

electrocution

1. **electrocution** : a fatal electric shock. ★ électrocution → *électrocution 1.* R смертельное поражение током. D tödlicher elektrischer Schlag. E electrocución. I elettrocuzione. N elektrocutie. P śmiertelne porażenie elektryczne. S dödande elchock. (604)

electrode

1. **accelerating electrode** (*Syn.* accelerator) : → *accelerator 2*
2. **active surface of an electrode** : → *surface 1*
3. **air-arc cutting and gouging electrode** : a carbon electrode which provides an arc for melting the metal. It is used with an air jet which removes the molten metal. ★ électrode de coupage et gougeage air-arc → *électrode 42.* R электрод для воздушно-дуговой резки и строжки. D Elektrode zum Luft-Lichtbogenschneiden und -fugenhobeln. E electrodo de corte y ranurado por aire-arco. I elettrodo da taglio e sgorbio ad arco-aria. N gutselektrode. P elektroda do cięcia i żłobienia elektropowietrznego. S elektrod för luftbågsmejsling. (851)
4. **arc cutting electrode** : electrode in the form of a rod, wire or tube from which the current passes to the arc for the purpose of cutting. ★ électrode de coupage à l'arc → *électrode 41.* R электрод для дуговой резки. D Lichtbogenschneidelektrode. E electrodo para corte por arco. I elettrodo da taglio all'arco. N ..... P elektroda do cięcia łukowego. S bågskärningselektrod. (851)
5. **arc furnace electrode arm** : → *arm 2*
6. **arc furnace electrode clamp** : → *clamp 3*
7. **arc furnace electrode mast** : → *mast 1*
8. **arc furnace electrode mast brake** (*Syn.* arc furnace electrode mast snubber) : → *mast 3*
9. **arc furnace electrode mast snubber** : → *mast 3*
10. **arc furnace electrode pitch circle diameter** : → *pitch 1*
11. **arc welding electrode** : electrode in the form of a rod, wire, strip or tube from which the current passes to the arc for the purpose of welding. ★ électrode de soudage à l'arc → *électrode 50.* R электрод для дуговой сварки. D Lichtbogenschweißelektrode. E electrodo para soldadura por arco. I elettrodo per saldatura ad arco. N laselektrode; lasdraad. P elektroda do spawania łukowego. S bågsvetselektrod. (851)
12. **carry electrode** : an electrode used to supply pulses to drive the following stage in a multi-stage counting system. ★ électrode de liaison → *électrode 44.* R электрод связи. D Übergabeelektrode. E electrodo de enlace. I elettrodo di collegamento. N overdraagelektrode. P elektroda pośrednicząca. S drivelektrod. (531)
13. **coated electrode** : an electrode the surface of which has a protective coating. ★ électrode enrobée → *électrode 59.* R электрод с защитным покрытием. D ummantelte Elektrode. E electrodo revestido. I elettrodo ricoperto. N elektrode met beschermlaag. P elektroda otulona. S belagd elektrod. (841)
14. **collecting electrode** : the electrode of an ionization chamber or a counter tube which is intended to collect electrons or ions produced by ionizing radiation. ★ électrode collectrice → *électrode 28.* R собирающий электрод. D Sammelelektrode. E electrodo colector. I elettrodo collettore. N verzamelelektrode. P elektroda zbiorcza. S uppsamlingselektrod. (391)
15. **consumable arc welding electrode** : arc welding electrode that melts to provide filler metal. ★ électrode fusible de soudage à l'arc → *électrode 60.* R плавящийся электрод для дуговой сварки. D abschmelzende Lichtbogenschweißelektrode. E electrodo consumible para soldadura por arco. I elettrodo consumabile per saldatura ad arco. N afsmeltende laselektrode. P elektroda do spawania łukowego topliwa. S smältande bågsvetselektrod. (851)
16. **consumable electrode** (of a furnace) : the electrode of a vacuum arc, electron beam or electroslag furnace of the metal to be refined which progressively forms an ingot. ★ électrode consommable → *électrode 30.* R расходуемый электрод (печи). D Abschmelzelektrode (selbstverzehrende Elektrode). E electrodo consumible (de un horno). I elettrodo consumabile (di un forno). N afsmeltelektrode. P elektroda topliwa. S smältbar elektrod. (841)
17. **continuous electrode** : an arc furnace electrode which allows for the attachment of new sections of electrode materials during furnace operation. ★ électrode continue → *électrode 31.* R наращиваемый электрод. D Dauerelektrode. E electrodo continuo. I elettrodo continuo. N continu gevormde elektrode. P elektroda ciągła. S skarvbar elektrod. (841)
18. **control electrode** : an electrode used to initiate or vary an electrode current. ★ électrode de commande → *électrode 35.* R управляющий электрод. D Steuerelektrode. E electrodo de control. I elettrodo di comando. N stuurelektrode. P elektroda sterująca. S styrelektrod. (531)
19. **convergence electrode** : an electrode whose electric field converges the electron beams. ★ électrode de convergence → *électrode 38.* R сводящий электрод. D Konvergenzelektrode. E electrodo de convergencia. I elettrodo di convergenza. N convergentie-elektrode. P elektroda skupiająca. S konvergeringselektrod. (531)
20. **cutting electrode** (of a dielectric heater) : a work electrode formed to the required shape, having a cutting edge working at high current density and pressure to achieve cutting. ★ électrode de coupage → *électrode 40.* R режущий электрод (диэлектрического нагревателя). D Schneidelektrode (eines dielektrischen Erwärmungsgerätes). E electrodo de corte (de un calentador dieléctrico). I elettrodo di taglio (di una stazione di riscaldamento dielettrico). N snijelektrode. P elektroda do cięcia (grzejnika pojemnościowego). S skärelektrod. (841)
21. **decelerating electrode** : an electrode used to decrease the velocity of electrons or ions. ★ électrode décélératrice → *électrode 54.* R тормозящий электрод. D Bremselektrode. E electrodo desacelerador. I elettrodo deceleratore. N vertragingselektrode. P elektroda hamująca. S retardationselektrod. (531)
22. **deflecting electrodes** (*Syn.* deflector plates) : the electrodes used to produce the electric field for deflection of the electron beam. ★ électrodes de déviation → *électrode 65.* R отклоняющие электроды. D Ablenkelektroden; Ablenkplatten. E electrodo de desviación; placas de desviación. I elettrodi (placche) di deflessione. N afbuigelektroden. P elektrody odchylające; płytki odchylające. S avböjningsplattor. (531)
23. **earth electrode** (*Syn.* ground electrode (USA)) : a conductor or group of conductors in intimate contact with and providing an electrical connection to earth. ★ électrode de terre → *électrode 52.* R заземлитель. D Erder. E electrodo de tierra. I dispersore; presa di terra. N aardelektrode. P elektroda uziemiająca. S jordelektrod. (604)
24. **earth electrode** : a conductive part or a group of conductive parts in intimate contact with and providing an electrical connection with earth. ★ prise de terre → *prise 29.* R заземлитель. D Erder. E toma de tierra. I dispersore; impianto di terra. N aardelektrode. P uziom. S jordtag. (826)
25. **electrically independent earth electrodes** : earth electrodes located at such a distance from one another that the maximum current likely to traverse one of them does not significantly affect the potential of the others. ★ prises de terre électriquement distinctes → *prise 38.* R электрически независимые заземляющие устройства. D elektrisch unabhängige Erder. E toma de tierra eléctricamente independiente; toma de tierra independiente. I impianti di terra elettricamente indipendenti. N aardelektroden zonder wederzijdse beïnvloeding. P uziomy niezależne. S elektriskt oberoende jordtag. (826)
26. **electrode** : a conducting part intended as a conducting interface with a medium of different conductivity. *Note.* — Between two electrodes of a device, there is normally a potential difference and there may be a current. ★ électrode → *électrode 20.* R электрод. D Elektrode. E electrodo. I elettrodo. N elektrode. P elektroda. S elektrod. (111,151,212)
27. **electrode** : a conducting element that performs one or more of the functions of emitting or collecting electrons or ions, or controlling their movement by an electric field. ★ électrode → *électrode 21.* R электрод. D Elektrode. E electrodo. I elettrodo. N elektrode. P elektroda. S elektrod. (521,531)

28. **electrode** (of a piezoelectric crystal element) : an electrically conducting plate in proximity to, or film in contact with a piezoelectric crystal element, which enables an electric field to be applied to the crystal element. ★ électrode → *électrode 22.* R электрод (пьезоэлектрического кристаллического элемента). D Elektrode (eines piezoelektrischen Quarzelementes). E electrodo (de un cristal piezoeléctrico). I elettrodo (di un cristallo piezoelettrico). N elektrode. P elektroda (elementu piezokrystalicznego). S elektrod. (561)
29. **electrode** (of a piezoelectric ceramic element) : an electrically conducting film in contact with a piezoelectric ceramic element by means of which a polarizing or a driving field is applied to the said element. *Note.* — Commonly used electrodes are : a) fired, b) plated, c) vacuum evaporated, d) sputtered. ★ électrode → *électrode 23.* R электрод (пьезоэлектрического керамического элемента). D Elektrode (eines piezoelektrischen keramischen Elementes). E electrodo (de un elemiento de cerámica piezoeléctrica). I elettrodo (di un elemento di ceramica piezoelettrica). N elektrode. P elektroda (elementu piezoceramicznego). S elektrod. (561)
30. **electrode a.c. resistance** : → *resistance 16*
31. **electrode admittance** : → *admittance 7*
32. **electrode breakages** (*Syn.* electrode scrap) : → *scrap 1*
33. **electrode characteristic** : → *characteristic 37*
34. **electrode conductance** : → *conductance 2*
35. **electrode control regulator** : → *regulator 1*
36. **electrode current** : → *current 76*
37. **electrode d.c. resistance** : → *resistance 17*
38. **electrode dead time** : → *time 51*
39. **electrode dissipation** : → *dissipation 6*
40. **electrode economizer** : → *economizer 1*
41. **electrode (for welding)** : a component in the welding circuit which transfers electrical energy to the surface of the metal in order to form a weld or make a cut. *Note.* — For particular types of electrodes see arc welding electrode, arc cutting electrode and resistance welding electrode. ★ électrode (pour soudage) → *électrode 62.* R электрод (для сварки). D Elektrode (zum Schweißen). E electrodo para soldadura. I elettrodo (da saldatura). N elektrode. P elektroda spawalnicza. S svetselektrod. (851)
42. **electrode holder** : → *holder 3*
43. **electrode impedance** : → *impedance 15*
44. **electrode nipple** : → *nipple 1*
45. **electrode of an arc furnace** : a conducting piece, generally of graphite, which is connected to a source of current while one end of the same ensures the passage of the arc to another electrode or to the charge. *Note.* — It is necessary to differentiate between: the roof electrodes, the hearth electrodes. ★ électrode d'un four à arc → *électrode 57.* R электрод дуговой печи. D Lichtbogenofenelektrode. E electrodo de un horno de arco. I elettrodo di un forno ad arco. N elektrode (van een boogoven). P elektroda pieca łukowego. S elektrod (i ljusbågsugn). (841)
46. **electrode oven** : → *oven 2*
47. **(electrode) polarization** : → *polarization 14*
48. **electrode potential** : → *potential 5*
49. **electrode reactance** : → *reactance 8*
50. **electrode reaction** : → *reaction 4*
51. **electrode response time** : → *response time 1*
52. **electrode scrap** : → *scrap 1*
53. **electrode speed** : → *speed 14*
54. **electrode supporting structure** : → *structure 1*
55. **electrode susceptance** : → *susceptance 1*
56. **electrode system** : → *system 59*
57. **electrode tapping for submerged arc furnace** : → *tapping 1*
58. **electrode tip** : → *tip 3*
59. **electrode voltage** : → *voltage 58*
60. **equilibrium (electrode) potential** : the electrode potential when the electrode reaction is at equilibrium. ★ potentiel d'équilibre → *potentiel 13.* R равновесный (электродный) потенциал. D Gleichgewichts spannung (elektroden). E potencial de equilibrio (de un eléctrodo). I potenziale d'equilibrio (di un elettrodo). N evenwichtspotentiaal (van een elektrode). P potencjał równowagowy (elektrody). S jämviktspotential. (111)
61. **extracting electrode** : an electrode placed between the cathode and the anode, which is at a positive potential in respect to the cathode and designed to extract the electrons emitted by the cathode. ★ électrode d'extraction → *électrode 56.* R промежуточный электрод. D Extraktionselektrode. E electrodo de extracción. I elettrodo di estrazione. N extractie-elektrode. P elektroda wyciągająca. S extraktionselektrod. (841)
62. **focusing electrode** : an electrode designed for electrostatic focusing. ★ électrode de concentration → *électrode 36.* R фокусирующий электрод. D Fokussierelektrode. E electrodo de concentración. I elettrodo di focalizzazione. N focusseerelektrode. P elektroda ogniskująca. S fokuseringselektrod. (531)
63. **focusing electrode** (*Syn.*) : →
64. **ground electrode** (*Syn.* earth electrode) : → *électrode 23*
65. **guide electrode** (*Syn.* transfer electrode) : an electrode that ensures the transfer of the discharge from one main gap to the next one. ★ électrode guide → *électrode 61.* R переходной электрод. D Überführungselektrode. E electrodo guía; electrodo de transferencia. I elettrodo di trasferimento. N overneemelektrode. P elektroda prowadząca. S hjälpelektrod. (531)
66. **hydrogen electrode** : platinized platinum electrode saturated by a stream of pure gaseous hydrogen. ★ électrode à hydrogène → *électrode 25.* R водородный электрод. D Wasserstoffelektrode. E electrodo de hidrógeno. I elettrodo a idrogeno. N waterstofelektrode. P elektroda wodorowa. S väteelektrod. (111)
67. **intensifier electrode** (*Syn.* post-deflection accelerator) : → *accelerator 7*
68. **inverse electrode current** (*Syn.* reverse electrode current) : → *current 176*
69. **keep-alive electrode** (*Syn.* primer electrode) : an electrode whose function is to maintain the gas or vapour in a gas discharge tube in a state of partial ionization. ★ électrode d'entretien → *électrode 55.* R поджигающий электрод. D Vorionisator. E electrodo de mantenimiento. I elettrodo di mantenimento. N activeringselektrode. P anoda podtrzymująca. S hållelektrod. (531)
70. **main electrode** (of a discharge lamp) : electrode through which the discharge current passes after the discharge has been stabilized. ★ électrode principale → *électrode 63.* R рабочий электрод (разрядной лампы). D Hauptelektrode (einer Entladungslampe). E electrodo principal. I elettrodo principale. N hoofdelektrode. P elektroda główna. S huvudelektrod. (845)
71. **measuring electrode** : a conductor applied to, or embedded in, a material to make contact with it to measure its dielectric properties. ★ électrode de mesure → *électrode 45.* R измерительный электрод. D Meßelektrode. E electrodo de medida. I elettrodo di misura. N meetelektrode. P elektroda pomiarowa. S mätelektrod. (212)
72. **mesh electrode** (*Syn.* field mesh) : an electrode in the form of a mesh, adjacent to the scanned side of a charge-storage target, and designed to establish an equipotential plane that produces a uniform retarding field for the scanning beam. ★ grille à mailles → *grille 10.* R полевая сетка; сетчатый электрод. D Netzelektrode; Feldnetz. E rejilla de mallas. I griglia a maglie. N gaaselektrode. P elektroda oczkowa. S nätelektrod. (531)
73. **non-consumable arc welding electrode** : arc welding electrode that does not provide filler metal. ★ électrode réfractaire de soudage à l'arc → *électrode 64.* R неплавящийся электрод для дуговой сварки. D nichtabschmelzende Lichtbogenschweißelektrode. E electrodo refractaro para soldadura por arco. I elettrodo non consumabile per saldatura ad arco. N niet-afsmeltende laselektrode. P elektroda do spawania łukowego nietopliwa. S icke smältande bågsvetselektrod. (851)
74. **non-consumable electrode refining arc furnace** : → *arc furnace 39*
75. **oxy-arc cutting electrode** : a metal tubular electrode through which oxygen for the cutting process is conveyed. ★ électrode de coupage oxy-arc → *électrode 43.* R электрод для кислородно-дуговой резки. D Lichtbogen-Sauerstoffschneidelektrode. E electrodo para oxi-corte. I elettrodo da taglio ad arco-ossigeno. N ..... P elektroda do cięcia łukowo-tlenowego. S elektrod för syrgasbågsskärning. (851)

76. **plate electrodes** (of a dielectric heater) : work electrodes consisting of two or more plates from which electrical energy is transferred to the charge to be converted to heat. ★ électrodes en forme de plaque → *électrode 69.* R плоские электроды (диэлектрического нагревателя). D Plattenelektrode (eines dielektrischen Erwärmungsgerätes). E electrodos de placas (de un calentador dieléctrico). I elettrodi a forma di piastra (di una stazione di riscaldamento dielettrico). N plaatelektroden. P elektrody płytowe (grzejnika pojemnościowego). S ..... (841)
77. **primer electrode** (*Syn.* keep-alive electrode) : → *electrode 69*
78. **reference electrode** : electrode with a well-defined and constant equilibrium potential against which it is possible to measure or calculate other electrode potentials by including them in an appropriate cell. ★ électrode de référence → *électrode 47.* R опорный электрод. D Referenzelektrode. E electrodo de referencia. I elettrodo di riferimento. N referentie-elektrode. P elektroda odniesienia. S referenselektrod. (111)
79. **resistance welding electrode** : an electrode through which the welding current passes to the workpiece and by which the necessary welding force is applied. *Note.* — The design of the electrode will depend on the specific application e.g. spot welding, seam welding, projection welding. ★ électrode de soudage par résistance → *électrode 51.* R электрод для контактной сварки. D Widerstandsschweißelektrode. E electrodo para soldadura por resistencia. I elettrodo per saldatura a resistenza. N weerstandlaselektrode. P elektroda zgrzewarki. S motståndssvetselektrod. (851)
80. **reverse electrode current** : → *current 176*
81. **rotating disc electrode** (of a dielectric heater) : a work electrode formed to the shape of a disc which rotates and makes physical contact with the moving workpiece in which thermal energy is generated. ★ électrode en forme de molette → *électrode 58.* R вращающийся дисковый электрод (диэлектрического нагревателя). D Rollenelektrode (eines dielektrischen Erwärmungsgerätes). E electrodo de disco giratorio (de un calentador dieléctrico). I elettrodo a forma di disco rotante (di una stazione di riscaldamento dielettrico). N draaischijfelektrode. P elektroda dyskowa wirująca (grzejnika pojemnościowego). S ..... (841)
82. **salt bath electrode furnace** : → *furnace 47*
83. **salt bath furnace with immersed electrodes** : → *furnace 48*
84. **salt bath furnace with submerged electrodes** : → *furnace 49*
85. **self-baking electrode** : a continuous electrode for certain types of arc furnaces, comprising mainly an envelope, generally metallic, filled with a plastic carbon compound which is self-baked by the heat of the furnace. *Example :* Söderberg electrode. ★ électrode à autocuisson → *électrode 24.* R самоспекающийся электрод. D selbstbackende Elektrode. E electrodo de autococción. I elettrodo ad autocottura. N zelfbakkende elektrode. P elektroda samospiekająca. S självbakande elektrod. (841)
86. **separate earth electrodes** (*Syn.* separate ground electrodes (USA)) : a system of earth electrodes such that the potential of the earth around one of them is not significantly affected by current flowing to earth in the others. ★ électrodes de terre indépendantes → *électrode 66.* R раздельные заземлители. D unbeeinflußte Erder. E electrodos de tierra independientes. I prese di terra indipendenti. N gescheiden aardelektroden. P niezależne elektrody uziemiające. S separatjord. (604)
87. **separate ground electrodes** (*Syn.* separate earth electrodes) : → *electrode 86*
88. **signal electrode** : an electrode from which the output signal is obtained. ★ électrode de signal → *électrode 48.* R сигнальный электрод. D Signalelektrode. E electrodo de señal. I elettrodo di segnale. N signaalelektrode. P elektroda sygnałowa. S utgångselektrod. (531)
89. **specific electrode consumption** : → *consumption 1*
90. **standard (electrode) potential** : → *potential 13*
91. **standard hydrogen electrode** : → *hydrogen 3*
92. **starting electrode** (*Syn.* trigger electrode) : an electrode used to initiate conduction in the main gap. ★ électrode d'amorçage ou d'allumage → *électrode 33.* R пусковой электрод. D Starter (Trigger). E electrodo de cebado. I elettrodo di innesco. N ontsteekelektrode. P elektroda zapłonowa; starter. S triggerelektrod. (531)
93. **starting electrode** (of a discharge lamp) : auxiliary electrode for starting the discharge in a lamp. ★ électrode d'amorçage → *électrode 32.* R поджигающий электрод (разрядной лампы). D Zündelektrode (einer Entladungslampe). E electrodo de cebado. I elettrodo d'innesco. N hulpelektrode. P elektroda zapłonowa. S tändelektrod. (845)
94. **transfer electrode** (*Syn.* guide electrode) : → *electrode 65*
95. **trigger electrode** (*Syn.* starting electrode) : → *électrode 92*
96. **welding electrode** (of a dielectric heater) : the work electrode used to produce thermal energy within the work piece and to apply pressure to the work piece to form the weld. ★ électrode de soudage → *électrode 49.* R сварочный электрод (диэлектрического нагревателя). D Schweisselektroden (eines dielektrischen Erwärmungsgerätes). E electrodo de soldadura (de un calentador dieléctrico). I elottrodo di saldatura (di una stazione di riscaldamento dielettrico). N laselektrode (van een diëlektrisch verwarmingstoestel). P elektroda do spawania (grzejnika pojemnościowego). S svetselektrod. (841)
97. **work electrode** (of a dielectric heater) : plates or other formed shapes of the work capacitor of a dielectric heater, between which is created the alternating electric field necessary to heat the material placed within them. ★ électrodes de travail → *électrode 68.* R рабочий электрод (диэлектрического нагревателя). D Arbeitselektroden (eines dielektrischen Erwärmungsgerätes). E electrodos de trabajo (de un calentador dieléctrico). I elettrodi di lavoro (di una stazione di riscaldamento dielettrico). N werkelektroden (van een diëlektrisch verwarmingstoestel). P elektrody robocze (grzejnika pojemnościowego). S arbetselektrod. (841)

electrodynamic

1. **electro-dynamic braking** : → *braking 26*
2. **electro-dynamic braking dependent on line supply** : → *braking 27*
3. **electro-dynamic braking independent of line supply** : → *braking 28*
4. **electrodynamic cutter head** : → *head 3*
5. **electrodynamic instrument** : → *instrument 4*
6. **electrodynamic loudspeaker** (*Syn.* moving-conductor loudspeaker) : → *loudspeaker 14*
7. **electrodynamic meter** : → *meter 19*
8. **electrodynamic microphone** (*Syn.* moving-conductor microphone) : → *microphone 24*
9. **electrodynamic pick-up head** : → *pick-up head 4*

electro-heat

1. **efficiency of an electro-heat installation** : → *efficiency 20*
2. **electro-heat** : the branch of science and technology dealing with the transformation of electrical energy into thermal energy for useful purposes. ★ électrothermie → *électrothermie 1.* R электронагрев. D Elektrowärme. E electrotermia. I elettrotermia. N elektrowarmte. P elektrotermia. S elvärmelära. (841)
3. **electro-heat equipment** : → *equipment 31*
4. **electro-heat installation** : → *installation 5*
5. **electro-heat technology** : the technique relating to the generation and application of heat in all fields of electric heating. ★ technique de l'électrothermie → *électrothermie 5.* R технология электронагрева. D Elektrowärmetechnik. E tecnología electrotérmica. I tecnologia elettrotermica. N elektrowarmtetechniek. P technika elektrotermiczna. S elvärmeteknik. (841)
6. **industrial electro-heat** : electro-heat applied by industry. ★ électrothermie industrielle → *électrothermie 2.* R промышленный электронагрев. D industrielle Elektrowärme. E electrotermia industrial. I elettrotermia industriale. N industriële elektrowarmte. P elektrotermia przemysłowa. S industriell elvärme. (841)

electroluminescence

1. **electroluminescence** : emission of optical radiation in excess of that radiation due to normal thermal emission resulting from the application of electrical energy. *Note.* — One example is the photon emission resulting from electron-hole recombination in a PN junction such as in a light emitting diode. ★ électroluminescence → *électroluminescence 1.*

R электролюминесценция. D Elektrolumineszenz. E electroluminiscencia. I elettroluminescenza. N elektroluminiscentie. P elektroluminescencja. S elektroluminiscens. (731)

2. **electroluminescence** : luminescence caused by the action of an electric field in a gas or in a solid material (Destriau effect, or radiative recombination as in light-emitting diodes). ★ électroluminescence → *électroluminescence 2.* R электролюминесценция. D Elektrolumineszenz. E electroluminiscencia. I elettroluminescenza. N elektroluminescentie. P elektroluminescencja. S elektroluminiscens. (845)

electroluminescent

1. **electroluminescent lamp** : → *lamp 15*
2. **electroluminescent panel** : → *panel 2*
3. **electroluminescent source** : → *source 10*

electrolysis

1. **electrolysis cell** : → *cell 12*

electrolyte

1. **electrolyte** : a liquid or solid phase containing mobile ions which render the phase ionically conductive. ★ électrolyte → *électrolyte 1.* R электролит. D Elektrolyt. E electrolito. I elettrolito. N elektrolyt. P elektrolit. S elektrolyt. (111,486)
2. **electrolyte level indicator** : → *indicator 5*
3. **electrolyte retention** : → *retention 3*

electrolytic

1. **a.c. electrolytic capacitor** : → *capacitor 1*
2. **electrolytic capacitor** : → *capacitor 31*
3. **electrolytic capacitor paper** : → *paper 4*

electromagnet

1. **electromagnet** : device consisting of a ferromagnetic core and a coil which produces a magnetic field when an electric current flows through the coil. ★ électro-aimant → *électro-aimant 2.* R электромагнит. D Elektromagnet. E electroimán. I elettromagnete. N elektromagneet. P elektromagnes. S elektromagnet. (151)

electromagnetic

1. **electromagnetic beam** : → *beam 19*
2. **electromagnetic braking** : → *braking 29*
3. **electro-magnetic braking** : → *braking 30*
4. **electromagnetic compatibility** : → *compatibility 5*
5. **(electromagnetic) compatibility level** : → *level 17*
6. **(electromagnetic) compatibility margin** : → *margin 2*
7. **electro-magnetic contactor** : → *contactor 8*
8. **electromagnetic disturbance** : → *disturbance 8*
9. **(electromagnetic) emission** : → *emission 4*
10. **electromagnetic energy** : → *energy 16*
11. **electromagnetic environment** : → *environment 1*
12. **electromagnetic field** : → *field 7*
13. **electro-magnetic friction braking** : → *braking 31*
14. **electromagnetic induction** : → *induction 6*
15. **electromagnetic interaction** : → *interaction 1*
16. **electromagnetic interference** : → *interference 4*
17. **electromagnetic lens** : → *lens 5*
18. **electromagnetic loudspeaker** : → *loudspeaker 5*
19. **electromagnetic microphone** : → *microphone 11*
20. **(electromagnetic) mode** : → *mode 21*
21. **electromagnetic noise** : → *noise 14*
22. **(electromagnetic) radiation** : → *radiation 20*
23. **(electromagnetic) radiation** : → *radiation 21*
24. **electro-magnetic rail brake** (*Syn.* electro-magnetic track brake) : → *brake 14*
25. **electromagnetic screen** : → *screen 5*
26. **electromagnetic spectrum** : → *spectrum 10*
27. **(electromagnetic) susceptibility** : → *susceptibility 2*
28. **electro-magnetic track brake** : → *brake 14*
29. **electromagnetic unit** : → *unit 20*
30. **electromagnetic wave** : → *wave 11*
31. **guided (electromagnetic) wave** : → *wave 18*
32. **transverse electromagnetic mode** (*Syn.* TEM mode) : → *mode 80*
33. **transverse electromagnetic mode** : → *mode 90*
34. **transverse (electromagnetic) wave** : → *wave 68*
35. **(volume) density of electromagnetic energy** : → *density 43*

electromechanical

1. **electromechanical coupling coefficient (1)** : → *coefficient 20*
2. **electromechanical coupling coefficient (2)** : → *coefficient 21*
3. **electromechanical coupling factor** : → *factor 66*
4. **electromechanical relay** : → *relay 12*
5. **electromechanical transducer** : → *transducer 5*

electromechanism

1. **linear control electromechanism** : → *control 120*
2. **rotational control electromechanism** : → *control 162*

electrometer

1. **electrometer** : an instrument intended to detect or measure a voltage, absorbing negligible energy. ★ électromètre → *électromètre 1.* R электрометр. D Elektrometer. E electrómetro. I elettrometro. N elektrometer. P elektrometr. S elektrometer. (301)
2. **electrometer tube** : → *tube 26*
3. **quadrant electrometer** : an electrometer in which the moving element is actuated by electrostatic forces between that element and fixed elements shaped like quadrants. ★ électromètre à quadrants → *électromètre 2.* R электрометр квадрантный. D Quadranten-Elektrometer. E electrómetro de cuadrantes. I elettrometro a quadrante. N kwadrantelektrometer. P elktrometr kwadrantowy. S kvadrantelektrometer. (302)

electromotive

1. **electromotive force** : → *force 17*
2. **noise electromotive force** (*Syn.* equivalent noise voltage) : → *voltage 64*
3. **psophometric electromotive force** : → *force 25*

electron

1. **Auger electron** : electron ejected as a result of the Auger effect. ★ électron Auger → *électron 7.* R Оже-электрон. D Auger-Elektron. E electron de Auger. I elettrone Auger. N Augerelektron. P elektron Augera. S Auger-elektron. (881)
2. **bound electron** : an electron in one of the quantized energy levels of an atom or molecule, not free to move under the influence of an applied electric field. ★ électron lié → *électron 15.* R связанный электрон. D gebundenes Elektron. E electrón ligado. I elettrone vincolato. N gebonden elektron. P elektron związany. S bunden elektron. (111)
3. **Compton electron** (*Syn.* recoil electron) : an electron ejected from an atom as a result of the Compton effect. ★ électron Compton → *électron 9.* R комптоновский электрон; электрон отдачи. D Compton-Elektron. E electron de Compton. I elettrone Compton; elettrone di rinculo. N Comptonelektron; terugstootelektron. P elektron Comptona; elektron odrzutu. S Compton-elektron. (881)
4. **conduction electron** : an electron of a conduction band free to move under the influence of an electric field. ★ électron de conduction → *électron 10.* R электрон проводимости. D Leitungselektron. E electrón de conducción. I elettrone di conduzione. N geleidingselektron. P elektron przewodnictwa. S ledningselektron. (111,521)
5. **conversion electron** : an electron ejected from an atom by internal conversion. ★ électron de conversion → *électron 11.* R конверсионный электрон. D Konversions-Elektron. E electrón de conversión. I elettrone di conversione. N conversie-elektron. P elektron konwersyjny. S konversionselektron. (881)
6. **electron** : a stable elementary particle with one negative elementary charge and a rest mass of 0.91095×10^{-30} kg. *Note.* — The term electron is sometimes used loosely to include both electrons and positrons. ★ électron → *électron 6.* R электрон. D Elektron. E electrón. I elettrone. N elektron. P elektron. S elektron. (026,111,391,881)

7. **(electron) avalanche** : → *avalanche 5*
8. **electron collection pulse chamber** : → *chamber 8*
9. **electron collection time** : → *time 52*
10. **electron concentration** (*Syn.* electron density) : → *density 7*
11. **electron conduction** : → *conduction 12*
12. **electron density** : → *density 7*
13. **electron density profile** (*Syn.* ionization profile) : → *profile 5*
14. **electron emission** : → *emission 5*
15. **electron gas** : → *gas 2*
16. **(electron) gyro-frequency** : → *gyro-frequency 1*
17. **electron lens** : → *lens 6*
18. **electron multiplier** : → *multiplier 1*
19. **electron penetration depth** : → *depth 3*
20. **electron radiography** (*Syn.* ionography) : → *ionography 1*
21. **electron therapy** : → *therapy 3*
22. **free electron** : an electron, not directly associated with the structure of an atom or molecule, free to move under the influence of an applied electric field. ★ électron libre → *électron 14.* R свободный электрон. D freies Elektron. E electrón libre. I elettrone libero. N vrij elektron. P elektron swobody. S fri elektron. (111)
23. **Giaever (normal electron) tunnelling** : → *tunnelling 1*
24. **lone electron** : an electron which is alone on an energy level. ★ électron célibataire → *électron 8.* R одиночный электрон. D Einzelelektron. E electrón suelto. I elettrone solitario. N enkel elektron. P elktron samotny. S ensam elektron. (521)
25. **orbital electron capture** : → *capture 4*
26. **recoil electron** (*Syn.* Compton electron) : → *electron 3*
27. **secondary electron** : an electron ejected from an atom due to the interaction of incident radiation with matter. ★ électron secondaire → *électron 16.* R вторичный электрон. D Sekundärelektron. E electron secundario. I elettrone secondario. N secundair elektron. P elektron wtórny. S sekundärelektron. (881)
28. **total electron content** : → *content 11*
29. **valence electron** : an electron, usually in the outer shell of the structure of an atom, commonly the means by which the atom enters into chemical combinations. ★ électron de valence → *électron 13.* R валентный электрон. D Valenzelektron. E electrón de valencia. I elettrone di valenza. N valentie-elektron. P elektron walencyjny; elektron wartościowości. S valenselektron; ledningselektron. (111)

electron-beam

1. **electron beam** : a group of accelerated electrons moving approximately in the same direction. ★ faisceau électronique → *faisceau 39.* R электронный луч. D Elektronenstrahl. E haz electrónico. I fascio elettronico. N elektronenstraal. P wiązka elektronowa. S elektronstråle. (841)
2. **electron beam aperture** : → *aperture 14*
3. **electron beam deflection system** : → *system 60*
4. **electron beam heating** : → *heating 14*
5. **(electron beam) oscilloscope** : → *oscilloscope 1*
6. **electron beam scanning system** : → *system 61*
7. **electron-beam transmission efficiency** : → *efficiency 21*
8. **electron-beam tube** : → *tube 27*

electronegative

1. **electronegative gas** : → *gas 3*

electron-gun

1. **electron gun** : a structure comprising a cathode and one or more electrodes for producing an electron beam. ★ canon électronique → *canon 10.* R электронный прожектор. D Elektronenstrahlerzeuger. E cañón electrónico. I cannone elettronico. N (elektronen)kanon. P wyrzutnia elektronowa. S elektronkanon. (531)
2. **electron gun** : a device to generate concentrated electrons as an electron beam. ★ canon à électrons → *canon 1.* R электронная пушка. D Elektronenkanone. E cañón electrónico; cañón de electrones. I cannone elettronico. N elektronenkanon. P wyrzutnia elektronowa. S elektronkanon. (841)
3. **electron-gun convergence ratio** (*Syn.* beam-compression factor) : → *beam-compression 1*
4. **electron-gun density multiplication** (*Syn.* beam-compression factor) : → *beam-compression 1*
5. **separately pumped electron gun** (*Syn.* external gun) : → *gun 4*

electronic

1. **bidirectional (electronic) valve** : → *valve 3*
2. **electronic a.c. power controller** : → *controller 3*
3. **electronic a.c. (power) switch** : → *switch 17*
4. **(electronic) a.c. voltage convertor** : → *convertor 16*
5. **(electronic) a.c.(power) convertor** : → *convertor 17*
6. **electronic amplifier** : → *amplifier 12*
7. **electronic animation bench** : → *bench 1*
8. **electronic controlling elements for current** : → *controlling 6*
9. **electronic convertor** : → *convertor 18*
10. **electronic crosspoint** : → *crosspoint 2*
11. **(electronic) d.c. convertor** : → *convertor 19*
12. **electronic d.c. power controller** : → *controller 4*
13. **electronic d.c. (power) switch** : → *switch 18*
14. **(electronic) d.c.(power) conversion** : → *conversion 18*
15. **electronic device** : → *device 23*
16. **electronic editing** : → *editing 2*
17. **electronic field production** : → *production 2*
18. **(electronic) frequency convertor** : → *convertor 20*
19. **electronic image** : → *image 3*
20. **electronic masking** : → *masking 1*
21. **electronic measuring instrument** : → *measuring instrument 7*
22. **electronic microphone** : → *microphone 12*
23. **electronic news gathering** : → *gathering 1*
24. **(electronic) phase convertor** : → *convertor 21*
25. **electronic picture** (*Syn.* computer-generated image) : → *image 2*
26. **(electronic) (power) inverter** : → *inverter 1*
27. **electronic (power) switch** : → *switch 19*
28. **electronic stylus** : → *stylus 3*
29. **electronic tube** : → *tube 28*
30. **electronic tuning range** : → *range 21*
31. **(electronic) valve** : → *valve 6*
32. **(electronic) valve device** : → *valve device 1*
33. **(electronic)(power) a.c. conversion** : → *conversion 19*
34. **(electronic)(power) conversion** : → *conversion 20*
35. **(electronic)(power) convertor** : → *convertor 22*
36. **(electronic)(power) inversion** : → *inversion 4*
37. **(electronic)(power) rectification** : → *rectification 1*
38. **(electronic)(power) resistance control** : → *control 95*
39. **(electronic)(power) switching** : → *switching 19*
40. **power electronic capacitor** : → *capacitor 55*
41. **unidirectional (electronic) valve** : → *valve 10*

electronic-flash

1. **electronic-flash lamp** (*Syn.* flash tube) : → *tube 33*

electronics

1. **control electronics** : that part of electronics which deals with control technology. ★ électronique de commande → *électronique 33.* R электроника управления. D Steuerelektronik. E electrónica de control. I elettronica di comando. N stuurelektronica. P elektronika sterownicza. S styrelektronik. (811)
2. **electronics** : the field of electrical engineering which exploits the property of asymmetric conductivity displayed by certain materials, alone or in combination with others e.g. semiconductors, transistors, thyristors, microprocessor control devices. ★ électronique → *électronique 32.* R электроника. D Elektronik. E electrónica. I elettronica. N elektronica. P elektronika. S elektronik. (811)
3. **power electronics** : that part of electronics which deals with power technology. ★ électronique de puissance → *électronique 34.* R силовая электроника. D Leistungselektronik. E electrónica de potencia. I elettronica di

potenza. N vermogenselektronica. P energoelektronika. S kraftelektronik. (551,811)

electron-positron

1. **electron-positron pair** : electron and positron simultaneously created, in a process called "pair production". ★ paire électron-positon → *électron-positon 1.* D Elektron-Positron-Paar. E par electrón-positrón. I coppia elettrone-positrone. N elektron-positronpaar. P para elektron-pozytron. S elektron-positronpar. (026)

electronvolt

1. **electronvolt** (eV) : a unit of energy equal to the change in energy of an electron in passing through a potential difference of one volt. $1eV = 1{,}60219 \times 10^{-19}J$. ★ électronvolt → *électronvolt 1.* R электронвольт. D Elektronenvolt. E electrón voltio. I elettron-volt. N elektronvolt. P elektronowolt. S elektronvolt. (391,881)

electro-ophthalmia

1. **electro-ophthalmia** : inflammation of the eye and related parts caused essentially by the action of ultra-violet radiation of an electric arc. ★ électrophtalmie → *électrophtalmie 1.* R электроофтальмия. D Verblitzung. E electroftalmia. I elettroftalmia. N elektrophtalmie. P elektrooftalmia. S elektrooftalmi. (604)

electro-optic

1. **electro-optic** : applies to optical effects induced by electric fields. ★ électro-optique → *électro-optique 2.* R электрооптический. D elektrooptisch. E electro-óptico. I elettro-ottico. N elektro-optisch. P elektrooptyczny. S elektrooptisk. (121)
2. **electro-optic effect** : → *effect 17*

electro-osmosis

1. **electro-osmosis** : the movement of a fluid through a diaphragm produced by application of an electric field. ★ électro-osmose → *électro-osmose 1.* R электроосмос. D Elektro-Osmose. E electroósmosis. I elettroosmosi. N elektro-osmose. P elektroosmoza. S elektroosmos. (111)

electrophonic

1. **electrophonic effect** : → *effect 18*

electro-pneumatic

1. **electro-pneumatic brake circuit** : → *circuit 70*
2. **electro-pneumatic brake control** : → *control 96*
3. **electro-pneumatic contactor** : → *contactor 9*
4. **electro-pneumatic valve** (*Syn.* magnet valve) : → *valve 8*

electroscope

1. **electroscope** : an instrument intended to detect a potential difference or an electric charge by electrostatic means. ★ électroscope → *électroscope 1.* R электроскоп. D Elektroskop. E electroscopio. I elettroscopio. N elektroscoop. P elektroskop. S elektroskop. (302)

electroslag

1. **electroslag remelting** : → *remelting 1*

electrostatic

1. **electrostatic accelerator** : → *accelerator 3*
2. **electrostatic actuator** : → *actuator 7*
3. **electrostatic deflection** : → *deflection 14*
4. **electrostatic discharge** : → *discharge 18*
5. **electrostatic focusing** : → *focusing 2*
6. **electrostatic instrument** : → *instrument 5*
7. **electrostatic lens** : → *lens 7*
8. **electrostatic loudspeaker** : → *loudspeaker 6*
9. **electrostatic memory tube** (*Syn.* charge-storage tube) : → *tube 15*
10. **electrostatic microphone** : → *microphone 13*
11. **electrostatic unit of charge** : → *unit 21*

electrostriction

1. **electrostriction** : the elastic deformation of a dielectric due to electric polarization. ★ électrostriction → *électrostriction 1.* R электрострикция. D Elektrostriktion. E electrostricción. I elettrostrizione. N elektrostrictie. P elektrostrykcja. S elektrostriktion. (121)

electrothermal

1. **electrothermal** : qualifies all techniques related to electro-heat, or all devices which function in accordance with its principles. ★ électrothermique → *électrothermique 1.* R электротермия. D elektrothermisch (wenig gebräuchlich). E electrotérmico. I elettrotermico. N elektrothermisch. P elektrotermiczny. S elektrotermisk. (841)
2. **electrothermal instrument** (*Syn.* thermal instrument) : → *instrument 32*

electro-vacuum

1. **electro-vacuum brake control** : → *control 97*

ELED

1. **ELED** (*Syn.* edge-emitting light emitting diode) : → *diode 8*

element

1. **A element** : in a code combination, a unit element to which is assigned the A condition. ★ moment A → *moment 4.* R элемент А. D A-Schritt. E momento A. I elemento A. N A-element. P element A. S A-element. (721)
2. **assembly for failed fuel element localization** : → *assembly 2*
3. **asymmetric (characteristic circuit) element** : a 2-terminal element where at least one parameter is dependent on the voltage polarity or the direction of the current. ★ élément (de circuit à caractéristique) asymétrique → *élément de circuit 3.* R несимметричный элемент цепи. D stromrichtungsabhängiges Element. E elemento (de circuito de caracteristica) asimétrico. I elemento (di circuito) asimmetrico (con caratteristica asimmetrica). N (netwerk)element met een asymmetrische karakteristiek. P element asymetryczny. S osymmetriskt tvåpoligt element. (131)
4. **binary-logic element** (*Syn.* binary-logic gate) : → *gate 1*
5. **(capacitor) element** : a device consisting essentially of two electrodes separated by a dielectric. ★ élément (de condensateur) → *élément 26.* R (конденсаторный) элемент. D Kondensatorelement. E elemento (de un condensador). I elemento; elemento capacitivo. N condensatorelement. P element kondensatorowy. S kondensatorelement. (436)
6. **coarse control element** (*Syn.* coarse control member) : → *control 33*
7. **comparing element** : functional block with two inputs and one output, the output signal being the difference between the two input signals. ★ comparateur → *comparateur 2.* R блок сравнения. D Vergleicher. E comparador. I comparatore. N vergelijkingselement; vergelijkingsorgaan. P człon porównawczy. S jämförare. (351)
8. **compensating element** (*Syn.* equalizer) : → *equalizer 1*
9. **contact element** (of a control switch) : all the structural parts, fixed and movable, conducting and insulating, of a control switch necessary to close and open one single conducting path of a circuit. ★ élément de contact → *élément 27.* R контактный узел (вылючателя цепей управления). D Schaltglied (eines Hilfsstromschalters). E elemento de contacto (de un auxiliar de mando). I elemento di contatto (di un apparecchio di comando). N contactdeel (van een stuurstroomschakelaar). P zespół łączeniowy (łącznika sterowniczego). S kontaktelement. (441)
10. **control element** (*Syn.* control member) : → *control 66*
11. **control element drive mechanism** : → *mechanism 3*
12. **current element** (for a cylindrical conductor of small cross-section) (*I ds*) : a vector quantity equal to the product of the current and the vector line element. ★ élément de courant → *élément 30.* R элемент тока (для цилиндрического проводника малого сечения). D Stromelement (für einen zylindrischen Leiter kleinen Querschnitts). E elemento de corriente (en un conductor filiforme). I elemento di corrente (per un conduttore filiforme). N stroomelement. P element prądowy (przewodu walcowego o małym przekroju). S strömelement. (121)
13. **director element** (of an antenna) : a radiating element located in front of a driven element, with respect to the desired direction of radiation, so as to increase radiation in that

direction. ★ (élément) directeur → *directeur 2.* R директор (антенны). D Direktor (-Element) (einer Antenne). E elemento director (de una antena). I (elemento) direttore. N richtend (versterkend) element (van een antenne). P element direktora (antenowego). S direktor. (712)

14. **driven element** (*Syn.* fed element) : a radiating element which is joined to a ratio transmitter or to a radio receiver directly or by a feed line. ★ élément alimenté → *élément 8.* R активный элемент антенны. D gespeistes Element. E elemento excitado; elemento alimentado. I elemento alimentato. N primaire straler. P element (antenowy) zasilany. S primärstrålare; matat element. (712)

15. **electrically separated contact elements** : contact elements belonging to the same control switch, but adequately insulated from each other so that they can be connected into electrically separated circuits. ★ éléments de contact électriquement séparés → *élément 76.* R электрически раздельные контактные узлы. D elektrisch isolierte Schaltglieder. E elementos de contacto eléctricamente separados. I elementi di contatto elettricamente separati. N elektrisch gescheiden contactdelen. P zespoły łączeniowe łącznika sterowniczego izolowane między sobą. S elektriskt separerade kontaktelement. (441)

16. **electronic controlling elements for current** : → *controlling 6*

17. **element** : any integral part of the tube that contributes to its operation and to which external connections can be made. ★ élément → *élément 7.* R элемент. D Element. E elemento. I elemento. N (constructie-)element. P ..... S element. (531)

18. **element of a polyphase circuit** : the set of the physical components of one of the branches of a phase of the polyphase circuit. ★ élément de circuit polyphasé → *élément de circuit 6.* R элемент многофазной цепи. D Element eines Mehrphasenstromkreises. E elemento de circuito polifásico. I elemento di un circuito polifase. N element van een meerfasennetwerk. P element (obwodu wielofazowego). S ..... (131)

19. **element synchronism** : → *synchronism 1*

20. **element synchronization** : → *synchronization 2*

21. **failed fuel element monitor** : → *monitor 5*

22. **fed element** (*Syn.* driven element) : → *element 14*

23. **final controlling element** : → *controlling 7*

24. **fine control element** (*Syn.* fine control member) : → *control 103*

25. **fuel element** : → *fuel 12*

26. **linear (circuit) element** : a circuit element for which the voltages between terminals and the currents into the terminals are related by linear operators. ★ élément linéaire (de circuit) → *élément 58.* R линейный элемент цепи. D lineares (Stromkreis-) Element. E elemento lineal (de circuito). I elemento lineare (di circuito). N lineair (netwerk)element. P element dwójnikowy linearny; element (układu) linearny. S linjärt kretselement. (131)

27. **logic element** (*Syn.* (logic) gate) : → *gate 10*

28. **luminous element** : the part of a lamp which emits light. *Note.* — The German term "Leuchtkörper" applies only to incandescent lamps. ★ corps lumineux → *corps 7.* R светящееся тело; тело накала. D Leuchtkörper. E cuerpo luminoso. I corpo luminoso. N lichtgevend deel. P element świecący. S lyskropp. (845)

29. **measuring element** (of an electromechanical measuring instrument) : that part of a measuring instrument which transforms the quantity to be measured into a mechanical movement. ★ élément de mesure → *élément 33.* R измерительный механизм (электромеханического прибора). D Messwerk (für ein elektromechanisches Messgerät). E elemento de medida (de un aparato de medida electromecánico). I elemento di misura. N meetdeel (van een elektromechanisch meetinstrument). P ustrój pomiarowy (przyrządu pomiarowego elektromechanicznego). S mätorgan. (302)

30. **moving element** : the moving part of a measuring element. ★ équipage mobile → *équipage 2.* R подвижная часть. D bewegliches Teil. E sistema móvil. I equipaggio mobile. N bewegend deel. P część ruchoma ustroju pomiarowego. S rörligt mätorgan. (302)

31. **multi-conductor element** (*Syn.* multi-wire element) : → *element 32*

32. **multi-wire element** (*Syn.* multi-conductor element) : a radiating element composed of several wires spaced from each other and connected in parallel, the assemblage being the electrical equivalent of a single conductor of large cross-section. ★ élément multifilaire → *élément 60.* R многопроводный элемент. D Mehrdrahtelement; Mehrleiterelement. E elemento multifilar; elemento multiconductor. I elemento multifilare. N meerdraadselement. P element wielodrurowy; element wieloprzewodowy. S flertrådselement. (712)

33. **non-driven element** (*Syn.* parasitic element) : → *element 35*

34. **orbital elements** : the parameters by which the shape, dimensions and position of the orbit of a body in space can be defined in relation to a specified frame of reference. *Notes. 1* — The position of the centre of mass of the body in the orbit at a specified time is required as well as the orbital elements in order to determine the position of the body at any time. *2* — The frame of reference used is a direct rectangular co-ordinate system OXYZ, in which the origin is at the centre of mass of the primary body and the third axis OZ is perpendicular to the principal reference plane, also called the basic reference plane, or simply the reference plane. *3* — For an artificial earth satellite, the principal reference plane is the Earth's equatorial plane and the third axis OZ has a south to north orientation. ★ éléments orbitaux → *élément 79.* R элементы орбиты. D Bahnelemente. E elementos de una órbita. I parametri orbitali. N baanparameters. P parametry orbity. S banparametrar. (725)

35. **parasitic element** (*Syn.* non-driven element) : a radiating element which is not joined to a radio transmitter or to a radio receiver directly or through a feed line and which is coupled to the driven elements only by the electromagnetic field. ★ élément non alimenté → *élément 62.* R пассивный элемент антенны. D parasitäres Element; nichtgespeistes Element. E elemento parásito; elemento no excitado. I elemento parassita. N secundair element. P element (antenowy) niezasilany. S sekundärstrålare; parasitelement. (712)

36. **picture element** (*Syn.* pixel; scanned element) : the area of the finest detail that can be reproduced effectively on the recording medium. ★ élément d'image → *élément 51.* R элемент изображения. D Bildelement. E elemento de imagen; elemento explorado. I elemento di immagine; pixel. N beeldelement; pixel. P element obrazu. S bildelement. (721)

37. **picture element** (*Syn.* pixel) : the area of the smallest element of a picture that can be distinguished from its neighbouring elements. ★ point d'image → *point 51.* R элемент изображения. (723)

38. **piezoelectric ceramic element** : an element of piezoelectric ceramic material made to a given geometric shape, size and orientation with respect to the polarizing axis. ★ céramique piézoélectrique → *céramique 2.* R пьезоэлектрический керамический элемент. D piezoelektrisches keramisches Element. E cerámica piezoeléctrica. I ceramica piezoelettrica. N kristalplaatje; piëzo-elektrisch keramisch plaatje. P element piezoceramiczny. S piezoelektriskt keramikelement. (561)

39. **piezoelectric crystal element** : an element cut from a single piezoelectric crystal, with a given geometric shape, size and orientation. ★ cristal piézoélectrique → *cristal 5.* R пьезоэлектрический кристаллический элемент. D piezoelektrisches Quarzelement. E cristal piezoeléctrico. I cristallo piezoelettrico. N kristalplaatje. P element piezokrystaliczny. S piezoelektriskt kvartselement. (561)

40. **quarter-wave sleeve element** : a tubular radiating element possibly a multiwire element, usually about a quarter-wave long, coaxially surrounding a conductive supporting cylinder and connected to it at one end. ★ jupe → *jupe 1.* R четвертьволновый трубчатый элемент. D Viertelwellen-Topfelement; Viertelwellen-Hülsenstrahler. E elemento manguito de cuarto de onda. I elemento a manicotto in quarto d'onda; elemento a cannocchiale in quarto d'onda. N kwartgolfmanchet. P element ćwierćfalowy rękawowy. S kvartvågs ärmelement. (712)

41. **radiant element** : a heating element which heats principally by radiation and which may incorporate a reflector. ★ élément radiant → *élément 70.* R элемент с тепловым излучением. D Strahlungselement. E elemento radiante. I elemento radiante. N stralingselement. P element promieniujący. S strålningselement. (841)

42. **radiating element** : a basic subdivision of an antenna which is designed to support the radio frequency currents or fields that

contribute directly to the radiation pattern of the antenna. *Notes. 1* — An antenna may comprise one or more radiating elements. *2* — A radiating element may be driven or not driven. *3* — Some parts of the antenna, such as struts, may support parasitic radiofrequency currents or fields which can cause the desired radiation of the antenna to be perturbed. ★ élément rayonnant → *élément 71.* **R** излучающий элемент (антенны). **D** Strahlerelement. **E** elemento radiante. **I** elemento irradiante. **N** stralend element. **P** element promieniujący. **S** strålare; antennelement. (712)

43. **reflector (element)** : → *reflector 23*
44. **regulating element** (*Syn.* fine control member) : → *control 103*
45. **resistor element** : a resistive conductor forming part of a resistor case or frame, usually in the form of grids, plates, strips, ribbons or wires and which may have intermediate tappings. ★ élément de résistance → *élément 43.* **R** резистивный элемент. **D** Widerstandselement. **E** elemento de resistencia. **I** elemento di resistore. **N** weerstandselement. **P** element rezystorowy. **S** motståndselement. (811)
46. **sampling element** (*Syn.* sampler) : → *sampler 1*
47. **scanned element** (*Syn.* picture element) : → *element 36*
48. **shim element** (*Syn.* shim member) : → *shim 2*
49. **signal element** : A part of a discretely timed signal distinguished from the others by one or more characteristics such as its duration, its relative position, its waveform, its magnitude. ★ élément de signal → *élément 45.* **R** элемент сигнала. **D** Signalelement. **E** elemento de señal. **I** elemento di segnale. **N** signaalelement. **P** element sygnału. **S** signalelement. (702,721)
50. **signal element** (in digital transmission) : a part of a digital signal, characterized by its discrete timing and its discrete value, and used to represent a digit. ★ élément de signal → *élément 46.* **R** элемент сигнала (в цифровой передаче). **D** Signalelement (in der digitalen Nachrichtenübertragung). **E** elemento de señal (en transmisión numérica). **I** elemento di segnale (nella trasmissione numerica). **N** signaalelement (bij digitale transmissie). **P** element sygnału (w transmisji cyfrowej). **S** signalelement. (704)
51. **signal element** (*Syn.* unit interval) : → *interval 25*
52. **(speed) detecting element** : an element which responds to the speed to be measured and which gives a signal to a measuring instrument, e.g. a tachograph. ★ capteur (de vitesse) → *capteur 2.* **R** датчик скорости. **D** Meßfühler. **E** captador (de velocidad). **I** captatore (di velocità). **N** (snelheids)opnemer. **P** czujnik (prędkości). **S** hastighetsgivare. (811)
53. **start element** : a start signal limited to one signal element generally having the duration of a unit interval. ★ élément de départ → *élément 31.* **R** стартовый элемент. **D** Startschritt. **E** elemento de arranque. **I** impulso di start. **N** startteken. **P** element startu. **S** startelement. (721)
54. **stop element** : a stop signal limited to one signal element having any duration equal to or greater than a specified minimum value. ★ élément d'arrêt → *élément 20.* **R** стоповый элемент. **D** Stopschritt. **E** elemento de parada. **I** impulso di stop. **N** stopteken; stopelement. **P** element stopu. **S** stoppelement. (721)
55. **storage element** (*Syn.* target element) : the smallest area of the storage surface that retains information which can be distinguished from that of adjacent areas. ★ élément de mémoire → *élément 32.* **R** накопительный элемент. **D** Speicherelement. **E** elemento de memoria; elemento de blanco de memoria. **I** elemento di (bersaglio di) memoria. **N** geheugenelement. **P** ..... **S** minneselement. (531)
56. **symmetric (characteristic circuit) element** : a 2-terminal element whose parameters are independent of the voltage polarity and of the direction of the current. ★ élément (de circuit à caractéristique) symétrique → *élément de circuit 4.* **R** симметричный элемент; элемент цепи с симметричной характеристикой. **D** stromrichtungsunabhängiges Element. **E** elemento (de circuito de característica) simétrico. **I** elemento (di circuito) simmetrico (con caratteristica simmetrica). **N** (netwerk)element met een symmetrische karakteristiek. **P** element symetryczny. **S** symmetriskt tvåpoligt element. (131)
57. **symmetrical radiating element** : a radiating element constructed from two geometrically symmetrical parts with respect to a plane considered to be a zero potential plane, and fed symmetrically with respect to this plane. ★ élément rayonnant symétrique → *élément 72.* **R** симметричный излучающий элемент. **D** symmetrisches Strahlerelement. **E** elemento radiante simétrico. **I** elemento irradiante simmetrico. **N** symmetrisch-stralend element. **P** element promieniujący symetryczny. **S** symmetrisk strålare. (712)
58. **target element** (*Syn.* storage element) : → *element 55*
59. **transductor element** : one of the cores with its windings which form part of a transductor. ★ élément de transducteur → *élément 50.* **R** ..... **D** Transduktorelement. **E** elemento de transductor. **I** elemento di trasduttore. **N** transductorelement. **P** element transduktorowy. **S** transduktorelement. (431)
60. **type of action of an element** : → *type 30*
61. **unit element** : a signal element having a rated duration equal to the unit interval. ★ élément unitaire → *élément 75.* **R** единичный элемент. **D** Einheitsschritt. **E** elemento unitario. **I** elemento unitario. **N** eenheidselement. **P** element jednostkowy. **S** enhetselement. (721)
62. **Z element** : in a code combination, a unit element to which is assigned the Z condition. ★ moment Z → *moment 13.* **R** элемент Z. **D** Z-Schritt. **E** momento Z. **I** elemento Z. **N** Z-element. **P** element Z. **S** Z-element. (721)

elementary

1. **elementary attenuation of propagation** : → *attenuation 17*
2. **elementary cable section** : → *section 8*
3. **elementary charge** : → *charge 29*
4. **elementary (conduction) current** : → *current 78*
5. **elementary dephasing of sound propagation** : → *dephasing 1*
6. **elementary (electric) charge** : → *charge 30*
7. **(elementary) electric dipole** (*Syn.* hertzian (electric) dipole) : → *dipole 10*
8. **elementary exponent of sound propagation** : → *exponent 1*
9. **elementary frequency** : → *frequency 36*
10. **(elementary) magnetic dipole** (*Syn.* hertzian magnetic dipole) : → *dipole 11*
11. **elementary maintenance activity** : → *activity 8*
12. **elementary particle** : → *particle 6*
13. **elementary period** : → *period 9*
14. **elementary regenerated section** (*Syn.* elementary regenerator section) : → *section 10*
15. **elementary regenerator section** : → *section 10*
16. **elementary repeater section** : → *section 11*
17. **elementary repeatered section** (*Syn.* elementary repeater section) : → *section 11*
18. **elementary section** : → *section 13*

elevated

1. **elevated duct** : → *duct 8*

elevator

1. **elevator furnace** : → *furnace 17*

ellipse

1. **polarization ellipse** : the locus of the extremity of the electric flux density vector at a given point, in the case of an electromagnetic wave with elliptical polarization. ★ ellipse de polarisation → *ellipse 1.* **D** Polarisationsellipse. **P** elipsa polaryzacji. (705)
2. **polarization ellipse** : the ellipse described by the extremity of the electric field strength vector or of the specified field vector of an elliptically polarized wave or field. ★ ellipse de polarisation → *ellipse 2.* **R** эллипс поляризации. **D** Polarisationsellipse. **E** elipse de polarización. **I** ellisse di polarizzazione. **N** polarisatie-ellips. **P** elipsa polaryzacji. **S** polarisationsellips. (726)

ellipsoid

1. **Fresnel ellipsoid** : locus of points in space such that the sum of the distances from each point to the transmission and reception antennas, assuming these antennas to be point sources, exceeds the distance between the two points by an amount equal to an integer multiple of the half wavelength. ★ ellipsoïde de Fresnel → *ellipsoïde 1.* **D** Fresnel-Ellipsoid. **P** elipsoida Fresnela. (705)

elliptic

1. **elliptic reproducing stylus tip** : → *stylus tip 3*
2. **elliptic waveguide** : → *waveguide 5*

elliptical

1. **elliptical orbit** : → *orbit 3*
2. **elliptical polarization** : → *polarization 15*
3. **elliptical polarization** : → *polarization 16*

elliptically

1. **elliptically polarized** : → *polarized 4*

embedded

1. **embedded coil side** : → *coil 19*
2. **embedded heating element** : → *heating element 1*

embedding

1. **embedding** : the process of completely encasing an article in a polymer by pouring a suitable compound over it in a mould, curing or solidifying the compound, and removing the encased article from the mould. *Note.* — In the case of electrical components, connecting wires or terminals may protrude from the embedment. ★ enrobage → *enrobage 1.* R заливка. D Vergießen; Einbetten. E revestimiento. I inglobamento. N omgeven; inbedden. P zalewanie (w formie). S inbäddning. (212)

EMC

1. **EMC** (*Syn.* electromagnetic compatibility) : → *compatibility 5*

emergency

1. **emergency battery** : → *battery 33*
2. **emergency brake** : → *brake 18*
3. **emergency dose** : → *dose 26*
4. **emergency lighting** : → *lighting 7*
5. **emergency power system** (*Syn.* supply system for safety services) : → *system 207*
6. **emergency routing** : → *routing 4*
7. **emergency shutdown** : → *shutdown 1*
8. **emergency shutdown rod** : → *rod 6*
9. **emergency shut-down system** : → *system 63*
10. **emergency stopping** : → *stopping 2*
11. **emergency switching** : → *switching 20*
12. **emergency tripping device** : → *device 24*
13. **standby or emergency cooling** : → *cooling 12*

e.m.f.

1. **angle of deviation between two e.m.f.'s** : → *angle 3*
2. **e.m.f.** (*Syn.* electromotive force) : → *force 17*
3. **maximum source e.m.f.** (recording) : the source e.m.f. which results in twice the total harmonic distortion obtained when the record gain is set at maximum and the tape flux is 6 dB below the rated recording level. ★ force électromotrice maximale de source → *force électromotrice 9.* R максимальная э д с входного сигнала. D maximale Quell-EMK (Aufnahme). E fuerza electromotriz máxima de la fuente (en registro). I ..... N maximale e.m.k. van de bron (bij opname). P siła elektromotoryczna źródła maksymalna (przy zapisywaniu). S högsta inspelningsspänning. (806)
4. **minimum source e.m.f.** (recording) : the source e.m.f. which, when recorded on the specified reference tape at maximum record gain will result in a tape flux which is identical to that of the rated recording level. ★ force électromotrice minimale de source → *force électromotrice 10.* R минимальная э д с входного сигнала. D Mindest-Quell-EMK (Aufnahme). E fuerza electromotriz mínima de la fuente (en registro). I tensione minima di ingresso per ottenere il livello di registrazione specificato. N minimale e.m.k. van de bron (bij opname). P siła elektromotoryczna źródła minimalna (przy zapisywaniu). S lägsta inspelningsspänning. (806)
5. **secondary limiting e.m.f.** : the product of the instrument security factor, the rated secondary current and the vectorial sum of the rated burden and the impedance of the secondary winding. ★ force électromotrice limite secondaire → *force électromotrice 8.* R предельная вторичная э.д.с.. D sekundäre Grenz-EMK. E fuerza electromotriz límite secundaria. I forza elettromotrice limite secondaria. N secundaire grens-e.m.k.. P s.e.m. wtórna graniczna. S sekundär mättningsspänning. (321)
6. **source e.m.f.** (*Syn.* open circuit voltage) : twice the value of the matched output voltage. ★ f.é.m. de la source → *f.e.m. 4.* R э.д.с. источника. D Quellenspannung; Leerlaufspannung. E f.e.m. de la fuente. I forza elettromotrice della sorgente; tensione a circuito aperto. N elektromotorische kracht; emk; open-klemspanning. P siła elektromotoryczna źródła. S tomgångsspänning. (303)
7. **transformer e.m.f.** (in an alternating or undulating or pulsed current commutator motor) : the electromotive force produced in the armature by the periodic variation of the flux arising from the field system. ★ tension de transformation → *tension 184.* R трансформаторная электродвижущая сила (в коллекторном двигателе переменного, пульсирующего или импульсного тока). D transformatorische EMK. E tensión de transformación (en un motor de colector de corriente alterna o modulada o pulsatoria). I forza elettromotrice trasformatorica (d'un motore a collettore). N transformatorische spanning. P napięcie transformacji (w silniku komutatorowym). S transformator-emk. (811)

EMI

1. **EMI** (*Syn.* electromagnetic interference) : → *interference 4*

emission

1. **broadband emission** : an emission which has a bandwidth greater than that of a particular measuring apparatus or receiver. ★ émission à large bande → *émission 22.* R широкополосное излучение. D breitbandige Aussendung. E emisión de banda ancha. I emissione a larga banda. N brede-bandstraling. P emisja szerokopasmowa. S bredbandsemission. (161)
2. **charge emission detector** : → *detector 5*
3. **cold emission** : the emission, produced by sufficiently high electric field strengths, of electrons from unheated surfaces. ★ émission froide → *émission 30.* R холодная эмиссия. D Feldemission; Kaltkathoden-Emission. E emision fría. I emissione a freddo. N koude emissie. P zimna emisja. S fältemission. (881)
4. **(electromagnetic) emission** : the phenomenon by which electromagnetic energy emanates from a source. ★ émission (électromagnétique) → *émission 23.* R (электромагнитное) излучение. D (elektromagnetische) Aussendung. E emisión (electromagnética). I emissione elettromagnetica. N (elektromagnetische) emissie. P emisja elektromagnetyczna. S emission. (161)
5. **electron emission** : the release of electrons from the surface of a body into the adjacent space. ★ émission électronique → *émission 24.* R электронная эмиссия. D Elektronenemission. E emisión electrónica. I emissione elettronica. N elektronenemissie. P emisja elektronowa. S elektronemission. (111,531)
6. **emission** (in radiocommunication) : radio waves or signals produced by a radio transmitting station. *Notes. 1* — In radiocommunication the term "emission" should not be used in the more general sense of "radio frequency emission". For example that part of electromagnetic energy from the local oscillator of a radio receiver transferred to external space, is a radiation and not an emission. *2* — In radiocommunication, the French term "émission" applies only to intentional radiation. ★ émission → *émission 16.* R излучение (в радиосвязи). D Aussendung (im Funk). E emisión (en radiocomunicaciones). I emissione (nelle radiocomunicazioni). N uitzending. P emisja (radiowa). S radioutsändning. (161,702)
7. **emission** : the phenomenon by which energy emanates from a source in the form of waves or particles. ★ émission → *émission 17.* R излучение. D Abstrahlung; Emission. E emisión. I emissione. N emissie; straling. P emisja. S emission. (702)
8. **emission** (*Syn.* transmission) : → *transmission 74*
9. **emission** (of radiation) : release of radiant energy. ★ émission → *émission 20.* R эмиссия (излучения). D Emission (von strahlung). E emisión. I emissione. N emissie; uitstraling. P emisja. S emission. (845)
10. **emission band** : → *band 12*

11. **emission characteristic of a multielectrode tube** (*Syn.* diode characteristic) : → *characteristic 32*
12. **emission level** : → *level 18*
13. **emission limit** : → *limit 6*
14. **emission margin** : → *margin 3*
15. **emission spectrum** : → *spectrum 11*
16. **field emission** : electron emission due to the action of a strong electric field. ★ émission par effet de champ → *émission 32.* R автоэлектронная эмиссия. D Feldemission. E emisión por efecto de campo. I emissione per effetto di campo. N veldemissie. P emisja polowa. S fältemission. (111,531)
17. **field emission tube** : → *tube 32*
18. **(luminescence) emission spectrum** : → *spectrum 20*
19. **narrowband emission** : an emission which has a bandwidth less than that of a particular measuring apparatus or receiver. ★ émission à bande étroite → *émission 21.* R узкополосное излучение. D schmalbandige Aussendung. E emisión de banda estrecha. I emissione a banda stretta. N smalle-banduitzending. P emisja wąskopasmowa. S smalbandsemission. (161)
20. **out-of-band emission** : emission on a frequency or frequencies immediately outside the necessary bandwidth which results from the modulation process, but excluding spurious emissions. ★ émission hors bande → *émission 31.* R внеполосное излучение. D Nebenband-Aussendung. E emisión fuera de la banda. I emissione fuori banda. N buiten-de-band-emissie. P emisja pozapasmowa. S utombandsstrålning. (161)
21. **photoelectric emission** : electron emission due to the incidence of photons. ★ émission photoélectronique → *émission 35.* R фотоэлектронная эмиссия. D photoelektrische Emission; Photoemission. E emisión fotoeléctrica. I emissione fotoelettrica; fotoemissione. N foto-emissie. P emisja fotoelektryczna. S fotoelektrisk emission; fotoemission. (111)
22. **photoelectric emission** (*Syn.* photoemissive effect) : electron emission only caused by incident radiant energy. ★ photo-émission → *photoémission 2.* R фотоэлектронная эмиссия. D Photoemission. E emisión fotoeléctrica. I emissione fotoelettrica. N foto-elektrische emissie. P emisja fotoelektronowa; fotoemisja. S fotoemission. (531)
23. **photon emission curve** : → *curve 31*
24. **primary-electron emission** : thermionic, photoelectric or field emission. ★ émission électronique primaire → *émission 26.* R первичная электронная эмиссия. D Primärelektronen-Emission. E emisión electrónica primaria. I emissione elettronica primaria. N emissie van primaire elektronen. P emisja elektronów pierwotnych. S primäremission. (111,531)
25. **secondary-electron emission** : electron emission due to the bombardment of the emitting surface by electrons or ions. ★ émission électronique secondaire → *émission 27.* R вторичная электронная эмиссия. D Sekundärelektronenemission. E emisión electrónica secundaria. I emissione elettronica secondaria. N emissie van secundaire elektronen. P emisja elektronów wtórnych; emisja wtórna. S sekundäremission. (111,531)
26. **secondary-electron emission current** : → *current 181*
27. **secondary-electron emission factor** : the ratio of the secondary-electron emission current to the primary-electron current. ★ facteur d'émission secondaire → *facteur 175.* R коэффициент вторичной электронной эмиссии. D Sekundäremissionsfaktor. E factor de emisión secundaria. I fattore di emissione secondaria. N secundaire elektronenemissiefactor. P współczynnik emisji wtórnej. S sekundäremissionsfaktor. (531)
28. **spontaneous emission** : electromagnetic radiation emitted when the internal energy of a quantum mechanical system drops from an excited level to a lower level without regard to the simultaneous presence of similar radiation. *Note.* — Examples of spontaneous emission include radiation from an LED, and radiation from an injection laser below the lasing threshold. ★ émission spontanée → *émission 36.* R спонтанное излучение. D spontane Emission. E emisión espontánea. I emissione spontanea. N spontane emissie. P emisja spontaniczna. S spontan emission. (731)
29. **spurious emission** (of a transmitting station) : emission on a frequency or frequencies which are outside the necessary bandwidth and the level of which may be reduced without affecting the corresponding transmission of information. Spurious emissions include harmonic emissions, parasitic emissions, intermodulation products and frequency conversion products, but exclude out-of-band emissions. *Note.* — Necessary bandwidth is defined in Radio Regulation 146.. ★ rayonnement non essentiel → *rayonnement 88.* R побочное излучение (радиопередающей станции). D Nebenwellen-Aussendung (einer Sendestation). E emisión no esencial. I emissione spuria (di una stazione trasmittente). N strooi-emissie (van een zendstation). P emisja niepożądana (stacji nadawczej). S oavsedd utstrålning. (161)
30. **stimulated emission** : radiation emitted when the internal energy of a quantum mechanical system drops from an excited level to a lower level when induced by the presence of radiant energy at the same frequency. *Note.* — An example is the radiation from an injection laser diode above lasing threshold. ★ émission stimulée → *émission 37.* R вынужденное излучение. D stimulierte Emission. E emisión estimulada. I emissione stimolata. N gestimuleerde emissie. P emisja wymuszona. S stimulerad emission. (731,845)
31. **stray emission** : uncontrolled electron emission that causes undesired luminance on the screen of a cathode-ray tube under cut-off conditions. ★ émission parasite → *émission 33.* R паразитная эмиссия. D Streuemission. E emisión parásita. I emissione parassita. N strooi-emissie. P emisja rozproszona; emisja zakłócająca. S strömemission. (531)

emissive

1. **emissive material** : → *material 12*

emissivity

1. **directional emissivity** (of a thermal radiator, in a given direction) (ε; $\varepsilon(\theta,\varphi)$) : ratio of the radiance of the radiator in the given direction to that of a Planckian radiator at the same temperature. *Note.* — The symbols θ, φ are chosen here as an example of the angular coordinates defining the given direction. ★ émissivité directionnelle → *émissivité 2.* R коэффициент направленного излучения (теплового излучателя, в данном направлении). D gerichteter Emissionsgrad (eines Temperaturstrahlers, in einer gegebenen Richtung). E emisividad direccional. I fattore di emissione direzionale. N richtingsafhankelijke emissiefactor. P emisyjność kierunkowa. S riktad emissivitet. (845)
2. **emissivity** : the ratio of the radiant emittance of a substance to the radiant emittance of a black body at the same temperature. *Note.* — Emissivity is a function of wavelength and temperature. ★ émissivité → *émissivité 1.* R излучательная способность. D Lichtergiebigkeit. E emisividad. I emissività; coefficiente di emissione. N emissiefactor. P zdolność emisyjna. S emissivitet. (731,841)
3. **(hemispherical) emissivity** (of a thermal radiator) (ε; ε_h) : ratio of the radiant exitance of the radiator to that of a Planckian radiator at the same temperature. ★ émissivité (hémisphérique) → *émissivité 3.* R (полусферический) коэффициент излучения (теплового излучателя). D halbräumlicher Emissionsgrad (eines Temperaturstrahlers). E emisividad (hemiesférica). I fattore di emissione. N emissiefactor. P emisyjność półkulista. S emissivitet. (845)

emittance

1. **radiant emittance** (*Syn.* radiant exitance) : the radiant power leaving an element of the surface of a source divided by the area of that element. ★ exitance (énergétique) → *exitance 1.* R излучательность. D Abstrahlung. E emisión radiante; salida radiante. I emettenza radiante; potere emissivo radiante. N stralingsemittantie; stralingsexitantie. P egzytancja energetyczna. S utstrålningstäthet. (731)

emitter

1. **alpha emitter** : radionuclide which disintegrates with emission of alpha radiation. ★ émetteur alpha → *émetteur 13.* R А излучатель. D Alpha-Strahler. E emisor alfa. I emettitore alfa. N alfastraler. P źródło promieniowania alfa. S alfastrålare. (026,391)
2. **beta emitter** : radionuclide which disintegrates with emission of beta radiation. ★ émetteur bêta → *émetteur 17.* R Б излучатель. D Betasstrahler. E emisor beta. I emettitore beta. N bêtastraler. P źródło promieniowania beta. S betastrålare. (026,391)

3. **common emitter (arrangement)** : → *arrangement 3*
4. **emitter** : a region between the emitter junction and the emitter electrode. ★ émetteur → *émetteur 4.* R эмиттер. D Emitter; Emitterzone. E emisor. I emettitore. N emitter. P emiter. S emitter. (521)
5. **emitter** (*α, β, γ,* etc.) : a radionuclide that emits alpha, beta, or gamma radiation (or conversion electrons, K, X-rays, or neutrons). ★ émetteur (*α, β, γ,*etc.) → *émetteur 23.* R излучатель (альфа-излучатель, бета-излучатель, гамма-излучатель и т. д.). D Strahler (*α, β, γ,* etc.). E emisor (*α, β, γ,* etc.). I emettitore (*α, β, γ,* ecc.). N straler (*α, β, γ,* enz.). P emiter (*α, β, γ,* itd.). S strålare. (881)
6. **emitter junction** : → *junction 6*
7. **gamma emitter** : radionuclide which disintegrates with emission of gamma radiation. ★ émetteur gamma → *émetteur 22.* R Г излучатель. D Gammasstrahler. E emisor gamma. I emettitore gamma. N gammastraler. P źródło promieniowania gamma. S gammastrålare. (026,391)
8. **infra-red ceramic panel emitter** : an infra-red heating panel having a ceramic coating. ★ panneau en céramique à rayonnement infrarouge → *panneau 11.* R инфракрасный керамический панельный излучатель. D Infrarotkeramikflächenstrahler. E panel cerámico de radiación infrarroja. I pannello in ceramica a raggi infrarossi. N keramisch stralingspaneel. P promiennik płytowy ceramiczny. S keramisk panel för infrastrålning. (841)
9. **infra-red emitter end-connection** : → *end-connection 1*
10. **infra-red emitter reflector** : → *reflector 8*
11. **infra-red glass panel emitter** : an electroconducting glass infrared panel which is heated by Joule effect. ★ panneau en verre à rayonnement infrarouge → *panneau 12.* R инфракрасный стеклянный панельный излучатель. D Infrarotglasplattenstrahler. E panel de vidrio de radiación infrarroja. I pannello in vetro a raggi infrarossi. N glazen stralingspaneel. P promiennik płytowy szklany. S glaspanel för infrastrålning. (841)
12. **microwave emitter** : a source of hyperfrequency energy. *Note.* — Microwave emitters may use magnetrons, klystrons or power triodes. ★ émetteur à hyperfréquences → *émetteur 6.* R генератор сверхвысокой частоты. D Mikrowellengenerator. E emisor de microondas. I emettitore a microonde. N microgolfzender. P źródło mikrofalowe. S mikrovågsalstrare. (841)
13. **tubular clear emitter (high temperature)** : an assembly comprising a tungsten filament enclosed in a hermetically sealed clear envelope containing an inert gas. ★ émetteur à tube de quartz (haute température) → *émetteur 12.* R трубчатый прозрачный излучатель (высокотемпературный). D durchsichtiger Rohrstrahler für hohe Temperatur. E emisor de tubo de cuarzo (alta temperatura). I emettitore a tubo di quarzo (alta temperatura). N helderebuisstraler (hoge temperatuur). P promiennik kwarcowy rurowy wysokotemperaturowy. S ..... (841)
14. **tubular clear emitter (low temperature)** : an assembly comprising a resistance alloy in an unsealed clear envelope. ★ émetteur à tube de quartz (basse température) → *émetteur 11.* R трубчатый прозрачный излучатель (низкотемпературный). D durchsichtiger Rohrstrahler für niedrige Temperatur. E emisor de tubo de cuarzo (baja temperatura). I emettitore a tubo di quarzo (bassa temperatura). N helderebuisstraler (lage temperatuur). P promiennik kwarcowy rurowy niskotemperaturowy. S ..... (841)
15. **vacuum meter with alpha emitter** : → *meter 69*
16. **X emitter** : radionuclide which disintegrates with emission of *X* radiation. ★ émetteur X → *émetteur 29.* R рентгеновский излучатель. D Röntgen-Strahler. E emisor X. I emettitore X. N röntgenstraler. P źródło promieniowania *X.* S röntgenstrålare. (391)
17. **X-ray emitter** : any matter or device liberating X-radiation. Apart from X-ray tube assemblies, scattering bodies and in certain circumstances rectifiers, oscilloscopes, image intensifiers, electron microscopes, magnetrons, television tubes, and other devices are also sources of X-radiation. ★ source de rayons X → *source 19.* R источник рентгеновского излучения. D Röntgenstrahlenquelle. E emisor de rayos X. I sorgente di raggi X. N röntgenstraler; röntgenbron. P źródło promieniowania rentgenowskiego. S röntgenstrålare. (881)

emitting

1. **edge-emitting light emitting diode** : → *diode 8*
2. **emitting sole** : → *sole 1*
3. **light emitting diode** : → *diode 12*
4. **surface emitting light emitting diode** : → *diode 22*
5. **surface emitting light emitting diode** : → *diode 22*

empty

1. **empty band** : → *band 13*
2. **empty running** : → *running 2*

EMRP

1. **EMRP** (*Syn.* effective monopole radiated power) : → *power 36*

emulsion

1. **nuclear-track emulsion** : specially prepared radiation-sensitive photographic emulsions, coated on glass plates or films, to record the passage or absorption of nuclear particles. Individual events can be identified and counted after photographic development. Emulsions can be prepared for optimum detection of particular types of particles. ★ émulsion nucléaire → *émulsion 1.* R ядерная эмульсия. D Kernspur-Emulsion. E emulsión nuclear. I emulsione nucleare. N kernspooremulsie. P błona jądrowa. S kärnemulsion. (881)

enabling

1. **enabling** (in echo control) : the action of permitting an echo control device to resume its echo control functions after being disabled. *Note.* — The associated verb is "to enable". ★ déneutralisation → *déneutralisation 1.* R включение (при управлении эхо-сигналом). D Inbetriebsetzen (in der Echoregulierung). E desneutralización. I abilitazione (nel controllo dell'eco). N inschakelen (bij echobeheersing). P odblokowanie (tłumienia echa). S deblockering. (704)

enamel

1. **enamel (1)** : a highly pigmented varnish having a high gloss when applied, and often used as a finishing varnish. ★ vernis de finition (1) → *vernis 3.* R эмаль (1). D Decklack. E barniz de acabado. I vernice da finitura. N email. P emalia. S lack. (212)
2. **enamel (2)** : a varnish particularly formulated for use as insulation on winding wires (wire enamel). ★ vernis isolant (2) → *vernis 4.* R эмаль (2). D Drahtlack. E barniz aislante. I vernice isolante. N email. P emalia. S trådlack. (212)
3. **vitreous enamel** (on metal) : a substantially glassy, smooth coating bonded to the surface by fusion. The coating may contain colouring or opacifying inorganic substances. ★ émail → *émail 1.* R стекловидная эмаль (на металле). D Email (auf Metall). E esmalte vitreo (sobre metal). I smalto. N moffellak. P emalia szklista (na metalu). S emalj. (212)

enamelled

1. **enamelled bulb** : → *bulb 7*

en-bloc

1. **en-bloc signalling** : → *signalling 16*

encapsulated

1. **encapsulated** : applied to a machine in which one or more of the windings are completely encased and sealed by moulded insulation. ★ machine encapsulée → *machine 45.* R машина с капсулированными обмотками. D Maschine mit vergossener Wicklung. E máquina encapsulada. I macchina con avvolgimenti incapsulati. N met ingegoten wikkeling. P maszyna z uzwojeniami hermetyzowanymi. S ingjuten. (411)

encapsulated-winding

1. **encapsulated-winding dry-type reactor** : → *reactor 10*
2. **encapsulated-winding dry-type transformer** : → *transformer 30*

encapsulating

1. **encapsulating** : the process of applying a thermoplastic or thermosetting protective or insulating coating to enclose an article by suitable means, such as brushing, dipping, spraying, thermoforming, or moulding. ★ encapsulage → *encapsulage 1.* R капсулирование. D Umgießen; Vergießen. E encapsulado. I investimento. N omhullen;

insluiten; inkapselen. **P** polewanie; tworzenie polewy. **S** inkapsling. (212)

2. **encapsulating resin** : → *resin 2*

enclosed

1. **enclosed assembly** : → *assembly 10*
2. **enclosed fuse-link** : → *fuse-link 2*

enclosed-ventilated

1. **enclosed-ventilated** : applied to a machine with a substantially complete enclosure in which openings are provided for ventilation only. ★ machine blindée ventilée → *machine 41.* **R** закрытая вентилируемая машина. **D** durchzugbelüftete Maschine. **E** máquina blindada ventilada. **I** macchina chiusa ventilata. **N** ..... **P** ..... **S** ventilerat kapslad. (411)

enclosure

1. **acoustic enclosure** : an enclosure (partial or total) made of sound absorbing material that surrounds a transformer in order to reduce its emitted noise. ★ enceinte d'insonorisation → *enceinte 2.* **R** звукоизолирующая оболочка. **D** Geräuschschutzhülle. **E** recubrimiento de insonorización. **I** recinzione antirumore. **N** ..... **P** obudowa dźwiękochłonna. **S** bullerskärm. (605)
2. **acoustic enclosure** : assembly consisting of an enclosure, one or more loudspeaker units, and other associated parts such as filters, transformers or other passive elements. ★ enceinte acoustique → *enceinte 1.* **R** акустическая система. **D** Beschallungseinheit. **E** montaje acústico. **I** ..... **N** luidsprekerbox. **P** zespół głosnikowy. **S** högtalarlåda. (801)
3. **degree of protection provided by enclosures** : → *degree 13*
4. **enclosure** (of electrical apparatus) : all the walls which surround the live parts of electrical apparatus including doors, covers, cable entries, rods, spindles and shafts. ★ enveloppe → *enveloppe 8.* **R** оболочка (электрооборудования). **D** Gehäuse. **E** envolvente (de un material eléctrico). **I** custodia (di una costruzione o di un materiale elettrico). **N** omhulsel (van elektrisch materieel). **P** osłona (urządzenia elektrycznego). **S** kapsling. (426)
5. **enclosure** (of an assembly) : a part of an assembly providing a specified degree of protection of equipment against external influences and a specified degree of protection against approach to or contact with live parts and against contact with moving parts. ★ enveloppe → *enveloppe 9.* **R** оболочка (комплекта). **D** Kapselung; Umhüllung. **E** envolvente (de un conjunto). **I** involucro (di un complesso). **N** omhulsel (van een inrichting). **P** obudowa. **S** kapsling. (441)
6. **enclosure** (of a piezoelectric vibrator) : an enclosure protecting one or more piezoelectric vibrators and their mounting system. ★ boîtier → *boîtier 1.* **R** корпус (пьезоэлектрического вибратора). **D** Gehäuse (eines piezoelektrischen Vibrators). **E** caja (de un vibrador piezoeléctrico). **I** contenitore (di vibratore piezoelettrico). **N** omhulsel. **P** obudowa (wibratora piezoelektrycznego). **S** kåpa. (561)
7. **enclosure** : a part providing protection of equipment against certain external influences and, in any direction, protection against direct contact. ★ enveloppe → *enveloppe 13.* **R** оболочка. **D** Gehäuse. **E** envolvente. **I** involucro. **N** omhulsel. **P** obudowa. **S** kapsling. (826)
8. **explosion proof enclosure** (*Syn.* flameproof enclosure "d") : → *enclosure 9*
9. **flameproof enclosure** "d" (of electrical apparatus for explosive gas atmospheres) (*Syn.* explosion proof enclosure) : a type of protection of electrical apparatus in which the enclosure will withstand an internal explosion of a flammable mixture which has penetrated into the interior without suffering damage and without causing ignition, through any joints or structural openings in the enclosure, of an external explosive atmosphere consisting of one or more of the gases or vapours for which it is designed. *Note.* — This type of protection is indicated by the letter "d". ★ enveloppe antidéflagrante "d" → *enveloppe 15.* **R** взрывонепроницаемая оболочка (взрывозащищенного электрооборудования). **D** druckfeste Kapselung "d". **E** envolvente antideflagrante "d" (de un material eléctrico para atmósferas explosivas gaseosas). **I** custodia a prova di esplosione "d" (di costruzioni elettriche per atmosfere esplosive per la presenza di gas). **N** drukvast omhulsel "d" (van elektrisch materieel voor plaatsen met ontploffingsgevaar). **P** osłona ognioszczelna "d" (urządzenia elektrycznego przeciwwybuchowego). **S** utförande med explosionstät kapsling. (426)
10. **pressurized enclosure** : an enclosure into which entry of the external atmosphere is prevented by pressurization. ★ enveloppe à surpression interne → *enveloppe 14.* **R** оболочка под избыточным давлением. **D** überdruckgekapseltes Gehäuse. **E** envolvente de sobrepresión interna; envolvente presurizada. **I** custodie a sovrapressione. **N** omhulsel met inwendige overdruk. **P** osłona gazowa pod ciśnieniem. **S** kapsling med övertryck. (426)
11. **separate terminal enclosure** : a form of termination in which the terminals are connected to the incoming supply leads inside a chamber which need not be fully enclosed and may be formed by the foundations beneath the machine. ★ compartiment de connexions → *compartiment 2.* **R** камера выводов. **D** getrennte Klemmenzelle. **E** recinto de conexiones. **I** nicchia morsetti. **N** aansluitruimte. **P** komora zaciskowa. **S** separat anslutningslåda. (411)
12. **shielded enclosure** (*Syn.* screened room) : a mesh or sheet metallic housing designed expressly for the purpose of separating electromagnetically the internal and the external environment. ★ cage de Faraday → *cage 1.* **R** экранированная камера. **D** Schirmraum. **E** jaula de Faraday. **I** gabbia di Faraday; cabina schermata. **N** kooi van Faraday. **P** pomieszczenie ekranowane; kabina ekranowana. **S** skärmat rum. (161)

encode

1. **to encode** (*Syn.* to code) : to represent information using a code. ★ coder → *coder 1.* **R** кодировать. **D** codieren; verschlüsseln. **E** codificar. **I** codificare. **N** coderen. **P** kodować. **S** koda. (702)

encoder

1. **encoder** : a device for producing the representation of information according to a given code. ★ codeur → *codeur 1.* **R** кодирующее устройство. **D** Codierer. **E** codificador. **I** codificatore. **N** coder; codeertoestel. **P** koder. **S** kodare. (702)
2. **encoder** (*Syn.* coder) : → *coder 1*
3. **PCM encoder** : a device for implementing encoding in pulse code modulation. ★ codeur MIC → *codeur 3.* **R** кодер ИКМ. **D** PCM-Codierer. **E** codificador MIC. **I** codificatore PCM. **N** PCM-codeerder. **P** koder (w modulacji impulsowo-kodowej). **S** PCM-kodare. (704)
4. **stereophonic encoder** : equipment producing the stereophonic multiplex signal from the left- andri ght-hand stereophonic signals. ★ codeur stéréophonique → *codeur 4.* **R** стереофонический кодер. (723)

encoder-decoder

1. **PCM encoder-decoder** (*Syn.* PCM codec) : → *codec 1*

encoding

1. **encoding** (*Syn.* coding) : the process of representing information using a code. ★ codage → *codage 2.* **R** кодирование. **D** Codierung; Verschlüsselung. **E** codificación. **I** codifica. **N** codering. **P** kodowanie. **S** kodning. (702)
2. **encoding** (in pulse code modulation) : the process of representing each quantized value by an arrangement of digits in accordance with a defined set of rules. ★ codage → *codage 3.* **R** кодирование (в импульсно-кодовой модуляции). **D** Codieren (bei Pulscodemodulation). **E** codificación (en modulación por impulsos y codificación). **I** codifica (nella modulazione a impulsi codificati). **N** coderen (bij pulscodemodulatie). **P** kodowanie (w modulacji impulsowo-kodowej). **S** kodning. (704)
3. **line encoding** : the process of applying the rules of a particular line code to a given set of digits to derive the sequence of signal elements of the line signal. ★ codage en ligne → *codage 5.* **R** линейное кодирование. **D** Leitungscodierung. **E** codificación en línea. **I** codifica di linea. **N** lijncodering. **P** kodowanie liniowe. **S** linjekodning. (704)

encumbrance

1. **encumbrance** (*Syn.* system height) : → *height 6*

end

1. **core end plate** : → *plate 2*
2. **end bracket** : → *bracket 3*

3. **end capacitor** : → *capacitor 33*
4. **end effect** : → *effect 19*
5. **end effect** : → *effect 20*
6. **end of medium signal** : → *signal 77*
7. **end of text signal** : → *signal 78*
8. **end of transmission signal** : → *signal 79*
9. **end plate (of a rotor)** : → *plate 5*
10. **end (point) voltage** : → *point 14*
11. **end shield** : → *shield 6*
12. **end stop** : → *stop 3*
13. **mechanical end stop** : → *stop 4*
14. **pole end plate** : → *plate 25*
15. **pre-insulated terminal end** : a terminal end having a barrel with a permanent layer of insulation through which a crimp is made. ★ embout pré-isolé → *embout 2.* R наконечник кабельный с предварительной изоляцией. D vorisolierter Kabelschuh. E contera preaislada. I terminazione pre-isolata. N voorgeïsoleerd draadaansluitgedeelte. P końcówka przewodowa skrośna. S förisolerad ledaravslutning. (581)
16. **sealing end** : a termination providing a seal to the end of the cable from the external environment and maintaining the pressure, if any, of the cable system. ★ extrémité étanche → *extrémité 10.* R герметичная концевая муфта. D Endverschluß. E terminal estanco. I terminale (a tenuta). N eindsluiting pothead (deprecated). P głowica kablowa ciśnieniowa. S trycktät avslutning. (461)
17. **shaft end** : the end of a shaft which is used to transmit torque. ★ bout d'arbre d'entraînement → *bout 2.* R конец вала со стороны привода. D Wellenende. E extremidad de árbol de arrastre. I estremità lato azionamento. N aseind. P czop końcowy wału. S tappända (av axel). (411)
18. **speed at end of notching** : → *speed 38*
19. **stub end** : the upper part of ingot showing irregular surface or shape after cooling. ★ masselotte → *masselotte 1.* R усадочная раковина. D Kopfende. E mazarota. I materozza. N verloren kop. P koniec wlewka. S göttopp. (841)
20. **terminal end** : a component to be fitted to a conductor to attach it to a terminal. ★ embout → *embout 1.* R наконечник кабельный. D Kabelschuh. E contera. I terminazione. N draadansluitgedeelte. P końcówka przewodowa. S ledaravslutning. (581)

end-connection

1. **infra-red emitter end-connection** : a contact assembly to bring electric current to the emitter. ★ dispositif de raccordement de l'émetteur → *dispositif 54.* R концевое соединение инфракрасного излучателя. D Infrarotstrahleranschluss. E dispositivo de conexión del emisor de infrarrojos. I dispositivo di connessione dell'emettitore. N aansluiting voor infraroodstraler. P łączówka grzejników promiennikowych. S ..... (841)

end-fire

1. **end-fire...** : pertains to a linear array antenna or an antenna having an elongated form, whose maximum radiation is along the line of the array or in the direction of maximum elongation of the antenna. *Example :* end-fire array. ★ à rayonnement longitudinal → *rayonnement 1.* R осевое излучение. D Längsstrahler-; Beispiel: Längsstrahlergruppe. E radiación longitudinal. I antenna a irradiazione longitudinale (end-fire array). N langsstralend. P zestaw (antenowy) wzdłużnokierunkowy. S längsstrålande. (712)

endless

1. **endless loop** : → *loop 11*

end-of-block

1. **end-of-block signal** : → *signal 80*

end-of-charge

1. **end-of-charge rate** : → *rate 27*
2. **end-of-charge voltage (of a cell or battery)** : → *voltage 61*

end-of-pulsing

1. **end-of-pulsing signal** : → *signal 81*

end-of-selection

1. **end-of-selection signal** : → *signal 82*

end-shift

1. **end-shift frame** : → *frame 9*

end-to-end

1. **end-to-end selection** (*Syn.* conjugate selecting) : → *selecting 2*
2. **end-to-end signalling** : → *signalling 17*

endurance

1. **endurance** : the ability to withstand the action of ageing factors. The endurance may be characterized by the results of accelerated ageing tests. ★ endurance → *endurance 1.* R стойкость. D Langzeitverhalten. E endurancia. I capacità di resistenza. N duurzaamheid. P wytrzymałość; wytrzymałość cieplna. S åldringsbeständighet. (212)
2. **endurance** : numerically defined behaviour of a battery during a given test simulating certain conditions of service. ★ endurance → *endurance 2.* R устойчивость. D Haltbarkeit. E resistencia. I durabilità. N (gedefinieerde) duurzaamheid; technische levensduur. P odporność. S beständighet. (486)
3. **endurance test** : → *test 31*
4. **final endurance value** : → *value 11*
5. **thermal endurance** : the ability to withstand the action of elevated temperature. The thermal endurance may be characterized by the results of accelerated ageing tests. ★ endurance thermique → *endurance 3.* R нагревостойкость. D thermisches Langzeitverhalten. E endurancia térmica. I capacità di resistenza alla temperatura. N thermische duurzaamheid. P wytrzymałość cieplna. S termisk åldringsbeständighet. (212)
6. **thermal endurance graph** : → *graph 4*

end-winding

1. **end winding** : either of the two parts of a single coil which connect the coil sides. ★ développante → *développante 1.* R лобовая часть катушки. D Stirnverbindung. E extremo de bobina. I evolvente (testata). N spoelkop. P czoło zezwoju. S härvände. (411)
2. **end-winding cover** : → *cover 3*
3. **rotor end-winding retaining ring** : → *ring 19*

end-window

1. **end-window counter tube** : → *counter tube 7*

energize

1. **to energize a relay** : to apply to a relay one or more of its energizing quantities. *Note.* — The presence of any one energizing quantity may not be sufficient to produce the required function of the relay. Consequently, it is necessary to define all the conditions of energization (method, magnitude, phase displacement, etc.). ★ alimenter un relais → *alimenter 1.* R возбуждать реле. D ein Relais erregen. E alimentar un relé. I alimentare un relè. N bekrachtigen van een relais. P zasilacz przekaźnik; wysterować przekaźnik. S mata ett relä. (446)

energizing

1. **auxiliary energizing quantity** : → *quantity 1*
2. **energizing quantity** : → *quantity 8*
3. **energizing winding** : → *winding 24*
4. **input energizing quantity** : → *quantity 14*
5. **limiting continuous thermal withstand value of an energizing quantity** : → *value 17*
6. **limiting dynamic value of an energizing quantity** : → *value 18*
7. **limiting short-time thermal withstand value of an energizing quantity** : → *value 19*
8. **nominal value of an energizing quantity** : → *value 31*
9. **operative range of an energizing quantity** : → *range 55*
10. **rated burden of an energizing circuit** (*Syn.* rated power of an energizing circuit) : → *power 159*
11. **rated impedance of an energizing circuit** : → *impedance 47*
12. **rated power of an energizing circuit** : → *power 159*
13. **rated value of an energizing quantity** : → *value 47*

energy

1. **absorption (energy)** : the removal of energy from radiation by the matter which it traverses. ★ absorption (d'énergie) → *absorption 14.* R поглощение (энергии). D Energieabsorption. E absorción (de energía). I assorbimento (di energia). N absorptie (van energie). P pochłanianie (energii). S absorption. (881)
2. **active energy** : the electrical energy transformable into some other form of energy. ★ énergie active → *énergie 28.* R активная электрическая энергия. D Wirkarbeit; Wirkenergie. E energía activa. I energia attiva. N werklastenergie. P energia czynna. S aktiv energi. (601)
3. **(active) energy meter** (*Syn.* watt-hour meter) : → *meter 77*
4. **apparent energy meter** (*Syn.* volt-ampere-hour meter) : → *meter 73*
5. **average energy expended per ion pair formed** (in a material) : the quotient of the initial kinetic energy of a charged particle by the average number of ion pairs formed along its track in a material when that particle is completely stopped by the material. ★ perte moyenne d'énergie par paire d'ions → *perte 35.* R средняя энергия ионообразования (в среде). D Energieaufwand zur Bildung eines Ionenpaares. E pérdida media de energía por par de iones (en una materia). I perdita media di energia per coppia di ioni (in un materiale). N gemiddelde energie per gevormd ionenpaar (in een materiaal). P średnia energia wytworzenia pary jonów. S medelenergi per jonpar (i ett material). (391)
6. **average logarithmic energy decrement** : → *decrement 1*
7. **binding energy** : 1. For a particle in a system, the net energy required to remove it from the system. 2. For a system, the net energy required to decompose it into its constituent particles. ★ énergie de liaison → *énergie 38.* D Bindungsenergie. E energía de enlace. I energia di legame. N bindingsenergie. P energia wiązania. S bindningsenergi. (026,881)
8. **bit energy to noise spectral density ratio** : → *ratio 10*
9. **direction of propagation (of energy)** : → *direction 9*
10. **direction of propagation of energy** : → *direction 10*
11. **discharge energy test** : → *test 25*
12. **disintegration energy** : → *disintegration 2*
13. **effective energy** (*Syn.* equivalent energy) : → *energy 47*
14. **electric energy transducer** : → *transducer 2*
15. **(electrical) energy** : the magnitude of an electricity supply, expressed in kilowatthours. ★ énergie (électrique) → *énergie électrique 4.* R (электрическая) энергия. D (elektrische) Arbeit. E energía (eléctrica). I energia (elettrica). N (elektrische) energie. P energia elektryczna. S energi. (691)
16. **electromagnetic energy** : the energy stored in an electromagnetic field. ★ énergie électromagnétique → *énergie 45.* R электромагнитная энергия. D elektromagnetische Energie. E energía electromagnética. I energia elettromagnetica. N elektromagnetische energie. P energia elektromagnetyczna. S elektromagnetisk energi. (121)
17. **energy** (E) : a quantity characterizing the ability of a physical system to do work. *Note.* — Energy exists in different forms transformable one into the other: examples are mechanical, electromagnetic, chemical, thermal, nuclear, etc. ★ énergie → *énergie 27.* R энергия. D Energie. E energía. I energia. N energie. P energia. S energi. (111)
18. **energy band** : → *band 14*
19. **energy band** : → *band 15*
20. **energy capability** : → *capability 2*
21. **energy capability factor** : → *factor 67*
22. **energy capability of a reservoir** : → *capability 4*
23. **energy conversion efficiency** : → *efficiency 22*
24. **energy cost** : → *cost 11*
25. **energy dependence** : → *dependence 1*
26. **energy efficiency (of a cell or battery)** : → *efficiency 23*
27. **energy fluence** : → *fluence 1*
28. **energy fluence rate** : → *rate 28*
29. **energy flux density** : → *flux density 4*
30. **energy flux density** (*Syn.* energy fluence rate) : → *rate 28*
31. **energy gap** : → *gap 5*
32. **energy gap** : → *gap 6*
33. **energy imparted** (to matter) (ε) : the sum, in a given time: - on the one hand, of the difference between the sum of the energies of all the ionizing particles which have entered a volume and the sum of the energies of all those which have left it, exclusive of rest energies ; - on the other hand, of the difference between the sum of all of the energies released and the sum of all the energies expended in any nuclear reactions, transformations and elementary particle processes which have occurred within the volume. ★ énergie communiquée → *énergie 31.* R переданная энергия (веществу); НРК; интегральная доза поглощенная. D auf das Material übertragene Energie. E energía cedida (a la materia). I energia comunicata (alla materia). N energie-overdracht (aan materie); integrale geabsorbeerde dosis. P energia przekazana (materii); sumaryczna dawka pochłonięta. S absorberad (strålnings)energi; integraldos. (391)
34. **energy imparted** (ε) : the energy imparted by ionizing radiation to the matter in a volume $\varepsilon = \Sigma\varepsilon_{in} - \Sigma\varepsilon_{ex} + \Sigma Q$ where $\Sigma\varepsilon_{in}$ is the sum of the energies (excluding rest energies) of all directly and indirectly ionizing particles incident on the volume, $\Sigma\varepsilon_{ex}$ is the sum of the energies (excluding rest energies) of all directly and indirectly ionizing particles emerging from the volume, and ΣQ is the sum of all changes (decreases : positive sign ; increases : negative sign) of rest energy of nuclei and elementary particles in any transformations which occur in the volume. *Note.* — ε is a stochastic quantity. ★ énergie communiquée à la matière → *énergie 32.* R переданная энергия. D zugeführte Energie. E energía comunicada a la materia. I energia ceduta. N overdrachtsenergie. P energia przekazana. S absorberad energi. (881)
35. **(energy) loss factor** : → *factor 68*
36. **energy losses** : → *loss 27*
37. **energy not supplied** (*Syn.* lost energy) : the energy which would have been supplied from the electrical system during a period of supply disconnection. ★ énergie non fournie → *énergie 51.* R недоотпуск энергии. D nicht gelieferte Energie. E energía no suministrada. I energia non fornita. N niet-geleverde energie. P energia niedostarczona. S energibortfall. (604)
38. **energy of a battery** : the energy which a fully charged battery can deliver under specified conditions. *Note.* — The SI unit for energy is the joule (1J = 1W·s) but in practice, energy of a battery is usually expressed in watt-hours (W·h). ★ énergie d'un accumulateur → *énergie 43.* R энергия батареи. D Energie (eines Akkumulators). E energía de una batería. I energia di un accumulatore. N energie (van een batterij); energie (van een accumulator). P energia akumulatora. S tillgänglig energi. (486)
39. **energy rate** (*Syn.* kilowatthour rate) : → *rate 48*
40. **energy reserve of a reservoir** : → *reserve 2*
41. **energy resolution** : → *resolution 1*
42. **energy shortfall** : → *shortfall 1*
43. **energy spectral density** : → *density 10*
44. **energy storage capacitor** : → *capacitor 34*
45. **energy transfer** : → *transfer 8*
46. **equal energy spectrum** (*Syn.* equi-energy spectrum) : → *spectrum 13*
47. **equivalent energy** (*Syn.* effective energy) : the photon energy of monoenergetic X-rays which, in some specified respect, have the same property as the heterogeneous beam under consideration. *Note.* — It may be defined with respect to half-value layer or other energy-dependent quantities. ★ énergie équivalente → *énergie 47.* R эквивалентная энергия; эффективная энергия. D äquivalente Energie. E energía equivalente; energía eficaz. I energia equivalente; energia efficace. N equivalente energie; effectieve energie. P energia równoważna; energia efektywna. S ekvivalent energi. (881)
48. **excess energy meter** : → *meter 20*
49. **excitation energy** : the energy necessary to raise a quantized system from the ground state to a given excited state. ★ énergie d'excitation → *énergie 39.* R энергия возбуждения. D Anregungsenergie. E energía de excitación. I energia d'eccitazione. N aanslagenergie. P energia wzbudzenia. S excitationsenergi. (111)
50. **fission energy** : energy released by fission process. ★ énergie de fission → *énergie 36.* R энергия деления. D Spaltungsenergie. E energía de fisión. I energia di fissione. N splijtingsenergie. P energia rozszczepienia. S klyvningsenergi; fissionsenergi. (391)

51. **Gibbs free energy** (*Syn.* Gibbs function) (*G*) : the function of state equal to the difference between the enthalpy of a body and the product of its entropy by the temperature. G = H - TS. ★ enthalpie libre → *enthalpie 2.* R свободная энтальпия. D freie Enthalpie; Gibbs-Funktion. E entalpi'a libre. I entalpia libera. N vrije energie volgens Gibbs. P entalpia wolna. S fri entalpi. (111)
52. **heat (energy)** (*Syn.* thermal energy) : → *energy 77*
53. **impurity activation energy** : the gap between an intermediate energy level due to an impurity and the adjacent energy band. ★ énergie d'activation des impuretés → *énergie 33.* R энергия активации примесей. D Störstellenaktivierungsenergie. E energía de activación de impurezas. I energia d'attivazione delle impurità. N activeringsenergie van de verontreiniging. P energia aktywacji domieszek. S störatomens aktiveringsenergi. (521)
54. **internal energy** (*U*) : the function of state equal to the sum of the work and the thermal energy that would be delivered by a body during cooling to the thermodynamic temperature of zero kelvin. ★ énergie interne → *énergie 49.* R внутренняя энергия. D innere Energie. E energía interna. I energia interna. N inwendige energie. P energia wewnętrzna. S inre energi. (111)
55. **ionization energy** : the least energy necessary to ionize an atom or molecule from its ground state. ★ énergie d'ionisation → *énergie 40.* R энергия ионизации. D Ionisationsenergie. E energía de ionización. I energia di ionizzazione. N ionisatie-energie. P energia jonizacji. S jonisationsenergi. (111)
56. **ionizing energy of acceptor** : the minimum energy to be applied to a valence band electron in order to transfer it to the acceptor level. ★ énergie d'ionisation d'un accepteur → *énergie 41.* R энергия ионизации акцептора. D Akzeptor-Ionisierungsenergie. E energía de ionización de un aceptador. I energia di ionizzazione di un accettore. N ionisatie-energie van een acceptor. P energia jonizacji akceptora. S joniseringsenergi för acceptor. (521)
57. **ionizing energy of donor** : the minimum energy to be applied to an electron located at the donor level in order to transfer it to the conduction band. ★ énergie d'ionisation d'un donneur → *énergie 42.* R энергия ионизации донора. D Donator-Ionisierungsenergie. E energía de ionización de un donador. I energia di ionizzazione di un donatore. N ionisatie-energie van een donor. P energia jonizacji donora. S joniseringsenergi för donator. (521)
58. **linear energy transfer** : → *transfer 14*
59. **lost energy** (*Syn.* energy not supplied) : → *energy 37*
60. **mass energy transfer coefficient** : → *coefficient 37*
61. **mean energy capability** : → *capability 5*
62. **mean energy expended in a gas per ion pair formed** (*W*) : the quotient of *E* by $\bar{N}$, where $\bar{N}$ is the mean number of ion pairs formed when the initial kinetic energy *E* of a charged particle is completely dissipated in the gas.

$$W = \frac{E}{\bar{N}}$$

Note. — The ions produced by the bremsstrahlung emitted by the charged particle must be counted in *N*. ★ perte moyenne d'énergie par paire d'ions → *perte 36.* R средняя энергия ионообразования в газе. D mittlerer Energieaufwand pro Ionenpaar in einem Gas. E pérdida media de energía por par de iones en un gas. I energia media necessaria per formare una coppia di ioni in un gas. N ..... P średnia wartość energii jonizacji w gazie. S medelenergiförlust per bildat jonpar. (881)
63. **mean energy imparted** $\bar{\varepsilon}$: the expectation value of the energy imparted. ★ énergie moyenne communiquée à la matière → *énergie 50.* R средняя переданная энергия. D mittlere zugeführte Energie. E energía media comunicada a la materia. I energia media ceduta. N gemiddelde overdrachtsenergie. P średnia wartość energii przekazanej. S integraldos. (881)
64. **neutron energy group** : → *group 46*
65. **nuclear energy** : energy released in nuclear reactions or transitions. ★ énergie nucléaire → *énergie 52.* D Kernenergie. E energía nuclear. I energia nucleare; energia atomica. N kernenergie. P energia jądrowa. S kärnenergi. (026)
66. **(particle) energy fluence** : → *fluence 3*
67. **radiant energy** : energy that is emitted, transmitted or received via electromagnetic waves. ★ énergie rayonnante → *énergie 53.* R энергия излучения. D Strahlungsenergie. E energía radiante. I energia radiante. N stralingsenergie. P energia promienista. S strålningsenergi. (731,841,881)
68. **radiant energy** (Q_e; Q) : time integral of the radiant flux Φ_e over a given duration Δt.

$$Q_e = \int_{\Delta t} \Phi_e \mathrm{d}t$$

Unit : J = W·s. ★ énergie rayonnante → *énergie 54.* R энергия излучения. D Strahlungsenergie. E (cantidad de) energía radiante. I energia raggiante. N stralingsenergie. P ilość energii promienistej. S strålningsenergi. (845)
69. **reactive energy** : in an a.c. system, the captive electrical energy exchanged continuously between the different electric and magnetic fields associated with the operation of the electrical system and of all the connected apparatus. ★ énergie réactive → *énergie 55.* R реактивная энергия. D Blindarbeit; Blindenergie. E energía reactiva. I energia reattiva. N blindlastenergie. P energia bierna. S reaktiv energi. (601)
70. **reactive energy meter** (*Syn.* var-hour meter) : → *meter 70*
71. **regulating energy of a system** (*Syn.* power/frequency characteristic) : for a power system the quotient of the change of active power demand by the corresponding change of frequency in the absence of secondary control. ★ énergie réglante d'un réseau → *énergie 56.* R регулирующий эффект энергосистемы по частоте. D Leistungskoeffizient eines Netzes. E energía reglante de una red. I energia regolante di una rete. N regelenergie van een net; netconstante. P energia regulacyjna systemu. S reglerstyrka hos system. (603)
72. **rest energy** (E_0) : the energy corresponding to the rest mass of a particle given by the equation : $E_0 = m_0 c_0^2$ where m_0 is the rest mass and c_0 is the velocity of light. ★ énergie au repos → *énergie 30.* R энергия покоя. D Ruheenergie. E energía en reposo. I energia di riposo. N rustenergie. P energia spoczynkowa. S viloenergi. (881)
73. **specific energy consumption of an electric vehicle** : → *consumption 2*
74. **spike leakage energy** : the energy contained in the initial pulse transmitted through a TR or pre TR tube prior to full firing when a high-power radio frequency pulse is applied. ★ énergie de fuite de pointe → *énergie 37.* R просачивающаяся энергия пика. D Leckenergie des Impulsanfangs. E energía de fuga de punta. I energia di dispersione di cresta. N pieklekvermogen. P energia ostrza (impulsu). S spetsläckenergi. (531)
75. **stored energy operation** : → *operation 68*
76. **stored kinetic energy traction** : → *traction 11*
77. **thermal energy** (*Syn.* heat (energy)) (*Q*) : the internal kinetic energy of a body, related to the disordered motions of its constituents. ★ énergie thermique → *énergie 58.* R тепловая энергия. D thermische Energie; Wärme (menge). E energía térmica. I energia termica. N thermische energie. P energia termiczna; energia cieplna. S värmeenergi; termisk energi. (111)
78. **total energy density** (*Syn.* sound energy density) : → *density 30*
79. **total (energy) transmittance** (*Syn.* solar factor) : → *factor 166*
80. **trapped energy mode** : → *mode 93*
81. **unavoidable energy** : primary energy the consumption of which cannot be delayed and which would be wasted if it could not be transformed into electricity. *Example :* run of river energy. ★ énergie fatale → *énergie 48.* R энергия вынужденного использования. D ungenutzte Energie. E energía vertible. I produzione indifferibile. N onvermijdbare energie. P energia pierwotna nieskładowalna. S tvångsproduktion. (602)
82. **(volume) density of electromagnetic energy** : → *density 43*

energy-absorption

1. **mass energy-absorption coefficient** : → *coefficient 38*

energy-level

1. **energy level** : the energy associated with a quantum state of a physical system. ★ niveau d'énergie → *niveau 57.* R энергетический уровень. D Energieniveau. E nivel de energía. I livello energetico. N energieniveau. P poziom energii. S energinivå. (111,521)

2. **energy level** : discrete quantum state of energy of an atom, a molecule or an ion. ★ niveau énergétique → *niveau 81.* R энергетический уровень. D Energieniveau. E nivel de energía. I livello energetico. N energieniveau. P poziom energetyczny. S energinivå. (845)
3. **energy-level diagram** : → *diagram 9*

energy-supply

1. **energy-supply station** : → *station 12*

ENG

1. **ENG** (*Syn.* electronic news gathering) : → *gathering 1*

engaged

1. **engaged signal** : → *signal 83*

engagement

1. **electrical engagement length** : → *length 8*
2. **engagement indicators** : → *indicator 6*
3. **tip engagement** : The distance by which the tape is moved by the head pole pieces with respect to the position which it is given by the vacuum guide. ★ pénétration des têtes → *pénétration 3.* R вдавливание головки. D Kopf-Band-Kontakt; Kopfeindringtiefe. E ranura de la guia. I penetrazione delle testine. N tippenetratie. P wnikanie (glowicy). S polinträngning. (806)

engaging

1. **engaging or separating force** : → *force 18*

engine

1. **continuous output (of an internal combustion engine)** (*Syn.* continuous power (of an internal combustion engine)) : → *power 26*
2. **maximum service output (of an internal combustion engine)** : → *output 23*
3. **net brake power (of an internal combustion engine)** (*Syn.* useful service output) : → *output 71*
4. **overload output (of an internal combustion engine)** (*Syn.* overload power (of an internal combustion engine)) : → *power 99*
5. **standard power (of an internal combustion engine)** (*Syn.* international rated output) : → *output 15*

engineering

1. **illuminating engineering** (*Syn.* lighting technology) : → *technology 3*

enhanced

1. **enhanced television (system)** : → *television 10*

enhancement

1. **enhancement type field-effect transistor** : → *transistor 4*

enriched

1. **enriched material** : → *material 13*
2. **enriched reactor** : → *reactor 11*

enrichment

1. **degree of enrichment** : → *degree 5*
2. **enrichment** (process) : the process by which the content of a specified isotope in an element is increased. ★ enrichissement → *enrichissement 2.* D Anreicherung (Prozess.). E enriquecimiento (proceso.). I arricchimento (processo.). N verrijking (sproces). P wzbogacanie. S anrikning (process.). (026)
3. **enrichment** : the content, expressed as a percentage or fraction, of a specified isotope present in a mixture of isotopes of the same element, when this proportion exceeds that in the naturally occurring mixture. *Note.* — Enrichment ha s also been taken to mean: *a)* enrichment factor *b)* enrichment factor minus one (degree of enrichment). These usages are to be avoided. ★ enrichissement → *enrichissement 3.* D Anreicherungsgrad. E enriquecimiento. I arricchimento. N verrijking; nuclidegehalte. P wzbogacenie. S anrikning. (026)
4. **enrichment factor** : → *factor 69*

enthalpy

1. **enthalpy** (*H*) : a function of state equal to the sum of the internal energy of a body and the product of pressure and its volume. $H = U + pV$. ★ enthalpie → *enthalpie 1.* R энтальпия. D Enthalpie. E entalpía. I entalpia. N enthalpie. P entalpia. S entalpi. (111)

entity

1. **entity** (*Syn.* item) : → *item 1*
2. **local switching entity** : a switching entity in the public telephone network to which subscribers are connected. ★ commutateur local → *commutateur 24.* R местная станция. D Ortsvermittlungsstelle; Ortsnetzknoten. E conmutador local; central local. I centrale urbana. N abonneecentrale; nummercentrale. P centrala miejscowa. S lokalstationsväxel. (722)
3. **maintenance entity** : any sub-item of a given item which can have a fault and which, by alarm or any other means, can be unambiguously identified for replacement or repair. ★ cellule de maintenance → *cellule 2.* R объект технического обслуживания. D der Instandhaltung unterzogene Einheit. E entidad de mantenimiento. I oggetto della manutenzione. N onderhoudseenheid. P obiekt obsługiwany. S underhållsobjekt. (191)
4. **switching entity** (*Syn.* exchange) : → *exchange 5*
5. **switching entity** : an aggregate of switching equipment and auxiliary apparatus at a telephone node enabling connections to be established by individual users. *Note.* — The French term "commutateur" is, strictly, the smallest switching entity having a unique designed function due to its control network. In this meaning, a local switching entity is defined by a given sequence of digits included in all its subscriber numbers. The corresponding English term is "switching entity". The term "central" is sometimes ambiguous because of its correspondence either to "commutateur", either to "centre de commutation". ★ commutateur → *commutateur 7.* R коммутационный центр. D Koppeleinrichtung. E conmutador (telefónico); central (telefónica). I centrale di commutazione. N (telefoon)schakeleenheid. P centrala telefoniczna. S växel. (722)
6. **switching entity area** : → *area 40*

entrance

1. **entrance angle** : → *angle 25*

entropy

1. **entropy** (*S*) : a function of state whose differential during a reversible transformation is

$$\mathrm{d}S = \delta Q/T$$

where δQ is the thermal energy supplied to the physical system by the external environment at thermodynamic temperature *T*. *Note.* — Entropy is related to the degree of disorder of a physical system. ★ entropie → *entropie 1.* R энтропия. D Entropie. E entropía. I entropia. N entropie. P entropia. S entropi. (111)

entry

1. **direct entry** (into electrical apparatus) : a method of connection of an electrical apparatus to the external circuits by means of the connecting facilities inside the main enclosure or in a terminal compartment having a free opening to the main enclosure. ★ entrée directe → *entrée 10.* R прямой ввод (в электрооборудование). D direktes Einführen. E entrada directa (en un material eléctrico). I entrata diretta (di una costruzione elettrica). N directe invoer (in elektrisch materieel). P wprowadzenie bezpośrednie (do urządzenia elektrycznego). S direkt införing. (426)
2. **indirect entry** (into electrical apparatus) : a method of connection of an electrical apparatus to the external circuits by means of a terminal box or a plug and socket connection which is external to the main enclosure. ★ entrée indirecte → *entrée 13.* R непрямой ввод (в электрооборудование). D indirektes Einführen. E entrada indirecta (de un material eléctrico). I entrata indiretta (di una costruzione elettrica). N indirecte invoer (in elektrisch materieel). P wprowadzenie pośrednie (do urządzenia elektrycznego). S indirekt införing. (426)
3. **restricted entry** : a design feature incorporated in a female contact or insulator to prevent the entry of an oversize pin or test probe. ★ entrée restreinte → *entrée 14.* R вход ограниченный. D verengter Kontakteingang. E entrada restringida. I guida calibrata. N insteekbeperking. P ogranicznik wprowadzania. S införingsspärr. (581)

envelope

1. **distortion of envelope delay time** : → *distortion 32*
2. **envelope** (of an electronic tube) : that part of an electronic or ionic tube which forms a gas-tight enclosure. ★ enveloppe → *enveloppe 10.* R внешняя оболочка. D Kolben; Hülle. E ampolla; envolvente. I involucro. N omhulling. P bańka. S rörhölje. (531)
3. **envelope** (*Syn.* amplitude) : → *amplitude 2*
4. **envelope** : a group of binary digits formed by a n-bit byte augmented by a number of additional bits which are required for the operation of the data network. ★ enveloppe → *enveloppe 12.* R конверт. D Envelope. E envolvente. I inviluppo. N enveloppe. P koperta. S envelopp. (721)
5. **envelope delay** : → *delay 18*
6. **envelope delay distortion** (*Syn.* group delay/frequency distortion) : → *distortion 43*
7. **envelope delay time** : → *delay-time 3*
8. **envelope demodulation** (*Syn.* linear demodulation) : → *demodulation 6*
9. **envelope of an amplitude modulated signal** : the upper and lower boundary lines of the area which is swept by the carrier wave when plotted against time while the phase of the modulating signal is varied continuously through 360°. ★ enveloppe d'un signal modulé en amplitude → *enveloppe 18.* R огибающая амплитудно-модулированного сигнала. D Hüllkurve eines amplitudenmodulierten Signals. E envolvente de una señal modulada en amplitud. I inviluppo di un segnale modulato in ampiezza. N omhullende (van een AM-signaal). P obwiednia sygnału modulowanego amplitudowo. S envelop hos amplitudmodulerad signal. (303)
10. **envelope velocity** : → *velocity 2*
11. **permanently locked envelopes** : envelopes which are always separated by a number of binary digits corresponding to an integral number of envelopes. ★ enveloppes verrouillées en permanence → *enveloppe 22.* R постоянно привязанные конверты. D Envelope im Festformat. E envolventes encerrados permanentemente. I inviluppo bloccato. N ..... P koperty wyrównane. S permanent låst envelopp. (721)

environment

1. **electromagnetic environment** : the totality of electromagnetic phenomena existing at a given location. ★ environnement électromagnétique → *environnement 3.* R электромагнитная обстановка. D elektromagnetische Umgebung. E ambiente electromagnético. I ambiente elettromagnetico. N elektromagnetische omgeving. P środowisko elektromagnetyczne. S elektromagnetisk miljö. (161,702)
2. **environment resistant connector** : → *connector 23*
3. **luminous environment** : lighting considered in relation to its physiological and psychological effects. ★ ambiance lumineuse → *ambiance 1.* R световая обстановка. D ..... E ..... I ambiente luminoso. N lichtklimaat. P otoczenie świetlne. S ljusmiljö. (845)
4. **radio environment** : 1. The electromagnetic environment in the radio frequency range. 2. The totality of electromagnetic fields created at a given location by operating radio transmitters. ★ environnement radioélectrique → *environnement 4.* R радиообстановка. D Funkumwelt. E ambiente radioeléctrico. I ambiente radioelettrico. N radiostralingsomgeving. P środowisko radioelektryczne. S radiomiljö. (161)

environmental

1. **environmental conditions** : → *condition 6*
2. **environmental monitoring** : → *monitoring 4*

epicadmium

1. **epicadmium neutrons** : → *neutron 5*

epilation

1. **epilation dose** : → *dose 27*

epitaxy

1. **epitaxy** : the deposition of a layer of semiconductor material onto a substrate, this layer having the same crystal orientation as the substrate. ★ épitaxie → *épitaxie 1.* R эпитаксия. D Epitaxie. E epitaxis. I tecnica epitassiale. N epitaxie. P epitaksja. S epitaxi. (521)

epithermal

1. **epithermal neutrons** : → *neutron 6*
2. **epithermal reactor** : → *reactor 12*

E-plane

1. **E-plane bend** : → *bend 2*
2. **E-plane corner** : → *corner 5*
3. **E-plane T junction** : → *junction 7*
4. **E-plane Y junction** : → *junction 8*

Epstein

1. **Epstein square** : → *square 2*
2. **Epstein test frame** (*Syn.* Epstein square) : → *square 2*

equal

1. **equal energy spectrum** (*Syn.* equi-energy spectrum) : → *spectrum 13*
2. **equal length code** : → *code 28*

equality

1. **equality of brightness photometer** : → *photometer 1*
2. **equality of contrast photometer** : → *photometer 2*

equalization

1. **attenuation equalization** : an action intended to compensate for amplitude/frequency distortion over the useful frequency band. ★ correction amplitude-fréquence → *correction 3.* R выравнивание затухания. D Dämpfungsausgleich; Dämpfungsentzerrung. E corrección amplitud/frecuencia; ecualización de atenuación. I correzione ampiezza/frequenza; equalizzazione di attenuazione. N dempingsvereffening; dempingsegalisatie. P korekcja tłumieniowa. S dämpningsutjämning. (702)
2. **diameter equalization** : the process of increasing the recording level of high frequencies in order to compensate for reproducing losses which occur towards the centre of the disk. ★ correction de diamètre → *correction 8.* R коррекция на диаметр. D Radius-Kompensation. E corrección de diámetro. I compensazione di diametro. N middellijncorrectie. P korekcja promieniowa. S diameterkorrektion. (806)
3. **equalization** (in analogue transmission) : a process of compensation for the deviation of the transfer function of a transmission channel or a two-port device from its ideal form with a view to reducing linear distortion of the transmitted signal. ★ correction linéaire → *correction 25.* R выравнивание (в аналоговой передаче). D Linearentzerrung; lineare Entzerrung (bei Analogübertragung). E corrección lineal; ecualización (en transmisión analógica). I correzione lineare; equalizzazione (in trasmissione analogica). N vereffening; egalisatie. P korekcja zniekształcenia linearnego (w transmisji analogowej). S utjämning. (702)
4. **equalization** (in digital transmission) : an action for reducing intersymbol interference resulting from distortion of a digital signal in a transmission channel. ★ égalisation → *égalisation 3.* R выравнивание (в цифровой передаче). D Entzerrung (bei Digitalübertragung). E ecualización (en transmisión digital). I equalizzazione (in trasmissione numerica). N vereffening; egalisatie. P korekcja sygnału cyfrowego (w transmisji cyfrowej). S utjämning. (702)
5. **equalization** : modification of the amplitude/frequency response characteristics of a recording or reproducing system with the purpose of compensating for deficiencies within the system. ★ correction d'un système d'enregistrement ou de lecture → *correction 24.* R частотные предыскажения и коррекция. D Entzerrung. E ecualización. I correzione di un sistema di registrazione o di riproduzione. N correctie. P korekcja. S utjämning; korrektion. (806)
6. **group delay equalization** : an action intended to compensate for group delay/frequency distortion over the useful frequency band. ★ correction de temps (de propagation) de groupe → *correction 14.* R выравнивание группового времени запаздывания. D Gruppenlaufzeitausgleich; Gruppenlaufzeitentzerrung. E corrección de tiempo (de propagación) de grupo; ecualización de tiempo (de propagación) de grupo. I correzione di tempo (di propagazione) di gruppo.

N groepvertragingsvereffening; groepvertragingsegalisatie. P korekcja opóźnienia grupowego. S löptidsutjämning. (702)

7. **phase equalization** : an action intended to compensate for phase/frequency distortion over the useful frequency band. ★ correction de phase → *correction 12.* R выравнивание фазы. D Phasenausgleich; Phasenentzerrung. E corrección de fase; ecualización de fase. I correzione di fase; equalizzazione di fase. N fasevereffening; fase-egalisatie. P korekcja fazowa. S fasutjämning. (702)

equalizer

1. **equalizer** (*Syn.* compensating element) : element connected in the forward path or in an auxiliary feedback path of a feedback control system and whose transfer function is such that the overall performances of the feedback control system are improved. *Note.* — Equalizers can be a lead network, a lag network, a lead-lag network, etc. ★ correcteur → *correcteur 3.* R компенсатор; компенсирующий элемент. D Kompensationsglied. E ecualizador; corrector. I compensatore. N compenserend element. P człon korekcyjny; korektor. S kompenseringslänk. (351)
2. **equalizer** : a connection made between points on a winding to minimize any undesirable potential difference between these points. ★ connexion équipotentielle → *connexion 22.* R уравнительное соединение. D Ausgleichsverbinder. E conexión equipotencial. I connessione equipotenziale. N evenwichtsverbinding; equipotentiaalverbinding. P połączenie wyrównawcze. S utjämningsförbindning. (411)
3. **equalizer** : a device used for equalization. *Examples* of equalizers : attenuation/frequency equalizer ; phase/frequency equalizer ; group delay equalizer. ★ égaliseur → *égaliseur 1.* R выравниватель. D Entzerrer. E ecualizador. I equalizzatore. N vereffenaar; egalisator. P korektor (zniekształceń linearnych). S utjämnare. (702)

equalizing

1. **equalising pulses** : → *pulse 11*
2. **equalizing charge** : → *charge 31*

equal-loudness

1. **equal-loudness contour** : → *contour 4*

equally

1. **equally tempered scale** : → *scale 2*

equation

1. **colour equation** : algebraic or vector representation of the match of two colour stimuli, of which, for instance, one may be an additive mixture of three reference colour stimuli. *Example :*

$$C[\mathrm{C}] \equiv X[\mathrm{X}] + Y[\mathrm{Y}] + Z[\mathrm{Z}]$$

Note. — The sign ≡ indicates a colour match and is read as "matches" ; the unbracketed symbols represent the amounts of the stimuli indicated by the bracketed symbols : thus C[C] means C units of stimulus [C] ; and the sign + means an additive mixture of colour stimuli. In such an equation, a minus sign means that the stimulus is added to those on the other side of the equation when the colour match is made. ★ équation chromatique → *équation 4.* R цветовое уравнение. D Farbabgleichung. E ecuación de color. I equazione colorimetrica. N kleurvergelijking. P równanie barwy. S färgekvation. (845)

2. **critical equation** : any equation relating parameters of an assembly which must be satisfied for the assembly to be critical. ★ équation critique → *équation 5.* D kritische Gleichung. E ecuación crítica. I equazione critica. N kriticiteitsvergelijking. P równanie krytyczne. S kritisk ekvation. (026)
3. **Maxwell's equations** : a set of partial differential equations between the four quantities $\vec{E}$, $\vec{D}$, $\vec{H}$, $\vec{B}$ representing together the electromagnetic field in a medium, and the two quantities $\vec{J}$ and ρ representing respectively the current density vector and the volume density of electric charges which may exist in certain parts of the medium. *Notes. 1* — In the International System of units (SI), Maxwell's equations are :

$$\mathrm{rot}\ \vec{E} = -\frac{\partial \vec{B}}{\partial t} \qquad \mathrm{div}\ \vec{D} = \rho$$

$$\mathrm{rot}\ \vec{H} = \vec{J} + \frac{\partial \vec{D}}{\partial t} \qquad \mathrm{div}\ \vec{B} = 0$$

2 — Maxwell's equations define entirely the electromagnetic field in a given medium only in association with the constitutive relations of the medium ; in the case of a linear medium, these relations are expressed in terms of the permittivity, permeability, and conductivity of the medium. ★ équations de Maxwell → *équation 6.* D Maxwellsche Gleichungen. P równania Maxwella. (705)

4. **measure equation** (*Syn.* numerical value equation) : → *equation 5*
5. **numerical value equation** (*Syn.* measure equation) : an equation in which letter symbols represent numbers, the numerical values corresponding to the chosen units. ★ équation aux valeurs numériques → *équation 3.* R уравнение численных значений. D Zahlenwertgleichung. E ecuación de valores numéricos. I equazione tra valori numerici. N getalwaardenvergelijking. P równanie wartości liczbowych. S mätetalsekvation. (111)
6. **quantity equation** : an equation in which letter symbols represent physical quantities. ★ équation aux grandeurs → *équation 1.* R уравнение величин. D Größengleichung. E ecuación de magnitudes. I equazione tra grandezze. N groothedenvergelijking. P równanie wielkościowe. S storhetsekvation. (111)
7. **unit equation** : an equation in which letter symbols represent units. ★ équation aux unités → *équation 2.* R уравнение единиц. D Einheitengleichung. E ecuación de unidades. I equazione tra unità. N eenhedenvergelijking. P równanie jednostek (miar). S måttenhetsekvation. (111)

equatorial

1. **equatorial orbit** : → *orbit 4*

equi-amplitude

1. **equi-amplitude surface** : → *surface 6*

equiangular

1. **equiangular spiral antenna** : → *antenna 47*

equi-energy

1. **equi-energy spectrum** : → *spectrum 13*

equilibrium

1. **charged particle equilibrium** : the condition existing at a point within a medium under irradiation, when, for every charged particle leaving a volume element surrounding the point, another charged particle of the same kind and energy enters. ★ équilibre de particules chargées → *équilibre 3.* R равновесие заряженной частицы. D Ladungsträgergleichgewicht. E equilibrio de partículas cargadas. I equilibrio di particelle cariche. N evenwicht voor geladen deeltjes. P równowaga cząstek naładowanych. S jämvikt för laddade partiklar. (391,881)
2. **equilibrium (electrode) potential** : → *electrode 60*
3. **equilibrium length** : → *length 13*
4. **equilibrium mode distribution** : → *distribution 25*
5. **equilibrium mode distribution length** (*Syn.* equilibrium length) : → *length 13*
6. **equilibrium radiation pattern** : → *pattern 6*
7. **photon equilibrium** : the condition existing at a point within a medium under irradiation when, for every photon leaving a volume element surrounding the point, another charged particle (photon) of the same kind and energy enters. ★ équilibre de photons → *équilibre 4.* R равновесие фотонов. D Photonengleichgewicht. E equilibrio de partículas cargadas; equilibrio de fotones. I equilibrio elettronico. N evenwicht van fotonen. P równowaga fotonów naładowanych. S jämvikt för fotoner. (881)
8. **radioactive equilibrium** : in a radioactive series for which the radioactive half-life of the precursor is longer than that of any other member of the series, the state which prevails when the ratios between the activities of successive members of the series remain constant. ★ équilibre radioactif → *équilibre 6.* R радиоактивное равновесие. D radioaktives Gleichgewicht. E equilibrio radiactivo. I equilibrio radioattivo. N radioactief evenwicht. P równowaga radioaktywna. S radioaktiv jämvikt. (881)
9. **secular equilibrium** : in a radiactive serie for which the radioactive half-life of the precursor is very much longer than that of any other member of the series the state that prevails when the activities of all members of the series are equal.

★ équilibre (radioactif) séculaire → *équilibre 7.* R вековое равновесие. D säkulares Gleichgewicht. E equilibrio radiactivo secular. I equilibrio secolare. N permanent evenwicht. P równowaga wiekowa (promieniotwórcza). S sekulär jämvikt. (881)

10. **thermal equilibrium** : the state reached when the observed temperature-rises of the several parts of the machine do not vary any longer. *Note.* — In practice, equilibrium is assumed to be reached when the temperature does not vary over a period of one hour by more than a specified amount, e.g. 2 °C. ★ équilibre thermique → *équilibre 8.* R тепловое равновесие. D thermischer Beharrungszustand. E equilibrio térmico. I equilibrio termico. N thermisch evenwicht. P równowaga cieplna. S termisk jämvikt. (411)

equiphase

1. **equiphase surface** : → *surface 7*

equipment

1. **... protection equipment** : a group incorporating one or more protection relays and/or logic elements designated to perform a specified protection function. *Note.* — This function is defined by the prefix represented by the dotted line. *Examples :* Distance protection equipment, phase comparison protection equipment. ★ dispositif de protection ... → *dispositif de protection 3.* R устройство... защиты. D ...schutzeinrichtung. E dispositivo de protección. I dispositivo di protezione. N ... beveiligingsapparatuur. P urządzenia zabezpieczające ; zespól przekaźnikowy. S ... skyddsutrustning ; skyddsutrustning för .... (448)
2. **automatic control equipment for...** : a group incorporating one or more relays and/or logic elements designed to perform a specified function of automation. *Note.* — This function is defined by a suffix represented by the dotted line. *Example :* Automatic control equipment for reclosing. ★ dispositif automatique de ... → *dispositif 17.* R автоматическое устройство.... D ... automatik (einrichtung). E dispositivo automático de .... I dispositivo automatico di .... N automatische apparatuur voor .... P urządzenie do samoczynnego sterowania. S automatisk styrutrustning för .... (448)
3. **automatic load regulation equipment** : equipment controlling the operation of the internal combustion engine and main generator or alternator of a thermo-electric vehicle so that for a given setting of the driving controller, the power supplied by the engine remains approximately constant over a range of train loads, speeds and gradients. ★ régulation automatique de puissance (thermique) → *régulation 15.* R автоматическое регулирование нагрузки оборудования. D automatische Lastregelung. E regulación automática de potencia (térmica). I regolazione automatica della potenza. N automatische belastingregelapparatuur. P regulacja mocy automatyczna. S automatisk belastningsregulator. (811)
4. **automatic load-shedding control equipment** : automatic control equipment intended to decrease the system load in the case of an abnormal condition such as a frequency reduction. ★ dispositif automatique de délestage → *dispositif 18.* R автоматическое устройство по ограничению мощности. D Lastabwurfautomatik (einrichtung). E dispositivo automático de desenganche. I dispositivo automatico di alleggerimento del carico. N automatische belastingsafschakelingsapparatuur. P samoczynne częstotliwościowe odciążenie. S automatisk styrutrustning för belastningsbortkoppling. (448)
5. **automatic loss-of-synchronism control equipment** : automatic control equipment intented to stop a loss of synchronism at its beginning in order to avoid spreading. ★ dispositif automatique contre les ruptures de synchronisme. → *dispositif 16.* R автоматическое устройство защиты от потери синхронизма. D Automatikeinrichtung gegen Außertrittfall. E dispositivo automático contra las pérdidas de sincronismo. I dispositivo automatico contro la rottura di sincronismo. N automatische apparatuur tegen verlies van synchronisme. P samoczynne urządzenie od utraty synchronizmu. S automatisk styrutrustning mot urfasfall. (448)
6. **automatic loss-of-voltage tripping equipment** : automatic control equipment intended to open a circuit-breaker in the case of system loss-of-voltage, in order to control the system restoration. ★ dispositif automatique à manque de tension → *dispositif 15.* R устройство автоматического отключения при потере напряжения. D Abschaltautomatik bei Spannungsausfall. E dispositivo automático de falta de tensión. I dispositivo automatico a mancanza di tensione. N automatische nulspanningsapparatuur. P samoczynne urządzenia wyłączające od zaniku napięcia. S utrustning för automatisk nollspänningsutlösning. (448)
7. **automatic monitoring equipment** : automatic equipment which detects certain signal transmission faults, such as a programme break, abnormal levels, etc, and notifies an operator. ★ signaleur → *signaleur 1.* R автоматическое контрольное устройство. (723)
8. **automatic reclosing control equipment** : automatic control equipment which is designed to initiate the reclosing of a circuit-breaker after tripping due to a protection system operation. ★ dispositif automatique de réenclenchement → *dispositif 20.* R автоматическое устройство повторного включения. D Kurzunterbrechungs-einrichtung Wiedereinschaltautomatik. E dispositivo automático de reenganche; reenganchador. I dispositivo automatico di richiusura. N apparatuur voor automatische wederinschakeling. P smoczynne ponowne załączenie (SPZ). S automatisk återinkopplingsutrustning. (448)
9. **automatic switching control equipment** : automatic control equipment which is designed to initiate the operation of circuit-breakers and/or disconnectors in a substation according to a specific programme. ★ dispositif automatique de manœuvre → *dispositif 19.* R автоматическое устройство управления. D Schaltautomatik (einrichtung). E dispositivo automa'tico de maniobra. I dispositivo automatico di manovra. N automatische schakelbedieningsapparatuur. P urządzenia do samoczynnego łączenia. S automatisk styrutrustning för elkopplare. (448)
10. **automatic traction control equipment** : an equipment in which starting and, if required, other functions of the equipment are or can be automatically regulated. ★ équipement automatique de traction → *équipement 7.* R оборудование автоматического управления тягой. D automatische Fahrzeug-Steuerungseinrichtung. E equipo automático de tracción. I equipaggiamento (di trazione) a comando automatico. N automatische treinbesturingsapparatuur. P zestaw (pojazdowy) sterowania samoczynnego trakcją. S automatisk manövrerad drivutrustning. (811)
11. **auxiliary equipment** : a set of components fitted to a vehicle for lighting, heating, air-compressing, ventilation, signalling, operating of doors, etc. ★ équipement des auxiliaires → *équipement 28.* R вспомогательное оборудование. D Hilfseinrichtungen. E equipamiento de servicios auxiliares. I (servizi) ausiliari. N hulpapparatuur. P wyposażenie elektryczne nietrakcyjne. S hjälputrustning. (811)
12. **channel translating equipment** (*Syn.* channel bank (USA)) : equipment used for the frequency translation of a specified number of voice-frequency channels and their assembly into a specified frequency band, normally 12 voice-frequency channels into a basic group, and for performing the complementary process. ★ multiplexeur de voies → *multiplexeur 10.* R аппаратура индивидуального преобразования. D Kanalumsetzereinrichtungen. E multiplexor de vías; equipo de transposición de vías; equipo de modulación de vías. I equipaggiamento modem di canale. N draaggolfapparatuur. P urządzenie modulujące grupy pierwotnej. S kanalmultiplexor. (704)
13. **compound catenary equipment** : an overhead contact line with one or two contact wires suspended from an auxiliary catenary which is suspended from the main catenary. ★ suspension caténaire composée → *suspension 18.* R сложная цепная подвеска. D Verbundoberleitung. E suspensión catenaria compuesta. I catenaria composta. N contactleiding met hulpdraagkabel. P sieć łańcuchowa złożona. S ..... (811)
14. **computer graphics equipment** : equipment for generating electronic pictures. ★ synthétiseur d'images → *synthétiseur 5.* R аппаратура компьютерной графики. (723)
15. **contactor equipment** : traction equipment in which the changes in the power circuit connections are effected by means of contactors. ★ équipement à contacteurs → *équipement 4.* R контакторное оборудование. D Schaltausrüstung. E equipo de contactores. I equipaggiamento a contattori. N schakelapparatuur. P zestaw sterowania stycznikowego. S kontaktorutrustning. (811)
16. **control equipment** : items used in the control circuit : control switchgroup or master controllers, switches and push-buttons, disconnectors, motor-driven controllers, interlocks, control

relays, electro-pneumatic valves, etc. ★ organe de commande → *organe de commande 4.* R аппаратура управления. D Steuerausrüstung. E órgano de control. I organo di comando. N regelapparatuur. P aparatura sterownicza. S utrustning för manöversystem. (811)

17. **controlling equipment** (*Syn.* controlling system) : → *system 40*

18. **current-using equipment** : equipment intended to convert electrical energy into another form of energy, for example light, heat, motive power. ★ matériel d'utilisation → *matériel 5.* R электроприемник. D elektrische Verbrauchsmittel. E material que utiliza la corriente eléctrica. I apparecchio utilizzatore. N stroomverbruikend materieel. P odbiornik energii elektrycznej. S strömförbrukande elmateriel. (826)

19. **data circuit terminating equipment** (*Syn.* DCE (abbreviation)) : functional unit, between a data terminal equipment and the line, that establishes, maintains and releases a connection and provides those functions necessary for any code conversion or signal conversion. ★ terminaison (de circuit de données) → *terminaison 4.* R аппаратура окончания канала данных; АКД (сокращение). D Datenübertragungseinrichtung; DÜE. E terminación (de circuito de datos); equipo de terminación de circuito de datos. I terminazione di rete; DCE. N ..... P urządzenie zakończenia łącza teledacyjnego. S dataledningsterminal. (721)

20. **data terminal equipment** (*Syn.* DTE (abbreviation)) : the functional unit of a data station that serves as a data source, a data sink or both and provides for the control of data transfer to be performed. ★ terminal (de données) → *terminal 13.* R оконечное оборудование данных; ООД (сокращение). D Datenendeinrichtung; DEE. E terminal (de datos); equipo terminal de tratamiento de datos. I terminale; DTE. N apparatuur voor een data-eindstation. P urządzenie końcowe teledacyjne. S dataterminal. (721)

21. **dead time (for automatic reclosing equipment)** : → *time 41*

22. **digital multiplex equipment** : the combination of a digital multiplexer and a digital demultiplexer at the same location but working in opposite directions. *Notes. 1* — The multiplexer and demultiplexer may or may not be combined into a single equipment. *2* — A digital multiplex equipment may be qualified by the digit rate or the multiplex order of the composite digital signal it handles. ★ équipement de multiplexage numérique → *équipement 16.* R аппаратура цифрового группообразования. D digitale Multiplexeinrichtung. E equipo de multiplexado numérico. I equipaggiamento di multiplazione numerica. N digitaalmultiplexapparatuur. P urządzenie krotnicy cyfrowej. S digital multiplexutrustning. (704)

23. **direct resistance heating equipment** : → *heating 11*

24. **directly controlled equipment** : traction equipment in which changes in the power circuit connections are effected directly by means of a manually-operated controller. ★ équipement à contrôleur → *équipement 6.* R оборудование непосредственного управления. D Direktsteuerung (Fahrschaltersteuerung). E equipo de controlador. I equipaggiamento (di trazione) a comando diretto. N handbesturingsapparatuur. P zestaw sterowania bezpośredniego. S direktmanövrerad utrustning. (811)

25. **document facsimile equipment, Group 1** : document facsimile equipment which uses double sideband modulation without any signal bandwidth compression and which is suitable for the transmission of a page of ISO A4 size in about six minutes at nominally four lines per millimeter via a telephone-type circuit. *Note.* — Equipment in group 1 may be designed to operate at a lower definition than four lines per millimeter for the transmission of a page of ISO A4 size in a time between three and six minutes. ★ télécopieur, Groupe 1 → *télécopieur 1.* R (документальный) факсимильный аппарат группы 1. D Fernkopierer Gruppe 1. E facsímil grupo 1; aparato de telecopia controlada, grupo 1. I terminale facsimile del gruppo 1. N beeldoverdrachtapparatuur groep 1. P symilograf, grupa 1. S faxutrustning av grupp 1. (721)

26. **document facsimile equipment, Group 2** : document facsimile equipment which uses signal bandwidth compression for transmission of a page of ISO A4 size in about three minutes at nominally four lines per millimeter via a telephone-type circuit. *Note.* — Signal bandwidth compression in this context may be achieved by encoding and vestigial side band modulation. ★ télécopieur, Groupe 2 → *télécopieur 2.* R (документальный) факсимильный аппарат группы 2. D Fernkopierer Gruppe 2. E facsímil grupo 2; aparato de telecopia controlada, grupo 2. I terminale facsimile del gruppo 2. N beeldoverdrachtapparatuur groep 2. P symilograf, grupa 2. S faxutrustning av grupp 2. (721)

27. **document facsimile equipment, Group 3** : document facsimile equipment in which the redundancies of the picture facsimile signals are reduced before modulation so as to obtain a transmission time of about one minute, at 4800 bauds, for a typical typescript page of ISO A4 size via a telephone-type circuit. *Note.* — The document facsimile equipment, group 3 may use signal bandwidth compression. ★ télécopieur, Groupe 3 → *télécopieur 3.* R (документальный) факсимильный аппарат группы 3. D Fernkopierer Gruppe 3. E facsímil grupo 3; aparato de telecopia controlada, grupo 3. I terminale facsimile del gruppo 3. N beeldoverdrachtapparatuur groep 3. P symilograf, grupa 3. S faxutrustning av grupp 3. (721)

28. **double catenary equipment** : an overhead contact line in which the contact wires are suspended from two catenaries having the same sag and placed at the same height above the running rails. ★ suspension caténaire double → *suspension 19.* R двойная цепная подвеска. D Doppeloberleitung. E suspensión catenaria doble. I catenaria a doppia corda. N contactleiding, bestaande uit twee draagkabels en rijdraad; kettinglijn. P sieć łańcuchowa podwójna. S kontaktledning med två bärlinor. (811)

29. **double tramway equipment** : an overhead contact line consisting of two contact wires close to one another and at the same potential. ★ ligne de contact double → *ligne 84.* R двойной контактный провод. D Einfachfahrleitung mit Doppelfahrdraht. E línea de contacto doble. I linea di contatto doppia. N contactleiding, bestaande uit twee rijdraden. P sieć dwuprzewodowa. S dubbelledning. (811)

30. **electrical equipment** : any item used for such purposes as generation, conversion, transmission, distribution or utilization of electrical energy, such as machines, transformers, apparatus, measuring instruments, protective devices, wiring material, appliances. ★ matériel électrique → *matériel 6.* R электрооборудование. D elektrische Betriebsmittel. E material eléctrico. I componente (elettrico) dell'impianto. N elektrisch materieel. P wyposażenie elektryczne. S elektrisk materiel; elmateriel. (826)

31. **electro-heat equipment** : an appliance or assembly of technological devices for converting electrical energy into thermal energy. ★ équipement d'électrothermie → *équipement 27.* R электротермическое оборудование. D Elektrowärmeeinrichtung. E equipo electrotérmico. I apparecchiatura elettrotermica. N elektrowarmte-apparatuur. P urządzenie elektrotermiczne. S elvärmeutrustning. (841)

32. **equipment failure information** : → *information 4*

33. **failure to operate (of protection equipment)** : → *failure 25*

34. **fixed equipment** (*Syn.* fixed termination conductor) : → *conductor 36*

35. **fixed equipment** : equipment fastened to a support or otherwise secured in a specific location. ★ matériel installé à poste fixe → *matériel 12.* R неподвижно установленное оборудование. D festangebrachte Betriebsmittel. E material instalado en un sitio fijo. I apparecchio a installazione fissa. N vast bevestigd materieel. P urządzenie zainstalowane na stałe. S fast monterad elmateriel. (826)

36. **group modulating equipment** : equipment used for the frequency translation of one basic group into a specified frequency band, for example into the band 12-60 kHz, and for performing the complementary process. ★ équipement spécial de transposition de groupe primaire → *équipement 31.* R аппаратура преобразования первичных групп. D Gruppenmodulationseinrichtung. E equipo especial de transposición de grupo primario; equipo de modulación de grupo (primario). I equipaggiamento di traslazione di gruppo primario. N groepmodulatieapparatuur. P przemiennik grupy pierwotnej; modulator grupy pierwotnej. S ..... (704)

37. **group translating equipment** (*Syn.* group bank (USA)) : equipment used for the frequency translation of a specified number of basic groups and their assembly into a specified frequency band, normally 5 basic groups into a basic supergroup, and for performing the complementary process. ★ multiplexeur de groupes primaires → *multiplexeur 5.* R аппаратура первичного группового преобразования. D Gruppenumsetzereinrichtungen. E multiplexor de grupos primarios; equipo de transposición de grupos primarios; equipo

de modulación de grupos primarios. I equipaggiamento modem di gruppo primario. N secundaire-draaggolfapparatuur. P urządzenie modulujące grupy wtórnej. S gruppmultiplexor. (704)

38. **hand-held equipment** : portable equipment intended to be held in the hand during normal use, in which the motor, if any, forms an integral part of the equipment. ★ matériel portatif → *matériel 14.* R переносное оборудование. D Handgeräte. E material portátil manualmente. I apparecchio portatile (a mano). N handgereedschap. P urządzenie przenośne (ręczne). S handhållen elmateriel. (826)

39. **hazardous location equipment** (*Syn.* electrical apparatus for explosive atmospheres) : → *apparatus 6*

40. **highest voltage for equipment** : → *high-voltage 9*

41. **highest voltage for equipment** U_m : → *high-voltage 10*

42. **hypergroup modulating equipment** (*Syn.* 15-supergroup assembly modulating equipment) : → *equipment 86*

43. **hypergroup translating equipment** (*Syn.* 15-supergroup assembly translating equipment) : → *equipment 87*

44. **individual contactor equipment** (*Syn.* unit switch equipment) : a contactor equipment consisting solely of independently controlled contactors. ★ équipement à contacteurs individuels → *équipement 5.* R оборудование с индивидуально управляемыми контакторами. D Einzelschützsteuerung. E equipo de contactores individuales. I equipaggiamento a contattori singoli. N separaat bediende schakelaars. P zestaw sterowania indywidualnego. S individuellt manövrerade kontaktorer. (811)

45. **information technology equipment** (*Syn.* ITE (abbreviation)) : equipment designed for the purpose of : a) receiving data from an external source (such as a data input line or via a keyboard) ; b) performing some processing functions on the received data (such as computation, data transformation or recording, filing, sorting, storage, transfer of data) ; c) providing a data output (either to other equipment or by the reproduction of data or images). *Note.* — This definition includes electrical or electronic units or systems which predominantly generate a multiplicity of periodic binary pulsed electrical or electronic waveforms and are designed to perform data processing functions such as word processing, electronic computation, data transformation, recording, filing, sorting, storage, retrieval and transfer, and reproduction of data as images. ★ appareil de traitement de l'information → *appareil 36.* R информационное технологическое оборудование. D Einrichtungen der Informationstechnik; ITE (Abkürzung). E aparato de tratamiento de la información; ATI (abreviatura). I apparati per il trattamento dell'informazione. N informatietechnologie-apparatuur. P urządzenie informatyczne. S utrustning för informationsbehandling. (161)

46. **insulation of equipment** : → *insulation 30*

47. **mastergroup modulating equipment** : equipment used for the frequency translation of one basic mastergroup into a specified frequency band, for example into the band 2 796-4 028 kHz, and for performing the complementary process. ★ équipement spécial de transposition de groupe tertiaire → *équipement 33.* R аппаратура преобразования третичных групп. D Tertiärgruppenmodulationseinrichtungen. E equipo esencial de transposición de grupo terciario. I equipaggiamento di traslazione di gruppo terziario. N hoofdgroepverschuivingsapparatuur. P przemiennik grupy trójnej. S ..... (704)

48. **mastergroup translating equipment** : equipment used for the frequency translation of a specified number of basic mastergroups and their assembly into a specified frequency band, normally 3 basic mastergroups into a basic supermastergroup, and for performing the complementary process. ★ multiplexeur de groupes tertiaires → *multiplexeur 8.* R аппаратура третичного группового преобразования; аппаратура третичного группового преобразования. D Tertiärgruppenumsetzeinrichtungen. E multiplexor de grupos terciarios; equipo de transposición de grupos terciarios; equipo de modulación de grupos terciarios. I equipaggiamento modem di gruppo terziario. N hoofdgroepdraggolfapparatuur. P urządzenie modulujące grupy czwórnej. S 300-gruppmultiplexor. (704)

49. **measuring equipment** : an assembly of measuring instruments intended for specified measurement purposes. ★ équipement de mesurage → *équipement 13.* R измерительная установка. D Messeinrichtung. E equipo de medida; equipo de medición. I apparecchiatura di misura. N meetapparatuur. P aparatura pomiarowa. S mätutrustning. (301)

50. **mercury-arc rectifier (equipment)** : → *rectifier 2*

51. **microwave heating equipment** : comprises the electrical and mechanical parts to transfer energy to the material to be heated including in particular power supplies, emitters, applicators, interconnecting cables and wave guides, control circuitry, means for transporting the material and ventilation and cooling systems. ★ installation de chauffage par hyperfréquences → *installation 6.* R оборудование для нагрева токами сверхвысокой частоты. D Mikrowellen-Erwärmungseinrichtung. E instalación de calentamiento por microondas. I installazione di riscaldamento a microonde. N microgolfverwarmingstoestel. P urządzenie elektrotermiczne mikrofalowe. S utrustning för mikrovågsvärmning. (841)

52. **motor-driven camshaft equipment** : a contactor equipment worked by one or more camshafts driven by a position-controlled motor. ★ équipement à arbre à cames et servomoteur → *équipement 3.* R оборудование с кулачковым валом, приводимым в действие серводвигателем. D motorisch angetriebenes Schaltwerk. E equipo de árbol de levas servomotor. I equipaggiamento ad albero a camme a servomotore. N servo-bediende nokkenwals. P zestaw o silnikowym wale kułakowym. S kampådrag. (811)

53. **original equipment battery** : → *battery 54*

54. **outside broadcast equipment** : equipment for making television programmes which is transportable but less portable than equipment for electronic news gathering or electronic field production. ★ vidéo-mobile → *vidéo-mobile 1.* R передвижная телевизионная станция. (723)

55. **overlay equipment** : equipment which effects overlay. ★ incrustateur → *incrustateur 1.* R аппаратура накладки. (723)

56. **PCM multiplex equipment** : equipment for deriving a single digital signal at a defined digit rate from the signals in several voice-frequency channels by a combination of pulse code modulation and time-division multiplexing, and also for carrying out the complementary functions in the opposite direction of transmission. *Note.* — The single digital signal is normally that of a primary digital group. ★ équipement de multiplexage MIC → *équipement 15.* R аппаратура группообразования ИКМ. D PCM-Multiplex-Einrichtung. E equipo de multiplexado MIC. I equipaggiamento di multiplazione PCM; multiplex PCM. N PCM-multiplexapparatuur. P krotnica impulsowo-kodowa. S pulskodsmultiplexor. (704)

57. **polygonal equipment** : an overhead contact line arrangement which in curves forms a series of straight lines between adjacent supports, forming in plan a polygon, the droppers in each span all lying in the same vertical plane. ★ caténaire polygonale → *caténaire 4.* R вертикальная цепная подвеска. D polygonale Oberleitung. E catenaria poligonal. I catenaria poligonale. N polygonale bovenleiding. P sieć (jezdna) łańcuchowa wielokątowa. S ..... (811)

58. **portable equipment** : equipment which is moved while in operation or which can easily be moved from one place to another while connected to the supply. ★ matériel mobile → *matériel 13.* R передвижное оборудование. D ortsveränderliche Betriebsmittel. E material móvil. I apparecchio mobile. N verplaatsbaar materieel. P urządzenie ruchome (przemieszczalne). S flyttbar elmateriel. (826)

59. **progression of equipment** : → *progression 1*

60. **reel-to-reel recording/reproducing equipment** : a device wherein a magnetic tape wound on a separate supply spool is unwound during recording, reproduction or a fast forward movement and simultaneously wound on to a separate empty take-up spool. ★ système dit «bobine à bobine» → *système 106.* R катушечный лентопротяжный механизм. D Spulengerät für Aufnahme/Wiedergabegerät. E sistema «bobina a bobina». I sistema da bobina a bobina. N opneem/weergeefapparatuur met spoelen. P zapisywacz-odczytywacz szpulowy; urządzenie szpulowe do zapisywania i odczytywania. S spole till spole-apparat. (806)

61. **run-back of equipment** : → *run-back 1*

62. **S + D (equipment)** (*Syn.* speech + duplex (equipment)) : → *speech 10*

63. **S + S (equipment)** (*Syn.* speech + simplex (equipment)) : → *speech 11*

64. **scanning equipment** (in transmission) : equipment for scanning a picture in transmission. ★ (dispositif) analyseur → *analyseur 15.* R блок развертки (в телевидении). (723)

65. **scanning equipment** (in reception) : equipment for scanning a picture in the receiver. ★ (dispositif) synthétiseur → *synthétiseur 2.* R блок развертки (при приеме). (723)

66. **simple (catenary) equipment with single contact wire** : an overhead contact line consisting of a contact wire suspended directly from a catenary. ★ caténaire à un fil de contact → *caténaire 2.* R одинарная цепная подвеска с одним контактным проводом. D Kettenoberleitung mit einem Fahrdraht. E catenaria con un hilo de contacto. I catenaria semplice a un filo. N kettinglijn met een enkele rijdraad (contactleiding). P sieć łańcuchowa prosta jednoprzewodowa. S enkelledning med bärlina. (811)

67. **simple (catenary) equipment with twin contact wires** : an overhead contact line consisting of two contact wires suspended directly from a catenary. ★ caténaire à deux fils de contact → *caténaire 1.* R одинарная цепная подвеска с двумя контактными проводами. D Kettenoberleitung mit Doppelfahrdraht. E catenaria con dos hilos de contacto. I catenaria semplice a doppio filo. N kettinglijn met dubbele rijdraden. P sieć łańcuchowa prosta dwuprzewodowa. S dubbelledning med bärlina. (811)

68. **single phase automatic reclosing control equipment** (*Syn.* single pole automatic reclosing control equipment) : → *equipment 69*

69. **single pole automatic reclosing control equipment** (*Syn.* single phase automatic reclosing control equipment) : automatic reclosing equipment intended to reclose one pole of a circuit-breaker after a single phase system fault. ★ réenclencheur unipolaire → *réenclencheur 3.* R однополюсное устройство повторного включения; однофазное устройство повторного включения. D Einrichtung für 1-polige Kurzunterbrechung. E reenganchador unipolar ;; reenganchador monofasico (desaconsejado). I dispositivo automatico di richiusura unipolare. N apparatuur voor één polige automatische wederinschakeling. P jednobiegunowe samoczynne ponowne załączenie. S enpolig återinkopplingsutrustning. (448)

70. **single tramway-type equipment** (*Syn.* trolley wire) : an overhead contact line consisting of a single contact wire. ★ ligne de contact simple → *ligne 85.* R простая контактная подвеска с одним контактным проводом. D Einfachfahrleitung mit einem Fahrdraht. E línea de contacto simple. I linea di contatto semplice. N contactleiding, bestaande uit één rijdraad; stadsophanging. P sieć jednoprzewodowa. S enkelledning. (811)

71. **speech + duplex (equipment)** : → *speech 10*

72. **speech + simplex (equipment)** : → *speech 11*

73. **stationary equipment** : either fixed equipment or equipment not provided with a carrying handle and having such a mass that it cannot easily be moved. *Example :* The value of this mass is 18 kg in IEC standards relating to household appliances. ★ matériel fixe → *matériel 11.* R стационарное оборудование. D ortsfeste Betriebsmittel. E material fijo. I apparecchio fisso. N vast opgesteld materieel. P urządzenie nieprzenośne. S stationär elmateriel. (826)

74. **supergroup modulating equipment** : equipment used for the frequency translation of one basic supergroup into a specified frequency band, for example into the band 12-252 kHz, and for performing the complementary process. ★ équipement spécial de transposition de groupe secondaire → *équipement 32.* R аппаратура преобразования вторичных групп. D Sekundärgruppenmodulationseinrichtung. E equipo especial de transposición de grupo secundario; equipo de modulación de grupo secundario. I equipaggiamento di traslazione di gruppo secondario. N supergroepmodulatie-apparatuur. P przemiennik grupy wtórnej. S ..... (704)

75. **supergroup translating equipment** (*Syn.* supergroup bank (USA)) : equipment used for the frequency translation of a specified number of basic supergroups and their assembly into a specified frequency band, normally 5 or 10 basic supergroups into a basic mastergroup or 15 basic supergroups into a basic 15-supergroup assembly, and for performing the complementary process. ★ multiplexeur de groupes secondaires → *multiplexeur 7.* R аппаратура вторичного группового преобразования. D Sekundärgruppenumsetzeinrichtung. E multiplexor de grupos secundarios; equipo de transposición de grupos secundarios; equipo de modulación de grupos secundarios. I equipaggiamento modem di gruppo secondario. N supergroepdraaggolfapparatuur. P urządzenie modulujące grupy trójnej. S sextiogruppmultiplexor. (704)

76. **supermastergroup translating equipment** : equipment used for the frequency translation of a specified number of basic supermastergroups and their assembly into a specified frequency band, and for performing the complementary process. ★ multiplexeur de groupes quaternaires → *multiplexeur 6.* R аппаратура четверичного группового преобразования. D Quartärgruppenumsetzereinrichtungen. E multiplexor de grupos cuaternarios; equipo de transposición de grupos cuaternarios; equipo de modulación de grupos cuaternarios. I equipaggiamento modem di gruppo quaternario. N superhoofdgroep-draaggolf-apparatuur. P przemiennik grupy czwórnej. S 900-gruppmultiplexor. (704)

77. **telemeasuring equipment** : an assembly of instruments intended to indicate or record the value of the measured quantity at a distance from the measuring point, using telecommunication techniques. ★ équipement de télémesure → *équipement 19.* R телеметрическая система. D Fernmesseinrichtung. E equipo de telemedida. I apparecchiatura per telemisura. N telemetrie-apparatuur. P urządzenie telemetryczne. S fjärrmätutrustning. (301)

78. **telerecording equipment for film** : equipment consisting of a television picture display and a cinematographic camera for the purpose of recording television programmes on film. ★ kinescope → *kinescope 1.* R оборудование записи на кинопленку. (723)

79. **telerecording equipment for magnetic tape** (*Syn.* video tape recorder) : → *tape recorder 6*

80. **tensioning equipment** (*Syn.* tensioning device; tensioner) : an arrangement enabling the mechanical tension of the conductors to be adjusted. ★ équipement tendeur → *équipement 35.* R натяжное устройство. D Spannvorrichtung; Nachspannvorrichtung. E tensor; equipo tensor. I tenditore. N naspaninrichting. P napręznik. S spänndon. (811)

81. **three phase automatic reclosing control equipment** (*Syn.* three pole automatic reclosing control equipment) : → *equipment 82*

82. **three pole automatic reclosing control equipment** (*Syn.* three phase automatic reclosing control equipment) : automatic reclosing equipment intended to reclose three poles of a circuit-breaker after a polyphase system fault. ★ réenclencheur tripolaire → *réenclencheur 2.* R трехполюсное устройство повторного включения; трехфазное устройство повторного включения. D Einrichtung für 3-polige Kurzunterbrechung. E reenganchador tripolar ;. I dispositivo automatico di richiusura tripolare. N apparatuur voor drie polige automatische wederinschakeling. P trójfazowe samoczynne ponowne załączenie. S trepolig återinkopplingsutrustning. (448)

83. **unit switch equipment** (*Syn.* individual contactor equipment) : → *equipment 44*

84. **unwanted operation (of a protection equipment)** : → *operation 74*

85. **welding equipment** (*Syn.* welding plant) : individual items used to make a weld. ★ matériel de soudage → *matériel 4.* R оборудование для сварки; сварочное оборудование. D Schweißeinrichtung. E equipo de soldadura. I saldatrice; impianto di saldatura. N lasuitrusting. P urządzenie spawalnicze. S svetsaggregat. (851)

86. **15-supergroup assembly modulating equipment** (*Syn.* hypergroup modulating equipment) : equipment used for the frequency translation of one basic 15-supergroup assembly into a specified frequency band for example, into the band 8 620-12 336 kHz which is inside the basic supermastergroup, and for performing the complementary process. ★ équipement spécial de transposition d'hypergroupes (de 15 groupes secondaires) → *équipement 34.* R аппаратура преобразования блока 15 вторичных групп; аппаратура преобразования пятеричных групп. D Hypergruppenmodulationseinrichtung; 15-Sekundärgruppenmodulationseinrichtung. E equipo especial de transposición de hipergrupo (de 15 grupos secundarios). I equipaggiamento di traslazione di gruppo pseudo-quaternario. N hypergroepmodulatie-apparatuur. P przemiennik zestawu 15 grup wtórnych. S ..... (704)

87. **15-supergroup assembly translating equipment** (*Syn.* hypergroup translating equipment) : equipment used for the frequency translation of a specified number of basic 15-supergroup assemblies and their assembly into a specified frequency band, and for performing the complementary process. ★ multiplexeur d'hypergroupes → *multiplexeur 11.* R аппаратура преобразования блока из 15 вторичных групп; аппаратура пятеричного группового преобразования. D Hypergruppenumsetzeinrichtung; 15-Sekundärgruppenumsetzereinrichtung. E multiplexor de hipergrupos; equipo de transposición de hipergrupos; equipo de modulación de hipergrupos. I equipaggiamento modem di gruppo pseudo-quaternario. N hypergroepdraaggolfapparatuur. P urządzenie modulujące zestawu 15 grup wtórnych. S ..... (704)

equipotential

1. **equipotential** : applies to a set of points all of which have the same potential. ★ équipotentiel → *équipotentiel 2.* R эквипотенциал. D Äquipotential. E equipotencial. I equipotenziale. N equipotentiaal. P ekwipotencjalny. S ekvipotentiell. (101)
2. **equipotential bonding** : → *bonding 1*
3. **equipotential bonding conductor** : → *conductor 34*

equivalent

1. **articulation reference equivalent** (*Syn.* AEN (abbreviation)) : the final difference in decibels, when the sound articulation levels have been reduced to 80 %, between the attenuation in the reference system for the determination of AEN and that in a given telephone system, during articulation tests made in a given direction alternately on each system within increasing values of line attenuation. *Note.* — The AEN method is described in the CCITT Recommendation P12 from the Volume V of the Yellow Book, 1981. ★ affaiblissement équivalent pour la netteté → *affaiblissement 34.* R эквивалент затухания по артикуляции; AEN. D AEN. E articulación de referencia equivalente; AEN (abreviación). I attenuazione equivalente per l'intelligibilità. N AEN. P tłumienność równoważna wyrazistości. S ekvivalent uppfattbarhetsdämpning. (722)
2. **attenuation equivalent** : a quantity indicating the attenuation effected by a layer of reference material which, if substituted in a beam of specified radiation quality and under specified geometrical conditions, would effect the same attenuation as the layer under consideration. *Note.* — Attenuation equivalent is expressed in terms of the thickness of the reference material, usually in millimetres. ★ équivalent d'atténuation → *équivalent 27.* R эквивалент по ослаблению. D Schwächungsäquivalent. E equivalente de atenuación. I attenuazione equivalente. N verzwakkingsequivalent. P równoważnik osłabienia. S dämpningsekvivalent. (881)
3. **(biologically) equivalent single dose** : → *dose 8*
4. **collective dose equivalent** (in a population) (S) : the quantity defined by the expression : $S = \Sigma_i H_i P_i$ where H_i is the per caput dose equivalent in the whole body or any specified organ or tissue of the P_i members of sub-group (i) of the exposed population. ★ équivalent de dose collective → *équivalent 30.* R коллективная эквивалентная доза (для населения). D Kollektivdosis (in einer Bevölkerungsgruppe). E dosis colectiva equivalente (en la poblacion). I equivalente di dose collettiva (in una popolazione). N verzamelde dosisequivalent (in een verzameling). P zbiorczy równoważnik dawki (dla populacji). S kollektivdos. (881)
5. **committed dose equivalent** (H_{50}) : the dose equivalent to an organ or tissue that will be accumulated over 50 years following the intake of radioactive material into the body.

$$H_{50} = \int_{t_0}^{t_0 + 50\,\mathrm{ans}} \dot{H}(t)\,\mathrm{d}\,t$$

where $\dot{H}(t)$ is the dose equivalent rate at time t, and t_0 is the time of intake. ★ équivalent de dose engagée → *équivalent 32.* R эквивалентная доза за 50 лет. D 50-Jahre-Folge-(äquivalent-)-dosis. E dosis equivalente comprometida. I equivalente di dose impegnata (H_{50}). N besmette dosisequivalent. P równoważnik dawki przekazanej. S dosinteckning. (881)
6. **corrected reference equivalent** (*Syn.* CRE (abbreviation)) : values of sending and receiving reference equivalent converted by a defined, non-linear, transformation into corresponding values that obey the laws of algebraic addition. *Note.* — The conversion is performed to avoid some of the difficulties experienced in applying reference equivalents. It is defined in the Annex C of the CCITT Recommendation G111 from the fascicle III.1 of the Blue Book, 1989. ★ équivalents de référence corrigés → *équivalent 44.* R скорректированный эквивалент затухания. D korrigierte Bezugsdämpfung. E equivalente de referencia corregido; ERC (abreviación). I equivalente di riferimento corretto. N gecorrigeerd referentie-equivalent. P tłumienność odniesienia skorygowana. S korrigerad referensekvivalent. (722)
7. **crosstalk reference equivalent** : the reference equivalent of the crosstalk path and calculated by adding the sending reference equivalent, the receiving reference equivalent and the crosstalk attenuation between the origin of the disturbing channel and the end of the disturbed channel. *Note.* — The sending reference equivalent refers to the part up to the origin of the disturbing channel and the receiving reference equivalent refers to the part from the end of the disturbed channel. ★ équivalent de référence pour la diaphonie → *équivalent 37.* R эквивалент затухания переходного влияния. D Nebensprechbezugsdämpfung. E equivalente de referencia para la diafonía. I equivalente di riferimento per la diafonia. N overspraakreferentie-equivalent. P tłumienność odniesienia (dla) przesłuchu. S överhörningsreferensdämpning. (722)
8. **dose equivalent** (H) : the product of D, Q and N at the point of interest in tissue, where D is the absorbed dose, Q is the quality factor and N is the p roduct of all other modifying factors. $H = DQN$. *Notes. 1* — The SI unit of dose equivalent is joule per kilogram and is given the special name sievert. The earlier special unit of dose equivalent, still in temporary use, was the rem. 1 Sv = 100 rem = 1 J . kg^{-1}. *2* — Dose equivalent is used only for radiation protection purposes and only for values of H up to the order of the applicable dose equivalent limit. ★ équivalent de dose → *équivalent 28.* R эквивалентная доза. D Äquivalentdosis. E dosis equivalente. I equivalente di dose. N dosisequivalent. P równoważnik dawki. S dosekvivalent. (881)
9. **dose equivalent index** : → *index 12*
10. **dose equivalent limit** : → *limit 5*
11. **dose equivalent rate** : → *rate 23*
12. **echo reference equivalent** : the reference equivalent of the path followed by an echo and calculated by adding the sending reference equivalent, the receiving reference equivalent and the loss of the path followed by that echo between the sending system and the receiving system. *Note.* — The loss of an echo path is usually frequency-dependent, and its contribution to the echo reference equivalent is determined by frequency weighting, described in the section B.5 of the annex B of the CCITT Recommendation G.122 from the fascicule III.1 of the Red Book, 1985. ★ équivalent de référence pour l'écho → *équivalent 38.* R эквивалент затухания эха. D Echobezugsdämpfung. E equivalente de referencia para el eco. I equivalente di riferimento per l'eco. N echoreferentie-equivalent. P tłumienność odniesienia (dla) echa. S ekoreferensdämpning. (722)
13. **effective dose equivalent** : the weighted sum of the dose equivalents to organs or tissues of the body when it is irradiated non-uniformly or partially. *Note.* — Weighting factors for body organs and tissues, representing the relative risks of stochastic effects, have been recommended by I.C.R.P. ★ équivalent de dose effectif → *équivalent 31.* R эффективная эквивалентная доза. D effektive Äquivalentdosis. E dosis efectiva equivalente; equivalente de dosis efectiva. I equivalente di dose efficace. N effectief dosisequivalent. P efektywny równoważnik dawki. S effektiv dosekvivalent. (881)
14. **equivalent absorption area of an object or of a surface** : → *area 19*
15. **equivalent binary content** : → *content 4*
16. **equivalent bit rate** : → *rate 30*
17. **equivalent circuit** : → *circuit 72*
18. **(equivalent) conductance** : → *conductance 3*
19. **equivalent constant voltage** : → *voltage 62*
20. **equivalent continuous rating** : → *rating 3*
21. **equivalent continuous sound level** (*Syn.* time-average sound level) : → *level 99*
22. **equivalent continuous sound pressure level** (*Syn.* time average sound pressure level) : → *average 18*
23. **equivalent contrast** : → *contrast 11*

24. **equivalent dark-current irradiation** : → *irradiation 3*
25. **equivalent electric circuit** : → *circuit 73*
26. **equivalent energy** : → *energy 47*
27. **equivalent flicker voltage fluctuation** : → *fluctuation 2*
28. **equivalent gradient** : → *gradient 1*
29. **equivalent isotropically radiated power** : → *power 57*
30. **equivalent line group** (*Syn.* PBX group) : → *group 48*
31. **equivalent luminance** : → *luminance 4*
32. **equivalent network** : → *network 24*
33. **equivalent noise irradiation** : → *irradiation 4*
34. **equivalent noise resistance** : → *resistance 19*
35. **equivalent noise voltage** : → *voltage 64*
36. **equivalent radius** : → *radius 4*
37. **equivalent random circuit group** : → *group 8*
38. **equivalent random traffic intensity** : → *intensity 6*
39. **(equivalent) resistance** : → *resistance 21*
40. **equivalent series resistance (of a capacitor)** : → *resistance 22*
41. **equivalent span** : → *span 3*
42. **equivalent (spot) noise temperature** : → *temperature 16*
43. **equivalent step index profile** : → *profile 3*
44. **equivalent veiling luminance** : → *luminance 5*
45. **equivalent wavelength** : → *wavelength 8*
46. **internal equivalent temperature** (*Syn.* virtual temperature) : → *temperature 67*
47. **lead equivalent** : the thickness of lead which, under specified conditions of irradiation, causes the same attenuation as the material under consideration. ★ épaisseur équivalente de plomb → *épaisseur 2.* R свинцовый эквивалент. D Bleiäquivalent. E espesor equivalente de plomo. I equivalente in piombo. N loodequivalent. P równoważnik ołowiowy. S ekvivalent blytjocklek; blyekvivalent. (881)
48. **(load weighted) equivalent interruption duration** : → *duration 23*
49. **mean (equivalent) noise temperature** : → *temperature 27*
50. **new fondamental system for the determination of reference equivalents** : → *system 124*
51. **noise equivalent input** : → *input 32*
52. **noise equivalent irradiance** : → *irradiance 4*
53. **noise equivalent power** : → *power 89*
54. **noise equivalent power** : → *power 90*
55. **objective reference equivalent meter** : → *meter 36*
56. **passive equivalent network** : → *network 65*
57. **primary system for the determination of reference equivalents** : → *system 156*
58. **receiving reference equivalent** : the reference equivalent of the complete connection constituted by the sending system of the new fundamental system for the determination of reference equivalents or NOSFER, an attenuator and a receiving system to be assessed minus the value of the attenuator. *Note.* — The receiving reference equivalent is strictly defined by the measuring method described in the CCITT Recommendation P72 from the Volume V of the Red Book, 1985. ★ équivalent de référence à la réception → *équivalent 34.* R эквивалент затухания приема. D Empfangsbezugsdämpfung; EBD. E equivalente de referencia de recepción. I equivalente di riferimento alla ricezione. N ontvangstreferentie-equivalent. P tłumienność odniesienia na odbiór. S mottagningsreferensdämpning. (722)
59. **reference equivalent** : the loss, expressed in decibels, constant at all frequencies transmitted, which has to be introduced into the new fundamental system for the détermination of reference equivalents or NOSFER in order to obtain in a given direction the same loudness as the complete telephone connection being considered, the acoustical speech power emitted by the talker being the same in both cases. *Notes. 1* — The reference equivalent is positive or negative according to whether it has been necessary for a loss to be added or removed from the NOSFER. *2* — The reference equivalent is strictly defined by the measuring method described in the CCITT Recommendations P42 and P72 from the Volume V of the Red Book, 1985. ★ équivalent de référence → *équivalent 33.* R эквивалент затухания. D Bezugsdämpfung. E equivalente de referencia. I equivalente di riferimento. N kwaliteitsverlies ten opzichte van NOSFER; referentie-equivalent. P tłumienność odniesienia. S referensdämpning. (722)
60. **relative equivalent** : the loss, expressed in decibels, which has to be introduced into a working standard in order to obtain in a given direction the same loudness as the telephone call being considered, the acoustical speech power emitted by the talker being the same in both cases. *Notes. 1* — The relative equivalent is positive or negative according to whether it has been necessary for a loss to be added or removed from that standard. *2* — The reference equivalent is approximately equal to the sum of the relative equivalent measured with respect to a working standard and of the reference equivalent of this working standard. *3* — The relative equivalent is strictly defined by the measuring method described in the CCITT Recommendation P72 from the Volume V of the Red Book, 1985. ★ équivalent relatif → *équivalent 41.* R относительный эквивалент затухания. D relative Bezugsdämpfung. E equivalente relativo. I equivalente relativo. N relatief equivalent. P tłumienność odniesienia względna. S relativ dämpning. (722)
61. **relative equivalent for receiving** : relative equivalent of the complete connection constituted by the sending system of a working standard, variable attenuators and the receiving system to be assessed. ★ équivalent relatif à la réception → *équivalent 42.* R относительный эквивалент затухания приема. D relative Empfangsbezugsdämpfung. E equivalente relativo de recepción. I equivalente relativo alla ricezione. N relatief ontvangstequivalent. P tłumienność odniesienia względna na odbiór. S relativ mottagningsdämpning. (722)
62. **relative equivalent for sending** : the relative equivalent of the complete connection constituted by a sending system to be assessed, variable attenuators and the receiving system of a working standard. ★ équivalent relatif à l'émission → *équivalent 43.* R относительный эквивалент затухания передачи. D relative Sendebezugsdämpfung. E equivalente relativo de emisión. I equivalente relativo all'emissione. N relatief zendequivalent. P tłumienność odniesienia względna na nadawanie. S relativ sändningsdämpning. (722)
63. **scavenger equivalent** (of askarel) : the amount of hydrochloric acid (HCl) which reacts chemically with the scavenger contained in a given sample of askarel to form a non volatile reaction product. ★ équivalent d'épurateur → *équivalent 39.* R раскислительный эквивалент (в аскарелях). D Scavenger-Äquivalent (eines Askarels). E equivalente de fijador de ácido clorhídrico (de askareles). I equivalente di stabilizzante (in un askarel). N zoutzuurequivalent (van askarel). P równoważnik oczyszczacza (askarelu). S ..... (212)
64. **sending reference equivalent** : the reference equivalent of the complete connection constituted by a sending system to be assessed, an attenuator, and the receiving system of the new fundamental system for the determination of reference equivalents or NOSFER minus the value of the attenuator. *Note.* — The sending reference equivalent is strictly defined by the measuring method described in the CCITT Recommendation P72 from the Volume V of the Red Book, 1985. ★ équivalent de référence à l'émission → *équivalent 35.* R эквивалент затухания передачи. D Sendebezugsdämpfung. E equivalente de referencia de emisión. I equivalente di riferimento all'emissione. N zendreferentie-equivalent. P tłumienność odniesienia na nadawanie. S sändningsreferensdämpning. (722)
65. **sidetone reference equivalent** : the reference equivalent of the sidetone path comprising the microphone and the telephone receiver of the telephone set whose line terminals are connected to a specified impedance and supplied with a specified value of feeding current. *Note.* — The reference equivalents for speech sidetone and ambient noise sidetone are strictly defined by the measuring methods described in the CCITT Recommendation P73 from the Volume V of the Red Book, 1985. ★ équivalent de référence de l'effet local → *équivalent 36.* R эквивалент затухания местного эффекта. D Rückhörbezugsdämpfung; RBD. E equivalente de referencia de efecto local. I equivalente di riferimento dell'effetto locale. N lokaal-effectreferentie-equivalent. P tłumienność odniesienia dogłosu. S sidtonsreferensdämpning. (722)
66. **tissue equivalent ionization chamber** : → *ionization chamber 21*
67. **tissue equivalent material** : → *material 40*
68. **virtual (equivalent) junction temperature** : → *temperature 66*

erasability

1. **erasability** : the ratio, expressed in decibels, of the maximum output level at a specified frequency, with reference bias applied, to the residual output level at that frequency, after erasure in a specified field at a specified temperature. ★ susceptibilité à l'effacement → *susceptibilité 1.* R стираемость. D Löschbarkeit. E susceptibilidad al borrado. I attenuazione di cancellazione rispetto al livello massimo. N wisbaarheid. P kasowalność. S raderbarhet. (806)

erasable

1. **erasable store** : → *store 4*

eraser

1. **bulk eraser** : a device for the erasure of the whole recording at the same time. ★ effaceur total → *effaceur 1.* R размагничивающее устройство. D Bandlöschgerät; Bandwickel-Löschgerät. E borrado total. I cancellatore totale. N bulkwisser. P kasownica. S totalraderare. (806)

erasing

1. **erasing** : reducing or cancelling, by a controlled operation, the amount of stored information. ★ effacement (en mémoire) → *effacement 4.* R стирание. D Löschen. E borrado. I cancellazione. N wissen. P kasowanie. S släckning. (531)
2. **erasing attenuation** : → *attenuation 18*
3. **erasing current** : → *current 79*
4. **erasing rate** : → *rate 31*
5. **erasing speed** : → *speed 15*
6. **magnetic erasing head** : → *head 14*
7. **minimum usable erasing time** : → *time 112*
8. **selective erasing** : the erasing of information stored on certain storage elements without affecting the information stored on neighbouring storage elements. ★ effacement sélectif → *effacement 5.* R селективное стирание. D selektives Löschen. E borrado selectivo. I cancellazione selettiva. N selectief wissen. P kasowanie selektywne. S selektiv släckning. (531)

erasure

1. **erasure** : a process by which a previous recording is removed from a magnetic medium. ★ effacement → *effacement 3.* R стирание. D Löschen; Löschung. E borrado. I cancellazione. N wissen. P kasowanie. S radering. (806)
2. **erasure signal** : → *signal 85*
3. **signal-to-erased signal ratio after bulk erasure** : → *ratio 89*

ergodic

1. **ergodic noise** : → *noise 20*

erlang

1. **erlang** (E) : a unit of traffic intensity corresponding to the occupancy of one resource. ★ erlang → *erlang 1.* D Erlang. P erlang. (715)

erroneous

1. **erroneous binary digit** : → *digit 15*
2. **erroneous block** : → *block 15*
3. **erroneous character** : → *character 14*
4. **erroneous digit** : → *digit 16*

error

1. **absolute error** : the algebraic difference between the indicated value and the comparison value: absolute error = indicated value comparison value. ★ erreur absolue → *erreur 16.* R абсолютная погрешность. D absoluter Fehler. E error absoluto. I errore assoluto. N fout. P błąd bezwzględny. S absolutfel. (301)
2. **absolute error** : the algebraic difference between a measured operating value of the characteristic quantity (or an actual value of the specified time) and its setting value. ★ erreur absolue → *erreur 17.* R абсолютная погрешность. D absolute Abweichung. E error absoluto. I errore assoluto. N absolute fout. P błąd bezwzględny; uchyb bezwzględny. S absolut fel. (446)
3. **analogue error detection** (*Syn.* (signal) quality detection) : → *detection 13*
4. **assigned error** : the error limits within which the manufacturer declares that any relay of a given type will perform under reference conditions. ★ erreur assignée → *erreur 18.* R установленная погрешность. D (Bemessungs-)Grenzabweichung. E error asignado. I errore stabilito. N aangegeven fout. P błąd gwarantowany; uchyb gwarantowani. S angivet fel. (446)
5. **billing error probability** : → *probability 1*
6. **bit error** : an incompatibility between a bit in a transmitted digital signal and the corresponding bit in the received digital signal. ★ erreur binaire → *erreur 19.* R ошибка в битах. D Bit-Fehler. E error binario. I errore binario; errore di bit. N fout in het binair cijfer; bitfout. P błąd binarny. S bitfel. (704)
7. **bit error probability** : → *probability 2*
8. **bit error rate** (in telecontrol) (*Syn.* DPDM (abbreviation)) : the ratio of the number of bits received inverted to the total number of bits sent. ★ taux d'erreurs sur les éléments binaires → *taux 45.* R частота искажений бита (в телемеханике). D Bitfehlerrate (beim Fernwirken). E tasa de error en los bits (en telecontrol). I tasso d'errore sui bit (nel telecontrollo). N bitfoutfractie. P stopa błędów elementowa (w sterowaniu zdalnym); stopa błędów pierwotna (w sterowaniu zdalnym). S bitfelsfrekvens. (371)
9. **bit error ratio** : → *ratio 11*
10. **block error probability** : → *probability 3*
11. **block error rate** : → *rate 8*
12. **block error ratio** : → *ratio 12*
13. **boresight error** (of an antenna) : the angular deviation of the electrical boresight of an antenna from a specified reference boresight. ★ écart de visée → *écart 12.* R ошибка осевого направления (антенны). D Abweichung von der Hauptstrahlrichtung (einer Antenne). E error de alineamiento (de una antena). I errore di puntamento. N asafwijking (van een antenne). P błąd ukierunkowania (anteny). S vinkelfel. (712)
14. **character error ratio** : → *ratio 14*
15. **composite error** : under steady-state conditions, the r.m.s. value of the difference between : *a)* the instantaneous values of the primary current, and *b)* the instantaneous values of the actual secondary current multiplied by the rated transformation ratio, the positive signs of the primary and secondary currents corresponding to the convention for terminal markings. *Note.* — The composite error is generally expressed as a percentage of the r.m.s. value of the primary current. ★ erreur composée → *erreur 20.* R полная погрешность. D Gesamtfehler. E error compuesto. I errore composto. N samengestelde fout. P błąd złożony. S visarfel. (321)
16. **conventional error** : the ratio of the absolute error to a specified conventional value. ★ erreur conventionnelle → *erreur 21.* R приведенная погрешность. D auf den Bezugswert bezogene Abweichung. E error convencional. I errore convenzionale. N conventionele fout. P błąd umowny; uchyb umowny. S fel hänfört till referensvärde. (446)
17. **core/cladding concentricity error** : 1 — For multimode fibres it is the distance between the core centre and the cladding centre divided by the core diameter. 2 — For singlemode fibre it is the distance between the core centre and the cladding centre. ★ erreur de concentricité cœur/gaine → *erreur 22.* R отклонение от концентричности сердцевины/оболочки. D Kern/Mantel-Konzentrizitätsfehler. E error de concentricidad núcleo/revestimiento. I errore di concentricità nucleo/mantello. N concentriciteitsafwijking tussen kern en mantel. P współczynnik niewspółosiowości rdzenia i płaszcza. S koncentricitetsfel mellan kärna och mantel. (731)
18. **core/reference surface concentricity error** : 1 — For multimode fibres it is the distance between the core centre and the reference surface centre divided by the core diameter. 2 — For singlemode fibres it is the distance between the core centre and the reference surface centre. ★ erreur de concentricité cœur/surface de référence → *erreur 23.* R отклонение от концентричности сердцевины/опорной поверхности. D Kern/Bezugsoberflächen-Konzentrizitätsfehler. E error de concentricidad núcleo/superficie de referencia. I errore di concentricità nucleo/superficie di riferimento. N concentriciteitsafwijking tussen kern en referentie-oppervlak. P współczynnik niewspółosiowości rdzenia i powierzchni odniesienia. S koncentricitetsfel mellan kärna och referensyta. (731)
19. **current error** : the error which a current transformer introduces into the measurement of a current and which arises from the fact that the actual transformation ratio is not equal to the rated transformation ratio. ★ erreur de courant → *erreur 24.* R токовая погрешность. D Stromfehler. E error

de intensidad. I errore di corrente; errore di rapporto. N stroomtransformatiefout. P błąd prądowy. S strömfel. (321)

20. **digit error ratio** : → *ratio 28*
21. **digital error** : an incompatibility between a digit in a transmitted digital signal and the corresponding digit in the received digital signal. ★ erreur (numérique) → *erreur 41.* R цифровая ошибка; ошибка в цифровом сигнале. D Digital-Fehler. E error (numérico). I errore numerico. N fout in het cijfer; digitale fout. P błąd cyfrowy. S sifferfel. (704)
22. **double error** : a group of two erroneous digits in the same character or block. ★ erreur double → *erreur 34.* R двойная ошибка. D Doppel-Fehler. E error doble. I errore doppio. N dubbele fout. P błąd podwójny. S dubbelfel. (721)
23. **error** : a discrepancy between a computed, observed or measured value or condition and the true, specified or theoretically correct value or condition. *Notes. 1* — An error can be caused by a faulty item, e.g. a computing error made by faulty computer equipment. *2* — The French term "erreur" may also designate a mistake. ★ erreur → *erreur 15.* R погрешность; ошибка технических или программных средств. D Fehlaussage. E error. I errore. N fout. P błąd. S avvikelse; fel. (191)
24. **error burst** : → *burst 10*
25. **error burst length** : → *length 15*
26. **error control** : → *control 98*
27. **error correcting code** : → *code 29*
28. **error correction** : → *correction 8*
29. **error correction** : → *correction 9*
30. **error correction by information feedback and repetition** : → *correction 10*
31. **error detecting and feedback system** : → *system 65*
32. **error detecting code** : → *code 30*
33. **error detection** : → *detection 8*
34. **error detection** : → *detection 9*
35. **error detection without repetition** : → *detection 10*
36. **error extension** (*Syn.* error multiplication) : → *multiplication 2*
37. **error multiplication** : → *multiplication 2*
38. **error multiplication factor** : → *factor 70*
39. **error protection code** : → *code 31*
40. **error ratio** : → *ratio 36*
41. **error signal** : → *signal 86*
42. **error spread** : → *spread 1*
43. **fiducial error** : the ratio of the absolute error to the fiducial value. ★ erreur réduite conventionnelle → *erreur 42.* R приведенная погрешность. D Bezugsfehler. E error reducido convencional. I errore ridotto convenzionale. N ..... P błąd charakterystyczny. S basfel. (301)
44. **geometric error** : time base errors resulting in geometric errors in the reproduced picture of a video tape recorder. ★ erreur de géométrie → *erreur 25.* R геометрические искажения. D Geometriefehler. E error de geometría. I errore di geometria. N geometrische fout. P błąd geometryczny; zniekształcenie geometryczne. S geometriskt fel. (806)
45. **human error** (*Syn.* mistake) : → *mistake 2*
46. **intrinsic error** : the error of a measuring instrument when used under reference conditions. ★ erreur intrinsèque → *erreur 36.* R основная погрешность. D Grundfehler. E error intrínseco. I errore intrinseco. N intrinsieke fout. P błąd podstawowy. S egenfel hos mätinstrument. (301)
47. **lateral tracking angle error** : the acute angle in the disk plane when reproducing a lateral recording, formed by the tangent to the arc of stylus tip motion, at the point of zero stylus tip displacement, and the radius of the disk passing through the same point of zero stylus tip displacement. ★ erreur de piste latérale → *erreur 26.* R горизонтальный угол погрешности. D tangentialer Spurfehlwinkel. E error de pista lateral. I errore di pista laterale. N laterale fouthoek. P błąd kątowy poziomy. S lateralt spårvinkelfel. (806)
48. **limiting error** : for a given relay, the maximum error to be expected with a given confidence level under identical stated conditions. ★ erreur limite → *erreur 37.* R предельная погрешность. D Vertrauensgrenze der Abweichung. E error límite. I errore limite. N maximale fout. P błąd graniczny; uchyb graniczny. S maximifel. (446)
49. **mean error** : for a given relay and for a specified number of measurements made under identical stated conditions, the quotient of the algebraic sum of the error values (absolute, relative or conventional) by the number of measurements. ★ erreur moyenne → *erreur 39.* R средняя погрешность. D Mittelwert der Abweichung. E error medio. I errore medio. N gemiddelde fout. P błąd średni; uchyb średni. S medelfel. (446)
50. **reference limiting error** : the limiting error determined under reference conditions. ★ erreur limite de référence → *erreur 38.* R предельная основная погрешность. D Vertrauensgrenze der Abweichung unter Bezugsbedingungen. E error límite de referencia. I errore limite di riferimento. N maximale fout onder referentievoorwaarden. P błąd graniczny odniesienia; uchyb graniczny odniesienia. S maximifelets referensvärde. (446)
51. **reference mean error** : the mean error determined under reference conditions. ★ erreur moyenne de référence → *erreur 40.* R средняя основная погрешность. D Mittelwert der Abweichung unter Bezugsbedingungen. E error medio de referencia. I errore medio di riferimento. N gemiddelde fout onder referentievoorwaarden. P błąd średni odniesienia; uchyb średni odniesienia. S medelfelets referensvärde. (446)
52. **relative error** : the ratio of the absolute error to the comparison value. ★ erreur relative → *erreur 43.* R относительная погрешность. D relativer Fehler. E error relativo. I errore relativo. N relatieve fout. P błąd względny. S relativt fel. (301)
53. **relative error** : the ratio of the absolute error to the setting value. ★ erreur relative → *erreur 44.* R относительная погрешность. D auf den Einstellwert bezogene Abweichung. E error relativo. I errore relativo. N relatieve fout. P błąd względny; uchyb względny. S relativt fel. (446)
54. **residual error probability** : → *probability 11*
55. **residual error rate** : → *rate 83*
56. **selection error correction** : → *correction 17*
57. **single error** : erroneous digit preceded and followed by at least one correct digit. ★ erreur simple → *erreur 45.* R одиночная ошибка. D Einzelfehler. E error simple. I errore singolo. N enkele fout. P błąd pojedynczy. S enkelfel. (721)
58. **stability error** : → *stability 15*
59. **time interval error** : the cumulative drift of the significant instants of a digital signal from their ideal positions in time, measured over a specified period. ★ dérive temporelle → *dérive 7.* R ошибка в интервале времени. D Zeitintervallfehler. E deriva temporal; error sobre la duración. I deriva temporale. N fout over een tijdinterval. P błąd taktowania. S ..... (704)
60. **transmission error alarm** : → *alarm 8*
61. **triple error** : a group of three erroneous digits in the same character or block. ★ erreur triple → *erreur 46.* R тройная ошибка. D Dreifach-Fehler. E error triple. I errore triplo. N drievoudige fout. P błąd potrójny. S trippelfel. (721)
62. **variation of the mean error** : → *variation 6*
63. **velocity error** : the deviation within a specified period of the rate of reproduction of a video signal with respect to its rated value. ★ erreur de vitesse → *erreur 33.* R скоростная ошибка. D Geschwindigkeitsfehler. E error de velocidad. I errore di velocità. N snelheidsfout. P błąd prędkości. S hastighetsfel. (806)
64. **vertical tracking angle error** : through the axis of symmetry of the stylus tip and its support, perpendicular to the record surface and viewed from the record centre, the angle between the tangent to the motion curve of the stylus tip and the perpendicular passing through the stylus tip. ★ erreur de piste verticale → *erreur 27.* R вертикальный угол погрешности. D vertikaler Spurfehlwinkel. E error de pista vertical. I errore di pista verticale. N verticale fouthoek. P błąd kątowy pionowy. S vertikalt spårvinkelfel. (806)
65. **voltage error** : the error which a voltage transformer introduces into the measurement of a voltage and which arises from the fact that the actual transformation ratio is not equal to the rated transformation ratio. ★ erreur de tension → *erreur 32.* R погрешность напряжения. D Spannungsfehler. E error de tensión. I errore di tensione. N spanningstransformatiefout. P błąd napięciowy. S spänningsfel. (321)

errored

1. **errored second** (*Syn.* ES (abbreviation)) : that period of time of duration one second during which one or more digital errors occur in a given digital signal. ★ seconde avec erreurs → *seconde 1.* R секунда с ошибками. D Fehlersekunde; ES

(Abkürzung). E segundo erróneo; segundo con errores. I secondo con presenza di errori. N foutseconde. P sekunda z błędami. S felsekund. (704)

error-free

1. **error-free second** (*Syn.* EFS (abbreviation)) : that period of time of duration one second during which no digital errors occur in a given digital signal. ★ seconde sans erreur → *seconde 3.* R безошибочная секунда. D fehlerfreie Sekunde; EFS (Abkürzung). E segundo sin errores. I secondo libero da errori. N foutvrije seconde. P sekunda bez błędów. S felfri sekund. (704)

error-rate

1. **residual error-rate** (*Syn.* undetected error-rate) : the ratio of the number of bits, unit elements, characters or blocks incorrectly received but undetected or uncorrected by the error control equipment, to the total number of corresponding elements sent. ★ taux d'erreurs résiduelles → *taux 41.* R коэффициент необнаруженных ошибок. D Restfehlerhäufigkeit; Restfehlercode. E tasa de errores residuales. I tasso di errore residuo. N restfoutenpercentage. P resztkowa stopa błędów. S restfelskvot. (721)
2. **undetected error-rate** (*Syn.* residual error-rate) : → *error-rate 1*

erythema

1. **(actinic) erythema** : reddening of the skin, with or without inflammation, caused by the actinic effect of solar radiation or artificial optical radiation. *Note.* —Non-actinic erythema can be caused by various chemical or physical agents. ★ érythème (actinique) → *érythème 3.* R (актиничная) эритема. D (aktinisches) Erythem. E eritema (actínico). I eritema (attinico). N (actinisch) erytheem. P erytema (aktyniczna); rumień (aktyniczny). S (aktinisk) erytem. (845)
2. **erythema dose** : → *dose 28*
3. **minimum erythema dose** : → *dose 36*
4. **threshold erythema dose** : → *dose 43*

erythemal

1. **erythemal radiation** : → *radiation 23*

ES

1. **ES** (*Syn.* errored second) : → *errored 1*

escape

1. **escape** : a function control which alters the meaning of a limited number of contiguously following code combinations to provide additional function controls. ★ échappement → *échappement 1.* R авторегистр. D Code-Umschaltung. E escape; huida. I carattere escape. N ontsnapping. P zmiana znaczenia. S kodväxling. (721)
2. **escape lighting** : → *lighting 8*

ESD

1. **ESD** (*Syn.* electrostatic discharge) : → *discharge 18*

ESI

1. **ESI refractive index difference** : → *difference 17*

ESI-profile

1. **ESI-profile** (*Syn.* equivalent step index profile) : → *profile 3*

essential

1. **essential auxiliary circuits** : → *circuit 75*

ester

1. **synthetic organic ester** : an insulating liquid produced from acids and alcohols by chemical reaction. *Note.* — These esters include mono-, di- and polyol-esters. ★ esters organiques synthétiques → *ester 1.* R синтетический органический эфир. D synthetische organische Ester. E ésteres orgánicos sintéticos. I estere organico sintetico. N synthetische organische esters. P estry organiczne syntetyczne. S syntetisk organisk ester. (212)

estimated

1. **estimated** : qualifies a value obtained as the result of the operation made for the purpose of assigning, from the observed values in a sample, numerical values to the parameters of the distribution chosen as the statistical model of the population from which this sample is taken. *Notes. 1* — The result may be expressed either as a single numerical value, a point estimate, or as a confidence interval. *2* — In French, an estimated value may also be designated by the term "estimation". ★ estimé → *estimé 1.* R статистический; оцененный. D geschätzt. E ... estimado. I stimato. N geschat. P oceniany. S estimerad. (191)

estimation

1. **state estimation** : the computation of the most probable currents and voltages within the network at a given instant by solving a system of mostly non-linear equations whose parameters are obtained by means of redundant measurements. ★ estimation d'état → *estimation 1.* R оценка режима. D Zustandsschätzung. E estimación de estado. I stima di stato. N toestandsschatting. P obliczanie rozpływu prądów i poziomów napięć. S tillståndsbestämning. (603)

eta

1. **eta factor** (*Syn.* neutron yield per absorption) : → *yield 6*

etch

1. **track (etch) detector** : → *detector 42*

european

1. **european master reference for telephone transmission** : → *reference 9*

evanescent

1. **evanescent field** : → *field 9*
2. **evanescent mode** (*Syn.* evanescent field) : → *field 9*
3. **evanescent mode** : → *mode 26*

event

1. **event information** : → *information 6*
2. **event parity check** : → *check 9*
3. **event recorder** : → *recorder 7*
4. **initial ionizing event** : an ionizing event that initiates a discharge resulting in a count. ★ événement ionisant initial → *événement 4.* R первичный акт ионизации. D Anfangs-Ionisierungsereignis. E suceso ionizante inicial. I evento ionizzante iniziale. N inleidend ionisatieverschijnsel. P akt jonizacji; zdarzenie jonizacji. S initialjonisering. (531)
5. **ionization event** : a process in which an ion or a group of ions is produced by interaction of a single particle with matter. ★ événement ionisant → *événement 3.* R акт ионизации. D Ionisierungsereignis. E suceso ionizante. I evento ionizzante. N ionisatieproces. P akt jonizacji. S jonisationshändelse. (391,531)

evolving

1. **gas evolving switch** : → *switch 21*

examination

1. **vertical examination stand** : → *stand 2*

excavation

1. **excavation** : a hole made in the ground for installing a foundation (see fig. 4.4). ★ fouille → *fouille 1.* R котлован. D Aushub. E hoyo. I scavo. N ontgraving. P wykop. S schaktgrop. (466)

excess

1. **excess carrier** : → *carrier 15*
2. **excess energy meter** : → *meter 20*
3. **neutron excess** : the difference between the number of neutrons and the number of protons in a nucleus. ★ excès de neutrons → *excès 1.* D Neutronenüberschuß. E exceso de neutrones. I eccesso di neutroni. N neutronenoverschot. P nadmiar neutronów. S neutronöverskott. (026)

exchange

1. **automatic (telephone) exchange** : a telephone exchange providing automatic telephone operation. *Note.* — In an automatic telephone exchange, an operator may help to establish some telephone connections. ★ commutateur (téléphonique) automatique → *commutateur 27.* R автоматическая (телефонная) коммутационная станция. D Wählvermittlungsstelle. E conmutador (telefónico) automático; autoconmutador (telefónico). I autocommutatore (telefonico). N automatische (telefoon)centrale. P centrala automatyczna. S automatväxel. (722)

2. **circuit switching exchange** (*Syn.* switch (circuit)) : a set of devices which is associated with a set of circuits and which is intended to interconnect temporarily on request two circuits to constitute connections. ★ commutateur de circuits → *commutateur 15.* R станция коммутации каналов. D Leitungsvermittlungsstelle. E conmutador de circuitos. I centrale a commutazione di circuito. N centrale voor circuitschakelen. P centrala komutacji łączy. S förbindelseförmedlingsväxel. (721)
3. **class of an exchange** : → *class 9*
4. **data switching exchange** (*Syn.* DSE (abbreviation)) : the set of means installed at a single location to switch data traffic. *Note.* — A data switching exchange may provide only circuit switching, only packet switching or both. ★ centre de commutation de données → *centre 4.* R станция коммутации данных; СКД (сокращение). D Datenwählvermittlungsstelle. E centro de conmutación de datos. I centrale di commutazione per dati. N datacentrale. P centrala teledacyjna komutacyjna. S dataväxel. (721)
5. **exchange** (in telecommunication) (*Syn.* switching entity; switching office (USA)) : an aggregate of switching equipment and auxiliary equipment at a node in a telecommunication network enabling connections, as required by individual users, to be established. *Notes. 1* — The term "switching entity" is used in telephony. *2* — In French and Spanish the corresponding terms "commutateur" and "conmutador" are also used with the meaning of "switch". ★ commutateur → *commutateur 5.* R (коммутационная) станция (в электросвязи). D Vermittlungseinrichtung. E conmutador (de telecomunicación). I autocommutatore; centrale telefonica. N centrale. P centrala (telekomunikacyjna). S växel. (714,715)
6. **exchange call set-up delay** : → *delay 20*
7. **exclusive exchange line** : → *line 34*
8. **foreign exchange line** (*Syn.* out-of-area subscriber's line) : → *line 118*
9. **ion exchange technique** : → *technique 11*
10. **local (charge) exchange** (*Syn.* local service area) : → *area 25*
11. **local switching exchange** (*Syn.* serving connection exchange) : → *exchange 23*
12. **local (switching) exchange** (*Syn.* local switching centre) : → *centre 13*
13. **manual (telephone) exchange** : a telephone exchange providing only manual telephone operation. ★ commutateur (téléphonique) manuel → *commutateur 31.* R (телефонная) станция с ручным обслуживанием. D Handvermittlungsstelle. E conmutador (telefónico) manual. I centrale (telefonica) manuale. N hand(telefoon)centrale. P centrala ręczna. S manuell telefonväxel. (722)
14. **message switching exchange** (*Syn.* switch (message)) : a set of devices which is associated with a set of circuits and which is intended to receive, to store and forward messages without providing any exclusive connection between circuits. ★ commutateur de messages → *commutateur 17.* R станция коммутации сообщений. D Speichervermittlungsstelle. E conmutador de mensajes. I centrale a commutazione di messaggio. N centrale voor berichtschakelen. P centrala komutacji wiadomości. S meddelandeförmedlingsväxel. (721)
15. **(mutual) exchange coefficient** : → *coefficient 41*
16. **private automatic branch exchange** (*Syn.* PABX (abbreviation)) : a private branch exchange consisting of an automatic telephone exchange. ★ commutateur (téléphonique) automatique privé → *commutateur 28.* R ведомственная автоматическая коммутационная станция с выходом в город. D private Wählnebenstellenanlage; private Wählanlage. E autoconmutador (telefónico) de abonado; PABX (abreviación). I centralino telefonico automatico. N automatische bedrijfstelefooncentrale met netlijnverkeer. P centrala (telefoniczna) wewnętrzna automatyczna z dostępem do sieci publicznej. S automatisk abonnentväxel. (722)
17. **private automatic exchange** (*Syn.* PAX (abbreviation)) : a private telephone exchange consisting of an automatic telephone exchange. ★ commutateur (téléphonique) automatique strictement privé → *commutateur 29.* R ведомственная автоматическая коммутационная станция; УПАТС. D private Wählvermittlungsstelle. E autoconmutador (telefónico) privado; PAX (abreviación). I centralino telefonico automatico privato. N automatische bedrijfstelefooncentrale zonder aansluiting op het openbare net. P centrala (telefoniczna) wewnętrzna automatyczna bez dostępu do sieci publicznej. S automatisk privatväxel. (722)
18. **private branch exchange** (*Syn.* PBX (abbreviation)) : a switching entity forming part of a private telephone installation that has access to the public switched telephone network. ★ commutateur (téléphonique) privé → *commutateur 34.* R ведомственная телефонная станция с выходом в город. D private Nebenstellenanlage; private Telefonanlage. E conmutador (telefónico) de abonado; PBX (abreviación). I centralino telefonico. N op het openbare net aangesloten bedrijfstelefooncentrale. P centrala (telefoniczna) wewnętrzna z dostępem do sieci publicznej. S abonnentväxel. (722)
19. **private manual branch exchange** (*Syn.* PMBX (abbreviation)) : a private branch exchange consisting of a manual telephone exchange. ★ commutateur (téléphonique) manuel privé → *commutateur 32.* R ведомственная ручная коммутационная станция с выходом в город. D private Handnebenstellenanlage. E conmutador (telefónico) manual de abonado; PMBX (abreviación). I centralino telefonico manuale. N bedrijfstelefooncentrale met handbediening. P centrala (telefoniczna) wewnętrzna ręczna. S manuell abonnentväxel. (722)
20. **private manual exchange** (*Syn.* PMX (abbreviation)) : a private telephone exchange consisting of a manual telephone exchange. ★ commutateur (téléphonique) manuel strictement privé → *commutateur 33.* R ведомственная станция с ручным управлением; УПТРС. D private Handvermittlungsstelle. E conmutador (telefónico) manual; PMX (abreviación). I centralino telefonico manuale privato. N bedrijfstelefooncentrale met handbediening en zonder aansluiting op het openbare net. P centrala (telefoniczna) wewnętrzna ręczna bez dostępu do sieci publicznej. S manuell privatväxel. (722)
21. **private non-branch exchange** (*Syn.* private (telephone) exchange) : → *exchange 22*
22. **private (telephone) exchange** (*Syn.* private non-branch exchange) : a switching entity forming part of a private telephone installation that has no access to the public switched telephone network. ★ commutateur (téléphonique) strictement privé → *commutateur 35.* R ведомственная (учрежденческо-производственная) (телефонная) станция. D private Vermittlungsstelle. E conmutador (telefónico) privado. I centralino telefonico privato. N bedrijfstelefooncentrale zonder aansluiting op het openbare net. P centrala (telefoniczna) wewnętrzna bez dostępu do sieci publicznej. S privatväxel. (722)
23. **serving connection exchange** (*Syn.* local switching exchange) : an exchange which is necessarily working whenever any terminal of a given set, said to be connected to this exchange, is involved in a communication ; this exchange usually provides an interface between the signalling particular to the terminals and other types of signalling. *Note.* — There is at least one, and generally only one, serving connection exchange to which a given terminal is interconnected by a set of lines in parallel. ★ commutateur de rattachement → *commutateur 19.* D Ortsvermittlungsstelle; Teilnehmervermittlungsstelle. P centrala komutacyjna miejscowa. (715)
24. **subscriber serving exchange** : a public switching exchange which connects subscribers lines within the same area to one another, or which establishes connections between these subscribers and other exchanges. ★ commutateur de rattachement → *commutateur 20.* R оконечная станция. D Endvermittlungsstelle. E conmutador de conexión. I commutatore terminale. N eindcentrale. P centrala końcowa. S publik växel. (721)
25. **(switching) exchange area** (*Syn.* switching entity area) : → *area 40*
26. **telegraph switching exchange** : the set of means installed at a single location to switch telegraph traffic. ★ centre de commutation télégraphique → *centre 6.* R телеграфная коммутационная станция. D Telegrafenwählvermittlungsstelle. E centro de conmutación telegráfico. I centrale di commutazione telegrafica. N telegraafcentrale. P centrala telegraficzna komutacyjna. S telegrafväxel. (721)
27. **telegraph transit exchange** : a telegraph exchange which enables connections between other telegraph exchanges to be

established. ★ commutateur nodal télégraphique → *commutateur 25.* R телеграфная транзитная станция. D Durchgangsvermittlungsstelle. E conmutador nodal telegráfico. I nodo di transito. N verkeerscentrale. P centrala węzłowa telegraficzna. S transitväxel. (721)

28. **transit exchange** (*Syn.* transit centre) : an exchange used primarily as a switching point for traffic from some exchanges towards other exchanges. *Note.* — It may also play the role of a serving connection exchange. ★ commutateur de transit → *commutateur 22.* D Durchgangsvermittlungsstelle; Transitvermittlungsstelle. P centrala tranzytowa. (715)

exchangeable

1. **(exchangeable) noise power** : → *power 58*
2. **exchangeable power** : → *power 59*
3. **exchangeable power gain** : → *gain 10*

excitation

1. **excitation** (*Syn.* stimulus) : → *stimulus 15*
2. **excitation** : the process by which a system —such as an atom or a nucleus— is transferred from one energy level to another, higher level. ★ excitation → *excitation 9.* R возбуждение. D Anregung. E excitación. I eccitazione. N aanslag; excitatie. P wzbudzenie. S excitation. (845,881)
3. **excitation band** : → *band 16*
4. **excitation energy** : → *energy 49*
5. **excitation of a transductor** : the action of a winding (excitation winding) or of an auxiliary magnetomotive force for the purpose of modifying the magnetic conditions of a transductor element. ★ excitation d'un transducteur → *excitation 11.* R подмагничивание магнитного усилителя. D Erregung eines Transduktors. E excitación de un transductor. I eccitazione di un trasduttore. N bekrachtiging van een transductor. P wzbudzenie transduktora. S magnetisering av en transduktor. (431)
6. **excitation purity** : → *purity 2*
7. **excitation resistor** : → *resistor 4*
8. **excitation response** : → *response 4*
9. **excitation response ratio** : → *ratio 37*
10. **excitation spectrum** : → *spectrum 14*
11. **excitation system stability** : → *stability 5*
12. **excitation winding** : → *winding 25*
13. **excitation winding** : → *winding 26*
14. **forced excitation** (*Syn.* constrained current operation) : → *operation 13*
15. **initial excitation system response** : → *response 8*
16. **natural excitation** (*Syn.* free current operation) : → *operation 24*
17. **nominal excitation system ceiling voltage** : → *voltage 125*
18. **X-ray excitation fluorimeter** (*Syn.* X-ray fluorescence content meter) : → *content meter 9*

excited

1. **compositely excited** : applied to a machine to denote that part of the excitation is supplied by the machine itself, and part is obtained from a source other than the machine. ★ machine à excitation composite → *machine 10.* R машина комбинированного возбуждения. D Maschine mit zusammengesetzter Erregung. E máquina con excitación doble. I macchina ad eccitazione mista. N machine met gemengde bekrachtiging. P maszyna o wzbudzeniu mieszanym. S tillsatsmagnetiserad. (411)
2. **excited state** : → *state 13*
3. **separately excited** : applied to a machine to denote that the excitation is obtained from a source other than the machine itself. ★ machine à excitation séparée → *machine 14.* R машина независимого возбуждения. D Maschine mit Fremderregung. E máquina con excitación independiente. I macchina ad eccitazione separata. N machine met onafhankelijke bekrachtiging. P maszyna obcowzbudna. S separatmagnetiserad. (411)
4. **separately excited motor** : → *motor 86*

exciter

1. **control exciter** : an exciter which acts as a rotary amplifier in a closed loop circuit. ★ excitatrice d'amplification → *excitatrice 3.* R регулирующий возбудитель. D Regelverstärkermaschine. E excitatriz de amplificación. I eccitatrice d'amplificazione. N regelopwekker. P wzbudnica-wzmacniacz. S förstärkande hjälpmatare. (411)
2. **dynamic brake exciter** : a motor-generator set supplying the field windings of traction motors so that they may act as generators during dynamic braking. ★ groupe (d'excitation) de freinage → *groupe 40.* R возбудитель электродинамического тормоза. D Bremserregermaschine. E grupo (de excitación) de frenado. I gruppo (d'eccitazione) di frenatura. N opwekker voor elektrisch remmen. P wzbudnica hamowania dynamicznego. S elbromsmatare. (811)
3. **exciter** : a generator which supplies all or part of the power required for the excitation of an electrical machine. *Note.* — Exciters may be d.c. or a.c. machines. ★ excitatrice → *excitatrice 1.* R возбудитель. D Erregermaschine. E excitatriz. I eccitatrice. N opwekker. P wzbudnica. S matare. (411,811)
4. **exciter response** : → *response 6*
5. **independently driven exciter** : an exciter for the main generator, driven by a separate engine. ★ excitatrice à entraînement indépendant → *excitatrice 2.* R возбудитель с независимым приводом. D fremdangetriebene Erregermaschine. E excitatriz con accionamiento independiente. I eccitatrice (ad azionamento) indipendente. N onafhankelijk aangedreven opwekker. P wzbudnica o napędzie niezależnym. S separatdriven matare. (811)
6. **main exciter** : an exciter which supplies all or part of the power required for the excitation of the principal electrical machine or machines. ★ excitatrice principale → *excitatrice 6.* R главный возбудитель. D Haupterregermaschine. E excitatriz principal. I eccitatrice principale. N hoofdopwekker. P wzbudnica główna. S huvudmatare. (411)
7. **pilot exciter** : an exciter which supplies all or part of the power required for the excitation of another exciter. ★ excitatrice pilote → *excitatrice 5.* R подвозбудитель. D Hilfserregermaschine. E excitatriz piloto. I eccitatrice pilota. N hulpopwekker. P podwzbudnica. S hjälpmatare. (411)
8. **shaft-end mounted exciter** : an exciter mounted on the shaft of the electrical machine for which it supplies the excitation. ★ excitatrice en bout d'arbre → *excitatrice 4.* R возбудитель с установкой на конце вала. D am Wellenende angebaute Erregermaschine. E excitatriz en extremo del eje. I eccitatrice coassiale. N asgekoppelde opwekker. P wzbudnica współosiowa. S axelmonterad matare. (811)

exciting

1. **exciting current** : → *current 80*

excitron

1. **excitron** : a single-anode pool rectifier tube with a keep-alive electrode and a mechanical or electrical starting device. ★ excitron → *excitron 1.* R экситрон. D Excitron. E excitrón. I eccitron. N excitron. P ekscytron. S excitron. (531,811)

exclusive

1. **exclusive exchange line** : → *line 34*

excretion

1. **excretion** : the elimination of radioactive materials from the body by its natural functions. ★ excrétion → *excrétion 1.* R выделение. D Aktivitätsexkretion. E excreción. I escrezione. N afscheiding. P wydalanie. S utsöndring. (881)

execute

1. **select and execute command** : → *command 18*

executive

1. **executive program** (*Syn.* supervisory program) : → *program 9*

exhauster

1. **exhauster** (*Syn.* vacuum exhauster) : a reciprocating or rotary machine creating vacuum to operate the vacuum brake. ★ pompe à vide → *pompe 3.* R вакуумный насос. D Vakuumpumpe. E bomba de vacío. I pompa del vuoto. N vacuümpomp. P pompa próżniowa. S vakuumpump. (811)
2. **vacuum exhauster** (*Syn.* exhauster) : → *exhauster 1*

exit

1. **exit dose** : → *dose 29*

exitance

1. **luminous exitance** (at a point of a surface) (M_v; M) : quotient of the luminous flux $d\Phi_v$ leaving an element of the surface containing the point, by the area dA of that element. *Equivalent definition.* Integral, taken over the hemisphere visible from the given point, of the expression $L_v \cos\theta \cdot d\Omega$, where L_v is the luminance at the given point in the various directions of the emitted elementary beams of solid angle $d\Omega$, and θ is the angle between any of these beams and the normal to the surface at the given point.

$$M_v = \frac{d\Phi_v}{dA} = \int_{2\pi sr} L_v \cdot \cos\theta \cdot d\Omega$$

Unit : $lm \cdot m^{-2}$. ★ exitance lumineuse → *exitance 3.* R светимость (в точке поверхности). D spezifische Lichtausstrahlung (von einem Punkt einer Oberfläche). E exitancia luminosa. I emettenza luminosa. N lichtexitantie. P egzytancja świetlna. S ljusexitans. (845)

2. **photon exitance** (at a point of a surface) (M_p; M) : quotient of the photon flux $d\Phi_p$ leaving an element of the surface containing the point, by the area dA of that element. *Equivalent definition.* Integral, taken over the hemisphere visible from the given point, of the expression $L_p \cos\theta d\Omega$, where L_p is the photon radiance at the given point in the various directions of the emitted elementary beams of solid angle $d\Omega$, and θ is the angle between any of these beam and the normal to the surface at the given point.

$$M_p = \frac{d\Phi_p}{dA} = \int_{2\pi sr} L_p \cdot \cos\theta \cdot d\Omega$$

Unit : $s^{-1} \cdot m^{-2}$. ★ exitance photonique → *exitance 4.* R фотонная светимость (в точке поверхности). D spezifische Photonenausstrahlung (von einem Punkt einer Oberfläche). E exitancia fotónica. I emettenza fotonica. N fotonenexitantie. P egzytancja fotonowa. S fotonexitans. (845)

3. **radiant exitance** (*Syn.* radiant emittance) : → *emittance 1*

4. **radiant exitance** (at a point of a surface) (M_e; M) : quotient of the radiant flux $d\Phi_e$ leaving an element of the surface containing the point, by the area dA of that element. *Equivalent definition.* Integral, taken over the hemisphere visible from the given point, of the expression $L_e \cdot \cos\theta \cdot d\Omega$, where L_e is the radiance at the given point in the various directions of the emitted elementary beams of solid angle $d\Omega$, and θ is the angle between any of these beams and the normal to the surface at the given point.

$$M_e = \frac{d\Phi_e}{dA} = \int_{2\pi sr} L_e \cdot \cos\theta \cdot d\Omega$$

Unit : $W \cdot m^{-2}$. ★ exitance énergétique → *exitance 2.* R энергетическая светимость (в точке поверхности). D spezifische Ausstrahlung (von einem punkt einer oberfläche). E exitancia radiante; strålnings exitans. I emettenza energetica. N stralingsexitantie. P egzytancja energetyczna. S utstrålningstäthet. (841,845)

exobase

1. **exobase** : the lower boundary of the exosphere. *Note.* — The height of the exobase is of the order of 500 to 600 km. ★ exobase → *exobase 1.* D Exobase. P granica dolna egzosfery. (705)

exoelectron

1. **exoelectron dosemeter** : → *dosemeter 7*

exosphere

1. **exosphere** : the outer part of the Earth's atmosphere located above the thermosphere, in which the collision frequency is sufficiently low that the probability that certain particles will escape towards free space is relatively high when the vertical velocity of these particles is sufficiently high. ★ exosphère → *exosphère 1.* D Exosphäre. P egzosfera. (705)

expand

1. **to expand** : to subject a signal to expansion. ★ expanser → *expanser 1.* R экспандировать. D expandieren. E expandir. I espandere. N expanderen. P ekspandować. S expandera. (702)

expanded

1. **expanded conductor** : → *conductor 35*
2. **expanded pile** : → *pile 5*
3. **expanded scale instrument** : → *instrument 7*

expander

1. **expander** : a non-linear device used for signal expansion. ★ expanseur → *expanseur 1.* R экспандер. D Expander. E expansor. I espansore. N expander. P ekspandor. S expander. (702)

expansion

1. **(analogue) temporal expansion** (of a video signal) : inverse operation to (analogue) temporal compression, the aim of either re-establishing the normal duration of the compressed signals, or to reduce the bandwith required for the signal. ★ décompression temporelle (analogique) → *décompression 1.* R расширение во времени (аналогового видеосигнала). (723)
2. **expansion** : the automatic increase, according to a specified law, of the variation of the average level of a signal, generally in order to restore to its original form a signal which has been subjected to compression. ★ expansion → *expansion 1.* R экспандирование. D Expansion. E expansión. I espansione. N expansie. P ekspansja. S expansion. (702)
3. **expansion** (in switching) : a process performed by a switching stage, or stages, in which the number of inlets is smaller than the number of outlets. ★ expansion → *expansion 2.* R расширение (в коммутации). D Expansion. E expansión (en conmutación). I espansione. N expansie. P ekspansja (w komutacji). S expandering. (714)
4. **expansion** (of a sound signal) : the increase of the dynamic range of a sound signal generally in order to restore to its original form a signal which has been subjected to compression. *Note.* — Associated terms : to expand, expander. ★ expansion → *expansion 3.* R экспандирование (звукового сигнала). (723)
5. **expansion** (*Syn.* compression) : → *compression 5*
6. **expansion cloud chamber** (*Syn.* Wilson cloud chamber) : → *chamber 17*
7. **expansion of the luminance range** : deliberate or accidental change in the facsimile signals which causes the luminance range of the received picture to be greater than that of the original. ★ extension des luminances → *extension 3.* R расширение диапазона яркости. D Ausdehnung des Helligkeitsbereichs. E extensión de lumiancias. I esaltazione di luminanza. N expansie van het luminantiegebied. P zwiększenie luminancji. S luminansexpansion. (721)
8. **expansion tank** (*Syn.* oil conservator) : → *conservator 1*
9. **sweep expansion** : the process enabling the sweep to be increased, in such a manner that a part of the display can be expanded to cover the whole rated horizontal deflection. ★ expansion du balayage → *expansion 4.* R растяжение развертки. D Dehnung der Zeitablenkung. E expansión del barrido. I scansione ingrandita. N tijdbasisexpansie. P ekspansja. S svepexpansion. (303)

expectation

1. **iterated fission expectation** : in a critical reactor, the average value, after many generations, of the number of fissions per generation arising from the daughter neutrons of a given neutron. Frequently called "Iterated fission probability". ★ espérance de fission itérée → *fission 4.* D asymptotische Spalterwartung. E expectación de fisión iterativa. I probabilità di fissione multipla. N verwachtingswaarde van herhaalde splijting. P asymptotyczne prawdopodobieństwo rozszczepienia. S itererat förväntningsvärde för klyvning. (026)

experiment

1. **critical experiment** : a test or series of tests performed with an assembly of reactor materials which can be gradually brought to the critical state for the purpose of determining the nuclear characteristics of a reactor. The experiment is usually performed at very low power. ★ expérience critique → *expérience 1.* D kritisches Experiment. E experiencia crítica. I esperimento critico. N kritiek (kritisch) experiment. P doświadczenie krytyczne. S kritiskt experiment. (026)

2. **exponential experiment** : an experiment, performed with a subcritical assembly of reactor materials, and an independent neutron source, used to determine the neutron characteristics of a configuration of these materials. With the usual placement of the neutron source (i.e. thermal neutrons introduced through one face of a cube or end of a cylinder) the neutron flux density in the assembly decreases exponentially with distance from the boundary adjacent to the source. ★ expérience exponentielle → *expérience 2.* D Exponentialexperiment. E experiencia exponencial. I esperimento esponenziale. N exponentieel experiment. P doświadczenie wykładnicze. S exponentialexperiment. (026)

experimental

1. **experimental hole** (*Syn.* beam hole) : → *hole 1*
2. **experimental reactor** : → *reactor 13*
3. **maximum experimental safe gap** : → *gap 17*

explosion

1. **explosion** (of an explosive atmosphere) : a sudden increase of pressure and temperature, due to oxidation or other exothermic reaction. ★ explosion → *explosion 2.* R взрыв (взрывоопасной среды). D Explosion. E explosión (de una atmósfera explosiva). I esplosione (di una atmosfera esplosiva). N ontploffing (van een ontplofbare atmosfeer); explosie (van een ontplofbare atmosfeer). P wybuch. S explosion. (426)

explosion-containing

1. **explosion-containing component** : → *component 21*

explosion-proof

1. **explosion proof enclosure** (*Syn.* flameproof enclosure "d") : → *enclosure 9*
2. **explosion proof (telephone) set** : → *set 15*
3. **explosion-proof component** : → *component 22*
4. **explosion-proof luminaire** (*Syn.* flameproof luminaire) : → *luminaire 7*

explosion-protected

1. **explosion-protected electrical apparatus** (*Syn.* electrical apparatus for explosive atmospheres) : → *apparatus 6*

explosive

1. **electrical apparatus for explosive atmospheres** : → *apparatus 6*
2. **explosive atmosphere** : → *atmosphere 3*
3. **explosive dust atmosphere** : → *atmosphere 4*
4. **explosive gas atmosphere** : → *atmosphere 5*
5. **explosive test mixture** : → *mixture 2*
6. **ignition temperature of an explosive gas atmosphere** : → *temperature 19*
7. **lower explosive limit** : → *limit 13*
8. **most explosive mixture** : → *mixture 4*
9. **upper explosive limit** : → *limit 21*

exponent

1. **elementary exponent of sound propagation** : with respect to a system having a periodic structure, the natural logarithm of the complex ratio of particle velocities (or pressures) measured at two successive corresponding points of the structure, when this structure is assumed to be of indefinite length. ★ exposant élémentaire de propagation acoustique → *exposant 1.* R акустическая постоянная распространения. D elementbezogener Ausbreitungskoeffizient. E exponente elemental de propagación acústica. I esponente elementare di propagazione acustica. N elementaire exponent van de geluidsvoortplanting. P tamowność falowa akustyczna elementarna. S ..... (801)
2. **linear exponent of sound propagation** (*Syn.* sound propagation coefficient) : with respect to a uniform system, the natural logarithm of the complex ratio of particle velocities (or pressures) measured at two succesive points separated by unit distance, when this system is assumed to be of infinite length. ★ exposant linéique de propagation acoustique → *exposant 3.* R линейная акустическая постоянная распространения; коэффициент распространения звука. D Schall-Ausbreitungskoeffizient. E exponente lineal de propagación acústica. I attenuazione. N lineaire exponent van de geluidsvoortplanting. P tamowność falowa akustyczna liniowa. S gångkonstant; utbredningskonstant. (801)

exponential

1. **exponential absorption** : → *absorption 20*
2. **exponential assembly** : → *assembly 11*
3. **exponential experiment** : → *experiment 2*
4. **exponential transmission line** : → *line 35*

exposed

1. **exposed conductive part** : → *part 3*

exposure

1. **automatic exposure control** : → *control 11*
2. **duration of X-ray tube exposure series** : → *duration 13*
3. **exposure** (of a telecommunication line to a power line) : relative position of a power line and a telecommunication line such that the electromagnetic effects of the power line on the telecommunication line are great enough to give rise to a possibility of danger or electromagnetic interference. ★ rapprochement → *rapprochement 1.* R расположение взаимно влияющих электрических линий. D Näherung. E proximidad (entre linea de telecomunicación y línea eléctrica). I avvicinamento (fra linea di telecomunicazione e linea elettrica). N blootstelling (van een telecommunicatielijn aan een hoogspanningsleiding). P zbliżenie (między linią telekomunikacyjną i energetyczną). S närmesträcka. (604)
4. **exposure** (to radiation) : the incidence of radiation on living or inanimate material by accident or intent. ★ exposition → *exposition 4.* R воздействие (излучения). D Strahlenexposition. E exposición (a una radiación). I esposizione (a radiazioni). N exposie (t.o.v. straling). P ekspozycja (na promieniowanie). S exponering. (881)
5. **exposure** (of a radiographic film) : the process of irradiating the radiograhic film, by X-radiation or gamma-radiation. ★ exposition → *exposition 5.* R экспозиция (радиографической пленки). D Filmbelichtung. E exposición (de una pelicula radiografica). I esposizione (di una pellicola radiografica). N exposie (van een radiografische film). P ekspozycja (błony rentgenowskiej). S exponering (av film). (881)
6. **exposure** (physical quantity) (X) : the quotient of dQ by dm, where dQ is the total electric charge of the ions of one sign produced in air when all electrons (negative and positive), liberated by photons in air of mass dm are completely stopped in air. $X = dQ/dm$. *Note.* — The SI unit of exposure is the coulomb per kilogram ($C\ kg^{-1}$). The earlier special unit of exposure, still in temporary use, was the roentgen. $1\ R = 2.58 \times 10^{-4}\ C\ kg^{-1}$. ★ exposition → *exposition 6.* R экспозиционная доза. D Standardionendosis. E exposición (magnitud fisica). I esposizione (grandezza fisica). N exposie (fysische grootheid). P ekspozycja (wielkość fizyczna). S exposition. (391,881)
7. **exposure in free air** : exposure in air without backscatter. ★ exposition dans l'air libre → *exposition 9.* R экспозиционная доза в свободном воздухе. D Standardionendosis frei in Luft. E exposición en el aire libre. I esposizione in aria libera. N exposie in de openlucht. P ekspozycja w powietrzu. S ..... (881)
8. **exposure rate** : → *rate 32*
9. **exposure rate constant** : → *constant 20*
10. **exposure ratemeter** : → *ratemeter 3*
11. **interval between X-ray tube exposures** : → *interval 11*
12. **luminous exposure** (at a point of a surface, for a given duration) (H_v; H) : quotient of dQ_v, quantity of light incident on an element of the surface containing the point over the given duration, by the area dA of that element. *Equivalent definition.* Time integral of E_v, illuminance at the given point, over the given duration Δt.

$$H_v = \frac{dQ_v}{dA} = \int_{\Delta t} E_v \cdot dt$$

Unit : $lx \cdot s = lm \cdot s \cdot m^{-2}$. ★ exposition lumineuse → *exposition 11.* R световая экспозиция (в точке поверхности, для данной длительности). D Belichtung (an einem Punkt einer Oberfläche, während einer gegebenen Zeit). E exposición luminosa. I esposizione luminosa. N belichtingsdosis. P naświetlenie. S ljusexponering. (845)
13. **oblique exposure** : a section where the exposure is such that the distance between the lines varies almost linearly along the line. ★ rapprochement oblique → *rapprochement 2.* R расходящееся расположение линий. D schräge Näherung.

E proximidad oblicua. I avvicinamento progressivo. N scheve blootstelling. P zbliżenie ukośne. S sned närmesträcka. (604)

14. **photon exposure** (at a point of a surface, for a given duration) (H_p; H) : quotient of dQ_p, number of photons incident on an element of the surface containing the point over the given duration, by the area dA of that element. *Equivalent definition.* Time integral of E_p, photon irradiance at the given point, over the given duration Δt.

$$H_p = \frac{dQ_p}{dA} = \int_{\Delta t} E_p \cdot dt$$

Unit : m^{-2}. ★ exposition photonique → *exposition 12.* R фотонная экспозиция (в точке поверхности, для данной длительности). D Photonenbestrahlung (an einem Punkt einer Oberfläche, während einer gegebenen Zeit). E exposición fotónica. I esposizione fotonica. N fotonendosis. P napromienienie fotonowe. S fotonexponering. (845)

15. **radiant cylindrical exposure** (at a point, for a given direction and duration) ($H_{e,z}$; H_z) : time integral of the cylindrical irradiance $E_{e,z}$ at the given point for the given direction, over the given duration Δt.

$$H_{e,z} = \int_{\Delta t} E_{e,z} \cdot dt$$

Unit : $J \cdot m^{-2} = W \cdot s \cdot m^{-2}$ *Note.* — The analogous quantities "luminous cylindrical exposure" $H_{v,z}$ and "photon cylindrical exposure" $H_{p,z}$ are defined in a similar way, replacing cylindrical irradiance $E_{e,z}$ by cylindrical illuminance $E_{v,z}$ or photon cylindrical irradiance $E_{p,z}$. ★ exposition cylindrique énergétique → *exposition 8.* R энергетическая цилиндрическая экспозиция (в какой-либо точке, для данных направлений и длительности). D zylindrische Bestrahlung (an einem Punkt, für eine gegebene Richtung und Zeitdauer). E exposición radiante cilíndrica. I esposizione energetica cilindrica. N cilindrische bestralingsdosis. P napromienienie cylindryczne. S cylindrisk strålningsexponering. (845)

16. **radiant exposure** (at a point of a surface, for a given duration) (H_e; H) : quotient of dQ_e, radiant energy incident on an element of the surface containing the point over the given duration, by the area dA of that element. *Equivalent definition.* Time integral of E_e, irradiance at the given point, over the given duration Δt.

$$H_e = \frac{dQ_e}{dA} = \int_{\Delta t} E_e \cdot dt$$

Unit : $J \cdot m^{-2} = W \cdot s \cdot m^{-2}$ *Note.* — The quantity "exposure" here defined must not be confused with the quantity also named exposure which is used in the field of X and γ rays, the unit of which is coulomb per kilogram ($C \cdot kg^{-1}$). ★ exposition énergétique → *exposition 10.* R энергетическая экспозиция (в точке поверхности, для данной длительности). D Bestrahlung (an einem Punkt einer Oberfläche, während einer gegebenen Zeit). E exposición radiante. I esposizione energetica. N bestralingsdosis. P napromienienie. S strålningsexponering. (845)

17. **radiant spherical exposure** (at a point, for a given duration) (*Syn.* radiant fluence) ($H_{e,o}$; H_o) : time integral of the spherical irradiance $E_{e,o}$ at the given point over the given duration Δt.

$$H_{e,0} = \int_{\Delta t} E_{e,0} \cdot dt$$

Unit : $J \cdot m^{-2} = W \cdot s \cdot m^{-2}$ *Note.* — The analogous quantities "luminous spherical exposure" $H_{v,o}$ and "photon spherical exposure" $H_{p,o}$ are defined in a similar way, replacing spherical irradiance $E_{e,o}$ by spherical illuminance $E_{v,o}$ or photon spherical irradiance $E_{p,o}$. ★ exposition sphérique énergétique → *exposition 13.* R энергетическая сферическая экспозиция (в точке, за данную длительность). D Raumbestrahlung (an einem Punkt, für eine gegebene Zeitdauer); Energiefluenz. E exposición radiante esférica. I esposizione energetica sferica. N sferische bestralingsdosis; stralingsfluentie. P napromienienie sferyczne. S sfärisk strålningsexponering. (845)

18. **single X-ray tube exposure** : energizing of an X-ray tube that is not followed by another until the X-ray tube returns to ambient temperature. ★ pose isolée → *pose 4.* R однократное включение рентгеновской трубки. D Einzelbelastung (einer Röntgenröhre). E exposición aislada de un tubo de rayos X. I esposizione singola di un tubo a raggi X. N enkelvoudige röntgenbuisbelasting. P pojedyńcza ekspozycja lampy rentgenowskiej. S enkelexponering. (881)

19. **sound exposure** : time integral of squared, instantaneous A-frequency-weighted sound pressure over a stated time interval or event, such as an aircraft flyover. The frequency weighting may be other than A-, if so specified. *Notes. 1* — Duration of integration is implicitly included in the integral, and need not be reported explicitly. *2* — The unit of sound exposure is the pascal-squared second (Pa^2s), if time is in seconds ; the pascal-squared kilosecond (Pa^2ks), if time is in kiloseconds ; the pascal-squared hour (Pa^2h), if time is in hours. ★ exposition au bruit → *exposition 7.* R звуковая экспозиция. D ..... E exposición al ruido. I esposizione al rumore. N blootstelling aan geluid. P narażenie szumowe. S ..... (801)

20. **sound exposure level** : → *level 85*

21. **X-ray tube exposure** : energizing of an X-ray tube by applying predetermined high voltage and current for a specified time. ★ pose → *pose 3.* R включение рентгеновской трубки. D Röntgenröhrenbelastung. E exposición de un tubo de rayos X; carga de un tubo de rayos X. I esposizione di un tubo a raggi X. N röntgenbuisbelasting. P ekspozycja lampy rentgenowskiej. S exponering. (881)

22. **X-ray tube exposure cycle time** : → *time 228*

23. **X-ray tube exposure frequency** : → *frequency 197*

24. **X-ray tube exposure series** : → *series 33*

exposure meter

1. **direct reading pocket exposure meter** : a pocket exposure meter comprising a capacitor ionization chamber and an electrometer which may be read directly. ★ stylo exposimètre à lecture directe → *stylo 5.* R прямопоказывающий карманный измеритель экспозиционной дозы. D direkt ablesbares Taschendosimeter. E exposímetro de bolsillo de lectura directa. I stilo esposimetro a lettura diretta. N direct afleesbare zakexposiemeter (pentype); penexposiemeter; zakexposiemeter (pentype); penexposiemeter; direct afleesbare. P miernik dawki ekspozycyjnej kieszonkowy z bezpośrednim odczytem. S pennexpositionsmätare med direktavläsning. (391)

2. **exposure meter** : a radiation meter intended to measure exposure. ★ exposimètre → *exposimètre 3.* R измеритель экспозиционной дозы. D Dosimeter. E exposímetro. I esposimetro. N exposiemeter. P miernik dawki ekspozycyjnej. S expositionsmätare. (391,881)

3. **exposure meter** : instrument for ascertaining the correct settings of the lens aperture, shutter speed, etc. of a camera. ★ posemètre → *posemètre 1.* R экспонометр. D Belichtungsmesser. E exposímetro. I esposimetro. N belichtingsmeter. P światłomierz. S exponeringsmätare. (845)

4. **exposure meter charger** : → *charger 3*

5. **exposure meter charger reader** : → *reader 2*

6. **indirect reading pocket exposure meter** : pocket exposure meter comprising a capacitor ionization chamber which must be read with a separate reader. ★ stylo exposimètre à lecture indirecte → *stylo 6.* R карманный измеритель экспозиционной дозы с косвенным отсчетом показаний. D indirekt ablesbares Taschendosimeter. E exposímetro de bolsillo de lectura indirecta. I stilo esposimetro a lettura indiretta. N zakexposiemeter (pentype); penexposiemeter; niet direct afleesbare. P miernik dawki ekspozycyjnej kieszonkowy z pośrednim odczytem. S pennexpositionsmätare med indirekt avläsning. (391)

7. **personal exposure meter** : exposure meter of small size intended to be carried by a person in order to determine the exposure received by this person. ★ exposimètre individuel → *exposimètre 4.* R измеритель экспозиционной дозы. D Personendosimeter. E exposímetro individual. I esposimetro individuale. N persoonlijke exposiemeter. P miernik dawki ekspozycyjnej indywidualny. S personexpositionsmätare. (391)

8. **photoluminescent personal exposure meter** : personal exposure meter comprising a photoluminescence detector, a separate reader being used for reading. ★ exposimètre individuel à photoluminescence → *exposimètre 5.* R индивидуальный радиофотолюминесцентный измеритель экспозиционной дозы. D Photoluminiszenz-Personendosimeter. E exposímetro individual de fotoluminiscencia. I esposimetro individuale a fotoluminescenza. N persoonlijke exposiemeter met fotoluminescentie. P miernik dawki ekspozycyjnej

f o t o l u m i n e s c e n c y j n y . S fotoluminiscenspersonexpositionsmätare. (391)

9. **pocket exposure meter** : personal exposure meter with the form and the dimensions of a fountain-pen. ★ stylo exposimètre → *stylo 4.* R карманный измеритель экспозиционной дозы. D Taschendosimeter. E exposímetro de bolsillo. I stilo esposimetro. N penexposiemeter; zakexposiemeter (pentype). P miernik dawki ekspozycyjnej kieszonkowy. S pennexpositionsmätare. (391)
10. **radiant exposure meter** : instrument for measuring radiant exposure. ★ ..... → . R энергетический экспозиметр. D Bestrahlungsmesser. E exposímetro radiante. I esposimetro radiometrico. N bestralingsmeter. P miernik napromienienia. S strålningsexponeringsmätare. (845)
11. **reader for photoluminescent exposure meter** : → *reader 4*
12. **reader of thermoluminescent exposure meter** : → *reader 6*
13. **thermoluminescent personal exposure meter** : personal exposure meter comprising a thermoluminescence detector, a separate reader being used for reading. ★ exposimètre individuel à thermoluminescence → *exposimètre 6.* R индивидуальный термолюминесцентный измеритель э к с п о з и ц и о н н о й д о з ы . D Thermoluminiszenz-Personendosimeter. E exposímetro individual de termoluminiscencia. I esposimetro individuale a termoluminescenza. N persoonlijke exposiemeter met thermoluminescentie. P miernik dawki ekspozycyjnej t e r m o l u m i n e s c e n c y j n y . S termoluminiscenspersonexpositionsmätare. (391)

expulsion

1. **expulsion fuse** : → *fuse 2*
2. **expulsion type arrester** : → *arrester 2*

extended

1. **extended definition television (system)** : → *television 11*
2. **extended rating current** : → *current 81*
3. **extended rating type current transformer** : → *transformer 31*

extended-interaction

1. **extended-interaction klystron** : → *klystron 1*
2. **extended-interaction plasma tube** : → *tube 31*

extender

1. **extender** : a liquid or solid substance added to a resin or a plastic to reduce cost. ★ matière de charge → *matière 9.* R удешевляющая добавка. D Extender; Füllstoff. E carga. I materiale di carica. N vulmiddel. P wypełniacz. S fyllmedel; utdrygningsmedel. (212)
2. **line extender** (*Syn.* spur amplifier) : → *amplifier 28*
3. **range extender** : an apparatus used in a local line network to enable satisfactory signalling, supervision and transmission to be obtained on a telephone line exceeding the usual limits allowed for in the switching entity design. ★ équipement de ligne longue d'abonné → *équipement 12.* R устройство для абонентских линий большой протяженности. D Reichweitenvergrößerer. E equipo de línea larga de abonado. I estensore di linea. N ..... P przedłużacz zasięgu lini abonenckiej. S abonnentöverdrag. (722)

extension

1. **body extension** : portion of a tower body which can be added to the lowest part of a given tower to increase its height. ★ tronçon de rallongement → *tronçon 3.* R дополнительная секция опоры. D Mastverlängerung. E suplemento. I tronco. N mastverhogingsstuk. P podwyższenie słupa. S stolpkroppsförlängning. (466)
2. **completely restricted extension** : in a private branch exchange, an extension restricted to internal telephone calls only. ★ poste privé → *poste 50.* R дополнительный абонентский аппарат без права выхода в город. D Nebenstelle ohne Amtsberechtigung; nicht amtsberechtigte Nebenstelle. E extensión restringida. I apparecchio telefonico derivato. N aansluiting voor intern verkeer. P aparat telefoniczny sieci wewnętrznej. S spärrad anknytning. (722)
3. **error extension** (*Syn.* error multiplication) : → *multiplication 2*
4. **extension** (*Syn.* subscriber's extension station) : a telephone station associated with a subscriber's main station or with a private branch exchange. ★ poste (téléphonique) supplémentaire → *poste 73.* R дополнительный абонентский аппарат. D Nebenstelle. E teléfono supletorio; extensión. I apparecchio telefonico addizionale. N neventoestel. P aparat (telefoniczny) dodatkowy. S sidoapparat. (722)
5. **extension line** : → *line 36*
6. **hill-side extension** (*Syn.* leg extension) : a portion added at the base of a tower designed to suit the body and used to compensate for variations in levels on hill-sides (see fig. 3.31). *Note.* — Leg extension can also be used to adjust the height of a tower. ★ pied dissymétrique → *pied 4.* R нога косогорной опоры. D Schrägfußverlängerung. E patas desiguales. I zoppicatura. N pootverlenging voor hellend terrein. P konstrukcja wyrównawcza. S stolpbensförlängning. (466)
7. **leg extension** (*Syn.* hill-side extension) : → *extension 6*
8. **nose extension** : a trace seen on an oblique-incidence ionogram extending beyond that of the low-angle ray at frequencies above the junction frequency. *Note.* — Nose extensions can arise from modes involving scattering or off-great-circle propagation. ★ extension de trace → *extension 2.* D ..... P występ w jonogramie (powyżej częstotliwości łącznej). (705)
9. **shaft extension** : → *shaft 8*
10. **subscriber's extension station** (*Syn.* extension) : → *extension 4*

extent

1. **geometric extent** (of a beam of rays) (G) : integral taken over the whole beam of the elementary quantity dG defined by the equivalent formulae

$$dG = \frac{dA \cdot \cos\theta \cdot dA' \cdot \cos\theta'}{l^2} = dA \cdot \cos\theta \cdot d\Omega$$

where dA and dA' are the areas of two sections of an element of the beam separated by the distance l ; θ and θ' are the angles between the direction of that elementary beam and the normals to dA and dA' ;

$$d\Omega = \frac{dA' \cdot \cos\theta'}{l^2}$$

is the solid angle subtented by dA' from a point on dA. Unit : $m^2 \cdot sr$ *Note.* — For a beam propagating through successive non-diffusing media, the quantity $G \cdot n^2$, where n is the refractive index, is invariant. That quantity is called the "optical extent". ★ étendue géométrique → *étendue 7.* R геометрический фактор (пучка лучей). D geometrischer Leitwert (eines Strahlenbündels); geometrischer Fluß. E flujo geométrico. I estensione geometrica. N bundelomvang. P wskaźnik geometryczny. S geometrisk omfattning. (845)

external

1. **asymmetric bridge with external commutation "out"** : → *bridge 1*
2. **external blocking** : → *blocking 10*
3. **external cathode counter tube** : → *counter tube 8*
4. **external commutation** : → *commutation 17*
5. **external disabled state** : → *state 14*
6. **external disabled time** : → *time 53*
7. **external gas pressure cable** : → *cable 27*
8. **external groove sidewall** : → *sidewall 1*
9. **external gun** : → *gun 4*
10. **external immunity** : → *immunity 1*
11. **external insulation** : → *insulation 15*
12. **external loss time** (*Syn.* external disabled time) : → *time 53*
13. **external noise** : → *noise 22*
14. **external overvoltage** : → *overvoltage 1*
15. **external photo-electric effect** (*Syn.* photo-emissive effect) : → *effect 55*
16. **external synchronization** : → *synchronization 3*
17. **external triggering** : → *triggering 1*

externally

1. **externally reflected component of daylight factor** : → *component 23*

externally-quenched

1. **externally-quenched counter tube** : → *counter tube 9*

extinction

1. **extinction** : the termination of current conduction in an arm. ★ extinction → *extinction 9.* **R** выключение; запирание. **D** Löschung. **E** extinción. **I** estinzione. **N** doven. **P** wygaszanie. **S** släckning. (811)
2. **extinction angle** : → *angle 26*
3. **extinction current** : → *current 83*
4. **extinction voltage** : → *voltage 65*

extracting

1. **extracting electrode** : → *electrode 61*

extraction

1. **contact extraction force** : → *force 9*
2. **extraction tool** : → *tool 2*

extra-focal

1. **extra-focal radiation** : → *radiation 24*

extraneous

1. **extraneous conductive part** : → *part 4*

extraordinary

1. **extraordinary wave** : → *wave 12*

extrapolated

1. **extrapolated** : qualifies a predicted value based on observed or estimated values for one or a set of conditions, intended to apply to other conditions such as time, maintenance and environmental conditions. ★ extrapolé → *extrapolé 1.* **R** экстраполированный. **D** extrapoliert. **E** ... extrapolado. **I** estrapolato. **N** geextrapoleerd. **P** ekstrapolowany. **S** extrapolerad. (191)
2. **extrapolated boundary** : → *boundary 1*

extrapolation

1. **extrapolation ionization chamber** : → *ionization chamber 10*

extraterrestrial

1. **extraterrestrial solar radiation** : → *radiation 25*

extreme

1. **extreme range of an influencing factor** : → *range 23*
2. **extreme range of an influencing quantity** : → *range 24*

extrinsic

1. **extrinsic joint loss** : → *loss 29*
2. **extrinsic semiconductor** : → *semiconductor 4*

extruded

1. **extruded insulation** : → *insulation 16*

eye

1. **magic eye** : a vacuum tube employing a beam of electrons for indicating visually the comparative magnitude of a direct or alternating voltage by means of the area of luminescence produced on an enclosed luminescent screen. ★ œil magique → *œil 1.* **R** электроннооптический индикатор настройки. **D** magisches Auge. **E** ojo mágico. **I** occhio magico. **N** afstemindicatorbuis; afstemoog. **P** wskaźnik strojenia elektronowy. **S** indikatorrör; «magiskt öga». (531)

eyelet

1. **eyelet** (*Syn.* contact plate) : → *plate 1*

Eyring

1. **Eyring absorption coefficient** : → *coefficient 22*

F

f

1. *f* factor : → *factor 1*

F

2. **farad, F** : → *farad 1*

fabric

1. **bias-cut fabric** : material cut so that both warp and weft threads make an angle with the edges other than 0° or 90°. ★ tissu coupé biais → *tissu 5.* R косо нарезанная ткань. D Diagonalschnitt-Gewebe. E tejido de corte diagonal. I tessuto tagliato diagonale. N schuin gesneden weefsel. P tkanina cięta skośnie. S snedskuret tyg. (212)
2. **fabric** : a sheet material produced from textile fibres by a weaving process unless otherwise specified. ★ tissu → *tissu 4.* R ткань. D Gewebe. E tejido. I tessuto. N weefsel. P tkanina. S tyg. (212)
3. **non-woven fabric (product)** : 1. A product of fibres held together without passing over and under each other in a regular pattern. 2. Mat in which the fibres are bonded together by means of a heat treatment or a binding agent, the material still being pliable. ★ (produit) non tissé → *produit 7.* R нетканный материал. D Faservliesstoff(-Erzeugnis). E fieltro. I non tessuto (prodotto). N niet-geweven textiel; vezelvlies. P materiał włóknisty nie tkany. S fibertyg. (212)
4. **panel form bias-cut fabric** : bias-cut material in short lengths not joined together. ★ tissu coupé biais forme panneau → *tissu 8.* R кусковая косо нарезанная ткань. D Tafelform von Diagonalschnitt-Gewebe. E tejido de corte diagonal formando paneles. I tessuto tagliato diagonale a forma di foglio. N tussenzetsel van schuingesneden weefsel. P płat tkaniny cięte j. S ..... (212)
5. **seamless bias-cut fabric** : bias-cut material produced in a continuous length by helical cutting from a woven sleeve and then varnished. ★ tissu coupé biais sans couture → *tissu 9.* R бесшовная косо нарезанная ткань. D nahtloses Diagonalschnitt-Gewebe. E tejido de corte diagonal sin costura. I tessuto tagliato diagonale senza cucitura. N schuingesneden weefsel zonder zoom. P tkanina cięta skośnie bezszwowa. S ..... (212)
6. **sewn bias-cut fabric** : bias-cut material in short lengths sewn together before or after varnishing, to form a continuous length. ★ tissu coupé biais cousu → *tissu 7.* R сшитая косо нарезанная ткань. D genähtes Diagonalschnitt-Gewebe. E tejido de corte diagonal cosido. I tessuto tagliato diagonale cucito. N aan elkaar genaaid schuingesneden weefsel. P tkanina cięta skośnie zszywana. S ..... (212)
7. **slit fabric** : material without selvages cut from full width material. ★ tissu découpé → *tissu 10.* R ленточная ткань. D geschnittenes Gewebe. E tejido cortado. I tessuto tagliato. N weefsel zonder zelfkant. P tkanina cięta poprzecznie. S kantskuret tyg. (212)
8. **straight-cut fabric** : material cut parallel to the warp direction. ★ tissu découpé droit fil → *tissu 11.* R прямонарезанная ткань. D Parallelschnitt-Gewebe. E tejido de corte recto. I tessuto tagliato diritto. N op de draad gesneden weefsel. P tkanina cięta wzdłużnie. S rakskuret tyg. (212)
9. **stuck bias-cut fabric** : bias-cut material in short lengths stuck together with an adhesive after varnishing, to form a continuous length. ★ tissu coupé biais collé → *tissu 6.* R склеенная косо нарезанная ткань. D geklebtes Diagonalschnitt-Gewebe. E tejido de corte diagonal encolado. I tessuto tagliato diagonale incollato. N geperst schuingesneden weefsel. P tkanina cięta skośnie łączona klejem. S ..... (212)
10. **varnished fabric** : a fabric coated usually on both sides and to a varying degree impregnated with a flexible insulating varnish or resin. Elastomeric coatings may be used for similar products. ★ tissu verni → *tissu 12.* R электроизоляционная лакоткань. D Lackgewebe. E tejido barnizado. I tessuto verniciato. N olielinnen. P tkanina lakierowana. S lackimregnerat tyg. (212)

face

1. **face luminaire** : → *luminaire 6*
2. **hot face** : the surface area of a refractory walling which forms the furnace chamber adjacent to the heat source. ★ face chaude → *face 11.* R горячая сторона поверхности футеровки. D Heisswand. E cara caliente. I faccia calda. N hete wand. P powierzchnia czołowa gorąca. S varm ugnsvägg. (841)
3. **north pole face** : the pole face of a magnet, away from which the external magnetic flux is directed. ★ face polaire nord → *face 14.* R поверхность северного полюса. D Nordpolfläche. E cara polar norte (de un imán). I faccia polare nord (di un magnete). N noordpooloppervlak. P powierzchnia bieguna północnego. S nordpolyta. (221)
4. **pole face** : the surface of a magnet through which the useful magnetic flux passes. ★ face polaire → *face 12.* R поверхность полюса. D Polfläche. E cara polar. I faccia polare. N pooloppervlak. P powierzchnia bieguna (magnesu). S polyta. (221)
5. **pole face** : the surface of the pole shoe forming one boundary of the air gap. ★ face polaire → *face 13.* R поверхность полюса. D Polfläche. E cara polar. I superfice dell'espansione polare. N poolvlak. P powierzchnia bieguna. S polyta. (411)
6. **pole face level** : → *level 69*
7. **pole face shaping** : → *shaping 1*
8. **south pole face** : the pole face of a magnet, into which the external magnetic flux is directed. ★ face polaire sud → *face 15.* R поверхность южного полюса. D Südpolfläche. E cara polar sur (de un imán). I faccia polare sud (di un magnete). N zuidpooloppervlak. P powierzchnia bieguna południowego. S sydpolyta. (221)

face-plate

1. **face-plate** : a glass plate carrying the luminescent screen and attached to the cone. ★ face → *face 8.* R фронтальная плоскость. D Frontglas; Frontscheibe. E cara. I faccia. N venster. P płyta czołowa. S frontskiva. (531)

facet

1. **surface burnishing facet** : the portion of the cutting stylus directly behind the cutting edge intended for polishing the groove walls. ★ facette de brunissage → *facette 1.* R полирующая фаска. D Facette. E perfil de pulido. I fascetta di brunitura. N polijstvlakken. P krawędź rylca (polerująca). S ..... (806)

facility

1. **facility request signal** : → *signal 87*
2. **user facility** : a facility which may be provided on request to a user of the telecommunication network in addition to the normal service provided. *Note.* — A user facility may be provided on a per call basis or for an agreed period of time. ★ service complémentaire → *service 36.* R услуга для абонентов. D Benutzerleistungsmerkmal. E servicio complementario. I prestazioni d'utente. N gebruikersfaciliteit. P udogodnienie użytkowe. S tjänst. (721)

facsimile

1. **black and white facsimile** (*Syn.* document facsimile) : → *facsimile 2*
2. **document facsimile** (*Syn.* black and white facsimile) : facsimile in which the original document is reproduced with two optical density levels. ★ télécopie contrastée → *télécopie 3.* R документальная факсимильная связь; черно-белая факсимильная связь. D Schwarz-Weiß-Faksimile. E telecopia contrastada; telecopia bivalente. I facsimile a due livelli. N zwart/wit-facsimile. P symilografia czarno-biała. S tvåtonsfaksimil. (721)
3. **document facsimile equipment, Group 1** : → *equipment 25*
4. **document facsimile equipment, Group 2** : → *equipment 26*

5. **document facsimile equipment, Group 3** : → *equipment 27*
6. **document facsimile telegram** : → *telegram 2*
7. **facsimile** (*Syn.* telecopy) : a form of telecommunication for the reproduction at a distance of graphic documents in the form of other graphic documents geometrically similar to the original. ★ télécopie → *télécopie 1.* R факсимильная связь; факсимильная телеграфля. D Fernkopieren. E facsímil. I fac simile. N facsimile. P teleskrypcja; teleautografia. S telefaksimil. (701,721)
8. **photograph facsimile telegram** : → *telegram 3*
9. **picture facsimile** : facsimile in which the reproduction may present graded tonal densities. ★ télécopie nuancée → *télécopie 4.* R полутоновая факсимильная связь. D Bildfaksimile. E grabado facsímil. I facsimile a più livelli di grigio. N beeldfacsimile. P symilografia odcieniowa. S bildfaksimil. (721)

factor

1. *f* factor : the factor by which the exposure at some point in a body or phantom must be multiplied to give the absorbed dose at that point if photon equilibrium exists. ★ facteur *f* → *facteur 7.* R коэффициент *f.* D *f*-Faktor. E factor *f.* I fattore *f.* N *f*-factor. P współczynnik *f.* S *f*-faktor. (881)
2. **a.c. conversion factor** (for an a.c. convertor) : the ratio of the fundamental output power to the fundamental input power. ★ facteur de conversion en courant alternatif → *facteur 48.* R коэффициент преобразования переменного тока (для преобразователя параметров переменного тока). D Wechselstrom-Umrichtgrad. E factor de conversión en corriente alterna (para un convertidor de corriente alterna). I fattore di conversione in corrente alternata (di un convertitore in corrente alternata). N wisselstroomomzetfactor (voor een wisselstroomomzetter). P współczynnik przekształcania przemiennoprądowego. S omriktarfaktor för vs-omriktare. (551)
3. **accuracy limit factor** (of a protective current transformer) : the ratio of the rated accuracy limit primary current to the rated primary current. ★ facteur limite de précision → *facteur 198.* R номинальная предельная кратность (трансформатора тока для защиты). D Fehlergrenzfaktor (eines Stromwandlers für Schutzzwecke). E factor límite de precisión (de un transformador de intensidad para protección). I fattore limite di precisione (di un trasformatore di corrente per protezione). N nauwkeurigheidsgrensfactor (van een beveiligingsstroomtransformator). P współczynnik graniczny dokładności. S märköverströmstal för reläkärna. (321)
4. **active mass factor** (*Syn.* effective mass factor) : the ratio of the active mass to the total mass of a magnetic body. ★ facteur de masse active → *facteur 103.* R фактор эффективной массы. D Faktor der aktiven Masse; Faktor der effektiven Masse. E factor de masa activa; factor de masa efectiva. I fattore di massa attiva; fattore di massa effettiva. N actieve massafactor; effectieve massafactor. P współczynnik masy równoważnej. S effektiv massfaktor. (221)
5. **activity factor** : the ratio of the ion activity to the ion concentration. ★ facteur d'activité → *facteur 21.* R коэффициент активности. D Aktivitätsfaktor; Aktivitätskoeffizient (nicht empfohlen). E factor de actividad. I coefficiente d'attività. N activiteitsfactor; activiteitscoëfficiënt. P współczynnik aktywności. S aktivitetsfaktor. (111)
6. **amplification factor** : the voltage factor or mu factor for a stated electrode and the control electrode, the anode current being maintained constant. ★ facteur d'amplification du tube → *facteur 27.* R коэффициент усиления. D Leerlaufverstärkung, Verstärkungsfaktor. E factor de amplificación. I fattore di amplificazione del tubo. N versterkingsfactor. P współczynnik wzmocnienia. S förstärkningsfaktor. (531)
7. **amplitude modulation factor** : the ratio of half the difference of the maximum and minimum amplitudes to the mean value of the amplitude. *Note.* — This definition does not apply to asymmetrical modulation or overmodulation. ★ taux de modulation d'amplitude → *taux 23.* R коэффициент амплитудной модуляции. D Amplitudenmodulationsgrad. E factor de modulación de amplitud. I fattore di modulazione d'ampiezza; indice di modulazione d'ampiezza. N modulatiediepte. P głębokość modulacji (amplitudowej). S amplitudmoduleringsfaktor. (303)
8. **(amplitude) reflection factor** : the ratio of the complex value of a given component of the electric field of a reflected wave to that of the corresponding component of the incident wave, at a point close to a reflective specular surface. *Note.* — In the case of transmission lines, reflection factor is defined similarly as the ratio of the reflected wave and the direct wave at a port or transverse cross-section. ★ facteur de réflexion (complexe) → *facteur 132.* D Reflexionsfaktor. P współczynnik odbicia (amplitudowy). (705)
9. **(amplitude) reflection factor** (in a transmission line) : the ratio of the normalized complex wave amplitude of the reflected wave to that of the incident wave at a port or transverse cross-section of a transmission line. ★ facteur de réflexion complexe → *facteur 133.* R (амплитудный) фактор отражения (в линии передачи). D (Amplituden-)Reflexionsfaktor (in einer Übertragungsleitung). E factor de reflexión (en una línea de transmisión). I riflettenza complessa (in una linea di trasmissione). N reflectiefactor. P współczynnik odbicia (amplitudowy) (w linii przesyłowej). S reflexionsfaktor. (726)
10. **(amplitude) transmission factor** (in a transmission line) : the ratio of the normalized complex wave amplitude of the transmitted wave at one port or transverse cross-section to that of the incident wave at another port or transverse cross-section of a transmission line. ★ facteur de transmission complexe → *facteur 165.* R (амплитудный) фацтор передачи (в линии передачи). D (Amplituden-)Übertragungsfaktor (in einer Übertragungsleitung). E factor de transmisión (en una línea de transmisión); coeficiente de transmisión. I trasmettenza complessa (in una linea di trasmissione). N transmissiefactor. P współczynnik transmisji (amplitudowy) (w linii przesyłowej). S transmissionsfaktor. (726)
11. **aperture blocking factor** (in a reflector antenna) : the relative reduction in effective area of a reflector antenna due to the masking effect of antenna parts, such as the feed, struts and sub-reflector. ★ facteur d'ombre → *facteur 185.* R коэффициент затенения раскрыва (в рефлекторной антенне). D Aperturabschattungsfaktor (einer Reflektorantenne). E factor de obstrucción de apertura (en una antena de reflector). I efficacia di bloccaggio. N apertuurafschermingsfactor (in een reflectorantenne). P współczynnik blokowania apertury (w antenie z reflektorem). S blockeringsfaktor. (712)
12. **array factor** : for a given array antenna, the radiation pattern function which would be obtained if all the elements of the array would be radiated isotropically. *Note.* — If the radiation pattern function of all the radiating elements of the array are identical and if these elements are congruent by translation, then the product of the array factor and the element radiation pattern function gives the radiation pattern of the entire array antenna. ★ fonction (caractéristique) de réseau → *fonction 14.* R множитель антенной решетки. D Gruppencharakteristik; Gruppenfaktor. E factor del conjunto. I fattore di schiera. N systeemfactor. P współczynnik zestawu antenowego. S gruppfaktor. (712)
13. **attenuation factor** : for a given attenuating body in a given configuration, the factor by which a radiation quantity at some point of interest is reduced owing to the interposition of the body between the source of radiation and the point of interest. ★ facteur d'atténuation → *facteur 32.* D materieller Schwächungsfaktor. E factor de atenuación. I fattore d'attenuazione. N verzwakkingsfactor. P stosunek osłabienia. S dämpningsfaktor. (026)
14. **availability factor** : the ratio of the up duration to the period of time under consideration. ★ taux de disponibilité → *taux 13.* R коэффициент готовности к работе. D Verfügbarkeitsgrad. E factor de disponibilidad (en tiempo). I tasso di disponibilità (durata). N beschikbaarheidsfactor. P współczynnik dyspozycyjności. S tillgänglighetsfaktor. (603)
15. **backscatter factor** : the scatter factor for X-rays at the intersection of the beam axis with the surface of the body or phantom, used for X-rays at tube voltages less than 400 kV. ★ facteur de rétrodiffusion → *facteur 155.* R коэффициент обратного рассеяния. D Rückstreufaktor. E factor de retrodifusión. I fattore di retrodiffusione. N terugverstrooiingsfactor. P współczynnik rozpraszania wstecznego. S återspridningsfaktor. (881)
16. **ballast lumen factor** : ratio of the luminous flux emitted by a reference lamp when operated with a particular production ballast to the luminous flux emitted by the same lamp when operated with its reference ballast. ★ facteur de flux (lumineux) d'un ballast → *facteur 86.* R световой показатель балласта. D Vorschaltgerät-Lichtstromfaktor.

E factor de flujo del balasto. I fattore di flusso di un alimentatore. N ballast-lumenfactor. P ..... S ljusflödesfaktor för förkopplingsdon. (845)

17. **beam-compression factor** : → *beam-compression 1*

18. **build-up factor** : → *build-up 2*

19. **build-up factor** : in calculations of protective barriers, the ratio of the broad-beam to the narrow-beam transmission at the given depth. ★ facteur d'accumulation → *facteur 20.* R коэффициент накопления. D Aufbaufaktor. E factor de acumulacion. I fattore di build-up. N opbouwfactor; accumulatie-factor. P współczynnik akumulacji. S tillväxtfaktor. (881)

20. **charge factor** : the factor by which the quantity of electricity delivered during discharge is multiplied to determine the minimum quantity required by the battery to recover its fully charged state. ★ facteur de charge → *facteur 36.* R коэффициент заряда. D Ladefaktor. E factor de carga. I fattore di carica. N laadfactor. P współczynnik ładowania. S laddningsfaktor. (486)

21. **coincidence factor** : the ratio, expressed as a numerical value or as a percentage, of the simultaneous maximum demand of a group of electrical appliances or consumers within a specified period, to the sum of their individual maximum demands within the same period. *Note.* — In using this term, it is necessary to specify to which level of the system it relates. ★ facteur de simultanéité → *facteur 158.* R коэффициент одновременности. D Gleichzeitigkeitsfaktor. E factor de simultaneidad. I fattore di contemporaneità; fattore di simultaneità. N gelijktijdigheidsfactor. P współczynnik jednoczesności. S sammanlagringsfaktor. (691)

22. **compensation factor** (of a compensated ionization chamber) : the ratio of the sensitivity to undesired radiation of the compensated ionization chamber to the sensitivity to the same undesired radiation of the same chamber, if it were not compensated. ★ facteur de compensation → *facteur 40.* R коэффициент компенсации (скомпенсированной ионизационной камеры). D Kompensationsgrad (einer kompensierten Ionisationskammer). E factor de compensación (de una cámara de ionización compensada). I fattore di compensazione (di una camera di ionizzazione compensata). N compensatiefactor (v.e. compensatie-ionisatievat). P współczynnik kompensacji (skompensowanej komory jonizacyjnej). S kompensationsfaktor (för kompenserad jonkammare). (391)

23. **(complex) reflection factor** (*Syn.* (complex) **reflection coefficient**) ($\underline{r}$) : the complex ratio of a sinusoidal field quantity, such as a reflected current or reflected wave component, to the corresponding field quantity of the incident current or incident wave at a point near the surface separating two propagation media, near a port of an electrical network or near a dicontinuity in a transmission line. *Notes. 1* — When the field quantity is a component of a plane electromagnetic wave, the sign of the reflection factor is different for an electric field component and the corresponding magnetic field component. *2* — When the field quantity refers to a port of an electrical network, or to a discontinuity in a transmission line, a voltage reflection factor can be defined with a sign opposite to that of the current reflection factor. *3* — When impedances can be defined, the complex current reflection factor $\underline{r}$ equals :

$$\underline{r} = \frac{\underline{Z} - \underline{Z}'}{\underline{Z} + \underline{Z}'}$$

where $\underline{Z}$ is the characteristic impedance of the transmission line ahead of the discontinuity or the impedance of the source and $\underline{Z}'$ is the impedance after the discontinuity or the load impedance seen from the junction between the source and the load. *4* — The reflection factor depends in the case of waveguides on the electromagnetic mode considered. ★ facteur de réflexion → *facteur 129.* R (комплексный) коэффициент отражения. D komplexer Reflexionskoeffizient; Amplitudenreflexionskoeffizient. E factor de reflexión; coeficiente de reflexión (complejo). I fattore di riflessione. N (complexe) terugkaatsings(reflectie)coëfficiënt. P współczynnik odbicia (zespolony). S reflektionsfaktor. (702)

24. **compression factor** (of a sound signal) : the difference between the dynamic ranges of a sound signal before and after compression. ★ facteur de compression → *facteur 41.* R степень сжатия (звукового сигнала). (723)

25. **configuration factor** (between two surfaces S_1 and S_2) (c) : ratio of the irradiance or illuminance at a point on surface S_2 (or S_1) due to the flux received from surface S_1 (or S_2), to the radiant or luminous exitance of surface S_1 (or S_2).

$$c_{21} = \frac{E_2}{M_1}; \qquad c_{12} = \frac{E_1}{M_2}$$

Unit : 1.The relation between the configuration factor c and the (mutual) exchange coefficient g is :

$$\int_{A2} c_{21}\,\mathrm{d}A_2 = \frac{\int_{A2} E_2\,\mathrm{d}A_2}{M_1} = \frac{\Phi_2}{M_1}$$

$$= g = \frac{\Phi_1}{M_2} = \frac{\int_{A1} E_1\,\mathrm{d}A_1}{M_2} = \int_{A1} c_{12}\,\mathrm{d}A_1$$

★ facteur de configuration → *facteur 43.* R коэффициент освещенности (между двумя поверхностями C_1 и C_2). D ..... E coeficiente de autocambio. I fattore di configurazione. N configuratiefactor. P współczynnik konfiguracji. S ..... (845)

26. **contrast rendering factor** (of a lighting system, for a task) : ratio of the contrast of the task under the lighting system considered, to the contrast of the same task under reference lighting. ★ facteur de rendu du contraste → *facteur 151.* R показатель передачи контраста. D Kontrastwiedergabefaktor (einer Beleuchtung, für eine Sehaufgabe). E factor de rendimiento en contraste. I fattore di resa del contrasto. N contrastweergavefactor. P wkaźnik oddawania kontrastu. S kontraståtergivningsfaktor. (845)

27. **convergence factor** : at a given point, the amplitude of a specified electromagnetic wave which has met convergence effects, divided by the amplitude of a wave which would have existed at the same point without these effects. *Note.* — When the specified wave is a wave reflected by a curved surface, the corresponding factor may be considered as a factor which multiplies the reflection factor of the reflecting surface assumed to be flat. ★ facteur de convergence → *facteur 45.* D Konvergenzfaktor; Fokussierrungsfaktor. P współczynnik zbieżności. (705)

28. **conversion factor** (in general) : the ratio of the fundamental output power or d.c. output power to the fundamental power or d.c. input power. ★ facteur de conversion → *facteur 46.* R коэффициент преобразования (в общем). D Stromrichtgrad. E factor de conversión (en general). I fattore di conversione. N omzetfactor (algemeen). P współczynnik przekształcania. S omriktarfaktor. (551)

29. **core factor** C_1 (*Syn.* core inductance parameter) (C_1) : for a magnetic core of given geometry, divided into a series of longitudinal elements of constant cross-section, the sum of the quotients of the lengths l of the elements measured along the assumed mean magnetic path and the corresponding cross-sectional areas A.

$$C_1 = \sum \frac{l}{A}$$

★ coefficient de noyau C_1 → *coefficient 39.* R коэффициент сердечника C_1; параметр индуктивности сердечника. D Kernfaktor C_1; Kern-Induktivätsparameter. E coeficiente de núcleo C_1; parámetro de inductancia (de un núcleo). I coefficiente di nucleo C_1; parametro di induttanza (di un nucleo). N zelfinductieparameter van een kern; kernfactor. P stała magnetowodu C_1. S kärnfaktor C_1; kärninduktansparameter. (221)

30. **core factor** C_2 (*Syn.* core hysteresis parameter) (C_2) : for a magnetic core of given geometry, divided into a series of longitudinal elements of constant cross-section, the sum of the quotients of the lengths l of the elements measured along the assumed mean magnetic path and the square of the corresponding cross-sectional areas A.

$$C_2 = \sum \frac{l}{A^2}$$

★ coefficient de noyau C_2 ↔ *coefficient 40.* R коэффициент сердечника C_2; параметр гистерезиса сердечника. D Kernfaktor C_2; Kern-Hystereseparameter. E coeficiente de núcleo C_2; parámetro histerético (de un núcleo). I coefficiente di nucleo C_2; parametro di isteresi (di un nucleo). N hysteresisparameter van een kern; kernfactor. P stała magnetowodu C_2. S kärnfaktor C_2; kärnhysteresparameter. (221)

31. **coupling factor** : the ratio of an electromagnetic quantity, usually voltage or current, appearing at a specified location of a given circuit to the corresponding quantity at a specified location in the circuit from which energy is transferred by coupling.. ★ facteur de couplage → *facteur 51.* R коэффициент связи. D Koppelfaktor. E factor de acoplamiento. I fattore di accoppiamento. N koppelfactor. P współczynnik sprzężenia. S kopplingsfaktor. (161)

32. **cyclic duration factor** : the ratio between the period of loading including starting and electric braking, and the duration of the duty cycle, expressed as a percentage. ★ facteur de marche → *facteur 100.* R продолжительность включения. D relative Einschaltdauer. E factor de marcha. I fattore di marcia. N belastingsfactor. P względny czas pracy. S intermittensfaktor. (411)

33. **daylight factor** (D) : ratio of the illuminance at a point on a given plane due to the light received directly or indirectly from a sky of assumed or known luminance distribution, to the illuminance on a horizontal plane due to an unobstructed hemisphere of this sky. The contribution of direct sunlight to both illuminances is excluded. *Notes. 1* — Glazing, dirt effects, etc. are included. *2* — When calculating the lighting of interiors, the contribution of direct sunlight must be considered separately. ★ facteur de lumière du jour → *facteur 96.* R коэффициент естественной освещенности. D Tageslichtquotient. E factor de luz de día. I fattore di luce diurna. N daglichtfactor. P współczynnik oświetlenia dziennego. S dagsljusfaktor. (845)

34. **d.c. conversion factor** : for d.c. conversion, the ratio between the d.c. power values of the load side and source side. ★ facteur de conversion en courant continu → *facteur 49.* R коэффициент преобразования постоянного тока. D Gleichstrom-Umrichtgrad. E factor de conversión en corriente continua. I fattore di conversione in corrente continua. N gelijkstroomomzetfactor. P współczynnik przekształcania stałoprądowego. S omriktarfaktor för ls-omriktare. (551)

35. **d.c. form factor** : the ratio of the r.m.s. value to the mean value averaged over a full period of a periodically varying quantity having a d.c. component. ★ facteur de forme en courant continu → *facteur 92.* R коэффициент формы постоянного тока. D halbe relative Schwingungsweite. E factor de forma de la corriente continua. I fattore di forma in corrente continua. N gelijkstroomvormfactor. P współczynnik kształtu prądu stałego. S ls-formfaktor. (551)

36. **d.c. ripple factor** (of a pulsating direct current) : the ratio of half the difference between the maximum and minimum value to the mean value of a pulsating direct current. *Note.* — With low values of the d.c. ripple factor this quantity is approximately equal to the ratio of the difference to the sum of the maximum and the minimum value. ★ taux d'ondulation d'un courant continu → *taux 54.* R коэффициент пульсации постоянного тока. D Schwingungsweitenverhältnis. E factor de ondulación de la corriente continua. I tasso d'ondulazione di una corrente continua. N gelijkstroomrimpelfactor. P współczynnik tętnienia prądu stałego. S pulsationsfaktor. (551,811)

37. **decontamination factor** : the ratio of the initial concentration of contaminating radioactive material to the final concentration resulting from a process of decontamination (the term may refer to a specified nuclide or to gross measurable radioactivity). ★ facteur de décontamination → *facteur 56.* D Dekontaminationsfaktor. E factor de descontaminación. I fattore di decontaminazione. N ontsmettingsfactor; decontaminatiefactor. P współczynnik odkażenia. S dekontamineringsfaktor. (026)

38. **deflection uniformity factor** : the ratio of the maximum variation in electrostatic or magnetic deflection sensitivity to the maximum value of that deflection sensitivity. *Note.* — This is, in fact, a non-uniformity factor. ★ facteur d'uniformité de déviation → *facteur 186.* R коэффициент нелинейности отклонения. D Ablenklinearität. E factor de uniformidad de desviación. I fattore di uniformità di deflessione. N afbuiggevoeligheidsvariatie. P współczynnik nierównomierności odchylania. S avböjningens likformighetsfaktor. (531)

39. **demagnetization factor** (N) : for a uniformly magnetized body, the ratio of the self-demagnetizing field strength to the magnetization. *Notes. 1* — If the magnetization is not uniform, an average value may be assigned to the demagnetization factor provided the conditions are stated. *2* — In permanent magnet technology, a demagnetization factor is sometimes used to represent the slope of the load line. ★ facteur de désaimantation → *facteur 66.* R коэффициент размагничивания. D Entmagnetisierungsfaktor. E factor de desmagnetización. I fattore di smagnetizzazione. N ontmagnetisatiefactor. P współczynnik odmagnesowania. S avmagnetiseringsfaktor. (121,221)

40. **demand factor** : the ratio, expressed as a numerical value or as a percentage, of the maximum demand of an installation or a group of installations within a specified period, to the corresponding total installed load of the installation(s). *Note.* — In using this term, it is necessary to specify to which level of the system it relates. ★ facteur de demande → *facteur 61.* R коэффициент спроса. D Verbrauchsfaktor. E factor de carga. I fattore di carico. N gelijktijdigheidsfactor van het geïnstalleerd vermogen. P współczynnik zapotrzebowania. S belastningsfaktor. (691)

41. **dielectric dissipation factor** (*Syn.* tan δ; loss tangent) : the numerical value of the ratio of the imaginary to the real part of the complex permittivity. ★ facteur de dissipation diélectrique → *facteur 76.* R тангенс угла диэлектрических потерь. D Permittivitäts-Verlustfaktor; tan δ; Tangens des Verlustwinkels, E factor de pérdidas dieléctricas; tan δ; tangente del ángulo de pérdidas. I fattore di dissipazione dielettrica; tg δ; tangente dell'angolo di perdita. N diëlektrische verliesfactor; tan δ; tangens diëlektrische verlieshoek. P współczynnik strat dielektrycznych; tg δ; tangens kąta strat. S förlustfaktor. (212)

42. **dielectric dissipation factor** (*Syn.* (dielectric) loss tangent) : for an insulating material submitted to a sinusoidal voltage, the ratio of the absorbed active power to the absolute value of the reactive power. ★ facteur de dissipation diélectrique → *facteur 77.* R коэффициент диэлектрического рассеяния. D dielektrischer Verlustfaktor. E factor de disipación dieléctrica; tangente de ángulo de pérdidas (dieléctricas). I fattore di dissipazione dielettrica; tangente dell'angolo di perdita. N diëlektrische verliesfactor. P współczynnik strat dielektrycznych; tangens kąta strat. S förlustfaktor. (841)

43. **diffraction factor** : for a specified frequency and a specified direction of sound incidence, ratio of the sound pressure acting on the part of a transducer designed to receive sound, to the free-field sound pressure at that place in the absence of the transducer. ★ facteur de diffraction → *facteur 69.* R коэффициент дифракции. D Beugungsfaktor. E factor de difracción. I fattore di diffrazione. N diffractieconstante. P współczynnik dyfrakcji. S diffraktionsfaktor. (801)

44. **diffusion factor** (of a diffusing surface, by reflection or by transmission) (σ) : ratio of the mean of the values of luminance measured at 20° and 70° (0.35 and 1.22 rad) to the luminance measured at 5° (0.09 rad) from the normal, when the surface considered is illuminated normally.

$$\sigma = \frac{L(20°) + L(70°)}{2\,L(5°)}$$

Notes. 1 — The diffusion factor is intended to give an indication of the spatial distribution of the diffused flux. It is equal to 1 for every isotropic diffuser, whatever the value of the diffuse reflectance or transmittance. *2* — This way of defining the diffusion factor can be applied only to materials for which the indicatrix of diffusion does not differ appreciably from that of ordinary opal glasses. ★ facteur de diffusion → *facteur 70.* R коэффициент диффузности (поверхности, рассеивающей путём отражения или пропускания). D Streuvermögen (einer streuend reflektierenden oder transmittierenden Fläche). E factor de difusión. I indice di diffusione. N verstrooiingsfactor. P wskaźnik rozpraszania. S diffusionsfaktor. (845)

45. **directivity factor** : a) Of an electroacoustic transducer for sound emission, at a specified frequency, ratio of the square of the free-field sound pressure at a fixed point on the principal axis, to the mean-square sound pressure over the surface of a sphere concentric with the effective acoustic centre of the transducer, and passing through the fixed point. b) Of an electroacoustic transducer for sound reception, at a specified frequency, ratio of the square of the free-field sensitivity to

sound waves that arrive along the principal axis, to the mean-square sensitivity to a succession of sound waves that arrive at the transducer with equal probability from all directions. ★ facteur de directivité → *facteur 73.* R фактор направленности; коэффициент концентрации. D Bündelungsgrad. E factor de directividad. I fattore di direttività. N richtingsfactor. P współczynnik kierunkowości. S riktfaktor. (801)

46. disaccommodation factor (of permeability) (D_F) : the disaccommodation coefficient divided by the relative permeability measured at the first measuring time:

$$D_F = \frac{d}{\mu_1}$$

★ facteur de désaccommodation (de la perméabilité) → *facteur 65.* R относительный коэффициент дезаккомодации (магнитной проницаемости). D Desakkommodationsfaktor (der Permeabilität). E factor de desacomodación (de la permeabilidad). I fattore di disaccomodazione (della permeabilità). N desaccommodatiefactor (van de permeabiliteit). P współczynnik dezakomodacji zredukowany. S desackomodationsfaktor. (221)

47. disadvantage factor : in a reactor cell, the ratio of the average neutron flux density in a material to that in the fuel. Usually, the term refers to the moderator material and to the thermal neutron flux density. ★ facteur de désavantage → *facteur 67.* D Absenkungsfaktor. E factor de desventaja. I fattore di svantaggio. N nadeelsfactor. P współczynnik niekorzyści. S depressionsfaktor. (026)

48. displacement factor (*Syn.* power factor of the fundamental) : the ratio of the active power of the fundamental voltage and current to their apparent power.

$$\lambda_1 = \cos \varphi_1 = \frac{P_1}{S_1}$$

where

$$\varphi_1 = \alpha_{u1} - \alpha_{i1}$$

Note. — The displacement factor can also be defined by the cosine of the angle formed by the phasors of the voltage and current fundamentals. ★ facteur de déphasage (du fondamental) → *facteur 63.* R коэффициент сдвига фаз (основной гармоники). D Verschiebungsfaktor; Grundschwingungsleistungsfaktor. E factor de desfase (de la fundamental). I fattore di potenza della fondamentale. N arbeidsfactor van de grondharmonische. P przesunięcie fazowe. S grundtonens effektfaktor. (131)

49. displacement factor : the ratio of the active power of the fundamental voltage and current to their apparent power. *Note.* — The displacement factor can also be defined by the cosine of the angle formed by the phasors of the fundamental voltage and current. ★ facteur de déphasage → *facteur 62.* R коэффициент сдвига. D Grundschwingungs-Leistungsfaktor (Verschiebungsfaktor). E factor de desfase. I fattore di sfasamento. N verschuivingsfactor. P współczynnik przesuwu fazowego. S fasfaktor. (551)

50. dissipation factor : ratio of sound energy dissipated as heat to the energy of the incident sound wave. ★ facteur de dissipation → *facteur 75.* R коэффициент диссипации. D Dissipationsgrad. E factor de disipación. I fattore di dissipazione. N dissipatiecoëfficient. P współczynnik rozproszenia. S förlustfaktor. (801)

51. dissipation factor test (*Syn.* loss tangent test) : → *test 49*

52. distance factor (*Syn.* (ionospheric) transmission factor) : → *factor 101*

53. distortion factor (*Syn.* harmonic factor) : → *factor 89*

54. distribution factor (*Syn.* spread factor) : → *factor 169*

55. divergence factor : at a given point, the amplitude of a specified electromagnetic wave which has met divergence effects, divided by the amplitude of a wave which would have existed at the same point without these effects. *Note.* — When the specified wave is a wave reflected by a curved surface, the corresponding factor may be considered as a factor which multiplies the reflection factor of the reflecting surface assumed to be flat. ★ facteur de divergence → *facteur 81.* D Divergenzfaktor; Defokussierungsfaktor. P współczynnik rozbieżności. (705)

56. diversity factor : the reciprocal of the coincidence factor. ★ facteur de diversité → *facteur 82.* R коэффициент разновременности. D Verschiedenheitsfaktor. E factor de diversidad. I fattore di diversità. N diversiteitsfactor. P współczynnik niezgodności. S spridningsfaktor. (691)

57. diversity factor (for welding) : in manual arc welding the factor used to multiply the product of the number of operators and the rated current per operator to obtain an equivalent current value. *Note.* — The equivalent current value should not exceed the total value of the rated current of the power source. ★ facteur de diversité (pour soudage) → *facteur 83.* R коэффициент разновременности (для сварки). D Gleichzeitigkeitsfaktor (beim Schweißen). E factor de utilización (para soldadura). I fattore di diversita (per saldatura). N gelijktijdigheidsfactor. P współczynnik jednoczesności spawania. S sammanlagringsfaktor. (851)

58. drum factor : the ratio of the usable scanning length of the drum to its diameter in a drum facsimile transmitter or a drum facsimile receiver. ★ facteur de cylindre → *facteur 55.* R отношение длины к диаметру барабана. D Trommelfaktor. E factor de cilindro. I fattore di tamburo. N trommelfactor. P proporcja bębna. S trumfaktor. (721)

59. duty factor : the ratio of (1) the sum of pulse durations to (2) a stated averaging time. For repetitive phenomena, the averaging time is the pulse repetition period. ★ facteur d'utilisation → *facteur 188.* R коэффициент заполнения. D Tastverhältnis (relative Einschaltdauer). E factor de utilización. I fattore di utilizzazione. N werktijdverhouding. P współczynnik wypełnienia. S intermittensfaktor. (531)

60. duty factor (*Syn.* duty cycle) : → *duty-cycle 3*

61. earth fault factor : at a given location of a three-phase system, and for a given system configuration, the ratio of the highest r.m.s. phase-to-earth power frequency voltage on a healthy phase during a fault to earth affecting one or more phases at any point on the system to the r.m.s. value of phase-to-earth power frequency voltage which would be obtained at the given location in the absence of any such fault. ★ facteur de défaut à la terre → *facteur 59.* R коэффициент замыкания на землю. D Erdfehlerfaktor. E factor de defecto a tierra. I fattore di guasto a terra. N aardfoutfactor. P współczynnik wzrostu napięcia przy zwarciu doziemnym. S jordfelsfaktor. (604)

62. effective demand factor : the ratio, expressed as a numerical value or as a percentage, of the effective demand to the total installed load of a consumer or of a group of consumers or installations. ★ facteur de responsabilité de pointe → *facteur 154.* R коэффициент нагрузки. D Höchstlastanteil, bezogen auf Anschlußwert. E factor de responsabilidad en la punta. I fattore di responsabilità di punta. N verhouding van de maximale belasting tot het aangesloten vermogen. P współczynnik obciążenia. S ..... (691)

63. effective Earth-radius factor (K) : ratio of the effective radius of the Earth to the actual Earth radius. *Notes. 1* — This factor K is related to the vertical gradient dn/dh of the refractive index n and to the actual Earth radius a by the equation :

$$K = \frac{1}{1 + a\dfrac{dn}{dh}}$$

2 — For an atmosphere having a standard refractivity gradient the value of K is taken as 4/3, corresponding to an effective radius of the Earth of approximately 8500 km. ★ facteur multiplicatif du rayon terrestre → *facteur 199.* D Krümmungsfaktor. P współczynnik skutecznego promienia Ziemi. (705)

64. effective mass factor (*Syn.* active mass factor) : → *factor 4*

65. efficiency factor in time (of a transmission with automatic repetition for the correction of errors) : ratio of the time necessary to transmit a text automatically without repetition, at a specified modulation rate, to the time actually taken to receive the same text with error control by repetition for a given error rate. ★ facteur d'efficacité dans le temps → *facteur 174.* R коэффициент эффективности во времени (передачи с автоматическим повторением для исправления ошибок). D Effizienz-Zeitfaktor. E factor de eficacia en el tiempo (de un transmisor con conexión de errores por repetición). I fattore d'efficienza nel tempo. N tijd-efficiëntiefactor. P współczynnik efektywności czasu (transmisji przy korekcji błędów z automatycznym powtarzaniem). S tidseffektivitet. (721)

66. **electromechanical coupling factor** : the square root of the ratio of electrical or mechanical work which can be accomplished to the total energy that can be stored in a piezoelectric resonator from a mechanical or electrical power source for a particular set of boundary conditions. ★ facteur de couplage électromécanique → *facteur 52.* R коэффициент электромеханической связи. D elektromechanischer Kopplungsfaktor. E factor de acoplamiento electromecánico. I fattore di accoppiamento elettromeccanico. N elektromechanische koppelfactor. P współczynnik sprzężenia elektromechanicznego. S elektromekanisk kopplingsfaktor. (561)

67. **energy capability factor** (of one or more hydroelectric installations) : the ratio of the energy capability over a given period of time to the mean energy capability over the same period. ★ indice de productibilité → *indice 22.* R ..... D Arbeitsvermögens-Koeffizient. E índice de producibilidad (de un o de un conjunto de aprovechamientos hidroeléctricos); índice de energía producible (de un o de un conjunto de aprovechiamentos hidroeléctricos). I coefficiente di producibilità; coefficiente di producibilità. N energieproduktiviteitsfactor. P współczynnik zasobu energetycznego. S energiutnyttjningsfaktor. (602)

68. **(energy) loss factor** : the ratio of the utilization time of power losses to the period of time under consideration. ★ taux de pertes (en énergie) → *taux 29.* R коэффициент продолжительность потерь. D Arbeitsverlustgrad. E factor de pérdidas (en energía). I tasso di perdite (d'energia). N (energie)verliesfactor. P współczynnik strat energii. S förlusternas utnyttjningsfaktor. (603)

69. **enrichment factor** : the ratio of the fraction of atoms of a particular isotope in a mixture enriched in that isotope, to the fraction of atoms of that isotope in a mixture of natural composition. ★ facteur d'enrichissement → *facteur 176.* D Anreicherungsfaktor. E factor de enriquecimiento. I fattore d'arricchimento. N verrijkingsfactor. P współczynnik wzbogacenia. S anrikningsfaktor. (026)

70. **error multiplication factor** : the ratio of the number of digital errors in the output signal to the number of digital errors in the input signal. *Note.* — The error multiplication factor may be expressed as an average value under defined operating conditions, or else as the maximum value that could result from a single digital error in the input signal. ★ facteur de multiplication d'erreurs → *facteur 111.* R коэффициент размножения ошибок. D Fehlermultiplikationsfaktor. E factor de multiplicación de errores. I fattore di moltiplicazione d'errore. N foutvermenigvuldigingsfactor. P współczynnik powielania błędów. S feltillskottskvot. (704)

71. **eta factor** (*Syn.* neutron yield per absorption) : → *yield 6*

72. **externally reflected component of daylight factor** : → *component 23*

73. **extreme range of an influencing factor** : → *range 23*

74. **factor of adhesion** : the limiting ratio of the tangential and normal forces at the point of contact between wheel and rail. *Note.* — The values of this factor are different for traction and braking. ★ facteur d'adhérence → *facteur 23.* R коэффициент сцепления. D Haftreibungsbeiwert. E factor de adherencia. I coefficiente d'aderenza. N adhesiecoëfficiënt. P współczynnik przyczepności. S adhesionskoefficient. (811)

75. **factor of cooperation** : the product of the total scanning line length and the scanning density. ★ facteur de coopération → *facteur 50.* R коэффициент согласования. D Zusammenarbeitsfaktor. E factor de cooperación. I fattore di cooperazione. N samenwerkingsfactor. P współczynnik współpracy. S kooperationsfaktor. (721)

76. **failure intensity acceleration factor** : in a time interval of given duration, whose beginning is specified by a fixed age of a repaired item, the ratio of the number of failures obtained under two different sets of stress conditions. ★ facteur d'accélération de l'intensité de défaillance → *facteur 16.* R коэффициент ускорения параметра потока отказов. D Ausfalldichten - Raffungsfaktor. E factor de aceleración de intensidad de fallo. I fattore di accelerazione della intensità di guasto. N storingsintensiteitversnellingsfactor. P współczynnik przyspieszenia strumienia uszkodzeń. S accelerationsfaktor för felintensitet. (191)

77. **failure rate acceleration factor** : the ratio of the failure rate under accelerated testing conditions to the failure rate under stated reference test conditions. *Note.* — Both failure rates refer to the same time period in the life of the tested items. ★ facteur d'accélération du taux de défaillance → *facteur 17.* R коэффициент ускорения интенсивности отказов. D Ausfallraten - Raffungsfaktor. E factor de aceleración de tasa de fallo. I fattore di accelerazione del tasso di guasto. N storingstempo-versnellingsfactor. P współczynnik przyspieszenia intensywności uszkodzeń. S accelerationsfaktor för felbenägenhet. (191)

78. **fast fission factor** : in an infinite medium, the ratio of the mean number of neutrons produced by fissions due to neutrons of all energies, to the mean number of neutrons produced by thermal fissions only. ★ facteur de fission rapide → *facteur 85.* D Schnellspaltfaktor. E factor de fisión rápida. I fattore di fissione veloce. N snelsplijtingsfactor. P współczynnik rozszczepienia prędkiego. S snabbklyvningsfaktor. (026)

79. **field strength diminution factor** : the ratio, generally expressed in decibels, of the field strength of a transmitter at 1 km from the transmitting antenna in the direction of the receiving point, to the field strength at the receiving point. *Note.* — The field strength diminution factor is mainly used for radio links by ionospheric reflection. ★ facteur de réduction du champ → *facteur 128.* D Feldstärkedämpfungsmaß. P współczynnik zmniejszenia natężenia pola. (705)

80. **form factor** : the ratio of the r.m.s. value to the rectified value of a periodic quantity. ★ facteur de forme → *facteur 89.* R коэффициент формы. D Formfaktor. E factor de forma. I fattore di forma. N vormfactor. P współczynnik kształtu. S formfaktor. (101)

81. **form factor** (between two surfaces S_1 and S_2) (f) : ratio of the average radiant or luminous flux density received over surface S_2 (or S_1) from surface S_1 (or S_2) to the radiant or luminous exitance of surface S_1 (or S_2).

$$f_{21} = \frac{\Phi_2}{A_2 M_1} = \frac{g}{A_2}$$

$$A_2 f_{21} = g = A_1 f_{12}$$

Unit : 1. ★ facteur de forme → *facteur 91.* R средний коэффициент освещенности (между поверхностями C_1 и C_2). D ..... E factor de interreflexión. I fattore di forma. N vormfactor. P współczynnik kształtu. S ..... (845)

82. **Fresnel reflection factor** : the reflection factor in the case of a plane wave, incident on an infinite planar surface. *Note.* — The term Fresnel reflection factor is only used for an incident wave, the electric flux density vector of which is either parallel to the surface or in the plane of incidence. ★ facteur de réflexion de Fresnel → *facteur 134.* D Fresnelscher Reflexionsfaktor. P współczynnik Fresnela. (705)

83. **fullness factor (related to the flux density)** (γ) : the ratio of the maximum BH product of a permanent magnet to the product of the remanence B_r and the coercivity related to the magnetic flux density H_{cB}.

$$\gamma = \frac{(B\,H)_{max}}{B_r\,H_{cB}}$$

★ facteur de plénitude (relatif à l'induction) → *facteur 116.* R коэффициент выпуклости по индукции. D Füllfaktor (bezogen auf die Flußdichte). E factor de plenitud (relativo a la inducción). I fattore di pienezza (relativo all'induzione). N vulfactor. P współczynnik pełności. S $B(H)$-utbuktningsfaktor. (221)

84. **fullness factor related to the polarization** (γ') : the maximum value of the product of the magnetic polarization and the magnetic field strength divided by the product of the remanence B_r and the coercivity related to polarization H_{cJ}.

$$\gamma' = \frac{(J\,H)_{max}}{B_r\,H_{cJ}}$$

★ facteur de plénitude relatif à la polarisation → *facteur 115.* R коэффициент выпуклости по поляризации. D Füllfaktor (bezogen auf die Polarisation). E factor de plenitud relativo a la polarización. I fattore di pienezza relativo alla polarizzazione. N polarisatievulfactor. P współczynnik pełności polaryzacyjny. S $J(H)$-utbuktningsfaktor. (221)

85. **fundamental factor** (of a non-sinusoidal alternating voltage or current) : the ratio of the r.m.s. value of the fundamental component to the r.m.s. value of the alternating quantity.

$$f_u = \frac{U_1}{U} \qquad f_i = \frac{I_1}{I}$$

★ taux de fondamental → *taux 19.* R коэффициент основной гармоники (несинусоидального напряжения или тока). D Grundschwingungsgehalt. E factor fundamental (de una tensión o corriente alterna no senoidal). I ..... N grondgolffactor. P współczynnik (składowej) podstawowej. S grundtonshalt. (131,161,551)

86. gas multiplication factor : the factor by which the initial number of ion pairs is multiplied as a result of the gas multiplication process, under stated conditions. ★ facteur de multiplication dans le gaz → *facteur 109.* R коэффициент газового усиления. D Gasverstärkungsfaktor. E factor de multiplicación en el gas. I fattore di moltiplicazione nel gas. N gasversterkingsfactor. P współczynnik wzmocnienia gazowego. S gasförstärkningsfaktor. (391)

87. gas multiplication factor : the ratio of the charge collected from the sensitive volume to the charge produced in this volume by initial ionization under stated conditions. ★ facteur de multiplication dans le gaz → *facteur 110.* R коэффициент газового усиления. D Gasverstärkungsfaktor. E factor de multiplicación en el gas. I fattore di moltiplicazione nel gas. N gas-vermenigvuldigingsfactor. P współczynnik wzmocnienia gazowego. S gas-multiplikationsfaktor. (531)

88. gas-content factor (*Syn.* vacuum factor) : → *factor 186*

89. harmonic factor (*Syn.* distortion factor) : the ratio of the r.m.s. value of the harmonic content to the r.m.s. value of the alternating quantity.

$$h_u = \frac{\sqrt{U^2 - U_1^2}}{U} = \sqrt{1 - f_u^2}$$

$$h_i = \frac{\sqrt{I^2 - I_1^2}}{I} = \sqrt{1 - f_i^2}$$

★ taux d'harmoniques → *taux 48.* R коэффициент гармоник; коэффициент искажения (несинусоидального напряжения или тока). D Oberschwingungsgehalt; Klirrfaktor. E factor de armónicos (de una tensión o corriente alterna no senoidal); factor de distorsión (de una tensión o corriente alterna no senoidal). I fattore di distorsione (di una tensione o corrente alternata non sinusoidale). N vervormingsfactor. P zawartość harmonicznych. S övertonshalt. (131)

90. homogeneity factor : the ratio of the first to the second half-value layer. *Note.* — The homogeneity factor for monoenergetic radiation is unity. ★ degré d'homogénéité → *degré 17.* R коэффициент однородности. D Homogenitätsgrad. E grado de homogeneidad. I grado di omogeneità. N homogeniteitsfactor. P współczynnik jednorodności. S homogenitetsfaktor. (881)

91. inductance factor (A_L) : the inductance of a coil of specified geometry, placed on a given core in a specified position, divided by the square of the number of turns.

$$A_L = L/N^2$$

where L is the inductance of the coil when placed on the core and N is the number of turns on the coil. *Notes. 1* — The inductance factor is closely related to permeance Λ; the latter refers to the reluctance of a core while inductance factor refers to the core with a winding. *2* — In principle inductance factor can correspond to the several forms of permeability defined in the IEV, for example amplitude permeability, but unless otherwise specified it should be assumed that it corresponds to the effective permeability at vanishingly small field strengths. *3* — The concept "turns factor" (α) has been used in the past. It was defined as: the number of turns that a coil of specified geometry, placed on a given core in a specified position, should have to obtain unit inductance (normally the millihenry):

$$\alpha = N/\sqrt{L}$$

★ inductance spécifique → *inductance 21.* R фактор индуктивности. D Induktivitätsfaktor. E inductancia específica; factor de inductancia. I fattore di induttanza. N zelfinductiefactor. P stała indukcyjności. S induktansfaktor. (221)

92. (inductive) coupling factor of two circuits : the ratio of the mutual inductance to the geometric mean of the inductances of the two circuits. ★ facteur de couplage (inductif) de deux circuits → *facteur 53.* R (индуктивный) коэффициент связи двух цепей. D (induktiver) Kopplungsgrad zweier Stromkreise. E factor de acoplamiento (inductivo) de dos circuitos. I fattore di accoppiamento (induttivo) di due circuiti. N (inductieve) koppelfactor van twee stroomkringen. P współczynnik sprzężenia indukcyjnego. S kopplingsfaktor. (131)

93. influencing factor : any factor likely to modify any of the specified characteristics of a relay (operating, releasing, accuracy, etc.). ★ facteur d'influence → *facteur 180.* R влияющая фактор. D Einflussfaktor. E factor de influencia. I fattore d'influenza. N beïnvloedende factor. P czynnik wpływający. S påverkande faktor. (446)

94. instability factor (of permeability) (S_F) : the instability of permeability S divided by the relative permeability μ_i, measured immediately before the application of the disturbance:

$$S_F = \frac{S}{\mu_i}$$

★ facteur d'instabilité (de la perméabilité) → *facteur 181.* R фактор нестабильности (магнитной проницаемости). D Instabilitätsfaktor (der Permeabilität). E factor de inestabilidad (de la permeabilidad). I fattore d'instabilità (della permeabilità). N instabiliteitsfactor (van de permeabiliteit). P współczynnik niestabilności(przenikalności magnetycznej) zredukowany. S instabilitetsfaktor. (221)

95. instrument security factor (*Syn.* FS (abbreviation)) : the ratio of rated instrument limit primary current to the rated primary current. ★ facteur de sécurité → *facteur 157.* R коэффициент безопасности приборов; FS. D Sicherheitsfaktor (für Meßinstrumente). E factor de seguridad (para los aparatos de medida); FS. I fattore di sicurezza (per gli apparecchi di misura). N veiligheidsfactor (voor meetinstrumenten). P współczynnik bezpieczeństwa przyrządu; FS. S märköverströmstal för mätkärna. (321)

96. interlacing factor : number of fields in each complete frame of the picture. ★ ordre d'entrelacement → *ordre 14.* R кратность развертки. (723)

97. internally reflected component of daylight factor : → *component 34*

98. inversion factor : for inversion, the ratio between the fundamental power and the d.c. power. ★ facteur de conversion d'un onduleur → *facteur 47.* R коэффициент инвертирования. D Wechselrichtgrad. E factor de ondulación. I fattore di inversione. N wisselrichtfactor. P współczynnik przekształcania falownikowego. S växelriktarfaktor. (551)

99. (ionospheric) defocussing factor : the factor by which the power flux density of an electromagnetic wave must be multiplied to take account of ionospheric defocussing. ★ facteur de défocalisation (ionosphérique) → *facteur 60.* D Defokussierungsfaktor. P współczynnik rozogniskowania (jonosferycznego). (705)

100. (ionospheric) focussing factor : the factor by which the power flux density of an electromagnetic wave must be multiplied to take account of ionospheric focussing. ★ facteur de focalisation (ionosphérique) → *facteur 87.* D Fokussierungsfaktor. P współczynnik ogniskowania (jonosferycznego). (705)

101. (ionospheric) transmission factor (*Syn.* distance factor) (M) : in the case of a hop comprising only one ionospheric reflection at a given ionospheric layer and for a given distance, the ratio of the basic MUF to the critical frequency at the reflection point. *Note.* — The symbol M must be followed by the distance in kilometres. *Example :* M(3000)F2. ★ facteur de distance → *facteur 78.* D Ionosphären-Übertragungsfaktor; Entfernungsfaktor. P współczynnik transmisji jonosferycznej; współczynnik odległościowy. (705)

102. Kell factor : in a television system using horizontal scanning, the ratio between the number of horizontal lines distinguishable in a picture to the number of scanning lines in the raster. ★ facteur de Kell → *facteur 94.* R Келл-фактор. (723)

103. K-rating factor : a rating factor, determined objectively from the distortion of various pulses, applied to television transmission and reproducing systems to express the degree of subjective impairment of the television picture resulting from some types of linear waveform distortion. *Note.* — A method of evaluating the K-rating factor is described in CCIR Rec. 654. ★ facteur K → *facteur 197.* R К-фактор. (723)

104. lamination factor (of a laminated or strip-wound core) (*Syn.* stacking factor (of a laminated or strip-wound core)) : the ratio of the metal cross-section to the total stack or built-up cross-section. ★ facteur de foisonnement → *facteur 88.* R коэффициент заполнения (шихтованного

или ленточного витого сердечника). D Füllfaktor (eines geblechten oder gewickelten Kerns); Stapelfaktor (eines geblechten oder gewickelten Kerns). E factor de apilamiento (de un núcleo laminado o enrollado). I fattore di riempimento. N stapelfactor. P współczynnik wypełnienia magnetowodu. S fyllfaktor; stapelfaktor. (221)

105. lay factor (*Syn.* lay ratio) : → *ratio 48*

106. light loss factor : ratio of the average illuminance on the working plane after a certain period of use of a lighting installation to the average illuminance obtained under the same conditions for the installation considered conventionally as new. *Notes. 1* — The term depreciation factor has been formerly used to designate the reciprocal of the above ratio. *2* — The light losses take into account dirt accumulation on luminaire and room surfaces and lamp depreciation. ★ facteur de dépréciation → *facteur 64.* R коэффициент спада освещенности. D Verminderungsfaktor. E factor de depreciación. I fattore di manutenzione. N lichtterugvalfactor. P współczynnik utrzymania. S bibehållningsfaktor. (845)

107. limiting factor (of a sound signal level) : the difference between the dynamic ranges of a sound signal before and after limiting. ★ facteur de limitation → *facteur 95.* R степень ограничения (звукового сигнала). (723)

108. loss anisotropy factor (T) : of electrical steel, the ratio of the difference between, and the sum of, the magnetic losses P_{90}, measured perpendicular to, and P_0, measured parallel to the direction of rolling, the ratio being expressed as a percentage:

$$T = \frac{P_{90} - P_0}{P_{90} + P_0} \times 100\,\%$$

Note. — The measurements of P_{90} and P_0 are to be made under the same conditions. ★ facteur d'anisotropie des pertes → *facteur 29.* R фактор анизотропии потерь. D Anisotropiefaktor der Verluste. E factor anisotrópico de pérdidas. I fattore d'anisotropia delle perdite. N anisotropiefactor met betrekking tot verliezen. P współczynnik anizotropii strat. S förlustanisotropifaktor. (221)

109. loss anisotropy factor (at a given angle) (T_L) : of electrical steel, the ratio of the difference between the magnetic losses P_α, measured at an angle α to the direction of rolling, and the magnetic losses, P_0, measured along the direction of rolling, to P_0, the ratio being expressed as a percentage:

$$T_L = \frac{P_\alpha - P_0}{P_0} \times 100\,\%$$

Notes. 1 — The measurements of P_α and P_0 are to be made under the same conditions. *2* — The loss anisotropy factor at a given angle differs both conceptually and numerically from the loss anisotropy factor T. ★ facteur d'anisotropie des pertes → *facteur 30.* R фактор анизотропии потерь (для заданного угла). D Verlust-Anisotropiefaktor. E factor anisotrópico de pérdidas (bajo un ángulo dado). I fattore d'anisotropia delle perdite (per un angolo dato). N anisotropie(hoek)verliesfactor. P współczynnik anizotropii strat (przy danym kącie). S riktningsbestämd förlustanisotropifaktor. (221)

110. luminance factor (at a surface element of a non-self-radiating medium, in a given direction, under specified conditions of illumination) (β_v; β) : ratio of the luminance of the surface element in the given direction to that of a perfect reflecting or transmitting diffuser identically illuminated.Unit : 1 *Notes. 1* — For photoluminescent media, the luminance factor is the sum of two portions, the reflected luminance factor β_S and the luminescent luminance factor β_L : $\beta_v = \beta_S + \beta_L$. *2* — In Germany, instead of the luminance factor β (or transmittance τ) it is usual in colorimetry to use the quantity "Hellbezugswert" $A = 100\,\beta$ (or $100\,\tau$). ★ facteur de luminance (lumineuse) → *facteur 98.* R коэффициент яркости (элемента поверхности несамосветящегося тела, в некотором направлении для заданых условий освещения). D Leuchtdichtefaktor (an einem Flächenelement auf der Oberfläche eines nicht selbststrahlenden Mediums, in einer Richtung, unter gegebenen Beleuchtungsbedingungen). E factor de luminancia. I fattore di luminanza. N luminantiefactor. P współczynnik luminancji świetlnej. S luminansfaktor. (845)

111. luminance factors : the proportions of the three primary colours needed to obtain the reference white. ★ facteurs de luminance → *facteur 205.* R яркостные коэффициенты. (723)

112. luminous flux maintenance factor (of a lamp) (*Syn.* lumen maintenance) : ratio of the luminous flux of a lamp at a given time in its life to its initial luminous flux, the lamp being operated under specified conditions. *Note.* — This ratio is generally expressed in per cent. ★ facteur de conservation du flux lumineux → *facteur 44.* R коэффициент сохранения светового потока (лампы). D Lichtstromverhältnis; Lichtstromfaktor. E factor de mantenimiento del flujo luminoso. I fattore di mantenimento del flusso. N ..... P współczynnik utrzymania strumienia. S ljusflödesförhållande. (845)

113. magnetic field strength anisotropy factor (T_H) : of electrical steel, the ratio of the difference between the peak value of the magnetic field strength $\hat{H}_\alpha$ measured at an angle α to the direction of rolling, and the peak value of the field strength $\hat{H}_0$ measured along the direction of rolling, to $\hat{H}_0$, at a stated peak value of the magnetic flux density, the ratio being expressed as a percentage:

$$T_H = \frac{\hat{H}_\alpha - \hat{H}_0}{\hat{H}_0} \times 100\,\%$$

Note. — The measurements of $\hat{H}_\alpha$ and $\hat{H}_0$ are to be made under the same conditions. ★ facteur d'anisotropie du champ magnétique → *facteur 31.* R фактор анизотропии напряженности магнитного поля. D Anisotropiefaktor der magnetischen Feldstärke. E factor anisotrópico de campo magnético. I fattore d'anisotropia del campo magnetico. N anisotropiefactor van de magnetische veldsterkte. P współczynnik anizotropii pola magnetycznego. S magnetiska fältstyrkans anisotropifaktor. (221)

114. magnetic leakage factor : the ratio of the total magnetic flux to the useful magnetic flux of a magnetic circuit. ★ facteur de fuite magnétique → *facteur 93.* R коэффициент магнитного рассеяния. D magnetischer Streufaktor. E factor de fuga magnética. I fattore di fuga magnetico. N magnetische lekfactor. P współczynnik rozproszenia magnetycznego. S magnetisk läckfaktor. (221)

115. (magnetic) loss factor

$$\left(\text{symb.} : \frac{\tan \delta_m}{\mu_r}\right)$$

the tangent of the magnetic loss angle divided by the relative permeability:

$$\frac{\tan \delta_m}{\mu_r} = \frac{\mu''}{(\mu')^2}$$

where μ' and μ'' are the real and imaginary components respectively of the complex permeability. ★ facteur de pertes magnétiques → *facteur 114.* R фактор потерь (магнитных). D (magnetischer) Verlustfaktor. E factor de pérdidas magnéticas. I coefficiente di perdite magnetiche. N verliesfactor. P współczynnik strat zredukowany. S förlusttal. (221)

116. (magnetic) quality factor (Q_m) : the reciprocal of the tangent of the magnetic loss angle. ★ facteur de qualité (magnétique) → *facteur 123.* R добротность. D (magnetischer) Gütefaktor. E factor (magnético) de calidad. I fattore (magnetico) di qualità. N kwaliteitsfactor. P dobroć. S (magnetiskt) godhetstal. (221)

117. mains decoupling factor : the ratio of a voltage applied at a specified point of the mains to a corresponding voltage applied at a specified input port of a device that yields the same disturbing effect to that device. ★ facteur de découplage avec l'alimentation → *facteur 58.* R сетевой коэффициент переноса помех. D Netzentkopplungsfaktor. E factor de desacoplamiento (de la alimentación). I fattore di disaccoppiamento con l'alimentazione. N netstoring-onderdrukkingsfactor. P współczynnik odsprzężenia sieci. S nätstörningsdämpning. (161)

118. (mean) noise factor (of a linear two-port device) (*Syn.* (mean) noise figure (of a linear two-port device)) (symb. : $\overline{F}$) : the ratio of the total noise power appearing at the output of a given linear two-port device within a specified frequency band, to the portion of this power originating from the one-port device connected to the input of the two-port device, the noise temperature of the one-port device being assumed equal at all frequencies to the reference thermodynamic temperature conventionally fixed around 290 K. *Notes. 1* — The mean noise

factor (symb. : $\bar{F}$) is related to the mean noise temperature T as follows :

$$\bar{F} = 1 + \frac{\bar{T}}{T_0}$$

where T_0 is the reference thermodynamic temperature. *2* — The value of the mean noise factor may be expressed in decibels. In English the term "noise factor" is generally employed when the ratio is expressed arithmetically and "noise figure" is employed when the ratio is expressed in decibels. ★ facteur de bruit (moyen) → *facteur 35.* R (средний) коэффициент шума (линейного четырехполюсника). D (mittlerer) Rauschfaktor (eines linearen Zweitors); (mittleres) Rauschmaß (eines linearen Zweitors). E factor de ruido (medio) (de un dispositivo bipuerta lineal). I cifra di rumore (medio) (di un elemento lineare a due porte). N gemiddelde ruisfactor (van een lineaire tweepoort). P współczynnik szumu przeciętny (dwuwrotnika linearnego). S ..... (702)

119. modulation factor : 1. In linear amplitude modulation, the ratio, generally expressed as a percentage, of the difference between the maximum and minimum amplitudes of the modulated signal to the sum of these amplitudes. *Note.* — If the modulating signal is a symmetrical alternating signal, only one modulation factor will exist. If the modulating signal is not a symmetrical alternating signal, a value of the modulation factor may be determined for each spectral component of the modulating signal. 2. In angle modulation, the ratio, generally expressed as a percentage, of the peak frequency deviation or peak phase deviation produced by a specified modulating signal to the maximum deviation specified for the given transmission system. ★ taux de modulation → *taux 22.* R коэффициент модуляции. D Modulationsgrad. E tasa de modulación; factor de modulación. I tasso di modulazione. N modulatiediepte. P współczynnik modulacji. S moduleringsgrad. (702)

120. mu factor (*Syn.* voltage factor) : → *factor 187*

121. multicycle control factor : the ratio between the number of conducting cycles and the sum of conducting and non-conducting cycles in the case of multicycle control. ★ facteur de réglage par train d'ondes → *facteur 146.* R коэффициент многопериодного управления. D Einschaltverhältnis bei Vielperiodensteuerung. E factor de regulación por ondas completas. I fattore di regolazione per treni d'onda. N meerperiodenstuurfactor. P współczynnik sterowania pełnofalowego. S sekvensstyrfaktor. (551)

122. multiplication factor : the ratio of the total number of neutrons produced during a time interval (excluding neutrons produced by sources whose strengths are not a function of fission rate) to the total number of neutrons lost by absorption and leakage during the same interval. When the quantity is evaluated for an infinite medium or for an infinite repeating lattice it is referred to as the infinite multiplication factor k_∞, and when the quantity is evaluated for a finite medium it is referred to as the effective multiplication factor (k_{eff}). Also called "multiplication constant". ★ facteur de multiplication → *facteur 107.* D Multiplikationsfaktor. E factor de multiplicación. I fattore di moltiplicazione. N vermenigvuldigingsfactor. P współczynnik mnożenia. S multiplikationskonstant. (026)

123. nominal range of an influencing factor : → *range 46*

124. occupancy factor : the factor by which the workload should be multiplied in order to correct for the degree or type of occupancy of the area in question. ★ facteur d'occupation → *facteur 184.* R коэффициент занятости. D Aufenthalts-Faktor. E factor de ocupación. I fattore di occupazione. N bezettingsgraad. P współczynnik zajętości. S uppehållsfaktor. (881)

125. operating factors : a collection of values (electrical, thermal and mechanical) characterizing the operation of a machine, equipment, or supply mains at a particular time. ★ régime → *régime 17.* R эксплуатационные параметры. D Betriebsparameter. E régimen. I fattori di funzionamento. N werkcondities. P współczynnik pracy. S driftdata. (851,881)

126. overload factor (of a receiver) : the ratio of the maximum amplitude of a sinusoidal input signal to the value corresponding to full-scale deflection of the indicating instrument, for which the amplitude/amplitude characteristics of the predetector circuits of a receiver do not depart from linearity by more than 1 dB. ★ marge de linéarité → *marge 8.* R коэффициент перегрузки (приёмника). D Überlastungsfaktor (eines Meßempfängers). E factor de sobrecarga (de un receptor). I margine di linearità (di un ricevitore di misura). N overbelastingsfactor (van een ontvanger). P współczynnik przeciążenia (odbiornika pomiarowego); margines linearności (odbiornika pomiarowego). S överbelastningsfaktor. (161)

127. peak factor : the ratio of the peak value to the r.m.s. value of a periodic quantity. ★ facteur de crête → *facteur 54.* R коэффициент амплитуды. D Scheitelfaktor. E factor de cresta. I fattore di picco. N topfactor. P współczynnik szczytu. S toppfaktor. (101)

128. peak responsibility factor : the ratio, expressed as a numerical value or as a percentage, of the effective demand of a consumer or of a group of consumers or installations of a specified type, to the system peak demand, these two values being measured at the same network level. *Note.* — The period of time to which the peak demand refers must always be stated. ★ facteur de participation à la pointe → *facteur 112.* R коэффициент участия в пике нагрузки. D Höchstlastanteilfaktor. E factor de participación en la punta. I fattore di partecipazione alla punta. N relatief aandeel in de maximale belasting. P współczynnik efektywności; współczynnik wykorzystania mocy. S relativ spetsdelaktighet. (691)

129. peak scatter factor : the scatter factor for X-rays at the point on the beam axis where the absorbed dose is maximum, used for X-rays at tube voltages greater than 400 kV. ★ facteur pic de diffusion → *facteur 201.* R максимальный коэффициент рассеяния. D Streufaktor im Dosismaximum. E factor pico de difusión. I fattore di diffusione nel massimo. N piekverstrooiingsfactor. P współczynnik maksymalnego rozpraszania. S ..... (881)

130. peakedness factor : the ratio of variance to mean of a traffic intensity distribution. ★ facteur d'irrégularité → *facteur 183.* D Spitzigkeitsfaktor. P współczynnik nieregularności ruchu. (715)

131. peak-ripple factor : the ratio of the peak-to-valley value of the ripple content to the absolute value of the direct component of a pulsating quantity. ★ taux d'ondulation de crête → *taux 53.* R пиковый коэффициент пульсации; коэффициент пульсации по амплитудному значению. D Spitzenwelligkeitsgehalt. E tasa de ondulación de cresta. I tasso di ondulazione di picco. N top-rimpelfactor. P wartość szczytowa współczynnika falowania. S topp-pulsationsfaktor. (131,161)

132. permeability rise factor (δ_H) : the fractional change of the amplitude permeability between two specified peak values of the sinusoidal magnetic field strength, divided by the difference in the peak values of the field strength:

$$\delta_H = \frac{\mu_{a2} - \mu_{a1}}{\mu_{a1}(\hat{H}_2 - \hat{H}_1)}$$

★ coefficient d'augmentation de perméabilité → *coefficient 16.* R фактор возрастания магнитной проницаемости. D Anstiegsfaktor der Permeabilität. E coeficiente de aumento de la permeabilidad. I coefficiente d'aumento della permeabilità. N stijgfactor van de permeabiliteit. P współczynnik wzrostu przenikalności magnetycznej. S (permeabilitetens) stigfaktor. (221)

133. phase control factor : the ratio of the voltage at the prevailing current delay angle to the voltage at zero current delay angle, all voltage drops being assumed to be zero. ★ facteur de réglage de phase → *facteur 144.* R коэффициент фазового управления. D Aussteuerungsgrad bei Anschnittsteuerung. E factor de regulación de fase. I fattore di regolazione di fase. N fasestuurfactor. P współczynnik sterowania fazowego. S utstyrningsgrad. (551,811)

134. pitch factor : a factor relating to a distributed winding, taking into account a deviation of the coil span from the pole pitch, which results in a decrease of the pole flux linkage with the winding considered, and consequently a decrease in the corresponding generated voltage. ★ facteur de raccourcissement (d'allongement) → *facteur 124.* R коэффициент сокращения (удлинения) шага. D Sehnungsfaktor. E factor de paso. I fattore di accorciamento (di allungamento). N spoelfactor. P współczynnik skrótu. S stegfaktor. (411)

135. post-deflection acceleration factor : the ratio of sensitivity in the presence of post-deflection acceleration to that without post-deflection acceleration. ★ facteur de post-accélération → *facteur 117.* R показатель послеускорения. D relativer Ablenkkoeffizient (bei Nachbeschleunigung). E factor de aceleración posterior; factor de postaceleración. I fattore di post-accelerazione. N naversnellingsfactor. P współczynnik

przyspieszenia poodchyleniowego. S efteraccelerationsfaktor. (531)

136. power reflection factor (*Syn.* reflectance) : the ratio of the power flux densities of a reflected wave and an incident wave, in the corresponding directions of propagation of energy after and before reflection, at a point close to a reflective surface. ★ facteur de réflexion énergétique → *facteur 140.* D Leistungsreflexionsfaktor. P współczynnik odbicia mocowy; reflektancja. (705)

137. power reflection factor (in a transmission line) : the ratio of the power of the reflected wave to the power of the incident wave at a specified port or transverse cross-section of a transmission line. ★ facteur de réflexion énergétique → *facteur 141.* R фактор отражения мощности (в линии передачи). D Leistungsreflexionsfaktor (in einer Übertragungsleitung). E factor de reflexión de potencia (en una línea de transmisión). I riflettenza energetica (in una linea di trasmissione). N vermogensreflectiefactor. P współczynnik odbicia mocy (w linii przesyłowej). S reflexionsfaktor för effekt. (726)

138. power transmission factor (in a transmission line) : the ratio of the power of the transmitted wave at a specified port or transverse cross-section to the power of the incident wave at another specified port or transverse cross-section of a transmission line. ★ facteur de transmission énergétique → *facteur 167.* R фактор передачи мощности (в линии передачи). D Leistungsübertragungsfaktor (in einer Übertragungsleitung). E factor de transmisión de potencia (en una línea de transmisión). I trasmettenza energetica (in una linea di trasmissione). N vermogenstransmissiefactor. P współczynnik transmisji mocy (w linii przesyłowej). S transmissionsfaktor för effekt. (726)

139. pulsation factor (of a pulsating voltage or current) : the ratio of the r.m.s. value of the alternating component to the r.m.s. value of the total pulsating quantity.

$$p_u = \frac{U\sim}{U} \qquad p_i = \frac{I\sim}{I}$$

★ taux de pulsation → *taux 31.* R коэффициент пульсации по действующему значению (пульсирующего напряжения или тока). D Schwingungsgehalt (einer Mischspannung oder eines Mischstromes). E factor de pulsación (de una tensión o corriente pulsatoria). I fattore di ondulazione (di una tensione o corrente pulsante). N pulsatiefactor. P współczynnik tętnienia. S pulsationshalt. (131)

140. pulse control factor : the conduction ratio of a principal arm in the case of pulse duration control and if the commutation inductance is regarded to be zero. ★ facteur de réglage par impulsion → *facteur 145.* R коэффициент импульсного управления. D Einschaltverhältnis (Tastverhältnis) bei Pulsbreitensteuerung. E factor de regulación por impulsos. I fattore di regolazione per impulso. N pulsstuurfactor. P współczynnik sterowania impulsowego. S pulsstyrfaktor. (551)

141. pulse duty factor : the ratio of the average pulse duration to the reciprocal of the pulse repetition frequency in a pulse sequence. ★ facteur de durée → *facteur 84.* R коэффициент заполнения импульса. D Impulsdauerfaktor; Tastgrad (beim Rechteckpuls). E factor de duración (de impulsos). I fattore di durata (di impulsi). N pulsverhouding; duurfactor. P współczynnik wypełnienia impulsu. S pulskvot. (702)

142. Q factor (*Syn.* quality factor) : → *factor 143*

143. quality factor (of a circuit element) (*Syn.* Q factor (of a circuit element)) : the ratio of the absolute value of the reactive power to the active power. ★ facteur de qualité → *facteur 119.* R добротность; коэффициент качества. D Gütefaktor. E factor de calidad. I fattore di qualità; fattore di sovratensione. N kwaliteitsfactor; Q-factor. P współczynnik dobroci; współczynnik Q. S godhetstal. (151)

144. quality factor : a measure of sharpness of resonance of a system, being 2π times the ratio of the maximum stored energy to the energy dissipated during one cycle. *Note.* — Historically, the letter Q was an arbitrarily chosen symbol to designate the ratio of reactance to resistance of a circuit element. The name "quality factor" was introduced later. ★ facteur de surtension → *facteur 160.* R добротность. D Resonanzüberhöhung; Güte. E factor de calidad. I fattore di bontà. N kwaliteitsfactor. P współczynnik dobroci; dobroć. S Q-värde. (801)

145. quality factor (Q) : a weighting factor for absorbed dose to allow for the effect on health detriment of the radiation quality. *Note.* — Quality factor is specified by I.C.R.P. as a function of the linear collision stopping power in water. ★ facteur de qualité → *facteur 122.* R коэффициент качества. D Qualitätsfaktor. E factor de calidad. I fattore di qualità. N kwaliteitsfactor. P współczynnik jakości promieniowania. S kvalitetsfaktor. (881)

146. radar reflectivity factor (of hydrometeors) : for an electromagnetic wave incident from a given direction, a quantity which characterizes the power back scattered by hydrometeors existing in the atmosphere. *Note.* — For homogeneous rain precipitation, the radar reflectivity factor is given by the expression :

$$Z = \frac{\Sigma N_i D_i^6}{V}$$

where N_i is the number of particles of diameter D_i in a volume V. The factor Z is generally expressed in mm^6/m^3. ★ coefficient de réflectivité radar → *coefficient 45.* D Radar-Reflektivität(sfaktor) (von Hydrometeoren). P współczynnik odbiciowy radarowy (od hydrometeorów). (705)

147. radiance factor (at a surface element of a non-self-radiating medium, in a given direction, under specified conditions of irradiation) (β_e; β) : ratio of the radiance of the surface element in the given direction to that of a perfect reflecting or transmitting diffuser identically irradiated.Unit : 1 *Note.* — For photoluminescent media, the radiance factor is the sum of two portions, the reflected radiance factor β_s and the luminescent radiance factor β_L : $\beta_e = \beta_s + \beta_L$. ★ facteur de luminance énergétique → *facteur 97.* R коэффициент энергетической яркости (элемента поверхности несамосветящегося тела, в некотором направлении для заданых условий освещения). D Strahldichtefaktor (an einem Flächenelement auf der Oberfläche eines nicht selbststrahlenden Mediums, in einer Richtung, unter gegebenen Bestrahlungsbedingungen). E factor de radiancia. I fattore di radianza. N radiantiefactor. P współczynnik luminancji energetycznej. S radiansfaktor. (845)

148. radiation factor : ratio of sound power radiated by a plate of a given area vibrating with a given root-mean-square velocity over the area, to that power which would be emitted as a plane wave by a plate of the same area vibrating in phase with the same vibration velocity. ★ facteur de rayonnement → *facteur 125.* R коэффициент излучения. D Abstrahlgrad. E factor de radiación. I fattore di radiazione. N stralingsfactor. P współczynnik promieniowania. S strålningsfaktor. (801)

149. rated voltage factor : the multiplying factor to be applied to the rated primary voltage to determine the maximum voltage at which a transformer must comply with the relevant thermal requirements for a specified time and with the relevant accuracy requirements. ★ facteur de tension assigné → *facteur 162.* R нормированный коэффициент повышения напряжения. D Bemessungs-Spannungsfaktor. E factor de tensión asignado. I fattore di tensione nominale. N toegekende spanningsfactor. P współczynnik napięciowy znamionowy. S märkspänningsfaktor. (321)

150. rectification factor : for rectification, the ratio between the d.c. power and the fundamental power. ★ facteur de redressement → *facteur 127.* R коэффициент выпрямления. D Gleichrichtgrad. E factor de rectificación. I fattore di raddrizzamento. N gelijkrichtfactor. P współczynnik prostowania. S likriktarfaktor. (551)

151. reduced utilization factor (of an installation, for a reference surface) : ratio of the average illuminance at the reference surface to the installed lamp flux density. ★ facteur d'utilisation réduit → *facteur 195.* R частный коэффициент использования светового потока ламп (установки, для расчётной плоскости). D spezifischer Beleuchtungswirkungsgrad (einer Beleuchtungsanlage, für eine Bezugsfläche). E factor de utilización reducido. I fattore di utilizzazione ridotto delle lampade. N gereduceerd verlichtingsrendement. P sprawność oświetlenia zredukowana. S relativ belysningsverkningsgrad. (845)

152. redundancy factor : numerical value characterizing the set of measurements available for the state estimation of a network.

$$r = \frac{m}{2n - 1} - 1$$

where : r= redundancy factor, m= number of measurements in the network, n= number of nodes of the netwo rk. ★ facteur de redondance → *facteur 126.* R коэффициент избыточности. D Redudanzfaktor. E factor de redundancia.

I fattore di ridondanza. N redundantiefactor. P współczynnik nadmiaru; współczynnik redundancji. S redundansfaktor. (603)

153. reference conditions of influencing quantities and factors : → *condition 22*

154. reference value of an influencing factor : → *value 50*

155. reflectance factor (at a surface element, for the part of the reflected radiation contained in a given cone with apex at the surface element, and for incident radiation of given spectral composition, polarization and geometrical distribution) (*R*) : ratio of the radiant or luminous flux reflected in the directions delimited by the given cone to that reflected in the same directions by a perfect reflecting diffuser identically irradiated or illuminated. *Notes. 1* — For regularly reflecting surfaces that are irradiated or illuminated by a beam of small solid angle, the reflectance factor may be much larger than 1 if the cone includes the mirror image of the source. *2* — If the solid angle of the cone approaches 2π sr, the reflectance factor approaches the reflectance for the same conditions of irradiation. *3* — If the solid angle of the cone approaches zero, the reflectance factor approaches the radiance or luminance factor for the same conditions of irradiation. ★ ..... → . R фактор коэффициента отражения (на элементе поверхности для той части отраженного излучения, которая сдержится в пучке лучей, с вершиной на данной элементарной поверхности, при этом падающее излучение должно быть определенного спектрального состава, поляризации, геометрического распределения). D Reflexionsfaktor (an einem Flächenelement einer Oberfläche, für den Teil der reflektierten Strahlung, der in einem gegebenen Raumwinkel mit dem Ursprung an diesem Element der Oberfläche enthalten ist, und für einfallende Strahlung gegebenen spektraler Zusammensetzung, Polarisation und geometrischer Verteilung). E factor de reflectancia. I ..... N bundelreflectiefactor. P ..... S reflektansfaktor. (845)

156. reflectance factor (optical) density : → *density 26*

157. reservoir fullness factor : the ratio of the electricity reserve of one or more reservoirs, at a given moment, to their energy capability. ★ facteur de remplissage en énergie électrique → *facteur 150.* R энергетический коэффициент заполнения водохранилища. D Speicherfüllungsgrad. E factor de llenado en energía eléctrica. I coefficiente di invaso in energia elettrica. N elektrische vulfactor van een stuwmeer. P współczynnik wypełnienia zbiornika. S fyllnadsgrad. (602)

158. r.m.s.-ripple factor : → *-ripple 10*

159. saturation factor : the ratio of the saturated value under specified conditions of a quantity to its unsaturated value. ★ facteur de saturation → *facteur 156.* R коэффициент насыщения. D Sättigungsfaktor. E factor de saturación. I fattore di saturazione. N verzadigingsfactor. P współczynnik nasycenia. S mättningsfaktor. (411)

160. scaling factor : the number of pulses required at the input of a scaling circuit in order to produce an output pulse. ★ facteur d'échelle → *facteur 173.* R коэффициент пересчета. D Untersetzungsfaktor. E factor de escala. I fattore di scala. N deelfactor. P współczynnik przeliczania. S skalfaktor. (391)

161. scatter factor : the ratio of the exposure (or absorbed dose) at a point in a body or a phantom to the part of that exposure (or absorbed dose) that is due to primary radiation. ★ facteur de diffusion → *facteur 71.* R коэффициент рассеяния. D Streufaktor. E factor de difusión. I fattore di diffusione. N fantoomverstrooiingsfactor. P współczynnik rozpraszania. S spridningsfaktor. (881)

162. screening factor : the ratio of the e.m.f. appearing in the disturbed line, calculated taking into account the screening effects of adjacent circuits or conductive bodies, to the e.m.f. which would appear if these circuits or conducting bodies were not present. ★ facteur réducteur → *facteur 202.* R коэффициент экранирования. D Reduktionsfaktor. E factor de reducción. I fattore riduttore. N afschermingsfactor. P współczynnik ekranowania. S skärmfaktor. (604)

163. secondary-electron emission factor : → *emission 27*

164. shape factor (of a band-pass or band-stop filter) : the ratio of the two bandwidths of a band-pass or a band-stop filter limited by two specified attenuation values. ★ facteur de forme → *facteur 90.* R коэффициент прямоугольности (полосно-пропускающего или полосно-задерживающего фильтра). D Formfaktor (eines Bandpass- oder Sperrbandfilters). E factor de forma (de un filtro pasabanda o de un filtro de corte de banda). I fattore di forma (di un filtro passa-banda o di un filtro passa-alto o di un filro passa-basso). N vormfactor (van een banddoorlaat- of bandonderdrukkingsfilter). P współczynnik kształtu (filtru środkowoprzepustowego lub środkowozaporowego). S formfaktor. (561)

165. sky component of daylight factor : → *component 52*

166. solar factor (of glazing material) (*Syn.* total (energy) transmittance) (*g*) : ratio of the quantity of heat penetrating into an interior through the glazing, to the solar radiant energy incident on that glazing. *Note.* — This ratio is the sum of two quantities : the radiant transmittance τ_e of the glazing and the quantity equal to the ratio of the convected and radiated heat gain from the glazing into the interior Q_2 to the solar radiant energy Q_1 incident on the glazing $g = \tau_e + Q_2/Q_1$. ★ facteur solaire → *facteur 203.* R общий коэффициент пропускания энергии (материала застекления). D Sonnenfaktor (von Verglasungen); Gesamt(energie)durchlassgrad. E factor solar. I fattore solare. N zontoetredingsfactor. P współczynnik przepuszczalności energetycznej (tworzywa szklistego). S transmittans för solstrålning. (845)

167. spill-over factor (*Syn.* feed efficiency) : for a reflector antenna, the ratio of the power intercepted by a reflector to the power that is radiated to this reflector from its feed. *Note.* — If an antenna includes a succession of reflectors, a spill-over factor may be considered for each reflector. ★ facteur d'utilisation → *facteur 190.* R коэффициент перехвата; эффективность облучателя. D Überstrahlungsfaktor; Speisungswirkungsgrad. E factor de desborde; eficiencia del alimentador. I efficienza di spillover. N overloopfactor; voedingsrendement. P współczynnik rozproszenia. S matningsverkningsgrad. (712)

168. spot noise factor (of a linear two-port device) (*Syn.* spot noise figure (of a linear two-port device)) ($F(f)$) : the ratio of the exchangeable power spectral density of the noise appearing at a given frequency at the output of a given linear two-port device, to the spectral density which would be present at the output if the only source of noise were the thermal noise due to a one-port device connected to the input and which is assumed to have at all frequencies a noise temperature equal to the reference thermodynamic temperature fixed by convention around 290 K. *Notes. 1* — The spot noise factor $F(f)$ is related to the equivalent spot noise temperature $T(f)$ as follows :

$$F(f) = 1 + \frac{T(f)}{T_0}$$

where T_0 is the thermodynamic reference temperature. *2* — The value of the ratio $F(f)$ may by expressed in decibels. In English, the term "noise factor" is generally employed when the ratio is expressed arithmetically, and "noise figure" is employed when the ratio is expressed in decibels. ★ facteur de bruit → *facteur 34.* R коэффициент шума (линейного четырехполюсника). D Rauschfaktor (eines linearen Zweitors); Rauschmaß (eines linearen Zweitors). E factor de ruido (de un dispositivo bipuerta lineal). I cifra di rumore (di un elemento lineare a due porte). N puntruisfactor (van een lineaire tweepoort). P współczynnik szumu (dwuwrotnika linearnego). S brusfaktor. (702)

169. spread factor (UK) (*Syn.* distribution factor (USA)) : a factor related to a distributed winding, taking into account the spatial distribution of the slots in which the winding considered is laid, i.e. the decrease in the generated voltage, as a result of a geometrical addition of the corresponding representative vectors. ★ facteur de zone → *facteur 172.* R коэффициент распределения обмотки. D Zonenfaktor. E factor de distribución. I fattore di distribuzione. N distributiefactor. P współczynnik grupy. S utbredningsfaktor. (411)

170. stacking factor (*Syn.* lamination factor) : → *factor 104*

171. suspension factor (of an installation in an interior) : ratio of the suspension length of the luminaires of the installation to the distance between the ceiling and the working plane. ★ rapport (de hauteur) de suspension → *rapport 22.* R коэффициент подвеса (осветительной установки в помещении). D Pendellängenverhältnis (einer Innenraum-Beleuchtungsanlage). E factor de suspensión. I rapporto di sospensione. N afhanghoogte verhouding. P współczynnik podwieszenia. S relativ pendellängd. (845)

172. tapping factor : the ratio U_d/U_N (tapping factor) or $100\,U_d/U_N$ (tapping factor expressed as a percentage) where : U_N is the rated voltage of the winding U_d is the voltage which would be developed at no-load at the terminals of the winding, connected on the tapping concerned, by applying rated voltage to an untapped winding. *Note.* — The tapping factor expresses the relative value of the "effective number of turns" of the tapped

winding at the relevant tapping, the basis 1 being the effective number of turns of this winding at the principal tapping. ★ facteur de prise → *facteur 118.* R коэффициент ответвления. D Anzapfungsfaktor. E factor de toma. I fattore di presa. N aftakkingsfactor. P współczynnik zaczepu (odpowiadający danemu zaczepowi transformatora). S reglerfaktor. (421)

173. **temperature factor (of reluctivity)** (α_F) : the negative of the change in the reluctivity of a material due to a change in temperature divided by that change in temperature:

$$\alpha_F = -\frac{\frac{1}{\mu_\theta} - \frac{1}{\mu_{ref}}}{\theta - \theta_{ref}} = \frac{\mu_\theta - \mu_{ref}}{\mu_\theta \mu_{ref} (\theta - \theta_{ref})}$$

where μ_θ and μ_{ref} are the permeabilities at temperatures θ and θ_{ref} respectively. ★ facteur de température (de la reluctivité) → *facteur 161.* R относительный температурный коэффициент (удельного магнитного сопротивления). D Temperaturfaktor (des spezifischen magnetischen Widerstandes). E factor de temperatura (de la reluctividad). I coefficiente di temperatura (della reluttività). N temperatuurfactor. P współczynnik temperaturowy reluktancji zredukowany. S (reluktansens) temperaturfaktor. (221)

174. **time acceleration factor** : the ratio between the time durations necessary to obtain the same stated number of failures or degradations in two equal size samples, under two different sets of stress conditions involving the same failure mechanisms and fault modes and their relative prevalence. *Note.* — One of the two sets of stress conditions should be a reference set. ★ facteur d'accélération temporelle → *facteur 18.* R коэффициент ускорения наработки. D Raffungsfaktor. E factor de aceleración temporal. I fattore di accelerazione dei tempi. N tijdsversnellingsfactor. P współczynnik przyspieszenia. S tidsaccelerationsfaktor. (191)

175. **(total) harmonic factor** : the ratio of the r.m.s. value of harmonic content to the r.m.s. value of an alternating quantity. ★ taux d'harmoniques → *taux 49.* R (общий) коэффициент гармоник. D Oberschwingungsgehalt; Klirrfaktor. E tasa armónica. I tasso di distorsione armonica. N vervormingsfactor. P współczynnik (ogólny) harmonicznych. S övertonshalt. (101,161)

176. **(total) harmonic factor** : the ratio of the root-mean-square value of the sum of the harmonic components of an alternating quantity to the root-mean-square value of that quantity. ★ taux d'harmoniques → *taux 51.* R (полный) коэффициент гармоник. D Oberschwingungsgehalt; Klirrfaktor. E tasa de armónicos. I tasso di armoniche. N harmonischenverhouding. P współczynnik zawartości harmonicznych. S övertonshalt. (702)

177. **total turbidity factor** (according to Linke) (T) : ratio of the vertical optical thickness of a turbid atmosphere to the vertical optical thickness of the pure and dry atmosphere (Rayleigh atmosphere), related to the whole solar spectrum.

$$T = \frac{\delta_R + \delta_A + \delta_Z + \delta_W}{\delta_R}$$

where δ_R is the optical thickness with respect to Rayleigh scattering at the air molecules, δ_A, δ_Z, δ_W are the optical thicknesses with respect to Mie scattering and absorption at the aerosol particles, to ozone absorption, and to water vapour absorption respectively. ★ facteur total de trouble → *facteur 204.* R показатель помутнения среды (по Линке). D Trübungsfaktor (nach Linke). E factor total de turbidez. I fattore totale di torbidità. N troebelheidsfactor. P współczynnik zmętnienia (według Linke). S turbiditetsfaktor. (845)

178. **transfer factor** (of a d.c. convertor) : the ratio of the voltage on the load side and the voltage on the source side. ★ rapport de transfert → *rapport 36.* R коэффициент передачи (преобразователя постоянного тока). D Übersetzungsfaktor (eines Gleichstromumrichters). E factor de transferencia (de un convertidor de corriente continua). I rapporto di trasferimento (di un convertitore di corrente continua). N overzetfactor (van een gelijkstroomomzetter). P współczynnik przekształcania (przekształtnika stałoprądowego). S omsättningsfaktor. (551)

179. **unavailability factor** : the ratio of the down duration to the period of time under consideration. ★ taux d'indisponibilité → *taux 52.* R коэффициент неготовности к работе. D Nichtverfügbarkeitsgrad. E factor de indisponibilidad (en tiempo). I tasso d'indisponibilità (durata). N niet-beschikbaarheidsfactor. P współczynnik niedyspozycyjności. S avbrottsfaktor. (603)

180. **unbalance factor** : in a three-phase system, the degree of unbalance expressed by the ratio (in per cent) between the r.m.s. values of the negative sequence (or the zero sequence) component and the positive sequence component of voltage or current. ★ taux de déséquilibre → *taux 12.* R коэффициент обратной (нулевой) последовательности. D Unsymmetriegrad. E tasa de desequilibrio. I tasso di squilibrio. N onbalansfactor. P wskaźnik asymetrii; współczynnik poziomu asymetrii. S osymmetrifaktor. (604)

181. **use factor** : the fraction of the workload during which the useful beam is pointed toward the area in question. ★ facteur d'utilisation → *facteur 193.* R коэффициент использования. D Richtungsfaktor. E factor de utilización. I fattore d'uso. N nuttigheidsfactor. P współczynnik korzystania. S utnyttjandefaktor. (881)

182. **utilisation factor of the maximum capacity of a unit** : the ratio of the energy generated by unit during a given period of time to the energy it would have generated if it had been running at maximum capacity for that period of time. ★ facteur d'utilisation de la puissance maximale possible d'une tranche → *facteur 194.* R коэффициент использования установленной мощности агрегата. D Arbeitsausnutzung eines Blockes. E factor de utilización de la potencia máxima posible de un grupo. I coefficiente di utilizzazione della potenza massima ammissibile di una unità. N gebruiksfactor van een opwekeenheid. P wskaźnik wykorzystania maksymalnej mocy osiągalnej zespołu prądotwórczego. S energiutnyttjningsfaktor för ett block. (602)

183. **utilization factor** (*Syn.* load-factor) : → *load-factor 4*

184. **utilization factor** (of an installation, for a reference surface) (*Syn.* coefficient of utilization (USA)) : ratio of the luminous flux received by the reference surface to the sum of the individual fluxes of the lamps of the installation. ★ facteur d'utilisation → *facteur 191.* R коэффициент использования светового потока ламп (осветительной установки, для расчётной плоскости). D Beleuchtungswirkungsgrad (einer Beleuchtungsanlage, für eine Bezugsfläche). E factor de utilización. I fattore di utilizzazione delle lampade. N verlichtingsrendement. P sprawność oświetlenia. S belysningsverkningsgrad. (845)

185. **utilization factor** : the ratio expressed in per cent of the sum of exposure times in a series to the duration of the series. ★ facteur d'utilisation → *facteur 192.* R коэффициент использования. D Einschaltverhätnis. E factor de utilización. I fattore di utilizzazione. N benuttingsgraad. P współczynnik wykorzystania. S utnyttjandegrad. (881)

186. **vacuum factor** (*Syn.* gas-content factor) : the ratio of the gas current to the electron current that causes it. ★ facteur de vide → *facteur 171.* R вакуум-фактор. D Vakuumfaktor. E factor de vida. I fattore di vuoto. N restgasfactor. P współczynnik próżni. S vakuumfaktor. (531)

187. **voltage factor** (*Syn.* mu factor (USA)) : the ratio of the infinitesimal change in one electrode voltage to the change in another electrode voltage required to maintain a stated electrode current unchanged, all other electrode voltages being maintained constant. ★ facteur d'amplification relatif à deux électrodes → *facteur 28.* R мю-фактор. D μ-Faktor. E factor de tensión. I fattore di amplificazione tra due elettrodi. N versterkingsfactor. P współczynnik oddziaływania napięciowego. S spänningsförstärkningsfaktor. (531)

188. **wavelength reduction factor** : the ratio, expressed in per cent, of the difference between wavelength in vacuum and antenna wavelength, to the wavelength in vacuum. ★ (taux de) contraction → *contraction 2.* R коэффициент уменьшения длины волны. D Wellenlängenverkürzungsfaktor. E factor de reducción de longitud de onda. I fattore di riduzione della lunghezza d'onda. N golflengtereductiefactor. P współczynnik skrócenia fali. S förkortningsfaktor. (712)

189. **winding factors** : the product of the spread factor and the pitch factor. ★ facteur de bobinage → *facteur 33.* R обмоточный коэффициент. D Wicklungsfaktor. E factor de devanado. I fattore di avvolgimento. N wikkelfactor. P współczynnik uzwojenia. S lindningsfaktor. (411)

factory-built

1. **factory-built assembly** : → *assembly 12*

fade

1. **(fade) margin** : → *margin 4*
2. **flat fade margin** : → *margin 5*
3. **net fade margin** : → *margin 11*
4. **to fade down** (a programme signal) (*Syn.* to fade out) : to gradually reduce a programme signal. ★ fermer en fondu → *fermer 4.* R плавно выводить. (723)
5. **to fade in** (*Syn.* to fade up) : → *fade 7*
6. **to fade out** (*Syn.* to fade down) : → *fade 4*
7. **to fade up** (*Syn.* to fade in) : to gradually introduce a programme signal. ★ ouvrir en fondu → *ouvrir 1.* R плавно вводить. (723)

fade-out

1. **fade-out** (*Syn.* black out) : deep fading of long duration. ★ extinction → *extinction 8.* D Totalausfall; Totalschwund. P zanik długotrwały głęboki. (705)
2. **Mögel-Dellinger fade-out** (*Syn.* short-wave fade-out) : → *fade-out 3*
3. **short-wave fade-out** (*Syn.* Mögel-Dellinger fade-out; SWF (abbreviation)) : a fade-out suddenly affecting radio waves at frequencies of between around two and thirty megahertz, caused by a sudden ionospheric disturbance. ★ évanouissement brusque → *évanouissement 6.* D Kurzschwund; Mögel-Dellinger-Effekt. P zanik w zakresie fal krótkich. (705)

fading

1. **cross fading** : to fade in one programme signal while fading out another in order to substitute gradually one for the other. *Note.* — Associated term : to cross-fade. ★ fondu enchaîné → *fondu 4.* R смена плавных переходов. (723)
2. **fading** : variation in the magnitude of an electromagnetic field or of the power of a signal due to time variations of the propagation conditions. *Note.* — When a reference value, such as the free space value, is used the term "fading may be restricted to a temporary and significant decrease in the magnitude of the electromagnetic field or of the power of the signal relative to this reference value. ★ évanouissement → *évanouissement 3.* D Schwund. P zanik. (705)
3. **fading** : gradual introduction or elimination of programme signals during a programme. *Note.* — Associated term : to fade. ★ fondu → *fondu 3.* R плавный переход. (723)
4. **fading area** : → *area 20*
5. **fading depth** : → *depth 4*
6. **fading duration** : → *duration 15*
7. **fading frequency** (*Syn.* fading rate) : → *rate 34*
8. **fading rate** : → *rate 34*
9. **fading time** (*Syn.* fading duration) : → *duration 15*
10. **fast fading** (*Syn.* short period fading) : fading in which the fading rate is characterized by a relatively short period. ★ évanouissement rapide → *évanouissement 9.* D schneller Schwund. P zanik szybki; zanik krótkotrwały. (705)
11. **frequency selective fading** : fading which affects unequally the different spectral components of a modulated radio wave. ★ évanouissement sélectif → *évanouissement 10.* D Selektivschwund. P zanik o selektywnej częstotliwości. (705)
12. **interference fading** : fading due to the interference of radio waves with varying relative phases. ★ évanouissement d'interférence → *évanouissement 7.* D Interferenzschwund. P zanik interferencyjny. (705)
13. **long period fading** (*Syn.* slow fading) : → *fading 16*
14. **rapidity of fading** : → *rapidity 1*
15. **short period fading** (*Syn.* fast fading) : → *fading 10*
16. **slow fading** (*Syn.* long period fading) : fading for which the fading rate is characterized by a relatively long period. ★ évanouissement lent → *évanouissement 8.* D langsamer Schwund. P zanik powolny; zanik długotrwały. (705)

fail

1. **fail safe** : → *safe 2*

failed

1. **assembly for failed fuel element localization** : → *assembly 2*
2. **failed fuel element monitor** : → *monitor 5*

failure

1. **ageing failure** (*Syn.* wearout failure) : a failure whose probability of occurrence increases with the passage of time, as a result of processes inherent in the item. ★ défaillance par vieillissement → *défaillance 23.* R отказ вследствие изнашивания и (или) старения. D alterungsbedinger Ausfall; Abnutzungsausfall. E fallo por envejecimiento; fallo por desgaste. I guasto per invecchiamento; guasto per usura. N storing door veroudering; storing door slijtage. P uszkodzenie starzeniowe. S försliningsfel. (191)
2. **cataleptic failure** (*Syn.* catastrophic failure) : a sudden failure which results in a complete inability to perform all required functions of an item. ★ défaillance cataleptique → *défaillance 8.* R катастрофический отказ. D Sprungvollausfall. E fallo catastrófico. I guasto catalettico. N catastrofale storing. P uszkodzenie katastroficzne. S plötsligt totalfel. (191)
3. **catastrophic failure** (*Syn.* cataleptic failure) : → *failure 2*
4. **circuit-breaker failure protection system** : → *system 28*
5. **common mode failure** : occurrence of multiple primary failures having a common cause. ★ défaillance à événements multiples → *défaillance 5.* R взаимосвязанный отказ. D Mehrfach-Primärausfall. E fallos con causa común. I deficienza evolutiva. N meervoudige storing. P zakłócenia złożone. S samhörande primärfel. (603)
6. **commutation failure** : a failure to commutate the current from a conducting arm to the succeeding arm. ★ raté de commutation → *raté 5.* R нарушение (потеря) коммутации. D Kommutierungsversager. E fallo de conmutación. I mancata commutazione. N commutatiestoring. P opuszczenie komutacji. S kommuteringsmiss, (551,811)
7. **complete failure** : a failure which results in the complete inability of an item to perform all required functions. ★ défaillance complète → *défaillance 9.* R полный отказ. D Vollausfall. E fallo completo. I guasto totale. N volledige storing. P uszkodzenie zupełne. S totalfel. (191)
8. **constant failure intensity period** : → *period 5*
9. **constant failure rate period** : → *period 6*
10. **critical failure** : a failure which is assessed as likely to result in injury to persons, significant material damage or other unacceptable consequences. ★ défaillance critique → *défaillance 10.* R критический отказ. D kritischer Ausfall. E fallo crítico. I guasto critico. N kritieke storing. P uszkodzenie krytyczne. S kritiskt fel. (191)
11. **degradation failure** : a failure which is both a gradual failure and a partial failure. ★ défaillance par dégradation → *défaillance 17.* R частичный постепенный отказ. D Driftteilausfall. E fallo por degradación. I guasto per degradazione. N storing door degradatie. P uszkodzenie wskutek zużycia. S gradvist partialfel. (191)
12. **design failure** : a failure due to inadequate design of an item. ★ défaillance due à la conception → *défaillance 11.* R конструкционный отказ. D konstruktionsbedingter Ausfall. E fallo de diseño. I guasto attribuibile alla progettazione. N storing door ontwerp. P uszkodzenie z winy konstrukcji. S konstruktionsfel. (191)
13. **drift failure** (*Syn.* gradual failure) : → *failure 27*
14. **early failure period** : → *period 8*
15. **equipment failure information** : → *information 4*
16. **failure** : the termination of the ability of an item to perform a required function. *Notes. 1* — After failure the item has a fault. *2* — "Failure" is an event, as distinguished from "fault", which is a state. *3* — This concept as defined does not apply to items consisting of software only. ★ défaillance → *défaillance 3.* R отказ. D Ausfall. E fallo. I guasto. N storing. P uszkodzenie. S fel(uppkomst). (191)
17. **failure** : the termination of the ability of an item to perform a required function. ★ défaillance → *défaillance 4.* R отказ элемента энергосистемы. D Ausfall. E fallo. I deficienza. N storing. P zawiedzenie. S fel. (603)
18. **failure analysis** : → *analysis 4*
19. **failure cause** : → *cause 1*
20. **failure intensity acceleration factor** : → *factor 76*
21. **failure load** : → *load 16*
22. **failure mechanism** : → *mechanism 6*

23. **failure rate acceleration factor** : → *factor 77*
24. **failure to operate** : the failure of a device to change its existing operational state when required to do so. ★ non-fonctionnement → *non-fonctionnement 2.* R неработоспособность. D Funktionsversagen. E no funcionamiento. I funzionamento mancato. N niet-functioneren. P niezadziałanie; zawiedzenie. S utebliven funktion. (604)
25. **failure to operate (of protection equipment)** : the condition of protection equipment which should have operated but which did not operate because of a technological failure or a design deficiency. ★ défaut de fonctionnement (d'un dispositif de protection) → *défaut 17.* R отказ в срабатывании (устройства защиты). D Unterfunktion (einer Schutzeinrichtung). E fallo de funcionamiento (de un dispositivo de protección). I difetto di funzionamento (di un dispositivo di protezione). N aanspreekweigering (van beveiligingsapparatuur). P zadziałanie zbędne (urządzenia zabezpieczającego). S utebliven funktion. (448)
26. **firing failure** : a failure to achieve conduction in a controllable valve or arm during the interval which is, in undisturbed operation, the conduction interval. ★ raté d'allumage → *raté 2.* R пропуск включения. D Zündversager. E fallo de encendido. I mancata accensione. N ontstekingsstoring. P zapłon opuszczony. S missning; tändmiss. (551,811)
27. **gradual failure** (*Syn.* drift failure) : a failure due to a gradual change with time of given characteristics of an item. *Note.* — A gradual failure may be anticipated by prior examination of monitoring and can sometimes be avoided by preventive maintenance. ★ défaillance progressive → *défaillance 27.* R постепенный отказ. D Driftausfall. E fallo progresivo. I guasto progressivo. N geleidelijk optredende storing. P uszkodzenie stopniowe. S gradvist fel. (191)
28. **(instantaneous) failure intensity** : → *intensity 9*
29. **(instantaneous) failure rate** : → *rate 42*
30. **life to X% failures** : the length of time during which X% of the lamps subjected to a life test reach the end of their lives, the lamps being operated under specified conditions and the end of life judged according to specified criteria. ★ durée de vie à X % de défaillances → *durée de vie 2.* R срок службы до X% отказов. D Lebensdauer bis zu einer Ausfallrate von X%. E vida X% de fallos. I vita all'X% di guasti. N levensduur tot X% uitvallers. P trwałość do X% wygaśnięć. S livslängd till X% bortfall. (845)
31. **manufacturing failure** : a failure due to non-conformity during manufacture to the design of an item or to specified manufacturing processes. ★ défaillance due à la fabrication → *défaillance 12.* R производственный отказ. D fertigungsbedingter Ausfall. E fallo de fabricación. I guasto attribuibile alla fabbricazione. N storing door fabricage. P uszkodzenie z winy wykonania. S tillverkningsfel. (191)
32. **mean failure intensity** : → *intensity 11*
33. **mean failure rate** : → *rate 54*
34. **mean operating time between failures** : → *operating 5*
35. **mean time between failures** : → *time 101*
36. **mean time to failure** : → *time 103*
37. **mean time to first failure** : → *time 104*
38. **mishandling failure** : a failure caused by incorrect handling or lack of care of the item. ★ défaillance par fausse manœuvre → *défaillance 19.* R отказ вследствие неправильного обращения. D Ausfall infolge Fehlbehandlung. E fallo por falsa maniobra. I guasto da errata manovra. N storing door onzorgvuldig gebruik. P uszkodzenie z niewłaściwej obsługi. S misskötselfel. (191)
39. **misuse failure** : a failure due to the application of stresses during use which exceed the stated capabilities of the item. ★ défaillance par mauvais emploi → *défaillance 21.* R отказ вследствие перегрузки. D Ausfall infolge Fehlnutzung. E fallo uso incorrecto. I guasto per impiego improprio. N storing door verkeerd gebruik. P uszkodzenie z niewłaściwego stosowania. S missbruksfel. (191)
40. **non-critical failure** : a failure which is assessed as not likely to result in injury to persons, significant material damage or other inacceptable consequences. ★ défaillance non critique → *défaillance 15.* R некритический отказ. D unkritischer Ausfall. E fallo no crítico. I guasto non critico. N niet-kritieke storing. P uszkodzenie niekrytyczne. S okritiskt fel. (191)
41. **non-relevant failure** : a failure that should be excluded in interpreting test or operational results or in calculating the value of a reliability performance measure. *Note.* — The criteria for the exclusion should be stated. ★ défaillance non pertinente → *défaillance 16.* R неучитываемый отказ. D nicht zu wertender Ausfall. E fallo irrelevante. I guasto non pertinente. N niet-relevante storing. P uszkodzenie nieistotne. S irrelevant fel. (191)
42. **operating time between failures** : → *time 124*
43. **partial failure** : a failure which results in the inability of an item to perform some, but not all, required functions. ★ défaillance partielle → *défaillance 24.* R частичный отказ. D Teilausfall. E fallo parcial. I guasto parziale. N gedeeltelijke storing. P uszkodzenie częściowe. S partialfel. (191)
44. **primary failure** : a failure of an item, not caused either directly or indirectly by a failure or a fault of another item. ★ défaillance primaire → *défaillance 26.* R независимый отказ. D Primärausfall. E fallo primario. I guasto primario. N primaire storing. P uszkodzenie pierwotne. S primärfel. (191,603)
45. **relevant failure** : a failure that should be included in interpreting test or operational results or in calculating the value of a reliability performance measure. *Note.* — The criteria for the inclusion should be stated. ★ défaillance pertinente → *défaillance 25.* R учитываемый отказ. D zu wertender Ausfall. E fallo a considerar. I guasto pertinente. N relevante storing. P uszkodzenie istotne. S relevant fel. (191)
46. **reproducible failure** (*Syn.* systematic failure) : → *failure 49*
47. **secondary failure** : a failure of an item, caused either directly or indirectly by a failure or a fault of another item. ★ défaillance secondaire → *défaillance 29.* R зависимый отказ. D Sekundärausfall. E fallo secundario. I guasto secondario. N secundaire storing. P uszkodzenie wtórne. S sekundärfel. (191,603)
48. **sudden failure** : a failure that could not be anticipated by prior examination or monitoring. ★ défaillance soudaine → *défaillance 30.* R внезапный отказ. D Sprungausfall. E fallo repentino. I guasto improvviso. N plotselinge storing. P uszkodzenie nagłe. S plötsligt fel. (191)
49. **systematic failure** (*Syn.* reproducible failure) : a failure related in a deterministic way to a certain cause, which can only be eliminated by a modification of the design or of the manufacturing process, operational procedures, documentation or other relevant factors. *Notes. 1* — Corrective maintenance without modification will usually not eliminate the failure cause. *2* — A systematic failure can be induced at will by simulating the failure cause. ★ défaillance systématique → *défaillance 31.* R систематический отказ. D systematischer Ausfall. E fallo sistemático; fallo reproducible. I guasto sistematico. N systematische storing; reproduceerbare storing. P uszkodzenie systemowe; uszkodzenie odtwarzalne. S systematiskt fel. (191)
50. **time between failures** : → *time 177*
51. **time to failure** : → *time 206*
52. **time to first failure** : → *time 207*
53. **weakness failure** : a failure due to a weakness in the item itself when subjected to stresses within the stated capabilities of the item. *Note.* — A weakness may be either inherent or induced. ★ défaillance par fragilité → *défaillance 20.* R отказ вследствие непрочности. D schwachstellenbedingter Ausfall. E fallo por fragilidad. I guasto per fragilità. N storing door zwakte. P uszkodzenie z małej odporności. S svaghetsfel. (191)
54. **wearout failure** (*Syn.* ageing failure) : → *failure 1*
55. **wear-out failure period** : → *period 36*

fall

1. **abnormal cathode fall** : a cathode fall which depends on the discharge current, which is distributed over the whole active surface of the cathode. ★ chute cathodique anormale → *chute 2.* R анормальное катодное падение. D anormaler Kathodenfall. E caída catódica anormal. I caduta catodica anormale. N abnormale kathodeval. P spadek katodowy anormalny. S anormalt katodfall. (845)
2. **cathode fall** (*Syn.* cathode drop) : the difference of potential due to the space charge near the cathode. ★ chute (de tension) cathodique → *chute de tension 1.* R катодное падение. D Kathodenfall. E caída catódica. I caduta catodica. N kathodeval. P spadek katodowy. S katodfall. (845)

3. **fall back circuit** (*Syn.* nominated reserved circuit) : → *circuit 124*
4. **fall time** : → *time 56*
5. **fall time** (*Syn.* decay time) : → *time 43*
6. **fall time** : → *time 58*
7. **normal cathode fall** : a cathode fall which is independent of the discharge current, the current density remaining constant over the active surface of the cathode. ★ chute cathodique normale → *chute 3.* R нормальное катодное падение. D normaler Kathodenfall. E caída catódica normal. I caduta catodica normale. N normale kathodeval. P spadek katodowy normalny. S normalt katodfall. (845)
8. **pulse fall time discriminator** : → *discriminator 9*
9. **rise and fall pendant** : → *pendant 2*
10. **scintillation fall time** : → *time 160*

falling

1. **falling characteristic** : → *characteristic 39*

fallout

1. **radioactive fallout** : radioactive material that is deposited on the surface of the earth, for example, in the form of dust or rain after being produced by a nuclear explosion or events subsequent to such an explosion, or after an accidental release of radioactivity. ★ retombée radioactive → *retombée 1.* R радиоактивные выпадения. D radioaktiver Niederschlag. E depósito radiactivo; pozo radiactivo. I fallout radioattivo/ricadute radioattive. N radioactief neerslag. P opad radioaktywny. S radioaktivt nedfall. (881)

false

1. **false coincidence** : → *coincidence 4*
2. **false firing** : → *firing 3*

fan

1. **axial flow fan** : a fan in which the air moves in a direction parallel to the axis of rotation. ★ ventilateur axial → *ventilateur 6.* R осевой вентилятор. D Axiallüfter. E ventilador axial; ventilador de hélice. I ventilatore assiale. N axiale ventilator. P wentylator osiowy; dmuchawa osiowa. S axialfläkt. (811)
2. **fan** (*Syn.* blower) : → *blower 1*
3. **fan housing** : → *housing 5*
4. **fan set** : → *set 16*
5. **fan shroud** : → *shroud 1*
6. **radial flow fan** : a fan through which the air moves radially. ★ ventilateur radial → *ventilateur 8.* R центробежный вентилятор. D Radiallüfter. E ventilación radial; ventilador centrífugo. I ventilatore centrifugo; ventilatore radiale. N radiale ventilator. P wentylator odśrodkowy; dmuchawa osiowa. S radialfläkt. (811)

fan-beam

1. **fan-beam antenna** : → *antenna 48*

fan-ventilated

1. **closed air-circuit fan-ventilated air-cooled** : applied to a closed air-circuit machine having an air-to-air heat exchanger in the internal air-circuit, the external air being blown through the heat exchanger by a fan mechanically driven by the machine shaft. ★ machine ventilée à refroidissement par air en circuit fermé → *machine 73.* R машина с замкнутой системой воздушного охлаждения и внешним вентилятором на валу машины. D Maschine mit Eigenrückkühlung durch Luft in geschlossenem Kreislauf. E máquina ventilada con refrigeración por aire en circuito cerrado. I macchina ventilata in ciclo chiuso. N met gesloten luchtomloop en lucht-luchtkoeler. P maszyna z zamkniętym obiegiem powietrza i zewnętrznym wentylatorem zależnym. S slutet kylsystem med luft-luftkylare. (411)
2. **closed air-circuit separately fan-ventilated air-cooled** : applied to a closed air-circuit machine having an air-to-air heat exchanger in the internal air-circuit, the external air being blown through the heat exchanger by a separately driven fan. ★ machine à ventilation séparée, à refroidissement par air en circuit fermé → *machine 32.* R машина с замкнутой системой воздушного охлаждения и внешним вентилятором с отдельным приводом. D Maschine mit Fremdruckkühlung durch Luft in geschlossenem Kreislauf. E máquina de ventilación separada, con refrigeración por aire en circuito cerrado. I macchina a ventilazione separata in ciclo chiuso. N met gesloten luchtomloop, lucht-luchtkoeler en onafhankelijke ventilator. P maszyna z zamkniętym obiegiem powietrza i zewnętrznym wentylatorem niezależnym. S slutet kylsystem med luft-luftkylare och separatdriven fläkt. (411)
3. **totally-enclosed fan-ventilated** : applied to a totally-enclosed machine with cooling augmented by means of a fan, mounted on the machine shaft, blowing external air over external cooling surfaces which are integral with the machine. ★ machine fermée autoventilée → *machine 53.* R закрытая машина с самовентиляцией. D völlig geschlossene Maschine mit Eigenlüftung. E máquina cerrada autoventilada. I macchina chiusa autoventilata esternamente. N uitwendig gekoeld. P maszyna zamknięta z wentylatorem zewnętrznym zależnym. S helkapslad mantelkyld. (411)
4. **totally-enclosed fan-ventilated air-cooled** : applied to a totally-enclosed machine having an air-to-air heat exchanger in the internal air circuit, the external air being blown through the heat exchanger by a fan mechanically driven by the machine shaft. ★ machine fermée autoventilée à échangeur air-air → *machine 54.* R закрытая самовентилируемая машина с воздушным охлаждением. D völlig geschlossene Maschine mit Eigenkühlung durch Luft. E máquina cerrada autoventilada con intercambiador aire-aire. I macchina chiusa autoventilata con scambiatore aria-aria. N gesloten met lucht-luchtkoeler. P maszyna zamknięta z powietrznym wymiennikiem ciepła. S helkapslad med luft-luftkylare. (411)
5. **totally-enclosed separately fan-ventilated** : applied to a totally-enclosed machine with cooling augmented by means of a separately driven fan causing external air to flow over external cooling surfaces which are integral with the machine. ★ machine fermée à ventilation séparée → *machine 51.* R закрытая машина с независимой вентиляцией. D völlig geschlossene Maschine mit Fremdlüftung. E máquina cerrada con ventilación separada. I macchina chiusa a ventilazione separata esterna. N uitwendig gekoeld met onafhankelijke ventilator. P maszyna zamknięta z wentylatorem zewnętrznym niezależnym. S helkapslad med separatdriven fläkt. (411)
6. **totally-enclosed separately fan-ventilated air-cooled** : applied to a totally-enclosed machine having an air-to-air heat exchanger in the internal air-circuit, the external air being blown through the heat exchanger by a separately driven fan. ★ machine fermée à ventilation séparée, à échangeur air-air → *machine 52.* R закрытая машина с независимой вентиляцией и воздухоохладителем. D völlig geschlossene Maschine mit Fremdkühlung durch Luft. E máquina cerrada, con ventilación separada, e intercambiador aire-aire. I macchina chiusa a ventilazione separata, con scambiatore aria-aria. N gesloten met lucht-luchtkoeler en onafhankelijke ventilator. P maszyna zamknięta z powietrznym wymiennikiem ciepła i wentylatorem niezależnym. S helkapslad med luft-luftkylare och separatdriven fläkt. (411)

far

1. **far field region** : → *region 5*
2. **far sound field** : → *sound field 2*

farad

1. **farad, F** (F) : SI unit of (electric) capacitance. ★ farad, F → *farad 1.* (100)

Faraday

1. **Faraday effect** : → *effect 22*
2. **Faraday effect** : → *effect 23*
3. **Faraday rotation** (*Syn.* Faraday effect) : → *effect 23*

far-end

1. **far-end crosstalk** : → *crosstalk 9*
2. **far-end crosstalk attenuation** : → *attenuation 19*

far-field

1. **far-field diffraction pattern** : → *pattern 7*
2. **far-field pattern** (*Syn.* far-field radiation pattern) : → *pattern 9*
3. **far-field radiation pattern** : → *pattern 9*
4. **far-field region** : → *region 6*

farm

1. **farm tariff** : → *tariff 8*

fast

1. **fast fading** : → *fading 10*
2. **fast fission** : → *fission 4*
3. **fast fission factor** : → *factor 78*
4. **fast forward movement** : → *movement 2*
5. **fast motion** : → *motion 1*
6. **fast neutrons** : → *neutron 7*
7. **fast reactor** : → *reactor 14*
8. **fast spiral** : → *spiral 3*
9. **fast wave** : → *wave 13*
10. **maximum fast spooling time** : → *time 85*

fastener

1. **special fastener** (of an electrical apparatus for explosive atmospheres) : a fastening device designed to deter unauthorized personnel from invalidating the type of protection of an electrical apparatus for explosive atmospheres. ★ fermeture spéciale → *fermeture 6.* R специальное крепежное устройство (взрывозащищенного электрооборудования). D Sonderverschluß. E cierre especial (de un material eléctrico para atmósferas explosivas). I chiusure speciali (di una costruzione elettrica per atmosfere esplosive). N bijzonder bevestigingsmiddel (van elektronisch materieel op plaatsen met ontploffingsgevaar). P zamknięcie specjalne. S speciellt fästelement. (426)

fault

1. **ageing fault** (*Syn.* wearout fault) : a fault resulting from a failure whose probability of occurrence increases with the passage of time as a result of processes inherent in the item. ★ panne par vieillissement → *panne 33.* R неисправность вследствие изнашивания и (или) старения. D abnutzungsbedingter Fehlzustand. E avería por envejecimiento; avería por desgaste. I avaria per invecchiamento; avaria per usura. N defect door veroudering; defect door slijtage. P niezdatność starzeniowa. S förslitningsfel. (191)
2. **busbar fault** : a fault located on a substation busbar. *Note.* — For protection purposes the limits of the busbar are determined by the location of the current transformers. ★ défaut de barres → *défaut 14.* R замыкание на шинах. D Sammelschienenfehler. E defecto en barras. I guasto sulle sbarre. N railfout. P zwarcie na szynach. S samlingsskenefel. (604)
3. **clamp fault** (*Syn.* black level shift) : → *shift 5*
4. **complete fault** (*Syn.* function-preventing fault) : a fault characterized by the complete inability of an item to perform all required functions. *Note.* — The criteria for a complete inability should be stated. ★ panne complète → *panne 16.* R полная неисправность; неисправность, препятствующая функционированию. D vollständiger Fehlzustand; funktionsverhindernder Fehlzustand. E avería completa. I avaria completa. N volledig defect. P niezdatność zupełna. S totalfel. (191)
5. **critical fault** : a fault which is assessed as likely to result in injury to persons, significant material damage, or other unacceptable consequences. ★ panne critique → *panne 17.* R критическая неисправность. D kritischer Fehlzustand. E avería crítica. I avaria critica. N kritiek defect. P niezdatność krytyczna. S kritiskt fel. (191)
6. **cross country fault** (*Syn.* multiple faults) : → *fault 60*
7. **current in the fault** : → *current 51*
8. **damage fault** : a fault which involves repair or replacement action at the point of the fault. ★ défaut avec dommage → *défaut 10.* R повреждение с нарушением работоспособности. D Fehler mit Schadenfolge. E defecto con desperfectos. I guasto con danneggiamento. N fout met schade. P zakłócenie z uszkodzeniem. S förstörande fel. (604)
9. **data-sensitive fault** : a fault that is revealed as a result of the processing of a particular pattern of data. ★ panne mise en évidence par les données → *panne 27.* R неисправность, обнаруживаемая при обработке данных. D datenbedingter Fehlzustand. E avería detectada por los datos. I avaria dati-dipendente. N gegevensafhankelijk defect. P niezdatność wynikła z układu danych. S databeroende fel. (191)
10. **design fault** : a fault due to inadequate design of an item. ★ panne due à la conception → *panne 18.* R конструкционная неисправность. D konstruktionsbedingter Fehlzustand. E avería de diseño. I avaria attribuibile alla progettazione. N defect door ontwerp. P niezdatność z winy konstrukcji. S konstruktionsfel. (191)
11. **determinate fault** : for an item which produces a response as a result of an action, a fault for which the response is the same for all actions. ★ panne franche → *panne 20.* R определенная неисправность. D eindeutiger Fehlzustand. E avería determinada. I avaria determinata. N onafhankelijk defect. P niezdatność określona. S ..... (191)
12. **developing fault** : an insulation fault which begins as a phase-to-earth (or phase-to-phase) fault and develops into a two-phase or three-phase fault. ★ défaut évolutif → *défaut 25.* R развивающееся замыкание. D sich ausweitender Kurzschluß. E defecto evolutivo. I guasto evolutivo. N zich ontwikkelende fout. P zwarcie rozwijające się. S omslagsfel. (604)
13. **double faults** : insulation faults to earth, occurring simultaneously at two different locations in one or several circuits originating from a common source. ★ défaut double → *défaut 21.* R двойное замыкание. D Doppelerdschluß. E defecto doble. I guasto doppio. N dubbele fouten. P zwarcie dwukrotne. S dubbelt jordfel. (604)
14. **double line to ground fault** (*Syn.* two-phase-to-earth fault) : → *fault 82*
15. **earth fault** : a fault caused by a conductor being connected to earth or by the insulation resistance to earth becoming less than a specified value. ★ défaut à la terre → *défaut 8.* R замыкание на землю. D Erdschluß; Erdfehler. E falta a tierra. I guasto a terra. N aardfout. P zwarcie z ziemią. S jordfel. (151)
16. **earth fault factor** : → *factor 61*
17. **earth fault relay** : → *relay 10*
18. **fault** : any undesired change that impairs normal operation. ★ défaut → *défaut 6.* R повреждение. D Fehler. E falta. I guasto. N fout; defect. P uszkodzenie. S fel. (151)
19. **fault** : the state of an item characterized by inability to perform a required function, excluding the inability during preventive maintenance or other planned actions, or due to lack of external resources. *Note.* — A fault is often the result of a failure of the item itself, but may exist without prior failure. ★ panne → *panne 15.* R (существенная) неисправность. D Fehlzustand. E avería. I avaria. N defect. P niezdatność. S (funktions)fel. (191)
20. **fault** : an unplanned occurrence or defect in an item which may result in one or more failures of the item itself or of other associated equipment. ★ défaut → *défaut 7.* R повреждение; неисправность. D Fehler. E defecto. I guasto. N fout. P zakłócenie. S fel. (604)
21. **fault analysis** : → *analysis 5*
22. **fault clearance** : → *clearance 10*
23. **fault clearance time** : → *time 59*
24. **fault correction** : → *correction 11*
25. **fault correction time** : → *time 60*
26. **fault coverage** : → *coverage 4*
27. **fault current** : → *current 84*
28. **fault current of an electrode** : → *current 85*
29. **fault diagnosis** : → *diagnosis 1*
30. **fault diagnosis time** : → *time 61*
31. **fault impedance** : → *impedance 16*
32. **fault localization** : → *localization 2*
33. **fault localization time** : → *time 62*
34. **fault location** : → *location 1*
35. **fault locator** : → *locator 1*
36. **fault masking** : → *masking 2*
37. **fault mode** : → *mode 27*
38. **fault modes and effects analysis** : → *analysis 6*
39. **fault modes, effects and criticality analysis** : → *analysis 7*
40. **fault recognition** : → *recognition 1*
41. **fault tolerance** : → *tolerance 7*
42. **fault tree** : → *tree 1*
43. **fault tree analysis** : → *analysis 8*
44. **function-preventing fault** (*Syn.* complete fault) : → *fault 4*
45. **indeterminate fault** : for an item which produces a response as a result of an action, a fault such that the error affecting the response depends on the action applied. *Note.* — An example

would be a data-sensitive fault. ★ panne indéterminée → *panne 21.* R неопределенная неисправность. D nichteindeutiger Fehlzustand. E avería indeterminada. I avaria indeterminata. N afhankelijk defect. P niezdatność nieokreślona. S ..... (191)

46. **insulation fault** : a defect in the insulation of an equipment which can result either in an abnormal current through this insulation or in a disruptive discharge. ★ défaut d'isolement → *défaut 20.* R повреждение изоляции; замыкание. D Isolationsfehler. E defecto de aislamiento. I guasto dell'isolamento. N isolatiefout. P uszkodzenie izolacji. S isolationsfel. (604)

47. **insulation fault detecting instrument** : → *instrument 20*

48. **intermittent fault** (*Syn.* volatile fault; transient fault) : a fault of an item which persists for a limited time duration following which the item recovers the ability to perform a required function without being subjected to any action of corrective maintenance. *Note.* — Such a fault is often recurrent. ★ panne intermittente → *panne 22.* R перемежающаяся неисправность; нестабильная неисправность. D intermittierender Fehlzustand. E avería intermitente; avería transitoria. I avaria intermittente; avaria temporanea. N tijdelijk defect; terugkerend defect. P niezdatność przejściowa. S intermittent fel. (191)

49. **intermittent fault** : a transient fault which recurs repeatedly in the same place and due to the same cause. ★ défaut intermittent → *défaut 28.* R перемежающееся замыкание. D intermittierender Fehler. E defecto intermitente. I guasto intermittente. N intermitterende fout. P zwarcie powtarzające się. S intermittent fel. (604)

50. **interturn fault** (*Syn.* turn-to-turn fault) : → *fault 81*

51. **interwinding fault** : an insulation fault between two conductors of different windings in wound-coil equipment. ★ défaut entre bobinage → *défaut 23.* R замыкание между обмотками. D Wicklungsschluß. E defecto entre bobinados. I guasto fra avvolgimenti. N wikkelingsfout. P zwarcie międzycewkowe. S fel mellan lindningar. (604)

52. **latent fault** : an existing fault that has not yet been recognized. ★ panne latente → *panne 23.* R скрытая неисправность. D latenter Fehlzustand. E avería latente. I avaria latente. N latent defect. P niezdatność utajona. S dolt fel. (191)

53. **line fault** : a fault occurring at a more or less well-localized point of an electrical line. *Note.* — For protection purposes the limits of the line are usually given by the location of the current transformers. ★ défaut en ligne → *défaut 22.* R замыкание на линии электропередачи. D Leitungsfehler. E defecto en línea. I guasto in linea. N leidingfout. P zwarcie w linii. S ledningsfel. (604)

54. **line-to-line fault** (*Syn.* phase-to-phase fault (clear of earth)) : → *fault 68*

55. **major fault** : a fault which affects a function considered to be of major importance. ★ panne majeure → *panne 24.* R значительная неисправность. D wesentlicher Fehlzustand. E avería mayor. I avaria maggiore. N ernstig defect. P niezdatność istotna. S större fel. (191)

56. **manufacturing fault** : a fault due to non-conformity during manufacture to the design of an item or to specified manufacturing processes. ★ panne due à la fabrication → *panne 19.* R производственная неисправность. D fertigungsbedingter Fehlzustand. E avería de fabricación. I avaria attribuibile alla fabbricazione. N defect door fabricage. P niezdatność z winy wykonania. S tillverkningsfel. (191)

57. **minor fault** : a fault which does not affect any function considered to be of major importance. ★ panne mineure → *panne 25.* R незначительная неисправность. D geringfügiger Fehlzustand. E avería menor. I avaria minore. N gering defect. P niezdatność nieistotna; niezdatność mała. S mindre fel. (191)

58. **mishandling fault** : a fault caused by incorrect handling or lack of care of the item. ★ panne par fausse manœuvre → *panne 29.* R неисправность вследствие неправильного обращения. D Fehlzustand infolge Fehlbehandlung. E avería por falsa maniobra. I avaria per errata manovra. N defect door onzorgvuldig gebruik. P niezdatność z niewłaściwej obsługi. S misskötselfel. (191)

59. **misuse fault** : a fault due to the application of stresses during use which exceed the stated capabilities of the item. ★ panne par mauvais emploi → *panne 31.* R неисправность вследствие перегрузки. D Fehlzustand infolge Fehlnutzung. E avería por uso incorrecto. I avaria per impiego improprio. N defect door verkeerd gebruik. P niezdatność z niewłaściwego stosowania. S missbruksfel. (191)

60. **multiple faults** (*Syn.* cross country fault) : insulation faults to earth, occurring simultaneously at more than two different locations in one or several circuits originating from a common source. ★ défaut multiple → *défaut 30.* R многократное замыкание. D Mehrfacherdschluß. E defecto múltiple. I guasto multiplo. N meervoudige fouten. P zwarcie wielokrotne. S flerfaldigt jordfel. (604)

61. **non-critical fault** : a fault which is assessed as not likely to result in injury to persons, significant material damage, or other unacceptable consequences. ★ panne non critique → *panne 28.* R некритическая неисправность. D unkritischer Fehlzustand. E avería no crítica. I avaria non critica. N niet-kritiek defect. P niezdatność niekrytyczna. S okritiskt fel. (191)

62. **non-damage fault** : a fault which does not involve repair or replacement action at the point of the fault. ★ défaut sans dommage → *défaut 34.* R повреждение без нарушения работоспособности. D Fehler ohne Schadenfolge. E defecto sin desperfectos. I guasto senza danneggiamento. N fout zonder schade. P zakłócenie bez uszkodzenia. S icke-förstörande fel. (604)

63. **partial fault** : a fault characterized by the inability of an item to perform some, but not all, required functions. ★ panne partielle → *panne 34.* R частичная неисправность. D partieller Fehlzustand. E avería parcial. I avaria parziale. N gedeeltelijk defect. P niezdatność częściowa. S partialfel. (191)

64. **permanent fault** (*Syn.* persistent fault) : → *fault 66*

65. **permanent fault** : a fault which affects a device and prevents its restoration into service until action has been taken at the point of the fault. ★ défaut permanent → *défaut 31.* R устойчивое повреждение. D bleibender Fehler. E defecto permanente. I guasto permanente. N blijvende fout. P zakłócenie trwałe; uszkodzenie trwałe. S kvarstående fel. (604)

66. **persistent fault** (*Syn.* permanent fault; solid fault) : a fault of an item that persists until an action of corrective maintenance is performed. ★ panne permanente → *panne 35.* R стабильная неисправность. D bleibender Fehlzustand; permanenter Fehlzustand. E avería permanente. I avaria persistente; avaria permanente. N blijvend defect. P niezdatność trwała. S kontinuerligt fel. (191)

67. **phase-to-earth fault** (*Syn.* single line to ground fault (USA)) : an insulation fault between one phase conductor and earth only. ★ défaut monophasé à la terre → *défaut 29.* R однофазное замыкание на землю. D einpoliger Erdschluß. E defecto monofásico a tierra; defecto fase-tierra. I guasto monofase a terra; guasto fase-terra. N eenfase-aardfout. P zwarcie doziemne jednofazowe; doziemienie. S enfasigt jordfel. (604)

68. **phase-to-phase fault (clear of earth)** (USA) (*Syn.* line-to-line fault (USA)) : line-to-line an insulation fault between two-phase conductors only and clear of earth. ★ défaut biphasé sans terre → *défaut 12.* R двухфазное замыкание. D zweipoliger Kurzschluß (ohne Erdberührung). E defecto bifásico (sin tierra). I guasto fra due fasi non a terra. N tweefasenfout. P zwarcie międzyfazowe. S tvåfasigt fel (utan jordberöring). (604)

69. **programme-sensitive fault** : a fault that is revealed as a result of the execution of some particular sequence of instructions. ★ panne mise en évidence par le programme → *panne 26.* R программно-обнаруживаемая неисправность. D programmbedingter Fehlzustand. E avería detectada por el programa. I avaria programma-dipendente. N programma-afhankelijk defect. P niezdatność wynikła z programu. S programberoende fel. (191)

70. **resistive fault** : an insulation fault, the resistance of which is sufficiently high to maintain a significant voltage between the faulted conductor and earth or between conductors. ★ défaut résistant → *défaut 33.* R замыкание через сопротивление. D widerstandsbehafteter Fehler. E defecto resistente. I guasto resistente. N weerstandsfout. P zwarcie przez opór; zwarcie oporowe. S högresistivt fel. (604)

71. **self-extinguishing fault** : an insulation fault where the arc extinguishes without it being necessary to disconnect the device from the system for its essential dielectric properties to be restored. ★ défaut auto-extincteur → *défaut 9.* R самоликвидирующееся замыкание. D selbstlöschender Fehler. E defecto autoextinguible. I guasto con autoestinzione.

N zichzelf blussende fout. P zwarcie samogasnące. S självsläckande fel. (604)

72. **single line to ground fault** (*Syn.* phase-to-earth fault) : → *fault 67*
73. **solid fault** (*Syn.* persistent fault) : → *fault 66*
74. **symmetrical fault** (*Syn.* three-phase fault) : → *fault 76*
75. **systematic fault** : a fault resulting from a systematic failure. ★ panne systématique → *panne 36.* R систематическая неисправность. D systematischer Fehlzustand. E avería sistemática. I avaria sistematica. N systematisch defect. P niezdatność systematyczna. S systematiskt fel. (191)
76. **three-phase fault** (*Syn.* symmetrical fault) : an insulation fault at one point of a circuit, affecting the insulation of all three phase conductors between one another and usually to earth. ★ défaut triphasé → *défaut 35.* R трехфазное замыкание. D dreipoliger Kurzschluß. E defecto trifásico. I guasto trifase. N driefasenfout. P zwarcie trójfazowe [symetryczne]. S trefasigt fel. (604)
77. **through fault current** : → *current 210*
78. **transductor fault limiting coupling** : → *coupling 41*
79. **transient fault** (*Syn.* intermittent fault) : → *fault 48*
80. **transient fault** : an insulation fault which only temporarily affects a device's dielectric properties which are restored after a short time. ★ défaut fugitif → *défaut 27.* R преходящее замыкание. D vorübergehender Fehler. E defecto fugitivo. I guasto passeggero. N voorbijgaande fout. P zwarcie przemijające. S övergående fel. (604)
81. **turn-to-turn fault** (*Syn.* interturn fault) : an insulation fault between neighbouring of the same winding in a coil. ★ défaut entre spires → *défaut 24.* R межвитковое замыкание. D Windungsschluß. E defecto entre espiras. I guasto fra spire (della stessa fase). N windingsfout. P zwarcie międzyzwojowe. S varvkortslutning. (604)
82. **two-phase-to-earth fault** (*Syn.* double line to ground fault (USA)) : an insulation fault at one point of a circuit between two-phase conductors and earth. ★ défaut biphasé à la terre → *défaut 11.* R двухфазное замыкание на землю. D zweipoliger Kurzschluß mit Erdberührung. E defecto bifásico a tierra. I guasto fra due fasi e a terra. N tweefasen aardfout. P zwarcie dwufazowe doziemne. S tvåfasigt jordfel. (604)
83. **undetected fault time** : → *time 220*
84. **volatile fault** (*Syn.* intermittent fault) : → *fault 48*
85. **weakness fault** : a fault due to a weakness in the item itself when subjected to stresses within the stated capabilities of the item. *Note.* — Weakness may be either inherent or induced. ★ panne par fragilité → *panne 30.* R неисправность вследствие непрочности. D schwachstellenbedingter Fehlzustand. E avería por fragilidad. I avaria per fragilità. N defect door zwakte. P niezdatność z małej odporności. S svaghetsfel. (191)
86. **wearout fault** (*Syn.* ageing fault) : → *fault 1*

faulty

1. **faulty** : pertaining to an item which has a fault. ★ en panne → *panne 11.* R неисправный. D fehlerhaft. E averiado. I inavaria. N defect. P niezdatny (obiekt). S felaktig. (191)
2. **faulty convergence** : → *convergence 12*
3. **faulty state information** : → *information 7*

Faure

1. **Faure plate** : → *plate 6*

FBA

1. **FBA** (*Syn.* factory-built assembly) : → *assembly 12*

FDHM

1. **FDHM** (*Syn.* full duration half maximum) : → *maximum 3*

FDM

1. **FDM** (*Syn.* frequency division multiplexing) : → *multiplexing 3*
2. **FDM link** : → *link 12*
3. **(FDM telephone) channel** : → *channel 25*
4. **multichannel FDM transmission** (*Syn.* multichannel carrier transmission) : → *transmission 42*

fed

1. **fed element** (*Syn.* driven element) : → *element 14*

fed-in

1. **fed-in winding** : → *winding 27*

feed

1. **chain conveyor feed** : a conveying device where the charge is moved by an endless chain with sprockets, which pulls the charge to or through the furnace chamber. ★ système d'avancement avec chaîne à ergots → *système 32.* R загрузка с помощью цепного конвейера. D Kettenförderer. E alimentación por transportador de cadena. I trasportatore a catena. N kettingtransporteur. P przenośnik łańcuchowy. S kedjematare. (841)
2. **clean feed circuit** : → *circuit 36*
3. **Cutler feed** : a primary radiator consisting of two radiating slots, one on each side of an axial feed line. ★ source Cutler → *source 15.* R двухщелевой облучатель. D Cutler-Speisepunkt; Schlitzspeisepunkt. E alimentador de Cutler. I illuminatore Cutler. N Cutlervoeding. P zasilanie Cutlera. S Cutler-matare. (712)
4. **error correction by information feedback and repetition** : → *correction 10*
5. **error detecting and feedback system** : → *system 65*
6. **feed** (of an array) : the arrangement of transmission lines and associated components in an array antenna, connecting the driven elements to the input part of the array. ★ (dispositif d') alimentation → *alimentation 17.* R фидер (антенной решетки). D Speisesystem (einer Gruppenantenne). E (dispositivo de) alimentación (de un conjunto). I alimentazione (di una schiera). N voedingssysteem (van een stelsel). P linia zasilająca (zestaw antenowy). S matningsnät. (712)
7. **feed** (of reflector or lens antennas) : that portion of an antenna which illuminates a reflector or lens. *Note.* — When an antenna includes a single illuminated lens or reflector, the feed cannot be distinguished from the primary radiator. ★ source d'illumination → *source 22.* R облучатель (рефлекторных или линзовых антенн). D Speisepunkt (von Reflektor- oder Linsenantennen). E alimentador (de un reflector o de una antena lente). I illuminatore. N voeding (van reflector- of lensantenne). P zasilanie (reflektora lub soczewki antenowej). S matare. (712)
8. **feed efficiency** (*Syn.* spill-over factor) : → *factor 167*
9. **feed forward control** : → *control 99*
10. **feed holes** (*Syn.* centre holes) : → *hole 3*
11. **feed line** : → *line 37*
12. **form feed** : a format effector designed to set the printing or display position on the first line of the next page or its equivalent. ★ commande de présentation de page → *commande 48.* R перевод формата. D Formularvorschub. E control de presentación de página. I cambio pagina. N begin nieuwe bladzijde. P nowa strona. S blankettmatning. (721)
13. **gravity feed furnace** (*Syn.* sloping hearth furnace) : → *furnace 53*
14. **intermediate feed antenna** : → *antenna 63*
15. **line feed** : a format effector which advances the printing or display position to the same character position on the next line. ★ changement de ligne → *changement 3.* R перевод строки. D Zeilenvorschub. E cambio de línea; avance de línea. I cambio di riga. N nieuwe regel. P zmiana wiersza. S nedstegning. (721)
16. **off-set feed** : a feed of a reflector antenna designed and positioned so as to avoid blockage of the aperture. ★ source décalée → *source 21.* R вынесенный облучатель. D Offset-Speisepunkt. E alimentador fuera de eje; fuente desfasada. I illuminatore offset. N antennebestralingselement (buiten de bundel); belichter (buiten de bundel). P zasilanie ofsetowe. S offsetmatare. (712)
17. **vibratory feed** (*Syn.* vibratory conveyor) : a charging system consisting of a horizontal or slightly sloping channel subjected to a vibration of small amplitude, which moves the material forward in a continuous manner. ★ transporteur par vibration → *transporteur 3.* R вибрационная система загрузки. D Vibrationsförderer. E transportador vibratorio; alimentación por vibración. I trasportatore a vibrazioni. N trilgoot. P przenośnik wibracyjny. S vibrationstransportör. (841)

18. **wire feed unit** : → *unit 86*

feedback

1. **feedback** : the return of a portion of a signal from output to input of a two-port electrical network or from one point on a transmission path to a preceding point along this path. ★ rétroaction → *rétroaction 1.* R обратная связь. D Rückkopplung. E realimentación. I retroazione. N terugkoppeling. P sprzężenie zwrotne. S återkoppling. (702)
2. **feedback control** : → *control 100*
3. **feedback cutter head** : → *head 4*
4. **feedback path** : → *path 5*
5. **feedback signal** : → *signal 88*
6. **main feedback path** : → *path 12*
7. **negative feedback** : feedback in which the returned signal tends to decrease the output signal. ★ contre-réaction → *contre-réaction 1.* R отрицательная обратная связь. D Gegenkopplung; negative Rückkopplung. E realimentación negativa. I controreazione; retroazione negativa. N negatieve terugkoppeling. P sprzężenie zwrotne ujemne. S negativ återkoppling. (702)
8. **positive feedback** : feedback in which the returned signal tends to increase the output signal. ★ réaction → *réaction 5.* R положительная обратная связь. D Mitkopplung; positive Rückkopplung. E realimentación positiva. I retroazione positiva. N positieve terugkoppeling. P sprzężenie zwrotne dodatnie. S positiv återkoppling. (702)
9. **transmission with decision feedback** : → *transmission 110*
10. **transmission with information feedback** : → *transmission 111*

feeder

1. **branch feeder** : feeder for connecting a distribution point to spur feeders. ★ ligne secondaire → *ligne 132.* R субмагистральная линия. (723)
2. **by-pass feeder** : a conductor providing electrical continuity between the contact line on the sections of track on either side of a station when the contact line in the station itself is isolated. ★ ligne de pontage → *ligne 94.* R обводная линия. D Bahnhofsumgehungsleitung. E línea de puenteo. I scarto. N doorverbindingsleiding (weerszijden van station). P przewód obejściowy. S förbigångsledning. (811)
3. **distribution feeder** (*Syn.* spur feeder) : → *feeder 20*
4. **feeder** : an electric line originating at a main substation and supplying one or more secondary substations. *Note.* — The term "feeder" formerly used in French is deprecated. ★ artère → *artère 1.* R питающая линия. D Speiseleitung. E arteria; línea de alimentación. I arteria. N afgaande leiding. P linia zasilająca. S matarledning. (601)
5. **feeder** (*Syn.* feed line) : → *line 37*
6. **feeder** (in a cabled distribution system) : a means of transmission between two points in a cabled distribution system,such as a metallic cable, an optical cable, a waveguide, or any combination of these. ★ ligne → *ligne 49.* R линия (в кабельной системе распределения). (723)
7. **feeder** (*Syn.* feeder cable) : → *cable 28*
8. **feeder bay** : → *bay 3*
9. **feeder cable** : → *cable 28*
10. **feeder circuit-breaker** : → *circuit-breaker 11*
11. **feeder clamp** : → *clamp 12*
12. **feeder disconnector** : → *disconnector 6*
13. **feeder station** : → *station 13*
14. **incoming feeder** : in a substation a feeder bay which is normally used to receive power from the system. ★ arrivée → *arrivée 1.* R присоединение питающей линии. D Speisefeld. E llegada (sentido restringido). I linea in arrivo (in senso stretto). N ..... P pole dopływowe. S in matningsfack. (605)
15. **line feeder** : an overhead conductor mounted parallel to or in parallel with the contact line either to supply successive feeding points or to increase the useful cross-sectional area. ★ ligne d'alimentation → *ligne 75.* R фидер. D Verstärkungsleitung. E línea de alimentación. I alimentatore (di linea). N versterkingsleiding. P przewód wzmacniający. S förstärkningsledning. (811)
16. **outgoing feeder** : in a substation a feeder bay which is normally used to transmit power to the system. ★ départ → *départ 3.* R присоединение отходящей линии. D Abgangsfeld. E salida (sentido restringido). I linea in partenza (in senso stretto). N ..... P pole odpływowe. S ut-matningsfack. (605)
17. **radial feeder** (*Syn.* single feeder) : → *feeder 19*
18. **ring feeder** : an arrangement of electric lines forming a complete ring and supplied only from a single source. *Note.* — A ring can be operated open or closed. ★ boucle → *boucle 2.* R кольцо с одним источником питания. D Ring (in einem Netz). E bucle (en una red); anillo (en una red). I anello (in una rete). N ring. P pierścień linii. S slinga. (601)
19. **single feeder** (*Syn.* radial feeder) : an electric line supplied from one end only. ★ (ligne en) antenne → *antenne 146.* R радиальная линия. D Stichleitung. E línea en antena; alimentación en antena. I linea in antenna. N uitloper. P linia zasilająca pojedyncza. S radialledning. (601)
20. **spur feeder** (*Syn.* distribution feeder) : feeder to which subscribers taps or looped system outlets are connected. ★ ligne de distribution → *ligne 87.* R линия домовой распределительной сети. (723)
21. **subscribers feeder** : feeder in a cabled distribution system connecting a spur feeder to a system outlet. ★ ligne d'usager → *ligne 113.* R абонентская линия. (723)
22. **super trunk feeder** : a feeder which connects only between head ends or possibly between a head end and the first distribution point. ★ ligne (primaire) de transfert → *ligne 128.* R супермагистральная линия. (723)
23. **trunk feeder** : feeder originating at the head-end of a cabled distribution system. ★ ligne primaire → *ligne 127.* R магистральная линия. (723)

feedforward

1. **feedforward** : the sending of a portion of a signal from input to output of a two-port device or from one point on a transmission path to a subsequent point along this path. ★ antéroaction → *antéroaction 1.* R прямая связь. D Vorwärtskopplung. E alimentación en avance. I azione anticipatrice in catena aperta. N voorwaartse koppeling. P sprzężenie wprzód (sygnału). S ..... (702)

feeding

1. **central battery feeding (telephony)** : → *telephony 1*
2. **common battery feeding (telephony)** (*Syn.* central battery feeding (telephony)) : → *telephony 1*
3. **feeding bridge** : → *bridge 11*
4. **feeding current** : → *current 86*
5. **feeding system** : → *system 68*

female

1. **female contact** : → *contact 68*

Fermi

1. **Fermi (characteristic energy) level** : → *level 21*
2. **Fermi statistics** (*Syn.* Fermi-Dirac statistics) : → *statistics 2*

Fermi-Dirac

1. **Fermi-Dirac function** : → *function 13*
2. **Fermi-Dirac statistics** : → *statistics 2*

Fermi-Dirac-Sommerfeld

1. **Fermi-Dirac-Sommerfeld velocity distribution law** : → *law 3*

ferrimagnetic

1. **ferrimagnetic substance** : → *substance 3*

ferrimagnetism

1. **ferrimagnetism** : a phenomenon by which, in the absence of an applied magnetic field, the magnetic moments of neighbouring atoms or ions are held by their interaction in a partially cancelling arrangement such that there remains a resultant magnetic moment; when an external magnetic field is applied, the alignment of the magnetic moments in its direction increases. ★ ferrimagnétisme → *ferrimagnétisme 1.* R ферримагнетизм. D Ferrimagnetismus. E ferrimagnetismo. I ferrimagnetismo. N ferrimagnetisme. P ferrimagnetyzm. S ferrimagnetism. (121)

ferrite

1. **ferrite** : a material composed of oxides containing ferric ions as the main component and exhibiting either ferrimagnetism or antiferromagnetism. *Notes. 1* — This term is often restricted to such materials having the spinel structure. *2* — In metallurgy and mineralogy, the term ferrite has other meanings. ★ ferrite → *ferrite 2.* R феррит. D Ferrit. E ferrita. I ferrite. N ferriet. P ferryt. S ferrit. (221)
2. **ferrite inductor** : → *inductor 5*
3. **ferrite rod antenna** : → *antenna 49*

ferrodynamic

1. **ferrodynamic instrument** : → *instrument 8*

ferroelectric

1. **ferroelectric** : applies to a dielectric which exhibits electric hysteresis. ★ ferroélectrique → *ferroélectrique 1.* R сегнетоэлектрик. D ferroelektrisch. E ferroeléctrico. I ferroelettrico. N ferro-elektrisch. P ferroelektryczny. S ferroelektrisk. (121)

ferromagnetic

1. **ferromagnetic substance** : → *substance 4*

ferromagnetism

1. **ferromagnetism** : a phenomenon by which the magnetic moments of neighbouring atoms are approximately aligned in the same direction over certain regions (domains) due to their interaction; the alignment of the resultant moments of the domains increases with the applied magnetic field strength. ★ ferromagnétisme → *ferromagnétisme 1.* R ферромагнетизм. D Ferromagnetismus. E ferromagnetismo. I ferromagnetismo. N ferromagnetisme. P ferromagnetyzm. S ferromagnetism. (121)

ferro-resonance

1. **ferro-resonance** : a resonance of the capacitance of an apparatus with the inductance of the saturable magnetic circuit of an adjacent apparatus. ★ ferrorésonance → *ferrorésonance 1.* R феррорезонанс. D Ferroresonanz. E ferrorresonancia. I ferrorisonanza. N ferroresonantie. P ferrorezonans. S ferroresonans. (604)

ferrule

1. **ferrule** : an accessory in the form of a short tube to provide cable support or termination for a cable screen. ★ bague → *bague 2.* R втулка кабельная. D Druckhülse. E casquillo. I anello; ghiera. N huls. P tuleja. S hylsa. (581)
2. **ferrule** : a mechanical fixture, generally a rigid tube, used to confine the stripped end of a fibre bundle or an optical fibre. ★ ferrule → *ferrule 2.* R втулка. D Stift. E casquillo. I ferrula. N (metalen) vezelhuls. P końcówka tulejkowa. S hylsa. (731)
3. **grommet ferrule** (*Syn.* grommet follower) : → *grommet 3*

fertile

1. **fertile** : of a nuclide, capable of being transformed, directly or indirectly, into a fissile nuclide by neutron capture. Of a material, containing one or more fertile nuclides. ★ fertile → *fertile 2.* D Brütermaterial. E fértil.. I fertile. N vruchtbaar. P paliworodny. S fertil. (026)

fibre

1. **all-glass fibre** : an optical fibre having core and cladding entirely of multicomponent glass. ★ fibre de verre → *fibre 13.* R стеклянное волокно. D Glasfaser. E fibra de vidrio. I fibra (interamente) vetrosa. N glasvezel. P światłowód całkowicie szklany. S helglasfiber. (731)
2. **all-plastic fibre** : an optical fibre having core and cladding entirely of multicomponent plastic. ★ fibre (de) plastique → *fibre 10.* R пластиковое волокно. D Plastikfaser. E fibra de plástico. I fibra (interamente) in plastica. N kunststofvezel. P światłowód całkowicie plastikowy. S helplastfiber. (731)
3. **all-silica fibre** : an optical fibre having core and cladding entirely of silica. ★ fibre de silice → *fibre 11.* R кварцевое волокно. D Quarzglasfaser. E fibra de silicio. I fibra (interamente) in silice. N kwartsglasvezel; siliciumoxidevezel. P światłowód całkowicie kwarcowy. S helkvartsfiber. (731)
4. **fibre axis** : → *axis 4*
5. **fibre buffer** : → *buffer 5*
6. **fibre bundle** : → *bundle 4*
7. **fibre jacket** (*Syn.* secondary coating) : → *coating 5*
8. **fibre optic terminal device** : → *device 25*
9. **fibre optics** : → *optic 2*
10. **fibre scattering** : → *scattering 10*
11. **graded index fibre** : an optical fibre having a graded index profile. ★ fibre à gradient d'indice → *fibre 6.* R градиентное волокно. D Gradientenindexfaser. E fibra de índice gradual. I fibra ad indice (di rifrazione) graduale. N gradiënt-indexvezel. P światłowód gradientowy. S gradient(index)fiber. (731)
12. **launching fibre** (*Syn.* optical fibre pigtail) : → *pigtail 1*
13. **multimode fibre** : an optical fibre in the core of which the radiation of two or more bound modes can propagate at the wavelength of interest. ★ fibre (optique) multimodale → *fibre 18.* R многомодовое волокно. D Multimodefaser; Mehrmodenfaser. E fibra multimodo. I fibra multimodale. N multimodusvezel. P światłowód wielomodowy. S flermodsfiber; multimodfiber. (731)
14. **optical fibre** : a filament-shaped waveguide made of dielectric materials, intended to guide electromagnetic energy in the form of optical waves. ★ fibre optique → *fibre 16.* R оптическое волокно. D optische Faser. E fibra óptica. I fibra ottica. N glasvezel. P światłowód. S optofiber. (704,731)
15. **optical fibre cable** (*Syn.* optical cable) : → *cable 49*
16. **optical fibre connector** : → *connector 36*
17. **optical fibre coupler** : → *coupler 18*
18. **optical fibre distribution system** : → *system 131*
19. **optical fibre link** : a transmission link consisting of a light emitting unit, an optical fibre, a receiving unit, connecting elements and, if necessary, optical repeaters. ★ liaison par fibre optique → *liaison 25.* R волоконно-оптическая линия передачи. D LWL-Übertragungsleitung. E enlace por fibra óptica. I collegamento in fibra ottica. N optische-vezelverbinding. P trakt światłowodowy. S fiberoptisk länk. (731)
20. **optical fibre pigtail** : → *pigtail 1*
21. **optical fibre splice** : → *splice 4*
22. **plastic clad silica fibre** (*Syn.* PCS-fibre (abbreviation)) : an optical fibre having silica core and plastic cladding. ★ fibre de silice gainée de plastique → *fibre 12.* R кварцевое волокно с пластиковой оболочкой. D Plastikmantel-Glasfaser; PCS-Faser (Abkürzung). E fibra de silicio revestida de plástico; fibra-PCS (abreviatura). I fibra con nucleo in silice e mantello in plastica. N kunststofmantel-kwartsglaskernvezel. P światłowód szklany o płaszczu plastikowym. S plastmantlad kvartsfiber. (731)
23. **receive fibre optic terminal device** : → *device 47*
24. **singlemode fibre** : an optical fibre in which the radiation of only one bound mode can propagate at the wavelength of interest. *Note.* — The bound mode may consist of a pair of orthogonally polarized fields. ★ fibre (optique) unimodale → *fibre 20.* R одномодовое волокно. D Einmodenfaser; Monomodefaser. E fibra monomodo. I fibra a modo singolo. N monomodusvezel. P światłowód jednomodowy. S enkelmodsfiber; singelmodfiber. (731)
25. **staple fibre** : a small diameter fibre of relatively short length (in the order of centimeters). ★ fibre discontinue → *fibre 15.* R штапельное волокно. D Stapelfaser. E fibra discontinua. I fibra discontinua. N stapelvezel. P włókno cięte. S stapelfiber. (212)
26. **step index fibre** : an optical fibre having a step index profile. ★ fibre à saut d'indice → *fibre 8.* R ступенчатое волокно. D Stufenindexfaser. E fibra de salto de índice. I fibra con indice (di rifrazione) a gradino; fibra a salto d'indice (di rifrazione). N stapindex-vezel. P światłowód skokowy. S stegindexfiber. (731)
27. **tapered fibre** : an optical fibre whose cross section dimensions change progressively with distance along the optical fibre. ★ transition progressive → *transition 20.* R фокон. D Fasertaper. E fibra ahusada. I fibra conica. N taps toelopende vezel. P światłowód z przewężeniem stożkowym. S avsmalnande fiber. (731)
28. **transmit fibre optic terminal device** : → *device 58*
29. **vulcanized fibre** : a nearly homogeneous material consisting of hydrated cellulose, made by subjecting cellulose to a parchmentizing process. ★ fibre vulcanisée → *fibre 22.*

R фибра. D Vulkanfiber. E fibra vulcanizada. I fibra vulcanizzata. N fiber. P fibra wulkanizowana. S vulkanfiber. (212)

30. **weakly guiding fibre** : an optical fibre for which the relative difference between the maximum refractive index in the core and the refractive index of the innermost homogeneous cladding is small. *Note.* — Usually this relative difference is less than 1 %. ★ fibre à guidage faible → *fibre 7.* R волокно с большим затуханием. D schwach führende Faser. E fibra de guiado débil. I fibra debolmente guidante. N zwak geleidende vezel. P światłowód o słabym prowadzeniu (modów). S svagt ledande fiber. (731)

fibrillating

1. **fibrillating current** : → *current 87*

fiducial

1. **fiducial error** : → *error 43*
2. **fiducial value** : → *value 10*

field

1. **cladding tolerance field** : for a cross section of an optical fibre it is the region between the circle concentric with the cladding centre circumscribed about the cladding and the largest circle, concentric with the first one, that fits into the cladding. ★ domaine de tolérance de la gaine → *domaine 13.* R поле допуска оболочки. D Mantel-Toleranzfeld. E dominio de tolerancia del revestimiento. I campo di tolleranza del mantello. N tolerantiegebied van de mantel. P obszar tolerancji płaszcza. S ..... (731)
2. **colour field** (*Syn.* primary colour field) : field produced by scanning in one of the constituent primary colours. ★ trame (primaire) de couleur → *trame 24.* R цветное поле; поле основного цвета. (723)
3. **core tolerance field** : for a cross section of an optical fibre it is the region between the circle concentric with the core centre circumscribed about the core area and the largest circle, concentric with the first one, that fits into the core area. ★ domaine de tolérance du cœur → *domaine 15.* R поле допуска сердцевины. D Kern-Toleranzfeld. E dominio de tolerancia del núcleo. I campo di tolleranza del nucleo. N tolerantiegebied van de kern. P obszar tolerancji rdzenia. S ..... (731)
4. **critical field** (of a counter tube) : the minimum electric field necessary for gas multiplication to be initiated. ★ champ critique → *champ 22.* R критическое поле (газоразрядного счетчика). D kritische Feldstärke. E campo crítico (de un tubo contador). I campo critico (di un tubo contatore). N kritieke (kritische); veldsterkte (v.e. telbuis). P krytyczne natężenie pola (licznika). S kritisk fältstyrka. (391)
5. **double-sided field system** : → *system 50*
6. **(effective) field ratio** : → *ratio 34*
7. **electromagnetic field** : a physical field determined by the set of four vectors which characterize the electric and magnetic states of a material medium or vacuum. *Note.* — The four vectors are: the electric field strength *E*; the electric flux density *D*; the magnetic field strength *H*; the magnetic flux density *B*. ★ champ électromagnétique → *champ 29.* R электромагнитное поле. D elektromagnetisches Feld. E campo electromagnético. I campo elettromagnetico. N elektromagnetisch veld. P pole elektromagnetyczne. S elektromagnetiskt fält. (121,705)
8. **electronic field production** : → *production 2*
9. **evanescent field** (*Syn.* evanescent mode) : an electromagnetic field such that, in at least one direction, each component of one of the vectors of the field has the same phase at the same time at all points and an amplitude which decreases very rapidly to negligible values at a few wavelengths, without this decreases being due to absorption. *Note.* — An evanescent field does not propagate energy and consequently it is not a wave. ★ champ évanescent → *champ 30.* D aperiodisch abklingendes Feld; aperiodisch abklingender Mode. P pole zanikające; rodzaj zanikający. (705,731)
10. **far field region** : → *region 5*
11. **field** : a scalar, vector or tensor quantity function of point coordinates in a defined space, and possibly time. *Note.* — A field may represent a physical phenomenon such as an acoustic pressure field, a gravity field, the Earth's magnetic field, the field from a radio transmitter. ★ champ → *champ 12.* D Feld. P pole. (101,705)
12. **field** (in signalling) : a subdivision of a signal unit which carries a certain type of information. ★ zone → *zone 14.* R (сигнальная) зона. D ..... E zona (de señalización). I campo (di segnalazione). N veld. P pole (rodzaju informacji). S fält. (714)
13. **field** (in software) : in a record, a specified area used for a particular category of data. ★ zone → *zone 15.* R поле данных (в программном обеспечении). D Datenfeld. E zona (en software). I campo (in software). N veld. P pole (w oprogramowaniu). S fält. (714)
14. **field** (in television) : a subdivision of the complete television picture in the vertical sense consisting of a series of equidistantly spaced sequential scanning lines covering the whole picture area, the repetition rate of the series being a multiple of that for the picture. *Notes. 1* — In some English Speaking Countries the term "frame" is used to mean a subdivision of the complete television picture, i.e. a "field" as defined above. 2 — In French, the term "trame (numérique)", often abbreviated to "trame", may refer to a digital signal representing a complete picture. ★ trame → *trame 22.* R поле (в телевидении). (723)
15. **field blanking teletext** : → *teletext 1*
16. **field coil** : → *coil 20*
17. **field coil flange** : → *flange 4*
18. **field data** : → *data 23*
19. **field displacement** : → *displacement 5*
20. **field emission** : → *emission 16*
21. **field emission tube** : → *tube 32*
22. **field frequency** : → *frequency 38*
23. **field line** : → *line 38*
24. **field maintenance** (*Syn.* on-site maintenance) : → *maintenance 37*
25. **field mesh** (*Syn.* mesh electrode) : → *electrode 72*
26. **field normalized impact sound pressure level** : → *level 22*
27. **field period** : → *period 10*
28. **field pole** : → *pole 5*
29. **field quantity** : → *quantity 10*
30. **field scan** : → *scan 1*
31. **field sequential colour television system** : → *system 69*
32. **field shunting** : → *shunting 2*
33. **field spool** : → *spool 1*
34. **field spool insulation** : → *insulation 17*
35. **field strength-distance product** : → *product 3*
36. **field sync pulse** (*Syn.* field synchronizing signal) : → *signal 89*
37. **field synchronizing signal** : → *signal 89*
38. **field system** : → *system 70*
39. **field system (of a linear traction motor)** : → *system 71*
40. **field test** : → *test 34*
41. **field (weakening by) tapping** : → *tapping 2*
42. **(field) weakening ratio** : → *ratio 38*
43. **field winding** : → *winding 28*
44. **forced field** : an arrangement in which the field current of a series motor is augmented from an independent source to a value greater than the current in the armature, usually to shorten the starting period. ★ champ renforcé → *champ 44.* R усиленное поле возбуждения. D Feldverstärkung. E campo reforzado. I eccitazione rinforzata. N versterkt veld. P wzbudzenie wzmocnione. S forcerat fält. (811)
45. **full field** : in a series motor, the circuit condition in which the main pole flux is formed by the normal excitation current (i.e. armature current) flowing through all the turns of the main field winding. ★ plein champ → *champ 70.* R полное поле возбуждения. D volle Erregung. E campo pleno. I pieno campo. N vol veld. P wzbudzenie pełne. S fullt fält. (811)
46. **induction field (region)** (*Syn.* reactive near field (region)) : → *near-field 8*
47. **internal electric field** : an electric field due to the presence of space charges inside a semiconductor. ★ champ électrique interne → *champ 28.* R собственное электрическое поле. D inneres elektrisches Feld. E campo eléctrico interno. I campo elettrico interno. N inwending elektrisch veld. P pole elektryczne wewnętrzne. S inre elektriskt fält. (521)
48. **irrotational field** : a vector field of zero curl. ★ champ irrotationnel → *champ 34.* R безвихревое поле. D wirbelfreies Feld. E campo irrotacional. I campo

irrotazionale. N rotatievrij veld; wervelvrij veld. P pole bezwirowe. S virvelfritt fält. (101)

49. **maximum field** : the condition in which the machine field windings are supplied with the maximum designed field current. ★ champ maximal → *champ 37.* R максимальное поле. D maximale Erregung. E campo máximo. I eccitazione massima. N maximaal veld. P wzbudzenie maksymalne. S maximifält. (811)
50. **minimum field** : the condition in which the machine field windings are supplied with the minimum designed field current. ★ champ minimal → *champ 38.* R минимальное поле. D minimale Erregung. E campo mínimo. I eccitazione minima. N minimaal veld. P wzbudzenie minimalne. S minimifält. (811)
51. **mode field diameter** : → *diameter 13*
52. **primary colour field** (*Syn.* colour field) : → *field 2*
53. **radial field cable** (*Syn.* individually screened cable) : → *cable 34*
54. **radiation field** : region through which radiation is being propagated. ★ champ de rayonnement → *champ 24.* R поле излучения. D Strahlenfeld. E campo de radiación. I campo di radiazioni. N stralingsveld. P pole promieniowania. S strålfält. (881)
55. **reference surface tolerance field** : for a cross section of an optical fibre it is the region between the circle concentric with the reference surface centre circumscribed about the reference surface and the largest circle, concentric with the first one, that fits into the reference surface. ★ domaine de tolérance de la surface de référence → *domaine 14.* R поле допуска опорной поверхности. D Bezugsoberflächen-Toleranzfeld. E dominio de tolerancia de la superficie de referencia. I campo di tolleranza della superficie di riferimento. N tolerantiegebied van het referentieoppervlak. P obszar tolerancji powierzchni odniesienia. S ..... (731)
56. **scalar permeability for circularly polarized fields** : → *permeability 26*
57. **scanning field** : in facsimile the total areas actually explored by the scanning spot, at reception or transmission, during the transmission of an image. ★ champ exploré → *champ 31.* R поле развертки; растр. D Abtastbereich. E campo explorado. I campo di scansionamento. N aftastveld. P pole rozwinięcia. S avsökningsyta. (721)
58. **self field** (of a Hall generator) : the magnetic field caused by the flow of control current through the loop formed by the control current leads and the relevant path through a Hall effect device. ★ champ induit → *champ 33.* R собственное поле (генератора Холла). D Eigenfeld (eines Hallgenerators). E campo inducido (de un generador de Hall). I campo indotto (di un generatore di hall). N eigen veld (van een Hallgenerator). P pole indukowane (generatora Halla). S egenfält. (521)
59. **single-sided field system** : → *system 189*
60. **specific field strength-distance product** : → *product 9*
61. **weak field** : in a series motor, the circuit condition in which the main pole flux is reduced by tapping to a reduced number of main field coil turns or by reducing the field coil current e.g. by a shunt resistor. ★ champ réduit → *champ 43.* R ослабленное поле возбуждения. D Feldschwächung. E campo débil. I campo indebolito; indebolimento di campo. N zwak veld. P wzbudzenie osłabione. S shuntat fält. (811)
62. **zero divergence field** : a vector field of zero divergence. ★ champ (à flux) conservatif → *champ 13.* R поле, не имеющее истоков соленоидальное поле. D quellenfreies Feld. E campo (de flujo) conservativo; campo adivergente. I campo solenoidale. N divergentievrij veld. P pole bezźródłowe. S källfritt fält. (101)

field strength

1. **coercive field strength** : the applied magnetic field strength necessary to bring magnetic flux density, magnetic polarization or the magnetization of a magnetized material to zero. *Notes. 1* — In a graphical representation it is the value corresponding to any intersection with *H*-axis of the magnetization curve (for flux density, polarization or magnetization). *2* — The coercive field strength may refer to the static or dynamic magnetization. When unqualified, the static curve is assumed. ★ champ coercitif → *champ 21.* R напряженность коэрцитивного поля. D Koerzitivfeldstärke bei inneren Schleifen. E campo coercitivo. I campo coercitivo. N coërcitieveldsterkte. P natężenie koercyjne. S koercivfältstyrka. (121,221)
2. **disruptive electric field strength** (of an insulant) : the least electric field strength that must be applied to an insulant to cause a disruptive breakdown. ★ champ électrique disruptif → *champ 27.* R напряженность электрического поля после прерывистого пробоя. D elektrische Durchschlagsfeldstärke (eines Isolierstoffes). E campo eléctrico disruptivo (de un aislante). I rigidità dielettrica (di un isolante). N doorslagveldsterkte. P natężenie pola elektrycznego niszczące; pole elektryczne niszczące. S genomslagsfältstyrka. (121)
3. **disturbance field strength** : the field strength produced at a given location by an electromagnetic disturbance, measured under specified conditions. ★ champ perturbateur → *champ 42.* R напряженность поля возмущения. D Störfeldstärke. E campo perturbador. I campo di disturbo. N storingsveldsterkte. P natężenie pola zaburzenia. S störningsfältstyrka. (161)
4. **electric field strength** (*E*) : the vector quantity that determines the component of the Coulomb-Lorentz force which is independent of velocity of the carrier. ★ champ électrique → *champ 26.* R напряженность электрического поля. D elektrische Feldstärke. E campo eléctrico. I forza elettrica; intensità di campo elettrico. N elektrische veldsterkte. P natężenie pola elektrycznego; pole elektryczne. S elektrisk fältstyrka. (121)
5. **field strength** (of a radio transmitter) : the magnitude of the electromagnetic field created at a given point by a radio transmitting system operating at a specified characteristic frequency with specified installation and modulation conditions. ★ champ d'un émetteur → *champ 25.* D Feldstärke (eines Senders). P natężenie pola (radiostacji). (705)
6. **field strength diminution factor** : → *factor 79*
7. **field strength pattern** : → *pattern 10*
8. **magnetic field strength** (*H*) : the vector quantity of electromagnetic field whose curl is the total current density. *Note.* — In vacuo, it is at all points equal to the quotient of the magnetic flux density by the magnetic constant

$$H = \frac{B}{\mu_0}$$

★ champ magnétique → *champ 35.* R напряженность магнитного поля. D magnetische Feldstärke. E campo magnético. I forza magnetica; intensità di campo magnetico. N magnetische veldsterkte. P natężenie pola magnetycznego; pole magnetyczne. S magnetisk fältstyrka. (121)
9. **minimum usable field strength** : the value of the usable field strength in the absence of interference. ★ champ minimal utilisable → *champ 39.* D Mindestfeldstärke. P natężenie pola użyteczne najmniejsze. (705)
10. **nominal usable field strength** (*Syn.* reference usable field strength) : an agreed value of the usable field strength used in planning a radio communication service. ★ champ nominal utilisable → *champ 40.* D Nennwert der nutzbaren Feldstärke. P natężenie pola użyteczne nominalne. (705)
11. **reference usable field strength** (*Syn.* nominal usable field strength) : → *field strength 10*
12. **self-demagnetization field strength** : the magnetic field strength arising from magnetization that is discontinuous along a field line. ★ champ d'autodésaimantation → *champ 23.* R размагничивающееся поле. D Selbstentmagnetisierungs-Feldstärke. E campo de autodesimantación; campo autodesmagnetizante. I forza smagnetizzante. N zelfontmagnetiserende veldsterkte. P pole odmagnesowujące. S avmagnetiserande fältstyrka. (121)
13. **standard unabsorbed field strength** : the electromagnetic field which would be produced close to a hypothetical plane ground surface exhibiting perfect conductivity by a short vertical monopole antenna located on the surface of the ground and radiating a specified power, generally 1 kW. ★ champ non absorbé de référence → *champ 41.* D nicht absorbierte Standardfeldstärke. P natężenie pola standardowe niezakłócone. (705)
14. **usable field strength** : the minimum value of the field strength from a transmitter permitting reception of required quality at a given point, for specified installation and operating conditions, in the presence of noise and interference, either as actually existing or determined by agreement or in accordance with frequency plans. *Notes. 1* — If either noise or interference is subject to fluctuations, the percentage of the time during which the required quality is to be met must be specified. *2* — The specified conditions include : — the transmission mode, the type of service and the frequency band used ; — the

characteristics of the reception installation : antenna gain, receiver pass-band, site ; — the operating conditions at the receiver, especially the geographical area, the time of day, and the season of the year. ★ champ utilisable → *champ 46.* D nutzbare Feldstärke. P natężenie pola użyteczne. (705)

field-displacement

1. **field-displacement isolator** : → *isolator 1*

field-effect

1. **depletion type field-effect transistor** : → *transistor 3*
2. **enhancement type field-effect transistor** : → *transistor 4*
3. **field-effect transistor** : → *transistor 5*
4. **insulated-gate field-effect transistor** : → *transistor 6*
5. **junction-gate field-effect transistor** : → *transistor 7*
6. **metal-oxide-semiconductor field-effect transistor** : → *transistor 8*
7. **N-channel field-effect transistor** : → *transistor 9*
8. **P-channel field-effect transistor** : → *transistor 10*

field-time

1. **field-time luminance distortion** : → *distortion 37*

field-weakening

1. **automatic field-weakening** : a system which automatically and progressively weakens the traction motor fields to increase the vehicle speed up to which full engine power can be used. ★ affaiblissement de champ automatique → *affaiblissement 7.* R автоматическое ослабление поля. D automatische Feldregelung. E debilitamiento de campo automático. I indebolimento automatico di campo. N automatische veldverzwakking. P osłabienie wzbudzenia automatyczne. S automatisk fältförsvagning. (811)
2. **combined field-weakening** : a field-weakening system in which shunting and tapping are used successively or simultaneously. ★ affaiblissement de champ mixte → *affaiblissement 8.* R смешанная система ослабления поля. D gemischte Feldschwächung. E debilitamiento de campo mixto. I indebolimento di campo misto. N (gecombineerde) veldverzwakking. P osłabienie wzbudzenia mieszane. S kombinerad fältförsvagning. (811)
3. **field-weakening switchgroup** : → *switchgroup 2*

figure

1. **binary figure** : either of the two figures 0, or 1, used in the binary numbering system. ★ chiffre binaire → *chiffre 3.* R двоичная цифра. D Binärzeichen. E cifra binaria. I cifra binaria. N binair getal. P cyfra binarna. S binär siffra. (702,721)
2. **figure of merit** : the ratio of the power amplification to the response time. ★ facteur de mérite → *facteur 105.* R добротность. D Güteziffer. E factor de mérito. I cifra di merito. N kwaliteitsfactor. P współczynnik jakości. S godhetstal. (431)
3. **figure of merit** (of an antenna) (*G/T*) : the ratio, usually expressed in logarithmic units, of the absolute gain *G* of an antenna to its noise temperature *T* referred to the antenna terminals at a specified frequency and in specified conditions of installation and operation. *Note.* — If the noise temperature is expressed in kelvins and the gain as a power ratio, the quantity 10 lg *G/T* is expressed in a unit designated by the symbol dBK. ★ facteur de qualité → *facteur 120.* R добротность (антенны). D Güte (einer Antenne). E figura de mérito (de una antena). I fattore di merito (di un'antenna). N kwaliteitsfactor. P współczynnik dobroci (anteny). S godhetstal. (712)
4. **figure of merit** (of an antenna-receiving system) : the ratio *G/T*, usually expressed in logarithmic units, of the absolute gain *G* of an antenna to the antenna-receiver noise temperature *T* referred to the antenna terminals at a specified frequency and in specified conditions of installation and operation. *Note.* — If the noise temperature is expressed in kelvins and the gain as a power ratio, the quantity 10 lg *G/T* is expressed in a unit designated by the symbol dBK. ★ facteur de qualité → *facteur 121.* R добротность (системы антенна-приемник). D Systemgüte (eines Antenne/Empfängersystems). E figura de mérito (de un sistema antena-receptor). I fattore di merito (di un sistema antenna-ricevitore). N kwaliteitsfactor. P współczynnik dobroci (zestroju antenowego odbiorczego). S godhetstal. (712)
5. **figure of merit of an active sonar** : excess of sound pressure level of an emitted pulse, at 1 meter distance from the source, over the sound pressure level of the minimum detectable echo under given conditions. ★ facteur de mérite d'un sonar actif → *facteur 106.* R эффективность гидролокационной станции. D Sonar-Gütemaß. E factor de merito de un sonar activo. I fattore di merito di un sonar attivo. N ..... P dobroć sonaru aktywnego. S prestationstal. (801)
6. **figures case** : → *case 3*
7. **figures shift** : → *shift 11*
8. **(mean) noise figure** (*Syn.* (mean) noise factor) : → *factor 118*
9. **pulling figure** : → *pulling 4*
10. **pushing figure** : → *pushing 2*
11. **spot noise figure** (*Syn.* spot noise factor) : → *factor 168*

figure-shift

1. **figure-shift signal** : → *signal 90*

filament

1. **carbon filament lamp** : → *lamp 7*
2. **coiled-coil filament** : helical filament wound into a larger helix. ★ filament à double boudinage → *filament 4.* R биспираль. D Doppelwendel. E filamento en doble espiral. I filamento a doppia spiralizzazione. N dubbelgespiraliseerde gloeidraad. P żarnik dwuskrętkowy; dwuskrętka. S dubbelspiral(iserad glödtråd). (845)
3. **directly heated cathode filament** : a hot cathode, usually in the form of a wire or ribbon, that is heated directly by the passage of current through it. ★ cathode à chauffage direct → *cathode 5.* R прямонакальный катод. D direkt geheizte Kathode. E cátodo de caldeo directo. I catodo con riscaldamento diretto. N direct verhitte kathode; gloeidraadkathode. P katoda żarzona bezpośrednio. S direktupphettad katod. (531)
4. **filament** : threadlike conductor, usually of tungsten, which is heated to incandescence by the passage of an electric current. ★ filament → *filament 3.* R нить накала. D Leuchtdraht. E filamento. I filamento. N gloeidraad. P żarnik. S glödtråd. (845)
5. **filament current** : → *current 88*
6. **filament or heater starting (surge) current** : → *current 89*
7. **filament voltage** : → *voltage 67*
8. **metal filament lamp** : → *lamp 38*
9. **(mono) filament** : a small diameter fibre in a very long length, considered as continuous. ★ (mono) filament → *filament 14.* R (моно) волокно. D Mono-Filament. E monofilamento. I (mono) filamento. N (enkele) draad. P włókno. S fiber. (212)
10. **single-coil filament** : filament wound in the form of a helix. ★ filament à simple boudinage → *filament 5.* R спираль. D Einfachwendel; Wendel. E filamento en espiral. I filamento a spiralizzazione semplice. N enkelgespiraliseerde gloeidraad. P żarnik jednoskrętkowy; jednoskrętka. S enkelspiral(iserad glödtråd). (845)
11. **straight filament** : filament which is uncoiled and straight or which consists of uncoiled straight portions. ★ filament droit → *filament 8.* R прямая нить накала. D gestreckter Leuchtdraht; geradliniger Leuchtdraht. E filamento recto. I filamento diritto. N rechte gloeidraad. P żarnik prostodrutowy. S ospiraliserad glödtråd. (845)
12. **tungsten filament lamp** : → *lamp 67*

file

1. **file** : a set of related records treated as a unit. ★ fichier → *fichier 1.* R файл. D Datei. E clasificador; fichero. I archivio di dati. N bestand. P plik (zapisów). S fil. (714)

filled

1. **air filled** : applied to a sealed machine in which the internal coolant is air. ★ machine à remplissage d'air → *machine 24.* R воздухо-заполненная машина. D luftgefüllte Maschine. E máquina llena de aire. I macchina stagna, piena d'aria. N met luchtvulling. P maszyna wypełniona powietrzem. S luftfylld. (411)
2. **filled and charged (secondary) battery** : → *battery 37*
3. **filled band** : → *band 17*
4. **filled discharged (secondary) battery** : → *battery 38*
5. **filled insulating liquid** : → *liquid 1*

6. **liquid filled** : applied to a sealed machine in which the internal coolant is liquid. ★ machine à remplissage de liquide → *machine 26.* R жидкостно-заполненная машина. D flüssigkeitsgefüllte Maschine. E máquina llena de líquido. I macchina stagna, piena di liquido. N met vloeistofvulling. P maszyna wypełniona cieczą. S vätskefylld. (411)
7. **water filled** : applied to a sealed machine in which the internal coolant is water. ★ machine à remplissage d'eau → *machine 27.* R водо-заполненная машина. D wassergefüllte Maschine. E máquina llena de agua. I macchina stagna, piena d'acqua. N met watervulling. P maszyna wypełniona wodą. S vattenfylld. (411)

filler

1. **filler** (in a plastic) : a relatively inert solid material added to a plastic to modify its strength, permanence, working properties, or other qualities, or to lower cost. ★ charge → *charge 23.* R наполнитель (в пластмассе). D Füllstoff (in einem Kunststoff). E carga (en un plástico). I carica; materiale di carica (in una plastica). N vulstof. P wypełniacz (w tworzywie sztucznym). S fyllmedel. (212)
2. **filler** : the material used to fill the interstices between the cores of a multiconductor cable. ★ bourrage → *bourrage 1.* R заполнитель. D Zwickelfüllung. E relleno. I riempitivo. N opvulling. P wypełnienie. S utfyllnad. (461)
3. **filler** : an inert material in a disk compound which is used as an extender in the plastic material. ★ charge → *charge 25.* R наполнитель. D Füllmaterial. E material de carga. I carica. N vulstof. P wypełniacz. S fyllmedel. (806)
4. **filler metal** : → *metal 1*
5. **filler plug** : → *plug 1*
6. **filler rod** : → *rod 8*
7. **filler wire** : → *wire 9*

filling

1. **digital filling** : the addition of a constant number of signal elements at regular intervals to a digital signal to increase the digit rate from its original value to a predetermined higher value. *Notes. 1* — The added signal elements are not normally used to transmit information. *2* — The ratio of the digit rates need not be an integer but must be a rational number, e.g. 64/62. ★ remplissage (numérique) → *remplissage 8.* R цифровое заполнение. D Stopfen. E rellenado (numérico); llenado digital. I riempimento (numerico). N digitale opvulling. P wypełnienie cyfrowe. S sifferutfyllnad. (704)
2. **sand filling** "q" (of electrical apparatus for explosive gas atmospheres) : a type of protection of electrical apparatus in which the enclosure is filled with sand or other powder material of specified characteristics so that, in the intended conditions of service, any arc or high temperature occurring within the enclosure will not ignite the surrounding explosive gas atmosphere. *Note.* — This type of protection is indicated by the letter "q". ★ remplissage pulvérulent "q" → *remplissage 9.* R кварцевое заполнение оболочки (взрывозащищенного электрооборудования). D Sandkapselung "q". E relleno pulverulento "q" (de un material eléctrico para atmósferas explosivas gaseosas). I costruzione sotto sabbia "q" a riempimento con materiale pulverulento (di un costruzione elettrica per atmosfere esplosive per la presenza di gas). N zandvulling "q" (van elektrisch materieel voor plaatsen met ontploffingsgevaar). P wypełnienie piaskowe "q" (urządzenia elektrycznego przeciwwybuchowego). S utförande med sand. (426)

film

1. **direct-exposure film** (*Syn.* non-screen film) : → *film 9*
2. **double-emulsion film** : a radiographic film covered with photographic emulsion on both sides. ★ film à double couche → *film 3.* R двусторонняя пленка. D Doppelschichtfilm. E película de doble capa. I pellicola a doppia emulsione. N film met dubbelzijdige emulsie. P błona z podwójną emulsją. S dubbelemulsionsfilm. (881)
3. **film badge** : → *badge 1*
4. **film capacitor** : → *capacitor 35*
5. **film changer** : → *changer 2*
6. **film dosemeter** (*Syn.* film badge) : → *badge 1*
7. **film integrated circuit** : → *integrated circuit 1*
8. **fluorographic film** : a film with a special photographic emulsion designed to be sensitive to fluorescent light from fluorescent screens. ★ film pour radiophotographie → *film 7.* R флюорографическая пленка. D fluorographischer Film. E película para radiofotográfia; película para fluorografía. I pellicola per schermografia. N schermbeeldfilm. P błona fluorograficzna. S skärmbildsfilm. (881)
9. **non-screen film** (*Syn.* direct-exposure film) : a film with a special photographic emulsion designed to be sensitive to X-radiation. ★ film sans écran → *film 9.* R безэкранная пленка. D folienloser Film. E película sin pantalla. I pellicola per esposizione diretta. N ..... P błona do bezpośredniej rejestracji. S direktröntgenfilm. (881)
10. **(plastic) film** : a thin plastic product of arbitrarily limited maximum thickness, in which the thickness is very small in proportion to length and width, generally supplied in roll form. *Note.* — The maximum limiting thickness is typically some hundred micrometres. ★ feuille mince → *feuille 3.* R полимерная пленка. D Kunststoffolie. E film (plástico); película (plástica). I foglio sottile; film (plastico). N folie; film. P folia (tworzywowa). S plastfilm. (212)
11. **radiographic film** : photographic film used to make radiographs. *Note.* — A radiographic film may be intended for use with screen film or with non-screen film and may have an emulsion on one or both sides. ★ film radiographique → *film 8.* R радиографическая пленка. D Röntgenfilm. E película radiográfica. I pellicola radiografica. N röntgenfilm. P błona radiograficzna. S röntgenfilm. (881)
12. **screen film** : a film with a special photographic emulsion designed to be sensitive to the fluorescent or secondary radiation from intensifying sreens. ★ film avec écran → *film 4.* R экранная пленка. D Folienfilm. E película con pantalla. I pellicola da usarsi con schermi di rinforzo. N film voor gebruik met scherm(en). P błona do rejestracji z ekranu. S ..... (881)
13. **telerecording equipment for film** : → *equipment 78*
14. **thin film optical waveguide** : → *waveguide 18*

filter

1. **a.c. filter** : a filter on the a.c. side designed to reduce the flow of harmonic current into the associated system. ★ filtre côté (courant) alternatif → *filtre 7.* R фильтр переменного тока. D wechselstromseitiges Filter. E filtro de corriente alterna. I filtro lato (corrente) alternata. N wisselstroomfilter. P filtr przemiennoprądowy. S vs-filter. (551)
2. **added filter** : a filter that can be inserted in, or removed from, the useful beam. ★ filtre additionnel → *filtre 4.* R дополнительный фильтр. D Zusatzfilter. E filtro adicional. I filtro addizionale. N toegevoegd filter. P filtr dodatkowy. S tillsatsfilter. (881)
3. **band-pass filter** : a filter having a single pass-band, neither of the cut-off frequencies being zero or infinite. ★ filtre passe-bande → *filtre 34.* R полосовой пропускающий фильтр. D Bandpaß (filter). E filtro pasa-banda. I filtro passa-banda. N banddoorlatend filter; bandfilter. P filtr środkowoprzepustowy. S bandpassfilter. (151)
4. **band-pass filter** : a filter having a single pass band between two specified stop bands. ★ filtre passe-bande → *filtre 35.* R полосно-пропускающий фильтр. D Bandpass. E filtro pasabanda. I filtro passa-banda. N banddoorlaatfilter. P filtr środkowoprzepustowy. S bandpassfilter. (561)
5. **band-stop filter** : a filter having a single stop-band, neither of the cut-off frequencies being zero or infinite. ★ filtre coupe-bande → *filtre 9.* R полосовой заграждающий фильтр. D Bandsperre. E filtro corte de banda. I filtro attenua-banda. N bandonderdrukkend filter. P filtr środkowozaporowy. S bandspärrfilter. (151)
6. **band-stop filter** : a filter having a single stop band between two specified pass bands. ★ filtre coupe-bande → *filtre 10.* R полосно-задерживающий фильтр. D Bandsperre. E filtro de corte de banda. I filtro taglia-banda (filtro passa-alto o passa-basso). N bandonderdrukkingsfilter; bandsperfilter (afgeraden). P filtr środkowozaporowy. S bandspärrfilter. (561)
7. **branching filter** : a device which enables the use of the same antenna for several transmitters or several receivers operating simultaneously in closely spaced radio frequency channels, without interaction. ★ filtre de branchement → *filtre 15.* R частотный разделительный фильтр. D Trennfilter. E filtro de ramificación. I filtro di diramazione. N vertakkingsfilter. P filtr rozgałęźny. S greningsfilter. (712)
8. **comb filter** : a two terminal pair filter in which there are five or more bands of which two or more are pass bands and two or more are stop bands. ★ filtre en peigne → *filtre 27.*

R гребенчатый фильтр. D Kammfilter. E filtro de peine. I filtro a pettine. N combinatiefilter. P filtr grzebieniowy. S kamfilter. (561)

9. **compensating filter** : attenuating or scattering material placed in a beam of radiation to get an approximately uniform flux over an irradiated area. ★ filtre compensateur → *filtre 5.* R компенсирующий фильтр. D Ausgleichsfilter. E filtro compensador. I filtro compensatore. N compensatiefilter. P filtr kompensacyjny. S kompensationsfilter. (881)
10. **compound filter** : a filter composed of more than one material. ★ filtre composite → *filtre 6.* R составной фильтр. D Verbundfilter. E filtro compuesto. I filtro composto. N samengesteld filter. P filtr złożony. S sammansatt filter. (881)
11. **d.c. filter** : a filter on the d.c. side designed to reduce the ripple in the associated system. ★ filtre côté (courant) continu → *filtre 8.* R фильтр постоянного тока. D gleichstromseitiges Filter. E filtro de corriente continua. I filtro lato (corrente) continua. N gelijkstroomfilter. P filtr stałoprądowy. S ls-filter. (551)
12. **dichroic filter** : an optical filter designed to separate optical radiation into two spectral bands. *Note.* — Examples are high and low pass filters. ★ filtre dichroïque → *filtre 24.* R дихроичный фильтр. D Spektralfilter. E filtro dicroico. I filtro dicroico. N dichroïtisch filter. P filtr dwubarwny. S dikroiskt filter. (731)
13. **direct line filter** (*Syn.* direct through-connection filter) : → *filter 14*
14. **direct through-connection filter** (*Syn.* direct line filter; direct transfer filter) : a bandpass filter for the interconnection of two FDM links providing transmission for signals occupying the same frequency band. *Note.* — A direct through-connection filter may be used to interconnect two FDM links inside the same group section, the same supergroup section, etc. ★ filtre de transfert direct → *filtre 23.* R транзитный ВЧ фильтр; линейный ВЧ фильтр; фильтр прямого транзита. D Direktdurchgangsfilter; Direktverbindungsfilter; Direktübertragungsfilter. E filtro de transparencia directo. I filtro di trasferimento diretto. N doorlaatfilter. P filtr transferu bezpośredniego. S genomkopplingsfilter. (704)
15. **direct transfer filter** (*Syn.* direct through-connection filter) : → *filter 14*
16. **edge filter** : a filter that not only selectively absorbs low-energy components of a heterogeneous beam of radiation, but also takes advantage of the sharp discontinuity of absorption near the energy of the *K* absorption edge. ★ filtre de bord → *filtre 14.* R резонансный фильтр. D Absorptionskanten-Filter. E filtro de borde. I filtro selettivo. N filter met absorptiekant. P filtr odcinający. S kantfilter. (881)
17. **filter** : a linear two-port device designed to transmit spectral components of signals according to a specified law, generally in order to pass the components in certain frequency bands and to attenuate those in other bands. ★ filtre → *filtre 2.* R фильтр. D Filter. E filtro (de frecuencias). I filtro. N filter. P filtr. S filter. (702)
18. **filter** : material placed in a beam of radiation in order to produce filtration. ★ filtre → *filtre 3.* R фильтр. D Filter. E filtro. I filtro. N filter. P filtr. S filter. (881)
19. **filter capacitor** : → *capacitor 36*
20. **filter capacitor** (*Syn.* smoothing capacitor) : → *capacitor 62*
21. **filter contact** : → *contact 69*
22. gyromagnetic filter (deprecated) : a filter containing at least one gyromagnetic resonator. ★ filtre gyromagnétique → *filtre 28.* R гиромагнитный фильтр. D gyromagnetisches Filter. E filtro giromagnético. I filtro giromagnetico. N gyromagnetisch filter. P filtr giromagnetyczny. S gyromagnetiskt filter. (221,726)
23. **high-pass filter** : a filter having a single pass-band extending from the cut-off frequency upwards. ★ filtre passe-haut → *filtre 38.* R фильтр верхних частот. D Hochpaß (filter). E filtro pasa-alto. I filtro passa-alto. N hoogdoorlatend filter. P filtr górnoprzepustowy. S högpassfilter. (151)
24. **high-pass filter** : a filter having a single pass band above a cut-off frequency and a stop band for lower frequencies. ★ filtre passe-haut → *filtre 39.* R фильтр верхних частот. D Hochpass. E filtro pasoalto. I filtro passa-alto. N hoogdoorlaatfilter. P filtr górnoprzepustowy. S högpassfilter. (561)
25. **ideal filter** : a two-port network that transmits signals with zero attenuation at all frequencies within one or more frequency bands, and with non-zero attenuation at all other frequencies. ★ filtre idéal → *filtre 29.* R идеальный фильтр. D ideales Filter. E filtro ideal. I filtro ideale. N ideaal filter. P filtr bezstratny. S idealt filter. (131)
26. **interference filter** : an optical filter consisting of one or more thin layers of dielectric or metallic material which operates by means of interference effects. ★ filtre interférentiel → *filtre 30.* R интерференционный фильтр. D LWL-Interferenz-Filter. E filtro interferencial. I filtro interferenziale. N interferentiefilter. P filtr interferencyjny. S interferensfilter. (731)
27. **low-pass filter** : a filter having a single pass-band extending from zero frequency up to the cut-off frequency. ★ filtre passe-bas → *filtre 36.* R фильтр нижних частот. D Tiefpaß (filter). E filtro pasa-bajo. I filtro passa-basso. N laagdoorlatend filter. P filtr dolnoprzepustowy. S lågpassfilter. (151)
28. **low-pass filter** : a filter having a single pass band below a cut-off frequency and a stop band for higher frequencies. ★ filtre passe-bas → *filtre 37.* R фильтр нижних частот. D Tiefpass. E filtro pasobajo. I filtro passa-basso. N laagdoorlaatfilter. P filtr dolnoprzepustowy. S lågpassfilter. (561)
29. **mode filter** : a device designed to pass electromagnetic waves along a waveguide in one or more selected modes of propagation, and substantially to reject waves in other modes. ★ filtre de mode → *filtre 17.* R фильтр типов колебаний. D Modenfilter. E filtro de modos. I filtro di modo. N modusfilter. P filtr rodzaju fali. S modfilter. (726)
30. **mode filter** : a device designed to accept or reject a certain mode or modes. ★ filtre de mode → *filtre 18.* R модовый фильтр. D LWL-Moden-Filter. E filtro de modos. I filtro modale. N modusfilter. P filtr modowy. S modfilter. (731)
31. **monolithic filter** : a filter with at least one monolithic multiple pole vibrator. ★ filtre monolithique → *filtre 31.* R монолитный фильтр. D monolithischer Filter. E filtro monolítico. I filtro monolitico. N monolithisch filter. P filtr monolityczny. S monolitiskt filter. (561)
32. **(optical) filter** : regularly transmitting device used to modify the radiant or luminous flux, the relative spectral distribution, or both, of the radiation passing through it. *Note.* — A distinction is made between selective filters and non-selective filters or neutral filters or neutral grey filters according as they do or do not alter the relative spectral distribution of the radiation. A selective filter that makes a significant change in the chromaticity of the radiation is called a coloured filter ; one that alters the spectral distribution but, because of metamerism, transmits radiation of nearly the same chromaticity as that of the incident radiation, may be called a grey filter. ★ filtre (optique) → *filtre 33.* R (оптический) фильтр; светофильтр. D (optische) Filter. E filtro (óptico). I filtro (ottico). N (optisch) filter. P filtr (optyczny). S (optiskt) filter. (731,845)
33. **piezoelectric filter** : an electrical filter in which one or more piezoelectric vibrators are incorporated. ★ filtre piézoélectrique → *filtre 40.* R пьезоэлектрический фильтр. D piezoelektrischer Filter. E filtro piezoeléctrico. I filtro piezoelettrico. N piëzo-elektrisch filter. P filtr piezoelektryczny. S piezoelektriskt filter. (561)
34. **reflection mode filter** : a mode filter which selects a desired mode of propagation by reflecting other modes. ★ filtre de mode à réflexion → *filtre 19.* R отражательный фильтр типов колебаний. D Reflexions-Modenfilter. E filtro de modos por reflexión. I filtro di modo a riflessione. N modusreflectiefilter. P filtr odbiciowy rodzaju fali. S modfilter av reflexionstyp. (726)
35. **resonant mode filter** : a mode filter which selects a desired mode of propagation by using a resonant structure. ★ filtre de mode à résonance → *filtre 20.* R резонансный фильтр типов колебаний. D Resonanz-Modenfilter. E filtro de modos por resonancia. I filtro di modo a risonanza. N modusresonantiefilter. P filtr rezonansowy rodzaju fali. S modfilter av resonanstyp. (726)
36. **secondary filter** : a filter used to remove the secondary radiation generated in the primary filter. ★ filtre secondaire → *filtre 41.* R вторичный фильтр. D Sekundärfilter. E filtro secundario. I filtro secondario. N secundair filter. P filtr wtórny. S sekundärfilter. (881)
37. **step-like filter** (*Syn.* wedge filter) : → *filter 43*

38. **stop (quarter-wave) filter** : a tuned movable coaxial structure set around a conductor in order to limit the radiating length of the conductor at a given frequency. *Note.* — A stop quarter-wave filter is a special case of the "quarter-wave choke". ★ filtre d'arrêt (en quart d'onde) → *filtre 11.* R стоп (четвертьволновый) фильтр. D (Viertel-Wellen) Sperrfilter. E filtro de parada (en cuarto de onda). I filtro di blocco (a un quarto d'onda). N (kwart-golflengte)onderdrukkend filter. P filtr zaporowy (ćwierćfalowy). S stoppfilter. (161)
39. **Thoraeus filter** : a filter composed of tin, copper, and aluminium that transmits more radiation than a copper filter that produces radiation of the same half value layer. *Note.* — Commonly used Thoraeus filters are : Th 1 : 0.4 mm Sn ; 0.25 mm Cu ; 1 mm Al Th 2 : 0.8 mm Sn ; 0.25 mm Cu ; 1 mm Al Th 3 : 1.2 mm Sn ; 0.25 mm Cu ; 1 mm Al. ★ filtre de Thoraeus → *filtre 21.* R фильтр Торейса. D Thoraeus-Filter. E filtro de Thoraeus. I filtro di Thoraeus. N Thoraeusfilter. P filtr Thoraeusa. S Thoraeus-filter. (881)
40. **through-group filter** : a bandpass filter whose pass band is the standardized frequency band of a basic group. *Notes. 1* — A through-group filter may be used to interconnect two consecutive group sections, where appropriate. *2* — Similar definitions can be given for : "through-supergroup filter", "through-masterg roup filter", "through-supermastergroup filter" and "through 15-supergroup assembly filter" or "through-hypergroup filter". ★ filtre de transfert de groupe primaire → *filtre 22.* R фильтр первичного группового транзита. D Primärgruppendurchgangsfilter. E filtro de transparencia de grupo primario. I filtro di trasferimento di gruppo primario. N groepdoorlaatfilter. P filtr transferu pierwotnogrupowego. S gruppgenomkopplingsfilter. (704)
41. **vestigial sideband filter** (in a vision transmitter) : filter which attenuates part of one of the sidebands of a radio frequency vision signal. ★ filtre de bande résiduelle → *filtre 13.* R фильтр подавления боковой полосы. (723)
42. **waveguide filter** : a section of waveguide in which one or more tuning elements have been included to provide a desired frequency characteristic. ★ filtre de guide d'ondes → *filtre 16.* R волноводный фильтр. D Hohlleiterfilter. E filtro de guíaonda. I filtro in guida d'onda. N golfgeleiderfilter. P filtr falowodowy. S vågledarfilter. (726)
43. **wedge filter** (*Syn.* step-like filter) : a filter of graduated thickness which causes a progressive decrease in intensity across all or part of the useful beam. ★ filtre en coin → *filtre 26.* R клиновидный фильтр; ступенчатый фильтр. D Keilfilter. E filtro en cuna; filtro de escalones. I filtro a cuneo; filtro a gradinata. N wigfilter; getrapt filter. P filtr klinowy. S kilfilter. (881)

filter-diplexer

1. **filter-diplexer** : a device which combines the functions of a vestigial sideband filter and a vision/sound diplexer. ★ filtre-diplexeur → *filtre-diplexeur 1.* R фильтр-диплексер. (723)

filtration

1. **filtration** (of radiation) : modification of the characteristics of ionizing radiation by its passage through matter of stated form and composition, e.g. : -the preferential absorption of the less penetrating components of a heterogeneous beam, accompanying its attenuation ; -the modification of the distribution of the exposure rate over a cross-section of the beam. ★ filtration → *filtration 1.* R фильтрация (излучения). D Filterung (einer Strahlung). E filtración (de una radiacion). I filtrazione (di una radiazione). N filtering (van straling). P filtracja (promieniowania). S filtrering. (881)
2. **inherent filtration** : filtration caused by the irremovable material through which the useful beam of ionizing radiation passes between the source and the space outside. *Note.* — The inherent filtration is expressed by the thickness of a reference material that produces the same radiation quality at a specified voltage and waveform. ★ filtration inhérente → *filtration 2.* R собственная фильтрация. D Eigenfilterung. E filtración inherente. I filtrazione inerente. N eigenfiltering. P filtracja własna. S egenfiltrering. (881)
3. **total filtration** : filtration made up of the inherent filtration and of the filtration caused by added filters. ★ filtre total → *filtre 42.* R полная фильтрация. D Gesamtfilterung. E filtro total. I filtrazione totale. N totale filtering. P filtracja całkowita. S totalfiltrering. (881)

fin

1. **cooling fin** : a metallic part or fin, extending the cooling area to facilitate the dissipation of the heat generated in a tube. ★ radiateur → *radiateur 1.* R охлаждающая пластина. D Kühlrippe. E radiador. I radiatore. N koelvin. P żeberko chłodzące. S kylfläns. (531)

final

1. **final circuit** : → *circuit 77*
2. **final circuit group** : → *group 9*
3. **final condition** : → *condition 7*
4. **final controlling element** : → *controlling 7*
5. **final endurance value** : → *value 11*
6. **final rate** (*Syn.* follow-on rate) : → *rate 39*
7. **final selector** : → *selector 5*
8. **final signal unit** : → *unit 22*
9. **final tripping** : → *tripping 4*
10. **final voltage** : → *voltage 68*

finding

1. **finding** : a process of sequential interrogation, initiated by a device requesting service, for locating that device from a group of devices. ★ recherche passive → *recherche 9.* R пассивное искание. D ..... E búsqueda pasiva. I ricerca di un circuito chiamante. N vinden. P szukanie bierne. S passiv sökning. (714)

fine

1. **fine control** : → *control 101*
2. **fine control element** (*Syn.* fine control member) : → *control 103*
3. **fine control member** : → *control 103*
4. **fine groove** (*Syn.* microgroove) : → *microgroove 1*

finishing

1. **finishing groove** : → *groove 8*
2. **finishing rate** (*Syn.* end-of-charge rate) : → *rate 27*

fire

1. **fire point** : → *point 15*
2. **fire protection wall** : → *wall 6*

fireproof

1. **fireproof connector** : → *connector 24*

firing

1. **burst firing control** : → *control 22*
2. **cross firing** (*Syn.* multi-field therapy) : → *therapy 5*
3. **false firing** : the firing of a controllable valve or arm at an incorrect instant. ★ allumage intempestif → *allumage 5.* R ложное включение. D Falschzündung. E encendido intempestivo. I accensione intempestiva. N foutief ontsteken. P zapłon błędny; zapłon niewczesny. S feltändning. (551)
4. **firing** : ionization of the blocking tube caused by incident radio frequency power. ★ allumage → *allumage 2.* R зажигание. D Zündung. E encendido. I accensione. N ontsteking. P zapłon. S (lelande) tändning. (531)
5. **firing** : the establishment of current in the conducting direction in a controllable valve or arm by control action. ★ allumage → *allumage 3.* R включение (отпирание). D Zünden. E encendido. I accensione; innesco. N ontsteken. P zapłon. S tändning. (551,811)
6. **firing failure** : → *failure 26*
7. **firing power** : → *power 61*
8. **firing speed** : → *speed 16*
9. **firing time** : → *time 63*
10. **firing torque** : → *torque 12*

first-party

1. **first-party release** : → *release 6*

fishbone

1. **fishbone antenna** : → *antenna 50*

fissile

1. **fissile** : of a nuclide, capable of undergoing fission by interaction with slow neutrons. ★ fissile par neutrons lents → *fissile 2.* D thermisch spaltbar. E fisible por neutrones

lentos. I fissile da neutroni lenti. N fissiel; termisch splijtbaar. P rozszczepialny przez neutrony powolne. S klyvbar. (026)

fission

1. **chain fission yield** : → *yield 1*
2. **cumulative fission yield** : → *yield 2*
3. **direct fission yield** (*Syn.* primary fission yield) : → *fission 19*
4. **fast fission** : fission caused by fast neutrons. ★ fission par neutrons rapides → *fission 7.* D Schnellspaltung. E fisión por neutrones rápidos. I fissione veloce. N snelsplijting; splijting met snelle neutronen. P rozszczepienie przez neutrony prędkie. S snabbklyvning. (026)
5. **fast fission factor** : → *factor 78*
6. **fission counter tube** : → *counter tube 10*
7. **fission cross-section** : → *cross-section 13*
8. **fission energy** : → *energy 50*
9. **fission fragments** : → *fragment 1*
10. **fission ionization chamber** : → *ionization chamber 11*
11. **fission neutrons** : → *neutron 8*
12. **fission products** : → *product 4*
13. **fission semiconductor detector** : → *semiconductor detector 6*
14. **fission spectrum** : → *spectrum 15*
15. **fission yield** : → *yield 4*
16. **independent fission yield** (*Syn.* primary fission yield) : → *fission 19*
17. **iterated fission expectation** : → *expectation 1*
18. **nuclear fission** : the division of a heavy nucleus into two (or, rarely, more) parts with masses of equal order of magnitude, usually accompanied by the emission of neutrons, gamma radiation, and, rarely, small charged nuclear fragments. ★ fission nucléaire → *fission 6.* R ядерное деление. D Kernspaltung. E fisión nuclear. I fissione nucleare. N kernsplijting. P rozszczepienie jądra. S (kärn)klyvning; fission. (026,391,881)
19. **primary fission yield** (*Syn.* direct fission yield; independent fission yield) : the fraction of fissions giving rise to a particular nuclide before any beta or gamma decay has occurred. ★ rendement de fission primaire → *rendement 22.* D primäre Spaltausbeute; Fragmentausbeute. E rendimiento de fisión primario; rendimiento de fisión directo; rendimiento de fisión independiente. I resa primaria di fissione; resa diretta di fissione; resa indipendente di fissione. N primaire splijtingsopbrengst. P pierwotna wydajność przy rozszczepieniu. S primärt klyvningsutbyte. (026)
20. **thermal fission** : fission caused by thermal neutrons. ★ fission thermique → *fission 8.* D thermische Spaltung. E fisión térmica.. I fissione termica. N termische splijting. P rozszczepienie termiczne. S termisk klyvning. (026)

fissionable

1. **fissionable** : of a nuclide, capable of undergoing fission by any process. ★ fissile → *fissile 1.* D spaltbar. E fisible. I fissile. N splijtbaar. P rozszczepialny. S klyvbar. (026)

fitting

1. **insulator protective fitting** : a metallic accessory, installed either at the line end, at the earth end or at both ends of an insulator set for the purpose of electrical protection. ★ pièce de garde → *pièce 5.* R защитная арматура изоляторов. D Schutzarmatur. E descargadores. I dispositivo di guardia. N overslagarmatuur. P osprzęt ochronny izolatora. S ljusbågsskydd. (466)
2. **termination fitting** : a fitting attached to the end of a wire or cable in order to anchor it. ★ pièce d'extrémité → *pièce 7.* R концевой зажим. D Endklemme. E pieza terminal. I terminale. N afspanklem. P uchwyt kotwowy. S ändklämma. (811)

fixed

1. **arc furnace fixed roof** : → *roof 1*
2. **fixed charge** (*Syn.* demand charge) : → *charge 24*
3. **fixed connector** : → *connector 25*
4. **fixed cost** : → *cost 12*
5. **fixed equipment** (*Syn.* fixed termination conductor) : → *conductor 36*
6. **fixed equipment** : → *equipment 35*
7. **fixed frequency convertor** : → *convertor 23*
8. **fixed light** : → *light 15*
9. **fixed (measuring) instrument** : → *measuring instrument 8*
10. **fixed payment tariff** : → *tariff 9*
11. **fixed termination conductor** : → *conductor 36*
12. **fixed trip mechanical switching device** : → *switching device 1*
13. **fixed X-ray generator** : → *generator 14*
14. **modulation with a fixed reference** : → *modulation 41*
15. **other fixed works costs** : → *cost 17*

fixing

1. **fixing device** : → *device 26*

flag

1. **jumper flag** (*Syn.* jumper lug) : the part of a joint or of another fitting which permits electrical continuity with another conductor. ★ plage de dérivation → *plage 2.* R лапка зажима. D Anschlußfahne für Stromschlaufe. E placa de derivación. I patella di derivazione. N aansluitvlag. P uchwyt przewodu (do mostkowania). S flagga. (466)

flagging

1. **flagging** (*Syn.* pulling) : → *pulling 3*

flame

1. **length of flame path** (*Syn.* length of flameproof joint) : → *length 20*

flame-arrester

1. **flame-arrester vent plug** : → *plug 2*

flameproof

1. **flameproof** : applied to a machine which has an enclosure that will withstand, without injury, any explosion of the prescribed inflammable gas that may occur within it under practical conditions of operation within the rating of the machine (and recognized overloads, if any, associated therewith); and will prevent the transmission of flame such as will ignite the prescribed inflammable gas which may be present in the surrounding atmosphere. *Note.* — A flameproof enclosure is not necessarily gas-proof, vapour-proof or watertight. ★ machine antidéflagrante → *machine 35.* R взрывозащищенная машина. D explosionsgeschützte Maschine. E máquina antideflagrante. I macchina antideflagrante. N ontploffingsveilig. P maszyna przeciwwybuchowa. S explosionstät. (411)
2. **flameproof bushing** : → *bushing 8*
3. **flameproof enclosure "d"** : → *enclosure 9*
4. **flameproof joint** : → *joint 10*
5. **flameproof luminaire** : → *luminaire 7*
6. **flameproof terminal box** : → *terminal box 2*
7. **gap (of a flameproof joint)** : → *gap 12*
8. **length of flameproof joint** : → *length 20*
9. **width of flameproof joint** (*Syn.* length of flameproof joint) : → *length 20*

flange

1. **choke flange** : a waveguide flange designed with auxiliary transmission line elements to provide without metallic contact the almost complete transfer of power within a given frequency band when used with a flat flange. ★ bride à piège → *bride 1.* R дроссельный фланец. D Drosselflansch. E brida choque. I flangia di blocco. N smoorgroefflens. P kołnierz dławikowy. S spårfläns. (726)
2. **contact flange** (*Syn.* flat flange) : → *flange 12*
3. **cover flange** : a flat flange used in conjunction with a choke flange to provide a choke joint. ★ bride de recouvrement → *bride 5.* R фланец-крышка. D Planflansch (in Verbindung mit Drosselflansch). E brida. I flangia di copertura. N sluitflens. P kołnierz współpłaski. S ..... (726)
4. **field coil flange** : insulation between the field coil and the pole shoe or between the field coil and the member carrying the pole body. ★ cadre de bobine de champ → *cadre 5.* R прокладка обмотки возбуждения.

D Polspulen-Isolierrahmen. E aislamiento de bobina de campo. I telaio isolante della bobina di campo. N spoelflens. P izolacja czołowa cewki. S spolkrage. (411)

5. **flange** : a fixed or removable circular disk forming one piece with the hub, on one or both sides of a hub for the purpose of protecting the magnetic tape wound on the hub. ★ flasque → *flasque 2.* R щека. D Flansch. E brida. I flangia. N flens. P kołnierz (krzyżka). S spolgavel. (806)
6. **flange assembly** : → *assembly 13*
7. **flange joint** : → *joint 11*
8. **flange style "C"** : a choke flange with a groove for a waveguide gasket. ★ bride à piège étanche → *bride 2.* R фланец вида «С». D Flanschbauart «C». E brida tipo «C»; brida choque presurizable; brida choque ostanca. I flangia di tipo «C». N C-flens. P kołnierz dławikowy uszczelniany. S C-fläns. (726)
9. **flange style "P"** : a waveguide flange having a groove for a waveguide gasket but no choke groove. ★ bride étanche → *bride 6.* R фланец вида «Р». D Flanschbauart «P». E brida tipo «P»; brida estanca. I flangia pressurizzabile; flangia di tipo «P». N P-flens. P kołnierz uszczelniany. S P-fläns. (726)
10. **flange style "U"** : a waveguide flange having neither a groove for a waveguide gasket nor a choke groove. *Note.* — Sometimes this flange is used with a flat gasket, that can provide electrical sealing, gas-tight sealing or both. ★ bride non étanche → *bride 12.* R фланец вида «U». D Flanschbauart «U». E brida tipo «U»; brida no estanca; brida no presurizable. I flangia non pressurizzabile; flangia di tipo «U». N U-flens. P kołnierz nieuszczelniany. S U-fläns. (726)
11. **flange type** : → *type 14*
12. **flat flange** (*Syn.* plain flange; contact flange; plane flange) : a waveguide flange having a flat mating face. ★ bride lisse → *bride 7.* R плоский фланец; гладкий фланец; контактный фланец; плоскостной фланец. D Planflansch. E brida plana. I flangia piatta; flangia ordinaria. N vlakke flens. P kołnierz płaski. S planfläns. (726)
13. **mounting flange** : a projection from a component for the purpose of attaching the component to a rigid surface. ★ collerette de montage → *collerette 2.* R фланец монтажный. D Montage-Flansch. E collarín de montaje. I flangia di montaggio. N montageflens. P kołnierz. S monteringsfläns. (581)
14. **plain flange** (*Syn.* flat flange) : → *flange 12*
15. **plane flange** (*Syn.* flat flange) : → *flange 12*
16. **socket flange** : a waveguide flange having an aperture on its mating face identical to that of the waveguide interior and having on its other face, self jigging features for aligning the flange aperture with the waveguide interior. ★ bride-douille → *bride-douille 1.* R фланец штепсельного типа. D Steckflansch. E brida de zócalo. I flangia a zoccolo. N pasflens. P kołnierz gniazdowy. S sockelfläns. (726)
17. **through flange** : a waveguide flange in which the plane of the waveguide aperture is coincident with the mating surface of the flange. ★ bride-manchon → *bride-manchon 1.* R фланец проходного типа. D Durchgangsflansch. E brida pasante. I flangia a manicotto. N doorgangsflens. P kołnierz jednopłaszczyznowy. S stötskarvfläns. (726)
18. **waveguide flange** : a flange designed to be mounted on the end of a waveguide and to accept means for aligning with and clamping to a mating flange. ★ bride (de guide d'ondes) → *bride 4.* R волноводный фланец. D Hohlleiterflansch. E brida de guíaonda. I flangia (di guida d'onda). N golfgeleiderflens. P kołnierz falowodowy. S vågledarfläns. (726)

flanking

1. **flanking transmission** : → *transmission 28*

flap

1. **flap attenuator** : → *attenuator 8*

flare

1. **edge flare** : unwanted additional luminance occurring at the edges of the picture. ★ surluminance de bord → *surluminance 1.* R факел. (723)
2. **flare** : unwanted component in a picture caused by the scattering of light in the optical system of the picture signal source or display. ★ (distorsion de) lumière parasite → *distorsion 35.* R светорассеяние. (723)

flash

1. **flash** : temporary insertion of a short item which interrupts a broadcast programme. ★ insert → *insert 1.* R вставка. (723)
2. **flash** : an unwanted moulding material at the edge of a disk, formed during the compression moulding operation. ★ bavure → *bavure 1.* R облой. D Kranzbruch. E rebaba. I sbavatura. N rand. P wypływka. S skägg. (806)
3. **flash barrier** : → *barrier 6*
4. **flash point** : → *point 16*
5. **flash tube** : → *tube 33*

flash-arc

1. **flash-arc** (*Syn.* Rocky-Point effect) : a sudden unpredictable large increase in current caused by irregularities on electrode surfaces, evolution of gas, etc., which may lead to a continuous arc between the electrodes but is usually of short duration and self-terminating. ★ flash → *flash 1.* R дуговая вспышка. D Überschlag. E flash; efecto Rocky Point. I effetto Rocky-Point. N Rocky-Point-effect. P zjawisko Rocky-Point. S blixteffekt. (531)

flashing

1. **flashing light** : → *light 16*

flashlight

1. **flashlight** (*Syn.* torch) : → *torch 8*

flashover

1. **back flashover** : a flashover of phase-to-earth insulation resulting from a lightning strike to that part of the system which is normally at earth potential. ★ amorçage en retour → *amorçage 4.* R обратное перекрытие. D rückwärtiger Überschlag. E cebado por retorno; cebado inverso. I adescamento di ritorno. N terugslag (van bliksem). P przeskok odwrotny. S baköverslag. (604)
2. **flashover** : an arc by-passing an insulating body. ★ contournement (électrique) → *contournement 4.* R перекрывающий разряд. D Überschlag. E contorneamiento (eléctrico). I scarica superficiale. N overslág. P przeskok. S överslag. (121)
3. **flashover** : a breakdown between electrodes in a gas or a liquid or in vacuum, at least partly along the surface of solid insulation. ★ contournement → *contournement 2.* R поверхностный пробой. D Überschlag. E contorneamiento. I scarica al contorno. N overslag. P przeskok. S överslag. (212)
4. **flashover** (of an insulator) : a disruptive discharge external to the insulator, and over its surface, connecting those parts which normally have the operating voltage between them. ★ contournement → *contournement 3.* R перекрытие. D Überschlag. E contorneamiento. I scarica (superficiale). N overslag. P przeskok. S överslag. (471)
5. **flashover** (*Syn.* disruptive discharge) : → *discharge 14*
6. **flashover** : a short-circuit caused by arcing between brushes or brush-holders at the surface of the commutator of an electrical machine or from any of these parts to the frame. ★ coup de feu au collecteur → *coup 3.* R круговой огонь. D Rundfeuer; Überschlag. E contorneamiento. I colpo di fuoco al collettore. N rondvuur. P przeskok (na komutatorze); iskrzenie (na komutatorze). S rundslag. (811)

flat

1. **flat bed facsimile transmitter** : → *transmitter 7*
2. **flat characteristic (of an arc welding power source)** : → *characteristic 40*
3. **flat compounded** (*Syn.* level compounded) : → *compounded 4*
4. **flat counter tube** : → *counter tube 11*
5. **flat fade margin** : → *margin 5*
6. **flat flange** : → *flange 12*
7. **flat formation** : → *formation 1*
8. **flat leakage power** : → *power 63*
9. **flat (multicore) cable** : → *cable 29*
10. **flat random noise** (*Syn.* white noise) : → *noise 93*
11. **flat rate tariff** : → *tariff 10*

flat-top

1. **flat-top antenna** : → *antenna 51*

fleet

1. **traction fleet** : a general term covering all the traction units belonging to a particular railway or other administration. ★ parc moteur → *parc 2.* R локомотивный парк. D Triebfahrzeugpark. E parque motor. I parco (dei mezzi) di trazione. N krachtvoertuigpark. P park pojazdów silnikowych. S dragfordonspark. (811)

fleeting

1. **fleeting information** : → *information 8*

flexibility

1. **flexibility ratio** : → *ratio 39*

flexible

1. **arc furnace flexible cables** : → *cable 2*
2. **flexible busbar** : → *busbar 10*
3. **flexible cable** : → *cable 30*
4. **flexible carrier** : → *carrier 16*
5. **flexible conductor** : → *conductor 37*
6. **flexible double-sided printed board** : → *board 4*
7. **flexible drive** : → *drive 9*
8. **flexible mica material** : → *material 14*
9. **flexible multilayer printed board** : → *board 5*
10. **flexible printed board** : → *board 6*
11. **flexible single-sided printed board** : → *board 7*
12. **flexible support** : → *support 9*
13. **flexible surface heater** : → *heater 3*
14. **flexible waveguide** : → *waveguide 6*
15. **(subscriber's line) flexible network** : → *network 91*

flex-rigid

1. **flex-rigid double-sided printed board** : → *board 8*
2. **flex-rigid multilayer printed board** : → *board 9*
3. **flex-rigid printed board** : → *board 10*

flicker

1. **critical flicker frequency** (*Syn.* fusion frequency) : → *frequency 108*
2. **equivalent flicker voltage fluctuation** : → *fluctuation 2*
3. **flicker** : impression of unsteadiness of visual sensation induced by a light stimulus whose luminance or spectral distribution fluctuates with time. ★ papillotement → *papillotement 2.* R фликер; мерцание. D flimmern; Flicker. E parpadeo; flicker. I sfarfallio; flicker. N flikkering. P migotanie. S flimmer. (161,845)
4. **flicker** (in television) : unwanted rapid rhythmic variation, perceptible by the eye, in one of the characteristics of a picture, such as luminosity or colour. ★ papillotement → *papillotement 3.* R мерцание (в телевидении). (723)
5. **flicker noise** : → *noise 24*
6. **flicker noise** : → *noise 25*
7. **flicker photometer** : → *photometer 3*
8. **flicker voltage range** : → *range 25*
9. **interline flicker** (*Syn.* twitter) : flicker arising on horizontal edges because the time interval between the scanning of contiguous lines of an interlaced picture is significant. ★ papillotement d'interligne → *papillotement 5.* R межстрочное мерцание. (723)
10. **large area flicker** : flicker arising because the field frequency of a scanning system is too low. ★ papillotement de trame → *papillotement 4.* R мерцание больших площадей. (723)
11. **threshold of flicker irritability** : → *threshold 22*
12. **threshold of flicker perceptibility** : → *threshold 23*

flickermeter

1. **flickermeter** : an instrument designed to measure any quantity representative of flicker. ★ flickermètre → *flickermètre 1.* R фликерметр. D Flickermeter. E contador de parpadeos; flickérmetro. I flickermetro. N flikkeringsmeter. P miernik migotania. S flickermeter. (161,604)

float

1. **contact float** : the permitted free movement of a contact in a component. ★ flottement d'un contact → *flottement 1.* R плавание контакта. D Kontaktspiel. E flotación de un contacto. I fluttuazione di un contatto. N contactspeling. P luz stykowy. S kontaktspel. (581)
2. **float** : boat-shaped buoy. *Note.* — A light float is a float that carries a signal light. ★ bouée-bateau → *bouée-bateau 1.* R бакен. D Floß. E barco boya. I zattera. N vlot. P pława. S flotte. (845)
3. **float mounting** : → *mounting 1*
4. **float mounting connector** : → *connector 26*

floating

1. **continuous floating action** : → *action 4*
2. **floating action** : → *action 7*
3. **floating battery** : → *battery 39*
4. **floating input** : → *input 8*
5. **floating output** : → *output 10*
6. **floating ring drive** : → *drive 10*
7. **floating voltage** : → *voltage 70*
8. **multiple-speed floating action** : → *action 13*
9. **single-speed floating action** : → *action 21*

floating-drift-tube

1. **floating-drift-tube klystron** : → *klystron 2*

flood

1. **flood lubricated bearing** : → *bearing 14*

floodlight

1. **floodlight** : projector designed for floodlighting, usually capable of being pointed in any direction. ★ projecteur d'illumination → *projecteur 13.* R прожектор заливающего света. D Flutlichtstrahler; Flutlichtscheinwerfer. E proyector para iluminación general. I proiettore per illuminazione a fascio. N schijnwerper. P projektor iluminacyjny. S fasadstrålkastare; flodljuskastare. (845)
2. **special studio floodlight** : lighting device with a specified half-peak divergence, less than 1.74 radian (100°), and a specified total divergence. ★ réflecteur diffusant spécial → *réflecteur 21.* R специальный световой прибор для студий. D spezieler Studio-Scheinwerfer. E proyector especial de estudio. I riflettore diffondente speciale. N speciaal studiolicht. P naświetlacz sceniczny specjalny. S specialstrålkastare. (845)
3. **studio floodlight** : lighting device with a half-peak divergence exceeding 1.74 radian (100°) and with a total divergence not less than 3.14 radians (180°). ★ réflecteur diffusant de studio → *réflecteur 20.* R световой прибор для студий. D Studio-Scheinwerfer. E proyector de estudio. I riflettore diffondente per studio. N studiolicht. P naświetlacz sceniczny. S ateljéstrålkastare. (845)

floodlighting

1. **floodlighting** : lighting of a scene or object, usually by projectors, in order to increase considerably its illuminance relative to its surroundings. ★ illumination → *illumination 4.* R освещение заливающим светом. D Flutlicht-Beleuchtung. E iluminación por proyección. I illuminazione a fascio. N schijnwerperverlichting. P oświetlenie projektorowe. S strålkastarbelysning. (845)

floor

1. **floor lamp** (*Syn.* standard lamp) : → *lamp 60*

flow

1. **angle of flow** : → *angle 4*
2. **axial flow fan** : → *fan 1*
3. **chain flow** : the traffic carried on a given chain from its originating node to its destination node. ★ trafic d'acheminement préférentiel → *trafic 27.* D Fluß auf dem Ende-zu-Ende-Weg. P przepływ w łańcuchu (połączeniowym). (715)
4. **continuous flow** (of direct current) : a flow of direct current which is not periodically interrupted. ★ écoulement continu → *écoulement 3.* R непрерывный режим (режим непрерывного тока). D nichtlückender Betrieb. E circulación continua (de una corriente continua). I erogazione continua (di una corrente continua). N continu vloeien (van gelijkstroom); leemtevrije stroom. P przewodzenie ciągłe (prądu stałego). S kontinuerlig likström. (551)

5. **flow control** : → *control 104*
6. **flow resistance** : → *resistance 23*
7. **flow resistivity** : → *resistivity 1*
8. **intermittent flow** (of direct current) : a flow of direct current which is periodically interrupted. ★ écoulement discontinu → *écoulement 4.* R непрерывный режим (режим непрерывного тока). D Lückbetrieb. E circulación discontinua (de una corriente contínua). I erogazione discontinua (di una corrente continua). N intermitterend vloeien (van gelijkstroom); leemtestroom. P przewodzenie przerywane (prądu stałego). S intermittent likström. (551)
9. **load flow calculation** : → *calculation 5*
10. **radial flow fan** : → *fan 6*
11. **specific flow resistance** : → *resistance 62*
12. **transmit flow control** : → *control 197*
13. **water cumulative flows** : total volume of water flowing through a given cross-section of water course during a given period of time. ★ apports hydrauliques → *apport 1.* R сток. D Zuflussmenge; Abflussmenge. E aportaciones hidraúlicas. I deflusso. N wateraanvoer. P przepływ wody. S ackumulerad vattenföring. (602)

fluctuation

1. **amplitude of fluctuation of the luminous flux** : → *amplitude 16*
2. **equivalent flicker voltage fluctuation** : a voltage fluctuation with specified frequency and shape (for example : sinusoidal, 10 Hz) which induces the same visual disturbance as the voltage fluctuation under consideration. ★ tension de papillotement équivalente → *tension 161.* R колебания напряжения, эквивалентные по миганиям. D flickeräquivalente Spannungsschwankung. E tensión de fluctuación rápida equivalente. I tensione equivalente di flicker. N equivalente spanningsflikkering. P symulowana fluktuacja napięcia migotania światła. S flickerekvivalent spänningsvariation. (604)
3. **fluctuations** : unwanted non-periodic deviations of relatively long duration, around an average value, which occur more or less randomly. Fluctuations are determined under specified conditions. *Note.* — Fluctuations are a part of PARD. ★ fluctuations → *fluctuation 7.* R флуктуации. D Fluktuation. E fluctuaciones. I fluttuazione. N fluctuaties. P fluktuacje. S fluktuationer. (303)
4. **magnitude of a voltage fluctuation** : → *magnitude 2*
5. **speed fluctuation** : a spurious frequency modulation in the recorded signal, in general caused by variation of the speed of the recording medium. ★ fluctuation de vitesse → *fluctuation 5.* R изменение высоты тона. D Geschwindigkeitsschwankung. E fluctuación de velocidad. I fluttuazione di velocità. N snelheidsschommelingen; jengel. P nierównomierność prędkości. S svajning. (806)
6. **voltage fluctuation** : a series of voltage changes or a cyclic variation of the voltage envelope. ★ fluctuation de tension → *fluctuation 4.* R колебание напряжения. D Spannungsschwankung. E fluctuación de tensión. I fluttuazione di tensione. N spanningsschommeling. P fluktuacja napięcia. S spänningsvariation. (161,604)
7. **voltage fluctuation waveform** : → *waveform 1*

fluence

1. **energy fluence** (Ψ) : at a given point of space, the sum of energies dE_r exclusive of rest energy, of all the particles incident during a given time interval on a suitably small sphere centered at that point, divided by the cross-sectional area da of that sphere.

$$\Psi = \frac{dE_r}{da}$$

★ fluence énergétique → *fluence 7.* R перенос энергии излучения; интегральная плотность; потока энергии. D Energiefluenz. E fluencia energética. I fluenza energetica. N energiefluentie; fluxdichtheid (van energie). P fluencja energii. S energifluens. (391)

2. **energy fluence rate** : → *rate 28*
3. **(particle) energy fluence** (Ψ) : the quotient of dR by da, where dR is the radiant energy incident on a sphere of cross-sectional area da:

$$\Psi = \frac{dR}{da}$$

★ fluence énergétique (de particules) → *fluence 9.* R перенос энергии (частиц). D Energiefluenz. E fluencia energética (de partículas). I fluenza di energia. N energiefluentie. P fluencja energii. S energifluens. (881)

4. **(particle) fluence** (Φ) : at a given point of space, the number dN of particles incident during a given time interval on a suitably small sphere centred at that point divided by the cross-sectional area da of the sphere.

$$\Phi = \frac{dN}{da}$$

★ fluence (de particules) → *fluence 6.* R перенос частиц; интегральная плоотность; потока частиц. D (Teilchen-)Fluenz. E fluencia (de partículas). I fluenza (di particelle). N deeltjesfluentie; fluentie; fluentie (van deeltjes). P fluencja cząstek. S (partikel)fluens. (026,391,881)

5. **(particle) fluence rate** : → *rate 64*
6. **particle fluence ratemeter** : → *ratemeter 6*
7. **radiant fluence** (*Syn.* radiant spherical exposure) : → *exposure 17*
8. **radiant fluence rate** (*Syn.* spherical irradiance) : → *irradiance 7*

fluid

1. **fluid poison control** : → *control 105*

fluidized

1. **fluidised-bed boiler** : → *boiler 5*
2. **fluidized bed coating** : → *coating 3*
3. **fluidized bed furnace** : → *furnace 18*
4. **fluidized reactor** : → *reactor 15*

fluorescence

1. **fluorescence** : photoluminescence in which the emitted optical radiation results from direct transitions from the photo-excited energy level to a lower level, these transitions taking place generally within 10 nanoseconds after the excitation. ★ fluorescence → *fluorescence 2.* R флуоресценция. D Fluoreszenz. E fluorescencia. I fluorescenza. N fluorescentie. P fluorescencja. S fluorescens. (845)
2. **fluorescence** : luminescence that occurs essentially only during irradiation. ★ fluorescence → *fluorescence 3.* R флюоресценция. D Fluoreszenz. E fluorescencia. I fluorescenza. N fluorescentie. P fluorescencja. S fluorescens. (881)
3. **X-ray fluorescence content meter** : → *content meter 9*
4. **X-ray fluorescence thickness meter** : → *meter 79*

fluorescent

1. **fluorescent lamp** : → *lamp 18*
2. **fluorescent screen** : → *screen 6*
3. **starterless fluorescent lamp** : → *lamp 61*
4. **switch-start fluorescent lamp** : → *lamp 63*

fluorimeter

1. **X-ray excitation fluorimeter** (*Syn.* X-ray fluorescence content meter) : → *content meter 9*

fluorographic

1. **fluorographic film** : → *film 8*

fluorophor

1. **fluorophor** (*Syn.* luminophor) : → *luminophor 1*

fluoroscope

1. **fluoroscope** : an X-ray tube and fluorescent screen, with or without an image intensifier, and associated equipment used for fluoroscopy. ★ appareil de radioscopie → *appareil 30.* R флюороскоп. D Röntgendurchleuchtungsgerät. E aparato de radioscopia; fluoroscopia. I apparecchio per radioscopia. N doorlichttoestel; fluoroscoop. P fluoroskop. S genomlysningsapparat. (881)

fluoroscopic

1. **fluoroscopic screen** : → *screen 7*

fluoroscopy

1. **fluoroscopy** : the process of observing the image on a fluorescent screen produced by the projection of an X-ray beam through an object onto the screen. *Note.* — The brightness and contrast of the fluoroscopic image can be enhanced by means of an image intensifier and associated television equipment. ★ radioscopie → *radioscopie 2.* R флюороскопия. D Durchleuchtung. E radioscopia; fluoroscopia. I fluoroscopia; radioscopia. N doorlichten. P fluoroskopia. S röntgengenomlysning. (881)

flush

1. **flush mounted antenna** (*Syn.* conformal antenna) : → *antenna 33*

flush-mounted

1. **flush-mounted antenna** : → *antenna 53*

flutter

1. **flutter** : an undesired form of frequency modulation introduced into the recorded signal by an irregular motion of the recording medium during the recording/reproducing process, the frequency of which is above 10 Hz. ★ scintillement → *scintillement 1.* R детонация (высокочастотная). D schnelle Tonhöhenschwankung (Flutter). E centelleo. I scintillamento. N snelle zwevingen. P drżenie. S snabb svajning. (806)
2. **flutter echo** : → *echo 13*

flux

1. **coil flux guide** : → *guide 2*
2. **cumulative downward flux proportion** : → *proportion 1*
3. **cumulative flux** (of a source, for a solid angle) : luminous flux emitted by the source under operating conditions, within a cone having a vertically downward axis and enclosing the solid angle. ★ flux cumulé → *flux 9.* R концентрированный поток излучения (источника, для данного телесного угла). D kumulierter Zonenlichtstrom (einer Lichtquelle, für einen Raumwinkel). E flujo acumulado. I flusso cumulato. N gesommeerde lichtstroom. P ..... S samlat ljusflöde. (845)
4. **direct flux** (on a surface) : luminous flux received by the surface directly from a lighting installation. ★ flux direct → *flux 14.* R непосредственно падающий световой поток (на поверхность). D direkter Lichtstrom (auf einer Fläche). E flujo directo. I flusso diretto. N directe lichtstroom. P strumień bezpośredni. S direkt ljusflöde. (845)
5. **downward flux** (of a source) : cumulative flux of the source for the solid angle 2π steradians, below the horizontal plane passing through the source. ★ flux (hémisphérique) inférieur → *flux 18.* R световой поток в нижней полусфере (источника). D unterer halbräumlicher Lichtstrom (einer Lichtquelle). E flujo (hemiesférico) inferior. I flusso luminoso emisferico inferiore. N neerwaartse lichtstroom (van een bron). P strumień półprzestrzenny dolny; strumień dolnoprzestrzenny. S nedåtriktat ljusflöde. (845)
6. **downward flux fraction** : → *fraction 3*
7. **electric flux** : the scalar quantity equal to the flux of the electric flux density. ★ flux électrique → *flux 17.* R электрический поток. D elektrischer Fluß. E flujo eléctrico. I flusso dielettrico. N elektrische flux. P strumień elektryczny. S elektriskt flöde. (121)
8. flux (deprecated) : a deprecated term when meaning: *particle flux density* or *particle fluence rate.* ★ flux → *flux 7.* R поток. D Fluss. E flujo. I flusso. N fluxdichtheid. P strumień. S flöde. (391)
9. **flux code** : → *code 32*
10. **flux meter** : → *meter 21*
11. **flux of a vector quantity** (across a surface) : a surface integral whose differential element is the scalar product of the quantity and the vector surface element. ★ flux d'une grandeur vectorielle → *flux 16.* R поток векторной величины (через поверхность). D Fluß einer vektoriellen Größe (durch eine Fläche). E flujo de una magnitud vectorial (a través de una superficie). I flusso di una grandezza vettoriale (attraverso una superficie). N flux van een vectorgrootheid. P strumień wektora. S vektorflöde. (101)
12. **flux triplet** : → *triplet 1*
13. **indirect flux** (on a surface) : luminous flux received by the surface from a lighting installation, after reflection from other surfaces. ★ flux indirect → *flux 20.* R отраженный световой поток (на поверхности). D indirekter Lichtstrom (auf einer Fläche). E flujo indirecto. I flusso indiretto. N indirecte lichtstroom. P strumień pośredni. S indirekt ljusflöde. (845)
14. **leakage flux** : that part of the flux in a magnetic circuit which is not channelled in the desired path. ★ flux de fuite → *flux 11.* R поток рассеяния. D Streufluß. E flujo disperso. I flusso disperso. N spreidingsflux; lekflux. P strumień rozproszenia. S läckflöde. (131)
15. **magnetic flux** (Φ) : the scalar quantity equal to the flux of the magnetic flux density. ★ flux magnétique → *flux 21.* R магнитный поток. D magnetischer Fluß. E flujo magnético. I flusso magnetico. N magnetische flux. P strumień magnetyczny. S magnetiskt flöde. (121)
16. **magnetic flux** : the area integral of the magnetic flux density. Particularly the flux in the magnetic circuit of the heads. ★ flux magnétique → *flux 22.* R магнитный поток. D Magnetfluß. E flujo magnético. I flusso magnetico. N magnetische flux. P strumień magnetyczny. S magnetflöde. (806)
17. **main flux** : the flux produced by the main poles of a machine as distinct from other poles, e.g. commutating poles. ★ flux principal → *flux 24.* R главный поток. D Haupt(pol)fluß. E flujo principal. I flusso principale. N hoofdpoolflux. P strumień główny. S huvudflöde. (811)
18. **monthly mean solar radio-noise flux** (Φ) : monthly average of the spectral density of the solar noise flux, measured at the surface of the Earth at a frequency of approximately 2800 MHz, expressed as a multiple of 10^{-22} watt per square metre per hertz. *Note.* — By convention, the measurements used are the observations made each day Ottawa at 17:00 UTC. ★ flux du bruit radioélectrique solaire moyen → *flux 15.* D mittlerer solarer Rauschfluß. P strumień średni miesięczny słonecznych szumów radiowych. (705)
19. **optical flux** (*Syn.* radiant power) : → *power 153*
20. **photon flux** (Φ_p; Φ) : quotient of the number of photons dN_p emitted, transmitted, or received in an element of time dt, by that element.

$$\Phi_p = \frac{dN_p}{dt}$$

Unit : s^{-1} *Note.* — For a beam of radiation whose spectral distribution is

$$\frac{d\Phi_e(\lambda)}{d\lambda}$$

or

$$\frac{d\Phi_e(\nu)}{d\nu}$$

, the photon flux Φ_p is

$$\Phi_p = \int_0^\infty \frac{d\Phi_e(\lambda)}{d\lambda} \cdot \frac{\lambda}{hc_0} d\lambda = \int_0^\infty \frac{d\Phi_e(\nu)}{d\nu} \cdot \frac{1}{h\nu} d\nu$$

h, Planck's constant

$$h = (6.6260755 \pm 0.000\,0040) \times 10^{-34}\ \mathrm{J \cdot s}$$

c_0, speed of light in vacuum = 299 792 458 $m \cdot s^{-1}$. ★ flux photonique → *flux 23.* R поток фотонов. D Photonenstrom. E flujo fotónico. I flusso fotonico. N fotonenstroom. P strumień fotonowy. S fotonflöde. (845)
21. **radiant flux** (*Syn.* radiant power) : → *power 153*
22. **radiant flux** (*Syn.* radiant power) (Φ_e; Φ; P) : power emitted, transmitted or received in the form of radiation. unit : W. ★ flux énergétique → *flux énergétique 3.* R поток излучения; мощность излучения. D Strahlungsleistung; Strahlungsfluss. E flujo radiante. I flusso energetico. N stralingsstroom; stralingsvermogen. P strumień energetyczny; strumień promienisty. S strålningsflöde; strålningseffekt. (841,845)
23. **short-circuit flux of a magnetic tape** : the flux which flows through the core of a reproducing head which has zero reluctance and in intimate contact with the surface of the tape over an infinite length. *Note.* — The value of the short-circuit flux is expressed in nanoweber per metre of track width. In the case of a sinusoidal quantity, it should be indicated whether it is an r.m.s. or peak value. ★ flux de court-circuit d'une bande magnétique → *flux 10.* R поток короткого замыкания

магнитной ленты. D Kurzschlußfluß eines Magnetbandes. E flujo de cortocircuito de una cinta magnética. I flusso di cortocircuito di un nastro magnetico. N kortsluitflux van een magnetische band. P strumień zwarciowy. S kortslutningsflöde. (806)

24. **sound energy flux** (*Syn.* sound power through a surface element) : time average product of the inphase components of the instantaneous sound pressure and the volume velocity through the surface element considered. ★ puissance acoustique à travers un élément de surface → *puissance 57.* R поток звуковой энергии; звуковая мощность через элемент поверхности. D Schalleistung durch ein Oberflächenelement. E potencia acústica a través de un elemento superficial. I potenza sonora attraverso un elemento di superficie. N akoestisch vermogen door een oppervlakte-element. P strumień energii akustycznej. S ljudflöde. (801)
25. **total flux** (of a source) : cumulative flux of the source for the solid angle 4π steradians. ★ flux total → *flux 27.* R общий световой поток (источника). D Gesamtlichtstrom (einer Lichtquelle). E flujo total. I flusso totale. N totale lichtstroom (van een bron). P strumień całkowity. S totalt ljusflöde. (845)
26. **transverse flux heating** : → *heating 55*
27. **upward flux** (of a source) : difference of total and downward fluxes. ★ flux (hémisphérique) supérieur → *flux 19.* R световой поток в верхней полусфере (источника). D oberer halbräumlicher Lichtstrom (einer Lichtquelle). E flujo (hemiesférico) superior. I flusso luminoso emisferico superiore. N opwaartse lichtstroom (van een bron). P strumień półprzestrzenny górny; strumień górnoprzestrzenny. S uppåtriktat ljusflöde. (845)
28. **zonal flux** (of a source, for a zone) : difference of the cumulative fluxes of the source for the solid angles subtended by the upper and lower boundaries of the zone. ★ flux zonal → *flux 28.* R зональный поток излучения (источника для данной зоны). D Zonenlichtstrom (einer Lichtquelle, für eine Zone). E flujo zonal. I flusso zonale. N zonale lichtstroom. P strumień strefowy. S zonljusflöde. (845)

flux density

1. **conventional flux density** (*Syn.* 2 200 m/s flux density) : → *flux density 17*
2. **diffusion coefficient for neutron flux density** : → *coefficient 16*
3. **electric flux density** (*D*) : a vector quantity whose divergence equals the electric volume charge density. *Note.* — In vacuo, it is at all points equal to the product of the electric field strength and the electric constant.

$$D = \varepsilon_0 E$$

★ induction électrique → *induction 18.* R плотность электрического потока; электрическое смещение; электрическая индукция. D elektrische Flußdichte; Verschiebung (veraltet). E inducción eléctrica; desplazamiento. I induzione dielettrica. N elektrische fluxdichtheid; elektrische verplaatsing. P indukcja elektryczna. S elektrisk flödestäthet. (121)

4. **energy flux density** : at a given point, the sum of the energies exclusive of rest energy, of all the particles or photons incident on a small sphere centred at that point, divided by the cross-sectional area of that sphere. It is identical with the product of the particle flux density and the average speed. ★ densité de flux énergétique → *densité de flux 4.* D Energieflußdichte. E densidad de flujo energético.. I densità di flusso energetico. N energiefluxdichtheid; fluxdichtheid van de energie. P gestość strumienia energii. S energiflödestäthet. (026)
5. **energy flux density** (*Syn.* energy fluence rate) : → *rate 28*
6. **fullness factor (related to the flux density)** : → *factor 83*
7. **installation flux density** (for an interior lighting) : quotient of the sum of the individual total fluxes of the luminaires of an installation, by the floor area.Unit : $lm \cdot m^{-2}$. ★ flux surfacique de l'installation → *flux 25.* R плотность потока установки (для внутреннего освещения). D flächenbezogener Lichtstrom der Beleuchtungsanlage (für eine Innenraumbeleuchtung). E densidad de flujo de la instalación. I densità di flusso dell'impianto. N ..... P gestość strumienia zainstalowanych opraw. S ..... (845)
8. **installed lamp flux density** (for an interior lighting) : quotient of the sum of the individual rated fluxes of the lamps of an installation, by the floor area.Unit : $lm \cdot m^{-2}$. ★ flux surfacique des lampes installées → *flux 26.* R плотность потока установленных ламп (для внутреннего освещения). D flächenbezogener Lichtstrom der installierten Lampen (für eine Innenraumbeleuchtung). E densidad de flujo de las lámparas. I densità di flusso delle lampade. N geïnstalleerde lichtstroom per oppervlakte-eenheid. P gestość strumienia zainstalowanych źródeł światła. S installerat ljusflöde per kvadratmeter. (845)
9. **magnetic flux density** (*Syn.* magnetic induction) (*B*) : the vector quantity of divergence zero at all points, which determines that component of the Coulomb-Lorentz force which is proportional to the velocity of the carrier. ★ induction magnétique → *induction 20.* R магнитная индукция. D magnetische Flußdichte; Induktion. E inducción magnética. I induzione magnetica. N magnetische fluxdichtheid; magnetische inductie. P indukcja magnetyczna. S magnetisk flödestäthet; magnetisk fluxtäthet. (121)
10. **particle flux density** : at a given point in space, the number of particles or photons incident per unit time on a small sphere, centred at that point, divided by the cross-sectional area of that sphere. It is identical with the product of the particle density and the average speed. The term is commonly called,"flux". ★ densité de flux de particules → *densité de flux 2.* D Teilchenflussdichte. E densidad de flujo de partículas. I densità di flusso di particelle. N fluxdichtheid van deeltjes; deeltjesfluxdichtheid. P gestość strumienia cząstek; strumień. S partikelflödestäthet. (026)
11. **(particle) flux density** (*Syn.* (particle) fluence rate) : → *rate 64*
12. **power flux density** (*Syn.* radiant flux density) : the power passing through an element of surface normal to the direction of propagation of energy of an electromagnetic wave divided by the area of the element. ★ puissance surfacique → *puissance 157.* D Leistungsflußdichte; Strahlungsflußdichte. P gestość strumienia mocy. (705,731)
13. **radiant flux density** (*Syn.* power flux density) : → *flux density 12*
14. **remanent flux density** : the value of the magnetic flux density remaining in a magnetized body when, in the absence of a self-demagnetizing field, the applied magnetic field strength is brought to zero. *Note.* — When the initial state is one of magnetic saturation, the remanent flux density is termed "magnetic remanence". ★ induction (magnétique) rémanente → *induction 22.* R остаточная индукция. D remanente Flußdichte. E inducción (magnética) remanente; densidad de flujo remanente. I induzione (magnetica) residua. N remanente inductie. P indukcja szczątkowa. S remanent flödestäthet. (121,221)
15. **sound energy flux density** (*Syn.* sound power density) : → *density 31*
16. **sound-energy flux density level** (*Syn.* sound intensity level) : → *level 86*
17. **2 200 m/s flux density** (*Syn.* conventional flux density) : a fictitious flux density equal to the product of the total number of neutrons per cubic centimetre and a neutron speed of 2.2×10^5 cm/s. ★ densité de flux de 2 200 m/s → *densité de flux 3.* D konventionelle Flußdichte. E densidad de flujo a 2 200 m/s; flujo convencional. I densità di flusso di 2 200 m/s; densità di flusso convenzionale. N conventionele fluxdichtheid; 2 200 m/s-fluxdichtheid. P strumień »2 200 m/s»; strumień umowny. S konventionell flödestäthet. (026)

fly-back

1. **fly-back** (*Syn.* retrace) : the return of the scanning spot from the end of a line or field to the commencement of the next. ★ retour du spot → *retour 27.* R обратный ход. (723)

flying

1. **flying angle support** : → *support 10*

flying-spot

1. **flying-spot scanner** : → *scanner 1*
2. **flying-spot scanner tube** : → *tube 34*
3. **flying-spot telecine** : → *telecine 3*

flywheel

1. **flywheel synchronization circuit** : → *circuit 81*
2. **inertia storage vehicle (by a flywheel)** : → *vehicle 8*

FM

1. **FM** (*Syn.* frequency modulation) : → *modulation 20*

FMEA

1. **FMEA** (*Syn.* fault modes and effects analysis) : → *analysis 6*

FMECA

1. **FMECA** (*Syn.* fault modes, effects and criticality analysis) : → *analysis 7*

foamed

1. **foamed plastic** (*Syn.* cellular plastic) : → *plastic 2*

focal

1. **effective focal spot** : → *spot 2*
2. **focal line beam gun** : → *gun 5*
3. **focal point** : → *point 17*
4. **focal spot** : → *spot 4*
5. **focal spot** : → *spot 5*
6. **focal track** : → *track 7*

focus

1. **double focus tube** : → *tube 22*
2. **image focus voltage** : → *voltage 85*
3. **line focus tube** : → *tube 48*

focused

1. **focused grid** : → *grid 8*

focusing

1. **antipodal focussing** : ionospheric focussing observed in the vicinity of the antipodal point. ★ focalisation antipodale → *focalisation 4.* D antipodische Fokussierung. P ogniskowanie (jonosferyczne) na antypodach. (705)
2. **electrostatic focusing** : focusing of an electron beam by means of an electric field. ★ concentration électrostatique → *concentration 8.* R электростатическая фокусировка. D elektrostatische Fokussierung. E concentración electrostática. I focalizzazione elettrostatica. N elektrostatische focussering. P ogniskowanie elektryczne. S elektrostatisk fokusering. (531)
3. **focusing** : the process of controlling the convergence of an electron beam so that the minimum or optimum cross-section is obtained at a given point. ★ concentration → *concentration 3.* R фокусировка. D Fokussierung. E concentración. I focalizzazione. N focussering. P ogniskowanie. S fokusering. (531)
4. **focusing coil** : → *coil 22*
5. **focusing cup** : → *cup 1*
6. **focusing electrode** : → *electrode 62*
7. **focusing electrode** (*Syn.*) : →
8. **focusing lens** : → *lens 9*
9. **focusing magnet** : → *magnet 3*
10. **focusing reflector** : → *reflector 5*
11. **ionospheric focussing** : increase of the electromagnetic field received at a given point after ionospheric reflection, relative to the field which would be received at this point if the curvature of the ionosphere were negligible. ★ focalisation ionosphérique → *focalisation 5.* D ionosphärische Fokussierung. P ogniskowanie jonosferyczne. (705)
12. **(ionospheric) focussing factor** : → *factor 100*
13. **(ionospheric) horizon focussing** : ionospheric focussing occurring when the propagation paths are approximately tangential to the Earth at the transmission and reception points and which is due only to the curvature of the ionosphere and of the surface of the Earth. ★ focalisation (ionosphérique) à l'horizon → *focalisation 6.* D (ionosphärische) Fokussierung am Horizont. P ogniskowanie horyzontowe. (705)
14. **magnetic focusing** : focusing of an electron beam by means of a magnetic field. ★ concentration magnétique → *concentration 10.* R магнитная фокусировка. D magnetische Fokussierung. E concentración magnética. I focalizzazione magnetica. N magnetische focussering. P ogniskowanie magnetyczne. S magnetisk fokusering. (531)
15. **skip distance focussing** : ionospheric focussing observed in the vicinity of the skip distance. ★ focalisation à la distance de saut → *focalisation 3.* D Sprungentfernungs-Fokussierung. P ogniskowanie w odległości skokowej. (705)

fog

1. **fog** (of radiographic film) : the optical density of an unexposed radiographic film equal to the sum of the optical density of the film base and the density produced in the sensitive layer(s) by processing. ★ voile → *voile 2.* R вуаль (на радиографии). D Schleier (eines Röntgenfilmes). E velado (de una película radiográfica). I velo (di una pellicola radiografica). N ..... P zadymienie (błony). S slöja. (881)
2. **front fog light** : → *light 17*
3. **rear fog light** : → *light 56*

foil

1. **metal foil capacitor** : → *capacitor 47*

folded

1. **folded balun** : → *balun 2*
2. **folded dipole** : → *dipole 6*
3. **folded monopole (antenna)** : → *monopole 2*
4. **folded unipole (antenna)** (*Syn.* folded monopole (antenna)) : → *monopole 2*
5. **loaded folded dipole** : → *dipole 13*
6. **multiple folded dipole** : → *dipole 17*

foldover

1. **foldover distortion** (*Syn.* aliasing) : → *aliasing 1*

follow

1. **contact follow** : the further specified movement of the contact tips when making and after they have just touched and while they are travelling in the same direction as that of the moving contact member. ★ accompagnement d'un contact → *accompagnement 1.* R совместный ход контакта. D Kontaktmitgang. E acompañamiento de un contacto. I corsa di accompagnamento di un contatto. N contactmeeloop. P ..... S efterfjädring. (446)

follower

1. **grommet follower** : → *grommet 3*

following

1. **following level meter** : → *meter 22*

follow-on

1. **follow-on rate** : → *rate 39*

follow-on-call

1. **follow-on-call** : the setting up of a new connection by holding part of the selection chain established for the preceding connection. ★ reprise de numérotation → *reprise 3.* R повторный вызов. D Folgeanruf. E repetición de numeración. I chiamata a seguire. N ..... P połączenie wznowione. S följdanrop. (721)

follow-up

1. **follow-up control** : → *control 106*

fondamental

1. **new fondamental system for the determination of reference equivalents** : → *system 124*

foot

1. **foot** (*Syn.* footing) : a part of a tower at the limit between the body and the foundation (see fig. 3.30). ★ pied du pylône → *pied 5.* R пята опоры. D Mastfuß. E pata. I piede di sostegno. N mastpoot; mastvoet. P stopa (słupa). S stolpfot. (466)
2. **foot switch** : → *switch 20*

footing

1. **footing** (*Syn.* foot) : → *foot 1*
2. **separate footing foundations** : → *foundation 11*
3. **spread footing with pier** (*Syn.* pad and chimney foundation) : → *foundation 6*

footprint

1. **footprint of a beam** (of a satellite antenna) : the area on the surface of the Earth within which the antenna gain is greater than a specified value relative to its maximum gain. ★ empreinte d'un faisceau → *empreinte 3.* R след луча

(бортовой антенны спутника). D Ausleuchtzone (einer Satellitenantenne). E huella de un haz (de una antena de satélite). I zona di azione (dell'antenna di un satellite). N bedekkingsgebied. P ślad wiązki. S täckningsområde. (725)

forbidden

1. **forbidden band** : → *band 18*

force

1. **accelerating force** : that part of the force at the wheel rim available to accelerate the masses of the train in both longitudinal and rotary movement. ★ effort accélérateur → *effort 1.* R ускоряющая сила. D Beschleunigungskraft. E esfuerzo acelerador. I forza accelerante. N versnellingskracht; aanzetkracht. P siła przyspieszająca. S accelerationskraft. (811)
2. **actuating force** : the force applied to an actuator necessary to complete the intended operation. ★ effort de commande → *effort 3.* R усилие воздействия. D Betätigungskraft. E esfuerzo de mando. I forza di azionamento. N bedieningskracht. P siła napędowa. S manöverkraft. (441)
3. **actuating force** : that force which must be applied to the actuator, or auxiliary actuator to cause it to move from the free position to the operating position. ★ force de manœuvre → *force 11.* R усилие рабочее. D Betätigungskraft. E fuerza de maniobra. I forza di manovra. N bedieningskracht. P siła napędowa wstępna. S manöverkraft. (581)
4. **brake force** (*Syn.* braking force) : the retarding force exerted on a vehicle or train by its braking system. ★ effort de freinage → *effort 5.* R тормозная сила; тормозное усилие. D Bremskraft. E esfuerzo de frenado. I forza di frenatura. N remkracht. P siła hamowania. S bromskraft. (811)
5. **braking force** (*Syn.* brake force) : → *force 4*
6. **breakaway force** : maximum resistance immediately before all the train wheels begin to turn. ★ effort de décollage → *effort 4.* R сопротивление движению при трогании. D Losbrechkraft. E esfuerzo de arranque. I resistenza allo spunto. N lostrekkracht. P opór wstępny. S igångsättningsmotstånd. (811)
7. **conductor pull-out force** (*Syn.* conductor tensile force) : → *force 8*
8. **conductor tensile force** (*Syn.* conductor pull-out force) : the force required to destroy a termination by separating a conductor from its terminal end by exerting an axial pull. ★ force de traction d'un conducteur → *force 15.* R усилие отрыва проводника (растягивающее). D Leiter-Ausziehkraft. E fuerza de tracción de un conductor; fuerza de arranque de un conductor. I forza di strappo di un conduttore; forza di trazione di un conduttore. N treksterkte van de verbinding. P siła trzymania przewodu. S lossdragningskraft för ledare. (581)
9. **contact extraction force** : the axial force required to extract a removal contact from a component. ★ force d'extraction d'un contact → *force 16.* R усилие извлечения контактов. D Kontakt-Ausziehkraft. E fuerza de extracción de un contacto. I forza di estrazione di un contatto. N houdkracht van het contact. P siła wyrywania styku. S kontaktutdragningskraft. (581)
10. **contact force** : the force which two contact tips exert against each other in the closed position under specified conditions. ★ force de contact → *force 8.* R контактное нажатие. D Kontaktkraft. E fuerza de contacto. I forza di contatto. N contactkracht. P nacisk stykowy; docisk stykowy. S kontaktkraft. (446)
11. **contact force** : the normal force (90°) which exists between engaged contact surfaces. ★ force de contact → *force 9.* R давление контактное. D Kontaktkraft. E fuerza de contacto. I forza di contatto. N contactkracht. P nacisk stykowy; docisk zestykowy. S kontaktkraft. (581)
12. **Coulomb-Lorentz force** (F) : the force F exerted on a carrier having the charge Q and the velocity v in the electromagnetic field characterized by the vectors E and B, given by the relation:

$$F = Q[E + v \times B]$$

★ force de Coulomb-Lorentz → *force 10.* R сила Кулона-Лоренца. D Coulomb-Lorentz-Kraft. E fuerza de Coulomb-Lorentz. I forza di Coulomb-Lorentz. N Coulomb-Lorentzkracht. P siła Coulomba-Lorentza. S Coulomb-Lorentzkraft. (121)
13. **cymomotive force** (*Syn.* field strength-distance product) : → *product 3*
14. **decelerating force** (*Syn.* retarding force) : the force available to decelerate the masses of the train in both longitudinal and rotary movement. ★ effort décélérateur → *effort 9.* R замедляющая сила; тормозящая сила. D Verzögerungskraft. E esfuerzo decelerador. I forza decelerante. N vertragingskracht; remkracht. P siła zwolniająca. S retardationskraft. (811)
15. **differential force** : the difference between the actuating force and the release force. ★ force différentielle → *force 17.* R усилие дифференциальное. D Differenzkraft. E fuerza diferencial. I forza differenziale. N krachtsverschil. P siła różnicowa. S skillnadskraft. (581)
16. **direct-axis component of magnetomotive force** : → *component 18*
17. **electromotive force** (*Syn.* e.m.f. (abbreviation)) : the voltage at the terminals of the ideal voltage source in the representation of an active element. ★ force électromotrice → *force électromotrice 5.* R электродвижущая сила; э.д.с.. D elektromotorische Kraft; EMK. E fuerza electromotriz; fem (abreviatura). I forza elettromotrice; f.e.m. (abbreviazione). N elektromotorische kracht; emk. P siła elektromotoryczna; SEM. S elektromotorisk kraft; emk. (131)
18. **engaging or separating force** : the force required to engage fully or separate a pair of mating components including the effect of a coupling, locking or similar device. ★ force d'accouplement ou de désaccouplement → *force 5.* R усилие сочленения или расчленения. D Kupplungskraft. E fuerza de acoplamiento o de desacoplamiento. I forza di inserzione e di disinserzione. N maak- of verbreekkracht. P siła sprzęgania i rozprzęgania. S hop- eller särkopplingskraft för don. (581)
19. **holding brake force** : the braking force exerted by the holding brake to maintain constant speed while descending a gradient. ★ effort de retenue → *effort 7.* R сила подтормаживания. D Gefaellebremskraft. E esfuerzo de retención. I forza di trattenuta. N aanhoudende remkracht. P siła hamowania stabilizującego prędkość. S hållbromskraft. (811)
20. **insertion or withdrawal force** : the force required to fully insert or withdraw a set of mating components without the effect of a coupling, locking or similar device. ★ force d'insertion ou d'extraction → *force 18.* R усилие вставления или разъема. D Steck- oder Ziehkraft. E fuerza de introducción o de extracción. I forza d'inserzione (d'estrazione). N maak- of verbreekkracht. P siła wprowadzania i wyprowadzania. S inskjutnings- eller utdragningskraft för don. (581)
21. **magnetomotive force** (*Syn.* mmf (abbreviation)) (F) : the scalar line integral of the magnetic field strength along a closed path. *Note.* — It is equal to the total current linking that path. ★ force magnétomotrice → *force magnétomotrice 4.* R магнитодвижущая сила МДС. D magnetische Umlaufspannung; MMK. E fuerza magnetomotriz; f.m.m. I forza magnetomotrice. N magnetomotorische kracht. P siła magnetomotoryczna; SMM. S magnetomotorisk kraft. (121)
22. **(mechanical) force** (F) : a vector quantity equal to the time derivative of the linear momentum. *Note.* — When the mass is constant, the force is equal to the product of the mass of a body and its linear acceleration. ★ force (mécanique) → *force 20.* R сила (механическая). D (mechanische) Kraft. E fuerza (mecánica). I forza (meccanica). N (mechanische) kracht. P pęd (liniowy). S (mekanisk) kraft. (111)
23. **moment of a force** : → *moment 5*
24. **noise electromotive force** (*Syn.* equivalent noise voltage) : → *voltage 64*
25. **psophometric electromotive force** : the psophometric e. m. f. is twice the psophometric voltage which would be measured across a resistance of 600 Ω closing the telep hone circuit at the point of measurement either directly or by means of an ideal transformer adapting the image impedance of the circuit to 600 Ω, the other end of the circuit being closed by its image impedance. *Note.* — The psophometric e.m.f. permits the quantitative expression of the degree of interference that a disturbing e.m.f. from outside sources would have on a telephone conversation. ★ force électromotrice psophométrique → *force électromotrice 11.* R псофометрическая ЭДС. D psophometrische elektromotorische Kraft. E fuerza electromotriz sofométrica. I f.e.m. psofometrica. N psofometrische elektromotorische

kracht. P siła elektromotoryczna psofometryczna. S psofometrisk emk. (722)

26. **quadrature-axis component of magnetomotive force** : → *component 45*
27. **release force** : the value to which the actuating force must be reduced in order to permit the switch to return to its normal position after operation. ★ force de retour → *force 13.* R усилие отпускания. D Rückschaltkraft. E fuerza de retorno. I forza di rilascio. N retourkracht. P siła zwrotna. S frigöringskraft. (581)
28. **reset force** : that force which must be applied to the reset actuator, or auxiliary actuator, to cause it to move from its free position to the reset position. ★ force de remise à zéro → *force 12.* R усилие установки на арретир. D Rückstellkraft. E fuerza de puesta a cero. I forza di ripristino. N herstelkracht. P siła zwalniająca. S återställningskraft. (581)
29. **restoring force** : the force provided to restore an actuator or a contact element to its initial position. ★ effort de rappel → *effort 6.* R возвращающее усилие. D Rückstellkraft. E esfuerzo de retorno. I forza di richiamo. N herstelkracht. P siła powrotu. S återställningskraft. (441)
30. **retarding force** (*Syn.* decelerating force) : → *force 14*
31. **specific cymomotive force** (*Syn.* specific field strength-distance product) : → *product 9*
32. **stylus force** : the force exerted by a stylus tip on the groove of a disk. ★ force d'appui → *force 6.* R прижимная сила. D Auflagegewicht. E fuerza de apoyo. I forza di appoggio. N naaldkracht. P nacisk igły. S nålkraft. (806)
33. **total over-travel force** : the force necessary to move the actuator, or auxiliary actuator, from the free position to the total travelled position. ★ force de sur-course → *force 14.* R усилие полное. D Endbetätigungskraft. E fuerza de sobrecarrera. I forza a fine-corsa. N totale bedieningskracht. P siła napędowa. S kraft för överrörelse. (581)
34. **tripping force** : the force required to trip the return mechanism in an automatic record player. ★ force résistante du bras de lecture au déplacement horizontal → *force 22.* R сила расцепления. D Abschaltungskraft. E fuerza de disparo. I forza resistente del braccio di riproduzione allo spostamento orizzontale. N ontspankracht. P ..... S återgångskraft. (806)
35. **vertical force** : the vertical attractive or repulsive force between field and armature produced by electrodynamic reaction. ★ effort vertical → *effort 12.* R вертикальная сила. D Vertikalschub. E esfuerzo vertical. I forza verticale. N verticale kracht. P siła pionowa (odpychania lub przyciągania). S vertikal kraft. (811)
36. **zero insertion force component** : → *component 63*

forced

1. **forced air circulation system** : → *system 72*
2. **forced characteristic** : → *characteristic 41*
3. **forced circulation** : → *circulation 4*
4. **forced draught cooling tower** : → *tower 3*
5. **forced excitation** (*Syn.* constrained current operation) : → *operation 13*
6. **forced field** : → *field 44*
7. **forced lubricated bearing** : → *bearing 15*
8. **forced oscillation** : → *oscillation 3*
9. **forced release** : → *release 7*
10. **forced ventilation** : → *ventilation 2*
11. **thermal forced convection** : → *convection 3*

forced-outage

1. **forced outage** : outage due to the unscheduled putting out of service of an item. ★ indisponibilité fortuite → *indisponibilité 12.* R аварийный перерыв в работе. D störungsbedingte Nichtverfügbarkeit. E indisponibilidad fortuita; indisponibilidad por avería. I indisponibilità casuale; indisponibilità per avaria. N onvoorziene niet-beschikbaarheid. P odstawienie awaryjne. S oplanerat avbrott. (603)
2. **forced-outage duration** : → *duration 16*

force-ventilated

1. **force-ventilated motor** : → *motor 31*

fore

1. **fore hearth** : → *hearth 2*

fore-and-aft

1. **fore-and-aft oscillation** : → *oscillation 4*

forecast

1. **generation mix forecast** : an estimate of the composition of a generation system at a given future date. ★ prévision du parc de production → *prévision 5.* R прогноз структуры генерирующей мощности. D Kraftwerkspark-Prognose. E previsión del parque de generación. I previsione del parco di produzione. N voorspelling van het pakket produktie-eenheden. P prognoza wytwarzania. S produktionsprognos. (603)
2. **ionospheric forecast** (*Syn.* ionospheric prediction) : → *prediction 2*
3. **(ionospheric) propagation forecast** : the preparation of information on probable radio propagation conditions produced from ionospheric prediction. ★ prévision de propagation (ionosphérique) → *prévision 4.* D (ionosphärische) Ausbreitungsvorhersage. P prognoza propagacji jonosferycznej. (705)
4. **load forecast** : an estimate of the expected load of a network at a given future date. ★ prévision de charge → *prévision 2.* R прогноз нагрузки. D Lastprognose. E previsión de carga. I previsione di carico. N belastingsvoorspelling. P prognoza obciążenia. S belastningsprognos. (603)
5. **management forecast of a system** : the preparation and checking of the programmes for the generation of electricity, means of storage and release, including network diagram analysis for providing the most economic supply of expected loads with the necessary security within a given period of time, in a given system, all present and foreseeable circumstances being taken into account. ★ gestion prévisionnelle d'un réseau → *gestion 4.* R оперативное планирование работы энергосистемы. D Netzführungsplanung. E gestión previa de una red. I gestione di previsione di una rete. N bedrijfsvoeringsplan van een systeem. P prognoza kierowania systemem. S driftsprognos för elkraftsystem. (603)

foreign

1. **foreign exchange line** (*Syn.* out-of-area subscriber's line) : → *line 118*

fork

1. **fork** (*Syn.* "K" frame) : a component which is part of a top hamper of a tower and illustrated by figure 3.14. ★ fourche → *fourche 1.* R пора. D Gabel; K-Rahmen. E horquilla. I corno del delta. N vork. P ramiona; widełki. S gaffel. (466)
2. **tuning fork contact** : → *contact 116*

form

1. **d.c. form factor** : → *factor 35*
2. **form factor** : → *factor 80*
3. **form factor** : → *factor 81*
4. **form feed** : → *feed 12*
5. **panel form bias-cut fabric** : → *fabric 4*

formant

1. **formant** : of a complex sound, a range of frequencies in which there is a local maximum in the sound spectrum. *Note.* — The frequency at the maximum is the formant frequency. ★ formant → *formant 1.* R форманта. D Formant. E formante. I formante. N formant. P formant. S formant. (801)

format

1. **change of format** : → *change 1*
2. **format effector** : → *effector 1*
3. **packet format** : a set of rules governing the structure of control data in a packet and which defines the size and content of the various fields that make up the packet. ★ format de paquet → *format 3.* R формат пакета. D Paketformat. E formato de paquetes. I formato dei pacchetti. N ..... P format pakietu. S paketformat, (721)

formation

1. **flat formation** : the formation of a number of cables laid in a plane, usually with equal spacing between adjacent cables. ★ (disposition en) nappe → *disposition 5.* R расположение в одной плоскости. D ebene Anordnung.

E capa (disposicio'n en). I disposizione in piano. N ligging naast elkaar. P układ kabli płaski. S plan förläggning. (461)

2. **gas formation** : the process by which gas is evolved by an insulating liquid when subjected to high thermal and/or disruptive discharge conditions. ★ formation de gaz → *formation 2.* R газообразование. D Gasbildung. E formación de gas. I formazione di gas. N gasvorming. P wytwarzanie się gazu. S gasbildning. (212)
3. **trefoil formation** : the formation of three cables so laid as to be mutually equidistant. Viewed in cross-section, the lines joining the cable centres form an equilateral triangle. The formation is known as «close trefoil» formation when the cables are touching each other. ★ (disposition en) trèfle → *disposition 6.* R расположение треугольником. D Dreiecksanordnung. E tresbolillo (disposicio'n en). I trifoglio (disposizione a). N driehoeksligging. P układ trójkątowy w ("trefl"); układ trójkątowy trójkątowy (w przekroju poprzecznym). S triangelförläggning. (461)

formula

1. **cost formula** : → *cost 8*

Fortescue

1. **Fortescue components** (*Syn.* symmetrical components) : → *component 57*

fortuitous

1. **fortuitous distortion** : → *distortion 39*

forward

1. **fast forward movement** : → *movement 2*
2. **feed forward control** : → *control 99*
3. **forward** : pertaining to signals or operations propagating in the same direction as the call set-up. ★ en avant → *en avant 1.* R прямой. D Vorwaerts-. E hacia adelante. I in avanti. N gelijkgericht; voorwaarts. P w przód. S framåtgående. (714)
4. **forward blocking state** (*Syn.* off-state) : → *off-state 7*
5. **forward breakdown** : → *breakdown 13*
6. **forward busying** : → *busying 2*
7. **forward channel** : → *channel 26*
8. **forward clearing** : → *clearing 6*
9. **forward current** : → *current 90*
10. **forward direction** : → *direction 11*
11. **forward direction** : → *direction 12*
12. **forward direction** : → *direction 13*
13. **forward hold** : → *hold 2*
14. **forward loss** : → *loss 30*
15. **forward loss** : → *loss 31*
16. **forward path** : → *path 6*
17. **forward recovery time** : → *time 64*
18. **forward scattering** : → *scattering 11*
19. **forward seizure** (*Syn.* forward busying) : → *busying 2*
20. **forward set-up** : → *set-up 3*
21. **forward signal** : → *signal 92*
22. **forward slope resistance** : → *resistance 24*
23. **forward switching signal** : → *signal 93*
24. **forward voltage** : → *voltage 71*
25. **forward wavefront** : → *wavefront 2*
26. **peak forward anode voltage** : → *voltage 138*
27. **small-signal short-circuit forward current transfer ratio** : → *ratio 92*
28. **static forward current transfer ratio** : → *ratio 96*
29. **store and forward switched network** (*Syn.* message switching network) : → *network 41*

forward-transfer

1. **forward-transfer signal** : → *signal 94*

forward-wave

1. **forward wave** : a wave in which the group and phase velocities have the same sign. ★ onde directe → *onde 64.* R прямая волна. D Vorwärtswelle. E onda directa. I onda diretta. N voorwaartse golf. P fala postępująca. S framåtvåg. (101)
2. **forward-wave tube** : → *tube 35*

FOT

1. **FOT** (*Syn.* optimum working frequency) : → *frequency 141*

fouet

1. **coup de fouet** : → *coup 1*

foundation

1. **block foundation** : a foundation consisting of a single block of concrete, into which the leg(s) of the support or anchor bolts are embedded. ★ fondation massive → *fondation 7.* R монолитный фундамент. D Einblockgründung. E cimentación monobloque. I fondazione a blocco unico. N blokfundament. P fundament blokowy. S blockfundament. (466)
2. **chimney (of a foundation)** : → *chimney 1*
3. **cleat (in a pad and chimney foundation)** : → *cleat 1*
4. **foundation** : a structure set in the ground, to which the base of a support is attached to provide the necessary anchorage to withstand all applied loads. ★ fondation → *fondation 5.* R фундамент. D Gründung. E cimentación. I fondazione. N fundament. P fundament. S fundament. (466)
5. **grillage foundation** : a type of foundation in which the tower or the stub is connected to a lattice work buried in the ground. ★ fondation à grille → *fondation 6.* R ростверковый фундамент. D Schwellengründung. E cimentación de parrilla. I fondazione a griglia. N roosterfundament. P fundament rusztowy. S stålbocksfundament. (466)
6. **pad and chimney foundation** (*Syn.* spread footing with pier (USA)) : a foundation consisting of a bottom pad anchoring it to the surrounding soil and of a narrower chimney ensuring proper connection with the stub or anchor bolts of the support (see fig. 4). ★ fondations à dalle et cheminée → *fondation 10.* R грибовидный фундамент. D Pilzgründung. E cimentación de zapata y pilar. I fondazione a platea e pilastrino. N plaat-en-poerfundament. P fundament stopowy obeliskowy. S fundament med platta och plint. (466)
7. **pad (of a foundation)** : → *pad 9*
8. **pier (of a foundation)** (*Syn.* chimney (of a foundation)) : → *chimney 1*
9. **pile foundation** : a long slender foundation installed without excavation. ★ fondation profonde → *fondation 9.* R свайный фундамент. D Pfahlgründung. E pilote. I fondazione profonda; palo di fondazione. N paalfundering. P fundament palowy. S pålfundament. (466)
10. **reinforcing rods (in a pad and chimney foundation)** : → *rod 13*
11. **separate footing foundations** : foundation specifically designed to withstand the loads transmitted by each leg of a support. ★ fondations à pieds séparés → *fondation 11.* R раздельные фундаменты. D aufgeteilte Gründung. E cimentaciones de patas separadas. I fondazione a piedini separati. N afzonderlijke fundamenten. P fundamenty dzielone stopowe. S separata fundament. (466)

four-conductor

1. **four-conductor bundle** (*Syn.* quad bundle) : → *bundle 6*

four-frequency

1. **four-frequency duplex telegraphy** : → *telegraphy 6*

Fourier

1. **Fourier integral** : → *integral 1*
2. **Fourier series** : → *series 3*
3. **Fourier transform** : → *transform 1*
4. **inverse Fourier transform** (*Syn.* Fourier integral) : → *integral 1*

four-phase

1. **4-phase (voltage) source** : → *voltage source 11*

four-switch

1. **four-switch mesh substation with mesh opening disconnectors** : → *substation 6*
2. **four-switch substation** : → *substation 7*

four-wire

1. **four-wire switching** : → *switching 22*

fovea

1. **fovea** (*Syn.* fovea centralis) : central part of the retina, thin and depressed, which contains almost exclusively cones and forming the site of most distinct vision. *Note.* — The fovea subtends an angle of about 0.026 rad (1.5°) in the visual field. ★ fovea → *fovea 1.* R фовеа. D Netzhautgrube; Fovea centralis. E fóvea. I fovea. N fovea; netvlieskuiltje. P dołek środkowy; fovea centralis. S fovea; centralgropen. (845)

fovea centralis

1. **fovea centralis** (*Syn.* fovea) : → *fovea 1*

foveola

1. **foveola** : central region of the fovea which contains only cones. *Note.* — The foveola subtends an angle of about 0.017 rad (1°) in the visual field. ★ foveola → *foveola 1.* R центральная ямка фовеи; фовеала. D Foveola. E foveola. I foveola. N foveola. P środkowa część żółtej plamki. S foveola. (845)

fractile

1. **p-fractile** : qualifies a value obtained as the p-fractile of the distribution of a random variable. ★ fractile d'ordre p de... → *fractile 1.* R П - квантиль. D Quantil. E ... cuantil-p de...; ... cuantil de orden-p de.... I p-frattile. N p-fractiel. P kwantyl rzędu p. S p-fraktil. (191)
2. **p-fractile access delay (of a communication)** : → *delay 31*
3. **p-fractile administrative delay** : → *delay 32*
4. **p-fractile logistic delay** : → *delay 33*
5. **p-fractile repair time** : → *time 129*

fraction

1. **burn-up fraction** : → *burn-up 2*
2. **delayed neutron fraction** : → *neutron 1*
3. **downward flux fraction** (of a luminaire) : ratio of the downward flux to the total flux of the luminaire. ★ fraction de flux (hémisphérique) inférieur → *fraction 1.* R доля потока в нижней полусфере (светильника). D unterer halbräumlicher Lichtstromanteil (einer Leuchte). E factor de flujo hemiesférico inferior de luminarias. I frazione del flusso emisferico inferiore. N neerwaarts lichtstroomaandeel. P ..... S nedåtriktat ljusflödes relativa andel. (845)
4. **effective delayed neutron fraction** : → *neutron 4*
5. **packing fraction** (of a fibre bundle) : in a fibre bundle, the ratio of the aggregate fibre cross-sectional core area to the total cross-sectional area (usually within the ferrule) including cladding and interstitial areas. ★ facteur de remplissage → *facteur 149.* R упаковочный коэффициент (жгута волокон). D Packungsdichte (in einem Faserbündel). E factor de relleno (de un mazo de fibras). I frazione d'impacchettamento (di un fascio di fibre). N pakkingsdichtheid (van een vezelbundel). P współczynnik upakowania. S kärnandel i fiberknippe. (731)
6. **prompt neutron fraction** : the ratio of the mean number of prompt neutrons per fission to the mean total number of neutrons (prompt plus delayed) per fission. ★ fraction de neutrons instantanés → *fraction de neutron 2.* D Anteil der prompten Neutronen. E fracción de neutrones instantáneos. I frazione di neutroni istantanei. N fractie prompte neutronen. P udział neutronów natychmiastowych. S relativt antal prompta neutroner. (026)

fractional

1. **fractional counting loss** : → *loss 32*
2. **fractional horsepower motor** : → *motor 32*
3. **fractional slot winding** : → *winding 29*
4. **power spectral density of fractional frequency deviations** : → *density 21*
5. **symmetrical fractional slot winding** : → *winding 80*

fractionation

1. **dose fractionation** : a method of administration of radiation in which the absorbed dose is divided into two or more fractions separated in time. ★ fractionnement de dose → *fractionnement 1.* R фракционирование дозы. D (Dosis-)Fraktionierung. E fraccionamiento de dosis. I frazionamento della dose. N fractionering van de dosis. P frakcjonowanie dawki. S dosfraktionering. (881)

fragment

1. **fission fragments** : nuclei resulting from fission and possessing kinetic energy acquired from that fission. ★ fragments de fission → *fragment 1.* R осколки деления. D Spaltbruchstücke. E fragmentos de fisión. I frammenti di fissione. N splijtingsbrokken; splijtingsfragmenten. P fragmenty rozszczepienia. S klyvningsfragment; fissionsfragment. (026,391)

frame

1. **"A" frame** (*Syn.* "A" pole) : → *pole 1*
2. **box frame** : a stator frame in the form of a box with ends and sides and which encloses the stator core. ★ carcasse fermée → *carcasse 5.* R коробчатый корпус. D Kastengehäuse. E armazón cerrado. I carcassa chiusa. N gesloten statorhuis. P kadłub skrzynkowy. S lådformig stomme. (411)
3. **bunched frame alignment signal** : → *signal 31*
4. **caption frame** : a mounting specially designed for televising captions or documents. ★ banc-titre → *banc-titre 1.* R ..... (723)
5. **combined distribution frame** : a distribution frame, usually in a small exchange, combining the functions of a main distribution frame and an intermediate distribution frame. ★ répartiteur mixte → *répartiteur 12.* R смешанный кросс. D kombinierter Verteiler. E repartidor mixto. I ripartitore a funzione mista. N ..... P przełącznica mieszana. S kombinationsstativ. (714)
6. **digital distribution frame** : a distribution frame for channels and circuits carrying digital signals. *Note.* — A digital distribution frame may be qualified to indicate the digit rate. ★ répartiteur numérique → *répartiteur 13.* R распределительная точка переключения цифровых каналов. D digitales Verteilerraster. E repartidor numérico. I ripartitore numerico. N ..... P przełącznica cyfrowa. S digitalt kopplingsstativ. (704)
7. **distributed frame alignment signal** : → *signal 75*
8. **distribution frame** : a structure or equipment providing flexibility of semi-permanent interconnection of channels, circuits or equipment by terminating them and providing means for connecting them together in any required manner. *Notes. 1* — A distribution frame permits any interconnection of subscribers' lines and line terminals, multiplex, switching, signalling and other equipment. The interconnections may be changed as required from time to time. *2* — Examples of the technology used for the interconnections are wires, U-links and plugs and sockets, all of which are set up and rearranged manually, and electromagnetic or electronic switches which can be operated locally or remotely. ★ répartiteur → *répartiteur 2.* R распределительная точка переключения; распределительный щит. D Verteiler. E repartidor. I ripartitore. N verdeler. P przełącznica. S kopplingsstativ. (702,704,714)
9. **end-shift frame** : a stator frame so constructed that it can be moved along the axis of the machine shaft for purposes of inspection. ★ carcasse coulissante → *carcasse 4.* R сдвигающийся корпус. D verschiebbares Gehäuse. E armazón deslizante. I carcassa a spostamento assiale. N verschuifbaar statorhuis. P kadłub wysuwany. S förskjutbar stomme. (411)
10. **Epstein test frame** (*Syn.* Epstein square) : → *square 2*
11. **frame** (*Syn.* chassis) : → *chassis 1*
12. **frame** (in TDM) : a repetitive set of consecutive time-slots constituting a complete cycle of a signal or of another process in which the relative position of each time-slot in the cycle can be identified. ★ trame → *trame 20.* R цикл (при временном разделении каналов). D (Zeit-)Raster (in TDM). E trama (en transmisión numérica). I trama (nella multiplazione a divisione di tempo). N ..... P ramka (w?? transmisji cyfrowej). S ram. (704,721)
13. **frame** (in switching) : a complete cycle of scanning or polling during which all the devices in a group are inspected. ★ trame → *trame 21.* R цикл (в коммутации). D Rahmen. E trama (en conmutación). I trama. N cyclus; raster. P ramka (w komutacji). S ram; frågecykel. (714)
14. **frame** (*Syn.* complete picture) : the ensemble of scanning lines which correspond to the complete exploration of a picture, including fly-back. *Note.* — In some English Speaking Countries the term "frame" is used to mean a subdivision of the complete television picture, i.e. a field as defined in this chapter. ★ image (complète) → *image 17.* R кадр. (723)

15. **frame** : a structure supporting the poles and fixed windings of a rotating electrical machine. ★ carcasse → *carcasse 1.* R станина. D Gehäuse. E carcasa. I carcassa. N statorhuis. P korpus; obudowa. S stomme. (811)
16. **frame alignment** : → *alignment 4*
17. **frame alignment recovery time** : → *time 65*
18. **frame alignment signal** : → *signal 95*
19. **frame alignment time-slot** : → *time-slot 3*
20. **frame bounce** : → *bounce 3*
21. **frame duration** (*Syn.* frame time) : → *time 66*
22. **frame frequency** : → *frequency 40*
23. **frame leakage protection system** : → *system 73*
24. **frame length** : → *length 16*
25. **frame period** : → *period 11*
26. **frame pulses** (*Syn.* edit pulses) : → *pulse 9*
27. **frame slip** : → *slip 2*
28. **frame start** : → *start 3*
29. **frame time** : → *time 66*
30. **frame yoke** : → *yoke 2*
31. **group distribution frame** : a distribution frame for channels and circuits carrying basic groups. *Note.* — Similar definitions may be given for : "supergroup distribution frame", "mastergroup distribution frame", "supermastergroup distribution frame" and "15-supergroup assembly distribution frame" or "hypergroup distribution frame". ★ répartiteur de groupes primaires → *répartiteur 6.* R стойка переключения первичных групп. D Primärgruppen-Verteiler. E repartidor de grupos primarios. I ripartitore di gruppo primario. N groepverdelerrek. P przełącznica grup pierwotnych. S gruppstativ. (704)
32. **"H" frame** (*Syn.* portal support) : → *support 16*
33. **high-frequency repeater distribution frame** (*Syn.* HFRDF (abbreviation)) : a distribution frame in a repeater station for channels and circuits carrying basic groups, basic supergroups, etc. *Note.* — Wherever possible, the use of the appropriate special terms is recommended. ★ répartiteur de groupes (à courants porteurs) → *répartiteur 5.* R стойка ВЧ переключения. D Hochfrequenzverstärkerverteiler; HFVVT (Abkürzung). E repartidor de grupos (de corrientes portadoras). I ripartitore di alta frequenza. N hoogfrequentversterker-verdelerrek. P przełącznica liniowa. S högfrekvensstativ. (704)
34. **intermediate distribution frame** : a distribution frame between units of switching and/or transmission equipment in an exchange. ★ répartiteur intermédiaire → *répartiteur 11.* R промежуточный кросс. D Zwischenverteiler. E repartidor intermedio. I ripartitore intermedio. N tussenverdeler. P przełącznica pośrednia. S mellankopplingsstativ. (714)
35. **"K" frame** (*Syn.* fork) : → *fork 1*
36. **laminated frame** : a stator frame formed from laminations clamped, bolted or riveted together with or without additional strengthening plates. ★ carcasse feuilletée → *carcasse 6.* R шихтованный корпус. D geblechtes Gehäuse. E armazón de perfiles. I carcassa laminata. N zelfdragend statorpakket. P kadłub składany. S laminerad stomme. (411)
37. **laminated frame** : a frame whose parts are made up of laminations giving magnetic continuity but insulated electrically from each other. ★ carcasse feuilletée → *carcasse 7.* R шихтованная станина. D geblechtes Gehäuse. E carcasa laminada. I carcassa laminata. N gelamineerd statorhuis. P korpus pakietowany. S laminerad stator. (811)
38. **main distribution frame** : a distribution frame to which are connected on one side the lines external to the exchange, and on the other side the internal cabling of the exchange inlets and outlets. ★ répartiteur principal → *répartiteur 14.* R главный кросс. D Hauptverteiler. E repartidor principal; repartidor de entrada. I permutatore. N hoofdverdeler. P przełącznica główna. S korskopplingsstativ. (714,722)
39. **pivot support frame** : steel frame on which pivots for the tilting cradle are mounted. ★ cadre support de pivots → *cadre 8.* R опорная рама для крепления наклоняющегося каркаса. D Kipplagergestell. E bastidor soporte de pivotes. I supporto dei perni di basculamento. N draaggestel van een kipstoel. P rama wsporcza (kołyski przechyłowej). S tippram. (841)
40. **repeater distribution frame** (*Syn.* RDF (abbreviation)) : a distribution frame in a repeater station for interconnecting voice-frequency and signalling channels and circuits, with or without repeaters. ★ répartiteur de voies → *répartiteur 9.* R стойка распределения каналов ТЧ. D Verstärkerverteiler; VVT (Abkürzung). E repartidor de vías; repartidor de baja frecuencia. I ripartitore di bassa frequenza; ripartitore a frequenze vocali. N versterkerrekverdeler. P przełącznica (stacji wzmacniakowej). S överdragsstativ. (704)
41. **resistor frame** (*Syn.* resistor case) : → *case 7*
42. **rotatable frame** : a stator frame which can be rotated by a limited amount about the axis of the machine shaft. ★ carcasse orientable → *carcasse 9.* R поворачивающийся корпус. D drehbares Gehäuse. E armazón orientable. I carcassa orientabile. N draaibaar statorhuis. P kadłub obracalny. S roterbar stomme. (411)
43. **skeleton frame** : a stator frame consisting of a simple structure which clamps the core but does not enclose it. ★ carcasse ajourée → *carcasse 3.* R корпус машины открытого исполнения. D Gehäusegestell. E armazón aligerado. I carcassa a giorno. N open statorhuis. P kadłub szkieletowy. S ribbad stomme. (411)
44. **solid frame** : a one-piece casting or forging, or a fabricated assembly, forming an electrically and magnetically continuous frame. ★ carcasse massive → *carcasse 8.* R неразъемная станина. D Massivgehäuse. E carcasa maciza. I carcassa massiccia. N massief statorhuis. P korpus lity. S massiv stomme. (811)
45. **stator frame** : the supporting structure holding the stator core or core assembly. ★ carcasse stator → *carcasse 10.* R корпус статора. D Ständergehäuse. E armazón del estator; carcasa del estator. I carcassa di statore. N statorhuis. P kadłub stojana. S statorstomme. (411)
46. **still frame** : picture derived from one or more fields, which is stored and which replaces the normal moving picture for a certain period. ★ image figée → *image 23.* R неподвижный кадр. (723)

frame-mounted

1. **frame-mounted motor** : → *motor 33*

framing

1. **framing** : the correct positioning of the area swept by the scanning spot in the picture signal source or display. ★ cadrage → *cadrage 1.* R кадрирование. (723)
2. **freeze framing** (*Syn.* still framing) : an automatic repetition of a single picture. ★ arrêt sur image → *arrêt 5.* R стоп-кадр. D Standbild. E parada de imagen. I immagine fissa. N enkel beeld. P zatrzymanie obrazu; stopklatka. S fryst bild; stillastående bild. (806)
3. **incorrect framing** : incorrect positioning of the area swept by the scanning spot relative to the specified frame of the picture signal source or display. ★ décadrage → *décadrage 1.* R неправильное кадрирование. (723)
4. **still framing** (*Syn.* freeze framing) : → *framing 2*

Francis

1. **Francis turbine** : → *turbine 3*

Franklin

1. **Franklin antenna** : → *antenna 54*

Fraunhofer

1. **Fraunhofer diffraction pattern** (*Syn.* far-field diffraction pattern) : → *pattern 7*
2. **Fraunhofer region** : → *region 7*

free

1. **carrier free** : a preparation of a radionuclide which is essentially free from stable nuclides of the element in question. ★ sans entraîneur → *entraîneur 2.* R свободный от носителя. D trägerfrei. E sin portador. I carrier-free. N dragervrij. P wolny nośnik. S bärarfri. (881)
2. **connect when free** (*Syn.* camp-on) : → *camp-on 1*
3. **exposure in free air** : → *exposure 7*
4. **free** : pertaining to a traffic-carrying device that is not being used but is available for use. ★ libre → *libre 19.* R свободный. D frei. E libre. I disponibile; libero. N vrij. P wolny. S ledig. (714)
5. **free** : pertaning to a resource that is not being used, but is available for use. ★ libre → *libre 20.* D frei. P wolny. (715)
6. **free air ionization chamber** : → *ionization chamber 12*

7. **free capacitance** : → *capacitance 8*
8. **free circuit condition** : → *condition 9*
9. **free connector** : → *connector 27*
10. **free coupler connector** : → *connector 28*
11. **free current operation** : → *operation 24*
12. **free electron** : → *electron 22*
13. **free impedance** : → *impedance 17*
14. **free line selection** (*Syn.* PBX hunting) : → *hunting 6*
15. **free oscillation** : → *oscillation 5*
16. **free oscillation** : → *oscillation 6*
17. **free position** : → *position 10*
18. **free progressive wave** (*Syn.* free wave) : → *wave 16*
19. **free sound field** : → *sound field 3*
20. **free space propagation** : → *propagation 8*
21. **free state** (*Syn.* idle state) : → *state 20*
22. **free time** (*Syn.* idle time) : → *time 76*
23. **free wave** : → *wave 16*
24. **Gibbs free energy** : → *energy 51*
25. **hands free (telephone) set** : → *set 22*
26. **loss relative to free space** : → *loss 56*

free path

1. **mean free path** : the average distance that particles of a specified type travel before a specified type (or types) of interaction in a given medium. The mean free path may thus be specified for all interactions (i.e. total mean free path) or for particular types of interaction such as scattering, capture, or ionization. ★ libre parcours moyen → *libre parcours 1.* D mittlere freie Weglänge. E recorrido libre medio. I percorso libero medio. N gemiddelde vrije weglengte. P średnia droga swobodna. S fri medelväglängd. (026)
2. **mean free path** : the average distance travelled by a particle between two successive collisions with other particles. ★ libre parcours moyen → *libre parcours 2.* R средняя длина свободного пробега. D mittlere freie Weglänge. E recorrido libre medio. I percorso libero medio. N gemiddelde vrije weglengte. P droga swobodna średnia. S medelfriväg. (111,881)
3. **mean free path** : in an enclosure, distance travelled by sound waves between two successive reflections, on the average of a large number of reflections and for all initial directions of propagation. ★ libre parcours moyen → *libre parcours 3.* R средний свободный пробег. D mittlere freie Weglänge. E recorrido libre medio. I cammino libero medio. N gemiddelde vrije weglengte. P długość swobodna średnia. S fri medelväglängd. (801)
4. **transport mean free path** : the reciprocal of the macroscopic transport cross-section. ★ libre parcours moyen de transport → *libre parcours 4.* D Transportweglänge. E recorrido libre medio de transporte. I percorso libero medio di trasporto. N gemiddelde vrije weglengte voor transport. P średnia droga swobodna transportu. S fri transportmedelväglängd. (026)

free-field

1. **free-field current sensitivity** : → *sensitivity 10*
2. **free-field room** : → *room 8*
3. **free-field sensitivity** : → *sensitivity 11*

free-running

1. **free-running time base** : → *base 18*

free-space

1. **free-space basic transmission loss** : → *loss 33*

free-wheeling

1. **free-wheeling arm** : → *arm 8*

freeze

1. **freeze framing** : → *framing 2*

freeze-update

1. **freeze-update** (*Syn.* strobe effect) : → *effect 81*

freezing

1. **freezing current** : → *current 93*
2. **freezing point** (*Syn.* solidification point) : the temperature at which a chemically pure substance changes from liquid to solid state at a given pressure. ★ point de congélation → *point 16.* R точка замерзания; точка затвердевания. D Erstarrungspunkt (Gefrierpunkt). E punto de congelación; punto de solidifación. I punto di congelamento; punto di solidificazione. N stolpunt. P temperatura krzepnięcia. S fryspunkt; stelningspunkt. (841)

frequency

1. **(absolute) frequency deviation** : the greatest difference between the instantaneous frequency of the frequency modulated wave and the average frequency. ★ excursion (absolue) de fréquence → *excursion 1.* R девиация частоты (абсолютная). D (absoluter) Frequenzhub. E desviación de frecuencia (absoluta). I deviazione (assoluta) di frequenza. N frequentiezwaai (absolute). P dewiacja częstotliwości. S absolut frekvensdeviation. (303)
2. **absorption (frequency) band** : → *band 2*
3. **absorption frequency meter** : → *meter 1*
4. **adjustment frequency** : the frequency to which an oscillator must be adjusted, under a particular combination of operating conditions, in order to meet the frequency tolerance specification over the specified range of operating conditions i.e., Adjustment Frequency = Nominal Frequency + Frequency Offset. ★ fréquence d'ajustage → *fréquence 67.* R частота настройки. D Abgleichfrequenz. E frecuencia de ajuste. I frequenza d'aggiustaggio. N afregelfrequentie. P częstotliwość pracy (generatora). S justerfrekvens. (561)
5. **amplitude/frequency characteristic** : → *characteristic 3*
6. **amplitude/frequency distortion** : → *distortion 3*
7. **angular frequency** : the product of the frequency of a sinusoidal quantity and the factor 2π rad. ★ pulsation → *pulsation 2.* R круговая частота; угловая частота. D Kreisfrequenz; Winkelfrequenz. E pulsación. I pulsazione. N cirkelfrequentie; pulsatie. P pulsacja; częstotliwość kątowa. S vinkelfrekvens. (101)
8. **anti-resonance frequency** (f_a) : the higher of the two frequencies of a piezoelectric resonator vibrating alone under specified conditions, at which the electrical impedance of the resonator is resistive. ★ fréquence d'antirésonance → *fréquence 68.* R антирезонансная частота. D Antiresonanzfrequenz. E frecuencia de antirresonancia. I frequenza di antirisonanza. N antiresonantiefrequentie. P częstotliwość antyrezonansowa. S antiresonansfrekvens. (561)
9. **antisymmetric frequency of a monolithic bipole vibrator** : the highest resonance frequency of a monolithic bipole vibrator whose output terminals are short-circuited. ★ fréquence antisymétrique d'un vibrateur monolithique à deux pôles → *fréquence 56.* R антисимметричная частота монолитного двухполюсного вибратора. D antisymmetrische Frequenz eines monolithischen Zweikreisvibrators. E frecuencia antisimétrica de un vibrador monolítico bipolar. I frequenza antisimmetrica di un vibratore monolitico a due poli. N antisymmetrische frequentie van een tweepolige resonator. P częstotliwość antysymetryczna (wibratora dwubiegunowego monolitycznego o). S högsta resonansfrekvens. (561)
10. **attenuation/frequency distortion** (*Syn.* amplitude/frequency distortion) : → *distortion 3*
11. **audio frequency** (*Syn.* AF (abbreviation)) : any frequency corresponding to a sinusoidal sound wave audible to the normal human ear. *Note.* — The audio frequency range of the normal human ear is generally considered to extend from about 16 Hz to about 16 kHz. ★ audiofréquence → *audiofréquence 1.* R звуковая частота. D Audiofrequenz; AF (Abkürzung). E audiofrecuencia; frecuencia audible; AF (abreviatura). I audiofrequenza; frequenza audio. N audiofrequentie; AF. P częstotliwość akustyczna. S tonfrekvens. (702)
12. **barrier frequency** (*Syn.* cut-off frequency) : → *frequency 28*
13. **beat frequency** : the difference between the frequencies of the two beating oscillations. ★ fréquence de battement → *fréquence 72.* R частота биений. D Schwebungsfrequenz. E frecuencia de batido. I frequenza di battimento. N zwevingsfrequentie. P częstotliwość dudnienia. S svävningsfrekvens. (101)
14. **blanketing frequency** (of an ionospheric layer) : that frequency below which a radio wave fails to penetrate vertically a certain ionospheric layer, and above which the wave may reach a higher ionospheric layer where it may be subject to ionospheric reflection. ★ fréquence d'occultation → *fréquence 105.*

D Abdeckungsfrequenz (einer Ionosphärenschicht); Abdeckfrequenz (einer Ionosphärenschicht). P częstotliwość osłony (warstwy jonosferycznej). (705)

15. **carrier frequencies** (in multichannel carrier transmission) : the specified frequencies of the carriers used for effecting modulation and demodulation in frequency translating equipments. ★ fréquences porteuses → *fréquence 135.* R несущие частоты (в многоканальной системе передачи). D Trägerfrequenzen (in Mehrkanalträgerfrequenzübertragung). E frecuencias portadoras (en transmisión de corrientes portadoras). I frequenze portanti; frequenze vettrici. N draaggolffrequenties (bij meervoudige draaggolftransmissie). P częstotliwości nośne (w transmisji nośnej wielokanałowej). S bär(vågs)frekvenser. (704)
16. **carrier frequency shift** : → *shift 6*
17. **cavity frequency meter** : → *meter 15*
18. **channel carrier frequencies** : a specified set of carrier frequencies used by channel translating equipment for the frequency translation of channels. ★ fréquences porteuses de voie → *fréquence 137.* R индивидуальные несущие частоты. D Kanal-Trägerfrequenzen. E frecuencias portadoras de vías. I frequenze portanti di canale. N kanaaldraaggolffrequenties. P częstotliwości nośne kanałowe. S kanalbärfrekvenser. (704)
19. **collision frequency** (electronic) : the average number of collisions of a free electron with the other particles of an ionized medium or a plasma during a given time interval divided by the duration of this time interval. ★ fréquence des chocs → *fréquence 101.* D (elektronische) Stoßfrequenz. P częstotliwość kolizji (elektronowej). (705)
20. **combination frequency** (*Syn.* combination tone) : the frequency of an intermodulation product. *Note.* — The combination frequencies are given by the formulas : $f = p f_1 + q f_2 + \ldots$ where p, q, ... are positive, negative or zero integers and f_1, f_2 ... are the frequencies of spectral components of the input signal or signals. ★ fréquence de combinaison → *fréquence 73.* R комбинационная частота. D Kombinationsfrequenz; Kombinationston. E frecuencia de combinación. I frequenza di combinazione. N combinatiefrequentie. P częstotliwość kombinacyjna; ton kombinacyjny. S kombinationsfrekvens. (702)
21. **commutator type frequency convertor** : → *convertor 6*
22. **complex angular frequency** : a complex quantity $s = \sigma + j\omega$ associated with a quantity represented by $a = \hat{A}.e^{\sigma t}.\cos(\omega t + \alpha)$. ★ pulsation complexe → *pulsation 3.* R комплексная круговая (угловая) частота. D komplexe Kreisfrequenz. E pulsación compleja. I pulsazione complessa. N complexe cirkelfrequentie. P pulsacja zespolona. S komplex vinkelfrekvens. (101)
23. **critical flicker frequency** (*Syn.* fusion frequency) : → *frequency 108*
24. **critical frequency** : the highest frequency at which a radio wave undergoes reflection in an ionospheric layer on which it is incident vertically ; there is usually one such frequency for each magneto-ionic component. *Notes 1* — The critical frequency for the ordinary wave is the plasma frequency corresponding to the maximum electron density of the layer. *2* — The critical frequencies for the ordinary wave and the extraordinary wave are respectively represented by the symbols f_0 and f_x, followed by the designation of the layer, for example : f_0F2. ★ fréquence critique → *fréquence 62.* D Senkrecht-Grenzfrequenz; kritische Frequenz. P częstotliwość krytyczna. (705)
25. **critical frequency** (of a mode in a waveguide) (*Syn.* mode cut-off frequency) : that frequency in a given lossless waveguide, below which a travelling wave in a particular mode of propagation cannot exist. ★ fréquence critique → *fréquence 63.* R критическая частота (типа колебаний в волноводе); предельная частота типа колебаний. D Grenzfrequenz (eines Modes im Wellenleiter). E frecuencia de corte (de un modo en una guíaonda). I frequenza critica (di un modo una guida d'onda); frequenza di taglio di modo; ampiezza normalizzata. N kritische frequentie. P częstotliwość krytyczna (rodzaju pola w falowodzie). S gränsfrekvens för vågledarmod. (726)
26. **cut-off frequency** : a frequency of a pass-band or stop-band at which the attenuation reaches a specified value. ★ fréquence de coupure → *fréquence 74.* R граничная (критическая) частота. D Grenzfrequenz. E frecuencia de corte. I frequenza di taglio. N afsnijfrequentie. P częstotliwość graniczna. S gränsfrekvens. (151,561)
27. **cut-off frequency** : the frequency at which the magnitude of a measured characteristic quantity has decreased to a specified fraction of its low-frequency value. *Note.* — For a transistor, the cut-off frequency usually applies to the small-signal short-circuit forward current transfer ratio for either the common-base or common-emitter configuration. ★ fréquence de coupure → *fréquence 75.* R граничная частота. D Grenzfrequenz. E frecuencia de corte. I frequenza di taglio. N afsnijfrequentie. P częstotliwość odcięcia. S gränsfrekvens. (521)
28. **cut-off frequency** (*Syn.* barrier frequency) : the lowest frequency above which a radio wave is able to penetrate an ionospheric layer at the angle of incidence required to establish transmission between specified points by reflection from a higher layer. *Note.* — In the case of vertical incidence, the cut-off frequency is also called the blanketing frequency. ★ fréquence de coupure → *fréquence 77.* D Grenzfrequenz. P częstotliwość odcięcia; częstotliwość graniczna. (705)
29. **cut-off frequency (for a mode)** : the frequency above or below which guided propagation in a particular electromagnetic mode cannot exist. ★ fréquence de coupure → *fréquence 76.* D Grenzfrequenz (eines Modes). P częstotliwość odcięcia (dla propagacji prowadzonej). (705)
30. **cyclotron frequency** (*Syn.* gyro-frequency) : → *gyro-frequency 2*
31. **damped natural frequency** (*Syn.* pseudo frequency) : frequency of free oscillation of a damped linear system. ★ fréquence propre avec amortissement → *fréquence 127.* R собственная частота при затухании. D gedämpfte Eigenfrequenz. E frecuencia propia amortiguada; pseudofrecuencia. I frequenza propria di un sistema smorzato. N gedempte eigenfrequentie. P częstotliwość własna tłumiona. S dämpad egenfrekvens. (801)
32. **delay/frequency characteristic** : → *characteristic 31*
33. **dot frequency** : a) Half the number of contiguous picture elements transmitted in a second by a facsimile transmitter. b) Fundamental frequency of the signal representing in facsimile alternately black and white picture elements along a scanning line. ★ fréquence de points → *fréquence 87.* R частота точек. D Punktfrequenz. E frecuencia de puntos. I segnale di messa in fase. N puntfrequentie. P częstotliwość szachownicy. S punktfrekvens. (721)
34. **dual frequency motor vehicle** : → *vehicle 5*
35. **(electronic) frequency convertor** : → *convertor 20*
36. **elementary frequency** : the reciprocal of the elementary period. ★ fréquence élémentaire → *fréquence 108.* R частота повторяемости. D Taktfrequenz. E frecuencia elemental. I frequenza elementare. N elementaire frequentie. P częstotliwość podstawowa. S grundfrekvens. (551)
37. **fading frequency** (*Syn.* fading rate) : → *rate 34*
38. **field frequency** : the number of fields scanned per second. ★ fréquence de trame → *fréquence 98.* R частота полей. (723)
39. **fixed frequency convertor** : → *convertor 23*
40. **frame frequency** (*Syn.* picture frequency) : the number of complete pictures scanned per second. *Note.* — In some English Speaking Countries the term "frame frequency" is used to mean the number of fields per second. ★ fréquence d'image → *fréquence 104.* R частота кадров. (723)
41. **frequency** : the reciprocal of the period. ★ fréquence → *fréquence 55.* R частота. D Frequenz. E frecuencia. I frequenza. N frequentie. P częstotliwość. S frekvens. (101)
42. **frequency adjustment range** : → *range 26*
43. **frequency band** : → *band 19*
44. **frequency band** : → *band 20*
45. **(frequency) bandwidth** : → *bandwidth 6*
46. **frequency changer** (*Syn.* frequency convertor) : → *convertor 25*
47. **frequency changer** : → *changer 4*
48. **frequency changer** (*Syn.* frequency convertor) : → *convertor 26*
49. **frequency changer set** : → *set 18*
50. **(frequency) channel** : → *channel 27*
51. **frequency comparison pilot** : → *pilot 1*

52. **frequency control** : → *control 107*
53. **frequency converter** (*Syn.* frequency changer) : → *changer 4*
54. **frequency converter substation** : → *substation 8*
55. **frequency converter tube** : → *tube 36*
56. **frequency convertor** : → *convertor 25*
57. **frequency convertor** : → *convertor 26*
58. **frequency demodulation** : → *demodulation 5*
59. **frequency departure** : → *departure 1*
60. **frequency deviation** : → *deviation 8*
61. **frequency discriminator** : → *discriminator 7*
62. **frequency divider** : → *divider 3*
63. **frequency division** : → *division 3*
64. **frequency division multiplexing** : → *multiplexing 3*
65. **frequency division switching** : → *switching 23*
66. **frequency drift** : → *drift 8*
67. **frequency independent antenna** : → *antenna 55*
68. **frequency interval** : → *interval 6*
69. **frequency inversion** : → *inversion 5*
70. **frequency meter** : → *meter 23*
71. **frequency modulated signal generator** : → *generator 15*
72. **frequency modulation** : → *modulation 19*
73. **frequency modulation** : → *modulation 20*
74. **frequency modulation distortion** : → *distortion 40*
75. **frequency multiplier** : → *multiplier 2*
76. **frequency of unity current transfer ratio** : → *ratio 40*
77. **frequency offset** : → *offset 2*
78. **frequency offset** : → *offset 3*
79. **frequency offset** : → *offset 4*
80. **frequency pulling** : → *pulling 1*
81. **frequency push-button dial** (*Syn.* multifrequency key pad) : → *pad 6*
82. **frequency pushing** : → *pushing 1*
83. **frequency range** : → *range 27*
84. **frequency range** : → *range 28*
85. **frequency record** : → *record 1*
86. **frequency reduction** : → *reduction 3*
87. **frequency relay** : → *relay 13*
88. **frequency selective fading** : → *fading 11*
89. **frequency shift** : → *shift 12*
90. **frequency shift** : → *shift 13*
91. **frequency shift keying** : → *keying 3*
92. **frequency shift keying** (*Syn.* frequency shift telegraphy) : → *telegraphy 7*
93. **frequency shift modulation** (*Syn.* frequency shift keying) : → *keying 3*
94. **frequency shift signalling** (*Syn.* frequency shift keying) : → *keying 3*
95. **frequency shift telegraphy** : → *telegraphy 7*
96. **frequency slope** : → *slope 2*
97. **frequency swing** (*Syn.* peak-to-peak (frequency) deviation) : → *deviation 14*
98. **frequency synthesizer** : → *synthesizer 1*
99. **frequency tape** : → *tape 4*
100. **frequency tolerance** : → *tolerance 8*
101. **frequency tolerance (due to ageing)** : → *tolerance 9*
102. **frequency tolerance (due to variations in level of drive)** : → *tolerance 10*
103. **frequency tolerance (over a temperature range)** : → *tolerance 11*
104. **frequency translation** : → *translation 2*
105. **frequency tuning range** : → *range 30*
106. **frequency tuning range** : → *range 31*
107. **fundamental frequency** : *a)* frequency of the sinusoidal component of a periodic quantity that has the same period as the periodic quantity. *b)* lowest natural frequency of an oscillatory system. ★ fréquence fondamentale → *fréquence 109.* R основная частота. D Grundtonfrequenz. E frecuencia fundamental. I frequenza fondamentale. N grondfrequentie. P częstotliwość podstawowa. S grundfrekvens. (561,801)
108. **fusion frequency** (for a given set of conditions) (*Syn.* critical flicker frequency) : frequency of alternation of stimuli above which flicker is not perceptible. ★ fréquence de fusion → *fréquence 82.* R частота слияния мельканий. D Verschmelzungsfrequenz (bei gegebenen Bedingungen). E frecuencia de fusión. I frequenza critica di sfarfallamento. N flikkerfusiefrequentie. P częstotliwość zanikowa; częstotliwość migotania krytyczna. S frekvensgräns för flimmer. (161,845)
109. **group carrier frequencies** : a specified set of carrier frequencies used by group translating equipment for the frequency translation of groups. *Note.* — Similar definitions can be given for "supergroup carrier frequencies", "mastergroup carrier frequencies", "supermastergroup carrier frequencies" and "15-supergroup assembly carrier frequencies" or "hypergroup carrier frequencies". ★ fréquences porteuses de groupe primaire → *fréquence 136.* R несущие частоты первичных групп. D Primärgruppenträgerfrequenzen. E frecuencias portadoras de grupo primario. I frequenze portanti di gruppo. N groepdraaggolffrequenties. P częstotliwości nośne grupowe. S gruppbärfrekvenser. (704)
110. **group delay/frequency distortion** : → *distortion 43*
111. **high frequency** : a frequency higher than 10kHz and lower than or equal to 300 MHz. ★ haute fréquence → *fréquence 143.* R высокая частота. D Hochfrequenz. E alta frecuencia. I alta frequenza. N hoge frequentie. P częstotliwość wielka. S högfrekvens. (841)
112. **high frequency capacitance (of a capacitor)** : → *capacitance 9*
113. **high frequency ignition** : → *ignition 1*
114. **horizontal sweep frequency** (*Syn.* line frequency) : → *frequency 122*
115. **induction frequency convertor** : → *convertor 30*
116. **inductor frequency convertor** : → *convertor 31*
117. **instantaneous frequency (of a signal)** : the time derivative of the phase of a signal, divided by 2π. ★ fréquence instantanée → *fréquence 112.* R мгновенная частота (сигнала). D Momentanfrequenz (eines Signals). E frecuencia instantánea (de una señal). I frequenza istantanea (di un segnale). N ogenbliksfrequentie (van een signaal). P częstotliwość chwilowa sygnału. S momentan frekvens. (702)
118. **(instantaneous) frequency deviation** : → *deviation 9*
119. **intermediate frequency rejection ratio** : → *ratio 43*
120. **ISM frequency band** : → *band 24*
121. **junction frequency** : the frequency at which the traces seen on an oblique incidence ionogram corresponding to the low-angle ray and to the high-angle ray respectively, for a given mode of propagation, merge together. ★ fréquence de jonction → *fréquence 83.* D ..... P częstotliwość łączna. (705)
122. **line frequency** (*Syn.* horizontal sweep frequency) : number of scanning lines traversed during one second. ★ fréquence de ligne → *fréquence 85.* R частота строк. (723)
123. **load resonance frequency** (f_L) : one of the two frequencies of a piezoelectric resonator in association with a series or with a parallel load capacitance under specified conditions, at which the electrical impedance of the combination is resistive. ★ fréquence de résonance avec capacité de charge → *fréquence 94.* R резонансная частота резонатора под нагрузкой. D Lastresonanzfrequenz. E frecuencia de resonancia con capacidad de carga. I frequenza di risonanza con capacità di carico. N resonantiefrequentie bij capacitieve belasting. P częstotliwość rezonansowa rezonatora obciążonego pojemnościowo. S lastresonansfrekvens. (561)
124. **logarithmic frequency interval** : → *interval 12*
125. **low frequency** : a frequency lower than or equal to 60 Hz. ★ basse fréquence → *fréquence 9.* R низкая частота. D Niederfrequenz. E baja frecuencia. I bassa frequenza. N lage frequentie. P częstotliwość mała. S lågfrekvens. (841)
126. **lowest useful frequency** (*Syn.* LUF (abbreviation)) : the lowest frequency that would permit acceptable performance of a radio circuit by signal propagation via the ionosphere between given terminals below the ionosphere at a given time, under specified working conditions. *Notes. 1* — Acceptable performance may for example be quoted in terms of maximum error ratio or required signal/noise ratio. *2* — Specified working conditions may include such factors as antenna types, transmitter power, class of emission and required information rate. ★ fréquence minimale utilisable → *fréquence 114.* D niedrigste nutzbare Frequenz; LUF (Abkürzung). P częstotliwość użyteczna najmniejsza; LUF. (705)

127. **mains frequency** : the frequency of the a.c. public supply, usually 50 or 60 Hz. ★ fréquence du réseau → *fréquence 107.* R промышленная частота. D Netzfrequenz. E frecuencia de la red. I frequenza di rete. N netfrequentie. P częstotliwość sieciowa. S nätfrekvens. (841)

128. **maximum observed frequency** (*Syn.* MOF (abbreviation)) : the highest frequency at which ionospheric propagation is observed during oblique incidence ionospheric sounding between two given points. ★ fréquence maximale observée → *fréquence 113.* D maximale beobachtete Frequenz; MOF (Abkürzung). P częstotliwość obserwowana największa. (705)

129. **medium frequency** : a frequency higher than 60 Hz and lower than or equal to 10kHz. ★ moyenne fréquence → *fréquence 154.* R повышенная частота. D Mittelfrequenz. E media frecuencia. I media frequenza. N middenfrequentie. P częstotliwość średnia. S medelfrekvens. (841)

130. **mid-band frequency** (of a band-pass or band-stop filter) : the geometric mean of the cut-off frequencies limiting a single pass band or a single stop band. *Note.* — In practice, the arithmetic mean is often used as a good approximation to the geometric mean for piezoelectric filters with relatively narrow pass bands or stop bands. ★ fréquence centrale → *fréquence 61.* R средняя частота (полосно-пропускающего или полосно-задерживающего фильтра). D Mittenfrequenz (eines Bandpass- oder Bandsperrfilters). E frecuencia central (de un filtro pasabanda o de un filtro de corte de banda). I frequenza centrale (di un filtro passa-banda o di un filtro passa-alto o di un filtro passa-basso). N centrale frequentie (van een banddoorlaat- of bandonderdrukkings filter). P częstotliwość środkowa (pasma przepustowego lub pasma tłumieniowego). S bandmittfrekvens. (561)

131. **minimum (phase frequency) shift keying** : → *keying 5*

132. mixed high frequencies (obsolete) : the high frequency parts of the spectrum occupied by the primary colour signals which are suppressed in the chrominance signals. ★ hautes fréquences achromes → *fréquence 144.* R смесь высоких частот (устар.). (723)

133. **mode cut-off frequency** (*Syn.* critical frequency) : → *frequency 25*

134. **natural frequency** (in a cavity resonator) : any frequency at which free oscillation can exist in a cavity resonator when the excitation has been removed. *Note.* — The natural frequency may be expressed as a complex number, the logarithmic decrement due to losses constituting the imaginary part thereof. ★ fréquence propre → *fréquence 125.* R собственная частота (в объемном резонаторе). D Eigenfrequenz (in einem Hohlraumresonator). E frecuencia propia (de una cavidad). I frequenza propria (di una cavità). N eigenfrequentie (in een trilholte). P częstotliwość drgań swobodnych (w rezonatorze). S egenfrekvens. (702,726)

135. **natural frequency** : frequency of free oscillation of a system. For a multiple-degree-of-freedom system, the natural frequencies are the frequencies of the normal modes of vibration. ★ fréquence propre → *fréquence 126.* R собственная частота системы. D Eigenfrequenz. E frecuencia propia. I frequenza propria. N eigenfrequentie. P częstotliwość własna. S egenfrekvens. (801)

136. **n-condition frequency shift keying** : → *keying 7*

137. **nominal frequency** (of a piezoelectric resonator) : the frequency used to identify the piezoelectric resonator. ★ fréquence nominale → *fréquence 116.* R номинальная частота (пьезоэлектрического резонатора). D Nennfrequenz (eines piezoelektrischen Resonators). E frecuencia nominal (de un resonador piezoeléctrico). I frequenza nominale (di un risuonatore piezoelettrico). N nominale frequentie. P częstotliwość znamionowa (rezonatora piezoelektrycznego). S nominell frekvens. (561)

138. **nominal frequency** (of a piezoelectric filter) : the frequency used to identify the piezoelectric filter. ★ fréquence nominale → *fréquence 117.* R номинальная частота (пьезоэлектрического фильтра). D Nennfrequenz (eines piezoelektrischen Filters). E frecuencia nominal (de un filtro piezoeléctrico). I frequenza nominale (di un filtro piezoelettrico). N nominale frequentie. P częstotliwość znamionowa (filtru). S nominell frekvens. (561)

139. **nominal frequency** (of a crystal controlled oscillator) : the frequency used to identify the crystal controlled oscillator. ★ fréquence nominale → *fréquence 118.* R номинальная частота (кварцевого генератора). D Nennfrequenz (eines Quarz-Oszillator). E frecuencia nominal (de un oscilador controlado por resonador de cuarzo). I frequenza nominale (di un oscillatore comandato da risuonatore a quarzo). N nominale frequentie. P częstotliwość znamionowa (generatora kwarcowego). S nominell frekvens. (561)

140. **normalised frequency** (*Syn. V* number) (*V*) : in an optical fibre a dimensionless quantity, denoted by *V*, given by

$$V = \frac{2\pi a}{\lambda}(n_1^2 - n_2^2)^{1/2}$$

where : a is the fibre core radius, λ is wavelength in vacuum, and n_1 and n_2 are the maximum refractive index in the core and refractive index of the innermost homogenous cladding, respectively. ★ fréquence normée → *fréquence 120.* R нормализованная частота. D normierte Frequenz; V-Nummer. E frecuencia normalizada; número V. I frequenza normalizzata. N genormeerde frequentie; V-getal. P częstotliwość znormalizowana. S normaliserad frekvens. (731)

141. **optimum working frequency** (*Syn.* OWF (abbreviation); FOT (abbreviation)) : the frequency that is exceeded by the operational MUF, at a given time, during 90 % of a specified period, usually a month. ★ fréquence optimale de travail → *fréquence 121.* D günstigste Verkehrsfrequenz; OWF (Abkürzung). P częstotliwość robocza optymalna; FOT. (705)

142. **overall frequency tolerance** : → *tolerance 12*

143. **overtone frequency** : a higher order of frequency than the fundamental of given mode of vibration. ★ fréquence partielle → *fréquence 123.* R частота гармоники. D Obertonfrequenz. E frecuencia armónica. I frequenza armonica. N frequentie van de boventoon. P częstotliwość nadpodstawowa. S övertonsfrekvens. (561)

144. **parallel resonance frequency** (f_p) : the frequency where the admittance value of a lossless resonator becomes zero. *Note.* — When the electromechanical coupling factor is low, an approximate value of this frequency is given by the expression :

$$f_p = \frac{1}{2\pi\sqrt{L_1 \dfrac{C_1 C_0}{C_1 + C_0}}}$$

where C_0 represents the shunt capacitance and L_1 and C_1 the motional inductance and capacitance respectively. ★ fréquence de résonance parallèle → *fréquence 95.* R частота параллельного резонанса. D Parallelfrequenz. E frecuencia de resonancia paralelo. I frequenza di risonanza parallelo. N parallelle resonantiefrequentie. P częstotliwość rezonansu równoległego. S parallellresonansfrekvens. (561)

145. **phase/frequency characteristic** : → *characteristic 64*

146. **phase/frequency distortion** : → *distortion 59*

147. **picture frequency** (*Syn.* frame frequency) : → *frequency 40*

148. **plasma frequency** (electronic) : the oscillation frequency at which a plasma, locally disturbed by an excess or deplection of electrons, reverts to its macroscopic state of neutral equilibrium, supposing that the ions remain fixed in position. *Note.* — The plasma frequency f_p is given by the equation :

$$f_p = \frac{e}{2\pi}\sqrt{\frac{n_e}{m\,\varepsilon_0}}$$

where e is the electron charge, m is the electron mass, n_e is the electron density, ε_0 is the electric constant. ★ fréquence de plasma → *fréquence 86.* D (elektronische) Plasmafrequenz. P częstotliwość plazmy (elektronowej). (705)

149. **power frequency** : conventionally, the values of frequency used in the electricity supply systems. ★ fréquence industrielle → *fréquence 110.* R промышленная частота. D Netzfrequenz. E frecuencia industrial. I frequenza industriale. N netfrequentie. P częstotliwość sieciowa. S kraftfrekvens. (601)

150. **power/frequency characteristic** (*Syn.* regulating energy of a system) : → *energy 71*

151. **power/frequency control** : → *control 140*

152. **power frequency recovery voltage** : → *recovery voltage 2*

153. **power frequency withstand voltage** : → *voltage 144*

154. power spectral density of fractional frequency deviations : → *density 21*

155. pseudo frequency (*Syn.* damped natural frequency) : → *frequency 31*

156. pulse frequency control : → *control 149*

157. pulse frequency modulation : → *modulation 52*

158. pulse repetition frequency (*Syn.* PRF (abbreviation); pulse repetition rate) : the number of pulses in a pulse train divided by the duration of the train. ★ fréquence de répétition → *fréquence 89.* R частота повторения импульсов. D Impulsfolgefrequenz; IFF (Abkürzung); Impulswiederholrate. E frecuencia de repetición (de impulsos). I frequenza di ripetizione (di impulsi). N pulsherhalingsfrequentie. P częstotliwość powtarzania impulsów. S pulsfrekvens. (702)

159. radio frequency (*Syn.* RF (abbreviation)) : the frequency of a periodic radio wave or of the corresponding electrical oscillation. ★ radiofréquence → *radiofréquence 2.* R радиочастота. D Funkfrequenz; Radiofrequenz; RF (Abkürzung). E radiofrecuencia; frecuencia radioeléctrica; RF (abreviatura). I radiofrequenza. N radiofrequentie; RF. P częstotliwość radiowa. S radiofrekvens. (702)

160. radio (frequency) disturbance : → *disturbance 13*

161. radio frequency heating apparatus : → *apparatus 12*

162. radio frequency interference : → *interference 19*

163. radio (frequency) noise : → *noise 65*

164. radio frequency vision signal : → *signal 153*

165. rated frequency : the frequency at which the transformer or reactor is designed to operate. ★ fréquence assignée → *fréquence 57.* R номинальная частота. D Bemessungsfrequenz. E frecuencia asignada. I frequenza nominale. N toegekende frequentie. P częstotliwość znamionowa. S märkfrekvens. (421)

166. rated frequency : the frequency of the supply mains in Hertz (Hz) specified by the manufacturer for the normal usage of a generator, and the accessory or associated equipment. ★ fréquence nominale → *fréquence 119.* R номинальная частота. D Nennfrequenz. E frecuencia asignada. I frequenza nominale. N toegekende frequentie. P częstotliwość znamionowa. S märkfrekvens. (881)

167. rated frequency of a capacitor : the frequency for which the capacitor has been designed. ★ fréquence assignée d'un condensateur → *fréquence 58.* R номинальная частота конденсатора. D Nennfrequenz eines Kondensators. E frecuencia asignada de un condensador. I frequenza nominale di un condensatore. N toegekende frequentie van een condensator. P częstotliwość znamionowa kondensatora. S märkfrekvens. (436)

168. recording/reproducing overall amplitude/frequency response : → *response 10*

169. relative differential limen of frequency : → *limen 3*

170. relative frequency spacing : → *spacing 4*

171. reproducing electrical amplitude/frequency response : → *response 11*

172. resistive cut-off frequency : the frequency at which the real part of the diode admittance at its terminals is zero, at a specified bias point. ★ fréquence de coupure résistive → *fréquence 80.* R предельная резистивная частота. D Entdämpfungsfrequenz. E frecuencia de corte resistiva. I frequenza di taglio resistiva. N resistieve afsnijfrequentie. P częstotliwość graniczna rezystywnościowa. S resistiv gränsfrekvens. (521)

173. resonance frequency (f_r) : the lower of the two frequencies of a piezoelectric resonator vibrating alone under specified conditions, at which the electrical impedance of the resonator is resistive. ★ fréquence de résonance → *fréquence 91.* R резонансная частота. D Resonanzfrequenz. E frecuencia de resonancia. I frequenza di risonanza. N resonantiefrequentie. P częstotliwość rezonansowa. S resonansfrekvens. (561)

174. resonance frequency (in a cavity resonator) : in a cavity resonator the real part of the natural frequency of a particular mode of resonance. ★ fréquence de résonance → *fréquence 92.* R резонансная частота (в объемном резонаторе). D Resonanzfrequenz (in einem Hohlraumresonator). E frecuencia de resonancia (de una cavidad). I frequenza di risonanza (di una cavità). N resonantiefrequentie. P częstotliwość rezonansowa (w rezonatorze). S resonansfrekvens. (726)

175. resonance frequency : frequency at which resonance exists. *Note.* — In case of possible confusion, the type of resonance must be indicated; for example velocity resonance frequency. ★ fréquence de résonance → *fréquence 93.* R резонансная частота. D Resonanzfrequenz. E frecuencia de resonancia. I frequenza di risonanza. N resonantiefrequentie. P częstotliwość rezonansowa. S resonansfrekvens. (801)

176. rest frequency : the frequency of either one of the two colour subcarriers in the SECAM colour television system when unmodulated. ★ fréquence de repos → *fréquence 90.* R частота покоя. (723)

177. sampling frequency (*Syn.* sampling rate) : → *rate 84*

178. scanning line frequency : the number of scanning line periods per unit of time. *Note.* — With drum apparatus the scanning line frequency is equal to the drum rotation speed in revolutions per unit of time. ★ fréquence de ligne → *fréquence 84.* R частота строк. D Zeilenabtastfrequenz. E frecuencia de línea. I frequenza di scansionamento di riga. N lijnaftastfrequentie. P częstotliwość rozwinięcia linii. S linjefrekvens. (721)

179. self-neutralization frequency : the frequency at which the transfer admittance (internal feed-back) of the tube is a minimum. ★ fréquence d'autoneutrodynage → *fréquence 69.* R частота самонейтрализации. D Selbstneutralisationsfrequenz. E frecuencia de autoneutralización. I frequenza di autoneutralizzazione. N eigenneutralisatiefrequentie. P częstotliwość samoneutralizacji. S frekvens för självneutralisering. (531)

180. series resonance frequency (f_s) : the frequency defined by the formula

$$f_s = \frac{1}{2\pi\sqrt{L_1 C_1}}$$

where L_1 and C_1 represent the motional inductance and capacitance respectively. ★ fréquence de résonance série → *fréquence 96.* R частота последовательного резонанса. D Serienfrequenz. E frecuencia de resonancia serie. I frequenza di risonanza serie. N serieresonantiefrequentie. P częstotliwość rezonansu szeregowego. S serieresonansfrekvens. (561)

181. short-term frequency stability : → *stability 12*

182. spurious response frequency : the frequency of an electromagnetic disturbance at which an unintended response from a given equipment may be obtained. *Note.* — In the case of a receiver tuned to frequency f_o, many spurious response frequencies f_S may be found from the following formulae :

$$f_s = \frac{1}{m}(nf_L \pm f_I)$$

or

$$f_s = \frac{f_o}{h}$$

Where : f_L = local oscillator frequency, f_I = intermediate frequency, m, n, h = integers. ★ fréquence parasite → *fréquence 122.* R побочная частота приёма. D Störanregungsfrequenz. E frecuencia parásita; frecuencia de respuesta no esencial. I frequenza di risposta spuria. N parasitaire responsiefrequentie. P częstotliwość pasożytnicza. S falskfrekvens. (161)

183. standard tuning frequency (*Syn.* standard musical pitch) : frequency, for the note A in the treble stave, of 440 Hz.(ISO Standard 16-1975). ★ fréquence d'accord normale → *fréquence 66.* R стандартная частота настройки. D Stimmtonfrequenz. E frecuencia normal de afirmación; frecuencia musical normal. I frequenza normale d'accordo. N standaardfrequentie van de stemtoon. P częstotliwość strojeniowa normowa; A strojeniowe. S normaltonsfrekvens. (801)

184. sub-telephone frequency : a frequency below a specified telephone frequency band. ★ fréquence infra-téléphonique → *fréquence 111.* R подтелефонная частота. D Subfernsprechfrequenz. E frecuencia infratelefónica. I frequenza in banda subtelefonica. N frequentie onder de telefonieband. P częstotliwość podtelefoniczna. S infratelefonfrekvens. (722)

185. super-telephone frequency : a frequency above a specified telephone frequency band. ★ fréquence supra-téléphonique → *fréquence 130.* R надтелефонная частота.

D Superfernsprechfrequenz. E frecuencia supratelefónica. I frequenza in banda sovratelefonica. N frequentie boven de telefonieband. P częstotliwość nadtelefoniczna. S ultratelefonfrekvens. (722)

186. **symmetric frequency of a monolithic bipole vibrator** : the lowest resonance frequency of a monolithic bipole vibrator whose output terminals are short-circuited. ★ fréquence symétrique d'un vibrateur monolithique à deux pôles → *fréquence 131.* R симметричная частота монолитного двухполюсного вибратора. D symmetrische Frequenz eines monolithischen Zweipols. E frecuencia simétrica de un vibrador monolítico bipolar. I frequenza simmetrica di un vibratore monolitico a due poli. N symmetrische frequentie van een tweepolige monolytische resonator. P częstotliwość symetryczna (wibratora dwubiegunowego monolitycznego). S lägsta resonansfrekvens. (561)

187. **(telecommunication) frequency spectrum** : → *spectrum 39*

188. **telephone frequency** : a frequency essential for a telephone conversation of commercial quality. *Note.* — The telephone frequency band is usually between 300 and 3 400 Hz. ★ fréquence téléphonique → *fréquence 132.* R телефонная частота. D Fernsprechfrequenz. E frecuencia telefónica. I frequenza in banda telefonica. N frequentie in de telefonieband. P częstotliwość telefoniczna. S telefonfrekvens. (722)

189. **threshold frequency** : the frequency of the incident radiant energy below which there is essentially no photoelectric effect. ★ seuil de fréquence → *seuil 16.* R пороговая частота. D Grenzfrequenz. E umbral de frecuencia. I soglia di frequenza. N drempelfrequentie. P częstotliwość progowa. S tröskelfrekvens. (531)

190. **transition frequency** (f_T) : the product of the modulus of the common emitter small-signal short-circuit forward current transfer ratio $|h_{21e}|$ and the frequency of measurement, this frequency being so chosen that $|h_{21e}|$ is decreasing at a slope of approximately 6 dB per octave. ★ fréquence de transition → *fréquence 99.* R граничная частота. D Transitfrequenz. E frecuencia de transición. I frequenza di transizione. N afsnijfrequentie. P częstotliwość przejścia. S extrapolerad enhetsgränsfrekvens. (521)

191. **transmission frequency meter** : → *meter 67*

192. **undamped natural frequency** : frequency of free oscillation resulting from only elastic and inertial forces of the system. ★ fréquence propre sans amortissement → *fréquence 128.* R собственная частота без затухания. D ungedämpfte Eigenfrequenz. E frecuencia propia no amortiguada. I frequenza propria non smorzata. N ongedempte eigenfrequentie. P częstotliwość własna nietłumiona. S odämpad egenfrekvens. (801)

193. **variable frequency convertor** : → *convertor 45*

194. **video frequency** : a frequency in the frequency band containing the spectral components of a picture signal in television. ★ vidéofréquence → *vidéofréquence 2.* R видеочастота. D Videofrequenz. E videofrecuencia; VF (abreviatura). I videofrequenza; frequenza video. N videofrequentie; VF. P częstotliwość wizyjna. S videofrekvens. (702)

195. **(waveguide) cut-off frequency** : that frequency below which the dominant mode cannot exist in a given uniform waveguide. ★ fréquence de coupure de guide (d'ondes) → *fréquence 78.* R частота среза (в волноводе). D Grenzfrequenz des Wellenleiters. E frecuencia de corte (de una guíaonda). I frequenza di taglio di una guida (d'onda). N (golfgeleider)afsnijfrequentie. P częstotliwość krytyczna (w falowodzie). S gränsfrekvens för vågledare. (726)

196. **working frequency** (f_w) : the frequency of vibration of a piezoelectric resonator with its associated circuits in the intended state of resonance. ★ fréquence de fonctionnement → *fréquence 81.* R рабочая частота. D Arbeitsfrequenz. E frecuencia de trabajo. I frequenza di funzionamento. N werkfrequentie. P częstotliwość pracy (rezonatora piezoelektrycznego). S arbetsfrekvens. (561)

197. **X-ray tube exposure frequency** : the ratio of the number of X-ray tube exposures to the duration of a regular series. *Note.* — The term "X-raytube exposure rate" should not be used. ★ cadence de pose → *cadence 3.* R частота включений рентгеновской трубки. D Belastungsfrequenz (der Röntgenröhre). E frecuencia de exposición de un tubo de rayos X. I frequenza delle esposizioni (di un tubo a raggi X). N röntgenbuisbelastings-frequentie. P częstotliwość ekspozycji. S exponeringsfrekvens. (881)

frequency/load

1. **frequency/load coefficient** : → *coefficient 23*

frequency/voltage

1. **frequency/voltage coefficient** : → *coefficient 24*

frequency-multiplication

1. **semiconductor frequency-multiplication diode** : → *diode 18*

frequency-response

1. **frequency response** : for a linear system, the ratio of the Fourier transform of the output signal to the Fourier transform of the corresponding input signal. *Note.* — The frequency response coincides with the transfer function taken on the imaginary axis of the complex plane. ★ réponse harmonique → *réponse 32.* R амплитудно-фазовая характеристика частотная характеристика. D Frequenzgang. E respuesta en frecuencia; respuesta armónica. I risposta armonica. N frequentieresponsie. P transmitancja widmowa. S frekvensfunktion. (351)

2. **frequency response** (*Syn.* frequency response characteristic) : a function equal to the ratio of Fourier transforms of corresponding signals at output and input of a linear and time-invariant two-port device. *Note.* — The frequency response of a two-port device equals the ratio of the Laplace transforms of output and input signals for the purely imaginary values of the complex frequency, the variable of Laplace transform. It is then the Fourier transform of the unit pulse response of the two-port device. ★ fonction de transfert isochrone → *fonction 29.* R частотная характеристика. D Frequenzverhalten; Frequenzcharakteristik. E función de transferencia isócrona; transmitancia isócrona. I risposta in frequenza. N frequentieresponsie. P transmitancja izochroniczna. S frekvensfunktion. (702)

3. **frequency response** (*Syn.* transfer function) : → *function 34*

4. **frequency response characteristic** (*Syn.* frequency response) : → *frequency-response 2*

5. **frequency-response characteristic** (*Syn.* Bode diagram) : → *diagram 2*

6. **frequency-response characteristic** : → *characteristic 44*

7. **frequency-response characteristic** : → *characteristic 45*

8. **open-loop frequency response** : product of the frequency responses of the forward path and of the feedback path. *Note.* — The open-loop gain and the open-loop phase angle are respectively the absolute value and the argument of the open-loop frequency response. ★ transmittance isochrone en boucle ouverte → *transmittance 5.* R амплитудно-фазовая характеристика разомкнутой системы. D Frequenzgang des aufgeschnittenen Kreises. E respuesta en frecuencia en bucle abierto. I risposta armonica ad anello aperto. N frequentieresponsie van de open kring. P transmitancja widmowa układu otwartego. S frekvensfunktion för öppna systemet. (351)

9. **recording/reproducing electro-acoustical frequency response** : a curve representing the variations, with respect to frequency, of the sound pressure delivered by a loudspeaker connected to the tape recorder when reproducing a tape on which a constant level signal applied to the input of the apparatus has been recorded. ★ courbe de réponse électroacoustique en enregistrement-lecture → *courbe 24.* R электроакустическая амплитудно-частотная характеристика магнитофона. D elektroakustischer Frequenzgang. E respuesta electroacústica en registro-lectura. I risposta elettroacustica in registrazione-riproduzione. N elektro-akoestische frequentiekarakteristiek. P charakterystyka (częstotliwościowa odtwarzania). S elektroakustisk frekvensåtergivning vid in- och avspelning. (806)

frequency-weighted

1. **peak frequency-weighted sound pressure level** : → *level 65*

Fresnel

1. **Fresnel diffraction pattern** (*Syn.* near-field diffraction pattern) : → *pattern 16*
2. **Fresnel ellipsoid** : → *ellipsoid 1*
3. **Fresnel lens antenna** : → *antenna 56*
4. **Fresnel reflection** : → *reflection 6*
5. **Fresnel reflection factor** : → *factor 82*
6. **Fresnel reflection method** : → *method 8*
7. **Fresnel region** : → *region 8*
8. **Fresnel spotlight** : → *spotlight 1*
9. **Fresnel zone** : → *zone 4*

Fricke

1. **Fricke dosemeter** : → *dosemeter 9*

friction

1. **electro-magnetic friction braking** : → *braking 31*
2. **magnetic friction clutch** : → *clutch 1*

fringe

1. **(interference) fringes** : a succession in space of electromagnetic field maxima and minima due to phase interference. ★ franges (d'interférence) → *frange 2.* D Interferenzmuster. P tętnienia interferencyjne. (705)

fringing

1. **(colour) fringing** (*Syn.* contrast) : → *contrast 2*

frog

1. **frog** (for tramway or trolleybus) : a device used at the junction of two overhead contact lines to permit the passage of the current collector. ★ aiguillage aérien → *aiguillage 1.* R воздушная стрелка (для трамваев или троллейбусов). D Fahrdrahtweiche mit angenäherten Oberleitungen (fuer Straßenbahn oder Obus). E aguja aérea (para tranvías y trolebuses). I scambio aereo (per tram e filobus). N rijdraadaftakking; luchtwissel (niet vrijlopend). P zwrotnica. S ledningsväxel. (811)

frog leg

1. **frog leg winding** : → *winding 30*

front

1. **connector front** : → *connector 10*
2. **front fog light** : → *light 17*
3. **front of a voltage impulse** : that part of an impulse which occurs prior to the peak. ★ front d'une tension de choc → *front 5.* R фронт импульса напряжения. D Stirn einer Stoßspannung. E frente de onda de un impulso de tensión. I fronte di una tensione a impulso. N front van een stootspanning. P czoło udaru napięcia. S front hos spänningsstöt; stötfront. (604)
4. **front pointer** : → *pointer 2*
5. **front porch (of line-synchronising signal)** : → *porch 2*
6. **front position light** : → *light 18*
7. **front span** : → *span 4*
8. **impulse chopped on the front** : → *impulse 7*
9. **virtual front duration (of a lightning impulse)** : → *duration 45*

front-mounted

1. **front-mounted** : a component with its mounting flange in front of the mounting surface when looking at the mating face or front side of the component. ★ monté par l'avant → *monté 6.* R компонент, устанавливаемый с внешней стороны панели. D außen befestigt. E montaje frontal. I montato anteriormente. N van voren gemonteerd. P natablicowy. S monterad framifrån. (581)

front-release

1. **front-release contact** : → *contact 70*

frosted

1. **frosted bulb** : → *bulb 8*

FRXD

1. **FRXD** (*Syn.* coupled reperforator and tape reader) : → *reperforator 1*

FS

1. **FS** (*Syn.* instrument security factor) : → *factor 95*

FSK

1. **FSK** (*Syn.* frequency shift keying) : → *keying 3*
2. **FSK** (*Syn.* frequency shift telegraphy) : → *telegraphy 7*

FSU

1. **FSU** (*Syn.* final signal unit) : → *unit 22*

FTA

1. **FTA** (*Syn.* fault tree analysis) : → *analysis 8*

fuel

1. **assembly for failed fuel element localization** : → *assembly 2*
2. **failed fuel element monitor** : → *monitor 5*
3. **fuel assembly** : → *assembly 14*
4. **fuel burn-out** : → *burn-out 1*
5. **fuel cell** : → *cell 15*
6. **fuel channel** : → *channel 28*
7. **fuel charging machine** : → *machine 12*
8. **fuel control** : → *control 108*
9. **fuel cooling installation** : → *installation 6*
10. **fuel cost adjustment clause** : → *clause 1*
11. **fuel discharging machine** : → *machine 13*
12. **fuel element** : the smallest structurally discrete part of a reactor which has fuel as its principal constituent. ★ élément de combustible → *élément 23.* D Brennelement. E elemento combustible. I elemento di combustible. N splijtstofelement. P element paliwowy. S bränsleelement. (026)
13. **fuel irradiation level** (*Syn.* specific burn-up) : → *burn-up 4*
14. **fuel reprocessing** : → *reprocessing 1*
15. **fuel rod** : → *rod 9*
16. **gaseous fuel boiler** : → *boiler 6*
17. **liquid fuel boiler** : → *boiler 7*
18. **nuclear fuel** : material containing fissile nuclides which, when placed in a reactor, enables a chain reaction to be achieved. ★ combustible nucléaire → *combustible 9.* D Kernbrennstoff. E combustible nuclear. I combustible nucleare. N splijtstof. P paliwo jądrowe. S kärnbränsle. (026)
19. **pulverised fuel boiler** : → *boiler 10*
20. **specific fuel consumption of a thermo-electric vehicle** : → *consumption 3*

full

1. **full annealing** : → *annealing 2*
2. **full carrier** : → *carrier 17*
3. **full cycle crimp mechanism** : → *mechanism 7*
4. **full duration half maximum** : → *maximum 3*
5. **full echo suppressor** : → *suppressor 3*
6. **full field** : → *field 45*
7. **full lightning impulse** : → *impulse 4*
8. **full load** : → *load 17*
9. **full track recording** : → *recording 4*
10. **full voltage motor** : → *motor 34*
11. **full width at half maximum** : → *width 1*
12. **full width half maximum** : → *maximum 5*

full-field

1. **full-field teletext** : → *teletext 2*

fullness

1. **fullness factor (related to the flux density)** : → *factor 83*
2. **fullness factor related to the polarization** : → *factor 84*
3. **reservoir fullness factor** : → *factor 157*

full-power

1. **full-power tapping** : → *tapping 3*

full-wave

1. **full-wave apparatus** : → *apparatus 8*
2. **full-wave dipole** : → *dipole 7*

fully

1. **fully charged state (of a cell or battery)** : → *state 18*
2. **fully dissociated signalling** : → *signalling 19*
3. **fully insulated current transformer** : → *transformer 32*
4. **fully provided circuit group** : → *group 12*

fully-routed

1. **fully-routed call attempt** (*Syn.* successful call attempt) : → *attempt 11*

fume

1. **arc furnace fume elbow** : → *elbow 1*
2. **arc furnace fume hood** : → *hood 2*

function

1. **autocorrelation function** : the correlation function of a signal with a time-delayed replica of the same signal. ★ fonction d'autocorrélation → *fonction 16.* R автокорреляционная функция. D Autokorrelationsfunktion. E función de autocorrelación. I funzione di autocorrelazione. N autocorrelatiefunctie. P funkcja autokorelacyjna. S autokorrelationsfunktion. (101)
2. **baseband response function** (*Syn.* baseband transfer function) : → *function 3*
3. **baseband transfer function** (*Syn.* baseband response function) : the transfer function of an optical fibre, defined as the ratio of the complex quantities corresponding to the input and output modulated radiant powers. ★ fonction de transfert en bande de base → *fonction 28.* R передаточная функция полосы модулирующих частот. D Basisband Übertragungsfunktion; Basisband-Antwort. E función de transferencia en banda base; función de respuesta en banda base. I funzione di trasferimento in banda base; funzione di risposta in banda base. N basisband-overdrachtsfunctie; basisband-responsiefunctie. P pasmo podstawowe funkcji przenoszenia. S ..... (731)
4. **CIE colour-matching functions** : the functions $\bar{x}(\lambda)$, $\bar{y}(\lambda)$, $\bar{z}(\lambda)$ in the CIE 1931 standard colorimetric system or
$$\bar{x}_{10}(\lambda),\ \bar{y}_{10}(\lambda),\ \bar{z}_{10}(\lambda)$$
in the CIE 1964 supplementary standard colorimetric system (see CIE Publication No.15). ★ fonctions colorimétriques CIE → *fonction 38.* R функции сложения МКО. D CIE-Normspektralwertfunktionen. E funciones de igualación de color CIE. I funzioni colorimetriche CIE. N colorimetrische functies van de CIE. P funkcje kolorymetryczne CIE. S CIE färgavstämningsfunktioner. (845)
5. **colorimetric functions** : the representation, in a given colorimetric system and as a function of the wavelength, of the quantities of the three primary colours needed to match each of the monochromatic components of wavelength in a uniform spectrum. *Note.* — These colorimetric functions were formerly designated the "distribution coefficients" and, later, the "trichromatic spectral components". ★ fonctions colorimétriques → *fonction 36.* R колориметрические функции. (723)
6. **colour stimulus function** ($\varphi_\lambda(\lambda)$) : description of a colour stimulus by the spectral concentration of a radiometric quantity, such as radiance or radiant power, as a function of wavelength. ★ courbe spectrale d'un stimulus de couleur → *courbe 41.* R функция цветового стимула. D Farbreizfunktion. E composición espectral del estímulo de color. I curva spettrale di uno stimolo di colore. N spectrale kleurprikkelfunctie. P rozkład bodźca barwowego widmowy. S spektralfördelning hos färgstimulus. (845)
7. **colour-matching functions** (of a trichromatic system) : the tristimulus values of monochromatic stimuli of equal radiant power. *Notes. 1* — The three values of a set of colour-matching functions at a given wavelength are called colour-matching coefficients (formerly spectral tristimulus values). *2* — The colour-matching functions may be used to calculate the tristimulus values of a colour stimulus from its colour stimulus function $\varphi_\lambda(\lambda)$ (see CIE Publication No.15). *3* — In the CIE standard colorimetric systems, the colour-matching functions are represented by the symbols $\bar{x}(\lambda)$, $\bar{y}(\lambda)$, $\bar{z}(\lambda)$ and
$$\bar{x}_{10}(\lambda),\ \bar{y}_{10}(\lambda),\ \bar{z}_{10}(\lambda)$$
★ fonctions colorimétriques → *fonction 37.* R функции сложения (трехцветной колориметрической системы). D Spektralwertfunktionen (eines trichromatischen Systems). E funciones de igualación de color. I funzioni colorimetriche. N colorimetrische functies. P funkcje kolorymetryczne. S färgavstämningsfunktioner. (845)
8. **correlation function** (of two signals) : a function $f(t)$ which is a measure of the similarity of two signals $f_1(t)$ and $f_2(t)$, defined by
$$f(t) = \int_{-\infty}^{+\infty} f_1(\tau) \cdot f_2(t + \tau) \cdot d\tau$$
Note. — The Fourier transform of $f(t)$ is equal to the product of the conjugate of the Fourier transform of $f_1(t)$ and the Fourier transform of $f_2(t)$ $F(j\omega) = F_1^*(j\omega).F_2(j\omega)$. ★ fonction de corrélation → *fonction 17.* R функция корреляции (между двумя функциями). D Korrelationsfunktion (von zwei Signalen). E función de correlación (entre dos funciones). I funzione di correlazione (tra due funzioni). N correlatiefunctie. P funkcja korelacyjna (dwu sygnałów). S korrelationsfunktion. (101)
9. **crosscorrelation function** : a correlation function between two different signals. ★ fonction d'intercorrélation → *fonction 32.* R функция взаимной корреляции. D Kreuzkorrelationsfunktion. E función de intercorrelación; función de correlación cruzada. I funzione di intercorrelazione. N kruiscorrelatiefunctie. P funkcja korelacji wzajemnej. S korskorrelationsfunktion. (101)
10. **describing function** : for a non-linear element in steady state, with a sinusoidal input signal, the frequency response obtained by taking only the fundamental component of the output signal. *Note.* — The describing function may depend on the frequency and on the amplitude of the input signal, or only on the amplitude of the input signal. ★ transmittance équivalente → *transmittance 2.* R эквивалентная амплитудно-фазовая характеристика нелинейного звена (описывающая функция). D Beschreibungsfunktion. E transmitancia equivalente. I funzione descrittiva. N beschrijvingsfunctie. P funkcja opisująca. S beskrivande funktion. (351)
11. **Dirac function** (*Syn.* unit pulse) : → *pulse 88*
12. **effective deceleration (as a function of distance)** : → *deceleration 1*
13. **Fermi-Dirac function** : a function expressing the probability $P(E)$, for a particle obeying Fermi statistics, that it will occupy a permitted energy level E
$$P(E) = \frac{1}{1 + \exp\left(\dfrac{E - E_F}{kT}\right)}$$
where: k is the Boltzmann constant T is the thermodynamic temperature E_F is the Fermi level and where this level is quantized and may contain 0, 1 or 2 electrons. ★ fonction de Fermi-Dirac → *fonction 19.* R функция Ферми-Дирака. D Fermi-Dirac-Funktion. E función de Fermi-Dirac. I funzione di Fermi-Dirac. N Fermi-Diracfunctie. P funkcja Fermiego-Diraca. S Fermi-Dirac-funktion. (521)
14. **function check-out** : → *check-out 2*
15. **function command** : → *command 7*
16. **function control** : → *control 109*
17. **function divided control** : → *control 110*
18. **function sharing** (*Syn.* function divided control) : → *control 110*
19. **function signal** : → *signal 98*
20. **Gibbs function** (*Syn.* Gibbs free energy) : → *energy 51*
21. **importance function** : → *importance 1*
22. **line-spread function** : a function that supplies information about the degree of blurring produced in a photographic or imaging system. For example, in the radiograph of a narrow slit in an opaque material, a curve of density versus distance along a line perpendicular to the long dimension of the slit. ★ fonction de frange → *fonction 20.* R степень размыва линий. D Linienspreizfunktion. E funcion de franja. I funzione di diffusione di linea. N lijnverbredingsfunctie. P funkcja rozrzutu liniowego. S linjespridningsfunktion. (881)
23. **mean deceleration (as a function of time)** : → *deceleration 2*
24. **modulation transfer function** (*Syn.* square-wave response characteristic) : → *characteristic 79*

25. **modulation transfer function** : the ratio of the final to the initial signal amplitude as a function of the spatial frequency of the initial signal. *Note.* — The modulation transfer function measures the loss of information from an input signal to an image-forming system owing to inherent characteristics of components of the system. For example, a measure of the loss of sharpness and contrast in an X-ray film and intensifying screen combination. ★ fonction de transfert de modulation → *fonction 27.* R передаточная функция модуляции. D Modulations-Übertragungsfunktion. E funcion de transferencia de modulacion. I funzione di trasferimento della modulazione. N modulatieoverdrachtsfunctie. P funkcja modulacji przenoszenia. S modulationsöverföringsfunktion. (881)
26. **register function** : in switching, the function of receiving, storing, analysing and possibly translating and transmitting address and other information for the purpose of setting up a connection. ★ fonction d'enregistreur → *fonction 31.* R функция регистра. D Registerfunktion. E función de registrar. I funzione di registro. N registerfunctie. P funkcja rejestru. S registerfunktion. (714)
27. **relative colour stimulus function** ($\varphi(\lambda)$) : relative spectral power distribution of the colour stimulus function. ★ courbe (spectrale) relative d'un stimulus de couleur → *courbe 42.* R относительная функция цветового стимула. D relative Farbreizfunktion. E distribución espectral del estímulo de color. I curva spettrale relativa di uno stimolo di colore. N relatieve spectrale kleurprikkelfunctie. P rozkład bodźca barwowego widmowy względny. S relativ spektralfördelning hos färgstimulus. (845)
28. **required function** : a function or a combination of functions of an item which is considered necessary to provide a given service. ★ fonction requise → *fonction 34.* R требуемая функция. D geforderte Funktion. E función requerida. I funzione richiesta. N taak. P zakres obsługi wymagany. S krävd funktion. (191)
29. **response function** (*Syn.* transfer function (2)) : → *function 35*
30. **single function (measuring) instrument** : → *measuring instrument 20*
31. **thermal electrical relay with partial memory function** : → *relay 49*
32. **thermal electrical relay with total memory function** : → *relay 50*
33. **transfer function** : in a linear system, ratio of the Laplace transform of an output signal to the Laplace transform of the corresponding input signal, with all initial conditions zero. ★ transmittance isomorphe → *transmittance 6.* R передаточная функция. D Übertragungsfunktion. E función de transferencia. I funzione di trasferimento. N overdrachtsfunctie. P transmitancja operatorowa. S överföringsfunktion. (351)
34. **transfer function** (*Syn.* frequency response) : the ratio of two complex quantities characterizing a signal as a function of frequency at the output and corresponding input of a device. *Notes. 1* — The transfer function may be taken as the ratio of the Fourier or Laplace transforms of the output and input quantities expressed as functions of time. The term frequency response essentially denotes a ratio of the Fourier transforms. *2* — The transfer function is the Laplace or Fourier transform of the impulse response. ★ fonction de transfert → *fonction 25.* R передаточная функция; частотная характеристика. D Übertragungsfunktion; Frequenz-Antwort. E función de transferencia; respuesta frecuencia. I funzione di trasferimento; risposta in frequenza. N overdrachtsfunctie; frequentieresponsie. P charakterystyka amplitudowo-fazowa; funkcja przenoszenia. S överföringsfunktion. (131,702,731,801)
35. **transfer function (2)** (*Syn.* transmittance; response function) : a function equal to the ratio of the Laplace transforms of corresponding signals at output and input of a linear and time-invariant two-port device. *Note.* — The transfer function of a two-port device is the Laplace transform of its unit pulse response. ★ fonction de transfert isomorphe → *fonction 30.* R функция передачи (2). D Übertragungsfunktion; Durchlaßverhalten; Antwortfunktion. E función de transferencia isomorfa; transmitancia isomorfa. I funzione di trasferimento (isomorfa). N overdrachtsfunctie; transmittantie. P transmitancja izomorficzna. S överföringsfunktion. (702)
36. **transmission control (function)** : → *control 196*
37. **weighting function** (*Syn.* unit pulse response) : → *response 26*
38. **work function** : the least energy required for the emission of a conduction electron. ★ travail d'extraction → *travail 27.* R работа выхода. D Austrittsarbeit. E trabajo de extracción. I lavoro di estrazione. N uittree-arbeid. P praca wyjścia. S utträdesarbete. (111)
39. **work function** (of an electrode material) : the energy required for the removal to infinity of an electron initially at the Fermi level in a given material. ★ travail d'extraction → *travail 28.* R работа выхода (материала электрода). D Austrittsarbeit (eines Elektroden-materials). E trabajo de extracción (de un material de electrodo). I lavoro di estrazione (di un materiale di elettrodo). N uittree-arbeid. P praca wyjścia. S övergångsarbete. (531)

function-affecting

1. **function-affecting maintenance** : → *maintenance 12*

functional

1. **functional block** : → *block 16*
2. **functional chain** : → *chain 6*
3. **functional mode** : → *mode 30*
4. **functional switching** : → *switching 24*
5. **functional unit** : → *unit 23*
6. **functional unit** : → *unit 24*

function-degrading

1. **function-degrading maintenance** : → *maintenance 13*

function-permitting

1. **function-permitting maintenance** : → *maintenance 14*

function-preventing

1. **function-preventing fault** (*Syn.* complete fault) : → *fault 4*
2. **function-preventing maintenance** : → *maintenance 15*

fundamental

1. **fundamental** (*Syn.* fundamental tone) : → *tone 15*
2. **fundamental (component)** : the component of order 1 of the Fourier series of a periodic quantity. ★ composante fondamentale → *composante 13.* R основная (составляющая). D Grundschwingung. E (componente, término) fundamental. I componente fondamentale; (termine) fondamentale. N grond-. P (składowa) podstawowa. S grund-. (101,161)
3. **fundamental factor** : → *factor 85*
4. **fundamental frequency** : → *frequency 107*
5. **fundamental mode of oscillation** : → *mode 31*
6. **fundamental power** : → *power 64*
7. **fundamental reference system of the CCITT** : → *system 74*
8. **fundamental tone** : → *tone 15*
9. **power factor of the fundamental** (*Syn.* displacement factor) : → *factor 48*

furnace

1. **bale out furnace** : a furnace chamber from which liquid metal may be taken out by a hand ladle or automatic pouring device. ★ four à puisage → *four 30.* R раздаточная печь. D Schöpfofen. E horno de achique. I forno a tazzaggio. N uitschepoven. P piec czerpalny. S ..... (841)
2. **batch furnace** : a horizontal, rectangular or cylindrical furnace which handles individual charges and which may be heated and cooled with the charge or maintained at specific temperature. ★ four discontinu à chambre → *four 47.* R садочная печь. D Kammerofen. E horno de carga completa. I forno discontinuo a camera. N kameroven. P piec nieprzelotowy. S satsugn. (841)
3. **bath furnace** : a furnace generally of the batch type, in which heating of the charge is effected by its immersion in a liquid medium at working temperature. *Examples :* — salt bath furnace — bath furnace for liquid metals (lead, zinc, tin). ★ four à bain → *four 5.* R печь для нагрева или обработки в жидкой среде. D Badofen. E horno de baño. I forno a bagno. N badoven. P piec kąpielowy. S badugn. (841)
4. **bell furnace** : a batch furnace in which the hearth is fixed and covered by a removable bell. ★ four à cloche → *four 15.* R колпаковая печь. D Haubenofen. E horno de campana.

I forno a campana. N klokoven. P piec dzwonowy. S klockugn. (841)

5. **belt conveyor furnace** : a continuous furnace through which charges are carried and conveyed by a belt formed from wire mesh or cast links. ★ four à bande transporteuse → *four 9.* R печь с ленточным конвейером. D Banddurchlaufofen. E horno de banda transportadora. I forno con nastro trasportatore. N transportbandoven. P piec taśmowy. S ugn med matningsband. (841)
6. **bogie furnace** : a furnace using a sufficient number of bogies to ensure continuous charging and discharging. ★ four à wagonnets → *four 41.* R печь с тележками. D Wagenherdofen. E horno de vagonetas. I forno a carrelli. N wagenoven. P piec wózkowy. S vagnugn. (841)
7. **bogie hearth furnace** : a furnace in which the hearth is constructed as a bogie unto which the charge is loaded for movement into and out of the furnace but which remains stationary during heating. ★ four à sole mobile → *four 37.* R печь с выдвижным подом. D Herdwagenofen. E horno de solera móvil. I forno a suola mobile. N bodemwagenoven. P piec o trzonie ruchomym. S vagnhärdugn. (841)
8. **chain conveyor furnace** : a continuous furnace through which the charge is carried on a chain conveyor. ★ four à chaîne → *four 10.* R печь с цепным конвейером. D Kettenförderofen. E horno de transporte por cadena. I forno a catena. N transportkettingoven. P piec o przenośniku łańcuchowym. S kedjematad ugn. (841)
9. **cold wall vacuum furnace** : a vacuum furnace with internal heating elements, the chamber walls being cooled. ★ four sous vide à parois froides → *four 53.* R вакуумная печь с холодными стенками. D Kaltwand-Vakuumofen. E horno de vacio de paredes frías. I forno sotto vuoto a pareti fredde. N vacuümoven met gekoelde wanden. P piec próżniowy o ścianach zimnych. S vakuumugn med kylda väggar. (841)
10. **continuous furnace** : a furnace through which the charge is conveyed progressively or continuously. ★ four à passage → *four 26.* R печь непрерывного действия. D Durchlauföfen. E horno continuo. I forno continuo. N continu-oven. P piec przelotowy. S genommatningsugn. (841)
11. **continuous muffle furnace** : a continuous furnace in which the charge passes through a sealed enclosure designed to protect the latter from action of the heating chamber atmosphere. ★ four continu à moufle → *four 43.* R муфельная печь непрерывного действия. D Durchlauf-Muffelofen. E horno continuo de mufla. I forno continuo a muffola. N moffeloven. P piec muflowy ciągłego działania. S ..... (841)
12. **crucible furnace inductor coil** : → *coil 14*
13. **crucible of coreless induction furnace** : → *crucible 3*
14. **direct resistance furnace** : a resistance furnace in which the electric current passes through the material to be heated. ★ four à chauffage direct par résistance → *four 12.* R печь сопротивления прямого нагрева. D Ofen zur direkten Widerstandserwärmung. E horno de calentamiento directo por resistencia. I forno a riscaldamento diretto a resistenza. N directe weerstandsoven. P piec rezystancyjny bezpośredni. S direkt motståndsugn. (841)
15. **discontinuous furnace** : a furnace in which loading and unloading are carried out in a discontinuous manner. ★ four discontinu → *four 46.* R печь периодического действия. D diskontinuierlicher Ofen. E horno discontinuo. I forno discontinuo. N discontinu-oven. P piec okresowego działania. S diskontinuerlig ugn. (841)
16. **drawing furnace** : a horizontal continuous furnace, used predominently for heating wire or strips which are drawn through the heating chamber by an automatically controlled winding system. ★ four tirant → *four 54.* R протяжная печь. D Durchziehofen. E horno de estirado. I forno a tiro. N trekoven. P piec przeciągarski. S genomdragningsugn. (841)
17. **elevator furnace** : a batch furnace, of which the upper part of the heating chamber constitutes the fixed bell, into which the hearth is raised for heating and lowered for cooling. ★ four à élévateur → *four 16.* R элеваторная печь. D Hubherdofen. E horno ascensor. I forno ad elevatore. N bodemhefoven. P piec elewatorowy. S elevatorugn. (841)
18. **fluidized bed furnace** : a furnace containing a bed of granulated products through which possibly reactant heated or cooled gas is passed in such a way that heat transfer is accelerated by movement of granulated products. ★ four à lit fluidisé → *four 22.* R печь с кипящим слоем. D Wirbelofen. E horno de lecho fluidificado. I forno a letto fluidizzato. N wervelbedoven. P piec ze złożem fluidalnym. S ugn med fluidiserad bädd. (841)
19. **gravity feed furnace** (*Syn.* sloping hearth furnace) : → *furnace 53*
20. **grooved hearth furnace** (*Syn.* slotted hearth furnace) : a batch furnace in which the hearth is grooved or slotted to accept the charge supporting rails of a charging machine. ★ four à sole à rainures de guidage → *four 34.* R печь с пазами в поде. D Nutherdofen. E horno de solera con guías ranuradas. I forno con suola con scanalature di guida. N oven met bodemsleuven. P piec o trzonie żłobkowym. S ..... (841)
21. **hot wall vacuum furnace** : a vacuum furnace in which the charge and chamber are heated externally. ★ four sous vide à parois chaudes → *four 52.* R вакуумная печь с горячими стенками. D Heisswand-Vakuumofen. E horno de vacío de paredes calientes. I forno sotto vuoto a pareti calde. N uitwendig verwarmde vacuümoven. P piec próżniowy o ścianach gorących. S vakuumugn med varma väggar. (841)
22. **indirect resistance furnace** (*Syn.* indirect resistance oven) : → *oven 3*
23. **induction channel furnace** : an induction melting or holding furnace forming a transformer whose secondary circuit comprises the molten metal contained in a channel made of refractory material and which is connected to a refractory lined chamber also containing molten metal, into which charge pieces, to be heated, are placed. ★ four à induction à canal → *four 19.* R индукционная канальная печь. D Induktionsrinnenofen. E horno de inducción de canal. I forno ad induzione a canale. N inductiekanaaloven. P piec indukcyjny kanałowy. S rännugn. (841)
24. **induction crucible furnace** : an induction melting or holding furnace in which the heat is generated directly in the charge, or in the crucible containing it by means of one or more inductor coils arranged around the crucible. ★ four à induction à creuset → *four 20.* R индукционная тигельная печь. D Induktionstiegelofen. E horno de inducción de crisol. I forno ad induzione a crogiolo. N inductiekroesoven. P piec indukcyjny tyglowy. S induktiv degelugn. (841)
25. **induction furnace** : an induction heating equipment comprising a heating chamber. ★ four à induction → *four 18.* R индукционная печь. D Induktionsofen. E horno de inducción. I forno ad induzione. N inductieoven. P piec indukcyjny. S induktionsugn. (841)
26. **induction furnace cast lining** : → *lining 3*
27. **induction furnace rammed lining** : → *lining 4*
28. **induction furnace susceptor lining** : → *lining 5*
29. **induction holding furnace** : a furnace specifically designed for holding liquid metal at a required temperature. ★ four de maintien à induction → *four 45.* R индукционная печь для выдержки. D Induktionswarmhalteofen. E horno de mantenimiento de inducción. I forno ad induzione di mantenimento (in temperatura). N inductiewarmhoudoven. P piec indukcyjny podgrzewający. S induktiv varmhållningsugn. (841)
30. **induction "lift off coil" crucible melting furnace** : a furnace where the induction coil, which surrounds the crucible, is lifted vertically or the crucible is lowered vertically, to allow removal and to allow a second crucible with a new charge to be positioned to receive the induction coil. ★ four à induction à creuset interchangeable → *four 21.* R индукционная тигельная плавильная печь с подъемом индуктора. D Induktionstiegelschmelzofen mit Hubspule oder Hubtiegel. E horno de inducción de crisol intercambiable. I forno di fusione ad induzione a crogiolo intercambiabile. N kroesoven met hefspoel. P piec indukcyjny o wymiennych tyglach. S induktiv huvugn. (841)
31. **induction melting furnace** : an induction furnace designed to melt its charge. ★ four de fusion à induction → *four 44.* R индукционная плавильная печь. D Induktionsschmelzofen. E horno de fusión de inducción. I forno di fusione ad induzione. N inductiesmeltoven. P piec indukcyjny wytopowy. S induktionssmältugn. (841)
32. **inductor assembly channel furnace** : an assembly of inductor coils, magnetic core, shield, casing and refractory lining. ★ ensemble inducteur d'un four à canal → *ensemble 16.* R узел индуктора канальной печи (индукционная единица). D Induktoreinheit eines Rinnenofens. E conjunto inductor de un horno de canal. I sistema induttore di un forno a canale. N uitwisselbare

inductor met smeltkanaal. P zespół wzbudnikowy pieca kanałowego. S ..... (841)

33. **inductor assembly crucible furnace** : an assembly of inductor coils, magnetic iron flux screening, the crucible and surrounding framework or metal casing. ★ ensemble inducteur d'un four à creuset → *ensemble 17.* R узел индуктора тигельной печи. D Induktoreinheit eines Tiegelofens. E conjunto inductor de un horno de crisol. I sistema induttore di un forno a crogiolo. N uitwisselbare inductie-kroesoven. P zespół wzbudnikowy pieca tyglowego. S ..... (841)

34. **low thermal mass furnace** : a furnace constructed of low thermal-capacity materials, so that the chamber temperature is reached in a short time. ★ four à faible inertie thermique → *four 17.* R печь с малой тепловой массой. D Ofen mit geringer Wärmeträgheit. E horno de baja inercia térmica. I forno ad inerzia termica debole. N lichtgewichtoven. P piec o małej bezwładności cieplnej. S ugn med låg termisk tröghet. (841)

35. **muffle furnace** ; a furnace with sealed enclosure containing the charge, designed to protect the latter from the action of the heating chamber atmosphere. ★ four à moufle → *four 25.* R муфельная печь. D Muffelofen. E horno de mufla. I forno a muffola. N moffeloven. P piec muflowy. S muffelugn. (841)

36. **multi-zone furnace** : a furnace chamber having two or more separately heated sections which are independently controlled to give the desired temperature level to satisfy a specific heat treatment cycle. ★ four multizones → *four 48.* R многозонная печь. D Mehrzonenofen. E horno multizonas. I forno multi-zone. N meerzone-oven. P piec wielostrefowy. S flerzonsugn. (841)

37. **natural atmosphere of a furnace** : → *atmosphere 8*

38. **pit furnace** : a batch furnace, forming a pit, in which the charge is loaded from the top. ★ four-puits → *four-puits 1.* R шахтная печь. D Schachtofen. E horno de foso. I forno a pozzo. N schachtoven. P piec szybowy. S gropugn. (841)

39. **plasma furnace** : a heating appliance comprising a chamber which is heated by one or several plasma torches. ★ four à plasma → *four 28.* R печь с нагревом плазмой. D Plasmaofen. E horno de plasma. I forno a plasma. N plasmaoven. P piec plazmowy. S plasmaugn. (841)

40. **pot-type furnace** : a batch furnace where a separate crucible is charged and placed in the furnace for processing. ★ four à pot → *four 29.* R печь тигельная. D Tiegelofen. E horno de pote. I forno a crogiolo metallico. N potoven. P piec garnkowy. S degelugn. (841)

41. **pusher furnace** : a continuous furnace, in which each charge piece is pushed intermittently by the following piece over a hearth which is either level or slightly inclined, the whole charge being moved by an external pushing device. ★ four poussant → *four 50.* R толкательная печь. D Stossofen. E horno de empuje. I forno a spinta. N schuiftegeloven, doorstootoven. P piec przepychowy. S genomskjutningsugn. (841)

42. **resistance furnace** : a heating chamber comprising heating resistors. ★ four à résistance → *four 32.* R печь сопротивления. D Widerstandsofen. E horno de resistencia. I forno a resistenza. N weerstandsoven. P piec rezystancyjny. S motståndsugn. (841)

43. **rocking resistor rod furnace** : a furnace heated by radiation from a rod resistor, the furnace body oscillating around an axis to move the charge, giving an improved heat transfer. ★ four oscillant à résistance → *four 49.* R вибрирующая печь сопротивления. D widerstandsbeheizter Schaukelofen. E horno basculante de resistencia. I forno oscillante a resistenza. N schommelende staafoven. P piec rezystancyjny wahadłowy. S ..... (841)

44. **roller hearth furnace** : a continuous furnace through which the charge is conveyed and carried on rollers, some of which are driven. ★ four à rouleaux → *four 33.* R печь с роликовым подом. D Rollenherdofen. E horno de rodillos. I forno a rullo. N rollenbaanoven. P piec rolkowy. S rullhärdugn. (841)

45. **rotary hearth furnace** : a horizontal continuous furnace, with a circular or annular hearth, which rotates around a vertical axis, having entry and exit openings (sometimes only one opening). ★ four à sole tournante → *four 38.* R печь с вращающимся подом. D Drehherdofen. E horno de solera giratoria. I forno a suola rotante. N carrouseloven. P piec karuzelowy. S roterhärdugn. (841)

46. **rotary retort furnace** : a drum furnace which rotates unidirectionally around a horizontal axis during heating. ★ four à tambour rotatif → *four 39.* R вращающаяся барабанная печь. D Trommelofen. E horno de tambor giratorio. I forno a tamburo rotante. N oven met roterende buis. P piec bębnowy obrotowy. S roterande trumugn. (841)

47. **salt bath electrode furnace** : a salt bath furnace in which heat is generated by direct flow of current between electrodes in the bath. ★ four à bain de sel à électrodes → *four 6.* R соляная электродная ванна. D Elektroden-Salzbadofen. E horno de baño salino de electrodos. I forno a bagno di sale ad elettrodi. N zoutbadoven met elektroden. P piec elektrodowy o kąpieli solnej. S saltbadsugn. (841)

48. **salt bath furnace with immersed electrodes** : a salt bath furnace where the electrodes pass through the surface of the bath. ★ four à bain de sel à électrodes immergées → *four 7.* R соляная ванна с погруженными электродами. D Elektroden-Salzbadofen mit Tauchelektroden. E horno de baño salino de electrodos de inmersión. I forno a bagno di sale ad elettrodi immersi. N zoutbadoven met gedeeltelijk ondergedompelde elektroden. P piec o elektrodach zanurzonych przy powierzchni kąpieli solnej. S ..... (841)

49. **salt bath furnace with submerged electrodes** : a salt bath furnace where the electrodes pass through the wall of the bath below its surface. ★ four à bain de sel à électrodes submergées → *four 8.* R соляная ванна с внешними электродами. D Elektroden-Salzbadofen mit nicht durch die Oberfläche eintauchenden Elektroden. E horno de baño salino de electrodos sumergidos. I forno a bagno di sale ad elettrodi sommersi. N zoutbadoven met geheel ondergedompelde elektroden. P piec o kąpieli solnej i elektrodach piecowych. S ..... (841)

50. **screw conveyor furnace** : a furnace in which the movement of the charge during heating is carried out by an Archimedean screw built into the drum. ★ four à vis d'Archimède → *four 40.* R печь со шнековым конвейером. D Ofen mit Transportschnecke. E horno de tornillo sin fin. I forno a vite trasportatrice. N oven met schroeftransporteur. P piec o przenośniku ślimakowym. S ugn med skruvmatare. (841)

51. **shaker hearth furnace** : a continuous furnace in which the charge is passed along the hearth by its to-and-from motion and quick return which moves the material forward by successive impulses. ★ four à sole à secousses → *four 35.* R печь с пульсирующим подом. D Rüttelherdofen. E horno de solera de vaivén. I forno con suola a scosse. N schudgootoven. P piec wstrząsowy. S skakhärdugn. (841)

52. **skid hearth furnace** : a furnace with horizontal hearth, either plain or with raised points on which the charge is raised or pushed in sequence to permit its continuous transfer and discharge. ★ four à sole glissante → *four 36.* R печь толкательная с направляющими. D Gleitherdofen. E horno de solera deslizante. I forno con suola a slitta. N glijbaanoven. P piec o trzonie wysuwnym. S ..... (841)

53. **sloping hearth furnace** (*Syn.* gravity feed furnace) : a continuous furnace in which the movement of the charge is effected by gravity. ★ four à passage à sole inclinée → *four 27.* R печь с наклонным подом. D Schrägherdofen. E horno de solera inclinada; horno alimentado por gravedad. I forno continuo a suola inclinata. N doorloopoven met hellende bodem. P piec grawitacyjny. S ugn med lutande härd. (841)

54. **slotted hearth furnace** (*Syn.* grooved hearth furnace) : → *furnace 20*

55. **submerged resistance furnace** (*Syn.* submerged arc furnace) : → *arc furnace 44*

56. **tilting furnace** : a furnace which rotates around a horizontal axis allowing tilting in order to facilitate loading, de-slagging, pouring or unloading. ★ four basculant → *four 42.* R наклоняющаяся печь. D Kippofen. E horno basculante. I forno basculante. N kipoven. P piec przechyłowy. S tippbar ugn. (841)

57. **tunnel furnace** : a horizontal continuous furnace of elongated form. ★ four tunnel → *four 55.* R туннельная печь. D Tunnelofen. E horno túnel. I forno tunnel. N tunneloven. P piec tunelowy. S tunnelugn. (841)

58. **vacuum furnace** : a furnace having a heating chamber constructed to allow a charge material to be processed at sub-atmospheric pressures. ★ four sous vide → *four 51.* R вакуумная печь. D Vakuumofen. E horno de vacío. I forno sotto vuoto. N vacuümoven. P piec próżniowy. S vakuumugn. (841)

59. **walking beam furnace** : a continuous furnace in which the charge is progressed by alternately raising and setting down at a point further along the furnace hearth by a mechanical device.

★ four à longerons mobiles → *four 23.* R печь с шагающим балочным подом. D Hubbalkenofen. E horno de balancines. I forno a travi mobili. N hefbalkoven. P piec o trzonie kroczącym. S stegbalksugn. (841)

furniture

1. **hearth furniture** : → *hearth 5*

fuse

1. **drop-out fuse** : a fuse in which the fuse-carrier automatically drops into a position providing an isolating distance after the fuse has operated. ★ fusible à ouverture automatique → *fusible 9.* R откидывающийся предохранитель. D Ausfall-Sicherung. E cortacircuitos fusible de apertura automática. I fusibile autosezionatore. N ..... P bezpiecznik stwarzający po wyłączeniu przerwę biegunową bezpieczną. S utfallssäkring. (441)
2. **expulsion fuse** : a fuse in which operation is accomplished by expulsion of gases produced by the arc. ★ fusible à expulsion → *fusible 7.* R выхлопной предохранитель; стреляющий предохранитель. D Ausblas-Sicherung. E fusible de expulsión. I fusibile a espulsione. N expulsie(smelt)veiligheid. P bezpiecznik gazowydmuchowy. S gasavgivande säkring. (441)
3. **fuse** : a device that by the fusing of one or more of its specially designed and proportionned components, opens the circuit in which it is inserted by breaking the current when this exceeds a given value for a sufficient time. The fuse comprises all the parts that form the complete device. ★ fusible → *fusible 6.* R предохранитель. D Sicherung. E cortacircuitos fusible; fusible. I fusibile. N smeltveiligheid. P bezpiecznik topikowy. S säkring. (441)
4. **high voltage fuse** : a fuse designed to interrupt a high voltage circuit. ★ fusible haute tension → *fusible 12.* R высоковольтный предохранитель. D Hochspannungssicherung. E fusible de alta tensión. I fusibile ad alta tensione. N hoogspanningssmeltveiligheid. P bezpiecznik wysokiego napięcia. S högspänningssäkring. (811)
5. **indicating fuse** : a fuse provided with an indicator. ★ fusible à indicateur → *fusible 8.* R предохранитель с указателем срабатывания. D Anzeiger-Sicherung. E fusible indicador. I fusibile a indicatore. N (smelt)veiligheid met verklikker. P bezpiecznik wskaźnikowy. S säkring med indikeringsanordning. (441)
6. **internal fuse of a capacitor** : a fuse connected inside a capacitor unit, in series with an element or a group of elements. ★ coupe circuit interne d'un condensateur → *coupe-circuit 1.* R внутренний предохранитель конденсатора. D interne Sicherung eines Kondensators. E cortacircuito interno de un condensador. I fusibile interno di un condensatore. N ingebouwde smeltveiligheid van een condensator. P bezpiecznik kondensatora. S inre kondensatorsäkring. (436)
7. **reactor safety fuse** : a self-contained device designed to respond to excessive temperature or flux in a reactor and to act to reduce the reaction rate to a safe level. The device may or may not contain stored energy to facilitate its operation. ★ fusible de sécurité d'un réacteur → *fusible 11.* D Reaktorschutzsicherung. E fusible de seguridad de un reactor. I fusibile di sicurezza per reattore. N reactorveiligheidsmechanisme. P bezpiecznik awaryjny. S reaktorsäkring. (026)
8. **striker fuse** : a fuse provided with a striker. ★ fusible à percuteur → *fusible 10.* R предохранитель с ударником. D Schalgvorrichtungs-Sicherung. E fusible percutor. I fusibile a percussore. N (smelt)veiligheid met slagstift. P bezpiecznik wybijakowy. S säkring med slagstift. (441)

fuse-base

1. **fuse-base** (*Syn.* fuse-mount) : the fixed part of a fuse provided with contacts and terminals. ★ socle → *socle 3.* R основание предохранителя. D Sicherungsunterteil. E base. I base del fusibile. N (smeltveiligheid)voetstuk; (smelt)patroonhouder (alleen bij gebruik van een gesloten smeltveiligheid). P podstawa bezpiecznikowa. S säkringssockel. (441)
2. **fuse-base contact** : → *contact 71*

fuse-carrier

1. **fuse-carrier** : the movable part of a fuse designed to carry a fuse-link. ★ porte-élément de remplacement → *porte-élément 2.* R держатель заменяемого элемента. D Sicherungsträger. E portafusible. I porta fusibile. N (smelt)patroondrager; schroefkop. P głowka bezpiecznikowa; osłona wkładki topikowej. S säkringspatronbärare. (441)
2. **fuse-carrier contact** : → *contact 72*

fuse-combination

1. **fuse-combination unit** : → *unit 25*

fused

1. **fused quartz** : → *quartz 1*
2. **fused short-circuit current** : → *short-circuit current 3*
3. **fused silica** : → *silica 1*
4. **integrally fused circuit-breaker** : → *circuit-breaker 13*

fuse-disconnector

1. **fuse-disconnector** : a disconnector in which a fuse-link or a fuse-carrier with fuse-link forms the moving contact. ★ fusible-sectionneur → *fusible-sectionneur 1.* R предохранитель-разъединитель. D Sicherungstrennschalter. E fusible-seccionador. I fusibile-sezionatore. N smeltpatroonscheider. P odłącznik bezpiecznikowy. S säkringsfrånskiljare. (441)

fuse-element

1. **fuse-element** : a part of the fuse-link designed to melt under the action of current exceeding some definite value for a definite period of time. ★ élément fusible → *élément 57.* R плавкий элемент. D Schmelzleiter. E elemento fusible. I elemento fusibile. N smeltstuk. P topik. S smältledare. (441)

fuse-holder

1. **fuse-holder** : the combination of a fuse-base with its fuse-carrier. ★ ensemble-porteur → *ensemble-porteur 1.* R держатель предохранителя. D Sicherungschalter. E conjunto portador. I supporto del fusibile. N (smelt)patroonhouder. P podstawa bezpiecznikowa z osłoną. S säkringspatronhållare. (441)

fuse-link

1. **current-limiting fuse-link** : a fuse-link that, during and by its operation in a specified current range, limits the current to a substantially lower value than the peak value of the prospective current. ★ élément de remplacement limiteur de courant → *élément 41.* R токоограничивающий заменяемый элемент. D strombegrenzender Sicherungseinsatz. E fusible limitador de corriente (intensidad). I elemento sostituibile limitatore di corrente. N stroombegrenzende (smelt)patroon. P wkładka topikowa ograniczająca. S strömbegränsande säkringspatron. (441)
2. **enclosed fuse-link** : a fuse-link in which the fuse-element(s) is(are) totally enclosed, so that during operation within its rating it cannot produce any harmful external effects e.g. due to development of an arc, the release of gas or the ejection of flame or metallic particles. ★ élément de remplacement à fusion enfermée → *élément 40.* R закрытый заменяемый элемент. D gekapselte Sicherung. E fusible de fusión cerrada. I elemento sostituibile chiuso. N gesloten (smelt)patroon. P wkładka topikowa zamknięta. S sluten säkringspatron. (441)
3. **fuse-link** : the part of a fuse (including the fuse-element(s)) intended to be replaced after the fuse has operated. ★ élément de remplacement → *élément 39.* R заменяемый элемент. D Sicherungseinsatz. E fusible. I elemento sostituibile del fusibile. N (smelt)patroon. P wkładka bezpiecznikowa topikowa; wkładka topikowa. S säkringspatron. (441)
4. **fuse-link contact** : → *contact 73*
5. **renewable fuse-link** : a fuse-link that, after operation, may be restored for service by a refill-unit. ★ élément de remplacement rechargeable → *élément 42.* R восстанавливаемый заменяемый элемент. D Reparatur-Sicherung. E fusible recargable. I elemento sostituibile. N repareerbare (smelt)patroon. P wkładka topikowa odnawialna. S omladdningsbar säkringspatron. (441)

fuse-mount

1. **fuse-mount** (*Syn.* fuse-base) : → *fuse-base 1*

fuse-switch

1. **fuse-switch** : a switch in which a fuse-link or a fuse-carrier with fuse-link forms the moving contact. ★ fusible-interrupteur → *fusible-interrupteur 1.* R предохранитель-выключатель нагрузки. D Sicherungslastschalter. E fusible-interruptor.

I fusibile-interruttore di manovra. N smeltpatroonlastschakelaar. P rozłącznik bezpiecznikowy. S säkringslastbrytare. (441)

fuse-switch-disconnector

1. **fuse-switch-disconnector** : a switch-disconnector in which a fuse-link or a fuse-carrier with fuse-link forms the moving contact. ★ fusible-interrupteur-sectionneur → *fusible-interrupteur-sectionneur 1.* R предохранитель-выключатель нагрузки-разъединитель. D Sicherungslasttrennschalter. E fusible-interruptor-seccionador. I fusibile-interruttore di manovra-sezionatore. N smeltpatroonlastscheider. P rozłącznik izolacyjny bezpiecznikowy. S säkringslastfrånskiljare. (441)

fusing

1. **conventional fusing current** : → *current 34*

fusion

1. **fusion frequency** : → *frequency 108*
2. **fusion splice** : → *splice 2*
3. **fusion welding** : → *welding 11*
4. **nuclear fusion** : a process in which two light nuclei interact to produce at least one nucleus heavier than either initial nucleus, together with excess energy attributable to the conversion of mass. ★ fusion nucléaire → *fusion 11.* R синтез ядер. D Kernfusion. E fusión nuclear. I fusione nucleare. N kernversmelting; kernfusie. P fuzja jądrowa. S fusion. (881)
5. **nuclear fusion reaction** : → *reaction 7*

FWHM

1. **FWHM** (*Syn.* full width at half maximum) : → *width 1*
2. **FWHM** (*Syn.* full width half maximum) : → *maximum 5*

G

G

1. **gauss, Gs, G** : → *gauss 1*

gain

1. **(absolute) gain** (of an antenna, in a given direction) (*Syn.* isotropic gain (of an antenna, in a given direction)) : the ratio, generally expressed in decibels, of the radiation intensity produced by an antenna in a given direction to the radiation intensity that would be obtained if the power accepted by the antenna were radiated equally in all directions. *Notes. 1* — If no direction is specified, the direction of maximum radiation intensity from the given antenna is implied. *2* — If the antenna is lossless its absolute gain is equal to its directivity in the same direction. ★ gain isotrope → *gain 25.* R абсолютный коэффициент усиления антенны (в данном направлении); изотропный коэффициент усиления (антенны в данном направлении). D (absoluter) Gewinn (einer Antenne) (in eine bestimmte Richtung); isotroper Gewinn (einer Antenne) (im eine bestimmte Richtung). E ganancia (absoluta) (de una antena, en una dirección dada); ganancia isotrópica (de una antena, en una dirección dada). I guadagno isotropo (riferito al radiatore). N (absolute) winst (van een antenne, in een gegeven richting); isotrope winst (van een antenne, in een gegeven richting). P żysk (bezwzględny) (anteny, w danym kierunku); zysk izotropowy (anteny, w danym kierunku). S antennvinst. (712)
2. **automatic gain control** : → *control 12*
3. **automatic gain control** : → *control 13*
4. **available power gain** (of a two-port device) : the ratio of available power from a source associated in cascade with a given two-port device, to the available power from the source alone. ★ gain en puissance disponible → *gain 22.* R усиление мощности при согласованной нагрузке (четырехполюсника). D verfügbare Leistungsverstärkung (eines Zweitors). E ganancia en potencia disponible (de un dispositivo bipuerta). I guadagno in potenza disponibile (di un elemento a due porte). N beschikbare vermogensversterking (van een tweepoort). P wzmocność mocy dysponowana (dwuwrotnika). S tillgänglig effektförstärkning. (702)
5. **breeding gain** : breeding ratio minus one. ★ gain de surrégénération → *gain 15.* D Brutgewinn. E ganancia de reproducción. I guadagno di surrigenerazione. N kweekwinst. P uzysk powielania. S bridvinst. (026)
6. **composite gain** (of a two-port device) : the ratio, generally expressed in decibels, of the apparent power delivered to a specified load after insertion of a given two-port device between the source and the load, to the apparent power that the same source would deliver to a load with zero reflection factor at its interface with the source. *Note.* — If the ratio defining the composite gain is less than one, its decibel value is negative, and its converse or its opposite value in decibels called composite loss may be used. ★ gain composite → *gain 11.* R составное усиление (четырехполюсника). D Betriebsverstärkung (eines Zweipol-Netzwerkes). E ganancia compuesta (de un dispositivo bipuerta). I guadagno composto (di un elemento a due porte). N samengestelde versterking (van een tweepoort). P wzmocność złożona (dwuwrotnika). S driftförstärkning. (702)
7. **convergence gain** : the convergence factor expressed in decibels. ★ gain de convergence → *gain 12.* D Konvergenzgewinnmaß; Fokussierungsgewinnmaß. P żysk zbieżności. (705)
8. **differential gain distortion** (*Syn.* differential amplitude distortion) : → *distortion 25*
9. **directional gain** (*Syn.* directivity index) : of a transducer, in decibels, ten times the logarithm to the base ten of the directivity factor. *Note.* — Directional gain may be given for a direction other than that of the principal axis, if the direction is specified. ★ indice de directivité → *indice 13.* R усиление направленности; индекс направленности. D Richtwirkungsmaß; Bündelungsmaß. E índice de directividad. I guadagno di direttività; indice di direttività. N richtingsindex. P żysk kierunkowości. S riktindex. (801)
10. **exchangeable power gain** (of a two-port device) : the ratio of exchangeable power from a source associated in cascade with a given two-port device to the exchangeable power from the source alone. ★ gain en puissance échangeable → *gain 23.* R усиление обменной мощности (четырехполюсника). D Verstärkung abgebbarer Leistung (eines Zweitors). E ganancia de potencia intercambiable (de un dispositivo bipuerta). I guadagno in potenza trasferibile (di un elemento a due porte). N uitwisselbare vermogensversterking (van een tweepoort). P wzmocność mocy wymienialna (dwuwrotnika). S utväxlingsbar effektförstärkning. (702)
11. **gain** (of a measuring instrument) : the ratio of the output to the input values of quantities of the same kind in a device or system when equal to or greater than unity. ★ gain → *gain 6.* R усиление (измерительного прибора). D Verstärkung. E ganancia (de un aparato de medida). I amplificazione (di uno strumento di misura). N versterking (van een meetinstrument). P wzmocność. S förstärkning. (303)
12. **gain** : for a linear system in sinusoidal steady state, the ratio of the amplitude of the output signal to the amplitude of the corresponding input signal. *Note.* — The gain is the absolute value of the frequency response. ★ gain → *gain 7.* R амплитудно-частотная характеристика. D Amplitudenverhältnis; Amplitudengang. E ganancia. I guadagno. N versterking. P współczynnik wzmocnienia. S förstärkning. (351)
13. **gain** (of an electron multiplier in a photomultiplier tube) : the number of electrons reaching, under specified working conditions, the output electrode of the photomultiplier tube for each electron received by the first dynode. ★ gain → *gain 8.* R усиление (электронного умножителя в фотоумножителе). D Verstärkung (eines SEV). E ganancia (de un multiplicador de electrones en un tubo fotomultiplicador). I guadagno (di un moltiplicatore di elettroni in un tubo fotomoltiplicatore). N versterking (v.e. elektronenvermenigvuldiger in een fotomultiplicatorbuis). P wzmocnienie (powielacza elektronowego w fotopowielaczu). S förstärkning. (391)
14. **gain** (of a photomultiplier tube) : the ratio of the anode signal current to the current emitted by the photocathode at stated electrode voltages. ★ gain → *gain 9.* R усиление (фотоумножителя). D Verstärkung (eines SEV mit Photokathode). E ganancia (de un tubo fotomultiplicador). I guadagno (di un tubo fotomoltiplicatore). N versterking (v.e. fotomultiplicatorbuis). P wzmocnienie (fotopowielacza). S förstärkning. (391)
15. **gain** : 1. An increase between two points of an electric, electromagnetic, or acoustic power. 2. The quantitative expression of a power increase by the ratio of the values at two points of a power or of a quantity related to power in a well defined manner. *Notes. 1* — By extension, the word "gain" may represent the ratio of powers in a given situation and in a reference condition; for example the "gain of an antenna". *2* — Gain is generally expressed in logarithmic units by a positive or negative value. When a gain has a negative value in logarithmic units, attenuation may be used instead of gain. ★ gain → *gain 10.* R усиление. D Verstärkung. E ganancia. I guadagno. N versterking. P wzmocnienie; wzmocność. S förstärkning. (702)
16. **gain degradation** : → *degradation 3*
17. **gain margin** : → *margin 6*
18. **gain ripple** : → *ripple 2*
19. **height gain** : the ratio, generally expressed in decibels, of the electromagnetic field at a given point, to the field at another point on the same vertical line at a reference height. *Notes. 1* — The height gain when expressed in decibels may have a negative value. *2* — In the case of spherical diffraction by the Earth, the reference height generally used depends on the wavelength and on the ratio of the effective radius of the Earth to the actual Earth radius. ★ gain de hauteur → *gain 14.* D Höhengewinn. P żysk wysokościowy. (705)
20. **incremental power gain** : the ratio of the increase in output power to a small increment of driving power causing it. ★ gain différentiel en puissance → *gain 17.* R дифференциальный

коэффициент усиления мощности. **D** differentielle Leistungsverstärkung. **E** ganancia diferencial en potencia. **I** guadagno differenziale di potenza. **N** differentiële vermogenversterking. **P** wzmocnienie (mocy) przyrostowe. **S** differentiell effektförstärkning. (531)

21. **insertion gain** (of a two-port device) : the ratio, generally expressed in decibels, of the apparent power at a point in a transmission channel after insertion of a given two-port device into the path immediately ahead of this point, to the power at this point before insertion of the device. *Note.* — If the ratio defining the insertion gain is less than one, its decibel value is negative, and its converse or opposite decibel value called "insertion loss" may be used. ★ gain d'insertion → *gain 18.* **R** вносимое усиление (четырехполюсника). **D** Einfügungsverstärkung (eines Zweitors). **E** ganancia de inserción (de un dispositivo bipuerta). **I** guadagno di inserzione (di un elemento a due porte). **N** insteekversterking (van een tweepoort). **P** wzmocnienie wtraceniowa (dwuwrotnika). **S** inlänkningsförstärkning. (702,726)
22. **isotropic gain** (*Syn.* (absolute) gain) : → *gain 1*
23. **logarithmic gain** : if G is the gain of the linear system, its logarithmic gain, expressed in decibels, is 20 log G. ★ gain logarithmique → *gain 27.* **R** логарифмическая амплитудно-частотная характеристика. **D** logarithmisches Amplitudenverhältnis. **E** ganancia logarítmica. **I** guadagno logaritmico. **N** logaritmische versterking. **P** współczynnik wzmocnienia. **S** logaritmisk förstärkning. (351)
24. **mode conversion gain** : the gain of power due to a mode conversion in waveguides. *Note.* — The mode conversion gain is generally expressed in decibels. ★ gain de conversion (de mode) → *gain 13.* **R** усиление преобразования. **D** Modenwandlungs-Verstärkung. **E** ganancia de conversión de modo. **I** guadagno di conversione. **N** modusomzettingsversterking. **P** wzmocnienie transformacji rodzaju. **S** modomvandlingsvinst. (726)
25. **obstacle gain** : the ratio, generally expressed in decibels, of the electromagnetic field due to edge diffraction by an isolated obstacle, to the field which would occur due only to spherical diffraction in the absence of the obstacle. ★ gain d'obstacle → *gain 19.* **D** Hindernisgewinn. **P** zysk przeszkodowy. (705)
26. **optimum gain** : the highest gain that can be obtained by adjustment when the tube is operated under stated conditions. ★ gain optimal → *gain 28.* **R** оптимальное усиление. **D** optimale Verstärkung. **E** ganancia óptima. **I** guadagno ottimo. **N** optimale vermogenversterking. **P** wzmocnienie optymalne. **S** maximal förstärkning. (531)
27. **pair gain system** : → *system 139*
28. **partial gain** (of an antenna, for a given polarization) : the ratio, generally expressed in decibels, of that part of the radiation intensity in a given direction, corresponding to a given polarization, to the radiation intensity that would be obtained if the power accepted by the antenna were radiated equally in all directions. *Notes. 1* — If no direction is specified, the direction of maximum radiation intensity from the given antenna is implied. *2* — The absolute gain of an antenna is the sum of the partial gains, expressed as power ratios, for any two orthogonal polarizations. ★ gain isotrope (partiel) → *gain 26.* **R** парциальный коэффициент усиления антенны (для заданной поляризации). **D** Teilgewinn; partieller Gewinn (einer Antenne für eine bestimmte Polarisation). **E** ganancia parcial (de una antena, para una polarización dada). **I** guadagno isotropo parziale (per una data polarizzazione). **N** antennewinst (voor een bepaalde polarisatie). **P** zysk cząstkowy (anteny dla danej polaryzacji). **S** partiell antennvinst. (712)
29. **path antenna gain** : the sum of the gains, expressed in decibels, of the antennas used for a radio link, possibly diminished by the gain degradation. ★ gain des antennes pour un trajet → *gain 16.* **D** Funkfeld-Antennengewinnmaß. **P** zysk antenowy wynikowy (w torze linii radiowej). (705)
30. **power gain** : the ratio, usually expressed in decibels, of the output power of an amplifier tube operated under stated conditions to the driving power. ★ gain en puissance → *gain 21.* **R** коэффициент усиления мощности. **D** Leistungsverstärkung. **E** ganancia en potencia. **I** guadagno di potenza. **N** vermogenversterking. **P** wzmocnienie (mocy). **S** effektförstärkning. (531)
31. **relative gain** (of an antenna with respect to that of a reference antenna) : the ratio, generally expressed in decibels, of the partial gain of a given antenna in a specified direction to the maximum absolute gain of a reference antenna having the polarization corresponding to that of the partial gain of the given antenna. *Notes. 1* — When the reference antenna has in the same direction, the same polarization as that of the given antenna, the relative gain is the ratio of the absolute gains. *2* — If no direction is specified, the direction of maximum radiation intensity from the given antenna is implied. *3* — A lossless half-wave dipole, elementary electric dipole or very short vertical monopole are frequently used as reference antennas. ★ gain relatif → *gain 29.* **R** относительный коэффициент усиления антенны (по отношению к усилению эталонной антенны). **D** relativer Gewinn (einer Antenne gegenüber einer Bezugsantenne). **E** ganancia relativa (de una antena respecto de una antena de referencia). **I** guadagno relativo. **N** relatieve winst (van een antenne ten opzichte van een referentie-antenne). **P** zysk względny (anteny). **S** relativ antennvinst. (712)
32. **saturation gain** : the available gain at saturation power. ★ gain en régime de saturation → *gain 24.* **R** усиление в режиме насыщения. **D** Sättigungsverstärkung. **E** ganancia en régimen de saturación. **I** guadagno in saturazione. **N** vermogenversterking bij verzadiging. **P** wzmocnienie nasyceniowe. **S** mättnadsförstärkning. (531)
33. **small-signal gain** : power gain in the driving-power range such that a decrease of the driving power has negligible effect on the gain. ★ gain en petits signaux → *gain 20.* **R** усиление в режиме малого сигнала. **D** Kleinsignalverstärkung. **E** ganancia en pequeñas señales. **I** guadagno per piccoli segnali. **N** vermogenversterking bij kleine signalen. **P** wzmocnienie małosygnałowe. **S** småsignalförstärkning. (531)
34. **transducer gain** (of a two-port device) : the ratio, generally expressed in decibels, of the active power delivered to a specified load after insertion of a given two-port device between the source and the load, to the available power of the source. *Note.* — If the ratio defining the transducer gain is less than one, its decibel value is negative, and its converse or its opposite value in decibels called transducer loss can be used. ★ gain transductique → *gain 30.* **R** усиление преобразования (четырехполюсного устройства). **D** Betriebsverstärkung (eines Zweitors). **E** ganancia de un transductor (de un dispositivo bipuerta). **I** guadagno di trasduzione (di un elemento a due porte). **N** overdragerversterking (van een netwerk met tweepoorten). **P** wzmocnienie transdukcji (w dwuwrotniku). **S** aktiv driftförstärkning. (702)

galloping

1. **conductor galloping** : a periodic motion of a conductor, or bundle, predominantly in a vertical plane of low frequency of the order of a fraction of one Hz and high amplitude, whose maximum value can be of the same order as the original sag. ★ galop des conducteurs → *galop 2.* **R** пляска проводов. **D** Leitertanzen. **E** galope de conductores. **I** galoppo dei conduttori. **N** dansen van geleiders. **P** taniec przewodu. **S** lindans; lingalopp. (466)
2. **galloping** (*Syn.* pitching) : → *pitching 1*

galvanic

1. **galvanic cell** : → *cell 16*

galvanometer

1. **ballistic galvanometer** : a galvanometer intended to measure the value of a quantity of electricity by reading the amplitude of the first swing of its moving element. ★ galvanomètre balistique → *galvanomètre 6.* **R** гальванометр баллистический. **D** ballistisches Galvanometer. **E** galvanómetro balístico. **I** galvanometro balistico. **N** ballistische galvanometer. **P** galwanometr balistyczny. **S** ballistisk galvanometer. (302)
2. **difference galvanometer** : a galvanometer intended to measure the difference of two currents. *Note :* this instrument was formerly called "differential galvanometer". ★ galvanomètre de différence → *galvanomètre 7.* **R** гальванометр дифференциальный. **D** Differenz-Galvanometer. **E** galvanómetro diferencial. **I** galvanometro differenziale. **N** verschilgalvanometer. **P** galwanometr różnicowy. **S** differensgalvanometer. (302)
3. **galvanometer** : an instrument intended to detect or measure a very small current. ★ galvanomètre → *galvanomètre 1.* **R** гальванометр. **D** Galvanometer. **E** galvanómetro. **I** galvanometro. **N** galvanometer. **P** galwanometr. **S** galvanometer. (301)
4. **moving coil galvanometer** : a galvanometer in which a coil carrying a current moves in the field of a permanent magnet. ★ galvanomètre magnétoélectrique → *galvanomètre 8.*

R магнитоэлектрический гальванометр с рамкой. D Drehspul-Galvanometer. E galvanómetro de bobina móvil; galvanómetro magnetoeléctrico. I galvanometro magnetoelettrico a bobina mobile. N draaispoelgalvanometer. P galwanometr o ruchomej cewce; galwanometr magnetoelektryczny. S vridspolegalvanometer. (302)

5. **string galvanometer** : a galvanometer in which the moving element is a conductive thread which is stretched between the pole pieces of a permanent magnet or of an electromagnet. ★ galvanomètre à corde → *galvanomètre 3.* R гальванометр струнный. D Saiten-Galvanometer. E galvanómetro de hilo. I galvanometro a sospensione. N snaargalvanometer. P galwanometr strunowy. S bandgalvanometer. (302)
6. **vibration galvanometer** : a galvanometer in which the natural frequency of the moving element is adjusted to resonate with the frequency of the current to be measured or detected. ★ galvanomètre à résonance → *galvanomètre 4.* R гальванометр вибрационный. D Vibrations-Galvanometer. E galvanómetro de resonancia; galvanómetro de vibración. I galvanometro a vibrazione. N vibratiegalvanometer. P galwanometr wibracyjny. S vibrationsgalvanometer. (302)

gamma

1. **capture gamma radiation** : → *radiation 9*
2. **display gamma** : maximum slope of the straight line which gives the best approximation to the curve representing, on a logarithmic scale, the luminance of a screen element as a function of the amplitude of the corresponding video signal, over the useful range of the curve. ★ gamma à la synthèse → *gamma 7.* R гамма воспроизводящего устройства. (723)
3. **gamma** : the slope, at any point, of the light-signal transfer characteristic plotted in logarithmic units. ★ gamma → *gamma 5.* R гамма. D Gamma, Exponent der Wandlungskennlinie. E gamma. I gamma. N gamma. P gamma. S gamma. (531)
4. **gamma** : the slope of the straight portion of the characteristic curve. ★ gamma → *gamma 6.* R гамма. D Gamma. E gamma. I gamma. N gamma. P gamma. S gamma. (881)
5. **gamma back-scatter thickness meter** : → *meter 24*
6. **gamma correction** : → *correction 13*
7. **gamma emitter** : → *emitter 7*
8. **gamma radiation** : → *radiation 27*
9. **gamma radiation** : → *radiation 28*
10. **gamma radiation** : → *radiation 29*
11. **prompt gamma radiation** : → *radiation 53*
12. **(system) gamma** (in television) : the slope of the straight line which gives the best approximation to the useful range of the curve representing, on a logarithmic scale, the luminance of a display element as a function of the luminance of the corresponding element of the original object. ★ gamma global → *gamma 9.* R гамма системы (в телевидении). (723)
13. **video signal source gamma** : the slope of the straight line which gives the best approximation to the useful range of the curve representing, on a logarithmic scale, the amplitude of the video signal as a function of the corresponding luminance of the object over the useful range of the curve. ★ gamma à l'analyse → *gamma 8.* R гамма датчика видеосигнала. (723)
14. **whole-body gamma spectrum analyzer** : → *analyzer 10*

gamma-ray

1. **anti-Compton gamma ray spectrometer** : → *spectrometer 2*
2. **gamma ray spectrometer** : → *spectrometer 4*
3. **gamma rays** (*Syn.* gamma radiation) : → *radiation 29*
4. **specific gamma-ray constant** : → *constant 30*

gantry

1. **arc furnace swivel gantry** : a structure which swivels around a king pin located on the furnace platform, carrying the electrode supporting structure and roof lift and swing aside mechanism. ★ grue pivotante de four à arc → *grue 1.* R портальная конструкция дуговой печи. D Schwenkportal. E pórtico giratorio de un horno de arco. I settore di rotazione di forno ad arco. N draaiinrichting voor de elektrodeophangingen. P dźwigar obrotowy (pieca łukowego). S svängbrygga. (841)
2. **beam gantry** (*Syn.* bridge; girder) : an horizontal element of a portal support or a tower which is designed for the attachment of the conductors (see fig. 3.12). ★ poutre → *poutre 1.* R балочная часть траверсы. D Riegel eines Einsystemmastes. E viga de cruceta. I trave; traversa. N binnentraverse. P poprzecznik belkowy. S regel. (466)

gap

1. **conductor rail gap** : a space left between two successive lengths of conductor rail. ★ sectionnement de rail de contact → *sectionnement 12.* R разрыв контактного рельса. D Stromschienentrennung. E seccionamiento de rail de contacto. I sezionamento della rotaia di contatto. N stroomrailonderbrekingsafstand. P odstęp sekcyjny trzeciej szyny. S strömskenegap. (811)
2. **contact gap** : the gap between the contact tip, under specified conditions, when the contact circuit is open. ★ intervalle de contact → *intervalle 9.* R зазор контакта. D Kontaktabstand. E separación de contacto. I intervallo di contatto. N contactopening. P przerwa stykowa. S kontaktavstånd. (446)
3. **differential gap** (*Syn.* overlap) : difference between the upper and the lower switching values. *Note.* — This should not be confused with "neutral zone". ★ recouvrement → *recouvrement 4.* R зона неоднозначности. D Schaltdifferenz. E solapamiento; recubrimiento. I differenza di commutazione. N schakeldifferentie. P rozstęp przełączania. S hystereszon. (351)
4. **effective gap length** : → *length 6*
5. **energy gap** : the smallest energy difference between two neighboring permitted bands separated by a forbidden band. ★ largeur de bande interdite → *largeur 15.* R ширина запрещенной зоны. D Energielücke. E ancho de banda prohibida. I larghezza di banda interdetta; scarto energetico. N bandafstand. P odstęp energetyczny; szczelina energetyczna. S energigap. (111)
6. **energy gap** : the gap between the lower energy boundary of the conduction band and the upper energy boundary of the valence band. ★ écart énergétique → *écart 15.* R запрещенная зона. D Energieabstand; Energielücke. E separación energética. I salto energetico (di energia). N bandafstand. P przerwa energetyczna. S energigap. (521)
7. **gap** : the conduction region between two electrodes. ★ espace interélectrode → *espace 20.* R разрядный промежуток. D Entladungsstrecke. E espacio entre electrodos. I spazio interelettrodico. N ontladingsbaan. P obszar wyładowczy. S urladdningsträcka. (531)
8. **gap depth** : → *depth 5*
9. **gap length** : → *length 17*
10. **gap loss** (*Syn.* longitudinal offset loss) : → *loss 45*
11. **gap loss** : → *loss 35*
12. **gap (of a flameproof joint)** : the distance between the corresponding surfaces of a flameproof joint. For cylindrical surfaces, the gap is the diametral clearance (difference between the two diameters). ★ interstice (d'un joint antidéflagrant) → *interstice 1.* R зазор (взрывонепроницаемого соединения); ширина щели. D Spaltweite. E intersticio (de una junta antideflagrante). I interstizio (di un giunto a tenuta di fiamma). N spleetwijdte (van een drukvaste spleet). P prześwit (szczeliny ognioszczelnej). S spalthöjd. (426)
13. **gap width** : the dimension of the magnetic gap parallel to the plane of the tape and perpendicular to the direction of the relative tape to head movement. ★ largeur d'entrefer → *largeur 19.* R длина рабочего зазора. D Spaltlänge. E anchura de entrehierro. I larghezza di traferro. N spleethoogte. P szerokość szczeliny. S spaltbredd. (806)
14. **interaction gap** : an interaction region the dimensions of which are small compared with the wavelength under consideration. ★ espace d'interaction → *espace 19.* R промежуток взаимодействия. D Wechselwirkungsspalt. E espacio de interacción. I intervallo di interazione. N wisselwerkingsspleet. P obszar oddziaływania krótki. S spalt för växelverkan. (531)
15. **magnetic head gap** : the gap between the two aligned faces of the pole pieces of a magnetic head, separated by a non-magnetic spacer. ★ entrefer d'une tête magnétique → *entrefer 4.* R рабочий зазор. D Magnetkopfspalt; Kopfspalt. E entrehierro de cabeza magnética. I traferro di una testina magnetica. N kopspleet. P szczelina głowicy magnetycznej. S magnetisk spalt. (806)
16. **main gap** : the gap that carries the load current. ★ espace principal → *espace 22.* R основной промежуток. D Hauptentladungsstrecke. E espacio principal. I spazio

interelettrodico principale. N hoofdontladingsbaan. P obszar wyładowczy główny. S huvud(urladdnings)sträcka. (531)

17. **maximum experimental safe gap** (*Syn.* MESG (abbreviation)) : the maximum gap of the joint between the two parts of the interior chamber of a test apparatus which, when the internal gas mixture is ignited and under specified conditions, prevents ignition of the external gas mixture by flame propagation through a 25 mm long joint, for all concentrations of the tested gas or vapour in air. *Note.* — IEC Publication 79-1 A standardizes an apparatus and a test method. ★ interstice expérimental maximal de sécurité → *interstice 2.* R безопасный экспериментальный максимальный зазор; БЭМЗ (аббревиатура). D Normspaltweite; MESG (Abkürzung). E intersticio experimental máximo de seguridad; IEMS (abreviatura). I interstizio sperimentale massimo di sicurezza; MESG (abbreviazione). N experimenteel bepaalde grootste veilige spleetwijdte; MESG. P prześwit maksymalny doświadczalny bezpieczny. S största provspalthöjd. (426)
18. **maximum permitted gap** : the highest value of gap, defined according to the electrical apparatus group, the volume of the flameproof enclosure and the length of the flameproof joint. ★ interstice maximal autorisé → *interstice 3.* R максимальный допустимый зазор. D höchstzulässige Spaltweite; Grenzspaltweite. E intersticio máximo autorizado. I interstizio massimo ammesso. N maximale toegelaten spleetwijdte. P prześwit maksymalny dopuszczalny. S största spalthöjd. (426)
19. **starter gap** (*Syn.* trigger gap) : the gap that carries the current which initiates the discharge in the main gap. ★ espace d'amorçage → *espace 16.* R пусковой промежуток. D Starterentladungsstrecke (Triggerentladungsstrecke). E espacio de cebado. I spazio interelettrodico di innesco. N ontstekingsbaan. P obszar wyładowczy zapłonowy. S (trigger)tändsträcka. (531)
20. **throat gap** (*Syn.* throat height (USA)) : the usable distance between : *a)* the arms of spot and seam resistance welding machines ; *b)* the platens of projection resistance welding machines. ★ écartement des bras de la machine → *écartement 1.* R раствор. D Armabstand. E separación de los brazos (de una máquina de soldar). I distanza di gola; altezza di gola. N elektrodeafstand. P rozstaw ramion zgrzewarki. S gaphöjd; armavstånd. (851)
21. **trigger gap** (*Syn.* starter gap) : → *gap 19*

gas

1. **electric discharge (in a gas)** : → *discharge 15*
2. **electron gas** : an aggregate of free electrons exhibiting some properties of a gas. ★ gaz électronique → *gaz 17.* R электронный газ. D Elektronengas. E gas electrónico. I gas elettronico. N elektronengas. P gaz elektronowy. S elektrongas. (111)
3. **electronegative gas** : a gas which captures free electrons and forms negative ions so arresting the formation of electrical discharges. ★ gaz électronégatif → *gaz 16.* R электроотрицательный газ. D elektronegatives Gas. E gas electronegativo. I gas elettronegativo. N elektronegatief gas. P gaz elektroujemny. S elektronegativ gas. (212)
4. **explosive gas atmosphere** : → *atmosphere 5*
5. **external gas pressure cable** : → *cable 27*
6. **gas conduction** : → *conduction 14*
7. **gas content** : → *content 5*
8. **gas current** : → *current 96*
9. **gas discharge** : → *discharge 20*
10. **gas evolving switch** : → *switch 21*
11. **gas formation** : → *formation 2*
12. **gas insulated line** : → *line 42*
13. **gas insulated metal-enclosed substation** : → *substation 9*
14. **gas multiplication** : → *multiplication 4*
15. **gas multiplication factor** : → *factor 86*
16. **gas multiplication factor** : → *factor 87*
17. **gas or vapour-proof** : → *vapour-proof 1*
18. **gas release** : → *release 8*
19. **gas reservoir** (*Syn.* reservoir) : → *reservoir 5*
20. **gas seal** : → *seal 5*
21. **gas turbine set** : → *set 19*
22. **ignition temperature of an explosive gas atmosphere** : → *temperature 19*
23. **insulating gas** : a gas with negligibly low electric conductivity, used to separate conducting parts at different electrical potentials. ★ isolant gazeux → *isolant 24.* R газообразный электроизоляционный материал. D Isoliergas; isolierendes Gas. E aislante gaseoso. I gas isolante. N isolatiegas. P gaz izolacyjny. S isolergas. (212)
24. **internal gas detector** : → *detector 12*
25. **internal gas pressure cable** : → *cable 37*
26. **mean energy expended in a gas per ion pair formed** : → *energy 62*
27. **non-self-maintained gas conduction** : → *conduction 18*
28. **plasma gas** : gas or vapour which is or may be ionized to form a plasma. ★ gaz plasmagène → *gaz 18.* R плазменный газ. D Plasmagas. E gas de plasma. I gas plasma. N plasmagas. P gaz plazmowy. S plasmagas. (841)
29. **protective gas** : a gas used to maintain pressurization or to dilute flammable gas or vapour to a concentration well below the lower explosive limit. *Note.* — The protective gas may be air, nitrogen or any other non-flammable gas or a mixture of such gases. ★ gaz de protection → *gaz 15.* R защитный газ. D Zündschutzgas. E gas de protección. I gas di protezione. N beschermingsgas. P gaz ochronny. S skyddsgas. (426)
30. **quenching gas** : a component of the gas mixture filling of a Geiger-Müller counter tube which is intended to ensure self-quenching of the discharge. ★ gaz de coupage → *gaz 14.* R гасящий газ. D Löschgas. E gas extintor. I gas interruttore. N doofgas (v.e. geigermüllertelbuis). P gaz gaszący. S släckgas. (391)
31. **self-maintained gas conduction** : → *conduction 19*

gas-absorbing

1. **gas-absorbing liquid** : → *liquid 2*

gas-blast

1. **gas-blast circuit-breaker** : → *circuit-breaker 12*

gas-content

1. **gas-content factor** (*Syn.* vacuum factor) : → *factor 186*

gaseous

1. **gaseous fuel boiler** : → *boiler 6*

gas-evolving

1. **gas-evolving liquid** : → *liquid 3*

gas-filled

1. **gas filled** : applied to a sealed machine in which the internal coolant is gas. ★ machine à remplissage de gaz → *machine 25.* R газозаполненная машина. D gasgefüllte Maschine. E máquina llena de gas. I macchina stagna, piena di gas. N met gasvulling. P maszyna wypełniona gazem. S gasfylld. (411)
2. **gas-filled (incandescent) lamp** : → *lamp 19*
3. **gas-filled phototube** : → *phototube 1*
4. **gas-filled tube** : → *tube 37*
5. **gas-filled valve device** (*Syn.* ionic valve device) : → *valve device 4*

gas-flow

1. **gas-flow counter tube** : → *counter tube 12*
2. **gas-flow detector** : → *detector 11*

gas-insulated

1. **gas-insulated metal-enclosed switchgear** : → *switchgear 1*

gasket

1. **knurled gasket** (*Syn.* knurled plate gasket) : → *gasket 2*
2. **knurled plate gasket** (*Syn.* knurled gasket) : a plate gasket having a knurled surface surrounding the waveguide openings of the gasket to ensure contact between mating waveguide flanges. ★ plaque de joint moletée → *plaque 14.* R плоская прокладка с насечкой; прокладка с насечкой. D geriffelte Scheibendichtung; geriffelte Dichtung. E junta metálica moleteada. I placca di giunzione zigrinata; giunto zigrinato. N ..... P uszczelka płaska radełkowana. S ..... (726)
3. **metal plate air seal gasket** : a metal waveguide gasket intended to reduce gas leakage affecting internal waveguide

pressure. ★ plaquette métallique de joint → *plaquette 1.* R плоская металлическая герметизирующая прокладка. D Metallscheibengasdichtung. E placa metálica de estanqueidad. I piastrina metallica di giunzione. N metalen luchtafdichting. P uszczelka metalowa (falowodowa). S ..... (726)

4. **plate gasket** : a thick metallic plate having seals built into its faces, a very short waveguide section normal to those faces, and locating bolt holes normal to those faces to allow for mounting between mating waveguide flanges. ★ plaque de joint → *plaque 13.* R плоская прокладка. D Scheibendichtung. E junta metálica. I placca di giunzione. N plaatvormige afdichting. P wkładka uszczelniająca. S ..... (726)
5. **waveguide gasket** : an insert between waveguide flanges intended to serve one or more of the following primary purposes: *a)* to reduce gas leakage affecting internal waveguide pressure *b)* to prevent intrusion of foreign material into the waveguide, or *c)* to reduce power leakage and arcing. ★ joint d'étanchéité → *joint 6.* R волноводная уплотняющая прокладка. D Hohlleiterdichtung. E junta de estanqueidad. I giunto a tenuta. N golfgeleiderafdichting. P uszczelka falowodowa. S vågledarpackning. (726)

gas-sample

1. **gas-sample counter tube** : → *counter tube 13*

gassing

1. **gassing** (under electrical stress) : the process by which gas is evolved or absorbed by an insulating liquid when subjected to electrical stress of sufficient intensity to cause an electric discharge through a gas phase in which a gas/liquid interface is located. *Note.* — Gassing test results are expressed either as a volume or a rate. Conventionally the value is positive if gas is evolved during the test, negative if gas is absorbed. ★ gazéification → *gazéification 1.* R газообразование (под влиянием электрической напряженности). D Gasen (unter elektrischer Spannung). E absorción-desprendimiento de gas (bajo campo eléctrico). I gassing (sotto sollecitazioni elettriche). N gasvorming (door elektrische spanning). P gazowanie (przy naprężeniu elektrycznym). S gasning. (212)
2. **gassing** : the formation of gas produced by electrolysis of the electrolyte. ★ bouillonnement → *bouillonnement 1.* R газовыделение. D Gasung. E desprendimiento de gas. I ebollizione. N (het) gassen. P gazowanie. S gasning. (486)

gastight

1. **gastight sealed (secondary) cell** : → *cell 17*

gate

1. **binary-logic gate** (*Syn.* binary-logic element) : two-state element which performs a combinatorial logic operation, for instance: the complementation (it is then called a NOT-gate) the logical product (it is then called an AND-gate) the complemented logical product (it is then called a NAND-gate) the logical sum (it is then called an OR-gate) the complemented logical sum (it is then called a NOR-gate). ★ opérateur logique binaire élémentaire → *opérateur 2.* R логическая схема; логический элемент. D binäres Verknüpfungsglied; Gatter. E puerta binaria; operador lógico binario elemental. I elemento logico binario. N binaire logicapoort; binair logica-element. P element logiczny dwójkowy; bramka logiczna. S binärt logiskt element. (351)
2. **channel gate** : a device for connecting a time-derived channel to a highway, or a highway to a time-derived channel, at specified times. ★ porte de voie → *porte 8.* R канальный ключ. D Kanaltor. E puerta de vía. I porta di canale. N kanaalpoort. P bramka kanałowa. S kanalgrind. (704)
3. **gate** (of field-effect transistors) : a region in which the electric field due to the control gate voltage is effective. ★ grille → *grille 7.* R затвор (полевого транзистора). D Gate (eines Feldeffekttransistors). E rejilla (de un transistor de efecto de campo). I porta (di un dispositivo a effetto di campo). N stuurelektrode (van een veldeffecttransistor). P bramka (w tranzystorze polowym). S styre (hos fälteffekttransistor). (521)
4. **gate** : an auxiliary terminal which controls the switching action of a thyristor. ★ gâchette → *gâchette 4.* R управляющий электрод. D Steueranschluß. E puerta. I porta. N stuurelektrode. P bramka (tyrystora). S styre. (521)
5. **gate control** : → *control 111*
6. **gate non-trigger current** : → *current 97*
7. **gate non-trigger voltage** : → *voltage 74*
8. **gate trigger current** : → *current 98*
9. **gate trigger voltage** : → *voltage 75*
10. **(logic) gate** (*Syn.* logic element) : a device for effecting an elementary logic operation such that one and only one output value corresponds to each possible combination of simultaneous input values. *Note.* — Each logic gate is qualified in accordance with the logic operation which it performs. ★ porte (logique) → *porte 10.* R логический элемент. D (logisches) Gatter; logisches Element. E puerta (lógica); elemento lógico (combinatorio). I porta (logica); elemento logico. N (logische) poort; logisch element. P bramka logiczna. S grind. (702)

gated

1. **gated RQ** : → *RQ 1*

gathering

1. **electronic news gathering** (*Syn.* ENG (abbreviation)) : news reporting by means of equipment sufficiently light to be carried by one or two operators, the signals being either recorded or transmitted via a radio link to a base station. ★ journalisme électronique (télévisuel) → *journalisme 1.* R телевизионная служба новостей; ТСН. (723)
2. **satellite news gathering** (*Syn.* SNG (abbreviation)) : news reporting in which the link between the reporting point and the switching centre or studio centre is by satellite, via a transportable earth station. ★ reportage d'actualités par satellite → *reportage 2.* R спутниковая служба новостей; ССН. (723)

gating

1. **gating** : the process of connecting and disconnecting two circuits or transmission channels at specific instants or for defined values of a signal. ★ portillonnage → *portillonnage 1.* R стробирование. D werteabhängiges Durchschalten; Schleusen. E desconexión cíclica. I connessione controllata (abilitazione). N poortschakelen. P bramkowanie. S grindkoppling. (702)

gauge

1. **conductor rail gauge** : a contour which contains all the cross-sections of the contact rail, the insulators, supports and safety devices above rail level, allowance being made for clearances around live parts. ★ gabarit de rail de contact → *gabarit 4.* R габарит контактного рельса. D Lichtraumprofil für Stromschiene. E gálibo del rail de contacto. I sagoma limite della rotaia di contatto. N profiel van vrije ruimte voor de stroomrail. P skrajnia trzeciej szyny. S konstruktionsprofil för strömskena. (811)
2. **electrification clearance gauge** : a contour which contains the various live parts of an overhead contact line, allowance being made for static electrical clearances, and from which all other fixed objects must be kept clear. ★ gabarit de ligne de contact → *gabarit 3.* R габарит контактной сети. D Lichtraumprofil für Oberleitung. E gálibo de la línea de contacto. I sagoma limite della linea di contatto. N profiel van vrije ruimte voor de bovenleiding. P skrajnia sieci trakcyjnej. S ..... (811)
3. **gauge** : cross-sectional dimensions defining the maximum permitted dimensions of vehicles or the minimum dimensions of fixed structures. *Note.* — More detailed definitions concerning gauges are given in the publications of the International Union of Railways. ★ gabarit → *gabarit 2.* R габарит. D Begrenzungslinie. E gálibo. I sagoma limite. N omgrenzingsprofiel. P skrajnia. S konstruktionsprofil. (811)
4. **pantograph clearance gauge** : a contour beyond which must be placed any fixed structure above vehicle roof level, to allow any pantograph in use to pass safely, making allowance for lateral displacement of the pantograph and for passing electrical clearances. ★ gabarit d'isolement des pantographes → *gabarit 7.* R габарит токоприемников. D Lichtraumprofil fuer Dachstromabnehmer. E gálibo de aislamiento de los pantógrafos. I sagoma limite del pantografo. N profiel van vrije ruimte voor de stroomafnemer. P skrajnia pantografu. S ..... (811)

gauss

1. **gauss, Gs, G** : unit of magnetic flux density, the use of it is deprecated and is replaced by tesla (T) in the SI system. ★ gauss. Gs, G → *gauss 1.* (100)

Gaussian

1. **Gaussian beam** : → *beam 22*
2. **Gaussian noise** : → *noise 26*
3. **Gaussian process** : → *process 2*
4. **Gaussian pulse** : → *pulse 14*

GE

1. **GE (television) projector** : → *projector 4*

gear

1. **barring gear** : → *barring 1*
2. **brush rocker gear** : → *brush 8*
3. **clearance underneath the gear case** : → *clearance 7*
4. **gear case** : → *case 4*
5. **gear centre distance** : → *distance 11*
6. **turning gear** (*Syn.* barring gear) : → *barring 1*
7. **worm gear** : a gear train incorporating a worm on the motor shaft. ★ engrenage à vis sans fin → *engrenage 6.* R червячная передача. D Schneckengetriebe. E engranaje con tornillo sin fin. I ingranaggi a vite senza fine. N wormwieloverbrenging. P przekładnia ślimakowa. S snäckväxel. (811)

gearing

1. **bilateral gearing** : a system of gears in which the components are located at both ends of the motor shafts. ★ engrenage bilatéral → *engrenage 7.* R двухсторонняя зубчатая передача. D zweiseitiges Getriebe. E engranaje bilateral. I ingranaggi bilaterali. N tweezijdige tandwieloverbrenging. P przekładnia zębata obustronna. S dubbelsidig växel. (811)
2. **double-reduction gearing** : gearing fixing the speed ratio between motor and axle in two stages of reduction. ★ engrenage à double réduction → *engrenage 2.* R двухступенчатая зубчатая передача. D doppelt übersetztes Getriebe. E engranaje doble reducción. I ingranaggi a doppia riduzione. N dubbele tandwieloverbrenging. P przekładnia zębata dwustopniowa. S tvåstegsväxel. (811)
3. **intermediate-wheel gearing** : single reduction gearing whith an intermediate gear wheel. ★ engrenage à roue intermédiaire → *engrenage 4.* R передача с промежуточным зубчатым колесом. D Zwischenradgetriebe. E engranaje con rueda intermedia. I ingranaggi con ruota dentata intermedia. N tandwieloverbrenging met tussenwiel. P przekładnia zębata z kołem pośredniczącym. S mellanhjulsväxel. (811)
4. **resilient gearing** : a system of gears in which one of the wheels is provided with resilience in a tangential direction between hub and ring. ★ engrenage élastique → *engrenage 8.* R эластичная зубчатая передача. D federndes Getriebe. E engranaje elástico. I ingranaggi elastici. N elastische tandwieloverbrenging. P przekładnia zębata elastyczna. S fjädrande växel. (811)
5. **single-reduction gearing** : gearing fixing the speed ratio between motor and axle in one stage of reduction. ★ engrenage à simple réduction → *engrenage 5.* R одноступенчатая зубчатая передача. D einfach übersetztes Getriebe. E engranaje simple reducción. I ingranaggi a semplice riduzione. N enkele tandwieloverbrenging. P przekładnia zębata jednostopniowa. S enstegsväxel. (811)
6. **solid gearing** : gearing without resilient components. ★ engrenage rigide → *engrenage 9.* R жесткая зубчатая передача. D starres Getriebe. E engranaje rígido. I ingranaggi rigidi. N onafgeveerde tandwieloverbrenging. P przekładnia zębata sztywna. S stum växel. (811)
7. **unilateral gearing** : a system of gears in which the components are located at one end of the motor shafts. ★ engrenage unilatéral → *engrenage 10.* R односторонняя зубчатая передача. D einseitiges Getriebe. E engranaje unilateral. I ingranaggi unilaterali. N eenzijdige tandwieloverbrenging. P przekładnia zębata jednostronna. S enkelsidig växel. (811)

gearless

1. **gearless drive** : → *drive 12*

Geiger

1. **Geiger threshold** : → *threshold 2*

Geiger-Müller

1. **Geiger-Müller counter tube** : → *counter tube 14*
2. **Geiger-Müller region** : → *region 9*
3. **Geiger-Müller threshold** : → *threshold 3*
4. **temperature coefficient of the Geiger-Müller threshold** : → *coefficient 75*

gel

1. **gel** (verb) : to change from a liquid phase to a gel (212-04-15). ★ gélifier → *gélifier 1.* R ..... D gelieren. E gelificar. I gelificare. N geleren. P żelować, S gela. (212)
2. **gel** (noun) : the initial jellylike solid phase that develops during the formation of a resin (see also 212-03-11). ★ gel → *gel 1.* R гель. D Gel. E gel. I gel. N gel. P żel. S gel. (212)
3. **gel point** : → *point 19*
4. **gel time** : → *time 69*

general

1. **brazing (general)** : → *brazing 2*
2. **CIE 1974 general colour rendering index** : → *index 2*
3. **general artificial ventilation** : → *ventilation 3*
4. **general diffused lighting** : → *lighting 9*
5. **general interrogation command** : → *command 8*
6. **general lighting** : → *lighting 10*
7. **general purpose motor** : → *motor 35*

generalized

1. **generalized phase control** : → *control 112*

generated

1. **direct-axis component of synchronous generated voltage** : → *component 19*
2. **quadrature-axis component of synchronous generated voltage** : → *component 46*
3. **synchronous generated voltage** : → *voltage 203*
4. **three-dimensional computer generated image** : → *image 22*
5. **two-dimensional computer generated image** : → *image 23*
6. **2-D computer generated image** (*Syn.* two-dimensional computer generated image) : → *image 23*
7. **2 1/2 — D computer generated image** : → *image 26*
8. **3-D computer generated image** (*Syn.* three-dimensional computer generated image) : → *image 22*

generating

1. **cold start-up of a thermal generating set** : → *start-up 1*
2. **electrical generating station** (*Syn.* power station) : → *power station 17*
3. **generating set** : → *set 20*
4. **hot start-up of a thermal generating set** : → *start-up 2*
5. **thermal generating set** : → *set 58*

generation

1. **generation mix forecast** : → *forecast 1*
2. **generation of electricity** : → *electricity 5*
3. **generation schedule** : → *schedule 2*
4. **generation system** : → *system 75*
5. **generation time** : → *time 70*

generator

1. **alternating current generator** : a generator for the production of alternating current and voltage. ★ alternateur → *alternateur 1.* R генератор переменного тока. D Wechselstromgenerator. E alternador. I alternatore. N wisselstroomgenerator. P prądnica prądu przemiennego. S växelströmsgenerator. (411)
2. **amplitude modulated signal generator** : a source of amplitude modulated signals, the frequency, voltage and modulation factor of which can be fixed or variable within specified limits. ★ générateur de signaux modulés en amplitude → *générateur 17.* R генератор сигналов с амплитудной модуляцией. D amplitudenmodulierter Signalgenerator. E generador de señales moduladas en amplitud. I generatore di segnale modulato in ampiezza. N in amplitude gemoduleerde signaalgenerator; AM-signaalgenerator.

P generator sygnałów modulowanych amplitudowo. S amplitudmodulerad signalgenerator. (303)

3. **angular variation in synchronous generators** : → *variation 1*
4. **auxiliary generator** : a generator which generates electricity to supply auxiliaries in a power station. ★ génératrice auxiliaire → *génératrice 10.* R генератор собственных нужд. D Eigenbedarfsgenerator. E generador auxiliar. I generatore ausiliario. N hulpgenerator. P generator potrzeb własnych; prądnica potrzeb własnych. S hjälpgenerator. (602)
5. **auxiliary generator set** : → *set 3*
6. **auxiliary supply generator** (*Syn.* train power supply generator) : → *generator 40*
7. **axle-driven generator** : a generator driven by an axle and whose rotational speed varies in proportion to the speed of the vehicle. ★ génératrice d'essieu → *génératrice 41.* R осевой генератор. D Achsgenerator. E generatriz accionada por eje. I generatore d'asse. N asgenerator. P prądnica odosiowa. S axeldriven generator. (811)
8. **(call) signal generator** (*Syn.* magneto) : an alternating current generator included in a telephone set to initiate a call attempt. *Note.* — The term magneto is used when the call signal generator consists of a manually driven permanent-magnet rotating machine. ★ générateur de courant d'appel → *générateur 12.* R генератор вызывных сигналов; индуктор. D Rufgenerator; Kurbelinduktor. E generador de corriente de llamada; magneto. I generatore (di corrente) di chiamata. N oproepsignaalgenerator; inductor. P generator zewowy. S signalgenerator. (722)
9. **cascade generator** (*Syn.* voltage-multiplying generator) : X-ray apparatus in which the X-ray tube voltage is a multiple of the secondary voltage of the high-voltage transformer. ★ générateur en cascade → *générateur 22.* R аппарат-умножитель напряжения. D Spannungsvervielfachungs-Generator. E generador en cascada; generador por multiplicación de tensión. I generatore a moltiplicazione di tensione. N cascadegenerator. P generator rentgenowski z układami powielania napięcia. S kaskadgenerator. (881)
10. **(d.c.) main generator** : a direct current generator, driven by the internal combustion engine and supplying the traction motors. ★ génératrice principale (de courant continu) → *génératrice 43.* R главный генератор постоянного тока. D Hauptgenerator (Gleichstrom). E generador principal (de corriente continua); generatriz (en desuso). I generatore principale (a corrente continua). N (gelijkstroom)hoofdgenerator. P prądnica główna. S likströms huvudgenerator. (811)
11. **direct current generator** : a generator for the production of direct current and voltage. ★ génératrice de courant continu → *génératrice 39.* R генератор постоянного тока. D Gleichstromgenerator. E generador de corriente continua. I generatore a corrente continua. N gelijkstroomgenerator. P prądnica prądu stałego. S likströmsgenerator. (411)
12. **double wound synchronous generator** : a synchronous generator which has two similar primary windings mounted on the same magnetic structure but not necessarily connected electrically either within or outside the machine. ★ alternateur synchrone à double enroulement → *alternateur 5.* R синхронный генератор с двойной обмоткой. D Zweiwicklungs-Synchrongenerator. E alternador síncrono de doble devanado. I alternatore sincrono a doppio avvolgimento. N synchrone generator met dubbele wisselstroomwikkeling. P prądnica synchroniczna o podwójnym uzwojeniu. S tvålindnings synkrongenerator. (411)
13. **(electric) generator** : an electric machine that converts mechanical energy into electric energy. ★ génératrice (électrique) → *génératrice 42.* R (электрический) генератор. D (elektrischer) Generator. E generador (eléctrico). I generatore (elettrico). N (elektrische) generator. P prądnica; generator (elektryczny). S elgenerator. (151,411)
14. **fixed X-ray generator** : X-ray apparatus permanently installed in an X-ray room. ★ générateur fixe → *générateur 23.* R стационарный рентгеновский аппарат. D ortsfester Röntgengenerator. E generador fijo de rayos X. I impianto radiologico fisso. N vaste röntgengenerator. P zestaw rentgenowski stacjonarny. S stationär röntgenapparat. (881)
15. **frequency modulated signal generator** : a source of frequency modulated signals, the frequency, voltage and frequency deviation of which can be fixed or variable within specified limits. ★ générateur de signaux modulés en fréquence → *générateur 18.* R генератор сигналов с частотной модуляцией. D frequenzmodulierter Signalgenerator. E generador de señales moduladas en frecuencia. I generatore di segnale modulato in frequenza. N in frequentie gemoduleerde signaalgenerator; FM-signaalgenerator. P generator sygnałów modulowanych częstotliwościowo. S frekvensmodulerad signalgenerator. (303)
16. **Hall generator** : a Hall plate, together with leads and, where used, encapsulation and ferrous or non-ferrous plates. ★ générateur de Hall → *générateur 13.* R генератор Холла. D Hallgenerator. E generador Hall. I generatore di Hall. N Hallgenerator. P generator Halla. S hallgenerator. (521)
17. **heating generator** : an alternating or direct current generator supplying only the electric heating on a train. ★ génératrice de chauffage → *générateur 38.* R отопительный генератор. D Heizgenerator. E generador de calefacción. I generatore di riscaldamento. N generator voor verwarming. P prądnica ogrzewcza. S tågvärmegenerator. (811)
18. **high-voltage generator** : an assembly of electrical and mechanical devices used to produce high voltage, e.g., suitable to energize an X-ray tube. ★ générateur haute tension → *générateur 24.* R высоковольтный генератор. D Röntgengenerator. E generador de alta tensión. I generatore di alta tensione. N hoogspanningsgenerator. P generator wysokiego napięcia. S högspänningsgenerator. (881)
19. **Ilgner generator set** : → *set 25*
20. **impulse generator** : laboratory equipment enabling dielectric tests to be carried out under impulse voltage conditions. ★ générateur de choc → *générateur 11.* R генератор импульсов. D Stoßspannungsgenerator. E generador de impulsos. I generatori di impulsi. N stootspanningsgenerator. P generator udarów. S stötgenerator. (604)
21. **induction generator** : an induction machine working as an alternating current generator. ★ génératrice asynchrone → *générateur 35.* R асинхронный генератор. D Induktionsgenerator; Asynchrongenerator. E generador asíncrono. I generatore asincrono. N inductiegenerator; asynchrone generator. P prądnica indukcyjna. S asynkrongenerator. (411,811)
22. **inductor generator** : an inductor machine for use as a generator. ★ alternateur à fer tournant → *alternateur 2.* R индукторный генератор. D Induktorgenerator. E alternador de hierro giratorio. I alternatore a ferro rotante. N inductorgenerator. P prądnica induktorowa. S induktorgenerator. (411)
23. **main generator** : a generator which transmits most or part of its generated electricity into the system or directly to the user. ★ générateur principal → *générateur 27.* R основной генератор. D Hauptgenerator. E generador principal. I generatore principale. N hoofdgenerator. P generator główny; prądnica główna. S huvudgenerator. (602)
24. **mobile X-ray generator** : X-ray apparatus that can be comveniently moved from one part of an institution to another. ★ générateur mobile → *générateur 25.* R передвижной рентгеновский аппарат. D ortsveränderlicher Röntgengenerator. E generador móvil de rayos X. I impianto radiologico mobile. N mobiele röntgengenerator. P zestaw rentgenowski ruchomy. S mobil röntgenapparat. (881)
25. **motor generator set** : → *set 33*
26. **pattern generator** (*Syn.* test pattern generator) : an electronic device that provides a video signal in the form of a television test card, without making use of the normal scanning equipment. ★ mire électronique → *mire 9.* R генератор испытательной таблицы. (723)
27. **permanent magnet generator** : a generator in which the field system consists of one or more permanent magnets. ★ génératrice à aimants permanents → *générateur 30.* R машина с постоянными магнитами. D Dauermagnetgenerator. E generador de imanes permanentes. I generatore a magneti permanenti. N generator met permanente magneten. P prądnica o magnesach trwałych. S permamagnetgenerator. (411)
28. **portable X-ray generator** : X-ray apparatus that can be conveniently carried from one place to another. ★ générateur portable → *générateur 26.* R переносный рентгеновский аппарат. D tragbarer Röntgengenerator. E generador portátil de rayos X. I impianto radiologico portatile. N draagbare röntgengenerator. P zestaw rentgenowski przenośny. S bärbar röntgenapparat. (881)

29. **power output of a high voltage generator** : → *output 58*
30. **self-contained X-ray generator** : X-ray apparatus in which the high-voltage generator and the X-ray tube are in one container. ★ bloc radiogène → *bloc 12.* R рентгеновский аппарат, объединенный с генератором. D Einkessel-(Röntgen-)Generator. E generador autocontenido de rayos X. I apparecchio per raggi X monoblocco. N zelfgenererende röntgengenerator. P generator rentgenowski głowicowy. S entanksapparat. (881)
31. **signal generator** (for measuring purposes) : a source of electrical signals, whose characteristics (waveform, frequency, voltage, etc.) can be fixed or controlled within specified limits. ★ générateur de signaux → *générateur 15.* R генератор сигналов (измерительный). D Signalgenerator (für Messzwecke). E generador de señales (para medidas). I generatore di segnale (da usare nelle misure). N signaalgenerator (voor meetdoeleinden). P generator sygnałowy (pomariowy). S signalgenerator. (303,702)
32. **single-peak generator** (*Syn.* half-wave apparatus) : → *apparatus 10*
33. **six-peak generator** (*Syn.* three-phase apparatus) : → *apparatus 18*
34. **special effects generator** : equipment designed for providing special effects on television pictures. ★ générateurs d'effets spéciaux → *générateur 29.* R генератор спецэффектов. (723)
35. **stabilized shunt (generator)** : → *shunt 19*
36. **stored-energy generator** (*Syn.* stored-energy apparatus) : → *apparatus 17*
37. **synchronizing pulse generator** : generator for supplying synchronising signals, blanking signals, and other signals for controlling the scanning in a picture signal source, and the display. ★ générateur de signaux de base → *générateur 16.* R генератор синхронизирующих импульсов. (723)
38. **synchronous generator** : a synchronous machine for use as a generator. ★ alternateur synchrone → *alternateur 4.* R синхронный генератор. D Synchrongenerator. E alternador síncrono. I alternatore sincrono. N synchrone generator. P prądnica synchroniczna. S synkrongenerator. (411)
39. **test pattern generator** (*Syn.* pattern generator) : → *generator 26*
40. **train power supply generator** (*Syn.* auxiliary supply generator) : an alternating or direct current generator supplying the electrically operated services on a train, including the heating and air-conditioning. ★ génératrice auxiliaire → *générateur 36.* R генератор питания для собственных нужд поезда. D Hilfsgenerator. E generador auxiliar. I generatore ausiliario. N boordnetgenerator. P prądnica pomocnicza. S hjälpkraftgenerator. (811)
41. **turbine-type alternating current generator** : an alternating current generator designed for high-speed operation and having an exciting winding embedded in the slots of a cylindrical steel rotor. *Note.* — In English usage, turbo-generator (turbo-alternator deprecated) would designate the complete turbine and generator set. ★ turbo-alternateur → *turbo-alternateur 2.* R турбогенератор. D (Wechselstrom-) Turbogenerator. E turboalternador. I turboalternatore. N turbogenerator. P turbogenerator. S turbogenerator. (411)
42. **twelve-peak generator** : X-ray apparatus with three-phase power supply and rectifiers connected to produce twelve voltage peaks to the X-ray tube, with the anode positive with respect to the cathode during one cycle of the power supply. ★ générateur à douze crêtes → *générateur 6.* R двенадцатипиковый генератор. D Zwölfpulsgenerator. E generador de doce crestas. I generatore esafase. N twaalfpulsgenerator. P generator rentgenowski dwunastopulsowy. S tolvpulsapparat. (881)
43. **two-peak generator** (*Syn.* full-wave apparatus) : → *apparatus 8*
44. **unit generator transformer** : → *transformer 77*
45. **voltage-multiplying generator** (*Syn.* cascade generator) : → *generator 9*
46. **Ward-Léonard generator set** : → *set 62*
47. **X-ray generator** (*Syn.* X-ray apparatus) : → *apparatus 20*

generic

1. **generic PCM** (*Syn.* generic pulse code modulation) : → *modulation 23*
2. **generic pulse code modulation** : → *modulation 23*

genetic

1. **genetic effects** : → *effect 26*

genetically

1. **genetically significant dose** : → *dose 31*

gentex

1. **gentex network** : → *network 25*

geographic

1. **geographic range** (*Syn.* geographical range) : → *range 33*

geographical

1. **geographical range** : → *range 33*

geometric

1. **geometric attenuation** : → *attenuation 20*
2. **geometric buckling** : → *buckling 1*
3. **geometric distortion** : → *distortion 41*
4. **geometric error** : → *error 44*
5. **geometric extent** : → *extent 1*
6. **geometric optics** : → *optic 3*

geometrical

1. **geometrical optics** : → *optic 4*

geometry

1. **geometry test chart** : → *chart 2*

geostationary

1. **geostationary satellite** : → *satellite 4*
2. **geostationary satellite orbit** : → *orbit 5*

geosynchronous

1. **geosynchronous satellite** : → *satellite 6*

geothermal

1. **geothermal power station** : → *power station 5*

germicidal

1. **germicidal lamp** (*Syn.* bactericidal lamp) : → *lamp 3*
2. **germicidal radiation** : → *radiation 30*

getter

1. **getter** : a substance, within an electronic tube, that decreases or stabilizes the residual gas pressure by chemical or physical action. ★ getter → *getter 1.* R газопоглотитель. D Getter. E getter. I getter (assorbitore). N gasbinder. P pochłaniacz gazów; getter. S getter. (531)

ghost

1. **ghost** : a spurious additional image of a picture highlight caused by photoelectrons reflected from the target at high velocity and subsequently returning to it at other locations. ★ fantôme → *fantôme 3.* R побочное изображение. D Geisterbild. E fantasma. I fantasma. N echobeeld. P zjawa (odbiciowa). S spökbild. (531)
2. **ghost** (*Syn.* echo (in television)) : an additional image, positive or negative, which may be seen displaced from the main image. ★ écho → *écho 9.* R повторные изображения; эхо. (723)

Giaever

1. **Giaever (normal electron) tunnelling** : → *tunnelling 1*

Gibbs

1. **Gibbs free energy** : → *energy 51*
2. **Gibbs function** (*Syn.* Gibbs free energy) : → *energy 51*

girder

1. **girder** (*Syn.* beam gantry) : → *gantry 2*

glare

1. **direct glare** : glare caused by self-luminous objects situated in the visual field, especially near the line of sight.

★ éblouissement direct → *éblouissement 2.* R прямая блёскость. D Infeldblendung; direkte Blendung. E deslumbramiento directo. I abbagliamento diretto. N directe verblinding. P olśnienie bezpośrednie. S direktbländning. (845)

2. **disability glare** : glare that impairs the vision of objects without necessarily causing discomfort. ★ éblouissement perturbateur → *éblouissement 5.* R слепящая блёскость. D physiologische Blendung. E deslumbramiento preturbador. I abbagliamento fisiologico. N maskerende verblinding; storende verblinding. P olśnienie przeszkadzające. S synnedsättande bländning. (845)
3. **discomfort glare** : glare that causes discomfort without necessarily impairing the vision of objects. ★ éblouissement inconfortable → *éblouissement 3.* R дискомфортная блёскость. D psychologische Blendung. E deslumbramiento molesto. I abbagliamento psicologico. N hinderlijke verblinding; onbehaaglijke verblinding. P olśnienie przykre. S obehagsbländning. (845)
4. **glare** : condition of vision in which there is discomfort or a reduction in the ability to see details or objects, caused by an unsuitable distribution or range of luminance, or to extreme contrasts. *Note.* — The Russian term relates to the properties of the light sources and other luminous surfaces which disturb the condition of vision, and not to the changed condition of vision caused by an unsuitable distribution of luminance in the visual field. ★ éblouissement → *éblouissement 1.* R блёскость. D Blendung. E deslumbramiento. I abbagliamento. N verblinding. P olśnienie. S bländning. (845)
5. **glare by reflection** : glare produced by reflections, particularly when the reflected images appear in the same or nearly the same direction as the object viewed. *Note.* — Formerly "reflected glare". ★ éblouissement par réflexion → *éblouissement 4.* R отраженная блёскость. D Reflexblendung. E deslumbramiento reflejado. I abbagliamento da luce riflessa. N verblinding door reflectie. P olśnienie odbiciowe. S reflexbländning. (845)

glass

1. **annealed glass** : glass which has been treated to eliminate internal stresses. ★ verre recuit → *verre 9.* R отожженное стекло. D nichtvorgespanntes Glas. E vidrio recocido. I vetro ricotto. N spanningsvrij glas. P szkło odprężane. S avhärdat glas. (471)
2. **ceramic glass (material)** : a partly crystallized glass. ★ verre céramique → *verre 7.* R керамическое стекло. D Glaskeramik. E vidrio cerámico. I vetro ceramica. N sinterglas. P szkło ceramika; dewitryfikat. S glaskeram. (212)
3. **glass** : an inorganic material, usually an oxide or a mixture of oxides, produced by melting and subsequently solidifying essentially without crystallization. ★ verre → *verre 5.* R стекло. D Glas. E vidrio. I vetro. N glas. P szkło. S glas. (212)
4. **hard glass bulb** : → *bulb 9*
5. **infra-red glass panel emitter** : → *emitter 11*
6. **lead glass** : glass, containing a high proportion of lead compounds to increase the attenuation of radiation passing through it, used as a transparent protective barrier. ★ verre au plomb → *verre 6.* R свинцовое стекло. D Bleiglas. E vidrio al plomo. I vetro piombifero. N loodglas. P szkło ołowiowe. S blyglas. (881)
7. **pressed glass lamp** : → *lamp 49*
8. **protective glass** : transparent or translucent part of an open or closed luminaire designed to protect the lamp(s) from dust or dirt, or to prevent their contact with liquids, vapours or gases and to render them inaccessible. ★ verrine → *verrine 1.* R защитное стекло. D Schutzglas. E vidrio protector. I vetro di protezione. N schutglas. P szkło ochronne. S skyddsglas. (845)
9. **toughened glass** : glass in which pre-stresses have been created in order to improve its mechanical characteristics. ★ verre trempé → *verre 10.* R закаленное стекло. D vorgespanntes Glas. E vidrio templado. I vetro temprato. N gehard glas. P szkło hartowane. S härdat glas. (471)
10. **Wood's glass lamp** (*Syn.* black light lamp) : → *lamp 4*

glaze

1. **glaze** (on ceramic) : a substantially glassy, smooth coating bonded to the surface by fusion. The coating may contain colouring or opacifying inorganic substances. *Note.* — Some glazes may be conducting or semiconducting. ★ émail → *émail 2.* R глазурь (на керамике). D Glasur (auf Keramik). E esmaltado (sobre cerámica). I smalto (su ceramica). N glazuur. P szkliwo (na ceramice); polewa. S glasyr. (212)
2. **glaze** (on paper or board) : a lustrous surface finish imparted to paper or board by any appropriate drying or mechanical finishing process. ★ glacé → *glacer 1.* R глазурованная поверхность (бумаги и картона). D Oberflächenglanz (auf Papier oder Pappe). E lustre (sobre papel o cartón). I pattinatura. N ..... P satynowanie (papieru, płyt). S glätt. (212)
3. **glaze** : a glassy surface layer on the insulating part of a ceramic insulator. ★ émail → *émail 3.* R глазурь. D Glasur. E esmalte. I smalto. N glazuur. P szkliwo. S glasyr. (471)
4. **semiconducting glaze** : a glaze having a resistivity lower than that of a usual ceramic material or glaze so that its surface resistivity generally lies in the range of $10^4\Omega$ to $10^7\Omega$. ★ émail semi-conducteur → *émail 4.* R полупроводящая глазурь. D halbleitende Glasur. E esmalte semiconductor. I smalto semiconduttore. N halfgeleidend glazuur. P szkliwo półprzewodzące. S halvledande glasyr. (471)

global

1. **global illuminance** : → *illuminance 1*
2. **global solar radiation** : → *radiation 31*
3. **reflected (global) solar radiation** : → *radiation 103*

globe

1. **globe** (*Syn.* trolley-shield) : → *trolley-shield 1*
2. **globe** : envelope of transparent or diffusing material, intended to protect the lamp, to diffuse the light, or to change the colour of the light. ★ globe → *globe 1,* R шар. D Leuchtenglocke. E globo. I globo. N ballon. P klosz. S lampkupa. (845)

gloss

1. **gloss** (of a surface) : the mode of appearance by which reflected highlights of objects are perceived as superimposed on the surface due to the directionally selective properties of that surface. ★ brillant → *brillant 1.* R глянец (поверхности). D Glanz (einer fläche). E brillo. I lucentezza. N glans. P połysk. S glans. (845)

glossmeter

1. **glossmeter** : instrument of measuring the various photometric properties of a surface giving rise to gloss. ★ luisancemètre → *luisancemètre 1.* R глянцеметр. D Glanzmesser. E brillómetro. I lucentimetro. N glansmeter. P połyskomierz. S glansmätare. (845)

glove

1. **glove box** : → *box 7*
2. **insulated gloves method** : → *method 11*
3. **protective gloves** : gloves made of attenuating materials, used to reduce radiation exposure or to prevent contamination of the skin of the hands. ★ gants protecteurs → *gant 2.* R защитные перчатки. D Strahlenschutz-Handschuhe. E guantes protectores. I guanti protettivi. N beschermende handschoenen. P rękawice ochronne. S strålskyddshandskar. (881)
4. **rubber gloves method** (*Syn.* insulated gloves method) : → *method 11*

glow

1. **glow discharge** : → *discharge 21*
2. **glow discharge** : → *discharge 22*
3. **glow discharge tube** : → *tube 38*
4. **glow indicator tube** : → *tube 39*

go

1. **go channel** : → *channel 29*

gonadal

1. **gonadal dose** : → *dose 32*

goniophotometer

1. **goniophotometer** : photometer for measuring the directional light distribution characteristics of sources, luminaires, media or surfaces. ★ goniophotomètre → *goniophotomètre 1.* R гониофотометр. D Goniophotometer. E goniofotómetro. I goniofotometro. N goniofotometer. P goniofotometr. S goniofotometer. (845)

gonioradiometer

1. **gonioradiometer** : radiometer for measuring the directional radiation distribution characteristics of sources, luminaires, media or surfaces. ★ gonioradiomètre → *gonioradiomètre 1.* R гониорадиометр. D Gonioradiometer. E gonioradiómetro. I gonioradiometro. N gonioradiometer. P gonioradiometr. S gonioradiometer. (845)

Goubau

1. **Goubau line** : → *line 43*

gouging

1. **air-arc cutting and gouging electrode** : → *electrode 3*

governor

1. **speed governor** : a device which adjusts the intake valves of the turbine in order to maintain the speed of rotation at a required value. ★ régulateur de vitesse → *régulateur 7.* R регулятор скорости. D Drehzahlregler. E regulador de velocidad. I regolatore di giri. N snelheidsregelaar. P regulator obrotów. S varvtalsregulator. (602)

grade

1. **grade of service** : the value of a traffic engineering quantity used to provide a measure of adequacy of a group of resources to carry traffic under specified conditions. *Note.* — This traffic engineering quantity may be a proportion of time-out overlays, probability of loss, dial-tone delay, etc. ★ qualité d'écoulement du trafic → *qualité 17.* D Verkehrsgüte. P stopień obsługi. (715)

graded

1. **capacitance graded bushing** : → *bushing 4*
2. **graded index fibre** : → *fibre 11*
3. **graded index profile** : → *profile 4*

gradient

1. **equivalent gradient** : the vertical gradient, assumed constant, of the refractive index of a hypothetical atmosphere such that the actual propagation path is replaced by a circular arc terminating at the same points as the actual path and tangential to the latter at one end, generally that end closer to the ground. ★ gradient équivalent → *gradient 4.* D äquivalenter Gradient. P gradient zastępczy. (705)
2. **gradient** (of a scalar field) : a vector quantity normal to a surface of constant value of the field, having a magnitude equal to the derivative of the field in the normal direction and being directed in the sense of increasing value of the field.

$$\mathbf{grad}\, f = \nabla f = \frac{\partial f}{\partial n}\, \boldsymbol{n}$$

★ gradient → *gradient 2.* R градиент (скалярного поля). D Gradient (eines Skalarfeldes). E gradiente (de un campo escalar). I gradiente (di un campo scalare). N gradiënt. P gradient. S gradient. (101)
3. **ionization gradient component** : → *component 35*
4. **ocean or sea temperature gradient power station** : → *power station 15*
5. **specific resistance on inclined track (gradient)** : → *resistance 64*
6. **standard refractive modulus gradient** (*Syn.* standard-M gradient) : that standard value of vertical gradient of refractive modulus which corresponds to the standard refractivity gradient. *Note.* — This value is +117 M-units per kilometre. ★ gradient normal du module de réfraction → *gradient 6.* D Richtwert des modifizierten Brechwertes; durchschnittlicher M-Gradient. P gradient modułu załamania standardowy. (705)
7. **standard refractivity gradient** (*Syn.* standard-N gradient) : a standard value of vertical gradient of refractivity namely — 40 N-units per kilometre. *Note.* — This value corresponds approximately to the median value of the gradient in the first kilometre of altitude in temperate regions. ★ gradient normal (du coïndice) → *gradient 5.* D Richtwert des Brechwertgradienten; durchschnittlicher N-Gradient. P gradient refraktywności standardowy. (705)
8. **standard-M gradient** (*Syn.* standard refractive modulus gradient) : → *gradient 6*
9. **standard-N gradient** (*Syn.* standard refractivity gradient) : → *gradient 7*
10. **vertical ionization gradient** (component) : the partial derivative of the electron density with respect to height. ★ gradient vertical d'ionisation → *gradient 7.* D senkrechter Ionisationsgradient. P gradient pionowy jonizacji (składowa). (705)

grading

1. **grading** : the ordered permutation of the pattern of the multiple of a switching stage in order to improve the traffic carrying characteristics in a limited availability group. ★ gradation → *gradation 1.* R ступенчатое включение. D Mischung. E gradación. I ripartizione. N gradering. P stopniowanie. S gradering. (714)
2. **grading screen** : → *screen 8*
3. **resistance grading (of corona shielding)** : a form of corona shielding embodying high resistance material on the surface of the coil. ★ dispositif antieffluves à haute résistance → *dispositif 13.* R противокоронное покрытие. D Potentialsteuerung (Glimmschutz) mit hohem Widerstand. E dispositivo antiefluvios de gran resistencia. I dispositivo anti-effluvi ad alta resistenza. N ontladingsscherm met hoge weerstand. P oporowa powłoka ochronna przed wyładowaniami ślizgowymi. S resistivt glimskydd. (411)
4. **voltage grading** : the reduction of marked inequalities of potential gradient in or along an insulator or insulation. ★ répartition des potentiels → *répartition 21.* R распределение потенциалов. D Potentialsteuerung. E reparto de potenciales. I ripartizione dei potenziali. N potentiaalverdeling. P stopniowanie napięcia. S spänningsutjämning. (151)

gradual

1. **gradual failure** : → *failure 27*

grain-oriented

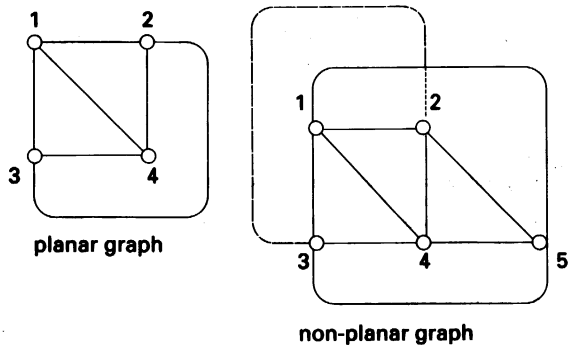
1. **grain-oriented material** : → *material 15*

gramophone

1. **gramophone** (*Syn.* phonograph) : an electroacoustic device including a record player, an amplifying system and one or more built-in or separate loudspeakers. ★ électrophone → *électrophone 1.* R электрофон. D Phonokoffer. E tocadiscos; gramófono. I grammofono; fonografo. N grammofoon. P gramofon. S grammofon. (806)

gram-rad

1. **gram-rad** : the earlier special unit of mean energy imparted. 1 gram-rad = 10^{-5} J = 10^{-5} . Gy.kg. ★ rad-gramme → *rad-gramme 1.* R грамм-рад. D Gramm-rad. E rad-gramo. I grammo-rad. N gramrad. P gram-rad. S gramrad. (881)



granules

1. **granules** : small plastic grains manufactured to be used in moulding disks. ★ granules → *granules 1.* R гранулы. D Granulat. E gránulos. I granuli. N korrels. P ziarenka. S granulat. (806)

graph

1. **Arrhenius graph** (*Syn.* thermal endurance graph) : → *graph 4*
2. **graph of a network** : graphical representation of a network with lumped circuit elements in which branches are represented by line segments and nodes by dots. ★ graphe d'un réseau → *graphe 1.* R граф схемы. D Graph eines Netzwerks. E grafo de una red. I grafo di una rete. N graaf van een netwerk. P graf układu. S graf. (131)

3. **planar graph** : a graph which can be drawn on a plane without crossing of branches.

★ graphe planaire → *graphe 2.* R планарный граф. D ebener Graph; planarer Graph. E plano. I grafo piano. N planaire graaf. P graf płaski. S plan graf. (131)

4. **thermal endurance graph** (*Syn.* Arrhenius graph) : a graph in which the logarithm of time to reach a specified end-point in a thermal endurance test is plotted versus the reciprocal thermodynamic (absolute) test temperature. ★ graphique d'endurance thermique → *graphique 2.* R кривая нагревостойкости; кривая Аррениуса. D thermisches Langzeitverhaltensdiagramm; Arrhenius-Diagramm. E gráfica de la endurancia térmica; gráfica de Arrhennius. I grafico di vita termica; grafico di Arrhenius. N thermische levensduurkromme; Arrhenius-kromme. P wykres wytrzymałości cieplnej. S Arrheniusdiagram. (212)

graphics

1. **computer graphics** (in television) : the technique associated with the production of computer generated images. ★ infographie → *infographie 1.* R компьютерная графика (в телевидении). (723)
2. **computer graphics equipment** : → *equipment 14*
3. **graphics tablet** : → *tablet 1*

graphitizing

1. **graphitizing** : a heat treatment applied to cast irons of hypereutectoid steels to promote the total or partial precipitation of carbon in the form of graphite. ★ graphitisation → *graphitisation 1.* R графитизация. D Graphitierung. E grafitización. I grafitizzazione. N grafitiserend gloeien. P grafityzowanie. S grafitering. (841)

Grassmann

1. **Grassmann's laws** : → *law 4*

grating

1. **diffraction grating** : an array of fine, parallel, equally spaced reflecting or transmitting lines that mutually enhance the effects of diffraction to concentrate the diffracted light in a few directions determined by the spacing of the lines and the wavelength of the light. ★ réseau de diffraction → *réseau 85.* R дифракционная решетка. D Beugungsgitter. E reja de difracción. I reticolo di diffrazione. N buigingstralie. P siatka dyfrakcyjna. S diffraktionsgitter. (731)

gravity

1. **gravity dam** : → *dam 4*
2. **gravity feed furnace** (*Syn.* sloping hearth furnace) : → *furnace 53*
3. **gravity switch** (*Syn.* switch hook) : → *hook 2*

gray

1. **gray** (Gy) : the special name of the SI unit of absorbed dose, kerma and specific energy imparted. 1 Gy = 1 $J.kg^{-1}$. ★ gray → *gray 1.* R грей. D Gray. E gray. I gray. N gray (Gy). P grau. S gray. (881)
2. **gray body** (*Syn.* grey body) : → *body 7*

grazing

1. **grazing angle** : → *angle 28*
2. **grazing incidence** : → *incidence 4*

greaseproof

1. **greaseproof (paper)** : → *paper 5*

green

1. **heating conductor green rot** : → *rot 1*

Gregorian

1. **gregorian reflector antenna** : → *antenna 57*

Grenz

1. **Grenz rays** : → *ray 9*

grey

1. **grey body** : → *body 7*
2. **grey level** : → *level 26*
3. **grey scale** : → *scale 4*
4. **grey scale distortion** : → *distortion 42*
5. **grey scale tracking** : → *tracking 2*

grid

1. **anti-scatter grid** : a device consisting of alternating strips of radiolucent and radio-opaque materials that allow primary radiation (useful beam) to pass and absorb some oblique secondary radiation. ★ grille antidiffusante → *grille 12.* R отсеивающая рентгеновская решетка. D Streustrahlenraster. E rejilla antidispersante; rejilla antidifusora. I griglia antidiffusione. N anti-stroolingsrooster. P siatka przeciwrozproszeniowa. S sekundärraster. (881)
2. **barrier grid** : a grid, placed very close to the storage surface or on this surface, which establishes an equilibrium potential for the secondary electrons coming from the target, and reduces variations in the distribution of the charges already arranged on the storage surface. ★ grille d'arrêt → *grille 17.* R барьерная сетка. D Sperrgitter. E rejilla supresora (de un tubo de memoria). I griglia soppressore (di un tubo a memoria). N keerrooster. P siatka zaporowa. S spärrgaller. (531)
3. **control grid** (of an electronic tube) : a control electrode in the form of a grid. ★ grille de commande → *grille 18.* R управляющая сетка. D Steuergitter. E rejilla de control. I griglia di comando. N stuurrooster. P siatka sterująca. S styrgaller. (531)
4. **critical grid current** : → *current 39*
5. **critical grid voltage** : → *voltage 39*
6. **cross grid** : an anti-scatter grid consisting of two linear grids built together in such a way that their strips form an angle. ★ grille croisée → *grille 13.* R перекрестная решетка. D Kreuzraster. E rejilla cruzada. I griglia a lamelle incrociate. N kruisrooster. P siatka krzyżowa. S korsraster. (881)
7. **de-ionizing grid** (of an electronic tube) : a grid designed to assist de-ionization. ★ grille de désionisation → *grille 20.* R деионизирующая сетка. D Entionisierungselektrode. E rejilla de desionización. I griglia di deionizzazione. N deïonisatierooster. P siatka dejonizacyjna. S avjoniseringsgaller. (531)
8. **focused grid** ; a linear grid where the planes of its absorbing strips converge to a line at the focusing distance. ★ grille de focalisation → *grille 21.* R фокусированная решетка. D fokussierte Streustrahlenraster. E rejilla de focalización. I griglia focalizzata. N gefocusseerd rooster. P siatka ogniskująca. S fokuserat raster. (881)
9. **grid** (of an electronic tube) : an electrode having one or more apertures for the passage of electrons or ions. ★ grille → *grille 8.* R сетка. D Gitter. E rejilla. I griglia. N rooster. P siatka. S galler. (531)
10. **grid** (of an X-ray tube) : an electrode between the cathode and anode that controls the electron beam. ★ grille → *grille 9.* R сетка (рентгеновской трубки). D Gitter (einer Röntgenröhre). E rejilla (de un tubo de rayos X). I griglia (di un tubo a raggi X). N rooster (van een röntgenbuis). P siatka (lampy rentgenowskiej). S galler. (881)
11. **grid bias voltage** : → *voltage 76*
12. **grid bias voltage** : → *voltage 77*
13. **grid/cathode driving voltage** : → *voltage 78*
14. **grid control** : → *control 113*
15. **grid current** : → *current 99*
16. **grid driving power** (*Syn.* grid input power) : → *power 66*

17. **grid driving voltage** (*Syn.* grid input voltage) : → *voltage 80*
18. **grid input power** : → *power 66*
19. **grid input voltage** : → *voltage 80*
20. **grid ionization chamber** : → *ionization chamber 13*
21. **grid type plate** (*Syn.* pasted plate) : → *plate 15*
22. **linear grid** : an anti-scatter grid composed of plane strips which are parallel. ★ grille linéaire → *grille 27.* R линейная решетка. D lineare Streustrahlenraster. E rejilla lineal. I griglia lineare. N lineair rooster. P siatka liniowa. S linjeraster. (881)
23. **moving grid** : a grid which is kept in motion during X-ray exposure, in order to avoid the formation of an image of the strips. ★ grille mobile → *grille 28.* R подвижная решетка. D Laufraster. E rejilla móvil. I griglia mobile. N bewegend rooster. P siatka ruchoma. S rörligt raster. (881)
24. **orthogonal grid** : a cross grid where the angle between strips is 90°. ★ grille orthogonale → *grille 29.* R ортогональная решетка. D orthogonale Kreuzraster. E rejilla ortogonal. I griglia a lamelle ortogonali. N orthogonaal rooster. P siatka ortogonalna. S rätvinkligt korsraster. (881)
25. **screen grid** : a grid, located between a control grid and an anode, to reduce the electrostatic influence of the anode in the space between the screen grid and the cathode. ★ grille écran → *grille 25.* R экранирующая сетка. D Schirmgitter. E rejilla pantalla. I griglia schermante o schermo. N schermrooster. P siatka ekranująca. S skärmgaller. (531)
26. **shadow grid** : a grid, located between the control grid and the screen grid, the wires of which are substantially aligned with those of the screen grid, and intended primarily to reduce the screen-grid current. ★ grille alignée → *grille 11.* R теневая сетка. D Schattengitter. E rejilla alineada. I griglia allineata. N schaduwrooster. P siatka cieniowa. S skuggaller. (531)
27. **shield grid** : a grid that shields the control electrode from electrostatic fields, thermal radiation and deposition of thermionic emissive material, and which may also be used as an additional control electrode. ★ grille de protection → *grille 22.* R защитная сетка. D Abschirmelektrode. E rejilla de protección. I griglia di protezione. N afschermrooster. P siatka osłaniająca. S skärmningsgaller. (531)
28. **stationary grid** : a grid which does not move during X-ray exposure. ★ grille fixe → *grille 26.* R стационарная решетка. D stationäre Streustrahlenraster. E rejilla fija. I griglia fissa. N stationair rooster. P siatka stacjonarna. S fast raster. (881)
29. **suppressor grid** : a grid, located between electrodes (usually the screen grid and the anode), intended primarily to prevent the passage of secondary electrons from one to the other. ★ grille d'arrêt → *grille 16.* R антидинатронная сетка. D Bremsgitter. E rejilla supresora. I griglia di soppressione o soppressore. N remrooster. P siatka hamująca. S bromsgaller. (531)

grid-controlled

1. **grid-controlled arc discharge tube** : → *tube 40*

grillage

1. **grillage foundation** : → *foundation 5*

grip

1. **insulation grip** : that part of a terminal end in which the cable insulation is secured. ★ manchon isolant → *manchon 10.* R зажим изоляции. D Isolationshalterung. E manguito aislante. I manicotto isolante. N isolatiehouder. P uchwyt izolacji (kabla). S klammer för ledarisolering. (581)

grommet

1. **grommet** : a part of a component or an accessory used to support and protect the wires or cable at the point of entry. It may also prevent the ingress of moisture or contaminants. ★ passe-fil → *passe-fil 5.* R втулка крепежная. D (Durchführungs) Dichtung. E pasahilos. I passa-filo per componente. N draaddoorvoer. P przepust (przewodu). S införingsskydd. (581)
2. **grommet ferrule** (*Syn.* grommet follower) : → *grommet 3*
3. **grommet follower** (UK) (*Syn.* grommet ferrule (USA)) : a part of a component or an accessory used to compress the grommet and/or reduce the transmission of torque to the grommet. ★ bague de passe-fil → *bague 7.* R кольцо нажимное. D Dichtungsdruckhülse. E anillo de pasahilos. I anello; anello passacavo; anello passacavo a compressione. N drukbus voor draaddoorvoer. P tuleja ochronna zaciskana. S införingshylsa. (581)
4. **grommet nut** : a part of a component or an accessory used to retain the grommet or grommet and follower. ★ écrou de passe-fil → *écrou 1.* R гайка крепежной втулки. D Dichtungsmutter. E tuerca de pasahilos. I dado del passacavo. N draaddoorvoermoer. P nakrętka przepustu. S införingsmutter. (581)
5. **grommet wire range** : → *range 34*

groove

1. **blank groove** (*Syn.* plain groove) : → *groove 24*
2. **coarse groove** : a groove, the width of which is normally more than 0.15 mm and is cut on disks which are recorded at the rated speed of 78 r.p.m. ★ sillon large → *sillon 22.* R широкая канавка. D «Normal»-Rille. E surco ancho. I solco largo. N normaalgroef. P rowek gruby. S grovt spår. (806)
3. **concentric groove** (*Syn.* locked groove) : → *groove 21*
4. **cross-talk between spiral groove** : → *crosstalk 6*
5. **eccentric groove** : a circular groove, the centre of which is not coincident with the normal axis of rotation of the disk. ★ sillon excentré → *sillon 19.* R эксцентрическая канавка. D exzentrische Rille. E surco excéntrico. I solco eccentrico. N excentrische groef. P rowek mimośrodkowy. S excentriskt spår. (806)
6. **external groove sidewall** : → *sidewall 1*
7. **fine groove** (*Syn.* microgroove) : → *microgroove 1*
8. **finishing groove** : a plain circular groove which follows the lead-out groove. ★ sillon final → *sillon 20.* R заключительная канавка. D Endrille. E surco final. I solco finale. N sluitgroef. P rowek zamykający. S slutspår. (806)
9. **groove** : a track in the form of a spiral with or without modulation, inscribed or moulded in the surface of a disk. ★ sillon → *sillon 11.* R канавка. D Rille. E surco. I solco. N groef. P rowek. S spår. (806)
10. **groove angle** : → *angle 29*
11. **groove depth** : → *depth 6*
12. **groove guard** : → *guard 3*
13. **groove shape** : the cross-section of the groove in a radial plane. It is defined in terms of top width, included angle, and bottom radius. ★ profil du sillon → *profil 13.* R профиль канавки. D Rillenform. E perfil del surco. I profilo del solco. N groefdoorsnede. P kształt rowka. S spårform. (806)
14. **groove speed** : → *speed 17*
15. **groove width** : the radial distance between the intersections of the groove sidewalls and the surface plane of the disk. ★ largeur du sillon → *largeur 20.* R ширина канавки. D Rillenbreite. E anchura del surco. I larghezza del solco. N groefbreedte. P szerokość rowka. S spårbredd. (806)
16. **horns of a groove** : → *horn 12*
17. **internal groove sidewall** : → *sidewall 2*
18. **lead-in groove** : a plain groove that starts at the periphery of the record and the pitch of which is greater than the normal recording pitch. ★ sillon de départ → *sillon 17.* R вводная канавка. D Einlaufrille. E surco de entrada. I solco di attacco. N inloopgroef. P rowek wprowadzający. S ingångsspår. (806)
19. **lead-out groove** : a plain groove which follows the modulated groove, whose pitch is greater than the normal recording pitch. ★ sillon de sortie → *sillon 18.* R выводная канавка. D Auslaufrille. E surco de salida. I solco di uscita. N uitloopgroef. P rowek wyprowadzający. S utgångsspår. (806)
20. **lead-over groove** : a spiral groove connecting two sections or bands of a disk. ★ sillon interplages → *sillon 21.* R соединительная канавка. D Kennrille. E surco de enlace. I solco intermedio. N kengroef. P rowek przejściowy. S övergångsspår. (806)
21. **locked groove** (*Syn.* concentric groove) : an unmodulated locked continuous circular groove whose centre is coincident with the centre of the recording spiral. It follows a modulated groove and is used for the purpose of preventing further inward or outward movement of the pick-up. ★ sillon concentrique → *sillon 16.* R концентрическая канавка. D konzentrische Endrille. E surco concéntrico. I solco concentrico. N gesloten groef. P rowek współśrodkowy. S koncentriskt spår. (806)
22. **modulated groove** : a groove containing lateral or vertical, or 45° × 45° stereophonic recording. ★ sillon modulé → *sillon 23.* R модулированная канавка. D modulierte Rille.

E surco modulado. I solco modulato. N gemoduleerde groef. P rowek modulowany. S modulerat spår. (806)

23. **oil grooves** : grooves cut in the surface of the bearing lining or sometimes in the journal to help to distribute the oil over the bearing surface. ★ rainures de graissage → *rainure 3.* R смазочные канавки. D Schmiernuten. E ranuras de engrase; patas de araña. I scanalature di lubrificazione. N oliegroeven. P rowek olejowy. S smörjspår. (411)
24. **plain groove** (*Syn.* blank groove) : any length of groove which carries no recording. ★ sillon blanc → *sillon 15.* R немая канавка. D Leerrille. E surco en blanco; surco no modulado. I solco non modulato. N ongemoduleerde groef. P rowek niemodulowany. S omodulerat spår; tomgångsspår. (806)
25. **variable groove depth** : → *depth 13*
26. **variable groove pitch** : → *pitch 15*

grooved

1. **grooved cable** : → *cable 31*
2. **grooved hearth furnace** : → *furnace 20*

gross

1. **degree of gross start-stop distortion** : → *degree 6*
2. **gross average heat rate of a unit** : → *rate 40*
3. **gross charge per tonne** : → *charge 33*
4. **gross head of a hydroelectric power station** : → *head 5*
5. **(gross) load hauled** : → *load 18*
6. **gross output of a power station** : → *output 11*
7. **gross output of a set** : → *output 12*
8. **gross thermal efficiency of a unit** : → *efficiency 25*
9. **gross traffic hauled** : → *traffic 7*
10. **total gross load (of a train)** : → *load 80*
11. **total gross traffic** : → *traffic 23*

ground

1. **aeronautical ground light** : → *light 1*
2. **double line to ground fault** (*Syn.* two-phase-to-earth fault) : → *fault 82*
3. **ground** (*Syn.* earth) : → *earth 2*
4. **ground based duct** : → *duct 9*
5. **ground clearance** : → *clearance 12*
6. **ground conductor** (*Syn.* earth conductor) : → *conductor 32*
7. **ground electrode** (*Syn.* earth electrode) : → *electrode 23*
8. **ground mat** (*Syn.* earth mat) : → *mat 1*
9. **ground plate** (*Syn.* earth plate) : → *plate 4*
10. **ground (reference) plane** : → *plane 5*
11. **ground rod** (*Syn.* earth rod) : → *rod 5*
12. **ground state** : → *state 19*
13. **ground strip** (*Syn.* earth strip) : → *strip 2*
14. **ground system** : → *system 76*
15. **ground wave** : → *wave 17*
16. **ground wire** (*Syn.* earth wire) : → *wire 7*
17. **impedance to ground** (*Syn.* impedance to earth) : → *impedance 24*
18. **line to ground voltage** (*Syn.* phase to earth voltage) : → *voltage 140*
19. **overhead ground wire** (*Syn.* earth wire) : → *wire 6*
20. **overhead ground wire peak** (*Syn.* earth wire peak) : → *peak 6*
21. **remote ground** (*Syn.* remote earth) : → *earth 33*
22. **separate ground electrodes** (*Syn.* separate earth electrodes) : → *electrode 86*
23. **single line to ground fault** (*Syn.* phase-to-earth fault) : → *fault 67*
24. **to ground** (*Syn.* to earth) : → *earth 35*

ground-coupled

1. **ground-coupled interference** (*Syn.* earth-coupled interference) : → *interference 3*

grounded

1. **grounded input** (*Syn.* earthed input) : → *input 7*
2. **grounded output** (*Syn.* earthed output) : → *output 6*
3. **grounded voltage transformer** (*Syn.* earthed voltage transformer) : → *transformer 29*

grounding

1. **grounding for work** (*Syn.* earthing for work) : → *earthing 6*
2. **grounding inductor** (*Syn.* earthing inductor) : → *inductor 4*
3. **grounding network** (*Syn.* earthing network) : → *network 21*
4. **grounding system** (*Syn.* earthing system) : → *system 55*
5. **grounding transformer** (*Syn.* three-phase earthing transformer) : → *transformer 67*
6. **operational grounding** (*Syn.* operational earthing) : → *earthing 16*

ground-plane

1. **ground-plane antenna** : → *antenna 58*

ground-wire

1. **ground wire** (*Syn.* earth wire) : → *wire 7*
2. **ground-wire** (*Syn.* overhead earth wire) : → *wire 17*
3. **overhead ground wire** (*Syn.* earth wire) : → *wire 6*
4. **overhead ground wire peak** (*Syn.* earth wire peak) : → *peak 6*

group

1. **basic group** : a group occupying the frequency band 60-108 kHz. ★ groupe primaire de base → *groupe 58.* R основная первичная группа; основная первичная группа В (нежелательный); первичная группа В (устаревший термин). D Basisprimärgruppe. E grupo primario de base; grupo básico B. I gruppo primario di base. N basisgroep. P grupa pierwotna podstawowa B. S grundgrupp. (704)
2. **cam group** : a switchgroup formed of contactors or interrupting devices operated by cams. ★ combinateur à cames → *combinateur 2.* R кулачковый групповой переключатель. D Nockenschaltwerk. E combinador de levas. I combinatore a camme. N nokkenwals. P nastawnik krzywkowy. S kamkontroller. (811)
3. **circuit group** (*Syn.* set of circuits; trunk group) : a group of traffic circuits having the same selection criteria. ★ faisceau (de circuits) → *faisceau 24.* R пучок (каналов). D Leitungsgruppe. E grupo (de circuitos). I fascio (di giunzioni). N bundel. P grupa łączy. S riksgrupp; trunkgrupp. (714,715)
4. **closed user group** : a user group on the public switched network whose terminals have the facility to communicate only with each other. *Note.* — A terminal may belong to more than one closed user group. ★ groupe fermé d'usagers → *groupe 42.* R замкнутая группа абонентов. D geschlossene Benutzergruppe; Teilnehmerbetriebsklasse. E grupo cerrado de usuarios. I gruppo chiuso. N besloten gebruikersgroep. P zamknięta grupa użytkowników. S sluten användargrupp. (721)
5. **commutating group** : a group of principal arms which commutate cyclically among themselves without intermediate commutation of the current to other principal arms. ★ groupe commutant → *groupe 30.* R коммутирующая группа. D Kommutierungsgruppe. E grupo conmutador. I gruppo commutante. N commutatiegroep. P grupa komutacyjna. S kommuteringsgrupp. (551)
6. **contactor group** : a frame or case in which a number of contactors are mounted. ★ batterie de contacteurs → *batterie 19.* R группа контакторов. D Schaltergruppe; Schuetzegerüst. E bateria de contactores. I gruppo di contattori. N contactorrek. P zespół stycznikowy. S kontaktorstativ. (811)
7. **equivalent line group** (*Syn.* PBX group) : → *group 48*
8. **equivalent random circuit group** : the circuit group associated with an equivalent random traffic intensity. ★ faisceau équivalent → *faisceau 41.* D äquivalentes Bündel. P wiązka (łączy) równoważna imtensywności losowej ruchu. (715)
9. **final circuit group** : a circuit group which receives overflow traffic and does not overflow it self. ★ faisceau final → *faisceau 42.* D Letztbündel. P wiązka (łączy) wyboru końcowego. (715)
10. **first choice circuit group** : a trunk group to be used on a first priority basis if a free circuit from this group is available. ★ faisceau de premier choix → *faisceau 33.* R пучок

каналов первого выбора. D Erstweg. E grupo de circuitos preferente. I fascio di prima scelta. N eerste-keuze-bundel. P wiązka pierwszego wyboru. S förstahandsval. (714,721)

11. **first choice circuit group** : a circuit group to be used on a first priority basis to carry a given traffic parcel. ★ faisceau de premier choix → *faisceau 34.* D Erstbündel. P wiązka (łączy) pierwszego wyboru. (715)

12. **fully provided circuit group** : a circuit group which is at the same time the first and last choice circuit group with respect to a given traffic parcel. ★ faisceau suffisant → *faisceau 45.* D Alleinwegbündel. P wiązka (łączy) doskonała. (715)

13. **group** (of an electrical apparatus for explosive atmospheres) : a classification of electrical apparatus related to the explosive atmosphere for which it is to be used. *Note.* — IEC Publication 79 defines two groups : Group I, electrical apparatus for mines susceptible to fire damp ; Group II, which can be divided into sub-groups, electrical apparatus for all places with an explosive gas atmosphere other than mines susceptible to fire damp. ★ groupe → *groupe 21.* R группа (взрывозащищенного электрооборудования). D Gruppe. E grupo (de un material eléctrico para atmósferas explosivas). I gruppo (di una costruzione elettrica per atmosfere esplosive). N groep (van elektrisch materieel voor plaatsen met ontploffingsgevaar). P grupa urządzeń elektrycznych. S explosionsgrupp. (426)

14. **group** : 1. The assembly, obtained by frequency division multiplexing of a specified number of FDM telephone channels, normally 12, in adjacent positions in a frequency band of specified width, constituting the first level in the standardized frequency division multiplex hierarchy. 2. A frequency band of standardized width, 48 kHz, in a multichannel carrier system and occupying one of a number of specified positions in the spectrum. *Notes 1* — A group is normally an assembly of 12 FDM telephone channels, each of 4 kHz bandwidth. But in some systems, for example those systems used over submarine cables, a group is an assembly of 16 FDM telephone channels, each of 3 kHz bandwidth. *2* — Signals, other than those derived from FDM telephone channels, may occupy the whole or a part of the frequency band normally assigned to a group. ★ groupe primaire → *groupe 56.* R первичная группа. D Primärgruppe. E grupo primario. I gruppo primario; Gr. I (abbreviazione). N groep. P grupa pierwotna. S tolvgrupp. (704)

15. group A (obsolete term) : a group occupying the frequency band 12-60 kHz. *Note.* — In 1968, it was decided that these terms should no longer be mentioned in CCITT Recommendations. ★ groupe primaire A → *groupe 57.* R первичная группа A (устаревший термин); основная первичная группа A (нежелательный). D Primärgruppe A (veralteter Begriff). E grupo primario; grupo primario de base A; grupo básico A. I gruppo A (termine non più in uso). N A-groep. P grupa pierwotna A. S ..... (704)

16. **group alarm** : → *alarm 4*

17. **group bank** (*Syn.* group translating equipment) : → *equipment 37*

18. **group call** : → *call 41*

19. **group carrier frequencies** : → *frequency 109*

20. **group command** : → *command 9*

21. **group delay** : → *delay 21*

22. **group delay equalization** : → *equalization 6*

23. **group delay/frequency distortion** : → *distortion 43*

24. **group distribution frame** : → *frame 31*

25. **group index** : → *index 18*

26. **group link** : → *link 13*

27. **group modulating equipment** : → *equipment 36*

28. **group reference pilot** : → *pilot 2*

29. **group removal cross-section** : → *cross-section 14*

30. **group section** : → *section 14*

31. **group selector** : → *selector 6*

32. **group size** : → *size 3*

33. **group transfer scattering cross-section** : → *cross-section 15*

34. **group translating equipment** : → *equipment 37*

35. **group velocity** : → *velocity 3*

36. **group velocity** : → *velocity 4*

37. **group velocity** : → *velocity 5*

38. **group velocity** : → *velocity 6*

39. **group velocity** : → *velocity 7*

40. **group velocity (vector)** : → *velocity 8*

41. **group wavelength** : → *wavelength 9*

42. **high usage circuit group** : a circuit group that is engineered in such a way that the traffic offered to it can overflow to one or more other groups. ★ faisceau débordant → *faisceau 36.* D Querbündel. P wiązka (łączy) wysokiego wykorzystania. (715)

43. **last choice circuit group** : with respect to a given traffic parcel, a circuit group from which there is no possibility of overflow. *Note.* — A last choice circuit group is a final circuit group or a fully provided circuit group. ★ faisceau de dernier choix → *faisceau 28.* D Letztwegbündel. P wiązka (łączy) wyboru ostatniego. (715)

44. **line group** : a group of connection lines having the same selection criteria,between a given terminal and a serving connection exchange. ★ faisceau de lignes → *faisceau 31.* D Anschlußgruppe. P wiązka linii. (715)

45. **multimode group delay** (*Syn.* differential mode delay) : → *delay 16*

46. **neutron energy group** : one or a set of groups consisting of neutrons having energies within arbitrarily chosen intervals. Each group may be assigned effective values for the characteristics of the neutrons within the group. ★ groupe d'énergie des neutrons → *groupe 39.* D Neutronenenergiegruppe. E grupo de energía de los neutrones. I gruppo di energia di neutroni. N neutronengroep. P grupa energetyczna neutronów. S neutronenergigrupp. (026)

47. **partially closed user group** : a user group where certain terminals may make calls to or receive calls from any other terminals normally accessible in the public switched network, the other terminals having the facility to communicate only with the users of the group. *Note.* — In some case the external access for nominated terminals is limited to outgoing calls. ★ groupe (d'usagers) partiellement fermé → *groupe 41.* R частично замкнутая группа абонентов. D teilweise geschlossene Benutzergruppe. E grupo (de usuarios) parcialmente cerrada. I gruppo parzialmente chiuso. N gedeeltelijk besloten gebruikersgroep. P częściowo zamknięta grupa użytkowników. S delvis sluten användargrupp. (721)

48. **PBX group** (*Syn.* equivalent line group) : a set of subscriber telephone lines used to connect a private branch exchange to a local switching entity. *Note.* — These lines can be accessed by dialling a single subscriber number. ★ groupement de lignes → *groupement 9.* R пучок ведомственной телефонной станции с выходом в город. D Sammelanschlußleitung(sbündel). E agrupamiento de líneas; grupo PBX. I linea multipla per centralini. N abonneelijnbundel; netlijnbundel (van een groepsaansluiting). P zespół łączy jednonumerowy. S huvudledningsgrupp. (722)

49. **plate group** : an assembly of plates of the same polarity connected together. ★ faisceau de plaques → *faisceau 32.* R полублок. D Plattensatz. E grupo de placas. I gruppo di piastre. N platengroep. P zespół płyt jednakobiegunowych. S plattgrupp. (486)

50. **primary digital group** (*Syn.* digroup (USA)) : the assembly, by digital multiplexing, of a specified number of digital signals constituting the first level of a digital multiplex hierarchy. *Notes. 1* — The primary digital groups standardized by CCITT operate at a digit rate of 1 544 or 2 048 kbit/s ; they comprise digital signals occupying channel time-slots, each of which has normally 8 digit time-slots and an effective digit rate of 64 kbit/s. *2* — The term "digroup" is used to designate a primary digital group operating at a digit rate of 1 544 kbit/s. ★ groupe numérique primaire → *groupe 50.* R цифровая первичная группа. D primäre Digitalgruppe. E grupo numérico binario; bloque primario. I gruppo numerico primario. N primaire digitale groep. P grupa cyfrowa pierwotna. S primär digitalgrupp. (704)

51. **primary PCM group A** : a primary digital group of PCM channels, usually 30, assembled by PCM multiplex equipment which uses the CCITT quantizing law A ; the composite digital signal has a frame consisting of 32 octet time-slots and operates at a digit rate of 2 048 kbit/s. *Note.* — This term should be used only when all the available channels are used as PCM channels. ★ groupe numérique primaire A → *groupe 51.* R первичная группа ИКМ типа A. D primäre PCM-Gruppe A. E grupo numérico primario A; bloque primario A. I gruppo numerico primario A. N primaire PCM-A-groep. P grupa cyfrowa pierwotna A. S primär A-grupp. (704)

52. **primary PCM group mu** : a primary digital group of 24 PCM channels assembled by PCM multiplex equipment which uses the CCITT quantizing law mu ; the composite digital signal has a frame consisting of 24 octet time-slots and a single digit time-slot, and operates at a digit rate of 1 544 kbit/s. *Note.* — This term should be used only when all the available channels are used as PCM channels. ★ groupe numérique primaire mu → *groupe 52.* R первичная группа ИКМ типа μ. D primäre PCM-Gruppe mu. E grupo numérico primario mu; bloque primario mu. I gruppo numerico primario mu. N primaire PCM-mu-groep. P grupa cyfrowa pierwotna "mi". S primär my-grupp. (704)
53. **quaternary digital group** : the assembly, by digital multiplexing, of a specified number of tertiary digital groups constituting the fourth level of a digital multiplex hierarchy. *Note.* — The quaternary digital groups standardized by CCITT operate at a digit rate of 97 728 or 139 264 kbit/s. ★ groupe numérique quaternaire → *groupe 53.* R цифровая четверичная группа. D quartäre Digitalgruppe. E grupo numérico cuaternario. I gruppo numerico quaternario. N quaternaire digitale groep. P grupa cyfrowa czwórna. S kvarternär digitalsignal. (704)
54. **secondary digital group** : the assembly, by digital multiplexing, of a specified number of primary digital groups constituting the second level of a digital multiplex hierarchy. *Note.* — The secondary digital groups standardized by CCITT operate at a digit rate of 6 312 or 8 448 kbit/s. ★ groupe numérique secondaire → *groupe 54.* R цифровая вторичная группа. D sekundäre Digitalgruppe. E grupo numérico secundario. I gruppo numerico secondario. N secundaire digitale groep. P grupa cyfrowa wtórna. S sekundär digitalgrupp. (704)
55. **tertiary digital group** : the assembly, by digital multiplexing, of a specified number of secondary digital groups constituting the third level of a digital multiplex hierarchy. *Note.* — The tertiary digital groups standardized by CCITT operate at a digit rate of 32 064, 34 368 or 44 736 kbit/s. ★ groupe numérique tertiaire → *groupe 55.* R цифровая третичная группа. D tertiäre Digitalgruppe. E grupo numérico terciario. I gruppo numerico terziario. N tertiaire digitale groep. P grupa cyfrowa trójna. S tertiär digitalgrupp. (704)
56. **trunk group** (*Syn.* circuit group) : → *group 3*

grouping

1. **grouping** : the non-uniformity in spacing between the spiral grooves of a disk caused by an irregular motion of the recording lathe feed screw. ★ irrégularité du pas du sillon → *irrégularité 3.* R группирование канавок. D willkürlich schwankende Rillensteigung. E agrupamiento. I irregolarità del passo del solco. N twist. P nierównomierność skoku zapisu. S oregelbunden spårstigning. (806)

growing

1. **growing by Czochralski's method** (*Syn.* growing by pulling) : → *pulling 2*
2. **growing by pulling** : → *pulling 2*
3. **growing by zone melting** (of a single crystal) : the production of a single crystal with the aid of a mono-crystalline seed by passing a molten zone first through a portion of the monocrystalline seed and then through the polycrystalline semiconductor material closely abutted to the seed. ★ croissance d'un monocristal par fusion de zone → *croissance 2.* R выращивание (монокристалла) методом зонной плавки. D Einkristallziehen durch Zonenschmelzen). E crecimiento de un monocristal por fusión de zona. I accrescimento per zone di fusione. N eenkristalgroei door zonesmelting. P metoda monokrystalizacji strefowej. S kristallodling med zonsmältning. (521)

growth

1. **growth zone** : → *zone 6*
2. **reliability growth** : a condition characterized by a progressive improvement of a reliability performance measure of an item with time. ★ croissance de la fiabilité → *croissance 1.* R рост безотказности; повышение безотказности. D Zuverlässigkeitswachstum. E crecimiento de la fiabilidad. I accrescimento dell'affidabilità. N toename van de betrouwbaarheid. P wzrost niezawodności. S funktionssäkerhetstillväxt. (191)

Gs

1. **gauss, Gs, G** : → *gauss 1*

guard

1. **anti-climbing guard** (*Syn.* anti-climbing device) : a device installed on, or attached to, a support, structure, tower, guy, etc., to make climbing difficult by unauthorised persons (see fig. 3.27). ★ défenses → *défense 1.* R устройство против влезания на опору. D Kletterschutz. E antiescalo. I parasalita. N klimwering. P zapora (wejściowa). S klätterhinder. (466)
2. **colour burst guard interval** : → *interval 4*
3. **groove guard** : the raised outer rim and label area on a disk, used to prevent damage to the recorded surfaces when they are placed in contact with others on an automatic record changer. ★ plage de garde du sillon → *plage 7.* R защита канавок. D Wulstrand. E zona de guarda del surco. I spazio di guardia del solco. N verhoogde buitenrand (groefbescherming). P obrzeże ochronne. S spårskydd. (806)
4. **guard band** : → *band 21*
5. **guard ring** : → *ring 8*
6. **guard's position** : → *position 12*
7. **luminaire guard** : device, shaped as a grid, used to shield the protective glass of the luminaire against mechanical shocks. ★ grille de protection → *grille 23.* R защитная сетка; защитная решетка. D Leuchtenschutzgitter. E reja protectora. I griglia di protezione. N beschermrooster. P siatka ochronna. S skyddsgaller. (845)
8. **release guard** (*Syn.* guarded release) : a technique for retaining a busy condition during the period of restoration of a circuit from its busy to its free state in order to ensure against premature re-seizure while exchange of release signals and the subsequent changes of state are in progress. ★ garde à la libération → *garde 11.* R защищенное освобождение. D Ausloeseuerbewachung. E guarda de liberación. I rilascio con ripristino controllato della disponibilità. N beveiligd vrijgeven. P rozłączenie nadzorowane. S nedkopplingsskydd. (714)
9. **release guard signal** : → *signal 157*

guarded

1. **guarded release** (*Syn.* release guard) : → *guard 8*

guarding

1. **guarding** : the function of taking special measures against false operation of a device. ★ garde → *garde 9.* R защита. D sperren; schuetzen. E guarda. I guardia. N beveiliging. P ochrona prawidłowości działania. S skyddande. (714)
2. **guarding** (in v.f. signalling) : rendering ineffective the signal imitation by recognizing the simultaneous presence of frequencies outside the signalling band. ★ garde → *garde 10.* R защита (в сигнализации на тональной частоте). D Sprachschutz. E guarda (en señalización en audiofrecuencia). I guardia (nella segnalazione a frequenza fonica). N ..... P ochrona (w sygnalizacji tonowej). S falsksignalspärrning. (714)

guide

1. **air guide** : any structure provided to control the direction of flow of cooling air and so improve the efficiency of the cooling system. ★ guidage d'air → *guidage 6.* R устройства для направления (направляющие) потока воздуха. D Luftführungen (Luftleitflächen). E guías de aire. I deflettori di ventilazione. N luchtgeleiding. P kierownica powietrza. S ledskärm för kylluft. (411)
2. **coil flux guide** : laminated iron sheets assembled into packets to guide the flux generated by the induction coil to prevent heating up of adjacent steel parts of the furnace assembly and improve efficiency. ★ blindage magnétique de l'inducteur → *blindage 5.* R магнитопровод. D magnetischer Rückschluss einer Induktionsspule mit Eisenpaketen (Joche). E guía del flujo de la bobina de inducción. I schermo magnetico dell'induttore. N blikpakket. P magnetowód wzbudnika. S ..... (841)
3. **guide bearing** : → *bearing 16*
4. **guide electrode** : → *electrode 65*
5. **guide pin** : → *pin 4*
6. **light guide** : optical device which is intended to transmit light without significant loss and may be placed for instance between a scintillator and a photomultiplier tube. ★ conduit de lumière → *conduit 3.* R световод. D Lichtleiter. E guía de

luz. I guida di luce. N lichtgeleider; lichtpijp. P światłowód. S ljusledare. (391)

7. **tape guide** : a roller or pillar used to position correctly the magnetic tape along its path on the tape transport system. ★ guide-bande → *guide-bande 1.* R направляющая ленты. D Bandführung. E guía de la cinta. I guidanastro. N bandgeleider. P prowadnik taśmy. S bandledare; bandförare. (806)
8. **vacuum guide** : that part of the video head assembly used to maintain the tape in the correct position relative to the head wheel by means of a suction system. ★ guide à dépression → *guide 7.* R вакуумная направляющая. D Vakuumbandführung; Bandführungssegment; Kopfschuh. E guía de vacío. I guida a depressione. N vacuüm geleider. P prowadnica próżniowa. S vakuumguide. (806)

guided

1. **guided (electromagnetic) wave** : → *wave 18*
2. **guided propagation** : → *propagation 9*
3. **guided wave** : → *wave 19*
4. **guided wave** : → *wave 20*

guiding

1. **weakly guiding fibre** : → *fibre 30*

guillotine

1. **guillotine attenuator** : → *attenuator 9*

gun

1. **arc stud welding gun** : a gun designed to make a stud weld by the use of a metal stud held in the head of the gun, the stud being affixed to the workpiece. ★ pistolet de soudage des goujons → *pistolet 2.* R пистолет для дуговой сварки шпилек. D Bolzenlichtbogenschweißbrenner. E pistola soldadora de espárragos. I pistola per saldare colonnette. N stiftlaspistool. P uchwyt pistoletowy do przygrzewania sworzni. S bultsvetspistol. (851)
2. **Charles gun** : an electron gun used in the presence of crossed electric and magnetic fields to inject an electron beam into the end of a slow-wave structure. ★ canon de Charles → *canon 3.* R пушка Чарльза. D Charles-Strahlerzeuger. E cañón de Charles. I cannone di Charles. N Charles-kanon. P wyrzutnia Charlesa. S Charles-kanon. (531)
3. **diode gun** : an electron gun wherein the focusing electrode is at the same potential as the cathode. ★ canon diode → *canon 9.* R диодная пушка. D Diodenkanone. E cañón diodo. I cannone diodo. N diodekanon. P wyrzutnia diodowa. S diodkanon. (841)
4. **external gun** (*Syn.* separately pumped electron gun) : an electron gun placed outside the work chamber, the gun and the chamber having separate pumping sets. ★ canon externe → *canon 12.* R электронная пушка с индивидуальной откачкой. D Aussenkanone; separat evakuierte Elektronenkanone. E cañón externo; cañón electrónico bombeado separadamente. I cannone esterno; cannone pompato separatamente. N uitwendig kanon. P wyrzutnia zewnętrzna. S (separat pumpad) yttre elektronkanon. (841)
5. **focal line beam gun** : an electron gun of a particular type in which the beam is concentrated on a focal line instead of a focal point. ★ canon à tache linéaire → *canon 2.* R электронно-лучевая пушка с линейным фокальным пятном. D Flachstrahlkanone. E cañón de línea focal. I cannone a macchia lineare. N lijnkanon. P wyrzutnia elektronowa wiązki zogniskowanej w linię. S elektronkanon med linjefokus. (841)
6. **gun** (*Syn.* torch) : a unit that conveys all services necessary to the arc for welding, cutting or allied processes, e.g. current, gas, coolant, electrode. *Note.* — In the case of a torch the handle is co-axial with the body and the neck may be straight or curved. In the case of a gun the handle is substantially perpendicular to the body. ★ pistolet → *pistolet 1.* R пистолет; горелка. D Brenner. E pistola; soplete. I pistola; torcia. N laspistool; lastoorts. P uchwyt pistoletowy; uchwyt prosty. S brännare; pistol. (851)
7. **holding gun** : an electron gun used to hold. ★ canon d'entretien → *canon 6.* R прожектор поддерживающего пучка. D Haltestrahlerzeuger. E cañón de mantenimiento. I cannone di mantenimento. N oplaadkanon. P wyrzutnia podtrzymująca. S hållkanon. (531)
8. **immersed gun** : an electron gun in which essentially all the flux of the confining magnetic field passes perpendicularly through the emitting surface of the cathode. ★ canon immergé → *canon 13.* R иммерсионный прожектор. D Immersions-Strahlerzeuger. E cañón sumergido. I cannone a immersione. N (elektronen)kanon met kathode-immersie. P wyrzutnia zanurzona. S ..... (531)
9. **internal gun** (*Syn.* vacuum gun) : an electron gun operating within the work chamber, the pumping sets being common to both the gun and the chamber. ★ canon interne → *canon 14.* R пушка, расположенная в рабочей камере. D Innenkanone; Vakuumkanone. E cañón interno; cañón al vacío. I cannone interno; cannone sotto vuoto. N inwendig kanon. P wyrzutnia wewnętrzna. S inre elektronkanon. (841)
10. **magnetron injection gun** : an electron gun that has high total perveance and produces a hollow beam parallel to the axis of a magnetic field. ★ canon d'injection de magnétron → *canon 7.* R магнетронный инжекционный прожектор. D Magnetron-Injektionsstrahlerzeuger. E cañón de inyección de magnetrón. I cannone di iniezione di magnetron. N (elektronen)kanon voor magnetroninjectie. P wyrzutnia magnetronowa. S magnetroninjektionskanon. (531)
11. **MIG/MAG gun** (*Syn.* MIG/MAG torch) : a gun or torch using a consumable arc welding electrode wire. *Note.* — MIG and MAG are the abbreviations for "metal inert gas" and "metal active gas" respectively. ★ pistolet MIG/MAG → *pistolet 3.* R пистолет для МИГ/МАГ — сварки; горелка для МИГ/МАГ — сварки. D MIG/MAG-Brenner. E pistola MIG/MAG; soplete MIG/MAG. I pistola MIG/MAG; torcia MIG/MAG. N MIG/MAG-toorts; MIG/MAG-pistool. P uchwyt pistoletowy MIG/MAG; uchwyt prosty MIG/MAG. S MIG/MAG-brännare; MIG/MAG-pistol. (851)
12. **Pierce gun** : an electron gun that produces an initially convergent electron beam by the use of electrostatic fields alone. ★ canon de Pierce → *canon 5.* R пушка Пирса. D Pierce-Strahlerzeuger. E cañón de Pierce. I cannone di Pierce. N Pierce-kanon. P wyrzutnia Pierce'a. S Pierce-kanon. (531)
13. **plasma gun** (*Syn.* plasma torch) : → *torch 5*
14. **reading gun** : an electron gun used to read. ★ canon de lecture → *canon 4.* R считывающий прожектор. D Lesestrahlerzeuger. E cañón de lectura. I cannone di lettura. N leeskanon. P wyrzutnia odczytująca. S läskanon. (531)
15. **TIG gun** (*Syn.* TIG torch) : → *torch 7*
16. **triode gun** : an electron gun wherein the focusing electrode is at a negative potential to the cathode. ★ canon triode → *canon 17.* R триодная пушка. D Triodenkanone. E cañón triodo. I cannone triodo. N triodekanon. P wyrzutnia triodowa. S triodkanon. (841)
17. **vacuum gun** (*Syn.* internal gun) : → *gun 9*
18. **writing gun** : an electron gun used to write. ★ canon d'inscription → *canon 8.* R записывающий прожектор. D Schreibstrahlerzeuger. E cañón de inscripción. I cannone di scrittura. N schrijfkanon. P wyrzutnia zapisująca. S skrivkanon. (531)

guy

1. **guy** (*Syn.* stay) : → *stay 1*

guyed

1. **guyed support** (*Syn.* stayed support) : → *support 21*

gyrator

1. **gyrator** : a non-reciprocal phase-shifter which provides phase-shifts differing by π radians for the two opposite directions of propagation. ★ girateur → *girateur 1.* R гиратор. D Gyrator. E inversor de fase. I giratore. N gyrator. P girator. S gyrator. (726)
2. **ideal gyrator** : a non-reciprocal passive two-port network maintaining the instantaneous power, in which the instantaneous voltage at each port is proportional to the instantaneous current at the other port. *Note.* — The impedance seen at one port is proportional to the terminating admittance of the other port. ★ gyrateur idéal → *gyrateur 3.* R идеальный гиратор. D idealer Gyrator. E girador ideal. I giratore ideale. N ideale gyrator. P girator idealny. S ideal gyrator. (131)
3. **microwave gyrator** : a non-reciprocal phase-shifter operating at microwave frequencies and having a differential phase shift of substantially π radians. *Note.* — The use of the word "gyrator" to denote gyromagnetic devices in general is deprecated. ★ gyrateur hyperfréquence → *gyrateur 2.* R гиратор СВЧ. D Mikrowellen-Gyrator. E girador de hiperfrecuencias;

girador de microondas. I giratore per iperfrequenze. N gyrator. P girator mikrofalowy. S mikrovågsgyrator. (221)

gyro-frequency

1. **(electron) gyro-frequency** (in the ionosphere) : the gyro-frequency of free electrons in the ionosphere, around the lines of force of the Earth's magnetic field. ★ gyrofréquence (électronique) → *gyrofréquence 2*. D (Elektronen-)Gyrofrequenz (in der Ionosphäre). P giroczęstotliwość (elektronowa) (w jonosferze). (705)
2. **gyro-frequency** (*Syn.* cyclotron frequency) : the frequency of rotation of a charged particle of specified nature describing, in the presence of a uniform magnetic field, a helical curve around the lines of force of the field. *Note.* — The gyro-frequency f_c is given by the expression :

$$f_c = \frac{1}{2\pi}\frac{qB}{m}$$

where B is the magnetic flux density, q are the mass and the charge of the particle respectively. ★ gyrofréquence → *gyrofréquence 1*. D Gyrofrequenz. P giroczęstotliwość; częstotliwość cyklotronowa. (705)

gyromagnetic

1. **gyromagnetic coefficient** : → *coefficient 25*
2. **gyromagnetic device** : → *device 27*
3. **gyromagnetic effect** : → *effect 27*
4. **gyromagnetic filter** : → *filter 22*
5. **gyromagnetic material** : → *material 16*
6. **gyromagnetic medium** (*Syn.* gyromagnetic material) : → *material 16*
7. **gyromagnetic medium** : → *medium 14*
8. **gyromagnetic power limiter** : → *limiter 2*
9. **gyromagnetic ratio** : → *ratio 41*
10. **gyromagnetic resonance** : → *resonance 1*
11. **gyromagnetic resonance loss** : → *loss 36*
12. **gyromagnetic resonator** : → *resonator 2*

H

H

1. **henry, H** : → *henry 1*

hairpin

1. **hairpin coil** : → *coil 23*

halation

1. **halation** (*Syn.* halo) : the presence of one or more illuminated annular areas surrounding the spot, caused by reflection, from the front and rear surfaces of the face-plate, of light originating from the spot. ★ halo → *halo 1.* **R** ореол. **D** Halo; Reflexions-Lichthof. **E** halo. **I** alone. **N** halo. **P** halo; aureola. **S** haloeffekt. (531)

half

1. **full duration half maximum** : → *maximum 3*
2. **full width at half maximum** : → *width 1*
3. **full width half maximum** : → *maximum 5*
4. **half dipole** : → *dipole 8*
5. **half doublet** (*Syn.* half dipole) : → *dipole 8*
6. **half echo suppressor** : → *suppressor 4*
7. **half tone picture** : → *picture 6*

half-coil

1. **half-coil** : either of two parts which when connected together would form a complete coil and which comprise a coil side and appropriate end winding. ★ demi-bobine → *demi-bobine 1.* **R** полукатушка. **D** Halbspule. **E** media bobina. **I** bastone, o barra. **N** halve spoel. **P** półzezwój. **S** härvhalva. (411)

half-controllable

1. **half-controllable connection** : → *connection 28*

half-controlled

1. **asymmetric half-controlled bridge** : → *bridge 2*
2. **symmetric half-controlled bridge** : → *bridge 17*

half-cycle

1. **half-cycle transductor** : → *transductor 5*

half-duplex

1. **half-duplex apparatus** : → *apparatus 9*

half-hourly

1. **hourly, half-hourly, quarter hourly, *n* minute etc... demand** : → *demand 16*

half-life

1. **biological half-life** : the time required for the amount of a particular substance in a biological system to be reduced to one-half of its initial value by biological processes when the process of elimination follows an exponential function of time. ★ période biologique → *période 5.* **R** биологический пефиод полураспада. **D** biologische Halbwertzeit. **E** periodo biologico. **I** emivita biologica; tempo di dimezzamento biologico. **N** biologische halveringstijd. **P** półokres biologiczny. **S** biologisk halveringstid. (881)
2. **effective half-life** : half-life of a radioactive substance in a biological system, resulting from the combination of radioactive decay and biological removal. effective half-life is the quotient of the product of biological half-life by radioactive half-life by the sum of these two half-lifes. ★ période effective → *période 24.* **R** эффективный период полураспада. **D** effektive Halbwertzeit. **E** periodo biologico efectivo; periodo efectivo. **I** tempo di dimezzamento effettivo. **N** effectieve halveringstijd. **P** efektywny okres półrozpadu. **S** effektiv halveringstid. (881)
3. **radioactive half-life** : for a single radioactive decay process, the time required for the activity to decrease to half its value. *Note.* — For a radionuclide, the radioactive half-life T is related to the decay constant λ by the expression

$$T = \frac{L_n 2}{\lambda} = \frac{0.693}{\lambda}$$

★ période radioactive → *période 28.* **R** период полураспада (радиоактивного). **D** Halbwertszeit. **E** periodo radiactivo. **I** periodo radioattivo. **N** (fysische) halveringstijd. **P** okres półrozpadu. **S** (radioaktiv) halveringstid. (026,391,881)

half-line

1. **half-line pulse** (*Syn.* broad pulse) : → *pulse 3*

half-peak

1. **half-peak divergence** : → *divergence 8*

half-step

1. **half-step** (*Syn.* tempered semitone) : → *semitone 1*

half-value

1. **half value depth** : → *depth 7*
2. **half-value angle** : → *angle 30*
3. **half-value layer** : → *layer 13*
4. **half-value thickness** (*Syn.* half-value layer) : → *layer 13*
5. **time to half value (of an impulse)** : → *time 208*

half-voltage

1. **half-voltage motor** : → *motor 36*

half-wave

1. **half-wave apparatus** : → *apparatus 10*
2. **half-wave dipole** : → *dipole 9*
3. **half-wave plate** : → *plate 9*
4. **negative half-wave** : the instantaneous values of an alternating quantity for that part of the period during which they have a negative sign; by extension, this concept is applied to a pulsating quantity. ★ alternance négative → *alternance 1.* **R** отрицательная полуволна. **D** negative Halbschwingung. **E** alternancia negativa. **I** alternanza negativa. **N** negatieve halve golf. **P** półfala ujemna. **S** negativ halvvåg. (101)
5. **positive half-wave** : the instantaneous values of an alternating quantity for that part of the period during which they have a positive sign; by extension, this concept is applied to a pulsating quantity. ★ alternance positive → *alternance 2.* **R** положительная полуволна. **D** positive Halbschwingung. **E** alternancia positiva. **I** alternanza positiva. **N** positieve halve golf. **P** półfala dodatnia. **S** positiv halvvåg. (101)

halide

1. **metal halide lamp** : → *lamp 39*

Hall

1. **Hall angle** : → *angle 31*
2. **Hall coefficient** : → *coefficient 26*
3. **Hall effect** : → *effect 28*
4. **Hall effect device** : → *device 28*
5. **Hall effect magnetometer** (*Syn.* Hall probe) : → *probe 4*
6. **Hall effect reproducing head** : → *head 6*
7. **Hall generator** : → *generator 16*
8. **Hall mobility** : → *mobility 2*
9. **Hall modulator** : → *modulator 1*
10. **Hall multiplier** : → *multiplier 3*
11. **Hall probe** : → *probe 4*
12. **Hall terminals** : → *terminal 10*
13. **Hall voltage** : → *voltage 82*

halo

1. **black halo** : a spurious darkening of the immediate surroundings of a bright object. ★ halo noir → *halo 2.* **R** черный ореол. **D** Schwarzer Halo. **E** halo negro. **I** alone nero. **N** zwarte halo. **P** czarne halo. **S** falsk mörkereffekt. (531)
2. **halo** (*Syn.* halation) : → *halation 1*

halogen

1. **tungsten halogen lamp** : → *lamp 68*

halogen-quenched

1. **halogen-quenched counter tube** : → *counter tube 15*

halving

1. **halving interval** : → *interval 7*

Hamming

1. **Hamming distance** : → *distance 12*

hamper

1. **top hamper** (*Syn.* super structure) : the upper part of a tower (see fig. 3.1). ★ tête de pylône → *tête 17.* R верхняя часть опоры. D Mastkopf. E cabeza de apoyo. I testa di sostegno. N bovenstuk. P głowica słupa. S överdel. (466)

hand

1. **artificial hand** : an electric network simulating the impedance of the human body under average operational conditions between a hand-held electrical appliance and earth. ★ main fictive → *main 4.* R эквивалент руки. D Handnachbildung. E mano artificial. I mano fittizia. N kunsthand. P operator sztuczny. S handekvivalent. (161)
2. **bare hand method** : → *method 2*
3. **hand pole** : → *pole 7*
4. **hand stick** (*Syn.* hand pole) : → *pole 7*
5. **hands free (telephone) set** : → *set 22*
6. **standby hand control** : → *control 175*

hand-and-foot

1. **hand-and-foot monitor** : → *monitor 6*

handbrake

1. **handbrake** : a brake type in which the friction members are actuated by hand through purely mechanical means. ★ frein à main → *frein 8.* R ручной тормоз. D Handbremse. E freno de mano. I freno a mano. N handrem. P hamulec ręczny. S handbroms. (811)

hand-held

1. **hand-held equipment** : → *equipment 38*

hand-lamp

1. **hand-lamp** (*Syn.* trouble lamp) : portable luminaire with a handle and a flexible cord for its supply. ★ (lampe) baladeuse → *baladeuse 1.* R ручной сетевой светильник. D Handleuchte. E lámpara de mano. I apparecchio di illuminazione portabile. N looplamp. P oprawa ręczna. S handlampa. (845)

handle

1. **dead-man's handle** (*Syn.* driver's safety device) : → *device 21*

handler

1. **boom handler** : person who holds a boom carrying a microphone over a person who is speaking, during shooting in television. ★ perchiste → *perchiste 1.* R оператор микрофона. (723)
2. **cable handler** : person responsible for handling the cables of a television camera when it is moving during shooting. ★ câbliste → *câbliste 1.* R держатель кабеля. (723)

handset

1. **handset** : a combination of telephone earphone, telephone transmitter and possibly other components in a form convenient for holding simultaneously to ear and mouth. ★ combiné (téléphonique) → *combiné 1.* R микротелефонная трубка. D Handapparat. E combinado (telefónico). I microtelefono. N hoorn; microtelefoon. P mikrotelefon. S handmikrotelefon; telefonlur. (722)

hanger

1. **hanger** (*Syn.* dropper) : → *dropper 2*

hanging

1. **hanging up** : actuating the switch hook to disconnect the speech circuit from the line, usually by replacing the telephone handset. ★ raccrochage → *raccrochage 1.* R отбой. D Auflegen. E colgar. I abbassamento del gancio commutatore. N hoorn neerleggen. P odłożenie mikrotelefonu. S påläggning (av telefonlur). (722)

hard

1. **hard glass bulb** : → *bulb 9*
2. **hard soldering** : → *soldering 1*
3. **hard spot** : → *spot 6*
4. **magnetically hard material** : → *material 22*

hardener

1. **hardener** (*Syn.* hardening agent) : → *agent 2*

hardening

1. **hardening agent** : → *agent 2*
2. **hardening by quenching** : hardening of steel resulting from a heat treatment involving austenitizing followed by cooling under such conditions that the austenite is more or less totally transformed into martensite or bainite. ★ durcissement par trempe → *durcissement 3.* R упрочнение с помощью закалки. D Härten durch Abschrecken. E endurecimiento al temple. I indurimento per tempra. N afschrikharden. P utwardzanie przez hartowanie. S härdning. (841)

hardware

1. **hardware** (in telecommunications) : electrical, mechanical or other physical devices which are connected together to perform telecommunication functions. ★ matériel → *matériel 1.* R оборудование (в электросвязи). D Hardware (in der Telekommunikation). E equipamiento; hardware (en telecomunicación). I hardware (in telecomunicazioni). N apparatuur (bij telecommunicatie). P urządzenie (w telecomunikacji); (w telekomunikacji). S maskinvara. (702,714)

harmonic

1. **aural harmonic** : sensation of hearing produced when an alternating current of suitable frequency and magnitude from an external source is passed through a person. ★ harmonique subjectif → *harmonique 11.* R субъективная гармоника. D subjektive Harmonische. E armónica subjetiva. I armonica soggettiva. N ..... P harmoniczna subiektywna. S subjektiv delton. (801)
2. **harmonic** : sinusoidal component of a complex sound wave whose frequency is an integral multiple of the frequency of the fundamental. ★ harmonique → *harmonique 10.* R гармоника. D harmonischer Teilton; Harmonische. E armónico. I armonica. N harmonische. P harmoniczna. S harmonisk delton. (801)
3. **harmonic (component)** : a component of order greater than 1 of the Fourier series of a periodic quantity. ★ (composante) harmonique → *composante 14.* R гармоника. D Oberschwingung; Harmonische. E (componente) armónico. I (componente) armonica. N harmonische. P (składowa) harmoniczna. S övertonsinnehåll. (101,161)
4. **harmonic conjugate signal** (*Syn.* quadrature signal) : → *signal 151*
5. **harmonic content** : the quantity obtained by subtracting the fundamental component from an alternating quantity. ★ résidu harmonique → *résidu 1.* R сумма высших гармоник. D Summe der Oberschwingungen (Harmonischen). E residuo armónico. I residuo armonico. N som van de hogere harmonischen. P zawartość harmonicznych. S övertonsinnehåll. (101,161,551)
6. **harmonic distortion** (*Syn.* relative harmonic content) : → *content 7*
7. **harmonic distortion** : → *distortion 45*
8. **harmonic factor** : → *factor 89*
9. **harmonic number** : → *number 11*
10. **harmonic order** (*Syn.* harmonic number) : → *number 11*
11. **harmonic resonance** : → *resonance 3*
12. **harmonic series of sounds** : → *series 4*
13. **harmonic telephone ringer** : → *ringer 1*
14. **harmonic test** : → *test 36*
15. **nth harmonic ratio** : → *ratio 63*
16. **recording/reproducing harmonic distortion** : → *distortion 62*
17. **relative harmonic content** : → *content 7*
18. **ripple harmonics of a rectifier** : sinusoidal components on the d.c. side whose frequencies are multiples of the fundamental

frequency of the supply voltage (even multiples in the case of a symmetric rectifier). ★ harmoniques d'ondulation d'un redresseur → *harmonique 12.* R гармоники выпрямителя. D Oberschwingungen der Welligkeit eines Gleichrichters. E armónicos de rizado de un rectificador. I armoniche lato corrente continua d'un raddrizzatore. N hogere harmonische van de rimpelspanning. P harmoniczne prądu tętniącego. S övertoner. (811)

19. **source of harmonic current** : → *source 36*
20. **source of harmonic voltage** : → *source 37*
21. **total harmonic distortion** : → *distortion 67*
22. **(total) harmonic factor** : → *factor 175*
23. **(total) harmonic factor** : → *factor 176*

harp

1. **trolley-wheel harp** (*Syn.* trolley-shield) : → *trolley-shield 1*

hartley

1. **hartley** : a unit of logarithmic measure of information equal to the decision content of a set of ten mutually exclusive events, expressed as a logarithm to base 10. *Example :* The decision content of a character set of eight characters equals approximately 0.9 hartley, the logarithm to base 10 of 8 being equal to 0.903. ★ hartley → *hartley 1.* R десятичная единица количества информации. D Hartley. E Hartley. I hartley. N hartley. P hartlej. S hartley. (702)

haulageway

1. **haulageway luminaire** : → *luminaire 8*

hauled

1. **(gross) load hauled** : → *load 18*
2. **gross traffic hauled** : → *traffic 7*

hazard

1. **hazard reducing device** : → *device 29*
2. **hazard warning signal** : → *signal 100*
3. **radiation hazard** : the risk of deleterious effects attributable to deliberate, accidental, or natural exposure to radiation. ★ risque d'irradiation → *risque 2.* R радиационная опасность. D Strahlengefährdung. E riesgo de irradiacion. I rischi da radiazioni. N stralingsgevaar. P narażenie na promieniowanie. S strålrisk. (881)

hazardous

1. **hazardous area** : → *area 21*
2. **hazardous location equipment** (*Syn.* electrical apparatus for explosive atmospheres) : → *apparatus 6*

HDTV

1. **HDTV** (*Syn.* high definition television (system)) : → *television 14*

head

1. **crystal cutter head** : a cutter head in which the displacements of the recording stylus are derived from the deformations of a piezoelectric material. ★ graveur piézoélectrique → *graveur 5.* R пьезоэлектрический рекордер. D piezoelektrischer Schneidkopf. E grabador piezoeléctrico. I incisore piezoelettrico. N kristal snijkop. P głowica (nacinająca piezoelektryczna). S piezoelektriskt graverhuvud. (806)
2. **cutter head** (*Syn.* mechanical recording head) : an electromechanical transducer which transforms electrical signals into mechanical displacements which modulate the spiral groove being cut in the disk by a cutting stylus. ★ graveur → *graveur 1.* R рекордер. D Schneidkopf; mechanischer Aufnahmekopf. E grabador; cabeza de registro mecánico. I incisore; testa di registrazione meccanica. N snijkop. P głowica nacinająca. S graverhuvud; mekaniskt inspelningshuvud. (806)
3. **electrodynamic cutter head** : a cutter head in which the displacements of the recording stylus are generated by the motion of a coil in a magnetic field. ★ graveur électrodynamique → *graveur 3.* R магнитный (электродинамический) рекордер. D elektrodynamischer Schneidkopf. E grabador electrodinámico. I incisore elettrodinamico. N elektrodynamische snijkop. P głowica (nacinająca magnetoelektryczna). S elektrodynamiskt graverhuvud. (806)
4. **feedback cutter head** : a cutter head, the output of which is linearized by the action of feedback signals injected from the cutter head into the recording amplifier circuit. ★ graveur à contre-réaction → *graveur 2.* R рекордер с обратной связью. D Gegenkopplungsschneidkopf. E grabador de realimentación. I incisore a controreazione. N tegengekoppelde snijkop. P głowica (nacinająca o sprzężeniu zwrotnym). S återkopplat graverhuvud. (806)
5. **gross head of a hydroelectric power station** : the difference in height between the water intake and tail-race levels under specified conditions. ★ chute brute d'une centrale hydro-électrique → *chute 1.* R напор ГЭС брутто. D Bruttofallhöhe eines Wasserkraftwerks. E salto bruto de una central hidroeléctrica. I salto utile lordo d'una centrale idroelettrica. N bruto stuwhoogte van een waterkrachtcentrale. P spad brutto elektrowni wodnej. S bruttofallhöjd för vattenkraftstation. (602)
6. **Hall effect reproducing head** : a reproducing head which uses semi-conductors sensitive to the Hall effect. ★ tête de lecture à effet Hall → *tête de lecture 3.* R магнитная головка Холла. D Hall-Effekt-Wiedergabekopf. E cabeza de lectura de efecto Hall. I testina di riproduzione a effetto Hall. N Hall effect kop. P głowica (odczytująca Halla). S halleffekt(avspelnings)huvud. (806)
7. **head adjustment** : → *adjustment 8*
8. **head clogging** : → *clogging 1*
9. **head on collision** : → *collision 9*
10. **head unit** : → *unit 28*
11. **head wheel** : → *wheel 1*
12. **ideal reproducing head** : a reproducing head, the losses of which are negligible. ★ tête de lecture idéale → *tête de lecture 8.* R идеальная воспроизводящая головка. D idealer Wiedergabekopf. E cabeza de lectura ideal. I testina di riproduzione ideale. N ideale weergeefkop. P głowica odczytująca idealna. S ideellt avspelningshuvud. (806)
13. **magnetic cutter head** : a cutter head in which the displacements of the recording stylus are directly generated by electromagnetic or electrodynamic forces. ★ graveur magnétique → *graveur 4.* R магнитный рекордер. D elektromagnetischer Schneidkopf. E grabador magnético. I incisore magnetico. N magnetische snijkop. P głowica (nacinająca magnetyczna). S magnetiskt graverhuvud. (806)
14. **magnetic erasing head** : a magnetic head used to produce a magnetic field suitable for erasing a magnetic recording. ★ tête magnétique d'effacement → *tête 23.* R стирающая магнитная головка. D Magnetlöschkopf. E cabeza magnética de borrado. I testina magnetica di cancellazione. N wiskop. P głowica magnetyczna kasująca. S magnetiskt raderhuvud. (806)
15. **magnetic head** : an electromagnetic transducer for converting electrical signals into magnetic flux variations or vice versa. ★ tête magnétique → *tête 21.* R магнитная головка. D Magnetkopf. E cabeza magnética. I testina magnetica. N (magneet)kop. P głowica magnetyczna. S magnetiskt huvud. (806)
16. **magnetic head core** : → *core 30*
17. **magnetic head gap** : → *gap 15*
18. **magnetic recording head** : a magnetic head used to modify the magnetic state of a magnetic recording medium. ★ tête magnétique d'enregistrement → *tête 24.* R записывающая магнитная головка. D Magnetaufnahmekopf. E cabeza magnética de registro. I testina magnetica di registrazione. N opneemkop. P głowica magnetyczna zapisująca. S magnetiskt inspelningshuvud. (806)
19. **magnetic recording/reproducing head** : a magnetic head able to be used alternatively as a recording head or as a reproducing head. ★ tête magnétique combinée → *tête 22.* R универсальная магнитная головка (записи-воспроизведения). D Magnetaufnahme-/Wiedergabekopf; Kombikopf. E cabeza magnética combinada. I testina magnetica ambivalente. N opneem/weergeefkop. P głowica magnetyczna uniwersalna; głowica magnetyczna zapisująco-odczytująca. S magnetiskt in- och avspelningshuvud. (806)
20. **magnetic reproducing head** : a magnetic head used to recreate the signals recorded on a magnetic medium. ★ tête magnétique de lecture → *tête de lecture 10.* R воспроизводящая магнитная головка. D Magnetwiedergabekopf. E cabeza magnética de lectura. I testina magnetica di riproduzione. N weergeefkop. P głowica

magnetyczna odczytująca. S magnetiskt avspelningshuvud. (806)

21. **mechanical recording head** (*Syn.* cutter head) : → *head 2*
22. **net head of a hydroelectric power station** : the gross head of a hydroelectric power station less a height equivalent to the hydraulic losses excluding those in the turbines. ★ chute nette d'une centrale hydro-électrique → *chute 4.* R напор ГЭС нетто. D Nettofallhöhe eines Wasserkraftwerks. E salto neto de una central hidroeléctrica. I salto utile netto d'una centrale idroelettrica. N netto stuwhoogte van een waterkrachtcentrale. P spad netto elektrowni wodnej. S nettofallhöjd för vattenkraftstation. (602)
23. **pantograph head** (*Syn.* pantograph pan) : pantograph equipment comprising the wearing strips and their mountings. ★ semelle de pantographe → *semelle 1.* R полоз пантографа. D Stromabnehmerwippe. E cabeza de pantógrafo; mesilla (de pantógrafo). I portastriscianti (dell'archetto). N schuitje. P ślizgacz listwowy. S toppstycke till strömavtagare. (811)
24. **recording head relative efficiency** : → *efficiency 36*
25. **reproducing head** (*Syn.* pick-up head) : → *pick-up head 7*
26. **reproducing head absolute efficiency** : → *efficiency 37*
27. **tape-reading head** (*Syn.* tape-reader) : a device which reads a recording tape and produces signals corresponding to the data recorded on the tape. ★ lecteur de bande → *lecteur 1.* R перфоленточное считывающее устройство. D Streifenleser. E lector de banda. I testina di lettura. N bandlezer. P czytnik taśmy. S remsläsare. (721)
28. **video head assembly** : → *assembly 29*

headbanding

1. **headbanding** (*Syn.* banding) : → *banding 1*

head-end

1. **head-end** (of a cabled distribution system) : assembly of equipment feeding signals into a cabled distribution system from local or external sources, including equipment for reception and signal processing. ★ tête de réseau (de télédistribution) → *tête 18.* R главная станция кабельной системы распределения. (723)

header

1. **header** : the initial part of a message or packet which contains the service information. ★ en-tête → *en-tête 1.* R заголовок. D Kopf. E encabezamiento. I intestazione. N hoofd; kop. P nagłówek. S rubrik. (721)

heading

1. **double heading** : assisted operation in which two motor vehicles are placed at the front of the train. ★ (marche en) double traction → *marche 17.* R следование двойной тягой. D Doppeltraktion. E marcha con doble tracción. I (marcia in) doppia trazione. N rijden met voorspan. P trakcja podwójna czołowa. S lokdubblering. (811)
2. **start of heading signal** : → *start 9*

headlamp

1. **headlamp** : an electric lamp mounted on the front of the leading vehicle of a train and giving a concentrated beam. ★ phare → *phare 1.* R прожектор. D Stirnleuchte. E faro. I faro. N frontlamp; frontsein. P projektor czołowy; reflektor czołowy. S toppstrålkastare. (811)
2. **headlamp** (*Syn.* headlight) : → *headlight 2*

headlight

1. **dipped-beam headlight** (*Syn.* low-beam headlight) : headlight designed to illuminate without causing undue glare to people in front of the vehicle carrying it, particularly to the drivers of approaching vehicles. *Note.* — In this term, lamp is sometimes used instead of light. ★ feu de croisement → *feu 14.* R фара ближнего света. D Abblendlichtscheinwerfer. E luze de cruce. I proiettore anabbagliante. N dimlicht. P światło mijania. S halvljus. (845)
2. **headlight** (*Syn.* headlamp) : projector carried on a vehicle for illuminating the way or scene in front of the vehicle. ★ projecteur avant → *projecteur 5.* R фара. D Fahrzeugscheinwerfer. E proyector delantero. I proiettore anteriore. N koplamp. P projektor główny (pojazdu). S strålkastare. (845)
3. **high-beam headlight** (*Syn.* main-beam headlight) : → *headlight 5*
4. **low-beam headlight** (*Syn.* dipped-beam headlight) : → *headlight 1*
5. **main-beam headlight** (*Syn.* high-beam headlight) : headlight designed to illuminate for a considerable distance ahead of the vehicle carrying it. *Note.* — In this term, lamp is sometimes used instead of light. ★ feu de route → *feu 22.* R фара дальнего света. D Fernlichtscheinwerfer. E luz de carretera. I proiettore di profondità. N grootlicht. P światło drogowe. S helljus. (845)

headphone

1. **headphone** : assembly of one or two earphones on a headband. ★ casque (d'écoute) → *casque 1.* R наушники. D Kopfhörer. E casco (de auriculares). I casco. N hoofdtelefoon. P słuchawki nagłowne. S huvudhörtelefon. (801)

headpiece

1. **headpiece** : part of a cap lamp, containing a light source or sources, designed to be attached to a miner's helmet. ★ projecteur de lampe au chapeau → *projecteur 7.* R фара головного светильника. D Kopfstück. E proyector de lámpara de casco. I proiettore per casco. N petstuk. P głowica lampy. S ..... (845)

headset

1. **headset** : assembly of a microphone and one or two earphones on a headband. ★ casque microphonique → *casque 2.* R микротелефонная трубка. D Hör-Sprech-Garnitur. E casco telefónico. I casco microtelefonico. N spreek-hoor-garnituur. P mikrotelefon nagłowny. S talgarnityr. (801)

head-span

1. **head-span suspension** : → *suspension 3*

health

1. **health physics** : → *physics 1*

hearing

1. **hearing aid** : → *aid 1*
2. **hearing level** : → *level 27*
3. **hearing protector** : → *protector 2*
4. **hearing threshold level** : → *level 28*
5. **normal threshold of hearing** : → *threshold 10*
6. **standard threshold of hearing** : → *threshold 13*
7. **threshold of hearing** : → *threshold 24*

hearth

1. **bogie hearth furnace** : → *furnace 7*
2. **fore hearth** : a charging area at the point of entry of the main furnace chamber and furnace hearth. A fore-hearth liquid metal holding furnace works in conjunction with a prime melting furnace. ★ avant-creuset → *avant-creuset 1.* R форкамера нагреваемая. D Vorherd. E antecrisol. I avancrogiolo. N ..... P dno czołowe. S föhärd; förvärmningszon. (841)
3. **grooved hearth furnace** : → *furnace 20*
4. **hearth** : structure on to which is placed the charge materials and which may be fixed or moving. ★ sole → *sole 10.* R под. D Herd. E crisol. I suola. N chargedraagconstructie. P dno. S härd. (841)
5. **hearth furniture** : skid rails, charge carriers and supporting pillars. ★ équipement de sole → *équipement 18.* R оснащение пода. D Herdeinrichtungen. E equipo de crisol. I accessori della suola. N chargeerhulpstukken. P wyposażenie dna. S ugnsutrustning. (841)
6. **hearth plate** : → *plate 10*
7. **hearth seal** : → *seal 6*
8. **roller hearth furnace** : → *furnace 44*
9. **rotary hearth furnace** : → *furnace 45*
10. **shaker hearth furnace** : → *furnace 51*
11. **skid hearth furnace** : → *furnace 52*
12. **sloping hearth furnace** : → *furnace 53*
13. **slotted hearth furnace** (*Syn.* grooved hearth furnace) : → *furnace 20*

heat

1. **combined heat and power** : the production of heat which is used for non-electrical purposes and also for electricity.

★ production combinée de chaleur et d'énergie électrique → *production 5.* R комбинированное производство тепла и электроэнергии. D Kraftwärmekopplung. E producción combinada de calor y de energía eléctrica. I produzione combinata di calore e di energia elettrica. N warmtekrachtproduktie. P wytwarzanie ciepła i energii elektrycznej w gospodarce skojarzonej. S värmekraftproduktion. (602)

2. **combined heat transmission** : → *transmission 13*
3. **gross average heat rate of a unit** : → *rate 40*
4. **heat** (*Syn.* melting charge) : → *charge 37*
5. **heat bondable mica material** : → *material 17*
6. **heat capacity** : → *capacity 10*
7. **heat (energy)** (*Syn.* thermal energy) : → *energy 77*
8. **heat shield** : → *shield 7*
9. **heat shield** : → *shield 8*
10. **heat transmission** : → *transmission 31*
11. **heat transmission coefficient** : → *coefficient 27*
12. **heat treatment** : → *treatment 2*
13. **latent heat** : the quantity of heat involved to change the state or structure of a substance when at constant temperature and pressure. ★ chaleur latente → *chaleur 2.* R скрытая теплота. D latente Wärme. E calor latente. I calore latente. N latente warmte. P ciepło utajone. S omvandlingsentalpi; latent entalpi. (841)
14. **localised heat** : the heating of a confined area of a body. ★ chauffage localisé → *chauffage 20.* R местный нагрев. D örtliche Erwärmung. E calentamiento localizado. I riscaldamento localizzato. N plaatselijke verwarming. P nagrzewanie elektryczne miejscowe. S lokal värmning. (841)
15. **molar reaction heat** : the quantity of heat which is evolved per mol during a chemical reaction. ★ chaleur (molaire) de réaction → *chaleur 4.* R молярная теплота реакции. D Reaktionswärme (Molwärme). E calor molar de reacción. I calore (molare) di reazione. N molaire reactiewarmte. P ciepło molowe reakcji. S molart reaktionsvärme. (841)
16. **molar reduction heat** : the quantity of heat per mol which is necessary to add during a chemical reaction. ★ chaleur (molaire) de réduction → *chaleur 5.* R молярная теплота восстановления. D Reduktionswärme (Molwärme). E calor molar de reducción. I calore (molare) di riduzione. N molaire reductiewarmte. P ciepło molowe redukcji. S molart reduktionsvärme. (841)
17. **net average heat rate of a unit** : → *rate 60*
18. **recuperative heat** : the quantity of heat which is not usable during the total heating process and which can be recuperated. ★ chaleur récupérable → *chaleur 6.* R рекуперированное тепло. D rückgewonnene Wärme. E calor recuperable. I calore recuperabile. N terugwinbare warmte. P ciepło odzyskowe. S återvinnbart värme. (841)
19. **specific heat capacity** : → *capacity 26*
20. **stored heat** : the heat which is put into a material of high specific heat and/or high latent heat primarily for later utilization. ★ chaleur accumulée → *chaleur 1.* R аккумулированное тепло. D Speicherwärme. E calor acumulado. I calore accumulato. N geaccumuleerde warmte. P ciepło akumulowane. S lagrat värme. (841)
21. **useful heat** : the quantity of heat which is usable during the total heating. ★ chaleur utile → *chaleur 8.* R полезное тепло. D Nutzwärme. E calor útil. I calore utile. N nuttige warmte. P ciepło użyteczne. S nyttigt värme. (841)

heated

1. **directly heated cathode filament** : → *filament 3*
2. **indirectly heated cathode** : → *cathode 24*

heater

1. **dielectric heater** : a dielectric heating appliance which does not have a heating chamber. ★ poste de chauffage diélectrique → *poste 20.* R диэлектрический нагреватель. D dielektrisches Erwärmungsgerät. E calentador dieléctrico. I stazione di riscaldamento dielettrico. N diëlektrisch verwarmingstoestel. P nagrzewnica pojemnościowa. S dielektrisk värmare. (841)
2. **filament or heater starting (surge) current** : → *current 89*
3. **flexible surface heater** : a heater having sufficient flexibility to conform to the shape of the surface to be heated. ★ réchauffeur de surface souple → *réchauffeur 2.* R гибкий нагреватель поверхности. D biegsames Oberflächenheizelement. E calentador de superficie flexible. I apparecchio di riscaldamento di una superficie flessibile. N soepel oppervlakteverwarmingselement. P grzejnik powierzchniowy giętki. S böjlig ytvärmare. (841)
4. **heater** : an electrically heated element for supplying heat to an indirectly heated cathode. ★ filament chauffant → *filament 7.* R подогреватель. D Heizer. E filamento calentador. I filamento riscaldatore. N gloeidraad. P grzejnik katody. S glödtråd för indirekt upphettad katod. (531)
5. **heater** : an assembly incorporating one or more heating elements. ★ corps de chauffe → *corps 2.* R нагреватель. D Heizkörper. E calentador. I apparecchio di riscaldamento. N verhitter. P grzejnik. S (motstånds)värmare. (841)
6. **heater current** : → *current 100*
7. **heater plate mica** : → *mica 6*
8. **heater voltage** : → *voltage 83*
9. **heater warm-up time** : → *time 72*
10. **induction heater** : an induction heating equipment without a closed heating chamber in which the current is induced in the workpiece by means of an inductor. ★ poste de chauffage par induction → *poste 21.* R индукционный нагреватель. D Induktionserwärmer. E calentador de inducción. I stazione di riscaldamento ad induzione. N inductief verwarmingstoestel. P nagrzewnica indukcyjna. S induktionsvärmare. (841)
11. **induction platen heater** : a laminated iron core with slots into which the coil windings are inserted. The platen, placed on the core, acts as a secondary winding, becomes heated and transfers heat to the workpiece by conduction. ★ réchauffeur par induction à plateau → *réchauffeur 3.* R индукционный плоский нагреватель. D induktiver Plattenerwärmer. E calentador de inducción de pletina. I riscaldatore ad induzione *(– a piastra –*). N inductief plaatverwarmingstoestel. P wzbudnik indukcyjny z płytką. S induktiv plattvärmare. (841)
12. **infra-red heater** : an infra-red heating appliance having no chamber. ★ radiateur à infrarouge → *radiateur 2.* R инфракрасный нагреватель. D Infrarotheizkörper. E radiador de infrarrojos. I elemento di riscaldo ad infrarossi. N infraroodverwarmingstoestel. P nagrzewnica promiennikowa. S infravärmare. (841)
13. **infra-red portable heater** : a panel construction, housing one or more infra-red emitters, the whole heater supported with a means for tilting and movement which is made portable. ★ radiateur portatif à infrarouge → *radiateur 5.* R инфракрасный портативный нагреватель. D tragbarer Infrarotheizkörper. E radiador portátil de infrarrojos. I elemento di riscaldo portatile ad infrarossi. N verplaatsbaar infraroodverwarmingstoestel. P nagrzewnica promiennikowa przenośna. S bärbar infravärmare. (841)
14. **plasma heater** : a heating appliance using (a) plasma torch(es) without heating chamber. ★ poste de chauffage par plasma → *poste 22.* R плазменный нагреватель. D Plasmabrenner (Erwärmungsgerät). E calentador a plasma. I riscaldatore a plasma. N plasmaverwarmingstoestel. P nagrzewnica plazmowa. S plasmavärmare. (841)
15. **rigid surface heater** : a non flexible heater fabricated to the general shape of the surface to be heated. ★ réchauffeur de surface rigide → *réchauffeur 1.* R неподвижно закрепленный нагреватель поверхности. D starres Oberflächenheizelement. E calentador de superficie rígida. I apparecchio di riscaldamento di superficie rigida. N star oppervlakteverwarmingselement. P grzejnik powierzchniowy sztywny. S formgiven ytvärmare. (841)

heater-cathode

1. **heater-cathode current** (*Syn.* heater-cathode insulation current) : → *current 102*
2. **heater-cathode insulation current** : → *current 102*

heating

1. **arc heating** : a method of heating in which the heat is chiefly produced by one or several electric arc(s). ★ chauffage par arc → *chauffage 21.* R дуговой нагрев. D Lichtbogenerwärmung. E calentamiento por arco. I riscaldamento ad arco. N (vlam)boogverwarming. P nagrzewanie łukowe. S ljusbågsvärmning. (841)
2. **arc resistance heating** (*Syn.* submerged arc heating) : → *heating 52*

3. **cathode heating rate** : → *rate 9*
4. **cathode heating time** : → *time 17*
5. **dielectric heating** : method of heating in which the heat is mainly generated in a non-conductive body by movements of electric charges, on the atomic or molecular scale, under the action of an electric field of a frequency range from 1 to 300 MHz. ★ chauffage (par hystérésis) diélectrique → *chauffage 27.* R диэлектрический нагрев. D dielektrische Erwärmung. E calentamiento dieléctrico. I riscaldamento dielettrico per isteresi. N diëlektrische verwarming. P nagrzewanie pojemnościowe. S dielektrisk värmning. (841)
6. **dielectric heating oven** : → *oven 1*
7. **direct arc heating** : an arc heating in which the arc current passes through the material to be heated. ★ chauffage direct par arc → *chauffage 7.* R прямой дуговой нагрев. D direkte Lichtbogenerwärmung. E calentamiento directo por arco. I riscaldamento diretto ad arco. N directe boogverwarming. P nagrzewanie łukowe bezpośrednie. S direkt ljusbågsvärmning. (841)
8. **direct electric heating** : an electric heating process in which the current passes through the material to be heated. ★ chauffage électrique direct → *chauffage 10.* R прямой электронагрев. D direkte elektrische Erwärmung. E calentamiento eléctrico directo. I riscaldamento elettrico diretto. N directe elektrische verwarming. P nagrzewanie elektryczne bezpośrednie. S direkt elvärmning; konduktiv elvärmning. (841)
9. **direct heating** (of a thermal time-delay switch) : a method of heating in a thermal time-delay switch where sufficient heat is generated by the flow of current through the operating member. ★ chauffage direct → *chauffage 6.* R нагрев прямой (термовыключатель с задержкой времени). D direkte Beheizung (eines temperaturgesteuerten Zeitschalters). E calentamiento directo (de un interruptor con retardo térmico). I ..... N directe verwarming. P nagrzewanie bezpośrednie (łącznika zwłocznego cieplnego). S direktupphettning. (581)
10. **direct resistance heating** : resistance heating in which the electric current passes through the material to be heated. ★ chauffage direct par résistance → *chauffage 8.* R прямой нагрев сопротивлением. D direkte Widerstandserwärmung. E calentamiento directo por resistencia. I riscaldamento diretto a resistenza. N directe weerstandsverwarming. P nagrzewanie rezystancyjne bezpośrednie. S direkt motståndsvärmning. (841)
11. **direct resistance heating equipment** : a resistance heating equipment in which the electric current passes through the material to be heated. ★ équipement de chauffage direct par résistance → *équipement 9.* R оборудование для прямого нагрева сопротивлением. D direkte Widerstandserwärmungseinrichtung. E equipo de calentamiento directo por resistencia. I apparecchiatura di riscaldamento diretto a resistenza. N apparatuur met directe weerstandsverwarming. P urządzenie elektrotermiczne rezystancyjne bezpośrednie. S ..... (841)
12. **electric heating** : the deliberate production of heat by electrical phenomena. ★ chauffage électrique → *chauffage 9.* R процесс электронагрева. D elektrische Erwärmung. E calentamiento eléctrico. I riscaldamento elettrico. N elektrische verwarming. P nagrzewanie elektryczne. S elektrisk värmning; elvärmning. (841)
13. **electric surface heating** : the heat generated in the surface layer of a body to be heated by electrical means in order to raise or maintain its temperature. ★ chauffage électrique superficiel → *chauffage 12.* R электронагрев поверхности. D elektrische Oberflächenerwärmung. E calentamiento eléctrico superficial. I riscaldamento elettrico superficiale. N elektrische oppervlakteverwarming. P nagrzewanie elektryczne powierzchniowe. S elektrisk ytvärmning. (841)
14. **electron beam heating** : method of heating, generally conducted in vacuum, in which the heat is generated by the impingement of an electron beam on the workpiece. ★ chauffage par faisceau électronique → *chauffage 24.* R нагрев электронным лучом. D Elektronenstrahlerwärmung. E calentamiento por haz electrónico. I riscaldamento per fascio elettronico. N verwarming door elektronenbombardement. P nagrzewanie elektronowe. S elektronstrålevärmning. (841)
15. **heating cable** : → *cable 32*
16. **heating cable unit** : → *unit 29*
17. **heating capacitor** : → *capacitor 38*
18. **heating chamber** : → *chamber 10*
19. **heating circuit** : → *circuit 85*
20. **heating conductor** : → *conductor 39*
21. **heating conductor green rot** : → *rot 1*
22. **heating conductor surface rating** : → *rating 6*
23. **heating contactor** : → *contactor 10*
24. **heating generator** : → *generator 17*
25. **heating inductor** : → *inductor 7*
26. **heating jumper** : → *jumper 1*
27. **heating resistance collar** (*Syn.* heating resistance pad) : → *pad 3*
28. **heating resistance mat** (*Syn.* heating resistance pad) : → *pad 3*
29. **heating resistance pad** : → *pad 3*
30. **heating resistor** (*Syn.* heating conductor) : → *conductor 39*
31. **heating resistor battery** : → *battery 40*
32. **heating tape unit** : → *unit 30*
33. **heating tariff** : → *tariff 11*
34. **heating time** : → *time 73*
35. **heating train line** : → *line 44*
36. **independent heating** (of a thermal time-delay switch) : a method of heating in a thermal time-delay switch where an independent heater operates the main contacts due to the effect of a control circuit independent from the load circuit. ★ chauffage indépendant → *chauffage 15.* R нагрев независимый (термовыключатель с задержкой времени). D unabhängige Beheizung (eines temperaturgesteuerten Zeitschalters). E calentamiento independiente (de un interruptor con retardo térmico). I ..... N onafhankelijke verwarming. P nagrzewanie niezależne (łącznika zwłocznego cieplnego). S separat upphettning. (581)
37. **indirect arc heating** : an arc heating in which the arc current does not pass through the material to be heated. ★ chauffage indirect par arc → *chauffage 17.* R косвенный дуговой нагрев. D indirekte Lichtbogenerwärmung. E calentamiento indirecto por arco. I riscaldamento indiretto ad arco. N indirecte boogverwarming. P nagrzewanie łukowe pośrednie. S indirekt ljusbågsvärmning. (841)
38. **indirect electric heating** : an electric heating process in which the heat generated is transferred to the material to be heated. ★ chauffage électrique indirect → *chauffage 11.* R косвенный электронагрев. D indirekte elektrische Erwärmung. E calentamiento eléctrico indirecto. I riscaldamento elettrico indiretto. N indirecte elektrische verwarming. P nagrzewanie elektryczne pośrednie. S indirekt elvärmning. (841)
39. **indirect heating** (of a thermal time-delay switch) : a method of heating in a thermal time-delay switch where the heat is generated by a coil in close proximity to the operating member. ★ chauffage indirect → *chauffage 16.* R нагрев косвенный. D indirekte Beheizung (eines temperaturgesteuerten Zeitschalters). E calentamiento indirecto (de un interruptor con retardo térmico). I ..... N indirecte verwarming. P nagrzewanie pośrednie (łącznika zwłocznego cieplnego). S indirekt upphettning. (581)
40. **indirect induction heating** (*Syn.* induction vessel heating) : → *heating 43*
41. **indirect resistance heating** : resistance heating in which the heat generated by Joule effect in a resistor is transferred to the material to be heated. ★ chauffage indirect par résistance → *chauffage 19.* R косвенный нагрев сопротивлением. D indirekte Widerstandserwärmung. E calentamiento indirecto por resistencia. I riscaldamento indiretto a resistenza. N indirecte weerstandsverwarming. P nagrzewanie rezystancyjne pośrednie. S indirekt motståndsvärmning. (841)
42. **induction heating** : method of heating in which the heat is generated by currents in the workpiece, induced electromagnetically. ★ chauffage par induction → *chauffage 28.* R индукционный нагрев. D Induktionserwärmung. E calentamiento por inducción. I riscaldamento ad induzione. N inductieve verwarming. P nagrzewanie indukcyjne. S induktiv värmning. (841)
43. **induction vessel heating** (*Syn.* indirect induction heating) : heating the metal or graphite container vessel walls and bottom, usually by mains frequency, the heat being transferred to the contents of the vessel principally by conduction. ★ chauffage indirect par induction

→ *chauffage 18.* R индукционный нагрев емкости; косвенный индукционный нагрев. D indirekte induktive Erwärmung. E calentamiento indirecto por inducción. I riscaldamento ad induzione indiretto. N inductieve vatverwarming; indirecte inductieve verwarming. P nagrzewanie indukcyjne naczyniowe. S indirekt induktiv värmning. (841)

44. **infra-red heating** : the method of heating based on the transfer of energy by infra-red radiation. ★ chauffage par rayonnement infrarouge → *chauffage 32.* R инфракрасный нагрев. D Infraroterwärmung. E calentamiento por radiación infrarroja. I riscaldamento con raggi infrarossi. N infraroodverwarming. P nagrzewanie promiennikowe. S infrarödvärmning. (841)
45. **microwave heating** : method of heating in which the heat is mainly generated by a molecular movement and by ionic conduction within a non-conductive material under the action of electromagnetic waves of a frequency range between 300 MHz and 300 GHz (wavelength from 1 m to 1 mm). ★ chauffage par hyperfréquences → *chauffage 26.* R нагрев токами сверхвысокой частоты. D Mikrowellenerwärmung. E calentamiento por microondas. I riscaldamento a microonde. N microgolfverwarming. P nagrzewanie mikrofalowe. S mikrovågsvärmning. (841)
46. **microwave heating equipment** : → *equipment 51*
47. **parallel cathode heating** (of a discharge lamp) : type of heating of the electrodes of a discharge lamp in which these electrodes are fed by separate circuits. *Note.* — Each electrode is usually connected across a low voltage winding which may be part of the ballast and provides the heating current. In certain circuits, this low voltage is automatically decreased after the arc has struck. ★ chauffage en parallèle des électrodes → *chauffage 13.* R нагрев параллельно включенного катода (разрядной лампы). D Parallelheizung einer Kathode. E caldeo en paralelo de cátodos. I riscaldamento in parallelo del catodo. N parallelverwarming van de kathoden. P grzanie katody równoległe. S parallelkatodvärmning. (845)
48. **plasma heating** : method of heating using the thermal and/or electrical properties of the ionised gas. ★ chauffage par plasma → *chauffage 31.* R плазменный нагрев. D Plasmaerwärmung. E calentamiento por plasma. I riscaldamento a plasma. N plasmaverwarming. P nagrzewanie plazmowe. S plasmavärmning. (841)
49. **radio frequency heating apparatus** : → *apparatus 12*
50. **resistance heating** : the method of heating in which the heat is generated by Joule effect in an electrical conductor connected directly to a source of electrical energy. ★ chauffage par résistance → *chauffage 33.* R нагрев сопротивлением. D Widerstandserwärmung. E calentamiento por resistencia. I riscaldamento a resistenza. N weerstandsverwarming. P nagrzewanie rezystancyjne. S motståndsvärmning. (841)
51. **series cathode heating** (of a discharge lamp) : type of heating of the electrodes of a discharge lamp in which the heating current flows through the electrodes in series. ★ chauffage en série des électrodes → *chauffage 14.* R нагрев последовательно включенного катода (разрядной лампы). D Serienheizung einer Kathode. E caldeo en serie de cátodos. I riscaldamento in serie del catodo. N serieverwarming van de kathoden. P grzanie katody szeregowe. S seriekatodvärmning. (845)
52. **submerged arc heating** (*Syn.* arc resistance heating) : a heating process in which the heat is dissipated partly in the arc itself and partly by Joule effect through the charge. ★ chauffage par arc submergé → *chauffage 22.* R процесс нагрева с погруженной дугой. D Erwärmung mit unterdrücktem Lichtbogen. E calentamiento por arco sumergido; calentamiento por arco-resistencia. I riscaldamento ad arco sommerso; riscaldamento ad arco-resistenza. N boog-weerstandsverwarming door ondergedompelde elektroden. P nagrzewanie łukiem krytym. S ljusbågsmotståndsvärmning. (841)
53. **through heating** : the heating of a work piece throughout to a temperature as uniformly as possible. ★ chauffage à cœur → *chauffage 5.* R сквозной нагрев. D Durchwärmung. E calentamiento pasante. I riscaldamento totale. N doorwarming. P nagrzewanie elektryczne skrośne. S genomvärmning. (841)
54. **(train) heating winding** : → *winding 85*
55. **transverse flux heating** : an induction heating technique in which the induced electromagnetic flux is directed transversely to the largest plane surface of the workpiece. ★ chauffage par flux transversal → *chauffage 25.* R нагрев поперечным потоком. D Querflusserwärmung. E calentamiento por flujo transversal. I riscaldamento con flusso traverso. N dwarsveldverwarming. P nagrzewanie indukcyjne strumieniem poprzecznym. S tvärfältsvärmning. (841)
56. **travelling wave heating** : an induction heating technique in which a three-phase flux is directed transversely to the largest plane surface of the workpiece and scans it at the fundamental frequency. ★ chauffage par ondes progressives → *chauffage 30.* R нагрев бегущей волной. D Wanderfeld-Erwärmung. E calentamiento por ondas progresivas. I riscaldamento con onde progressive. N lopendegolfverwarming. P nagrzewanie indukcyjne falą bieżącą. S svept induktiv värmning. (841)

heating element

1. **embedded heating element** : a heating element wound in slots or passed through hole in metal or refractory materials, the whole constituting a heat source. ★ élément chauffant noyé → *élément chauffant 4.* R встроенный нагревательный элемент. D eingebettetes Heizelement. E elemento calentador empotrado. I elemento riscaldante incapsulato. N ingebed verwarmingselement. P element grzejny zagłębiony. S inbäddat motståndselement. (841)
2. **heating element** : a part, removable or not, comprising a heating conductor and accessories which make up an independent unit. ★ élément chauffant → *élément chauffant 2.* R нагревательный элемент. D Heizelement. E elemento calentador. I elemento riscaldante. N verwarmingselement. P element grzejny. S motståndselement. (841)
3. **infra-red heating element** : the heat source from which infra-red radiation is emitted. ★ élément chauffant par infrarouge → *élément chauffant 5.* R инфракрасный нагревательный элемент. D Infrarotheizelement. E elemento calentador por infrarrojos. I elemento riscaldante a raggi infrarossi. N infraroodstralingselement. P grzejnik promiennikowy. S infrastrålare. (841)
4. **insulated tape heating element** : an electrically insulated tape comprising one or more heating resistors and a flexible carrier. ★ ruban isolant chauffant → *ruban 13.* R изолированный ленточный нагревательный элемент. D isoliertes Bandheizleiterelement. E cinta de calentamiento aislada. I nastro isolante riscaldante. N (geïsoleerd) verwarmingslint. P element grzejny taśmowy izolowany. S (isolerat) värmeband. (841)
5. **protected heating element** : a heating element in which the conductor and its electrical insulation are contained in a protecting envelope. ★ élément chauffant protégé → *élément chauffant 6.* R защищенный нагревательный элемент. D geschütztes Heizelement. E elemento calentador protegido. I elemento riscaldante protetto. N beschermd verwarmingselement. P element grzejny w osłonie. S skyddat motståndselement. (841)
6. **sheathed heating element** : a protected heating element whose protecting envelope is particularly resistant to mechanical stresses and ingress of fluids. ★ élément chauffant blindé → *élément chauffant 3.* R нагревательный элемент с упрочненной защитной оболочкой. D ummanteltes Heizelement. E elemento calentador blindado. I elemento riscaldante blindato. N afgeschermd verwarmingselement. P element grzejny opancerzony. S extra skyddat motståndselement. (841)

Heaviside

1. **(Heaviside) unit step** : → *step 2*

heel

1. **heel effect** : → *effect 32*
2. **liquid heel** : the quantity of liquid metal retained in a furnace in continuous service. ★ pied de bain → *pied 3.* R остаток жидкого металла в печи. D flüssiger Sumpf. E pie de baño. I piede caldo. N badrest. P pozostałość pospustowa. S sump. (841)

height

1. **duct height** : the height above the surface of the Earth of the lower boundary of an elevated duct. ★ hauteur du conduit → *hauteur 6.* D Ducthöhe. P wysokość duktu. (705)

2. **effective height** (*Syn.* effective length) : → *length 7*
3. **height gain** : → *gain 19*
4. **layer height** : the height equal either to the height of maximum ionization or to the minimum value of the virtual height of an ionospheric layer. *Note.* — The characteristic used to define the height of the layer must always be specified. ★ hauteur d'une couche → *hauteur 7.* D Schichthöhe. P wysokość warstwy. (705)
5. **record-stacking height** : → *record-stacking 1*
6. **system height** (*Syn.* encumbrance) : the vertical distance between main catenary and contact wire measured at a support point. ★ encombrement (de la ligne de contact) → *encombrement 3.* R высота системы. D Systemhöhe. E encumbramiento. I ingombro verticale (della linea di contatto). N systeemhoogte. P odstęp przewodu jezdnego (od linki nośnej). S systemhöjd. (811)
7. **throat height** (*Syn.* throat gap) : → *gap 20*
8. **virtual height** : the height of the hypothetical horizontal surface at which a radio wave, propagating in vacuo between two given points located on the ground, would have to be reflected for the group delay to be the same as of the real transmission path between these two points comprising a single ionospheric reflection. ★ hauteur virtuelle (de réflexion) → *hauteur 13.* D scheinbare Höhe. P wysokość wirtualna. (705)
9. **working height** : the range of heights over which the pantograph operates correctly. ★ hauteur de travail → *hauteur 4.* R рабочая высота. D Arbeitsbereich. E altura de trabajo. I campo di lavoro (del pantografo). N werkgebied. P zasięg roboczy. S arbetshöjd för strömavtagare. (811)

helical

1. **helical post-deflection accelerator** : → *accelerator 4*
2. **helical video tape recorder** : → *tape recorder 1*

heliotherapy

1. **heliotherapy** : treatment of disease by the use of solar irradiation. ★ héliothérapie → *héliothérapie 1.* R гелиотерапия. D Heliotherapie. E helioterapia. I elioterapia. N heliotherapie. P helioterapia. S helioterapi. (845)

helium

1. **helium counter tube** : → *counter tube 16*

helix

1. **helix antenna** : → *antenna 60*
2. **writing helix** : a rotating part used in some continuous facsimile receivers, comprising a helicoidal rib, the intersection of which with the scanning line defines, at a given instant, the position of the picture element on this line. ★ hélice d'inscription → *hélice 4.* R записывающая спираль. D Schreibwendel. E hélice de inscripción. I ellisse di scrittura. N schrijfschroeflijn. P spirala zapisu. S skrivspiral. (721)

Hell

1. **Hell system** : → *system 78*

Hellschreiber

1. **Hellschreiber system** (*Syn.* Hell system) : → *system 78*

Helmholtz

1. **Helmholtz resonator** : → *resonator 3*

Helmholtz-Kohlrausch

1. **Helmholtz-Kohlrausch phenomenon** : → *phenomenon 3*

hemeralopia

1. **hemeralopia** (*Syn.* night-blindness) : anomaly of vision in which there is a pronounced inadequacy or complete absence of scotopic vision. ★ héméralopie → *héméralopie 1.* R куриная слепота. D Nachtblindheit; Hemeralopie. E ceguera nocturna. I emeralopia. N nachtblindheid. P hemeralopia; niedowidzenie zmierzchowe. S nattblindhet. (845)

hemispherical

1. **(hemispherical) emissivity** : → *emissivity 3*

henry

1. **henry, H** (H) : SI unit of (electric) inductance. ★ henry, H → *henry 1.* (100)

heptode

1. **heptode** : a seven-electrode electronic tube containing an anode, a cathode, a control electrode, and four additional electrodes. ★ heptode → *heptode 1.* R гептод. D Heptode. E eptodo. I eptodo. N heptode. P heptoda. S heptod. (531)

hermaphroditic

1. **hermaphroditic connector** : → *connector 29*
2. **hermaphroditic contact** : → *contact 74*

hermetic

1. **hermetic connector** : → *connector 30*
2. **hermetic seal** : → *seal 7*

hermetically

1. **hermetically sealed (secondary) cell** : → *cell 18*

hertz

1. **hertz, Hz** (Hz) : SI unit of frequency of a periodic phenomena. ★ hertz, Hz → *hertz 2.* (100)

hertzian

1. **hertzian (electric) dipole** : → *dipole 10*
2. **hertzian magnetic dipole** : → *dipole 11*

heterogeneous

1. **heterogeneous multiplex** : → *multiplex 3*
2. **heterogeneous plane wave** : → *wave 21*
3. **heterogeneous radiation** : → *radiation 32*
4. **heterogeneous reactor** : → *reactor 16*

heterojunction

1. **heterojunction** : a PN semiconductor junction in which the two regions differ in their doping conductivities, and also in their atomic compositions. ★ hétérojonction → *hétérojonction 1.* R гетерогенный переход; гетеропереход. D Heterogen-Verbindung. E heterounión. I eterogiunzione. N heterojunctie. P heterozłącze (półprzewodnikowe). S heteroövergång. (731)

heteropolar

1. **heteropolar machine** : → *machine 14*

hexafluoride

1. **sulphur hexafluoride circuit-breaker** : → *circuit-breaker 18*

hexode

1. **hexode** : a six-electrode electronic tube containing an anode, a cathode, a control electrode, and three additional electrodes. ★ hexode → *hexode 1.* R гексод. D Hexode. E exodo. I esodo. N hexode. P heksoda. S hexod. (531)

HFRDF

1. **HFRDF** (*Syn.* high-frequency repeater distribution frame) : → *frame 33*

HIC

1. **HIC** (*Syn.* halving interval) : → *interval 7*

HID

1. **HID lamp** (*Syn.* high intensity discharge lamp) : → *lamp 22*

hidden

1. **hidden demand** (*Syn.* suppressed traffic) : → *traffic 21*

hierarchic

1. **hierarchic mutually synchronized network** : → *network 29*
2. **hierarchic synchronized network** : → *network 30*

hierarchy

1. **digital multiplex hierarchy** : a series of levels of digital multiplexing in which each level is characterized by a defined digit rate, and in which each level handles a digital signal assembled by multiplexing signals whose digit rate is that of a

lower level. *Note.* — CCITT has defined the basis for a standardized digital multiplex hierarchy. ★ hiérarchie de multiplexage numérique → *hiérarchie 1.* R иерархия цифрового группообразования. D digitale Multiplexhierarchie. E jerarquía de multiplexado numérico. I gerarchia di multiplazione numerica. N digitale multiplexhierarchie. P hierarchia krotnień cyfrowych. S digital multiplexhierarki. (704)

high

1. **high activity laboratory** : → *laboratory 1*
2. **"high band" standards** : → *standard 11*
3. **high conductivity polymer** : → *polymer 1*
4. **high definition television (system)** : → *television 14*
5. **high frequency** : → *frequency 111*
6. **high frequency capacitance (of a capacitor)** : → *capacitance 9*
7. **high frequency ignition** : → *ignition 1*
8. **high intensity discharge lamp** : → *lamp 22*
9. **high level language** : → *language 4*
10. **high load factor consumer** : → *consumer 4*
11. **high load factor tariff** : → *tariff 12*
12. **high pressure mercury (vapour) lamp** : → *lamp 23*
13. **high pressure sodium (vapour) lamp** : → *lamp 24*
14. **high reliability power line** : → *line 45*
15. **high speed automatic reclosing** : → *reclosing 5*
16. **high speed telex** (*Syn.* supertelex (service)) : → *supertelex 1*
17. **high usage circuit group** : → *group 42*
18. **high vacuum valve device** : → *valve device 3*
19. **mixed high frequencies** : → *frequency 132*
20. **tubular clear emitter (high temperature)** : → *emitter 13*

high-angle

1. **high-angle ray** : → *ray 10*

high-beam

1. **high-beam headlight** (*Syn.* main-beam headlight) : → *headlight 5*

high-frequency

1. **high frequency capacitance (of a capacitor)** : → *capacitance 9*
2. **high frequency ignition** : → *ignition 1*
3. **high-frequency repeater distribution frame** : → *frame 33*

high-low

1. **high-low action** : → *action 8*

high-pass

1. **high-pass filter** : → *filter 23*
2. **high-pass filter** : → *filter 24*

high-speed

1. **(d.c.) high-speed circuit-breaker** : → *circuit-breaker 9*
2. **high speed automatic reclosing** : → *reclosing 5*
3. **high speed telex** (*Syn.* supertelex (service)) : → *supertelex 1*

high-velocity

1. **high-velocity camera tube** : → *camera tube 4*
2. **high-velocity scanning** : → *scanning 2*

high-voltage

1. **high voltage** (*Syn.* HV (abbreviation)) : 1) in a general sense, the set of voltage levels in excess of low voltage. 2) in a restrictive sense, the set of upper voltage levels used in power systems for bulk transmission of electricity. ★ haute tension → *haute tension 11.* R высокое напряжение. D Hochspannung. E alta tensión (abreviatura); A.T. (abreviatura). I alta tensione; AT (abbreviazione). N hoogspanning; HS (afgekort). P napięcie wysokie. S högspänning. (601)
2. **high voltage capacitor** : → *capacitor 40*
3. **high voltage circuit** : → *circuit 87*
4. **high voltage consumer** : → *consumer 5*
5. **high voltage fuse** : → *fuse 4*
6. **high voltage tariff** : → *tariff 13*
7. **high voltage terminal** : → *terminal 11*
8. **high voltage test** : → *test 37*
9. **highest voltage for equipment** : the highest r.m.s. value of phase-to-phase voltage for which the equipment is designed in respect of its insulation as well as other characteristics which relate to this voltage in the relevant equipment standards. ★ tension la plus élevée pour le matériel → *tension 222.* R наибольшее допустимое напряжение оборудования. D höchste Spannung für Betriebsmittel. E tensión más elevada para el material. I tensione massima per il componente. N hoogste spanning waarvoor het materieel is ontworpen. P najwyższe napięcie robocze urządzenia. S konstruktionsspänning. (604)
10. **highest voltage for equipment** U_m (applicable to a transformer or reactor winding) : the highest r.m.s. phase-to-phase voltage for which a transformer or reactor winding is designed in respect of its insulation. *Note.* — U_m is the maximum value of the highest voltage of a system to which the winding may be connected, in respect of its insulation. ★ tension la plus élevée pour le matériel U_m → *tension 223.* R наибольшее рабочее напряжение U_m (обмотки трансформатора или реактора). D höchste Spannung für Betriebsmittel U_m (bezogen auf eine Transformator- oder Drosselspulenwicklung). E tensión más elevada para el material U_m (relativa a un arrollamiento de transformador o de reactancia). I tensione massima relativa ad un avvolgimento di trasformatore o di reattore U_m. N hoogste spanning U_m waarvoor het toestel is ontworpen (toegepast op een wikkeling van een transformator of van een spoel). P napięcie najwyższe urządzenia U_m (odniesione do uzwojenia transformatora lub dławika). S konstruktionsspänning. (421)
11. **highest voltage of a system** : the highest value of operating voltage which occurs under normal operating conditions at any time and any point in the system. *Note.* — Transient overvoltages due e.g. to switching operations and abnormal temporary variations of voltage, are not taken into account. ★ tension la plus élevée d'un réseau → *tension 221.* R максимальное напряжение электрической сети. D höchste Betriebsspannung eines Netzes. E tensión más elevada de una red. I tensione massima di una rete; tensione massima di un sistema. N hoogste spanning van een net. P napięcie sieci najwyższe. S högsta driftspänning. (601)
12. **high-voltage capacitor** : → *capacitor 41*
13. **high-voltage d.c. link** : → *link 14*
14. **high-voltage generator** : → *generator 18*
15. **high-voltage regulation** : → *regulation 4*
16. **high-voltage winding** : → *winding 32*
17. **low-frequency high voltage test** : → *test 50*
18. **power output of a high voltage generator** : → *output 58*

highway

1. **highway** (*Syn.* bus) : a common path within an apparatus or station over which signals from a number of channels pass with separation achieved by time division multiplexing. ★ bus → *bus 1.* R цифровая шина. D Bus. E barra de distribución; unión múltiplex interna. I bus; autostrada; canale omnibus. N hoofdweg; bus. P szyna zbiorcza (sygnałów). S buss. (704,714)

hill-and-dale

1. **hill-and-dale recording** (*Syn.* vertical recording) : → *recording 49*

hill-side

1. **hill-side extension** : → *extension 6*

hinged

1. **hinged cantilever** : → *cantilever 2*

hiss

1. **hiss** : tube noise in the audio-frequency range, having subjective characteristics analogous to the prolonged sibilant sound. ★ souffle → *souffle 1.* R свист. D Zischen. E silbido. I soffio. N gesis. P syczenie. S väsning. (531)
2. **hiss** (*Syn.* background noise) : → *noise 3*

HLL

1. **HLL** (*Syn.* high level language) : → *language 4*

hoghorn

1. **hoghorn** (antenna) : a reflector antenna consisting of a reflector in the form of a parabolic cylinder, fed by a sectoral horn which physically intersects the reflector, a part of one of the non-parallel sides of the horn being removed to form the antenna aperture. ★ cornet sectoral à réflecteur → *cornet 17.* R сегментно-параболическая рупорная антенна. D Hornparabolantenne. E bocina sectorial con reflector (hoghorn). I hog horn. N hoornparabool. P antena rożkowa z reflektorem cylindrycznym. S parabelhorn. (712)

hoist

1. **skip hoist** : a charging device with chains or links which carries charged containers being continuously hoisted for tilting at the position required by the process. ★ élévateur à balancelles → *élévateur 1.* R скиповый подъемник. D Kippmulden-Aufzug. E elevador de vasijas. I elevatore a tazze. N verticale kipbakinrichting. P podnośnik kubłowy. S ..... (841)

hold

1. **backward hold** : the holding of switching equipment or circuits as a result of a hold act at a subsequent switching stage. *Note.* — This function does not necessarily imply the use of a physical holding circuit. ★ maintien par l'aval → *maintien 9.* R обратное удержание. D Rueckwaertshalten. E retención hacia atrás. I tenuta a ritroso. N terugwaarts (vast)houden. P trzymanie wstecz. S fasthållning i backriktning. (714)
2. **forward hold** : the holding of switching equipment or circuits as a result of a hold act in a previous switching stage. *Note.* — This function does not necessarily imply the use of a physical holding circuit. ★ maintien par l'amont → *maintien 8.* R прямое удержание. D Vorwaertshalten. E retención hacia adelante. I tenuta in avanti. N voorwaarts (vast)houden. P trzymanie w przód. S fasthållning i framriktning. (714)
3. **hold** : the act of maintaining the state of a set of traffic-carrying devices or a switching path in the busy condition for as long as is required. ★ maintien → *maintien 5.* R удержание. D halten. E mantenido. I tenuta. N handhaven; houden. P trzymanie. S belägga. (714)
4. **manual hold** : in semi-automatic switching, the holding of the connection, until the operator releases it if the caller has cleared first. ★ maintien manuel → *maintien 6.* R ручное удержание соединения. D manuelles Halten. E retención manual. I tenuta manuale. N ..... P trzymanie ręczne. S manuell fasthållning. (714)
5. **musical hold device** : → *device 37*

holder

1. **brush holder** : → *brush 4*
2. **brush holder support** : → *brush 5*
3. **electrode holder** : a device to hold the electrode and to convey the current to it for the purpose of welding or cutting. ★ porte-électrode → *porte-électrode 1.* R электрододержатель. D Elektrodenhalter. E porta-electrodo. I portaelettrodo. N elektrodehouder. P uchwyt elektrody spawalniczy. S elektrodhållare. (851)

holding

1. **call holding device** (*Syn.* musical hold device) : → *device 37*
2. **holding** : maintaining storage elements at an equilibrium potential by electron bombardment. ★ entretien → *entretien 8.* R поддерживание. D halten. E mantenimiento. I mantenimento. N opladen. P podtrzymywanie. S hållning. (531)
3. **holding action** : → *action 9*
4. **holding brake** : → *brake 19*
5. **holding brake force** : → *force 19*
6. **holding current** : → *current 103*
7. **holding gun** : → *gun 7*
8. **holding temperature** : → *temperature 18*
9. **holding time** : → *time 74*
10. **induction holding furnace** : → *furnace 29*

hold-off

1. **hold-off interval** : → *interval 8*
2. **hold-off period** (*Syn.* off-state interval) : → *interval 14*
3. **trigger hold off** : → *trigger 8*

hole

1. **beam hole** (*Syn.* irradiation channel; experimental hole) : duct through the shield into the interior of a reactor and used for experimental purposes, either for radiation in situ or for the passage of a beam of radiation to the outside of the reactor. *Note.* — the duct passes though the biological shield and the thermal shield which together form what is termed the shield. ★ canal expérimental → *canal 7.* D Strahlrohr. E canal experimental. I apertura di fascio sperimentale. N bundelgat; stralingskanaal. P kanał wiązki. S strålkanal. (026)
2. **Bethe hole coupler** : → *coupler 3*
3. **centre holes** (*Syn.* feed holes) : pattern of holes perforated in telegraph tape, which, when the tape is engaged in a suitable tape feeding mechanism, enable it to be propelled in a forward or backward direction. ★ perforation d'entraînement → *perforation 3.* R ведущая дорожка. D Führungslöcher; Transportlöcher. E agujero de alimentación; perforación de arrastre. I fori di trascinamento. N voedingsgaten. P otwór transportowy. S matningshål. (721)
4. **component hole** : hole used for the attachment of component terminations to the printed board as well as for any electrical connection to the conductive pattern. ★ trou de connexion → *trou 4.* R монтажное отверстие печатной платы. D Anschlußloch. E agujero de conexión; agujero de paso de cara. I foro per connessioni elettriche. N componentengat. P otwór wyprowadzeniowy. S anslutningshål. (541)
5. **coupling hole** (*Syn.* coupling aperture) : → *aperture 12*
6. **crimp inspection hole** : a hole provided in the conductor barrel to permit visual inspection of conductor position. ★ trou d'inspection du contact → *trou 6.* R отверстие контакта контрольное. D Crimp-Prüfloch. E orificio de inspección del contacto. I foro d'ispezione del contatto a crimpare. N inspectiegat (voor wurgverbinding). P otwór kontrolny zgniotu. S inspektionshål i kontaktpressningshylsa. (581)
7. **experimental hole** (*Syn.* beam hole) : → *hole 1*
8. **feed holes** (*Syn.* centre holes) : → *hole 3*
9. **hole** : a vacancy appearing in a normally-filled energy band, behaving like a positive charge carrier. *Note.* — A hole is frequently produced by the elevation of an electron from the valence band to the conduction band and produces what is called an electron-hole pair. ★ trou → *trou 3.* R дырка. D Loch. E agujero. I lacuna. N gat. P dziura. S (elektron)hål. (111,391,521)
10. **hole conduction** : → *conduction 15*
11. **inspection hole** (*Syn.* sight hole) : an opening to allow observation of the charge materials within the furnace chamber. ★ regard → *regard 1.* R смотровое отверстие; отверстие для наблюдения. D Schauloch. E mirilla. I apertura di ispezione. N kijkgat. P wziernik. S inspektionsöppning. (841)
12. **landless hole** : plated-through hole without land. ★ trou sans pastille → *trou 8.* R отверстие без контактной площадки. D lötaugenloses Loch. E agujero sin nodo o pastilla. I foro senza pastiglia. N gat zonder aansluitvlak. P otwór bez pola lutowniczego. S kraglöst hål. (541)
13. **mounting hole** : hole used for the mechanical mounting of a printed board or for mechanical attachment of components to the printed board. ★ trou de montage → *trou 5.* R крепежное отверстие печатной платы. D Befestigungsloch. E agujero de montaje. I foro di montaggio. N montagegat. P otwór montażowy. S monteringshål. (541)
14. **plated-through hole** : hole in which metal is deposited on the wall. ★ trou métallisé → *trou 7.* R металлизированное отверстие печатной платы. D metallisiertes Loch. E agujero metalizado. I foro metallizzato. N doorgemetalliseerd gat. P otwór metalizowany. S metallerat hål. (541)
15. **record preserving sensor hole** : a hole in the back of the cassette, the presence of which may be sensed by the recorder, thus preventing unintentional erasing of a recording. ★ fenêtre de commande sensible pour la préservation d'un enregistrement → *fenêtre 5.* R защитный карман кассеты. D Öffnung für Aufnahmesperre. E ventana de control sensible para la conservación de un registro. I linguetta di sicurezza per prevenire la registrazione. N wispreventiegat. P okienko czujnika zabezpieczenia zapisu. S raderspärrhål. (806)
16. **recorder adjustment sensor hole** : an additional hole in the back of the cassette, the presence of which may be sensed by a recorder, thus enabling the recorder to adjust bias and/or time

constants in accordance with the tape used. ★ fenêtre de commande sensible pour l'adaptation d'un magnétophone → *fenêtre 6.* R коммутационный карман кассеты. D Öffnung für Geräteeinstellung. E ventana de control sensible para la adaptación de un magnetófono. I aperture supplementari per utilizzare nastri ad alto potere risolvente. N instelgat voor bandspeler. P okienko czujnika podkładu i korekcji magnetofonu. S bandtypshål. (806)

17. **sight hole** (*Syn.* inspection hole) : → *hole 11*
18. **single hole mounting** : → *mounting 6*

hollow

1. **hollow conductor** : → *conductor 42*
2. **hollow conductor** : → *conductor 43*
3. **hollow insulator** : → *insulator 10*
4. **hollow shaft motor drive** : → *drive 13*

hollow-anode

1. **hollow-anode tube** (*Syn.* Chaoul tube) : → *tube 13*

home

1. **home position** : → *position 13*

homing

1. **homing** : the resetting of a sequential interrogating device to an invariant origin of sequence. ★ retour à l'origine → *retour 20.* R возвращение в исходное положение. D zuruecksetzen. E retorno al origen. I ritorno a zero. N terugkeren in de nulstand. P powrót do pozycji początkowej. S återställning. (714)

homogeneity

1. **homogeneity factor** : → *factor 90*

homogeneous

1. **homogeneous cladding** : → *cladding 13*
2. **homogeneous multiplex** : → *multiplex 4*
3. **homogeneous plane wave** : → *wave 22*
4. **homogeneous reactor** : → *reactor 17*
5. **homogeneous series** : → *series 5*

homogenizing

1. **homogenizing** : high-temperature annealing to reduce or suppress the heterogeneities in chemical composition due to segregation. ★ (recuit d') homogénéisation → *homogénéisation 1.* R гомогенизация. D Homogenisieren; Diffusionsglühen. E homogeneización (en un recocido). I ricottura di omogeneizzazione. N homogeen gloeien. P homogenizacja; ujednorodnianie. S diffusionsglödgning. (841)

homojunction

1. **homojunction** : a PN semiconductor junction in which the two regions differ in their doping level conductivities but not in their atomic compositions. ★ homojonction → *homojonction 1.* R гомогенный переход; гомопереход. D Homogen-Verbindung. E homounión. I omogiunzione. N homojunctie. P homozłącze (półprzewodnikowe). S homoövergång. (731)

homopolar

1. **homopolar component** : → *component 27*
2. **homopolar machine** : → *machine 15*

hood

1. **acoustic hood** : a hood lined with sound-absorbing material to facilitate the use of a telephone station by reducing the ambient noise level. ★ abri téléphonique → *abri 1.* R акустический кожух. D Fernsprechhaube. E semicabina. I nicchia telefonica. N geluidskap. P osłonnik akustyczny. S talhuv. (722)
2. **arc furnace fume hood** : a suspended ducting over the furnace which is designed to extract fume together with a certain amount of shop air, the latter cooling the fume, before being ducted off to the dust removal equipment. ★ hotte d'évacuation des fumées d'un four à arc → *hotte 1.* R вытяжной зонт дуговой печи. D Rauchgashaube. E campana de evacuación de humos de un horno de arco. I cappa di evacuazione dei fumi di un forno ad arco. N rookgaskap van een boogoven. P kaptur wyciągowy. S rökhuv. (841)

hook

1. **pole hook** : a hook which retains the pole in the lowered position when not in use. ★ repos de perche → *repos 21.* R захват для штанги токоприемника. D Stangenhalter. E gancho de sujeción (de la pértiga en reposo). I gancio di fissaggio (dell'asta). N vanghaak. P uchwyt spoczynkowy drążka. S låsdon för strömavtagarstång. (811)
2. **switch hook** (*Syn.* gravity switch; cradle switch; hookswitch) : a switch in a telephone set, usually actuated by removal of the handset, to connect the speech circuit to the line and disconnect the call indicating device. ★ support commutateur → *support 15.* R рычажный переключатель. D Gabelumschalter. E soporte conmutador. I gancio commutatore. N haakcontact. P przełącznik aparatowy. S klykomkopplare. (722)

hookswitch

1. **hookswitch** (*Syn.* switch hook) : → *hook 2*

hop

1. **chordal hop** : a hop with two or more consecutive ionospheric reflections from the same layer. ★ ..... → . D Sehnensprung. P skok wieloodbiciowy. (705)
2. **hop** : a propagation path between two points on the surface of the Earth, comprising one or more ionospheric reflections but without intermediate reflection by the ground. ★ bond → *bond 1.* D Sprung; Hop. P skok. (705)

hopper

1. **hopper loading** : → *loading 3*

hopping

1. **mode hopping** (*Syn.* mode jumping) : the transfer of power from one mode to another in a laser. ★ saut de mode → *saut 8.* R скачок моды. D Modenspringen. E salto modal. I salto di modo. N modusverspringing. P migotanie modów. S modhopp. (731)

horizon

1. **(ionospheric) horizon focussing** : → *focusing 13*
2. **radio horizon** : the locus of points at which the direct rays from a point source of radio waves are tangential to the surface of the Earth. *Note.* — As a general rule, the radio and geometrical horizons are different because of atmospheric refraction. ★ horizon radioélectrique → *horizon 3.* D Radiohorizont. P horyzont radiowy. (705)
3. **radio horizon distance** : → *distance 19*
4. **radio horizon range** (*Syn.* radio horizon distance) : → *distance 19*
5. **standard radio horizon** : the radio horizon corresponding to propagation through the standard radio atmosphere. ★ horizon radioélectrique normal → *horizon 4.* D Standard-Radiohorizont. P horyzont radiowy standardowy. (705)

horizontal

1. **horizontal configuration** : → *configuration 8*
2. **horizontal picture slip** : → *slip 3*
3. **horizontal polarization** : → *polarization 18*
4. **horizontal sweep** (*Syn.* line scan) : → *scan 2*
5. **horizontal sweep frequency** (*Syn.* line frequency) : → *frequency 122*
6. **horizontal table** : → *table 1*
7. **horizontal tabulation** : → *tabulation 1*

horn

1. **(acoustic) horn** : tube of varying section, larger at one end than the other, intended to achieve an acoustic impedance match and, possibly, to produce a directional effect. ★ pavillon acoustique → *pavillon 3.* R рупор (акустический); горн. D (Schall-) Trichter. E bocina acústica. I tromba acustica. N (akoestische) hoorn. P tuba akustyczna. S akustiskt horn; akustisk tratt. (801)
2. **arcing horn** : a protective fitting in the shape of a horn. ★ corne de garde → *corne 2.* R разрядный рог. D Lichtbogenhorn. E descargador de cuerno. I corno di guardia. N overslaghoorn. P rożek ochronny przeciwłukowy. S ljusbågshorn. (466)

3. **compound circular horn** (antenna) : a horn antenna of circular cross section with one or more changes of flare angle or diameter. ★ cornet circulaire composite → *cornet 9.* R комбинированная рупорная антенна круглого сечения. D runde(s) Mehrstufenhorn (-Antenne). E bocina circular compuesta (antena). I tromba circolare composita. N samengestelde cirkelvormige hoorn (antenne). P antena złożona z rożkiem (o przekroju) kołowym. S sammansatt cikulärt horn. (712)
4. **compound rectangular horn** (antenna) : a horn antenna of rectangular cross section in which at least one pair of opposing sides has one or more abrupt changes of flare angle or spacing. ★ cornet rectangulaire composite → *cornet 15.* R комбинированная рупорная антенна прямоугольного сечения. D Rechteck-Mehrstufenhorn (-Antenne). E bocina rectangular compuesta (antena). I tromba rettangolare composita. N samengestelde rechthoekige hoorn (antenne). P antena złożona z rożkiem (o przekroju) prostokątnym. S sammansatt rektangulärt horn. (712)
5. **conical horn** (antenna) : a horn antenna in the shape of a truncated cone. ★ cornet conique → *cornet 10.* R коническая рупорная антенна. D Konushorn; Konushornantenne. E bocina cónica (antena). I trombetta conica; tromba circolare. N kegelvormige hoorn (antenne). P antena rożkowa stożkowa. S koniskt horn. (712)
6. **corrugated horn** : a hybrid mod horn antenna produced by cutting transverse grooves in the interior walls of the horn. ★ cornet annelé → *cornet 8.* R гофрированная рупорная антенна. D Rillenhorn. E bocina corregida. I tromba corrugata. N gegroefde hoorn. P rożek fałdowany. S korrugerat horn. (712)
7. **E-plane sectoral horn** (antenna) : a sectoral horn antenna whose two parallel sides are parallel to the electric field of the transverse electric mode employed. ★ cornet sectoral E → *cornet 18.* R Е-плоскостная секториальная рупорная антенна. D E-Ebenen-Sektorhorn; E-Ebenen-Sektorhornantenne. E bocina sectorial de plano E (antena). I trombetta a settore nel piano E. N in E-vlak verwijde hoorn (antenne). P antena rożkowa sektorowa typu E. S E-planshorn. (712)
8. **horn** (antenna) : an antenna consisting of a waveguide section in which the cross-sectional area increases towards an open end which is the aperture. ★ cornet → *cornet 2.* R рупорная антенна. D Hornstrahler; Hornantenne. E bocina (antena). I (antenna a) trombetta. N hoorn; tromp. P antena rożkowa. S hornantenn. (712)
9. **horn** : the down-turned end of the pantograph head. ★ corne → *corne 1.* R por. D Auflaufhorn. E cuerno. I corno. N oploopstuk; hoorn. P wąs ślizgacza. S ändhorn. (811)
10. **horn loudspeaker** : → *loudspeaker 7*
11. **horn reflector** : → *reflector 7*
12. **horns of a groove** : the edges of a groove raised undesirably above the disk surface due to an embossing effect when recording. ★ cornes d'un sillon → *corne 3.* R рога канавки. D Hörnchen. E cuernos de un surco. I corna di un solco. N hoorntjes. P zadzior rowka. S ås. (806)
13. **H-plane sectoral horn** (antenna) : a sectoral horn antenna whose two parallel sides are perpendicular to the electric field of the transverse electric mode employed. ★ cornet sectoral H → *cornet 19.* R Н-плоскостная секториальная рупорная антенна. D H-Ebenen-Sektorhorn; H-Ebenen-Sektorhornantenne. E bocina sectorial de plano H (antena). I trombetta a settore nel piano H. N in H-vlak verwijde hoorn (antenne). P antena rożkowa sektorowa typu H. S H-planshorn. (712)
14. **hybrid mode horn** : a horn antenna excited by one or more hybrid modes in order to produce a specified aperture illumination. ★ cornet à mode hybride → *cornet 5.* R рупорная антенна с гибридом мод. D Hybridmodenhorn. E bocina de modo híbrido. I tromba di modo ibrido. N hybridemode hoorn. P rożek hybrydowy. S hybridmodshorn. (712)
15. **lens-corrected horn** (antenna) : a horn antenna incorporating a (radio wave) lens in order to produce a specified aperture illumination. ★ cornet à lentille → *cornet 4.* R рупорная антенна с корректирующей линзой. D linsenkorrigiertes Horn. E bocina de lente corregida (antena). I tromba corretta con lente. N hoorn(antenne) met lens. P antena rożkowa z soczewką korekcyjną. S trattlinsantenn. (712)
16. **multimode horn** : a horn antenna excited by two or more waveguide modes in order to produce a specified aperture illumination. ★ cornet multimode → *cornet 13.* R многомодовая рупорная антенна. D Multimodenhorn. E bocina multimodo. I tromba multimodo. N meermode hoorn. P rożek wielomodowy. S flermodshorn. (712)
17. **Potter horn** : a compound circular horn with one or more abrupt changes in diameter which excites two or more waveguide modes in other to produce a specified aperture illumination. ★ cornet de Potter → *cornet 11.* R рупорная антенна Поттера. D Potter-Horn. E bocina de Potter. I tromba Potter. N Potterhoorn. P rożek Pottera. S Potter-horn. (712)
18. **pyramidal horn** (antenna) : a horn antenna in the shape of a truncated pyramid generally of rectangular cross-section. ★ cornet pyramidal → *cornet 14.* R пирамидальная рупорная антенна. D Pyramidenhorn; Pyramidenhornantenne. E bocina piramidal (antena). I trombetta piramidale; tromba rettangolare. N piramidale hoorn (antenne). P antena rożkowa piramidalna. S pyramidhorn. (712)
19. **ridged horn** (antenna) : a horn antenna in which the waveguide section is ridged. ★ cornet à moulure → *cornet 6.* R гребенчатая рупорная антенна. D Steghorn; Steghornantenne. E bocina de cresta (antena). I trombetta con nervature. N gerilde hoorn. P antena rożkowa prążkowa. S ryggvågledarhorn. (712)
20. **sectoral horn** (antenna) : a horn antenna of a rectangular cross-section with two opposite sides parallel and the other two sides flared. ★ cornet sectoral → *cornet 16.* R секториальная рупорная антенна. D Sektorhorn; Sektorhornantenne. E bocina sectorial (antena). I trombetta a settore. N verwijde hoorn. P antena rożkowa sektorowa. S sektorhorn. (712)

horsepower

1. **fractional horsepower motor** : → *motor 32*

hoseproof

1. **hoseproof** : applied to a machine so constructed that water directed on it from a hose under prescribed conditions cannot cause interference with satisfactory operation. ★ machine protégée contre les jets d'eau → *machine 66.* R водозащищенная машина. D Maschine mit Strahlwasserschutz. E máquina protegida contra chorros de agua. I macchina protetta contro i getti d'acqua. N straalwaterdicht. P maszyna strugoszczelna. S sköljhärdig. (411)

hot

1. **hot** : an expression commonly used to mean "highly radioactive". ★ chaud → *chaud 2.* D heiß. E caliente. I caldo. N sterk radioactief; heet. P gorący. S högaktiv. (026)
2. **hot conditions** (*Syn.* operating conditions) : → *condition 19*
3. **hot face** : → *face 2*
4. **hot stand-by** : → *standby 1*
5. **hot start-up of a thermal generating set** : → *start-up 2*
6. **hot stick working** (*Syn.* safe clearance working) : → *working 7*
7. **hot topping** : → *topping 1*
8. **hot wall vacuum furnace** : → *furnace 21*
9. **refractory hot spot of an arc furnace** : → *spot 10*

hot-cathode

1. **hot cathode** : a cathode that must be heated to produce the desired thermionic emission. ★ cathode chaude → *cathode 9.* R термокатод. D Glühkathode. E cátodo caliente. I catodo caldo. N gloeikathode. P termokatoda; katoda żarzona. S varmkatod. (531,841)
2. **hot cathode lamp** : → *lamp 25*
3. **hot-cathode stepping tube** : → *tube 42*
4. **hot-cathode tube** : → *tube 43*

hot-start

1. **hot-start lamp** (*Syn.* preheat lamp) : → *lamp 48*

hot-wire

1. **hot-wire microphone** (*Syn.* thermal microphone) : → *microphone 35*

hour

1. **average daily peak hour traffic intensity** : → *intensity 1*
2. **bouncing busy hour** (*Syn.* peak busy hour) : → *hour 6*
3. **busy hour** : time interval of one hour duration, lying wholly in a given period, for which the traffic carried or the number of call attempts is greatest. ★ heure chargée → *heure 2.* D Hauptverkehrsstunde. P godzina ruchu (w danym okresie). (715)
4. **day to busy hour ratio** : → *ratio 26*
5. **mean busy hour** (*Syn.* time consistent busy hour) : → *hour 9*
6. **peak busy hour** (*Syn.* bouncing busy hour; post selected busy hour) : the busy hour for a period of 24 consecutive hours. *Note.* — The peak busy hour may vary from day to day. ★ heure de pointe → *heure 4.* D Spitzenhauptverkehrsstunde. P godzina ruchu szczytowego. (715)
7. **post selected busy hour** (*Syn.* peak busy hour) : → *hour 6*
8. **restricted hour tariff** : → *tariff 34*
9. **time consistent busy hour** (*Syn.* mean busy hour) : time interval of one hour duration, starting at the same time each day, for which the average, taken on several days, of the traffic carried intensity is greatest. ★ heure chargée moyenne → *heure 3.* D mittlere Hauptverkehrsstunde. P godzina ruchu przeciętna dzienna największa. (715)

hourly

1. **hourly, half-hourly, quarter hourly, *n* minute etc... demand** : → *demand 16*

house

1. **house telephone system** (*Syn.* internal (telephone) system) : → *system 94*

housekeeping

1. **housekeeping digits** (*Syn.* service digits) : → *digit 26*

housing

1. **antenna tuning housing** : a construction, such as a box, cabin, hut, house located near the feed point of an antenna, which encloses devices associated with an antenna such as matching elements, filters, or pre-amplifiers. ★ cabine d'antenne → *cabine 1.* R антенный павильон. D Antennenabstimmgehäuse. E cabina de antena; alojamiento de antena. I cassetta di giunzione. N antennekoppelkast. P domek antenowy. S antennhus. (712)
2. **bearing housing** : a structure supporting the actual bearing liner or ball or roller bearing in a bearing assembly. ★ logement de palier → *logement 2.* R корпус подшипника. D Lagergehäuse. E alojamiento de cojinete. I supporto del cuscinetto. N lagerhuis. P obudowa łożyska. S lagerhus. (411)
3. **connector housing** : the part of a connector into which the insert and contacts are assembled. ★ boîtier de connecteur → *boîtier 3.* R корпус соединителя. D Steckverbinder-Gehäuse. E caja de un conector. I corpo del connettore. N connectorhuis. P oprawa łącznika. S donhus. (581)
4. **diagnostic-type protective tube housing** : X-ray tube housing, for which the leakage radiation one meter from the focal spot, when the tube is continuously operated, with closed window, at its maximum rated current for the maximum rated voltage, is reduced to an agreed-upon level for diagnostic X-ray tubes. ★ gaine protectrice de tube de diagnostic → *gaine 20.* R защитный кожух диагностической трубки. D Röhrenschutzgehäuse, (Diagnostik-Röhre). E coraza protectora de tubo de diagnostico. I guaina autoprotetta per tubi di diagnostica. N ..... P ochronny kołpak rentgenowski typu diagnostycznego. S skyddskåpa för diagnostikrör. (881)
5. **fan housing** : the structure surrounding a fan and which forms the outer boundary of the coolant gas passing through the fan. ★ enveloppe de ventilateur → *enveloppe 17.* R кожух вентилятора. D Lüftergehäuse. E envolvente de ventilador. I involucro del ventilatore. N ventilatorhuis. P obudowa wentylatora. S fläkthus. (411)
6. **housing seal** : → *seal 8*
7. **insulated bearing housing** : a bearing housing which is electrically insulated from its supporting structure to prevent the circulation of shaft currents. ★ palier à coussinet isolé → *palier 9.* R изолированный корпус подшипника. D isoliertes Lagergehäuse. E alojamiento de cojinete aislado. I supporto isolato. N geïsoleerd lagerhuis. P izolowana obudowa łożyska. S isolerad lagerinbyggnad. (411)
8. **lamp housing** : the structural parts for carrying the infra-red lamp and its connections. ★ logement de lampe → *logement 1.* R корпус лампы инфракрасного излучения. D Lampengehäuse. E alojamiento de la lámpara. I collocamento delle lampade. N lamparmatuur. P oprawa promiennika lampowego. S lamparmatur. (841)
9. **therapeutic-type protective tube housing** : X-ray tube housing for which the leakage radiation at a specified distance from the focal spot and at any point near the surface of the housing, when the tube is continuously operated, with shielded portal, at its maximum rated current for the maximum rated voltage, is reduced to an agreed-upon level for therapeutic X-ray tubes. ★ gaine protectrice de tube de thérapie → *gaine 21.* R защитный кожух терапевтической трубки. D Röhrenschutzgehäuse, (Therapie-Röhre). E coraza protectora de tubo terapéutico. I guaina autoprotetta per tubi di terapia. N ..... P ochronny kołpak rentgenowski typu terapeutycznego. S skyddskåpa för terapirör. (881)
10. **X-ray tube housing** : a container in which an X-ray tube is mounted for normal use, providing protection against electric shock and against radiation, other than the useful beam. ★ gaine (radiogène) → *gaine 22.* R кожух трубки. D Röntgenröhrenschutzgehäuse. E coraza (de un tubo de rayos X). I guaina per tubo a raggi X. N röntgenbuisomhulling. P kołpak rentgenowski. S rörkåpa. (881)

howler

1. **howler** : a device in a local exchange which generates a warning and attention calling sound to a subscriber whose handset is left off-hook. ★ hurleur → *hurleur 1.* R мощный зуммер; ревун. D Heuler; Tongenerator. E zumbador. I dispositivo urlatore. N ..... P buczek. S summer. (714)

H-plane

1. **H-plane bend** : → *bend 4*
2. **H-plane corner** : → *corner 7*
3. **H-plane T junction** : → *junction 9*
4. **H-plane Y junction** : → *junction 10*

H.T.

1. **H.T. delay time** : → *delay-time 4*
2. **H.T. warm-up time** : → *time 75*

hub

1. **hub** : a circular device on which the magnetic tape is wound. ★ noyau → *noyau 6.* R сердечник. D Wickelkern; Spulenkern. E núcleo. I nucleo. N wikkelkern. P krążek. S spolnav. (806)

hue

1. **binary hue** : perceived hue that can be described as a combination of two unitary hues. For example : orange is a yellowish-red or reddish-yellow ; violet is reddish-blue, etc. ★ teinte binaire → *teinte 6.* R двойной цветовой тон. D Zwischenton. E tono binario. I tinta binaria. N tussenkleur. P odcień dwuskładnikowy. S mellankulörton. (845)
2. **hue** : attribute of a visual sensation according to which an area appears to be similar to one of the perceived colours, red, yellow, green, and blue, or to a combination of two of them. *Note.* — Formerly "Farbton" in German. ★ teinte → *teinte 5.* R цветовой тон. D Buntton. E tono. I tinta. N kleurtoon. P odcień. S kulörton. (845)
3. **unique hue** (*Syn.* unitary hue) : → *hue 4*
4. **unitary hue** (*Syn.* unique hue) : perceived hue that cannot be further described by the use of hue names other than its own. *Note.* — There are four unitary hues : red, green, yellow and blue. ★ teinte élémentaire → *teinte 7.* R основной цветовой тон. D Urfarbe. E tono unitario. I tinta unitaria. N primaire kleur. P odcień jednolity; odcień jednoznaczny. S elementarkulörton. (845)

hum

1. **hum** : unwanted roughly sinusoidal low frequency deviation at frequencies related to that of the mains supply. Hum is determined under specified conditions. *Note.* — Hum is part of PARD. ★ ronflement → *ronflement 2.* R фон переменного тока. D Brumm. E zumbido. I ronzio. N brom. P przydźwięk. S brum. (303)

2. **hum** (of an electronic tube) : unwanted audible modulation arising from the tube voltage supplies. ★ ronflement → *ronflement 3.* R фон. D Brummen. E zumbido. I ronzio. N (ge)brom. P przydźwięk. S brum. (531)
3. **hum** (in telecommunications) (*Syn.* supply noise) : noise of low frequency usually caused directly, or indirectly, by an alternating current power supply system. ★ ronflement → *ronflement 4.* R фон переменного тока. D Brummen (in der Telekommunikation); Versorgungsrauschen. E zumbido (en telecomunicación); ruido de alimentación. I rumore di alimentazione. N voedingsruis. P przydźwięk (sieciowy). S brum. (702)
4. **hum** : a voltage at a given output, derived from stray fields in specified conditions, and superimposed on the reproduction of the recorded signal. ★ ronflement → *ronflement 6.* R фон. D Netzbrummen. E zumbido. I ronzio. N brom. P przydźwięk. S brum. (806)
5. **hum bars** : → *bar 8*
6. **hum level** : → *level 30*

human

1. **human error** (*Syn.* mistake) : → *mistake 2*

humidity

1. **relative humidity** : the ratio, expressed as a percentage, of the vapour pressure of water vapour in moist air to the saturation vapour pressure with respect to water or ice at the same temperature. ★ humidité relative → *humidité 2.* D relative Luftfeuchte. P wilgotność względna. (705)

hump

1. **hump locomotive** : → *locomotive 2*

hunting

1. **hunting** : usually undesirable self-sustained periodic oscillations in a control system. ★ pompage → *pompage 3.* R автоколебание. D Pendelung. E penduleo. I regime di pendolazione. N oscilleren; oscillatie. P wzbudzanie. S självsvängning. (351)
2. **hunting** : a fluctuation of speed about a state of uniform rotation. ★ pompage → *pompage 4.* R качания. D Pendeln. E penduleo. I pendolamento. N slingeren; pendelen. P kołysanie. S pendling. (411)
3. **hunting** : a process of sequential interrogation, initiated by the interrogation device, for locating a required device from a group of devices. ★ recherche active → *recherche 2.* R свободное искание. D Suche (Weg). E búsqueda activa. I ricerca di una via libera. N zoeken. P szukanie czynne. S aktiv sökning. (714)
4. **hunting** (*Syn.* nosing) : → *nosing 1*
5. **hunting of interconnected synchronous machines** : the oscillation between interconnected synchronous machines in which the angles of deviation swing on both sides of a mean value. ★ pompage de machines synchrones interconnectées → *pompage 6.* R качания синхронных машин. D Pendeln. E oscilación de máquinas síncronas interconectadas. I pendolazione di macchine sincrone interconnesse. N pendelen van gekoppelde synchrone machines. P kołysanie maszyn synchronicznych. S pendling. (603)
6. **PBX hunting** (*Syn.* free line selection) : the process whereby the local exchange entity automatically searches for a free line in a PBX group. ★ recherche dans un groupement de lignes → *recherche 4.* R свободное искание в пучке УПТС. D freie Leitungssuche. E busca automática PBX; selección de línea libre. I ricerca multipla. N kiezen van een vrije lijn (in een groepsaansluiting). P wyszukiwanie wolnego łącza (w grupie jednonumerowej). S gruppledningssökning. (722)
7. **random hunting** : a search for a free outlet controlled in such a way that the probability of selecting a given outlet is not different from the probability of selecting any other. ★ recherche aléatoire → *recherche 3.* R произвольное свободное искание. D zufaelliges Absuchen. E búsqueda aleatoria. I ricerca casuale. N ongericht/willekeurig zoeken. P szukanie przypadkowe; szukanie losowe. S slumpvis sökning. (714)
8. **sequential hunting** : a search for a free outlet performed in consecutive order among the available outlets. ★ recherche séquentielle → *recherche 10.* R последовательное свободное искание. D geordnetes Absuchen. E búsqueda de secuencias. I ricerca sequenziale. N gericht zoeken. P szukanie kolejnościowe. S ordnad sökning. (714)

HV

1. **HV** (*Syn.* high voltage) : → *high-voltage 1*

HVDC

1. **HVDC link** (*Syn.* high-voltage d.c. link) : → *link 14*

HVL

1. **HVL** (*Syn.* half-value layer) : → *layer 13*

HVT

1. **HVT** (*Syn.* half-value layer) : → *layer 13*

hybrid

1. **hybrid coil** (*Syn.* hybrid transformer) : → *transformer 35*
2. **hybrid configuration** : → *configuration 9*
3. **hybrid coupler** (*Syn.* differential coupler) : → *coupler 8*
4. **hybrid junction** : → *junction 11*
5. **hybrid mode** : → *mode 32*
6. **hybrid mode horn** : → *horn 14*
7. **hybrid ring** : → *ring 9*
8. **hybrid system** : → *system 83*
9. **hybrid T** : → *tee 2*
10. **hybrid transformer** : → *transformer 35*
11. **hybrid transformer** (*Syn.* induction coil) : → *coil 25*
12. **quadrature hybrid** : a hybrid junction which has the property that the waves leaving the two output ports, each having a matched termination, are in phase quadrature. ★ jonction à quadrature → *jonction 9.* R квадратурное гибридное соединение. D 90°-(Richt)koppler. E unión híbrida en cuadratura. I giunzione in quadratura. N kwadratuurverbindingsstuk. P hybryd kwadraturowy. S kvadraturgrening. (726)

hydrocarbon

1. **aromatic hydrocarbon content** : → *content 2*
2. **synthetic aromatic hydrocarbons** : an insulating liquid, consisting of aromatic ring structures with substituent straight or branched paraffin hydrocarbon chains. *Note.* — These hydrocarbons include alkylbenzenes, alkylnaphthalenes. ★ hydrocarbures aromatiques synthétiques → *hydrocarbure 1.* R синтетические ароматические углеводороды. D synthetische aromatische Kohlenwasserstoffe. E hidrocarburos aromáticos sintéticos. I idrocarburi aromatici sintetici. N synthetische aromatische koolwaterstoffen. P węglowodory aromatyczne syntetyczne. S syntetiska aromatiska kolväten. (212)

hydroelectric

1. **gross head of a hydroelectric power station** : → *head 5*
2. **hydroelectric installation** : → *installation 7*
3. **hydroelectric power station** : → *power station 8*
4. **hydroelectric set** : → *set 24*
5. **net head of a hydroelectric power station** : → *head 22*
6. **reversible hydroelectric set** : → *set 40*

hydrogen

1. **hydrogen electrode** : → *electrode 66*
2. **hydrogen treatment** : → *treatment 3*
3. **standard hydrogen electrode** : a hydrogen electrode in contact with an electrolyte of hydrogen ion activity equal to one and with the hydrogen gas at a pressure of 101,325 kPa (1 atm). *Note.* — By convention the potential of this electrode is zero at any temperature. ★ électrode à hydrogène normalisée → *électrode 26.* R стандартный водородный электрод. D Wasserstoff-Normal-elektrode. E electrodo de hidrógeno normalizado; electrodo normal de hidrógeno. I elettrodo a idrogeno normale. N standaardwaterstofelektrode. P elektroda wodorowa normalna. S normalväteelektrod. (111)

hydrolytic

1. **hydrolytic stability** : → *stability 6*

hydrolyzable

1. **hydrolyzable chlorine** : → *chlorine 1*

hydrometeor

1. **hydrometeors** : water or ice particles which may exist in the atmosphere or be deposited on the ground. *Note.* — Rain, fog,

clouds, now, hail, are the main hydrometeors. ★ hydrométéore → *hydrométéore 1.* D Hydrometeore. P hydrometeor. (705)

hydrophone

1. **hydrophone** : transducer that produces electric signal in response to waterborne acoustic signals. ★ hydrophone → *hydrophone 1.* R гидрофон. D Hydrophon. E hidrófono. I idrofono. N hydrofoon. P hydrofon. S hydrofon. (801)

hygiene

1. **radiation hygiene** : the special practices intended to maintain health in the presence of radiation hazards. ★ radiohygiène → *radiohygiène 1.* R радиационная гигиена. D Strahlenhygiene. E higiene de las radiaciones; radiohigiene. I igiene delle radiazioni. N stralingshygiëne. P higiena radiacyjna. S strålhygien. (881)

hyperfrequency

1. **hyperfrequency** : a frequency higher than 300 MHz and lower than or equal to 300 GHz. ★ hyperfréquence → *hyperfréquence 6.* R сверхвысокая частота. D Höchstfrequenz (Mikrowellen). E hiperfrecuencia. I iperfrequenza. N ultrahoge frequentie. P częstotliwość mikrofalowa. S mikrovågsfrekvens. (841)

hypergroup

1. **basic (15-supergroup) hypergroup** (*Syn.* basic 15-supergroup assembly) : → *assembly 6*
2. **hypergroup modulating equipment** (*Syn.* 15-supergroup assembly modulating equipment) : → *equipment 86*
3. **hypergroup translating equipment** (*Syn.* 15-supergroup assembly translating equipment) : → *equipment 87*
4. **(15-supergroup) hypergroup** (*Syn.* 15-supergroup assembly) : → *assembly 32*

hyperon

1. **hyperon** : a general term applied to various elementary very short-lived particles, with or without charge, of spin 1/2 or 3/2, of mass greater than that of the neutron. ★ hypéron → *hypéron 1.* R гиперон. D Hyperon. E hyperón. I iperone. N hyperon. P hyperon. S hyperon. (391)

hypothetical

1. **hypothetical reference connection** : → *connection 29*
2. **hypothetical reference connection** : → *connection 30*

hysteresis

1. **core hysteresis parameter** (*Syn.* core factor C_2) : → *factor 30*
2. **electric hysteresis** : in a dielectric, an irreversible variation of the electric flux density, associated with a change in the electric field strength. ★ hystérésis électrique → *hystérésis 4.* R электрический гистерезис. D elektrische Hysterese. E histéresis eléctrica. I isteresi elettrica. N elektrische hysteresis. P histereza elektryczna. S elektrisk hysteres. (121)
3. **electric hysteresis loop** : → *loop 10*
4. **hysteresis** : phenomenon represented by a characteristic curve which has a branch, for increasing values of the input variable, and a different branch, called descending branch, for decreasing values of the input variable. *Note.* — Sometimes a dead band effect can be superposed on a hysteresis phenomenon. ★ hystérésis → *hystérésis 3.* R зона неоднозначности (гистерезис). D Hysterese. E histéresis. I isteresi. N hysteresis. P histereza. S hysteres. (351)
5. **hysteresis core constant** : → *constant 21*
6. **hysteresis coupling** : → *coupling 28*
7. **hysteresis loss** : → *loss 37*
8. **hysteresis material constant** : → *constant 22*
9. **hysteresis motor** : → *motor 38*
10. **incremental hysteresis loop** : → *loop 12*
11. **magnetic hysteresis** : in a ferromagnetic or ferrimagnetic substance, the irreversible variation of the magnetic flux density or magnetization which is associated with the change of magnetic field strength and is independent of the rate of change. ★ hystérésis magnétique → *hystérésis 5.* R магнитный гистерезис. D magnetische Hysterese. E histéresis magnética. I isteresi magnetica. N magnetische hysteresis. P histereza magnetyczna. S magnetisk hysteres. (121,221)
12. **(magnetic) hysteresis loop** : → *loop 23*
13. **normal hysteresis loop** : → *loop 25*
14. **rotational hysteresis loss** : → *loss 88*
15. **saturation hysteresis loop** : → *loop 30*

Hz

1. **hertz, Hz** : → *hertz 1*

I

I-action

1. **I-action** (*Syn.* integral action) : → *integral-action 1*

IAM

1. **IAM** (*Syn.* initial address message) : → *message 1*

ice

1. **ice loading** : → *loading 4*
2. **non-uniform ice loading** : → *loading 9*
3. **uniform ice loading** : → *loading 10*

iconoscope

1. **iconoscope** : a high-velocity photoemissive camera tube in which the beam scans a mosaic capable of storing an electric charge pattern. ★ iconoscope → *iconoscope 1.* R иконоскоп. D Ikonoskop. E iconoscopio. I iconoscopio. N iconoscoop. P ikonoskop. S ikonoskop. (531)
2. **image iconoscope** : a high-velocity image camera tube in which the electron image is stored and scanned on the same side of the target. ★ iconoscope à transfert d'image → *iconoscope 2.* R иконоскоп с переносом изображения. D Superikonoskop. E iconoscopio de transferencia de imagen; iconoscopio de imagen. I iconoscopio immagine. N beeldiconoscoop. P superikonoskop. S bildikonoskop. (531)

ideal

1. **controlled ideal no-load direct voltage** : → *direct voltage 2*
2. **ideal amplifier** : → *amplifier 13*
3. **ideal attenuator** : → *attenuator 10*
4. **ideal capacitor** : → *capacitor 42*
5. **ideal (circuit) element** : → *circuit element 4*
6. **ideal crystal** : → *crystal 6*
7. **ideal current source** : → *source k2*
8. **ideal dielectric** (*Syn.* perfect dielectric) : → *dielectric 22*
9. **ideal diode** : → *diode 9*
10. **ideal filter** : → *filter 25*
11. **ideal gyrator** : → *gyrator 2*
12. **ideal impedance convertor** : → *convertor 27*
13. **ideal inductor** : → *inductor 8*
14. **ideal instant** : → *instant 3*
15. **ideal magnetic medium** : → *medium 15*
16. **ideal noise diode** : → *diode 10*
17. **ideal no-load direct voltage** : → *direct voltage 6*
18. **ideal paralleling** : → *paralleling 1*
19. **ideal reproducing head** : → *head 12*
20. **ideal resistor** : → *resistor 7*
21. **ideal self-excitation** : → *self-excitation 4*
22. **ideal synchronizing** : → *synchronizing 3*
23. **ideal transducer** : → *transducer 6*
24. **ideal transformer** : → *transformer 37*
25. **ideal voltage source** : → *voltage source 2*

identification

1. **automatic identification** : the transmission without manual intervention of the identification of the calling terminal to the connected terminal or vice-versa or the identification of terminals to one another when a connection is established. *Note.* — This identification may be provided by the network or by the terminal. ★ identification automatique → *identification 4.* R автоматическая идентификация. D automatische Kennungsgabe. E identificación automática. I identificazione automatica. N automatische oproepherkenning; automatisch oproeperidentificatie. P identyfikacja automatyczna. S automatisk identifiering. (721)
2. **coinbox identification tone** : → *tone 7*
3. **colour identification signal** : → *signal 52*
4. **identification** : the act of segregating and uniquely defining a specific unit within a set of similar functional units. ★ identification → *identification 3.* R опознавание. D Identifizierung. E identificación. I identificazione. N identificatie. P identyfikacja. S identifiering. (714)
5. **identification beacon** : → *beacon 3*
6. **identification request** : → *request 2*
7. **line identification by the network** : transmission by the network, in response to a request from either of two connected parties, of an appropriate line or address identification. ★ identification de ligne par le réseau → *identification 5.* R идентификация линии сетью. D Anschlußkennung durch das Netz. E identificación de línea por la red. I identificazione da rete. N ..... P identyfikacja linii przez sieć. S linjeidentifiering. (721)

identifier

1. **identifier** (in switching) : a functional unit allocated to a switching network, that finds the terminal location of a calling terminal within this network. ★ identificateur → *identificateur 1.* R идентификатор (в коммутации). D Identifikator (Ident). E identificador (en conmutación). I identificatore. N abonneenummeridentificator. P identyfikator (w komutacji). S identifierare. (714)
2. **identifier** (in software) : a character, or group of characters, used to identify or name an item of data and possibly to indicate certain properties of that item. ★ identificateur → *identificateur 2.* R идентификатор (в программном обеспечении). D Bezeichner; Name. E identificador (en software). I identificatore (in software). N identificator. P identyfikator (w oprogramowaniu). S identifierare. (714)

idle

1. **idle** : pertaining to a traffic-carrying device that is not being used, but is not faulty. *Note.* — An idle device may be either free or busied out. ★ au repos → *repos 1.* R незанятый (находящийся в исходном состоянии). D nichtbelegt; in Ruhe. E en reposo. I a riposo e non disponibile. N beschikbaar. P swobodny; osiagalny. S outnyttjad. (714)
2. **idle** : pertaining to a resource that is not being used, but is not faulty. *Note.* — An idle resource may be either free or busied out. ★ au repos → *repos 2.* D belegbar. P bierny; w stanie spoczynku. (715)
3. **idle circuit condition** : → *condition 11*
4. **idle interval** : → *interval 9*
5. **idle period** : → *period 13*
6. **idle period** (*Syn.* non-conducting interval) : → *interval 13*
7. **idle signal unit** : → *unit 32*
8. **idle state** : → *state 20*
9. **idle time** : → *time 76*

idling

1. **idling speed** : → *speed 20*
2. **minimum idling speed** : → *speed 26*

IDU

1. **IDU** (*Syn.* idle signal unit) : → *unit 32*

ignitable

1. **most easily ignitable mixture** : → *mixture 3*

igniter

1. **igniter** : a stationary starting electrode that is in contact with a pool cathode. ★ igniteur → *igniteur 2.* R игнайтер. D Zündstift. E encendedor. I ignitore. N stationaire ontsteekelektrode. P ignitor; zapalnik. S tändelektrod. (531)

igniting

1. **minimum igniting current** : → *current 131*

ignition

1. **high frequency ignition** (of a plasma torch) : a device used in an arc plasma torch to ignite the arc by a high frequency electric discharge between the electrodes. ★ dispositif

d'amorçage haute fréquence → *dispositif 31.* R высокочастотное зажигание (плазменной горелки). D Hochfrequenzzündung. E dispositivo de ignición de alta frecuencia (de una antorcha de plasma). I dispositivo di innesco ad alta frequenza (di una torcia a plasma). N hoogfrequente ontsteking (van een plasmatoorts). P zapłon wielkiej częstotliwości (plazmotronu). S högfrekvenständning. (841)

2. **ignition** (in a gaseous medium) : an avalanche produced intentionally to initiate gas conduction. ★ allumage → *allumage 1.* R зажигание (в газовой среде). D Zündung (in einem gasförmigen Medium). E encendido (en un medio gaseoso). I ignizione (in un mezzo gassoso). N ontsteking. P zapłon (w gazie). S tändning. (121)
3. **ignition** (in a gaz) : the abrupt transition of the gap resistance from a practically infinite value to a relatively low value, which results in a desired discharge. ★ amorçage → *amorçage 1.* R возникновение разряда (в газе). D Zündung (in einem Gas). E cebado (en un gas). I innesco (in un gas). N ontsteking (in een gas). P zapłon (w gazie). S tändning. (531)
4. **ignition temperature of an explosive gas atmosphere** : → *temperature 19*
5. **ignition time** : → *time 77*
6. **ignition voltage** : → *voltage 84*
7. **primer ignition** (for TR and pre TR tubes) : the process of creating local ionization by means of an applied d.c. or pulse voltage for the purpose of increasing the electron density in the ignition gap of the tube to facilitate the ionization of the tube when high radio frequency power occurs. ★ amorçage → *amorçage 2.* R возникновение вспомогательного разряда (для РЗП и предварительного РЗП). D Vorzündung (bei Empfänger-und Vorsperröhren). E cebado (tubos T.R. y P.T.R.). I innesco (tubi TR e pre-TR). N activeringsontsteking (blokkeerbuizen). P wyładowanie pomocnicze. S hjälptändning. (531)
8. **statistical delay of ignition** : → *delay 39*

ignitor

1. **ignitor** : a device intended, either by itself or in combination with other components, to generate voltage pulses to start a discharge lamp without providing for the preheating of the electrodes. ★ amorceur → *amorceur 1.* R ..... D Zündgerät. E arrancador. I accenditore. N ontsteker. P ..... S pulständare. (845)
2. **ignitor control** : → *control 114*

ignitron

1. **ignitron** : a single-anode pool rectifier tube in which each arc discharge is initiated by an igniter. ★ ignitron → *ignitron 1.* R игнитрон. D Ignitron. E ignitrón. I ignitron. N ignitron. P ignitron. S ignitron. (531,811)

I^2t

1. I^2t (*Syn.* Joule integral) : the integral of the square of the current over a given time interval :

$$I^2t = \int_0^{t_1} i^2 \mathrm{d}t$$

Notes. 1 — The pre-arcing I^2t is the I^2t integral extendend over the pre-arcing time of the fuse. *2* — The operating I^2t is the I^2t integral extended over the operating time of the fuse. *3* — The energy in joules liberated in one ohm of resistance in a circuit protected by a fuse is equal to the value of the operating I^2t expressed in A^2 . *s.* ★ I^2t → I^2t 2. R I^2t; интеграл Джоуля. D Joule-Integral; I^2t-Wert. E I^2t; integral de Joule. I I^2t; integrale di Joule. N integraal I^2t; integraal van Joule. P całka Joule'a. S Joule-integral; strömvärmeintegral. (441)

2. **I^2t characteristic** : → *characteristic 47*

ILD

1. **ILD** (*Syn.* injection laser diode) : → *diode 11*

Ilgner

1. **Ilgner generator set** : → *set 25*
2. **Ilgner system** : → *system 84*

illuminance

1. **global illuminance** (E_g) : illuminance produced by daylight on a horizontal surface on the earth. ★ éclairement (lumineux) global → *éclairement 12.* R общая освещенность. D Globalbeleuchtungsstärke. E iluminancia global. I illuminamento globale. N verlichtingssterkte van het daglicht. P natężenie oświetlenia globalne. S global belysningsstyrka. (845)
2. **illuminance** (of an elementary surface) (E) : the luminous flux received by an elementary surface divided by the area of this surface. *Note.* — In the SI system of units illuminance is expressed in lux (lx) or lumens per square metre (lm/m^2). ★ éclairement → *éclairement 2.* R освещенность (элементарной новерхности). (723)
3. **illuminance** (at a point of a surface) (E_v; E) : quotient of the luminous flux $\mathrm{d}\Phi_v$ incident on an element of the surface containing the point, by the area $\mathrm{d}A$ of that element. *Equivalent definition.* Integral, taken over the hemisphere visible from the given point, of the expression $L_v \cdot \cos\theta \cdot \mathrm{d}\Omega$, where L_v is the luminance at the given point in the various directions of the incident elementary beams of solid angle $\mathrm{d}\Omega$, and θ is the angle between any of these beams and the normal to the surface at the given point.

$$E_v = \frac{\mathrm{d}\Phi_v}{\mathrm{d}A} = \int_{2\pi sr} L_v \cdot \cos\theta \cdot \mathrm{d}\Omega$$

Unit: lx = lm·m^{-2}. ★ éclairement (lumineux) → *éclairement 11.* R освещенность (в точке поверхности). D Beleuchtungsstärke (an einem Punkt einer Oberfläch). E iluminancia. I illuminamento. N verlichtingssterkte. P natężenie oświetlenia. S illuminans; belysningsstyrka. (845)
4. **illuminance meter** : → *meter 25*
5. **illuminance vector** : → *vector 5*
6. **service illuminance** (of an area) : mean illuminance during one maintenance cycle of an installation averaged over the relevant area. *Note.* — The area may be either the whole area of the working plane in an interior or the working areas. ★ éclairement en service → *éclairement 4.* R освещенность при эксплуатации (площади). D Betriebswert der Beleuchtungsstärke (einer Fläche); Betriebsbeleuchtungsstärke. E iluminancia en servicio. I illuminamento in esercizio. N nominale verlichtingssterkte. P natężenie międzykonserwacyjne. S belysningsstyrkans driftvärde. (845)
7. **threshold of illuminance** : → *threshold 25*
8. **uniformity ratio of illuminance** : → *ratio 101*

illuminant

1. **CIE standard illuminants** : the illuminants A, B, C, D_{65}, and other illuminants D, defined by the CIE in terms of relative spectral power distributions. *Note.* — These illuminants are intended to represent ; A, Planckian radiation at a temperature of about 2856 K ; B, direct solar radiation (obsolete) ; C, average daylight ; D_{65}, daylight including the ultraviolet region. (See CIE Publication No.15). ★ illuminants normalisés CIE → *illuminant 6.* R стандартные излучения МКО. D CIE-Normlichtarten. E iluminantes patrones CIE. I illuminanti CIE. N standaard lichtsoorten van de CIE. P iluminanty normalne CIE. S CIE standardljus. (845)
2. **daylight illuminant** : illuminant having the same or nearly the same relative spectral power distribution as a phase of daylight. ★ illuminant lumière du jour → *illuminant 5.* R иллюминант дневного света. D Tageslichtart. E iluminante luz de día. I illuminante luce diurna. N daglicht. P iluminant światła dziennego. S dagsljus. (845)
3. **illuminant** : radiation with a relative spectral power distribution defined over the wavelength range that influences object colour perception. *Note.* — In everyday English this term is not restricted to this sense, but is also used for any kind of light falling on a body or scene. ★ illuminant → *illuminant 3.* R иллюминант. D Lichtart. E iluminante. I illuminante. N lichtsoort. P iluminant. S ljus(typ). (723,845)
4. **illuminant colorimetric shift** : → *shift 19*
5. **illuminant (perceived) colour shift** : → *shift 20*
6. **reference illuminant** : an illuminant with which other illuminants are compared. *Note.* — A more particular meaning may be needed in the case of illuminants for colour reproduction. ★ illuminant de référence → *illuminant 4.* R образцовый иллюминант. D Bezugslichtart. E iluminante de referencia. I illuminante di riferimento. N referentielichtsoort. P iluminant odniesieniowy. S referensljuskälla. (845)

illuminated

1. **illuminated button** : → *button 2*

illuminating

1. **illuminating engineering** (*Syn.* lighting technology) : → *technology 3*

illumination

1. **aperture illumination** (function) : a mathematical expression giving the amplitude, phase and polarization distribution of the electromagnetic field at each point on the aperture of an antenna. ★ (fonction d') illumination → *illumination 3.* R функция распределения поля в раскрыве антенны. D Aperturbelegungsfunktion; Aperturausleuchtungsfunktion. E iluminación de apertura (función). I (funzione di) illuminazione d'apertura. N apertuurbelichting; openingbelichting. P oświetlenie apertury (wyrażenie matematyczne). S aperturfältfördelning. (712)
2. **aperture illumination efficiency** : → *efficiency 3*
3. **illumination** (*Syn.* lighting) : → *lighting 13*
4. **illumination diagram** (*Syn.* illumination pattern) : → *pattern 13*
5. **illumination pattern** : → *pattern 13*
6. **resistance under illumination** : → *resistance 55*

image

1. **after image** (*Syn.* picture sticking) : an unwanted image reappearing after the apparent removal of the charge corresponding to a previously stationary image. ★ rémanence à l'extinction → *rémanence 2.* R послеизображение. D Nachbild. E remanencia en la extinción. I persistenza all'estinzione. N nabeeld. P odbicie konturu. S sekundärbildsinfall. (531)
2. **computer-generated image** (*Syn.* electronic picture) : still or moving television picture generated directly by purely electronic means, providing an electrical signal without scanning any material object. ★ image synthétique → *image 33.* R электронное изображение; компьютерное изображение. (723)
3. **electronic image** : the representation of the optical image produced on a photosensitive surface by corresponding electrical quantities. ★ image électronique → *image 20.* R электронное изображение. (723)
4. **image antenna** : → *antenna 61*
5. **image arc furnace** : → *arc furnace 37*
6. **image camera tube** : → *camera tube 5*
7. **image dissector** : → *dissector 1*
8. **image focus voltage** : → *voltage 85*
9. **image iconoscope** : → *iconoscope 2*
10. **image intensifier** : → *intensifier 1*
11. **image intensifier tube** : → *tube 44*
12. **image orthicon** : → *orthicon 1*
13. **image orthicon** : → *orthicon 2*
14. **image pick-up tube** (*Syn.* camera tube) : → *camera tube 2*
15. **image quality indicator** : → *indicator 8*
16. **image rejection ratio** : → *ratio 42*
17. **image retention** : → *retention 4*
18. **image sensor** : → *sensor 3*
19. **latent image** : the physico-chemical changes in the emulsion of a radiographic film produced by the absorption of radiation. ★ image latente → *image 26.* R скрытое изображение. D latentes Bild. E imagen latente. I immagine latente. N latent beeld. P obraz utajony. S latent bild. (881)
20. **multiple image** : a succession of additional images, positive or negative, which may be seen displaced from the main image. ★ écho multiple → *écho 12.* R множественность изображений. (723)
21. **optical image** (in television scanning equipment) : the image produced, by an optical device, on the photosensitive surface of the scanning equipment. ★ image optique → *image 29.* R оптическое изображение. (723)
22. **three-dimensional computer generated image** (*Syn.* 3-D computer generated image) : a computer-generated image giving the impression of being three-dimensional when displayed on a screen. The computer stores the three spatial coordinates of each point of the imaginary object, and the apparent view point and illumination of the object can be altered by the operator. ★ image (synthétique) 3D → *image 36.* R трехмерное компьютерное изображение. (723)
23. **two-dimensional computer generated image** (*Syn.* 2-D computer generated image) : computer-generated image which is restricted to one plane. ★ image (synthétique) 2D → *image 34.* R двумерное компьютерное изображение. (723)
24. **(visible) image** : picture produced on a television screen during a picture period. ★ image (visible) → *image 37.* R (видимое) изображение. (723)
25. **2-D computer generated image** (*Syn.* two-dimensional computer generated image) : → *image 23*
26. **2 1/2 — D computer generated image** : computer-generated images conveying an impression of relief by the use of a limited number of different planes made up of two-dimensional computer generated images. ★ image (synthétique) 2D 1/2 → *image 35.* R двух-с-половиной-мерное компьютерное изображение. (723)
27. **3-D computer generated image** (*Syn.* three-dimensional computer generated image) : → *image 22*

image-converter

1. **image-converter tube** : → *tube 46*

imbalance

1. **traffic distribution imbalance** (*Syn.* traffic load imbalance) : → *imbalance 2*
2. **traffic load imbalance** (*Syn.* traffic distribution imbalance) : uneven distribution of traffic carried between similar resources. ★ déséquilibre de trafic → *déséquilibre 2.* D schiefe Verkehrslast. P nierównowaga ruchu. (715)
3. **voltage imbalance** (*Syn.* voltage unbalance) : → *unbalance 5*

imitation

1. **signal imitation** : in voice frequency signalling, the occurrence within the signalling band of frequencies produced by speech or other currents which are not genuine signals, causing the unwanted response of a signal receiver. ★ imitation de signaux → *imitation 1.* R имитация сигнала. D Zeichentaeuschung. E imitación de señales. I imitazione del segnale. N signaalnabootsing. P imitacja sygnału. S falsksignalering. (714)

immediate

1. **immediate appreciation percentage** : → *percentage 3*

immersed

1. **completely immersed bushing** : → *bushing 6*
2. **immersed gun** : → *gun 8*
3. **salt bath furnace with immersed electrodes** : → *furnace 48*

immersion

1. **oil immersion "o"** (for electrical apparatus for explosive gas atmospheres) : a type of protection of electrical apparatus in which all the apparatus or parts of the apparatus are immersed in oil in such a way that an explosive gas atmosphere, which may be above the oil or outside the enclosure, will not be ignited by the apparatus. *Note.* — This type of protection is indicated by the letter "o". ★ immersion dans l'huile "o" → *immersion 1.* R масляное заполнение оболочки (для взрывозащищенного электрооборудования). D Ölkapselung "o". E inmersión en aceite "o" (de un material eléctrico para atmósferas explosivas gaseosas). I immersione in olio "o" (di costruzioni elettriche per atmosfere esplosive per la presenza di gas). N olievulling "o" (van elektrisch materieel voor plaatsen met gasontploffingsgevaar). P osłona olejowa "o" (urządzenia elektrycznego przeciwwybuchowego). S utförande med olja. (426)

immittance

1. **driving-point immittance of an n-port network** : the immittance seen at the port at which the signal is applied. *Note.* — Its value is a function of terminating immittances at the other ports. ★ immittance d'entrée d'un multiporte → *immittance 7.* R входной иммитанс многополюсника. D Eingangsimmittanz eines Mehrtores. E inmitancia de entrada

de una red multipuerta. I immettenza di ingresso di un n-bipolo. N ingangsimmittantie van een n-poort. P immitancja wejściowa wielowrotnika. S inimmittans hos n-port; inimmittans hos mångport. (131)

2. **immittance** : a term denoting either impedance or admittance. ★ immittance → *immittance 1.* R иммитанс. D Immittanz. E inmitancia. I immettenza. N immittantie. P immitancja. S immittans. (131,801)
3. **immittance matrix of a polyphase element in normalized components** : → *matrix 5*
4. **immittance relative to a component** *x* : the diagonal term of index *xx* of an immittance matrix in coherent or normalized components relative to a symmetrical polyphase circuit. *Note.* — A symmetrical three-phase circuit has a single positive, a single negative and a single homopolar immittance. ★ immittance relative à une composante *x* → *immittance 8.* R иммитанс, относящийся к составляюще *x*. D Immittanz der Komponente *x*. E inmitancia relativa a una componente *x*. I impedenza d'ingresso relativa a una componente *x*. N immittantie met betrekking tot component *x*. P immitancja odniesiona do składowej *x*. S ..... (131)
5. **input immittance of a two-port network** : the immittance of a network seen at its input terminals. ★ immittance d'entrée d'un biporte → *immittance 6.* R входной иммитанс четырехполюсника. D Eingangsimmittanz eines Zweitores. E inmitancia de entrada de una red bipuerta. I immettenza di ingresso di un doppio bipolo. N ingangsimmittantie van een tweepoort. P immitancja wejściowa dwuwrotnika. S inimpedans. (131)
6. **load immittance** : the terminating immittance of the output port. ★ immittance de charge → *immittance 2.* R нагрузочный иммитанс. D Belastungsimmittanz. E inmitancia de carga. I immettenza di carico. N belastingsimmittantie. P immitancja obciążenia. S belastningsimmittans. (131)
7. **output immittance of a two-port network** : the immittance of a network seen at its output terminals. ★ immittance de sortie d'un biporte → *immittance 4.* R выходной иммитанс четырехполюсника. D Ausgangsimmittanz eines Zweitores. E inmitancia de salida de una red bipuerta. I immettenza di uscita di un doppio bipolo. N uitgangsimmittantie van een tweepoort. P immitancja wejściowa czwórnika. S utimpedans. (131)
8. **terminating immittance of a port** : the immittance of the electric circuit or device connected to the terminals of that port. ★ immittance de fermeture d'une porte → *immittance 3.* R замыкающий иммитанс. D Abschlußimmittanz eines Tores. E inmitancia terminal de una puerta. I immettenza di chiusura di una porta. N afsluitimmittantie van een poort. P immitancja robocza dwuwrotnika; immitancja robocza czwórnika. S anslutningsimmittans. (131)
9. **transfer immittance** : a transfer function in which one signal is a voltage and the other a current. ★ immittance de transfert → *immittance 5.* R передаточный иммитанс. D Übertragungsimmittanz. E inmitancia de transferencia. I immettenza di trasferimento. N overdrachtsimmittantie. P immitancja skrośna. S överföringsimmittans. (131,702)

immunity

1. **external immunity** : ability of a device, equipment or system to perform without degradation in the presence of electromagnetic disturbances entering other than via its normal input terminals or antennas. ★ immunité externe → *immunité 3.* R внешняя невосприимчивость; помехозащищенность. D äußere Störfestigkeit. E inmunidad externa. I immunità esterna. N externe storingsgevoeligheid. P odporność zewnętrzna. S tålighet mot yttre störning. (161)
2. **immunity** : a thermodynamic state by which electrochemical corrosion is made impossible. ★ immunité → *immunité 1.* R иммунитет. D Immunität. E inmunizado. I immunità. N immuniteit. P odporność. S immunitet. (111)
3. **immunity** (to a disturbance) : the ability of a device, equipment or system to perform without degradation in the presence of an electromagnetic disturbance. ★ immunité → *immunité 2.* R невосприимчивость (к возмущению). D Störfestigkeit (gegenüber einer Störung). E inmunidad (a una perturbación). I immunità (a un disturbo). N immuniteit (voor een storing). P odporność na zaburzenia. S tålighet; immunitet. (161)
4. **immunity level** : → *level 31*
5. **immunity limit** : → *limit 7*
6. **immunity margin** : → *margin 7*
7. **immunity to interference** : the ability of a transmission system, and in particular of receiving equipment, to reduce or reject the effects of interference to wanted signals. ★ insensibilité aux brouillages → *insensibilité 1.* R помехозащищенность. D Überlagerungsimmunität. E insensibilidad a las interferencias; inmunidad a las interferencias. I immunità ai distrubi. N ongevoeligheid voor storing. P odporność na zakłócenia. S störningsimmunitet. (702)
8. **internal immunity** : ability of a device, equipment or system to perform without degradation in the presence of electromagnetic disturbances appearing at its normal input terminals or antennas. ★ immunité interne → *immunité 4.* R внутренняя невосприимчивость; помехоустойчивость. D innere Störfestigkeit. E inmunidad interna. I immunità interna. N interne storingsongevoeligheid. P odporność wewnętrzna. S tålighet mot inre störning. (161)
9. **mains immunity** : immunity from mains-borne disturbance. ★ immunité par rapport à l'alimentation → *immunité 5.* R невосприимчивость по сети питания; помехозащищенность по сети питания. D Netzstörfestigkeit. E inmunidad de la alimentación. I immunità nei riguardi dell'alimentazione. N ongevoeligheid voor netstoring. P odporność na zaburzenia sieciowe. S tålighet mot nätstörning. (161)

imp

1. **imp** (abbreviation) (*Syn.* impairment unit) : unit for evaluating the subjective degradation of a picture under specified conditions of observation, derived from a reference image which has a medium rating using a given quality scale or impairment scale. *Notes. 1* — Under certain conditions the imp units are summable, in the sense that the subjective degradation due to several non-correlated faults is the sum of the degradations due to each fault considered separately. *2* — The method of use of imp units is described in CCIR Report 405. ★ unité i.m.p. → *unité 34.* R единица ухудшения; имп. (723)

impact

1. **field normalized impact sound pressure level** : → *level 22*
2. **impact sound pressure level** : → *level 32*
3. **impact-sound reducing material** : → *material 19*
4. **normalized impact sound pressure level** : → *level 59*

impairment

1. **impairment** (of signal quality) : an undesired change of a signal reducing the telephone transmission performance. *Note.* — Impairment may be caused by noise, distorsion or other phenomena. ★ dégradation → *dégradation 3.* R ухудшение (качества сигнала). D Beeinträchtigung (der Signalqualität). E degradación (de la calidad de una señal). I degradazione della qualità di trasmissione. N vermindering van de transmissiekwaliteit. P obniżenie jakości transmisji. S transmissionsförsämring. (722)
2. **impairment scale** : → *scale 7*
3. **impairment unit** (*Syn.* imp) : → *imp 1*

imparted

1. **energy imparted** : → *energy 33*
2. **energy imparted** : → *energy 34*
3. **mean energy imparted** : → *energy 63*

impedance

1. **acoustic impedance** : at a specified surface, quotient of sound pressure by volume velocity through the surface. ★ impédance acoustique → *impédance 8.* R акустический импеданс. D Flußimpedanz; akustische Impedanz. E impedancia acústica. I impedenza acustica. N akoestische impedantie. P impedancja akustyczna. S akustisk impedans. (801)
2. **antenna (input) impedance** : the complex impedance of an antenna appearing at the feed point terminals. *Note.* — The antenna impedance may be described in terms of the complex reflection coefficient between the feed line and the antenna. ★ impédance (d'entrée) d'antenne → *impédance 35.* R полное входное сопротивление антенны; входной импеданс антенны. D Antennenimpedanz;

Antenneneingangsimpedanz. E impedancia (de entrada) de antena. I impedenza (d'ingresso) d'antenna. N antenne-impedantie. P impedancja (wejściowa) anteny. S matningsimpedans. (712)

3. **appliance impedance** : the output impedance of an appliance as seen from the end of the flexible cord remote from the appliance. ★ impédance d'appareil → *impédance 17.* R импеданс электроустройства. D Geräteimpedanz. E impedancia de un aparato. I impedenza d'apparecchio. N aansluitimpedantie. P impedancja urządzenia. S impedans hos bruksföremål. (161)
4. **asynchronous impedance** : the quotient of the sinusoidal voltage of a phase winding on a balanced system connected to a synchronous machine out of synchronism and the same frequency component of the current in that phase winding. *Note.* — The value of this impedance depends on the slip, and on the rotor angle of a machine with asymmetrical rotor. ★ impédance asynchrone → *impédance 12.* R полное асинхронное сопротивление. D Asynchron-Impedanz. E impedancia asíncrona. I impedenza asincrona. N asynchrone impedantie. P impedancja asynchroniczna. S asynkronimpedans. (411)
5. **blocked impedance** : for a transducer which converts an electric signal into a mechanical or an acoustic signal, input impedance when the output is connected to a load of infinite impedance. ★ impédance en blocage → *impédance 42.* R заторможенный импеданс. D Leerlaufimpedanz. E impedancia de bloqueo. I impedenza bloccata. N geblokkeerde mechanische impedantie. P impedancja przetwornika unieruchomionego. S blockerad impedans. (801)
6. **bus impedance matrix** : → *matrix 4*
7. **characteristic impedance** (of a transmission line or waveguide) : a quantity defined for a mode of propagation at a given frequency in a specific uniform transmission line or uniform waveguide by one of the three following relations:

$$\underline{Z}_1 = \underline{S}/|\underline{I}|^2 \quad \underline{Z}_2 = |\underline{U}|^2/\underline{S} \quad \underline{Z}_3 = \underline{U}/\underline{I}$$

where $\underline{Z}$ is the complex characteristic impedance, $\underline{S}$ the complex power and $\underline{U}$ and $\underline{I}$ are the values, usually complex, respectively of a voltage and a current conventionally defined for each type of mode by analogy with transmission line equations. *Examples : 1* — For a parallel-wire transmission line, $\underline{U}$ and $\underline{I}$ can be uniquely defined and the three equations are consistent. If the transmission line is lossless, the charac teristic impedance is real. *2* — For a waveguide, the conventional definitions for $\underline{U}$ and $\underline{I}$ depend on the type of mode and generally lead to thr ee different values of the characteristic impedance. *3* — For a circular waveguide in the dominant mode TE_{11}, U = r.m.s. voltage along the diameter where the magnitude of the electric field strength vector is a maximum, I = the r.m.s. longitudinal current. *4* — For a rectangular waveguide in the dominant mode TE_{10}, U = the r.m.s. voltage between midpoints of the two conductor faces normal to the electric field strength vector, I = the r.m.s. longitudinal current following on one surface normal to the electric field strength vector. ★ impédance caractéristique → *impédance 14.* R волновое сопротивление (линии передачи или волновода). D Wellenwiderstand (einer Übertragungsleitung oder eines Wellenleiters). E impedancia característica (de una línea de transmisión o de una guíaonda). I impedenza caratteristica (di una linea di trasmissione o di una guida d'onda). N karakteristieke impedantie. P impedancja charakterystyczna (linii przesyłowej lub falowodu). S karakteristisk impedans. (726)
8. **characteristic impedance of a medium** : the wave impedance for a travelling wave in a specific medium. *Note.* — The characteristic impedance of a homogeneous isotropic medium is given by :

$$\underline{Z}_i = \sqrt{\frac{\mu_0 \mu_r}{\varepsilon_0 \varepsilon_r}}$$

where μ_0 is the magnetic constant, $\underline{\mu}_r$ is the relative complex permeability, ε_0 is the electric constant, $\underline{\varepsilon}_r$ is the relative complex permittivity, ★ impédance intrinsèque → *impédance 49.* D Wellenimpedanz eines Mediums; Feldwellenimpedanz. P impedancja charakterystyczna środowiska. (705)
9. **characteristic impedance of a medium** : product of the equilibrium density and speed of sound in a medium. *Note.* — For a plane acoustic wave propagating in a non-dissipative medium, the specific acoustic impedance relative to this wave is equal to the characteristic impedance of the medium. ★ impédance acoustique caractéristique d'un milieu → *impédance 9.* R удельный импеданс среды. D Schallkennimpedanz. E impedancia característica de un medio. I impedenza caratteristica di un mezzo. N karakteristieke impedantie van een medium. P impedancja akustyczna charakterystyczna środowiska. S vågimpedans. (801)
10. **characteristic impedance of vacuum** : the square root Z_0 of the magnetic constant μ_0 divided by the electric constant

$$Z_0 = \sqrt{\frac{\mu_0}{\varepsilon_0}}$$

Note. — In the International System of units (SI), the characteristic impendance of vacuum is equal to :

$$Z_0 = 4\pi 10^{-7} c_0$$

c_0 being the velocity of electromagnetic waves in vacuum ; Z_0 is approximately equal to 120 π ohms or 377 ohms. ★ impédance (intrinsèque) du vide → *impédance 50.* D Wellenimpedanz des leeren Raumes. P impedancja charakterystyczna próżni. (705)
11. **characteristic wave impedance** (of a transmission line) : the ratio of the transverse component of the electric field strength vector to that of the magnetic field strength vector at a point in a specified transverse cross-section of a transmission line. *Note.* — In a uniform transmission line with homogeneous transverse cross-section the characteristic wave impedance is the same at every point. ★ impédance d'onde caractéristique → *impédance 37.* R характеристическое сопротивление волны (линии передачи). D Feldwellenwiderstand (einer Übertragungsleitung). E impedancia de onda característica (de una línea de transmisión). I impedenza d'onda caratteristica (di una linea di trasmissione). N karakteristieke golfimpedantie. P impedancja falowa (linii przesyłowej). S karakteristisk vågimpedans. (726)
12. **(complex) impedance** : a complex quantity whose modulus is the modulus of the impedance and whose argument is the phase angle of the voltage minus the phase angle of the current. ★ impédance (complexe) → *impédance 16.* R комплексное электрическое сопротивление (комплексный импеданс). D (komplexe) Impedanz; komplexer Scheinwiderstand. E impedancia (compleja). I impedenza (complessa). N (complexe) impedantie. P impedancja. S (komplex) impedans. (131)
13. **conjugate impedances** : impedances whose real components (resistances) are equal and whose imaginary components (reactances) are equal but opposite in sign. *Note.* — Conjugate impedances are expressed by conjugate complex quantities. ★ impédances conjuguées → *impédance 64.* R сопряженные импедансы. D konjugiert komplexe Impedanzen. E impedancias conjugadas. I impedenze coniugate. N toegevoegde impedantie. P impedancje sprzężone. S konjugerade impedanser. (801)
14. **driving-point impedance** : quotient of a dynamic field quantity at one point in a system by the resulting kinematic field quantity at the same point. ★ impédance en un point d'application → *impédance 46.* R импеданс точки приложения. D Impedanz am Angriffspunkt. E impedancia en un punto de aplicación. I impedenza in un punto. N aanstootimpedantie. P impedancja w punkcie pracy. S punktimpedans. (801)
15. **electrode impedance** : at a stated operating point and frequency, the quotient of the fundamental frequency component of the voltage at the accessible terminal of an electrode by the sinusoidal current applied to that terminal to cause that voltage, all other terminal potentials being maintained constant. *Note.* — For infinitesimal amplitudes, this is the reciprocal of the electrode admittance. ★ impédance d'électrode → *impédance 32.* R импеданс электрода. D innere Elektrodenimpedanz. E impedancia de electrodo. I impedenza di elettrodo. N elektrode-impedantie. P impedancja elektrody. S elektrodimpedans. (531)
16. **fault impedance** : the impedance at the point of the fault between the faulted phase conductor and earth (ground) or between the faulted phase conductors themselves. *Example :* arc resistance. ★ impédance de défaut → *impédance 22.* R сопротивление в месте замыкания. D Fehlerimpedanz.

E impedancia de falta. I impedenza di guasto. N foutimpedantie. P impedancja miejsca zwarcia. S felimpedans. (603)

17. **free impedance** : for a transducer which converts an electric signal into a mechanical or an acoustic signal, input impedance when the output is connected to a load of zero impedance. ★ impédance à vide → *impédance 7.* R свободный импеданс. D Kurzschlußimpedanz. E impedancia en vacío. I impedenza libera. N vrije impedantie. P impedancja (przetwornika) w próżni. S fri impedans. (801)
18. **ideal impedance convertor** : → *convertor 27*
19. **impedance** : at a given frequency, quotient of a dynamic field quantity (such as force, sound pressure) by a kinematic field quantity (such as vibration velocity, particle velocity), or quotient of a voltage by a current. *Notes. 1* — The term impedance is generally applied to a linear system and to steady sinusoidal signals. *2* — In the case of a transient, impedance as a function of frequency is the quotient of the respective Fourier or Laplace transforms. *3* — An impedance is the quotient of two quantities the product of which has the dimensions of power or power per unit area. ★ impédance → *impédance 6.* R импеданс. D Impedanz. E impedancia. I impedenza. N impedantie. P impedancja. S impedans. (801)
20. **impedance drop** : → *drop 3*
21. **impedance earthed (neutral) system** : → *system 85*
22. **impedance matrix of a polyphase element in coherent components** : → *matrix 6*
23. **impedance relay** : → *relay 14*
24. **impedance to earth** (*Syn.* impedance to ground (USA)) : the impedance measured between a specified terminal and earth. *Notes. 1* — In practice earth may be replaced by a reference point, e.g. frame *2* — The common mode rejection ratio of an instrument is dependent on the impedance to earth of each of the input terminals. The term used for each of these impedances is common mode impedance. ★ impédance par rapport à la terre → *impédance 58.* R импеданс относительно земли. D Impedanz gegen Erde. E impedancia con relación a tierra. I impedenza di terra. N impedantie naar aarde. P impedancja doziemna. S impedans till jord. (303)
25. **impedance to ground** (*Syn.* impedance to earth) : → *impedance 24*
26. **impedance voltage at rated current (for the principal tapping)** : → *voltage 86*
27. **input impedance** : the impedance of the input circuit looking into the device, measured between the input terminals of the device under operating conditions. *Notes. 1* — Impedance may be expressed as its inverse admittance. *2* — In certain cases e.g. sampling and/or self balancing potentiometric devices, the impedance can be different according to the time when it is determined (before, during or after the measuring time). *3* — When the input circuit of an instrument is such that the instantaneous value of the current flowing into the input terminals is a non-linear function of the instantaneous value of the input voltage under given conditions of frequency and voltage, the combination of resistance and reactance which absorbs the same active power as the input circuit and into which flows a reactive current equal to the fundamental frequency component that is flowing into the actual input circuit of the instrument is called equivalent input impedance. ★ impédance du circuit d'entrée → *impédance 40.* R входной импеданс. D Eingangsimpedanz. E impedancia del circuito de entrada. I impedenza d'ingresso. N ingangsimpedantie. P impedancja wejściowa. S inimpedans. (303)
28. **input impedance** : the input electrode impedance. ★ impédance d'entrée → *impédance 33.* R входной импеданс. D Eingangsimpedanz. E impedancia de intrada. I impedenza di ingresso. N ingangsimpedantie. P impedancja wejściowa. S inimpedans. (531)
29. **input impedance** : the impedance presented by a piezoelectric filter to the signal source when terminated in the specified load impedance. ★ impédance d'entrée → *impédance 34.* R полное входное сопротивление. D Eingangsimpedanz. E impedancia de entrada. I impedenza d'entrata. N ingangsimpedantie. P impedancja wejściowa. S inimpedans. (561)
30. **installation wiring impedance** : the impedance of the wiring between the user's side of the metering point and a particular outlet. ★ impédance de l'installation intérieure → *impédance 23.* R импеданс электропроводки установки. D Impedanz der internen Installation. E impedancia de una instalación interna. I impedenza dell'impianto interno. N installatieimpedantie. P impedancja instalacji wewnętrznej. S impedans hos installationsledning. (161)
31. **line impedance stabilization network** (*Syn.* artificial mains network) : → *network 4*
32. **load impedance** : the total impedance of the external circuit between the output electrodes or beyond the output reference plane. ★ impédance de charge → *impédance 19.* R импеданс нагрузки. D Lastimpedanz. E impedancia de carga. I impedenza di carico. N belastingsimpedantie. P impedancja obciążenia. S belastningsimpedans. (531)
33. **loaded impedance** : for a transducer, input impedance of stated kind — electric, mechanical or acoustic — when the output is connected to a stated load. ★ impédance en charge → *impédance 43.* R нагрузочный импеданс. D Impedanz bei Nennabschluß. E impedancia en carga. I impedenza con carico nominale. N impedantie bij belasting. P impedancja pzetwornika obciążonego. S driftimpedans. (801)
34. **locked-rotor impedance characteristic** : → *characteristic 55*
35. **longitudinal impedance** (*Syn.* series impedance) : → *impedance 50*
36. **mechanical impedance** (at a point) : in a linear mechanical system, quotient of a force applied at a point, by the resulting component of velocity in the direction of the force. *Note.* — In the case of torsional mechanical impedance, the words "force" and "velocity" are replaced by "torque" and "angular velocity". ★ impédance mécanique → *impédance 54.* R механический импеданс (в точке). D mechanische Impedanz. E impedancia mecánica (en un punto). I impedenza meccanica (in un punto). N mechanische impedantie. P impedancja mechaniczna (w punkcie). S mekanisk impedans. (801)
37. **mesh impedance matrix** : → *matrix 9*
38. **(modulus of) impedance** : a scalar quantity equal to the quotient of the r.m.s. value of the voltage by the r.m.s. value of the current of a 2-terminal circuit. ★ (module de l') impédance → *impédance 69.* R полное электрическое сопротивление (импеданс). D Betrag der Impedanz; Scheinwiderstand. E (módulo de) impedancia. I (modulo dell') impedenza. N (modulus van de) impedantie. P moduł impedancji. S impedans(belopp). (131)
39. **motional impedance** : of a transducer, the loaded electric impedance minus the electric impedance when mechanically blocked. *Note.* — This definition is best applied to transducers with gyroscopic coupling. ★ impédance cinétique → *impédance 15.* R импеданс движения. D Bewegungsimpedanz. E impedancia cinética. I impedenza mozionale; impedenza cinetica. N bewegingsimpedantie. P impedancja kinetyczna. S rörelseimpedans. (801)
40. **mutual impedance** (between two radiating elements) : for an antenna consisting of several, fed or not, radiating elements, the coefficient Z_{ij}, with i different from j, relating the current in the element of rank j to the voltage E_i at its terminals of the element of rank i, in the set of linear equations:

$$E_i = \Sigma_j Z_{ij} I_j$$

★ impédance mutuelle → *impédance 56.* R взаимный импеданс (между двумя излучающими элементами). D Gegenimpedanz (zweier Strahlerelemente). E impedancia mutua (entre dos elementos radiantes). I impedenza mutua. N wederkerige impedantie. P impedancja wzajemna (między dwoma elementami promieniującymi). S ömsesidig impedans. (712)
41. **negative phase-sequence impedance** : the quotient of the negative phase-sequence component of the voltage, assumed to be sinusoidal, at the terminals of a machine rotating in synchronism, and the negative-sequence component of the current at the same frequency. *Note.* — It is equal to the asynchronous impedance for a slip equal to two. ★ impédance inverse → *impédance 51.* R полное сопротивление обратной последовательности. D Invers-Impedanz. E impedancia inversa. I impedenza inversa. N inverse impedantie. P impedancja składowej przeciwnej. S minusföljdsimpedans. (411)
42. **normalized impedance** : the ratio of an impedance to the characteristic impedance of a given transmission line. ★ impédance normée → *impédance 57.* R нормализованное полное сопротивление. D normierte Impedanz. E impedancia normalizada. I impedenza

normalizzata; fattore di impedenza. N genormeerde impedantie. P impedancja unormowana. S impedanstal. (726)

43. **open-circuit impedance** : for a transducer which converts a mechanical or an acoustic signal into an electric signal, input impedance — mechanical or acoustic — when the output is connected to a load of infinite impedance. ★ impédance en circuit ouvert → *impédance 44.* R импеданс холостого хода. D Leerlaufimpedanz. E impedancia en circuito abierto. I impedenza a circuito aperto. N ingangsimpedantie bij nominale belasting. P impedancja przetwornika nieobciążonego. S tomgångsimpedans. (801)

44. **output impedance** : the impedance of the output circuit locking into the device, measured between the output terminals of the device under operating conditions. *Notes. 1* — Impedance may be expressed as its inverse admittance. *2* — In certain cases e.g. sampling and/or self balancing potentiometric devices, the impedance can be different according to the time when it is determined (before, during or after the measuring time). *3* — When the output circuit of an instrument is such that the instantaneous value of the current flowing into the output terminals is a non-linear function of the instantaneous value of the output voltage under given conditions of frequency and voltage, the combination of resistance and reactance which absorbs the same active power as the output circuit and into which flows a reactive current equal to the fundamental frequency component that is flowing into the actual output circuit of the instrument is called equivalent output impedance. ★ impédance du circuit de sortie → *impédance 39.* R выходной импеданс. D Ausgangsimpedanz. E impedancia del circuito de salida. I impedenza d'uscita. N uitgangsimpedantie. P impedancja wyjściowa. S utimpedans. (303)

45. **output impedance** : the output electrode impedance. ★ impédance de sortie → *impédance 26.* R выходной импеданс. D Ausgangsimpedanz. E impedancia de salida. I impedenza di uscita. N uitgangsimpedantie. P impedancja wyjściowa. S utimpedans. (531)

46. **output impedance** : the impedance presented by a piezoelectric filter to the load when its input is connected to the specified source impedance. ★ impédance de sortie → *impédance 27.* R полное выходное сопротивление. D Ausgangsimpedanz. E impedancia de salida. I impedenza d'uscita. N uitgangsimpedantie. P impedancja wyjściowa. S utimpedans. (561)

47. **rated impedance of an energizing circuit** : the value of the complexe impedance of a given energizing circuit of a relay determined under specified conditions. ★ impédance assignée d'un circuit d'alimentation → *impédance 11.* R установленное сопротивление цепи возбуждения. D Bemessungsimpedanz eines Erregungskreises. E impendancia asignada de un circuito de alimentación. I impedenza specificata di un circuito d'alimentazione. N toegekende impedantie van een bekrachtigingscircuit. P impedancja wejściowa znamionowa. S märkimpedans hos matningskrets. (446)

48. **reference impedance** : an impedance of specified value used in the calculation or measurement of the electromagnetic disturbance caused by an appliance. ★ impédance de référence → *impédance 25.* R эталонный импеданс. D Bezugs-Impedanz. E impedancia de referencia. I impedenza di riferimento. N referentie-impedantie. P impedancja odniesienia. S referensimpedans. (161)

49. **self impedance** (of a radiating element) : for an antenna consisting of several, fed or not, radiating elements, the coefficient Z_{ii} relating the current in the element of rank i to the voltage at its terminals, in the set of linear equations:

$$E_i = \Sigma_j Z_{ij} I_j$$

★ impédance propre → *impédance 59.* R собственный импеданс (излучающего элемента). D Eigenimpedanz. E impedancia propia (de un elemento radiante). I impedenza propria. N eigen impedantie. P impedancja własna (elementu promieniującego). S egenimpedans. (712)

50. **series impedance** (*Syn.* longitudinal impedance) : the impedance between the phase terminals in the two-port network equivalent to a given network component. ★ impédance série → *impédance 60.* R полное продольное сопротивление. D Längsimpedanz. E impedancia serie; impedancia longitudinal. I impedenza serie; impedenza longitudinale. N serie-impedantie; langsimpedantie. P impedancja wzdłużna (szeregowa). S serieimpedans. (603)

51. **service connection impedance** : the impedance of the connection from the point of common coupling up to the user's side of the metering point. ★ impédance de branchement → *impédance 18.* R импеданс эксплуатационного соединения. D Hausanschluß-Impedanz. E impedancia de la conexión de servicio. I impedenza di connessione. N aansluitpuntimpedantie. P impedancja przyłącza służbowego. S impedans hos servisledning. (161)

52. **short-circuit impedance** : for a transducer which converts a mechanical or an acoustic signal into an electric signal, input impedance of stated kind — mechanical or acoustic — when the output is connected to a load of zero impedance. ★ impédance en court-circuit → *impédance 45.* R импеданс короткого замыкания. D Kurzschlußimpedanz. E impedancia en corto circuito. I impedenza in cortocircuito. N kortsluitimpedantie. P impedancja zwarciowa (przetwornika). S kortslutningsimpedans. (801)

53. **short-circuit impedance of a pair of windings** : the equivalent star connection impedance related to one of the windings, for a given tapping and expressed in ohms per phase, at rated frequency, measured between the terminals of a winding when the other winding is short-circuited. *Note.* — This value is normally related to the appropriate reference temperature. ★ impédance de court-circuit d'une paire d'enroulements → *impédance 21.* R полное сопротивление короткого замыкания пары обмоток. D Kurzschlußimpedanz eines Wicklungspaares. E impedancia de cortocircuito de un par de arrollamientos. I impedenza di cortocircuito di una coppia di avvolgimenti. N kortsluitimpedantie van een wikkelingspaar. P impedancja zwarcia pary uzwojeń. S kortslutningsimpedans för lindningspar. (421)

54. **short-circuit impedance of an arc furnace installation** : the calculated value of the impedance from the values of voltage and current attained under short-circuit test conditions. ★ impédance de court-circuit d'une installation de four à arc → *impédance 20.* R импеданс короткого замыкания установки дуговой печи. D Kurzschlussimpedanz einer Lichtbogenofenanlage. E impedancia de cortocircuito de una instalación de horno de arco. I impedenza di cortocircuito di un'installazione di forno ad arco. N kortsluitimpedantie (van een boogoveninstallatie). P impedancja zwarciowa. S ljusbågsugns kortslutningsimpedans. (841)

55. **specific acoustic impedance** : at a point in a sound field, quotient of sound pressure by particle velocity. ★ impédance acoustique spécifique → *impédance 10.* R удельный акустический импеданс. D spezifische Schallimpedanz; Feldimpedanz. E impedancia acústica especifica. I impedenza acustica specifica. N specifieke akoestische impedantie. P impedancja akustyczna jednostkowa. S ljudfältsimpedans. (801)

56. **specific wall impedance** : quotient of the sound pressure acting on a wall, or a wall covering, by the particle velocity normal to the wall. ★ impédance spécifique d'une paroi → *impédance 61.* R импеданс стенки. D Wandimpedanz. E impedancia especifica de una pared. I impedenza specifica di una parete. N specifieke wandimpedantie. P impedancja (akustyczna) charakterystyczna ściany. S väggimpedans. (801)

57. **supply system impedance** : the impedance of the supply system as viewed from the point of common coupling. ★ impédance du réseau (d'alimentation) → *impédance 41.* R импеданс системы питания. D Impedanz des Versorgungsnetzes. E impedancia del sistema (de alimentación). I impedenza della rete (di alimentazione). N voedingsimpedantie. P impedancja systemu zasilania. S impedans hos distributionsnät. (161)

58. **surface impedance** (of an isotropic material) : the ratio of the electric field strength vector component parallel to the current along the surface of a propagation medium consisting of an isotropic material to the current per unit width along that surface. ★ impédance de surface → *impédance 28.* R поверхностное полное сопротивление (изотропного материала). D Oberflächen-Feldwiderstand (in einem isotropen Material). E impedancia de superficie (de un material isótropo). I impedenza di superficie. N oppervlakte-impedantie. P impedancja powierzchniowa (materiału izotropowego). S ytimpedans. (726)

59. **surface transfer impedance** (of a coaxial line) : the quotient of the voltage induced in the centre conductor of a coaxial line per unit length by the current on the external surface of the coaxial line. ★ impédance linéique de transfert

→ *impédance 52.* R сопротивление связи (коаксиальной линии). D Kopplungswiderstand (eines Koaxialkabels). E impedancia de transferencia (de una línea coaxial). I impedenza di trasferimento per unità di lunghezza (di una linea coassiale). N oppervlakte overdrachtsimpedantie (van een coaxiale lijn). P impedancja powierzchniowa przeniesiona (linii współosiowej). S överkopplingsimpedans i koaxialledning. (161)

60. **surge impedance of a line** : the quotient of the voltage and the current of a wave travelling along a line of infinite length having the same parameters as the given line. ★ impédance d'onde d'une ligne → *impédance 38.* R волновое сопротивление линии. D Wellenwiderstand einer Leitung. E impedancia de onda de una línea. I impedenza d'onda di una linea. N golfimpedantie van een lijn. P impedancja falowa linii. S vågimpedans hos ledning. (603)
61. **synchronous impedance** : the quotient of (a) the value of the vector difference between the generated synchronous voltage and the terminal voltage of a synchronous machine and (b) the current, in a steady-state condition. *Note.* — This definition is of rigorous application to turbine-type machines only, but it gives a good degree of approximation for salient-pole machines. ★ impédance synchrone → *impédance 62.* R полное синхронное сопротивление. D Synchronimpedanz. E impedancia sincrona. I impedenza sincrona. N synchrone impedantie. P impedancja synchroniczna. S synkronimpedans. (411)
62. **system impedance ratio** : → *ratio 98*
63. **terminating impedance** : the impedance presented to a piezoelectric filter by its load or by its source. ★ impédance terminale → *impédance 63.* R полное нагрузочное сопротивление. D Abschlussimpedanz. E impedancia terminal. I impedenza terminale; impedenza ai morsetti. N afsluitimpedantie. P impedancja na końcówkach (filtru). S avslutningsimpedans. (561)
64. **transfer impedance** (of a screened circuit) : the quotient of the voltage appearing between two specified points in the screened circuit by the current in a defined cross-section of the screen. ★ impédance de transfert → *impédance 29.* R сопротивление связи (экранированной цепи). D Kurzschlußwiderstand (eines abgeschirmten Kabels). E impedancia de transferencia (de un circuito apantallado). I impedenza di trasferimento (di un circuito schermato). N overdrachtsimpedantie (van een afgeschermde schakeling). P impedancja przeniesiona (obwodu ekranowanego). S överkopplingsimpedans. (161)
65. **transfer impedance** : a transfer function in which the output quantity is a voltage and the input quantity a current. ★ impédance de transfert → *impédance 30.* R импеданс передачи. D Übertragungsimpedanz. E impedancia de transferencia. I impedenza di trasferimento. N overdrachtsimpedantie. P impedancja przejścia; impedancja transferowa. S överföringsimpedans. (702)
66. **transfer impedance** : quotient of a dynamic field quantity at one point in a system by the corresponding kinematic field quantity at another point in the same system. ★ impédance de transfert → *impédance 31.* R переходной импеданс. D Übertragungsimpedanz. E impedancia de transferencia. I impedenza di trasferimento. N overdrachtsimpedantie. P impedancja przeniesienia. S överföringsimpedans. (801)
67. **transition impedance** : a resistor or reactor consisting of one or more units bridging the tapping in use and the tapping next to be used, for the purpose of transferring load from one tapping to the other without interruption or appreciable change in the load current, at the same time limiting the circulating current for the period that both tappings are used. ★ impédance de passage → *impédance 24.* R токоограничивающий элемент. D Überschaltimpedanz. E impedancia de conmutación. I impedenza di commutazione. N overbruggingsimpedantie. P impedancja ograniczająca stopniowa. S överkopplingsimpedans. (421)
68. **wave impedance** : for a sinusoidal electromagnetic wave, using complex notation, the quantity representing the electric field at a point divided by the quantity representing the magnetic field at the same point. ★ impédance d'onde → *impédance 36.* D Wellenimpedanz. P impedancja fali. (705)
69. **zero phase-sequence impedance** : the quotient of the zero phase-sequence component of the voltage, assumed to be sinusoidal, supplied to a synchronous machine, and the zero phase-sequence component of the current at the same frequency. ★ impédance homopolaire → *impédance 47.* R полное сопротивление нулевой последовательности. D Nullimpedanz. E impedancia homopolar. I impedenza omopolare. N homopolaire impedantie. P impedancja składowej zerowej. S nollföljdsimpedans. (411)
70. **zero-sequence impedance (of a polyphase winding)** : the impedance, expressed in ohms per phase at rated frequency, between the line terminals of a polyphase star or zigzag-connected winding connected together and its neutral terminal. ★ impédance homopolaire (d'un enroulement polyphasé) → *impédance 48.* R сопротивление нулевой последовательности (многофазной обмотки). D Nullimpedanz (einer Mehrphasenwicklung). E impedancia homopolar (de un arrollamiento polifásico). I impedenza omopolare (di un avvolgimento polifase). N homopolaire impedantie (van een meerfasenwikkeling). P impedancja kolejności zerowej (uzwojenia wielofazowego). S nollföljdsimpedans. (421)

imperfection

1. **imperfection** (of a crystal lattice) : a deviation in structure from that of an ideal crystal. ★ imperfection → *imperfection 1.* R дефекты (в кристаллической решетке). D Störstelle (eines Kristallgitters). E imperfección (de un sólido cristalino). I imperfezione (di un lattice di cristallo). N imperfectie. P defekty (sieci krystalicznej). S störning (i ett kristallgitter). (521)

implant

1. **implant (radioactive)** : radioactive material, or radioactive material in a suitable container, embedded permanently or temporarily in a tissue for therapeutic purposes. ★ implant (radioactif) → *implant 3.* R имплантант (радиоактивный). D (radioaktives) Implantat. E implante (radiactivo). I infissione (radioattiva). N implantaat (radioactief). P implantant (radioaktywny). S implantat. (881)
2. **planar implant** : an implant in a single plane. ★ implant en surface → *implant 1.* R плоский имплантант. D Oberflächen-Implantat. E implante en superficie. I infissione planare. N planair implantaat. P implantant płaski. S ytimplantat. (881)
3. **volume implant** : an implant in tissue in three dimensions. ★ implant en volume → *implant 2.* R объемный имплантант. D Volumen-Implantat. E implante en volumen. I infissione in un volume. N ruimtelijk implantaat. P implantant objętościowy. S volymimplantat. (881)

implantation

1. **implantation technique** : → *technique 9*
2. **ion implantation** : the formation of a region of P-type, N-type or intrinsic conductivity in semiconductor crystal by implanting accelerated ions. ★ implantation ionique → *implantation 1.* R ионная имплантация. D Ionenimplantation. E implantación iónica. I fissaggio ionico (implantazione ionica). N ionenimplantatie. P implantacja jonów. S jonimplantering. (521)

importance

1. **importance function** : in a critical system, the average asymptotic number of neutrons in the system descended from a neutron of a given position and velocity. It is proportional to the adjoint of the neutron flux density. ★ fonction importance → *fonction 33.* D Einflußfunktion. E función importancia. I funzione importanza. N gewichtsfunctie; invloedsfunctie. P funkcja cenności. S viktfunktion. (026)
2. **relative importance** : for neutrons of type "A" relative to neutrons of type "B", the average number of neutrons with velocity and position "B" which must be added to a critical system to keep the chain reaction rate constant after removal of a neutron with velocity and position "A". ★ importance relative → *importance 2.* D relativer Einfluß. E importancia relativa. I importanza relativa. N relatief gewicht. P względna cenność. S relativ vikt. (026)

imported

1. **imported backfill** : → *backfill 2*

impregnated

1. **impregnated paper insulation** : → *insulation 19*

impregnating

1. **impregnating** : the process of filling with a liquid the interstices and voids in an insulating material or a combination of materials. *Note.* — The liquid may remain liquid or become

solid after impregnating. ★ imprégnation → *imprégnation 1.* R пропитка. D Imprägnieren; Tränken. E impregnación. I impregnazione. N impregneren. P impregnacja. S impregnering. (212,212,436)

2. **impregnating resin** : → *resin 3*

improvement

1. **reliability improvement** : a process undertaken with the deliberate intention of improving the reliability performance by eliminating causes of systematic failures and/or by reducing the probability of occurrence of other failures. ★ amélioration de la fiabilité → *amélioration 1.* R улучшение безотказности. D Zuverlässigkeitsverbesserung. E mejora de la fiabilidad. I miglioramento dell'affidabilità (intenzionale). N verbetering van de betrouwbaarheid. P poprawa niezawodności. S funktionssäkerhetsförbättring. (191)

impulse

1. **chopped lightning impulse** : a lightning impulse suddenly interrupted by a disruptive discharge causing a rapid collapse of the voltage, practically to zero. ★ choc de foudre coupé → *choc 5.* R срезанный грозовой импульс напряжения. D abgeschnittene Blitzstoßspannung. E impulso tipo rayo cortado. I impulso atmosferico tronco. N gekapte bliksemstootspanning. P udar piorunowy ucięty. S stympad kort stöt. (604)
2. **conventional impulse withstand voltage** : → *voltage 36*
3. **front of a voltage impulse** : → *front 3*
4. **full lightning impulse** : a lightning impulse not interrupted by a disruptive discharge. ★ choc de foudre plein → *choc 6.* R полный стандартный грозовой импульс. D volle Blitzstoßspannung. E impulso tipo rayo pleno. I impulso atmosferico pieno. N volle bliksemstootspanning. P udar piorunowy pełny. S ostympad kort stöt. (604)
5. **impulse** : a pulse that, for a given application, approximates a unit pulse or a Dirac function. ★ impulsion quasi-Dirac → *impulsion 27.* R единичный импульс. D Quasi-Dirac-Impuls. E impulso quasi-Dirac. I impulso quasi-Dirac. N impuls. P impuls quasi-Diraca. S diracpuls. (161)
6. **impulse** : time integral of a force over the time during which the force is applied. ★ impulsion → *impulsion 19.* R импульс силы. D Kraftimpulsgröße. E impulso. I impulso. N impuls. P impuls. S impuls. (801)
7. **impulse chopped on the front** : an impulse chopped before it has reached peak value. ★ choc coupé sur le front → *choc 3.* R импульс напряжения, срезанный на фронте. D in der Stirn abgeschnittene Stoßspannung. E impulso cortado en el frente. I impulso troncato sul fronte. N op het front gekapte stootspanning. P udar ucięty na czole. S frontstympad stöt. (604)
8. **impulse chopped on the tail** : an impulse chopped after it has passed its peak value. ★ choc coupé sur la queue → *choc 2.* R импульс напряжения, срезанный на хвосте. D im Rücken abgeschnittene Stoßspannung. E impulso cortado en la cola. I impulso troncato sulla coda. N op de rug gekapte stootspanning. P udar ucięty na grzbiecie. S ryggstympad stöt. (604)
9. **impulse generator** : → *generator 20*
10. **impulse test** : → *test 38*
11. **impulse type turbine** : → *turbine 5*
12. **lightning impulse** : a voltage impulse of a specified shape applied during dielectric tests with a virtual front duration of the order of 1 microsecond and a time to half value of the order of 50 microseconds. *Note.* — The lightning impulse is defined by the two figures giving these durations in microseconds ; in particular the standard lightning impulse is : 1.2/50μ s. ★ tension de choc de foudre → *tension de choc 8.* R стандартный грозовой импульс напряжения. D Blitzstoßspannung. E impulso tipo rayo. I tensione a impulso atmosferico. N bliksemstootspanning. P udar piorunowy. S kort stöt. (604)
13. **lightning impulse protective level** : → *level 52*
14. **protection ratio against lightning impulses** : → *ratio 71*
15. **protection ratio against switching impulses** : → *ratio 72*
16. **statistical impulse withstand voltage** : → *voltage 196*
17. **switching impulse** : a voltage impulse of a specified shape applied during dielectric tests, with a time to crest of 100 to 300 microseconds, and a time to half value of a few milliseconds. *Note.* — The switching impulse is defined by the two figures giving these durations in microseconds ; in particular the standard switching impulse is 250/2 500μ s. ★ tension de choc de manœuvre → *tension de choc 9.* R коммутационный испытательный импульс. D Schaltstoßspannung. E impulso tipo maniobra. I tensione a impulso di manovra. N schakelstootspanning. P udar łączeniowy. S lång stöt. (604)
18. **switching impulse protective level** : → *level 96*
19. **tail of a voltage impulse** : → *tail 5*
20. **time to crest (of a switching impulse)** : → *time 205*
21. **time to half value (of an impulse)** : → *time 208*
22. **unit impulse** (*Syn.* unit pulse) : → *pulse 88*
23. **unit impulse response** (*Syn.* unit pulse response) : → *response 26*
24. **virtual front duration (of a lightning impulse)** : → *duration 45*
25. **voltage impulse** : a transient voltage wave applied to a line or equipment, characterized by a rapid increase, followed generally by a slower non-oscillatory decrease of the voltage. ★ tension de choc → *tension de choc 6.* R импульс напряжения. D Stoßspannung. E impulso de tensión; tensión de choque. I tensione a impulso. N stootspanning. P udar napięcia. S spänningsstöt. (604)

impulsive

1. **impulsive disturbance** : → *disturbance 9*
2. **impulsive noise** : → *noise 28*
3. **recurrent (impulsive) noise** : → *noise 68*

impurity

1. **impurity** : 1. Foreign atoms in a single-element semiconductor 2. Foreign atoms or either an excess or a deficiency of atoms with respect to the stochiometric composition of a compound semiconductor. ★ impureté → *impureté 4.* R примесь. D Störstelle. E impurezas. I impurità. N verontreiniging. P domieszka; zanieczyszczenie. S störämne. (521)
2. **impurity activation energy** : → *energy 53*
3. **impurity band** : → *band 23*
4. **impurity compensation** : → *compensation 6*
5. **impurity concentration transition zone** : → *zone 7*
6. **impurity level** : → *level 33*

in-band

1. **in-band signalling** : → *signalling 20*

incandescence

1. **incandescence** : emission of optical radiation by the process of thermal radiation. *Note.* — In the USA, incandescence is restricted to visible radiation. ★ incandescence → *incandescence 1.* R накал. D Glühen. E incandescencia. I incandescenza. N (het) gloeien. P żarzenie; inkadescencja. S termisk ljusalstring. (845)

incandescent

1. **gas-filled (incandescent) lamp** : → *lamp 19*
2. **incandescent (electric) lamp** : → *lamp 27*
3. **vacuum (incandescent) lamp** : → *lamp 71*

incendive

1. **most incendive mixture** : → *mixture 5*

inception

1. **discharge inception test** : → *test 26*
2. **partial discharge inception test** : → *test 58*

inching

1. **inching** : electrically actuated angular movement or slow rotation of a machine. ★ virage (électrique) → *virage 1.* R ..... D elektrisches Drehen. E virado (eléctrico). I viraggio. N (elektrisch) tornen. P obracanie. S framryckning. (411)
2. **inching** : energizing a motor or solenoid repeatedly for short periods to obtain small movements of the driven mechanism. ★ marche par à-coups → *marche 30.* R толчковый режим. D Tippen. E marcha a golpes. I manovra ad impulso. N tippen. P impulsowanie. S baxning. (441)

incidence

1. **angle of incidence** : → *angle 5*
2. **angle of incidence** : → *angle 6*
3. **Brewster angle incidence** : the incidence of an incident wave in a perfect dielectric medium on the surface separating it from

another perfect dielectric medium at an angle of incidence equal to the Brewster angle. ★ incidence brewstérienne → *incidence 4.* D Brewster-Einfall. P padanie brewsterowskie. (705)

4. **grazing incidence** : the incidence of an incident wave on a surface at a very small grazing angle. ★ incidence rasante → *incidence 6.* D streifender Einfall. P padanie muśnięciem. (705)
5. **incidence matrix** : → *matrix 7*
6. **oblique incidence ionospheric sounding** : → *sounding 7*
7. **plane of incidence** : → *plane 14*
8. **pseudo-Brewster angle incidence** : incidence of an incident wave in a perfect dielectric medium on the surface separating it from a medium which is not a perfect dielectric at an angle of incidence such that the modulus of the reflection coefficient is minimum for a wave that has its electric flux density vector in the plane of incidence. ★ incidence pseudo-brewstérienne → *incidence 5.* D Pseudo-Brewster-Einfall. P padanie pseudobrewsterowskie. (705)
9. **random incidence** : incidence of sound waves from all directions with equal probability. ★ incidence aléatoire → *incidence 3.* R случайное падение. D diffuser Schalleinfall. E incidencia aleatoria. I incidenza casuale. N alzijdige inval. P padanie (fal akustycznych) losowe. S diffust infall. (801)
10. **vertical incidence ionosonde** : → *ionosonde 2*
11. **vertical incidence ionospheric recorder** (*Syn.* vertical incidence ionosonde) : → *ionosonde 2*
12. **vertical incidence ionospheric sounder** (*Syn.* vertical incidence ionosonde) : → *ionosonde 2*
13. **vertical incidence ionospheric sounding** : → *sounding 9*

incident

1. **incident** : an event of external or internal origin, affecting equipment or the supply system and which disturbs its normal operation. ★ incident → *incident 3.* R авария. D Störungsanlaß. E incidente. I incidente. N storing. P zaburzenie. S driftstörning. (604)
2. **incident current** : → *current 106*
3. **incident wave** : → *wave 23*
4. **incident wave** : → *wave 24*
5. **system incident** : a succession of events resulting in complete or partial failure of the system. ★ incident de réseau → *incident 4.* R системная авария. D Netzstörung. E incidente de red. I incidente di rete. N netstoring. P zakłócenie systemowe; awaria systemowa. S systemstörning. (604)

inclination

1. **inclination** (of a satellite orbit) : the angle between the orbital plane of a satellite and the principal reference plane. *Note.* — By convention, the inclination of a direct orbit is an acute angle and the inclination of a retrograde orbit is an obtuse angle. ★ inclinaison → *inclinaison 2.* R наклонение (орбиты спутника). D Inklination (einer Satelliten-Umlaufbahn). E inclinación (de una órbita de satélite). I inclinazione (dell'orbita di un satellite). N helling; inclinatie. P nachylenie (orbity satelity). S inklination; lutningsvinkel. (725)

inclined

1. **inclined - V antenna** : → *antenna 62*
2. **inclined catenary** : → *catenary 9*
3. **inclined orbit** : → *orbit 6*
4. **inclined span** (*Syn.* sloping span) : → *span 9*
5. **specific resistance on inclined track (gradient)** : → *resistance 64*

included

1. **included angle of a reproducing stylus tip** : → *angle 32*

inclusion

1. **inclusion** : any foreign material within a synthetic quartz crystal made visible when examined by light from a bright source. *Note.* — A particularly common inclusion is the mineral acmite (sodium iron silicate). ★ inclusion → *inclusion 1.* R включение. D Einschlüsse. E inclusión. I inclusione. N insluitsel. P wtrącenie. S inneslutning. (561)

incoherence

1. **incoherence** : the property of radiation which is characterised by a very low degree of coherence. ★ incohérence → *incohérence 1.* R некогерентность. D Inkohärenz. E incoherencia. I incoerenza. N incoherentie. P niespójność; niekoherencja. S inkoherens. (731)

incoherent

1. **incoherent radiation** : → *radiation 33*
2. **incoherent scattering** : → *scattering 13*
3. **incoherent scattering cross-section** : → *cross-section 16*

incoherent-scatter

1. **incoherent-scatter ionospheric sounding** : → *sounding 3*

incoming

1. **direct incoming selection** : → *selection 4*
2. **direct incoming selection with integrated numbering** : direct incoming selection using a single selection sequence made up from certain figures identifying the private network, followed by certain figures identifying the called terminal in that network. The complete sequence of figures constitute a complete address integrated into the numbering plan of the telex network. ★ sélection directe à l'arrivée avec numérotation intégrée → *sélection 12.* R прямой входящий набор с интегрированной нумерацией. D direkte Durchwahl mit verdeckter Numerierung. E selección directa a la llegada con numeración integrada. I selezione diretta entrante con numerazione continua. N doorkiezen met geïntegreerd nummer. P wywołanie przychodzące bezpośrednie z numeracją jednolitą. S direktval med integrerad numrering. (721)
3. **direct incoming selection with two-stage selection** : direct incoming selection using two selection sequences to select the required terminal in the private network. The first sequence identifies the private network, the second sequence identifies the terminal in this network. Only the first sequence is integrated into the numbering plan of the telex network. ★ sélection directe à l'arrivée avec numérotation en deux temps → *sélection 11.* R прямой входящий набор с двуэтапной нумерацией. D direkte Durchwahl mit Zweistufenwahl. E selección directa a la llegada con numeración en dos tiempos. I selezione diretta entrante con numerazione in due tempi. N tweetraps doorkiezen. P wywołanie przychodzące bezpośrednie z numeracją dwustopniową. S tvåstegs direktval. (721)
4. **incoming** : pertaining to traffic at a port of a device or network to indicate that the direction of the call set-up is to that port from another point. ★ entrant → *entrant 3.* R входящий. D kommend; ankommend. E entrante. I entrante. N inkomend. P przychodzący. S inkommande. (714)
5. **incoming circuit** : → *circuit 89*
6. **incoming feeder** : → *feeder 14*
7. **incoming only terminal** : → *terminal 12*
8. **incoming response delay** : → *delay 24*
9. **incoming traffic** : → *traffic 8*
10. **splitting of the incoming line** : → *splitting 3*

incomplete

1. **incomplete bridge connection** : → *connection 31*

incorrect

1. **incorrect (discrete) signal** : → *signal 103*
2. **incorrect framing** : → *framing 3*

increased

1. **increased safety "e"** : → *safety 2*

incremental

1. **incremental command** (*Syn.* regulating step command) : → *command 17*
2. **incremental duplex** : → *duplex 8*
3. **incremental hysteresis loop** : → *loop 12*
4. **incremental $B(H)$ loop** : → *loop 13*
5. **incremental $J(H)$ loop** : → *loop 14*
6. **incremental $M(H)$ loop** : → *loop 15*
7. **incremental information** : → *information 9*
8. **incremental permeability** : → *permeability 12*

9. **incremental power gain** : → *gain 20*
10. **incremental range** : → *range 35*

indentor

1. **crimp indentor** : that part of a crimping tool which intends or compresses the conductor barrel or ferrule. ★ poinçon de sertissage → *poinçon 1.* R пуансон обжимного инструмента. D Crimp-Stempel. E punzón de engaste. I dentellatura per crimpaggio; morsa di crimpatura. N stempel. P tłocznik (zagniataka). S överback. (581)

indenture

1. **indenture level** : → *level 34*

independant

1. **code independent** : qualifies a data link, a data network or an operating mode which permit any sequence of binary elements to be transmitted under the sole condition that the said sequence has a specified binary rate. ★ indépendant du code → *indépendant 11.* R кодонезависимый. D codeunabhängig. E independencia del código. I indipendente dalla codifica. N code-onafhankelijkheid. P niezależność od kodu. S kodoberoende. (721)

independence

1. **bit sequence independence** : the property of a binary transmission channel, circuit, or connection which permits all sequences of binary signal elements to be conveyed over it at its specified bit rate. ★ indépendance de la suite des bits → *indépendance 1.* R независимость от статистики битов. D Bitfolgen-Unabhängigkeit. E independencia de la secuencia de bits. I indipendenza dalla sequenza dei bit. N onafhankelijkheid van de bitvolgorde. P niezależność od sekwencji binarnej. S bitföljdsoberoende. (704)
2. **independence of tracks** : a general arrangement of equipment providing mechanical and electrical independence of the tracks from one another, so that a failure on one track does not affect the others. ★ indépendance des voies → *indépendance 2.* R независимость путей. D unabhängig gespeiste Gleise. E independencia de vías. I indipendenza dei binari. N onafhankelijke ophanging en voeding van naast elkaar gelegen sporen. P niezależność torów. S ..... (811)
3. **quasi bit sequence independence** : the property of a binary transmission channel, circuit, or connection which permits almost all sequences of binary signal elements to be conveyed over it at its specified bit rate, the exceptional sequences being completely specified together with their prohibition and allowance conditions. ★ quasi-indépendance de la suite des bits → *quasi-indépendance 1.* R квазинезависимость от статистики битов. D Bitfolgen-Quasi-Unabhängigkeit. E cuasi independencia de la secuencia de bits. I quasi indipendenza dalla sequenza dei bit. N quasi-onafhankelijkheid van de bitvolgorde. P niby-niezależność od sekwencji binarnej. S villkorligt bitföljdsoberoende. (704)

independent

1. **electrically independent earth electrodes** : → *electrode 25*
2. **electro-dynamic braking independent of line supply** : → *braking 28*
3. **frequency independent antenna** : → *antenna 55*
4. **independent circulating circuit component** : → *circulating circuit 2*
5. **(independent) current source** : → *source 13*
6. **independent fission yield** (*Syn.* primary fission yield) : → *fission 19*
7. **independent heating** : → *heating 36*
8. **independent manual operation** : → *operation 25*
9. **independent mechanical system** : → *mechanical system 6*
10. **independent sideband** : → *sideband 3*
11. **(independent) voltage source** : → *voltage source 3*

independently

1. **independently driven exciter** : → *exciter 5*

independent-time

1. **independent-time measuring relay** : → *relay 15*

indeterminate

1. **indeterminate fault** : → *fault 45*

index

1. **absorbed dose index** (at a point) (D_I) : the maximum absorbed dose within a 30 cm diameter sphere centred at this point and consisting of material equivalent to soft tissue with a density of 1 g cm^{-3}. ★ indice de dose absorbée → *indice 14.* R показатель поглощенной дозы (в данной точке). D Energiedosis-Index (an einem Punkt). E índice de dosis absorbida (en un punto). I indice di dose assorbita (in un punto). N index van de geabsorbeerde dosis (bij een punt) (D_I). P wskaźnik dawki pochłoni ętej (w punkcie). S stråldosindex. (881)
2. **CIE 1974 general colour rendering index** (R_a) : mean of the CIE 1974 special colour rendering indices for a specified set of eight test colour samples. ★ indice général de rendu des couleurs CIE 1974 → *indice 42.* R общий индекс цветопередачи МКО 1974. D allgemeiner Farbwiedergabe-Index CIE 1974. E índice general de rendimiento en color CIE 1974. I indice generale di resa dei colori CIE 1974. N algemene kleurweergave-index CIE 1974. P wskaźnik oddawania barw CIE 1974 ogólny. S CIE 1974 allmänna färgåtergivningsindex. (845)
3. **CIE 1974 special colour rendering index** (R_i) : measure of the degree to which the psychophysical colour of a CIE test colour sample illuminated by the test illuminant conforms to that of the same sample illuminated by the reference illuminant, suitable allowance having been made for the state of chromatic adaptation. ★ indice particulier de rendu des couleurs CIE 1974 → *indice 44.* R частный индекс цветопередачи МКО 1974. D spezieller Farbwiedergabe-Index CIE 1974. E índice especial de rendimiento en color CIE 1974. I indice speciale di resa dei colori CIE 1974. N speciale kleurweergave-index CIE 1974. P wskaźnik oddawania barw CIE 1974 szczególny. S CIE 1974 speciella färgåtergivningsindex. (845)
4. **class index** : conventional designation of an accuracy class by a number or symbol. ★ indice de classe → *indice 11.* R обозначение класса точности. D Klassenzeichen. E índice de clase. I indice di classe. N klasse-index. P oznaczenie klasy dokładności. S klassbeteckning. (302,446)
5. **colour rendering index** (R) : measure of the degree to which the psychophysical colour of an object illuminated by the test illuminant conforms to that of the same object illuminated by the reference illuminant, suitable allowance having been made for the state of chromatic adaptation. *Note.* — In German, the term "Farbwiedergabe-Index" is also applied to colour reproduction. ★ indice de rendu des couleurs → *indice 30.* R индекс цветопередачи. D Farbwiedergabe-index. E índice de rendimiento en color. I indice di resa dei colori. N kleurweergave-index. P wskaźnik oddawania barw. S färgåtergivningsindex. (845)
6. **comparative tracking index** (*Syn.* CTI (abbreviation)) : the numerical value of the maximum voltage in volts which a material can withstand without tracking under specified test conditions. ★ indice de résistance au cheminement → *indice 31.* R сравнительный индекс трекингостойкости: СИТ (сокращенно). D Vergleichszahl der Kriechwegbildung: CTI (Abkürzung). E índice de resistencia a la formación de caminos conductores; IRC. I indice di resistenza alla traccia. CTI (abbreviazione). N vergelijkbare kruipstroomvastheid. P wskaźnik porównawczy wytrzymałości na tworzenie ścieżek pełznych. S krypströmsindex (CTI). (212)
7. **complex refractive index** (in a given direction) : a dimensionless complex scalar quantity $\underline{n}$, characteristic of a medium at a given point and in a given direction, when there can exist in the medium a sinusoidal electromagnetic wave whose wave vector $\underline{K}$ has colinear real and imaginary parts K' and K'', in the given direction ; this quantity is defined by the equation :

$$\underline{K} = \vec{K'} + j\,\vec{K''} = \underline{n}\,\frac{\omega}{c_0}\,\vec{u}$$

where ω is the angular frequency, c_0 is the velocity of propagation of electromagnetic waves in vacuum and u is the unit vector in the given direction. *Notes. 1* — For an isotropic medium, the complex refractive index is the square root of the product of the relative complex permittivity and the relative complex permeability. *2* — For each direction in an anisotropic

medium, there are generally two distinct wave vectors and two values of the complex refractive index. ★ indice de réfraction complexe → *indice 27.* D komplexe Brechzahl (in einer gegebenen Richtung). P współczynnik załamania zespolony. (705)

8. **complex refractive index** (of an absorbing, isotropic material) ($\hat{n}(\lambda)$) : quantity defined by the formula

$$\hat{n}(\lambda) = n(\lambda) - i\kappa(\lambda)$$

where $\kappa(\lambda)$ is the spectral absorption index and $i = \sqrt{-1}$. Unit : 1. ★ indice de réfraction complexe → *indice 28.* R комплексный показатель преломления (однородного светопоглощающего вещества). D komplexe Brechzahl (eines absorbierenden, isotropen Materials). E índice de refracción complejo. I indice di rifrazione complesso. N complexe brekingsindex. P współczynnik załamania zespołowy. S komplext brytningsindex. (845)

9. **(dielectric) loss index** : the numerical value of the imaginary part of the relative complex permittivity. ★ indice de pertes (diélectriques) → *indice 20.* R коэффициент диэлектрических потерь. D (dielektrische) Verlustzahl. E índice de pérdidas (dieléctricas). I indice di perdite (dielettriche). N (diëlektrische) verliesfactor. P wskaźnik strat dielektrycznych. S förlusttal. (212)

10. **(dielectric) loss index** : the product of the relative permittivity and the dielectric dissipation factor of an insulating material. ★ indice de pertes (diélectriques) → *indice 21.* R коэффициент (диэлектрических) потерь. D dielektrische Verlustziffer. E índice de pérdidas (dieléctricas). I indice di perdite. N diëlektrische verliesfactor. P wskaźnik strat dielektrycznych. S förlustindex. (841)

11. **directivity index** (*Syn.* directional gain) : → *gain 9*

12. **dose equivalent index** (at a point) (H_i) : the maximum dose equivalent within a 30 cm diameter sphere centred at this point and consisting of material equivalent to soft tissue with a density of 1 g cm^{-3}. ★ indice d'équivalent de dose → *indice 38.* R показатель эквивалентной дозы (в данной точке). D Äquivalentdosis-Index (an einem Punkt). E índice de dosis equivalente (en un punto). I indice di equivalente di dose (in un punto). N index van de dosisequivalent (bij een punt). P wskaźnik równoważnika dawki (w punkcie). S dosekvivalentindex. (881)

13. **equivalent step index profile** : → *profile 3*

14. **ESI refractive index difference** : → *difference 17*

15. **four concentric circle refractive index template** : → *template 2*

16. **graded index fibre** : → *fibre 11*

17. **graded index profile** : → *profile 4*

18. **group index** (N) : the velocity of light in vacuum, divided by the magnitude of the group velocity of the mode. *Notes. 1* — For a plane wave of wavelength λ, it is related thus to the refractive index n :

$$N = n - \lambda \frac{dn}{d\lambda}$$

2 — Each mode has its own group index. ★ indice de groupe → *indice 15.* R групповой показатель преломления. D Gruppenindex. E índice de grupo. I indice (di rifrazione) di gruppo. N groepindex. P współczynnik grupowy modu; wskaźnik grupowy. S gruppindex. (731)

19. **index** (of an indicating device) : the fixed or movable part of the indicating device such as pointer, luminous spot or window, whose position, in relation to a scale, permits the value of the measured quantity to be determined. ★ index → *index 2.* R указатель (отсчетного устройства). D Zeiger. E indicador (de un dispositivo indicador). I indice (di un dispositivo indicatore). N wijzer. P wskazówka. S visare. (301)

20. **index dip** : → *dip 2*

21. **index matching material** : → *material 20*

22. **index of cooperation** : quotient of the factor of cooperation by the constant π. *Note.* — In a drum transmitter or drum receiver, the index of cooperation is equal to the product of the drum diameter and the scanning density. ★ module de coopération → *module 6.* R модуль согласования. D Zusammenarbeitsindex. E módulo de cooperación; índice de cooperación. I indice di cooperazione. N samenwerkingsindex. P moduł współpracy. S kooperationsindex. (721)

23. **installation index** (*Syn.* room index) : → *index 38*

24. **instrument with optical index** : → *instrument 18*

25. **intelligibility (index)** : → *intelligibility 2*

26. **ionospheric index** : a number deduced from ionospheric observations used for determining the monthly average values of certain ionospheric parameters for ionospheric prediction. *Note.* — Various ionospheric indices are in use. ★ indice ionosphérique → *indice 43.* D Ionosphärenindex. P wskaźnik jonosferyczny. (705)

27. **modified refractive index** : the sum of the refractive index n of the air at height h and the ratio of this height to the radius of the Earth a :

$$n + \frac{h}{a}$$

★ indice de réfraction modifié → *indice 29.* D modifizierte Brechzahl. P współczynnik załamania zmodyfikowany. (705)

28. **modulation index** : 1. In angle modulation the peak phase deviation in radians. *Note.* — In angle modulation by a sinusoidal modulating signal, the modulation index is equal to the ratio of the peak frequency deviation to the frequency of the modulating signal. 2. In two-condition frequency shift keying, the ratio of the frequency shift in hertz to the modulation rate in bauds. ★ indice de modulation → *indice 16.* R индекс модуляции. D Modulationsindex. E índice de modulación. I indice di modulazione. N modulatie-index. P wskaźnik modulacji. S moduleringsindex. (702)

29. **modulation index** (in frequency shift modulation) : in two-condition frequency shift keying, the ratio of the frequency shift in hertz to the modulation rate in bauds. ★ indice de modulation → *indice 17.* R индекс модуляции (при частотной модуляции). D Modulationsindex (bei Frequenzumtastung). E índice de modulación. I indice di modulazione. N modulatie-index (bij frequentiemodulatie). P wskaźnik modulacji (w modulacji częstotliwościowej impulsowej). S moduleringsindex. (721)

30. **performance index** : mathematical expression which characterizes the quality of control under specified conditions. ★ fonction de coût → *fonction 18.* R показатель качества. D Güteindex. E función de calidad. I indice di prestazione. N kwaliteitsindex. P wskaźnik jakości. S prestationsfunktion. (351)

31. **power-law index profile** : → *profile 9*

32. **proof tracking index** (*Syn.* PTI (abbreviation)) : the numerical value of the proof voltage in which a material can withstand without tracking under specified test conditions. ★ indice de tenue au cheminement → *indice 37.* R испытательный индекс трекингостойкости; ИИТ (сокращенно). D Prüfzahl der Kriechwegbildung; PTI (Abkürzung). E índice de prueba a la formación de caminos conductores; IPC. I indice di tenuta alla traccia; PTI (abbreviazione). N vereiste kruipstroomvastheid. P wskaźnik probierczy wytrzymałości na tworzenie ścieżek pełznych. S krypströmsindex (PTI). (212)

33. **radiation index** : in decibels, ten times the logarithm to the base ten of the radiation factor. ★ indice de rayonnement → *indice 25.* R показатель излучения. D Abstrahlmaß. E índice de radiación. I indice di radiazione. N stralingsindex. P indeks promieniowania. S strålningsindex. (801)

34. **refractive index** (of a medium, for a monochromatic radiation of wavelength λ in vacuum) ($n(\lambda)$) : ratio of the velocity of the electromagnetic waves in vacuum to the phase velocity of the waves of the monochromatic radiation in the medium. Unit: 1 *Note.* — For isotropic media, this index is equal to the ratio of the sines of the angles of incidence (θ_1) and refraction (θ_2) of a ray passing through the surface separating vacuum and medium: $n(\lambda) = \sin\theta_1/\sin\theta_2$. ★ indice de réfraction → *indice 26.* R показатель преломления (среды для монохроматического излучения с длиной волны λ в вакууме). D Brechzahl (eines Mediums für eine monochromatische Strahlung der Wellenlänge λ im Vakuum); Brechungszahl. E índice de refracción. I indice di rifrazione. N brekingsindex. P współczynnik załamania. S brytningsindex. (702,705,731,845)

35. **refractive index contrast** : → *contrast 14*

36. **refractive index profile** : → *profile 14*

37. **relative temperature index** (*Syn.* RTI (abbreviation)) : the temperature index of a test material obtained from the time which corresponds to the known temperature index of a reference material when both materials are subjected to the

same ageing and diagnostic procedures in a comparative test. ★ indice relatif de température → *indice 45.* R относительный температурный индекс; ОТИ (сокращенно). D relativer Temperaturindex; RTI (Abkürzung). E índice relativo de temperatura; IRT (abreviatura). I indice di temperatura relativo; IRT (abbreviazione). N relatieve temperatuurindex; RTI (afgekort). P wskaźnik temperaturowy względny. S relativt temperaturindex. (212)

38. **room index** (*Syn.* installation index) (*K*) : number representative of the geometry of the part of the room between the working plane and the plane of the luminaires, used in calculation of utilization factor or utilance. *Notes. 1* — Unless otherwise indicated, the room index is given by the formula

$$K = \frac{a \cdot b}{h(a + b)}$$

in which *a* and *b* are the dimensions of the sides of the room and *h* the mounting height, that is the distance between the working plane and the plane of the luminaires. *2* — In British practice, the ceiling index is calculated from the same formula except that *h* is the distance from ceiling to luminaires. *3* — In the USA, the term room cavity ratio is currently used. This is equal to five times the reciprocal of the room index defined by the formula in Note 1. Two supplementary terms are used: ceiling cavity ratio and floor cavity ratio which are derived in the same way as the room cavity ratio except that *h* is respectively the distance from ceiling to luminaires and from floor to working plane. ★ indice du local → *indice 41.* R индекс помещения. D Raum-Index. E índice del local. I indice di locale. N vormindex. P wskaźnik pomieszczenia. S rumsindex. (845)

39. **solar (activity) index** : a number characterizing solar activity, such as : international relative sunspot number, twelve-month running mean sunspot number, monthly mean solar radio-noise flux. ★ indice d'activité solaire → *indice 9.* D Index der Sonnenaktivität. P wskaźnik aktywności słonecznej. (705)

40. **sound reduction index** (*Syn.* transmission loss; sound insulation) : of a partition, for a specified frequency band, difference in decibels between the average sound pressure levels in the reverberant source and receiving rooms, plus ten times the logarithm to the base ten of the ratio of the area of the common partition to the total Sabine absorption in the receiving room. ★ indice d'affaiblissement → *indice 10.* R индекс снижения звука; потери передачи звука; звукоизоляция. D Schalldämm-Maß. E índice de reducción acústica. I potere fonoisolante. N geluidsisolatie. P indeks tłumienia akustycznego. S reduktionstal. (801)

41. **spectral absorption index** (of a heavily absorbing material) ($\kappa(\lambda)$) : quantity defined by the formula

$$\kappa(\lambda) = \frac{\lambda}{4\pi} a(\lambda)$$

where $a(\lambda)$ is the spectral line ar absorption coefficient. Unit: l. ★ indice d'absorption spectral → *indice 7.* R спектральный главный показатель поглощения (сильно поглощающего вещества). D spektraler Absorptionsindex (eines stark absorbierenden Materials). E índice de absorción espectral. I indice spettrale di assorbimento. N spectrale absorptie-index. P współczynnik pochłaniania widmowy. S absorptionsindex. (845)

42. **step index fibre** : → *fibre 26*
43. **step index profile** : → *profile 16*
44. **temperature index** (*Syn.* TI (abbreviation)) : the number corresponding to the temperature in degrees Celsius derived from the thermal endurance relationship at a given time, normally 20 000 hours. ★ indice de température → *indice 36.* R температурный индекс; ТИ (сокращенно). D Temperaturindex; TI (Abkürzung). E índice de temperatura; IT (abreviatura). I indice di temperatura; IT (abbreviazione). N temperatuurindex; TI (afgekort). P wskaźnik temperaturowy. S temperaturindex. (212)

indexing

1. **indexing mechanism** : → *mechanism 8*

indicated

1. **indicated value** : → *value 13*

indicating

1. **call indicating device** : → *device 14*
2. **indicating circuit** : → *circuit 90*
3. **indicating device** : → *device 30*
4. **indicating device** : → *device 31*
5. **indicating fuse** : → *fuse 5*
6. **indicating (measuring) instrument** : → *measuring instrument 9*
7. **position indicating device** : → *device 45*

indication

1. **audible indications** : any audible information, such as tones or spoken messages, provided in real time to the user of a telephone network, through the receiver of his telephone set, for example about the setting up, holding and release of his call. ★ indications audibles → *indication 5.* D Ansagen; Hörtöne. P informacje słuchowe. (715)
2. **automatic date and time indication** : automatic indication by the network of date and time of the commencement of a call either to the calling terminal or to both the calling and the called terminals. ★ indication automatique de date et d'heure → *indication 1.* R автоматическое указание даты и времени. D automatische Datums- und Zeitangabe. E identificación automática de fecha y hora. I indicazione di dati e ora. N automatische datum-en tijdaanduiding. P automatyczne wskazanie daty i godziny. S automatisk tidangivning. (721)
3. **indication of a measuring instrument** : the value of the measured quantity indicated by the measuring instrument. *Notes. 1* — This term can be applied most particularly to an indicating measuring instrument; however, when no ambiguity is possible, it can also be applied to the information displayed by a recording measuring instrument. *2* — The concept of the indication of a measuring instrument also refers to material measures. *3* — The term "indication" also means a presumed indication, obtained by interpolation of the position of the index of the instrument between adjacent scale marks. *4* — The value of the measured quantity can be directly indicated in units of that quantity or in conventional units. In this latter case, the direct indication must be multiplied by the constant of the instrument. ★ indication d'un instrument de mesurage → *indication 4.* R показание средства измерения. D Messwert. E indicador de un aparato de medida. I indicazione di uno strumento di misura. N aanwijzing van een meetinstrument. P wskazanie przyrządu pomiarowego. S visning (hos mätinstrument). (301)
4. **indication of charge** : the indication by the network to the paying terminal of the charge of a call prior to the release of the paying terminal or by recall at a convenient time. *Note.* — This information may be provided automatically or on demand. ★ indication de taxe → *indication 3.* R указание платы. D Gebührenangabe. E indicación de precio. I indicazione dell'addebito. N kostenopgaaf. P wskazanie opłaty. S prisuppgift. (721)
5. **indication of duration** : the indication by the network to the paying terminal of the chargeable time of a call prior to the release of the paying terminal or by recall at a convenient time. *Note.* — This information may be provided automatically or on demand. ★ indication de durée → *indication 2.* R указание длительности. D Angabe der Verbindungsdauer. E indicación de duración. I indicazione di durata. N tijdsduuraanduiding. P wskazanie czasu trwania połączenia. S varaktighetsuppgift. (721)

indicator

1. **air contamination indicator** : an indicator designed to detect the presence of contamination by radioactive aerosols, vapours or gas in air. ★ signaleur de contamination atmosphérique → *signaleur 2.* R индикатор загрязненности воздуха. D Luftkontaminationsanzeiger. E indicador de radiactividad en el aire. I segnalatore di contaminazione atmosferica. N luchtbesmettingsindicator. P wskaźnik skażeń powietrza. S luftaktivitetsindikator. (392)
2. **alarm indicator** : an indicator which gives a visible and/or audible warning upon the appearance of one or more faults to advise the reactor operator that his attention is required. ★ signaleur de défauts → *signaleur 3.* R индикатор предупредительной сигнализации. D Gefahrenanzeige. E indicador de alarma. I segnalatore di allarme. N alarmindicator. P wskaźnik stanu alarmowego. S larmindikator. (392)
3. **character indicator tube** : → *tube 14*

4. **direction indicator light** : → *light 11*
5. **electrolyte level indicator** : a device to indicate the level of the electrolyte in a cell. ★ indicateur de niveau → *indicateur 10.* R указатель уровня электролита. D Elektrolytstand-Anzeiger. E indicador de nivel del electrolito. I indicatore di livello. N peilindicator; niveauwijzer. P wskaźnik poziomu elektrolitu. S nivåindikator. (486)
6. **engagement indicators** : marks which indicate when a connector is fully engaged. ★ indicateurs d'accouplement → *indicateur 22.* R указатели сочленения. D Stellungsanzeiger. E indicadores de acoplamiento. I indicatore di accoppiamento. N koppelingindicatoren. P wskaźnik sprzężenia (złącza). S hopkopplingsmärken. (581)
7. **glow indicator tube** : → *tube 39*
8. **image quality indicator** (*Syn.* IQI (abbreviation); penetrameter) : a device for measuring penetrating power of a beam of X-radiation or other penetrating radiation. ★ pénétramètre → *pénétramètre 1.* R измеритель проникающей способности. D Penetrameter. E penetrametro. I indicatore della qualità di un fascio; penetrametro. N beeldkwaliteitaanduider; penetrometer. P penetrametr. S penetrameter. (881)
9. **indicator** (*Syn.* indicating device) : → *device 31*
10. **indicator** : a flag, pointer or visual sign of any kind indicating the state or performance of its associated apparatus. ★ voyant → *voyant 1.* R указатель. D Schauzeichen. E indicador. I indicatore. N signalering. P wskaźnik optyczny. S indikeringsdon. (811)
11. **indicator light** : → *light 19*
12. **message alignment indicator** : information added to a signal message within the signalling terminals to identify the boundaries of that message during its transfer from the user part concerned to the message transfer part or vice versa. ★ indicateur d'alignement de message → *indicateur 8.* R индикатор границ сообщения. D ..... E indicador de alineación de mensaje. I indicatore di allineamento del messaggio. N ..... P wskaźnik uszeregowania wiadomości. S meddelandeavgränsare. (714)
13. **meter with maximum demand indicator** : → *meter 33*
14. **neon indicator tube** : → *tube 58*
15. **on-off level indicator** (ionizing radiation) : an indicator that includes an ionizing radiation source and a detector for determining, in the case of a material contained in an enclosure, the absence or the presence of this material on the path between source and detector. ★ signaleur de dépassement de niveau → *signaleur 4.* R радиоизотопный индикатор превышения уровня. D Grenzfüllstandsmeßgerät (mittels ionisierender Strahlung). E indicador de rebase de nivel (por radiaciones ionizantes). I segnalatore di livello (per mezzo di radiazioni ionizzanti). N aan/uit niveau-indicator (voor ioniserende straling). P wskaźnik poziomu izotopowy. S nivåvakt (med joniserande strålning). (392)
16. **phase sequence indicator** : an instrument intended to indicate, on a polyphase system, the sequence in which the instantaneous voltages of the phase conductors reach their maximum values. ★ indicateur d'ordre des phases → *indicateur 18.* R фазоуказатель. D Phasenfolgeanzeiger. E indicador de secuencia de fases. I strumento indicatore della sequenza delle fasi. N fasenverklikker. P wskaźnik kolejności faz. S fasföljdsindikator. (302)
17. **polarity indicator** : an instrument intended to indicate the polarity of one conductor with reference to another. ★ indicateur de polarité → *indicateur 12.* R индикатор полярности. D Polaritätsanzeiger. E indicador de polaridad. I strumento indicatore di polarità. N poolverklikker. P wskaźnik biegunowości. S polaritetsindikator. (302)
18. **prospecting audio-radiation indicator** : a portable prospecting radiation indicator that provides an audible indication of radiation flux density. ★ audio-signaleur de prospection → *audio-signaleur 1.* R поисковый звуковой индикатор. D Lagerstättensuchgerät mit akustischer Anzeige. E indicador acústico de prospección. I audio-segnalatore per prospezione. N akoestische indicator voor stralingsverkenning. P wskaźnik akustyczny radiometryczny (do poszukiwań geologicznych). S akustisk indikator för (radiometrisk) prospektering. (392)
19. **proximity indicator** (ionizing radiation) : an indicator including an ionizing radiation source and a radiation detector, designed to give an estimate of the relative proximity of two objects, by using the direct or scattered radiation. ★ signaleur de proximité → *signaleur 5.* R радиоизотопный индикатор расстояния. D Näherungsanzeiger (mittels ionisierender Strahlung). E indicador de proximidad (por radiación ionizante). I segnalatore di prossimità (per mezzo di radiazione ionizzante). N nabijheidsindicator (berustend op ioniserende straling). P wskaźnik odległości izotopowy. S radiometrisk närhetsindikator. (392)
20. **(radiation) indicator** : an assembly for quickly giving, by means of the variation of a signal usually visual or audible a coarse estimation of a quantity connected with ionizing radiation. ★ signaleur (de rayonnement) → *signaleur 6.* R индикатор ионизирующего излучения. D (Strahlungs-)Indikator. E indicador (de radiación). I indicatore (di radiazione). N stralingsverkenner; indicator; stralingsaanwijzer. P wskaźnik promieniowania. S strålningsindikator. (391,881)
21. **recording level indicator** : a device indicating signal level when recording. ★ indicateur de niveau d'enregistrement → *indicateur 11.* R индикатор уровня записи. D Aussteuerungsmesser. E indicador de nivel de registro. I indicatore di livello di registrazione. N opneemniveaumeter. P wskaźnik wysterowania. S nivåindikator för inspelning; utstyrningsinstrument. (806)
22. **service indicator** : information within a signal unit used to identify the user to which a signal message belongs. ★ indicateur de service → *indicateur 15.* R служебный индикатор. D Dienstkennung. E indicador de servicio. I indicatore di servizio. N dienstaanwijzer. P wskaźnik użytkownika. S användarindikator. (714)
23. **signal unit indicator** : information within a signal unit used to identify the type of signal unit. ★ indicateur d'unité de signalisation → *indicateur 13.* R указатель сигнальной единицы. D Zeichengabe-Element-Indikator. E indicador de unidad de señalización. I indicatore di unità di segnalazione. N signaaleenheid-type-indicator. P wskaźnik jednostki sygnału. S indikator. (714)
24. **standing-wave indicator** (*Syn.* standing-wave meter) : → *meter 56*
25. **tap position indicator** : an electrical, mechanical or electromechanical device for indicating the tap position of the tap-changer. ★ indicateur de position de prise → *indicateur 14.* R указатель положения. D Stellungsanzeige. E indicador de posición de toma. I indicatore della posizione di presa. N standaanwijzer. P wskaźnik pozycji zaczepowej. S lägesindikator. (421)
26. **tap-change in progress indicator** : a device indicating that the motor-drive mechanism is operating. ★ indicateur de changement de prise en cours → *indicateur 9.* R указатель действия устройства переключения. D Laufanzeige. E indicador de cambio de toma en curso. I indicatore di commutazione in corso. N loopverklikker. P wskaźnik działania napędu silnikowego. S indikeringsdon för pågående manöver. (421)
27. **visual approach slope indicator** : aeronautical ground light, or system of lights, designed to indicate the correct angle of descent to an aircraft making an approach to land. ★ indicateur visuel de pente d'approche → *indicateur 21.* R глиссадный огонь. D Gleitwinkelfeuer; Gleitwinkelbefeuerung. E luces de pendiente de aproximación. I indicatore visivo di pendenza di avvicinamento. N visuele glijpadindicator. P światło kąta zbliżania. S visuell glidbaneindikator. (845)
28. **volume indicator** (*Syn.* volume meter) : → *meter 74*

indicatrix

1. **indicatrix of diffusion** : → *diffusion 12*
2. **scattering indicatrix** (*Syn.* indicatrix of diffusion) : → *diffusion 12*

indirect

1. **indirect a.c.(power) convertor** : → *convertor 28*
2. **indirect acting instrument** : → *instrument 9*
3. **indirect actinic effect** : → *effect 33*
4. **indirect address** : → *address 11*
5. **indirect arc furnace** : → *arc furnace 38*
6. **indirect arc heating** : → *heating 37*
7. **indirect calculation of efficiency** : → *efficiency 26*
8. **indirect commutation** : → *commutation 18*

9. **indirect contact** : → *contact 75*
10. **indirect control** : → *control 115*
11. **indirect d.c. convertor** : → *convertor 29*
12. **indirect electric heating** : → *heating 38*
13. **indirect entry** : → *entry 2*
14. **indirect flux** : → *flux 13*
15. **indirect heating** : → *heating 39*
16. **indirect induction heating** (*Syn.* induction vessel heating) : → *heating 43*
17. **indirect lighting** : → *lighting 11*
18. **indirect lightning strike** : → *strike 2*
19. **indirect (method of) measurement** : → *measurement 6*
20. **indirect over-current release** : → *release 10*
21. **indirect ray path** : → *path 7*
22. **indirect reading pocket dosemeter** : → *dosemeter 10*
23. **indirect reading pocket exposure meter** : → *exposure meter 6*
24. **indirect resistance furnace** (*Syn.* indirect resistance oven) : → *oven 3*
25. **indirect resistance heating** : → *heating 41*
26. **indirect resistance kiln** (*Syn.* indirect resistance oven) : → *oven 3*
27. **indirect resistance oven** : → *oven 3*
28. **indirect wave** : → *wave 25*

indirectly

1. **indirectly heated cathode** : → *cathode 24*
2. **indirectly ionizing particle** : → *particle 7*
3. **indirectly ionizing particles** (*Syn.* indirectly ionizing radiation) : → *radiation 34*
4. **indirectly ionizing radiation** : → *radiation 34*
5. **indirectly irradiated area** : → *area 22*

individual

1. **degree of individual distortion** : → *degree 7*
2. **individual axle drive locomotive** : → *locomotive 3*
3. **individual coach lighting** : → *lighting 12*
4. **individual contactor equipment** : → *equipment 44*
5. **individual drive** : → *drive 15*
6. **individual line** (*Syn.* exclusive exchange line) : → *line 34*
7. **individual reception** : → *reception 3*

individually

1. **individually screened cable** : → *cable 34*

indoor

1. **indoor bushing** : → *bushing 9*
2. **indoor post insulator** : → *insulator 11*
3. **indoor substation** : → *substation 10*
4. **indoor switchgear and controlgear** : → *switchgear 2*

indoor-immersed

1. **indoor-immersed bushing** : → *bushing 10*

induced

1. **artificially induced actinic effect** : → *effect 2*
2. **induced control voltage** : → *voltage 87*
3. **induced magnetic anisotropy** : → *anisotropy 1*
4. **induced radioactivity** : → *radioactivity 2*
5. **induced voltage** : → *voltage 88*

inductance

1. **commutation inductance** : the resulting inductance in the commutation circuit. ★ inductance de commutation → *inductance 7.* **R** индуктивность контура коммутации. **D** Kommutierungsinduktivität. **E** inductancia de conmutación. **I** induttanza di commutazione. **N** commutatie-inductiviteit. **P** indukcyjność komutacyjna. **S** kommuteringsinduktans. (551)
2. **core inductance parameter** (*Syn.* core factor C_1) : → *factor 29*
3. **inductance** (of an ideal inductor) : the quotient of the voltage by the time derivative of the current. ★ inductance (propre) → *inductance 19.* **R** индуктивность (идеальной индуктивной катушки). **D** Induktivität (einer idealen Spule). **E** inductancia (de una inductancia ideal). **I** induttanza (di un induttore ideale). **N** zelfinductie (van een ideale spoel). **P** indukcyjność (induktora idealnego). **S** induktans (hos en ideal induktor). (131)
4. **inductance factor** : → *factor 91*
5. **motional inductance** (of a piezoelectric resonator) (L_1) : the inductance of the motional or series arm of the equivalent circuit. ★ inductance dynamique → *inductance 16.* **R** динамическая индуктивность (пьезоэлектрического резонатора). **D** dynamische Induktivität (eines piezoelektrischen Resonators). **E** inductancia dinámica (de un resonador piezoeléctrico). **I** induttanza dinamica (di un risuonatore piezoelettrico). **N** dynamische zelfinductie. **P** indukcyjność dynamiczna. **S** dynamisk induktans. (561)
6. **mutual inductance** : the quotient of the magnetic flux induced in one circuit by the current in another circuit which produces that flux. ★ inductance mutuelle → *inductance 18.* **R** взаимная индуктивность. **D** gegenseitige Induktivität; Gegeninduktivität. **E** inductancia mutua. **I** mutua induttanza. **N** wederkerige inductie. **P** indukcyjność wzajemna. **S** ömsesidig induktans. (131)
7. **saturation inductance** : that inductance of a power winding which corresponds to small flux variations within the saturated range of the magnetizing curve. ★ inductance de saturation → *inductance 14.* **R** индуктивность насыщения. **D** Sättigungsinduktivität. **E** inductancia de saturación. **I** induttanza di saturazione. **N** verzadigingsinductiviteit. **P** indukcyjność nasyceniowa. **S** mättningsinduktans. (431)
8. **temperature coefficient of inductance** : → *coefficient 72*

induction

1. **crucible of coreless induction furnace** : → *crucible 3*
2. **effective induction area of the control current loop** : → *area 17*
3. **effective induction area of the output loop** : → *area 18*
4. **electric induction** (phenomenon) : a phenomenon modifying the charge distribution of a body in an electric field. ★ influence électrique → *influence 10.* **R** электростатическая индукция. **D** elektrische Influenz. **E** inducción eléctrica (fenómeno de). **I** induzione elettrica (fenomeno). **N** influentie; elektrische inductie. **P** indukcja elektryczna. **S** elektrisk induktion. (121)
5. **electric induction braking** : → *braking 25*
6. **electromagnetic induction** : the phenomenon that produces an induced voltage. ★ induction électromagnétique → *induction 19.* **R** электромагнитная индукция. **D** elektromagnetische Induktion. **E** inducción electromagnética. **I** induzione elettromagnetica. **N** elektromagnetische inductie. **P** indukcja elektromagnetyczna. **S** elektromagnetisk induktion. (121)
7. **indirect induction heating** (*Syn.* induction vessel heating) : → *heating 43*
8. **induction channel furnace** : → *furnace 23*
9. **induction coil** : → *coil 25*
10. **induction coupling** : → *coupling 29*
11. **induction crucible furnace** : → *furnace 24*
12. **induction field (region)** (*Syn.* reactive near field (region)) : → *near-field 8*
13. **induction frequency convertor** : → *convertor 30*
14. **induction furnace** : → *furnace 25*
15. **induction furnace cast lining** : → *lining 3*
16. **induction furnace rammed lining** : → *lining 4*
17. **induction furnace susceptor lining** : → *lining 5*
18. **induction generator** : → *generator 21*
19. **induction heater** : → *heater 10*
20. **induction heating** : → *heating 42*
21. **induction holding furnace** : → *furnace 29*
22. **induction instrument** : → *instrument 10*
23. **induction "lift off coil" crucible melting furnace** : → *furnace 30*
24. **induction luminaire** : → *luminaire 9*
25. **induction machine** : → *machine 17*
26. **induction melting furnace** : → *furnace 31*
27. **induction meter** : → *meter 26*
28. **induction period** : → *period 15*

29. **induction platen heater** : → *heater 11*
30. **induction vessel heating** : → *heating 43*
31. **magnetic induction** (*Syn.* magnetic flux density) : → *flux density 9*
32. **mutual induction** : the electromagnetic induction in an electrical circuit due to the current flowing in another circuit. ★ induction mutuelle → *induction 23.* R взаимная индукция. D gegenseitige Induktion; Gegeninduktion. E inducción mutua. I mutua induzione. N wederkerige inductie. P indukcja wzajemna. S ömsesidig induktion. (121)
33. **surface induction** : the flux density in free space normal to the surface of the magnetic medium. ★ induction superficielle → *induction 25.* R поверхностная индукция. D Oberflächeninduktion. E inducción superficial. I induzione superficiale. N oppervlakte-inductie. P indukcja powierzchniowa. S luftgapsflödestäthet. (806)

induction motor

1. **brushless wound-rotor induction motor** : a wound-rotor induction motor in which the ends of the secondary winding are directly connected with an incorporated starting device. ★ moteur à démarreur incorporé → *moteur 32.* R бесщеточный асинхронный двигатель с фазным ротором. D bürstenloser Induktionsmotor mit gewickeltem Läufer. E motor con arrancador incorporado. I motore con avviatore incorporato, a rotore avvolto senza spazzole. N borstelloze inductiemotor met bewikkelde rotor. P silnik indukcyjny z wbudowanym rozrusznikiem bezszczotkowym. S asynkronmotor med startkopplare. (411)
2. **cage induction motor** (UK) (*Syn.* squirrel cage induction motor (USA)) : an induction motor in which a primary winding on one member, usually the stator, is connected to the power source, and a secondary cage-winding on the other member, usually the rotor, carries induced current. ★ moteur à induction à cage → *moteur à induction 3.* R асинхронный двигатель с короткозамкнутым ротором. D Käfigläufer-Induktionsmotor. E motor de inducción de jaula. I motore a induzione a gabbia. N kooiankermotor; kortsluitmotor (deze term wordt ontraden.). P silnik klatkowy. S kortsluten asynkronmotor. (411)
3. **induction motor** : an induction machine for use as a motor. ★ moteur à induction → *moteur à induction 1.* R асинхронный двигатель. D Induktionsmotor. E motor de inducción. I motore a induzione. N inductiemotor; asynchrone motor. P silnik indukcyjny. S asynkronmotor. (411)
4. **linear induction motor** : a linear motor whose operation is asynchronous. ★ moteur linéaire asynchrone → *moteur 87.* R линейный асинхронный двигатель. D Asynchron-Linearmotor. E motor lineal asíncrono. I motore lineare asincrono. N lineaire inductiemotor; lineaire assynchroonmotor. P silnik liniowy asynchroniczny. S linjär asynkronmotor. (811)
5. **repulsion induction motor** : a repulsion motor with an additional rotor cage winding. ★ moteur à induction et répulsion → *moteur à induction 6.* R асинхронный репульсионный двигатель. D Repulsions-Induktionsmotor. E motor de inducción y repulsión. I motore a induzione e repulsione. N repulsiemotor met kooi(wikkeling); repulsie-inductiemotor. P silnik indukcyjno-repulsyjny. S burlindad repulsionsmotor. (411)
6. **repulsion start induction motor** : a repulsion motor in which the commutator bars are short-circuited or otherwise connected at an appropriate speed to give the equivalent of a cage winding. ★ moteur à induction à démarrage par répulsion → *moteur à induction 4.* R асинхронный двигатель с репульсионным пуском. D Induktionsmotor mit Repulsionsanlauf. E motor de inducción de arranque por repulsión. I motore a induzione, con avviamento a repulsione. N repulsiemotor met kortsluiter. P silnik indukcyjny z rozruchem repulsyjnym. S enfasmotor med repulsionsstart. (411)
7. **salient pole synchronous induction motor** : a salient pole synchronous motor having a coil winding for starting purposes embedded in the pole shoes. The terminal leads of this coil winding are connected to collector rings. ★ moteur asynchrone synchronisé à pôles saillants → *moteur 68.* R явнополюсный синхронный двигатель с фазной пусковой обмоткой. D synchronisierter Asynchronmotor mit Schenkelpolen. E motor asíncrono sincronizado de polos salientes. I motore asincrono sincronizzato a poli salienti. N gesynchroniseerde asynchrone motor met uitspringende polen. P silnik indukcyjny synchronizowany wydatnobiegunowy. S ..... (411)
8. **squirrel cage induction motor** (*Syn.* cage induction motor) : → *induction motor 2*
9. **synchronous induction motor** : a cylindrical rotor synchronous motor having a secondary coil winding similar to that of a wound rotor induction motor. This winding is used for both starting and excitation purposes. ★ moteur asynchrone synchronisé → *moteur 67.* R синхронизированный асинхронный двигатель. D synchronisierter Asynchronmotor. E motor asíncrono sincronizado. I motore asincrono sincronizzato. N gesynchroniseerde asynchrone motor. P silnik indukcyjny synchronizowany z wirnikiem cylindrycznym. S autosynkronmotor. (411)
10. **wound-rotor induction motor** : an induction motor in which a primary winding on one member, usually the stator, is connected to the power source, and a secondary polyphase coil-winding on the other member, usually the rotor, carries induced current. *Note.* — The terminal leads of the rotor windings can be short-circuited for the running condition. Unless otherwise specified, this motor will usually have collector rings. ★ moteur à induction à rotor bobiné → *moteur à induction 5.* R асинхронный двигатель с фазным ротором. D Induktionsmotor mit gewickeltem Läufer. E motor de inducción de rotor bobinado. I motore a induzione a rotore avvolto. N inductiemotor met bewikkelde rotor. P silnik indukcyjny o uzwojonym wirniku. S asynkronmotor med faslindad rotor. (411)

inductive

1. **cascade (inductive) voltage transformer** : → *transformer 18*
2. **inductive** : applies to a device or circuit in which, under given conditions, the predominant quantity is inductance. ★ inductif → *inductif 2.* R индуктивный. D induktiv. E inductivo. I induttivo. N inductief. P indukcyjny. S induktiv. (151)
3. **(inductive) coupling factor of two circuits** : → *factor 92*
4. **inductive direct voltage regulation** : → *regulation 5*
5. **inductive shunt** : → *shunt 2*

inductor

1. **core type inductor** : an inductor assembly which consists of a laminated iron core one limb of which carries one or two induction coil(s). The core passes through a liquid metal loop which effects a secondary of a transformer. ★ inducteur à noyau → *inducteur 7.* R индуктор с сердечником. D Induktor eines Rinnenofens. E inductor de núcleo. I induttore a nucleo. N inductor met blikpakket. P wzbudnik rdzeniowy. S rännінduktor. (841)
2. **crucible furnace inductor coil** : → *coil 14*
3. **cylindrical inductor** (*Syn.* solenoid inductor) : → *inductor 22*
4. **earthing inductor** (*Syn.* grounding inductor (USA)) : an inductor connected in series with the earthing conductor of an appliance. ★ inductance de (mise à la) terre → *inductance 11.* R заземляющая катушка индуктивности. D Erdinduktivität. E inductancia de tierra. I induttanza di (messa a) terra. N aardingsspoel. P cewka uziemiająca. S jordledarespole. (161)
5. **ferrite inductor** : an inductor in which a ferrite section is positioned to concentrate magnetic flux in order to localize the induced current in a precise zone of the workpiece. ★ inducteur à ferrite → *inducteur 6.* R индуктор с ферритовым магнитопроводом. D Heizinduktor mit ferromagnetischem Kern. E inductor de ferrita. I induttore con (nucleo di) ferrite. N inductor met ferrietkern. P wzbudnik rdzeniowy ferrytowy. S ferritinduktor. (841)
6. **grounding inductor** (*Syn.* earthing inductor) : → *inductor 4*
7. **heating inductor** (*Syn.* work coil) : a component of an induction heating work station, carrying an alternating current and designed to create the magnetic field which induces currents in the workpiece. ★ inducteur de chauffage → *inducteur 10.* R нагревательный индуктор; рабочая катушка. D Heizinduktor. E inductor de calentamiento. I induttore di riscaldamento; bobina induttrice. N inductor; werkspoel. P wzbudnik (grzejny). S värmningsinduktor. (841)
8. **ideal inductor** : linear 2-terminal circuit element for which the instantaneous voltage is proportional to the time derivative of the current. ★ inductance idéale → *inductance 17.*

R идеальная катушка индуктивности. D ideale Spule. E inductancia ideal. I induttore ideale. N ideale spoel. P induktor idealny; cewka indukcyjna idealna. S ideal induktor. (131)

9. **inductor** : a device used because of its inductance. ★ bobine d'inductance → *bobine d'inductance 1.* R индуктивная катушка. D induktives Bauelement. E bobina de inductancia. I induttore. N (inductie)spoel. P cewka indukcyjna; induktor. S induktor; (induktans)spole. (151,811)
10. **inductor assembly channel furnace** : → *furnace 32*
11. **inductor assembly crucible furnace** : → *furnace 33*
12. **inductor coil earth leakage protection** : → *protection 20*
13. **inductor frequency convertor** : → *convertor 31*
14. **inductor generator** : → *generator 22*
15. **inductor machine** : → *machine 18*
16. **inductor type synchronous motor** : → *motor 39*
17. **internal inductor** : a heating inductor formed to a shape generally that of a hollow workpiece that requires to be heated internally. ★ inducteur interne → *inducteur 15.* R внутренний индуктор. D Inneninduktor. E inductor interno. I induttore interno. N inwendige inductor. P wzbudnik wewnętrzny. S inre induktor. (841)
18. **loop inductor** : a single turn work coil surrounding the workpiece. ★ inducteur boucle → *inducteur 8.* R одновитковый индуктор. D Schleifeninduktor. E inductor en bucle. I induttore ad anello. N eenwindingsinductor. P wzbudnik pętlowy. S induktorslinga. (841)
19. **pancake inductor** : a coil constitued of one or several spirals situated on the same plane and intended for surface heating of flat pieces. ★ inducteur galette → *inducteur 14.* R плоскоспиральный индуктор. D Flachspule. E inductor plano. I induttore piatto. N platte inductor; pannekoekspoel. P wzbudnik płaski. S pannkakasspole. (841)
20. **series inductor** : inductor connected in series with the voltage circuit of a measuring instrument in order to extend its effective range. ★ inductance additionnelle → *inductance 5.* R добавочная катушка индуктивности. D Reiheninduktivität. E inductancia adicional. I induttore addizionale. N voorschakelzelfinductie. P induktor szeregowy. S förkopplingsinduktor. (301)
21. **smoothing inductor** : an inductor designed and used to reduce the alternating component of a pulsating current. ★ inductance de lissage → *inductance 10.* R сглаживающий дроссель. D Glättungsdrossel. E inductancia de alisamiento. I induttore di livellamento. N afvlaksmoorspoel. P dławik; induktor wygładzający. S glättningsspole. (151,811)
22. **solenoid inductor** (*Syn.* cylindrical inductor; spiral inductor) : a multi-turn heating inductor surrounding the workpiece in the zone to be heated. ★ inducteur solénoïde → *inducteur 17.* R соленоидный индуктор; цилиндрический индуктор; спиральный индуктор. D Zylinderspule. E inductor solenoide; inductor cilindrico; inductor espiral. I induttore a solenoide; induttore cilindrico; induttore a spirale. N solenoïdevormige inductor; cilindrische inductor; spiraalvormige inductor. P wzbudnik solenoidalny. S solenoidinduktor. (841)
23. **spiral inductor** (*Syn.* solenoid inductor) : → *inductor 22*

industrial

1. **industrial electro-heat** : → *electro-heat 6*
2. **industrial locomotive** : → *locomotive 4*
3. **industrial tariff** : → *tariff 14*

inelastic

1. **inelastic collision** : → *collision 10*
2. **inelastic scattering** : → *scattering 15*
3. **inelastic scattering cross-section** : → *cross-section 17*
4. **radiative inelastic scattering** : → *scattering 20*
5. **radiative inelastic scattering cross-section** : → *cross-section 22*
6. **thermal inelastic scattering** : → *scattering 40*
7. **thermal inelastic scattering cross-section** : → *cross-section 28*

inequality

1. **chrominance-luminance delay inequality** : difference in transmission delay of chrominance and luminance signal which results in the spilling of colour to left or right of the area of corresponding luminance. ★ retard chrominance-luminance → *retard 21.* R расхождение во времени сигналов яркости и цветности. (723)

inert

1. **inert atmosphere** : → *atmosphere 7*

inertance

1. **inertance** (*Syn.* acoustic mass) : → *mass 1*

inertia

1. **inertia** : that property of matter by virtue of which any material body continues in its existing state of movement or rest, in the absence of an external force. ★ inertie → *inertie 4.* R инерция. D Trägheit. E inercia. I inerzia. N traagheid. P bezwładność; inercja. S tröghet. (111)
2. **inertia constant** : → *constant 23*
3. **inertia storage vehicle (by a flywheel)** : → *vehicle 8*
4. **moment of inertia** : → *moment 6*

infinite

1. **infinite bus** : → *bus 8*

infinitesimal

1. **infinitesimal dipole** (*Syn.* hertzian (electric) dipole) : → *dipole 10*

influence

1. **influence coefficient** : → *coefficient 28*
2. **influence quantity** : → *quantity 12*
3. **variation (due to influence quantity)** : → *variation 5*

influencing

1. **extreme range of an influencing factor** : → *range 23*
2. **extreme range of an influencing quantity** : → *range 24*
3. **influencing factor** : → *factor 93*
4. **influencing quantity** : → *quantity 13*
5. **nominal range of an influencing factor** : → *range 46*
6. **nominal range of an influencing quantity** : → *range 47*
7. **reference conditions of influencing quantities and factors** : → *condition 22*
8. **reference value of an influencing factor** : → *value 50*
9. **reference value of an influencing quantity** : → *value 51*

information

1. **address (information)** : → *address 5*
2. **binary state information** : monitored information of the status of operational equipment which is characterized by one of two states, for example on/off. ★ information binaire d'état → *information 7.* R двухпозиционная информация. D binär dargestellte Zustandsinformation. E información binaria de estado. I informazione di stato binaria. N binaire toestandsinformatie. P informacja o stanie binarnym. S binär statusinformation. (371)
3. **double-point information** : monitored information represented by two bits characterizing two determined states and two indeterminate states of operational equipment. *Example :* 10 and 01 represent determined states ; 00 and 11 represent indeterminate states. ★ information de signalisation double → *information 14.* R двухэлементная информация. D Doppelmeldung. E información de señalización doble. I informazione doppia. N dubbele toestandsinformatie. P informacja dwubitowa. S dubbelindikering; dubbel binär information. (371)
4. **equipment failure information** : information indicating failure of telecontrol equipment. ★ information de défaut → *information 11.* R информация об отказе аппаратуры. D Gerätefehlermeldung. E información de fallo de equipo. I allarme guasto apparato. N apparatuurfoutinformatie. P informacja o uszkodzeniu. S utrustningsfelsmeddelande. (371)
5. **error correction by information feedback and repetition** : → *correction 10*
6. **event information** : monitored information on the change of state of an operational equipment. ★ information de changement d'état → *information 10.* R информация об изменении состояния. D Ereignismeldung. E información de cambio de estado. I informazione di evento. N toestandswijzigingsinformatie. P informacja o zmianie stanu. S händelseinformation; ändringsinformation. (371)

7. **faulty state information** : monitored information characterizing an indeterminate state of operational equipment which state lasts longer than a specified time. ★ information d'anomalie d'état → *information 9.* R информация об ошибочном состоянии. D Stellungsfehler-Meldung. E información de estado de defecto. I informazione di allarme. N fouttoestandsinformatie. P informacja o anomalii. S fellägesindikering; felstatusinformation. (371)
8. **fleeting information** (*Syn.* transient information) : monitored information on a condition that may persist for a time which is so short that reliable detection and transmission requires storage in the input facility of the telecontrol equipment. ★ information fugitive → *information 20.* R информация о кратковременном состоянии. D Kurzzeitmeldung. E información fugitiva. I informazione fuggitiva; informazione transitoria. N transiënte informatie; vluchtige informatie. P informacja ulotna. S övergående indikering; transientindikering. (371)
9. **incremental information** : monitored information on the alteration of a value by one or more units. *Note.* — Sometimes this alteration may be only in one direction e.g. for counting purposes. In other cases the alteration may be in two directions, e.g. higher/lower, forward/backward, left/right, etc. ★ information incrémentale → *information 21.* R информация о приращении. D Inkrementmeldung. E información incremental. I informazione di tendenza. N stapsgewijze informatie. P informacja o zmianie wielkości. S inkremental information; stegінformation. (371)
10. **information** : intelligence or knowledge capable of being represented in forms suitable for communication, storage or processing. *Note.* — Information may be represented for example by signs, symbols, pictures or sounds. ★ information → *information 6.* R информация. D Information. E información. I informazione. N informatie. P wiadomość; informacja. S information. (701,704)
11. **information bit** : → *bit 12*
12. **information capacity** : → *capacity 11*
13. **information security** : → *security 1*
14. **information separator** : → *separator 2*
15. **information technology equipment** : → *equipment 45*
16. **information tone** : → *tone 17*
17. **information transfer efficiency** : → *efficiency 27*
18. **information transfer rate** : → *rate 41*
19. **intermediate state information** : monitored information on an indeterminate state of operational equipment which may last a specified time. *Example :* The state of a slow-moving disconnector while in transit. ★ information d'état intermédiaire → *information 18.* R информация о промежуточном состоянии. D Zwischenstellungsmeldung. E información de estado intermedio. I informazione di stato intermedio. N overgangstoestandsinformatie. P informacja o stanie pośrednim. S mellanlägesindikering. (371)
20. **mean phase difference between related information** : → *difference 20*
21. **monitored information** (in telecontrol) : information characterising the state or the change in state of an equipment in a monitored station and which is transmitted to a monitoring station. ★ information de surveillance → *information 16.* R контрольная информация (в телемеханике). D Meldung (beim Fernwirken). E información de vigilancia (en telecontrol). I informazione di sorveglianza (in telecontrollo). N bewakingsinformatie. P informacja dozorowa (w sterowaniu zdalnym). S övervakningsinformation. (371)
22. **peak to peak phase difference between related information** : → *difference 24*
23. **persistent information** : monitored information which persists long enough to be reliably detected and transmitted without storing in the input facility of the telecontrol equipment. ★ information permanente → *information 22.* R информация о длительном состоянии. D Dauermeldung. E información persistente. I informazione permanente. N permanente informatie. P informacja trwała. S kvarstående indikering. (371)
24. **probability of information loss** : → *probability 8*
25. **probability of residual information loss** : → *probability 10*
26. **rate of information loss** : → *rate 76*
27. **rate of residual information loss** : → *rate 78*
28. **return information** (in telecontrol) : monitored information indicating whether or not a command has been executed. ★ information d'exécution → *information 19.* R информация об исполнении (в телемеханике). D Rückmeldung (beim Fernwirken). E información de confirmación (en telecontrol). I informazione di ritorno. N retourinformatie (bij afstandsbesturing). P informacja kwitująca. S kvittering; återindikering. (371)
29. **signalling information** : the information content of a signal message. ★ information de signalisation → *information 13.* R сигнальная информация. D Zeichengabeinformation. E información de señalización. I informazione di segnalazione. N signaleringsinformatie. P informacja sygnalizacyjna. S signalinformation. (714)
30. **single-point information** : monitored information represented by only one bit characterizing two determined states of operational equipment. ★ information de signalisation simple → *information 15.* R одноэлементная информация. D Einzelmeldung. E información de señalización simple. I informazione semplice. N enkelvoudige toestandsinformatie. P informacja jednobitowa. S enkelindikering; enkel binär information. (371)
31. **special information tone** : → *tone 32*
32. **state information** : monitored information on a characteristic condition of operational equipment. Characteristic conditions can assume two or more possibilities. ★ information d'état → *information 17.* R информация о состоянии. D Zustandsmeldung. E información de estado. I informazione di stato. N toestandsinformatie. P informacja o stanie. S lägesinformation; statusinformation. (371)
33. **timing information** (in a synchronized network) : information pertaining to the timing relationship of several series of events and which is conveyed by and/or derived from synchronization signals, timing signals, or time-scales embedded in digital signals. ★ information temporelle → *information 23.* R хронирующая информация (в синхронных сетях). D Synchronisations-Information (in einem synchronisierten Netzwerk). E información temporal (en una red sincronizada). I informazione di temporizzazione (in una rete sincronizzata). N tijdinformatie (bij een gesynchroniseerd netwerk). P informacja o taktowaniu (w sieci synchronizowanej). S taktinformation. (704)
34. **transient information** (*Syn.* fleeting information) : → *information 8*
35. **transmission with information feedback** : → *transmission 111*

infra-red

1. **infra-red ceramic panel emitter** : → *emitter 8*
2. **infra-red emitter end-connection** : → *end-connection 1*
3. **infra-red emitter reflector** : → *reflector 8*
4. **infra-red glass panel emitter** : → *emitter 11*
5. **infra-red heater** : → *heater 12*
6. **infra-red heating** : → *heating 44*
7. **infra-red heating element** : → *heating element 3*
8. **infrared lamp** : → *lamp 28*
9. **infra-red oven** : → *oven 4*
10. **infra-red portable heater** : → *heater 13*
11. **infrared radiation** : → *radiation 35*
12. **infra-red radiation panel** : → *panel 5*
13. **long wave infra-red radiation** : → *radiation 39*
14. **medium wave infra-red radiation** : → *radiation 42*
15. **reflector infra-red lamp** : → *lamp 53*
16. **short wave infra-red radiation** : → *radiation 109*

infrasound

1. **infrasound** : acoustic oscillation whose frequency is below the low-frequency limit of audible sound (about 16 Hz). ★ infrason → *infrason 1.* R инфразвук. D Infraschall. E infrasonido. I infrasuono. N infrageluid. P infradźwięk. S infraljud. (801)

inherent

1. **inherent** (*Syn.* intrinsic) : → *intrinsic 1*
2. **inherent characteristic of a system** : → *characteristic 46*
3. **inherent direct voltage regulation** : → *regulation 6*
4. **inherent distortion** : → *distortion 46*

5. **inherent filtration** : → *filtration 2*
6. **inherent regulation** : → *regulation 7*
7. **inherent regulation** : → *regulation 8*
8. **inherent stability of a power system** : → *stability 7*
9. **number of inherent tapping positions** : → *number 19*

inhibited

1. **inhibited insulating oil** : → *oil 1*

inhibitor

1. **inhibitor** : a substance used in small proportion to suppress a chemical reaction. ★ inhibiteur → *inhibiteur 1.* R ингибитор. D Inhibitor. E inhibidor. I inibitore. N inhibitor; remmer. P inhibitor. S inhibitor. (212)
2. **oxidation inhibitor** (*Syn.* antioxidant) : → *antioxidant 1*

initial

1. **initial address message** : → *message 1*
2. **initial charge** : → *charge 35*
3. **initial condition** : → *condition 12*
4. **initial excitation system response** : → *response 8*
5. **initial ionizing event** : → *event 4*
6. **initial magnetization curve** : → *curve 15*
7. **initial permeability** : → *permeability 13*
8. **initial signal unit** : → *unit 34*
9. **initial susceptibility** : → *susceptibility 3*
10. **initial symmetrical short-circuit current** : → *short-circuit current 4*
11. **initial temperature (of a cell or battery)** : → *temperature 20*
12. **initial voltage (of a cell or battery)** : → *voltage 89*

initiation

1. **arc initiation device** : → *device 9*

injected

1. **pressure injected pile** : → *pile 8*

injected-beam

1. **injected-beam magnetron** : → *magnetron 3*

injection

1. **d.c. injection braking** : → *braking 21*
2. **injection laser diode** : → *diode 11*
3. **injection locked laser** : → *laser 4*
4. **injection moulding** : → *moulding 2*
5. **magnetron injection gun** : → *gun 10*
6. **series injection of a centralized telecontrol signal** : injection of a signal into the supply system by a device connected in series with each outgoing feeder or with the supply to busbars. ★ injection série d'un signal de télécommande centralisée → *injection 5.* R последовательный ввод команды телеуправления. D Serieneinspeisung von Rundsteuersignalen. E inyección serie de una señal de telemando centralizado. I inserimento serie di un segnale di telecomando centralizzato. N serie-injectie van een centraal afstandsbedieningssignaal. P szeregowe wprowadzanie do sieci impulsu zdalnego sterowania. S serieinmatning av rundstyrningssignaler. (604)
7. **shunt injection of a centralized telecontrol signal** : injection of a signal into the supply system by a device connected in parallel with the substation busbars. ★ injection parallèle d'un signal de télécommande centralisée → *injection 4.* R параллельный ввод команды телеуправления. D Paralleleinspeisung von Rundsteuersignalen. E inyección paralelo de una señal de telemando centralizado. I inserimento parallelo di un segnale di telecomando centralizzato. N parallel injectie van een centraal afstandsbedieningssignaal. P równoległe wprowadzanie do sieci impulsu zdalnego sterowania. S shuntinmatning av rundstyrningssignaler. (604)

inlet

1. **inlet** : port through which the incoming traffic enters a switching stage or a switching matrix. ★ entrée → *entrée 8.* R вход. D Eingang; Zubringer. E entrada. I ingresso. N ingang. P przyjście. S ingång. (714)

in-local

1. **in-local** : operating a terminal without transmitting signals to line, e.g. to produce a record of a message to be transmitted at automatic speed at a later time. ★ fonctionnement en local → *fonctionnement 37.* R работа в местном режиме. D Lokalbetrieb. E funcionamiento en local. I funzionamento in locale. N lokaal (bedrijf). P praca lokalna. S lokalskrift. (721)

inner

1. **inner covering** : → *covering 1*
2. **inner diameter of the recorded surface** : → *diameter 12*

in-phase

1. **in phase** : applies to two sinusoidal quantities of the same frequency having zero phase difference. ★ en phase → *phase 39.* R в фазе. D gleichphasig. E en fase. I in fase. N in fase. P w fazie. S i fas. (101)
2. **in-phase (voltage) control** : → *control 117*

input

1. **anode input power** (*Syn.* anode supply power) : → *power 6*
2. **antenna (input) admittance** : → *admittance 4*
3. **antenna (input) impedance** : → *impedance 2*
4. **asymmetrical input** : a three terminal input circuit where the nominal values of the impedances between the common terminal and each of the other two terminals are different. *Note.* — The common terminals of the input and the output need not necessarily both be accessible, nor need they be at the same potential. ★ entrée asymétrique → *entrée 9.* R несимметричный вход. D unsymmetrischer Eingang. E entrada asimétrica. I ingresso asimmetrico. N asymmetrische ingang. P wejście asymetryczne. S osymmetrisk ingång. (303)
5. **balanced input** (*Syn.* symmetrical input) : → *input 36*
6. **differential input** : an input circuit having two sets of input terminals, intended to measure the difference between the values of electrical quantities of the same nature applied to them. ★ circuit d'entrée différentiel → *circuit d'entrée 3.* R дифференциальный вход. D Differenzeingang. E circuito de entrada diferencial. I ingresso differenziale. N verschilingang. P wejście różnicowe. S differensingång. (303)
7. **earthed input** (*Syn.* grounded input (USA); single-ended input) : an input circuit in which one input terminal is directly connected to measuring earth. In many cases, this is the common point terminal. ★ circuit d'entrée à la terre de mesure → *circuit d'entrée 2.* R заземленный вход. D geerdeter Eingang. E circuito de entrada con tierra de medida. I ingresso sbilanciato. N eenzijdig geaarde ingang. P wejście doziemne. S jordad ingång. (303)
8. **floating input** : an input circuit which is isolated from the frame, from the supply source and from any of the externally accessible circuit terminals. ★ circuit d'entrée flottant → *circuit d'entrée 5.* R «плавающий» (изолированный) вход. D erdfreier Eingang. E circuito de entrada flotante. I ingresso fluttuante. N zwevende ingang. P wejście o potencjale nieokreślonym. S flytande ingång. (303)
9. **grid input power** : → *power 66*
10. **grid input voltage** : → *voltage 80*
11. **grounded input** (*Syn.* earthed input) : → *input 7*
12. **input** : a qualifying term applied to quantities (voltage, current, impedance, ...) or to components (terminals, leads, ...) which are associated with the reception of power or signals. ★ d'entrée → *entrée 7.* R вход. D Eingangs-. E de entrada. I di ingresso. N ingangs-. P wejściowy. S in; ingång. (151)
13. **input** : to a generator: the mechanical power transmitted to its shaft.— To a motor: the active electrical power supplied to its terminals. ★ puissance absorbée → *puissance 55.* R подведенная мощность. D Leistungsaufnahme. E potencia absorbida. I potenza assorbita. N opgenomen vermogen. P moc pobierana. S tillförd effekt. (411)
14. **input** (for a detector of optical radiation) : radiometric or photometric quantity that a detector of optical radiation is being used to measure or detect. ★ excitation → *excitation 8.* R входная величина (приёмника оптического излучения). D Eingangsgröße (eines Empfängers optischer Strahlung). E estímulo del detector. I segnale di ingresso. N transductorinvoer. P wielkość wejściowa (odbiornika). S insignal. (845)

15. **input admittance** : → *admittance 8*
16. **input and output with isolated common point** : an arrangement of circuits in which one of the input and one of the output terminals are connected together and isolated from the frame and from the supply source. ★ circuit d'entrée et de sortie à point commun isolé → *circuit d'entrée 4.* R вход и выход с изолированной общей точкой. D Eingang und Ausgang mit isoliertem gemeinsamen Punkt. E circuito de entrada y circuito de salida con punto común aislado. I ingresso e uscita con un terminale comune isolato. N ..... P wejście i wyjście o wspólnym punkcie izolowanym. S ingång och utgång med isolerad gemensam anslutning. (303)
17. **input circuit** : → *circuit 92*
18. **input energizing quantity** : → *quantity 14*
19. **input immittance of a two-port network** : → *immittance 5*
20. **input impedance** : → *impedance 27*
21. **input impedance** : → *impedance 28*
22. **input impedance** : → *impedance 29*
23. **input level** : → *level 35*
24. **input power** : → *power 72*
25. **input power control** : → *control 118*
26. **input signal (of a transmission system)** : → *signal 105*
27. **input terminals of a network** : → *terminal 13*
28. **input time constant** : → *time constant 9*
29. **input variable** : → *variable 2*
30. **maximum rated input power** : → *power 82*
31. **multiband amplifier with n inputs** : → *amplifier 20*
32. **noise equivalent input** (of a detector) : value of the detector input that produces an output equal to the root mean square (r.m.s.) noise output, for a stated frequency and bandwidth of the measuring instrument. *Note.* — It is usual to consider a 1 Hz bandwidth and this value is implied unless stated otherwise. ★ excitation équivalente au bruit → *excitation 12.* R эквивалентный входной сигнал шума (приёмника). D rauschäquivalente Eingangsgröße (eines Empfängers). E estímulo equivalente al ruido. I segnale di ingresso equivalente al rumore. N ruisequivalente invoer (van een transductor). P równoważnik szumów wejściowy. S brusekvivalent insignal. (845)
33. **radio-frequency input power** (*Syn.* driving power) : → *power 33*
34. **rated input voltage** : → *voltage 162*
35. **single-ended input** (*Syn.* earthed input) : → *input 7*
36. **symmetrical input** (*Syn.* balanced input) : a three terminal input circuit where the nominal values of the impedances between the common terminal and each of the other two terminals are equal. *Note.* — The common terminals of the input and the output need not necessarily both be accessible, nor need they be at the same potential. ★ entrée symétrique → *entrée 15.* R симметричный вход; сбалансированный вход. D symmetrischer Eingang. E entrada simétrica. I ingresso simmetrico; ingresso bilanciata. N symmetrische ingang. P wejście symetryczne. S symmetrisk ingång; balanserad ingång. (303)

insert

1. **alternative insert position** : → *position 1*
2. **connector insert** : an insulating element designed to support and position contacts in a connector housing. ★ isolant d'un connecteur → *isolant 23.* R изолятор соединителя. D Steckverbinder-Einsatz. E aislante de un conector. I ..... N connectorisolatieblok. P obsada izolacyjna (styków łącznika). S doninsats. (581)
3. **insert earphone** : → *earphone 3*

inserter

1. **power inserter** : device for supplying power to an amplifier or other equipment along the feeder. ★ injecteur d'alimentation → *injecteur 1.* R устройство для подачи мощности. (723)

insertion

1. **insertion attenuation** : → *attenuation 21*
2. **insertion gain** : → *gain 21*
3. **insertion loss** : → *loss 38*
4. **insertion loss** : → *loss 39*
5. **insertion loss** : → *loss 40*
6. **insertion or withdrawal force** : → *force 20*
7. **insertion reference signal** (*Syn.* insertion test signal) : → *signal 108*
8. **insertion signal** : → *signal 107*
9. **insertion test signal** : → *signal 108*
10. **insertion tool** : → *tool 3*
11. **sonar dome insertion loss** : → *loss 89*
12. **zero insertion force component** : → *component 63*

inset

1. **inset** : a small part of a picture, of predefined shape, in which another is displayed. ★ médaillon → *médaillon 1.* R врезка. (723)

in-situ

1. **in situ maintenance** (*Syn.* on-site maintenance) : → *maintenance 37*

in-slot

1. **in-slot signalling** : → *signalling 21*

inspection

1. **crimp inspection hole** : → *hole 6*
2. **inspection hole** : → *hole 11*

instability

1. **instability factor (of permeability)** : → *factor 94*
2. **instability (of permeability)** (*S*) : the fractional change in permeability caused by a specified disturbance:

$$S = \frac{\mu_2 - \mu_1}{\mu_1}$$

where μ_1 and μ_2 are the permeabilities immediately before and at a specified time after the applied disturbance respectively. ★ instabilité (de la perméabilité) → *instabilité 4.* R нестабильность (магнитной проницаемости). D Instabilität (der Permeabilität). E inestabilidad (de la permeabilidad). I instabilità (della permeabilità). N instabiliteit (van de permeabiliteit). P niestabilność(przenikalności magnetycznej). S (permeabilitetens) instabilitet. (221)
3. **long-term instability** : the variations lasting for more than one second, and expressed in decibels as the ratio of the highest to the lowest output levels measured over the entire length of the reel of tape. ★ instabilité à long terme → *instabilité 3.* R медленные вариации. D Langzeit-Unstabilität. E inestabilidad a largo plazo. I instabilità a lungo termine. N lange-termijn-instabiliteit. P niestabilność poziomu wyjściowego długotrwała. S långtidsinstabilitet. (806)
4. **output level instability** : variations in output level due to inconsistent tape quality and/or head to tape contact. *Note.* — Instability is specified as long term or short term. ★ instabilité du niveau de sortie → *instabilité 7.* R вариации выходного уровня. D Ausgangspegel-Unstabilität. E inestabilidad del nivel de salida. I instabilità del livello di uscita. N instabiliteit van het uitgangsniveau. P niestabilność poziomu wyjściowego. S instabilitet hos utnivå. (806)
5. **short-term instability** : the variations of a duration between 40 ms and 1s, expressed as the ratio in decibels of the highest to the lowest output levels measured over a length of tape not less than 250 m. ★ instabilité à court terme → *instabilité 2.* R быстрые вариации. D Kurzzeit-Unstabilität. E inestabilidad a corto plazo. I instabilità a breve termine. N korte-termijn-instabiliteit. P niestabilność poziomu wyjściowego krótkotrwała. S korttidsinstabilitet. (806)

installation

1. **capacitor installation** : one or more capacitor banks and their accessories. ★ installation de condensateurs → *installation 9.* R конденсаторная установка. D Kondensator-Anlage. E instalación de condensadores. I installazione di condensatori. N condensatorinstallatie. P zespół kondensatorów. S kondensatoranläggning. (436)
2. **dynamic voltage of an arc furnace installation** : → *voltage 56*
3. **efficiency of an electro-heat installation** : → *efficiency 20*
4. **electrical installation of buildings** : an assembly of associated electrical equipment to fulfil a specific purpose or

purposes and having coordinated characteristics. ★ installation électrique de bâtiments → *installation 18.* R электрическая установка здания. D elektrische Anlagen von Gebäuden. E instalación eléctrica (de edificios). I impianto utilizzatore. N elektrische installatie van gebouwen. P instalacja elektryczna w budynku. S elinstallation i byggnad. (826)

5. **electro-heat installation** : an installation composed of an electro-heat equipment and the electrical and mechanical equipment needed for its operation and use. ★ installation d'électrothermie → *installation 15.* R электротермическая установка. D Elektrowärmeanlage. E instalación electrotérmica. I installazione elettrotermica. N elektrowarmte-installatie. P urządzenie elektrotermiczne z wyposażeniem. S elvärmeinstallation. (841)
6. **fuel cooling installation** : a large container or cell, usually filled with water, in which spent nuclear fuel is set aside until its radioactivity has decreased to a desired level. ★ installation de refroidissement du combustible → *installation 13.* D Abklingbecken. E instalación de enfriamiento del combustible. I installazione per raffreddamento del combustibile. N afkoelbassin. P schron schładzania paliwa. S bränslekylbassäng. (026)
7. **hydroelectric installation** : an ordered arrangement of civil engineering structures, machinery and plant designed chiefly to convert the gravitational potential energy of water into electricity. ★ aménagement hydro-électrique → *aménagement 1.* R гидроузел энергетического назначения. D Wasserkraftanlage. E aprovechamiento hidroeléctrico. I impianto idroelettrico. N waterkrachtinstallatie. P obiekt wodno-elektroenergetyczny. S vattenkraftanläggning. (602)
8. **installation flux density** : → *flux density 7*
9. **installation index** (*Syn.* room index) : → *index 38*
10. **installation wiring impedance** : → *impedance 30*
11. **origin of an electrical installation** : the point at which electrical energy is delivered to an installation. ★ origine d'une installation électrique → *origine 3.* R ввод электрической установки. D Speisepunkt (Anfang) einer elektrischen Anlage. E origen de una instalación eléctrica. I origine di un impianto utilizzatore. N voedingspunt van een elektrische installatie. P źródło energii elektrycznej (instalacji). S anslutningspunkt. (826)
12. **private (telephone) installation** : a telephone network installed on the premises of a single individual or organization. *Note.* — By convention, private telephone installations include sets of telephone stations which are connected to one subscriber's line. ★ installation (téléphonique) intérieure → *installation 21.* R ведомственная (учрежденческо-производственная) (телефонная) установка. D private Fernsprecheinrichtung. E instalación (telefónica) privada; instalación (telefónica) interior. I impianto (telefonico) interno. N bedrijfstelefooninstallatie. P sieć wewnętrzna. S privat telefonnät. (722)
13. **short-circuit impedance of an arc furnace installation** : → *impedance 54*
14. **storage installation** : an installation that provides a store-and-forward function. *Note.* — This installation may be provided at a terminal or at a centralized installation. ★ installation d'enregistrement → *installation 16.* R накопитель. D Speicherungseinrichtung. E instalación de registro. I centro di memorizzazione. N ..... P bufor. S mellanlagringsutrustning. (721)
15. **subscriber's installation** : the lines, the terminals and any extension, private exchange, control units and any other equipment located at the subscriber's premises. ★ installation d'abonné → *installation 5.* R абонентская установка. D Teilnehmereinrichtung. E instalación de abonado. I installazione terminale (d'abbonato). N abonnee-installatie. P instalacja abonencka. S abonnentutrustning. (721)
16. **terminal installation for data transmission** (*Syn.* data station) : → *station 7*
17. **welding installation** : the entire apparatus for making a weld, consisting of welding equipment and, if applicable, additional manipulative devices. ★ installation de soudage → *installation 14.* R сварочная установка. D Schweißanlage. E instalación de soldadura. I installazione di saldatura. N lasinstallatie. P instalacja spawalnicza. S svetsanläggning. (851)
18. **X-ray installation** : X-ray apparatus installed in an X-ray room including all means for its satisfactory operation. ★ installation radiologique → *installation 20.* R рентгеновская установка. D Röntgenanlage. E instalacion de rayos X. I impianto radiologico. N röntgeninstallatie. P zestaw rentgenowski. S röntgenutrustning. (881)

installed

1. **installed lamp flux density** : → *flux density 8*
2. **installed load** : → *load 19*

instant

1. **coherent significant instants** : in parallel transmission, the significant instants at which the elements of the same character signal start on all channels. ★ instants significatifs cohérents → *instant 8.* R когерентные значащие моменты. D gemeinsamer Kennzeitpunkt. E instantes significativos coherentes. I istante significativo coerente. N coherent significant moment. P moment charakterystyczny współbieżny. S gemensam signifikanstidpunkt. (721)
2. **decision instant** (for a digital signal) : the instant at which a decision is taken as to the probable value of a signal element of a received digital signal. ★ instant de décision → *instant 2.* R момент решения (для цифрового сигнала). D Entscheidungszeitpunkt (für ein Digitalsignal). E instante de decisión (en transmisión numérica). I istante di decisione (per un segnale numerico). N besluitmoment (van een digitaal signaal). P chwila decyzji (dla sygnału cyfrowego). S beslutsögonblick. (704)
3. **ideal instant** : instant with which a significant instant should coincide in certain conditions to be specified for each system. ★ instant idéal → *instant 4.* R идеальный момент. D Idealzeitpunkt; Sollzeitpunkt. E instante ideal. I istante ideale. N ideaal moment. P moment znamienny idealny. S ideal tidpunkt. (721)
4. **instant of time** : a single point on a time scale. *Note.* — The time scale may be continuous as calendar time, or discrete e.g. number of use cycles. ★ instant → *instant 1.* R момент времени. D Zeitpunkt. E instante. I istante. N tijdstip. P moment; chwila. S tidpunkt. (191)
5. **justification instant** (*Syn.* stuffing instant) : an instant at which zero, one, or two digits of the original digital signal are transmitted according to the timing relationship between the time-slots of the original signal and the time-slots provided for conveying that signal. ★ instant justifiable → *instant 5.* R момент цифрового выравнивания. D Justierungszeitpunkt; Füllungszeitpunkt. E instante justificable; instante de justificación. I istante di giustificazione. N justeermoment. P chwila dopełniania. S taktanpassningstidpunkt. (704)
6. **significant instant** (in transmission) : an instant at which a time interval commences in a time-scale or a signal element commences in a discretely-timed signal. ★ instant significatif → *instant 6.* R значащий момент (при передаче). D wichtiger Zeitpunkt (im Bereich der Nachrichtenübertragung). E instante significativo (en transmisión). I istante significativo (in trasmissione). N signifikant moment (bij transmissie). P chwila znamienna (w transmisji). S signifikant tidpunkt. (704)
7. **significant instant** : the instant of change from one significant condition to another within a discretely-timed signal. ★ instant significatif → *instant 7.* R значащий момент. D Kennzeitpunkt. E instante significativo. I istante significativo. N significant moment. P moment charakterystyczny; moment znamienny. S signifikant tidpunkt. (721)
8. **stuffing instant** (*Syn.* justification instant) : → *instant 5*

instantaneous

1. **instantaneous** : qualifies the value, at a given instant of time, of a time dependent variable quantity. ★ instantané → *instantané 17.* R нестационарный; мгновенный. D momentan. E ... instantáneo.... I istantaneo. N momenteel. P chwilowy. S momentan. (191)
2. **instantaneous availability** : → *availability 5*
3. **instantaneous contactor relay** : → *contactor 12*
4. **(instantaneous) failure intensity** : → *intensity 9*
5. **(instantaneous) failure rate** : → *rate 42*
6. **instantaneous frequency** : → *frequency 117*
7. **(instantaneous) frequency deviation** : → *deviation 9*
8. **instantaneous kinetic sound energy density** : → *density 11*
9. **instantaneous operating point** : → *point 21*

10. **instantaneous particle acceleration** : → *acceleration 3*
11. **instantaneous particle displacement** : → *displacement 6*
12. **instantaneous particle velocity** : → *velocity 9*
13. **instantaneous peak power** : → *power 74*
14. **(instantaneous) phase deviation** : → *deviation 10*
15. **instantaneous potential sound energy density** : → *density 12*
16. **instantaneous power** : → *power 75*
17. **instantaneous recording** : → *recording 6*
18. **instantaneous release** : → *release 11*
19. **(instantaneous) repair rate** : → *rate 43*
20. **instantaneous sound pressure** : → *sound pressure 6*
21. **instantaneous speech power** : → *power 76*
22. **instantaneous unavailability** : → *unavailability 3*
23. **instantaneous value** : → *value 14*
24. **instantaneous value (of a wave)** : → *value 15*

instant-start

1. **instant-start lamp** (*Syn.* cold-start lamp) : → *lamp 9*

instruction

1. **instruction command** : → *command 11*

instrument

1. **bimetallic instrument** : a thermal instrument in which the deformation of a bimetallic element, heated directly or indirectly by a current, is transmitted to the movable element. ★ appareil bimétallique → *appareil 21.* R биметаллический прибор. D Bimetall-Messgerät. E aparato bimetálico. I strumento bimetallico. N bimetaalinstrument. P przyrząd bimetalowy. S bimetallinstrument. (302)
2. **detecting instrument** : an instrument intended to detect a quantity without special regard to its value, in some cases showing the approximate value and/or the sign of the quantity. ★ appareil détecteur → *appareil 37.* R индикатор. D Indikator-Messgerät. E aparato detector. I strumento rivelatore. N detecterend instrument. P wskaźnik. S detekterande instrument. (301)
3. **direct acting instrument** : an instrument in which the indicating or recording device is mechanically connected to, and actuated by, the moving element. ★ appareil à action directe → *appareil 1.* R измерительный прибор прямого действия. D direkt wirkendes Messgerät. E aparato de acción directa. I strumento ad azione diretta. N direct aanwijzend instrument. P przyrząd o działaniu bezpośrednim. S direktverkande instrument. (302)
4. **electrodynamic instrument** : an instrument which operates by the interaction of a current in a movable coil with a current in one or more fixed coils. *Note.* — This term is generally reserved for instruments which do not have ferromagnetic material in the magnetic circuit. ★ appareil électrodynamique → *appareil 39.* R электродинамический прибор. D elektrodynamisches Messgerät. E aparato electrodinámico. I strumento elettromagnetico. N elektrodynamisch instrument. P przyrząd elektrodynamiczny. S elektrodynamiskt instrument. (302)
5. **electrostatic instrument** : an instrument which is intended to determine potential difference by means of electrostatic forces between fixed and movable charged electrodes. ★ appareil électrostatique → *appareil 40.* R электростатический прибор. D elektrostatisches Messgerät. E aparato electrostático. I strumento elettrostatico. N elektrostatisch instrument. P przyrząd elektrostatyczny. S elektrostatiskt instrument. (302)
6. **electrothermal instrument** (*Syn.* thermal instrument) : → *instrument 32*
7. **expanded scale instrument** : an instrument in which a small part of the total range is expanded to occupy the greater portion of the scale length. ★ appareil à échelle dilatée → *appareil 9.* R прибор с растянутой шкалой. D Messlupen-Messgerät (Messgerät mit gespreiztem Messbereich). E aparato de escala dilatada. I strumento di misura con scala estesa. N instrument met uitgerekte schaal. P przyrząd o rozciągniętej podziałce. S instrument med expanderad skala. (302)
8. **ferrodynamic instrument** : an instrument which operates by the interaction of a current in a movable coil with a current in one or more fixed coils and which incorporates "soft" ferromagnetic material in the magnetic circuit. ★ appareil ferrodynamique → *appareil 41.* R ферродинамический прибор. D ferrodynamisches Messgerät. E aparato ferrodinámico. I strumento ferrodinamico. N ferrodynamisch instrument. P przyrząd ferrodynamiczny. S ferrodynamiskt instrument. (302)
9. **indirect acting instrument** : an instrument in which the indicating or recording device is driven by a motor or other device, controlled by the quantity to be measured and using electromechanical, electrical or electronic means. *Note.* — Indirect acting instruments may make use of any method of comparison, but this is usually electrical or mechanical. ★ appareil à action indirecte → *appareil 2.* R измерительный прибор косвенного действия. D indirekt wirkendes Messgerät. E aparato de acción indirecta. I strumento ad azione indiretta. N indirect aanwijzend instrument. P przyrząd o działaniu pośrednim. S indirekt verkande instrument. (302)
10. **induction instrument** : an instrument which operates by the interaction of fixed electro-magnets on currents which they induce in movable conductive element(s). ★ appareil à induction → *appareil 13.* R индукционный прибор. D Induktions-Messgerät. E aparato de inducción. I strumento a induzione. N inductie-instrument. P przyrząd indukcyjny. S induktionsinstrument. (302)
11. **instrument autotransformer** : → *auto-transformer 7*
12. **instrument circuit** : → *circuit 93*
13. **instrument lead** : → *lead 4*
14. **instrument security factor** : → *factor 95*
15. **instrument transformer** : → *transformer 38*
16. **instrument with contacts** : an instrument in which the moving element operates contacts at certain predetermined positions. ★ appareil à contacts → *appareil 8.* R прибор контактный. D kontaktgebendes Messgerät. E aparato con contactos. I strumento di misura con contatti. N contactinstrument. P przyrząd z zestykiem. S instrument med kontaktfunktioner. (302)
17. **instrument with locking device** : an instrument in which a device can lock the moving element in the position where it stands at a given time. ★ appareil à blocage d'équipage → *appareil 5.* R прибор с блокировочным устройством. D Messgerät mit Zeigerarretierung. E aparato con bloqueo del sistema móvil. I strumento di misura con blocco dell'equipaggio. N instrument met wijzervang. P przyrząd z blokadą. S instrument med låsningsanordning. (302)
18. **instrument with optical index** : an indicating instrument in which the indications are given by the displacement of an optical index over a scale which may be a part of the instrument or may be separate from it. ★ appareil à index lumineux → *appareil 12.* R прибор с оптическим указателем. D Lichtmarken-Messgerät. E aparato de índice luminoso. I strumento a indice luminoso. N lichtwijzerinstrument. P przyrząd o wskazaniu świetlnym. S instrument med optisk visare. (302)
19. **instrument with suppressed zero** : an instrument which gives no useful information when the quantity to be measured is less than a certain value. *Note.* — "Suppressed zero" can apply to either mechanical zero or electrical zero. ★ appareil à suppression de zéro → *appareil 17.* R прибор с подавленным нулем. D Messgerät mit unterdrücktem Nullpunkt. E aparato con cero suprimido. I strumento di misura a zero ritratto. N instrument met onderdrukt nulpunt. P przyrząd o podziałce bezzerowej. S instrument med undertryckt nollpunkt. (302)
20. **insulation fault detecting instrument** : an apparatus intended to detect faults in electrical insulation. ★ détecteur de défaut d'isolement → *détecteur 19.* R индицатор повреждения изоляции. D Isolationsfehler-Messgerät. E detector de defecto de aislamiento. I rivelatore di difetti di isolamento. N isolatiefoutzoekinstrument. P wskaźnik uszkodzenia izolacji. S isolationsfelsdetektor. (302)
21. **magnetoscope (instrument)** (*Syn.* video tape recorder) : → *tape recorder 6*
22. **moving-iron instrument** : an instrument comprising a movable piece of "soft" magnetic material which is actuated either by a current in a fixed coil or by one (or more) fixed piece(s) of "soft" magnetic material, magnetised by a current in the fixed coil. ★ appareil ferromagnétique → *appareil 42.* R электромагнитный прибор. D Dreheisen-Messgerät. E aparato de hierro móvil; aparato ferromagnético. I strumento

a ferro mobile. N weekijzerinstrument. P przyrząd ferromagnetyczny. S vridjärnsinstrument. (302)

23. **moving-magnet instrument** : an instrument which operates by the interaction of the field of a movable permanent magnet with a current in a fixed coil. *Note.* — The instrument can have more than one coil. ★ appareil à aimant mobile → *appareil 4.* R магнитоэлектрический прибор с подвижным магнитом. D Drehmagnet-Messgerät. E aparato de imán móvil. I strumento a magnete mobile. N draaimagneetinstrument. P przyrząd o ruchomym magnesie. S vridmagnetinstrument. (302)
24. **moving-scale instrument** : an indicating instrument in which the scale moves relative to a fixed index. *Note.* — An instrument in which the scale is projected, is a particular type of moving-scale instrument. ★ appareil à échelle mobile → *appareil 10.* R прибор с подвижной шкалой. D Messgerät mit beweglicher Skala. E aparato de escala móvil. I strumento a scala mobile. N instrument met bewegende schaal. P przyrząd o ruchomej podzielni. S instrument med rörlig skala. (302)
25. **permanent-magnet moving-coil instrument** : an instrument which operates by the interaction of a current in a movable coil with the field of a fixed permanent magnet. *Note.* — These instruments can have more than one coil, measuring the sum or ratio of the currents in them. ★ appareil magnétoélectrique → *appareil 45.* R магнитоэлектрический прибор с подвижной рамкой. D Drehspul-Messgerät. E aparato de bobina móvil e imán fijo; aparato magnetoeléctrico. I strumento magnetoelettrico a bobina mobile. N draaispoelinstrument. P przyrząd magnetoelektryczny. S vridspoleinstrument. (302)
26. **pointer instrument** : an indicating instrument in which the index is a pointer moving over a fixed scale. ★ appareil à aiguille mobile → *appareil 3.* R стрелочный прибор. D Zeigermessgerät. E aparato de aguja. I strumento a indice. N wijzerinstrument. P przyrząd wskazówkowy. S visarinstrument. (302)
27. **rated instrument limit primary current** : → *current 159*
28. **rectifier instrument** : an instrument intended to measure alternating quantities, usually of the permanent-magnet moving-coil type, in association with a rectifying device. ★ appareil à redresseur → *appareil 16.* R выпрямительный прибор. D Gleichrichter-Messgerät. E aparato con rectificador. I strumento a raddrizzatore. N triltonginstrument. P przyrząd prostownikowy. S likriktarinstrument. (302)
29. **shadow column instrument** : an indicating instrument in which the indications are given by a shadow column on an illuminated scale which may be a part of the instrument or may be separate from it. ★ appareil à colonne d'ombre → *appareil 7.* R измерительный прибор стеневым указателем. D Leuchtbalken-Messgerät. E aparato de columna de sombra. I strumento a colonna d'ombra. N instrument met schaduwkolom. P przyrząd o wskazaniu pasmem cienia. S instrument med skuggvisare. (302)
30. **summation instrument** (*Syn.* totalizer) : an instrument intended to determine the sum of the values of quantities of the same kind measured simultaneously in different circuits. ★ appareil totalisateur → *appareil 50.* R суммирующий измерительный прибор (сумматор); сумматор. D summierendes Messgerät; Summen-Messgerät. E aparato totalizador. I strumento totalizzatore. N sommeter; totalisator. P przyrząd sumujący. S summainstrument. (301)
31. **telephone instrument** (*Syn.* telephone set) : → *set 56*
32. **thermal instrument** (*Syn.* electrothermal instrument (USA)) : an instrument which operates by the heating effect of one or more currents. ★ appareil thermique → *appareil 49.* R тепловой прибор. D elektrothermisches Messgerät. E aparato térmico. I strumento a filo caldo. N thermisch instrument. P przyrząd cieplny. S termoinstrument. (302)
33. **thermocouple instrument** : a thermal instrument in which the current heats one or more thermocouples of which the electromotive force(s) is (are) measured. ★ appareil à thermocouple → *appareil 18.* R термоэлектрический прибор. D Thermoumformer-Messgerät. E aparato de termopar. I strumento a termocoppia. N thermokoppelingstrument. P przyrząd termoelementowy. S termoomvandlarinstrument. (302)
34. **vibrating reed instrument** : an instrument intended to measure frequency, comprising a set of tuned vibrating reeds, one or a few of which resonate under the action of an alternating current of the appropriate frequency flowing through one or more fixed coils. ★ appareil à lames vibrantes → *appareil 14.* R вибрационный язычковый прибор. D Zungen-Frequenzmessgerät. E aparato con lengüetas vibrantes. I strumento a lamelle vibranti. N trilcontactinstrument. P przyrząd wibracyjny. S instrument med vibrerande tungor. (302)

insulant

1. **insulant** : a material, generally a dielectric, used to prevent conduction current. ★ isolant → *isolant 20.* R изоляция. D Isolierstoff. E aislante. I isolante. N isolatiemateriaal. P materiał izolacyjny. S isolationsmaterial. (151)
2. **insulant** : a substance in which the valence band is a filled band separated from the first excitation band by a forbidden band of such width that the energy needed to excite electrons from the valence band to the conduction band is so large as to disrupt the substance. ★ isolant → *isolant 22.* R изолятор. D Isolator. E aislante. I isolante. N isolator. P nieprzewodnik; izolator. S isolator. (521)

insulate

1. **(to) insulate** : to prevent conduction between separate conductive bodies. ★ isoler → *isoler 1.* R изолировать. D isolieren. E aislar (por medio de aislantes). I isolare (per mezzo di isolanti). N isoleren. P izolować. S isolera. (151)

insulated

1. **aerial (insulated) cable** : → *cable 1*
2. **air insulated terminal box** : → *terminal box 1*
3. **fully insulated current transformer** : → *transformer 32*
4. **gas insulated line** : → *line 42*
5. **gas insulated metal-enclosed substation** : → *substation 9*
6. **insulated bearing housing** : → *housing 7*
7. **insulated bearing pedestal** : → *pedestal 2*
8. **insulated cable** : → *cable 35*
9. **insulated conductor** (*Syn.* core) : → *core 3*
10. **insulated gloves method** : → *method 11*
11. **insulated overlap** : → *overlap 3*
12. **insulated rail joint** : → *joint 13*
13. **insulated return system** : → *system 90*
14. **insulated shield cable system** : → *system 91*
15. **insulated tape heating element** : → *heating element 4*
16. **insulated tool** : → *tool 4*
17. **phase insulated terminal box** : → *terminal box 4*
18. **transposition (of insulated cables)** : → *transposition 5*

insulated-gate

1. **insulated-gate field-effect transistor** : → *transistor 6*

insulating

1. **aerial lift device with insulating arm** : → *device 2*
2. **combined (insulating) material** : → *material 9*
3. **filled insulating liquid** : → *liquid 1*
4. **inhibited insulating oil** : → *oil 1*
5. **(insulating) bushing** : → *bushing 11*
6. **insulating gas** : → *gas 23*
7. **insulating liquid** : → *liquid 4*
8. **insulating material** : → *material 21*
9. **insulating tool** : → *tool 5*
10. **mineral insulating oil** : → *oil 2*
11. **naphthenic insulating oil** : → *oil 3*
12. **paraffinic insulating oil** : → *oil 13*
13. **passivated insulating oil** : → *oil 14*
14. **treated insulating liquid** : → *liquid 12*
15. **uninhibited insulating oil** : → *oil 16*
16. **unused insulating liquid** : → *liquid 13*
17. **used insulating liquid** : → *liquid 14*

insulation

1. **acoustical insulation material** : material used in insulating against the transmission of sound. ★ matériau isolant acoustique → *matériau 15.* R звукоизоляционный материал. D Schallisolierungsmaterial. E material aislante acústico. I materiale isolante acustico. N materiaal voor

luchtgeluid(s)isolatie. P materiał akustoizolacyjny. S ljudisolerande material. (801)

2. **banding insulation** : insulation between the winding overhang and the binding bands. ★ isolation de frettage → *isolation 17.* R подбандажная изоляция. D Versteifungsringisolation. E aislamiento de zunchado. I isolamento del bandaggio. N isolatie onder de bandage. P izolacja pod bandażem. S isolering mot bandage. (411)
3. **bar insulation** : the main insulation, to earth or between phases, surrounding a bar, additional to any conductor or turn insulation. ★ isolation de barre → *isolation 12.* R изоляция стержня. D Stab-Isolation. E aislamiento de barra. I isolamento di barra. N stafisolatie. P ..... S stavisolering. (411)
4. **belt insulation** : a form of overhang packing inserted circumferentially between adjacent layers in the winding overhang. ★ isolation entre couches de tête de bobine → *isolation 24.* R изоляция между слоями лобовых частей обмотки. D Wickelkopf-Distanzstücke in Umfangsrichtung. E aislamiento entre capas de cabeza de bobina. I isolamento degli strati di testata. N tussenlaagisolatie (van de spoelkoppen). P izolacja między czołami uzwojenia. S mellanlägg för lindningslager. (411)
5. **bore-hole lead insulation** (*Syn.* up-shaft insulation) : → *insulation 57*
6. **circuit insulation voltage** : → *voltage 25*
7. **class of insulation** : → *class 10*
8. **coil insulation** : the main insulation, to earth or between phases, surrounding a coil, additional to any conductor or turn insulation. ★ isolation de bobine → *isolation 13.* R изоляция катушки. D Spulen-Isolation. E aislamiento de bobina. I isolamento di bobina. N spoelisolatie. P izolacja zezwoju. S härvisolering. (411)
9. **commutator segment insulation** : the insulation between commutator segments. ★ entre-lames → *entre-lames 1.* R изоляция пластин коллектора. D Kommutator-Stegisolation. E aislamiento entre delgas. I isolamento tra le lamelle. N lamelisolatie. P izolacja międzywycinkowa. S kommutatormellanlägg. (411,811)
10. **commutator V-ring insulation** : the insulation between the V-ring and the commutator segments. ★ cône isolant → *cône 4.* R изоляция стяжного кольца коллектора. D Kommutator-Druckringisolation. E aislamiento del cono. I cono isolante. N V-ringisolatie; klemringisolatie. P stożkowy pierścień izolacyjny. S kommutatortryckringsisolering. (411)
11. **conductor insulation** : the insulation on a conductor or between adjacent conductors. ★ isolation de conducteur → *isolation 15.* R изоляция проводника (стержня). D Leiter-Isolation. E aislamiento de conductor. I isolamento del conduttore. N geleiderisolatie. P izolacja przewodu. S ledarisolering. (411)
12. **conductor insulation** : insulation applied on a conductor or a conductor screen. ★ enveloppe isolante → *enveloppe 19.* R изоляция жилы. D Leiterisolierung. E aislamiento del conductor. I isolamento del conduttore. N aderisolatie. P izolacja żyły. S ledarisolering. (461)
13. **double insulation** : two-stage insulation, the first being between the live conductors and an intermediate frame and the second between the intermediate frame and the body of the vehicle. ★ double isolement → *isolement 6.* R двойная изоляция. D Doppelisolierung. E doble aislamiento. I doppio isolamento. N dubbele isolatie. P izolacja podwójna. S dubbelisolering. (811)
14. **electrical insulation** : that part of an electrotechnical product which separates the conducting parts at different electrical potentials. ★ isolation électrique → *isolation 22.* R электрическая изоляция. D elektrische Isolierung. E aislamiento eléctrico. I isolamento elettrico. N elektrische isolatie. P izolacja elektryczna. S elektrisk isolering. (212)
15. **external insulation** : the distances in atmosphere and the surfaces in contact with open air of solid insulation of the equipement which are subject to dielectric stresses and to the effects of atmospheric and other external conditions such as pollution, humidity, vermin, etc. ★ isolation externe → *isolation 26.* R внешняя изоляция. D äußere Isolierung. E aislamiento externo. I isolamento esterno. N uitwendige isolatie. P izolacja zewnętrzna. S yttre isolering. (604)
16. **extruded insulation** : insulation consisting generally of one layer of a thermoplastic or thermosetting material and applied by an extrusion process. ★ isolation extrudée → *isolation 27.* R экструдированная изоляция. D extrudierte Isolierung. E aislamiento extruido. I isolamento estruso. N geëxtrudeerde isolatie. P izolacja wytłaczana. S sprutad homogen isolering. (461)
17. **field spool insulation** : insulation between an uninsulated field spool and the field coil. ★ isolation d'armature de bobine (de champ) → *isolation 11.* R изоляция каркаса обмотки возбуждения. D Spulenkasten-Isolation. E aislamiento de soporte de bobina de campo. I isolamento del sostegno della bobina (di campo). N spoelkokerisolatie. P izolacja szkieletu cewki. S isolering mot spolhylsa. (411)
18. **heater-cathode insulation current** : → *current 102*
19. **impregnated paper insulation** : lapped insulation consisting of paper impregnated with an insulating material. ★ isolation au papier imprégné → *isolation 6.* R бумажная пропитанная изоляция. D imprägnierte Papierisolierung. E aislamiento de papel impregnado. I isolamento in carta impregnata. N isolatie van geïmpregneerd papier. P izolacja papierowa przesycona. S impregnerad pappersisolering. (461)
20. **insulation** (material) : all the material used to insulate a device. ★ isolation → *isolation 4.* R изоляция (материал). D Isolierstoffe (Gesamtheit). E aislamiento (material). I isolamento. N isolatie (als materiaal). P izolacja. S isolering. (151,461)
21. **insulation** (property) : all properties acquired by a conductor by virtue of its being insulated. ★ isolement → *isolement 9.* R изоляция (свойство). D Isolation (Eigenschaft, Zustand). E aislamiento (propiedad). I isolamento. N isolatie (als eigenschap). P izolacja. S isolation. (151)
22. **insulation barrier** : → *barrier 7*
23. **insulation co-ordination** : → *co-ordination 4*
24. **(insulation) cylinder** : → *cylinder 2*
25. **insulation fault** : → *fault 46*
26. **insulation fault detecting instrument** : → *instrument 20*
27. **insulation grip** : → *grip 1*
28. **insulation level** : → *level 36*
29. **insulation level** : → *level 37*
30. **insulation of equipment** : the dielectric qualities of the overall insulation of equipment. ★ isolement (d'un matériel) → *isolement 14.* R ..... D Isolation eines Betriebsmittels. E aislamiento de un equipo. I isolamento (di un componente). N isolatie van het materieel. P izolacja urządzenia. S apparatisolation. (604)
31. **insulation resistance** : → *resistance 32*
32. **insulation resistance meter** : → *meter 27*
33. **insulation resistance test** : → *test 40*
34. **insulation screen** : → *screen 9*
35. **insulation support** : → *support 12*
36. **insulation test voltage** : → *voltage 91*
37. **internal insulation** : the internal solid, liquid or gaseous parts of the insulation of equipment which are protected from the effects of atmospheric and other external conditions. ★ isolation interne → *isolation 28.* R внутренняя изоляция. D innere Isolierung. E aislamiento interno. I isolamento interno. N inwendige isolatie. P izolacja wewnętrzna. S inre isolering. (604)
38. **interturn insulation** : the insulation between adjacent turns, often in the form of strips. ★ isolation entre spires → *isolation 25.* R междувитковая изоляция. D Isolation zwischen den Windungen. E aislamiento entre espiras. I isolamento tra spire. N scheidingsisolatie (tussen windingen). P izolacja międzyzwojowa. S varvmellanlägg. (411)
39. **joint-sleeve insulation** : an external insulation applied to the metallic joint-sleeve of a specially bonded cable. ★ isolation de la boîte de jonction → *isolation 18.* R изоляция соединительной муфты. D Muffengehäuse-Isolierung. E aislamiento del manguito de empalme. I isolante della cassetta di giunzione. N uitwendige isolatie van de mof. P izolacja kadłuba mufy. S ..... (461)
40. **lapped insulation** : insulation consisting of tapes applied helically in concentric layers. ★ isolation rubanée → *isolation 33.* R изоляция в виде обмотка. D gewickelte Isolierung. E aislamiento encintado. I isolamento a nastri. N gewikkelde isolatie. P izolacja taśmowa. S laminerad isolering. (461)
41. **mass-impregnated non-draining insulation** : mass-impregnated paper insulation in which the impregnant is not fluid at the maximum continuous operating temperature. ★ isolation à matière stabilisée → *isolation 5.*

R нестекающая изоляция, пропитанная в массе. D Papierhaftmasseisolierung. E aislamiento de material estabilizado. I isolamento in carta impregnata di miscela no migrante. N met "non-draining" massa geïmpregneerde isolatie. P izolacja przesycona syciwem nieściskającym. S vaximpregnerad isolering. (461)

42. **mass-impregnated (paper) insulation** : impregnated paper insulation in which the paper tapes are impregnated after lapping. ★ isolation (au papier) par imprégnation à masse → *isolation 7.* R изоляция (бумажна), пропитанная в массе. D masseimprägnierte (Papier) Isolierung. E aislamiento (de papel) con impregnacio'n de masa. I isolamento in carta impregnata di miscela. N met massa geïmpregneerde (papier)isolatie. P izolacja z papieru nasyconego po nałozeniu. S massaimpregnerad pappersisolering. (461)
43. **mineral insulation** : insulation consisting of compressed mineral powder. ★ isolation minérale → *isolation 29.* R минеральная изоляция. D Mineralisolierung. E aislamiento mineral. I isolamento minerale. N minerale isolatie. P izolacja mineralna. S mineralisolering. (461)
44. **non-self-restoring insulation** : insulation which loses its insulating properties, or does not recover them completely, after a disruptive discharge. ★ isolation non autorégénératrice → *isolation 30.* R несамовосстанавливающая изоляция. D nichtselbstheilende Isolierung. E aislamiento no autorregenerable. I isolamento non autoripristinante. N zichzelf niet-herstellende isolatie. P izolacja nie regenerująca się samoczynnie. S icke-självläkande isolering. (604)
45. **non-uniform insulation of a winding** (of a transformer or of a reactor) : the insulation of the winding of a transformer or of a reactor when it has an end intended for direct or indirect connection to earth and is designed with a lower insulation level assigned to this earth or neutral winding end. ★ isolation non uniforme d'un enroulement → *isolation 31.* R неполная изоляция нейтрали обмотки (трансформатора или реактора). D abgestufte Isolation einer Wicklung (eines Transformators oder einer Drosselspule). E aislamiento no uniforme de un arrollamiento (de un transformador o de una reactancia). I isolamento non uniforme di un avvolgimento (di trasformatore o di reattore). N getrapte wikkelingisolatie (van een transformator of van een spoel). P izolacja uzwojenia stopniowana (transformatora lub dławika). S graderad isolation. (421)
46. **phase coil insulation** : additional insulation between adjacent coils which are in different phases. ★ isolation de bobines entre phases → *isolation 14.* R междуфазная изоляция катушек. D Phasensprungisolation. E aislamiento de bobinas entre fases. I isolamento delle matasse tra le fasi. N fasescheidingsisolatie. P izolacja międzyfazowa. S extra fasisolering. (411)
47. **pole body insulation** : insulation between the pole body and the field coil. ★ isolation de noyau polaire → *isolation 19.* R изоляция сердечника полюса. D Polschaftisolation. E aislamiento de núcleo polar. I isolamento del nucleo polare. N poolkernisolatie. P izolacja pieńka bieguna. S isolering mot polkärna. (411)
48. **pre-impregnated (paper) insulation** : impregnated paper insulation in which the paper tapes are impregnated before lapping. ★ isolation (au papier) préimprégné → *isolation 8.* R предварительно пропитанная (бумажная) изоляция. D vorimprägnierte (Papier) Isolierung. E aislamiento (de papel) preimpregnado. I isolamento in carta preimpregnata. N voorgeïmpregneerde (papier) isolatie. P izolacja z papieru wstępnie nasyconego. S förimpregnerad pappersisolering. (461)
49. **rated insulation level** : → *level 71*
50. **self-restoring insulation** : insulation which completely recovers its insulating properties after a disruptive discharge. ★ isolation autorégénératrice → *isolation 9.* R самовосстанавливающаяся изоляция. D selbstheilende Isolierung. E aislamiento autorregenerable. I isolamento autoripristinante. N zichzelf herstellende isolatie. P izolacja samoczynnie regenerująca się. S självläkande isolering. (604)
51. **sound insulation** (*Syn.* sound reduction index) : → *index 40*
52. **strand or lamination insulation** : the insulation on a strand or lamination or between adjacent strands or laminations which comprise a conductor. ★ isolation de fil → *isolation 16.* R изоляция элементарного проводника. D Drahtisolation. E aislamiento de hilo. I isolamento del filo o della piattina. N deelgeleiderisolatie. P izolacja przewodu elementarnego. S partisolering. (411)
53. **thermal insulation** : the material used to reduce heat transfer between two media. ★ isolation thermique → *isolation 34.* R тепловая изоляция. D Wärmeisolation. E aislamiento térmico; calorifugado. I isolamento termico. N warmte-isolatie; thermische isolatie. P izolacja cieplna. S värmeisolermaterial. (841)
54. **thermal insulation** : the refractory materials, for example fibrous walls, having low heat conducting properties, placed between the furnace high temperature refractories and furnace casing. ★ isolants thermiques → *isolant 30.* R тепловая изоляция. D Wärmeisolierung. E aislamientos térmicos. I isolamenti termici. N warmte-isolatie. P izolacja cieplna. S värmeisolering. (841)
55. **turn insulation** : the insulation surrounding a turn. ★ isolation de spire → *isolation 20.* R витковая изоляция. D Windungsisolation. E aislamiento de espira. I isolamento di spira. N windingisolatie. P izolacja zwojowa. S varvisolering. (411)
56. **uniform insulation of a winding** (of a transformer or of a reactor) : the insulation of the winding of a transformer or of a reactor when all its ends connected to terminals have the same power frequency withstand voltage to earth. ★ isolation uniforme d'un enroulement → *isolation 35.* R полная изоляция нейтрали обмотки (трансформатора или реактора). D gleichmäßige Isolation einer Wicklung (eines Transformators oder einer Drosselspule). E aislamiento uniforme de un arrollamiento (de un transformador o de una reactancia). I isolamento uniforme di un avvolgimento (di trasformatore o di reattore). N gelijkmatige wikkelingisolatie (van een transformator of van een spoel). P izolacja uzwojenia niestopniowana (transformatora lub dławika). S likformig isolation. (421)
57. **up-shaft insulation** (UK) (*Syn.* bore-hole lead insulation (USA)) : special insulation surrounding connections which pass through a hollow shaft. ★ isolation dans l'arbre → *isolation 10.* R изоляция внутри полого вала. D Wellenbohrungsisolation. E ..... I isolamento nel foro d'albero. N isolatie van de asboring. P izolacja wydrążonego wału. S axelhålsisolering. (411)
58. **winding overhang support insulation** : insulation between the winding overhang and an uninsulated winding overhang support. ★ isolation de tête de bobine → *isolation 21.* R изоляция опорного кронштейна лобовых частей обмотки. D Wickelkopf-Halteringisolation. E aislamiento de cabeza de bobina. I isolamento dei sostegni delle testate di bobina. N spoelkopsteunisolatie. P izolacja podzwojnika. S isolering mot lindningsstöd. (411)

insulation-enclosed

1. **insulation-enclosed switchgear and controlgear** : → *switchgear 3*

insulator

1. **antipollution-type insulator** : an insulator which has the external profile designed for use in polluted areas. ★ isolateur de type antipollution → *isolateur 26.* R грязестойкий изолятор. D Isolator für schwere Verschmutzung. E aislador anticontaminación. I isolatore del tipo anti-inquinamento. N isolator met vergrote kruipweg. P izolator przeciwzabrudzeniowy. S isolator med förlängd krypsträcka. (471)
2. **camber of an insulator** : → *camber 2*
3. **cap and pin insulator** : an insulator comprising an insulating part having the form of a disk or bell and fixing devices consisting of an outside cap and an inside pin attached axially. ★ isolateur à capot et tige → *isolateur 11.* R тарельчатый изолятор. D Kappenisolator. E aislador tipo caperuza y vástago. I isolatore a cappa e perno. N schaalisolator. P izolator kołpakowy. S kåppinnisolator. (471)
4. **composite insulator** : insulator made of at least two insulating materials: the core and the external envelope. The composite insulator, for example, can consist either of individual sheds mounted on the core, with or without an intermediate sheath or alternatively, of the complete envelope with sheds directly moulded or cast in one piece on to the core. ★ isolateur composite → *isolateur 21.* R комбинированный изолятор. D Verbundisolator. E aislador compuesto. I isolatore composito. N composietisolator. P izolator złożony; izolator kompozytowy. S kompositisolator. (471)
5. **core of an insulator** : → *core 17*

6. **counterweight (to a suspension insulator set)** (*Syn.* suspension set weight) : → *weight 4*
7. **cylindrical post insulator** : a post insulator of approximately cylindrical shape consisting of one or more insulating components with a metal fitting attached to each end; the metal fitting may consist of a cap, insert or flange with plain or tapped holes for attachment by bolts or screws. ★ support isolant cylindrique → *support 36.* R стержневой опорный изолятор. D zylindrischer Stützisolator. E aislador de apoyo cilíndrico. I isolatore portante cilindrico. N cilindrische steunisolator. P izolator wsporczy cylindryczny. S cylindrisk stödisolator. (471)
8. **disc insulator** (*Syn.* suspension insulator) : → *insulator 36*
9. **edge insulator** : a part which ensures insulation between the plate edges and the container sidewalls. ★ isolateur latéral → *isolateur 28.* R изолятор кромок. D Randstreifen. E aislador lateral. I isolatore laterale. N randisolator. P izolator boczny. S kantisolator. (486)
10. **hollow insulator** : a hollow insulator which is open from end to end, with or without sheds. *Note.* — In general, the term hollow insulator does not include the fixing devices or end fittings. A hollow insulator may consist of one or two or more permanently assembled insulating elements. ★ enveloppe isolante → *enveloppe 20.* R покрышка. D Hohlisolator; Gehäuseisolator. E envolvente aislante. I involucro isolante. N holle isolator. P osłona izolacyjna. S rörisolator. (471)
11. **indoor post insulator** : a post insulator not intended to be exposed to outdoor atmospheric conditions. ★ support isolant d'intérieur → *support 38.* R опорный изолятор внутренней установки. D Innenraum-Stützisolator. E aislador de apoyo de interior. I isolatore portante per interno. N steunisolator voor binnenopstelling. P izolator wsporczy wnętrzowy. S inomhusstödisolator. (471)
12. **insulator** : a component designed to support and insulate a conductive body. ★ isolateur → *isolateur 7.* R изолятор. D Isolator. E aislador. I isolatore. N isolator. P izolator. S isolator. (151)
13. **insulator** : a device intended for electrical insulation and mechanical fixing of equipment or conductors which are subject to potential differences. ★ isolateur → *isolateur 8.* R изолятор. D Isolator. E aislador. I isolatore. N isolator. P izolator. S isolator. (471)
14. **insulator protective fitting** : → *fitting 1*
15. **insulator set** : → *set 26*
16. **insulator set** : → *set 27*
17. **insulator string** : → *string 2*
18. **insulator string** : → *string 3*
19. **line-post insulator** : a rigid insulator consisting of one or more components of insulating material permanently assembled with a metal base and intended to be mounted rigidly on a supporting structure. ★ isolateur rigide à socle → *isolateur 30.* R стержневой линейный опорный изолятор. D Freileitungsstützer. E aislador rígido de peana. I isolatore rigido a base. N lijnsteunisolator. P izolator liniowy wsporczy. S LP-isolator. (471)
20. **long rod insulator** : an insulator comprising an insulating part having an approximately cylindrical core, with or without sheds, and external or internal fixing devices attached to each end. ★ isolateur à long fût → *isolateur 17.* R стержневой подвесной изолятор. D Langstabisolator. E aislador tipo bastón. I isolatore a bastone. N staafisolator. P izolator długopniowy. S stavisolator. (471)
21. **multi-element insulator** : an insulator which has an insulating body consisting of two or more disc or bell-shaped insulating elements permanently assembled together and to the fixing device(s). *Note.* — The term "multiple cone insulator" is included in this definition. ★ isolateur à éléments multiples → *isolateur 15.* R многоэлементный изолятор. D mehrteiligzusammengesetzter Isolator. E aislador de elementos múltiples. I isolatore a più elementi. N samengestelde isolator. P izolator wieloczęściowy. S isolator av flera element; flerisolantisolator. (471)
22. **outdoor post insulator** : a post insulator intended to be exposed to outdoor atmospheric conditions. ★ support isolant d'extérieur → *support 37.* R опорный изолятор наружной установки. D Freiluft-Stützisolator. E aislador de apoyo de exterior. I isolatore portante per esterno. N steunisolator voor buitenopstelling. P izolator wsporczy napowietrzny. S utomhusstödisolator. (471)
23. **pedestal post insulator** : a post insulator having two metal parts, a "cap" partly embracing an insulating component and a «pedestal» cemented into a recess in the insulating component; the cap normally has tapped holes and the pedestal a flange with plain holes for attachment by bolts or screws. ★ support isolant à capot et embase → *support 35.* R шпорный изолятор с шапкой и гнездом. D Stielflansch-Stützisolator. E aislador de apoyo de caperuza y peana. I isolatore portante a cappa e base. N steunisolator met ingekit voetstuk. P izolator wsporczy trzonowy. S stödisolator av kåppinntyp. (471)
24. **pin insulator** : a rigid insulator consisting of an insulating component intended to be mounted rigidly on a supporting structure by means of a pin passing up inside the insulating component which consists of one or more pieces of insulating material permanently connected together. ★ isolateur rigide à tige → *isolateur 31.* R штыревой линейный изолятор. D Stützenisolator. E aislador rígido de vástago. I isolatore rigido a perno. N klokisolator. P izolator stojący. S pinnisolator. (471,811)
25. **post insulator** : an insulator intended to give rigid support to a live part which is to be insulated from earth or from another live part. *Note.* — A post insulator may be an assembly of a number of post insulator units. ★ support isolant → *support 33.* R изолирующая опора. D Stützisolator. E aislador de apoyo. I isolatore portante. N steunisolator. P izolator wsporczy. S stödisolator. (471)
26. **post insulator unit** : a constituent part of a post insulator consisting of a permanent assembly of one or more insulating parts complete with fixing devices designed to facilitate attachment to it. ★ élément de support isolant → *élément 48.* R элемент изолирующей опоры. D Stützisolatorelement. E elemento de aislador de apoyo. I elemento di colonna. N steunisolatorelement. P element kolumny izolatorów wsporczych. S stödisolatorelement. (471)
27. **rigid insulator** : an insulator intended to give rigid support to an overhead line conductor and to be stressed mainly by bending and compressive loads. ★ isolateur rigide → *isolateur 29.* R опорный линейный изолятор. D starrer Isolator. E aislador rígido. I isolatore rigido. N steunisolator. P izolator sztywny. S linjestödisolator. (471)
28. **section insulator** : a sectioning point formed by insulators inserted in a continuous run of contact line, with skids or similar devices to maintain continuous current collection. ★ isolateur de section → *isolateur 23.* R секционный изолятор. D Streckentrenner. E aislador de sección. I isolatore di sezione. N leidingonderbreker. P izolator sekcyjny. S sektionsisolator. (811)
29. **shackle insulator** : an insulator consisting of one component of insulating material intended to be secured to the structure by means of a spindle passing through it. ★ isolateur d'arrêt → *isolateur 22.* R анкерный изолятор. D Schäckelisolator. E aislador tipo polea. I isolatore per amarraggio (a foro passante). N draadondersteuningsisolator. P izolator sworzniowy szaklowy; izolator szpulowy. S rullisolator. (471)
30. **shed of an insulator** : → *shed 1*
31. **solid-core insulator** : an insulator of which the core is solid and composed only of homogeneous insulating material. ★ isolateur a fût massif → *isolateur 16.* R стержневой изолятор. D Vollkern-Isolator. E aislador de núcleo macizo. I isolatore a nucleo pieno. N massieve isolator. P izolator pniowy. S massiv isolator. (471)
32. **stabilized insulator** : an insulator having the whole surface of the insulating parts covered with high resistance coating e.g. semi-conducting glaze. *Note.* — An insulator with high resistance coating or semiconducting glaze applied to small areas of the insulating parts to reduce local electrical stresses is sometimes called a fringe glazed insulator. ★ isolateur stabilisé → *isolateur 32.* R стабилизированный изолятор. D Isolator mit halbleitender Glasur. E aislador estabilizado. I isolatore stabilizzato. N isolator met halfgeleidende laag. P izolator stabilizowany. S isolator med halvledande glasyr. (471)
33. **strain insulator** : an insulator placed in a structural support such as a guy or span wire to isolate a portion of the support or to prevent current flow through the support. ★ noix d'ancrage → *noix 2.* R анкерный изолятор. D Abspann-Isolator. E nuez de anclaje. I isolatore per tirante. N tui-isolator. P izolator odciągowy. S stagisolator. (471)
34. **strain insulator** (in electric traction) : an insulator with longitudinal grooves, pierced with two mutually perpendicular holes, so that the insulating material is loaded in compression.

★ noix → *noix 1.* R натяжной изолятор (в электрической тяге). D Nuß- oder Eiisolator. E aislador tensor; (aislador) nuez. I isolatore a noce. N ..... P izolator jajowy. S äggisolator. (811)

35. **string insulator unit** : → *unit 61*
36. **suspension insulator** (in electric traction) (*Syn.* disc insulator) : a component of a string of insulators capable of being loaded in tension. ★ isolateur de suspension → *isolateur 24.* R подвесной изолятор; дисковый изолятор (в электрической тяге). D Hängeisolator. E aislador de suspensión (en tracción eléctrica). I isolatore di sospensione. N kettingisolator. P izolator wiszący. S kedjeisolator. (811)

intake

1. **annual limit on intake** : → *limit 2*
2. **intake** : the intentional or accidental introduction, for instance by ingestion, inhalation or cutaneous transfer, of radioactive materials into the body. ★ incorporation → *incorporation 1.* R попадание (веществ в организм). D Aktivitätszufuhr. E incorporación. I introduzione/incorporazione. N opgenomen straling. P wchłanianie. S intag. (881)

integral

1. **Fourier integral** (*Syn.* inverse Fourier transform) : the representation of a function $f(t)$ by an integral of the form

$$f(t) = \frac{1}{2\pi} \int_{-\infty}^{+\infty} F(j\omega)\, e^{j\omega t}\, d\omega$$

★ intégrale de Fourier → *intégrale 2.* R интеграл Фурье обратное; преобразование Фурье. D Fourier-Integral; inverse Fourier-Transformation. E integral de Fourier; transformada inversa de Fourier. I integrale di Fourier; (trasformata inversa di Fourier). N Fourierintegraal; inverse Fouriertransformatie. P transformata Fouriera odwrotna; całka Fouriera. S invers Fourier-transform. (101)

2. **integral circulating circuit component** : → *circulating circuit 3*
3. **integral slot winding** : → *winding 33*
4. **Joule integral** (*Syn.* I^2t) : → I^2t 1
5. **line integral** : an integral along a directed path whose differential element is a product of a scalar or vector quantity and the vector line element. *Note.* — This integral may be a scalar or a vector quantity according to the kind of product. ★ intégrale de ligne → *ligne 45.* R линейный интеграл; криволинейный интеграл. D Linienintegral. E integral de línea; integral curvilínea. I integrale di linea; integrale curvilineo. N lijnintegraal. P całka liniowa. S linjeintegral. (101)
6. **scalar line integral** (of a vector quantity) : a line integral whose differential element is the scalar product of the quantity and the vector line element. ★ circulation → *circulation 5.* R скалярный линейный интеграл (векторной величины). D skalares Linienintegral (einer vektoriellen Größe). E circulación (de una magnitud vectorial). I circolazione (di una grandezza vettoriale). N scalaire lijnintegraal. P całka liniowa skalarna (wielkości wektorowej). S skalär linjeintegral. (101)
7. **surface integral** : an integral over a directed surface whose differential element is a product of a scalar or vector quantity and the vector surface element. *Note.* — This integral may be a scalar or a vector quantity according to the kind of product. ★ intégrale de surface → *intégrale 6.* R поверхностный интеграл. D Flächenintegral. E integral de superficie. I integrale di superficie. N oppervlakte-integraal. P całka powierzchniowa. S ytintegral. (101)
8. **volume integral** : an integral over a volume whose differential element is the product of a scalar or a vector quantity and the volume element. ★ intégrale de volume → *volume 5.* R объемный интеграл. D Volumenintegral. E integral de volumen. I integrale di volume. N volume-integraal. P całka objętościowa. S rymdintegral. (101)

integral-action

1. **integral action** (*Syn.* I-action) : type of continuous (floating) action in which the rate of change (time derivative) of the output variable is proportional to the concomitant value of the input variable (i.e., in the case of a controller, of the system deviation). ★ action par intégration → *action 17.* R интегральное воздействие; Воздействие. D integrierendes Verhalten; I-Verhalten. E acción integral; acción I. I azione integrale I. N integrerende werking; I-actie. P działanie całkujące; działanie I. S integralverkan; I-verkan. (351)
2. **integral-action coefficient** : → *coefficient 29*
3. **integral-action time constant** : → *time constant 10*

integrally

1. **integrally fused circuit-breaker** : → *circuit-breaker 13*

integrated

1. **integrated microcircuit** : → *microcircuit 1*
2. **integrated optical circuit** : → *circuit 94*
3. **PIN-FET integrated receiver** : → *receiver 6*
4. **transmission of integrated totals** (*Syn.* telecounting) : → *telecounting 1*

integrated circuit

1. **film integrated circuit** : an integrated microcircuit whose elements and interconnections are films formed on an insulating substrate. ★ circuit intégré à couches → *circuit intégré 2.* R пленочная интегральная схема. D integrierte Schichtschaltung. E circuito integrado de película. I circuito integrato a film. N geïntegreerde filmschakeling. P układ scalony warstwowy. S (integrerad) filmkrets. (521)
2. **integrated circuit** : a circuit in which a number of circuit elements are inseparably associated and electrically interconnected such that, for the purpose of specification, testing, application and maintenance, it is considered indivisible. *Note.* — For this definition, a circuit element does not have an envelope or external connection and is not specified or sold as a separate item. ★ circuit intégré → *circuit intégré 1.* R интегральная схема. D integrierte Schaltung. E circuito integrado. I circuito integrato. N geïntegreerde schakeling. P układ scalony. S integrerad krets. (521)
3. **semiconductor integrated circuit** : an integrated microcircuit whose elements and interconnections are formed within and upon a semiconductor substrate. ★ circuit intégré à semiconducteurs → *circuit intégré 5.* R полупроводниковая интегральная схема. D integrierte Halbleiterschaltung. E circuito integrado semiconductor. I circuito integrato a semiconduttore. N geïntegreerde halfgeleiderschakeling. P układ scalony półprzewodnikowy. S integrerad halvledarkrets. (521)
4. **thick-film integrated circuit** : a film integrated circuit whose films are formed by printing, serigraphy or other related techniques. ★ circuit intégré à couches épaisses → *circuit intégré 3.* R толстопленочная интегральная схема. D integrierte Dickschichtschaltung. E circuito integrado de película gruesa. I circuito integrato a film spesso. N geïntegreerde dikkefilmschakeling. P układ scalony grubowarstwowy. S (integrerad) tjockfilmskrets. (521)
5. **thin-film integrated circuit** : a film integrated circuit whose films are formed by vacuum deposition techniques, possibly supplemented by other deposition techniques. ★ circuit intégré à couches minces → *circuit intégré 4.* R тонкопленочная интегральная схема. D integrierte Dünnschichtschaltung. E circuito integrado de película delgada. I circuito integrato a film sottile. N geïntegreerde dunnefilmschakeling. P układ scalony cienkowarstwowy. S (integrerad) tunnfilmskrets. (521)

integrating

1. **integrating circuit** (*Syn.* integrator) : → *integrator 2*
2. **integrating dosemeter** : → *dosemeter 11*
3. **integrating ionization chamber** : → *ionization chamber 14*
4. **integrating (measuring) instrument** : → *measuring instrument 11*
5. **integrating photometer** : → *photometer 4*
6. **integrating sphere** : → *sphere 1*

integration

1. **demand integration period** : the interval of time of an hour (half-hour) (quarter-hour) etc., over which the electricity consumed is integrated in order to determine the average hourly (half-hourly) (quarter-hourly) etc., demand. ★ période d'intégration de la puissance → *période 21.* R период суммирования присоединенной мощности. D Registrierperiode; Zeit für Leistungsmittelung. E período de integración de la potencia. I periodo di integrazione della

potenza. N registratietijdvak; meettijdvak. P okres całkowania. S mätperiod; integreringsperiod (för effekt). (691)

integrator

1. **charge integrator** (*Syn.* radiation charge meter) : an assembly intended to measure the electric charge by integration of the current provided from a radiation detector. ★ chargemètre de rayonnement → *chargemètre 1.* R интегратор тока; измеритель заряда ионизирующего излучения. D Strahlungsmeßgerät nach der Integrationsmethode. E medidor de carga de radiación. I coulombometro di radiazione. N ladingsmeter voor straling. P integrator ładunkowy; ładunkowy miernik promieniowania. S laddningsmätare. (391)
2. **integrator** (*Syn.* integrating circuit) : a device for producing an output quantity proportional to the time integral of the input quantity. ★ intégrateur → *intégrateur 3.* R интегрирующее устройство. D Integrierer; Integrationsschaltung. E integrador; circuito de integración. I (circuito) integratore. N integrator; integrerende schakeling. P układ całkujący; integrator. S integreringskrets. (702)

integrity

1. **digit sequence integrity** : the property of a digital transmission channel, circuit, or connection, that permits a digital signal to be conveyed over it without change in the sequence of the signal elements. ★ intégrité de la suite des éléments numériques → *intégrité 1.* R целостность последовательности символов. D Vollständigkeit der Digitalfolge. E integridad de la secuencia de dígitos; integridad de la continuidad de elementos numéricos. I integrità della sequenza di cifra. N integriteit in de cijfervolgorde. P niepodzielność sekwencji elementów cyfrowych. S ..... (704)
2. **octet sequence integrity** : the property of a digital transmission channel, circuit, or connection which permits a digital signal to be conveyed over it without change in the sequence of the octets. ★ intégrité de la suite des octets → *intégrité 2.* R целостность последовательности октетов. D Vollständigkeit der Oktettfolge. E integridad de la secuencia de octetes. I integrità della sequenza degli ottetti. N integriteit in de volgorde van de octets. P niepodzielność sekwencji oktetów. S ..... (704)
3. **service integrity** : the ability of a service, once obtained, to be provided without excessive impairments. *Note.* — For a telecommunication service this is characterized by the transmission performance of the system used. ★ intégrité de service → *intégrité 3.* R стабильность услуги. D Dienstintegrität. E integridad del servicio. I integrità del servizio. N integriteit van een dienst(verlening). P pełnosprawność serwisu. S tjänsteintegritet. (191)

intelligibility

1. **intelligibility** (*Syn.* articulation) : → *articulation 2*
2. **intelligibility (index)** : the percentage of words of a text which are correctly identified, either directly or with the help of the context, under given conditions over a complete connection. ★ (indice d') intelligibilité → *intelligibilité 1.* R коэффициент словесной разборчивости. D Verständlichkeit von Wörtern (eines Textes). E (índice de) inteligibilidad. I (indice di) intelligibilità. N woordverstaanbaarheidspercentage. P wskaźnik wyrazistości. S relativ orduppfattbarhet. (722)
3. **threshold of speech intelligibility** : → *threshold 28*

intelligible

1. **intelligible crosstalk** : → *crosstalk 11*

intensifier

1. **image intensifier** : an electronic device for increasing the brightness of a fluoroscopic or other optical image. ★ intensificateur d'image → *intensificateur 1.* R усилитель изображения. D Bildverstärker. E intensificador de imagen. I intensificatore di immagine. N beeldversterker. P wzmacniacz obrazu. S bildförstärkare. (881)
2. **image intensifier tube** : → *tube 44*
3. **intensifier electrode** (*Syn.* post-deflection accelerator) : → *accelerator 7*

intensifying

1. **intensifying screen** : → *screen 10*

intensity

1. **average daily peak hour traffic intensity** : the average busy hour carried traffic intensity of several days. ★ moyenne du trafic des heures de pointe → *moyen 52.* D mittlerer Tagesspitzenverkehr. P godzina ruchu przeciętna dzienna. (715)
2. **call intensity** : the number of call attempts over a specified time interval divided by the duration of this interval. *Note.* — The call intensity refers to one or the other direction of call set up, or to the sum of both. ★ intensité d'appel → *intensité 5.* D Anrufrate; Anruffolgedichte. P intensywność wywołań. (715)
3. **(colour) intensity control** (*Syn.* (colour) saturation control) : → *control 36*
4. **constant failure intensity period** : → *period 5*
5. **effective intensity** (of a flashing light) : luminous intensity of a fixed light, of the same relative spectral distribution as the flashing light, which would have the same luminous range (or visual range in aviation terminology) as the flashing light under identical conditions of observation. *Note.* — For practical purposes, a conventional effective intensity may be evaluated for a flashing light from photometric data by an agreed method. ★ intensité effective → *intensité 16.* R эффективная сила света (вспыхивающего огня). D effektive Lichtstärke (eines Taktfeuers). E intensidad efectiva (de una luz de destellos). I intensità effettiva. N effectieve lichtsterkte (van een flits). P światłość efektywna (błysku światła). S effektiv ljusstyrka. (845)
6. **equivalent random traffic intensity** : the theoretical Poisson traffic intensity that, when offered to a theoretical circuit group, produces an overflow traffic intensity distribution with a mean and variance equal to that of a given offered traffic. *Note.* — The concept of equivalent random traffic intensity makes it possible to take into account traffic variance in an indirect way ; the theoretical circuit group is called "equivalent random circuit group". ★ intensité de trafic équivalente → *intensité 13.* D äquivalentes Poisson-Verkehrsangebot. P ruch równoważny puasonowskiemu. (715)
7. **failure intensity acceleration factor** : → *factor 76*
8. **high intensity discharge lamp** : → *lamp 22*
9. **(instantaneous) failure intensity** ($z(t)$) : the limit, if this exists, of the ratio of the mean number of failures of a repaired item in a time interval, $(t, t + \Delta t)$, and the length of this interval, Δt, when the length of the time interval tends to zero. *Note.* — The instantaneous failure intensity is expressed by the formula as

$$z(t) = \lim_{\Delta t \to 0+} \frac{E[N(t + \Delta t) - N(t)]}{\Delta t}$$

where $N(t)$ is the number of failures in the time interval $(0, t)$, where E denotes the expectation. ★ intensité (instantanée) de défaillance → *intensité 19.* R параметр потока отказов. D momentane Ausfalldichte. E intensidad (instantánea) de fallo. I intensità di guasto (istantanea). N (momentele) storingsintensiteit. P strumień uszkodzeń (chwilowy). S (momentan) felintensitet. (191)
10. **intensity** : the square of the electric field magnitude of an electromagnetic wave. *Note.* — Intensity is proportional to irradiance or to power flux density and is sometimes used in place of these terms when only relative values are important. ★ intensité → *intensité 3.* R интенсивность (излучения). D Leistung. E intensidad. I intensità. N intensiteit. P ..... S ..... (731)
11. **mean failure intensity** $\bar{z}(t_1, t_2)$: the mean of the instantaneous failure intensity over a given time interval, (t_1, t_2). *Note.* — The mean failure intensity is related to instantaneous failure intensity $z(t)$ as

$$\bar{z}(t_1, t_2) = \frac{1}{t_2 - t_1} \int_{t_1}^{t_2} z(t)\,\mathrm{d}t$$

★ intensité moyenne de défaillance → *intensité 20.* R средний параметр потока отказов. D mittlere Ausfalldichte. E intensidad media de fallos. I intensità media di guasto. N gemiddelde storingsintensiteit. P strumień uszkodzeń średni. S medelfelintensitet. (191)
12. **partial discharge intensity** : a general term describing the amount of discharge occurring under given conditions, without specifying measuring method or units. ★ intensité de décharges partielles → *intensité 6.* R интенсивность частичного разряда. D Teilentladungsintensität. E nivel de

descargas parciales. I intensità delle scariche parziali. N ontladingsgrootte. P intensywność wyładowania niezupełnego. S urladdningsintensitet. (212)

13. **peak intensity wavelength** : → *wavelength 12*
14. **photon intensity** (of a source, in a given direction) (I_p; I) : quotient of the photon flux $d\Phi_p$ leaving the source and propagated in the element of solide angle $d\Omega$ containing the given direction, by the element of solid angle.

$$I_p = \frac{d\Phi_p}{d\Omega}$$

Unit : $s^{-1} \cdot sr^{-1}$. ★ intensité photonique → *intensité 21.* R фотонная сила излучения (источника в данном направлении). D Photonenstrahlstärke (einer Strahlungsquelle, in einer gegeben Richtung). E intensidad fotónica. I intensità fotonica. N fotonenintensiteit. P gęstość fotonów. S fotonintensitet. (845)

15. **radiant intensity** : the radiant power leaving a source and propagated in an element of solid angle containing a given direction divided by the element of solid angle. ★ intensité énergétique → *intensité 17.* R сила излучения. D Strahlungsintensität. E intensidad radiante. I intensità radiante. N stralingsintensiteit; stralingssterkte. P natężenie promieniowania. S strålningsstyrka. (731)
16. **radiant intensity** (of a source, in a given direction) (I_e; I) : quotient of the radiant flux $d\Phi_e$ leaving the source and propagated in the element of solid angle $d\Omega$ containing the given direction, by the element of solid angle.

$$I_e = \frac{d\Phi_e}{d\Omega}$$

Unit: $W \cdot sr^{-1}$. ★ intensité énergétique → *intensité 18.* R энергетическая сила света (источника а данном направлении); сила излучения. D Strahlstärke (einer Strahlungsquelle, in einer gegeben Richtung). E intensidad radiante. I intensità energetica. N stralingssterkte; stralingsintensiteit. P natężenie promieniowania. S strålningsstyrka. (841,845)

17. **radiation intensity** (in a given direction) : the power radiated by a coherent point source in an element of solid angle comprising a specified direction, divided by the solid angle. *Note.* — A antenna can be considered as a point source provided that its radiation is measured in its far field. ★ intensité de rayonnement → *intensité 9.* D Strahlungsintensität (in einer gegebenen Richtung). P natężenie promieniowania (w danym kierunku). (705)
18. **radiation intensity** (from an antenna in a given direction) : in a given direction and in the far-field region, the power radiated per unit solid angle by an antenna. *Notes. 1* — The radiation intensity is expressed in watts per steradian. *2* — The radiation intensity may be considered to be the sum of radiation intensities of two orthogonally polarized components. ★ intensité de rayonnement → *intensité 10.* R интенсивность излучения (антенны в заданном направлении). D Strahlungsintensität (einer Antenne in eine bestimmte Richtung). E intensidad de radiación (de una antena, en una dirección dada). I intensità d'irradiazione (potenza/angolo solido), N stralingsintensiteit. P intensywność promieniowania (ze źródła w danym kierunku). S strålningsstyrka. (712)
19. **sound intensity** (*Syn.* sound power density) : → *density 31*
20. **sound intensity level** : → *level 86*
21. **traffic carried (intensity)** (*Syn.* traffic load) : traffic intensity of the traffic served by a particular pool resources. *Note.* — General practice is to estimate the traffic intensity as an average over a specified time interval, for example the busy hour. ★ (intensité du) trafic écoulé → *trafic 13.* D Verkehrslast. P ruch załatwiany. (715)
22. **traffic intensity** : the number of simultaneously busy resources in a particular pool of resources. *Note.* — A unit of traffic intensity is the erlang. ★ intensité de trafic → *intensité 12.* D Verkehrswert. P intensywność ruchu. (715)

intent

1. **call intent** : for a given telecommunication network user, the desire to establish a call to a given user, terminal or service. *Note.* — A call intent is normally manifested by one or more call attempts. However, call attempts may be suppressed or delayed by the user, e.g. if he expects a poor quality of service at a particular time. ★ intention d'appel → *intention 1.* D Verbindungswunsch. P zamierzenie połączenia. (715)

interaction

1. **electromagnetic interaction** : interaction attributable to an electromagnectic field, such as : interaction between photons and charged particles in atoms ; forces on electrons in atoms ; forces between atoms or molecules. ★ interaction électromagnétique → *interaction 3.* R электромагнитное взаимодействие. D elektromagnetische Wechselwirkung. E interacción electromagnética. I interazione elettromagnetica. N elektromagnetische wisselwerking. P oddziaływanie elektromagnetyczne. S elektromagnetisk växelverkan. (881)
2. **interaction** : *1)* A generic term referring to forces between particles (including photons) in atoms or between particles that collide. *2)* This term also refers to events involving two or more particles. ★ interaction → *interaction 2.* R взаимодействие. D Wechselwirkung. E interacción. I interazione. N wisselwerking. P oddziaływanie. S växelverkan. (881)
3. **interaction gap** : → *gap 14*
4. **interaction region** : → *region 11*
5. **non-elastic (interaction) cross-section** : → *cross-section 21*

interactive

1. **interactive videography** (*Syn.* videotex) : → *videotex 1*

interband

1. **interband transmission** : → *transmission 34*

intercarrier

1. **intercarrier sound** : → *sound 9*

intercell

1. **intercell connector** : → *connector 31*

interception

1. **changed address interception** : automatic advice provided by the network to a calling terminal of a called terminal's new address followed either by call redirection or by release of the calling terminal. *Note.* — It is also possible to simply send a service signal followed by release. ★ intervention pour transfert d'abonné → *intervention 4.* R перехват измененных номеров. D Adressenänderungshinweis. E intervención por cambio de número de llamada. I intervento per indirizzo cambiato. N adreswijzigingsbericht. P informacja o zmianie numeru. S adressändringsuppgift. (721)

interchange

1. **time-slot interchange** : the transfer of information from one time slot to another between incoming and outgoing time division highways. ★ échange de créneaux temporels → *échange 2.* R обмен временными интервалами. D Zeitlagenwechsel. E cambio de ranuras de tiempo. I interscambio di intervallo di tempo. N tijdsleufwisseling. P komutacja ze zmianą szczeliny czasowej. S tidluckebyte. (714)

interchangeability

1. **accessory of limited interchangeability** : → *accessory 3*

interchangeable

1. **interchangeable** : a component is interchangeable when it meets the original performance specifications and is intermountable. in the case of connectors, interchangeability applies only to connector mated sets, since individual connectors are not necessarily intermateable. ★ interchangeable → *interchangeable 4.* R компонент взаимозаменяемый. D austauschbar. E intercambiable. I intercambiabile. N verwisselbaar. P wymienny. S utbytbar. (581)
2. **interchangeable accessory** : → *accessory 4*

interchannel

1. **interchannel interference** : → *interference 7*

inter-character

1. **inter-character rest condition** : → *condition 13*

inter-circuit

1. **inter-circuit wiring** : → *wiring 3*

intercom

1. **intercom** (*Syn.* intercommunication station) : → *station 14*

intercommunication

1. **intercommunication station** : → *station 14*

interconnected

1. **hunting of interconnected synchronous machines** : → *hunting 5*
2. **interconnected operation** : → *operation 26*
3. **interconnected systems** : → *system 92*

interconnection

1. **interconnection** : the connection of distinct networks to each other. ★ interconnexion → *interconnexion 1.* R обединение. D Zusammenschluß; Zusammenschaltung. E interconexión. I interconnessione. N doorverbinding. P połączenie (członów urządzenia). S sammankoppling. (151)
2. **interconnection** (of power systems) : a single or multiple transmission link between transmission systems enabling electricity to be exchanged between these systems by means of circuits and/or transformers. ★ interconnexion → *interconnexion 2.* R межсистемная связь. D Verbund. E interconexión (de redes eléctricas); interconexión (de sistemas de energía). I interconnessione (di reti). N (net)koppeling. P połączenie (systemów elektroenergetycznych). S förbindelse; länk. (601)

intercontinental

1. **intercontinental circuit** : → *circuit 96*
2. **prefix giving access to the intercontinental telex network** : → *prefix 2*

inter-dependent

1. **inter-dependent mechanical system** : → *mechanical system 7*

interelectrode

1. **interelectrode capacitance** : → *capacitance 10*

interface

1. **cathode interface layer** : → *layer 2*
2. **connector interface** : the two surfaces of mating connectors which face each other when mated. ★ interface de connecteur → *interface 3.* R поверхность стыка в соединителе. D Steckverbinder-Stirnflächen. E intercara de conector. I interfaccia del connettore. N connectorraakvlakken. P stycznia złącza. S mötande ytor i don. (581)
3. **interface** : a shared boundary between two functional units defined by common physical interconnection characteristics, signal characteristics and functional characteristics of the interchange circuits. ★ jonction → *jonction 7.* R стык. D Schnittstelle. E interfase; interfaz. I interfaccia. N interface. P styk; interfejs. S gränssnitt. (721)
4. **interface circuit** : → *circuit 97*
5. **interface (specification)** : a specification of the common physical interconnection characteristics, signal characteristics and functional characteristics at an interface. ★ (spécification de) jonction → *jonction 37.* R стык (технические требования). D Schnittstellenbeschreibung. E especificación de interfase. I specifiche di interfaccia. N koppelvlak(specificatie); interface(specificatie). P parametry styku; parametry interfejsu. S gränssnittsspecifikation. (721)

interfacial

1. **interfacial seal** : → *seal 9*
2. **interfacial tension** : → *tension 2*

interference

1. **axial interference microscopy** (*Syn.* slab interferometry) : → *interferometry 2*
2. **discontinuous interference** : electromagnetic interference occuring during certain time intervals separated by interference-free intervals. ★ brouillage intermittent → *brouillage 6.* R прерывистая помеха. D diskontinuierliche Beeinflussung. E interferencia intermitente. I interferenza intermittente. N intermitterende storing. P zakłócenie nieciągłe. S intermittent störning. (161)
3. **earth-coupled interference** (*Syn.* ground-coupled interference (USA)) : electromagnetic interference resulting from an electromagnetic disturbance coupled from one circuit to another through a common earth or ground return path. ★ brouillage par couplage par la terre → *brouillage 10.* R помеха, образуемая в контуре заземления. D erdgekoppelte Störung. E interferencia por acoplamiento por (medio de) la tierra. I interferenza per accoppiamento attraverso la terra. N storing door koppeling van aarde. P zakłócenie poprzez uziemienie. S koppling över jord. (161)
4. **electromagnetic interference** (*Syn.* EMI (abbreviation)) : degradation of the performance of an equipment, transmission channel or system caused by an electromagnetic disturbance. *Notes. 1* — The English words "interference" and "disturbance" are often used indiscriminately. *2* — In French, the term "perturbation électromagnétique" is also used with the meaning of "brouillage électromagnétique". ★ brouillage électromagnétique → *brouillage 4.* R электромагнитная помеха. D elektromagnetische Überlagerung; EMÜ (Abkürzung). E interferencia electromagnética; EMI (abreviatura). I interferenza elettromagnetica; IEM (abbreviazione). N elektromagnetische storing. P interferencja elektromagnetyczna. S elektromagnetisk störning. (161,702)
5. **ground-coupled interference** (*Syn.* earth-coupled interference) : → *interference 3*
6. **immunity to interference** : → *immunity 7*
7. **interchannel interference** : in a given transmission channel, the interference resulting from signals in one or more other channels. *Examples* of interchannel interference : crosstalk in telephony ; cross-view and cross-colour in television. ★ brouillage entre voies → *brouillage 5.* R межканальная помеха. D Kanalüberlagerung. E interferencia entre canales. I interferenza tra canali (vie). N overspraak. P interferencja międzykanałowa. S kanalinterferens. (702)
8. **interference** (to a wanted signal) : disturbance of the reception of a wanted signal caused by interfering signals, noise or electromagnetic disturbance. ★ brouillage → *brouillage 1.* R помеха (полезному сигналу). D Überlagerung (eines gewünschten Signals). E interferencia (de una señal útil). I interferenza (su di un segnale utile). N storing (bij een gewenst signaal). P interferencja (w sygnale użytecznym). S interferens. (702)
9. **interference fading** : → *fading 12*
10. **interference filter** : → *filter 26*
11. **(interference) fringes** : → *fringe 1*
12. **interference pattern** : → *pattern 14*
13. **interference suppression** : → *suppression 3*
14. **intersymbol interference** : disturbance due to the overflowing into the signal element representing a wanted digit of signal elements representing preceding or following digits. ★ brouillage intersymbole → *brouillage 7.* R межзнаковая помеха. D Überlagerung verschiedener Zeichen; Interzeichenüberlagerung. E interferencia entre símbolos. I interferenza fra simboli. N intersymboolstoring; intersymboolvervorming. P interferencja międzyelementowa. S teckeninterferens. (702)
15. **inter-system interference** : electromagnetic interference in one system due to an electromagnetic disturbance produced by another system. ★ brouillage inter-systèmes → *brouillage 8.* R межсистемная помеха. D externe Systembeeinflussung. E interferencia entre sistemas. I interferenza di origine esterna. N storing tussen systemen. P zakłócenie międzysystemowe. S störning mellan system. (161)
16. **intra-system interference** : electromagnetic interference occuring in a system due to an electromagnetic disturbance produced within the same system. ★ brouillage intra-système → *brouillage 9.* R внутрисистемная помеха. D interne Systembeeinflussung. E interferencia de origen interno. I interferenza di origine interna. N storing binnen een systeem. P zakłócenie wewnątrzsystemowe. S störning inom system. (161)
17. **limit of interference** : → *limit 10*
18. **phase interference** (*Syn.* wave interference) : a phenomenon resulting from the superposition of two or more coherent oscillations or waves of equal or nearly equal frequency and appearing as a variation of the resulting amplitude, in space in the form of interference patterns, and in time in the form of beats. ★ interférence → *interférence 3.* R интерференция. D Phasenüberlagerung; Wellenüberlagerung. E interferencia de

onda; interferencia de fase. I interferenza. N fasestoring. P interferencja fazowa; interferencja falowa. S fasinterferens. (702,705,731,801,845)

19. **radio frequency interference** (*Syn.* RFI (abbreviation)) : degradation of the reception of a wanted signal caused by radio frequency disturbance. *Note.* — The English words "interference" and "disturbance" are often used indiscriminately. The expression "radio frequency interference" is also commonly applied to a radio frequency disturbance or an unwanted signal. ★ brouillage (radioélectrique) → *brouillage 12.* R радиочастотная помеха; радиопомеха. D Hochfrequente Beeinflussung. E interferencia (radioeléctrica). I interferenza radioelettrica. N radio(frequente) storing. P zakłócenie radioelektryczne. S radiostörning. (161)
20. **sideband interference** : interference produced in a transmission channel by a sideband of a modulated signal occupying a nearby frequency band. ★ brouillage par une bande latérale → *brouillage 11.* R помеха боковой полосы. D Seitenbandüberlagerung. E interferencia por banda lateral. I interferenza da banda laterale. N zijbandinterferentie. P zakłócenie od wstęgi bocznej. S sidbandsinterferens. (702)
21. **signal/interference ratio** (*Syn.* signal to interference ratio) : → *ratio 85*
22. **signal to interference ratio** : → *ratio 85*
23. **wave interference** (*Syn.* phase interference) : → *interference 18*

interfering

1. **interfering signal** : → *signal 109*

interferometer

1. **interferometer** : an instrument that employs the interference of light waves for purposes of measurement. ★ interféromètre → *interféromètre 1.* R интерферометр. D Interferometer. E interferómetro. I interferometro. N interferometer. P interferometr. S interferometer. (731)

interferometry

1. **axial slab interferometry** (*Syn.* slab interferometry) : → *interferometry 2*
2. **slab interferometry** (*Syn.* axial slab interferometry; axial interference microscopy) : the method whereby the refractive index profile of an optical fibre is measured by using an interferometer which scans across the end face, perpendicular to the optic axis, of a thin slab of the optical fibre. ★ interférométrie axiale → *interférométrie 1.* R интерферометрия среза; интерферометрия осевого среза. D axiale Interferenzmikroskopie; axiale Scheibeninterferometrie; Scheibeninterferometrie. E interferometría slab; interferometría axial slab; microscopio de interferencia axial. I interferometria su campione planare; microscopia ad interferenza assiale. N plak-interferometrie; axiale-plak-interferometrie. P interferometria płytkowa; interferometria poosiowa. S axiell interferometri. (731)
3. **transverse interferometry** : the method used to measure the refractive index profile of an optical fibre by placing it in an interferometer and illuminating the fibre transversely to the fibre axis. ★ interférométrie transversale → *interférométrie 2.* R поперечная интерферометрия. D radiale Interferometrie. E interferómetro transversal. I interferometria trasversale. N transversale interferometrie. P interferometria poprzeczna. S transversell interferometri. (731)

interflection

1. **interflection** (*Syn.* interreflection) : → *interreflection 1*

interlace

1. **interlace** : ideal positioning of the fields in an interlaced scanning system. ★ entrelacement → *entrelacement 2.* R перемежение. (723)

interlaced

1. **interlaced scanning** : → *scanning 3*

interlacing

1. **interlacing factor** : → *factor 96*
2. **interlacing sequence** : → *sequence 4*
3. **pulse interlacing** (*Syn.* pulse interleaving) : a process in time division multiplexing in which pulses or groups of pulses from several sources are transmitted successively and periodically over a common channel. ★ entrelacement → *entrelacement 1.* R чередование импульсов. D Impulsverbinden. E entrecruzamiento de impulsos. I interlacciamento (di impulsi). N pulsinterliniëring. P wtrącanie impulsów. S pulsinterfoliering. (702)

interleaved

1. **character interleaved telegraphy** : → *telegraphy 4*

interleaving

1. **pulse interleaving** (*Syn.* pulse interlacing) : → *interlacing 3*

interline

1. **interline flicker** : → *flicker 9*

interlock

1. **electrical interlocks** : auxiliary contacts operated by the controlled apparatus and reacting upon the control circuit to ensure the equipment operates safely and in the required manner or sequence. ★ asservissement(s) électrique(s) → *asservissement 3.* R электрические блокировки. D elektrische Verriegelung. E enclaviamento eléctrico. I asservimento(i) elettrico(i); blocco(blocchi) elettrico(i). N elektrische vergrendeling. P blokady elektryczne uzależniające. S elektriska förreglingar. (811)
2. **interlock circuit** : → *circuit 98*
3. **interlock code** : → *code 34*
4. **(safety) interlock system** : that part of the protection system which prevents certain operations which may affect the safety of the reactor unless all prescribed conditions are met. ★ système de verrouillage (de sécurité) → *système 100.* R канал блокировки. D (Sicherheits-) Verriegelungssystem. E sistema de bloqueo (de seguridad). I apparecchiatura di interblocco di protezione. N grendelsysteem. P układ blokad awaryjnych. S (säkerhets)förreglingssystem. (392)

interlocking

1. **interlocking device** : → *device 33*
2. **interlocking switchgroup** : → *switchgroup 3*

intermateable

1. **intermateable connectors** : → *connector 32*

intermediate

1. **intermediate carrier** : → *carrier 19*
2. **intermediate distribution frame** : → *frame 34*
3. **intermediate feed antenna** : → *antenna 63*
4. **intermediate frequency rejection ratio** : → *ratio 43*
5. **intermediate neutrons** : → *neutron 9*
6. **intermediate reactor** : → *reactor 18*
7. **intermediate reference system** : → *system 93*
8. **intermediate spectrum reactor** (*Syn.* intermediate reactor) : → *reactor 18*
9. **intermediate state information** : → *information 19*
10. **intermediate support** : → *support 13*

intermediate-voltage

1. **intermediate voltage capacitor** : → *capacitor 43*
2. **intermediate voltage capacitor** : → *capacitor 44*
3. **intermediate voltage terminal** : → *terminal 14*
4. **intermediate-voltage winding** : → *winding 34*
5. **open-circuit intermediate voltage** : the voltage to earth at the intermediate voltage terminal of the capacitor divider unit when primary voltage is applied between the high voltage terminal and the low voltage terminal or the earth, the electromagnetic unit being disconnected. ★ tension intermédiaire à circuit ouvert → *tension 214.* R промежуточное напряжение при разомкнутой цепи. D Zwischenspannung bei offenem Stromkreis. E tensión intermedia a circuito abierto. I tensione intermedia a circuito aperto. N open middenspanning. P napięcie pośrednie dzielnika przekładnika napięciowo-pojemnościowe go przy odłączonym członie indukcyjnym. S mellanspänning i tomgång. (321)
6. **open-circuit intermediate voltage (of a capacitor divider)** : the voltage across the terminals of the intermediate voltage capacitor when a voltage is applied between the high-voltage and low-voltage terminals, no impedance being connected in parallel with the intermediate voltage capacitor.

★ tension intermédiaire à circuit ouvert (d'un diviseur capacitif) → *tension 215.* **R** промежуточное напряжение разомкнутой цепи (емкостного делителя). **D** mittlere Leerlaufspannung (eines kapazitiven Spannungsteilers). **E** tensión intermedia en circuito abierto (de un divisor capacitivo). **I** tensione intermedia a circuito aperto (di un divisore capacitivo). **N** nullastmiddenspanning van een capacitieve deler. **P** napięcie pośrednie jałowe (dzielnika kondensatorowego). **S** tomgångsmellanspänning. (436)

intermediate-wheel

1. **intermediate-wheel gearing** : → *gearing 3*

intermittent

1. **intermittent duty** : → *duty 8*
2. **intermittent duty** : → *duty 9*
3. **intermittent fault** : → *fault 48*
4. **intermittent fault** : → *fault 49*
5. **intermittent flow** : → *flow 8*
6. **intermittent periodic duty-type** : → *duty-type 6*
7. **intermittent periodic duty-type with starting** : → *duty-type 7*
8. **intermittent periodic duty-type with electric braking** : → *duty-type 8*
9. **intermittent rating** : → *rating 7*

intermodulation

1. **intermodulation** : a process occurring in a non-linear device or transmission medium whereby the spectral components of the input signal or signals interact to produce new components having frequencies equal to linear combinations with integral coefficients of the frequencies of the input components. *Note.* — Intermodulation may result from a single non-sinusoidal input signal or from several sinusoidal or non-sinusoidal signals applied to the same or to different inputs. ★ intermodulation → *intermodulation 5.* **R** интермодуляция. **D** Intermodulation. **E** intermodulación. **I** intermodulazione. **N** intermodulatie. **P** intermodulacja. **S** intermodulation. (161,702)
2. **intermodulation component** (*Syn.* intermodulation product) : → *product 5*
3. **intermodulation distortion** : → *distortion 47*
4. **intermodulation distortion** : → *distortion 48*
5. **intermodulation noise** : → *noise 29*
6. **intermodulation product** : → *product 5*
7. **intermodulation product order** : → *order 2*

intermountable

1. **intermountable** : two components are intermountable when their mechanical mounting parameters are identical without regard to intermateability or interchangeability. ★ montable → *montable 1.* **R** компоненты взаимоустанавливаемые. **D** mechanisch austauschbar. **E** montable. **I** montabile. **N** uitwendig verwisselbaar. **P** zamienny montażowo. **S** monteringsutbytbar. (581)

internal

1. **(apparent) internal resistance** : → *resistance 3*
2. **continuous output (of an internal combustion engine)** (*Syn.* continuous power (of an internal combustion engine)) : → *power 26*
3. **internal angle of an alternator** : → *angle 33*
4. **internal blocking** : → *blocking 12*
5. **internal burden** : → *burden 3*
6. **internal combustion set** : → *set 28*
7. **internal conversion** : → *conversion 22*
8. **internal disabled state** (*Syn.* down state) : → *state 11*
9. **internal discharge** : → *discharge 26*
10. **internal electric field** : → *field 47*
11. **internal energy** : → *energy 54*
12. **internal equivalent temperature** (*Syn.* virtual temperature) : → *temperature 67*
13. **internal fuse of a capacitor** : → *fuse 6*
14. **internal gas detector** : → *detector 12*
15. **internal gas pressure cable** : → *cable 37*
16. **internal groove sidewall** : → *sidewall 2*
17. **internal gun** : → *gun 9*
18. **internal immunity** : → *immunity 8*
19. **internal inductor** : → *inductor 17*
20. **internal insulation** : → *insulation 37*
21. **internal overvoltage** : → *overvoltage 2*
22. **internal photo-electric effect** (*Syn.* photo-conductivity) : → *photo-conductivity 1*
23. **internal synchronization** : → *synchronization 5*
24. **internal (telephone) system** : → *system 94*
25. **internal traffic** : → *traffic 9*
26. **internal triggering** : → *triggering 2*
27. **maximum service output (of an internal combustion engine)** : → *output 23*
28. **Napierian spectral internal transmittance density** : → *density 16*
29. **net brake power (of an internal combustion engine)** (*Syn.* useful service output) : → *output 71*
30. **overload output (of an internal combustion engine)** (*Syn.* overload power (of an internal combustion engine)) : → *power 99*
31. **spectral internal absorptance** : → *absorptance 2*
32. **spectral internal transmittance** : → *transmittance 4*
33. **spectral internal transmittance density** : → *density 33*
34. **standard power (of an internal combustion engine)** (*Syn.* international rated output) : → *output 15*

internally

1. **internally reflected component of daylight factor** : → *component 34*

internal-source

1. **internal-source irradiation** : → *irradiation 6*

international

1. **International Alphabet No.5** : → *alphabet 1*
2. **international circuit** : → *circuit 99*
3. **international rated output** : → *output 15*
4. **international relative sunspot number** : → *number 12*
5. **international selection sequence** : → *sequence 5*
6. **international standard** : → *standard 12*
7. **International System of Units (SI)** : → *system 95*
8. **International Telegraph Alphabet No.1** : → *alphabet 2*
9. **International Telegraph Alphabet No.2** : → *alphabet 3*
10. **International Telegraph Alphabet No.3** : → *alphabet 4*
11. **International Telegraph Alphabet No.4** : → *alphabet 5*
12. **international two-stage selection** : → *selection 9*
13. **prefix giving access to the international telex network** : → *prefix 3*

interphase

1. **interphase transformer** : → *transformer 39*

interpole

1. **interpole** (*Syn.* commutating pole) : the part of the magnetic circuit which provides the commutating flux. ★ pôle auxiliaire → *pôle 12.* **R** добавочный полюс. **D** Wendepol. **E** polo auxiliar. **I** polo ausiliario; polo di commutazione. **N** hulppool. **P** biegun pomocniczy; biegun komutacyjny. **S** kommuteringspol. (811)

interreflection

1. **interreflection** (*Syn.* interflection) : general effect of the reflections of radiation between several reflecting surfaces. ★ réflexions mutuelles → *réflexion 43.* **R** многократные отражения. **D** Mehrfachreflexion; Interflexion. **E** interreflexión. **I** riflessione mutua. **N** interreflectie. **P** odbicie wielokrotne. **S** interreflexion. (845)
2. **interreflection ratio** : → *ratio 44*

interrogation

1. **general interrogation command** : → *command 8*
2. **interrogation** : the process whereby a data station is requesting a data terminal equipment or data station to identify itself or give its status. *Note.* — In data communication, it is the master station that requests the slave station to identify itself.

★ demande d'identification → *demande 4.* R запрос идентификатора. D Stationsaufforderung. E demanda de identificación. I richiesta di identificazione. N ..... P zapytanie. S förfrågning. (721)

3. **interrogation command** : → *command 12*
4. **selective interrogation command** : → *command 20*
5. **station interrogation command** : → *command 25*

interrogative

1. **interrogative telecontrol system** (*Syn.* polling telecontrol system) : → *system 149*
2. **interrogative telecontrol system** (*Syn.* polling telecontrol system) : → *system 149*

interrupt

1. **interrupt** (*Syn.* interruption) : a suspension of a process, such as the execution of a computer program, caused by an event external to that process and performed in such a way that the process can be resumed. ★ interruption → *interruption 7.* R прерывание (в вычислительной технике). D Unterbrechung; Interrupt. E interrupción (en informática). I interruzione automatica. N onderbreking. P przerwanie (procesu). S avbrott. (714)

interruptible

1. **interruptible load** : → *load 20*

interruption

1. **interruption** (of service) (*Syn.* break (of service)) : temporary state of inability of a service to be provided, persisting for more than a given time duration, and characterized by a change beyond given limits in at least one parameter essential for the service. *Notes. 1* — An interruption of a service may be caused by disabled states of the items used for the service, or by external reasons such as a high service demand. *2* — In telecommunications, an example of an interruption of service is an interruption of the transmission, which may be characterized by an abnormal value of power level, noise level, signal distortion, error rate, etc. ★ interruption → *interruption 6.* R прерывание (обслуживания); прекращение (обслуживания). D Unterbrechung; Pause. E interrupción (de un servicio); corte de un servicio. I interruzione (del servizio). N onderbreking van een dienst (-verlening). P przerwa (w pracy). S avbrott. (191)
2. **interruption** (*Syn.* interrupt) : → *interrupt 1*
3. **interruption duration** : → *duration 20*
4. **interruption duration** : → *duration 21*
5. **interruption of supply** : the loss of supply to one or several consumers. ★ interruption de fourniture → *interruption 9.* R перерыв энергоснабжения. D Versorgungsunterbrechung. E interrupción de suministro. I interruzione di fornitura. N onderbreking van de levering. P przerwa w dostawie energii. S leveransavbrott. (603)
6. **interruption of transmission** (*Syn.* (transmission) break) : → *break 11*
7. **(load weighted) equivalent interruption duration** : → *duration 23*
8. **mean interruption duration** : → *duration 25*
9. **mean time between interruptions** : → *time 102*
10. **time between interruptions** : → *time 178*

interstitial

1. **interstitial technique** (*Syn.* implantation technique) : → *technique 9*

inter-switch

1. **inter-switch link** : → *link 16*

interswitchboard

1. **interswitchboard line** (*Syn.* tie line) : → *line 164*

intersymbol

1. **intersymbol interference** : → *interference 14*

inter-system

1. **inter-system interference** : → *interference 15*

intertripping

1. **intertripping** (*Syn.* transfer tripping) : the tripping of circuit-breaker(s) by signals initiated from protection at a remote location independent of the state of the protection at the local location. ★ télédéclenchement → *télédéclenchement 1.* R телеотключение; передача отключения. D unmittelbare Fernauslösung. E teledisparo. I interruzione telecomandata. N uitschakelen via een overdrachtkanaal. P zdalne wyłączania; sterowanie. S fjärrutlösning. (448)

interturn

1. **interturn fault** (*Syn.* turn-to-turn fault) : → *fault 81*
2. **interturn insulation** : → *insulation 38*
3. **interturn test** : → *test 42*

interval

1. **blanking interval** (*Syn.* blanking period) : an interval of time during which picture blanking takes place. *Examples :* line blanking interval, field blanking interval. ★ intervalle de suppression → *intervalle 18.* R интервал гашения. (723)
2. **circuit off-state interval** : that part of the idle interval during which a controllable valve or arm is in the off-state. ★ intervalle de blocage dans le sens direct → *intervalle 4.* R интервал закрытого состояния. D Vorwärts-Sperrzeit. E intervalo de bloqueo en sentido directo (en un circuito). I intervallo di blocco diretto (del circuito). N blokkeerinterval (in doorlaatrichting) (van een stroomkring). P czas stanu blokowania. S blockintervall. (551)
3. **circuit reverse blocking interval** : the interval during which a valve or arm is in the reverse blocking state. ★ intervalle de blocage dans le sens inverse → *intervalle 6.* R интервал обратного непроводящего состояния. D Rückwärts-Sperrzeit. E intervalo de bloqueo en sentido inverso (en un circuito). I intervallo di blocco inverso (del circuito). N sperinterval van een stroomkring. P czas stanu zaworowego. S spärrintervall. (551)
4. **colour burst guard interval** : that part of the blanking interval between the trailing edge of the line synchronising pulse and the start of the colour burst. ★ (intervalle de) garde de la salve de couleur → *intervalle 12.* R защитный интервал цветовой вспышки. (723)
5. **conduction interval** (of an arm) : that part of an elementary period in which the arm conducts. ★ intervalle de conduction → *intervalle 8.* R интервал проводимости (плеча). D Stromflußzeit. E intervalo de conducción (de un brazo). I intervallo di conduzione (di un ramo). N geleidingsinterval. P czas przewodzenia (ramienia). S ledintervall. (551)
6. **frequency interval** : ratio of two frequencies. ★ intervalle de fréquences → *intervalle 11.* R частотный интервал. D Frequenzintervall. E intervalo de frecuencia. I intervallo di frequenza. N interval. P interwał częstotliwości. S frekvensintervall. (801)
7. **halving interval** (*Syn.* HIC (abbreviation)) : the number corresponding to the temperature interval in degrees Celsius which expresses the halving of the time to end-point taken at the temperature of the TI or the RTI. ★ intervalle de division par deux → *intervalle 10.* R половинный температурный интервал; ПТИ (сокращенно). D Halbzeit(intervall); HIC (Abkürzung). E intervalo de división por dos; IDD (abreviatura). I intervallo di dimezzamento. N ..... P odstęp temperaturowy połówkowy. S halveringsintervall. (212)
8. **hold-off interval** : the interval between that instant when the on-state current of a controllable valve device has decreased to zero and that instant when the same valve device is required to withstand off-state voltage. ★ intervalle de suppression → *intervalle 17.* R время выключения. D Schonzeit; Freihaltezeit. E intervalo de supresión. I intervallo di ripristino. N vrijwaarinterval. P czas wyłączania dysponowany. S spärrspänningstid. (551)
9. **idle interval** (of an arm) : that part of an elementary period in which no principal arm conducts. ★ intervalle de repos → *intervalle 14.* R интервал непроводимости (плеча). D stromlose Zeit. E intervalo de reposo (de un brazo). I intervallo di riposo (di un ramo). N stroomloos interval. P czas nieprzewodzenia (ramienia). S vilointervall. (551)
10. **interval** (*Syn.* logarithmic frequency interval) : → *interval 12*
11. **interval between X-ray tube exposures** : the time elapsing between the end of one X-ray tube exposure and the start of the next. ★ intervalle entre poses → *intervalle 23.* R интервал между включениями рентгеновской трубки. D Belastungspause (bei einer Röntgenröhre). E intervalo entre

exposiciones de un tubo de rayos X. I intervallo fra le esposizioni di un tubo a raggi X. N pauze tussen röntgenbuisbelastingen. P czas przerwy między ekspozycjami. S paustid. (881)

12. **logarithmic frequency interval** (*Syn.* interval) : logarithm of the ratio of two frequencies. ★ intervalle logarithmique de fréquences → *intervalle 25.* R логарифмический частотный интервал; интервал. D logarithmisches Frequenzintervall. E intervalo logarítmico de frecuencia; intervalo. I intervallo logaritmico di frequenza. N interval. P interwał logarytmiczny częstotliwości; interwał. S intervall. (801)
13. **non-conducting interval** (of an arm) (*Syn.* idle period) : that part of an alternating voltage cycle during which the arm is not carrying current. ★ temps de repos → *temps 109.* R период непроводимости; холостой период плеча. D stromlose Zeit. E tiempo de reposo. I tempo di riposo (di un ramo); intervallo di riposo. N stroomloosinterval. P okres nieprzewodzenia. S tomgångsperiod. (811)
14. **off-state interval** (*Syn.* hold-off period) : that part of the idle period during which the anode has a positive potential with respect to the cathode, the start of commutation being blocked by phase control. ★ temps de blocage → *temps 43.* R интервал закрытого состояния. D Sperrzeit; Vorwärsperrzeit. E tiempo de bloqueo. I tempo di blocco (in senso) diretto; intervallo di blocco (in senso) diretto. N vrijwaarinterval. P okres blokady w kierunku przewodzenia. S blockspänningsintervall. (811)
15. **quantizing interval** : one of the adjacent intervals used in quantizing. ★ intervalle de quantification → *intervalle 13.* R шаг квантования. D Quantisierungsintervall. E intervalo de cuantificación. I intervallo di quantizzazione. N kwantificeerinterval. P przedział kwantowania. S kvantiseringsintervall. (704)
16. **reverse blocking interval** (*Syn.* inverse period) : that part of the idle period during which the anode has a negative potential with respect to the cathode. ★ temps de tension négative → *temps 122.* R период действия обратного напряжения. D Negativspannungsdauer; Rückwaertssperrdauer. E tiempo de tensión negativa. I tempo di blocco (in senso) inverso; intervallo di blocco (in senso) inverso. N blokkeertoestand. P okres blokady w kierunku nieprzewodzenia. S spärrspänningsintervall. (811)
17. **scale interval** : the difference between the values of the measured quantity corresponding to two consecutive scale marks. ★ valeur d'une division → *valeur 44.* R цена деления. D Skalenintervall. E valor de una división. I valore di una divisione. N schaalinterval. P wartość działki elementarnej. S skalintervall. (301)
18. **significant interval** : time interval between two consecutive significant instants. ★ intervalle significatif → *intervalle 27.* R значащий интервал. D Schrittlänge. E intervalo significativo. I intervallo significativo. N significant interval. P odstęp charakterystyczny; odstęp znamienny. S signifikant intervall. (721)
19. **theoretical duration of a significant interval** : → *duration 42*
20. **time interval** : the part of a time scale between, and described by, two given instants of time. ★ intervalle de temps → *intervalle 19.* R интервал времени. D Zeitspanne. E intervalo de tiempo. I intervallo di tempo. N tijdsinterval. P przedział czasu. S tidsintervall. (191)
21. **time interval analyzer** : → *analyzer 7*
22. **time interval error** : → *error 59*
23. **transposition interval** : length of line between two successive transpositions. ★ intervalle de transposition → *intervalle 22.* R шаг транспозиции. D Verdrillungsabschnitt. E distancia entre transposiciones. I intervallo di trasposizione. N wisselafstand. P skok przepleceniowy. S skruvningsavstånd. (466)
24. **unguarded interval** : the period of transition between the busy and the free states of a circuit or a functional unit, during which they may be erroneously seized. ★ intervalle non gardé → *intervalle 26.* R незащищенный интервал. D nichtgesperrte Zeit. E intervalo sin guarda. I intervallo con guardia non protetta. N onbeveiligd interval. P okres beznadzorowy. S oskyddat intervall. (714)
25. **unit interval** (*Syn.* signal element (USA)) : the longest time interval such that the rated durations of the significant intervals of a signal are all whole multiple of the duration of this interval. ★ intervalle unitaire → *intervalle 28.* R единичный интервал. D Einheitsschrittlänge. E intervalo unitario. I intervallo di tempo unitario. N eenheidsinterval. P odstęp jednostkowy. S enhetsintervall. (721)
26. **voltage change interval** : interval of time which elapses from the beginning of one voltage change to the beginning of the next voltage change. ★ intervalle entre variations de tension → *intervalle 24.* R интервал изменения напряжения. D Spannungsänderungsintervall. E intervalo entre variaciones de tensión. I intervallo tra variazioni di tensione. N spanningsvariatie-interval. P odstęp czasu między zmianami napięcia. S intervall mellan spänningsändringar. (161)

interwinding

1. **interwinding fault** : → *fault 51*

interworking

1. **interworking between networks** : the means whereby terminals connected to a telecommunication network may communicate with terminals of another network. ★ interconnexion de réseaux → *interconnexion 3.* R взаимодействие между сетями. D Verknüpfung zwischen Netzen. E interconexión de redes. I apparecchiature di interconnesione fra reti. N samenwerking tussen netwerken. P współpraca między sieciami. S nätsamverkan. (721)

intraband

1. **intraband transmission** : → *transmission 36*

intracavitary

1. **intracavitary radiotherapy** : → *radiotherapy 1*

intramodal

1. **intramodal distortion** : → *distortion 49*

intra-system

1. **intra-system interference** : → *interference 16*
2. **intra-system noise** (*Syn.* intrinsic noise) : → *noise 31*

intrinsic

1. **intrinsic** (*Syn.* inherent) : qualifies a value determined when maintenance and operational conditions are assumed to be ideal. ★ intrinsèque → *intrinsèque 9.* R внутренний; собственный. D inhärent. E ... intrínseco; ... inherente. I intrinseco. N intrinsiek; inherent. P wewnętrzny; inherentny. S inneboende. (191)
2. **intrinsic conduction** : → *conduction 16*
3. **intrinsic conductivity** : → *conductivity 4*
4. **intrinsic error** : → *error 46*
5. **intrinsic joint loss** : → *loss 41*
6. **intrinsic noise** : → *noise 31*
7. **intrinsic semiconductor** : → *semiconductor 5*

intrinsically

1. **associated electrical apparatus** : → *apparatus 3*
2. **intrinsically safe luminaire** : → *luminaire 10*
3. **spark test apparatus (for intrinsically-safe circuits)** : → *apparatus 14*

intrinsically-safe

1. **intrinsically safe luminaire** : → *luminaire 10*
2. **intrinsically-safe circuit** : → *circuit 100*
3. **intrinsically-safe electrical apparatus** : → *apparatus 11*

intrusion

1. **intrusion** (*Syn.* override (USA)) : intervention by a third party, whilst a call is in progress for the purpose of making an announcement to the parties, e.g. offering a trunk call. ★ intrusion → *intrusion 1.* R вмешательство. D aufschalten. E intrusión; entrada en línea. I inclusione. N opschakelen. P wejście na trzeciego (anonsujące). S inbrytning. (714)
2. **intrusion tone** : → *tone 18*

inverse

1. **inverse direction** : → *direction 14*
2. **inverse direction of operation** : → *direction 15*
3. **inverse electrode current** (*Syn.* reverse electrode current) : → *current 176*

4. **inverse Fourier transform** (*Syn.* Fourier integral) : → *integral 1*
5. **inverse Laplace transform** : → *transform 3*
6. **inverse period** (*Syn.* reverse blocking interval) : → *interval 16*
7. **inverse square law** : → *law 5*
8. **inverse suppressor** : → *suppressor 5*
9. **inverse time-delay over-current release** : → *release 12*
10. **inverse voltage** : → *voltage 92*

inversion

1. **alternate mark inversion code** : → *code 2*
2. **alternate mark inversion signal** : → *signal 10*
3. **alternate mark inversion violation** : → *violation 1*
4. **(electronic)(power) inversion** : electronic conversion from d.c. to a.c. ★ ondulation (électronique) (de puissance) → *ondulation 6.* R (электронное)(силовое) инвертирование. D Wechselrichten. E ondulación (electrónica)(de potencia). I inversione (elettronica) (di potenza). N (elektronische) gelijkstroomomzetting. P przekształcanie falownikowe (elektroniczne). S växelriktning. (551)
5. **frequency inversion** : change of sign of the frequency difference between any pair of spectral components of a signal; in the resulting signal the higher frequency components represent the lowest frequency components of the original signal and conversely the higher original frequency components are represented by the lower frequency final components. ★ inversion de fréquence → *inversion 4.* R частотная инверсия. D Frequenzinversion. E inversión de frecuencia. I inversione di frequenza. N frequentieomdraaiing. P inwersja częstotliwości. S frekvensinvertering. (702)
6. **inversion factor** : → *factor 98*
7. **inversion layer** : → *layer 14*
8. **modified alternate mark inversion code** : → *code 37*
9. **phase inversion modulation** : → *modulation 44*
10. **phase inversion modulation** : → *modulation 45*
11. **temperature inversion** (in the troposphere) : an increase of temperature with height in the troposphere. ★ inversion de température → *inversion 5.* D Temperaturinversion (in der Troposphäre). P inwersja temperatury (w jonosferze). (705)

inverted

1. **inverted** : applied to a machine in which the usual functions of the stationary and revolving members are interchanged: e.g. an induction motor in which the primary winding is on the rotor and is connected to the supply through collector rings and the secondary winding is on the stator. ★ machine inversée → *machine 59.* R обращенная машина. D umgekehrte Maschine. E máquina invertida. I macchina a campi invertiti. N geïnverteerde machine. P maszyna w układzie odwróconym. S med ytterrotor. (411)
2. **inverted - V antenna** : → *antenna 64*
3. **inverted television channels** : → *channel 32*
4. **inverted-L antenna** : → *antenna 65*

inverter

1. **(electronic) (power) inverter** : an electronic convertor for inversion. ★ onduleur (électronique) (de puissance) → *onduleur 3.* R (электронный) (силовой) инвертор. D Wechselrichter. E ondulador (electrónico) (de potencia). I invertitore (elettronico) (di potenza). N wisselrichter. P falownik (elektroniczny). S växelriktare. (551)

invertor

1. **invertor** : a static convertor for the conversion of direct current to alternating current. ★ onduleur → *onduleur 2.* R инвертор. D Wechselrichter. E ondulador. I invertitore. N wisselrichter. P falownik. S växelriktare. (151,811)

investigation

1. **investigation test** : → *test 43*

IOC

1. **IOC** (*Syn.* integrated optical circuit) : → *circuit 94*

ion

1. **average energy expended per ion pair formed** : → *energy 5*
2. **ion** : any atom or bonded group of atoms that has a net electric charge. ★ ion → *ion 2.* R ион. D Ion. E ión. I ione. N ion. P jon. S jon. (026,111,111,705,881)
3. **ion activity** : → *activity 10*
4. **ion cluster** : → *cluster 1*
5. **ion collection pulse chamber** : → *chamber 11*
6. **ion collection time** : → *time 79*
7. **ion concentration** : → *concentration 7*
8. **ion density** : → *density 13*
9. **ion dose** : → *dose 33*
10. **ion exchange technique** : → *technique 11*
11. **ion implantation** : → *implantation 2*
12. **ion nitriding** : → *nitriding 1*
13. **ion noise** : → *noise 32*
14. **ion trap** : → *trap 1*
15. **linear ion density** : → *density 14*
16. **mean energy expended in a gas per ion pair formed** : → *energy 62*
17. **volume ion density** : → *density 44*

ion-dose

1. **ion-dose rate** : → *rate 44*

ionic

1. **ionic conduction** : → *conduction 17*
2. **ionic loudspeaker** : → *loudspeaker 8*
3. **ionic microphone** : → *microphone 15*
4. **ionic semiconductor** : → *semiconductor 6*
5. **ionic strength** : → *strength 2*
6. **ionic valve device** : → *valve device 4*

ionization

1. **columnar ionization** : very dense ionization along the path of a charged ionizing particle in a gas. ★ ionisation colonnaire → *ionisation 16.* R колонная ионизация. D Säulen-Ionisierung. E columna de ionización; ionización columnar. I ionizzazione. N zuilionisatie. P jonizacja kolumnowa. S kolonnjonisation. (881)
2. **degree of ionization** : → *degree 8*
3. **ionization** : the formation of ions by the division of molecules or by the addition or removal of electrons from atoms or molecules. ★ ionisation → *ionisation 15.* R ионизация. D Ionisierung. E ionización. I ionizzazione. N ionisatie. P jonizacja. S jonisation. (026,111,391,705,881)
4. **ionization current** : → *current 109*
5. **ionization detector** : → *detector 13*
6. **ionization energy** : → *energy 55*
7. **ionization event** : → *event 5*
8. **ionization gradient component** : → *component 35*
9. **ionization ledge** : → *ledge 1*
10. **ionization path** : → *path 8*
11. **ionization profile** : → *profile 5*
12. **ionization rate** : → *rate 45*
13. **ionization time** : → *time 80*
14. **ionization track** : → *track 10*
15. **probability of ionization (by collision)** : the ratio of the number of collisions followed by ionization to the total number of collisions during a specified time. ★ probabilité d'ionisation (par choc) → *probabilité 12.* R вероятность ионизации (соударением). D Ionisationswahrscheinlichkeit (durch Stoß). E probabilidad de ionización (por choque). I probabilità di ionizzazione (per urto). N ionisatiekans. P prawdopodobieństwo jonizacji. S jonisationssannolikhet. (111)
16. **specific ionization coefficient** : → *coefficient 61*
17. **sporadic ionization** : ionization of the upper atmosphere, irregularly distributed in space and time, abnormally dense relative to the average ionization level of the region in which it is contained. ★ ionisation sporadique → *ionisation 19.* D sporadische Ionisation. P jonizacja sporadyczna. (705)
18. **total ionization** : total number of ion-pairs produced by an ionizing particle along all of its trajectory. ★ ionisation totale

→ *ionisation 20.* D totale Ionisation. E ionización total. I ionizzazione totale. N totale ionisatie. P jonizacja całkowita. S totaljonisation. (026)

19. **vertical ionization gradient** : → *gradient 10*

ionization chamber

1. **air-wall ionization chamber** : an ionization chamber in which the filling gas and the materials of the wall have the same effective atomic number as air. This conditions allows some relaxation of the Bragg-Gray cavity conditions so that the cavity size may be large compared with the range of the secondary particles. It may be used to determine the absorbed dose in air or to measure exposure when it is calibrated against a free-air ionization chamber. ★ chambre d'ionisation équivalente à l'air → *chambre d'ionisation 22.* R воздухоэквивалентная ионизационная камера. D luftäquivalente Ionisationskammer. E cámara de ionización equivalente de aire. I camera di ionizzazione equivalente all'aria. N ionisatievat met aan lucht equivalente wanden. P komora ze ściankami rownoważnymi powietrzu. S luftekvivalent jonkammare. (391,881)
2. **boron trifluoride ionization chamber** : an ionization chamber intended to detect neutrons and containing for this purpose boron trifluoride. Ionization is initiated by alpha particles and lithium nuclei produced by nuclear reaction of neutrons with boron. ★ chambre d'ionisation à trifluorure de bore → *chambre d'ionisation 18.* R ионизационная камера с трехфтористым бором. D Bortrifluorid-Kammer; BF_3-Kammer. E cámara de ionización de trifluoruro de boro. I camera di ionizzazione a trifluoruro di boro. N BF3-ionisatievat. P komora jonizacyjna wypełniona trójfluorkiem boru. S bortrifluoridjonkammare. (391)
3. **boron-lined ionization chamber** : an ionization chamber intended to detect neutrons and containing for that purpose boron sensitive lining on its walls or on conveniently shaped electrodes. Ionization is initiated by alpha particles and lithium nuclei produced by nuclear reaction of neutrons with boron in the lining. ★ chambre d'ionisation à dépôt de bore → *chambre d'ionisation 8.* R ионизационная камера с покрытием из бора. D Borkammer. E cámara de ionización de depósito de boro. I camera di ionizzazione a deposito di boro. N boriumionisatievat. P komora jonizacyjna z pokryciem borowym. S borbelagd jonkammare. (391)
4. **Bragg-Gray cavity ionization chamber** : an ionization chamber used for determining the absorbed dose (e.g. of X or gamma rays) in a medium. Its characteristics (sensitive volume, gas pressure, nature and thickness of the walls) are such that the conditions defining the Bragg-Gray cavity are met in practice. ★ chambre d'ionisation à cavité → *chambre d'ionisation 3.* R полостная ионизационная камера. D Bragg-Gray-Kammer. E cámara de ionización de cavidad de Bragg-Gray. I camera di ionizzazione a cavità (Bragg-Gray). N Bragg-Gray-ionisatievat. P komora jonizacyjna wnękowa Bragga-Graya. S Bragg-Gray-jonkammare. (391)
5. **capacitor ionization chamber** : an ionization chamber whose electrodes form a capacitor of known capacitance so that when previously charged the radiation exposure can be calculated from the decrease in potential. ★ chambre d'ionisation condensateur → *chambre d'ionisation 20.* R конденсаторная ионизационная камера. D Kondensatorkammer. E cámara de ionización de condensador. I camera di ionizzazione condensatore. N condensatorionisatievat. P kondensatorowa komora jonizacyjna. S kondensator(jon)kammare. (391,881)
6. **cavity ionization chamber** : a chamber designed to satisfy the theoretical requirements relating to the ionization and the energy deposition in a small cavity in a homogeneous medium subject to radiation. ★ chambre d'ionisation à cavité → *chambre d'ionisation 4.* R полостная ионизационная камера. D Hohlraumkammer. E cámara de ionizacion de cavidad. I camera di ionizzazione a cavità. N doosionisatievat. P komora jonizacyjna wnękowa. S hålrumskammare. (881)
7. **compensated ionization chamber** : a difference ionization chamber designed in such a manner as to practically eliminate the effect of another radiation superimposed on the radiation which it is desired to measure. ★ chambre d'ionisation compensée → *chambre d'ionisation 19.* R скомпенсированная ионизационная камера. D kompensierte Ionisationskammer. E cámara de ionización compensada. I camera di ionizzazione compensata. N ionisatievat met compensatie; compensatie-ionisatievat. P skompensowana komora jonizacyjna. S kompenserad jonkammare. (391)
8. **current ionization chamber** : an ionization chamber used for measurement of the ionization current produced by ionizing radiation. ★ chambre d'ionisation à courant → *chambre d'ionisation 7.* R токовая ионизационная камера. D Strom-Ionisationskammer. E cámara de ionización de corriente. I camera di ionizzazione a corrente. N ionisatievat met stroommeting. P prądowa komora jonizacyjna. S strömjonkammare. (391)
9. **difference ionization chamber** : an ionization chamber composed of two sections arranged in such a manner that the resulting output current corresponds to the difference between the ionization currents of the two sections. ★ chambre d'ionisation à différence → *chambre d'ionisation 9.* R разностная ионизационная камера. D Differentialkammer. E cámara de ionización de diferencia. I camera di ionizzazione a differenza. N differentieel ionisatievat. P różnicowa komora jonizacyjna. S differentialjonkammare. (391)
10. **extrapolation ionization chamber** : an ionization chamber in which one of the characteristics can be varied — normally the spacing between electrodes — in order to extrapolate the readings to zero chamber volume. ★ chambre d'ionisation à extrapolation → *chambre d'ionisation 10.* R экстраполяционная ионизационная камера. D Extrapolationskammer. E cámara de ionización de extrapolación. I camera di ionizzazione a estrapolazione. N extrapolatie-ionisatievat. P ekstrapolacyjna komora jonizacyjna. S extrapolations(jon)kammare. (391,881)
11. **fission ionization chamber** : an ionization chamber intended to detect neutrons and containing for that purpose a sensitive lining of fissile materials. Ionization is initiated mainly by fission fragments produced by nuclear reaction of neutrons with the fissile material. ★ chambre d'ionisation à fission → *chambre d'ionisation 11.* R ионизационная камера деления. D Spaltkammer. E cámara de ionización de fisión. I camera di ionizzazione a fissione. N splijtingsionisatievat. P rozszczepieniowa komora jonizacyjna. S fissionskammare. (391)
12. **free air ionization chamber** : an ionization chamber open to the air and mainly used for the absolute measurement of exposures. It is so designed that the volume of air which is taken as the basis for the calculation of the exposure is well defined and neither the beam of radiation nor a significant number of the secondary electrons produced strike the electrodes. ★ chambre d'ionisation à air libre → *chambre d'ionisation 2.* R нормальная ионизационная камера. D Freiluft-Ionisationskammer. E cámara de ionización de aire libre. I camera di ionizzazione ad aria libera. N openluchtionisatievat. P powietrzna komora jonizacyjna. S öppen luftkammare. (391,881)
13. **grid ionization chamber** : a pulse ionization chamber, generally used to measure the energy of alpha particles or fission fragments. It contains flat electrodes and an additional electrode (Frisch grid), which is held at an intermediate potential, to reduce the influence of heavy ions. ★ chambre d'ionisation à grille → *chambre d'ionisation 12.* R ионизационная камера с сеткой. D Ionisationskammer mit Frisch-Gitter. E cámara de ionización de rejilla. I camera di ionizzazione a griglia. N roosterionisatievat. P komora jonizacyjna z siatką. S gallerjonkammare. (391)
14. **integrating ionization chamber** : an ionization chamber designed to measure the accumulated charge caused by individual ionizing events occurring during some interval of time. ★ chambre d'ionisation à intégration → *chambre d'ionisation 14.* R интегрирующая ионизационная камера. D integrierende Ionisationskammer. E cámara de ionización de integración. I camera di ionizzazione a integrazione. N ionisatievat met ladingsmeting. P całkująca komora jonizacyjna. S integrerande jonkammare. (391)
15. **ionization chamber** : an ionization detector consisting of a chamber filled with a suitable gas, in which an electric field, insufficient to induce gas multiplication, is provided for the collection at the electrodes of charges associated with the ions and the electrons produced in the sensitive volume of the detector by the ionizing radiation. ★ chambre d'ionisation → *chambre d'ionisation 1.* R ионизационная камера. D Ionisationskammer. E cámara de ionización. I camera di ionizzazione. N ionisatievat. P komora jonizacyjna. S jon(isations)kammare. (391,881)

16. **liquid-wall ionization chamber** : an ionization chamber designed to measure the alpha or beta activity of a liquid so situated that its surface constitutes the wall of the chamber. ★ chambre d'ionisation à paroi liquide → *chambre d'ionisation 15.* R жидкостенная ионизационная камера. D Flüssigwändekammer. E cámara de ionización de pared líquida. I camera di ionizzazione a parete liquida. N ionisatievat met vloeistofwand. P komora jonizacyjna o ściance cieczowej. S jonisationskammare med vätskevägg. (392)
17. **pocket ionization chamber** : personal dosemeter (exposure meter) consisting of a small capacitor ionization chamber. ★ chambre d'ionisation de poche → *chambre d'ionisation 21.* R карманная ионизационная камера. D Taschenkammer. E cámara de ionización de bolsillo. I camera di ionizzazione tascabile. N zakionisatievat. P kieszonkowa komora jonizacyjna. S fickjonkammare. (391)
18. **pulse ionization chamber** : an ionization chamber acting as a pulse detector and producing a useful pulse for each detected ionizing particle. ★ chambre d'ionisation à impulsions → *chambre d'ionisation 13.* R импульсная ионизационная камера. D Impuls-Ionisationskammer. E cámara de ionización de impulsos. I camera di ionizzazione a impulsi. N pulsionisatievat. P impulsowa komora jonizacyjna. S pulsjonkammare. (391)
19. **recoil proton ionization chamber** : an ionization chamber intended to detect fast neutrons and in which the filling gas contains for this purpose hydrogenous atoms. Ionization is initiated mainly by recoil protons resulting from the collision of fast neutrons with the nuclei of these hydrogenous atoms. ★ chambre d'ionisation à protons de recul → *chambre d'ionisation 16.* R ионизационная камера протонов отдачи. D Rückstoßprotonenkammer. E cámara de ionización de protones de rechazo. I camera di ionizzazione a protoni di rinculo. N terugstootionisatievat. P komora jonizacyjna protonów odrzutu. S rekylproton(jon)kammare. (391)
20. **thimble ionization chamber** : an ionization chamber in which the outer electrode has shape and dimension similar to those of a thimble. ★ chambre dé → *chambre 8.* R напёрстковая ионизационная камера. D Fingerhutkammer. E cámara de ionización de dedal. I camera a ditale. N vingerhoedionisatievat. P naparstkowa komora jonizacyjna. S fingerborgs(jon)kammare. (391,881)
21. **tissue equivalent ionization chamber** : an ionization chamber intended to determine the absorbed dose in tissue and in which the materials of the walls have the same effective atomic number as tissue. This condition allows some relaxation of the Bragg-Gray cavity conditions so that the cavity size may be large compared with the range of the secondary particles. ★ chambre d'ionisation équivalente au tissu → *chambre d'ionisation 23.* R тканеэквивалентная ионизационная камера. D gewebeäquivalente Ionisationskammer. E cámara de ionización equivalente de tejido. I camera di ionizzazione equivalente al tessuto. N weefselequivalent ionisatievat. P komora jonizacyjna równoważna tkance. S vävnadsekvivalent jonkammare. (391,881)
22. **wall-less ionization chamber** : an ionization chamber in which the sensitive volume is not defined by walls, but by the lines of force of the electrical field determined by the form and arrangement of the electrodes and by the potential difference between electrodes. ★ chambre d'ionisation sans paroi → *chambre d'ionisation 24.* R бесстеночная ионизационная камера. D wandlose Ionisationskammer. E cámara de ionización sin pared. I camera di ionizzazione senza parete. N wandloos ionisatievat. P komora jonizacyjna normalna; komora jonizacyjna bezściankowa. S väggfri jonisationskammare. (392)
23. **well-type ionization chamber** : an ionization chamber designed for measuring the activity of beta, X or gamma emitters of appreciable volume within a solid angle of nearly 4π steradians. It comprises a central cylindrical well in which the sources to be measured are placed. ★ chambre d'ionisation à puits → *chambre d'ionisation 17.* R ионизационная камера с колодцем. D Faßkammer. E cámara de ionización de pozo. I camera di ionizzazione a pozzo. N ionisatievat met put. P wnękowa komora jonizacyjna. S brunnsjonkammare. (391)

ionized-gas

1. **ionized-gas anemometer** : → *anemometer 1*

ionizing

1. **directly ionizing particle** : → *particle 4*
2. **directly ionizing particles** (*Syn.* directly ionizing radiation) : → *radiation 19*
3. **directly ionizing radiation** : → *radiation 19*
4. **indirectly ionizing particle** : → *particle 7*
5. **indirectly ionizing particles** (*Syn.* indirectly ionizing radiation) : → *radiation 34*
6. **indirectly ionizing radiation** : → *radiation 34*
7. **initial ionizing event** : → *event 4*
8. **ionizing energy of acceptor** : → *energy 56*
9. **ionizing energy of donor** : → *energy 57*
10. **ionizing radiation** : → *radiation 37*

ionogram

1. **ionogram** : the record provided by an ionosonde and representing the virtual heights as a function of frequency. ★ ionogramme → *ionogramme 1.* D Ionogramm. P jonogram. (705)

ionography

1. **ionography** (*Syn.* electron radiography) : an imaging process in which X-radiation ionizes a high-pressure, high-atomic-weight gas in a narrow-gap, parallel-plate ionization chamber. A latent image is produced on an insulating film covering one of the plates. After removal of the film the image is made visible by applying a fine powder. The process produces pronounced edge contrast. ★ ionographie → *ionographie 1.* R ионография; электронная радиография. D Ionographie. E ionografía; radiografía electrónica. I ionografia; radiografia ad elettroni. N elektronenradiografie. P jonografia; radiografia elektronowa. S jonografi. (881)

ionosonde

1. **ionosonde** (*Syn.* ionospheric sounder; ionospheric recorder) : radio equipment designed to carry out ionospheric soundings and to record the results. ★ sondeur ionosphérique → *sondeur 1.* D Ionosonde. P jonosonda. (705)
2. **vertical incidence ionosonde** (*Syn.* vertical incidence ionospheric sounder; vertical incidence ionospheric recorder) : an ionosonde designed to carry out vertical incidence ionospheric soundings and to record the virtual heights as a function of time and frequency. ★ sondeur (ionosphérique) vertical → *sondeur 2.* D Senkrecht-Ionosonde. P jonosonda sondowania pionowego. (705)

ionosphere

1. **ionosphere** : that part of the upper atmosphere characterized by the presence of ions and free electrons mainly arising from photo-ionization, the electron density being sufficient to produce significant modification of the propagation of radio waves in certain frequency bands. *Note.* — The Earth's ionosphere extends approximately from a height of 50 km to a height of 2000 km. ★ ionosphère → *ionosphère 1.* D Ionosphäre. P jonosfera. (705)

ionospheric

1. **abnormal (ionospheric) absorption** : → *absorption 1*
2. **back-scatter ionospheric sounding** : → *sounding 1*
3. **bottom-side ionospheric sounding** : → *sounding 2*
4. **incoherent-scatter ionospheric sounding** : → *sounding 3*
5. **ionospheric absorption** : → *absorption 22*
6. **(ionospheric) bistatic sounding** : → *sounding 4*
7. **ionospheric cross modulation** : → *modulation 24*
8. **ionospheric defocussing** : → *defocusing 2*
9. **(ionospheric) defocussing factor** : → *factor 99*
10. **ionospheric distortion** : → *distortion 50*
11. **ionospheric disturbance** : → *disturbance 10*
12. **ionospheric focussing** : → *focusing 11*
13. **(ionospheric) focussing factor** : → *factor 100*
14. **ionospheric forecast** (*Syn.* ionospheric prediction) : → *prediction 2*
15. **(ionospheric) horizon focussing** : → *focusing 13*
16. **ionospheric index** : → *index 26*

17. **ionospheric layer** : → *layer 15*
18. **ionospheric map** : → *map 1*
19. **ionospheric modification** : → *modification 1*
20. **(ionospheric) monostatic sounding** : → *sounding 5*
21. **ionospheric prediction** : → *prediction 2*
22. **ionospheric propagation** : → *propagation 10*
23. **(ionospheric) propagation forecast** : → *forecast 3*
24. **ionospheric recorder** (*Syn.* ionosonde) : → *ionosonde 1*
25. **ionospheric reflection** : → *reflection 10*
26. **ionospheric sounder** (*Syn.* ionosonde) : → *ionosonde 1*
27. **ionospheric sounding** : → *sounding 6*
28. **ionospheric storm** : → *storm 1*
29. **(ionospheric) transmission curve** : → *curve 16*
30. **(ionospheric) transmission factor** : → *factor 101*
31. **ionospheric wave** : → *wave 26*
32. **laterally deviated (ionospheric) propagation** : → *propagation 12*
33. **normal (ionospheric) absorption** : → *absorption 30*
34. **numerical ionospheric map** : → *map 2*
35. **oblique incidence ionospheric sounding** : → *sounding 7*
36. **off-great-circle ionospheric propagation** : → *propagation 19*
37. **(propagation by) ionospheric scatter** : → *scatter 3*
38. **relative ionospheric opacity meter** (*Syn.* riometer) : → *riometer 1*
39. **sudden ionospheric disturbance** : → *disturbance 15*
40. **top-side ionospheric sounding** : → *sounding 8*
41. **vertical incidence ionospheric recorder** (*Syn.* vertical incidence ionosonde) : → *ionosonde 2*
42. **vertical incidence ionospheric sounder** (*Syn.* vertical incidence ionosonde) : → *ionosonde 2*
43. **vertical incidence ionospheric sounding** : → *sounding 9*

ion-yield

1. ion-yield (of radiation) (deprecated) : the number of ion pairs produced per particle (which may be a photon) or the quotient of the number of ion pairs and the energy imparted by the radiation to the matter in which the ion pairs are produced. ★ rendement en paires d'ions → *rendement 30.* R выход ионов (излучения) (не рекомендуется). D Ionenausbeute (einer Strahlung) (veralteter Begriff). E rendimiento en pares de iones (desaconsejado). I rendimento ionico (di radiazione) (sconsigliato). N ionenopbrengst (van straling). P wydajność jonizacji (radiacyjnej) (termin nie zalecany). S jonutbyte. (881)

IPL

1. **IPL** (*Syn.* rated instrument limit primary current) : → *current 159*

IQI

1. **IQI** (*Syn.* image quality indicator) : → *indicator 8*

iris

1. **iris** (in a waveguide) : a partial obstruction consisting of one or more metal or dielectric thin plates at a transverse cross-section of a waveguide used for impedance transformation. ★ iris → *iris 1.* R диафрагма (в волноводе). D Blende (im Hohlleiter). E iris (en una guíaonda). I iride (di guida d'onda). N iris. P przesłona (w falowodzie). S bländare. (726)
2. **resonant iris** (*Syn.* resonant window) : an iris designed to pass without attenuation in a waveguide incident waves at a particular frequency. ★ iris résonant → *iris 2.* R резонансная диафрагма; резонансное окно. D Resonanzblende. E iris resonante; ventana resonante. I iride risonante. N resonantie-iris. P przesłona rezonansowa. S resonansbländare. (726)

irradiance

1. **cylindrical irradiance** (at a point, for a direction) ($E_{e,z}$; $\vec{E}_z$) : quantity defined by the formula

$$E_{e,z} = \frac{1}{\pi}\int_{4\pi sr} L_e \sin\varepsilon \cdot d\Omega$$

where $d\Omega$ is the solid angle of each elementary beam passing through the given point, L_e its radiance at that point and ε the angle between it and the given direction ; unless otherwise stated, that direction is vertical. Unit: $W \cdot m^{-2}$ *Notes. 1* — This quantity is the quotient of the radiant flux of all the radiation incident on the outer curved surface of an infinitely small cylinder containing the given point and whose axis is in the given direction, by π times the area of the cross-section of that cylinder measured in a plane containing its axis. *2* — The analogous quantities "cylindrical illuminance" $E_{v,z}$ and "photon cylindrical irradiance" $E_{p,z}$ are defined in a similar way, replacing radiance L_e by luminance L_v or photon radiance L_p. ★ éclairement cylindrique énergétique → *éclairement 3.* R цилиндрическая облученность (в точке для какого-либо направления). D zylindrische Bestrahlungsstärke (an einem Punkt, für eine Richtung). E irradiancia cilíndrica. I irradiamento cilindrico. N cilindrische bestralingssterkte. P natężenie napromienienia cylindryczne. S cylindrisk irradians. (845)

2. **irradiance** : the radiant power incident on an element of a surface divided by the area of that element. ★ éclairement (énergétique) → *éclairement 5.* R облученность; энергетическая освещенность. D Bestrahlungsstärke. E irradiación. I irradianza. N bestralingssterkte; intensiteit. P natężenie napromienienia. S irradians. (731)

3. **irradiance** (at a point of a surface) (E_e; E) : quotient of the radiant flux $d\Phi_e$ incident on an element of the surface containing the point, by the area dA of that element. *Equivalent definition.* Integral, taken over the hemisphere visible from the given point, of the expression $L_e \cdot \cos\theta \cdot d\Omega$, where L_e is the radiance at the given point in the various directions of the incident elementary beams of solid angle $d\Omega$, and θ is the angle between any of these beams and the normal to the surface at the given point.

$$E_e = \frac{d\Phi_e}{dA} = \int_{2\pi sr} L_e \cdot \cos\theta \cdot d\Omega$$

Unit: $W \cdot m^{-2}$. ★ éclairement énergétique → *éclairement 6.* R энергетическая освещенность (в точке поверхности); облученность. D Bestrahlungsstärke (an einem Punkt einer Oberfläche). E irradiancia. I irradiamento. N bestralingssterkte. P natężenie napromienienia. S irradians. (841,845)

4. **noise equivalent irradiance** (of a detector) (E_m) : name given to the noise equivalent input when the quantity that the detector is being used to measure or detect is a uniform irradiance. ★ éclairement (énergétique) équivalent au bruit → *éclairement 7.* R эквивалентная облучённость по шуму (приёмника). D rauschäquivalente Bestrahlungsstärke (eines Empfängers). E irradiancia equivalente al ruido. I irradiamento equivalente al rumore. N ruisequivalent bestralingssterkte. P natężenie napromienienia równoważ szumów. S brusekvivalent irradians. (845)

5. **photon irradiance** (at a point of a surface) (E_p; E) : quotient of the photon flux $d\Phi_p$ incident on an element of the surface containing the point, by the area dA of that element. *Equivalent definition.* Integral, taken over the hemisphere visible from the given point, of the expression $L_p \cdot \cos\theta \cdot d\Omega$, where L_p is the photon radiance at the given point in the various directions of the incident elementary beams of solid angle $d\Omega$, and θ is the angle between any of these beams and the normal to the surface at the given point.

$$E_p = \frac{d\Phi_p}{dA} = \int_{2\pi sr} L_p \cdot \cos\theta \cdot d\Omega$$

Unit: $s^{-1} \cdot m^{-2}$. ★ éclairement photonique → *éclairement 13.* R фотонная освещенность (в точке поверхности). D Photonenbestrahlungsstärke (an einem Punkt einer Oberfläche). E irradiancia fotónica. I irradiamento fotonico. N fotonenbestralingssterkte. P natężenie napromienienia fotonowe. S fotonirradians. (845)

6. **spectral irradiance** : the irradiance contained in an elementary range of wavelengths at a given wavelength divided by that range. ★ éclairement (énergétique) spectrique → *éclairement 8.* R спектральная облученность. D spektrale Bestrahlung. E irradiación espectral. I irradianza spettrale. N spectrale bestralingssterkte. P gęstość widmowa natężenia napromienienia; gęstość monochromatyczna natężenia napromienienia. S spektral irradians. (731)

7. **spherical irradiance** (at a point) (*Syn.* radiant fluence rate) ($E_{e,o}$; E_o) : quantity defined by the formula

$$E_{e,0} = \int_{4\pi sr} L_e \, d\Omega$$

where $d\Omega$ is the solid angle of each elementary beam passing through the given point and L_e its radiance at that point. Unit: $W \cdot m^{-2}$ *Notes. 1* — This quantity is the quotient of the radiant flux of all the radiation incident on the outer surface of an infinitely small sphere centered at the given point, by the area of the diametrical cross-section of that sphere. *2* — The analogous quantities "spherical illuminance" $E_{v,o}$ and "photon spherical irradiance" $E_{p,o}$ are defined in a similar way, replacing radiance L_e by luminance L_v or photon radiance L_p. *3* — The term spherical irradiance", or "scalar irradiance", or similar terms may be found in the literature, in the definition of which the area of the cross-section is sometimes replaced by the surface area of the spherical element which is four times larger. ★ éclairement sphérique énergétique → *éclairement 14.* R сферическая облученность (в точке). D Raumbestrahlungsstärke (an einem Punkt); Energieflußdichte. E irradiancia esférica. I irradiamento sferico. N sferische bestralingssterkte. P natężenie napromienienia sferyczne. S sfärisk irradians. (845)

irradiated

1. **directly irradiated area** : → *area 15*
2. **indirectly irradiated area** : → *area 22*

irradiation

1. **acute irradiation** : a term used to denote high-level irradiation of short duration. ★ irradiation aiguë → *irradiation 4.* R острое облучение. D akute Bestrahlung. E irradiación aguda. I irradiazione acuta. N acute bestraling. P ostre napromieniowanie. S akut bestrålning. (881)
2. **chronic irradiation** : a term used to denote low-level irradiation of long duration either continuous or intermittent. ★ irradiation chronique → *irradiation 5.* R хроническое облучение. D chronische Bestrahlung. E irradiación crónica. I irradiazione cronica. N chronische bestraling. P chroniczne napromienienie. S kronisk bestrålning. (881)
3. **équivalent dark-current irradiation** : the value of incident radiation required to give a d.c. signal output current equal to the dark current. ★ éclairement équivalant au courant d'obscurité → *éclairement 10.* R энергетический эквивалент темнового тока. D dunkelstromäquivalente Strahlung. E irradiación equivalente a la corriente de oscuridad. I irradiazione equivalente alla corrente di oscuramento. N straling voor equivalente donkerstroom. P napromienienie równoważne prądowi ciemnemu. S ekvivalent mörkerströmbestrålning. (531)
4. **equivalent noise irradiation** : the value of incident radiation that, when modulated in a stated manner, produces a signal output power equal to the noise power, both in a stated bandwidth. ★ éclairement équivalant au bruit → *éclairement 9.* R энергетический эквивалент шумов. D rauschäquivalente Strahlung. E irradiación equivalente al ruido. I irradiazione equivalente al rumore. N straling voor equivalente ruis. P napromienienie równoważne szumowe. S ekvivalent brusbestrålning. (531)
5. **fuel irradiation level** (*Syn.* specific burn-up) : → *burn-up 4*
6. **internal-source irradiation** : the irradiation of the body owing to radioactive materials within it. ★ irradiation interne → *irradiation 7.* R внутреннее облучение. D interne Bestrahlung. E irradiación interna. I irradiazione interna. N interne bronbestraling. P napromienienie źródłem wewnętrznym. S intern bestrålning. (881)
7. **irradiation** : radiation exposure. ★ irradiation → *irradiation 2.* D Bestrahlung. E irradiación. I irradiazione. N bestraling. P naświetlanie. S bestrålning. (026)
8. **irradiation** : exposure to ionizing radiation. ★ irradiation → *irradiation 3.* R облучение. D Bestrahlung. E irradiación. I irradiazione. N bestraling. P napromieniowanie. S bestrålning. (881)
9. **irradiation channel** (*Syn.* beam hole) : → *hole 1*
10. **whole-body irradiation** : radiotherapy in which the greater portion of, or the entire, body is irradiated. ★ irradiation globale → *irradiation 6.* R облучение всего тела. D Ganzkörperbestrahlung. E irradiación global. I panirradiazione. N bestraling van het hele lichaam. P napromienienie całego ciała. S helkroppsbestrålning. (881)

irradiation-saturation

1. **irradiation-saturation current** : → *current 110*

irregularity

1. **cyclic irregularity** : the periodic fluctuation of speed caused by irregularity of the prime mover torque. ★ irrégularité cyclique → *irrégularité 2.* R периодическое изменение скорости. D Ungleichförmigkeit (der Drehzahl). E irregularidad cíclica. I irregolarità ciclica. N oneenparigheid. P wymuszona nierównomierność biegu. S frekvensvariation. (411)

irritability

1. **threshold of flicker irritability** : → *threshold 22*

irrotational

1. **irrotational field** : → *field 48*

IRS

1. **IRS** (*Syn.* intermediate reference system) : → *system 93*
2. **IRS** (*Syn.* insertion test signal) : → *signal 108*

ISB

1. **ISB** (*Syn.* independent sideband) : → *sideband 3*

islanding

1. **islanding** (*Syn.* network splitting) : → *splitting 2*

ISM

1. **ISM** (qualifier) : qualifies equipment or appliances designed to generate and use locally radio frequency energy for industrial, scientific, medical, domestic or similar purposes, excluding applications in the field of telecommunications. *Notes. 1* — The acronym ISM derives from "industrial, scientific and medical". *2* — In some organizations, information technology equipment is excluded. ★ ISM → *ISM 2.* R ПНМ. D ISM (Gruppeneinteilung). E ISM (instalaciones industriales, científicas y médicas). I ISM (qualificativo). N ISM (industrieel, wetenschappelijk, medisch). P PMN (przemysłowe, medyczne, naukowe). S ISM. (161)
2. **ISM frequency band** : → *band 24*

ISO

1. **ISO 7 bits code** (*Syn.* International Alphabet No.5) : → *alphabet 1*

isobar

1. **isobars** : nuclides having the same mass number, but different atomic numbers. ★ nucléides isobares → *nucléide 2.* R изобары. D Isobare. E nucleidos isobaros; isobaros. I isobari. N isobaren. P izobary. S (kärn)isobarer. (881)

isochronism

1. **isochronism** : the state in which a time-varying phenomenon, a time-scale, or a signal, is isochronous. *Note.* — The use of "synchronism" in the sense of "isochronism" is strongly deprecated. ★ isochronisme → *isochronisme 1.* R изохронизм. D Isochronismus. E isocronismo. I isocronismo. N isochronisme. P izochronizm. S isokronism. (702)

isochronous

1. **aggregate (isochronous) signal** : → *signal 9*
2. **burst isochronous** : qualifying a time-varying phenomenon, a time-scale or a signal limited to repeated intervals of time of isochronous activity. ★ isochrone intermittent → *isochrone 4.* R пакетный изохронный. D burstisochron. E isócrono por ráfagas; isócrono intermitente. I isocrono intermittente. N ..... P izochronicznie wtrącany. S skurisokron. (704)
3. **burst isochronous** : a transmission process which may be used when the transmission channel rate is higher than the input binary rate. The binary digits being transferred are signalled at the digit rate of the channel and the transfer is interrupted at intervals in order to produce the required mean binary rate. The interruption is always for an integral number of digits periods. ★ isochronisme par paquets → *isochronisme 3.* R изохронная передача пачками. D bündelweise isochron. E isocronismo por paquetes; isocronismo interrumpido. I isocronismo a pacchetto. N ..... P izochronizm przerywany. S skurisokronism. (721)

4. **degree of isochronous distortion** : → *degree 9*
5. **isochronous** : qualifying a time varying phenomenon, a time-scale or a signal the consecutive significant instants of which are separated by time intervals which all have the same rated duration or have rated durations equal to integral multiples of a unit duration. *Note.* — The use of "synchronous" in the sense of "isochronous" is strongly deprecated. ★ isochrone → *isochrone 3.* R изохронный. D isochron; gleichlang (zeitlich). E isócrono. I isocrono. N isochroon. P izochroniczny. S isokron. (702,704,721)
6. **isochronous modulation** : → *modulation 25*

isodose

1. **isodose curve** : → *curve 17*
2. **isodose surface** : → *surface 11*

isoexposure

1. **isoexposure curve** : → *curve 18*
2. **isoexposure surface** : → *surface 12*

iso-illuminance

1. **iso-illuminance curve** : → *curve 19*
2. **iso-illuminance line** (*Syn.* iso-illuminance curve) : → *curve 19*

iso-intensity

1. **iso-intensity curve** : → *curve 20*
2. **iso-intensity diagram** : → *diagram 11*
3. **iso-intensity line** (*Syn.* iso-intensity curve) : → *curve 20*

isolate

1. **(to) isolate** : 1. To disconnect completely a device or circuit from other devices or circuits. 2. To provide (by separation) a specified degree of protection from any live circuit. ★ isoler → *isoler 2.* R разъединить. D trennen. E separar (por corte o separación de los circuitos). I sezionare (per interruzione o separazione di circuiti). N scheiden. P oddzielić; odizolować. S frånskilja. (151)

isolated

1. **input and output with isolated common point** : → *input 16*
2. **isolated neutral system** : → *system 98*
3. **isolated operation** : → *operation 28*
4. **isolated position** (*Syn.* disconnected position) : → *position 7*

isolating

1. **isolating distance** : → *distance 13*
2. **isolating distance** : → *distance 14*
3. **traction motor isolating switch** : → *switch 59*

isolation

1. **cross polarization isolation** (of two radio waves) : for two radio waves transmitted at the same frequency, with the same power and orthogonal polarization, the ratio at the reception point, of the power received from one of the waves to the power from the other wave, in the expected polarization of the first wave. *Note.* — The cross polarization isolation depends both on the characteristics of the antennas and on the propagation medium. ★ isolement de polarisation → *isolement 13.* D Kreuzpolarisationsisolation (zweier elektromagnetischer Wellen). P izolacja polaryzacji skrośnej. (705)
2. **isolation** : a function intended to cut off for reasons of safety the supply from all or a discrete section of the installation by separating the installation or section from every source of electrical energy. ★ sectionnement → *sectionnement 10.* R отключение. D Trennen. E seccionamiento. I sezionamento. N spanningsloos maken. P utworzenie przerwy izolacyjnej; przerwa izolacyjna. S frånskiljning. (826)
3. **isolation of a unit** : the emergency measure consisting of the disconnection of a unit to maintain the supply of its own auxiliaries. ★ îlotage d'une tranche → *îlotage 2.* R отключение агрегата. D Übergang eines Blockes in Inselbetrieb. E separación de un grupo; aislamiento de un grupo. I isolamento di una unità. N eilandbedrijf van een opwekeenheid. P wyizolowanie bloku energetycznego. S övergång till husturbindrift. (602)
4. **isolation ratio** : → *ratio 45*
5. **sound isolation between rooms** (*Syn.* level difference) : → *difference 18*
6. **standardized sound isolation between rooms** (*Syn.* normalized level difference) : → *difference 22*

isolator

1. **field-displacement isolator** : a microwave isolator whose operation depends upon field-displacement caused by a gyromagnetic material or medium.. ★ isolateur à déplacement de champ → *isolateur 13.* R вентиль на смещении поля. D Feldverzerrungs-Richtungsleitung. E aislador de desplazamiento de campo. I isolatore a spostamento di campo. N veldverschuivingsisolator. P izolator o przemieszczeniu pola. S fältändringsisolator. (221,726)
2. **isolator** (*Syn.* one-way attenuator) : a two-port device having much greater attenuation in one direction of propagation than in the opposite direction. ★ isolateur → *isolateur 9.* R вентиль; однонаправленный аттенюатор. D Einweg-Dämpfungsglied. E aislador; atenuador unidireccional. I isolatore; attenuatore unidirezionale; attenuatore non reciproco. N richtingsisolator. P izolator; tłumik jednokierunkowy. S isolator; envågsdämpare. (726)
3. **isolator** : a two port device having much greater attenuation in one direction of propagation than in the opposite direction. *Note.* — An isolator is often used to prevent return reflections along a transmission path. ★ isolateur affaiblisseur → *isolateur 20.* R изолятор. D LWL-Isolator. E aislador. I isolatore. N isolator. P izolator. S isolator. (731)
4. **lumped-element isolator** : a microwave isolator in which the two ports are internally connected by a network of lumped impedance elements. ★ isolateur à éléments localisés → *isolateur 14.* R вентиль с сосредоточенными реактивными элементами. D Richtungsleitung aus diskreten Elementen. E aislador de elementos localizados. I isolatore a elementi localizzati. N isolator bestaande uit discrete elementen. P izolator o elementach skupionych. S kretselementisolator. (221)
5. **lumped-element isolator** : an isolator in which the two ports are connected by a network of lumped impedance elements. ★ isolateur à constantes localisées → *isolateur 12.* R вентиль на сосредоточенных элементах. D Einweg-Dämpfungsglied mit Einzelelementen. E aislador de constantes concentradas. I isolatore con parametri concentrati. N geconcentreerde-elementenisolator. P izolator o elementach skupionych. S kretselementisolator. (726)
6. **(microwave) isolator** (*Syn.* one-way attenuator) : a passive two-port device operating at microwave frequencies and having much greater attenuation in one direction of propagation than in the other. ★ isolateur (hyperfréquence) → *isolateur 27.* R вентиль СВЧ. D (Mikrowellen-)Isolator; Einwegleitung; Richtungsleitung. E aislador (hiperfrecuencias); atenuador unidireccional. I isolatore (per iperfrequenza); smorzatore unidirezionale. N isolator; eenrichtingsverzwakker. P izolator; tłumik jednokierunkowy. S isolator; envågsdämpare. (221)
7. **resonance (absorption) isolator** : a microwave isolator whose operation depends upon resonance absorption in a gyromagnetic material or medium. ★ isolateur à résonance → *isolateur 18.* R резонансный вентиль. D Resonanz-Richtungsleitung. E aislador de resonancia; aislador de absorción (de resonancia). I isolatore a risonanza; isolatore (ad assorbimento) a risonanza. N resonantie-isolator. P izolator rezonansowy; izolator o absorpcji rezonansowej. S resonans(absorptions)isolator. (221,726)
8. **(wave) rotation isolator** : a microwave isolator containing at least one non-reciprocal polarization rotator. ★ isolateur à rotation (de polarisation) → *isolateur 19.* R поляризационный вентиль. D Faraday-Richtungsleitung. E aislador de rotación (de polarización). I isolatore a rotazione (di polarizzazione). N rotatie-isolator. P izolator rotacyjny. S rotationsisolator; vågvridningsisolator. (221,726)

isoluminance

1. **isoluminance curve** : → *curve 21*

isolux

1. **isolux curve** (*Syn.* iso-illuminance curve) : → *curve 19*
2. **isolux line** (*Syn.* iso-illuminance curve) : → *curve 19*

isomer

1. **nuclear isomer** : a nucleus in a metastable energy state. *Note.* — Nuclear isomers have identical mass numbers and atomic numbers. ★ nucléides isomères → *nucléide 3.* R ядерный изомер. D isomerer Kern. E nucleidos isomeros. I nuclei isomeri. N (kern)isomeer. P izomer jądrowy. S (kärn)isomer. (881)

isomeric

1. **nuclear isomeric transition** : → *transition 7*

isophase

1. **isophase light** : → *light 20*

isothermal

1. **isothermal layer** : → *layer 16*

isotone

1. **isotones** : nuclides having the same number of neutrons, but different atomic numbers. ★ isotones → *isotone 1.* R изотоны. D Isotone. E isotonos. I isotoni. N isotonen. P izotony. S (kärn)isotoner. (881)

isotope

1. **isotope** : one of a set of nuclides having the same number of protons, hence constituting the same chemical element, but differing in number of neutrons. ★ isotope → *isotope 1.* R изотоп. D Isotop. E isótopo. I isotopo. N isotoop. P izotop. S isotop. (026,111,881)
2. **isotope technician** : → *technician 1*

isotopic

1. **isotopic abundance** : → *abundance 2*

isotropic

1. **isotropic** (for electromagnetic waves) : pertaining to a medium whose electromagnetic properties at each point are independent of direction of propagation and polarization of a wave propagating in the medium. ★ isotrope → *isotrope 5.* R изотропный (для электромагнитных волн). D isotrop (für elektromagnetische Wellen). E isótropo (para ondas electromagnéticas). I isotropo. N isotroop. P izotropowy (dla fali elektromagnetycznej). S isotropisk. (731)
2. **isotropic diffuse reflection** : → *reflection 11*
3. **isotropic diffuse transmission** : → *transmission 39*
4. **isotropic gain** (*Syn.* (absolute) gain) : → *gain 1*
5. **isotropic radiator** : → *radiator 2*
6. **magnetically isotropic substance** : → *substance 7*

isotropically

1. **equivalent isotropically radiated power** : → *power 57*

ISU

1. **ISU** (*Syn.* initial signal unit) : → *unit 34*

ITE

1. **ITE** (*Syn.* information technology equipment) : → *equipment 45*

item

1. **item** (*Syn.* entity) : any part, component, device, subsystem, functional unit, equipment or system that can be individually considered. *Notes. 1* — An item may consist of hardware, software or both, and may also in particular cases, include people. *2* — In French the term "entité" is preferred to the term "dispositif" due to its more general meaning. The term "dispositif" is also the common equivalent for the English term "device". *3* — In French the term "individu" is used mainly in statistics. *4* — A number of items, e.g. a population of items or a sample, may itself be considered as an item. ★ entité → *entité 1.* R объект. D Einheit. E elemento; dispositivo. I elemento; entità. N artikel; eenheid; exemplaar; (onder)deel. P obiekt. S enhet. (191)
2. **non-repaired item** : an item which is not repaired after a failure. *Note.* — A non-repaired item may be repairable or not. ★ entité non réparée → *entité 2.* R невосстанавливаемый объект. D nicht instandgesetzte Einheit. E elemento no reparado. I entità non riparata. N niet-hersteld (onder)deel. P obiekt nienaprawiony. S enhet som ej avses repareras. (191)
3. **reliability of an item** : → *reliability 14*
4. **repaired item** : a repairable item which is in fact repaired after a failure. ★ entité réparée → *entité 3.* R восстанавливаемый объект. D instandgesetzte Einheit. E elemento reparado. I entità riparata. N hersteld (onder)deel. P obiekt naprawiony. S enhet som avses repareras. (191)

iterated

1. **iterated fission expectation** : → *expectation 1*

ITS

1. **ITS** (*Syn.* insertion test signal) : → *signal 108*

J

J

1. **joule, J** : → *joule 3*

jack

1. **jack** : a connector to mate with a telephone plug. ★ jack → *jack 1.* R гнездо телефонное. D Klinke. E jack. I jack. N klink. P gniazdo (telefoniczne). S telefonjack. (581)
2. **jack shaft** : → *shaft 3*

jacket

1. **fibre jacket** (*Syn.* secondary coating) : → *coating 5*
2. **jacket** (*Syn.* sheath) : → *sheath 1*

jacketed

1. **tight jacketed cable** : → *cable 68*

jack-screw

1. **jack-screw system** : a device comprising a set of captive screws and nuts used to couple and uncouple mating components. It may also provide a polarization facility. ★ système à vis d'accouplement → *système 19.* R замок винтовой. D Spindelverriegelungssystem. E sistema de acoplamiento por tornillo. I sistema a vite di accoppiamento; sistema a vite di manovra. N bout-en-moer-koppelingssysteem. P układ śrubowy sprzęgania. S skruvlåssystem. (581)

Japanese

1. **Japanese tissue paper** : → *paper 7*

jet

1. **jet recorder** : → *recorder 9*

jitter

1. **jitter** : sudden, small, irregular departures from the ideal value of a characteristic of a signal, such as the phase, pulse duration or magnitude.. ★ gigue → *gigue 1.* R дрожание. D Jitter. E inestabilidad; fluctuación. I scintillamento; sfarfallamento. N jitter. P fluktuacje. S jitter. (702)
2. **jitter** (in digital transmission) : short-term non-cumulative variations in the significant instants of a digital signal from their ideal positions in time. ★ gigue → *gigue 2.* R фазовое дрожание (в цифровой передаче). D Jitter (in digitaler Nachrichtenübertragung). E perturbaciones oscilantes rápidas. I jitter (in trasmissione numerica). N jitter (bij digitale transmissie). P wahania (w transmisji cyfrowej). S jitter. (704)
3. **jitter** (in television) : jerky and irregular displacements of the picture due to a synchronisation fault. ★ instabilité (d'image) → *instabilité 6.* R фазовое дрожание. (723)
4. **jitter** : a perceptible instability of the time base of a reproduced video signal. ★ scintillement → *scintillement 2.* R дрожание. D Jitter. E inestabilidad de fase. I scintillamento; instabilità di fase. N beeldbibber. P drżenie; błąd czasowy. S jitter. (806)
5. **time base jitter** : an unwanted fluctuation in the position of the display or a part of it, in a direction parallel to the sweep. *Note.* — This fluctuation may result from: *a)* an unwanted change in the delay of the trigger signal, *b)* unwanted changes of the sweep rate. ★ erratisme de la base de temps → *erratisme 1.* R нестабильность временной развертки. D Jitter der Zeitablenkeinrichtung. E inestabilidad de la base de tiempos. I fluttuazione della base dei tempi. N ..... P drżenie podstawy czasu. S tidbasfladder. (303)
6. **transit time jitter** (in a photomultiplier tube) : the variation in the transit times corresponding to different light pulses having a finite flux and infinitesimal duration, each giving rise to not more than a single photoelectron. ★ fluctuation du temps de transit → *fluctuation 6.* R разброс времени пролета (в фотоумножителе). D Laufzeitstreuung (in einem SEV mit Photokathode). E fluctuación del tiempo de tránsito (en un tubo fotomultiplicador). I fluttuazione del tempo di transito (in un tubo fotomoltiplicatore). N looptijdspreiding (in een fotomultiplicatorbuis). P fluktuacja czasu przelotu (w fotopowielaczu). S löptidsspridning. (391,531)

Johnson

1. **Johnson noise** (*Syn.* thermal noise) : → *noise 88*

joint

1. **bonded rail joint** (*Syn.* electrical rail joint) : → *joint 8*
2. **breeches joint** (*Syn.* Y joint) : an accessory making a connection of a branch cable to a main cable where the axes of the two cables are approximately parallel. ★ dérivation tangente → *dérivation 12.* R Ы-образная муфта. D Gabel-Muffe; Y-Muffe. E derivacio'n en Y. I giunzione per derivazione tangente, o giunzione a «Y». N aftakmof; splitsmof. P mufa Y. S Y-avgrening. (461)
3. **butt joint** (*Syn.* contact joint) : a flange joint ensuring metallic continuity between the inner walls of the waveguides. ★ raccord lisse → *raccord 8.* R стыковое соединение; контактное соединение. D Kontaktverbindung. E junta de presión. I giunto liscio; giunto a contatto. N golfgeleidercontactkoppeling. P złącze czołowe. S stötskarv. (726)
4. **choke joint** : a flange joint composed of a choke flange and a flat flange. ★ raccord à piège → *raccord 4.* R дроссельное соединение (не рекомендуется). D Drosselflanschverbindung. E junta choque. I giunto a blocco. N smoorgroefkoppeling. P złącze dławikowe. S spårflänsskarv. (726)
5. **contact joint** (*Syn.* butt joint) : → *joint 3*
6. **dead-end tension joint** : a joint inserted at the end of a conductor for attachment to an insulator tension set, designed to carry the full current and to provide mechanical termination of the conductor. ★ manchon d'ancrage → *manchon 5.* R натяжной зажим (I). D Endabspannklemme. E grapa de amarre. I morsa di amarro a compressione. N afspan-stroomverbindingsklem. P złączka odciągowa. S pressad spännlinehållare. (466)
7. **double-lapped joint** : a joint between two stacks of material, in the form of flat strips, lying parallel to a common plane and meeting together to form a perpendicular corner, the alternate strips being interleaved over their whole width. ★ joint à double recouvrement → *joint 2.* R соединение в двойную нахлестку. D doppelt überlappte Ecke. E junta de doble recubrimiento. I giunto a incastro. N dubbel-overkappende verbinding. P łączenie na podwójną zakładkę. S överlappsfog. (221)
8. **electrical rail joint** (*Syn.* bonded rail joint) : a mechanical rail joint which also ensures electrical continuity of the return circuit. ★ éclisse électrique → *éclisse 1.* R электрическое стыковое соединение; рельсовый стык с приваренным стыковым соединением. D elektrische Schienenlasche. E plaqueta eléctrica. I giunto conduttore. N lasplaat. P złącze (szynowe) elektryczne. S skenskarvförbindning. (811)
9. **extrinsic joint loss** : → *loss 29*
10. **flameproof joint** : the place where corresponding surfaces of the different parts of a flameproof enclosure come together and prevent the transmission of an internal explosion to the explosive gas atmosphere surrounding the enclosure. ★ joint antidéflagrant → *joint 3.* R взрывонепроницаемое соединение; (взрывонепроницаемая) щель. D zünddurchschlagsicherer Spalt. E junta antideflagrante. I giunto a tenuta di fiamma. N drukvaste spleet. P szczelina ognioszczelna. S explosionstät spalt. (426)
11. **flange joint** : a flange assembly fastened to a second flange assembly or its functional equivalent for the purpose of mechanically connecting and aligning two waveguide apertures to provide efficient power transfer between the waveguides. ★ raccord à brides → *raccord 2.* R фланцевое соединение. D Flanschverbindung. E junta de bridas; unión de bridas. I giunto a flangia. N flensverbinding. P złącze kołnierzowe. S flänsskarv. (726)
12. **gap (of a flameproof joint)** : → *gap 12*
13. **insulated rail joint** : a mechanical rail joint which separates the rails electrically. ★ éclisse isolante → *éclisse 2.* R изолированное стыковое соединение. D Isolierschienenlasche. E plaqueta aislante. I giunto isolante.

N isolatielas. P złącze (szynowe) izolacyjne. S isolerad skenskarv. (811)

14. **intrinsic joint loss** : → *loss 41*
15. **joint** : an assembly designed to permit connection between two or more optical fibres. ★ raccord → *raccord 1.* R соединение. D Faserverbinder. E junta. I giunto. N lasverbinding. P złączka (włókna światłowodowego). S fiberförbindning. (731)
16. **length of flameproof joint** : → *length 20*
17. **mid-span tension joint** : a joint inserted between two lengths of a conductor to provide electrical and mechanical continuity of the conductor. *Examples :* — Drawn type midspan joint, (figure 5.1) Compression type midspan joint, (figure 5.2) Conetype midspan joint. (figure 5.3). ★ manchon de jonction → *manchon 7.* R соединительный зажим. D Feldverbinder. E empalme. I giunto. N verbindingsklem; getrokken verbindingsklem (figuur 466-5.1); compressieverbindingsklem (figuur 466-5.2); conusverbindingsklem (figuur 466-5.3). P złączka śródprzęsłowa. S linskarv. (466)
18. **multifibre joint** : an assembly designed to permit the connection between two or more multifibre cables. ★ raccord multifibre → *raccord 9.* R многоволоконное соединение. D Mehrfach-Faserverbinder. E unión multifibra. I giunto multifibre. N multivezellasverbinding. P złączka wielowłóknowa. S flerfiberförbindning. (731)
19. **plain joint** : a flange joint composed of two flat flanges. ★ raccord ordinaire → *raccord 10.* R простое фланцевое соединение. D ..... E junta normal. I giunto ordinario. N vlakke flensverbinding. P złącze stykowe. S planflänsskarv. (726)
20. **rail joint bond** : → *bond 2*
21. **rotary joint** (*Syn.* rotating joint) : a joint for efficient transmission of electromagnetic waves between two transmission lines designed to permit the continuous mechanical rotation of one with respect to the other. ★ raccord tournant → *raccord 11.* R вращающееся сочленение; вращательное сочленение. D Drehverbindung. E junta rotativa. I giunto rotante. N draaibare koppeling. P złącze obrotowe. S roterskarv. (726)
22. **rotating joint** (*Syn.* rotary joint) : → *joint 21*
23. **sectionalising joint** : a joint where the metallic sheath, shield and insulation screen of the cable are electrically interrupted. ★ jonction de sectionnement → *jonction 13.* R изолирующая муфта. D Isoliermuffe. E empalme de seccionamiento. I giunzione di sezionamento. N isoleermof. P mufa sekcjonująca (izolująca). S sektioneringsskarv. (461)
24. **stop joint** : an accessory making a connection between two cables where the fluid in one cable is segregated from the fluid or the insulation of the other cable by a pressure resisting barrier. ★ jonction à joint d'arrêt → *jonction 8.* R стопорная муфта. D Sperrmuffe. E empalme estanco. I giunzione di arresto. N stopmof. P mufa zaporowa. S stoppskarv. (461)
25. **tee joint** : an accessory making a connection of a branch cable to a main cable where the axes of the two cables are approximately at right angles. ★ dérivation en té → *dérivation 10.* R ответвительная муфта. D T-Muffe. E derivacio'n en T. I giunzione a «T». N T-mof. P trójnik; mufa T. S T-avgrening. (461)
26. **transition joint** : an accessory making a connection between two cables having different types of insulation. ★ jonction mixte → *jonction 26.* R переводная муфта. D Übergangsmuffe. E empalme mixto. I giunzione mista o di transizione. N overgangsmof. P mufa przechodnia; mufa przejściowa. S övergångsskarv. (461)
27. **trifurcating joint** : an accessory making a connection between a three-core cable and three single-core cables. ★ jonction tri-mono → *jonction 31.* R тройниковая соединительная муфта. D Dreier-Aufteilungsmuffe. E empalme de trifurcacio'n. I giunzione di triforcazione. N ..... P mufa trójwylotowa. S ..... (461)
28. **width of flameproof joint** (*Syn.* length of flameproof joint) : → *length 20*
29. **Y joint** (*Syn.* breeches joint) : → *joint 2*

joint-sleeve

1. **joint-sleeve insulation** : → *insulation 39*

Jordan

1. **Jordan diagram** : → *diagram 12*

Josephson

1. **Josephson effect** : → *effect 35*

joule

1. **Joule effect** : → *effect 36*
2. **Joule integral** (*Syn.* I^2t) : → I^2t 1
3. **joule, J** (J) : SI unit of energy. ★ joule, J → *joule 3.* (100)

journal

1. **journal bearing** : → *bearing 19*
2. **journal (of a shaft)** : that part of a shaft which is intended to rotate inside a bearing. ★ tourillon → *tourillon 2.* R шейка (вала). D Wellen-Gleitlagersitz. E gorrón. I perno. N astap. P czop łożyskowy (wału). S lageryta (på axel). (411)

judder

1. **longitudinal judder** : an effect due to the irregularity of the facsimile scanning speed, originating for example, in the irregular rotation of the drum or writing helix and causing slight waviness or breaks in the reproduction of lines that are regular on the original document. ★ broutage longitudinal → *broutage 1.* R продольные механические качания. D längszittern. E trepidación longitudinal. I discontinuità longitudinale. N ..... P wystrzępienie wzdłużne. S bildstörning i längsled. (721)
2. **transverse judder** : an effect due to irregularity of the facsimile scanning pitch resulting in concurrent overlap and underlap in the reproduced picture. ★ broutage transversal → *broutage 2.* R поперечные механические качания. D seitliches Zittern. E trepidación transversal. I discontinuità trasversale. N ..... P wystrzępienie poprzeczne. S bildstörning i tvärled. (721)

judged

1. **judged perceived noise level** : → *level 38*

jump

1. **Barkhausen jumps** (*Syn.* Barkhausen effect) : → *effect 5*
2. **voltage jump** : an abrupt change in the tube voltage drop of a glow discharge tube during operation. ★ saut de tension → *saut 9.* R скачок напряжения. D Spannungssprung. E salto de tensión. I salto di tensione. N spanningssprong. P skok napięcia. S spänningshopp. (531)

jumper

1. **heating jumper** (*Syn.* train power supply jumper) : an electrical connection, easily disconnected, comprising a plug and socket coupling the heating train line between vehicles. ★ accouplement de chauffage → *accouplement 6.* R междувагонное соединение магистрали отопления; междувагонное соединение магистрали энергоснабжения. D Zugsammelschienenkupplung; Zugheizkupplung. E acoplamiento de calefacción. I accoppiatore (ad alta tensione). N hoogspanningsverwarmingskoppeling. P sprzęgnik ogrzewania. S elvärmekoppling. (811)
2. **jumper** : a short length of conductor, not under mechanical tension, making an electrical connection between two separate sections of a line. ★ bretelle → *bretelle 1.* R шлейф. D Stromschlaufe. E puente. I collo morto. N bretel. P mostek; przewód mostkujący. S slack. (466)
3. **jumper** : a connecting wire across a distribution frame. ★ jarretière → *jarretière 1.* R кроссировочный шнур. D Rangierdraht. E puente. I trecciola di ripartizione. N ..... P krosówka. S bygel. (714)
4. **jumper board** : → *board 11*
5. **jumper cable** : → *cable 38*
6. **jumper flag** : → *flag 1*
7. **jumper lug** (*Syn.* jumper flag) : → *flag 1*
8. **jumper terminal** : → *terminal 15*
9. **(track) jumper cable** : → *cable 69*
10. **train power supply jumper** (*Syn.* heating jumper) : → *jumper 1*

jumping

1. **jumping characteristic** : → *characteristic 48*

2. **mode jumping** (*Syn.* mode hopping) : → *hopping 1*

junction

1. **abrupt junction** : a junction the width of which in the direction of the impurity-concentration gradient is much less than the width of the space charge region. ★ jonction abrupte → *jonction 10.* R резкий переход. D abrupter Übergang. E unión abrupta. I giunzione abrupta. N abrupte junctie. P złącze skokowe. S abrupt övergång. (521)
2. **bipolar junction transistor** : → *transistor 2*
3. **collector junction** : a junction between the base and collector regions normally biased in the reverse direction and through which the charge carriers flow from a region in which they are minority carriers to one in which they are majority carriers. ★ jonction collecteur → *jonction 11.* R коллекторный переход. D Kollektorübergang; Kollektor-Basis-Zonenübergang. E unión colector. I giunzione di collettore. N collectorjunctie. P złącze kolektora. S kollektorövergång. (521)
4. **cross-over junction** (for tramway or trolleybus) : a type of overhead junction in which the contact wires of a branch line cross over those of the main line. ★ aiguillage croisé → *aiguillage 2.* R воздушная стрелка с пересечением (для трамваев или троллейбусов). D Fahrdrahtweiche mit kreuzenden Oberleitungen (fuer Straßenbahn oder Obus). E aguja cruzada (para tranvías y trolebuses). I scambio aereo incrociato. N rijdraadkruising. P rozjazd krzyżowy. S ..... (811)
5. **diffused junction semiconductor detector** : → *semiconductor detector 5*
6. **emitter junction** : a junction between the base and emitter regions normally biased in the forward direction and through which the charge carriers flow from a region in which they are majority carriers to one in which they are minority carriers. ★ jonction émetteur → *jonction 15.* R эмиттерный переход. D Emitterübergang; Emitter-Basis-Zonenübergang. E unión emisor. I giunzione di emettitore. N emitterjunctie. P złącze emitera. S emitterövergång. (521)
7. **E-plane T junction** (*Syn.* series T) : a T junction in which the electric field strength vectors of the dominant mode in all arms are parallel to the plane containing the longitudinal axes of the arms. ★ jonction en Té plan E → *jonction 19.* R Т-образное соединение в плоскости Е; последовательный тройник. D T-Verzweigung in der E-Ebene. E unión en T en el plano E; T serie. I giunzione a T nel piano E; T serie; giunzione a T magnetica. N E-vlak-T-stuk. P rozgałęzienie T w płaszczyźnie E; rozgałęzienie T szeregowe. S serie-T. (726)
8. **E-plane Y junction** : a Y junction in which the electric field strength vectors of the dominant mode in all arms are parallel to the plane containing the longitudinal axes of the arms. ★ jonction en Y plan E → *jonction 22.* R Y-образное соединение в плоскости Е. D Y-Verzweigung in der E-Ebene. E unión en Y en el plano E. I giunzione a Y nel piano E; giunzione a Y magnetica. N E-vlak-Y-stuk. P rozgałęzienie Y w płaszczyźnie E. S serie-Y. (726)
9. **H-plane T junction** (*Syn.* shunt T) : a T junction in which the electric field strength vectors of the dominant mode in all arms are orthogonal to the plane containing the longitudinal axes of the arms. ★ jonction en Té plan H → *jonction 20.* R Т-образное соединение в плоскости Н; параллельный тройник. D T-Verzweigung in der H-Ebene. E unión en T en el plano H; T derivación. I giunzione a T nel piano H; T derivazione; giunzione a T magnetica. N H-vlak-T-stuk. P rozgałęzienie T w płaszczyźnie H; rozgałęzienie T równoległe. S shunt-T. (726)
10. **H-plane Y junction** : a Y junction in which the electric field strength vectors of the dominant mode in all arms are orthogonal to the plane containing the longitudinal axes of the arms. ★ jonction en Y plan H → *jonction 23.* R Y-образное соединение в плоскости Н. D Y-Verzweigung in der H-Ebene. E unión en Y en el plano H. I giunzione a Y nel piano H; giunzione a Y magnetica. N H-vlak-Y-stuk. P rozgałęzienie Y w płaszczyźnie H. S shunt-Y. (726)
11. **hybrid junction** : a four port device in which power fed into any one port is equally divided between two other ports having matched terminations; furthermore, power fed into the remaining port is equally divided between the same two ports. ★ jonction hybride → *jonction 25.* R гибридное соединение. D Hybridverzweigung. E unión híbrida. I giunzione ibrida. N hybride verbindingsstuk. P sprzegacz hybrydowy. S hybridgrening. (726)
12. **junction** : a transition layer between semiconductor regions of different electrical properties, or between a semiconductor and a superficial layer of different type. This layer is characterized by a potential barrier impeding the movement of charge carriers from one region to the other. ★ jonction → *jonction 6.* R переход. D Übergang. E unión. I giunzione. N grenslaag; overgang. P złącze. S övergång. (391,521)
13. **junction box** (*Syn.* power divider) : → *divider 4*
14. **junction circulator** : → *circulator 6*
15. **junction frequency** : → *frequency 121*
16. **PN junction** : a junction between P and N type semiconductor regions. ★ jonction PN → *jonction 28.* R ПН-переход. D PN-Übergang. E unión PN. I giunzione PN. N PN-overgang. P złącze p-n. S PN-övergång. (391,521)
17. **progressive junction** : a junction the width of which in the direction of the impurity-concentration gradient is comparable with the width of the space charge region. ★ jonction progressive → *jonction 29.* R постепенный переход. D allmählicher fortschreitender Übergang. E unión gradual. I giunzione progressiva. N geleidelijke junctie. P złącze przejściowe stopniowane. S gradvis övergång. (521)
18. **T junction** (*Syn.* Tee junction; Tee) : a junction of waveguides in which the longitudinal waveguide axes form a "T". ★ jonction en Té → *jonction 18.* R Т-образное соединение; тройниковое соединение; тройник. D T-Verzweigung. E unión en T. I giunzione a T; giunzione a Te. N T-stuk. P rozgałęzienie T. S T-grening. (726)
19. **tangential junction** (for tramway or trolleybus) : a type of overhead junction in which the contact wires of a branch line run side-by-side with those of the main line after convergence. ★ aiguillage tangentiel → *aiguillage 3.* R воздушная стрелка без пересечения (для трамваев или троллейбусов). D Fahrdrahtweiche mit Parallelführung der kreuzenden Oberleitungen (fuer Straßenbahn oder Obus). E aguja tangencial. I scambio aereo tangenziale. N (bij wissel) meelopende rijdraad. P rozjazd (przewodów równoległych). S ..... (811)
20. **Tee junction** (*Syn.* T junction) : → *junction 18*
21. **telegraph junction circuit** : → *circuit 179*
22. **virtual (equivalent) junction temperature** : → *temperature 66*
23. **Wye junction** (*Syn.* Y junction) : → *junction 24*
24. **Y junction** (*Syn.* Wye junction) : a junction of waveguides in which the longitudinal axes form a "Y". ★ jonction en Y → *jonction 21.* R Y-образное соединение; тройниковое соединение. D Y-Verzweigung. E unión en Y. I giunzione a Y. N Y-stuk. P rozgałęzienie Y. S Y-grening. (726)

junction-gate

1. **junction-gate field-effect transistor** : → *transistor 7*

just

1. **just value** : → *value 16*

justifiable

1. **justifiable digit time-slot** : → *time-slot 4*

justification

1. **justification** (*Syn.* pulse stuffing) : the process of changing the digit rate of a digital signal in a controlled manner without loss or mutilation of information. *Notes. 1* — Justification is usually employed as an adjunct to digital multiplexing to enable the multiplexing to be applied to tributary channels that are not synchronized to the multiplex equipment. Where this is done, the original signal of each channel is independently justified. *2* — Associated verbs are "to justify", "to stuff". ★ justification → *justification 8.* R цифровое выравнивание; согласование скорости (передачи символов цифрового сигнала). D Justierung; Impuls-Füllung. E justificación. I giustificazione. N justeren. P dopełnianie impulsowe. S taktanpassning. (704)
2. **justification capacity** : → *capacity 12*
3. **justification instant** : → *instant 5*
4. **justification rate** : → *rate 46*
5. **justification ratio** : → *ratio 46*
6. **justification service digit** : → *digit 19*
7. **maximum justification rate** (*Syn.* justification capacity) : → *capacity 12*

8. **maximum justification ratio** : → *ratio 54*
9. **minimum justification ratio** : → *ratio 56*
10. **negative justification** (*Syn.* negative pulse stuffing) : a method of justification in which the digit time-slots used to convey a digital signal have a digit rate that is always lower than the digit rate of the original signal, and in which at each justification instant, depending on the prevailing conditions, either : a) one digit of the original signal is transmitted in the justifiable digit time-slot, or b) two digits of the original signal are transmitted, one in the justifiable digit time-slot with the other digit being removed and then transmitted by another means, with these alternative justification states being indicated by unique signals formed from justification service digits. ★ justification négative → *justification 9.* R отрицательное цифровое выравнивание. D negative Justierung; negative Impulsfüllung. E justificación negativa. I giustificazione negativa. N negatieve justering. P dopełnianie ujemne. S negativ taktanpassning. (704)
11. **nominal justification rate** : → *rate 61*
12. **nominal justification ratio** : → *ratio 60*
13. **positive justification** (*Syn.* positive pulse stuffing) : a method of justification in which the digit time-slots used to convey a digital signal have a digit rate that is always higher than the digit rate of the original signal, and in which at each justification instant, depending on the prevailing conditions, either : a) no digit of the original signal is transmitted but, instead, a justifying digit is transmitted in the justifiable digit time-slot, or b) one digit of the original signal is transmitted in the justifiable digit time-slot, with these two alternative justification states being indicated by unique signals formed from justification service digits. ★ justification positive → *justification 10.* R положительное цифровое выравнивание. D positive Justierung; positive Impulsfüllung. E justificación primitiva. I giustificazione positiva. N positieve justering. P dopełnianie dodatnie. S positiv taktanpassning. (704)
14. **positive/zero/negative justification** (*Syn.* positive/zero/negative pulse stuffing) : a method of justification in which the digit time-slots used to convey a digital signal have a digit rate that, at various times, may be higher than, the same as, or lower than the digit rate of the original signal, and in which at each justification instant, depending on the prevailing conditions, either : a) no digit of the original signal is transmitted but, instead, a justifying digit is transmitted in the justifiable digit time-slot, or b) one digit of the original signal is transmitted in the justifiable digit time-slot, or c) two digits of the original signal are transmitted, one in the justifiable digit time-slot with the other digit being removed and then transmitted by another means, with these three alternative justification states being indicated by unique signals formed from justification service digits. ★ justification positive/nulle/négative → *justification 11.* R двустороннее цифровое выравнивание. D Positiv-Null-Negativ-Justierung; Positiv-Null-Negativ-Impulsfüllung. E justificación primitiva / nula / negativa. I giustificazione positiva/nulla/negativa. N positieve/nul/negatieve justering. P dopełnianie dodatnio-zero-ujemne. S positiv-noll-negativ taktanpassning. (704)

justifying

1. **justifying digit** : → *digit 20*

K

Kaplan

1. **Kaplan turbine** : → *turbine 6*

keep-alive

1. **keep-alive electrode** : → *electrode 69*

keeper

1. **keeper** : a high-permeance piece of magnetic material placed across the poles of a permanent magnet to protect it from unintentional demagnetization or to reduce its external field. ★ court-circuit magnétique → *court-circuit 11.* R якорь. D Magnetanker; Magnetschlußstück. E cortocircuito magnético. I cortocircuito magnetico. N (magnetisch) sluitstuk. P zwora. S ankare. (151)

Kell

1. **Kell factor** : → *factor 102*

Kelvin

1. **Kelvin (double) bridge** : → *bridge 13*

kerma

1. **air kerma-rate constant** : → *constant 2*
2. **kerma** (K) : the quotient of dE_{tr} by dm, where dE_{tr} is the sum of the initial kinetic energies of all the charged particles liberated by indirectly ionizing particles in a material of mass dm. $K = dE_{tr}/dm$. *Note.* — The SI unit of kerma is the joule per kilogram and is given the special name gray (Gy). The earlier special unit of kerma, still in temporary use, was the rad. 1 Gy = 100 rad = 1 J kg^{-1}. ★ kerma → *kerma 3.* R керма. D Kerma. E kerma. I kerma. N kerma. P kerma. S kerma. (881)
3. **kerma rate** : → *rate 47*

Kerr

1. **Kerr effect** : → *effect 37*

key

1. **decadic key pad** : → *pad 2*
2. **key** : a bar which by being inserted in the recesses of two adjacent members serves to transmit a torque from one to the other. ★ clavette → *clavette 1.* R шпонка. D Paßfeder (Keil). E chaveta. I chiavetta. N spie. P wpust. S kil. (411)
3. **key** : a solid projection, along the length of the spigot, that locates the base in its correct angular position in the socket. ★ clé → *clé 1.* R ориентирующий выступ. D Führungsnase. E llave. I chiavetta. N zoeknok. P klucz (cokołu). S styrblock. (531)
4. **key** : a projection which engages with a keyway to guide a component during mating. ★ ergot → *ergot 2.* R ключ. D Schlüssel. E pitón. I chiave di guida — chiavetta; chiavetta. N geleidenok. P klucz. S styrklack. (581)
5. **key** (in switching) : a hand-operated switching device normally comprising concealed spring contacts with an exposed handle or pushbutton, capable of closing or opening one or more electrical paths. ★ clé → *clé 2.* R ключ (коммутации). D Schalter; Taste. E llave (de conmutación). I chiave (di commutazione). N sleutel. P klucz (w komutacji). S omkastare. (714)
6. **key clicks** (*Syn.* telegraph noise) : → *noise 87*
7. **key pad** : → *pad 4*
8. **key pad (telephone) set** (*Syn.* push-button (telephone) set) : → *set 38*
9. **key telephone set** : → *set 30*
10. **Morse key** : a device designed to permit the formation of Morse telegraphy signals by a manual operation. ★ manipulateur Morse → *manipulateur 6.* R ключ Морзе. D Morsetaste. E manipulador Morse. I tasto Morse. N Morsesleutel. P klucz Morse'a. S morsenyckel; telegrafnyckel. (721)
11. **multifrequency key pad** : → *pad 6*
12. **piano key button** : → *button 3*

keyboard

1. **alphanumeric keyboard** : a device comprising an assembly of alphanumeric keys and function keys the operation of which controls the transmitter of a telegraph apparatus or a data source. ★ clavier alphanumérique → *clavier 5.* R буквенно-цифровая клавиатура. D alphanumerische Tastatur. E teclado alfanumérico. I tastiera alfanumerica. N alfanumeriek toetsenbord. P klawiatura alfanumeryczna. S alfanumeriskt tangentbord. (721)
2. **keyboard perforator** : → *perforator 1*
3. **keyboard selection** : → *selection 10*
4. **keyboard transmitter** : → *transmitter 9*
5. **motorized keyboard** : an alphanumeric keyboard in which the energy required to move the combination bars into the position selected by the depression of a key is derived from the motor driving the instrument of which the keyboard forms a part. ★ clavier mécanique assisté → *clavier 7.* R клавиатура с приводом. D angetriebene Tastatur. E teclado de tracción mecánica; teclado motorizado. I tastiera automatizzata. N elektrisch toetsenbord. P klawiatura mechaniczna. S motordrivet tangentbord. (721)
6. **saw-tooth keyboard** : an alphanumeric keyboard in which the energy required to move the combination bars into the position selected by the depression of a key is derived from the operator. ★ clavier à action directe → *clavier 2.* R клавиатура прямого действия; клавиатура с пилообразными комбинаторными линейками. D Sägezahn-Tastatur. E teclado con acción directa. I tastiera meccanica. N mechanisch toetsenbord. P klawiatura o działaniu bezpośrednim. S mekaniskt tangentbord. (721)
7. **storage keyboard** : an alphanumeric keyboard in which the combination set up by the depression of a key does not directly control the transmitter but is transferred to one or more sets of storage members for subsequent control of the transmitter. ★ clavier à enregistreur → *clavier 4.* R клавиатура с накопителем. D Speichertastatur. E teclado con registrador. I tastiera di registrazione. N toetsenbord met geheugen. P klawiatura z pamięcią. S tangentbord med magasinering. (721)

keying

1. **amplitude shift keying** (*Syn.* ASK (abbreviation); amplitude shift modulation) : modulation in which each significant condition of a digital modulating signal is represented by a specified value of the amplitude of a sinusoidal oscillation. ★ modulation par changement d'amplitude → *modulation 42.* R амплитудная манипуляция. D Amplitudenumtastung; ASK (Abkürzung); Amplitudensprungmodulation. E modulación por cambio de amplitud; modulación por desplazamiento de amplitud. I modulazione per valori discreti ampiezza. N amplitudeschakelmodulatie; ASM. P modulacja przesunięciem amplitudy. S amplitudskiftsmodulering. (702,721)
2. **differential phase shift keying** (*Syn.* DPSK (abbreviation)) : angle modulation in which each change of significant condition of a modulating discretely timed signal is represented by a specified change of phase of the modulated signal. ★ modulation par déplacement de phase différentielle → *modulation 48.* R относительная фазовая манипуляция. D differentielle Phasenumtastung; DPSK (Abkürzung). E modulación por desplazamiento de fase diferencial. I modulazione per spostamento di fase differenziale; DPSK (abbreviazione). N differentiele faseschakelmodulatie. P modulacja przesunięciem fazy różnicowa. S fasdifferensmodulering. (702,721)
3. **frequency shift keying** (*Syn.* FSK (abbreviation); frequency shift modulation; frequency shift signalling) : angle modulation in which each significant condition of a discretely timed modulating signal is represented by one of a specified set of discrete values of the frequency of the modulated signal. ★ modulation par déplacement de fréquence → *modulation 44.* R частотная манипуляция. D Frequenzumtastung; FSK (Abkürzung);

Frequenzsprungmodulation; Frequenzumtastsignalisierung. E modulación por desplazamiento de frecuencia; FSK (abreviatura). I modulazione per spostamento di frequenza; FSK (abbreviazione). N frequentieschakelmodulatie. P modulacja przesunięciem częstotliwości. S frekvensskiftsmodulering. (702,721)

4. **frequency shift keying** (*Syn.* frequency shift telegraphy) : → *telegraphy 7*
5. **minimum (phase frequency) shift keying** (*Syn.* MSK (abbreviation)) : a form of two-condition frequency shift keying with modulation index equal to 0.5, in which phase variations are continuous. ★ modulation à déphasage minimal → *modulation 14.* R минимальнофазовая частотная манипуляция. D Minimum-Phasen-Frequenzumtastung; MSK (Abkürzung). E modulación con desfase mínimo. I modulazione a sfasamento minimo. N minimale-fasefrequentieschakelmodulatie. P modulacja o minimalnym przesunięciu fazy. S ..... (702)
6. **multiple phase shift keying** (*Syn.* MPSK (abbreviation)) : phase shift keying in which the phase shift takes n different values generally multiples of $2\pi/n$ radians. ★ modulation par déplacement de phase à n états → *modulation 47.* R многопозиционная фазовая манипуляция. D multiple Phasenumtastung; MPSK (Abkürzung). E modulación por desplazamiento de fase de n estados. I modulazione per spostamento multiplo di fase; MPSK (abbreviazione). N meervoudige faseschakelmodulatie. P modulacja przesunięciem fazy o n stanach. S flerfasmodulering. (702)
7. **n-condition frequency shift keying** (*Syn.* n-FSK (abbreviation)) : frequency shift keying in which the frequency shift takes n different values which are usually uniformly spaced. ★ modulation par déplacement de fréquence à n états → *modulation 45.* R n — позиционная частотная манипуляция. D n-äre Frequenzmodulationsumtastung; n-FSK (Abkürzung). E modulación por desplazamiento de frecuencia de n estados. I modulazione per spostamento di multiplo frequenza; MFSK (abbreviazione). N n-frequentiesschakel modulatie. P modulacja przesunięciem częstotliwości o n stanach. S n-frekvensmodulering. (702)
8. **phase shift keying** (*Syn.* PSK (abbreviation); phase shift modulation; phase shift signalling) : angle modulation in which each significant condition in a discretely timed modulating signal is represented by a specified difference between the phase of the modulated signal and the phase of the carrier in the absence of modulation. ★ modulation par déplacement de phase → *modulation 46.* R фазовая манипуляция. D Phasenumtastung; PSK (Abkürzung); Phasensprungmodulation; Phasenumtastsignalisierung. E modulación por desplazamiento de fase. I modulazione per spostamento di fase; PSK (abbreviazione). N faseschakelmodulatie. P modulacja przesunięciem fazy. S fasskiftsmodulering. (702,721)
9. **quadrature phase shift keying** (*Syn.* QPSK (abbreviation); quadrature phase modulation) : four condition phase shift keying in which the phase shift takes values that are multiples of $\pi/2$ radians. ★ modulation par quadrature de phase → *modulation 57.* R квадратурная фазовая манипуляция. D quaternäre Phasenumtastung; QPHT (Abkürzung). E modulación por cuadratura de fase. I modulazione per quadratura di fase; modulazione tetravalente di fase; QPSK (abbreviazione). N kwadratuurfasemodulatie. P modulacja przesunięciem fazy kwadraturowym. S fyrfasmodulering. (702,721)

keyshelf

1. **keyshelf** : the shelf on which control keys are mounted for use by operators or other personnel. ★ panneau de clés → *panneau 6.* R панель ключей. D Schalteraufnahme. E panel de llaves. I pannello chiavi. N ..... P pulpit. S omkastarfält. (714)

keyway

1. **keyway** : a slot or groove in which a key engages. ★ rainure d'ergot → *rainure 2.* R паз ориентирующий. D Schlüsselnut. E ranura de pitón. I guida; scanalatura di guida. N sleuf. P prowadnica klucza. S styrspår. (581)

killer

1. **colour killer** : a device in a colour television receiver which ensures the display of an acceptable black and white picture when no colour information is present in the received signal, by blocking the chrominance path of the decoder. ★ portier → *portier 1.* R схема выключения канала цветности. (723)

kiln

1. **indirect resistance kiln** (*Syn.* indirect resistance oven) : → *oven 3*

kilovolt-ampere

1. **price per kilowatt or kilovolt-ampere** (*Syn.* demand rate) : → *rate 20*

kilowatt

1. **price per kilowatt or kilovolt-ampere** (*Syn.* demand rate) : → *rate 20*

kilowatthour

1. **average price per kWh** : → *price 1*
2. **cost of kWh not supplied** : → *cost 9*
3. **kilowatthour rate** : → *rate 48*

kind

1. **Stiles-Crawford effect (of the first kind)** : → *effect 79*

kinematic

1. **kinematic viscosity** : → *viscosity 2*

kinetic

1. **instantaneous kinetic sound energy density** : → *density 11*
2. **stored kinetic energy traction** : → *traction 11*

kiosk

1. **kiosk substation** : → *substation 11*
2. **substation relay kiosk** (*Syn.* substation relay building) : → *building 2*

klystron

1. **extended-interaction klystron** : a linear-beam tube that utilizes the principles of a klystron at the input and of a forward-wave amplifier tube at the output. ★ klystron à interaction étendue → *klystron 2.* R ..... D Wanderfeldklystron. E klistrón de interacción extendida. I klystron con interazione estesa. N klystron met verlengde wisselwerking. P klistron kombinowany. S ..... (531)
2. **floating-drift-tube klystron** : a klystron in which the drift space is a shielded region within a cavity. ★ klystron à tube de glissement flottant → *klystron 3.* R клистрон с плавающей трубой дрейфа. D Doppelspaltoszillator. E klistrón de tubo de deslizamiento flotante. I klystron con tubo di deriva fluttuante. N klystron met afgeschermde voortplantingsruimte. P klistron o elektrodzie dryfującej. S resonatorklystron. (531)
3. **klystron** : a linear-beam tube containing at least one drift space and in which the space-charge waves interact with stationary radio-frequency fields that are confined to one or more interaction gaps. ★ klystron → *klystron 1.* R клистрон. D Klystron. E klistrón. I klystron. N klystron. P klistron. S klystron. (531)
4. **multi-cavity klystron** : a klystron having more than two interaction gaps. ★ klystron multicavité → *klystron 4.* R многорезонаторный клистрон. D Mehrkammerklystron. E klistrón multicavidad. I klystron pluricavità. N klystron met meer dan twee trilholten. P klistron wielownękowy; klistron wieloobwodowy. S flerresonatorklystron. (531)
5. **reflex klystron** : a single-cavity klystron in which the beam direction is reversed within the drift space, so that it passes a second time through the interaction gap. ★ klystron réflex → *klystron 5.* R отражательный клистрон. D Reflexklystron. E klistrón de reflexión. I klystron reflex. N reflectieklystron. P klistron refleksowy. S reflexklystron. (531)

knee

1. **knee luminous flux** (*Syn.* knee sensitivity) : → *sensitivity 12*
2. **knee point** : → *point 22*
3. **knee point voltage** : → *voltage 93*
4. **knee sensitivity** : → *sensitivity 12*

knife-edge

1. **knife-edge diffraction** : → *diffraction 10*

knurled

1. **knurled gasket** (*Syn.* knurled plate gasket) : → *gasket 2*
2. **knurled plate gasket** : → *gasket 2*

Koschmieder

1. **Koschmieder's law** : → *law 6*

Kraemer

1. **Kraemer system** : → *system 100*
2. **modified Kraemer system** : → *system 117*
3. **static Kraemer system** : → *system 200*

kraft

1. **kraft capacitor paper** : → *paper 8*
2. **kraft paper** : → *paper 9*

kraft-mixture

1. **manila/kraft-mixture paper** : → *paper 10*

K-rating

1. **K-rating factor** : → *factor 103*

kymography

1. **kymography** : a radiographic technique for recording the motion of the boundary of the shadow of an object. ★ kymographie → *kymographie 1.* **R** кимография. **D** Kymographie. **E** kimografía. **I** chimografia. **N** kymografie. **P** kimografia. **S** kymografi. (881)

L

label

1. **label** : information within a signal message used to identify the particular traffic circuit, call or management action to which the message is related. ★ étiquette → *étiquette 1.* R адресная часть. D Adresse. E etiqueta. I etichetta. N label. P etykieta. S etikett. (714)
2. **label** (in signalling) : one or more characters within or attached to a set of data, that contains information about the set, including its identification. ★ étiquette → *étiquette 2.* R метка (в сигнализации). D Wählvorspann. E etiqueta (en señalización). I etichetta. N label (bij signalering). P etykieta (w sygnalizacji). S etikett. (721)
3. **label area** : → *area 23*

label-addressed

1. **label-addressed signalling** (*Syn.* common-channel signalling) : → *signalling 8*

labelled

1. **labelled** (*Syn.* tagged) : applies to molecules, in which atoms have been replaced by other isotopes of the same elements, allowing the use of the molecules as tracers. ★ marqué → *marquer 1.* R меченый. D markiert. E marcado. I marcato. N gemerkt. P znacznik molekularny. S märkt. (881)
2. **labelled message** (*Syn.* signal message) : → *message 14*

laboratory

1. **high activity laboratory** : a laboratory so equipped with adequate barriers and special instruments that large quantities of radioactive materials can be processed safely. ★ laboratoire de haute activité → *laboratoire 4.* R лаборатория с высоким уровнем активности. D Laboratorium für hohe Aktivität. E laboratorio de alla actividad; laboratorio caliente. I laboratorio di alta attività. N laboratoria voor verwerking van hoogradioactief materiaal. P laboratorium wysokiej aktywności; laboratorium gorące. S högaktivitetslaboratorium. (881)
2. **laboratory test** : → *test 44*

lacing

1. **double lacing** (*Syn.* double warren) : → *warren 1*
2. **double lacing redundant support** (*Syn.* double warren redundant support) : → *support 8*
3. **lacing system** (*Syn.* bracing system) : → *system 20*
4. **single lacing** (*Syn.* single warren) : → *warren 3*
5. **triple lacing** (*Syn.* triple warren) : → *warren 4*

lacquer

1. **lacquer** : 1. A quick drying enamel that is not baked on. 2. A quick drying coating which hardens primarily by loss of solvent and is usually not baked on. Lacquers are sometimes used as finishing varnishes. ★ vernis-laque → *vernis-laque 1.* R быстросохнущий лак. D Überzugslack; lufttrocknender Lack. E laca. I vernice-lacca. N lak. P lakier (szybkoschnący). S lack. (212)
2. **lacquer disk** : → *disk 9*
3. **lacquer original** : an instantaneous recording from which a metal master is produced by an electroplating process. ★ (disque de) laque original → *laque 2.* R лаковый оригинал. D Lackoriginal. E disco de laca original. I lacca originale; disco di lacca originale. N opname op lakplaat. P oryginał (płyty gramofonowej). S graverad lackskiva (för formning). (806)

ladder

1. **ladder network** : → *network 34*

ladle

1. **ladle** : a refractory lined bucket for receiving and transporting molten metal. ★ poche de coulée → *poche 3.* R ковш. D Giesspfanne. E cazo de colada. I siviera. N gietlepel. P kadź spustowo-transportowa. S skänk. (841)

lag

1. **distance-velocity lag** : a delay attributable to the transport of material or to the finite rate of propagation of a signal. ★ retard de parcours → *retard 23.* R транспортное запаздывание. D Laufzeit. E retardo de propagación. I ritardo di trasporto propagazione. N looptijd. P opóźnienie transportowe. S transportfördröjning. (351)
2. **lag** (*Syn.* smearing) : failure of the output current to follow variations of the light input instantaneously. ★ persistance → *persistance 5.* R инерционность. D Trägheit. E persistencia. I persistenza. N achterblijven. P przeciąganie obrazu. S eftersläpning. (531)
3. **(phase) lag** : the phase difference of the second quantity with respect to the first. ★ retard de phase → *retard 24.* R запаздывание по фазе. D Phasen-Nacheilwinkel. E retardo de fase. I ritardo di fase. N faseachterstand. P opóźnienie fazowe. S negativ fasdifferens. (101)
4. **phase lag** (*Syn.* positive phase difference) : → *difference 27*
5. **picture-sound lag** (*Syn.* picture-sound desynchronisation) : a time-lag, which is clearly perceptible, between the picture and the associated sound or sounds. ★ décalage image-son → *décalage 8.* R потеря синхронности звука и изображения. (723)

lagging

1. **lagging phase** (*Syn.* dead phase) : → *phase 6*

Lambert

1. **Lambert's (cosine) law** : → *law 7*

Lambertian

1. **Lambertian radiator** : → *radiator 3*
2. **Lambertian reflector** : → *reflector 9*
3. **Lambertian source** (*Syn.* Lambertian radiator) : → *radiator 3*
4. **Lambertian surface** : → *surface 13*

laminar

1. **laminar plasma torch** : → *torch 1*

laminate

1. **laminate** : a product made by bonding together two or more layers of the same or different materials. ★ stratifié → *stratifié 1.* R слоистый материал. D Schichtpreßstoff. E estratificado; laminado. I stratificato. N laminaat. P laminat. S laminat. (212)

laminated

1. **laminated core** : → *core 26*
2. **laminated frame** : → *frame 36*
3. **laminated frame** : → *frame 37*
4. **laminated (magnetic) core** : → *core 27*
5. **transformer with radially laminated core** : → *transformer 74*

lamination

1. **lamination factor** : → *factor 104*
2. **(stator or rotor) lamination** : a sheet generally coated with an insulating material, used in the construction of parts of the magnetic circuit of the laminated stator or rotor of an electrical machine. ★ tôle (de stator ou de rotor) → *tôle 1.* R лист статора (ротора). D (Ständer oder Läufer) Blechung. E chapa (de estator o de rotor). I lamiera (di statore o di rotore); lamierino (di statore o di rotore). N (stator- of rotor)blikpakket. P blacha stojana lub wirnika. S laminering. (811)
3. **strand or lamination insulation** : → *insulation 52*

lamp

1. **air-turbo lamp** (*Syn.* compressed air luminaire) : luminaire energized by an alternator driven by compressed air. ★ lampe électropneumatique → *lampe 49.* R .....

D Druckluftleuchte. E luminaria electro-pneumática. I apparecchio elettropneumatico. N persluchtlamp. P lampa turbinkowa; lampa powietrzna. S tryckluftlampa. (845)

2. **arc lamp** : a discharge lamp in which the light is emitted by an arc discharge and/or by its electrodes. *Note.* — The electrodes may be either of carbon (operating in air) or of metal. ★ lampe à arc → *lampe à arc 1.* R дуговая лампа. D Bogenlampe. E lámpara de arco. I lampada ad arco. N booglamp. P lampa łukowa. S båglampa. (845)

3. **bactericidal lamp** (*Syn.* germicidal lamp) : low pressure mercury vapour lamp with a bulb which transmits the bactericidal ultraviolet-C radiation. ★ lampe germicide → *lampe 57.* R бактерицидная лампа. D Entkeimungslampe. E lámpara germicida. I lampada germicida. N bacteriëndodende straler. P lampa bakteriostatyczna; lampa bakteriobójcza. S bakteriedödande lampa. (845)

4. **black light lamp** (*Syn.* Wood's glass lamp) : lamp designed to emit ultraviolet-A radiation and very little visible radiation. *Note.* — Such a lamp is generally mercury discharge or fluorescent. ★ lampe à lumière noire → *lampe 24.* R лампа черного света. D Schwarzglaslampe. E lámpara de Wood. I lampada a luce nera. N lamp van Wood. P lampa Wooda. S UV-mörkstrålare; Woods lampa. (845)

5. **blended lamp** (*Syn.* self-ballasted mercury lamp) : lamp containing in the same bulb a mercury vapour lamp and an incandescent lamp filament connected in series. *Note.* — The bulb may be diffusing or coated with phosphors. ★ lampe à lumière mixte → *lampe 23.* R лампа смешанного света. D Verbund-Lampe; Mischlichtlampe. E lámpara de mezcla. I lampada a luce miscelata. N menglichtlamp. P lampa o świetle mieszanym. S blandljuslampa. (845)

6. **cap lamp** : miner's personal lamp designed to be attached to a miner's helmet. ★ lampe au chapeau → *lampe 35.* R головной светильник. D Kopfleuchte; persönliches Geleucht. E lámpara de casco. I lampada per casco. N petlamp. P lampa naheĺmna. S hjälmlampa. (845)

7. **carbon filament lamp** : incandescent lamp whose luminous element is a filament of carbon. ★ lampe à filament de carbone → *lampe 12.* R лампа с угольной нитью. D Kohlefadenlampe. E lámpara de filamento de carbono. I lampada a filamento di carbone. N kooldraadlamp. P żarówka o żarniku węglowym. S koltrådslampa. (845)

8. **cold cathode lamp** : a discharge lamp in which the light is produced by the positive column of a glow discharge. *Note.* — Such a lamp is generally fed from a device providing sufficient voltage to initiate starting without special means. ★ lampe à cathode froide → *lampe 7.* R лампа с холодным катодом. D Kaltkathodenlampe. E lámpara de cátodo frío. I lampada a catodo freddo. N koude-kathodelamp. P lampa o zimnej katodzie. S kallkatodlampa. (845)

9. **cold-start lamp** (*Syn.* instant-start lamp) : a discharge lamp designed to start without preheating of the electrodes. ★ lampe à amorçage à froid → *lampe 5.* R лампа с зажиганием в холодном состоянии. D Kaltstartlampe. E lámpara de cebado en frío. I lampada a catodo non preriscaldato. N koud ontstekende lamp. P lampa o zimnym zapłonie. S kallstartlampa. (845)

10. **compact-source arc discharge lamp** (*Syn.* short-arc lamp) : → *lamp 58*

11. **comparison lamp** : light source having a constant but not necessarily known luminous intensity, luminous flux, or luminance, with which a standard lamp and the light source under test are successively compared. ★ lampe tare → *lampe 66.* R лампа сравнения. D Vergleichslampe. E lámpara de comparación. I lampada di paragone. N vergelijkingslamp. P lampa porównawcza. S referenslampa. (845)

12. **daylight lamp** : lamp giving light with a spectral energy distribution approximating that of a specified daylight. ★ lampe à lumière du jour → *lampe 22.* R лампа дневного света. D Tageslichtlampe. E lámpara de luz de día. I lampada a luce diurna. N daglichtlamp. P lampa o świetle dziennym. S dagsljuslampa. (845)

13. **discharge lamp** : lamp in which the light is produced, directly or indirectly, by an electric discharge through a gas, a metal vapour or a mixture of several gases and vapours. *Note.* — According as the light is mainly produced in a gas or in a metal vapour, one distinguishes between gaseous discharge lamps, for example xenon, neon, helium, nitrogen, carbon dioxide lamp, and metal vapour lamps, such as the mercury vapour lamp and the sodium vapour lamp. ★ lampe à décharge → *lampe 8.* R разрядная лампа. D Entladungslampe. E lámpara de descarga. I lampada a scarica. N ontladingslamp. P lampa wyładowcza. S urladdningslampa. (845)

14. **dummy lamp** : a device simulating the radio frequency impedance of a fluorescent lamp and so constructed that it can replace the fluorescent lamp in a luminaire for the purpose of luminaire insertion loss measurement. ★ lampe fictive → *lampe 53.* R эквивалент лампы. D Lampennachbildung. E lámpara ficticia. I lampada fittizia. N kunstlamp. P lampa sztuczna. S lampekvivalent. (161)

15. **electroluminescent lamp** : lamp in which the light is produced by electroluminescence. ★ lampe électroluminescente → *lampe 48.* R электролюминесцентная лампа. D Elektrolumineszenz-Lampe. E lámpara electroluminiscente. I lampada elettroluminescente. N elektroluminescentielamp. P lampa elektroluminescencyjna. S elektroluminiscent lampa. (845)

16. **electronic-flash lamp** (*Syn.* flash tube) : → *tube 33*

17. **floor lamp** (*Syn.* standard lamp) : → *lamp 60*

18. **fluorescent lamp** : a discharge lamp of the low pressure mercury type in which most of the light is emitted by one or several layers of phosphors excited by the ultraviolet radiation from the discharge. *Note.* — These lamps are frequently tubular and, in the UK, are then usually called fluorescent tubes. ★ lampe fluorescente → *lampe 54.* R люминесцентная лампа. D Leuchtstofflampe; Fluoreszenzlampe (CH). E lámpara fluorescente. I lampada fluorescente, N fluorescentielamp. P świetlówka; lampa fluorescencyjna. S lysrör. (845)

19. **gas-filled (incandescent) lamp** : incandescent lamp in which the luminous element operates in a bulb filled with an inert gas. ★ lampe (à incandescence) à atmosphère gazeuse → *lampe 16.* R газополная лампа. D gasgefüllte Lampe. E lámpara (incandescente) de atmósfera gaseosa. I lampada a gas. N gas-gevulde lamp. P żarówka gazowana. S gasfylld lampa. (845)

20. **germicidal lamp** (*Syn.* bactericidal lamp) : → *lamp 3*

21. **HID lamp** (*Syn.* high intensity discharge lamp) : → *lamp 22*

22. **high intensity discharge lamp** (*Syn.* HID lamp) : an electric discharge lamp in which the light-producing arc is stabilized by wall temperature and the arc has a bulb wall loading in excess of 3 watts per square centimetre. *Note.* — HID lamps include groups of lamps known as high pressure mercury, metal halide and high pressure sodium lamps. ★ lampe à décharge à haute intensité → *lampe 9.* R разрядная лампа высокой интенсивности. D Hochdruckentladungslampe; HID-Lampe. E lámpara de descarga de alta intensidad. I lampada a scarica ad alta intensità. N hogedrukgasontladingslamp. P lampa wyładowcza dużej intensywności. S högtryckslampa. (845)

23. **high pressure mercury (vapour) lamp** : a high intensity discharge lamp in which the major portion of the light is produced, directly or indirectly, by radiation from mercury operating at a partial pressure in excess of 100 kilopascals. *Note.* — This term covers clear, phosphor coated (mercury fluorescent) and blended lamps. In a fluorescent mercury discharge lamp, the light is produced partly by the mercury vapour and partly by a layer of phosphors excited by the ultraviolet radiation of the discharge. ★ lampe à (vapeur de) mercure à haute pression → *lampe 32.* R ртутная лампа высокого давления. D Quecksilberdampf-Hochdrucklampe. E lámpara (de vapor) de mercurio de alta presión. I lampada a (vapore di) mercurio ad alta pressione. N hogedrukkwiklamp. P rtęciówka wysokoprężna. S kvicksilverlampa av högtryckstyp. (845)

24. **high pressure sodium (vapour) lamp** : a high intensity discharge lamp in which the light is produced mainly by radiation from sodium vapour operating at a partial pressure of the order fo 10 kilopascals. *Note.* — The term covers lamps with clear or diffusing bulb. ★ lampe à (vapeur de) sodium à haute pression → *lampe 34.* R натриевая лампа высокого давления. D Natriumdampf-Hochdrucklampe. E lámpara (de vapor) de sodio de alta presión. I lampada a (vapore di) sodio ad alta pressione. N hogedruknatriumlamp. P sodówka wysokoprężna. S natriumlampa av högtryckstyp. (845)

25. **hot cathode lamp** : a discharge lamp in which the light is produced by the positive column of an arc discharge. *Note.* —

Such a lamp generally requires a special starting device or circuit. ★ lampe à cathode chaude → *lampe 6.* R лампа с горячим катодом. D Glühkathodenlampe. E lámpara de cátodo caliente. I lampada a catodo caldo. N warme-kathodelamp. P lampa o gorącej katodzie. S varmkatodlampa. (845)

26. **hot-start lamp** (*Syn.* preheat lamp) : → *lamp 48*

27. **incandescent (electric) lamp** : lamp in which light is produced by means of an element heated to incandescence by the passage of an electric current. ★ lampe (électrique) à incandescence → *lampe 47.* R лампа накаливания. D (elektrische) Glühlampe. E lámpara (eléctrica) incandescente. I lampada a incandescenza. N (elektrische) gloeilamp. P żarówka. S glödlampa. (845)

28. **infrared lamp** : lamp which radiates especially strongly in the infrared, the visible radiation produced, if any, not being of direct interest. ★ émetteur (à rayonnement) infrarouge → *émetteur 9.* R инфракрасный излучатель; инфракрасная лампа. D Infrarot-Strahler; Infrarot-Lampe. E lámpara infrarroja. I lampada a radiazione infrarossa. N infraroodstraler. P promiennik podczerwieni. S IR-lampa. (845)

29. **installed lamp flux density** : → *flux density 8*

30. **instant-start lamp** (*Syn.* cold-start lamp) : → *lamp 9*

31. **lamp** : source made in order to produce an optical radiation, usually visible. *Note.* — This term is also sometimes used for certain types of luminaires. ★ lampe → *lampe 3.* R лампа. D Lampe. E lámpara. I lampada. N lamp. P lampa. S lampa. (845)

32. **(lamp) connector** : → *connector 33*

33. **lamp housing** : → *housing 8*

34. **lamp voltage** : → *voltage 94*

35. **long-arc lamp** : an arc lamp, generally of high pressure, in which the distance between the electrodes is large, the arc filling the discharge tube and being therefore stabilized. ★ lampe à arc long → *lampe à arc 3.* R лампа с длинной дугой. D Langbogenlampe. E lámpara de arco largo. I lampada ad arco lungo. N lange-booglamp. P lampa długołukowa. S långbågslampa. (845)

36. **low pressure mercury (vapour) lamp** : a discharge lamp of the mercury vapour type, with or without a coating of phosphors, in which during operation the partial pressure of the vapour does not exceed 100 pascals. ★ lampe à (vapeur de) mercure à basse pression → *lampe 31.* R ртутная лампа низкого давления. D Quecksilberdampf-Niederdrucklampe. E lámpara (de vapor) de mercurio de baja presión. I lampada a (vapore di) mercurio a bassa pressione. N lagedrukkwiklamp. P rtęciówka niskoprężna. S kvicksilverlampa av lågtryckstyp. (845)

37. **low pressure sodium (vapour) lamp** : a discharge lamp in which the light is produced by radiation from sodium vapour operating at a partial pressure of 0.1 to 1.5 pascal. ★ lampe à (vapeur de) sodium à basse pression → *lampe 33.* R натриевая лампа низкого давления. D Natriumdampf-Niederdrucklampe. E lámpara (de vapor) de sodio de baja presión. I lampada a (vapore di) sodio a bassa pressione. N lagedruknatriumlamp. P sodówka niskoprężna. S natriumlampa av lågtryckstyp. (845)

38. **metal filament lamp** : incandescent lamp whose luminous element is a filament of metal. ★ lampe à filament métallique → *lampe 14.* R лампа с металлической нитью. D Metalldrahtlampe. E lámpara de filamento metálico. I lampada a filamento metallico. N metaaldraadlamp. P żarówka o żarniku metalowym. S metalltrådslampa. (845)

39. **metal halide lamp** : a high intensity discharge lamp in which the major portion of the light is produced from a mixture of a metallic vapour and the products of the dissociation of halides. *Note.* — The term covers clear and phosphor-coated lamps. ★ lampe aux halogénures métalliques → *lampe 36.* R лампа с галоидными соединениями металлов. D Metall-Halogenid-Lampe. E lámpara de halogenuros metálicos. I lampada a (vapore di) alogenuri. N metaalhalogenidelamp. P lampa metalohalogenkowa. S metallhalogenlampa. (845)

40. **mine safety lamp** : flame lamp used for detection of methane and oxygen deficiency in mine air. ★ lampe de sûreté à flamme → *lampe 43.* R рудничная безопасная пламенная лампа. D Benzinsicherheitslampe. E lámpara de mina de seguridad. I lampada di sicurezza a fiamma. N veiligheidsmijnlamp. P lampa benzynowa wskaźnikowa; lampa bezpieczeństwa. S gasindikeringslampa. (845)

41. **miner's (personal) lamp** : mine luminaire with integral energy source, required for each person entering an underground mine. ★ lampe de mineur → *lampe 38.* R индивидуальный светильник шахтёра. D (persönliche) Bergmannsleuchte. E lámpara de minero. I apparecchio per minatore. N mijnwerkerslamp. P lampa osobista. S gruvlampa. (845)

42. **negative-glow lamp** : discharge lamp in which the light is produced directly or indirectly (by fluorescence) from the radiation of the negative glow, in the region in front of the cathode. ★ lampe à lueur → *lampe 20.* R лампа отрицательного свечения. D Glimmlampe. E lámpara luminiscente negativa. I lampada a bagliore. N glimlamp. P lampa świetląca. S glimlampa. (845)

43. **paddy lamp** (*Syn.* trip lamp) : battery-powered portable mine luminaire showing a red light, designed for mounting at the rear of a train of cars. ★ feu arrière d'une rame → *feu 10.* R хвостовой сигнальный светильник. D Zugschlußleuchte. E luminaria de señalización posterior. I fanale di coda. N sluitlamp van een trein. P lampa sygnalizacyjna końcowa. S akterlykta. (845)

44. **photoflash lamp** : lamp emitting, by combustion within a bulb, a large quantity of light in a single flash of very short duration, for lighting objects to be photographed. ★ lampe éclair → *lampe 46.* R лампа-вспышка. D Blitzlampe. E lámpara de destello. I lampada lampo a combustione. N fotoflitslamp. P lampa błyskowa spaleniowa. S blixtlampa; fotoblixt. (845)

45. **photoflood lamp** : incandescent lamp of especially high colour temperature, often of the reflector type, for lighting objects to be photographed. ★ lampe pour photographie → *lampe 61.* R фотолампа. D Photo-Aufnahme-Lampe. E lámpara para fotografía. I lampada per fotografia. N foto-opnamelamp. P lampa zdjęciowa. S fotolampa. (845)

46. **pilot lamp** (*Syn.* pilot light) : an indicator light signalling normal operation. ★ lampe témoin → *lampe 67.* R контрольная лампочка. D Kontrollampe. E lámpara piloto. I lampada spia. N lamp normaal bedrijf. P lampka kontrolna. S övervakningslampa; kontrollampa. (811)

47. **prefocus lamp** : incandescent lamp in which, during manufacture, the luminous element is accurately adjusted to a specified position with respect to locating devices that form part of the cap. ★ lampe préfocus → *lampe 63.* R лампа с фокусирнющим цоколем. D Prefocus-lampe; Einstellampe. E lámpara prefocus. I lampada a filamento centrato. N pre-focuslamp. P żarówka zogniskowana. S prefokuslampa. (845)

48. **preheat lamp** (*Syn.* hot-start lamp) : a hot cathode lamp which requires preheating of the electrodes for starting. ★ lampe à amorçage à chaud → *lampe 4.* R лампа с зажиганием в горячем состоянии. D Glühstartlampe; Warmstartlampe. E lámpara de cebado en caliente. I lampada a catodo preriscaldato. N warm ontstekende lamp. P lampa o gorącym zapłonie. S lysrör med förvärmd katod. (845)

49. **pressed glass lamp** : a reflector lamp, the bulb of which consists of two glass parts fused together, namely a metallized reflecting bowl and a patterned cover forming an optical system. ★ lampe à optique incorporée → *lampe 25.* R лампа со встроенной оптической системой. D Preßglaslampe. E lámpara con óptica incorporada. I lampada in vetro pressato. N persglaslamp. P lampa ze szkła prasowanego. S pressglaslampa. (845)

50. **projection lamp** : lamp in which the luminous element is of relatively concentrated form and is so mounted that the lamp may be used with an optical system for the projection of either still or motion pictures on a screen. ★ lampe de projection → *lampe 40.* R проекционная лампа. D Projektionslampe. E lámpara de proyector de imágenes. I lampada per proiezione. N projectielamp. P lampa projekcyjna. S projektorlampa. (845)

51. **projector lamp** : lamp in which the luminous element is so mounted that the lamp may be used with an optical system projecting the light in chosen directions. *Note.* — This term includes various types of lamp such as floodlight lamps, spotlight lamps, studio lamps, etc. ★ lampe pour projecteur → *lampe 62.* R прожекторная лампа. D Lichtwurflampe. E lámpara de proyector de luz. I lampada per proiettori. N schijnwerper. P lampa projektorowa. S strålkastarlampa. (845)

52. **reference lamp** : a discharge lamp selected for the purpose of testing ballasts and which, when associated with a reference ballast under specified conditions, has electrical values which are close to the objective values given in a relevant specification. ★ lampe de référence → *lampe 41.* R эталонная лампа.

D Referenzlampe. E lámpara de referencia. I lampada di riferimento. N referentielamp. P lampa odniesieniowa. S normallysrör. (845)

53. **reflector infra-red lamp** : a lamp emitter having a built-in reflector which concentrates infra-red energy on the charge. ★ lampe infrarouge à réflecteur → *lampe 58.* R инфракрасная лампа с отражателем. D Infrarotreflektorlampe. E lámpara de infrarrojos con reflector. I lampada a raggi infrarossi con riflettore. N verwarmingslamp. P promiennik lampowy z odbłyśnikiem. S infralampa med reflektor. (841)
54. **reflector lamp** : incandescent or discharge lamp in which part of the bulb, of suitable shape, is coated with a reflecting material so as to control the light. ★ lampe à réflecteur → *lampe 28.* R светонаправляющая лампа. D Reflektorlampe. E lámpara con reflector. I lampada a riflettore. N reflectorlamp. P lampa-projektor. S reflektorlampa. (845)
55. **sealed beam lamp** : a pressed glass lamp designed to give a closely controlled beam of light. ★ lampe monobloc → *lampe 59.* R ..... D ..... E lámpara de haz definido. I lampada-proiettori. N ..... P ..... S sealedbeam-lampa. (845)
56. **secondary standard lamp** : lamp intended to be used as a secondary photometric standard. ★ lampe étalon secondaire → *lampe 52.* R вторичная эталонная лампа. D Sekundärnormallampe. E lámpara patrón secundario. I lampada campione secondario. N secundaire standaardlamp. P lampa wzorcowa wtórna. S sekundärnormal(lampa). (845)
57. **self-ballasted mercury lamp** (*Syn.* blended lamp) : → *lamp 5*
58. **short-arc lamp** (*Syn.* compact-source arc discharge lamp) : an arc lamp, generally of very high pressure, in which the distance between the electrodes is of the order of 1 to 10 millimetres. *Note.* — Certain mercury vapour or xenon lamps belong to this type. ★ lampe à arc court → *lampe à arc 2.* R лампа с короткой дугой. D Kurzbogenlampe. E lámpara de arco corto. I lampada ad arco corto. N korte-booglamp. P lampa krótkołukowa. S kortbågslampa. (845)
59. **spectroscopic lamp** : discharge lamp which gives a well-defined line spectrum and which, in combination with filters, may be used to obtain monochromatic radiation. ★ lampe spectrale → *lampe 65.* R спектральная лампа. D Spektrallampe. E lámpara espectral. I lampada a righe spettrali. N spectrumlamp. P lampa spektroskopowa. S spektrallampa. (845)
60. **standard lamp** (*Syn.* floor lamp) : portable luminaire on a high stand suitable for standing on the floor. ★ lampadaire → *lampadaire 1.* R напольный светильник. D Stehleuchte. E lámpara de pie. I apparecchio di illuminazione da pavimento. N staande lamp. P oprawa podłogowa. S golvlampa. (845)
61. **starterless fluorescent lamp** : a fluorescent lamp of cold or hot-start type designed to operate with an auxiliary equipment which enables it, when switched on, to start rather quickly without the intervention of a starter. ★ lampe fluorescente à allumage sans starter → *lampe 56.* R люминесцентная лампа без стартерного зажигания. D Leuchtstofflampe für starterlosen Betrieb. E lámpara fluorescente sin cebador. I lampada fluorescente (a innesco) senza starter. N fluorescentielamp zonder starter. P świetlówka bezzapłonnikowa. S lysrör för tändarlös koppling. (845)
62. **strip lamp** (*Syn.* tungsten ribbon lamp) : → *lamp 69*
63. **switch-start fluorescent lamp** : a fluorescent lamp designed to operate in a circuit requiring a starter for the preheating of the electrodes. ★ lampe fluorescente à allumage par starter → *lampe 55.* R люминесцентная лампа со стартерным зажиганием. D Leuchtstofflampe für Starterbetrieb. E lámpara fluorescente con cebador. I lampada fluorescente (a innesco) con starter. N fluorescentielamp met starter. P świetlówka zapłonnikowa. S lysrör för tändarkoppling. (845)
64. **table lamp** : portable luminaire intended for standing on furniture. ★ luminaire de table → *luminaire 14.* R настольный светильник; настольная лампа. D Tischleuchte. E lámpara de mesa. I apparecchio di illuminazione da tavolo. N tafellamp. P oprawa stołowa. S bordlampa. (845)
65. **trip lamp** (*Syn.* paddy lamp) : → *lamp 43*
66. **trouble lamp** (*Syn.* hand-lamp) : → *hand-lamp 1*
67. **tungsten filament lamp** : incandescent lamp whose luminous element is a filament of tungsten. ★ lampe à filament de tungstène → *lampe 13.* R лампа с вольфрамовой нитью. D Wolframdrahtlampe. E lámpara de filamento de wolframio. I lampada a filamento di tungsteno. N wolfraamdraadlamp. P żarówka o żarniku wolframowym. S volframtrådslampa. (845)
68. **tungsten halogen lamp** : gas-filled lamp containing halogens or halogen compounds, the filament being of tungsten. *Note.* — Iodine lamps belong to this category. ★ lampe (à incandescence) à halogènes → *lampe 17.* R галоидная лампа накаливания. D Halogen-Glühlampe. E lámpara (incandescente) con halógenos. I lampada ad alogeni. N halogeengloeilamp. P żarówka halogenowa. S halogenglödlampa. (845)
69. **tungsten ribbon lamp** (*Syn.* strip lamp) : incandescent lamp in which the luminous element is a tungsten ribbon. *Note.* — This type of lamp is particularly used as a standard in pyrometry and spectral radiometry. ★ lampe à ruban de tungstène → *lampe 29.* R ленточная лампа. D Wolframband-Lampe. E lámpara de cinta (de wolframio). I lampada a nastro di tungsteno. N wolfraambandlamp. P żarówka taśmowa. S volframbandlampa. (845)
70. **ultraviolet lamp** : lamp which radiates especially strongly in the ultraviolet, the visible radiation produced, if any, not being of direct interest. *Note.* — There are several types of such lamp used for photobiological, photochemical and biomedical purposes. ★ émetteur (à rayonnement) ultraviolet → *émetteur 10.* R ультрафиолетовый излучатель; ультрафиолетовая лампа. D Ultraviolett-strahler; Ultraviolett-Lampe. E lámpara ultravioleta. I lampada a radiazione ultravioletta. N ultravioletstraler. P promiennik nadfioletu. S UV-lampa. (845)
71. **vacuum (incandescent) lamp** : incandescent lamp in which the luminous element operates in an evacuated bulb. ★ lampe (à incandescence) à vide → *lampe 18.* R вакуумная лампа. D Vakuumlampe. E lámpara de vacío. I lampada a vuoto. N vacuümlamp. P żarówka próżniowa. S vakuumlampa. (845)
72. **Wood's glass lamp** (*Syn.* black light lamp) : → *lamp 4*
73. **working standard lamp** : lamp intended to be used as a working photometric standard. ★ lampe étalon de travail → *lampe 51.* R рабочая эталонная лампа. D Arbeitsnormallampe. E lámpara patrón de trabajo. I lampada campione di lavoro. N werkstandaardlamp. P lampa wzorcowa robocza. S arbetsnormal(lampa). (845)

lampholder

1. **lampholder** : a device which holds the lamp in position, usually by having the cap inserted in it, in which case it also provides the means of connecting the lamp to the electric supply. *Note.* — The term socket or, when the context is clear, the abbreviation holder are commonly used instead of lampholder. ★ douille → *douille 1.* R патрон. D Fassung. E portalámpara. I portalampada. N lamphouder. P oprawka. S lamphållare. (845)

landing

1. **landing light** : → *light 21*

landless

1. **landless hole** : → *hole 12*

language

1. **assembly language** : a low level language whose instructions are usually in one-to-one correspondence with computer instructions and that may provide facilities such as the use of macroinstructions. ★ langage d'assemblage → *langage 1.* R язык ассемблера. D Assemblersprache. E lenguaje de ensamblado. I linguaggio assemblatore. N assembleertaal. P język assemblera. S assemblerspråk. (714)
2. **command language** : a language consisting primarily of procedural operators that indicate the functions to be performed by an operating system. ★ langage de commande → *langage 2.* R командный язык. D Befehlssprache; Kommandosprache. E lenguaje de control. I linguaggio di comando. N besturingstaal. P język komend. S styrspråk; kommandospråk. (714)
3. **computer language** (*Syn.* machine language) : a low level language whose instructions consist only of computer instructions. ★ langage-machine → *langage-machine 1.* R машинный язык. D Computersprache; Maschinensprache. E lenguaje-máquina. I linguaggio macchina. N machinetaal. P język maszynowy. S datorspråk; maskinspråk. (714)
4. **high level language** (*Syn.* HLL (abbreviation)) : a programming language that does not reflect the structure of any one given computer or any one given class of computers. ★ langage évolué → *langage 4.* R язык высокого уровня.

D hoehere Programmiersprache; Hochsprache. E lenguaje de alto nivel; lenguaje evolucionado. I linguaggio ad alto livello. N hogere programmeertaal. P język wysokiego poziomu. S högnivåspråk. (714)

5. **low level language** : a programming language that reflects the structure of a given computer or that of a given class of computers. ★ langage lié à l'ordinateur → *langage 6.* R язык низкого уровня. D maschinennahe Sprache; maschinenorientierte Programmiersprache. E lenguaje ligado al ordenador; lenguaje de bajo nivel. I linguaggio a basso livello. N lagere programmeertaal. P język niskiego poziomu. S datorinriktat språk; lågnivåspråk. (714)
6. **machine language** (*Syn.* computer language) : → *language 3*
7. **man-machine language** (*Syn.* MML (abbreviation)) : a language designed to facilitate direct user control of a computer. ★ langage homme-machine → *langage 5.* R язык человек-машина. D Dialogsprache; Mensch-Maschinen-Sprache. E lenguaje hombre-máquina. I linguaggio uomo-macchina. N mens/machine-taal. P język "człowiek-maszyna". S dialogspråk. (714)
8. **object language** (*Syn.* target language) : a language into which statements are translated. ★ langage-objet → *langage-objet 1.* R выходной язык. D Objektsprache; Zielsprache. E lenguaje objeto; lenguaje resultante. I linguaggio oggetto. N objecttaal; doeltaal. P język wynikowy. S målspråk. (714)
9. **source language** : a language from which statements are translated. ★ langage-source → *langage-source 1.* R исходный язык. D Quellsprache. E lenguaje fuente. I linguaggio sorgente. N brontaal. P język źródła. S källspråk. (714)
10. **target language** (*Syn.* object language) : → *language 8*

lanyard

1. **lanyard disconnect connector** : → *connector 34*

lap

1. **duplex lap winding** : → *winding 22*
2. **lap winding** : → *winding 35*
3. **multiplex lap winding** : → *winding 39*
4. **simplex lap winding** : → *winding 71*

lapel

1. **lapel microphone** : → *microphone 16*

Laplace

1. **inverse Laplace transform** : → *transform 3*
2. **Laplace transform** : → *transform 4*

Laplacian

1. **Laplacian** (of a scalar field) : a scalar quantity equal to the divergence of the gradient of the scalar field.

$$\Delta f = \nabla^2 f = \text{div } \textbf{grad } f$$

★ laplacien → *laplacien 1.* R лапласиан (скалярного поля). D Laplacescher Operator (eines Skalarfeldes). E laplaciana (de un campo escalar). I laplaciano (di un campo scalare). N Laplace-operator (toegepast op een scalair veld). P laplasjan (skalarny). S Laplace-operator (för ett skalärt fält). (101)

2. **Laplacian** (of a vector field) : a vector quantity equal to the gradient of the divergence of the vector field minus the curl of the curl of this vector field.

$$\Delta f = \nabla^2 f = \textbf{grad } \text{div } f - \textbf{rot rot } f$$

★ laplacien vectoriel → *laplacien 4.* R векторный лапласиан (векторного поля). D Laplacescher Operator (eines Vektorfeldes). E laplaciana vectorial (de un campo vectorial). I laplaciano vettoriale (di un campo vettoriale). N Laplace-operator (toegepast op een vectorveld). P laplasjan (wektorowy). S Laplace-operator (för ett vektorfält). (101)

lapped

1. **lapped insulation** : → *insulation 40*

large

1. **large area flicker** : → *flicker 10*

laser

1. **active laser medium** : → *medium 2*
2. **diode laser** (*Syn.* injection laser diode) : → *diode 11*
3. **injection laser diode** : → *diode 11*
4. **injection locked laser** : a laser whose peak intensity wavelength of emission is controlled by the injection of a separate optical signal from a different souce or a reflected optical signal from an external mirror. ★ laser verrouillé par injection → *laser 6.* R лазер с внешней синхронизацией. D injektionsgesteuerter Laser. E láser de inyección controlada. I laser agganciato sul segnale ottico iniettato. N door uitwendig optisch signaal in golflengte bestuurde laser. P laser sterowany optycznie. S injektionslåst laser. (731)
5. **laser** : a device that produces coherent optical radiation by stimulated emission and amplification in an optical resonant cavity providing positive feedback when external energy is used to maintain a population inversion. *Note.* — Laser is an acronym for Light Amplification by Stimulated Emission of Radiation. ★ laser → *laser 2.* R лазер. D Laser. E láser. I laser. N laser. P laser. S laser. (731,845)
6. **laser medium** (*Syn.* active laser medium) : → *medium 2*
7. **multimode laser** : a laser that produces emission in two or more modes. ★ laser multimodal → *laser 4.* R многомодовый лазер. D Multimodelaser. E láser multimodal. I laser multimodale. N multimoduslaser. P laser wielomodowy. S multimodlaser. (731)
8. **semiconductor laser** (*Syn.* injection laser diode) : → *diode 11*

lasing

1. **lasing threshold** : → *threshold 5*

last

1. **last choice circuit group** : → *group 43*

last-party

1. **last-party release** : → *release 13*

latch

1. **bistable latch** (*Syn.* bistable trigger circuit) : → *circuit 11*
2. **shield latch** (of a socket) : protrusion on the skirt or lower shield of a socket to provide retention of the tube shield. ★ verrou → *verrou 1.* R пуклевка (ламповой панели). D Abschirmhalterung (einer Fassung). E cerrojo (de un zócalo). I bloccaggio (di un supporto). N borging van de afscherming. P zatrzask ekranu (gniazda). S skärmfäste. (581)

latched

1. **latched contactor** : → *contactor 13*

latching

1. **accumulative latching mechanical system** : → *mechanical system 1*
2. **latching** : to hold a device in its activated position without the use of external power or holding circuitry. ★ maintien mécanique → *maintien 7.* R механическое удержание. D ..... E retención mecánica. I auto-tenuta. N vergrendelen. P zakleszczenie. S mekanisk låsning. (714)
3. **latching current** : → *current 111*

late

1. **degree of late anisochronous parallel distortion** : → *degree 10*

latency

1. **latency time** : → *time 81*

latent

1. **latent fault** : → *fault 52*
2. **latent heat** : → *heat 13*
3. **latent image** : → *image 19*

lateral

1. **lateral elasticity** : → *elasticity 1*
2. **lateral light** : → *light 22*
3. **lateral mark** : → *mark 6*
4. **lateral offset loss** : → *loss 42*
5. **lateral oscillation** : → *oscillation 8*

6. **lateral projection** : → *projection 3*
7. **lateral recording** : → *recording 7*
8. **lateral resilience** (*Syn.* **lateral elasticity**) : → *elasticity 1*
9. **lateral tracking angle error** : → *error 47*
10. **lateral wave** : → *wave 27*

latex

1. **latex** : a colloidal aqueous dispersion of a polymeric material. ★ latex → *latex 1.* **R** латекс. **D** Latex. **E** látex. **I** lattice. **N** latex. **P** lateks. **S** latex. (212)

lattice

1. **lattice reflector** : → *reflector 10*
2. **lattice tower** : → *tower 4*
3. **reactor lattice** : an array of fuel and other materials arranged according to a regular pattern. ★ réseau du réacteur → *réseau 113.* **D** Reaktorgitter. **E** reticulo del reactor. **I** reticolo del reattore. **N** rooster. **P** siatka reaktora. **S** reaktorgitter. (026)

launch

1. **launch numerical aperture** : → *aperture 15*

launching

1. **launching fibre** (*Syn.* optical fibre pigtail) : → *pigtail 1*

launder

1. **launder** : a refractory lined channel, generally of greater depth than width, to transport molten metal by gravity or electromagnetically. ★ goulotte de coulée → *goulotte 2.* **R** лоток. **D** Giessrinne. **E** artesa de colada. **I** canale di colata. **N** transportgoot voor vloeibaar metaal. **P** rynna spustowa. **S** tappränna. (841)

law

1. **Abney's law** : an empirical law stating that if two colour stimuli, A and B, are perceived to be of equal brightness and two other colour stimuli, C and D, are perceived to be of equal brightness, then the additive mixtures of A with C and B with D will also be perceived to be of equal brightness. *Note.* — The validity of Abney's law depends strongly on the observing conditions. ★ loi d'Abney → *loi 1.* **R** закон Эбни. **D** Abneysches Gesetz. **E** ley de Abney. **I** legge di Abney. **N** wet van Abney. **P** prawo Abneya. **S** Abneys lag. (845)
2. **Allard's law** : law relating the illuminance E produced on a surface by a light source to the luminous intensity I of the source in the direction to the surface, to the distance d between the surface and the source, and to the atmospheric transmissivity T, which is assumed to be uniform ; the surface is normal to the direction of the source and sufficiently distant for the source to be considered as a point source

$$E = \frac{I}{d^2} \cdot T^{d/d_0}$$

where d_0 is the length specified in the definition of T. *Notes. 1* — The above formula is sometimes written

$$E = \frac{I}{d^2} \cdot T^{\mathrm{d}}$$

where the exponent d in T^{d} is the numerical value of the distance d measured with d_0 as "unit". *2* — Taking into account the relationship between T and the meteorological optical range V, this law can also be written as

$$E = \frac{I}{d^2} \cdot 0{,}05^{d/V}$$

★ loi d'Allard → *loi 2.* **R** закон Аллара. **D** Gesetz von Allard. **E** ley de Allard. **I** legge di Allard. **N** wet van Allard. **P** prawo Allarda. **S** Allards lag. (845)
3. **Fermi-Dirac-Sommerfeld velocity distribution law** : the algebraic equation giving the number dN of particules of a quantized system in equilibrium, the velocity components of which are included in the intervals (u, $u+\mathrm{d}u$), (v, $v+\mathrm{d}v$), (w, $w+\mathrm{d}w$) respectively:

$$\mathrm{d}N = 2N \cdot \frac{m^3}{h^3} \cdot \frac{\mathrm{d}u \cdot \mathrm{d}v \cdot \mathrm{d}w}{1 + \exp\left(\dfrac{E - E_M}{kT}\right)}$$

where: N is the total number of particles, m is the mass of the particle, T is the thermodynamic temperature, k is the Boltzmann constant, h is the Planck constant, E is the kinetic energy of a particle,

$$E = \frac{m}{2}(u^2 + v^2 + w^2)$$

E_M is the inner work function. dN/N represents the probability that a particle has its components within the intervals considered. ★ loi de distribution des vitesses de Fermi-Dirac-Sommerfeld → *loi 3.* **R** закон распределения скоростей Ферми-Дирака-Зоммерфельда. **D** Fermi-Dirac-Sommerfeldsche Geschwindigkeitsverteilung. **E** ley de distribución de las velocidades de Fermi-Dirac-Sommerfeld. **I** legge di distribuzione delle velocità di Fermi-Dirac-Sommerfeld. **N** verdelingswet volgens Fermi-Dirac-Sommerfeld. **P** prawo rozkładu prędkości Fermiego-Diraca-Sommerfelda. **S** Fermifördelning. (521)
4. **Grassmann's laws** : the three empirical laws that describe colour-matching properties of additive mixtures of colour stimuli: 1. To specify a colour-match, three independent variables are necessary and sufficient. 2. For an additive mixture of colour stimuli, only their tristimulus values are relevant, not their spectral compositions. 3. In an additive mixture of colour stimuli, if one or more components of the mixture are gradually changed, the resulting tristimulus values also change gradually. *Note.* — Grassmann's laws do not hold for all observing conditions. ★ lois de Grassmann → *loi 14.* **R** законы Грассманна. **D** Grassmannsche Gesetze. **E** leyes de Grassmann. **I** legge di Grassmann. **N** wetten van Grassmann. **P** prawa Grassmana. **S** Grassmans lagar. (845)
5. **inverse square law** : the statement that in the absence of attenuation by matter, energy fluence rate, particle fluence rate, exposure rate, or kerma rate (of radiation) from a point source is inversely proportional to the square of the distance from the source. ★ loi de l'inverse des carrés de la distance → *loi 6.* **R** закон обратных квадратов. **D** Abstandsquadrat-Gesetz. **E** ley de la inversa de los cuadrados de la distancia. **I** legge dell'inverso del quadrato della distanza. **N** ..... **P** prawo odwrotności kwadratu. **S** kvadratlagen. (881)
6. **Koschmieder's law** : law relating the apparent contrast C_d of an object against a sky background, at a given distance of observation d, to the inherent contrast C_0 and to the atmospheric transmissivity T, which is assumed to be uniform

$$C_d = C_0 \cdot T^{d/d_0}$$

where d_0 is the length specified for the definition of T. *Notes. 1* — The formula is sometimes written

$$C_d = C_0 \cdot T^{\mathrm{d}}$$

d being the numerical value of d measured with d_0 as "unit". *2* — Taking into account the relationship between T and the meteorological optical range V, this law can also be written as

$$C_d = C_0 \cdot 0{,}05^{d/V}$$

3 — The contrast is taken to be the ratio of the difference between the luminance of the object and the luminance of the background to the luminance of the background. ★ loi de Koschmieder → *loi 5.* **R** закон Кошмидера; световоздушное уравнение. **D** Gesetz von Koschmieder. **E** ley de Koschmieder. **I** legge di Koschmieder. **N** wet van Koschmieder. **P** prawo Koschmiedera. **S** Koschmieders lag. (845)
7. **Lambert's (cosine) law** : for a surface element whose radiance or luminance is the same in all directions of the hemisphere above the surface: $I(\theta) = I_n \cos\theta$ where $I(\theta)$ and I_n are the radiant or luminous intensities of the surface element in a direction at an angle θ from the normal to the surface and in the direction of that normal, respectively. ★ loi (du cosinus) de Lambert → *loi 12.* **R** закон Ламберта (косинуса). **D** Lambertsches (Cosinus-)Gesetz. **E** ley de Lambert. **I** legge (del coseno) di Lambert. **N** (cosinus) wet van Lambert. **P** prawo (kosinusowe) Lamberta. **S** Lamberts (cosinus)lag. (731,845)
8. **Maxwell-Boltzmann velocity-distribution law** : the algebraic equation giving the number dN of particles of a non-quantized system, the components of velocity of which are comprised in the intervals (u, $u+\mathrm{d}u$), (v, $v+\mathrm{d}v$), (w, $w+\mathrm{d}w$) respectively :

$$dN = A \cdot \exp\left[\frac{-m(u^2 + v^2 + w^2)}{2kT}\right] du \cdot dv \cdot dw$$

where :

$$A = N\left[\frac{m}{(2\pi \cdot kT)}\right]^{3/2}$$

N is the total number of particles; m is the mass of a particle; T is the thermodynamic temperature; k is the Boltzmann constant; *Note.* — dN/N represents the probability that a particle has its components of velocity within the intervals considered. ★ loi de distribution des vitesses de Maxwell-Boltzmann → *loi 4.* R закон распределения скоростей Максвелла-Больцмана. D Maxwell-Boltzmannsche Geschwindigkeitsverteilung. E ley de distribución de las velocidades de Maxwell-Boltzmann. I legge di distribuzione delle velocità di Maxwell-Boltzmann. N snelheidsverdelingswet van Maxwell-Boltzmann. P prawo rozkładu prędkości Maxwella-Boltzmanna. S Maxwellfördelning. (521)

9. **Planck's law** : law giving the spectral concentration of radiance of a Planckian radiator as a function of wavelength and temperature.

$$L_{e,\lambda}(\lambda, T) = \frac{\partial L_e(\lambda, T)}{\partial \lambda} = \frac{c_1}{\pi}\lambda^{-5}(e^{\frac{c_2}{\lambda T}} - 1)^{-1}$$

L_e radiance, λ wavelength in vacuum, T thermodynamic temperature, $c_1 = 2\pi hc_o^2$, $c_2 = hc_o/k$, h Planck's constant, c_o velocity (speed) of light in vacuum, k the Boltzmann constant *Notes. 1* — The formula is sometimes written with

$$\frac{c_1}{\pi\Omega_0}$$

instead of

$$\frac{c_1}{\pi}$$

where Ω_0 is the solid angle of magnitude 1 steradian. *2* — For a detector in a medium of refractive index n, the measured radiance is : $n^2 L_{e,\lambda}(\lambda, T)$. *3* — Planck's law can be also expressed to give the spectral concentration of radiant exitance $M_{e,\lambda}(\lambda, T)$; the first factor in the formula, is then c_1 instead of c_1/π. *4* — Both quantities (radiance and exitance) apply to the unpolarized radiation as emitted. ★ loi de Planck → *loi 8.* R закон Планка. D Planckschs Gesetz. E ley de Planck. I legge di Planck. N stralingswet van Planck. P prawo Plancka. S Plancks lag. (845)

10. **quantizing law** : a law in quantizing that defines the number of quantizing intervals, the virtual decision values, the decision values, the quantized values and, where appropriate, the rules governing adaptive working. *Note.* — Examples are quantizing laws A and mu standardized by CCITT for voice-frequency signals. ★ loi de quantification → *loi 9.* R закон квантования. D Quantisierungsgesetz. E ley de cuantificación; ley de codificación. I legge di quantizzazione. N kwantificeerwet. P zasada kwantowania. S kvantiseringslag. (704)

11. **square law detection** : → *detection 14*

12. **Stefan-Boltzmann's law** : relation between the radiant exitance of a Planckian radiator and its temperature. $M_e = \sigma T^4$

$$\sigma = \frac{2\pi^5 k^4}{15 h^3 c_0^2}$$

$$= (5{,}670\,51 \pm 0{,}000\,19) \times 10^{-8}\,W \cdot m^{-2} \cdot K^{-4}$$

★ loi de Stefan-Boltzmann → *loi 10.* R закон Стефана-Больцмана. D Stefan-Boltzmannsches Gesetz. E ley de Stefan-Boltzmann. I legge di Stefan-Boltzmann. N stralingswet van Stefan en Boltzmann. P prawo Stefana-Boltzmana. S Stefan-Boltzmanns lag. (845)

13. **Talbot's law** : if a point on the retina is excited by a light stimulus that undergoes periodic variations in magnitude at a frequency that exceeds the fusion frequency, the visual sensation produced is identical with that produced by a steady stimulus whose magnitude equals the mean magnitude of the variable stimulus taken over one period. ★ loi de Talbot → *loi 11.* R закон Тальбота. D Talbotsches Gesetz. E ley de Talbot. I legge di Talbot. N wet van Talbot. P prawo Talbota. S Talbots lag. (845)

14. **(von Kries') persistence law** : an empirical law stating that colour stimuli that match in one set of adaptation conditions continue to do so in any other set. *Note.* — von Kries' persistence law does not apply to all conditions. ★ loi de persistance (de von Kries) → *loi 7.* R закон постоянства (фон Криса). D Persistenzsatz (nach von Kries). E ley de von Kries (de persistencia). I legge della persistenza (di von Kries). N wet van Von Kries. P prawo trwałości wrażeń (von Kriesa). S von Kries beständighetslag. (845)

15. **Wien's law (of radiation)** : approximate form of Planck's law, valid with an approximation better than one part in a thousand when the product λT is smaller than 0.002 m·K.

$$L_{e,\lambda}(\lambda, T) = \frac{c_1}{\pi}\lambda^{-5} e^{-\frac{c_2}{\lambda T}}$$

★ loi (du rayonnement) de Wien → *loi 13.* R закон Вина (излучения). D Wiensches Strahlungsgesetz. E ley de Wien. I legge di Wien. N stralingswet van Wien. P prawo promieniowania Wiena. S Wiens lag. (845)

lay

1. **direction of lay** : → *direction 5*
2. **direction of lay** : → *direction 6*
3. **lay factor** (*Syn.* lay ratio) : → *ratio 48*
4. **lay ratio** : → *ratio 47*
5. **lay ratio** : → *ratio 48*
6. **length of lay** : → *length 21*
7. **length of lay** : → *length 22*

layer

1. **barrier layer** : a layer which prevents hydroxyl OH-ion diffusion into the core. ★ couche barrière → *couche 9.* R запирающий слой. D Trennschicht; Randschicht; Grenzschicht. E capa de protección. I strato di barriera. N barrière-laag; opsluitlaag. P bariera przeciwdyfuzyjna. S barriärskikt. (731)

2. **cathode interface layer** : an undesired poorly conducting layer between the base metal and the coating of an oxide-coated cathode. ★ couche d'interface de cathode → *couche 17.* R промежуточный слой катода. D Zwischenschicht. E capa intercaras de cátodo. I strato di interfaccia di catodo. N kathodegrenslaag. P warstwa (katody) pośrednia. S katodmellanskikt. (531)

3. **dead layer** (of a semiconductor detector) : a layer of a semiconductor detector in which no significant part of the energy lost by particles can contribute to the resulting signal. ★ zone morte → *zone 50.* R мертвый слой (полупроводникового детектора). D unempfindliche Schicht (eines Halbleiterdetektors). E zona muerta (de un detector semiconductor). I zona morta (di un semiconduttore). N dode laag (v.e. halfgeleiderdetector). P warstwa martwa (detektora półprzewodnikowego). S neutralområde. (391)

4. **deep scattering layer** : layer of scatterers located at a certain depth and which returns echoes. ★ couche diffusante profonde → *couche 16.* R глубоководный рассеивающий слой. D tiefe Echo-Streuschicht. E capa dispersora profunda. I strato di diffusione profondo. N diepe verstrooiende laag. P warstwa rozproszeniowa głęboka. S djupt diffuserande skikt. (801)

5. **depletion layer** (in a semiconductor detector) : a layer of a semiconductor detector which constitutes its sensitive volume. Most of the energy lost by the particles in this region can contribute to the resulting signal. ★ zone de déplétion → *zone 29.* R обедненный слой (полупроводникового детектора). D Verarmungsschicht (in einem Halbleiterdetektor). E zona de agotamiento (de un detector semiconductor). I zona di svuotamento (di un semiconduttore). N verarmingslaag (in een halfgeleiderdetector). P warstwa zaporowa (w detektorze półprzewodnikowym). S bristområde. (391)

6. **depletion layer** (of a semiconductor) : a region in which the mobile charge carrier concentration is insufficient to neutralize the net fixed charge density of ionized donors and acceptors. ★ couche d'appauvrissement → *couche 10.* R обедненный слой (полупроводника). D Sperrschicht (eines Halbleiters). E capa de agotamiento (de un semiconductor). I strato di svuotamento (di un semiconduttore). N depletielaag

(van een halfgeleider). P warstwa zubożana. S utarmningsområde, (521)

7. **diffuse layer potential** (*Syn.* zeta potential) : the potential difference across the face between the rigid layer and the diffuse layer of the electrolyte. ★ potentiel de couche diffuse → *potentiel 11.* R потенциал диффузного слоя. D Diffusschichtspannung. E potencial zeta; potencial de capa difusa. I potenziale di strato diffuso. N diffusielaagspanning; zetapotentiaal. P potencjawarstwy dyfuzyjnej; potencjał zeta. S elektrokinetisk potential; zeta-potential. (111)
8. **ducting layer** : a tropospheric layer characterized by a negative M gradient, which consequently may generate a tropospheric radio duct. ★ couche de guidage → *couche 15.* D Duct verursachende Schicht. P warstwa duktowa. (705)
9. **E layer** (normal) : an ionospheric layer in the E region whose ionization profile is characterized by a maximum value, the ionization varying regularly on a daily basis. ★ couche E → *couche 19.* D (normale) E-Schicht. P warstwa E (normalna). (705)
10. **Es layer** (*Syn.* sporadic E layer) : → *layer 20*
11. **F1 layer** : the lower of the two ionospherice layers which normally exist in the day time in the F region. *Note.* — The ionization profile of the F1 layer is very often characterized by a pronounced ionization ledge ; this layer exhibits some degree of daily and seasonal regularity in occurrence and behaviour. ★ couche F1 → *couche 23.* D F1-Schicht. P warstwa F_1. (705)
12. **F2 layer** : the ionospheric layer which is continuously present in the F region and whose ionization profile is characterized by a maximum value. In day time, this layer is the higher layer in the F region ; at night time, it is the only layer. ★ couche F2 → *couche 24.* D F2-Schicht. P warstwa F_2. (705)
13. **half-value layer** (*Syn.* HVL (abbreviation); half-value thickness; HVT (abbreviation)) : the thickness of a specified material that reduces the exposure rate to 50 per cent ; the second HVL is the additional thickness necessary to reduce the exposure rate to 25 per cent of the initial value. *Note.* — Measurements of HVL are performed under narrow beam conditions. ★ couche de demi-atténuation → *couche 12.* R слой половинного ослабления; СПО; толщина половинного ослабления; ТПО. D Halbwertdicke; HWD (Abkürzung). E capa de semiatenuación; espesor de semirreducción. I strato emivalente; SEV. N halveringslaag; halveringsdikte. P warstwa półchłonna ($d_{1/2}$). S halvvärdestjocklek. (881)
14. **inversion layer** : for a given type of semiconductor, a surface layer of the opposite type. ★ couche d'inversion → *couche 18.* R инверсный слой. D Inversionsschicht. E capa de inversión. I strato di inversione. N inversielaag. P warstwa inwersyjna. S inversionsskikt. (391)
15. **ionospheric layer** : a part of a region within the ionosphere, in which the ionization profile has a maximum value or an ionization ledge. ★ couche ionosphérique → *couche 25.* D Ionosphärenschicht. P warstwa jonosferyczna. (705)
16. **isothermal layer** : layer of the ocean characterized by an essentially constant temperature. ★ couche isotherme → *couche 26.* R изотермический слой. D isotherme Schicht. E capa isoterma. I strato isotermo. N isotherme laag. P warstwa izotermiczna. S isotermiskt skikt. (801)
17. **layer** : in a stranded conductor, that group of wires, arranged to form a cylinder of constant radius, with the same axis as the conductor and having the same direction and length of lay. ★ couche → *couche 7.* R повив. D Lage. E capa. I strato. N laag. P warstwa (drutów w przewodzie wielodrutowym). S lager. (466)
18. **layer height** : → *height 4*
19. **single layer winding** : → *winding 73*
20. **sporadic E layer** (*Syn.* Es layer) : an ionospheric layer of the E region which is thin, transient and of limited extent, produced by sporadic ionization. ★ couche E sporadique → *couche 20.* D sporadische E-Schicht; Es-Schicht. P warstwa E sporadyczna; warstwa E_S. (705)
21. **tenth-value layer** (*Syn.* TVL (abbreviation); tenth-value thickness; TVT (abbreviation)) : the thickness of a specified material that reduces the exposure rate to 10 per cent. *Note.* — The TVL, will depend on whether the measurement has been made under broad or narrow beam conditions. ★ couche d'atténuation au dixième → *couche 11.* R слой, необходимый для ослабления излучения в десять раз; толщина, необходимая для ослабления излучения в десять раз. D Zehntelwertdicke; ZWD (Abkürzung). E capa de 10% de atenuación. I strato decivalente; SDV (abbreviazione). N decimeringslaag; decimeringsdikte. P warstwa dziesięciokrotnie osłabiająca; TVL. S tiondedelvärdestjocklek. (881)
22. **(tropospheric) layer** : a part of the atmosphere having radio propagation properties which are clearly distinguished from those of the surrounding atmosphere, in which the horizontal dimensions greatly exceed the vertical dimensions. *Note.* — In French, the term "feuillet troposphérique" applies essentially to tropospheric layers of relatively small sizes. ★ couche (troposphérique) → *couche 28.* D (troposphärische) Schicht. P warstwa (troposferyczna). (705)

layout

1. **associated phase layout** : in a substation, a layout in which the conductors relating to the three phases of the same circuit are located side by side (see Figure 605-4*a*). ★ disposition à phases associées → *disposition 1.* R трехфазная компоновка. D Anordnung nach Stromkreisen. E disposición de fases asociadas. I disposizione a fasi raggruppate. N ..... P rozmieszczenie faz skojarzone. S trefas samlat utförande. (605)
2. **mixed phase layout** : in a substation, a layout in which the busbars are arranged as a separated phase layout but the bay circuits are arranged as associated phase layout (see Figure 605-4*c*). ★ disposition à phases mixtes → *disposition 2.* R смешанная компоновка. D gemischte Anordnung. E disposición de fases mixtas. I disposizione a fasi miste. N ..... P rozmieszczenie faz mieszane. S ..... (605)
3. **separated phase layout** : in a substation, a layout in which the conductors of different circuits, relating to the same phase, are located side by side (see Figure 605-4*b*). ★ disposition à phases séparées → *disposition 3.* R пофазная компоновка. D Anordnung nach phasengleichen Aussenleitern. E disposición de fases separadas. I disposizione a fasi separate. N ..... P rozmieszczenie faz rozdzielone. S fasvis samlat utförande. (605)

LB

1. **LB** (*Syn.* local battery) : → *battery 44*

LCD

1. **LCD** (*Syn.* liquid crystal display) : → *display 4*

LD_{50}

1. **LD_{50}** (*Syn.* median lethal dose) : → *dose 35*

lead

1. **bore-hole lead insulation** (*Syn.* up-shaft insulation) : → *insulation 57*
2. **cold lead** (*Syn.* cold tail; non-heating lead) : an electrically insulated conductor used to connect a heating conductor to a source of electrical energy and designed so as to produce no apparent heat. ★ connexion froide → *connexion 24.* R охлаждаемый токоподвод; охлаждаемый вывод; ненагреваемый токоподвод. D Kaltleitung; kalte Zuleitung; nichtbeheizter Leiter. E conexión fría. I connessione fredda. N uitloper; koud eind. P doprowadzenie zimne. S kall anslutning. (841)
3. **draw lead bushing** : → *bushing 7*
4. **instrument lead** : a lead comprising one or more conductors, specially designed for interconnecting measuring instruments and accessories. ★ cordon de mesure → *cordon 3.* R соединительные провода прибора. D (Messgerät-)Zuleitung. E cordón de conexión. I cordoni tarati. N meetkabel. P przewód przyrządu pomiarowego. S instrumentledning. (301)
5. **lead** : a flexible terminal. ★ fil → *fil 15.* R гибкий вывод. D Anschlußdraht. E hilo (de salida). I filo (di uscita). N draad. P końcówka giętka. S tråduttag. (531)
6. **lead equivalent** : → *equivalent 47*
7. **lead glass** : → *glass 6*
8. **lead rubber** : → *rubber 1*
9. **loose leads** : a form of termination in which the terminals are loose leads. ★ extrémités libres → *extrémité 12.* R незакрепленные выводы. D freie Wicklungsenden. E conexiones libres. I estremità libere. N losse uitlopers. P luźne przewody wyprowadzające. S uttag med lösa kablar. (411)
10. **non-heating lead** (*Syn.* cold lead) : → *lead 2*

11. **(phase) lead** : the phase difference of the first quantity with respect to the second. ★ avance de phase → *avance 3.* R опережение по фазе. D Phasen-Voreilwinkel. E avance de fase. I anticipo di fase. N fasevoorsprong. P przyspieszenie fazowe; wyprzedzenie fazowe. S positiv fasdifferens. (101)
12. **phase lead** (*Syn.* negative phase difference) : → *difference 21*
13. **receiver lead** : a lead which connects the subscribers outlet to the subscriber's apparatus. *Note.* — The lead may include other equipment such as filters, programme selectors etc. ★ cordon de raccordement → *cordon 4.* R абонентский шнур. (723)
14. **shield bonding lead** : an insulated conductor forming the connection between the shield of the cable or the joint sleeve and a link in the link box. ★ conducteur de connexion d'écran → *conducteur 18.* R соединительный провод кабельного экрана. D Schirmverbindungsleitung. E conductor de conexio'n de pantalla. I conduttore di connessione degli schermi. N aardingsschermverbinding. P ..... S ..... (461)

lead-acid

1. **lead-acid battery** : → *battery 43*

leader

1. **leader** (*Syn.* trailer) : a length of ribbon having the same width as the magnetic tape, but without magnetic coating, attached to each extremity of the tape. In video recording, a length of tape usually preceding the programme material which contains engineering alignment and production information. ★ amorce → *amorce 1.* R начальный ракорд. D Vorlaufband. E cinta de arrastre. I avviatore. N voorloopband; naloopband. P rozbiegówka; taśma rozbiegowa. S ledarband. (806)

lead-in

1. **contact lead-in** : a chamfered or flared portion of a female contact or insert to facilitate insertion of a male contact. ★ entrée d'un contact → *entrée 11.* R фаска заходная. D Kontakteinführung. E entrada de un contacto. I guida di contatto. N contactinloop. P wlot gniazda. S kontaktinstyrning. (581)
2. **lead-in groove** : → *groove 18*
3. **subscriber's lead-in** (*Syn.* subscriber's service line; drop (in telephony)) : that part of the subscriber's line between the distribution point and the subscriber's premises. ★ ligne de branchement → *ligne 78.* R абонентский ввод. D Endstellenleitung. E línea de acometida; acometida de abonado. I raccordo d'abbonato. N invoerkabel. P doprowadzenie łącza abonenckiego. S fastighetsledning. (722)

leading

1. **leading lights** : → *light 23*
2. **leading marks** : → *mark 7*
3. **leading phase** (*Syn.* wild phase) : → *phase 110*

leading-edge

1. **leading-edge broadening** : → *broadening 2*

lead-out

1. **lead-out groove** : → *groove 19*

lead-over

1. **lead-over groove** : → *groove 20*

lead-sheathed

1. **separately lead-sheathed cable** : → *cable 59*

leakage

1. **earth leakage detector** : → *detector 10*
2. **flat leakage power** : → *power 63*
3. **frame leakage protection system** : → *system 73*
4. **inductor coil earth leakage protection** : → *protection 20*
5. **leakage** (reactor theory) : the net loss of neutrons from a region of a reactor by escape across the boundaries of the region. ★ fuite de neutrons → *fuite 10.* D Neutronenausfluß. E fuga de neutrones (teoría de los reactores.). I fuga di neutroni. N lek. P ucieczka neutronów. S läckning. (026)
6. **leakage** (shielding) : escape of radiation through a shield, especially by way of holes or cracks through the shield. ★ fuite → *fuite 9.* D Durchlaßstrahlung. E fuga (blindaje.). I fuga. N lek. P ucieczka promieniowania. S läckning. (026)
7. **leakage current** : → *current 112*
8. **leakage current** : → *current 113*
9. **leakage current** : → *current 114*
10. **leakage flux** : → *flux 14*
11. **leakage radiation** : → *radiation 38*
12. **leakage spot displacement** (*Syn.* electrical spot displacement) : → *displacement 4*
13. **magnetic leakage factor** : → *factor 114*
14. **oil leakage sump** : → *sump 1*
15. **spike leakage energy** : → *energy 74*
16. **total leakage power** : → *power 189*

leaky

1. **leaky mode** : → *mode 34*
2. **leaky ray** : → *ray 12*
3. **leaky wave** : → *wave 28*

leaky-wave

1. **leaky-wave antenna** : → *antenna 66*

learning

1. **learning process** : → *process 3*

leased

1. **leased circuit** (*Syn.* dedicated circuit) : → *circuit 52*
2. **leased circuit** (*Syn.* private wire (telephone) circuit) : → *circuit 146*

Leblanc

1. **Leblanc connection** : → *connection 32*

LED

1. **LED** (*Syn.* light emitting diode) : → *diode 12*
2. **superluminescent LED** (*Syn.* superradiant diode; SRD (abbreviation)) : a junction semiconductor device which emits optical radiation through the superluminescence effect. ★ diode superluminescente → *diode 20.* R суперлюминесцентный светодиод; суперлюминесцентный СИД. D superstrahlende LED; SRD (Abkürzung). E LED superluminiscente; diodo superradiante; SRD (abreviatura). I LED superluminescente. N superluminescentie LED; superstralende diode. P dioda superluminescencyjna. S superluminiscent lysdiod. (731)

ledge

1. **ionization ledge** : that part of an ionization profile in which the vertical ionization gradient decreases with height, then remains low without assuming negative values over a certain range of heights, and then increases. By extension, the corresponding part of the ionosphere. ★ palier d'ionisation → *palier 30.* D Ionisationsüberhang. P uskok jonizacyjny (w profilu jonizacji). (705)

left

1. **left (stereophonic) signal** : → *signal 111*

left-hand

1. **left-hand polarization** : → *polarization 19*
2. **left-hand polarized wave** : → *wave 29*

leg

1. **diagonal leg profile** : → *profile 1*
2. **leg extension** (*Syn.* hill-side extension) : → *extension 6*
3. **leg slope** : → *slope 3*
4. **main leg** : a tower member illustrated by figure 3.24. ★ membrure → *membrure 1.* R пояс. D Eckstiel. E montante. I montante. N hoekstijl. P krawężnik trzonu słupa. S ramstång. (466)

legend

1. **legend** : a format of lettering or symbols on the printed board, e.g. part numbers, component locations. ★ marquage → *marquage 1.* R маркировка печатной платы. D Beschriftung. E marcado. I dicitura. N opdruk. P opis. S märkning. (541)

legislative

1. **legislative load** : → *load 21*

LEL

1. **LEL** (*Syn.* lower explosive limit) : → *limit 13*

length

1. **arc length** : the length of the arc between the electrode tip and the charge or another electrode tip. ★ longueur d'arc → *longueur 1.* R длина дуги. D Lichtbogenlänge. E longitud de arco. I lunghezza d'arco. N booglengte. P długość łuku. S ljusbågslängd. (841)
2. **breaking length** (of paper) : a measure of the tensile strength, calculated as the limiting length of a strip of paper of any uniform width, beyond which it would break by its own weight if it were suspended by one end. ★ longueur de rupture → *longueur 9.* R разрывная длина (для бумаги). D Reißlänge (von Papier). E longitud de rotura (de un papel). I lunghezza di rottura (di una carta). N breeklengte. P samorozerwalność (papieru). S slitlängd. (212)
3. **coherence length** : the propagation distance over which propagating optical radiation may be considered to be coherent radiation. *Note.* — If the spectral linewidth of the source is $\Delta\lambda$ and the central wavelength is λ_0, the coherence length in a medium of refractive index n is approximately $\lambda_0^2/n.\Delta\lambda$. ★ longueur de cohérence → *longueur 2.* R длина когерентности. D Kohärenzlänge. E longitud de coherencia. I lunghezza di coerenza. N coherentielengte. P droga spójności; droga koherencji. S koherenslängd. (731)
4. **diffusion length** : the square root of the diffusion area. ★ longueur de diffusion → *longueur 3.* D Diffusionslänge. E longitud de difusión. I lunghezza di diffusione. N diffusielengte. P długość dyfuzji. S diffusionslängd. (026)
5. **diffusion length** (of minority carriers) : the distance in which the density of minority carriers decays to the fraction 1/e of the original density during their diffusion in a homogeneous semiconductor. ★ largeur de diffusion → *largeur 17.* R диффузионная длина (неосновных носителей). D Diffusionslänge (von Minoritätsträgern). E longitud de difusión (de portadores minoritarios). I profondità di diffusione (di un portatore minoritario). N diffusielengte (van miderheidsladingdragers). P długość dyfuzji (nośników mniejszościowych). S diffusionsväglängd. (521)
6. **effective gap length** : the numerical value which has to be substituted for the actual gap length for computing the gap loss. The effective gap length is determined by noting the longest recorded wavelength at which the head output is zero. ★ longueur équivalente d'entrefer → *longueur 19.* R эффективная ширина рабочего зазора. D effektive Spaltbreite. E longitud equivalente de entrehierro. I lunghezza equivalente di traferro. N effectieve spleetlengte. P długość szczeliny skuteczna. S effektiv spaltlängd. (806)
7. **effective length** (of an antenna) (*Syn.* effective height (of an antenna)) : for a linearly polarized antenna receiving a plane wave, the ratio of the magnitude of the open circuit voltage developed at the terminals of the antenna, to the magnitude of that component of the electric field strength in the direction of the antenna polarization. *Note.* — The term "effective height" is especially used for antennas with vertical polarization. ★ longueur équivalente → *longueur 18.* R эффективная длина (антенны); эффективная высота (антенны). D wirksame (effektive) Antennenlänge; wirksame (effektive) Antennenhöhe. E longitud efectiva (de una antena); altura efectiva (de una antena). I altezza efficace. N effectieve lengte; effectieve hoogte. P długość skuteczna (anteny); wysokość skuteczna. S effektiv antennlängd. (712)
8. **electrical engagement length** : the distance a contact travels on the surface of its mating contact during engagement or separation. ★ engagement de contact → *engagement 1.* R длина контактирования. D Kontaktreibweg. E carrera de los contactos. I corsa dei contatti corsa di contatto. N contactschuifweg. P przesuw styków; zachodzenie styków. S kontaktberöringslängd. (581)
9. **electrical length** (of a radiating element) : length of a radiating element expressed as a fraction of the antenna wavelength. ★ longueur électrique → *longueur 16.* R электрическая длина (излучающего элемента). D elektrische Länge (eines Strahlerelementes). E longitud eléctrica (de un elemento radiante). I lunghezza elettrica. N elektrische golflengte (van een stralend element). P długość elektryczna (elementu promieniującego). S elektrisk längd. (712)
10. **electrical length** (of a waveguide element or component) : the length of a waveguide expressed in waveguide wavelengths which would provide the same total phase shift as a given waveguide element or component at the frequency of interest. ★ longueur électrique → *longueur 17.* R электрическая длина (элемента или компонента волновода). D elektrische Länge (einer Wellenleiteranordnung oder eines -bauelementes). E longitud eléctrica (de un elemento o de un componente de una guíaonda). I lunghezza elettrica (di un elemento o componente di guida d'onda). N elektrische lengte. P długość elektryczna (linii przesyłowej lub dwuwrotnika). S elektrisk längd. (726)
11. **electrical path length difference** (*Syn.* path length difference) : → *difference 23*
12. **equal length code** : → *code 28*
13. **equilibrium length** (*Syn.* equilibrium mode distribution length) : for a specific excitation condition, the length of multimode optical fibre necessary to attain equilibrium mode distribution. *Note.* — When the excitation condition is not specified it is taken to be the longest such length that would result from the worst case. ★ longueur d'équilibrage → *longueur 12.* R длина равновесия; длина равномерного распределения мод. D Modengleichgewichtslänge. E longitud de equilibrio; longitud de distribución de equilibrio modal. I lunghezza di stato stazionario. N evenwichtslengte; evenwichtsmodusverdelingslengte. P droga ustalania rozkładu modów. S modutjämningslängd. (731)
14. **equilibrium mode distribution length** (*Syn.* equilibrium length) : → *length 13*
15. **error burst length** : the number of digits in the sequence beginning at the first erroneous digit of an error burst and ending at the last erroneous digit. ★ longueur d'un paquet d'erreurs → *longueur 13.* R длина пакета ошибок. D Länge eines Fehlerbündels. E anchura de una ráfaga de errores. I lunghezza del burst di errori. N lengte van de foutenuitbarsting; lengte van het foutsalvo. P długość paczki błędów. S felskurslängd. (721)
16. **frame length** (in switching) : the number of devices in a group being scanned or polled in a cycle of polling or scanning. ★ longueur de trame → *longueur 10.* R длина цикла. D Rahmenlaenge. E longitud de trama. I lunghezza di trama. N cycluslengte; rasterlengte. P długość ramki. S ramlängd. (714)
17. **gap length** : the actual distance between the pole pieces of a magnetic head. ★ longueur réelle d'entrefer → *longueur 20.* R ширина рабочего зазора. D Spaltbreite. E longitud de entrehierro. I lunghezza reale di traferro. N spleetlengte. P długość szczeliny. S spaltlängd. (806)
18. **length of a scale division** : the part of the scale length between two consecutive marks. ★ longueur d'une division → *longueur 14.* R длина деления. D Skalenteilstrichabstand. E longitud de una división. I lunghezza di una divisione. N lengte van schaaldeel. P długość działki elementarnej. S skaldelslängd. (301)
19. **length of flame path** (*Syn.* length of flameproof joint) : → *length 20*
20. **length of flameproof joint** (*Syn.* length of flame path; width of flameproof joint) : the shortest path through a flameproof joint from the inside to the outside of a flameproof enclosure. *Note.* — This definition does not apply to threaded joints. ★ longueur de joint antidéflagrant → *longueur 4.* R длина взрывонепроницаемого соединения; длина щели. D Länge des zünddurchschlagsicheren Spaltes; Spaltlänge. E longitud de la junta antideflagrante. I lunghezza del giunto a tenuta di fiamma. N lengte van een drukvaste spleet. P długość szczeliny ognioszczelnej. S spaltlängd. (426)
21. **length of lay** : the axial length of one complete turn of the helix formed by one cable component. ★ pas (d'assemblage) → *pas 10.* R шаг скрутки. D Schaglänge. E paso de cableado. I passo di riunione. N spoed; slaglengte. P skok skrętu. S stigning; slaglängd. (461)
22. **length of lay** : the axial length of one complete turn of the helix of a wire in a stranded conductor. ★ pas de câblage → *pas 14.* R шаг скрутки. D Schlaglänge. E paso de cableado. I passo di cordatura. N slaglengte. P skok skrętu. S stigning. (466)
23. **migration length** : the square root of the migration area. ★ longueur de migration → *longueur 6.* D Wanderlänge. E longitud de migración. I lunghezza di migrazione. N migratielengte. P długość migracji. S migrationslängd. (026)
24. **optical path length** (*Syn.* phase path length) : the length of the path that would be travelled at the speed of light in

vacuum in a time duration equal to the phase delay of a given electromagnetic wave between two given points. *Note.* — Between two points in a same ray path this length equals the line integral of the refractive index along the ray path :

$$\int_c n\,ds$$

where n is the refractive index of the medium at each point in the direction of path and ds the curve element along the path. ★ chemin optique → *chemin 7.* D optische Weglänge; Phasenweglänge. P długość drogi optyczna; długość drogi fazowa. (705)

25. **optical path length** : in a medium of constant refractive index n, the product of the geometrical distance and the refractive index. ★ chemin optique → *chemin 8.* R длина оптического канала. D optische Weglänge. E longitud del trayecto óptico. I lunghezza del cammino ottico. N optische weglengte. P długość drogi optycznej. S optisk väglängd. (731)
26. **path length difference** : → *difference 23*
27. **phase path length** (*Syn.* optical path length) : → *length 24*
28. **scale length** : the length of the line (curved or straight) which passes through the centres of all the shortest scale marks, contained between the first and the last scale marks. ★ longueur d'échelle → *longueur 11.* R длина шкалы. D Skalenlänge. E longitud de una escala. I lunghezza della scala. N schaallengte. P długość podziałki. S skallängd. (301)
29. **sloping span length** : the distance between the attachment points of the conductor on two consecutive supports (see fig. 1). ★ portée oblique → *portée 17.* R длина наклонного пролета. D geneigte Spannweite. E longitud del vano inclinado. I campata obliqua. N hellende veldlengte. P rozpiętość przęsła pochyłego. S lutande spannlängd. (466)
30. **slowing-down length** : the square root of the slowing-down area. ★ longueur de ralentissement → *longueur 8.* D Bremslänge. E longitud de moderación. I lunghezza di rallentamento. N afremlengte. P długość spowalniania. S nedbromsningslängd. (026)
31. **span length** : the horizontal distance between the attachment points of the conductor on two consecutive supports. ★ longueur de la portée → *longueur 5.* R длина пролета. D Spannweite. E longitud del vano. I campata orizzontale; lunghezza della campata. N veldlengte. P rozpiętość przęsła. S spannlängd. (466)
32. **suspension length** (of a luminaire in an interior) : distance between the ceiling and the light centre of the luminaire. ★ distance au plafond → *distance 4.* R длина подвеса (светильника). D Pendellänge (einer Leuchte im Innenraum). E altura de suspensión. I distanza dal soffitto. N afhanghoogte (van een armatuur). P odległość podwieszenia (opraw). S pendellängd. (845)
33. **total scanning line length** : the product of the scanning speed and the scanning line period. *Note.* — The total scanning line length is equal to the sum of the usable scanning line length and the product of the scanning speed and the lost time. ★ longueur totale de ligne → *longueur 21.* R общая длина строки. D Gesamtabtastzeilenlänge. E longitud total de línea. I lunghezza di linea totale. N totale lengte van de aftastlijn. P długość całkowita linii rozwinięcia. S total linjelängd. (721)
34. **usable scanning line length** : the maximum length of the scanning line that can be achieved with a particular facsimile equipment. ★ longueur utile de ligne → *longueur 22.* R полезная длина строки. D nutzbare Zeilenlänge. E longitud útil de línea. I lunghezza di linea utile. N bruikbare lengte van de aftastlijn. P długość użyteczna linii rozwinięcia. S effektiv linjelängd. (721)

lengthener

1. **line lengthener** : a device for altering the electrical length of a transmission line without altering the physical length between its terminal ports. ★ extenseur électrique de ligne → *extenseur 3.* R удлинитель. D ..... E extensor eléctrico de línea. I estensore elettrico di linea. N elektrische lijnlengte-insteller. P linia (przesyłowa) o zmiennej długości elektrycznej. S ledningsförlängare. (726)

lens

1. **collimating lens** : an electron lens used for collimation of an electron beam near the storage assembly. ★ électrode de collimation → *électrode 34.* R коллиматорная линза. D Kollimator. E electrodo de colimación. I elettrodo di collimazione. N collimatorlens. P soczewka kolimacyjna. S kollimationslins. (531)
2. **constrained lens** : a parallel-plate lens in which the waves are guided by the parallel plates, hence the direction of propagation within the lens is independent of the angle of incidence. ★ lentille à propagation contrainte → *lentille 7.* R ограничительная линза. D Linse mit Zwangswellenführung. E lente compulsiva. I lente a propagazione guidata. N ..... P soczewka o wymuszonej propagacji. S vågledarlins. (712)
3. **dielectric lens** : a (radio wave) lens made of dielectric material. ★ lentille diélectrique → *lentille 9.* R диэлектрическая линза. D dielektrische Linse. E lente dieléctrica. I lente dielettrica. N diëlektrische lens. P soczewka dielektryczna. S dielektrisk lins. (712)
4. **eggcrate lens** (*Syn.* multicellular lens) : → *lens 14*
5. **electromagnetic lens** : an electron lens utilising a magnetic field. ★ lentille électromagnétique → *lentille 10.* R электромагнитная линза. D elektromagnetische Linse. E lente electromagnética. I lente elettromagnetica. N elektromagnetische lens. P soczewka magnetyczna. S magnetisk lins. (531)
6. **electron lens** : a structure designed for controlling the cross-section of an electron beam. ★ lentille électronique → *lentille 11.* R электронная линза. D Elektronenlinse. E lente electrónica. I lente elettronica. N elektronenlens. P soczewka elektronowa. S elektronlins. (531)
7. **electrostatic lens** : an electron lens utilizing an electric field. ★ lentille électrostatique → *lentille 12.* R электростатическая линза. D elektrostatische Linse. E lente electrostática. I lente elettrostatica. N elektrostatische lens. P soczewka elektryczna. S elektrostatisk lins. (531)
8. **E-plane lens** : a parallel-plate lens in which the plates are parallel to the electric field vector. *Note.* — The spacing between adjacent plates must be greater than one-half wavelength. Usually they are spaced no greater than one wavelength. ★ lentille à plaques parallèles E → *lentille 5.* R E-плоскостная линза. D E-Ebenen-Linse. E lente de plano E. I lente nel piano E. N E-vlaklens. P soczewka równoległopłytkowa typu E. S E-planslins. (712)
9. **focusing lens** : an electromagnetic coil(s) or electrostatic plates which provide the field for focusing the electron beam. ★ dispositif de focalisation → *dispositif 51.* R фокусирующие линзы. D Fokussierungslinse. E dispositivo de focalización. I dispositivo di focalizzazione. N focusseringslens. P układ skupiający; cylinder Wehnelta. S fokuseringslins. (841)
10. **Fresnel lens antenna** : → *antenna 56*
11. **H-plane lens** : a parallel-plate lens in which the plates are parallel to the magnetic field vector. ★ lentille à plaques parallèles H → *lentille 6.* R H-плоскостная линза. D H-Ebenen-Linse. E lente de plano H. I lente nel piano H. N H-vlaklens. P soczewka równoległopłytkowa typu H. S H-planslins. (712)
12. **lens spotlight** : → *spotlight 2*
13. **Luneburg lens antenna** : → *antenna 72*
14. **multicellular lens** (*Syn.* eggcrate lens) : a (radio wave) lens formed from two sets of parallel plates set perpendicular to each other, such that rectangular cells are formed which behave as coupled waveguides in the direction of propagation. ★ lentille multicellulaire → *lentille 13.* R многосотовая линза. D Vielzellenlinse; Linse mit gekreuzten Platten. E lente multicelular. I lente multicellulare. N eierdooslens. P soczewka wielokomórkowa. S cell-lins. (712)
15. **parallel-plate lens** : a (radio wave) lens composed of thin parallel conducting plates parallel to the general direction of propagation. ★ lentille à plaques parallèles → *lentille 4.* R линза из (параллельных) пластин. D Parallelplattenlinse. E lente de placas paralelas. I lente a lamine metalliche. N lens met evenwijdige platen. P soczewka równoległopłytkowa. S parallellskivelins. (712)
16. **perforated lens** : an artificial-dielectric lens composed of parallel conducting sheets which are held perpendicular to the general direction of propagation and which have perforations of appropriate size and position. ★ lentille à trous → *lentille 8.* R перфорированная линза. D perforierte Linse; Lochlinse. E lente perforada. I lente perforata. N geperforeerde lens. P soczewka perforowana. S hålskivelins. (712)

17. **(radio wave) lens** : a structure, through which radio waves in a certain frequency range can pass, designed to produce specified convergence or divergence effects. ★ lentille radioélectrique → *lentille 14.* R радиолинза. D (Radiowellen-)Linse. E lente (de onda de radio); lente radioeléctrica. I lente (elettromagnetica). N lens (voor een radiogolf). P soczewka fal radiowych. S lins. (712)
18. **stepped lens** (*Syn.* zone lens) : → *lens 19*
19. **zone lens** (*Syn.* stepped lens) : a (radio wave) lens with one or both of its faces divided into zones which are each stepped thus forming a discontinuous surface. ★ lentille à échelon → *lentille 3.* R зонированная линза; ступенчатая линза. D Zonenlinse; Stufenlinse. E lente zonal; lente escalonada. I lente a gradini. N getrapte lens. P soczewka stopniowana. S trappstegslins. (712)
20. **zone-plate lens antenna** (*Syn.* Fresnel lens antenna) : → *antenna 56*

lens-corrected

1. **lens-corrected horn** : → *horn 15*

LET

1. **LET** (*Syn.* linear energy transfer) : → *transfer 14*

let-go

1. **let-go current** (*Syn.* releasing current) : → *current 167*

lethal

1. **median lethal dose** : → *dose 35*
2. **median lethal time** : → *time 108*

lethargy

1. **lethargy** : the natural logarithm of the ratio of a reference energy to the energy of a neutron. ★ léthargie → *léthargie 1.* D Lethargie. E letargia (de un neutrón.). I letargia (d'un neutrone.). N lethargie; sloomheid. P letarg. S letargi. (026)

letter

1. **letters case** : → *case 5*
2. **letters shift** : → *shift 21*
3. **letters shift-on space** : → *space 12*

letter-shift

1. **letter-shift signal** : → *signal 112*

let-through

1. **let-through current** (*Syn.* cut-off current) : → *current 63*
2. **let-through (current) characteristic** (*Syn.* cut-off (current) characteristic) : → *characteristic 29*

level

1. **absolute power level** : the ratio of the power of a signal or noise at a point in a transmission channel to a specified reference power ; this ratio is generally expressed in decibels and represented in abridged form, for instance "dBm" if the reference power is one milliwatt. ★ niveau absolu de puissance → *niveau 16.* R абсолютный уровень мощности. D absoluter Leistungspegel. E nivel absoluto de potencia. I livello assoluto di potenza. N absoluut vermogensniveau. P poziom mocy bezwzględny. S absolut effektnivå. (702)
2. **absolute voltage level** : the ratio, generally expressed in decibels, of the r.m.s value of the voltage of a signal at a point in a transmission channel, to a specified reference r.m.s value of voltage. ★ niveau absolu de tension → *niveau 17.* R абсолютный уровень напряжения. D absoluter Spannungspegel. E nivel absoluto de tensión. I livello assoluto di tensione. N absoluut spanningsniveau. P poziom napięcia bezwzględny. S absolut spänningsnivå. (702)
3. **acceptor level** : an intermediate impurity level close to the valence band in an extrinsic semiconductor. *Note.* — The acceptor level is empty at the temperature of zero kelvin; at any other temperatures it can receive electrons from the valence band. The acceptor levels can form narrow impurity bands. ★ niveau accepteur → *niveau 18.* R акцепторный уровень. D Akzeptorniveau. E nivel aceptador. I livello dell'accettore. N acceptorniveau. P poziom akceptorowy. S acceptornivå. (521)
4. **average picture-signal level** (*Syn.* APL (abbreviation)) : the average signal level during a picture period, excluding blanking intervals. *Note.* — The average picture-signal level is usually expressed with respect to blanking level as a percentage of the difference between blanking and white levels. ★ niveau moyen (d'un signal) d'image → *niveau 87.* R средний уровень сигнала изображения. (723)
5. **average sound pressure level in a room** : in decibels, ten times the common logarithm of the ratio of the space and time average of the sound pressure squared to the square of the reference sound pressure, the space average being taken over the entire room with the exception of those parts where the direct radiation of any sound source or the near field of the boundaries is of significant influence. ★ niveau de pression acoustique quadratique moyenne dans une salle → *niveau 36.* R уровень среднего звукового давления в помещении. D mittlerer Schalldruckpegel in einem Raum. E nivel de presión acústica media en una sala. I livello medio di pressione acustica in un ambiente. N gemiddeld geluid(s)drukniveau in een kamer. P poziom ciśnienia akustycznego średni w pomieszczeniu. S medelljudtrycksnivå. (801)
6. **axial source level** (*Syn.* sonar source level) : → *level 84*
7. **band sound pressure level** : the level of the sound pressure produced within a specified frequency band. *Note.* — The band may be specified by its lower and upper out-off frequencies, or by its geometric center frequency and bandwidth. The width of the band may be indicated by a modifier such as one octave band (sound pressure) level, one-half octave band level, one-third octave band level. ★ niveau de pression acoustique par bande → *niveau 34.* R уровень звукового давления в полосе частот. D Schalldruck-Bandpegel. E nivel de presión acústica por banda. I livello di pressione acustica di banda. N geluid(s)drukniveau in een bepaalde frequentieband. P poziom ciśnienia akustycznego w pasmie częstotliwości. S ljudtrycksnivå för frekvensband. (801)
8. **black level** : the level of a video signal corresponding to a specified minimum level of luminance. ★ niveau du noir → *niveau 78.* R уровень черного. (723)
9. **black level shift** : → *shift 5*
10. **blanking level** : the level of a video signal corresponding to the theoretical zero level of luminance. ★ niveau de suppression → *niveau 47.* R уровень гашения. (723)
11. **blanking level discontinuity** : → *discontinuity 1*
12. **calculated loudness level** : loudness level calculated by a specified procedure. *Note.* — Such procedures are given in ISO Recommendation R 532-1975. ★ niveau d'isosonie calculé → *niveau 72.* R расчетный уровень громкости. D berechneter Lautstärkepegel. E nivel de sonoridad calculado. I livello di sensazione calcolato. N berekend luidheidsniveau. P poziom głośności przeliczony. S beräknad hörnivå. (801)
13. **difference in levels** : → *difference 10*
14. **donor level** : an intermediate impurity level close to the conduction band in an extrinsic semiconductor. *Note.* — The donor level is filled at the temperature of zero kelvin; at any other temperature it can supply electrons to the conduction band. The donor levels can form narrow impurity bands. ★ niveau donneur → *niveau 73.* R (примесный) донорный уровень. D Donatorniveau; Störstellenniveau. E nivel donador. I livello del donatore. N donorniveau. P poziom donorowy. S donatornivå. (521)
15. **effective perceived noise level** : level in decibels of the time integral of the antilogarithm of one-tenth of tone-corrected perceived noise level, over the duration of an aircraft flyover ; the reference duration is 10 s. *Notes. 1* — The integral is usually approximated by one-half the summation, over the top ten decibels of an aircraft flyover, of the antilogarithm of one-tenth of the tone-corrected perceived noise level in successive 0.5 s intervals. *2* — Effective perceived noise level purports to represent subjective noisiness. *3* — Effective perceived noise level of an aircraft flyover tends to be 2 dB or 3 dB greater than A-weighted sound exposure level. ★ niveau effectif de bruit perçu → *niveau 79.* R эффективный уровень ощущения шума. D ..... E nivel efectivo de ruido percibido. I livello di rumore effettivamente percepito. N ..... P poziom szumu dostrzegalnego skuteczny. S ..... (801)
16. **electrolyte level indicator** : → *indicator 5*
17. **(electromagnetic) compatibility level** : the specified maximum electromagnetic disturbance level expected to be impressed on a device, equipment or system operated in particular conditions. *Note.* — In practice the electromagnetic compatibility level is not an absolute maximum level but may be exceeded by a small probability. ★ niveau de compatibilité (électromagnétique) → *niveau 26.* R уровень (электромагнитной) совместимости. D (elektromagnetischer)

Verträglichkeitspegel. E nivel de compatibilidad (electromagnética). I livello di compatibilità (elettromagnetica). N (elektromagnetisch) compatibiliteitsniveau. P poziom kompatybilności (elektromagnetycznej). S förväntad störningsnivå. (161)

18. **emission level** (of a disturbing source) : the level of a given electromagnetic disturbance emitted from a particular device, equipment or system, measured in a specified way. ★ niveau d'émission → *niveau 53.* R уровень излучения на источнике. D Abstrahlungspegel (einer Störquelle). E nivel de emisión. I livello di emissione (di una sorgente di disturbo). N stralingsniveau (van een storingsbron). P poziom emisji (źródła zaburzenia). S emissionsnivå. (161)
19. **equivalent continuous sound level** (*Syn.* time-average sound level) : → *level 99*
20. **equivalent continuous sound pressure level** (*Syn.* time average sound pressure level) : → *average 18*
21. **Fermi (characteristic energy) level** : in a solid, the energy level separating the occupied states from the unoccupied states at a thermodynamic temperature of zero kelvin. *Note.* — When a forbidden band separates the occupied and unoccupied states, the Fermi level is assigned to the centre of the forbidden band. ★ niveau de Fermi → *niveau 30.* R уровень Ферми. D Fermi-(Energie-)Niveau. E nivel de Fermi. I livello di Fermi. N Ferminiveau. P poziom Fermiego. S Ferminivå. (111,521)
22. **field normalized impact sound pressure level** : for a specified frequency band, impact sound pressure levelin decibels minus ten times the logarithm to the base ten of the ratio of the reverberation time in the receiving room to the reference reverberation time of 0.5 second. ★ niveau du bruit de choc normalisé in-situ → *niveau 77.* R стандартизованный уровень ударного звука. D wirklicher Norm-Trittschallpegel. E nivel de ruido de choque normalizado «in situ». I livello di rumore di calpestio normalizzato in opera. N genormeerd contact geluidsniveau in de praktijk. P poziom ciśnienia akustycznego udarowego normowy w danym miejscu. S normerad stegljudnivå i byggnad. (801)
23. **following level meter** : → *meter 22*
24. **frequency tolerance (due to variations in level of drive)** : → *tolerance 10*
25. **fuel irradiation level** (*Syn.* specific burn-up) : → *burn-up 4*
26. **grey level** : picture signal level which is intermediate between the black level and the white level. ★ niveau de gris → *niveau 31.* R уровень серого. (723)
27. **hearing level** : for a specified signal, for a specific type of earphone and for a specified manner of application, sound pressure level of the signal produced by the earphone in a specified coupler or artificial ear, minus the sound pressure level produced in the earphone corresponding to a specified standard threshold of hearing. ★ niveau supraliminaire de pression acoustique → *niveau 92.* R уровень слышимости. D ..... E nivel técnico de audicion. I livello normalizzato di sensazione uditiva. N gehoorniveau. P poziom słyszalności. S ..... (801)
28. **hearing threshold level** : for a specified signal and method of presentation, amount in decibels by which the threshold of hearing for a listener, for either one or two ears, exceeds a specified standard threshold of hearing. ★ perte d'audition → *perte 14.* R уровень порога слышимости; потеря слуха. D Hörverlust. E pérdida de audición. I perdita uditiva. N gehoorverlies. P poziom nadprogowy. S hörselnivå. (801)
29. **high level language** : → *language 4*
30. **hum level** : the ratio, expressed in decibels, of the voltage derived from stray fields in specified conditions and measured at a given output, to the voltage derived from a reference signal intended for and measured at the same output. ★ niveau de ronflement → *niveau 42.* R уровень фона. D Brummpegel. E nivel de zumbido. I livello di ronzio. N bromniveau. P poziom przydźwięku. S brumspänning. (806)
31. **immunity level** : the maximum level of a given electromagnetic disturbance incident on a particular device, equipment or system for which it remains capable of operating at a required degree of performance. ★ niveau d'immunité → *niveau 63.* R уровень невосприимчивости. D Störfestigkeitspegel. E nivel de inmunidad. I livello di immunità. N stralingsongevoeligheid. P poziom odporności. S tålighetsnivå. (161)
32. **impact sound pressure level** : the average sound pressure level in a specified frequency band in the rceiving room when the floor under test is excited by the standardized impact sound source. *Note.* — The standardized impact sound source is a tapping machine specified in ISO Standard 140/6, which causes hammers whose effective mass each is 0.5 kg to fall 40 mm at the rate of 10 impacts per second. ★ niveau du bruit de choc → *niveau 75.* R уровень ударного звука. D Trittschallpegel. E nivel de ruido de choque. I livello di rumore di calpestio. N contactgeluid(s)niveau. P poziom ciśnienia akustycznego udarowego. S stegljudnivå. (801)
33. **impurity level** : a local level due to the impurity. ★ niveau d'impureté → *niveau 64.* R примесный уровень. D Stör(stellen)niveau. E nivel de impurezas. I livello locale. N verontreinigingsniveau. P poziom domieszkowy. S störämnesnivå. (521)
34. **indenture level** (for maintenance) : a level of subdivision of an item from the point of view of a maintenance action. *Notes. 1* — Examples of indenture levels could be a subsystem, a circuit board, a component. *2* — The indenture level depends on the complexity of the item's construction, the accessibility to subitems, skill level of maintenance personnel, test equipment facilities, safety considerations, etc. ★ niveau d'intervention → *niveau 66.* R уровень разукрупнения (для технического обслуживания и ремонта). D Gliederungsebene. E nivel de intervención (para el mantenimiento). I livello di intervento (per la manutenzione). N ingrijpingsniveau (voor onderhoud). P poziom podziału obiektu (do obsługi). S systemnivå. (191)
35. **input level** : the power, voltage or current value presented to the input terminal pair of a piezoelectric filter. ★ niveau d'entrée → *niveau 60.* R входной уровень. D Eingangspegel. E nivel de entrada. I livello d'entrata. N ingangsniveau. P poziom wejściowy. S innivå. (561)
36. **insulation level** : the test voltage, under specified conditions, that the insulation of a device is designed to withstand. ★ niveau d'isolement → *niveau 68.* R электрическая прочность изоляции. D Isolationspegel. E nivel de aislamiento. I livello di isolamento. N isolatieniveau. P napięcie probiercze. S isolationsnivå. (151)
37. **insulation level** : for a particular item of equipement a characteristic defined by one or two values indicating the insulation withstand voltages. ★ niveau d'isolement → *niveau 69.* R уровень изоляции. D Isolationspegel. E nivel de aislamiento. I livello d'isolamento. N isolatieniveau. P poziom izolacji. S isolationsnivå. (604)
38. **judged perceived noise level** : sound pressure level, in decibels, of a frontally presented octave band of pink noise centred on 1 kHz and of duration two seconds that is subjectively judged equally noisy as a given sound. ★ niveau de bruit perçu estimé → *niveau 24.* R шумовой уровень, оцениваемый по ощущению. D ..... E nivel de ruido percibido estimado. I livello di rumore percepito. N ..... P poziom szumu dostrzegalnego oceniany. S ..... (801)
39. **level** (of a time varying quantity) : a mean or otherwise weighted value of a time varying quantity, such as a power or a field quantity, evaluated in a specified manner during a specified time interval. *Note.* — The level of a quantity may be expressed in logarithmic units, for example in decibels with respect to a reference value. ★ niveau → *niveau 12.* R уровень (изменяющейся во времени величины). D Pegel (einer zeitlich sich ändernden Größe). E nivel (de una magnitud). I livello (di una grandezza variabile). N niveau (van een tijdafhankelijke variabele). P poziom (wielkości zmiennej w czasie). S nivå. (161,702)
40. **level** (of a sound signal) : the mean value during a specified time interval of the voltage of a sound signal evaluated with an instrument of specified characteristics and generally expressed in decibels with respect to a specified reference, for example, 0.775· ★ niveau → *niveau 13.* R уровень (звукового сигнала). (723)
41. **level** (of a picture signal) : instantaneous value of the electrical quantity representing a picture signal, generally the voltage corresponding to a picture signal threshold, often expressed as a percentage or fraction of a specified reference amplitude, for example 1 volt. ★ niveau → *niveau 14.* R уровень (сигнала изображения). (723)
42. **level** : logarithm of the ratio of a given quantity to a reference quantity of the same kind. The base of the logarithm, the reference quantity, and the kind of level must be indicated. *Notes.* — The kind of level is indicated by use of a compound term such as sound power level or sound pressure level. *2* — The value of the reference quantity remains unchanged, whether the chosen quantity is peak, rootmean-square, or otherwise. *3* — The base of the logarithm is indicated by use of a unit of level

associated with that base. ★ niveau → *niveau 15.* R уровень. D Pegel. E nivel. I livello. N niveau; peil. P poziom. S nivå. (801)

43. **level above threshold** (*Syn.* sensation level) : → *level 82*
44. **level compounded** : → *compounded 4*
45. **level controller** : → *controller 5*
46. **level difference** : → *difference 18*
47. **level meter** : → *meter 28*
48. **level monitoring** : → *monitoring 5*
49. **level of drive** (of a piezoelectric resonator) : a value of the amplitude of motion imposed on a piezoelectric resonator, usually expressed in terms of power dissipated. ★ niveau d'excitation → *niveau 61.* R уровень возбуждения (пьезоэлектрического резонатора). D Belastung (eines piezoelektrischen Resonators). E nivel de excitación (de un resonador piezoeléctrico). I livello d'eccitazione (di un risuonatore piezoelettrico). N kristalstroomniveau; vermogen. P poziom wzbudzenia. S drivnivå. (561)
50. **level of maintenance** : the set of maintenance actions to be carried out at a specified indenture level. *Note.* — Examples of a maintenance action are replacing a component, a printed circuit board, a subsystem, etc. ★ niveau de maintenance → *niveau 32.* R уровень технического обслуживания и ремонта. D Instandhaltungsebene. E nivel de mantenimiento. I livello di manutenzione. N onderhoudsniveau. P zakres obsługi (według podziału obiektu). S underhållsomfattning. (191)
51. **level span** : → *span 6*
52. **lightning impulse protective level** (of a protective device) : the maximum permissible peak voltage value, on the terminals of a protective device subjected to lightning impulses under specific conditions. ★ niveau de protection aux surtensions de foudre → *niveau 37.* R уровень защиты от грозовых перенапряжений (защитного устройства). D Blitz-Überspannungsschutzpegel (einer Überspannungsschutzeinrichtung). E nivel de protección contra sobretensiones tipo rayo (de un dispositivo de protección). I livello di protezione alle sovratensioni a impulso. N bliksemstootspanningsbeschermingsniveau (van een beschermingstoestel). P piorunowy poziom ochrony aparatu zabezpieczającego. S skyddsnivå vid kort stöt. (604)
53. **limiting (of sound signal level)** : → *limiting 12*
54. **local level** : an energy level in a forbidden band caused by a lattice imperfection in the case of a low concentration of defects. ★ niveau local → *niveau 84.* R локальный уровень. D örtliches (lokales) Niveau. E nivel local. I banda di impurezza. N plaatselijk niveau. P poziom lokalny. S lokal nivå. (521)
55. **loudness level** : of a sound, in phons, numerically equal to the median sound pressure level in decibels, re 20 μPa of a free progressive wave having a frequency of 1 000 Hz presented to listeners having normal hearing facing the source that in a specified number of trials is judged equally as loud as the unknown sound. *Note.* — The manner of presenting the unknown sound, such as from earphones or in a diffuse sound field, must be stated and forms one of the characteristics of the sound. ★ niveau d'isosonie → *niveau 71.* R уровень громкости. D Lautstärkepegel. E nivel de sonoridad. I livello di sensazione. N luidheidsniveau. P poziom głośności. S hörnivå. (801)
56. **low level language** : → *language 5*
57. **maximum level** : the power, voltage or current value above which unacceptable distortion of the signal or irreversible changes may occur in a piezoelectric filter. ★ niveau maximal → *niveau 85.* R максимальный уровень. D Maximalpegel. E nivel máximo. I livello massimale. N maximumniveau. P poziom maksymalny. S maximalnivå. (561)
58. **maximum output level** : the relative recorded level corresponding to the harmonic distortion level fixed for the kind of tape concerned. The measurement is carried out at a reference frequency which is the frequency of the signal recorded in the "level" section of the corresponding standard calibration tape. ★ niveau maximal de sortie → *niveau 86.* R уровень записи, соответствующий заданным гармоническим искажениям. D maximaler Ausgangspegel. E nivel máximo de salida. I massimo livello di uscita. N maximaal uitgangsniveau. P poziom wyjściowy maksymalny. S maximal utnivå. (806)
59. **normalized impact sound pressure level** : for a specified frequency band, average sound pressure level in a receiving room in decibels due to the standardized impact sound source, plus ten times the logarithm to the base ten of the ratio of the Sabine absorption in the receiving room to the reference absorption of ten decibel metre-square. ★ niveau du bruit de choc normalisé → *niveau 76.* R приведённый уровень ударного звукового давления. D Norm-Trittschallpegel. E nivel de ruido de choque normalizado. I livello di rumore di calpestio normalizzato. N genormeerd contactgeluidsniveau. P poziom ciśnienia akustycznego udarowego normowy. S standardiserad stegljudnivå i laboratorium. (801)
60. **normalized level difference** : → *difference 22*
61. **on-off level indicator** : → *indicator 15*
62. **output level** : the power, voltage or current value delivered to the load circuit of a piezoelectric filter. ★ niveau de sortie → *niveau 46.* R выходной уровень. D Ausgangspegel. E nivel de salida. I livello d'uscita. N uitgangsniveau. P poziom wyjściowy. S utnivå. (561)
63. **output level instability** : → *instability 4*
64. **particle velocity level** : logarithm of the ratio of a given velocity to the reference velocity. Velocity level in decibels is 20 times the logarithm to the base ten of the ratio. *Notes. 1* — Unless otherwise specified, the reference velocity is 10 nm/s. *2* — Unless otherwise specified, the velocities are understood to be expressed in root-mean-square values. ★ niveau de vitesse acoustique d'une particule → *niveau 51.* R уровень колебательной скорости. D Schallschnellepegel. E nivel de velocidad acústica de una partícula. I livello di velocità di spostamento. N snelheidsniveau. P poziom prędkości akustycznej. S (partikel)hastighetsnivå. (801)
65. **peak frequency-weighted sound pressure level** (*Syn.* peak sound level) : greatest instantaneous value of a standard-frequency-weighted sound pressure level, within a stated time interval. *Note.* — If frequency weighting is not specified, the A-frequency weighting is understood. ★ niveau de crête de pression acoustique pondérée en fréquence → *niveau 28.* R пиковый уровень звука; пиковый частотновзвешнный уровень звукового давления. D Spitzenwert des bewerteten Schallpegels. E nivel sonoro de cresta; nivel de cresta de presión acústica ponderada en frecuencia. I livello sonoro di picco. N topwaarde van het geluid(s)niveau. P poziom ciśnienia akustycznego szczytowy ważony częstotliwościowo. S toppvärde av ljudnivån. (801)
66. **peak level** : maximum instantaneous level of stated kind that occurs during a stated time interval. ★ niveau de crête → *niveau 27.* R пиковый уровень. D Spitzenwert des Pegels. E nivel de cresta. I livello di picco. N topniveau. P poziom szczytowy. S toppnivå. (801)
67. **peak sound level** (*Syn.* peak frequency-weighted sound pressure level) : → *level 65*
68. **perceived noise level** : the frequency-weighted sound pressure level in decibels, obtained by a stated procedure that combines the sound pressure levels in the 24 one-third octave bands centred on 50 Hz to 10 kHz. *Notes. 1* — The procedure is stated in ISO Standard 3891-1978:Procedures for describing aircraft noise on the ground. *2* — Perceived noise level is intended to approximate judged perceived noise level. ★ niveau de bruit perçu calculé → *niveau 22.* R уровень ощущения шума. D ..... E nivel de ruido percibido (calculado). I livello di rumore calcolato. N ..... P poziom szumu dostrzegalnego. S upplevd bullernivå. (801)
69. **pole face level** : that portion of the pole shoe which is bevelled so as to increase the length of the radial air-gap. ★ biseau droit de face polaire → *biseau 1.* R скос поверхности полюса. D Polflächenabschrägung. E bisel recto de cara polar. I rastremazione polare. N poolvlakafschuining. P ścięcie powierzchni bieguna. S fasning av polplatta. (411)
70. **print-through level** : → *print-through 2*
71. **rated insulation level** : the test voltages, under specified conditions, that the insulation is designed to withstand. *Note.* — These test voltages can be for instance : a) rated lightning impulse and short duration power frequency withstand voltages. b) rated lightning and switching impulse withstand voltages (phase-to-earth). ★ niveau d'isolement assigné → *niveau 70.* R номинальный уровень изоляции. D Bemessungs-Isolationspegel. E nivel de aislamiento asignado. I livello nominale di isolamento. N toegekend isolatieniveau. P poziom izolacji znamionowy. S isolationsnivå. (421)
72. **rated level** : the power, voltage or current value at which the characteristics of a piezoelectric filter are specified. ★ niveau assigné → *niveau 19.* R номинальный уровень. D Bemessungsspegel. E nivel asignado. I livello nominale. N toegekend niveau. P poziom znamionowy. S märknivå. (561)

73. **rated recording level** : the level of a signal, having a frequency equal to the reference frequency which, when applied to the recording head terminals, results in a signal recorded on the tape with a specified value of total harmonic distortion. ★ niveau nominal d'enregistrement → *niveau 88.* R номинальный уровень записи. D Nenn-Aufnahmepegel. E nivel nominal de registro. I livello di registrazione specificato. N toegekend opnameniveau. P poziom zapisu znamionowy. S nominell inspelningsnivå. (806)

74. **recorded level** : the magnitude of the signal level on a recorded medium defined by comparison with a reference level. ★ niveau enregistré → *niveau 82.* R уровень записи. D relativer Aufnahmepegel. E nivel registrado. I livello registrato. N opgenomen niveau. P poziom zapisu. S inspelad nivå. (806)

75. **recording level** : on a recording medium, the value of the recorded level for a stated percentage of distortion. *Note.* — It shall be stated whether this level is a measure of r.m.s., peak or peak-to-peak values. ★ niveau d'enregistrement → *niveau 59.* R уровень записи при заданных искажениях. D Aufnahmepegel. E nivel de registro. I livello di registrazione. N opneemniveau. P poziom zapisu umowny. S inspelningsnivå. (806)

76. **recording level indicator** : → *indicator 21*

77. **reference level** : the magnitude of a significant parameter of a recorded medium. It is expressed in terms of recorded velocity in disk recording, and of short-circuit magnetic flux in magnetic recording. *Note.* — It enables relative recorded programme levels or relative noise levels to be defined. ★ niveau de référence → *niveau 40.* R номинальный уровень записи. D Bezugspegel. E nivel de referencia. I livello di riferimento. N referentieniveau. P poziom odniesienia. S referensnivå. (806)

78. **relative power level** : the ratio, generally expressed in decibels, of the power of a signal or noise at a point in a transmission channel, to the corresponding power at a chosen reference point, generally the origin of the channel. ★ niveau relatif de puissance → *niveau 89.* R относительный уровень мощности. D relativer Leistungspegel. E nivel relativo de potencia. I livello relativo di potenza. N relatief vermogensniveau. P poziom mocy względny. S relativ effektnivå. (702)

79. **relative reverberation level** : difference, at apoint on the reference axis of a source, between the sound pressure level due to reverberation and the sound pressure level due to the direct wave. ★ niveau de réverbération relatif → *niveau 41.* R относительный уровень реверберации. D relativer Nachhallpegel. E nivel de reverberación relativa. I livello relativo di riverberazione. N relatief nagalmniveau. P poziom pogłosowy względny. S relativ efterklangsnivå. (801)

80. **(relative) side lobe level** : the ratio, usually expressed in decibels, of the maximum value of the amplitude of the specified field component in a side lobe, to the maximum value in a reference lobe. *Note.* — If it is not specified, the reference lobe is the major lobe. ★ amplitude (relative) d'un lobe latéral → *amplitude 7.* R относительный уровень боковых лепестков. D (relativer) Nebenkeulenpegel; (relativer) Nebenzipfelpegel. E nivel de lóbulos laterales (relativo). I livello (relativo) del lobo secondario; livello (relativo) del lobo laterale. N (relatief) zijlobniveau; (relatief) zijlusniveau. P proziom (względny) listka bocznego. S sidlobsnivå. (712)

81. **rumble level** : the ratio, expressed in decibels, of the voltage derived from a low frequency vibration within the unit, measured at a given output, to the voltage derived from a reference signal intended for, and measured at the same output. *Note.* — It can be expressed either as a weighted, or an unweighted value. ★ niveau de ronronnement → *niveau 43.* R уровень рокота. D Rumpelfremd- bzw. Geräuschpegel. E nivel de ronroneo. I livello di tremolio. N dreunniveau. P poziom dudnienia. S bullernivå. (806)

82. **sensation level** (*Syn.* level above threshold) : for an individual listener and a specified sound, amount by which a sound pressure level exceeds the threshold of hearing for that sound. ★ niveau de sensation → *niveau 44.* R уровень ощущения; уровень выше порога. D Hörpegel; überschwelliger Pegel. E nivel de sensación. I livello di sensazione uditiva. N waarnemingsniveau. P poziom nadprogowy. S ..... (801)

83. **sensitivity level** (of a transducer) : output level of stated kind minus the input level of stated kind that caused the output level. *Note.* — The reference values for the input and output levels determine the reference sensitivity and should be chosen accordingly. ★ niveau de sensibilité → *niveau 45.* R уровень чувствительности (преобразователя). D Übertragungsmaß. E nivel de sensibilidad; nivel de eficacia (de un transductor). I livello di sensibilità (di un trasduttore). N gevoeligheidspeil. P poziom skuteczności (przetwornika). S känslighetsnivå. (801)

84. **sonar source level** (*Syn.* axial source level) : sound pressure level on the axis of a sound projector at the reference distance of 1 metre, unless otherwise specified, from the effective acoustic centre of the projector. The reference quantity is the reference sound pressure at the reference distance. ★ niveau d'émission d'un sonar → *niveau 55.* R уровень излучателя. D Sonar-Sendepegel. E nivel de emisión de un sonar; nivel de emisión axial. I livello di emissione di un sonar. N bronsterkte van de sonar. P poziom nadawczy sonaru. S sonarsändningsnivå; axial sändningsnivå. (801)

85. **sound exposure level** : logarithm of the ratio of a given time integral of squared A-frequency-weighted sound pressure, over a stated time interval or event such as an aircraft flyover, to the product of the squared reference sound pressure of 20 μPa and the reference duration of one second. Sound exposure level in decibels is ten times the logarithm to the base ten of that ratio. The reference sound pressure and the frequency weighting may be different, if specifically stated with the sound exposure level. ★ niveau d'exposition au bruit → *niveau 62.* R уровень продолжительности звука. D abgestrahlter Schallpegel. E nivel de exposición al ruido. I livello di esposizione al rumore. N geluid(s)dosis. P poziom narażenia szumowego. S ..... (801)

86. **sound intensity level** (*Syn.* sound-energy flux density level) : logarithm of the ratio of a given intensity of sound in a stated direction to the reference sound intensity. Intensity level in decibels is ten times the logarithm to the base ten of the ratio. *Note.* — Unless otherwise specified, the reference sound intensity is 1 pW/m². ★ niveau d'intensité acoustique → *niveau 65.* R уровень интенсивности звука; уровень плотности потока звуковой энергии. D Schallintensitätspegel. E nivel de intensidad acústica. I ..... N intensiteitsniveau. P poziom natężenia akustycznego. S ljudintensitetsnivå. (801)

87. **sound level** (*Syn.* weighted sound pressure level) : → *level 103*

88. **sound level meter** : → *meter 54*

89. **sound power level** : logarithm of the ratio of a given sound power to the reference sound power. Power level in decibels is ten times the logarithm to the base ten of the ratio. *Note.* — Unless otherwise specified, the reference sound power is 1 pW. ★ niveau de puissance acoustique → *niveau 39.* R уровень звуковой мощности. D Schalleistungspegel. E nivel de potencia acústica. I livello di potenza acustica; livello di potenza sonora. N geluid(s)vermogensniveau. P poziom mocy akustycznej. S ljudeffektnivå. (801)

90. **sound pressure level** : logarithm of the ratio of a given sound pressure to the reference sound pressure. Sound pressure level in decibels is 20 times the logarithm to the base ten of the ratio. *Notes. 1* — Unless otherwise specified, the reference sound pressure is 20 μPa for airborne sound and 1 μPa for sound in media other than air. *2* — Unless otherwise specified, the sound pressures are understood to be expressed in root-mean-square values. ★ niveau de pression acoustique → *niveau 33.* R уровень звукового давления. D Schalldruckpegel. E nivel de presión acústica. I livello di pressione acustica; livello di pressione sonora. N geluid(s)drukniveau. P poziom ciśnienia akustycznego. S ljudtrycksnivå. (801)

91. **sound-energy flux density level** (*Syn.* sound intensity level) : → *level 86*

92. **spectrum density level** (*Syn.* spectrum level) : level of the limit, as the width of the band approaches zero, of the ratio of a spcified quantity distributed within a frequency band to the width of the band. *Notes. 1* — The kind of quantity must be specified, such as by (squared) sound pressure spectrum level. *2* — In view of the fact that filters have finite bandwidths, practically the sound pressure spectrum level L_{ps} is obtained for the centre frequency of the band by the formula:

$$L_{ps} = 10 \log_{10} \frac{(p^2/B)}{(p_0^2/B_0)} \text{ dB}$$

where p and p_0 are respectively the given field quantity and the reference quantity; B and B_0 are respectively the effective bandwidth of the filter and the reference bandwidth of 1 Hz. When L_p is the band pressure level observed through the filter, the above relation reduces to $L_{p1} = L_p - 10\lg_{10}(B/B_0)$ dB.

★ niveau de densité spectrale → *niveau 29.* **R** уровень спектральной плотности; спектральный уровень. **D** Spektraldichte-Pegel. **E** nivel de densidad espectral. **I** livello di densità spettrale. **N** spectraal niveau. **P** poziom gęstości widmowej. **S** spektral (ljudtrycks)nivå. (801)

93. spectrum level (*Syn.* spectrum density level) : → *level 92*

94. static level meter : → *meter 57*

95. surface level : a local level caused by the presence of an impurity or other imperfection at the surface of the crystal. ★ niveau de surface → *niveau 48.* **R** поверхностный уровень. **D** Oberflächenniveau. **E** nivel de superficie. **I** livello di superficie. **N** oppervlakteniveau. **P** poziom powierzchniowy. **S** ytnivå. (521)

96. switching impulse protective level (of a protective device) : the maximum permissible peak voltage value, on the terminals of a protective device subjected to switching impulses under specific conditions. ★ niveau de protection aux surtensions de manœuvre → *niveau 38.* **R** уровень защиты от коммутационных перенапряжений (защитного устройства). **D** Schalt-Überspannungsschutzpegel (einer Übrespannungsschutzeinrichtung). **E** nivel de protección contra sobretensiones tipo maniobra (de un dispositivo de protección). **I** livello di protezione alle sovratensioni di manovra. **N** schakelstootspanningsbeschermingsniveau (van een beschermingstoestel). **P** łączeniowy poziom ochrony aparatu zabezpieczającego. **S** skyddsnivå vid lång stöt. (604)

97. synchronizing level : in a complete picture signal the level corresponding to the peak value of the line synchronising signal. ★ niveau de synchronisation → *niveau 49.* **R** уровень синхронизации. (723)

98. time average sound pressure level : → *average 18*

99. time-average sound level (*Syn.* equivalent continuous sound level) : logarithm of the ratio of a given time-mean-square standard-frequency-weighted sound pressure for a stated time period, to the square of the reference sound pressure of 20 μPa. Time-average sound level in decibels is ten times the logarithm to the base ten of that ratio. *Note. 1* — If a frequency weighting is not specified, the A-frequency weighting is understood. *2* — In principle, exponential time weighting is not involved. ★ niveau continu équivalent de pression acoustique pondérée (en fréquence) → *niveau 20.* **R** средний во времени уровень звука; эквивалентный непрерывный уровень звука. **D** bewerteter Mittelungspegel. **E** nivel equivalente continuo de presión acústica ponderada (en frecuencia). **I** livello sonoro continuo equivalente. **N** equivalent (continu) gemiddeld geluidsdrukniveau. **P** poziom ciśnienia akustycznego uśredniony ważony. **S** ekvivalent ljudnivå. (801)

100. tone-corrected perceived noise level : a sound pressure level in decibels, obtained by adding to perceived noise level an adjustment that is related to the degree of irregularity that may occur among contiguous one-third-octave band sound pressure levels of an aircraft noise. *Notes. 1* — The adjustment is described in ISO Standard 3891-1978 ; it may vary from 0 dB to 6.7 dB. *2* — The adjustment purports to account for the extra subjective noisiness caused by pronounced audible tones such as may be generated by propellors, compressors, turbines or fans. ★ niveau de bruit perçu corrigé pour les sons purs → *niveau 23.* **R** откорректированный уровень ощущения шума. **D** ..... **E** nivel de ruido percibido por los sonidos puros; nivel acústico corregido. **I** livello di rumore percepito-ponderato. **N** ..... **P** poziom szumu dostrzegalnego korygowany. **S** ..... (801)

101. (vibratory) acceleration level : logarithm of the ratio of a given (vibratory) acceleration to the reference acceleration. Acceleration level in decibels is 20 times the logarithm to the base ten of the ratio. *Notes. 1* — Unless otherwise specified, the reference acceleration is 1 $\mu m/s^2$. *2* — Unless otherwise specified, the accelerations are understood to be expressed in root-mean-square values. ★ niveau d'accélération acoustique → *niveau 21.* **R** уровень колебательного ускорения. **D** (Schwing-)Beschleunigungspegel. **E** nivel de aceleración acústica. **I** livello di accelerazione. **N** versnellingsniveau. **P** poziom przyspieszenia akustycznego. **S** (partikel)accelerationsnivå. (801)

102. voltage level : one of the nominal voltage values used in a given system. ★ niveau de tension → *niveau 50.* **R** ступень напряжения. **D** Spannungsebene. **E** nivel de tensión. **I** livello di tensione. **N** spanningsniveau. **P** poziom napięcia. **S** spänningsnivå. (601)

103. weighted sound pressure level (*Syn.* sound level) : logarithm of the ratio of a given sound pressure to the reference sound pressure of 20 μPa, the sound pressure being obtained with a standard frequency weighting and with a standard exponential time weighting. Sound level in decibels is twenty times the logarithm to the base ten of that ratio. *Notes. 1* — Standard frequency weightings A, B and C and standard exponential time weightings fast (F), slow (S) and impulse (I) are given in IEC Publication 651 (1979): Sound level meters. *2* — Time and frequency weightings employed should be specified, but if not stated explicitly, fast (F) exponential time weighting and A-frequency weighting are understood. ★ niveau de pression acoustique pondérée → *niveau 35.* **R** уровень звука; взвешенный уровень звукового давления. **D** bewerteter Schalldruckpegel. **E** nivel sonoro; nivel de presión acústica ponderada. **I** livello sonoro. **N** geluid(s)drukniveau; gewogen geluid(s)drukniveau. **P** poziom ciśnienia akustycznego ważony. **S** vägd ljudtrycksnivå; ljudnivå. (801)

104. white level : the maximum level of the luminance signal, specified for a given television system. *Notes. 1* — The luminance signal is assumed to be positive. *2* — In colour television, the maximum level of the colour video signal may exceed the white level. ★ niveau du blanc → *niveau 74.* **R** уровень белого. (723)

levelling

1. zone levelling : the passing of one or more molten zones through a semiconductor crystal for the purpose of uniformly distributing impurities in the crystal. ★ nivellement par zone → *nivellement 1.* **R** зонное выравнивание. **D** Zonennivellieren. **E** nivelación por zona. **I** livellamento a zone. **N** nivellering door zonesmelting. **P** wyrównywanie strefowe. **S** zonutjämning. (521)

levitation

1. levitation melting : → *melting 4*

licence-plate

1. licence-plate light (*Syn.* number-plate light) : → *light 46*

lid

1. lid : a part to close the container normally having holes for topping-up, for gas escape and for the terminals. *Note.* — It may also enclose several cells in the case of a monobloc container. ★ couvercle → *couvercle 1.* **R** крышка. **D** Zellendeckel. **E** tapa. **I** coperchio. **N** deksel. **P** wieczko. **S** lock. (486)

2. lid sealing compound : → *compound 11*

life

1. average life : the average of the individual lives of the lamps subjected to a life test, the lamps being operated under specified conditions and the end of life judged according to specified criteria. ★ durée de vie moyenne → *durée de vie 5.* **R** средний срок службы. **D** mittlere Lebensdauer. **E** vida media. **I** vita media. **N** gemiddelde levensduur. **P** trwałość średnia. **S** medellivslängd. (845)

2. burn-up life (of a neutron detector) : an estimated fluence of neutrons of a given energy distribution after which the sensitive material will be consumed to such an extent that the detector characteristics exceed the specified tolerances for a specified purpose. ★ fluence de combustion → *fluence 5.* **R** радиационный ресурс (детектора нейтронов). **D** Lebensdauer für Abbrand (eines Detektors). **E** fluencia de combustión (de un detector de neutrones). **I** fluenza di combustione (di un rivelatore di neutroni). **N** verbruiksfluentie (v.e. neutronendetector). **P** trwałość ze względu na zużycie materiału czynnego (detektora neutronowego). **S** utbränningsfluens. (391)

3. life (of a lamp) : the total time for which a lamp has been operated before it becomes useless, or is considered to be so according to specified criteria. *Note.* — Lamp life is usually expressed in hours. ★ durée de vie → *durée de vie 1.* **R** срок службы (лампы). **D** Lebensdauer (einer Lampe). **E** vida. **I** vita. **N** levensduur. **P** trwałość lampy. **S** livslängd (hos lampa). (845)

4. life test : → *test 45*

5. life test : → *test 46*

6. life to X% failures : → *failure 30*

7. mean life (of a particle) : in an exponentially decaying population, the time in which the number of particles is divided by e, the base of naperian logarithms. ★ vie moyenne → *vie 2.* **R** среднее время жизни (частицы). **D** mittlere Lebensdauer (eines Teilchens). **E** vida media (de una partícula). **I** vita media (di una particella). **N** gemiddelde levensduur. **P** czas życia (cząsteczki) średni. **S** medellivslängd. (111)

8. **mean life** : the average lifetime of an atomic or nuclear system in a specified state. For an exponentially decaying system, it is the average time for the number of atoms or nuclei in a specified state to be divided by a factor e (2.718...). *Note.* — For a radionuclide, the mean life τ is the reciprocal of the decay constant λ:

$$\tau = \frac{1}{\lambda}$$

★ vie moyenne → *vie 3.* R среднее время жизни. D mittlere Lebensdauer. E vida media. I vita media. N (gemiddelde) levensduur. P średni czas życia. S medellivslängd; medellivstid. (026,391,881)

9. **pot life** (*Syn.* working life) : the time a raw material or semi-finished product retains its processing properties after final preparation (mixing of components, adding of catalysts, etc.). ★ vie en pot → *vie 1.* R срок жизни. D Topfzeit; Gebrauchsdauer. E tiempo máximo de utilización. I vita nel mescolatore; durata limite di impiego. N verwerkingstijd. P czas podatności roboczej. S brukbarhetstid. (212)
10. **service life** : the period of useful life of a battery under specified conditions. ★ durée en service → *durée 99.* R срок службы. D Brauchbarkeitsdauer. E duración en servicio. I durata di vita in servizio. N levensduur. P trwałość użytkowa. S livslängd. (486)
11. **shelf life** (*Syn.* storage life) : the time a raw material or semi-finished product may be stored under specified conditions without losing its processing properties. ★ durée limite de stockage → *durée 105.* R срок хранения. D Haltbarkeit; Lagerzeit. E tiempo máximo de almacenamiento. I durata limite di immagazzinamento; durata di vita in magazzino. N houdbaarheidsduur. P czas magazynowania; przechowalność. S lagringstid. (212)
12. **storage life** (*Syn.* shelf life) : → *life 11*
13. **useful life** : under given conditions, the time interval beginning at a given instant of time, and ending when the failure intensity becomes unacceptable or when the item is considered unrepairable as a result of a fault. *Note.* — In French, the term "durée de vie utile" is the duration of this time interval. ★ vie utile → *vie 4.* R технический ресурс. D Brauchbarkeitsdauer. E vida útil. I vita utile. N praktische gebruikduur. P czas użyteczności. S livslängd. (191)
14. **useful life** (of a detector) : operational life, under irradiation and environmental conditions restricted within specified limits, after which the detector characteristics exceed the specified tolerances. Useful life can be expressed in incident particle fluence, number of produced pulses, etc. ★ vie utile → *vie 5.* R ресурс (детектора). D praktische Lebensdauer (eines Detektors). E vida útil (de un detector). I vita utile (di un rivelatore). N nuttige levensduur (v.e. detector). P trwałość (detektora). S livslängd (för detektor). (391)
15. **working life** (*Syn.* pot life) : → *life 9*

lifetime

1. **bulk lifetime** (of minority carriers) : the time interval in which a given density of excess minority carriers in the bulk of a homogeneous semiconductor decays by recombination to the fraction 1/e of its original value. ★ durée de vie dans le matériau → *durée de vie 3.* R объемное время жизни (неосновных носителей). D Volumenlebensdauer (von Minoritätsträgern). E vida media en el material (de portadores minoritarios). I durata di vita nel materiale (di un portatore minoritario). N levensduur in het inwendige van een kristal (van minderheidsladingdragers). P czas życia objętościowy (nośnika mniejszościowego). S volymlivslängd. (521)

lift

1. **aerial lift device with insulating arm** : → *device 2*
2. **arc furnace roof lift and swing aside** : → *roof 2*
3. **induction "lift off coil" crucible melting furnace** : → *furnace 30*

light

1. **aeronautical ground light** : signal light provided on land or water to assist the navigation of aircraft. ★ feu aéronautique à la surface → *feu 7.* R наземный аэронавигационный огонь. D Luftfahrbodenfeuer. E luz aeronáutica de superficie. I luce aeronautica a terra. N luchtvaartgrondlicht. P światło lotnicze naziemne. S markljus. (845)
2. **alternating light** : signal light that shows different colours in a regularly repeated sequence. ★ feu alternatif → *feu 8.* R цветопеременный огонь. D Wechselfeuer. E luz alternante. I luci miste. N wissellicht. P światło przemiennobarwne. S växelljus. (845)
3. **anti-collision light** : signal light carried on an aircraft to indicate the presence of the aircraft. ★ feu anticollision → *feu 9.* R огонь предупреждения столкновений. D Zusammenstoßwarnlicht. E luz anticolisión. I luce anticollisione. N anti-botsingslicht. P światło antykolizyjne. S kollisionsvarningsljus. (845)
4. **backup light** (*Syn.* reversing light) : → *light 61*
5. **black light lamp** : → *lamp 4*
6. **brake light** (*Syn.* stop light) : signal light carried on a vehicle to indicate rearwards that a brake is being applied to the vehicle. *Note.* — In this term, lamp is sometimes used instead of light. ★ feu-stop → *feu-stop 1.* R сигнал торможения. D Bremsleuchte. E luz de freno. I luce d'arresto. N remlicht; stoplicht. P światło hamowania. S bromslykta. (845)
7. **cardinal light** : signal light used to indicate, with reference to the cardinal points of the compass, where navigable water may be found. ★ feu cardinal → *feu 11.* R кардинальный огонь. D kardinales Feuer. E luz cardinal. I luce cardinale. N cardinale lichtboei. P światła kardynalne. S kardinalfyr. (845)
8. **character (of a light signal)** : → *character 9*
9. **characteristic (of a light signal)** (*Syn.* character (of a light signal)) : → *character 9*
10. **delta light pulse** : → *pulse 5*
11. **direction indicator light** (*Syn.* turn-signal light) : signal light, one of a set, carried on a vehicle to indicate an intended, or actual, movement by the vehicle to the left or the right. *Note.* — In this term, lamp is sometimes used instead of light. ★ feu indicateur de direction → *feu 30.* R указатель поворота. D Fahrtrichtungsanzeiger. E luz de dirección. I indicatore di direzione. N richtingaanwijzer. P światło kierunku jazdy. S körriktningsvisare. (845)
12. **direction light** : signal light designed to show a signal of one character over a narrow arc of the horizon, and used to indicate a particular direction. It may also indicate an arc of the horizon to each side by dissimilar characters. *Note.* — In French, the term "feu de guidage" refers to a direction light in which a very narrow arc of the horizon is used to indicate a particular direction, and an arc of the horizon to each side must be indicated. ★ feu de direction → *feu 15.* R направленный огонь. D Leitfeuer. E luz de dirección. I luce di direzione. N geleidelicht. P światło kierunkowe. S riktningsfyr. (845)
13. **downward light output ratio** : → *ratio 32*
14. **edge-emitting light emitting diode** : → *diode 8*
15. **fixed light** : signal light that shows continuously, in any given direction, with constant luminous intensity and colour. ★ feu fixe → *feu 29.* R постоянный огонь. D Festfeuer. E luz fija. I luce fissa; fuoco fisso. N vast licht. P światło stałe; światło nieprzerywane. S fast ljus. (845)
16. **flashing light** : rhythmic light in which every appearance of light (flash) is of the same duration, and, except possibly for rhythms with rapid rates of flashing, the total duration of light in a period is clearly shorter than the total duration of darkness. *Note.* — The term eclipse is used for the interval of darkness between two successive appearances of light. ★ feu à éclats → *feu 4.* R вспыхивающий огонь; импульсный огонь. D Blitzfeuer. E luz de destellos. I luce a lampi. N flitslicht. P światło błyskowe. S blinkljus. (845)
17. **front fog light** : projector carried on a vehicle for illuminating the way ahead in poor visibility, and usually positionned so as to moderate the amount of light returned by scattering to the driver. *Note.* — In this term, lamp is sometimes used instead of light. ★ feu-brouillard avant → *feu-brouillard 2.* R передняя противотуманная фара. D Nebelscheinwerfer. E luz antiniebla delantera. I proiettore fendinebbia. N (voor)mistlicht. P światło przeciwmgłowe przednie. S dimstrålkastare. (845)
18. **front position light** : signal light carried on a vehicle to indicate forwards the presence of the vehicle. It may also, particularly if paired with an identical light, provide an indication of the width of the vehicle. *Notes. 1* — The terms "sidelight" (UK) and "side-marker light" (USA) are commonly used for one of a pair of front position lights. *2* — In this term, lamp is sometimes used instead of light. ★ feu de position avant → *feu 20.* R передние габаритные огни. D vordere Begrenzungsleuchte. E luz de posición anterior. I luce di

posizione anteriore. N breedtelicht. P światło pozycyjne przednie. S främre positionslykta. (845)

19. **indicator light** : a lamp used as an indicator. ★ voyant lumineux → *voyant 2.* R сигнальная лампочка. D Signallampe. E indicador luminoso. I indicatore luminoso. N signaallamp. P wskaźnik świetlny. S indikeringslampa. (811)
20. **isophase light** : rhythmic light in which all the durations of light and darkness are intended to be perceived as equal. *Note.* — In French and in terminology of road traffic, an isophase light is also called "feu clignotant". ★ feu isophase → *feu 31.* R равнопроблесковый огонь. D Gleichtaktfeuer. E luz isofase. I luce isofase. N isofaselicht. P światło rytmiczne równoczasowe. S klippljus. (845)
21. **landing light** : projector carried on an aircraft for illuminating the ground in front of the aircraft while it is landing or taking-off. The projector may also be used to provide a highly conspicuous light while the aircraft is making an approach to land. ★ phare d'atterrissage → *phare 4.* R взлетно-посадочная фара. D Landescheinwerfer. E luz de aterrizaje. I proiettore di atterraggio. N landingslicht. P projektor lądowania pokładowy. S landningsströlkastare. (845)
22. **lateral light** : signal light used to indicate the course of a navigable waterway. *Note.* — A preferred-channel light is a lateral light that is used to indicate a preferred course at a point where a choice of courses exists. ★ feu latéral → *feu 32.* R боковой (кромочный) огонь. D laterales Feuer. E luz lateral. I luce laterale. N laterale lichtboei. P światła boczne toru wodnego. S lateralfyr. (845)
23. **leading lights** : two or more signal lights positioned to indicate a leading line, or navigational course, in the direction in which they may be seen in vertical alignment. ★ alignement de feux → *alignement 2.* R створные огни. D Richtfeuer. E luces de alineación. I luci di allineamento. N lichtenlijn. P światła nabieżnikowe. S ensfyrar. (845)
24. **licence-plate light** (*Syn.* number-plate light) : → *light 46*
25. **light** (*Syn.* visible radiation) : any optical radiation capable of causing a visual sensation directly on a human being. *Notes. 1* — Nominally covering the wavelength in vacuum range of 380 nm to 800 nm. *2* — In the laser and optical communication fields, custom and practice in the English language have extended usage of the term light to include the much broader portion of the electromagnetic spectrum than can be handled by the basic optical techniques used for the visible spectrum. ★ lumière → *lumière 13.* R свет; видимое излучение. D Licht; sichtbare Strahlung. E luz; radiación visible. I luce; radiazione visibile. N licht; zichtbare straling. P światło; promieniowanie widzialne. S ljus; synlig strålning. (731)
26. **light** : 1. Perceived light. 2. Visible radiation. *Notes. 1* — The word "light is sometimes used in sense 2 for optical radiation extending outside the visible range, but this usage is not recommended. *2* — The terms "light" in English and "Licht" in German are also used, especially in visual signalling, for certain lighting devices and for light signals. ★ lumière → *lumière 14.* R свет. D Licht. E luz. I luce. N licht. P światło. S ljus. (845)
27. **light** : adjective used to describe high levels of lightness. ★ clair → *clair 2.* R светлый. D hell. E claro. I chiaro. N licht. P jasny. S ljus. (845)
28. **light band width** (*Syn.* Buchmann and Meyer pattern) : → *pattern 1*
29. **light centre** : → *centre 11*
30. **light emitting diode** : → *diode 12*
31. **light guide** : → *guide 6*
32. **light load test** : → *test 47*
33. **light loss factor** : → *factor 106*
34. **light output ratio** : → *ratio 49*
35. **light pen** : → *pen 1*
36. **light ray** : → *ray 13*
37. **light running** : → *running 3*
38. **light signal** : → *signal 113*
39. **light stimulus** : → *stimulus 7*
40. **light vessel** : → *vessel 2*
41. **locomotive running light** (*Syn.* light running) : → *running 3*
42. **mast-head light** : navigation light positioned above the longitudinal axis of a vessel, and designed to show a fixed white light forwards and to the sides of the vessel. ★ feu de tête de mât → *feu 25.* R мачтовый огонь. D Topplicht. E luz de cabeza. I fanale di testa d'albero. N toplicht. P światło masztowe; światło topowe. S topplanterna. (845)
43. **navigation light** (of a vessel) : signal light, one of a set, carried on a vessel to indicate the presence and aspect, and sometimes the particular occupation and ability to manoeuvre, of the vessel. ★ feu de navigation → *feu 17.* R навигационный огонь (судна). D Positionslicht (am Wasserfahrzeug). E luz de navegación. I fanali di navigazione. N navigatielicht (van een vaartuig). P światła nawigacyjne (statku). S lanterna. (845)
44. **navigation light** (of an aircraft) : signal light, one of a set, carried on an aircraft to indicate the presence and aspect of the aircraft. ★ feu de position → *feu 18.* R аэронавигационный огонь (самолёта). D Positionslicht (am Luftfahrzeug). E luz de posición. I luce di navigazione. N navigatielicht; boordnavigatielicht. P światło nawigacyjne (statku powietrznego); światło pozycyjne. S positionsljus. (845)
45. **night warning light** (for conductor) : a device which becomes luminous generally by capacitive induction from the live conductor to which it is attached. ★ balise nocturne lumineuse → *balise 3.* R предупредительные огни (для проводов). D Nachtwarnbefeuerung (für Leiter). E baliza nocturna luminosa (para conductor). I dispositivo di segnalazione notturna (per conduttore). N waarschuwingslicht (voor een geleider). P światło ostrzegawcze nocne (na przewodach). S flygvarningsljus. (466)
46. **number-plate light** (*Syn.* rear registration-plate light; licence-plate light) : lighting device carried on a vehicle to illuminate the number plate, or registration plate, or licence plate, at the rear of the vehicle. *Note.* — In this term, lamp is sometimes used instead of light. ★ dispositif d'éclairage de la plaque d'immatriculation arrière → *dispositif 62.* R фонарь номерного знака. D Kennzeichenleuchte. E luz de matrícula posterior. I luce di targa. N kentekenplaatverlichting. P światło tablicy rejestracyjnej. S skyltlykta. (845)
47. **obstacle light** : aeronautical ground light used to indicate the presence of a fixed or mobile hazard to the permitted movement of aircraft on the ground or in the air. ★ feu d'obstacle → *feu 27.* R заградительный огонь. D Hindernisfeuer. E luz de obtáculo. I luce ostacolo. N hindernislicht. P światło przeszkodowe. S hinderljus. (845)
48. **occulting light** : rhythmic light in which every interval of darkness (occultation) is of the same duration, and the total duration of light in a period is clearly longer than the total duration of darkness. ★ feu à occultations → *feu 5.* R затмевающийся огонь. D unterbrochenes Feuer. E luz de ocultaciones. I luce ad occultazioni. N onderbroken licht. P światło przerywane. S intermittent ljus. (845)
49. **optical light output ratio** : → *ratio 64*
50. **(outline) marker light** : signal light positioned on a vehicle to provide an indication of the exceptional length or bulk of the vehicle. *Note.* — In this term, lamp is sometimes used instead of light. ★ feu d'encombrement → *feu 26.* R габаритные огни. D Kennleuchte. E luz de gálibo. I luce di ingombro. N markeringslicht. P światło obrysowe. S markeringslykta. (845)
51. **parking light** : signal light carried on a vehicle to indicate the presence of the vehicle in a parking-place. *Notes. 1* — A front position light or a rear position light may sometimes be used as a front parking light or a rear parking light respectively. *2* — In this term, lamp is sometimes used instead of light. ★ feu de stationnement → *feu 24.* R стояночный огонь. D Parkleuchte. E luz de estacionamiento. I luce di stazionamento. N parkeerlicht. P światło postojowe. S parkeringslykta. (845)
52. **(perceived) light** : universal and essential attribute of all perpections and sensations that are peculiar to the visual system. *Notes. 1* — Light is normally, but not always, perceived as a result of the action of a light stimulus on the visual system. *2* — See "light". ★ lumière (perçue) → *lumière 1.7.* R (воспринимаемый) свет. D (wahrgenommenes) Licht. E luz (percibida). I luce. N licht. P światło (postrzegane). S (varseblivet) ljus. (845)
53. **pilot light** (*Syn.* pilot lamp) : → *lamp 46*
54. **primary light source** : → *source 22*
55. **quantity of light** (Q; Q) : time integral of the luminous flux Φ over a given duration Δt.

$$Q = \int_{\Delta t} \Phi \, dt$$

Unit: lm·s Other unit: lumen-hour (lm·h). ★ quantité de

lumière → *quantité 2.* R световая энергия. D Lichtmenge. E (cantidad de) luz. I energia luminosa. N hoeveelheid licht. P ilość światła. S ljusmängd. (845)

56. **rear fog light** : signal light carried on a vehicle to indicate rearwards the presence of the vehicle in poor visibility. It is supplementary to a rear position light. *Note.* — In this term, lamp is sometimes used instead of light. ★ feu-brouillard arrière → *feu-brouillard 1.* R задний противотуманный огонь. D Nebelschlußleuchte. E luz antiniebla posterior. I luce fendinebbia posteriore. N mistachterlicht. P światło przeciwmgłowe tylne. S dimbaklykta. (845)
57. **rear position light** (*Syn.* tail light) : signal light carried on a vehicle to indicate rearwards the presence of the vehicle. It may also, particularly if paired with an identical light, provide an indication of the width of the vehicle. *Notes. 1* — The terms "sidelight" (UK) and "side-marker light" (USA) are commonly used for one of a pair of front position lights. *2* — In this term, lamp is sometimes used instead of light. ★ feu de position arrière → *feu 19.* R задние габаритные огни. D hintere Begrenzungsleuchte; Schlußleuchte. E luz de posición posterior. I luce di posizione posteriore. N achterlicht. P światło pozycyjne tylne. S bakre positionslykta. (845)
58. **rear registration-plate light** (*Syn.* number-plate light) : → *light 46*
59. **reciprocating lights** : pair of isophase lights that are arranged to show light alternately. ★ feux alternés → *feu 34.* R попеременнодействующие огни. D Wechselblinklicht. E luces alternadas. I luci alternate. N afwisselllicht. P światła wzajemnie naprzemienne. S ..... (845)
60. **return light** : a pre-arranged light signal in answer to a cue. ★ signal de réponse → *signal 140.* R ответный световой сигнал. (723)
61. **reversing light** (*Syn.* backup light) : signal light carried on a vehicle to indicate rearwards an intended, or actual, backward movement by the vehicle. It may also be designed to illuminate the way behind the vehicle. *Note.* — In this term, lamp is sometimes used instead of light. ★ feu de marche arrière → *feu 16.* R фонарь заднего хода. D Rückfahrscheinwerfer. E luz de marcha atrás. I proiettore per la retromarcia. N achteruitrijlicht. P światło cofania. S backningsstrålkastare. (845)
62. **rhythmic light** : signal light that shows intermittently, in a given direction, with a regular periodicity. ★ feu rythmé → *feu 33.* R проблесковый огонь. D Taktfeuer. E luz rítmica. I luce a ritmo. N knipperlicht. P s'wiatło rytmiczne. S periodiskt ljus. (845)
63. **runway lights** : aeronautical ground lights positioned on, or very close to, a runway of an aerodrome to indicate the part of the runway intended for the landing or take-off of aircraft. *Note.* — Runway centre-line lights and runway edge lights indicate respectively the centre line and the edges of a runway. Runway threshold lights and runway end lights indicate respectively the beginning and the end of the part of the runway intended for the landing of aircraft. Runway touchdown zone lights are barrettes arranged in pairs symmetrically about the centre line of a runway, and between the two lines of runway edge lights, to indicate the portion of the runway where aircraft should first make contact on landing. ★ feux de piste → *feu 35.* R огни взлетно-посадочной полосы. D Start- und Landebahnfeuer. E luces de pista. I luci di pista. N baanlichten. P światła drogi startowej. S banljus. (845)
64. **secondary light source** : → *source 29*
65. **sector light** : signal light designed to indicate designated arcs of the horizon by dissimilar characters. ★ feu à secteurs → *feu 6.* R секторный огонь. D Sektorfeuer. E luz sectorizada. I luce a settori. N sectorlicht. P światło sektorowe. S sektorfyr. (845)
66. **signal light** : object or apparatus designed to emit a light signal. ★ feu (de signalisation) → *feu 23.* R сигнальный огонь. D Signalleuchte. E luz de señalización. I luce di segnalazione. N signaallicht. P sygnalizator; światło sygnałowe. S signalljus. (845)
67. **stern light** : navigation light positioned at the stern of a vessel, and designed to show a fixed white light rearwards. ★ feu de poupe → *feu 21.* R кормовой огонь. D Hecklicht. E luz de popa. I fanale di poppa. N heklicht. P światło rufowe. S akterlanterna. (845)
68. **stop light** (*Syn.* brake light) : → *light 6*
69. **surface emitting light emitting diode** : → *diode 22*
70. **tail light** (*Syn.* rear position light) : → *light 57*
71. **taxiing light** : projector carried on an aircraft for illuminating the ground in front of the aircraft while it is manoeuvring on the ground. ★ phare de roulage → *phare 5.* R рулёжная фара. D Rollscheinwerfer. E luz de rodaje. I proiettore di rullaggio. N rijlicht. P projektor kołowania pokładowy. S taxiljus. (845)
72. **traffic light** : signal light used for regulating traffic. *Note.* — A three-colour set, with red, yellow (amber) and green lights, is the common arrangement for the regulation of vehicular traffic. In French, the term "feu tricolore" is used for such a three-colour set. ★ feu de circulation → *feu 12.* R светофор. D Verkehrslichtzeichen. E luz de tráfico. I semaforo. N verkeerslicht. P światła regulacji ruchu drogowego. S trafiksignal. (845)
73. **turn-signal light** (*Syn.* direction indicator light) : → *light 11*
74. **velocity of light** : → *velocity 23*

light-beam

1. **light-beam diaphragm** (*Syn.* light-beam localizer) : → *localizer 1*
2. **light-beam localizer** : → *localizer 1*

lighted

1. **lighted buoy** : → *buoy 2*

lighthouse

1. **lighthouse** : tower, or substancial building or structure, erected at a designated geographical location to carry a signal light and to assist maritime navigation. ★ phare → *phare 2.* R маяк. D Leuchtturm. E faro. I faro. N vuurtoren. P latarnia morska. S fyr(byggnad). (845)

lighting

1. **approach lighting system** : → *system 11*
2. **cornice lighting** : lighting system comprising light sources shielded by a panel parallel to the wall and attached to the ceiling, and distributing light over the wall. ★ bandeau lumineux → *bandeau 1.* R ..... D Wandbeleuchtung. E iluminación en gargante. I cornice luminosa. N ..... P ..... S takramp för väggbelysning. (845)
3. **cove lighting** : lighting system comprising light sources shielded by a ledge or recess, and distributing light over the ceiling and upper wall. ★ éclairage en corniche → *éclairage 16.* R световой карниз. D Deckenbeleuchtung (CH); Voutenbeleuchtung (CH). E iluminación en cornisa. I illuminazione in cornice. N koofverlichting. P oświetlenie gzymsowe. S väggramp för takbelysning. (845)
4. **diffused lighting** : lighting in which the light on the working plane or on an object is not incident predominantly from a particular direction. ★ éclairage diffusé → *éclairage 13.* R диффузное освещение. D diffuse Beleuchtung; gestreute Beleuchtung. E alumbrado difuso. I illuminazione diffusa. N diffuse verlichting. P oświetlenie rozproszone. S diffus belysning. (845)
5. **direct lighting** : lighting by means of luminaires having a distribution of luminous intensity such that the fraction of the emitted luminous flux directly reaching the working plane, assumed to be unbounded, is 90% to 100%. ★ éclairage direct → *éclairage 14.* R прямое освещение. D direkte Beleuchtung. E alumbrado directo. I illuminazione diretta. N directe verlichting. P oświetlenie bezpośrednie. S direkt belysning. (845)
6. **directional lighting** : lighting in which the light on the working plane or on an object is incident predominantly from a particular direction. ★ éclairage dirigé → *éclairage 15.* R направленное освещение. D gerichtete Beleuchtung. E alumbrado dirigido. I illuminazione direzionale. N gerichte verlichting. P oświetlenie kierunkowe. S riktad belysning. (845)
7. **emergency lighting** : lighting provided for use when the supply to the normal lighting fails. ★ éclairage de secours → *éclairage 10.* R аварийное освещение. D Notbeleuchtung. E alumbrado de emergencia. I illuminazione di emergenza. N noodverlichting. P oświetlenie awaryjne. S nödbelysning. (811,845)
8. **escape lighting** : that part of emergency lighting provided to ensure that an escape route can be effectively indentified and used. ★ éclairage d'évacuation → *éclairage 12.* R эвакуационное освещение. D Sicherheitsbeleuchtung für Rettungswege; Notbeleuchtung für Fluchtwege (CH).

E alumbrado de evacuación. I illuminazione di soccorso. N vluchtrouteverlichting. P oświetlenie ewakuacyjne. S utrymningsljus. (845)

9. **general diffused lighting** : lighting by means of luminaires having a distribution of luminous intensity such that the fraction of the emitted luminous flux directly reaching the working plane, assumed to be unbounded, is 40% to 60%. ★ éclairage (mixte) direct-indirect → *éclairage 22.* R рассеянное освещение. D gleichförmige Beleuchtung. E alumbrado mixto. I illuminazione mista. N gemengde verlichting. P oświetlenie mieszane. S likafördelad belysning. (845)
10. **general lighting** : substantially uniform lighting of an area without provision for special local requirements. ★ éclairage général → *éclairage 18.* R общее освещение. D Allgemeinbeleuchtung. E alumbrado general. I illuminazione generale. N algemene verlichting. P oświetlenie ogólne. S allmänbelysning. (845)
11. **indirect lighting** : lighting by means of luminaires having a distribution of luminous intensity such that the fraction of the emitted luminous flux directly reaching the working plane, assumed to be unbounded, is 0 to 10%. ★ éclairage indirect → *éclairage 19.* R отраженное освещение. D indirekte Beleuchtung. E alumbrado indirecto. I illuminazione indiretta. N indirecte verlichting. P oświetlenie pośrednie. S indirekt belysning. (845)
12. **individual coach lighting** : a method of lighting in which each coach is fitted with a self-contained lighting circuit. ★ éclairage autonome → *éclairage 6.* R автономное освещение. D Einzelwagenbeleuchtung. E iluminación autónoma. I illuminazione autonoma. N rijtuigverlichting. P oświetlenie (wagonu) indywidualne. S individuell vagnbelysning. (811)
13. **lighting** (*Syn.* illumination) : application of light to a scene, objects or their surroundings so that they may be seen. *Note.* — This term is also used colloquially with the meaning "lighting system" or "lighting installation". ★ éclairage → *éclairage 4.* R освещение. D Beleuchtung. E iluminación. I illuminazione. N verlichting. P oświetlanie. S belysning. (845)
14. **lighting chain** : → *chain 7*
15. **lighting circuit** : → *circuit 104*
16. **lighting dynamo** : → *dynamo 1*
17. **lighting string** (*Syn.* lighting chain) : → *chain 7*
18. **lighting tariff** : → *tariff 15*
19. **lighting technology** : → *technology 3*
20. **local lighting** : lighting for a specific visual task, additional to and controlled separately from the general lighting. ★ éclairage local → *éclairage 20.* R местное освещение. D Platzbeleuchtung; Arbeitsplatzbeleuchtung. E alumbrado local. I illuminazione locale. N werkplekverlichting. P oświetlenie miejscowe. S platsbelysning. (845)
21. **localised lighting** : lighting designed to illuminate an area with a higher illuminance at certain specified positions, for instance those at which work is carried out. ★ éclairage localisé → *éclairage 21.* R общее локализованное освещение. D Arbeitsplatzorientierte Allgemeinbeleuchtung. E alumbrado reforzado. I illuminazione localizzata. N gelokaliseerde verlichting. P oświetlenie zlokalizowane. S lokaliserad belysning. (845)
22. **multiple coach lighting** : a method of lighting in which the coaches are lit by means of a supply circuit distributed throughout the length of the train. ★ éclairage général → *éclairage 17.* R централизованное освещение. D Allgemeinbeleuchtung. E iluminación general; iluminación colectiva. I illuminazione centrale. N treinverlichting. P oświetlenie (wagonu) centralne. S belysning med genomgående matning. (811)
23. **pelmet lighting** (*Syn.* valance lighting) : → *lighting 31*
24. **permanent supplementary artificial lighting** (in interiors) : permanent artificial lighting intended to supplement the natural lighting of premises, when the natural lighting is insufficient or objectionable if used alone. *Note.* — This type of lighting is generally denoted in brief by the initial letters PSALI of the words of the English term. ★ éclairage artificiel complémentaire permanent → *éclairage 5.* R постоянное дополнительное искусственное освещение (помещения). D Tageslichtergänzungsbeleuchtung (in Innenräumen). E alumbrado artificial suplementario permanente. I illuminazione artificiale complementare permanente. N permanent toegevoegde kunstverlichting. P oświetlenie uzupełniające (wnętrz) sztuczne stałe. S permanent tillsatsbelysning. (845)
25. **public lighting tariff** : → *tariff 31*
26. **reference lighting** : perfectly diffuse and unpolarised lighting by standard illuminant A of a task in a surround. ★ éclairage de référence → *éclairage 8.* R стандартное освещение. D (diffuse) Bezugsbeleuchtung. E iluminación de referencia. I illuminazione di riferimento. N referentieverlichting. P oświetlenie odniesieniowe. S referensbelysning. (845)
27. **safety lighting** : that part of emergency lighting provided to ensure the safety of people involved in a potentially hazardous process. ★ éclairage de sécurité → *éclairage 11.* R освещение безопасности. D Sicherheitsbeleuchtung für Arbeitsplätze (mit besonderer Gefährdung); Notbeleuchtung für Räume (CH). E alumbrado de seguridad. I illuminazione di sicurezza. N veiligheidsverlichting. P oświetlenie bezpieczeństwa. S säkerhetsbelysning. (845)
28. **semi-direct lighting** : lighting by means of luminaires having a distribution of luminous intensity such that the fraction of the emitted luminous flux directly reaching the working plane, assumed to be unbounded, is 60% to 90%. ★ éclairage semi-direct → *éclairage 24.* R преимущественно прямое освещение. D vorwiegend direkte Beleuchtung. E alumbrado semidirecto. I illuminazione semidiretta. N overwegend directe verlichting. P oświetlenie przeważnie bezpośrednie. S övervägande direkt belysning. (845)
29. **semi-indirect lighting** : lighting by means of luminaires having a distribution of luminous intensity such that the fraction of the emitted luminous flux directly reaching the working plane, assumed to be unbounded, is 10% to 40%. ★ éclairage semi-indirect → *éclairage 25.* R преимущественно отраженное освещение. D vorwiegend indirekte Beleuchtung. E alumbrado semi-indirecto. I illuminazione semi-indiretta. N overwegend indirecte verlichting. P oświetlenie przeważnie pośrednie. S övervägande indirekt belysning. (845)
30. **stand-by lighting** : that part of emergency lighting provided to enable normal activities to continue substantially unchanged. ★ éclairage de remplacement → *éclairage 9.* R резервное освещение. D Ersatzbeleuchtung. E alumbrado de continuidad. I illuminazione sostitutiva. N hulpverlichting. P oświetlenie zapasowe. S reservbelysning. (845)
31. **valance lighting** (*Syn.* pelmet lighting) : lighting system comprising light sources shielded by a panel parallel to the wall at the top of a window. ★ boîte à rideau lumineuse → *boîte 4.* R ..... D Vorhangbeleuchtung. E iluminación en galería. I mantovana luminosa. N ..... P oświetlenie karniszowe. S kornischbelysning. (845)

lightness

1. **lightness** (of a related colour) : the brightness of an area judged relative to the brightness of a similarly illuminated area that appears to be white or highly transmitting. *Note.* — Only related colours exhibit lightness. ★ clarté → *clarté 1.* R светлота площадки (неизолированного цвета). D Helligkeit (einer bezogenen Farbe). E claridad. I chiarore. N lichtheid. P jasność. S ljushet (hos relaterad färg). (845)

lightning

1. **chopped lightning impulse** : → *impulse 1*
2. **direct lightning strike** : → *strike 1*
3. **full lightning impulse** : → *impulse 4*
4. **indirect lightning strike** : → *strike 2*
5. **lightning arrester** : → *arrester 3*
6. **lightning conductor** : → *conductor 45*
7. **lightning impulse** : → *impulse 12*
8. **lightning impulse protective level** : → *level 52*
9. **lightning overvoltage** : → *overvoltage 3*
10. **lightning protection cable** : → *cable 39*
11. **magnetic detector for lightning currents** : → *detector 16*
12. **protection ratio against lightning impulses** : → *ratio 71*
13. **virtual front duration (of a lightning impulse)** : → *duration 45*

lightship

1. **lightship** (*Syn.* light vessel) : → *vessel 2*

light-signal

1. **light-signal transfer characteristic** : → *characteristic 50*

light-valve

1. **light-valve (television) projector** : → *projector 5*

limen

1. **difference limen for loudness** : for an individual listener and a sound of specified frequency, in specified conditions of trials, the minimum change of the frequency that is just noticed as a change of pitch. ★ seuil différentiel pour la sonie → *seuil 28.* R разностный порог для громкости. D Lautheits-Unterschiedsschwelle. E umbral diferencial para la sonoridad. I soglia di sensazione differenziale. N juist waarneembaar luidheidsverschil. P próg różnicowy dla głośności. S skillnadströskel för hörnivå. (801)
2. **difference limen for pitch** ★ seuil différentiel pour la tonie → *seuil 29.* R разностный порог для высоты тона. D Tonhöhen-Unterschiedsschwelle. E umbral diferencial para la tonalidad. I soglia differenziale di altezza. N juist waarneembaar toonhoogteverschil. P próg różnicowy dla wysokości dźwięku. S skillnadströskel för tonhöjd. (801)
3. **relative differential limen of frequency** : for a given listener, the ratio of the minimum perceptible frequency difference of two successively presented sinusoidal tones, to the frequency at which the difference threshold is being measured. ★ seuil différentiel relatif de fréquences → *seuil 30.* R относительный разностный порог частоты. D Unterschiedsschwelle für relative Frequenzänderungen. E umbral diferencial relativo de frecuencia. I soglia differenziale di frequenza. N juist waarneembaar relatief frequentieverschil. P próg różnicowy względny częstotliwości. S relativ frekvensskillnadströskel. (801)

limit

1. **accuracy limit factor** : → *factor 3*
2. **annual limit on intake** (*Syn.* ALI (abbreviation)) : the activity of a particular radionuclide which, if taken into the body during a year, would give rise to committed dose equivalents whose weighted sum equals the annual limit of effective dose equivalent. ★ limite annuelle d'incorporation → *limite 14.* R годовой предел попадания. D Jahres-Inkorporationsgrenzwert; JAZ (Abkürzung). E limite anual de incorporación. I limite annuale di introduzione; ALI (abbreviazione). N jaargrens van de opgenomen dosis. P maksymalne roczne wchłonięcie; ALI. S årsgräns för radioaktivt intag; ALI. (881)
3. **conventional touch voltage limit** : → *voltage 37*
4. **derived limit** : a limit, calculated with the aid of a model, which provides a quantitative link between a particular measurement and the recommended dose equivalent limit or annual limit on intake. ★ limite dérivée → *limite 21.* R производный предел. D abgeleiteter Grenzwert. E limite derivado. I limite derivato. N afgeleide grens. P pochodna wartość dozwolona. S härledd gräns. (881)
5. **dose equivalent limit** : the upper limit of the dose equivalent to the whole or part of the body or of effective dose equivalent, intended to prevent non-stochastic effects of onizing radiation and to limit the occurrence of stochastic effects to an acceptable level. *Notes. 1* — Dose equivalent limits may be set for occupational or non-occupational exposure and different values may be specified for different groups within a population. *2* — In applying dose equivalent limits, absorbed doses received from medical exposures or from normal exposure to natural radiation may be disregarded. ★ limite d'équivalent de dose → *limite 20.* R максимально допустимая. D Äquivalentdosis-Grenzwert. E limite de equivalente de dosis. I limite di equivalente di dose. N grensdosisequivalent; maximaal toegestaan dosisequivalent. P maksymalny równoważnik dawki. S dosekvivalentgräns. (881)
6. **emission limit** (from a disturbing source) : the specified maximum emission level of a source of electromagnetic disturbance. ★ limite d'émission → *limite 19.* R норма на уровень излучения на источнике. D Abstrahlungsgrenze (einer Störquelle). E límite de emisión. I limite di emissione (di una sorgente di disturbo). N maximaal stralingsniveau (van een storingsbron). P poziom emisji (źródła zaburzenia) dopuszczalny. S tillåten emissionsnivå. (161)
7. **immunity limit** : the specified minimum immunity level. ★ limite d'immunité → *limite 23.* R норма невосприимчивости. D Störfestigkeitsgrenzwert. E límite de inmunidad. I limite di immunità. N minimale stralingsongevoeligheid. P odporność graniczna. S gränsvärde för tålighet. (161)
8. **limit of accuracy of chronology** (*Syn.* time resolution) : → *resolution 9*
9. **limit of disturbance** : the maximum permissible electromagnetic disturbance level, as measured in a specified way. ★ limite de perturbation → *limite 16.* R норма на возмущение. D Störschwelle. E límite de perturbación. I limite di disturbo. N maximaal storingsniveau. P poziom zaburzenia dopuszczalny. S tillåten störningsnivå. (161)
10. **limit of interference** : maximum permissible degradation of the performance of a device, equipment or system due to an electromagnetic disturbance. *Notes. 1* — Because of the difficulty of measuring interference in many systems, frequently the term "limit of interference" is used in English instead of "limit of disturbance". *2* — In Russian, the term "norma na pomehu" is used instead of the term "norma na vozmuščenie". ★ limite de brouillage → *limite 15.* R норма на помеху. D Beeinflussungsschwelle. E límite de interferencia. I limite di interferenza. N maximaal verstoringsniveau. P poziom zakłócenia dopuszczalny. S ..... (161)
11. **limit switch** : → *switch 23*
12. **limit switch** : → *switch 24*
13. **lower explosive limit** (*Syn.* LEL (abbreviation)) : the concentration of flammable gas, vapour or mist in air below which an explosive gas atmosphere will not be formed. ★ limite inférieure d'explosivité → *limite 25.* R нижний предел взрываемости; НВП (аббревиатура). D untere Explosionsgrenze; UEG (Abkürzung). E límite inferior de explosividad; LIE (abreviatura). I limite inferiore di esplodibilità; LEL (abbreviazione). N onderste explosiegrens; LEL. P granica wybuchowości dolna. S undre explosionsgräns. (426)
14. **lower range limit** : lowest value of the variable that a measuring device can be adjusted to measure within a specified accuracy. *Note.* — For a multi-range device, the lower range limit is the lowest of the different lower range values. ★ portée limite inférieure → *portée 11.* R нижний предел диапазона. D größter Meßbereichs-Endwert. E límite inferior del margen. I limite inferiore del campo di misura. N minimale meetgrens. P dolna granica zakresu pomiarowego (przyrządu wielozakresowego). S undre mätgräns. (351)
15. **rated accuracy limit primary current** : → *current 153*
16. **rated instrument limit primary current** : → *current 159*
17. **self-extinguishing current limit** : → *current 182*
18. **stability limit of a system state variable** : the critical value of a given system state variable which cannot be exceeded without endangering power system stability. *Note.* — For a power system without a fault this concept is related to the steady-state stability of the system. ★ limite de stabilité pour une variable d'état → *limite 17.* R предел устойчивости. D Stabilitätsgrenze einer Netzvariablen. E límite de estabilidad de una variable de estado. I limite di stabilità di una variabile di stato. N stabiliteitsgrens van een systeemtoestandsvariabele. P granica stabilności zmiennej stanu systemu ekeltroenergetycznego. S stabilitetsgräns för tillståndsvariabel. (603)
19. **temperature rise limit** : the maximum temperature rise allowed in rating tests of a machine having a particular class of insulation. ★ limite d'échauffement → *limite 18.* R предел нагрева. D Grenzübertemperatur. E límite de calentamiento. I temperatura massima. N temperatuurverhogingsgrens. P nagrzanie graniczne. S maximalt tillåten temperaturstegring. (811)
20. **time-current zone limits** : specified limitations for the time-current co-ordinates of the time-current zones for standardized fuses. *Note.* — These limits take into account both manufacturer's tolerances and design deviation between manufacturers. They do not take into account the influence of environmental conditions. ★ limites de la zone temps-courant → *limite 29.* R пределы время-токовой зоны. D Zeit/Strombereichsgrenzen. E limites de la zona tiempo-corriente (intensidad). I limiti della zona tempo-corrente. N grenzen van tijd-stroomgebied. P granice strefy czasowo-prądowej. S tid-strömområdesgränser. (441)
21. **upper explosive limit** (*Syn.* UEL (abbreviation)) : the concentration of flammable gas, vapour or mist in air above which an explosive gas atmosphere will not be formed. ★ limite supérieure d'explosivité → *limite 27.* R верхний предел взрываемости; ВПВ (аббревиатура). D obere Explosionsgrenze (abkürzung); OEG (Abkürzung). E límite superior de explosividad; LSE (abreviatura). I limite superiore di

esplodibilità; UEL (abbreviazione). N bovenste explosiegrens; UEL. P granica wybuchowości górna. S övre explosionsgräns. (426)

22. **upper range limit** : → *range 71*

limited

1. **accessory of limited interchangeability** : → *accessory 3*
2. **distortion limited operation** : → *operation 23*
3. **limited scanning** : → *scanning 4*
4. **quantum limited operation** (*Syn.* quantum-noise-limited operation) : → *operation 55*
5. **region of limited proportionality** : → *region 20*
6. **region of limited proportionality** : → *region 21*
7. **space-charge limited state** : → *state 34*
8. **temperature limited state** (*Syn.* saturation state) : → *state 33*

limiter

1. **base limiter** : a limiter used for base limiting. ★ épiéteur → *épiéteur 1.* R ограничитель по основанию. D Basisbegrenzer. E limitador de base. I limitatore per l'eliminazione della base. N basisbegrenzer. P ogranicznik spadku (sygnału) przyprogowy. S tröskelbegränsare. (702)
2. **gyromagnetic power limiter** : a power limiter whose operation depends upon saturation effects in one gyromagnetic material. ★ limiteur de puissance gyromagnétique → *limiteur 5.* R гиромагнитный ограничитель мощности. D gyromagnetischer Leistungsbegrenzer. E limitador giromagnético de potencia. I limitatore di potenza giromagnetico. N gyromagnetische vermogensbegrenzer. P ogranicznik mocy giromagnetyczny. S gyromagnetisk effektbegränsare. (221,726)
3. **limiter** : a non-linear device used for limiting. *Examples* of limiters : clipper ; slicer ; base limiter. ★ limiteur → *limiteur 3.* R ограничитель. D Begrenzer. E limitador. I limitatore. N begrenzer. P ogranicznik; limiter. S nivåbegränsare. (702)
4. **(modulation) limiter** : apparatus intended for automatic limiting of a sound signal level. ★ limiteur → *limiteur 4.* R ограничитель (модуляции). (723)
5. **shield voltage limiter** : a device connected to a shield or to the shields of specially bonded cables intended to limit shield voltages during system transients. ★ limiteur de surtension d'écran → *limiteur 6.* R ограничитель напряжения на экране кабеля. D Schirmspannungsbegrenzer. E limitador de sobretensio'n de pantalla. I limitatore di tensione dello schermo. N aardingsschermspanningsbegrenzer. P ogranicznik napięcia żły powrotnej (powłoki metalowej); odgromnik. S ..... (461)

limiting

1. **base limiting** : a form of limiting in which all the instantaneous values of a signal falling below a predetermined threshold value are replaced by values close to that of the threshold, other instantaneous values of the signal being preserved. ★ épiétage → *épiétage 1.* R ограничение по основанию. D Basis-Begrenzen. E limitación base. I limitazione per eliminazione della base. N begrenzen van de basis. P ograniczanie spadku sygnału przyprogowe. S tröskelbegränsing. (702)
2. **limiting** : an action whereby all the instantaneous values of a signal exceeding a predetermined threshold value, or outside two predetermined threshold values, are reduced, all other instantaneous values of the signal being preserved. *Note.* — The reduction of instantaneous values may be abrupt or progressive. *Examples* of limiting : clipping ; slicing ; base limiting. ★ limitation → *limitation 2.* R ограничение. D Begrenzen. E limitación. I limitazione. N begrenzing. P ograniczanie. S nivåbegränsning. (702)
3. **limiting breaking capacity** : → *capacity 13*
4. **limiting continuous current of an output circuit** : → *current 117*
5. **limiting continuous thermal withstand value of an energizing quantity** : → *value 17*
6. **limiting current of a capacitor** : → *current 118*
7. **limiting cycling capacity** : → *capacity 14*
8. **limiting dynamic value of an energizing quantity** : → *value 18*
9. **limiting error** : → *error 48*
10. **limiting factor** : → *factor 107*
11. **limiting making capacity** : → *capacity 15*
12. **limiting (of sound signal level)** : process by which the gain of a sound signal amplifier is reduced whenever the input signal exceeds a preset level, so that the output signal does not substantially exceed a specified level. ★ limitation → *limitation 3.* R ограничение (модуляции). (723)
13. **limiting ray** : → *ray 14*
14. **limiting short-time current of an output circuit** : → *current 119*
15. **limiting short-time thermal withstand value of an energizing quantity** : → *value 19*
16. **limiting temperature** : → *temperature 22*
17. **limiting temperature** : → *temperature 23*
18. **limiting value** : → *value 20*
19. **limiting value of the characteristic quantity** : → *value 21*
20. **limiting values for operation** : → *value 22*
21. **limiting values for storage** : → *value 23*
22. **limiting values for transport** : → *value 24*
23. **limiting voltage of a capacitor** : → *voltage 95*
24. **peak limiting** (in quantizing) : the effect whereby any value to be quantized lying outside the working range is replaced by the nearest quantized value. ★ écrêtage → *écrêtage 4.* R пиковое ограничение (при квантовании). D Spitzenwertbegrenzung (beim Quantisieren). E limitación de cresta; limitación de máximo. I limitazione di picco (nella quantizzazione). N begrenzen van de top (bij kwantificering). P ograniczenie szczytowe (kwantyzatora). S klippning. (704)
25. **reference limiting error** : → *error 50*
26. **secondary limiting e.m.f.** : → *e.m.f. 5*
27. **secondary limiting thermal current** : → *current 180*
28. **transductor fault limiting coupling** : → *coupling 41*

line

1. **a.c. line** : a line connected to an alternating current source of supply or connecting two alternating current networks. ★ ligne à courant alternatif → *ligne 50.* R линия электропередачи переменного тока. D Drehstromleitung; Wechselstromleitung. E línea de corriente alterna. I linea a corrente alternata. N wisselstroomlijn. P linia prądu przemiennego. S växelströmsledning. (466)
2. **access line** (*Syn.* connection line) : → *line 14*
3. **active line** : that part of the scanning line that is not within the line blanking interval, or any line which is outside the frame blanking period. ★ ligne utile → *ligne 143.* R активная часть строки. (723)
4. **artificial balancing line** (*Syn.* balancing network) : → *network 7*
5. **auxiliary power supply line** (*Syn.* heating train line) : → *line 44*
6. **beam transmission line** : a transmission line consisting of a sequence of lenses or mirrors that can guide an electromagnetic wave. ★ ligne à faisceaux → *ligne 52.* R лучевая линия передачи. D Übertragungsleitung für gebündelte Strahlen. E línea de transmisión de haz. I linea a fasci. N bundeltransmissielijn. P linia przesyłowa ogniskująca. S ..... (726)
7. **bipolar line** : a direct current line in which the two poles connect the load to the supply. ★ ligne bipolaire → *ligne 67.* R двухполюсная линия. D zweipolige Leitung. E línea bipolar. I linea bipolare. N tweepolige lijn. P linia obubiegunowa. S tvåpolig likströmsledning. (466)
8. **branch line** (*Syn.* spur) : an electric line connected to a main line at a point on its route. *Note.* — A branch line which is a final circuit is called a spur. ★ (ligne en) dérivation → *dérivation 14.* R ответвление от электрической линии. D Abzweigleitung. E línea en derivación; alimentación en derivación. I (linea in) derivazione. N aftakleiding. P odgałęzienie liniowe. S påtickskledning. (601)
9. **bus line** : a train line used for interconnecting collector shoes of like polarity through-out the train. ★ ligne omnibus → *ligne 123.* R силовая поездная магистраль. D durchgehende Leitung. E línea ómnibus. I condotta di collegamento delle prese di corrente. N doorgaande voedingskabel. P łącznik odbiorników prądu. S genomgående matarkabel. (811)

10. **CCD line telecine** : → *telecine 2*
11. **circuit (of an overhead line)** : → *circuit 23*
12. **coaxial line** : a transmission line consisting of two coaxial cylindrical conductors. ★ ligne coaxiale → *ligne 69.* R коаксиальная линия. D Koaxialleitung. E línea coaxial; cable coaxial. I linea coassiale; cavo coassiale. N coaxiale lijn. P linia współosiowa. S koaxialledning. (726)
13. **conductor (of an overhead line)** : → *conductor 21*
14. **connection line** (*Syn.* access line; subscriber's line; subscriber's loop) : a link between equipment in a subscriber's premises and a serving connection exchange, including the terminating equipments. ★ ligne de rattachement → *ligne 98.* D Anschlußleitung; Teilnehmeranschlußleitung. P linia abonencka. (715)
15. **contact line** : a conductor system for supplying electric energy to vehicles through current-collecting equipment. ★ ligne de contact → *ligne 83.* R контактная сеть. D Fahrleitung. E línea de contacto. I linea di contatto. N contactleiding. P sieć trakcyjna. S strömförsörjningnät. (811)
16. **continuous line recorder** : → *recorder 1*
17. **control line** (*Syn.* supervisory circuit) : a telephone circuit for technical conversations between operators at different points along a broadcasting chain from the programme source to the transmitters. ★ ligne de service → *ligne 104.* R линия управления. (723)
18. **control train line** : a train line used for interconnecting master controllers or control circuits. ★ ligne de commande → *ligne 82.* R поездная магистраль управления. D Steuerleitung. E línea de control. I filo treno di comando. N doorgaande stuurstroomdraad; treindraad. P przewód sterowania ukrotnionego. S multipelkabel. (811)
19. **d.c. line** : a line connected to a direct current source of supply. ★ ligne à courant continu → *ligne 51.* R линия электропередачи постоянного тока. D Gleichstromleitung. E línea de corriente continua. I linea a corrente continua. N gelijkstroomlijn. P linia prądu stałego. S likströmsledning. (466)
20. **delay line** : a linear two-port device designed to introduce a desired delay in the transmission of a signal, without modifying the other characteristics of the signal. ★ ligne de retard → *ligne 102.* R линия задержки. D Verzögerungsleitung. E línea de retardo. I linea di ritardo. N vertragingslijn. P tor opóźniający; dwuwrotnik opóźniający. S fördröjningsledning. (151,702)
21. **delay line** : a section of transmission line which by virtue of its electrical length deliberately introduces a specified group delay. ★ ligne de retard → *ligne 103.* R линия задержки. D Verzögerungsleitung. E línea de retardo. I linea di ritardo. N vertragingslijn. P linia opóźniająca. S fördröjningsledning. (726)
22. **digital line link** : → *link 8*
23. **digital line section** : → *section 5*
24. **digital line system** : → *system 42*
25. **direct line filter** (*Syn.* direct through-connection filter) : → *filter 14*
26. **distribution line** : a line which is used for the distribution of electricity. ★ ligne de distribution → *ligne 86.* R распределительная линия. D Verteilungsleitung. E línea de distribución. I linea di distribuzione. N distributielijn. P linia rozdzielcza. S distributionsledning. (466)
27. **dotted line recorder** : → *recorder 5*
28. **double circuit line** : a line comprising two circuits not necessarily at the same voltage and frequency installed on the same support. ★ ligne double → *ligne 112.* R двухцепная линия. D Doppelleitung; Zweisystemleitung. E línea de doble circuito. I linea doppia. N lijn met twee circuits. P linia dwutorowa. S dubbelledning. (466)
29. **double line to ground fault** (*Syn.* two-phase-to-earth fault) : → *fault 82*
30. **(electric) line** : an arrangement of conductors, insulating materials and accessories for transferring electricity between two points of a system. ★ ligne (électrique) → *ligne 114.* R линия (электропередачи). D (elektrische) Leitung. E línea (eléctrica). I linea (elettrica). N (elektrische) verbinding. P linia elektroenergetyczna. S (elektrisk) ledning. (466,601)
31. **electro-dynamic braking dependent on line supply** : → *braking 27*
32. **electro-dynamic braking independent of line supply** : → *braking 28*
33. **equivalent line group** (*Syn.* PBX group) : → *group 48*
34. **exclusive exchange line** (*Syn.* individual line) : a subscriber's line with one subscriber number by means of which only one private telephone installation is connected to a local switching entity. ★ ligne individuelle → *ligne 118.* R индивидуальная абонентская линия. D Einzelanschlußleitung. E línea individual. I linea d'abbonato singolo. N individuele abonneelijn. P łącze indywidualne. S individuell abonnentledning. (722)
35. **exponential transmission line** : a tapered transmission line whose characteristic impedance varies exponentially with distance along the line. ★ ligne exponentielle → *ligne 117.* R экспоненциальная линия передачи. D Exponentialleitung. E línea de transmisión exponencial. I linea esponenziale. N exponentiële transmissielijn. P linia przesyłowa wykładnicza. S exponentialledning. (726)
36. **extension line** : line connecting an extension either to a subscriber's main station or to a private branch exchange. ★ ligne (téléphonique) supplémentaire → *ligne 137.* R линия дополнительного аппарата. D Nebenanschlußleitung. E línea suplementaria; línea extensión. I linea (telefonica) privata. N nevenlijn. P łącze wieloaparatowe. S anknytningsledning. (722)
37. **feed line** (*Syn.* feeder) : 1. A radio frequency transmission line interconnecting an antenna and a transmitter or receiver. 2. For an antenna comprising more than one driven element, a radio frequency transmission line interconnecting the antenna input and a driven element. ★ ligne d'alimentation → *ligne 74.* R фидер; фидерная линия. D Speiseleitung. E línea de alimentación (de antena); alimentador (de antena). I linea d'alimentazione. N voedingslijn. P linia zasilająca. S matarledning. (712)
38. **field line** : a line whose tangent, at every point, is parallel to the field vector at that point. ★ ligne de champ → *ligne 79.* R линия поля. D Feldlinie. E línea de campo. I linea di campo. N veldlijn. P linia pola. S fältlinje. (101)
39. **focal line beam gun** : → *gun 5*
40. **foreign exchange line** (*Syn.* out-of-area subscriber's line) : → *line 118*
41. **free line selection** (*Syn.* PBX hunting) : → *hunting 6*
42. **gas insulated line** : an electric line whose conductors are contained in a enclosure and insulated with a compressed gas. ★ ligne à isolation gazeuse → *ligne 54.* R газоизолированная электрическая линия. D gasisolierte Leitung. E línea con aislamiento de gas. I linea a isolamento gassoso. N met gas geïsoleerde leiding. P linia elektroenergetyczna o izolacji gazowej. S gasisolerad ledning. (601)
43. **Goubau line** : a uniform single-wire line of circular transverse cross-section in which the surface treatment consists of a coating of dielectric material. ★ ligne de Goubau → *ligne 91.* R линия Губо. D Goubauleiter. E línea Goubau. I linea di Goubau. N Goubau-lijn. P falowód Goubau; linia Goubau. S Goubau-ledning. (726)
44. **heating train line** (*Syn.* train power supply line; auxiliary power supply line) : an electric cable running throughout a train and supplying the heating or other services on each coach. ★ conduite de chauffage → *conduite 5.* R магистраль энергоснабжения поезда; магистраль энергоснабжения вспомогательных цепей. D Zugsammelschiene; Zugheizleitung. E conducto de calefacción. I condotta ad alta tensione. N hoogspanningsverwarmingskabel. P przewód (elektryczny) zbiorczy ogrzewania. S tågvärmeledning. (811)
45. **high reliability power line** (according to CCITT) : an transmission or distribution line, adjacent to a telecommunication line which is designed in accordance with specified parameters, so that the interference caused by fault currents is kept within acceptable limits of duration and frequency. ★ ligne à grande sécurité de service → *ligne 53.* R безопасная линия. D ..... E línea de gran seguridad de servicio (según CCITT). I linea a sicurezza di servizio aumentata (secondo CCITT). N hoogspanningsleiding met hoge betrouwbaarheid. P linia energetyczna niezakłócająca (wg CCITT); linia energetyczna bezzakłóceniowa (wg CCITT). S ..... (604)
46. **individual line** (*Syn.* exclusive exchange line) : → *line 34*

47. **interswitchboard line** (*Syn.* tie line) : → *line 164*
48. **iso-illuminance line** (*Syn.* iso-illuminance curve) : → *curve 19*
49. **iso-intensity line** (*Syn.* iso-intensity curve) : → *curve 20*
50. **isolux line** (*Syn.* iso-illuminance curve) : → *curve 19*
51. **line** (*Syn.* trace) : → *trace 1*
52. **line...** : circuit-breaker or contactor used to disconnect the traction motors circuit from the line, especially in the event of overload. ★ ...de ligne → *ligne 22.* R главный выключатель (контактор). D Überstromschalter. E ... de línea. I .... di linea. N lijnschakelaar. P liniowy (stycznik lub wyłącznik). S motorskyddsbrytare. (811)
53. **line angle** : → *angle 35*
54. **line circuit** : → *circuit 107*
55. **line code** : → *code 36*
56. **line commutation** : → *commutation 19*
57. **line concentrator** : → *concentrator 5*
58. **line concentrator** : → *concentrator 6*
59. **line connection** (*Syn.* supply service) : → *service 47*
60. **line digit rate** : → *rate 49*
61. **line encoding** : → *encoding 3*
62. **line extender** (*Syn.* spur amplifier) : → *amplifier 28*
63. **line fault** : → *fault 53*
64. **line feed** : → *feed 15*
65. **line feeder** : → *feeder 15*
66. **line focus tube** : → *tube 48*
67. **line frequency** : → *frequency 122*
68. **line group** : → *group 44*
69. **line identification by the network** : → *identification 7*
70. **line impedance stabilization network** (*Syn.* artificial mains network) : → *network 4*
71. **line integral** : → *integral 5*
72. **line lengthener** : → *lengthener 1*
73. **line link** : → *link 17*
74. **line load control** : → *control 119*
75. **line lockout** : → *lockout 2*
76. **line microphone** : → *microphone 17*
77. **line monitor** (*Syn.* picture monitor) : → *monitor 10*
78. **line of maintenance** (*Syn.* maintenance echelon) : → *echelon 1*
79. **line of shafting** : a group of rotors coupled on the same axis. ★ ligne d'arbres → *ligne 76.* R валопровод. D Einwellenanordnung. E línea de ejes. I linea d'albero. N groep rotoren op één as. P linia wałowa. S rotorstrång. (602)
80. **line of sight propagation** : propagation between two points for which the direct ray path is sufficiently clear from obstacles for diffraction to have negligible effect. ★ propagation en visibilité → *propagation 27.* D Ausbreitung bei Sichtverbindung. P propagacja przy bezpośredniej widoczności. (705)
81. **line offset** : → *offset 6*
82. **line pairing** : → *pairing 1*
83. **line period** : → *period 17*
84. **line scan** : → *scan 2*
85. **line sequential colour television system** : → *system 102*
86. **line series capacitor** : → *capacitor 46*
87. **line signal** : → *signal 115*
88. **line signalling** : → *signalling 23*
89. **line spectrum** : → *spectrum 17*
90. **line spectrum** : → *spectrum 18*
91. **line spectrum** : → *spectrum 19*
92. **line stretcher** : → *stretcher 1*
93. **line sync pulse** (*Syn.* line synchronizing signal) : → *signal 116*
94. **line synchronizing signal** : → *signal 116*
95. **line tearing** (*Syn.* tearing) : → *tearing 2*
96. **line terminal** : → *terminal 16*
97. **line to ground voltage** (*Syn.* phase to earth voltage) : → *voltage 140*
98. **line to line voltage** (*Syn.* phase to phase voltage) : → *voltage 142*
99. **line to neutral voltage** (*Syn.* phase to neutral voltage) : → *voltage 141*
100. **line visibility** : → *visibility 1*
101. **line voltage drop** : → *voltage drop 1*
102. **load line** : the locus of the working points of a permanent magnetic material forming part of a given magnetic circuit when the magnitude of the magnetization is varied. ★ ligne de charge → *ligne 80.* R линия нагрузки. D Belastungs-Kennlinie. E línea de carga. I linea di carico. N werklijn. P linia obciążenia. S belastningslinje. (221)
103. **load line** (of an electronic tube) : locus of the operating points giving currents and voltages for a given load impedance drawn on the plane of the characteristics of the active element. ★ ligne de charge → *ligne 81.* R характеристика нагрузки. D Arbeitskennlinie der Ausgangselektrode. E línea de carga. I linea di carico. N belastingslijn. P charakterystyka obciążenia. S belastningslinje. (531)
104. **local line** : the part of the subscriber's line between the subscriber's installation and the first multiplexer or concentrator or between the subscriber's installation and the switching centre if a concentrator or multiplexer is not used. ★ ligne terminale de raccordement → *ligne 139.* R местная абонентская линия. D Ortsanschlußleitung. E línea local. I linea d'utente. N ader in lokale kabel. P linia lokalna. S lokalledning. (721)
105. **local line network** : → *network 39*
106. **(local line) network with link circuit** : → *network 40*
107. **long line adapter** : → *adapter 1*
108. **long line (telephone) set** : → *set 31*
109. **main line** : a telephone line consisting of a subscriber's line or a line connecting a local switching entity with a public pay-phone or with a telephone station used by the public telephone network operating body. *Note.* — The number of main lines is often used for statistical purposes. ★ ligne (téléphonique) principale → *ligne 136.* R главная линия. D Hauptanschlußleitung. E línea principal. I linea per telefono pubblico. N hoofdaansluitingslijn. P łącze główne. S huvudledning. (722)
110. **measuring line** (*Syn.* measuring line section) : a section of uniform transmission line along which a coupling probe can be traversed for measuring purposes. ★ ligne de mesure → *ligne 92.* R измерительная линия; измерительная секция. D Messleitung. E línea de medición. I linea di misura. N meetlijn. P linia pomiarowa. S mätledning. (726)
111. **measuring line section** (*Syn.* measuring line) : → *line 110*
112. **monopolar line** : a direct current line in which only one pole connects the load to the supply, the return path being through earth. ★ ligne monopolaire → *ligne 120.* R однополюсная линия. D einpolige Leitung. E línea monopolar. I linea unipolare. N eenpolige lijn. P linia jednobiegunowa. S enpolig likströmsledning. (466)
113. **multiple circuit line** : a line comprising several circuits not necessarily at the same voltage and frequency installed on the same support. ★ ligne multiple → *ligne 121.* R многоцепная линия. D Mehrfachleitung; Mehrsystemleitung. E línea de múltiple circuito. I linea multipla. N lijn met meer dan twee circuits. P linia wielotorowa. S multippelledning. (466)
114. **music line** (*Syn.* programme line) : → *line 127*
115. **natural load of a line** : → *load 65*
116. **neutral line** : the locus of the points on the surface of a magnet where the normal component of the magnetic flux density is zero. *Note.* — The neutral line divides the surface into regions of opposite polarity. ★ ligne neutre → *ligne 122.* R нейтральная линия. D Neutrallinie. E línea neutra. I linea neutra. N neutrale lijn. P linia neutralna magnesu. S neutrallinje. (221)
117. **operating line** (*Syn.* operating curve) : the locus of all simultaneous values of total instantaneous electrode voltage and current for given external circuit conditions. ★ ligne de fonctionnement → *ligne 88.* R рабочая характеристика. D Arbeitskennlinie. E línea de funcionamiento; curva de funcionamiento. I curva di funzionamento. N werklijn. P charakterystyka robocza. S arbetslinje; arbetskurva. (531)
118. **out-of-area subscriber's line** (*Syn.* foreign exchange line) : a subscriber's line connecting a local switching entity with a subscriber outside the switching entity area served by this entity. ★ ligne de rattachement exceptionnel → *ligne 99.* R абонентская линия вне зоны.

D Ausnahme-Anschlußleitung. E línea de fuera de zona. I linea d'abbonato fuori area. N buitennetaansluiting. P łącze spoza obszaru centrali. S perifer abonnentledning. (722)

119. overhead contact line : a contact line placed above (or beside) the upper limit of the vehicle gauge and supplying vehicles with electric energy through roof-mounted current collection equipment. ★ ligne aérienne de contact → *ligne 63.* R воздушная контактная сеть. D Oberleitung. E línea aérea de contacto. I linea di contatto aerea. N bovengrondse contactleiding. P sieć jezdna górna. S kontaktledning. (811)

120. overhead contact line with catenary suspension (*Syn.* overhead contact line with longitudinal suspension) : an overhead contact line where the contact wire or wires are suspended from one or more longitudinal catenaries. ★ ligne (aérienne de contact) à suspension caténaire → *ligne 64.* R воздушная контактная сеть с цепной подвеской; воздушная контактная сеть с продольной подвеской. D Kettenoberleitung. E línea con suspensión catenaria. I linea (di contatto) a catenaria o longitudinale; catenaria. N contactleiding, bestaande uit draagkabel(s) en rijdraad (rijdraden); kettinglijn. P sieć łańcuchowa; sieć podwieszona. S bärlineupphängd kontaktledning. (811)

121. overhead contact line with longitudinal suspension (*Syn.* overhead contact line with catenary suspension) : → *line 120*

122. overhead line : an electric line whose conductors are supported above ground, generally by means of insulators and appropriate supports. *Note.* — Certain overhead lines may also be constructed with insulated conductors. ★ ligne aérienne → *ligne 62.* R воздушная линия электропередачи. D Freileitung. E línea aérea. I linea aerea. N bovengrondse lijn. P linia napowietrzna. S luftledning. (466,601)

123. party line : a subscriber's line providing non-simultaneous service to two or more subscriber stations, each station having a unique subscriber number. ★ ligne partagée → *ligne 124.* R абонентская линия коллективного пользования. D Mehrfachanschlußleitung. E línea compartida. I linea d'abbonato multiplo. N gedeelde abonneelijn. P łącze wspólne. S flerpartsledning. (722)

124. phase (of an a.c. line) : → *phase 66*

125. power line carrier pilot protection system : → *system 152*

126. preferential (PBX) access line : a line in a PBX group which also can be accessed by a separate subscriber number. ★ ligne préférentielle → *ligne 126.* R линия предпочтительного доступа. D Vorzugsleitung. E línea preferencial PBX. I linea preferenziale (per un centralino). N ..... P łącze wydzielone. S direktledning. (722)

127. programme line (*Syn.* music line; music pair; sound pair) : sound channel using a transmission line. *Note.* — The terms "music pair", "sound pair" are used for the special case where twin transmission line, generally screened and located in the interior of a telephone cable, is used to facilitate good quality transmission of audio frequency signals. ★ ligne radiophonique → *ligne 130.* R линия подачи программы; звуковая пара. (723)

128. radial transmission line : a pair of parallel conducting planes used for propagating a cylindrical wave with respect to an axis normal to the planes. ★ ligne radiale → *ligne 129.* R радиальная линия передачи. D radiale Übertragungsleitung; Radialleitung. E línea radial. I linea radiale. N radiale transmissielijn. P falowód radialny. S radialledning. (726)

129. recoil line (*Syn.* recoil curve; recoil loop) : the hysteresis loop or part of that loop which is traversed by a permanent magnet in the recoil state. *Note.* — In practice the recoil line is generally indistinguishable from a straight line. ★ ligne de recul → *ligne 100.* R линия возврата; кривая возврата; петля возврата. D Linie; Kurve der rückläufigen Schleife; rückläufige Schleife. E línea de retroceso; curva de retroceso; ciclo de retroceso. I linea di ritorno; curva di ritorno; ciclo di ritorno. N terugllooplijn; terugloopkromme; terugllooplus. P linia powrotu. S återgångskurva. (221)

130. redundant line code : → *code 47*

131. regulated line section : → *section 19*

132. resonance line : spectral line that is the result of direct transition from an excited energy level to the ground level, or vice versa, without going through intermediate levels (e.g. λ = 253.7 nm for mercury and λ = 589.0 nm and 589.6 nm for sodium). ★ raie de résonance → *raie 2.* R резонансная линия. D Resonanzlinie. E linea de resonancia. I riga di risonanza. N resonantielijn. P linia rezonansowa. S resonanslinje. (845)

133. rod line : a transmission line consisting of a conductor of circular transverse cross-section along a parallel extended conducting surface or between two such surfaces. ★ ligne à tige (ronde) → *ligne 60.* R прутковая линия. D runde Stableitung. E línea de varilla (circular). I linea a barra. N cirkelvormige staaflijn. P linia kołowo-paskowa. S ..... (726)

134. scalar line integral : → *integral 6*

135. scanning line : in facsimile the area explored by the scanning spot in one sweep from one side to the other of the scanning field. ★ ligne d'exploration → *ligne 109.* R строка развертки. D Abtastzeile. E línea de exploración. I linea di scansionamento. N aftastlijn. P linia rozwinięcia. S avsökningslinje. (721)

136. (scanning) line : a single line of the picture traversed during scanning (in television). ★ ligne (de balayage) → *ligne 77.* R строка (развертки). (723)

137. scanning line frequency : → *frequency 178*

138. scanning line period : → *period 29*

139. section (of an overhead line) : → *section 22*

140. semi-rigid coaxial line : a coaxial line constructed so as to permit very limited bending or twisting without appreciable change of its electrical properties. ★ coaxial semi-rigide → *coaxial 3.* R полужесткая коаксиальная линия. D halbstarre Koaxialleitung. E línea coaxial semirígida. I linea coassiale semirigida. N licht buigbare coaxiale lijn. P linia współosiowa półsztywna. S halvstel koaxialledning. (726)

141. shared-service line (*Syn.* two-party line) : a party line serving only two subscribers. ★ ligne partagée entre deux abonnés → *ligne 125.* R спаренная абонентская линия. D Zweieranschlußleitung. E línea compartida entre dos abonados. I linea d'abbonato duplex. N ..... P łącze wspólne dwuabonenckie. S tvåpartsledning. (722)

142. simultaneous line sequential colour television system : → *system 188*

143. single circuit line : → *circuit 164*

144. single line to ground fault (*Syn.* phase-to-earth fault) : → *fault 67*

145. single-wire line : a surface-wave waveguide consisting of a single conductor with a surface reactance formed by either a dielectric coating, an artificial dielectric or by the skin effect. ★ guide unifilaire → *guide 36.* R однопроводная линия (не рекомендуется). D (Ein)drahtwellenleiter. E línea unifilar. I guida unifilare. N enkeldraadstransmissielijn. P linia jednoprzewodowa. S vågtråd. (726)

146. slab line : a transmission line consisting of a conductor of rectangular transverse cross-section along a parallel extended conducting surface or between two such surfaces. ★ ligne à tige (rectangulaire) → *ligne 59.* R плоскостная линия. D rechteckige Stableitung. E línea de varilla (rectangular). I linea a lastra. N rechthoekige staaflijn. P linia prostokątno-paskowa. S ..... (726)

147. slotted line (*Syn.* slotted measuring section) : a section of uniform transmission line in the wall of which there is a longitudinal slot through which a coupling probe may be inserted for measuring purposes. ★ ligne (de mesure) à fente → *ligne 93.* R щелевая линия; щелевая измерительная секция. D geschlitzte Messleitung. E línea ranurada. I linea di misura a fessura. N sleuflijn; gesleufde meetlijn. P linia pomiarowa ze szczeliną. S slitsad mätledning. (726)

148. slotted line carriage : → *carriage 2*

149. spectral line : 1. Each discrete component of a line spectrum. 2. A narrow band of frequencies or wavelengths characterized by a single value, occupied by a monochromatic electromagnetic radiation, emitted or absorbed during a transition between two energy levels in a quantum system. ★ raie spectrale → *raie 3.* R спектральная линия. D Spektrallinie. E raya espectral; línea espectral. I riga spettrale. N spectraallijn. P prążek widmowy. S spektrallinje. (702,731,845)

150. splitting of the incoming line : → *splitting 3*

151. splitting of the outgoing line : → *splitting 4*

152. strip line : a transmission line consisting of a conducting strip between two parallel extended conducting surfaces. ★ ligne à ruban → *ligne 58.* R полосковая линия. D Streifenleitung; Bandleitung. E línea de cinta triplaca. I linea a striscia. N striplijn. P linia paskowa. S planledning. (726)

153. **structure (of an overhead line)** (*Syn.* support) : → *support 24*
154. **subscriber's line** (*Syn.* subscriber loop) : a link between equipment in a subscriber's premises and the telecommunication centre providing the required services. ★ ligne d'abonné → *ligne 70.* R абонентская линия. D Teilnehmeranschlußleitung. E línea de abonado; bucle de abonado. I linea d'abbonato;raccordo d'abbonato. N abonneelijn. P sieć telekomunikacyjna. S abonnentledning. (701,721)
155. **subscriber's line** (*Syn.* connection line) : → *line 14*
156. **(subscriber's line) flexible network** : → *network 91*
157. **(subscriber's line) rigid network** : → *network 92*
158. **subscriber's service line** (*Syn.* subscriber's lead-in) : → *lead-in 3*
159. **subscriber's (telephone) line** (*Syn.* subscriber loop (in telephony)) : a link between a public switching centre and a telephone station or a private telephone installation or another terminal using signals compatible with the telephone network. *Note.* — In French, the term "ligne de réseau" is used only when the private telephone installation is a private branch exchange or an internal telephone system. ★ ligne (téléphonique) d'abonné → *ligne 135.* R абонентская (телефонная) линия. D Teilnehmeranschlußleitung. E línea (telefónica) de abonado. I linea d'abbonato. N abonneelijn. P łącze abonenckie; linia abonencka. S abonnentledning. (722)
160. **surge impedance of a line** : → *impedance 60*
161. **tapped line** (*Syn.* teed line) : a main line to which branch lines are connected. ★ ..... → . R магистральная линия. D Hauptleintung. E línea con derivaciones. I linea principale. N stamleiding; hoofdleiding. P linia główna. S förgrenad ledning. (601)
162. **teed line** (*Syn.* tapped line) : → *line 161*
163. **(telephone) line density** : → *density 36*
164. **tie line** (*Syn.* interswitchboard line; tie trunk) : a telephone circuit permanently connecting two private telephone installations. ★ ligne d'intérêt privé → *ligne 110.* R соединительная линия ведомственного пользования. D Querverbindungsleitung; Festverbindung. E línea directa de unión. I linea telefonica dedicata. N koppellijn. P łącze trwałe. S privatledning. (722)
165. **total scanning line length** : → *length 33*
166. **train line** : a conductor extending the whole length of each coach of a train with couplers to maintain electrical continuity throughout the train. ★ ligne de train → *ligne 105.* R поездная магистраль. D Zugsteuerleitung. E línea de tren. I filo treno. N treindraad. P przewód wzdłużny pociągu. S genomgående kabel. (811)
167. **train power supply line** (*Syn.* heating train line) : → *line 44*
168. **transmission line** : a line which is part of an electric power transmission system. ★ ligne de transport → *ligne 107.* R магистральная линия электропередачи. D Übertragungsleitung. E línea de transporte. I linea di trasporto. N transportlijn. P linia przesyłowa. S kraftledning. (466)
169. **transmission line** : a means for conveying electromagnetic energy between two points with a minimum of radiation. ★ ligne de transmission → *ligne 106.* R линия передачи. D Übertragungsleitung. E línea de transmisión. I linea di trasmissione. N transmissielijn. P linia przesyłowa; tor elektryczny. S transmissionsledning. (704,726)
170. **(transmission line) adapter** : → *adapter 2*
171. **two-party line** (*Syn.* shared-service line) : → *line 141*
172. **uniform transmission line** : a transmission line in which the physical and electrical characteristics do not change with distance along the transmission line. ★ ligne uniforme → *ligne 142.* R однородная линия передачи. D homogene Übertragungsleitung. E línea de transmisión uniforme. I linea uniforme. N uniforme transmissielijn. P linia przesyłowa jednorodna. S homogen ledning. (726)
173. **usable scanning line length** : → *length 34*

linear

1. **air gap (of a linear traction motor)** : → *air-gap 3*
2. **armature (of a linear traction motor)** : → *armature 3*
3. **field system (of a linear traction motor)** : → *system 71*
4. **linear** : pertaining to an operating characteristic, a device, an electrical network or a transmission medium satisfying the superposition principle according to which, within a specified working range : — at a specified output port, the signal resulting from an arbitrary input signal applied to a given port is such that, when the input signal is increased by a numerical factor, the output signal is also increased by the same factor. — at a specified output port, the total signal resulting from the simultaneous application of a number of arbitrary input signals, either individually to given independent ports or collectively into one given port, is the sum of individual outputs which would be produced by the application to the same input ports of the same input signals, each acting separately. *Note.* — A device with several ports may be linear only for a certain set of ports. ★ linéaire → *linéaire 24.* R линейный. D linear. E lineal. I lineare. N lineair. P linearny (układ elektryczny). S linjär. (702)
5. **linear accelerator** : → *accelerator 5*
6. **linear array** : → *array 12*
7. **linear attenuation coefficient** : → *coefficient 30*
8. **linear (circuit) element** : → *element 26*
9. **linear collision stopping power** : → *power 77*
10. **linear control electromechanism** : → *control 120*
11. **linear conversion** : → *conversion 23*
12. **linear demodulation** : → *demodulation 6*
13. **linear detector** : → *detector 14*
14. **linear direct current amplifier** : → *amplifier 14*
15. **linear distortion** : → *distortion 51*
16. **linear (electric) charge density** : → *charge-density 2*
17. **linear energy transfer** : → *transfer 14*
18. **linear exponent of sound propagation** : → *exponent 2*
19. **linear grid** : → *grid 22*
20. **linear induction motor** : → *induction motor 4*
21. **linear ion density** : → *density 14*
22. **linear modulation** : → *modulation 26*
23. **(linear) momentum** : → *momentum 2*
24. **linear polarization** : → *polarization 20*
25. **linear polarization** : → *polarization 21*
26. **linear pulse amplifier** : → *amplifier 15*
27. **linear radiative stopping power** : → *power 78*
28. **linear ratemeter** : → *ratemeter 4*
29. **linear reluctance motor** : → *motor 40*
30. **linear synchronous motor** : → *motor 41*
31. **linear system** : → *system 103*
32. **linear (traction) motor** : → *motor 42*
33. **linear 2-terminal circuit element** : → *circuit element 5*
34. **polyphase linear quantity** : → *quantity 22*
35. **restricted linear collision stopping power** (*Syn.* linear energy transfer) : → *transfer 14*
36. **(set of) components of a polyphase (or *m*-phase) linear quantity** : → *component 50*
37. **slip (of a linear traction asynchronous motor)** : → *slip 7*
38. **spectral linear absorption coefficient** : → *coefficient 62*
39. **spectral linear attenuation coefficient** : → *coefficient 63*
40. **spectral linear scattering coefficient** : → *coefficient 64*
41. **synchronous speed (of a linear traction motor)** : → *speed 54*
42. **thrust (of a linear traction motor)** : → *thrust 3*
43. **total linear stopping power** : → *power 190*
44. **total linear stopping power** : → *power 191*

linear-beam

1. **linear-beam tube** : → *tube 49*

linearity

1. **linearity** (of a measuring instrument) : the ability of a measuring instrument to provide an indication or output quantity having a linear relationship to a defined quantity other than an influence quantity. *Note.* — The method of expression of lack of linearity is different for different kinds of instrument and is established in each particular case. ★ linéarité → *linéarité 1.* R линейность (средства измерений). D Linearität (für ein Messgerät). E linealidad (de un aparato de medida). I linearità (di uno strumento di misura). N lineariteit. P liniarność (narzędzia pomiarowego). S linearitet. (301)

linearly

1. **linearly polarised mode** : → *mode 35*
2. **linearly polarized** : → *polarized 7*

line-busy

1. **line-busy tone** (*Syn.* busy tone) : → *tone 1*

line-post

1. **line-post insulator** : → *insulator 19*

liner

1. **bearing liner** : the assembly of a bearing shell together with its lining. ★ coussinet de palier → *coussinet 4.* R вкладыш подшипника. D Lagerkörper. E conjunto de cojinete. I cuscinetto. N lagermetaal. P panew. S lagerskål. (411)
2. **slot liner** : separate insulation between an embedded coil side and the slot which can provide mechanical and electrical protection. ★ caniveau d'encoche → *caniveau 3.* R ..... D Nutauskleidung. E aislamiento de ranura. I cartoccio. N gleufvoering; groefvoering. P izolacja żłobkowa. S spårinlägg. (411)

line-spread

1. **line-spread function** : → *function 22*

line-synchronising

1. **back porch (of line-synchronising signal)** : → *porch 1*
2. **front porch (of line-synchronising signal)** : → *porch 2*

line-time

1. **line-time luminance distortion** : → *distortion 52*

line-to-line

1. **line-to-line fault** (*Syn.* phase-to-phase fault (clear of earth)) : → *fault 68*

line-up

1. **line-up tape** : → *tape 7*

linewidth

1. **spectral linewidth** : a measure of the wavelength extent of a spectral line. ★ largeur de raie → *largeur 18.* R ширина спектральной линии. D spektrale Linienbreite. E ancho de línea espectral. I larghezza di riga (spettrale). N spectrale lijnbreedte. P szerokość prążka widma. S linjebredd. (731)

lining

1. **arc furnace lining** : the thermal insulation refractories which line the furnace shell; a combination of refractories and devices suitable for the thermal duty. ★ garnissage de four à arc → *garnissage 1.* R футеровка дуговой печи. D Lichtbogenofen-Zustellung; lichtbogenofen-zustellung. E revestimiento de horno de arco. I rivestimento forno ad arco. N boogovenbekleding. P wykładzina (pieca łukowego). S ugnsinfodring. (841)
2. **bearing lining** : that element of the journal bearing assembly in which the journal rotates. ★ garniture de coussinet → *garniture 2.* R заливка вкладыша подшипника. D Lagergleitfläche. E casquillo de cojinete. I rivestimento antifrizione. N lagervoering. P warstwa stopu łożyskowego w panwi. S glidyta. (411)
3. **induction furnace cast lining** : a lining constructed of moist or wetted granulated refractory material of specific quality and analysis and poured around a former of dimensions adapted to those of the charge. ★ revêtement coulé d'un four à induction → *revêtement 2.* R литая футеровка индукционной печи. D gegossene oder geschlämmte Zustellung eines Induktionsofens. E revestimiento colado de un horno de inducción. I rivestimento per colata di un forno ad induzione. N gegoten bekleding. P wykładzina lana pieca indukcyjnego. S gjuten infodring. (841)
4. **induction furnace rammed lining** : a lining constructed of a granulated refractory material of specific quality and analysis and rammed around a former of dimensions adapted to those of the charge. ★ revêtement damé d'un four à induction → *revêtement 3.* R набивная футеровка индукционной печи. D gestampfte Zustellung eines Induktionsofens. E revestimiento apisonado de un horno de inducción. I rivestimento per pigiata di un forno ad induzione. N gestampte bekleding. P wykładznia ubijana pieca indukcyjnego. S stampad infodring. (841)
5. **induction furnace susceptor lining** : a type of lining of specific shape to satisfy the dimensions of the inductor coil and charge capacity employing electric conducting materials, for example graphite. Heat is induced into the susceptor which conducts it to the charge materials. ★ suscepteur d'un four à induction → *suscepteur 1.* R проводящая футеровка индукционной печи. D leitfähige Zustellung eines Induktionsofens. E revestimiento susceptivo de un horno de inducción; crisol conductor. I crogiolo conduttore (o suscettore) di un forno ad induzione. N inductieoven met geleidende bekleding. P wykładzina podatna pieca indukcyjnego. S ..... (841)
6. **sensitive lining** (of a neutron detector) : sensitive material applied as a lining. ★ dépôt sensible → *dépôt 6.* R чувствительное покрытие (детектора нейтронов). D strahlungsempfindlicher Belag (eines Neutronendetektors). E depósito sensible (de un detector de neutrones). I deposito sensibile (di un rivelatore di neutroni). N gevoelige bekleding (v.e. neutronendetector). P wykładzina uczulająca (detektora neutronów). S (neutron)känslig beläggning. (391)

link

1. **asynchronous link** : an interconnection between two a.c. systems operating at independant frequencies. ★ liaison asynchrone → *liaison 9.* R асинхронная связь. D asynchrone Verbindung. E conexión asíncrona. I collegamento asincrono. N asynchrone verbinding. P połączenie asynchroniczne. S asynkronlänk. (601)
2. **basic transmission loss (of a radio link)** : → *loss 7*
3. **bipolar d.c. link** : a link having two poles normally operating at d.c. voltages of opposite polarity in relation to earth. ★ liaison à tension continue bipolaire → *liaison 7.* R биполярная линия постоянного тока. D zweipolige HGÜ-Verbindung. E enlace de corriente continua bipolar. I collegamento a corrente continua bipolare. N dubbelpolige verbinding met gelijkspanning. P połączenie prądu stałego dwubiegunowe. S bipolärt system. (601)
4. **coil switching link** : a device to allow tappings of the inductor coil to be preselected to allow optimum design performance of the coil. ★ commutateur de prise d'une bobine à induction → *commutateur 18.* R коммутационное соединение индуктора. D Spulenanzapfschalter. E conmutador de toma de una bobina de inducción. I commutatore di presa di una bobina ad induzione. N aanpassingsschakelaar. P przełącznik cewki wzbudnika. S ..... (841)
5. **contribution link** (*Syn.* contribution circuit) : circuit designed to convey signals from programme sources to a continuity control room or a presentation control area, where they may be processed and assembled in order to make up the final programme. ★ liaison de contribution → *liaison 12.* R собирательная линия. (723)
6. **data link** (in common channel signalling) : a combination of two data channels operating at the same data rate but in opposite directions. ★ liaison de données → *liaison 14.* R звено передачи данных (в сигнализации по общему каналу). D (Zeichengabe-) Daten-Abschnitt. E enlace de datos (en señalización por canal común). I circuito dati (nella segnalazione a canale comune). N dataverbinding. P łącze danych. S datalänk. (714)
7. **data link** : the telecommunication facility joining two data stations and ensuring a data communication. ★ liaison de données → *liaison 15.* R звено данных. D Datenübermittlungsabschnitt. E conexión de datos. I circuito per dati. N dataverbinding. P łącze teledacyjne. S datalänk. (721)
8. **digital line link** : a digital link comprising a digital line section or a number of tandem-connected digital line sections. ★ liaison de ligne numérique → *liaison 16.* R цифровой линейный тракт. D digitale Leitungsverbindung. E conexión de línea numérica. I collegamento di linea numerica. N digitale lijnschakel. P droga liniowa cyfrowa. S digital linjelänk. (704)
9. **digital link** : a digital section or a number of tandem-connected digital sections operating at the same digit rate between two digital distribution frames, or equivalent points, at which switches or terminal equipments are connected. *Notes. 1* — Terminal equipments are those at which signals at the specified digit rate originate or terminate. *2* — A digital link may be qualified to indicate its digit rate or multiplex order. ★ liaison numérique → *liaison 24.* R цифровой тракт. D Digitalverbindung; Digitalweg (in diesem Sinne abgelehnt). E conexión numérica; conducto numérico. I collegamento

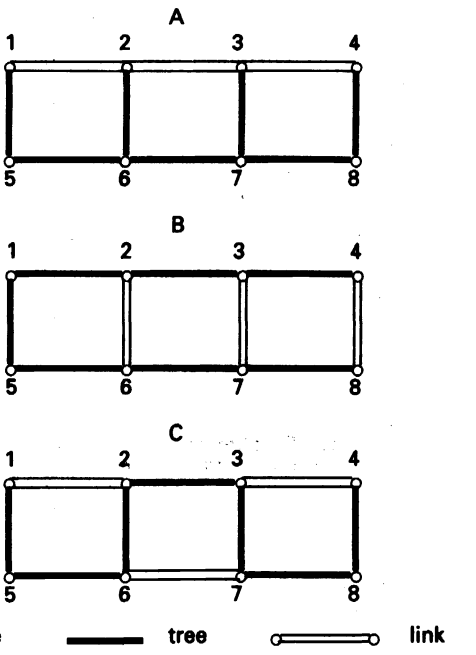
numerico. N digitale schakel. P droga cyfrowa. S digital länk. (704)

10. digital radio link : a digital link comprising a digital radio section or a number of tandem-connected digital radio sections. ★ liaison radioélectrique numérique → *liaison 30.* R цифровой радиотракт. D digitale Funkverbindung. E conexión radioeléctrica numérica. I collegamento radio numerico; parte radio numerico. N digitale radioschakel. P droga radiowa cyfrowa. S digital radiolänk. (704)

11. distribution link (*Syn.* distribution circuit) : link designed to convey programme signals from a programme production centre to a transmitter or the head end of cabled distribution system. ★ liaison de distribution → *liaison 13.* R распределительная линия. (723)

12. FDM link : the basic entity of frequency division multiplex transmission, for transmitted source signals occupying a specified frequency band, comprising the whole of the means of transmission, over a given transmission medium, between two consecutive separation points at this frequency band. *Notes. 1* — An FDM link provides transmission in both directions unless otherwise specified. *2* — An FDM link never includes a direct through-connection filter. *3* — In such cases as optical fibre transmission, radio-relay transmission, etc, the appropriate terminal equipment is included within the FDM link. ★ liaison en ligne → *liaison 19.* R тракт с ЧРК; линейный тракт (нежелателен в данном случае). D FM-Verbindung. E conexión en línea. I collegamento FDM. N FDM-verbinding. P odcinek traktu. S frekvensmultiplexlänk. (704)

13. group link : a group section or a number of tandem connected group sections between two group distribution frames, or equivalent points, where the group originates or terminates. *Notes. 1* — A group link provides transmission in both directions unless otherwise specified. *2* — Similar definitions can be given for : "supergroup link", "mastergroup link", "supermastergroup link" and "15-supergroup assembly link" or "hypergroup link". ★ liaison en groupe primaire → *liaison 18.* R первичный групповой тракт. D Primärgruppen-Verbindung. E conexión en grupo primario. I collegamento di gruppo primario. N groepschakel. P przęsło pierwotnogrupowe. S grupplänk. (704)



14. high-voltage d.c. link (*Syn.* HVDC link) : an installation for transmitting large quantities of electricity at high-voltage d.c., including the converter substations. ★ liaison à haute tension continue → *liaison 6.* R электропередача постоянного тока. D HGÜ-Verbindung. E enlace de alta tensión continua. I collegamento a corrente continua ad alta tensione. N verbinding met hoge gelijkspanning. P połączenie prądu stałego wysokonapięciowe. S högspänd likströmsförbindelse. (601)

15. HVDC link (*Syn.* high-voltage d.c. link) : → *link 14*

16. inter-switch link : a link between two switching stages in the same exchange. ★ maille inter-étage → *maille 7.* R межступенное звено. D Zwischenleitung. E mallas interetapas. I giunzione interstadio. N schalm. P łącze międzystopniowe. S mellanlänk. (714)

17. line link : a transmission link provided by a manufactured transmission medium. *Note.* — Examples of a line link are a symmetric pair line link, a coaxial line link, a waveguide line link, an optical fibre line link. ★ liaison par ligne → *liaison 26.* R линейный тракт. D Leitungsverbindung. E conexión por línea. I collegamento con linea fisica. N lijnverbinding. P linia przewodowa. S linjelänk. (704)

18. link : a branch of a co-tree.

★ maillon → *maillon 1.* R связь. D Verbindungszweig; Sehne. E eslabón. I ..... N koorde. P złączka; gałąź współdrzewa. S länk. (131)

19. link : a means of telecommunication with specified characteristics between two points . *Note.* — The type of transmission path or the capacity is normally indicated; for example : line link, radio link, broadband link. ★ liaison → *liaison 5.* R тракт, звено. D Verbindungsleitung; Linie. E enlace. I collegamento. N verbinding. P fala radiowa. S länk. (701,704,714,715)

20. link (in switching) : a connection between an outlet in one switching matrix and an inlet in the next. ★ maille → *maille 6.* R звено (в коммутации). D Link; Zwischenleitung. E malla (en conmutación). I collegamento interstadio. N schalm. P łącze międzymatrycowe. S kopplingslänk. (714)

21. link (in programming) : a part of a program that passes control and parameters between separate portions of the program. ★ lien → *lien 1.* R связь (в программировании). D Binder. E enlace (en programación). I legame. N programmakoppeling. P ogniwo (w programowaniu). S länk. (714)

22. link box : → *box 9*

23. link cable : → *cable 40*

24. link connected switching stage : → *stage 2*

25. link in a system : a branch between two nodes of a system. *Note.* — It generally comprises a line, a transformer or a connection between two adjacent bus-bars. ★ liaison dans un réseau → *liaison 11.* R перемычка. D Verbindung in einem Netz. E enlace en una red. I collegamento di una rete. N netverbinding. P połączenie sieciowe. S nätelement. (601)

26. link protocol : → *protocol 1*

27. link system : → *system 105*

28. (local line) network with link circuit : → *network 40*

29. monopolar d.c. link : a link having only one energized pole whatever the means of return of the d.c. current. ★ liaison à tension continue unipolaire → *liaison 8.* R униполярная линия постоянного тока. D einpolige HGÜ-Verbindung. E enlace de corriente continua monopolar. I collegamento a corrente continua unipolare. N enkelpolige verbinding met gelijkspanning. P połączenie prądu stałego jednobiegunowe. S monopolärt system. (601)

30. multi-satellite link : a link between a transmitting earth station and a receiving earth station through two or more satellites, without any intermediate earth station. *Notes. 1* — A multi-satellite link comprises one up-link, one or more satellite-to-satellite links and one down-link. *2* — A link consisting of two or more satellite links in tandem is called a

"multi hop satellite link". ★ liaison multisatellite → *liaison 23*. R многоспутниковая линия. D Mehrfach-Satelliten-Übertragungsstrecke. E enlace multisatélite. I collegamento multisatellite. N multisatellietverbinding. P linia wielosatelitowa. S flersatellitlänk. (725)

31. **optical fibre link** : → *fibre 19*
32. **optical link pilot protection system** : → *system 132*
33. **radio link** : a transmission link provided by means of radio waves. *Note.* — Examples of a radio link are a radio-relay link, a satellite link. ★ liaison radioélectrique → *liaison 29*. R радиотракт. D Funkverbindung. E conexión radioeléctrica. I collegamento radio. N radioverbinding. P linia radiowa. S radiolänk. (704)
34. **regular signalling link** : the signalling link which normally carries some particular parcel of signalling traffic. ★ canal sémaphore normal → *canal 10*. R основной тракт сигнализации. D Regel-Signalisierabschnitt. E enlace de señalización normal. I circuito di segnalazione normale. N ..... P łącze sygnalizacyjne zwykłe. S reguljär signaleringslänk. (714)
35. **reserve signalling link** : the signalling link which carries all or part of the signalling traffic of a regular signalling link when the latter has failed or has been withdrawn from service. ★ canal sémaphore de secours → *canal 9*. R резервный тракт сигнализации. D Zweit-oder Reservesignalsierabschnitt. E enlace de señalización de reserva. I circuito di segnalazione di riserva. N ..... P łącze sygnalizacyjne rezerwowe. S reservsignaleringslänk. (714)
36. **satellite link** : a link between a transmitting earth station and a receiving earth station through one satellite. *Note.* — A satellite link comprises one up-link and one down-link. ★ liaison unisatellite → *liaison 33*. R спутниковая линия. D Satelliten-Übertragungsstrecke. E enlace por satélite. I collegamento unisatellite. N satellietverbinding. P linia satelitarna. S satellitlänk. (725)
37. **signalling link** : a bi-directional transmission path for signals, comprising a data link operating in an interactive way with signalling terminal equipments at both ends. ★ canal sémaphore → *canal 8*. R звено сигнализации. D Zeichengabe-Abschnitt. E enlace de señalización. I circuito di segnalazione. N signaleringsverbinding. P łącze sygnalizacyjne. S signaleringslänk. (714)
38. **signalling link set** (*Syn.* signalling module) : → *module 2*
39. **synchronization link** : a link, between two synchronization nodes, over which timing information is transmitted in one or both directions. ★ liaison de synchronisation → *liaison 17*. R линия синхронизации. D Synchronisationsverbindung. E conexión de sincronización. I collegamento di sincronizzazione. N synchronisatieverbinding. P łącze synchronizacji. S synkroniseringslänk. (704)
40. **to link** (in programming) : to provide a link. ★ relier → *relier 1*. R соединять (в программировании). D binden. E enlazar (en programación). I stabilire un legame. N koppelen. P tworzyć ogniwo (w programowaniu). S länka. (714)
41. **total loss (of a radio link)** : → *loss 103*
42. **transmission capacity of a link** : → *capacity 29*
43. **transmission loss (of a radio link)** : → *loss 111*

linkage

1. **current linkage** (with a closed path) (Θ) : a scalar quantity given by the conduction current through any surface bounded by that path. ★ solénation → *solénation 1*. R трубка тока. D (elektrische) Durchflutung (eines geschlossenen Pfades). E corriente abarcada por una línea cerrada. I corrente concatenata (con un percorso chiuso). N omvatte stroom. P przepływ. S omkretsad ström. (121)

link-by-link

1. **link-by-link signalling** : → *signalling 24*

lip

1. **lip microphone** : → *microphone 18*

liquid

1. **filled insulating liquid** : an unused insulating liquid in place in new equipment before energization. ★ isolant liquide en place → *isolant 26*. R залитый жидкий электроизоляционный материал. D eingefüllte Isolierflüssigkeit. E líquido aislante dispuesto para uso. I liquido isolante in opera. N meegeleverde isolatievloeistof. P ciecz izolacyjna (świeża) wlana. S ny, påfylld isolervätska. (212)
2. **gas-absorbing liquid** : an insulating liquid which absorbs gas when its gassing characteristic under electrical stress is tested under standardized conditions. ★ liquide absorbeur de gaz → *liquide 14*. R газопоглощающая жидкость. D gasabsorbierende Flüssigkeit. E líquido absorbente de gas. I liquido gas-assorbente. N gasabsorberende vloeistof. P ciecz pochłaniająca gaz. S gasabsorberande vätska. (212)
3. **gas-evolving liquid** : an insulating liquid which evolves gas when its gassing characteristic under electrical stress is tested under standardized conditions. ★ liquide émetteur de gaz → *liquide 15*. R газовыделяющая жидкость. D gasabspaltende Flüssigkeit. E líquido desprendedor de gas. I liquido gas-evolvente. N gasvormende vloeistof. P ciecz wydzielająca gaz. S gasutvecklande vätska. (212)
4. **insulating liquid** : a liquid with negligibly low electric conductivity, used to separate conducting parts at different electrical potentials. ★ isolant liquide → *isolant 25*. R жидкий электроизоляционный материал. D Isolierflüssigkeit; isolierende Flüssigkeit. E líquido aislante. I liquido isolante. N isolatievloeistof. P ciecz izolacyjna. S isolervätska. (212)
5. **liquid absorption** : → *absorption 23*
6. **liquid crystal display** : → *display 4*
7. **liquid filled** : → *filled 6*
8. **liquid fuel boiler** : → *boiler 7*
9. **liquid heel** : → *heel 2*
10. **liquid scintillator activity meter** : → *meter 29*
11. **silicone liquid** : an insulating liquid consisting of liquid organosiloxane polymers structures of which normally consist of linear chains of alternating silicon and oxygen atoms in which organic radicals are attached to each silicon atom. ★ liquide silicone → *liquide 16*. R кремний органический; силиконовая жидкость. D Siliconflüssigkeit. E silicona líquida. I liquido di silicone. N siliconenolie. P ciecz silikonowa. S silikonolja. (212)
12. **treated insulating liquid** : an unused insulating liquid which has been treated appropriately for use in equipment. ★ isolant liquide traité → *isolant 28*. R обработанный жидкий электроизоляционный материал. D behandelte Isolierflüssigkeit. E líquido aislante tratado. I liquido isolante trattato. N voorbehandelde isolatievloeistof. P ciecz izolacyjna (świeża) obrobiona. S behandlad isolervätska. (212)
13. **unused insulating liquid** : an insulating liquid as delivered by the supplier. ★ isolant liquide neuf → *isolant 27*. R неиспользованный жидкий электроизоляционный материал. D neue Isolierflüssigkeit. E líquido aislante nuevo. I liquido isolante nuovo. N nieuwe isolatievloeistof. P ciecz izolacyjna świeża. S ny isolervätska. (212)
14. **used insulating liquid** : an insulating liquid that has changed in certain characteristics following energization in equipment. ★ isolant liquide usagé → *isolant 29*. R использованный жидкий электроизоляционный материал. D gebrauchte Isolierflüssigkeit. E líquido aislante usado. I liquido isolante usato. N in gebruik zijnde isolatievloeistof. P ciecz izolacyjna używana. S begagnad isolervätska. (212)

liquid-flow

1. **liquid-flow counter** : → *counter 4*

liquid-sample

1. **liquid sample counter tube** : → *counter tube 17*
2. **liquid-sample counter** : → *counter 5*

liquid-wall

1. **liquid-wall ionization chamber** : → *ionization chamber 16*

LISN

1. **LISN** (*Syn.* artificial mains network) : → *network 4*

list

1. **list of a stylus** (*Syn.* camber of a stylus) : → *camber 1*
2. **phonetically balanced word list** : a list of words in which the vowels and consonants or consonant combinations are approximately in the same proportion as in the usual language. ★ liste de mots phonétiquement équilibrée → *liste 1*. R фонетически сбалансированный перечень слов. D phonologisch ausgewogene Wörterliste. E lista de palabras

fonéticamente equilibradas. I lista di parole foneticamente equilibrate. N lijst van fonetisch evenwichtige woorden. P lista słów zrównoważonych fonetycznie. S fonetiskt balanserad ordlista. (722)

listener

1. **listener** : person listening to a broadcast sound programme. ★ auditeur → *auditeur 1.* R радиослушатель. (723)

listening

1. **prefade listening** : listening to a sound programme output, or to elements of that sound programme, for control purposes before transmission or recording. ★ écoute préalable → *écoute 2.* R предварительное прослушивание. (723)

lithium

1. **lithium coated semiconductor detector** : → *semiconductor detector 7*
2. **lithium drifted semiconductor detector** : → *semiconductor detector 8*

live

1. **live** : applies to a device or a circuit to indicate that a voltage is applied. ★ sous tension → *tension 97.* R под напряжением. D unter Spannung. E en tensión. I sotto tensione. N onder spanning staand. P pod napięciem. S spänningsförande. (151)
2. **live** : adjective describing a studio or other location which has a comparatively long reverberation time. ★ réverbérant → *réverbérant 1.* R звонкая студия. (723)
3. **live broadcast** : → *broadcast 8*
4. **live part** : → *part 5*
5. **live room** : → *room 9*
6. **live tank circuit-breaker** : → *circuit-breaker 14*
7. **live voltage detector** : → *detector 15*
8. **live working** : → *working 4*

LNA

1. **LNA** (*Syn.* launch numerical aperture) : → *aperture 15*

load

1. **automatic load compensation** : → *compensation 1*
2. **automatic load regulation equipment** : → *equipment 3*
3. **axle load** : sum of the vertical forces which an axle of a stationary vehicle in working order exerts on the rails on level track. ★ charge par essieu → *charge 75.* R осевая нагрузка. D Achslast; Radsatzlast. E carga por eje. I carico per asse; massa per asse. N asbelasting. P nacisk osi. S axellast. (811)
4. **base load set** : → *set 5*
5. **connected load** : that part of the installed load of the consumer that may be supplied by the supply undertaking. ★ puissance raccordée → *puissance 148.* R присоединенная мощность. D Anschlußwert. E potencia conectada. I potenza allacciata. N aangesloten vermogen. P moc przyłączona. S ansluten effekt. (691)
6. **continuous operation duty-type with related load/speed changes** : → *duty-type 3*
7. **controllable load** : the load of particular consumers which under contract must be reduced, for a limited period of time, at the request of the distribution supply undertaking. ★ charge modulable → *charge 69.* R потребитель-регулятор. D beeinflußbare Last. E carga modulable. I carico scaglionabile. N regelbare belasting. P obciążenie buforowe sterowane przez odbiorcę. S reducerbar belastning. (603)
8. **crossover of load characteristic** : → *cross-over 3*
9. **crush load (of a train unit)** : the maximum mass of passengers and luggage which can be safely accommodated in the train unit. It may reduce the performance. ★ charge exceptionnelle (d'un élément automoteur) → *charge 60.* R критическая масса (для моторвагонной секции). D Überlast (einer Zugeinheit). E carga excepcional (de una unidad motora). I carico massimo (di un'unità di trazione). N maximale treinbelading. P ładunek maksymalny (zespołu trakcyjnego). S maxlast. (811)
10. **cut-off load** : the load being supplied at the instant preceding a supply disconnection. ★ puissance coupée → *puissance 79.* R отключе"нная нагрузка. D ausgeschaltete Leistung. E potencia cortada. I potenza interrotta. N afgeschakelde belasting. P moc wyłączona. S bortkopplad belastning. (604)
11. **deferrable load** : a load which needs to be supplied for a part of day and can be deferred in time. *Example :* heating or pumping loads. ★ charge reportable → *charge 82.* R потребитель-регулятор. D zeitlich verlagerbare Last. E cargas transferibles. I carico rinviabile. N in de tijd verschuifbare belasting. P obciążenie buforowe (przesuwalne w czasie). S sekunda kraft. (604)
12. **deflection under bending load** : → *deflection 10*
13. **dummy load** (*Syn.* dummy antenna) : a non-radiating dissipative network simulating the input impedance of an antenna over a specified frequency range and used as a load for testing a transmitter. ★ antenne fictive → *antenne 92.* R эквивалент нагрузки; эквивалент антенны. D künstliche Last; künstliche Antenne. E carga ficticia; antena ficticia. I carico fittizio. N kunstantenne; antennesimulator. P antena sztuczna; obciążenie sztuczne. S konstlast. (712)
14. **dummy load** : a dissipative, non-radiating transmission line termination that simulates the immittance characteristics of the actual load. e.g., the load presented by an antenna. ★ charge fictive → *charge 61.* R эквивалент нагрузки. D Ersatzabschluss. E carga artificial. I carico fittizio; carico di prova. N nagebootste belasting. P obciążenie zastępcze. S konstbelastning. (726)
15. **economical load of a unit** : the load corresponding to the minimum of the curve of the heat rate as a function of the load. ★ charge économique d'une tranche → *charge 58.* R оптимальная нагрузка агрегата. D Bestlast eines Blockes. E carga económica de un grupo. I carico economico di una unità. N optimale belasting van een opwekeenheid. P obciążenie zespołu prądotwórczego ekonomiczne. S ekonomisk effekt för ett block. (602)
16. **failure load** : the load which causes failure to occur in any element. ★ charge de rupture → *charge 46.* R разрушающая нагрузка. D Versagenslast. E carga de rotura. I carico di rottura. N bezwijkbelasting. P obciążenie uszkodzeniowe. S brottlast. (466)
17. **full load** : the highest value of load specified for rated conditions of operation. ★ pleine charge → *charge 135.* R полная нагрузка. D Vollast. E plena carga. I pieno carico. N volle belasting. P obciążenie pełne. S fullast. (151)
18. **(gross) load hauled** (*Syn.* trailing load) : the mass of all the vehicles hauled, including their loads. ★ charge (brute) remorquée → *charge 36.* R масса брутто поезда; масса брутто прицепных единиц подвижного состава. D (Brutto) Anhaengelast; Zuglast. E carga (bruta) remolcada; carga de un tren. I massa (lorda) rimorchiata. N treinbelasting. P masa ciągniona (pociągu) brutto. S vagnvikt. (811)
19. **installed load** : the sum of the nameplate ratings of the electrical apparatus installed on the consumer's premises. ★ puissance installée → *puissance 118.* R установленная мощность. D installierte Leistung. E potencia instalada. I potenza installata. N geïnstalleerd vermogen. P moc zainstalowana. S installerad effekt. (691)
20. **interruptible load** : the load of particular consumers which, according to contract, can be disconnected by the supply undertaking for a limited period of time. ★ charge interruptible → *charge 65.* R отключаемый электроприемник. D unterbrechbare Last. E carga interrumpible. I carico staccabile. N afschakelbare belasting. P obciążenenie buforowe sterowane przez dostawcę. S frånkopplingsbar belastning. (603)
21. **legislative load** : the load prescribed by local or national regulating bodies. ★ charge réglementaire → *charge 81.* R регламентированная нагрузка. D gesetzliche Last. E carga reglamentaria. I carico prescritto dalla norma. N belasting volgens de voorschriften. P obciążenie przepisowe. S normerad belastning. (466)
22. **light load test** : → *test 47*
23. **line load control** : → *control 119*
24. **load** : 1. A device that absorbs power. 2. The power delivered by a device. ★ charge → *charge 22.* R нагрузка. D Belastung; Last. E carga. I carico. N belasting; afgegeven vermogen. P obciążenie. S last; belastning. (151)
25. **load** : all the numerical values of the electrical and mechanical quantities that signify the demand to be made at a given instant on a rotating machine by an electric circuit or a mechanism. ★ régime → *régime 16.* R нагрузка. D Betriebszustand. E régimen carga. I regime, carico. N belasting(toestand). P obciążenie. S belastning. (411)

26. **load angle characteristic** : → *characteristic 51*
27. **load bus** : → *bus 9*
28. **load capacitance** : → *capacitance 11*
29. **load capacity** : → *capacity 16*
30. **load centre** : → *centre 12*
31. **load characteristic** : → *characteristic 52*
32. **load characteristic** : → *characteristic 53*
33. **load characteristics** : → *characteristic 54*
34. **load commutation** : → *commutation 20*
35. **load curve** : → *curve 24*
36. **load density** : → *density 15*
37. **load duration curve** : → *curve 25*
38. **load flow calculation** : → *calculation 5*
39. **load forecast** : → *forecast 4*
40. **load immittance** : → *immittance 6*
41. **load impedance** : → *impedance 32*
42. **load in a system** : 1) the active, reactive or apparent power generated, transmitted or distributed within a system. 2) the power demanded by a group of consumers classified according to their particulars, and characteristics, e.g. heating load, daytime reactive load, etc. ★ charge dans un réseau → *charge 40.* R нагрузка энергосистемы. D Last. E carga en una red; carga de una sistema. I carico in una rete. N netbelasting. P obciążenie systemu elektroenergetycznego. S belastning. (601)
43. **load line** : → *line 102*
44. **load line** : → *line 103*
45. **load loss** : → *loss 44*
46. **load power** (*Syn.* useful output power) : → *power 200*
47. **load/rate tariff** : → *tariff 16*
48. **load recovery** : → *recovery 5*
49. **load resonance frequency** : → *frequency 123*
50. **load resonance resistance** : → *resistance 35*
51. **load sharing** : → *sharing 2*
52. **load sharing** (*Syn.* traffic load divided control) : → *control 195*
53. **load shedding** : → *shedding 1*
54. **load stability** : → *stability 8*
55. **load transfer** : → *transfer 15*
56. **load transfer** : → *transfer 16*
57. **load voltage** (*Syn.* output voltage) : → *voltage 136*
58. **load voltage (of a welding power source)** : → *voltage 101*
59. **(load weighted) equivalent interruption duration** : → *duration 23*
60. **longitudinal load** : the longitudinal components of any load applied at a given point of the support in a three-dimensional system of co-ordinates related to the support. ★ charge longitudinale → *charge 66.* R продольная нагрузка. D longitudinale Last. E carga longitudinal. I carico longitudinale. N belasting in de lijnrichting. P obciążenie wzdłużne. S längslast; last i linjeriktningen. (466)
61. **loss of load** : → *loss 52*
62. **matched load** (*Syn.* matched termination) : → *termination 2*
63. **maximum load of a motor vehicle** : the maximum load which can be safely hauled by one or more motor vehicles over a given route. It may reduce the performance. ★ charge maximale d'un véhicule moteur → *charge 67.* R максимальная перевозимая масса (тяговой единицы подвижного состава). D Grenzlast eines Triebfahrzeuges. E carga máxima de un vehículo motor. I massa rimorchiabile massima (di un veicolo motore). N maximale belasting van een krachtvoertuig. P obciążenie maksymalne (pojazdu trakcyjnego). S maximal vagnvikt. (811)
64. **maximum rated X-ray tube load** : maximum tube load specified by the manufacturer for stated operating factors, the waveform of the X-ray tube voltage being such that coefficient $f = 1$. *Note.* — There are two maximum ratings: *a)* The 2.5 h rating: This is the maximum rated tube load of an X-ray tube for a time of 2.5 h given by the manufacturer for various types of use (assembly in a shield, artificial cooling, use with long cables, etc.). *b)* Temporary use: Unless indicated otherwise this is the maximum rated tube load permitted for a time of 0.1 s and for a coefficient $f = 1$. ★ puissance maximale d'un tube radiogène → *puissance 128.* R максимальная номинальная нагрузка трубки. D maximale Anoden-Eingangsleistung; (Langzeit-Nennleistung ; Kurzzeit-Nennleistung). E potencia máxima asignada de un tubo de rayos X. I massimo carico nominale di un tubo a raggi X. N maximale toegekende röntgenbuisbelasting. P maksymalne znamionowe obciążenie lampy rentgenowskiej. S maximal rörbelastning. (881)
65. **natural load of a line** : that value of power carried by a line for which the line appears purely resistive due to the reactive power originating from the capacitance and the inductance of the line being equal. ★ puissance naturelle d'une ligne → *puissance 135.* R натуральная мощность линии электропередачи. D natürliche Leistung einer Leitung. E potencia natural de una línea; potencia característica de una línea. I potenza naturale di una linea; potenza caratteristica di una linea. N natuurlijk vermogen van een lijn. P moc naturalna linii. S naturlig ledningslast. (603)
66. **normal load** (*Syn.* primary load) : load resulting from the action of the wind and of gravity on wires, insulators and supports with or without ice accretion. ★ charge normale → *charge 71.* R нагрузка нормальных режимов; первичная нагрузка. D Normallast; primäre Last. E carga normal. I carico normale. N normale belasting. P obciążenie normalne; obciążenie podstawowe. S verklig belastning. (466)
67. **normal load of a motor vehicle** : the trailing load which can be hauled by one or more motor vehicles over a given route whilst observing a specified schedule. ★ charge normale d'un véhicule moteur → *charge 73.* R нормальная перевозимая масса (тяговой единицы подвижного состава). D Normallast eines Triebfahrzeuges. E carga normal de un vehículo motor. I massa rimorchiabile normale (di un veicolo motore). N normale belasting van een krachtvoertuig. P obciążenie nominalne (pojazdu trakcyjnego). S normal vagnvikt. (811)
68. **normal load (of a train unit)** : the specified total mass of passengers and luggage, on which the performance of the train unit in normal service is based. ★ charge normale (d'un élément automoteur) → *charge 72.* R нормальная масса (для моторвагонной секции). D Normallast (einer Zugeinheit). E carga normal (de una unidad motora). I carico normale (di un'unità di trazione). N normale treinbelading. P ładunek nominalny (zespołu trakcyjnego). S normallast. (811)
69. **optimum load** : the load of a network component for which the sum of the present values of cost under given conditions is a minimum. ★ charge optimale → *charge 74.* R оптимальная нагрузка. D wirtschaftliche Belastung. E carga óptima. I carico ottimale. N optimale belasting. P obciążenie optymalne. S optimaldrift (av anläggningsdel). (603)
70. **power-regulation coefficient of load** : → *coefficient 46*
71. **primary load** (*Syn.* normal load) : → *load 66*
72. **rated load torque** : → *torque 21*
73. **sliding load** : a dissipative transmission line termination which is continuously movable along the transmission line. ★ charge mobile → *charge 68.* R подвижная нагрузка. D verschiebbarer Abschluss. E carga deslizante. I carico mobile. N verschuifbare afsluiting. P obciążenie ruchome. S förskjutbar avslutare. (726)
74. **special load** : load produced by the reasonable activities of construction and maintenance personnel, and/or that resulting from the failure of some component of a line. ★ charge spéciale → *charge 83.* R специальная нагрузка. D Sonderlast. E carga especial (anormal). I carico speciale. N bijzondere belasting. P obciążenie szczególne. S exceptionell belastning. (466)
75. **stabilized load characteristic** : → *characteristic 81*
76. **steady-state load characteristic** : → *characteristic 88*
77. **supplementary load loss** : → *loss 97*
78. **test load** : the load applied to an element or elements of an overhead line for testing purposes. ★ charge d'essai → *charge 54.* R испытательная нагрузка. D Prüflast. E carga de ensayo. I carico di prova. N proefbelasting. P obciążenie probiercze. S provlast. (466)
79. **(to) load** : to cause a device or circuit to deliver power. ★ charger → *charger 4.* R нагрузить. D belasten. E cargar. I caricare. N belasten. P obciążać. S belasta. (151)
80. **total gross load (of a train)** : the total of the gross load hauled and the mass of the motor vehicles which haul it. ★ charge brute totale (d'un train) → *charge 37.* R полная масса брутто поезда. D Gesamtzuggewicht (eines Zuges). E carga bruta total (de un tren). I massa (lorda) totale (di un treno). N treinbelasting inclusief locomotief. P masa całkowita (pociągu) brutto. S tågvikt. (811)

81. **traffic load** (*Syn.* traffic carried) : → *traffic 27*
82. **traffic load** (*Syn.* traffic carried (intensity)) : → *intensity 21*
83. **traffic load control** : → *control 194*
84. **traffic load divided control** : → *control 195*
85. **traffic load imbalance** : → *imbalance 2*
86. **trailing load** (*Syn.* (gross) load hauled) : → *load 18*
87. **transient load characteristic** : → *characteristic 92*
88. **transverse load** : the transverse components of any load applied at a given point of the support in a three-dimensional system of co-ordinates related to the support. ★ charge transversale → *charge 85.* R поперечная нагрузка. D transversale Last. E carga transversal. I carico trasversale. N belasting loodrecht op de lijnrichting. P obciążenie poprzeczne. S last tvärs linjeriktningen. (466)
89. **tube load** : conventionally the product VIf expressed in watts or kilowatts where V is the peak value of the accelerating potential, I is the average value of the tube current and f is a coefficient depending on the waveform of the current and the voltage. ★ puissance absorbée d'un tube → *puissance 56.* R нагрузка трубки. D Anoden-Eingangsleistung. E potencia absorbida de un tubo. I carico al tubo. N belasting van de röntgenbuis. P obciążenie lampy. S rörbelastning. (881)
90. **ultimate design load** : the load which all elements should just sustain without failure, during any specified duration. ★ charge ultime spécifiée → *charge 86.* R предельная проектная нагрузка; расчетная нагрузка. D Bemessungsgrenzlast. E carga límite especificada. I carico ultimo prescritto. N rekenbelasting. P obciążenie obliczeniowe. S gränslast. (466)
91. **vertical load** : the vertical components of any load applied at a given point of the support in a three-dimensional system of co-ordinates related to the support. ★ charge verticale → *charge 88.* R вертикальная нагрузка. D vertikale Last. E carga vertical. I carico verticale. N verticale belasting. P obciążenie pionowe. S vertikallast. (466)
92. **voltage drop or rise for a specified load condition** : → *voltage drop 3*
93. **voltage regulation for a specified load condition** (*Syn.* voltage drop or rise for a specified load condition) : → *voltage drop 3*
94. **water load** : a matched termination in which the electromagnetic energy is absorbed by water. ★ charge à eau → *charge 30.* R водяная нагрузка. D Wasserlast. E carga de agua. I carico idraulico. N waterafsluiting. P obciążenie wodne. S vattenlast. (726)
95. **wind load** : the horizontal load resulting from wind pressure applied to any element of the overhead line, with or without ice loading. ★ charge de vent → *charge 50.* R ветровая нагрузка. D Windlast. E carga de viento. I carico di vento. N windbelasting. P obciążenie wiatrowe. S vindlast. (466)
96. **working load** : the load derived from the specified loading assumptions excluding factors of safety or overload factors. ★ charge de service → *charge 47.* R рабочая нагрузка; нормативная нагрузка. D Arbeitslast; Betriebslast. E carga de trabajo. I carico di lavoro. N gebruiksbelasting. P obciążenie charakterystyczne. S nominell belastning. (466)

loaded

1. **loaded folded dipole** : → *dipole 13*
2. **loaded impedance** : → *impedance 33*
3. **periodically loaded waveguide** : → *waveguide 10*
4. **spring loaded bearing** : → *bearing 33*

load-factor

1. **high load factor consumer** : → *consumer 4*
2. **high load factor tariff** : → *tariff 12*
3. **load factor of a unit** : the ratio of the energy generated by a unit during a given period of time to the energy it would have generated if it had been running at its maximum capacity for the operation duration within that period of time. ★ facteur de charge d'une tranche → *facteur 38.* R коэффициент нагрузки агрегата. D Leistungsausnutzung eines Blockes. E factor de carga de un grupo. I coefficiente di carico di una unità. N belastingsfactor van een opwekeenheid. P wskaźnik obciążenia zespołu prądotwórczego. S energiutnyttjningsfaktor under drifttid för ett block. (602)
4. **load-factor** (in tariff in electricity) (*Syn.* utilization factor (in tariff in electricity)) : the ratio, expressed as a numerical value or as a percentage, of the consumption within a specified period (year, month, day, etc.), to the consumption that would result from continuous use of the maximum or other specified demand occurring within the same period. *Notes. 1* — This term should not be used without specifying the demand and the period to which it relates. *2* — The load factor for a given demand is also equal to the ratio of the utilization time to the time in hours within the same period. ★ facteur d'utilisation → *facteur 189.* R коэффициент использования мощности. D Belastungsfaktor. E factor de utilización. I fattore di utilizzazione. N belastingsfactor. P współczynnik wypełnienia wykresu obciążenia. S utnyttjningsfaktor. (691)
5. **low load factor consumer** : → *consumer 6*
6. **low load factor tariff** : → *tariff 17*

loading

1. **economic loading schedule** : → *schedule 1*
2. **electric loading** : 1. Of a machine. The average ampere conductors of the primary winding per unit length of the air-gap periphery. 2. Of a distributed winding. The average ampere conductors of the winding per unit length of the air-gap surface. ★ densité linéique (électrique) → *densité 12.* R линейная нагрузка. D Strombelag. E densidad lineal (eléctrica). I densità lineare di corrente. N stroombelegging. P średni okład prądu. S elektrisk belastning. (411,811)
3. **hopper loading** : method of loading using a hopper to transport the charge to a tray, chute or opening of a furnace. ★ chargement par trémie → *chargement 3.* R загрузочный бункер. D Trichterbeschickung. E carga mediante tolva. I caricamento mediante tramoggia. N trechtervoeding. P ładowanie koszem (samowyładowczym). S chargering med tratt. (841)
4. **ice loading** : the additional load resulting from ice accretion on any element of the line. ★ charge de givre → *charge 42.* R гололедная нагрузка. D Eislast. E carga de hielo. I carico di ghiaccio. N ijzelbelasting. P obciążenie sadziowe. S islast. (466)
5. **loading** : introduction of nuclear fuel into a reactor. ★ chargement → *chargement 2.* D Beladen. E carga. I caricamento. N laden. P załadunek. S laddning. (026)
6. **loading assumptions** : → *assumptions 1*
7. **loading case** : → *case 6*
8. **magnetic loading** : the average flux per unit area of the air-gap surface. ★ induction magnétique dans l'entrefer → *induction 21.* R магнитная индукция. D mittlere Luftspaltinduktion. E inducción magnética en el entrehierro. I induzione magnetica nel traferro. N gemiddelde lucht (spleet)induktie. P średnia indukcja magnetyczna w szczelinie. S magnetisk belastning. (411)
9. **non-uniform ice loading** : the load due to uneven ice loading along conductors or earthwires in a section of a line. *Note.* — This may result from non-uniform accumulation, or non-uniform detachment of ice from the conductors or earthwires. ★ charge de givre dissymétrique → *charge 43.* R неравномерная гололедная нагрузка. D ungleiche Eislast. E carga de hielo asimétrica. I carico di ghiaccio dissimetrico. N ongelijkmatige ijzelbelasting. P obciążenie sadziowe nierównomierne. S lokal islast. (466)
10. **uniform ice loading** : the ice load uniformly distributed over the length of each conductor and earthwire on all the spans of a section of line. ★ charge de givre uniforme → *charge 44.* R равномерная гололедная нагрузка. D gleichförmige Eislast. E carga de hielo uniforme. I carico di ghiaccio uniforme. N gelijkmatige ijzelbelasting. P obciążenie sadziowe równomierne. S jämnt fördelad islast. (466)

load-shedding

1. **automatic load-shedding control equipment** : → *equipment 4*
2. **load shedding** : → *shedding 1*

load-tap-changer

1. **load-tap-changer** (*Syn.* on-load tap-changer) : → *tap-changer 1*

lobe

1. **back lobe** : a secondary lobe the axis of which makes an angle of approximately 180 degrees with the forward direction of the axis of the major lobe of an antenna ; by extension, a radiation lobe in the half space opposed to the direction of the major lobe. ★ lobe arrière → *lobe 2.* R задний лепесток (диаграммы

направленности антенны). D Rückkeule; Rückwärtsstrahlung. E lóbulo posterior. I lobo posteriore. N achterlob; achterlus. P listek promieniowania wstecznego. S baklob. (712)

2. **main lobe** (*Syn.* major lobe) : → *lobe 3*
3. **major lobe** (*Syn.* main lobe) : the radiation lobe of an antenna which includes the direction in which the amplitude of the specified field component has the largest value. *Note.* — Certain antennas have more than one major lobe. ★ lobe principal → *lobe 5.* R главный лепесток (диаграммы направленности антенны); основной лепесток (диаграммы направленности антенны). D Hauptkeule. E lóbulo mayor; lóbulo principal. I lobo principale. N hoofdlob; hoofdlus. P listek główny. S huvudlob. (712)
4. **minor lobe** (*Syn.* secondary lobe) : → *lobe 7*
5. **radiation lobe** : a part of the radiation pattern bounded by relatively low values, of the amplitude of the specified field component, and over which there is no deep minimum. ★ lobe (de rayonnement) → *lobe 3.* R лепесток (диаграммы направленности антенны). D Strahlungskeule. E lóbulo (de radiación). I lobo d'irradiazione. N stralingslob; stralingslus. P listek promieniowania. S (strålnings)lob. (712)
6. **(relative) side lobe level** : → *level 80*
7. **secondary lobe** (*Syn.* minor lobe) : any radiation lobe other than the major lobe. ★ lobe secondaire → *lobe 6.* R вторичный лепесток (диаграммы направленности антенны). D Nebenkeule; Nebenzipfel. E lóbulo secundario; lóbulo menor. I lobo secondario. N secundaire lob; secundaire lus. P listek drugorzędny. S bilob. (712)
8. **side lobe** : any secondary lobe other than the back lobes. ★ lobe latéral → *lobe 4.* R боковой лепесток (диаграммы направленности антенны). D Nebenkeule; Nebenzipfel. E lóbulo lateral. I lobo laterale. N zijlob; zijlus. P listek boczny. S sidlob. (712)

local

1. **(circuit) local back-up protection** : → *protection 10*
2. **in local override** : → *override 1*
3. **local action** (*Syn.* self-discharge) : → *self-discharge 1*
4. **local artificial ventilation** : → *ventilation 4*
5. **local battery** : → *battery 44*
6. **local (charge) exchange** (*Syn.* local service area) : → *area 25*
7. **local control** : → *control 121*
8. **local level** : → *level 54*
9. **local lighting** : → *lighting 20*
10. **local line** : → *line 104*
11. **local line network** : → *network 39*
12. **(local line) network with link circuit** : → *network 40*
13. **local record** : → *record 2*
14. **local service area** : → *area 25*
15. **local switching centre** : → *centre 13*
16. **local switching entity** : → *entity 2*
17. **local switching exchange** (*Syn.* serving connection exchange) : → *exchange 23*
18. **local (switching) exchange** (*Syn.* local switching centre) : → *centre 13*
19. **local (telephone) circuit** : → *circuit 109*
20. **local telex number** : → *number 13*
21. **local traffic** : → *traffic 10*
22. **local value (of a wave)** : → *value 25*
23. **(substation) local back-up protection** : → *protection 53*

localization

1. **assembly for failed fuel element localization** : → *assembly 2*
2. **fault localization** : actions taken to identify the faulty sub-item or sub-items at the appropriate indenture level. ★ localisation de panne → *localisation 3.* R установление места (существенной) неисправности. D Fehlerlokalisierung. E localización (de una avería). I localizzazione di avaria. N lokaliseren van een defect. P lokalizacja przyczyny niezdatności. S fellokalisering. (191)
3. **fault localization time** ; → *time 62*
4. **selective localization** (of radionuclides) : in the use of radionuclides, the concentration of a particular nuclide in certain cells, organs, or tissues. ★ localisation sélective → *localisation 5.* R избирательное (селективное) накопление (радионуклидов). D selektive Lokalisation (von Radionukliden). E localización selectiva (de un radionucleido radiactivo). I localizzazione selettiva (di un radionuclide). N selectieve localisatie (van radiolucliden). P selektywna lokalizacja (radionuklidów). S selektiv lokalisering. (881)

localized

1. **localised heat** : → *heat 14*
2. **localised lighting** : → *lighting 21*

localizer

1. **light-beam localizer** (*Syn.* light-beam diaphragm) : a device used to collimate and direct the useful beam upon the desired area of the surface of an object and to indicate that area by a projected beam of light. ★ localisateur lumineux → *localisateur 2.* R световой локализатор. D Lichtvisier. E localizador luminoso; diafragma luminoso. I localizzatore luminoso; diaframma luminoso. N lichtbundellocalisator; lichtbundeldiafragma. P świetlny celownik wiązki; przesłona wiązki świetlnej. S ljusvisirbländare. (881)

locally

1. **locally active** : → *active 26*

locally-controlled

1. **locally-controlled (repeater) station** : → *station 15*

locally-derived

1. **locally-derived synchronization signal** : → *signal 117*

location

1. **fault location** : an application of measurement techniques so as to determine the position of a circuit fault. ★ localisation d'un défaut → *localisation 4.* R определение места повреждения. D Fehlerortung. E localización del defecto. I localizzazione di un guasto. N plaatsbepaling van een fout. P lokalizacja uszkodzenia. S felsökning. (604)
2. **hazardous location equipment** (*Syn.* electrical apparatus for explosive atmospheres) : → *apparatus 6*
3. **location bearing** : → *bearing 20*

locator

1. **fault locator** : a device used for fault location. ★ localisateur de défaut → *localisateur 1.* R искатель повреждения. D Fehlerortungsgerät. E localizador de defectos. I localizzatore di guasto. N foutplaatszoeker. P lokalizator uszkodzeń. S felsökningsutrustning. (604)
2. **locator of a crimping tool** : a device for positioning a terminal end in a crimping tool. ★ positionneur d'un outil de sertissage → *positionneur 4.* R фиксатор обжимного инструмента. D Aufnahme des Crimpwerkzeuges. E posicionador de un útil de engaste. I posizionatore di un attrezzo di crimpatura; testa di un attrezzo di crimpatura. N aanslag van het wurggereedschap. P ustawiak (zagniataka). S fixtur. (581)
3. **sound locator** : electroacoustic apparatus for locating a sound source. ★ appareil de repérage acoustique → *appareil 32.* R акустический локатор. D Schallortungsgerät. E localizador acústico. I ecogoniometro. N geluid(s)bronlokalisator. P namiernik akustyczny. S ljudpejl. (801)

lock

1. **lock chamber** : → *chamber 12*

locked

1. **injection locked laser** : → *laser 4*
2. **locked groove** : → *groove 21*
3. **permanently locked envelopes** : → *envelope 11*
4. **segmental or locked coil conductor** (*Syn.* smooth body conductor) : → *conductor 65*

locked-rotor

1. **locked-rotor current** : → *current 120*
2. **locked-rotor current of a motor and starter** : → *current 121*
3. **locked-rotor impedance characteristic** : → *characteristic 55*
4. **locked-rotor test** : → *test 48*

5. **locked-rotor torque** : → *torque 13*

locking

1. **double pressure locking mechanical system** : → *mechanical system 5*
2. **instrument with locking device** : → *instrument 17*
3. **locking contact** : → *contact 77*
4. **locking device** : → *device 34*
5. **locking mechanical system** : → *mechanical system 8*
6. **side locking** (of the sub-carrier) : colorimetric distortion which is produced in an NTSC or PAL colour television receiver when the frequency of the local oscillator used to demodulate the chrominance signal locks to an unwanted side band of the sub-carrier instead of the sub-carrier frequency. ★ calage à côté → *calage 2.* R боковой захват (поднесущей). (723)

lockout

1. **circuit-breaker with lock-out preventing closing** : → *circuit-breaker 7*
2. **line lockout** : a system feature which prevents permanent line signals from causing undue holding or appearing as repeated call attempts. *Note.* — The signals may come from a parked network terminal. ★ neutralisation des faux-appels → *neutralisation 3.* R блокировка ложных вызовов. D ..... E neutralización de falsas llamadas. I incapsulamento per falsa chiamata. N afwerpen. P oswobodzenie linii. S kapsling. (714)
3. **lock-out** (*Syn.* final tripping) : → *tripping 4*

locomotive

1. **coupled-axle locomotive** : a locomotive in which certain axles are coupled mechanically, in rotary motion, in one or more groups. ★ locomotive à essieux accouplés → *locomotive 2.* R локомотив со спаренными осями. D Lokomotive mit gekuppelten Radsätzen. E locomotora de ejes acoplados. I locomotiva ad assi accoppiati. N locomotief met gekoppelde asaandrijving. P lokomotywa o osiach sprzężonych (mechanicznie). S lok med kopplade axlar. (811)
2. **hump locomotive** : a shunting locomotive designed to propel trains over the hump in a hump shunting yard. ★ locomotive de butte → *locomotive 4.* R горочный локомотив. D Abdrücklokomotive. E locomotora para clasificar. I locomotiva di spinta per selle di lancio. N heuvellocomotief. P lokomotywa rozrządowa. S lok för vallväxling. (811)
3. **individual axle drive locomotive** : a locomotive in which the driving axles are not mechanically coupled in rotary motion. ★ locomotive à essieux indépendants → *locomotive 3.* R локомотив с индивидуальным приводом осей. D Lokomotive mit Einzelradsatzantrieb. E locomotora de ejes independientes. I locomotiva ad assi indipendenti. N locomotief met afzonderlijke asaandrijving. P lokomotywa o osiach napędzanych indywidualnie. S enkelaxeldrivet lok. (811)
4. **industrial locomotive** : a locomotive used on a private siding (factory siding, etc.) and not necessarily having all the safety devices provided on main-line locomotives. ★ locomotive industrielle → *locomotive 8.* R промышленный локомотив. D Industrielokomotive. E locomotora industrial. I locomotiva (per servizio) industriale. N industrielocomotief. P lokomotywa przemysłowa. S industrilok. (811)
5. **locomotive** : a motor vehicle intended to move other vehicles and not carrying a payload nor forming part of a train-unit. ★ locomotive → *locomotive 1.* R локомотив. D Lokomotive. E locomotora. I locomotiva. N locomotief. P lokomotywa. S lok(omotiv). (811)
6. **locomotive running light** (*Syn.* light running) : → *running 3*
7. **mine locomotive** : a locomotive used in mine galleries or in underground installations. ★ locomotive de mine → *locomotive 7.* R рудничный локомотив. D Grubenlokomotive. E locomotora de mina. I locomotiva di miniera. N mijnlocomotief. P lokomotywa kopalniana. S gruvlok. (811)
8. **shunting locomotive** : a locomotive designed for shunting service. ★ locomotive de manœuvre → *locomotive 6.* R маневровый локомотив. D Rangierlokomotive. E locomotora de maniobras. I locomotiva di manovra. N rangeerlocomotief. P lokomotywa manewrowa. S växellok. (811)
9. **small-power locomotive** : a motor vehicle of low output intended for minor shunting operations or for moving light trains. ★ locotracteur → *locotracteur 1.* R мотовоз. D Kleinlokomotive. E locomotora de pequeña potencia; locotractor. I locotrattore. N locomotor. P lokomotywa manewrowa. S lokomotor. (811)

locus

1. **daylight locus** : the locus of points in a chromaticity diagram that represents chromaticities of phases of daylight with different correlated colour temperatures. ★ lieu des lumières du jour → *lieu 2.* R область дневного света. D Tageslichtkurvenzug. E lugar de los estímulos (de color) luz de día. I luogo della luce diurna. N daglichtkromme. P krzywa światła dziennego. S dagsljusort. (845)
2. **Planckian locus** : the locus of points in a chromaticity diagram that represents chromaticities of the radiation of Planckian radiators at different temperatures. ★ lieu des corps noirs → *lieu 1.* R линия чёрного тела. D Planckscher Kurvenzug. E lugar de los estímulos (de color) planckianos. I luogo del corpo nero. N zwarte-stralerkromme. P krzywa ciała czarnego. S Planck-ort. (845)

logarithmic

1. **average logarithmic energy decrement** : → *decrement 1*
2. **logarithmic decrement** : → *decrement 2*
3. **logarithmic direct current amplifier** : → *amplifier 16*
4. **logarithmic frequency interval** : → *interval 12*
5. **logarithmic gain** : → *gain 23*
6. **logarithmic pulse amplifier** : → *amplifier 17*
7. **logarithmic ratemeter** : → *ratemeter 5*

logatom

1. **logatom** : a phonetic element, chosen without inherent meaning, for use in telephonometry, consisting of a vowel sound preceded and followed by a consonant sound or a consonant combination sound. *Examples :* BALP,KID, FROP. See the Volume V of the CCITT Red Book, 1960, pages 74 and 75. ★ logatome → *logatome 1.* R логатом. D Logatom. E logatomo. I logatomo. N logatoom. P logatom. S logatom. (722)
2. **logatom articulation** : → *articulation 4*

logging

1. **radiometric bore-hole logging assembly** : a prospecting radiation meter intended to measure the radiation in a bore-hole at various depths. The assembly includes a probe that is inserted in the bore-hole and connected to external associated apparatus. ★ ensemble de radiosondage → *ensemble 12.* R прибор радиометрический каротажный. D Anordnung zur radiometrischen Bohrlochvermessung. E conjunto de radiosondeo. I insieme di radiosondaggio; complesso di radiosondaggio. N meetopstelling voor boorgatonderzoek. P urządzenie radiometryczne do karotażu odwiertów. S strålningsmätare för borrhål. (391)

logic

1. **binary logic system** : → *system 17*
2. **logic circuit** : → *circuit 110*
3. **logic element** (*Syn.* (logic) gate) : → *gate 10*
4. **logic system** : → *system 107*
5. **safety logic assembly** : → *assembly 24*

logistic

1. **logistic delay** : → *delay 25*
2. **mean logistic delay** : → *delay 28*
3. **p-fractile logistic delay** : → *delay 33*

log-periodic

1. **log-periodic antenna** : → *antenna 67*

lone

1. **lone electron** : → *electron 24*
2. **lone signal unit** : → *unit 38*

long

1. **distortion of long duration** : → *distortion 33*
2. **long line adapter** : → *adapter 1*
3. **long line (telephone) set** : → *set 31*
4. **long period fading** (*Syn.* slow fading) : → *fading 16*
5. **long rod insulator** : → *insulator 20*

6. **long wave infra-red radiation** : → *radiation 39*

long-arc

1. **long-arc lamp** : → *lamp 35*

long-distance

1. **prefix giving access to the long-distance telex network** : → *prefix 4*

longitudinal

1. **longitudinal component** : → *component 36*
2. **(longitudinal) differential protection system** : → *system 108*
3. **longitudinal impedance** (*Syn.* series impedance) : → *impedance 50*
4. **longitudinal judder** : → *judder 1*
5. **longitudinal load** : → *load 60*
6. **longitudinal magnetization** : → *magnetization 3*
7. **longitudinal offset loss** : → *loss 45*
8. **longitudinal profile** : → *profile 6*
9. **longitudinal propagation** : → *propagation 15*
10. **longitudinal resolution** : → *resolution 2*
11. **longitudinal resolution** : → *resolution 3*
12. **longitudinal video tape recorder** : → *tape recorder 2*
13. **longitudinal wave** : → *wave 32*
14. **longitudinal wave** : → *wave 33*
15. **overhead contact line with longitudinal suspension** (*Syn.* overhead contact line with catenary suspension) : → *line 120*

longitudinally

1. **longitudinally mounted motor** : → *motor 43*

long-path

1. **long-path signal** : → *signal 119*

long-playing

1. **long-playing record** : → *record 3*

long-run

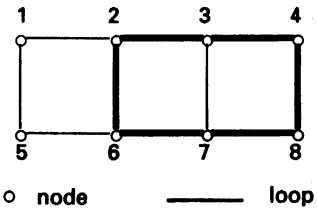
1. **long-run marginal cost** : → *cost 14*

long-term

1. **long-term instability** : → *instability 3*

long-wire

1. **long-wire antenna** : → *antenna 68*



loom

1. **loom** (of a light) : diffused glow that may be seen from outside a beam of light as an effect of atmospheric scattering of the light. ★ lueur → *lueur 3.* **R** ореол. **D** Schimmer. **E** halo (de una luz). **I** chiarore. **N** diffuse gloed (om een licht). **P** majaczenie światła. **S** diffrakterat ljus. (845)

loop

1. **Alford loop** (antenna) : an essentially omni-directional antenna consisting of four insulated conductors, each approximately one-half wavelength long, positioned in the form of a square in a horizontal plane and symmetrically fed by balanced lines at two diagonally opposite corners of the square. ★ antenne en carré → *antenne 75.* **R** квадратная рамочная антенна; рамочная антенна Элфорда. **D** Alford-Rahmenantenne. **E** cuadro o lazo de Alford (antena); cuadrado Gouriaud. **I** anello Alford. **N** Alfordraam. **P** antena Alforda. **S** Alford-slinga. (712)
2. ***B*(*H*) loop** : a closed loop representing magnetic flux density as a function of magnetic field strength when the magnetic field strength is cyclic. ★ cycle *B*(*H*) → *cycle 24.* **R** петля *B*(*H*). **D** *B*(*H*)-Schleife. **E** ciclo *B*(*H*). **I** ciclo *B*(*H*). **N** *B*(*H*)-lus. **P** pętla *B*(*H*). **S** *B*(*H*)-slinga. (221)
3. **control loop** : assembly of elements comprising a comparing element, the corresponding forward path and the corresponding feedback path. *Note.* — Sometimes a control loop may enclose others, in which case it is called the main loop; the enclosed ones are called minor, subsidiary, secondary, auxiliary or local loops. ★ boucle de régulation → *boucle 6.* **R** контур управления. **D** Regelkreis. **E** bucle de control. **I** anello (di controllo). **N** regelkring. **P** pętla regulacji. **S** reglerkrets. (351)
4. **coupling loop** : a small single turn inductor which is inserted into a transmission line, a cavity resonator or a waveguide for the purpose of transferring power to or from an external circuit. ★ boucle de couplage → *boucle 5.* **R** петля связи. **D** Koppelschleife. **E** anillo de acoplamiento. **I** spina di accoppiamento. **N** koppellus. **P** pętla sprzęgająca. **S** kopplingsslinga. (726)
5. **dynamic *B*(*H*) loop** : a *B*(*H*) loop obtained when the rate of change of magnetic field strength is high enough to influence the shape of the loop. ★ cycle dynamique *B*(*H*) → *cycle 21.* **R** динамическая петля *B*(*H*). **D** dynamische *B*(*H*)-Schleife. **E** ciclo dinámico *B*(*H*). **I** ciclo dinamico *B*(*H*). **N** dynamische *B*(*H*)-lus. **P** pętla dynamiczna *B*(*H*). **S** dynamisk *B*(*H*)-slinga. (221)
6. **dynamic *J*(*H*) loop** : a *J*(*H*) loop obtained when the rate of change of magnetic field strength is high enough to influence the shape of the loop. ★ cycle dynamique *J*(*H*) → *cycle 22.* **R** динамическая петля *J*(*H*). **D** dynamische *J*(*H*)-Schleife. **E** ciclo dinámico *J*(*H*). **I** ciclo dinamico *J*(*H*). **N** dynamische *J*(*H*)-lus. **P** pętla dynamiczna *J*(*H*). **S** dynamisk *J*(*H*)-slinga. (221)
7. **dynamic *M*(*H*) loop** : an *M*(*H*) loop obtained when the rate of change of magnetic field strength is high enough to influence the shape of the loop. ★ cycle dynamique *M*(*H*) → *cycle 23.* **R** динамическая петля *M*(*H*). **D** dynamische *M*(*H*)-Schleife. **E** ciclo dinámico *M*(*H*). **I** ciclo dinamico *M*(*H*). **N** dynamische *M*(*H*)-lus. **P** pętla dynamiczna *M*(*H*). **S** dynamisk *M*(*H*)-slinga. (221)
8. **effective induction area of the control current loop** : → *area 17*
9. **effective induction area of the output loop** : → *area 18*
10. **electric hysteresis loop** : a closed electric polarization curve representing the hysteresis of a dielectric when the electric field strength is cyclic. ★ cycle d'hystérésis électrique → *cycle d'hystérésis 2.* **R** цикл электрического гистерезиса. **D** elektrische Hystereseschleife. **E** ciclo de histéresis eléctrica. **I** ciclo di isteresi dielettrica. **N** elektrische hysteresislus. **P** pętla histerezy elektrycznej. **S** elektrisk hysteresslinga. (121)
11. **endless loop** : a length of tape, the extremities of which are connected together in order to form an endless ribbon. ★ boucle → *boucle 3.* **R** петля ленты. **D** endlose Bandschleife. **E** bucle sin fin. **I** anello. **N** eindloze band. **P** obieg taśmy zamknięty. **S** bandslinga. (806)
12. **incremental hysteresis loop** : the non-symmetrical hysteresis loop obtained in the presence of a static magnetic field that is collinear with the time-varying field. ★ cycle d'hystérésis mineur → *cycle d'hystérésis 4.* **R** частная гистерезисная петля. **D** Hystereseschleife bei überlagertem Gleichfeld. **E** ciclo de histéresis incremental. **I** ciclo d'isteresi minore. **N** incrementele hysteresislus. **P** pętla histerezy przy podmagnesowaniu. **S** överlagrad hysteresslinga. (221)
13. **incremental *B*(*H*) loop** : the non-symmetrical *B*(*H*) loop obtained in the presence of a stati c magnetic field that is collinear with the time-varying field. ★ cycle *B*(*H*) mineur → *cycle 26.* **R** частная петля *B*(*H*). **D** *B*(*H*)-Schleife bei überlagertem Gleichfeld. **E** ciclo *B*(*H*) incremental. **I** ciclo *B*(*H*) minore. **N** incrementele hysteresis- *B*(*H*)-lus. **P** pętla *B*(*H*) przy podmagnesowaniu. **S** överlagrad *B*(*H*)-slinga. (221)
14. **incremental *J*(*H*) loop** : the non-symmetrical *J*(*H*) loop obtained in the presence of a static magnetic field that is collinear with the time-varying field. ★ cycle *J*(*H*) mineur → *cycle 30.* **R** частная петля *J*(*H*). **D** *J*(*H*)-Schleife bei überlagertem Gleichfeld. **E** ciclo *J*(*H*) incremental. **I** ciclo *J*(*H*) minore. **N** incrementele hysteresis- *J*(*H*)-lus. **P** pętla *J*(*H*) przy podmagnesowaniu. **S** överlagrad *J*(*H*)-slinga. (221)
15. **incremental *M*(*H*) loop** : the non-symmetrical *M*(*H*) loop obtained in the presence of a static magnetic field that is collinear with the time-varying field. ★ cycle *M*(*H*) mineur → *cycle 34.* **R** частная петля *M*(*H*). **D** *M*(*H*)-Schleife bei überlagertem Gleichfeld. **E** ciclo *M*(*H*) incremental. **I** ciclo *M*(*H*) minore. **N** incrementele hysteresis- *M*(*H*)-lus. **P** pętla *M*(*H*) przy podmagnesowaniu. **S** överlagrad *M*(*H*)-slinga. (221)
16. ***J*(*H*) loop** : a closed loop representing magnetic polarization as a function of magnetic field strength when the magnetic field strength is cyclic. ★ cycle *J*(*H*) → *cycle 28.* **R** петля *J*(*H*). **D** *J*(*H*)-Schleife. **E** ciclo *J*(*H*). **I** ciclo *J*(*H*). **N** *J*(*H*)-lus. **P** pętla *J*(*H*). **S** *J*(*H*)-slinga. (221)

17. **loop** : a set of branches forming a closed path passing only once through any node.

★ boucle → *boucle 1.* R петля. D Umlauf (Kreis); Schleife. E lazo. I maglia. N lus. P obwód (elektryczny). S slinga. (131)

18. **loop antenna** : → *antenna 69*
19. **loop checking** : → *checking 1*
20. **loop/disconnect signalling** : → *signalling 25*
21. **loop inductor** : → *inductor 18*
22. **loop system** : → *system 109*
23. **(magnetic) hysteresis loop** : a closed magnetization curve representing the magnetic hysteresis of a substance when the magnetic field strength is cyclic. ★ cycle d'hystérésis (magnétique) → *cycle d'hystérésis 3.* R цикл магнитного гистерезиса. D (magnetische) Hystereseschleife. E ciclo de histéresis (magnética). I ciclo di isteresi (magnetica). N (magnetische) hysteresislus. P pętla histerezy magnetycznej. S (magnetisk) hysteresslinga. (121)
24. ***M(H)* loop** : a closed loop representing magnetization as a function of magnetic field strength when the magnetic field strength is cyclic. ★ cycle *M(H)* → *cycle 32.* R петля *M(H).* D *M(H)*-Schleife. E ciclo *M(H).* I ciclo *M(H).* N *M(H)*-lus. P pętla *M(H).* S *M(H)*-slinga. (221)
25. **normal hysteresis loop** : the hysteresis loop which is symmetrical with respect to the origin of the co-ordinates. ★ cycle d'hystérésis normal → *cycle d'hystérésis 5.* R симметричная гистерезисная петля. D normale Hystereseschleife. E ciclo de histéresis normal. I ciclo d'isteresi normale. N normale hysteresislus. P pętla histerezy normalna. S normal hysteresslinga. (221)
26. **normal *B(H)* loop** : the *B(H)* loop which is symmetrical with respect to the origin of the co-ordinates. ★ cycle *B(H)* normal → *cycle 27.* R симметричная петля *B(H).* D normale *B(H)*-Schleife. E ciclo *B(H)* normal. I ciclo *B(H)* normale. N normale *B(H)*-lus. P pętla normalna *B(H).* S normal *B(H)*-slinga. (221)
27. **normal *J(H)* loop** : the *J(H)* loop which is symmetrical with respect to the origin of the co-ordinates. ★ cycle *J(H)* normal → *cycle 31.* R симметричная петля *J(H).* D normale *J(H)*-Schleife. E ciclo *J(H)* normal. I ciclo *J(H)* normale. N normale *J(H)*-lus. P pętla normalna *J(H).* S normal *J(H)*-slinga. (221)
28. **normal *M(H)* loop** : the *M(H)* loop which is symmetrical with respect to the origin of the co-ordinates. ★ cycle *M(H)* normal → *cycle 35.* R симметричная петля *M(H).* D normale *M(H)*-Schleife. E ciclo *M(H)* normal. I ciclo *M(H)* normale. N normale *M(H)*-lus. P pętla normalna *M(H).* S normal *M(H)*-slinga. (221)
29. **recoil loop** (*Syn.* recoil line) : → *line 129*
30. **saturation hysteresis loop** : a normal hysteresis loop for which the maximum value of the magnetic field strength brings the material into magnetic saturation. ★ cycle d'hystérésis à saturation → *cycle d'hystérésis 1.* R предельная гистерезисная петля. D Sättigungs-Hystereseschleife. E ciclo de histéresis de saturación. I ciclo d'isteresi a saturazione. N verzadigingshysteresislus. P pętla histerezy przy nasyceniu. S mättningshysteresslinga. (221)
31. **saturation *B(H)* loop** : a normal *B(H)* loop for which the maximum value of the magnetic field strength brings the material into magnetic saturation. ★ cycle *B(H)* à saturation → *cycle 25.* R предельная петля *B(H).* D Sättigungs-*B(H)*-Schleife. E ciclo *B(H)* de saturación. I ciclo *B (H)* a saturazione. N verzadigingshysteresis-*B(H)*-lus. P pętla *B(H)* przy nasyceniu. S mättad *B(H)*-slinga. (221)
32. **saturation *J(H)* loop** : a normal *J(H)* loop for which the maximum value of the magnetic field strength brings the material into magnetic saturation. ★ cycle *J(H)* à saturation → *cycle 29.* R предельная петля *J (H).* D Sättigungs-*J(H)*-Schleife. E ciclo *J(H)* de saturación. I ciclo *J (H)* a saturazione. N verzadigingshysteresis-*J(H)*-lus. P pętla *J(H)* przy nasyceniu. S mättad *J(H)*-slinga. (221)
33. **saturation *M(H)* loop** : a normal *M(H)* loop for which the maximum value of the magnetic field strength brings the material into magnetic saturation. ★ cycle *M(H)* à saturation → *cycle 33.* R предельная петля *M(H).* D Sättigungs-*M(H)*-Schleife. E ciclo *M(H)* de saturación. I ciclo *M (H)* a saturazione. N verzadigingshysteresis-*M(H)*-lus. P pętla *M(H)* przy nasyceniu. S mättad *M(H)*-slinga. (221)
34. **static *B(H)* loop** : a *B(H)* loop obtained at such a low rate of change of magnetic field strength that the loop is not influenced by the rate of change. ★ cycle statique *B(H)* → *cycle 38.* R статическая петля *B(H).* D statische *B(H)*-Schleife. E ciclo estático *B(H).* I ciclo statico *B(H).* N statische *B(H)*-lus. P pętla statyczna *B(H).* S statisk *B(H)*-slinga. (221)
35. **static *J(H)* loop** : a *J(H)* loop obtained at such a low rate of change of magnetic field strength that the loop is not influenced by the rate of change. ★ cycle statique *J(H)* → *cycle 39.* R статическая петля *J(H).* D statische *J(H)*-Schleife. E ciclo estático *J(H).* I ciclo statico *J(H).* N statische *J(H)*-lus. P pętla statyczna *J(H).* S statisk *J(H)*-slinga. (221)
36. **static *M(H)* loop** : an *M(H)* loop obtained at such a low rate of change of magnetic field strength that the loop is not influenced by the rate of change. ★ cycle statique *M(H)* → *cycle 40.* R статическая петля *M(H).* D statische *M(H)*-Schleife. E ciclo estático *M(H).* I ciclo statico *M(H).* N statische *M(H)*-lus. P pętla statyczna *M(H).* S statisk *M(H)*-slinga. (221)
37. **subscriber loop** (*Syn.* subscriber's line) : → *line 154*
38. **subscriber loop** (*Syn.* subscriber's (telephone) line) : → *line 159*
39. **subscriber's loop** (*Syn.* connection line) : → *line 14*

looped

1. **looped system outlet** : → *outlet 2*

loose

1. **loose cable structure** : → *structure 2*
2. **loose leads** : → *lead 9*
3. **loose tube cable** : → *cable 42*

lordotic

1. **lordotic projection** : → *projection 4*

loss

1. **absorption loss** (of an electromagnetic wave) : that part of the attenuation of an electromagnetic wave due only to absorption. ★ affaiblissement d'absorption → *affaiblissement 5.* D Absorptionsdämpfung (einer elektromagnetischen Welle). P straty absorpcyjne. (705)
2. **absorption loss** : that part of the transmission loss due to the dissipation or conversion of sound energy, either within the medium or attendant upon a reflection. ★ perte par absorption → *perte 37.* R потери на поглощение. D Absorptionsverlust. E pérdida por absorción. I perdita per assorbimento. N absorptieverlies. P straty absorpcyjne. S absorptionsförlust. (801)
3. **angular deviation loss** : sensitivity level of the transducer on the principal axis minus the sensitivity level of the transducer for a specified direction. ★ perte de déviation angulaire → *perte 19.* R угловой перепад уровней. D Richtmaß. E pérdidas por desviación angular. I perdita di deviazione angolare. N verlies door richteffect. P tłumienność odchyleniowa. S riktningsdämpning. (801)
4. **angular misalignment loss** : the extrinsic joint loss caused by angular deviation from the optimum alignment of source to optical fibre, fibre to fibre, or fibre to detector. ★ perte par désalignement angulaire → *perte 41.* R потери при угловом смещении осей. D Dämpfung durch Winkelversatz. E pérdida por desalineamiento angular. I perdita per disallineamento angolare. N hoekafwijkingsverlies. P tłumienność połączenia zewnętrzna kątowa. S vinkelfelsförlust. (731)

5. **antenna to medium coupling loss** (*Syn.* gain degradation) : → *degradation 3*
6. **azimuth loss** : a loss due to a misadjustment of the azimuth angle of the reproducing head with respect to the azimuth angle of the recording head. ★ perte par déréglage d'azimut → *perte 40*. R потери из-за перекоса. D Azimutfehleinstellung; Spaltfehleinstellung. E pérdida de azimut. I perdita per sregolazione di azimut. N spleetinstellingsverliezen. P straty skosu. S spaltvinkelförlust. (806)
7. **basic transmission loss (of a radio link)** (A_i ; L_b) : the transmission loss that would occur if the antennas were replaced by isotropic antennas with the same polarization as the real antennas, the propagation path being retained, but the effects of obstacles close to the antennas being disregarded. *Notes. 1* — The basic transmission loss is equal to the ratio of the equivalent isotropically radiated power of the transmitter system and the power available from an isotropic receiving antenna. *2* — The effect of the local ground close to the antenna is included in computing the antenna gain, but not in the basic transmission loss. ★ affaiblissement de propagation → *affaiblissement 14*. D Grundübertragungsdämpfungsmaß (einer Funkverbindung). P straty transmisyjne podstawowe. (705)
8. **calculation of efficiency from summation of losses** : → *efficiency 4*
9. **calculation of efficiency from total loss** : → *efficiency 5*
10. **capacitor losses** : the active power dissipated in the capacitor. ★ pertes d'un condensateur → *perte 54*. R потери конденсатора. D Kondensatorverluste. E pérdidas de un condensador. I perdite di un condensatore. N condensatorverliezen. P straty kondensatora. S kondensatorförluster. (436)
11. **cold loss** : the attenuation that occurs from the radio frequency output terminal to the radio frequency input terminal of an amplifier tube under cold conditions. ★ perte d'insertion à froid → *perte 30*. R потери в нерабочем режиме. D Kaltdämpfung. E pérdida en frío. I perdita di inserzione a freddo. N demping in rusttoestand. P tłumienie w stanie zimnym; straty w stanie zimnym. S effektförlust vid kyla. (531)
12. **composite loss** (of a two-port device) : the ratio, generally expressed in decibels, of the apparent power that a specified source would deliver to a load with zero reflection factor at its interface with the source, to the apparent power delivered to a specified load after insertion of a given two-port device between the source and the load. *Note.* — If the ratio defining the composite loss is less than one, its decibel value is negative and its converse or its opposite value in decibels called composite gain may be used. ★ affaiblissement composite → *affaiblissement 4*. R составные потери (четырехполюсника). D Betriebsdämpfung (eines Zweitors). E atenuación compuesta; pérdidas compuestas (de un dispositivo bipuerta). I attenuazione composta (di un elemento a due porte). N samengesteld verlies (van een tweepoort). P tłumienność złożona (dwuwrotnika). S driftdämpning. (702)
13. **counting loss** : a reduction of the observed counting rate due to the resolving time or to losses caused by phenomena such as pile-up. ★ perte de comptage → *perte 16*. R просчет. D Zählverluste. E pérdida de cuenta. I perdita di conteggio. N telverlies. P straty zliczania. S pulsförlust. (391)
14. **coupler loss** : the insertion loss from a chosen input port to a chosen output port with the remaining ports correctly terminated. ★ affaiblissement de coupleur → *affaiblissement 12*. R потери в разветвителе. D LWL-Koppeldämpfung. E pérdida del acoplador. I perdita dell'accoppiatore. N verlies van een koppelaar. P tłumienność sprzęgacza. S kopplarförlust. (731)
15. **coupling loss** : the loss of optical power obtained when light is coupled from one optical device to another, expressed either as an absolute value or as a relative value. ★ perte de couplage → *perte 18*. R потери ввода-вывода. D LWL-Ankoppeldämpfung. E pérdida de acoplo. I perdita d'accoppiamento. N koppelingsverlies. P tłumienność sprzężenia. S kopplingsförlust. (731)
16. **dielectric loss** : the power absorbed from a time-varying electric field in a dielectric and usually dissipated as heat. ★ perte diélectrique → *perte 27*. R диэлектрические потери. D dielektrischer Verlust. E pérdidas dieléctricas. I perdita dielettrica. N diëlektrische verliezen. P straty dielektryczne. S dielektrisk förlust. (121,212,841)
17. **dielectric loss angle** : → *angle 24*
18. **(dielectric) loss index** : → *index 9*
19. **(dielectric) loss index** : → *index 10*
20. **(dielectric) loss tangent** (*Syn.* dielectric dissipation factor) : → *factor 42*
21. **distribution losses** : losses occurring in the equipment involved in a distribution. ★ pertes de distribution → *perte 51*. R потери при распределении электрической энергии. D Verteilungsverluste. E pérdidas por distribución. I perdite di distribuzione. N distributieverliezen. P straty rozdziału energii. S distributionsförluster. (603)
22. **divergence loss** : the divergence factor expressed in decibels. ★ affaiblissement de divergence → *affaiblissement 13*. D Divergenzdämpfungsmaß; Defokussierungsdämpfungsmaß. P straty rozbieżności. (705)
23. **divergence loss** (*Syn.* spreading loss) : that part of the transmission loss due to the divergence, i.e. spreading of sound waves in accordance with the configuration of the system. *Note.* — Divergence loss exists, for example, for spherical waves emitted by a point source. ★ perte par divergence → *perte 42*. R потери на расхождение; потери распространения. D Streuverlust. E pérdida por divergencia. I perdita per divergenza del campo. N spreidingsverlies. P straty rozproszeniowe. S spridningsförlust. (801)
24. **eddy current loss** : the power absorbed by a material due to eddy currents. ★ pertes par courants de Foucault → *perte 58*. R потери на вихревые токи. D Wirbelstromverluste. E pérdidas por corrientes de Foucault. I perdite per correnti di Foucault. N wervelstroomverliezen. P straty wiroprądowe. S virvelströmsförlust. (221)
25. **efficiency loss in magnetic recording** : a value, generally expressed in decibels, of the ratio of an output quantity of a magnetic recorder or reproducer, to the same quantity theoretically computed, assuming that no losses occur. *Note.* — Losses are mainly considered with respect to frequency, recorded wavelength, etc. ★ perte d'efficacité en enregistrement magnétique → *perte 23*. R потери магнитной записи или воспроизведения. D Leistungsverlust bei der Magnetaufzeichnung, Wirkungsgrad. E pérdida de eficiencia en registro magnético. I perdita di efficienza della registrazione magnetica. N signaalverlies bij magnetische opname. P ..... S effektförlust vid magnetisk inspelning. (806)
26. **(energy) loss factor** : → *factor 68*
27. **energy losses** : the time integral of power losses. ★ pertes en énergie → *perte 55*. R потери энергии. D Arbeitsverluste. E pérdidas de energía. I perdite d'energia. N energieverliezen. P straty energii. S energiförluster. (603)
28. **external loss time** (*Syn.* external disabled time) : → *time 53*
29. **extrinsic joint loss** (*Syn.* misalignment loss) : that coupling loss of optical power caused by imperfect jointing. ★ perte extrinsèque de raccordement → *perte 33*. R внешние потери при соединении. D extrinsische Spleiß-Verluste. E pérdida extrínseca de una unión; pérdidas por desalineamiento. I perdita per disallineamento. N extrinsieke lasdemping; verlies ten gevolge van uitlijningsafwijking. P tłumienność połączenia zewnętrzna. S inpassningsförlust. (731)
30. **forward loss** : insertion loss in the forward direction of a microwave isolator or a circulator. ★ affaiblissement direct → *affaiblissement 27*. R прямые потери. D Verlust in Vorwärtsrichtung. E atenuación directa. I smorzamento diretto. N doorlaatverliezen. P straty w kierunku przepustowym; tłumienie w kierunku przepustowym. S framdämpning. (221)
31. **forward loss** (in a circulator or isolator) : attenuation of waves in the forward direction in a circulator or isolator. *Note.* — The forward loss is usually expressed in decibels. ★ affaiblissement direct → *affaiblissement 28*. R прямые потери (в циркуляторе или вентиле). D Vorwärtsdämpfung (in einem Zirkulator oder Einweg-Dämpfungsglied). E atenuación directa (en un circulador o en un aislador). I attenuazione diretta (in un circolatore o isolatore). N keerrichting. P straty w kierunku przepustowym (w cyrkulatorze lub izolatorze); tłumienie w kierunku przepustowym (w cyrkulatorze lub izolatorze). S framdämpning. (726)
32. **fractional counting loss** : counting loss referred to the number of received data. ★ taux de perte de comptage → *taux 26*. R относительный просчет. D relative Zählverluste. E tasa de pérdida de cuenta. I tasso di perdita di

conteggio; rateo di perdita di conteggio. N fractioneel telverlies. P względne straty zliczania. S relativ pulsförlust. (391)

33. **free-space basic transmission loss** (A_0 ; L_{bf}) : the transmission loss that would occur if the antennas were replaced by isotropic antennas located in a perfectly dielectric, homogeneous, isotropic and unlimited environment, the distance between the antennas being retained. *Note.* — If the distance d between the antennas is much greater than the wavelength λ, the free-space attenuation in decibels will be :

$$A_0 = 20 \log \left(\frac{4 \pi d}{\lambda} \right) \text{ dB}$$

★ affaiblissement d'espace libre → *affaiblissement 22.* D Freiraum-Grundübertragungsdämpfungsmaß. P straty transmisyjne podstawowe w wolnej przestrzeni. (705)

34. **gap loss** (*Syn.* longitudinal offset loss) : → *loss 45*

35. **gap loss** : a loss in output level due to the finite gap length of a reproducing head when the recorded wavelength approaches the gap length. ★ perte d'entrefer → *perte 25.* R щелевые потери. D Spaltverlust. E pérdida de entrehierro. I perdita di traferro. N spleetverliezen. P straty szczelinowe. S spaltförlust. (806)

36. **gyromagnetic resonance loss** : the power absorbed by a material due to gyromagnetic resonance. ★ pertes par résonance gyromagnétique → *perte 61.* R гиромагнитные резонансные потери. D Verluste durch gyromagnetische Resonanz. E pérdidas por resonancia giromagnética. I perdite per risonanza giromagnetica. N gyromagnetische resonantieverliezen. P straty przy rezonansie giromagnetycznym. S gyromagnetisk resonansförlust. (221)

37. **hysteresis loss** : the power absorbed by a material due to magnetic hysteresis. ★ pertes par hystérésis → *perte 59.* R потери на гистерезис. D Hystereseverluste. E pérdidas por histéresis. I perdite per isteresi. N hysteresisverliezen. P straty histerezowe. S hysteresförlust. (221)

38. **insertion loss** (of a two-port device) : the ratio, generally expressed in decibels, of the apparent power at a point in a transmission channel to the power at the same point after insertion of a given two-port device into the transmission channel immediately ahead of this point. *Note.* — If the ratio defining the insertion loss is less than one, its decibel value is negative, and its converse or opposite decibel value called "insertion gain" may be used. ★ affaiblissement d'insertion → *affaiblissement 25.* R вносимые потери (четырехполюсника). D Einfügungsverlust (eines Zweitors); Einfügungs-Dämpfungsmaß. E atenuación de inserción; pérdidas de inserción (de un dispositivo bipuerta). I perdita di inserzione (di un elemento a due porte). N insteekverlies (van een tweepoort). P tłumienność wtrąceniowa (dwuwrotnika). S inlänkningsdämpning. (702)

39. **insertion loss** : resulting from the insertion of a network into a transmission system, the ratio of the power delivered to that part of the system following the network, before insertion of the network, to the power delivered to that same part after insertion of the network. *Note.* — The insertion loss is generally expressed in decibels. ★ perte d'insertion → *perte 28.* R вносимые потери. D Einfügungsdämpfung. E pérdida de inserción. I perdita di inserzione. N tussenschakeldemping. P straty wtrąceniowe. S inlänkningsdämpning. (726)

40. **insertion loss** (of an optical component) : the extra optical attenuation caused by the insertion of an extra optical component into an optical system. ★ affaiblissement d'insertion → *affaiblissement 26.* R вносимые потери (оптического компонента). D Einfügungsdämpfung (einer optischen Komponente). E pérdida de inserción (de un componente óptico). I perdita per inserzione (di un componente ottico). N tussenschakeldemping (van een optische component). P tłumienność wtrąceniowa. S inlänkningsdämpning. (731)

41. **intrinsic joint loss** : the coupling loss of optical power, intrinsic to the fibre, caused by fibre parameter mismatches when two non-identical fibres are joined. *Note.* — Typical fibre parameters giving rise to intrinsic joint loss are geometric properties, difference in index profiles etc. ★ perte intrinsèque de raccordement → *perte 34.* R внутренние потери при соединении. D intrinsische Spleiß-Verluste. E pérdida intrínseca de una unión. I perdita intrinseca di giunzione. N intrinsieke lasdemping. P tłumienność połączenia wewnętrzna. S missanpassningsförlust. (731)

42. **lateral offset loss** (*Syn.* transverse offset loss) : the extrinsic joint loss caused by transverse deviation from optimum alignment of source to optical fibre, fibre to fibre or fibre to optical detector. ★ perte par décalage latéral → *perte 38.* R потери при боковом смещении; потери при поперечном смещении. D Dämpfung durch radialen Versatz; Dämpfung durch seitlichen Versatz. E pérdida por separación lateral; pérdida por separación transversal. I perdita per disallineamento laterale; perdita per disallineamento trasversale. N demping ten gevolge van dwarsafwijking. P tłumienność połączenia zewnętrzna osiowa. S sidförskjutningsförlust. (731)

43. **light loss factor** : → *factor 106*

44. **load loss** : a) of two-winding transformers (for the principal tapping): The active power absorbed at rated frequency when rated current is flowing through the line terminal(s) of one of the windings, the terminals of the other winding being short-circuited, and any winding fitted with tappings being connected on its principal tapping. b) of multi-winding transformers, related to a certain pair of windings (for the principal tapping): The active power absorbed at rated frequency when a current flows through the line terminal(s) of one of the windings of the pair, corresponding to the smaller of the rated power values of both windings of that pair, the terminals of the other winding of the same pair being short-circuited, any winding of the pair fitted with tappings being connected on its principal tapping and the remaining winding(s) being open-circuited. *Notes. 1* — The load loss can also be considered for tappings other than the principal tapping. The reference current of two-winding transformers is, for any tapping, equal to the tapping current. For multi-winding transformers, the reference current or reference power are related to a specified loading combination. *2* — The load loss is normally related to the appropriate reference temperature. ★ pertes dues à la charge → *perte 53.* R потери короткого замыкания. D Kurzschlußverluste. E pérdidas debidas a la carga. I perdite a carico; data coppia di avvolgimenti (per la presa principale). N kortsluitverlies. P straty obciążeniowe. S belastningsförluster. (421)

45. **longitudinal offset loss** (*Syn.* gap loss) : the extrinsic joint loss caused by a space between axially aligned fibres in a connecting point, or the deviation from the optimum spacing between an optical fibre and a source or an optical detector. ★ perte par espacement longitudinal → *perte 43.* R потери при продольном смещении. D Dämpfung durch Abstand der Faserstirnflächen; Dämpfung durch axialen Versatz. E pérdida por separación longitudinal; pérdida por gap. I perdita per spostamento longitudinale. N demping ten gevolge van longitudinale afwijking in lengterichting; spleetdemping (van een vezelkoppeling). P tłumienność połączenia zewnętrzna szczelinowa. S gapförlust. (731)

46. **loss** (*Syn.* losses) : the difference between the input power and the output power of a device. ★ pertes → *perte 48.* R потери. D Verluste. E pérdidas. I perdite. N verliezen. P straty. S förluster. (151)

47. **loss** (*Syn.* attenuation) : → *attenuation 3*

48. **loss angle** : → *angle 37*

49. **loss anisotropy factor** : → *factor 108*

50. **loss anisotropy factor** : → *factor 109*

51. **loss mode of operation** : → *mode 36*

52. **loss of load** : a sudden reduction of the power demand of the network. ★ perte de charge → *perte 15.* R сброс нагрузки. D Lastwegfall. E pérdida de carga. I perdita di carico. N verlies van belasting. P spadek (zrzut) obciążenia. S belastningsbortfall. (603)

53. **loss of synchronisation** (of a picture) : intermittent or permanent disappearance of the whole of a picture due to a frame or line synchronisation fault. *Note.* — Associated term : to lose synchronisation. ★ décrochage → *décrochage 9.* R потеря синхронизации (изображения). (723)

54. **loss of voltage** : → *voltage 102*

55. **loss ratio** : → *ratio 50*

56. **loss relative to free space** (A_n ; L_m) : the difference between the basic transmission loss and the free-space basic transmission loss, expressed in decibels. *Note.* — Loss relative to free space may be divided into losses of different types, such as : — absorption loss, for example by ionospheric, atmospheric gases or hydrometeors ; — diffraction loss, as for ground waves ; — effective reflection or scattering loss as in the ionospheric case including the results of any ionospheric focussing or defocussing; — polarization coupling loss, which can arise from

a polarization mismatch between the antennas for the particular ray path considered ; — antenna gain degradation, as in tropospheric scatter propagation ; — losses due to phase inerference between the direct ray and rays reflected from the ground, other obstacles or atmospheric layers. ★ affaiblissement par rapport à l'espace libre → *affaiblissement 45.* D Ausbreitungsdämpfungsmaß. P straty odniesione do wolnej przestrzeni. (705)

57. **loss tangent** (*Syn.* dielectric dissipation factor) : → *factor 41*
58. **loss tangent test** : → *test 49*
59. **losses** (*Syn.* loss) : → *loss 46*
60. **macrobend loss** : in an optical fibre, that loss attributable to macrobending. ★ affaiblissement par macrocourbures → *affaiblissement 43.* R потери при макроизгибе. D Makrokrümmungs-Verluste. E pérdida por macrocurvaturas. I perdita per macrocurvatura. N macrobochtenverlies. P tłumienie na makrozgięciu. S makroböjningsförlust. (731)
61. **(magnetic) loss angle** : → *angle 38*
62. **(magnetic) loss factor** : → *factor 115*
63. **magnetic loss resistance** : → *resistance 36*
64. **magnetic losses** : the power absorbed from a time varying magnetic field in a magnetic substance and dissipated as heat. *Note.* — Magnetic losses include hysteresis loss and eddy current loss. ★ pertes magnétiques → *perte 57.* R магнитные потери. D magnetische Verluste. E pérdidas magnéticas. I perdite magnetiche. N magnetische verliezen. P straty magnetyczne. S magnetiska förluster. (121)
65. **microbend loss** : in an optical fibre that loss attributable to microbending. ★ affaiblissement par microcourbures → *affaiblissement 44.* R потери при микроизгибе. D Mikrokrümmungs-Verluste. E pérdida por microcurvaturas. I perdita per microcurvature. N microbochtenverlies. P tłumienie na mikrozgięciu. S mikroböjningsförlust. (731)
66. **misalignment loss** (*Syn.* extrinsic joint loss) : → *loss 29*
67. **mode conversion loss** : the loss of power due to a mode conversion in waveguides. *Note.* — The mode conversion loss is generally expressed in decibels. ★ perte de conversion (de mode) → *perte 17.* R потери преобразования. D Modenwandlungs-Dämpfung. E pérdida de conversión de modo. I perdita di conversione. N modusomzettingsdemping. P straty transformacji rodzaju. S modomvandlingsförlust. (726)
68. **no-load loss** : the active power absorbed when a given voltage at rated frequency is applied to the terminals of one of the windings, the other winding(s) being open-circuited. *Note.* — Normally the applied voltage is the rated voltage and the energized winding, if fitted with tappings, is connected on its principal tapping. ★ pertes à vide → *perte 49.* R потери холостого хода. D Leerlaufverluste. E pérdidas en vacío. I perdite a vuoto. N nullastverlies. P straty stanu jałowego. S tomgångsförluster. (421)
69. **operating loss** : the attenuation that occurs from the radio frequency output terminal to the radio frequency input terminal of an amplifier tube under operating conditions. ★ perte d'insertion en fonctionnement → *perte 31.* R потери в рабочем режиме. D Rückflußdämpfung. E pérdida en funcionamiento. I perdita di inserzione in funzionamento. N demping in werktoestand. P tłumienie w stanie roboczym; straty w stanie roboczym. S effektförlust vid drift. (531)
70. **polarization coupling loss** (due to propagation effects) : that part of the transmission loss due to the mismatch between the polarization of the transmitted wave and the propagation medium or between the polarization of the incident wave and the polarization to which the receiving antenna responds. ★ affaiblissement (de couplage) de polarisation → *affaiblissement 11.* D Dämpfungsmaß infolge unvollkommener Polarisationskopplung (bei Ausbreitungseffekten). P straty sprzężenia polaryzacyjnego (w wyniku propagacji). (705)
71. **power losses** : the difference at a given moment in time between the total active input power and the total active output power in a network. ★ pertes en puissance → *perte 56.* R потери мощности в электрической сети. D Leistungsverluste. E pérdidas de potencia. I perdite di potenza. N vermogensverlies van een net (of van een bepaald netgedeelte). P straty mocy w sieci (lub w części sieci). S effektförluster. (603)
72. **present value of cost losses** : → *value 43*
73. **present worth of cost of losses** (*Syn.* present value of cost losses) : → *value 43*
74. **probability of information loss** : → *probability 8*
75. **probability of residual information loss** : → *probability 10*
76. **propagation loss** (*Syn.* transmission loss) : → *loss 109*
77. **rate of information loss** : → *rate 76*
78. **rate of residual information loss** : → *rate 78*
79. **ray path transmission loss** (A_t ; L_t) : the transmission loss for a particular propagation path equal to the basic transmission loss minus the transmitting and receiving antenna gains in the ray path directions. ★ affaiblissement de transmission pour un trajet (radioélectrique) → *affaiblissement 20.* D Übertragungsdämpfungsmaß des Strahlenweges. P straty transmisyjne wzdłuż promienia propagacji. (705)
80. **recording loss** : the attenuation, in a recording system, of the level of a recorded signal with respect to frequency. *Note.* — The loss may be due to different causes, e.g. the finite dimensions of a cutting stylus. ★ perte d'enregistrement → *perte 24.* R потери записи. D lineare Aufnahmeverzerrung. E pérdida de registro. I perdita di registrazione. N opneemverlies. P spadek poziomu zapisu. S inspelningsförluster. (806)
81. **reflection loss** : the ratio, generally expressed in decibels, of the apparent power that a specified source would deliver to a load with zero reflection factor at its interface with the source, to the apparent power delivered by the same source to a directly connected specified load. ★ affaiblissement de réflexion → *affaiblissement 15.* R потери отражения. D Reflexionsverlust(e); Reflexions-Dämpfungsmaß. E atenuación de reflexión; pérdidas de reflexión. I attenuazione di riflessione. N reflectieverlies. P tłumienność odbiciowa. S reflexionsdämpning. (702)
82. **refraction loss** : that part of the transmission loss due to refraction resulting from non-uniformity of the medium. ★ perte par réfraction → *perte 46.* R потери на рефракцию. D Brechungsverlust. E pérdida por refracción. I perdita per rifrazione. N brekingsverlies. P straty odbiciowe. S refraktionsförlust. (801)
83. **reproducing loss** : the attenuation, with respect to frequency, of the output of a reproducing transducer when compared to the output of an ideal reproducing transducer. *Note.* — The reproducing loss may be due in disk recording to the finite dimensions of the reproducing stylus tip, or to groove wall deformations, and in magnetic recording to the magnetic head gap length and/or head core losses, during reproduction. ★ perte de lecture → *perte 20.* R потери воспроизведения. D lineare Wiedergabeverzerrung; Wiedergabeverlust. E pérdida de lectura. I perdita di riproduzione. N weergeefverlies. P spadek poziomu odczytu. S återgivningsförluster. (806)
84. **residual loss** : the difference between the total loss and the sum of the eddy current and hysteresis losses. *Note.* — In a magnetic material, the division of the losses into eddy current loss, hysteresis loss and residual loss is based on assumptions that are not entirely justified. The definitions given here represent the accepted technical usage. ★ pertes résiduelles → *perte 62.* R остаточные потери. D Restverluste. E pérdidas residuales. I perdite residue. N restverliezen. P straty pozostałe. S restförlust. (221)
85. **return loss** : the modulus of the reciprocal of the reflection factor, generally expressed in decibels : *Note.* — When impedances can be defined, the return loss is given by the formula :

$$-20 \lg |r| = 20 \lg \left| \frac{\underline{Z} - \underline{Z}'}{\underline{Z} + \underline{Z}'} \right|$$

where $\underline{Z}$ is the characteristic impedance of a transmission line ahead of a discontinuity, or the impedance of a source, and $\underline{Z}'$ is the impedance after the discontinuity or the load impedance seen from the junction between the source and the load. ★ facteur d'adaptation → *facteur 22.* R обратные потери. D Rückwärtsverlust. E factor de adaptación (en reflexión). I fattore d'adattamento (in riflessione). N demping door onjuiste aanpassing. P tłumienność niedopasowania. S missanpassningsdämpning. (702)
86. **reverse loss** : insertion loss in the reverse direction of a microwave isolator or a circulator. ★ affaiblissement inverse → *affaiblissement 38.* R обратные потери. D Verlust in Rückwärtsrichtung. E atenuación inversa. I smorzamento

inverso. N verliezen in keerrichting. P straty w kierunku zaporowym; tłumienie w kierunku zaporowym. S backdämpning. (221)

87. reverse loss (in a circulator or isolator) : attenuation of waves in the reverse direction in a circulator or isolator. *Note.* — The reverse loss is usually expressed in decibels. ★ affaiblissement inverse → *affaiblissement 39.* R обратные потери (в циркуляторе или вентиле). D Rückwärtsdämpfung (in einem Zirkulator oder Einweg-Dämpfungsglied). E atenuación inversa (en un circulador o en un aislador). I attenuazione inversa (in un circolatore o isolatore). N keerverlies. P straty w kierunku zaporowym (w cyrkulatorze lub izolatorze); tłumienie w kierunku zaporowym (w cyrkulatorze lub izolatorze). S backdämpning. (726)

88. rotational hysteresis loss : the power absorbed by a material which is subjected to a magnetic field of constant magnitude, the direction of which rotates with respect to the material. ★ pertes par hystérésis en rotation → *perte 60.* R потери на вращательный гистерезис. D Rotationshystereseverluste. E pérdidas por histéresis rotacional. I perdite per isteresi in rotazione. N rotatiehysteresisverliezen. P straty histerezowe rotacyjne. S rotationshysteresförlust. (221)

89. sonar dome insertion loss : loss, caused by the insertion of a sonar dome, equal to the increase in transmission loss between the electrical terminals of a specified transducer and external field point at which sound is received or emitted. ★ perte par insertion du dôme du sonar → *perte 45.* R звукопрозрачность обтекателя гидроакустической станции. D Sonardom-Dämmung. E pérdida por inserción de la bóveda del sonar. I attenuazione della cupola del sonar. N tussenschakeldemping van de sonarkoepel. P tłumienie kopuły sonaru. S sonardomdämpning. (801)

90. sonar dome loss directivity-pattern : → *directivity-pattern 1*

91. specific total loss (*Syn.* total loss (mass) density) : → *density 38*

92. splice loss : that insertion loss attributable to an optical fibre splice. ★ affaiblissement d'épissure → *affaiblissement 21.* R потери в неразъемном соединителе. D LWL-Spleiß-Dämpfung. E pérdidas por empalme. I perdita di giunzione. N lasdemping. P tłumienność połączenia (włókien). S skarvförlust. (731)

93. spreading loss : the attenuation of an electromagnetic wave due uniquely to the fact that with increasing distance the energy is distributed over a wider area. *Note.* — In a homogeneous and isotropic medium, the spreading loss is characterized by a decrease of the power flux density in proportion to the reciprocal of the square of the distance to the source. ★ affaiblissement géométrique → *affaiblissement 36.* D geometrische Ausbreitungsdämpfung. P straty rozprzestrzeniania. (705)

94. spreading loss (*Syn.* divergence loss) : → *loss 23*

95. stand-by losses (*Syn.* standing losses) : the power consumed by electroheating equipment to maintain the rated temperature at the steady state only. ★ puissance de maintien → *puissance 89.* R потери холостого хода. D Warmhalteverluste. E potencia de mantenimiento. I potenza di mantenimento. N stationair verlies; warmhoudverlies. P straty stanu jałowego. S varmhållningsförlust; tomgångsförlust. (841)

96. standing losses (*Syn.* stand-by losses) : → *loss 95*

97. supplementary load loss : the loss figure given by subtracting the I^2R loss (corrected to the appropriate reference temperature) from the load loss. *Note.* — R is equal to the d.c. resistance. ★ pertes supplémentaires (dues à la charge) → *perte 63.* R добавочные потери (в опыте короткого замыкания). D Zusatzverluste. E pérdidas suplementarias (debidas a la carga). I perdite addizionali. N bijkomend kortsluitverlies. P straty dodatkowe. S tillsatsförluster. (421)

98. system loss (A_s ; L_s) : the ratio, usually expressed in decibels, in a radio link, of the radio frequency power input to the terminals of the transmitting antenna, and the resultant radio frequency signal power available at the terminals of the receiving antenna. *Notes. 1* — The available power is the maximum real power which a source can deliver to a load, i.e. the power which would be transferred if the impedances were conjugately matched. *2* — The system loss excludes losses in feeder lines but includes all losses in radio frequency circuits which are integral parts of the antenna, such as losses in conducting, or dielectric radiating elements, antenna loading coil losses, terminating resistor losses, and ground losses in the vicinity of the antenna. ★ affaiblissement entre bornes d'antennes → *affaiblissement 33.* D Systemdämpfungsmaß. P straty międzyantenowe (linii radiowej). (705)

99. tangent of the loss angle (of a capacitor) : → *tangent 4*

100. thermal losses : the quantity of heat lost during the heating process, being the difference between the total heat input and useful heat. ★ pertes calorifiques → *perte 50.* R тепловые потери. D Verlustwärme. E pérdidas térmicas; pérdidas caloríficas. I perdite termiche. N warmteverliezen. P straty cieplne. S värmeförlust. (841)

101. total loss : the difference between the input and the output. ★ pertes totales → *perte 65.* R суммарные потери. D Gesamtverluste. E pérdidas totales. I perdite totali. N totale verliezen. P straty całkowite. S totalförluster. (411)

102. total loss (mass) density : → *density 38*

103. total loss (of a radio link) (A_l ; L_l) : the ratio, usually expressed in decibels, between the radio frequency power supplied by the transmitter of a radio link and the radio frequency power supplied to the corresponding receiver in real installation, propagation and operational conditions. *Note.* — It is necessary to specify in each case the points at which the power supplied by the transmitter and the power to the receiver are determined, for example : — before or after the radio frequency filters or multiplexers that may be employed at the sending or the receiving end, — at the input or at the output of the transmitting and receiving antenna feed lines. ★ affaiblissement (global) → *affaiblissement 37.* D (Gesamt-)Dämpfungsmaß (einer Funkverbindung). P straty całkowite (linii radiowej). (705)

104. total loss (volume) density : → *density 39*

105. total losses : the sum of the no-load loss and the load loss. *Note.* — For multi-winding transformers, the total losses refer to a specified loading combination. ★ pertes totales → *perte 66.* R суммарные потери (тансформатора). D Gesamtverluste. E pérdidas totales. I perdite totali. N totaal verlies. P straty ogólne (całkowite). S totala förluster. (421)

106. transducer loss (of a two-port device) : the ratio, generally expressed in decibels, of the available power from a specified source to the active power delivered to a load of given impedance after insertion of a given two-port device between the source and the load. *Note.* — If the ratio defining the transducer loss is less than one, its decibel value is negative, and its converse or its opposite value in decibels called transducer gain may be used. ★ affaiblissement transductique → *affaiblissement 53.* R потери преобразования (четырехполюсника). D Wirkdämpfung (eines Zweitors). E atenuación de un transductor (de un dispositivo bipuerta). I attenuazione di trasduzione (di un elemento a due porte). N overdragerverliezen (van een tweepoort). P tłumienność transdukcji (w dwuwrotniku). S aktiv driftdämpning. (702)

107. transmission loss : attenuation of a signal between the two ends of a link.. ★ affaiblissement de transmission → *affaiblissement 17.* R потери передачи. D Übertragungsverlust(e); Transmission-Dämpfung(smaß). E atenuación de transmisión; pérdidas de transmisión. I attenuazione di trasmissione. N transmissiedemping. P tłumienie (sygnału). S överföringsdämpning. (702)

108. transmission loss (of an optical path) : the loss of an optical transmission path at a particular wavelength between two consecutive opto-electronic equipments. ★ affaiblissement de transmission → *affaiblissement 19.* R потери при передаче (через оптический канал). D Übertragungsdämpfung (einer optischen Verbindung). E pérdida de transmisión (de una trayectoria óptica). I perdita per trasmissione (lungo un cammino ottico). N transmissiedemping (van een optisch traject). P tłumienność drogi transmisyjnej. S transmissionsförlust. (731)

109. transmission loss (*Syn.* propagation loss) : reduction in sound pressure level between two designated locations in a sound transmission system, one location often being at reference distance from the source. ★ perte de transmission → *perte 22.* R затухание; потери на распространение. D Ausbreitungsmaß. E pérdida de transmisión; pérdida de propagación. I perdita per trasmissione. N voortplantingsverlies. P tłumienność (układu transmisyjnego). S transmissionsdämpning; reduktionstal. (801)

110. transmission loss (*Syn.* sound reduction index) : → *index 40*

111. **transmission loss (of a radio link)** (A ; L) : the ratio, usually expressed in decibels, for a radio link, of the power radiated by the transmitting antenna to the power that would be available at the receiving antenna output if there were no loss in the radio frequency circuits of the antennas, it being assumed that the antenna radiation characteristics are retained. *Note.* — Transmission loss is equal to system loss minus the loss in the radio frequency circuits which are integral parts of the antennas. ★ affaiblissement de transmission → *affaiblissement 18.* D Übertragungsdämpfungsmaß (einer Funkverbindung). P straty transmisyjne (linii radiowej). (705)
112. **transmission losses** : losses occurring in the equipment involved in a transmission network. ★ pertes de transport → *perte 52.* R потери при передаче электрической энергии. D Übertragungsverluste. E pérdidas por transporte. I perdite di trasmissione. N transportverliezen. P straty przesyłu energii. S transmissionsförluster; överföringsförluster. (603)
113. **transverse offset loss** (*Syn.* lateral offset loss) : → *loss 42*
114. **utilization time of power losses** : → *time 224*

loss-of-synchronism

1. **automatic loss-of-synchronism control equipment** : → *equipment 5*

loss-of-voltage

1. **automatic loss-of-voltage tripping equipment** : → *equipment 6*

lost

1. **lost call** : → *call 42*
2. **lost call attempt** : → *attempt 8*
3. **lost energy** (*Syn.* energy not supplied) : → *energy 37*
4. **lost time** : → *time 82*

loudness

1. **calculated loudness level** : → *level 12*
2. **difference limen for loudness** : → *limen 1*
3. **loudness** : that attribute of auditory sensation in terms of which sounds may be ordered on a scale extending from soft to loud. *Note.* — Loudness depends primarily upon the sound pressure of the stimulus, but also upon its frequency, waveform and duration. ★ sonie → *sonie 3.* R громкость. D Lautheit. E sonoridad. I sensazione (sonora). N luidheid. P głośność. S hörstyrka. (722,801)
4. **loudness level** : → *level 55*
5. **loudness rating** : → *rating 8*

loudspeaker

1. **composite loudspeaker** (*Syn.* multichannel loudspeaker) : → *loudspeaker 16*
2. **cone loudspeaker** : loudspeaker in which the radiating element has the form of a cone. ★ haut-parleur à cône → *haut-parleur 4.* R конусный громкоговоритель; диффузорный громкоговоритель. D Konuslautsprecher. E altavoz de cono. I altoparlante a cono. N conusluidspreker. P głośnik stożkowy. S konhögtalare. (801)
3. **dome loudspeaker** : loudspeaker in which the radiation element has the form of a sphere segment. ★ haut-parleur à dôme → *haut-parleur 5.* R купольный громкоговоритель. D Kugellautsprecher. E altavoz de bóveda. I altoparlante a calotta sferica. N koepelluidspreker. P głośnik czaszowy. S ..... (801)
4. **electrodynamic loudspeaker** (*Syn.* moving-conductor loudspeaker) : → *loudspeaker 14*
5. **electromagnetic loudspeaker** : loudspeaker that operates by variation of the reluctance of a magnetic circuit. ★ haut-parleur électromagnétique → *haut-parleur 11.* R электромагнитный громкоговоритель. D elektromagnetischer Lautsprecher. E altavoz electromagnético. I altoparlante elettromagnetico. N elektromagnetische luidspreker. P głośnik elektromagnetyczny. S elektromagnetisk högtalare. (801)
6. **electrostatic loudspeaker** : loudspeaker that operates by electrostatic forces. ★ haut-parleur électrostatique → *haut-parleur 12.* R электростатический громкоговоритель. D elektrostatischer Lautsprecher. E altavoz electrostático. I altoparlante elettrostatico. N elektrostatische luidspreker. P głośnik elektrostatyczny; głośnik pojemnościowy. S elektrostatisk högtalare. (801)
7. **horn loudspeaker** : loudspeaker in which the radiating element is coupled to the medium by means of a horn. ★ haut-parleur à pavillon → *haut-parleur 7.* R рупорный громкоговоритель. D Trichterlautsprecher. E altavoz de bocina. I altoparlante a tromba. N hoornluidspreker. P głośnik tubowy. S hornhögtalare; tratthögtalare. (801)
8. **ionic loudspeaker** : loudspeaker that operates by the interaction between an ionic plasma and the surrounding air. ★ haut-parleur ionique → *haut-parleur 14.* R ионный громкоговоритель. D Ionenlautsprecher. E altavoz iónico. I altoparlante ionico; ionofono. N ionenluidspreker. P głośnik jonowy. S jonhögtalare. (801)
9. **loudspeaker** : transducer by which acoustic waves are obtained from electrical oscillation waves and designed to radiate acoustic power into the surrounding medium. *Note.* — The term "loudspeaker" applies to a loudspeaker unit and also to the acoustical enclosure. ★ haut-parleur → *haut-parleur 1.* R громкоговоритель. D Lautsprecher. E altavoz. I altoparlante. N luidspreker. P głośnik. S högtalare. (801)
10. **loudspeaker unit** : electroacoustical transducer, without any associated device such as an acoustical enclosure or baffle, which is designed to radiate acoustic energy into the surrounding medium. ★ haut-parleur élémentaire → *haut-parleur 13.* R головка громкоговорителя. D Lautsprechersystem. E altavoz elemental. I ..... N losse luidspreker. P głosnik (elementarny, bez obudowy). S högtalarenhet. (801)
11. **magnetostriction loudspeaker** : loudspeaker that operates by the magnetostrictive deformation of material. ★ haut-parleur à magnétostriction → *haut-parleur 6.* R магнитострикционный громкоговоритель. D magnetostriktiver Lautsprecher. E altavoz de magnetostricción. I altoparlante magnetostrittivo. N magnetostrictieluidspreker. P głośnik magnetostrykcyjny. S magnetostriktiv högtalare. (801)
12. **monitor loudspeaker** : a high quality loudspeaker for assessing the sound quality of a programme. ★ haut-parleur de contrôle → *haut-parleur 9.* R контрольный громкоговоритель. (723)
13. **moving-coil loudspeaker** (*Syn.* moving-conductor loudspeaker) : → *loudspeaker 14*
14. **moving-conductor loudspeaker** (*Syn.* moving-coil loudspeaker; electrodynamic loudspeaker) : loudspeaker that operates by motion of a conductor or a coil, carrying a varying current, in a steady magnetic field. ★ haut-parleur à conducteur mobile → *haut-parleur 3.* R электродинамический громкоговоритель. D elektrodynamischer Lautsprecher. E altavoz de conductor móvil; altavoz de bobina móvil; altavoz electrodinámico. I altoparlante a conduttore mobile; altoparlante a bobina mobile; altoparlante elettrodinamico. N elektrodynamische luidspreker. P głośnik magnetoelektryczny; głośnik o ruchomej cewce. S elektrodynamisk högtalare. (801)
15. **multicellular loudspeaker** : horn loudspeaker in which the radiating element is coupled to the medium by means of two or more juxtaposed horns. ★ haut-parleur multicellulaire → *haut-parleur 15.* R громкоговоритель с секционированным рупором. D Vielzellenlautsprecher. E altavoz multicelular. I altoparlante multicellulare. N meercellige luidspreker. P głośnik tubowy wielodrożny. S cellhögtalare. (801)
16. **multichannel loudspeaker** (*Syn.* composite loudspeaker) : assembly consisting of two or more loudspeakers usually with dividing networks, designed to radiate simultaneously in particular frequency bands. ★ haut-parleur à voies multiples → *haut-parleur 8.* R многополосный громкоговоритель. D Mehrkanallautsprecher. E altavoz de vías múltiples. I altoparlante multicanale. N luidsprekercombinatie. P zespół głośnikówy wielokanałowy. S kombinationshögtalare; flerkanalshögtalare. (801)
17. **piezoelectric loudspeaker** : loudspeaker that operates by the deformation of piezoelectric material. ★ haut-parleur piézoélectrique → *haut-parleur 16.* R пьезоэлектрический громкоговоритель. D piezoelektrischer Lautsprecher. E altavoz piezoeléctrico. I altoparlante piezoelettrico. N piëzo-elektrische luidspreker. P głośnik piezoelektryczny. S piezoelektrisk högtalare. (801)
18. **pneumatic loudspeaker** : loudspeaker that operates by controlled variations of an air stream. ★ haut-parleur pneumatique → *haut-parleur 17.* R пневматический громкоговоритель. D pneumatischer Lautsprecher. E altavoz neumático. I altoparlante pneumatico. N pneumatische

luidspreker. P głośnik pneumatyczny. S pneumatisk högtalare. (801)

19. **(telephone) loudspeaker** : a telephone receiver intended to radiate acoustic power in the surrounding medium. ★ haut-parleur (téléphonique) → *haut-parleur 18.* R (телефонный) громкоговоритель. D (Telefon-) Lautsprecher. E altavoz (telefónico). I altoparlante (telefonico). N (telefoon) luidspreker. P głośnik (telefoniczny). S telefonhögtalare. (722)

loudspeaking

1. **loudspeaking (telephone) set** : → *set 32*

louver

1. **louver** (*Syn.* louvre) : → *louvre 1*

louvre

1. **louvre** (*Syn.* spill shield; louver) : screen made of translucent or opaque components and geometrically disposed to prevent lamps from being directly visible over a given angle. ★ paralume → *paralume 1.* R экранирующая решетка. D Abdeckung; Raster. E celosía. I schermo. N (licht)rooster. P raster. S bländskydd. (845)

low

1. **arc furnace low reactance connection** : → *connection 3*
2. **"low band" standards** ; → *standard 13*
3. **low conductivity polymer** : → *polymer 2*
4. **low frequency** : → *frequency 125*
5. **low level language** : → *language 5*
6. **low load factor consumer** : → *consumer 6*
7. **low load factor tariff** : → *tariff 17*
8. **low noise antenna** : → *antenna 70*
9. **low pressure mercury (vapour) lamp** : → *lamp 36*
10. **low pressure sodium (vapour) lamp** : → *lamp 37*
11. **low temperature antenna** (*Syn.* low noise antenna) : → *antenna 70*
12. **low thermal mass furnace** : → *furnace 34*
13. **lower explosive limit** : → *limit 13*
14. **lower range limit** : → *limit 14*
15. **lower range value** : → *value 26*
16. **lower shield** (*Syn.* skirt) : → *skirt 1*
17. **lower sideband** : → *sideband 4*
18. **tubular clear emitter (low temperature)** : → *emitter 14*

low-angle

1. **low-angle ray** : → *ray 15*

low-beam

1. **low-beam headlight** (*Syn.* dipped-beam headlight) : → *headlight 1*

lowest

1. **lowest useful frequency** : → *frequency 126*
2. **lowest voltage of a system** : → *voltage 103*

low-frequency

1. **low-frequency high voltage test** : → *test 50*

low-load

1. **low load factor consumer** : → *consumer 6*
2. **low load factor tariff** : → *tariff 17*
3. **low-load tariff** (*Syn.* off-peak tariff) : → *tariff 27*

low-noise

1. **low-noise amplifier** : → *amplifier 18*

low-pass

1. **low-pass filter** : → *filter 27*
2. **low-pass filter** : → *filter 28*

low-velocity

1. **low-velocity camera tube** : → *camera tube 6*
2. **low-velocity scanning** : → *scanning 5*

low-voltage

1. **dedicated low-voltage wiring** : → *wiring 1*
2. **low voltage** (*Syn.* LV (abbreviation)) : a set of voltage levels used for the distribution of electricity and whose upper limit is generally accepted to be 1 000 V a.c. ★ basse tension → *basse tension 1.* R низкое напряжение. D Niederspannung. E baja tensión; B.T. (abreviatura). I bassa tensione; BT (abbreviazione). N laagspanning; LS (afgekort). P napięcie niskie. S lågspänning. (601)
3. **low voltage circuit** : → *circuit 111*
4. **low voltage consumer** : → *consumer 7*
5. **low voltage tariff** : → *tariff 18*
6. **low voltage terminal** : → *terminal 17*
7. **low-voltage regulation** : → *regulation 9*
8. **low-voltage winding** : → *winding 37*

LP

1. **LP mode** (*Syn.* linearly polarised mode) : → *mode 35*

LSU

1. **LSU** (*Syn.* lone signal unit) : → *unit 38*

lubricated

1. **disk and wiper lubricated bearing** : → *bearing 13*
2. **flood lubricated bearing** : → *bearing 14*
3. **forced lubricated bearing** : → *bearing 15*
4. **oil ring lubricated bearing** : → *bearing 22*
5. **pressure lubricated bearing** : → *bearing 27*
6. **wick lubricated bearing** : → *bearing 37*

LUF

1. **LUF** (*Syn.* lowest useful frequency) : → *frequency 126*

lug

1. **break-out lug** : a lug in the record preserving sensor hole which, when broken out after recording, will activate the function of the hole. ★ barrette de sécurité → *barrette 2.* R упор кармана кассеты. D Ausbrechzunge. E tope de seguridad. I linguetta asportabile. N uitbreeknok. P języczek bezpieczeństwa. S spärrhålstunga. (806)
2. **jumper lug** (*Syn.* jumper flag) : → *flag 1*

luggage

1. **motor luggage van** : → *van 1*

lumbered

1. **lumbered synthetic quartz crystal** (*Syn.* pre-dimensioned bar) : → *bar 10*

lumen

1. **ballast lumen factor** : → *factor 16*
2. **lumen** (lm) : SI unit of luminous flux : luminous flux emitted in unit solid angle (steradian) by a uniform point source having a luminous intensity of 1 candela. (9th General Conference of Weights and Measures, 1948) *Equivalent definition.* Luminous flux of a beam of monochromatic radiation whose frequency is 540×10^{12} hertz and whose radiant flux is 1/683 watt. ★ lumen → *lumen 1.* R люмен. D Lumen. E lumen. I lumen. N lumen. P lumen. S lumen. (845)
3. **lumen maintenance** (*Syn.* luminous flux maintenance factor) : → *factor 112*

luminaire

1. **adjustable luminaire** : luminaire of which the main part may be turned or moved by means of appropriate devices. *Note.* — An adjustable luminaire may be fixed or portable. ★ luminaire ajustable → *luminaire 5.* R регулируемый светильник. D verstellbare Leuchte. E luminaria orientable. I apparecchio di illuminazione regolabile. N verstelbaar armatuur. P oprawa nastawna. S ställbar armatur. (845)
2. **asymmetrical luminaire** : luminaire with an asymmetrical luminous intensity distribution. ★ luminaire asymétrique → *luminaire 8.* R асимметричный светильник. D asymmetrische Leuchte. E luminaria asimétrica. I apparecchio di illuminazione asimmetrico. N armatuur met asymmetrische lichtsterkteverdeling. P oprawa asymetryczna. S osymmetrisk armatur. (845)
3. **bulkhead luminaire** : protected luminaire of compact design intended to be fixed directly on a vertical or horizontal surface. ★ hublot → *hublot 1.* R ..... D Bodenleuchte. E plafón. I oblò. N ..... P plafoniera. S skeppsarmatur. (845)

4. **compressed air luminaire** (*Syn.* air-turbo lamp) : → *lamp 1*
5. **explosion-proof luminaire** (*Syn.* flameproof luminaire) : → *luminaire 7*
6. **face luminaire** : mine luminaire portable or otherwise, providing illumination in working face areas. ★ luminaire de front → *luminaire 9.* R забойный светильник. D Ortsleuchte. E luminaria de talla. I apparecchio per cantiere. N lamp voor werkfrontverlichting. P lampa przodkowa. S frontstrålkastare. (845)
7. **flameproof luminaire** (*Syn.* explosion-proof luminaire) : luminaire which satisfies the appropriate regulations applicable to equipment with explosion-proof enclosure, for use in situations where there is a risk of explosion. ★ luminaire antidéflagrant → *luminaire 6.* R взрывозащищенный светильник. D explosiongeschützte Leuchte. E luminaria antideflagrante. I apparecchio di illuminazione antideflagrante. N explosieveilig armatuur. P oprawa przeciwwybuchowa. S armatur i explosionsskyddat utförande. (845)
8. **haulageway luminaire** : mine luminaire designed for lighting in mining haulageways and operated from mains network. ★ luminaire de galerie → *luminaire 10.* R светильник для откатных выработок. D Streckenleuchte. E luminaria de galería. I apparecchio per galleria. N lamp voor galerijverlichting. P lampa chodnikowa. S ortarmatur. (845)
9. **induction luminaire** : mine luminaire, connected to an electric network by means of the open magnetic circuit of a transformer which is an integral part of the luminaire. ★ luminaire à alimentation par induction → *luminaire 2.* R индукционный светильник. D Induktionsleuchte. E luminaria de inducción. I apparecchio a induzione. N inductielamp. P lampa indukcyjna. S ..... (845)
10. **intrinsically safe luminaire** : mine luminaire whose safety results from the use of intrinsically safe electrical circuits. ★ luminaire de sécurité intrinsèque → *luminaire 13.* R искробезопасный светильник. D eigensichere Leuchte. E luminaria intrínsecamente segura. I apparecchio a sicurezza intrinseca. N intrinsiek veilige mijnlamp. P lampa iskrobezpieczna. S gruvarmatur i egensäkert utförande. (845)
11. **luminaire** : apparatus which distributes, filters or transforms the light transmitted from one or more lamps and which includes, except the lamps themselves, all the parts necessary for fixing and protecting the lamps and, where necessary, circuit auxiliaries together with the means for connecting them to the electric supply. *Notes. 1* — The term lighting fitting is deprecated. *2* — In the USSR, the term "fonar" is used in public and transport lighting, and also sometimes to describe portable luminaires. ★ luminaire → *luminaire 1.* R светильник. D Leuchte. E luminaria. I apparecchio di illuminazione. N armatuur. P oprawa oświetleniowa. S (ljus)armatur. (845)
12. **luminaire efficiency** (*Syn.* light output ratio) : → *ratio 49*
13. **luminaire guard** : → *guard 7*
14. **mine luminaire** : luminaire comprising a casing and sometimes an accumulator, provided for illumination in all areas of an underground mine. ★ luminaire de mine → *luminaire 11.* R рудничный светильник. D Grubenleuchte. E luminaria de mina. I apparecchio per miniera. N mijnlamp. P lampa górnicza. S gruvarmatur. (845)
15. **mine rescue luminaire** : portable mine luminaire with integral power source designed for rescue operations. ★ lampe de sauveteur → *lampe 42.* R рудничный светильник для горноспасательных работ. D Rettungsleuchte für Grubenwehrmannschaften. E luminaria de mina de salvamento. I apparecchio per squadre di salvataggio. N lamp voor reddingsploegen. P lampa ratownicza. S räddningslampa. (845)
16. **ordinary luminaire** : luminaire without special protection against dust or moisture. ★ luminaire ordinaire → *luminaire 18.* R незащищенный светильник. D gewöhnliche Leuchte. E luminaria ordinaria. I apparecchio di illuminazione ordinario. N gewoon armatuur. P oprawa zwykła. S armatur i normalutförande. (845)
17. **pendant luminaire** (*Syn.* suspended luminaire) : luminaire provided with a cord, chain, tube, etc., which permits it to be suspended from a ceiling or a wall support. ★ luminaire suspendu → *luminaire 21.* R подвесной светильник. D Hängeleuchte (CH); Pendelleuchte (CH). E luminaria suspendida. I apparecchio di illuminazione a sospensione. N hangarmatuur. P oprawa zwieszakowa. S hängarmatur; pendelarmatur. (845)
18. **permissible luminaire** : mine luminaire designed and tested for use in areas where explosive methane gas or coal dust may be present. ★ luminaire antigrisouteux → *luminaire 7.* R взрывобезопасный светильник. D schlagwettergeschützte Grubenleuchte. E luminaria anti-grisutoso. I apparecchio di sicurezza. N mijngasveilige lamp. P lampa przeciwwybuchowa górnicza. S ..... (845)
19. **portable luminaire** : luminaire which can easily be moved from one place to another even while connected to the electric supply. ★ luminaire mobile → *luminaire 17.* R переносной светильник. D ortsveränderliche Leuchte. E luminaria portátil. I apparecchio di illuminazione mobile. N verplaatsbaar armatuur. P oprawa przenośna. S flyttbar armatur. (845)
20. **portable mine luminaire** : mine luminaire with integral or mains-operated power source, which can supply light while being moved. ★ luminaire de mine portatif → *luminaire 12.* R рудничный переносной светильник. D tragbare Grubenleuchte. E luminaria de mina portátil. I apparecchio portatile per miniera. N draagbare mijnlamp. P lampa górnicza przenośna. S flyttbar gruvarmatur. (845)
21. **protected luminaire** : luminaire with special protection against ingress of dust, moisture or water. *Note.* — IEC Publication 598-1 considers amongst others the following types of protected luminaires: dust-proof luminaire, dust-light luminaire, drip-proof luminaire, splash-proof luminaire, rainproof luminaire, jet-proof luminaire, watertight luminaire. ★ luminaire protégé → *luminaire 20.* R защищенный светильник. D geschützte Leuchte. E luminaria protegida. I apparecchio di illuminazione protetto. N vocht en stofdichtarmatuur. P oprawa zabezpieczona. S kapslad armatur. (845)
22. **recessed luminaire** : luminaire suitable to be fully or partly recessed into a mounting surface. ★ luminaire encastré → *luminaire 15.* R встроенный светильник. D Einbauleuchte. E luminaria empotrada. I apparecchio di illuminazione da incasso. N inbouwarmatuur. P oprawa wbudowana. S infälld armatur. (845)
23. **suspended luminaire** (*Syn.* pendant luminaire) : → *luminaire 17*
24. **symmetrical luminaire** : luminaire with a symmetrical luminous intensity distribution. *Note.* — The symmetry may refer to an axis or to a plane. ★ luminaire symétrique → *luminaire 22.* R симметричный светильник. D symmetrische Leuchte. E luminaria simétrica. I apparecchio di illuminazione simmetrico. N armatuur met symmetrische lichtsterkteverdeling. P oprawa symetryczna. S symmetrisk armatur. (845)
25. **wide angle luminaire** : luminaire which distributes the light over a comparatively wide solid angle. *Note.* — In contrast with wide angle luminaires, narrow angle luminaires could have been mentioned but practically these are projectors. ★ luminaire extensif → *luminaire 16.* R широкоизлучатель. D Weitwinkel-Leuchte; Breitstrahler. E luminaria difusora. I apparecchio di illuminazione a fascio largo. N breedstralend armatuur. P oprawa szerokostrumienna. S bredstrålande armatur. (845)

luminance

1. **build-up (of luminance)** : → *build-up 4*
2. **coefficient of retroreflected luminance** : → *coefficient 8*
3. **compression of the luminance range** : → *compression 9*
4. **equivalent luminance** (of a field of given size and shape, for a radiation of arbitrary relative spectral distribution) (L_{eq}) : luminance of a comparison field in which the radiation has the same relative spectral distribution as that of a Planckian radiator at the temperature of freezing platinum and which has the same brightness as the field considered under the specified photometric conditions of measurement ; the comparison field must have a specified size and shape which may be different from that of the field considered. Unit: $cd \cdot m^{-2}$ *Note.* — A comparison field may also be used in which the radiation has a relative spectral distribution different from that of a Planckian radiator at the temperature of freezing platinum (T = 2042 K), if the equivalent luminance of this field is known under the same conditions of measurement. ★ luminance équivalente → *luminance 22.* R эквивалентная яркость (поля определенной формы, размеров и произвольного спектрального распределения излучения). D äquivalente Leuchtdichte (eines Feldes gegebener Größe und Form für eine Strahlung beliebiger relativer spektraler Verteilung).

E luminancia equivalente. I luminanza equivalente. N equivalente luminantie. P luminancja równoważna. S ekvivalent luminans. (845)

5. **equivalent veiling luminance** (for disability glare or veiling reflections) : the luminance that, when added by superposition to the luminance of both the adapting background and the object, makes the luminance threshold or the luminance difference threshold the same under the two following conditions : (1) glare present, but no additional luminance ; (2) additional luminance present, but no glare. ★ luminance équivalente de voile → *luminance 23.* R яркость эквивалентной вуали (для слепящей блескости или отражений вуали). D äquivalente Schleierleuchtdichte (für physiologische Blendung oder Schleierreflexionen). E luminancia velante equivalente. I luminanza di velo equivalente. N equivalente sluierluminantie. P luminancja równoważna zamglenia. S ekvivalent slöjluminans. (845)
6. **expansion of the luminance range** : → *expansion 7*
7. **field-time luminance distortion** : → *distortion 37*
8. **line-time luminance distortion** : → *distortion 52*
9. **luminance** (of a source, in one direction) (L_v) : the luminous flux of an elementary source in one direction, divided by the apparent surface area of this source in the direction being considered. *Note.* — In the SI system of units the luminance is expressed in candelas per square metre (cd/m²). ★ luminance → *luminance 16.* R яркость (источника в одном направлении). (723)
10. **luminance** (in a given direction, at a given point of a real or imaginary surface) (L_v; L) : quantity defined by the formula

$$L_v = \frac{d\Phi_v}{dA \cdot \cos\theta \cdot d\Omega}$$

where $d\Phi_v$ is the luminous flux transmitted by an elementary beam passing through the given point and propagating in the solid angle $d\Omega$ containing the given direction ; dA is the area of a section of that beam containing the given point ; θ is the angle between the normal to that section and the direction of the beam. Unit: $cd \cdot m^{-2} = lm \cdot m^{-2} \cdot sr^{-1}$ *Note.* — See notes 1 to 5 to "radiance". ★ luminance (lumineuse) → *luminance 24.* R яркость (в данном направлении, в данной точке реальной или воображаемой поверхности). D Leuchtdichte (in einer gegebenen Richtung, in einem gegebenen Punkt einer realen oder imaginären Oberfläche). E luminancia. I luminanza. N luminantie. P luminancja świetlna. S luminans. (845)
11. **luminance axis** : → *axis 5*
12. **luminance coefficient** : → *coefficient 31*
13. **luminance compensation** : → *compensation 7*
14. **luminance difference threshold** : → *threshold 7*
15. **luminance factor** : → *factor 110*
16. **luminance factors** : → *factor 111*
17. **luminance meter** : → *meter 30*
18. **luminance path** : → *path 10*
19. **luminance signal** : → *signal 120*
20. **luminance/synchronizing ratio** : → *ratio 51*
21. **luminance threshold** : → *threshold 8*
22. **luminance trap** : → *trap 2*
23. **uniformity of luminance** (for character indicator tubes) : the ratio of the luminance of the darkest portion of a character to the luminance of the brightest portion. ★ uniformité d'affichage → *uniformité 3.* R однородность яркости (для знаковых индикаторных приборов). D Gleichmäßigkeit der Helligkeit (bei einer Zeichenanzeigeröhre). E uniformidad de luminancia (tubos indicadores de caracteres). I uniformità di luminanza (tubi indicatori di caratteri). N luminantievariatie (tekenindicatorbuizen). P równomierność luminancji. S luminansjämnhet. (531)

luminescence

1. **anti-Stokes luminescence** : photoluminescence whose radiation is located in a spectral region of shorter wavelengths than that of the exciting radiation. *Note.* — This happens, for instance, when the energy of the emitted photon originates from the absorption of two exciting photons. ★ luminescence anti-Stokes → *luminescence 3.* R анти-Стокова люминесценция. D Anti-Stokes-Lumineszenz. E luminiscencia anti-Stokes. I luminescenza anti-Stokes. N anti-Stokesluminescentie. P luminescencja anomalna. S ..... (845)
2. **luminescence** : emission, by atoms, molecules or ions in a material, of optical radiation which for certain wavelengths or regions of the spectrum is in excess of the radiation due to thermal emission from that material at the same temperature, as a result of these particles being excited by energy other than thermal agitation. *Note.* — In the USA, this term sometimes applies to the emitted radiation. ★ luminescence → *luminescence 1.* R люминесценция. D Lumineszenz. E luminiscencia. I luminescenza. N luminescentie. P luminescencja. S luminiscens. (845)
3. **luminescence** : a phenomenon in which certain substances, when irradiated, emit light of wavelength characteristic of the substance. ★ luminescence → *luminescence 2.* R люминесценция. D Lumineszenz. E luminiscencia. I luminescenza. N luminescentie. P luminescencja. S luminiscens. (881)
4. **(luminescence) emission spectrum** : → *spectrum 20*
5. **thermally activated luminescence** (*Syn.* thermoluminescence) : luminescence occurring when a previously excited luminescent material is heated. ★ luminescence thermiquement activée → *luminescence 4.* R термолюминесценция. D thermisch stimulierte Lumineszenz; Thermolumineszenz. E termoluminiscencia. I termoluminescenza. N thermoluminescentie. P luminescencja wywoływana temperaturowo; termoluminescencja. S termoluminiscens. (845)

luminescent

1. **luminescent screen** : → *screen 11*

luminophor

1. **luminophor** (*Syn.* phosphor; fluorophor) : luminescent material. ★ luminophore → *luminophore 2.* R люминофор. D Luminophor. E luminóforo. I luminoforo; fosforo. N luminescerende stof. P luminofor. S lysämne. (845)

luminous

1. **luminous efficacy of a source** : → *efficacy 1*
2. **luminous efficacy of radiation** : → *efficacy 2*
3. **luminous efficiency** : → *efficiency 29*
4. **luminous element** : → *element 28*
5. **luminous environment** : → *environment 3*
6. **luminous exitance** : → *exitance 1*
7. **luminous exposure** : → *exposure 12*
8. **luminous (perceived) colour** : → *colour 58*
9. **luminous range** : → *range 38*
10. **luminous sensitivity** : → *sensitivity 13*
11. **spectral luminous efficiency** : → *efficiency 41*

luminous flux

1. **amplitude of fluctuation of the luminous flux** : → *amplitude 16*
2. **knee luminous flux** (*Syn.* knee sensitivity) : → *sensitivity 12*
3. **luminous flux** (radiated by a source) (Φ) : a magnitude defined by

$$\Phi = K_m \int_0^\infty V(\lambda) P(\lambda) d\lambda$$

where : $P(\lambda)$ is the power spectral density radiated by the source at wavelength λ ; $V(\lambda)$ is the spectral luminous efficiency for photopic vision ; K_m is a constant. *Note.* — In the SI system of units, where $P(\lambda)$ is expressed in watts per metre, the luminous flux Φ is expressed in lumens, and $K_m = 683$ lm/W. ★ flux lumineux → *flux lumineux 4.* R световой поток (излучаемый источником). (723)
4. **luminous flux** (Φ_v; Φ) : quantity derived from radiant flux Φ_e by evaluating the radiation according to its action upon the CIE standard photometric observer. For photopic vision

$$\Phi_v = K_m \int_0^\infty \frac{d\Phi_e(\lambda)}{d\lambda} \cdot V(\lambda)\, d\lambda$$

where

$$\frac{d\Phi_e(\lambda)}{d\lambda}$$

is the spectral distribution of the radiant flux and $V(\lambda)$ is the spectral luminous efficiency. Unit: lm. *Note.* — For the values of K_m (photopic vision) and K'_m (scotopic vision), see "luminous efficacy of radiation". ★ **flux lumineux** → *flux lumineux 5.* **R** световой поток. **D** Lichtstrom. **E** flujo luminoso. **I** flusso luminoso. **N** lichtstroom. **P** strumień świetlny. **S** ljusflöde. (845)

5. **luminous flux maintenance factor** : → *factor 112*
6. **rated luminous flux** (of a type of lamp) : the value of the initial luminous flux of a given type of lamp declared by the manufacturer or the responsible vendor, the lamp being operated under specified conditions.Unit: lm. *Notes. 1* — The initial luminous flux is the luminous flux of a lamp after a short ageing period as specified in the relevant lamp standard. *2* — The rated luminous flux is sometimes marked on the lamp. *3* — In French, formerly "flux lumineux nominal". ★ flux lumineux assigné → *flux lumineux 6.* **R** номинальный световой поток (типа ламп). **D** Bemessungswert des Lichtstromes (eines Lampentyps). **E** flujo luminoso nominal. **I** flusso luminoso nominale. **N** toegekende lichtstroom. **P** strumień świetlny znamionowy. **S** märkljusflöde. (845)
7. **threshold luminous flux** (*Syn.* sensitivity) : → *sensitivity 24*

luminous intensity

1. **coefficient of luminous intensity** : → *coefficient 7*
2. **luminous intensity** (of a source, in a given direction) (I_v; I) : quotient of the luminous flux $d\Phi_v$ leaving the source and propagated in the element of solid angle $d\Omega$ containing the given direction, by the element of solid angle.

$$I_v = \frac{d\Phi_v}{d\Omega}$$

Unit: cd = $lm \cdot sr^{-1}$. ★ intensité lumineuse → *intensité lumineuse 2.* **R** сила света (источника в данном направлении). **D** Lichtstärke (einer Strahlungsquelle, in einer gegeben Richtung). **E** intensidad luminosa. **I** intensità luminosa. **N** lichtsterkte; lichtintensiteit. **P** światłość. **S** ljusstyrka. (723,845)

3. **mean spherical luminous intensity** (of a source) : average value of the luminous intensity of the source in all directions, equal to the quotient of its luminous flux by the solid angle 4π stéradians. ★ intensité lumineuse sphérique moyenne → *intensité lumineuse 3.* **R** среднесферическая сила света (источника). **D** mittlere räumliche Lichtstärke (einer Lichtquelle). **E** intensidad media esférica. **I** intensità luminosa media sferica. **N** gemiddelde sferische lichtsterkte (van een bron). **P** światłość całoprzestrzenna średnia. **S** sfärisk medelljusstyrka. (845)
4. **rotationally symmetrical luminous intensity distribution** : → *distribution 36*
5. **(spatial) distribution of luminous intensity** : → *distribution 39*
6. **symmetrical luminous intensity distribution** : → *distribution 41*

lumped

1. **lumped circuit** : → *circuit 112*

lumped-element

1. **lumped-element circulator** : → *circulator 7*
2. **lumped-element circulator** : → *circulator 8*
3. **lumped-element isolator** : → *isolator 4*
4. **lumped-element isolator** : → *isolator 5*

Luneburg

1. **Luneburg lens antenna** : → *antenna 72*

lutea

1. **macula lutea** (*Syn.* yellow spot) : → *spot 21*

lux

1. **lux** (lx) : SI unit of illuminance : Illuminance produced on a surface of area 1 square metre by a luminous flux of 1 lumen uniformly distributed over that surface. 1 lx = 1 $lm \cdot m^{-2}$ *Note.* — Non-metric unit: lumen per square foot ($lm \cdot ft^{-2}$) or footcandle (fc) (USA) = 10.764 lx. ★ lux → *lux 1.* **R** люкс. **D** Lux. **E** lux. **I** lux. **N** lux. **P** luks. **S** lux. (845)

Luxembourg

1. **Luxembourg effect** (*Syn.* ionospheric cross modulation) : → *modulation 24*

LV

1. **LV** (*Syn.* low voltage) : → *low-voltage 2*

M

M

1. **maxwell, Mx, M** : → *maxwell 1*

MAC

1. **MAC** (*Syn.* MAC (colour television) system) : → *system 112*
2. **MAC (colour television) system** : → *system 112*

machine

1. **acyclic machine** : a direct current homopolar machine. ★ machine acyclique → *machine 34.* R униполярная машина. D azyklische Maschine; Unipolarmaschine. E máquina aciclica. I macchina aciclica. N acyclische machine. P maszyna homopolarna prądu stałego. S unipolarmaskin. (411)
2. **alternating current commutator machine** : an induction machine having an armature winding connected to a commutator. ★ machine asynchrone à collecteur → *machine 37.* R коллекторная машина переменного тока. D Wechselstrom-Kommutatormaschine. E máquina asíncrona de colector. I macchina asincrona a collettore. N wisselstroom-commutatormachine. P maszyna komutatorowa prądu przemiennego. S växelströmskommutatormaskin. (411)
3. **asynchronous machine** : an alternating current machine in which the speed on load and the frequency of the system to which it is connected are not in a constant ratio. ★ machine asynchrone → *machine 36.* R асинхронная машина. D Asynchronmaschine. E máquina asíncrona. I macchina asincrona. N asynchrone machine. P maszyna asynchroniczna. S asynkronmaskin. (411)
4. **asynchronous operation of a synchronous machine** : → *operation 3*
5. **calibrated driving machine test** : → *test 11*
6. **conical rotor machine** : a machine in which the rotor is in the shape of a frustum of a cone. ★ machine à rotor conique → *machine 28.* R машина с коническим ротором. D Maschine mit konischem Läufer. E máquina de rotor cónico. I macchina a rotore conico. N machine met conische rotor. P maszyna o wirniku stożkowym. S elmaskin med konisk rotor. (411)
7. **cylindrical rotor machine** : a machine having a cylindrically-shaped rotor the periphery of which may be provided with slots which accommodate the coil sides of a winding. ★ machine à rotor cylindrique → *machine 29.* R машина с цилиндрическим ротором. D Trommelläufer-Maschine. E máquina de rotor cilíndrico. I macchina a rotore cilindrico. N machine met cilindrische rotor. P maszyna o wirniku cylindrycznym. S elmaskin med cylindrisk rotor. (411)
8. **direct current commutator machine** : a direct current machine incorporating an armature winding connected to a commutator and magnetic poles which are excited from a direct current source or which are permanent magnets. ★ machine à collecteur à courant continu → *machine 5.* R коллекторная машина постоянного тока. D Gleichstrom-Kommutatormaschine. E máquina de colector de corriente continua. I macchina a collettore a corrente continua. N gelijkstroom-commutator-machine. P maszyna komutatorowa prądu stałego. S likströmsmaskin. (411)
9. **double-fed asynchronous machine** : an asynchronous machine of which the stator winding and the rotor winding are fed by supply frequencies each of which may be either constant or variable. ★ machine asynchrone à double alimentation → *machine 38.* R асинхронная машина двойного питания. D doppelt-gespeiste Asynchronmaschine. E máquina asíncrona de doble alimentación. I macchina asincrona a doppia alimentazione. N dubbelgevoede asynchrone machine. P maszyna asynchroniczna dwustronnie zasilana. S dubbelmatad asynkronmaskin. (411)
10. **electric machine** : an electric energy transducer that converts electric energy into mechanical energy or vice versa. ★ machine électrique → *machine 43.* R электрическая машина. D elektrische Maschine. E máquina eléctrica. I macchina elettrica. N elektrische machine. P maszyna elektryczna. S elmaskin. (151)
11. **(electrical) rotating machine** : an electrical apparatus depending on electromagnetic induction for its operation and having components capable of relative rotary movement and intended for converting energy. *Note.* — This term also applies to electrical apparatus operating on the same principle and similar in construction and intended for other purposes, e.g. regulation, and is not intended to cover electrostatic machines. ★ machine (électrique) tournante → *machine 44.* R (электрическая) вращающаяся машина. D (elektrische) umlaufende Maschinen. E máquina (eléctrica) rotativa. I macchina (elettrica) rotante. N roterende (elektrische) machine. P maszyna elektryczna. S roterande (elektrisk) maskin; elmaskin. (411)
12. **fuel charging machine** : apparatus for introducing fuel into the reactor. ★ appareil de chargement → *appareil 23.* D Lademaschine. E máquina de carga. I macchina di carica. N laadmachine voor splijtstof. P maszyna załadowcza. S bränslehanteringsmaskin. (026)
13. **fuel discharging machine** : apparatus for extracting fuel from a reactor. ★ appareil de déchargement → *appareil 27.* D Entlademaschine. E máquina de descarga. I macchina di scarica. N losmachine voor splijtstof. P maszyna wyładowcza. S bränslehanteringsmaskin. (026)
14. **heteropolar machine** : a machine having successive physical or effective poles of opposite polarity. ★ machine hétéropolaire → *machine 57.* R многополюсная машина. D Heteropolarmaschine; Wechselpolmaschine. E máquina heteropolar. I macchina eteropolare. N heteropolaire machine. P maszyna heteropolarna. S heteropolarmaskin. (411)
15. **homopolar machine** : a machine in which the magnetic flux passes in the same direction from one member to the other over the whole of a single air-gap area. ★ machine homopolaire → *machine 58.* R одноименнополюсная машина. D Homopolarmaschine; Gleichpolmaschine. E máquina homopolar. I macchina omopolare. N homopolaire machine. P maszyna homopolarna. S homopolarmaskin. (411)
16. **hunting of interconnected synchronous machines** : → *hunting 5*
17. **induction machine** : an asynchronous machine comprising a magnetic circuit interlinked with two or more electric circuits moving relative to one another and in which power is transferred from the stationary to the moving part, or vice-versa, by electromagnetic induction. *Note.* — In many countries this term is practically synonymous with asynchronous machine, whereas some others recognize only the term "asynchronous machine" for both concepts. ★ machine à induction → *machine 20.* R индукционная машина. D Induktionsmaschine. E máquina de inducción. I macchina a induzione. N inductiemachine. P maszyna indukcyjna. S asynkronmaskin. (411)
18. **inductor machine** : a synchronous machine in which one member, usually stationary, carries main and exciting windings effectively disposed relative to each other, and in which the other member, usually rotating, is without windings but carries a number of regular projections. Permanent magnets may be used instead of the exciting winding. ★ machine à fer tournant → *machine 18.* R индукторная машина. D Induktormaschine. E máquina de hierro giratorio. I macchina a ferro rotante. N inductormachine. P maszyna induktorowa. S induktormaskin. (411)
19. **machine language** (*Syn.* computer language) : → *language 3*
20. **machine mounted circulating circuit component** : → *circulating circuit 4*
21. **polyphase machine** : a machine which generates or utilizes polyphase alternating current. ★ machine polyphasée → *machine 62.* R многофазная машина. D Mehrphasenmaschine. E máquina polifásica. I macchina polifase. N meerfasenmachine. P maszyna wielofazowa. S flerfasmaskin. (411)

22. **regenerative braking of a d.c. machine** (*Syn.* counter-current braking) : regenerative braking in which the main current of a d.c. machine is reversed. ★ freinage par contre-courant → *freinage 27.* R торможение противовключением (машины постоянного тока); торможение противотоком (не рекомендуется). D Gegenstrombremsung. E frenado con contracorriente. I frenatura in controcorrente. N tegenstroomremmen (van een gelijkstroommotor). P hamowanie przez przeciwwłączenie (silnika prądu stałego). S regenerativ bromsning (av likströmsmaskin). (411)
23. **salient pole machine** : a machine in which the field poles project from the frame yoke or hub towards the air-gap. ★ machine à pôles saillants → *machine 21.* R машина с явно выраженными полюсами. D Schenkelpolmaschine. E máquina de polos salientes. I macchina a poli salienti. N machine met uitspringende polen. P maszyna wydatnobiegunowa. S elmaskin med utpräglade poler. (411)
24. **Scherbius machine** : a polyphase alternating current commutator machine capable of generator or motor action intended for connection in the secondary circuit of a wound-rotor induction-motor and used for speed and power factor control. The magnetic part of the field system is laminated and of the salient pole type and it has commutating poles and a series-connected armature reaction compensating winding. The control field winding may be separately or shunt excited with or without an additional series excited field winding. ★ machine Scherbius → *machine 70.* R коллекторная машина переменного тока в каскаде с асинхронным двигателем; машина Шербиуса. D Scherbius-Maschine (Lydall-Maschine). E máquina Scherbius. I macchina Scherbius. N Scherbius-machine. P maszyna Scherbiusa. S Scherbiusmaskin. (411)
25. **single-phase machine** : a machine which generates or utilizes single-phase alternating current. ★ machine monophasée → *machine 60.* R однофазная машина. D Einphasenmaschine. E máquina monofásica. I macchina monofase. N eenfase(wisselstroom-)machine. P maszyna jednofazowa. S enfasmaskin. (411)
26. **speed (of a rotating machine)** : → *speed 44*
27. **synchronous machine** : an alternating current machine in which the frequency of the generated voltage and the speed of the machine are in a constant ratio. ★ machine synchrone → *machine 72.* R синхронная машина. D Synchronmaschine. E máquina síncrona. I macchina sincrona. N synchrone machine. P maszyna synchroniczna. S synkronmaskin. (411)
28. **synchronous operation of a machine** : → *operation 70*

macro

1. **macro** (*Syn.* macroinstruction) : → *macroinstruction 1*

macrobend

1. **macrobend loss** : → *loss 60*

macrobending

1. **macrobending** : in an optical fibre, all macroscopic deviations of the axis from a straight line with radii large compared with the fibre diameter ; distinguished from microbending. ★ macrocourbures → *macrocourbure 2.* R макроизгиб. D Makrokrümmung. E macrocurvaturas. I macrocurvatura. N het optreden van macrobochten. P makrozgięcie. S makroböjning. (731)

macroinstruction

1. **macroinstruction** (*Syn.* macro (instruction)) : an instruction in a source language that is to be replaced by a defined sequence of instructions in the same source language. *Note.* — The macroinstruction may also specify values for parameters in the instructions that are to replace it. ★ macro-instruction → *macro-instruction 1.* R макрокоманда. D Makro; Makrobefehl; Makroinstruktion. E macroinstrucción. I macroistruzione. N macroinstructie. P makroinstrukcja. S makroinstruktion. (714)

macroscopic

1. **macroscopic cross-section** : → *cross-section 18*

macula

1. **macula lutea** (*Syn.* yellow spot) : → *spot 21*

MAD

1. **MAD** (*Syn.* mean administrative delay) : → *delay 27*

MADT

1. **MADT** (*Syn.* mean accumulated down time) : → *time 94*

MAG

1. **MIG/MAG gun** : → *gun 11*
2. **MIG/MAG torch** (*Syn.* MIG/MAG gun) : → *gun 11*

magic

1. **magic eye** : → *eye 1*
2. **magic T** : → *tee 3*

maglev

1. **maglev** (*Syn.* magnetically supported vehicle) : → *vehicle 9*

magnet

1. **anti-slip magnet valve** : → *valve 1*
2. **convergence magnet** : a magnet assembly whose magnetic field converges the electron beams. ★ aimant de convergence → *aimant 3.* R магнит сходимости. D Konvergenzmagnet. E imán de convergencia. I magnete di convergenza. N convergentiemagneet. P magnes skupiający. S konvergeringsmagnet. (531)
3. **focusing magnet** : a permanent magnet, usually adjustable, that produces a magnetic field for focusing an electron beam. ★ aimant de concentration → *aimant 2.* R фокусирующий магнит. D Fokussiermagnet. E imán de concentración. I magnete di focalizzazione. N focusseermagneet. P magnes ogniskujący. S fokuseringsmagnet. (531)
4. **magnet** : a device intended to have an external magnetic field. ★ aimant → *aimant 1.* R магнит. D Magnet. E imán. I magnete. N magneet. P magnes. S magnet. (151)
5. **magnet valve** : → *valve 8*
6. **variable magnet valve** : → *valve 15*

magnetic

1. **blank magnetic tape** : → *tape 2*
2. **cyclic magnetic condition** : → *condition 4*
3. **efficiency loss in magnetic recording** : → *loss 25*
4. **(elementary) magnetic dipole** (*Syn.* hertzian magnetic dipole) : → *dipole 11*
5. **hertzian magnetic dipole** : → *dipole 11*
6. **ideal magnetic medium** : → *medium 15*
7. **induced magnetic anisotropy** : → *anisotropy 1*
8. **laminated (magnetic) core** : → *core 27*
9. **magnetic after-effect** : → *after-effect 1*
10. **magnetic ageing** : → *ageing 6*
11. **magnetic amplifier** : → *amplifier 19*
12. **magnetic anisotropy** : → *anisotropy 4*
13. **magnetic anneal** : → *anneal 1*
14. **magnetic (area) moment** : → *moment 3*
15. **magnetic axis** : → *axis 6*
16. **magnetic circuit** : → *circuit 113*
17. **magnetic circuit** : → *circuit 114*
18. **magnetic conditioning** : → *conditioning 3*
19. **magnetic constant** : → *constant 24*
20. **(magnetic) core** : → *core 28*
21. **magnetic core antenna** : → *antenna 73*
22. **magnetic coupling** : → *coupling 31*
23. **magnetic cutter head** : → *head 13*
24. **magnetic deflection** : → *deflection 15*
25. **magnetic detector for lightning currents** : → *detector 16*
26. **magnetic dipole moment** : → *moment 4*
27. **magnetic dipole (1)** : → *dipole 15*
28. **magnetic dipole (2)** : → *dipole 16*
29. **magnetic disk** : → *disk 10*
30. **magnetic drag** : → *drag 1*
31. **magnetic erasing head** : → *head 14*
32. **magnetic flux** : → *flux 15*

33. **magnetic flux** : → *flux 16*
34. **magnetic flux density** : → *flux density 9*
35. **magnetic focusing** : → *focusing 14*
36. **magnetic friction clutch** : → *clutch 1*
37. **magnetic head** : → *head 15*
38. **magnetic head core** : → *core 30*
39. **magnetic head gap** : → *gap 15*
40. **magnetic hysteresis** : → *hysteresis 11*
41. **(magnetic) hysteresis loop** : → *loop 23*
42. **magnetic induction** (*Syn.* magnetic flux density) : → *flux density 9*
43. **magnetic leakage factor** : → *factor 114*
44. **magnetic loading** : → *loading 8*
45. **(magnetic) loss angle** : → *angle 38*
46. **(magnetic) loss factor** : → *factor 115*
47. **magnetic loss resistance** : → *resistance 36*
48. **magnetic losses** : → *loss 64*
49. **magnetic medium relative efficiency** : → *efficiency 30*
50. **magnetic overload release** : → *release 14*
51. **magnetic particle coupling** : → *coupling 32*
52. **magnetic phase shifter** : → *phase-shifter 3*
53. **magnetic polarization** : → *polarization 22*
54. **magnetic powder core** : → *core 31*
55. **magnetic pull** : → *pull 2*
56. **(magnetic) quality factor** : → *factor 116*
57. **magnetic recorder** : → *recorder 10*
58. **magnetic recording** : → *recording 8*
59. **magnetic recording head** : → *head 18*
60. **magnetic recording medium** : → *medium 18*
61. **magnetic recording/reproducing head** : → *head 19*
62. **magnetic relaxation** : → *relaxation 1*
63. **magnetic remanence** : → *remanence 1*
64. **magnetic reproducer** : → *reproducer 1*
65. **magnetic reproducing head** : → *head 20*
66. **magnetic reproduction** : → *reproduction 1*
67. **magnetic saturation** : → *saturation 2*
68. **magnetic screen** : → *screen 12*
69. **magnetic sensitivity** : → *sensitivity 14*
70. **magnetic shunt** : → *shunt 3*
71. **magnetic storm** : → *storm 2*
72. **magnetic substance** : → *substance 5*
73. **magnetic susceptibility** : → *susceptibility 4*
74. **magnetic tape** : → *tape 8*
75. **magnetic texture** : → *texture 1*
76. **magnetic track** : → *track 11*
77. **magnetic transmission** (*Syn.* magnetic coupling) : → *coupling 31*
78. **(magnetic) variability** : → *variability 1*
79. **magnetic variable reluctance pick-up head** : → *pick-up head 5*
80. **magnetic vector potential** : → *potential 8*
81. **magnetic videodisk** : → *videodisk 1*
82. **magnetic viscosity** : → *viscosity 3*
83. **neutral magnetic state** : → *state 25*
84. **remanent magnetic polarization** : → *polarization 40*
85. **saturation magnetic polarization** : → *polarization 43*
86. **scalar magnetic potential** : → *potential 11*
87. **short-circuit flux of a magnetic tape** : → *flux 23*
88. **strip-wound (magnetic) core** : → *core 37*
89. **telerecording equipment for magnetic tape** (*Syn.* video tape recorder) : → *tape recorder 6*
90. **transverse magnetic mode** (*Syn.* TM mode) : → *mode 82*
91. **transverse magnetic mode** : → *mode 92*

magnetic field

1. **magnetic field** : that component of an electromagnetic field which is characterized by the magnetic field strength vector H and the magnetic flux density vector B. *Note.* — In French, the term "champ magnétique" is generally used for the "magnetic field strength". ★ champ magnétique → *champ 36.* R магнитное поле. D magnetisches Feld. E campo magnético. I campo magnetico. N magnetisch veld. P pole magnetyczne. S magnetiskt fält. (221)
2. **magnetic field strength** : → *field strength 8*
3. **magnetic field strength anisotropy factor** : → *factor 113*
4. **residual voltage for zero magnetic field** : → *voltage 177*

magnetically

1. **magnetically anisotropic substance** : → *substance 6*
2. **magnetically hard material** : → *material 22*
3. **magnetically isotropic substance** : → *substance 7*
4. **magnetically soft material** : → *material 23*
5. **magnetically supported vehicle** : → *vehicle 9*

magnetization

1. **dynamic magnetization curve** : → *curve 13*
2. **initial magnetization curve** : → *curve 15*
3. **longitudinal magnetization** : a recording in which the principal component of the recorded magnetic field is parallel to the direction of the relative head to tape movement. ★ enregistrement magnétique longitudinal → *enregistrement 22.* R запись с продольным намагничиванием. D Längsmagnetisierung. E registro magnético longitudinal. I registrazione magnetica longitudinale. N langsmagnetisatie. P zapis wzdłużny. S längsmagnetisering. (806)
4. **magnetization** (M) : the vector quantity defined by subtracting the magnetic field strength from the quotient of magnetic flux density by the magnetic constant

$$M = \frac{B}{\mu_0} - H$$

★ aimantation → *aimantation 1.* R намагниченность. D Magnetisierung. E imantación. I magnetizzazione. N magnetisatie. P magnetyzacja. S magnetisering. (121)
5. **magnetization curve** : → *curve 26*
6. **normal magnetization curve** (*Syn.* commutation curve) : → *curve 9*
7. **perpendicular magnetization** : a recording in which the principal component of the recorded magnetic field is perpendicular to the plane of the tape. ★ enregistrement magnétique perpendiculaire → *enregistrement 23.* R запись с перпендикулярным намагничиванием. D vertikale Magnetisierung. E registro magnético perpendicular. I registrazione magnetica perpendicolare. N loodrechtmagnetisatie. P zapis poprzeczny. S perpendikulär magnetisering. (806)
8. **remanent magnetization** : the value of the magnetization remaining in a magnetized body when, in the absence of a self-demagnetizing field, the applied magnetic field strength is brought to zero. ★ aimantation rémanente → *aimantation 4.* R остаточная намагниченность. D remanente Magnetisierung. E magnetización remanente; imantación remanente. I magnetizzazione residua. N remanente magnetisatie. P magnetyzacja szczątkowa. S remanent magnetisering. (121,221)
9. **saturation magnetization** (M_S) : the maximum obtainable magnetization for a given substance at a given temperature. ★ aimantation à saturation → *aimantation 2.* R намагниченность насыщения. D Sättigungsmagnetisierung. E magnetización de saturación; imantación de saturación. I magnetizzazione a saturazione. N verzadigingsmagnetisatie. P magnetyzacja nasycenia. S mättningsmagnetisering. (221)
10. **saturation magnetization (mass) density** : → *density 28*
11. **specific saturation magnetization** (*Syn.* saturation magnetization (mass) density) : → *density 28*
12. **spontaneous magnetization** : magnetization resulting from the alignment of atomic magnetic moments without the application of an external magnetic field. ★ aimantation spontanée → *aimantation 5.* R самопроизвольная намагниченность. D spontane Magnetisierung. E magnetización espontánea; imantación espontánea. I magnetizzazione spontanea. N spontane magnetisatie. P magnetyzacja spontaniczna. S spontan magnetisering. (221)
13. **static magnetization curve** : → *curve 37*
14. **transverse magnetization** : a recording in which the principal component of the recorded magnetic field is parallel to the plane of the tape and perpendicular to the direction of the relative head-to-tape movement. ★ enregistrement magnétique

transversal → *enregistrement 25.* R запись с поперечным намагничиванием. D transversale Magnetisierung. E registro magnético transversal. I registrazione magnetica trasversale. N dwarsmagnetisatie. P zapis skośny. S tvärmagnetisering. (806)

magnetize

1. **to magnetize** : to induce magnetization in a body. ★ aimanter → *aimanter 1.* R намагнитить. D magnetisieren. E magnetizar; imantar; imanar. I magnetizzare. N magnetiseren. P magnesować. S magnetisera. (221)

magneto

1. **magneto** (*Syn.* (call) signal generator) : → *generator 8*
2. **magneto (telephone) bell** : → *bell 4*

magnetodynamic

1. **magnetodynamic pick-up head** : → *pick-up head 6*

magneto-hydro-dynamic

1. **magneto-hydro-dynamic thermal power station** : → *power station 9*

magneto-ionic

1. **magneto-ionic component** : → *component 38*
2. **magneto-ionic double refraction** : → *refraction 1*

magnetometer

1. **Hall effect magnetometer** (*Syn.* Hall probe) : → *probe 4*
2. **magnetometer** : an instrument intended to measure the value of a magnetic flux density in a given direction. ★ magnétomètre → *magnétomètre 1.* R магнитометр. D Flussdichte-Messgerät (Messgerät zur Messung der magnetischen Flussdichte). E magnetómetro. I magnetometro. N magnetometer. P magnetometr. S magnetometer. (301)

magnetomotive

1. **direct-axis component of magnetomotive force** : → *component 18*
2. **magnetomotive force** : → *force 21*
3. **quadrature-axis component of magnetomotive force** : → *component 45*

magneton

1. **Bohr magneton** (μ_B) : a physical constant used to express the magnetic moment of an electron: its value is

$$e\,h/4\,\pi\,m \approx (9.274\,078 \pm 0.000\,036) \times 10^{-24}\,\mathrm{Am}^2$$

where e is the elementary charge, h the Planck's constant, and m the electron rest mass. *Notes. 1* — The numerical value quoted is that adopted by the International Union of Pure and Applied Physics (IUPAP). *2* — The magnetic moment of a free electron due to its spin is approximately equal to 1.001 μ_B. ★ magnéton de Bohr → *magnéton 1.* R магнетрон Бора. D Bohrsches Magneton. E magnetón de Bohr. I magnetone di Bohr. N Bohrmagneton. P magneton Bohra. S Bohrs magneton. (221)

magneto-optic

1. **magneto-optic** : applies to optical effects induced by magnetic fields. ★ magnéto-optique → *magnéto-optique 2.* R магнитооптический. D magnetooptisch. E magneto-óptico. I magneto ottico. N magneto-optisch. P magnetooptyczny. S magnetooptisk. (121)
2. **magneto-optic effect** : → *effect 39*

magnetopause

1. **magnetopause** : the outer boundary of the magnetosphere. ★ magnétopause → *magnétopause 1.* D Magnetopause. P magnetopauza. (705)

magnetoresistive

1. **magnetoresistive characteristic curve** : → *curve 27*
2. **magnetoresistive coefficient** : → *coefficient 32*
3. **magnetoresistive effect** : → *effect 40*
4. **magnetoresistive ratio** : → *ratio 52*
5. **magnetoresistive sensitivity** : → *sensitivity 15*

magnetoresistor

1. **magnetoresistor** : a semiconductor or conductor device in which the dependence of electric resistance on magnetic flux density is used. ★ magnétorésistance → *magnétorésistance 3.* R магниторезистор. D magnetischer Widerstand. E magnetorresistencia. I magnetoresistore. N magnetoweerstand. P magnetorezystor. S magnetoresistor. (521)

magnetoscope

1. **magnetoscope (instrument)** (*Syn.* video tape recorder) : → *tape recorder 6*

magnetosphere

1. **magnetosphere** : a region, beyond the ionosphere, in which the trajectories of charged particles essentially depend on the environmental magnetic field, the effect of collisions being negligible. *Note.* — Towards the Sun, the outer limit of the Earth's magnetosphere is at a distance of some ten Earth radii. The magnetosphere extends much farther in the opposite direction. ★ magnétosphère → *magnétosphère 1.* D Magnetosphäre. P magnetosfera. (705)

magnetostatically

1. **tensor permeability for a magnetostatically saturated medium** (*Syn.* Polder's tensor permeability) : → *permeability 18*

magnetostriction

1. **magnetostriction** : the elastic deformation of a magnetic substance due to its magnetization. ★ magnétostriction → *magnétostriction 2.* R магнитострикция. D Magnetostriktion. E magnetostricción. I magnetostrizione. N magnetostrictie. P magnetostrykcja. S magnetostriktion. (121)
2. **magnetostriction loudspeaker** : → *loudspeaker 11*
3. **magnetostriction microphone** : → *microphone 19*

magnetron

1. **continuous wave magnetron** (*Syn.* c.w. magnetron) : a magnetron designed to be operated with d.c., a.c., or unfiltered rectified voltage supply. ★ magnétron en régime continu → *magnétron 4.* R магнетрон непрерывного генерирования. D Dauerstrich-Magnetron. E magnetrón en régimen continuo. I magnetron per regime continuo. N magnetron voor continu spanningsbedrijf. P magnetron o fali ciągłej. S CW-magnetron. (531)
2. **c.w. magnetron** (*Syn.* continuous wave magnetron) : → *magnetron 1*
3. **injected-beam magnetron** (*Syn.* voltage-tunable magnetron) : a magnetron with an injected electron beam, designed so that the frequency of oscillation is determined by the anode voltage. ★ magnétron à accord par la tension → *magnétron 3.* R магнетрон, настраиваемый напряжением. D Strahlmagnetron; Magnetron mit Spannungsdurchstimmung. E magnetrón sintonizado en tensión. I magnetron con accordo di tensione. N magnetron met geïnjecteerde bundel; magnetron met spanningsafstemming. P magnetron przestrajalny napięciowo. S spänningsavstämd magnetron. (531)
4. **magnetron** : a crossed-field tube in which both the electron beam and the slow-wave structure are re-entrant. ★ magnétron → *magnétron 2.* R магнетрон. D Magnetron. E magnetrón. I magnetron. N magnetron. P magnetron. S magnetron. (531)
5. **magnetron injection gun** : → *gun 10*
6. **pulsed magnetron** : a magnetron designed to be operated with a pulsed voltage supply. ★ magnétron en régime pulsé → *magnétron 5.* R импульсный магнетрон. D Puls-Magnetron. E magnetrón en régimen pulsado. I magnetron per regime impulsivo. N pulsmagnetron. P magnetron impulsowy. S pulsdriftsmagnetron. (531)
7. **voltage-tunable magnetron** (*Syn.* injected-beam magnetron) : → *magnetron 3*

magnification

1. **magnification ratio** : → *ratio 53*

magnifying

1. **magnifying effect** : → *effect 41*

magnitude

1. **apparent magnitude** (of an astronomical object) (m) : quantity that correlates with the more or less luminous aspect of a star and that is defined by the formula

$$m = m_0 - 2.5 \log_{10} (E/E_0)$$

where E is the point brilliance of the star considered, m_0 and E_0 are constants based on the magnitudes ascribed to certain standard stars. unit : 1 *Note.* — In addition to the visual apparent magnitude defined above, other apparent magnitudes (photographic, bolometric, etc.) are defined by the same formula, but where E and E_0 are the responses of a detector having a specified spectral responsitivy. ★ magnitude apparente → *magnitude 1.* R видимая величина (астрономического объекта). D scheinbare Grösse (eines astronomischen Objekts). E magnitud aparente. I magnitudine stellare. N schijnbare grootte; magnitude. P wielkość pozorna (obiektu astronomicznego). S skenbar magnitud. (845)

2. **magnitude of a voltage fluctuation** : the difference between the maximum and minimum values of r.m.s. or peak voltage during a voltage fluctuation. ★ amplitude d'une fluctuation de tension → *amplitude 6.* R размах колебаний напряжения. D Betrag einer Spannungsschwankung. E amplitud de una fluctuación de tensión. I ampiezza di una fluttuazione di tensione. N amplitude van een spanningsschommeling. P wielkość fluktuacji napięcia. S spänningsskillnad. (161)
3. **pulse magnitude** : a single value, for instance a mean, root mean square or peak value characterizing the aggregate instantaneous values of a unidirectional pulse with respect to the common initial and final value. ★ hauteur → *hauteur 2.* R амплитуда импульса. D Impulsbetrag. E amplitud de impulso; altura (de un impulso). I ampiezza (di un impulso); altezza (di un impulso). N pulsgrootte. P amplituda impulsu. S pulshöjd. (702)

main

1. **artificial mains network** : → *network 4*
2. **(d.c.) main generator** : → *generator 10*
3. **main alternator** : → *alternator 2*
4. **(main) beam** : → *beam 23*
5. **main bracing** : → *bracing 3*
6. **main busbar** : → *busbar 11*
7. **main cable** : → *cable 43*
8. **main carrier** : → *carrier 20*
9. **main catenary** : → *catenary 10*
10. **main circuit** : → *circuit 115*
11. **main circuit** : → *circuit 116*
12. **main contact** : → *contact 78*
13. **main contact** : → *contact 79*
14. **main contacts** : → *contact 80*
15. **main convertor** : → *convertor 32*
16. **main distribution frame** : → *frame 38*
17. **main earthing bar** (*Syn.* main earthing terminal) : → *terminal 18*
18. **main earthing terminal** : → *terminal 18*
19. **main electrode** : → *electrode 70*
20. **main exciter** : → *exciter 6*
21. **main feedback path** : → *path 12*
22. **main flux** : → *flux 17*
23. **main gap** : → *gap 16*
24. **main generator** : → *generator 23*
25. **main leg** : → *leg 4*
26. **main line** : → *line 109*
27. **main lobe** (*Syn.* major lobe) : → *lobe 3*
28. **main pole** : → *pole 8*
29. **main protection** : → *protection 23*
30. **main reflector** : → *reflector 11*
31. **main station** : → *station 16*
32. **main switching contacts** : → *contact 81*
33. **main (telephone) station** (*Syn.* subscriber's main station) : → *station 37*
34. **main terminals** : → *terminal 19*
35. **main winding** : → *winding 38*
36. **mains decoupling factor** : → *factor 117*
37. **mains frequency** : → *frequency 127*
38. **mains immunity** : → *immunity 9*
39. **subscriber's main station** : → *station 37*

main-beam

1. **main-beam headlight** : → *headlight 5*

mains-borne

1. **mains-borne disturbance** : → *disturbance 12*

maintainability

1. **maintainability** ($M(t_1, t_2)$) : the probability that a given active maintenance action, for an item under given conditions of use can be carried out within a stated time interval, when the maintenance is performed under stated conditions and using stated procedures and resources. *Note.* — The term "maintainability" is also used to denote the maintainability performance quantified by this probability. ★ maintenabilité → *maintenabilité 6.* R ремонтопригодность; обслуживаемость. D Instandhaltbarkeitsmaß. E mantenibilidad. I manutenibilità. N onderhoudbaarheid. P obsługiwalność (parametr). S underhållsmässighet. (191)
2. **maintainability allocation** : → *allocation 3*
3. **maintainability apportionment** (*Syn.* maintainability allocation) : → *allocation 3*
4. **maintainability demonstration** : → *demonstration 1*
5. **maintainability model** : → *model 1*
6. **maintainability (performance)** : the ability of an item under given conditions of use, to be retained in, or restored to, a state in which it can perform a required function, when maintenance is performed under given conditions and using stated procedures and resources. *Note.* — The term "maintainability" is also used as a measure of maintainability performance. ★ maintenabilité → *maintenabilité 5.* R ремонтопригодность (свойство); обслуживаемость (свойство). D Instandhaltbarkeit. E mantenibilidad. I manutenibilità. N onderhoudbaarheid. P obsługiwalność (podatność). S underhållsmässighet. (191)
7. **maintainability prediction** : → *prediction 3*
8. **maintainability verification** : → *verification 1*
9. **reliability and maintainability assurance** : → *assurance 1*
10. **reliability and maintainability audit** : → *audit 1*
11. **reliability and maintainability control** : → *control 157*
12. **reliability and maintainability management** : → *management 4*
13. **reliability and maintainability plan** : → *plan 2*
14. **reliability and maintainability programme** : → *programme 9*
15. **reliability and maintainability surveillance** : → *surveillance 1*

maintained

1. **maintained command** : → *command 13*
2. **single pressure maintained mechanical system** : → *mechanical system 13*

maintaining

1. **maintaining voltage** : → *voltage 105*

maintenance

1. **active corrective maintenance time** : → *time 3*
2. **active maintenance time** : → *time 4*
3. **active preventive maintenance time** : → *time 5*
4. **arc maintenance device** : → *device 10*
5. **automatic maintenance** : maintenance accomplished without human intervention. ★ maintenance automatique → *maintenance 12.* R автоматизированное техническое обслуживание. D automatische Instandhaltung. E mantenimiento automático. I manutenzione automatica. N automatisch onderhoud. P obsługa automatyczna. S automatiskt underhåll. (191)
6. **controlled maintenance** : a method to sustain a desired quality of service by the systematic application of analysis techniques using centralized supervisory facilities and/or sampling to minimize preventive maintenance and to reduce corrective maintenance. ★ maintenance dirigée → *maintenance 18.* R управляемое техническое обслуживание и ремонт. D gelenkte Instandhaltung. E mantenimiento vigilado. I manutenzione controllata. N begeleid onderhoud. P obsługa sterowana. S tillståndsstyrt underhåll. (191)

7. **corrective maintenance** : the maintenance carried out after fault recognition and intended to put an item into a state in which it can perform a required function. *Note.* — In French, the term "dépannage" sometimes implies a provisional restoration. ★ maintenance corrective → *maintenance 15.* R неплановый ремонт; текущий ремонт. D Instandsetzung; korrektive Instandhaltung. E mantenimiento correctivo. I manutenzione correttiva. N correctief onderhoud. P obsługa naprawcza. S avhjälpande underhåll. (191)
8. **corrective maintenance time** : → *time 33*
9. **deferred maintenance** : corrective maintenance which is not immediately initiated after a fault recognition but is delayed in accordance with given maintenance rules. ★ maintenance différée → *maintenance 17.* R задержанные техническое обслуживание и ремонт. D aufgeschobene Instandhaltung. E mantenimiento diferido. I manutenzione differita. N uitgesteld onderhoud. P obsługa odłożona. S uppskjutet underhåll. (191)
10. **elementary maintenance activity** : → *activity 8*
11. **field maintenance** (*Syn.* on-site maintenance) : → *maintenance 37*
12. **function-affecting maintenance** : a maintenance action during which one or more required functions of the item under maintenance are interrupted or degraded. ★ maintenance affectant les fonctions → *maintenance 11.* R техническое обслуживание, влияющее на функционирование. D funktionsbeeinträchtigende Instandhaltung. E mantenimiento que afecta a las funciones. I manutenzione che inficia la funzionalità. N onderhoud dat de functie beïnvloedt. P obsługa naruszająca funkcjonowanie. S funktionsstörande underhåll. (191)
13. **function-degrading maintenance** : function-affecting maintenance that degrades one or more of the required functions of a maintained item, but not to such extent as to cause complete loss of all the functions. ★ maintenance en fonctionnement dégradé → *maintenance 22.* R техническое обслуживание, ухудшающее функционирование. D funktionseinschränkende Instandhaltung. E mantenimiento que degrada las funciones. I manutenzione che degrada la funzionalità. N onderhoud dat de functie aantast. P obsługa ograniczająca funkcjonowanie. S funktionsnedsättande underhåll. (191)
14. **function-permitting maintenance** : maintenance action during which one of the required functions of the item under maintenance are interrupted or degraded. ★ maintenance en fonctionnement → *maintenance 21.* R техническое обслуживание, не влияющее на функционирование. D Instandhaltung ohne Funktionseinschränkung. E mantenimiento en funcionamiento. I manutenzione che non interrompe la funzionalità. N onderhoud dat de functie niet beïnvloedt. P obsługa nienaruszająca funkcjonowania. S funktionstillåtande underhåll. (191)
15. **function-preventing maintenance** : function-affecting maintenance that prevents a maintained item from performing a required function by causing complete loss of all the functions. ★ maintenance avec arrêt → *maintenance 13.* R техническое обслуживание, препятствующее функционированию. D funktionsverhindernde Instandhaltung. E mantenimiento con parada. I manutenzione che impedisce la funzionalità. N onderhoud dat de functie verhindert. P obsługa wykluczająca funkcjonowanie. S funktionshindrande underhåll. (191)
16. **in situ maintenance** (*Syn.* on-site maintenance) : → *maintenance 37*
17. **level of maintenance** : → *level 50*
18. **line of maintenance** (*Syn.* maintenance echelon) : → *echelon 1*
19. **lumen maintenance** (*Syn.* luminous flux maintenance factor) : → *factor 112*
20. **luminous flux maintenance factor** : → *factor 112*
21. **maintenance** : the combination of all technical and administrative actions, including supervision actions, intended to retain an item in, or restore it to, a state in which it can perform a required function. ★ maintenance → *maintenance 10.* R техническое обслуживание и ремонт. D Instandhaltung. E mantenimiento. I manutenzione. N onderhoud. P obsługa; obsługiwanie. S underhåll. (191)
22. **maintenance action** : → *action 11*
23. **maintenance duration** : → *duration 24*
24. **maintenance echelon** : → *echelon 1*
25. **maintenance entity** : → *entity 3*
26. **maintenance man-hours** : → *man-hours 1*
27. **maintenance philosophy** : → *philosophy 1*
28. **maintenance policy** : → *policy 1*
29. **maintenance support performance** : → *performance 4*
30. **maintenance task** (*Syn.* maintenance action) : → *action 11*
31. **maintenance test** : → *test 51*
32. **maintenance time** : → *time 83*
33. **maintenance tree** : → *tree 3*
34. **mean active corrective maintenance time** : → *time 95*
35. **mean maintenance man-hours** : → *man-hours 2*
36. **off-site maintenance** : maintenance performed at a location different from where the item is used. *Note.* — An example of off-site maintenance is the repair of a sub-item at a maintenance centre. ★ maintenance hors site → *maintenance 23.* R техническое обслуживание и ремонт не на месте эксплуатации. D Instandhaltung außerhalb des Einsatzorts. E mantenimiento no local. I manutenzione fuori sede. N onderhoud elders. P obsługa poza miejscem użytkowania. S sekundärunderhåll. (191)
37. **on-site maintenance** (*Syn.* in situ maintenance; field maintenance) : maintenance performed at the location where the item is used. ★ maintenance sur site → *maintenance 26.* R техническое обслуживание и ремонт на месте эксплуатации. D Instandhaltung am Einsatzort; Instandbaltung im Einbauzustand; Instandbaltung vor Ort. E mantenimiento local; mantenimiento sobre el terreno. I manutenzione in sito. N onderhoud ter plaatse. P obsługa u użytkownika. S primärunderhåll. (191)
38. **preventive maintenance** : the maintenance carried out at predetermined intervals or according to prescribed criteria and intended to reduce the probability of failure or the degradation of the functioning of an item. ★ entretien → *entretien 7.* R техническое обслуживание. D Wartung; vorbeugende Instandhaltung. E mantenimiento preventivo. I manutenzione preventiva. N preventief onderhoud. P obsługa zapobiegawcza. S förebyggande underhåll. (191)
39. **preventive maintenance time** : → *time 134*
40. **remote maintenance** : maintenance of an item performed without physical access of the personnel to the item. ★ télémaintenance → *télémaintenance 1.* R дистанционное техническое обслуживание. D ferngesteuerte Instandhaltung. E mantenimiento remoto; telemantenimiento. I manutenzione remota. N onderhoud op afstand. P obsługa zdalna. S fjärrunderhåll. (191)
41. **scheduled maintenance** : the preventive maintenance carried out in accordance with an established time schedule. ★ entretien systématique → *entretien 10.* R плановое техническое обслуживание. D planmäßge Instandhaltung. E mantenimiento programado. I manutenzione programmata. N onderhoud volgens plan. P obsługa planowana. S regelbundet underhåll. (191)
42. **switching-off for mechanical maintenance** : → *switching-off 1*
43. **unscheduled maintenance** : the maintenance carried out, not in accordance with an established time schedule, but after reception of an indication regarding the state of an item. ★ maintenance conditionnelle → *maintenance 14.* R неплановое техническое обслуживание и ремонт. D unplanmäßige Instandhaltung. E mantenimiento no programado. I manutenzione non programmata. N ongeregeld onderhoud. P obsługa nieplanowana. S oregelbundet underhåll. (191)

maintenance-free

1. **maintenance-free (secondary) battery** : → *battery 45*

major

1. **major fault** : → *fault 55*
2. **major lobe** : → *lobe 3*
3. **uniform major section** : → *section 27*

majority

1. **majority carrier** : → *carrier 21*

make

1. **break before make contact** (*Syn.* non-shorting contact) : → *contact 87*
2. **closing time of a make contact** : → *time 25*
3. **make before break contact** (*Syn.* shorting contact) : → *contact 104*
4. **make contact** (*Syn.* "a" contact) : → *contact 1*
5. **make contact** : → *contact 84*
6. **make contact** : → *contact 85*
7. **opening time of a make contact** : → *time 118*
8. **output make circuit** : → *circuit 132*

make-before-break

1. **change-over make-before-break contact** : → *contact 16*

make-break

1. **make-break time** : → *time 84*

maker

1. **call maker** (*Syn.* autodialler) : a calling device for use with a telephone set to automatically dial prerecorded telephone numbers. ★ composeur de numéros → *composeur 1.* R автоматический номеронабиратель. D automatische Wähleinrichtung; Wählautomat. E marcador automático. I selezionatore automatico. N (automatisch) kiesapparaat; kiesautomaat. P automatyczne urządzenie wybiercze. S nummersändare. (722)

make-time

1. **make-time** : the interval of time between the initiation of the closing operation and the instant when the current begins to flow in the main circuit. ★ durée d'établissement → *durée 75.* R время включения. D Einschaltzeit. E tiempo de establecimiento. I durata di stabilimento. N inschakeltijd. P czas załączania. S sluttid. (441)

making

1. **limiting making capacity** : → *capacity 15*
2. **making capacity** : → *capacity 17*
3. **prospective making current** : → *current 146*
4. **short-circuit making capacity** : → *capacity 25*

male

1. **male contact** : → *contact 86*

malleablizing

1. **malleablizing** : a heat treatment having the object of changing the structure of white cast iron to obtain malleable cast iron, either by decarburization or by graphitization of cementite. ★ (recuit de) malléabilisation → *recuit 4.* R отжиг белого чугуна на ковкий. D Glühfrischen; Tempern. E maleabilización (en un recocido). I ricottura di malleabilizzazione. N sferoïdaal gloeien van smeedbaar gietijzer. P nadawanie kowalności. S aducering. (841)

maloperation

1. **maloperation** (*Syn.* misoperation) : performance of a device different from that which would be expected. ★ fonctionnement incorrect → *fonctionnement 43.* R неправильное действие оборудования. D Fehlfunktion. E funcionamiento incorrecto. I funzionamento errato. N onjuist functioneren. P działanie nieprawidłowe. S felfunktion. (604)

man

1. **one man operation** : → *operation 36*

management

1. **management forecast of a system** : → *forecast 5*
2. **power system management** : the effective operation of generation, transmission and distribution facilities so as to assure adequate security of supply at minimum cost. ★ conduite du réseau → *conduite 6.* R управление работой энергосистемы. D Netzführung. E gestión de redes. I gestione di rete. N systeembeheer. P kierowanie pracą systemu elektroenergetycznego. S drift av elkraftsystem. (603)
3. **radioactive waste management** : the processes of storing or disposing of radioactive materials which are no longer needed, or of contaminated waste, so that the hazard to man in particular and all living organisms in general throughout the environment is minimized. ★ exploitation des déchets radioactifs → *exploitation 3.* R удаление радиоактивных отходов. D Beseitigung radioaktiven Abfalls. E gestión de desechos radiactivos. I gestione dei rifiuti radioattivi. N verwerking van radioactief afval. P usuwanie odpadów promieniotwórczych. S avfallshantering. (881)
4. **reliability and maintainability management** : the administration of the functions and activities necessary to determine and satisfy the reliability performance and maintainability performance requirements of an item. ★ gestion de la fiabilité et de la maintenabilité → *gestion 2.* R управление безотказностью и ремонтопригодностью. D Zuverlässigkeits-Management. E gestión de la fiabilidad y de la mantenibilidad. I conduzione aziendale dell'affidabilità e manutenibilità. N beheer van betrouwbaarheid en onderhoudbaarheid. P kierowanie niezawodnością i obsługiwalnością. S tillförlitlighetsledning. (191)
5. **signalling network management** : automatic and manual procedures, which can be overridden by ad hoc intervention, to vary the signalling routing in accordance with the conditions which prevail generally or locally within the signalling network. ★ gestion du réseau sémaphore → *gestion 3.* R управление сетью сигнализации. D Zeichengabe-Netz-Verwaltung. E gestión de la red de señalización. I gestione della rete di segnalazione. N signaleringsnetbeheer. P zarządzanie siecią sygnalizacyjną. S signalnätsstyrning. (714)

manager

1. **manager and secretary service** : → *service 9*

man-hours

1. **maintenance man-hours** (*Syn.* MMH (abbreviation)) : the accumulated durations of the individual maintenance times, expressed in hours, used by all maintenance personnel for a given type of maintenance action or over a given time interval. ★ durée équivalente de maintenance → *durée 100.* R трудоемкость технического обслуживания и ремонта в человеко-часах. D Instandhaltungs-Mannstunden. E duración equivalente de mantenimiento; horas-hombre de mantenimiento. I ore-uomo di manutenzione. N onderhoudsmanuren. P czas obsługi skumulowany (w osobo-godzinach). S mantimmar för underhåll. (191)
2. **mean maintenance man-hours** : the expectation of the maintenance man-hours. ★ durée moyenne équivalente de maintenance → *durée 122.* R средняя трудоемкость технического обслуживания и ремонта в человеко-часах. D mittlere Mannstunden für Instandhaltung. E duración media equivalente de mantenimiento; media de horas-hombre de mantenimiento. I numero medio di ore-uomo di manutenzione. N gemiddeld aantal onderhoudsmanuren. P czas obsługi średni (w osobo-godzinach). S medelarbetstid för underhåll. (191)

manila

1. **manila/kraft-mixture paper** : → *paper 10*
2. **manila paper** : → *paper 11*

manipulated

1. **manipulated range** (*Syn.* correcting range) : → *range 10*
2. **manipulated variable** : → *variable 4*

man-machine

1. **man-machine language** : → *language 7*

man-made

1. **man-made noise** : → *noise 36*
2. **man-made radiation** : → *radiation 41*

manned

1. **manned substation** : → *substation 12*
2. **permanently manned substation** : → *substation 19*

manual

1. **dependent manual operation** : → *operation 21*
2. **independent manual operation** : → *operation 25*
3. **manual air pump** : → *pump 1*
4. **manual answering** : → *answering 4*
5. **manual calling** : → *calling 6*
6. **manual control** : → *control 122*

7. **manual editing** : → *editing 3*
8. **manual hold** : → *hold 4*
9. **manual operation** : → *operation 31*
10. **manual operation of motor-drive mechanism** : → *operation 32*
11. **manual starter** : → *starter 3*
12. **manual switchgroup** : → *switchgroup 4*
13. **manual switching** : → *switching 31*
14. **manual (telephone) exchange** : → *exchange 13*
15. **manual (telephone) operation** : → *operation 33*
16. **private manual branch exchange** : → *exchange 19*
17. **private manual exchange** : → *exchange 20*

manufacture

1. **manufacture's spare pair** : → *pair 5*

manufacturing

1. **manufacturing failure** : → *failure 31*
2. **manufacturing fault** : → *fault 56*

map

1. **ionospheric map** : a geographical map showing curves of equal value of a characteristic parameter of the ionosphere at a given time, generally expressed in coordinated universal time (UTC). ★ carte ionosphérique → *carte 19.* D Ionosphärenkarte. P mapa jonosferyczna. (705)
2. **numerical ionospheric map** : numerical representation of a characteristic parameter of the ionosphere as a function of geographical coordinates and time. ★ carte numérique ionosphérique → *carte 20.* D numerische Ionosphärenkarte. P mapa jonosferyczna numeryczna. (705)
3. **(stored) network map** : → *network 90*
4. **to map (over)** : to establish a set of values having a defined correspondence with the quantities or values of another set. ★ appliquer → *appliquer 1.* R отображать, устанавливать соответствие. D abbilden auf. E delimitar; aplicar. I mappare. N correspondentietabel maken. P ustalać zbiór wartości. S avbilda. (714)
5. **voltage map** : consistent presentation of the voltages at the major nodes of a network under specified operating conditions. ★ plan de tension → *plan 29.* R карта напряжений. D Spannungsplan. E plan de tensión. I piano di tensioni. N spanningsoverzicht. P mapa napięciowa. S spänningsplan. (603)

map-in-memory

1. **map-in-memory** (*Syn.* (stored) network map) : → *network 90*

margin

1. **effective margin** (of a given apparatus) : the margin measured on a specified receiver under actual operating conditions. ★ marge effective → *marge 14.* R эффективная исправляющая способность (данного аппарата). D effektiver Empfangsspielraum (eines gegeben Geräts). E margen efectivo (de un aparato dado). I margine effettivo. N effectieve marge (van een gegeven apparaat). P marża rzeczywista. S effektiv marginal. (721)
2. **(electromagnetic) compatibility margin** : the difference between the immunity level of a device, equipment or system and the emission limit from the disturbance source. ★ marge de compatibilité (électromagnétique) → *marge 6.* R запас (электромагнитной) совместимости. D (elektromagnetischer) Verträglichkeitsbereich. E margen de compatibilidad (electromagnética). I margine di compatibilità (elettromagnetica). N (elektromagnetische) compatibiliteitsruimte; compatibiliteitsmarge. P margines kompatybilności (elektromagnetycznej). S EMC-marginal. (161)
3. **emission margin** : the difference between the electromagnetic compatibility level and the emission limit for a device, equipment or system. ★ marge d'émission → *marge 11.* R запас по уровню излучения на источнике. D Abstrahlungsbereich. E margen de emisión. I margine di emissione. N stoorniveauruimte; stoorniveaumarge. P margines emisji. S emissionsmarginal. (161)
4. **(fade) margin** : the maximum fading depth which can be tolerated on a radio link for a specified quality of reception. ★ marge contre les évanouissements → *marge 5.* D Schwundreserve. P margines głębokości zaniku (dopuszczalny). (705)
5. **flat fade margin** : the fade margin in the absence of frequency selective fading within the bandwidth of the receiver. ★ marge brute → *marge 4.* D Brutto-Schwundreserve; Flachschwundreserve. P margines zaniku płaskiego. (705)
6. **gain margin** : for an absolutely stable feedback system, the reciprocal of the open-loop gain at the frequency at which the phase angle reaches $-\pi$ rad. ★ marge de gain → *marge 7.* R запас устойчивости по амплитуде. D Amplitudenrand. E margen de ganancia. I margine di guadagno. N versterkingsmarge. P zapas wzmocnienia. S förstärkningsmarginal. (351)
7. **immunity margin** : the difference between the immunity limit of a device, equipment or system and the electromagnetic compatibility level. ★ marge d'immunité → *marge 12.* R запас невосприимчивости. D Störfestigkeitsbereich. E margen de inmunidad. I margine di immunità. N stralingsongevoeligheidsruimte; stralingsongevoeligheidsmarge. P margines odporności. S tålighetsmarginal. (161)
8. **margin** (of a receiver or other terminal) : the maximum value of a degree of individual distortion compatible with correct translation by a printer receiver or another terminal, when the signals arrive at the input under specified conditions. ★ marge → *marge 1.* R исправляющая способность (приемника или другого терминала). D Empfangsspielraum (eines Empfängers oder einer Endstelle). E margen (de un receptor o terminal). I margine (di ricevitore o terminale). N marge (van een ontvanger of terminal). P marża (odbiornika lub urządzenia końcowego). S marginal. (721)
9. **margin** (of a start-stop apparatus) : the maximum value of the degree of gross start-stop distortion compatible with the correct translation by a start-stop apparatus of all the character signals appearing either singly, or at the maximum rapidity corresponding to the standard modulation rate. ★ marge → *marge 2.* R исправляющая способность (стартстопного аппарата). D Empfangsspielraum (eines Start-Stop-Empfängers). E margen (de un aparato arrítmico). I margine (di apparato telegrafico). N marge (van een start/stop-apparaat). P marża (urządzenia arytmicznego). S marginal. (721)
10. **margin of a synchronous receiver** : the margin of a synchronous receiver determined by the degree of isochronous distortion. ★ marge d'un récepteur synchrone → *marge 13.* R исправляющая способность синхронного приемника. D synchroner Empfangsspielraum. E margen de un receptor síncrono. I margine di ricevitore sincrono. N marge van een synchrone ontvanger. P marża odbiornika synchronicznego. S marginal hos synkronmottagare. (721)
11. **net fade margin** : the fade margin equal to the fading depth at a fixed frequency exceeded for a fraction of time equal to that during which a specified quality of reception is not obtained. *Note.* — In case of selective fading, net fade margin is smaller than flat fade margin. ★ marge nette → *marge 15.* D Netto-Schwundreserve. P margines zaniku netto. (705)
12. **net margin** : the margin of a terminal, when the modulation rate at the input has its nominal value. ★ marge nette → *marge 16.* R чистая исправляющая способность. D Netto-Empfangsspielraum. E margen neto. I margine netto. N netto marge. P marża właściwa. S nettomarginal. (721)
13. **nominal margin** (of a type of apparatus) : the minimum value specified for the effective margin of equipment of a given type when working under standard operating and adjustment conditions. ★ marge nominale → *marge 17.* R номинальная исправляющая способность (типа аппарата). D Nennspielraum (eines Gerätetyps). E margen nominal (de un tipo de aparato). I margine nominale. N nominale marge. P marża znamionowa. S nominell marginal. (721)
14. **phase margin** : for an absolutely stable feedback system, the difference between π rad and the absolute value of the open-loop phase angle at the frequency at which the open-loop gain is unity. ★ marge de phase → *marge 9.* R запас устойчивости по фазе. D Phasenrand. E margen de fase. I margine di fase. N fasemarge. P zapas fazy. S fasmarginal. (351)
15. **stability margin of a system state variable** : the difference between the actual value of a given system state variable and its stability limit. ★ marge de stabilité d'une variable d'état → *marge 10.* R запас устойчивости. D Stabilitätsmarge einer Netzvariablen. E margen de estabilidad de una variable de

estado. I margine di stabilità di una variabile di stato. N stabiliteitsmarge van een systeemtoestandsvariabele. P margines stabilności zmiennej systemu elektroenergetycznego. S stabilitetsmarginal för tillståndsvariabel. (603)

16. **synchronous (start-stop) margin** : the maximum value of the margin of a start-stop apparatus obtained by adjusting the modulation rate of the input signals to the most favourable value with respect to the time-base characteristics of the receiver. ★ marge au synchronisme → *marge 3.* R синхронная исправляющая способность (стартстопного аппарата). D synchroner Speilraum (eines Start-Stop-Empfängers). E margen en el sincronismo (de un aparato arrítmico). I margine sincrono. N synchrone (start/stop-) marge. P marża przy synchronizmie. S synkron marginal. (721)
17. **theoretical margin** : the margin that could be evaluated from the manufacturing data of the equipment, assuming that it is working under perfect conditions. ★ marge théorique → *marge 18.* R теоретическая исправляющая способность. D theoretischer Spielraum. E margen teórico. I margine teorico. N theoretische marge. P marża teoretyczna. S teoretisk marginal. (721)

marginal

1. **long-run marginal cost** : → *cost 14*
2. **marginal cost** : → *cost 15*
3. **marginal cost method** : → *cost 16*
4. **short-run marginal cost** : → *cost 21*

mark

1. **alternate mark inversion code** : → *code 2*
2. **alternate mark inversion signal** : → *signal 10*
3. **alternate mark inversion violation** : → *violation 1*
4. **cardinal mark** : artificial mark used to indicate, with reference to the cardinal points of the compass, where navigable water may be found. ★ marque cardinale → *marque 1.* R кардинальный знак. D kardinales Zeichen. E marca cardinal. I marca cardinale. N cardinaal teken. P znaki kardynalne. S kardinalmärke. (845)
5. **electric mark** : a visible sign left by an electric arc or by the passage of current through the body. ★ marque électrique → *marque 3.* R электрический знак. D Strommarke. E señal eléctrica. I marcatura elettrica. N elektrisch merkteken; elektrisch litteken. P znamię porażenia elektrycznego. S elektrisk brännmärke. (604)
6. **lateral mark** : artificial mark used to indicate the course of a navigable waterway. *Note.* — A preferred-channel mark that is used to indicate a preferred course at a point where a choice of courses exists. ★ marque latérale → *marque 4.* R боковой кромочный знак. D laterales Zeichen. E marca lateral. I marca laterale. N lateraal teken. P znaki boczne toru wodnego. S lateralmärke. (845)
7. **leading marks** : two or more marks positioned to indicate a leading line, or navigational course, in the direction in which they may be seen in vertical alignment. ★ alignement de jour → *alignement 3.* R створные знаки. D Richtbaken. E marcas de alineación. I segnali di allineamento. N geleidelijn. P znaki nabieżnikowe. S ensmärken. (845)
8. **mark condition** : → *condition 14*
9. **modified alternate mark inversion code** : → *code 37*
10. **(navigation) mark** : natural or artificial object that provides navigational formation by virtue of both its situation and its distinctive appearance. ★ marque (de navigation) → *marque 2.* R навигационный знак. D Navigations-Zeichen. E marca (de navegación). I marca. N (navigatie)baken. P znak (nawigacyjny). S navigationsmärke. (845)
11. **zero scale mark** : the mark on the scale associated with the zero of the scale numbering. ★ zéro de l'échelle → *zéro 12.* R нулевая отметка шкалы. D Skalennullpunkt. E cero de la escala. I zero della graduazione. N nulpuntmarkering (op schaal). P zero podziałki. S nollpunkt. (301)

marker

1. **aircraft warning marker** (for conductor and earth wire) : a warning device visible during the day, used on conductors or earth wires. ★ balise diurne → *balise 2.* R предупредительная маркировка (проводов и молниезащитных тросов для авиации). D Flugwarnmarker (für Leiter und Erdseile). E baliza diurna esférica (para conductor y cable de tierra). I dispositivo di segnalazione diurna (per conduttore e corda di guardia). N markering ten behoeve van de luchtvaart (voor een geleider). P znaczniki ostrzegawcze dla samolotów (na przewodach i drutach). S flygvarningsklot. (466)
2. **marker** : a control device used for marking in a switching network. ★ marqueur → *marqueur 1.* R маркёр (в коммутации). D Markierung. E marcador (en conmutación). I marcatore. N merker. P oechownik. S markör. (714)
3. **marker post** : → *post 5*
4. **marker space** : → *space 14*
5. **(outline) marker light** : → *light 50*
6. **raised pavement marker** (*Syn.* road stud) : → *stud 2*

marking

1. **marking** : the act of assigning a specific state to a traffic-carrying device. ★ marquage → *marquage 2.* R маркирование. D markieren. E marcado. I marcaggio. N markeren. P oechowanie. S markering. (714)
2. **road marking** : mark, line, pattern, symbol or alphanumeric character applied to the surface of a road to regulate, or inform, vehicular or pedestrian traffic. A road marking may incorporate retroreflecting material. ★ marque routière → *marque 5.* R дорожная разметка. D Straßenmarkierung. E indicadores de carretera. I iscrizione sulla carreggiata. N wegmarkering. P oznakowanie drogi. S vägmarkering. (845)
3. **scale marking** : the series of marks distributed on a scale according to an appropriate law. *Note.* — The English word "graduation" means the process of setting out a scale. ★ graduation → *graduation 1.* R разметка шкалы. D Skalenteilstrich. E graduación. I graduazione. N schaalverdeling. P oznakowanie. S gradering. (301)

mask

1. **mask microphone** : → *microphone 20*

masked

1. **masked threshold** : → *threshold 9*

masking

1. **electronic masking** (of a picture) : a procedure in which part of a picture is suppressed by blanking the picture signal during appropriate periods, so as to substitute another picture in its place. ★ découpage électronique → *découpage 2.* R электронное маскирование (изображения). (723)
2. **fault masking** : the condition in which a fault exists in a sub-item of an item but cannot be recognized because of a feature of the item or because of another fault of that sub-item or of another sub-item. ★ masquage de panne → *masquage 1.* R маскируемая неисправность. D Fehlermaskierung. E enmascaramiento de averías. I mascheramento di avaria. N maskeren van defecten. P niezdatność zamaskowana. S felmaskering. (191)
3. **masking** : 1. The process by which the threshold of hearing for one sound is raised by the presence of another (masking) sound. 2. The amount by which the threshold of hearing for one sound is raised by the presence of another (masking) sound, expressed in decibels. ★ effet de masque → *effet 28.* R маскировка. D Verdeckung. E efecto de enmascaramiento. I mascheramento. N maskering. P maskowanie. S maskering. (801)
4. **masking audiogram** : → *audiogram 1*

mass

1. **acoustic mass** (*Syn.* inertance) : at a frequency for which inertia is dominant, quotient of sound pressure by the resulting in-phase volume acceleration during sinusoidal motion. *Note.* — Acoustic mass has dimensions of mass divided by the square of area. ★ masse acoustique → *masse 11.* R акустическая масса; инерционность. D akustische Masse. E masa acústica; inertancia. I massa acustica; inertanza acustica. N akoestische vervangingsmassa. P masa akustyczna; inertancja. S akustisk massa. (801)
2. **active mass** (*Syn.* effective mass) : in a magnetic body, the mass regarded as effectively magnetized under given conditions. ★ masse active → *masse 12.* R активная масса; эффективная масса. D aktive Masse; effektive Masse. E masa activa; masa efectiva. I massa attiva; massa effettiva. N actieve massa; effectieve massa. P masa równoważna. S effektiv massa. (221)
3. **active mass factor** : → *factor 4*

4. **apparent mass** : quotient of force by the resulting in-phase acceleration during sinusoidal motion. *Note.* — This term is best applied at frequencies for which inertia is dominant. ★ masse apparente → *masse 13.* R кажущаяся масса. D effektive Masse. E masa aparente. I massa apparente. N schijnbare massa. P masa pozorna. S skenbar massa. (801)
5. **apparent power (mass) density** : → *density 1*
6. **atomic mass unit** : → *unit 6*
7. **collision mass stopping power** : → *power 21*
8. **critical mass** : the minimum mass of fissile material which can be made critical with a specified geometrical arrangement and material composition. ★ masse critique → *masse 15.* D kritische Masse. E masa crítica. I massa critica. N kritieke (kritische) massa. P masa krytyczna. S kritisk massa. (026)
9. **effective mass** (*Syn.* active mass) : → *mass 2*
10. **effective mass factor** (*Syn.* active mass factor) : → *factor 4*
11. **effective mass of the stylus tip** : the ratio of a force applied to a reproducing stylus tip to the acceleration generated by that force. ★ masse de l'équipage mobile rapportée à l'extrémité de la pointe de lecture → *équipage 4.* R действующая масса подвижной системы звукоснимателя. D effektive Nadelmasse bezogen auf den Abtastpunkt. E masa efectiva de la aguja de lectura. I massa dell'equipaggio mobile riportata all'estremità della puntina di riproduzione. N effectieve naaldpuntmassa. P masa skuteczna wierzchołka igły. S effektiv nålspetsmassa. (806)
12. **low thermal mass furnace** : → *furnace 34*
13. **mass** (*m*) : a fundamental quantity postulated to describe inertia and gravitation. ★ masse → *masse 8.* R масса. D Masse. E masa. I massa. N massa. P masa. S massa. (111)
14. **mass attenuation coefficient** : → *coefficient 33*
15. **mass attenuation coefficient (pair production)** : → *coefficient 34*
16. **mass attenuation coefficient (photoelectric)** : → *coefficient 35*
17. **mass attenuation coefficient (scattering)** : → *coefficient 36*
18. **mass defect** : → *defect 1*
19. **mass energy transfer coefficient** : → *coefficient 37*
20. **mass energy-absorption coefficient** : → *coefficient 38*
21. **mass in working order** : the total of the tare and mass of driving staff and of the various items required in normal service (sand, breakdown equipment, tools, fuel, lubricating oil, etc.). ★ masse en ordre de marche → *masse 19.* R служебная масса. D Gesamtgewicht; Dienstgewicht. E peso en orden de marcha. I massa in ordine di marcia. N dienstmassa. P masa służbowa. S tjänstevikt. (811)
22. **mass number** : → *number 14*
23. **mass spectrograph** : → *spectrograph 2*
24. **mass spectrometer** : → *spectrometer 5*
25. **radiative mass stopping power** : → *power 155*
26. **relative optical air mass** (*m*) : ratio of the slant optical thickness, $\delta(\varepsilon)$, to the vertical optical thickness, $\delta(0)$, of the atmosphere. $m = \delta(\varepsilon)/\delta(0)$. Unit: 1 *Note.* — When the curvature of the atmosphere and atmospheric refraction are neglected, $m = 1/\cos\varepsilon$. ★ masse d'air optique relative → *masse 16.* R относительная оптическая масса воздуха. D relative optische Luftmasse. E masa óptica del aire relativa. I massa ottica relativa dell'aria. N relatieve optische luchtmassa. P gęstość optyczna atmosfery względna. S relativ optisk luftmassa. (845)
27. **rest mass** (m_0) : the mass of a particle excluding additional mass acquired by the particle in motion according to the theory of relativity. ★ masse au repos → *masse 14.* R масса покоя. D Ruhemasse. E masa en reposo. I massa di riposo. N rustmassa. P masa spoczynkowa. S vilomassa. (881)
28. **saturation magnetization (mass) density** : → *density 28*
29. **service mass (of a battery)** : the mass of a battery in service condition. ★ masse en service (d'un accumulateur) → *masse 20.* R эксплуатационная масса (батареи). D Betriebsgewicht. E masa en servicio (de una batería). I massa di un accumulatore pronto all'uso. N bedrijfsgewicht. P masa użytkowa. S batterivikt. (486)
30. **spectral mass attenuation coefficient** : → *coefficient 65*
31. **tare mass (of a vehicle)** : the mass of an empty vehicle. ★ tare (d'un véhicule) → *tare 2.* R масса тары (единицы подвижного состава). D Fahrzeugeigengewicht. E tara de un vehículo. I tara (d'un veicolo). N tarra (van een voertuig); eigen massa (van een voertuig). P masa własna (pojazdu). S taravikt; tomvikt. (811)
32. **total loss (mass) density** : → *density 38*
33. **total mass stopping power** : → *power 192*
34. **unsprung mass** : the mass of those parts of the running gear (wheels, axles, gearing, traction motors, etc.) which are supported directly by the axle and are unable to rise and fall independently of the parts in contact with the rail. ★ masse non suspendue → *masse 21.* R неподрессоренная масса. D unabgefederte Masse. E masa no suspendida. I massa rigida. N ongeveerde massa. P masa nieresorowana. S oavjädrad massa. (811)

mass-impregnated

1. **mass-impregnated non-draining insulation** : → *insulation 41*
2. **mass-impregnated (paper) insulation** : → *insulation 42*

mast

1. **arc furnace electrode mast** : a rise and fall vertical structure on which sits the electrode arm. Fixed masts carry a moving electrode arm. ★ mât de potence d'électrode de four à arc → *mat 3.* R стойка электрода дуговой печи. D Elektroden-Mast des Lichtbogenofens. E mástil de la estructura soporte de electrodo de un horno de arco. I montante dell'elettrodo del forno ad arco. N elektrodemast (van een boogoven). P maszt (zawieszenia elektrod). S elektrodpelare. (841)
2. **arc furnace electrode mast brake** (*Syn.* arc furnace electrode mast snubber) : → *mast 3*
3. **arc furnace electrode mast snubber** (*Syn.* arc furnace electrode mast brake) : a device to automatically arrest the movement of a mast or electrode arm, in the event of a failure of the motivation mechanism. ★ dispositif de blocage d'une potence d'électrode → *dispositif 41.* R тормоз для фиксации электрода дуговой печи. D Feststellvorrichtung an der Elektroden-Säule eines Lichtbogenofens. E dispositivo de detención de la estructura soporte de un horno de arco. I dispositivo di bloccaggio del montante dell'elettrodo. N blokkeerinrichting van een elektrodemast. P amortyzator masztu (zawieszenia elektrod). S elektrodanslag. (841)
4. **mast** (*Syn.* pole) : → *pole 16*

master

1. **artwork master** : → *artwork 1*
2. **european master reference for telephone transmission** : → *reference 9*
3. **master (broadcasting) antenna** (*Syn.* MATV) : → *MATV 1*
4. **master clock** : → *clock 2*
5. **master controller** : → *controller 6*
6. **master copy** : in the assembly of a recorded programme by editing techniques, the first tape produced which contains all the intended scene durations and sequences. ★ programme à diffuser → *programme 12.* R вторичная видеофонограмма дубль-оригинал. D Sendekopie; geschnitten; Sendeband. E montaje original. I copia principale. N moederband. P kopia (zapisu). S originalband. (806)
7. **master negative** (*Syn.* master original) : a metal master produced by an electroplating process from a lacquer original. It is used to generate further metal moulds by subsequent electroplating. ★ père original → *père 1.* R первый оригинал; первый негатив. D Originalnegativ («Vater»). E registro original (sonido). I negativo originale. N vader. P negatyw (płyty gramofonowej). S patris. (806)
8. **master original** (*Syn.* master negative) : → *master 7*
9. **master original** : recording of original signals. ★ enregistrement original → *enregistrement 31.* R первичная видеофонограмма оригинал. D Originalaufzeichnung, ungeschnitten. E registro original (imagen). I registrazione originale. N originele opname. P oryginał (zapisu). S originalinspelning. (806)
10. **master oscillator** : → *oscillator 1*
11. **master station** (*Syn.* control centre) : → *centre 7*
12. **master station** : → *station 19*
13. **master substation** : → *substation 13*

mastergroup

1. **basic mastergroup** : a mastergroup occupying the standardized frequency band 812-2 044 kHz. *Note.* — In the USA, the basic mastergroup is an assembly of 10 supergroups occupying the frequency band 564-3 084 kHz. ★ groupe tertiaire de base → *groupe 68.* R основная третичная группа. D Basistertiärgruppe; Tertiärgruppe A (veraltet). E grupo terciario de base. I gruppo terziario di base. N basishoofdgroep; A-hoofdgroep. P grupa trójna podstawowa. S grund-300-grupp. (704)
2. **mastergroup** : 1. An assembly, obtained by frequency division multiplexing of a specified number of supergroups, normally 5, in adjacent positions in a frequency band of specified width with guard bands between supergroups. 2. A frequency band of standardized width, 1 232 kHz, in a multichannel carrier system and occupying one of a number of specified positions in the spectrum. *Notes. 1* — A mastergroup is normally an assembly of 300 FDM telephone channels. *2* — In the USA, a mastergroup is an assembly of 10 supergroups, normally 600 FDM telephone channels, with a bandwidth of 2 520 kHz. *3* — Signals, other than those derived from an assembly of supergroups but having specified characteristics, may occupy the whole or a part of a frequency band normally assigned to a master group. ★ groupe tertiaire → *groupe 66.* R третичная группа. D Tertiärgruppe. E grupo terciario. I gruppo terziario; Gr. III (abbreviazione). N hoofdgroep. P grupa trójna. S 300-grupp. (704)
3. mastergroup B (obsolete term) : a mastergroup occupying the frequency band 2 796-4 028 kHz. ★ groupe tertiaire B → *groupe 67.* R третичная группа B (устаревший термин). D Tertiärgruppe B (veralteter Begriff). E grupo terciario B. I gruppo terziario B (termine obsoleto). N B-hoofdgroep. P grupa trójna podstawowa B. S ..... (704)
4. **mastergroup modulating equipment** : → *equipment 47*
5. **mastergroup translating equipment** : → *equipment 48*

mast-head

1. **mast-head light** : → *light 42*

mastoid

1. **artificial mastoid** (*Syn.* mastoid simulator) : device which simulates the mechanical impedance of the average human mastoid where a bone vibrator may be applied to permit calibration of the vibrator. ★ mastoïde artificiel → *mastoïde 1.* R искусственный мастоид. D künstliches Mastoid. E mastoides artificial. I mastoide artificiale. N rotsbeensimulator. P wyrostek brodawkowy sztuczny. S artificiell mastoid. (801)
2. **mastoid simulator** (*Syn.* artificial mastoid) : → *mastoid 1*

mat

1. **earth mat** (*Syn.* ground mat) : a conductive sheet or a system of conductors arranged in the form of a grid or mat located on the ground, to provide a conductive plane surface for an antenna. ★ tapis de sol → *tapis 1.* R заземленная сетка (антенны). D Erdungsdrahtnetz; Erdungsnetz. E trenza de tierra; rejilla de tierra. I rete di terra. N aardmat; aardnet. P sieć uziemienia. S motviktsnät. (712)
2. **ground mat** (*Syn.* earth mat) : → *mat 1*
3. **heating resistance mat** (*Syn.* heating resistance pad) : → *pad 3*
4. **mat** : a product made of filaments, staple fibres or strands, cut or uncut, oriented or not, held loosely together in the form of a sheet or sheeting (212-05-01). ★ mat → *mat 2.* R мат. D Matte. E mat. I feltro. N niet-geweven textiel vilt. P mata. S matta. (212)

match

1. **polarization match** : the condition which exists when the receiving polarization of an antenna in a specified direction is the same as the polarization of the wave received from that direction. *Note.* — If no direction is specified, the direction is assumed to be that of the maximum received power. ★ adaptation de polarisation → *adaptation 5.* R поляризационное согласование. D Polarisationsausrichtung. E adaptación de polarización. I adattamento di polarizzazione. N polarisatie-aanpassing. P zakłócenie polaryzacyjne. S polarisationsanpassning. (712)

matched

1. **matched cladding** : → *cladding 14*
2. **matched load** (*Syn.* matched termination) : → *termination 2*
3. **matched output voltage** : → *voltage 106*
4. **matched termination** : → *termination 2*

matching

1. **colour matching** : action of making a colour stimulus appear the same in colour as a given colour stimulus. *Note.* — The French and Russian terms apply mainly to the adjustement of equality of the fields of a visual colorimeter, whereas the English and German terms apply equally well to the selection of two material specimens having the same colour under a given illuminant. ★ égalisation de couleur → *égalisation 5.* R уравнивание по цвету. D Farbabgleich. E igualación de color. I uguagliamento di colori. N kleurgelijkstelling. P zrównanie barw. S färgavstämning. (845)
2. **current matching transformer** : → *transformer 23*
3. **index matching material** : → *material 20*
4. **matching** (between a load and a source) : 1. When a load is directly connected to a given source, the conditions under which either exchangeable power or available power from the source, or maximum current or voltage in the load, or minimum reflection factor at the interface between the source and the load is obtained. 2. For a given source and a given load an action whereby maximum power, current or voltage is obtained in the load or minimum power is reflected to the source, either by insertion of a two-port device of appropriate characteristics between the source and the load, or by variation of the load or source characteristics. *Note.* — In French, examples of matching are : "adaptation en courant", "adaptation en puissance", "adaptation en réflexion", "adaptation en tension". ★ adaptation → *adaptation 1.* R согласование (между нагрузкой и источником). D Anpassung (zwischen einer Last und einer Quelle). E adaptación (entre una carga y una fuente). I adattamento (fra un carico e una sorgente). N aanpassen (van een belasting aan een bron). P dopasowanie (między obciążeniem i źródłem). S anpassning. (702)
5. **matching section** : → *section 15*
6. **matching stub** : → *stub 1*
7. **matching transformer** : → *transformer 40*
8. **voltage matching transformer** : → *transformer 78*

mated

1. **connector mated set** : → *connector 14*

material

1. **acoustical insulation material** : → *insulation 1*
2. **active material** : any material which undergoes electrode reaction in a cell and enables chemical energy to be converted into electric energy when the cell discharges. *Note.* — In a secondary cell the active materials are restored to their original composition on recharge. ★ matière active → *matière 5.* R активное вещество. D aktives Material. E materia activa. I materiale attivo; depolarizzante. N actieve stof. P masa czynna. S aktivt material. (111)
3. **active material** : the material which reacts chemically to produce electric energy when the cell discharges, and which is restored to its original state during the charge. ★ matière active → *matière 6.* R активная масса. D aktive Masse. E materia activa. I materia attiva. N actieve stof; actief materiaal. P masa czynna. S aktivt material. (486)
4. **air-equivalent material** : a material used for the construction of air-filled ionization chambers in photon dosimetry, whose atomic composition provides at the material/air interface, the charged particle equilibrium. ★ matériau équivalent à l'air → *matériau 12.* R воздухоэквивалентный материал. D luftäquivalentes Material. E sustancia equivalente al aire. I materiale aria-equivalente. N aan lucht equivalent materiaal. P materiał równoważny powietrzu. S luftekvivalent material. (881)
5. **backing (material)** (*Syn.* base (material)) : the flexible material carrying the adhesive to constitute an adhesive tape. ★ support → *support 11.* R основа (материал); основание (материал). D Träger der Klebeschicht. E soporte (en cinta adhesiva). I supporto (di nastro adesivo). N drager. P materiał podłożowy (taśmy klejącej). S ryggmaterial. (212)

6. **base material** (for printed circuits) : an insulating material on which conductive patterns may be formed. *Note.* — The material may be rigid or flexible. ★ support → *support 10.* R базовый материал (для печатных схем). D Basismaterial (für gedruckte Schaltungen). E material base (para circuitos impresos). I supporto (per circuiti stampati). N basismateriaal (voor gedrukte schakelingen). P materiał podłożowy (do płytek drukowanych). S basmaterial. (212)
7. **base (material)** (*Syn.* backing (material)) : → *material 5*
8. **base material** : insulating material upon which the pattern may be formed. *Note.* — The material may be flexible or rigid. ★ matériau de base → *matériau 8.* R материал основания (печатной платы). D Basismaterial. E material de base. I materiale di base. N basismateriaal. P materiał podłoża. S basmaterial. (541)
9. **combined (insulating) material** : a flexible sheet or sheeting consisting of two or more different insulating materials bonded together. ★ matériau (isolant) combiné → *matériau 16.* R композиционный (электроизоляционный) материал. D Mehrschichtisolierstoff. E material (aislante) compuesto. I materiale (isolante) combinato; materiale (isolante) composito. N (isolerend) laminaat. P materiał izolacyjny złożony. S laminat. (212)
10. **commutator mica material** : hard built-up mica or treated mica paper with low compressibility and dimensional tolerances used for building commutators. ★ micanite pour collecteurs → *micanite 3.* R коллекторный слюдосодержащий материал. D Kommutator-Mikanit. E micanita para colectores. I lastra a base mica per collettori. N mica voor collectorlamellen. P mikanit komutatorowy. S kommutatormikanit. (212)
11. **depleted material** : material which has undergone depletion. ★ matière appauvrie → *matière 7.* D verarmtes (abgereichertes) Material. E substancia empobrecida. I materiale impoverito. N verarmd materiaal. P materiał zubożony. S utarmat material. (026)
12. **emissive material** : material deposited on a metal electrode to promote the emission of electrons. ★ matière émissive → *matière 10.* R эмитирующее вещество. D Emitter (material). E sustancia emisora. I materiale emittente. N elektronen-emitterende stof. P emiter. S emissionsmaterial. (845)
13. **enriched material** : material in which the concentration of one or more specified isotopes of a constituent is greater than its natural value. ★ matière enrichie → *matière 11.* D angereichertes Material. E substancia enriquecida. I materiale arricchito. N verrijkt materiaal. P materiał wzbogacony. S anrikat material. (026)
14. **flexible mica material** : a built-up mica or treated mica paper with or without reinforcement, which is sufficiently flexible to permit winding or wrapping into place without heating. This flexibility may be maintained permanently. The material is available in sheet form and/or in rolls, e.g., flexible mica tapes and sheets for conductor, coil and slot insulation. ★ micanite souple → *micanite 6.* R гибкий слюдосодержащий материал. D Flexibel-Mikanit. E micanita flexible. I lastra a base mica flessibile. N buigzaam mica. P mikanit giętki. S flexibelt glimmermaterial. (212)
15. **grain-oriented material** : a material in which magnetic texture has been developed by complete or partial orientation of the grains. ★ matériau à grains orientés → *matériau 5.* R материал с кристаллографической текстурой. D kornorientierter Werkstoff. E material de grano orientado. I materiale a grani orientati. N materiaal met kristaloriëntatie. P materiał o ziarnach zorientowanych. S orienterat material. (221)
16. **gyromagnetic material** (*Syn.* gyromagnetic medium) : a material or medium capable of displaying the gyromagnetic effect. *Note.* — The electromagnetic properties of a gyromagnetic material or medium exhibit a characteristic behaviour described by the tensor permeability. ★ substance gyromagnétique → *substance 9.* R гиромагнитный материал; гиромагнитная среда. D gyromagnetischer Werkstoff; gyromagnetisches Medium. E sustancia giromagnética; medio giromagnético. I materiale giromagnetico; mezzo giromagnetico. N gyromagnetisch materiaal. P materiał giromagnetyczny; środowisko giromagnetyczne. S gyromagnetiskt material; gyromagnetiskt medium. (221,726)
17. **heat bondable mica material** : a built-up mica or treated mica paper, with or without reinforcement, which bonds to itself when heated, e.g., micafolium or mica tapes with thermoplastic or thermosetting binder. ★ micanite soudable à chaud → *micanite 5.* R слюдосодержащий материал, склеивающийся при нагревании. D Mikanit mit wärmehärtendem Bindemittel. E micanita soldable por calor. I lastra a base mica saldabile a caldo. N micafolium. P mikanit spajalny na gorąco. S värmehärdande glimmermaterial. (212)
18. **hysteresis material constant** : → *constant 22*
19. **impact-sound reducing material** : material producing low noise when excited by impacts or vibrations and attenuating the propagation of the impact sound and the vibration. ★ matériau insonore (antivibratile) → *matériau 13.* R вибропологлощающий материал. D Trittschall-Isolierungsmaterial. E material insonoro (antivibratorio). I materiale isolante al calpesto. N materiaal voor contactgeluid(s)isolatie. P materiał tłumiący dźwięki udarowe. S stegljuddämpande material. (801)
20. **index matching material** : a material, often a liquid or cement, whose refractive index is nearly equal to the core refractive index, used to reduce Fresnel reflections from a fibre end face. ★ substance adaptatrice d'indice → *substance 2.* R иммерсионный материал. D Immersionsmaterial. E material adaptador de índices. I materiale adattatore d'indice. N (brekings)index-aanpassingsmateriaal. P materiał immersyjny. S indexanpassat material. (731)
21. **insulating material** : a solid with negligibly low electric conductivity, used to separate conducting parts at different electrical potentials. *Note.* — In English, the term "insulating material" is sometimes used in a broader sense to designate also insulating liquids and gases. ★ matériau isolant → *matériau 14.* R твердый электроизоляционный материал. D Isolierstoff; isolierender Werkstoff. E material aislante; aislante. I materiale isolante (solido). N isolatiemateriaal. P materiał izolacyjny. S isolermaterial. (212)
22. **magnetically hard material** : a magnetic material having a high coercivity. *Note.* — A specific value of coercivity defining the boundary between magnetically hard and soft materials cannot easily be stated : it lies in the region 1 to 10 kA/m. ★ matériau magnétique dur → *matériau 19.* R магнитотвердый материал. D magnetisch harter Werkstoff. E material magnético duro. I materiale magnetico duro. N magnetisch hard materiaal. P materiał magnetycznie twardy. S hårdmagnetiskt material. (221)
23. **magnetically soft material** : a magnetic material having a low coercivity. *Notes. 1* — A specific value of coercivity defining the boundary between magnetically hard and soft materials cannot easily be stated : it lies in the region 1 to 10 kA/m. *2* — Certain magnetically soft iron alloys, for example silicon iron, used in electrical applications are commonly referred to as electrical steels and in some cases in French as "tôles magnétiques". ★ matériau magnétique doux → *matériau 18.* R магнитомягкий материал. D magnetisch weicher Werkstoff. E material magnético dulce. I materiale magnetico dolce. N magnetisch zacht materiaal. P materiał magnetycznie miękki. S mjukmagnetiskt material. (221)
24. **material buckling** : → *buckling 2*
25. **material dispersion** : → *dispersion 6*
26. **material dispersion parameter** : → *parameter 4*
27. **material measure** : → *measure 1*
28. **material scattering** : → *scattering 18*
29. **metal core base material** : base material having an internal metal sheet. ★ matériau de base à âme métallique → *matériau 9.* R материал основания с металлической сердцевиной; материал основания с металлическим слоем. D Metallkern-Basismaterial. E material de base con alma metálica. I materiale di base con anima metallica. N basismateriaal met metalen kern. P materiał podłoża o rdzeniu metalowym. S basmaterial med metallkärna. (541)
30. **metal-clad base material** : base material covered with metal on one or both sides. ★ matériau de base métallisé → *matériau 10.* R фольгированный материал основания. D metallkaschiertes Basismaterial. E material de base metalizado. I supporto isolante placcato con metallo. N basismateriaal met metaal bekleed. P materiał podłoża metalizowany. S metallfolierat basmaterial. (541)
31. **moulding mica material** : a rigid mica material capable of being formed to its final shape in a heated mould. ★ micanite moulable → *micanite 2.* R формовочный слюдосодержащий материал. D Formmikanit. E micanita

moldeable. I lastra a base mica stampabile. N micalex. P mikanit formowalny. S varmformbart glimmermaterial. (212)

32. **optically active material** : a material that can rotate the polarisation of linearly polarised optical radiation that passes through it. *Note.* — An optically active material exhibits different refractive indices for left and right circular polarisations. ★ substance optiquement active → *substance 13.* R оптически активный материал. D optischaktives Material. E material ópticamente activo. I materiale otticamente attivo. N optisch actief materiaal. P materiał aktywny optycznie. S optiskt aktivt material. (731)

33. **pre-impregnated material** (for electrical insulation) (*Syn.* prepreg (for electrical insulation)) : an impregnated insulating material, intended for curing after application. The term is usually restricted to sheet, sheeting or tape with semi-cured impregnant. ★ pré-imprégné → *préimprégné 2.* R препрег (для электрической изоляции); предварительно пропитанный материал (для электрической изоляции). D vorimprägnierter Werkstoff (für die elektrische Isolierung); Prepreg (für elektrische Isolation). E material preimpregnado (para aislamiento eléctrico). I preimpregnato (per isolamento elettrico). N voorgeïmpregneerd materiaal. P prepreg; materiał impregnowany wstępnie. S förimpregnerat material. (212)

34. **protective material** : any substance used for attenuating ionizing radiation with the aim of minimizing the exposure, absorbed dose, or dose equivalent. ★ matériau protecteur → *matériau 21.* R защитные материалы. D Strahlenschutzstoffe. E material protector. I materiali protettivi. N beschermende materialen. P materiał ochronny. S strålskyddsmaterial. (881)

35. **radioactive material** : material having the property of radioactivity. *Notes. 1* — For legal purposes material may be considered radioactive only if its activity or radioactive concentration exceeds a specified value. *2* — The material may contain radionuclides and stable nuclides. ★ matériau radioactif → *matériau 22.* R радиоактивный материал. D radioaktiver Stoff. E material radiactivo. I materiale radioattivo. N radioactief materiaal. P materiał radioaktywny. S radioaktivt material. (026,881)

36. **rigid mica material** : a built-up mica or treated mica paper with or without reinforcement, pressed in the form of flat pieces, e.g., commutator separators, heater plates. ★ micanite rigide → *micanite 4.* R твердый слюдосодержащий материал. D Hartmikanit. E micanita rígida. I lastra a base mica rigida. N stijf mica. P mikanit sztywny. S styvt glimmermaterial. (212)

37. **scintillating material** : a material able to emit, by means of scintillation, a luminous radiation in response to ionizing radiation. ★ matériau scintillant → *matériau 23.* R сцинтиллирующее вещество. D Szintillator. E material centelleante. I materiale scintillante. N scintillerend materiaal. P materiał scyntylacyjny. S scintillator. (391)

38. **sensitive material** (of a neutron detector) : the material used in certain neutron detectors, either for example in a lining or a filling gas, which is intended to produce directly ionizing particles from the neutrons by nuclear reaction. *Note.* — The word "particle" is used here in a general sense and includes fission fragments. ★ matière sensible → *matière 13.* R чувствительное вещество (детектора нейтронов). D strahlungsempfindliches Material (eines Neutronendetektors). E material sensible (de un detector de neutrones). I materiale sensibile (di un rivelatore di neutroni). N gevoelig materiaal (v.e. neutronendetector). P materiał uczulający (detektora neutronów). S (neutron)känsligt material. (391)

39. **sound absorbing material** : material characterized by relatively large capability of absorbing sound. ★ matériau absorbant → *matériau 6.* R звукопоглощающий материал. D Schallabsorptionsmaterial. E material absorbente acústico. I materiale assorbente acustico. N geluidabsorberend materiaal. P materiał dźwiękochłonny. S ljudabsorberande material. (801)

40. **tissue equivalent material** : a material having such atomic composition that it absorbs and scatters radiation of a specified kind to the same degree as a particular biological tissue, whatever the energy of radiation. ★ substance équivalente au tissu → *substance 6.* R тканеэквивалентный материал. D gewebeäquivalentes Material. E sustancia equivalente al tejido. I materiale tessuto-equivalente. N weefselequivalent materiaal. P material równoważny tkance. S vävnadsekvivalent material. (881)

matrix

1. **admittance matrix of a polyphase element in coherent components** : the transform of the operational admittance matrix $Y_m(s)$ or of the complex admittance matrix $\underline{Y}_m$ of this element defined by

$$Y_c(s) = B^{-1} Y_m(s) A$$

such that

$$I_c(s) = Y_c(s) U_c(s)$$

or

$$\underline{Y}_c = \underline{B}^{-1} \underline{Y}_m \underline{A}$$

such that

$$\underline{I}_c = \underline{Y}_c \underline{U}_c$$

Note. — The same transformation applies to the capacitance matrices or to those of the reciprocals of inductances. ★ matrice des admittances d'un élément polyphasé en composantes cohérentes → *matrice 6.* R матрица проводимостей многофазного элемента, представленная с помощью сопряженных составляющих. D Admittanzmatrix eines Mehrphasenelementes in kohärenten Komponenten. E matriz de admitancias de un elemento polifásico en componentes coherentes. I matrice delle ammettenze di un elemento polifase in componenti coerenti. N admittantiematrix van een meerfasenelement in coherente componenten. P macierz admitancyjna (elementu wielofazówego wyrażona składowymi koherentnymi). S ..... (131)

2. **antenna switching matrix** : a system of switches usually in rectangular matrix form, and their associated controls, for connecting each transmitter or receiver at a transmitting or receiving station with any selected antenna. ★ grille d'antenne → *grille 15.* R антенный коммутатор матричного типа. D Antennenschaltmatrix. E matriz de conmutación (de antena). I matrice di commutazione d'antenna. N antenneschakelmatrix. P matryca przełączająca antenowa. S antennomkopplingsnät. (712)

3. **bus admittance matrix** (*Syn.* Y bus matrix) : a matrix enabling the dependence of the node input currents on the node voltages to be expressed. ★ matrice des admittances nodales → *matrice 8.* R матрица узловых проводимостей. D Knotenadmittanzmatrix. E matriz de admitancias nodales; matriz de admitancias en cortocircuito. I matrice delle ammettenze nodali; matrice delle ammettenze in cortocircuito. N knooppuntsadmittantiematrix; Y-matrix. P macierz admitancji węzłowych. S knutpunktsadmittansmatris. (603)

4. **bus impedance matrix** (*Syn.* Z bus matrix) : the inverse bus admittance matrix. ★ matrice des impédances nodales → *matrice 12.* R матрица полных сопротивлений. D Knotenimpedanzmatrix. E matriz de impedancias nodales; matriz de impedancias en vacío. I matrice delle impedenze nodali; matrice delle impedenze a vuoto. N knooppuntsimpedantiematrix; Z-matrix. P macierz impedancji węzłowych. S knutpunktsimpedansmatris. (603)

5. **immittance matrix of a polyphase element in normalized components** : the canonical transform of an immittance matrix M_m defined by

$$M_c = \underline{A}^{-1} M_m A$$

★ matrice d'immittances d'un élément polyphasé en composantes normées → *matrice 13.* R матрица иммитансов многофазного элемента, представленная с помощью нормированных составляющих. D Immittanzmatrix eines Mehrphasenelementes in normierten Komponenten. E matriz de inmitancias de un elemento polifásico en componentes normalizadas. I matrice delle impedenze d'ingresso di un elemento polifase in componenti normalizzati. N immittantiematrix van een meerfasenelement in genormeerde componenten. P macierz immitancyjna (elementu wielofazowego wyrażona składowymi koherentnymi). S ..... (131)

6. **impedance matrix of a polyphase element in coherent components** : the transform of the operational impedance matrix $Z_m(s)$ or of the complex impedance matrix $\underline{Z}_m$ of this element defined by

$$Z_c(s) = A^{-1} Z_m(s) B$$

such that

$$U_c(s) = Z_c(s)\, I_c(s)$$

or

$$\underline{Z}_c = \underline{A}^{-1}\, \underline{Z}_m\, \underline{B}$$

such that

$$\underline{U}_c = \underline{Z}_c\, \underline{I}_c$$

★ matrice des impédances d'un élément polyphasé en composantes cohérentes → *matrice 11.* **R** матрица сопротивлений многофазного элемента, представленная с помощью сопряженных составляющих. **D** Impedanzmatrix eines Mehrphasenelementes in kohärenten Komponenten. **E** matriz de impedancias de un elemento polifásico en componentes coherentes. **I** matrice delle impedenze di un elemento polifase in componenti coerenti. **N** impedantiematrix van een meerfasenelement in coherente componenten. **P** macierz impedancyjna (elementu wielofazowego wyrażona składowymi koherentnymi). **S** ..... (131)

7. **incidence matrix** : a matrix describing the topology of the network. *Examples :* branch-bus incidence matrix, branch-mesh incidence matrix. ★ matrice d'incidence → *matrice 14.* **R** матрица инциденций. **D** Inzidenzmatrix. **E** matriz de incidencia. **I** matrice d'incidenza. **N** incidentiematrix. **P** macierz typologii sieci. **S** nätmatris. (603)
8. **matrix sign** : → *sign 1*
9. **mesh impedance matrix** : a matrix enabling the dependence of the mesh voltages on the mesh currents to be expressed. ★ matrice des impédances de maille → *matrice 10.* **R** матрица контурных сопротивлений. **D** Maschenimpedanzmatrix. **E** matriz de impedancias de malla. **I** matrice delle impedenze di maglia. **N** maasimpedantiematrix. **P** macierz impedancji oczka sieci. **S** maskimpedansmatris. (603)
10. **scattering matrix** : a square array of complex numbers consisting of the amplitude transmission factors and the amplitude reflection factors at the ports of a multiport structure. *Note.* — The scattering matrix is the array of the coefficients of the linear equations which express the normalized complex wave amplitudes of the transmitted wave and the reflected wave at each port 1,2,i,...*n* considered as an output port in terms of the normalized complex wave amplitudes of the incident waves to the ports 1,2,j,...*n* considered as input ports. ★ matrice de répartition → *matrice 3.* **R** матрица рассеяния. **D** Streumatrix. **E** matriz de distribución. **I** matrice di diffusione. **N** verstrooiingsmatrix. **P** macierz rosproszenia. **S** spridningsmatris. (726)
11. **switching matrix** : a subset of a switching stage consisting of an array of crosspoints arranged in the form of a matrix. ★ matrice de commutation → *matrice 2.* **R** коммутационная матрица. **D** Koppelvielfach; Koppelmatrix. **E** matriz de conmutación. **I** matrice di commutazione. **N** schakelmatrix. **P** matryca komutacyjna. **S** väljarmatris. (714)
12. **traffic matrix** : matrix of traffic intensities related to the traffic parcels between a number of origins and destinations. ★ matrice de trafic → *matrice 5.* **D** Verkehrsmatrix. **P** macierz strumieni ruchu. (715)
13. **Y bus matrix** (*Syn.* bus admittance matrix) : → *matrix 3*
14. **Z bus matrix** (*Syn.* bus impedance matrix) : → *matrix 4*

matrixing

1. **matrixing** (in colour television) : performing a linear colour co-ordinate transformation by electrical or optical means. ★ matriçage → *matriçage 1.* **R** матрицирование (в цветном телевидении). (723)

matting

1. **colour matting** : a technique, similar in its effect to chromakey which permits soft transitions from background to subject and which also uses colour processing to improve the quality of the final image. ★ incrustation douce → *incrustation 3.* **R** цветовое матирование. (723)

MATV

1. **MATV** (*Syn.* master (broadcasting) antenna) : antenna associated with a cabled distribution system intended for feeding the sound or television broadcast receivers of users located in the same building or complex of buildings. *Note.* — The use of the terms MATV and CATV varies according to local practice. ★ antenne collective → *antenne 63.* **R** главная антенна. (723)

maximum

1. **annual, quarterly, monthly, weekly daily, maximum demand** : → *demand 1*
2. **authorized maximum demand** : → *demand 2*
3. **full duration half maximum** (of a pulse) (*Syn.* FDHM (abbreviation)) : the time period over which a pulse has a level greater than 50 % of its maximum value. ★ durée à mi-crête → *durée 12.* **R** полная длительность импульса по уровню 0,5. **D** Halbwertszeit (eines Impulses); FDHM (Abkürzung). **E** duración total en puntos mitad del máximo (de un pulso); FDHM (de un pulso) (abreviatura). **I** durata completa a mezza altezza. **N** totale tijdsduur op halve (max.) hoogte (van een puls). **P** czas trwania impulsu na poziomie 0.5. **S** halvvärdestid. (731)
4. **full width at half maximum** : → *width 1*
5. **full width half maximum** (*Syn.* FWHM (abbreviation)) : the range of a variable over which a given characteristic is greater than 50 % of its maximum value. *Note.* — FWHM may be applied to characteristics such as radiation patterns, spectral linewidths etc and the variable may be wavelength, spatial or angular properties etc, as appropriate. ★ largeur à mi-crête → *largeur 3.* **R** полная ширина полосы по уровню 0,5. **D** Halbwertsbreite; FWHM (Abkürzung). **E** ancho total en puntos mitad del máximo; FWHM (abreviatura). **I** larghezza totale a semi altezza; FWHM (abbreviazione). **N** totale breedte op halve (max.) hoogte. **P** szerokość charakterystyki na poziomie 0.5. **S** halvvärdesbredd. (731)
6. **maximum absorbed dose** : → *dose 34*
7. **maximum asymmetric short-circuit current** : → *short-circuit current 5*
8. **maximum capacity of a power station** : → *capacity 18*
9. **maximum capacity of a unit** : → *capacity 19*
10. **maximum concentrated weight per metre** : → *weight 3*
11. **maximum continuous operating temperature** : → *temperature 25*
12. **maximum continuous rating** : → *rating 9*
13. **maximum contrast** : → *contrast 12*
14. **maximum counting rate** : → *rate 51*
15. **maximum demand required** : → *demand 17*
16. **maximum experimental safe gap** : → *gap 17*
17. **maximum fast spooling time** : → *time 85*
18. **maximum field** : → *field 49*
19. **maximum justification rate** (*Syn.* justification capacity) : → *capacity 12*
20. **maximum justification ratio** : → *ratio 54*
21. **maximum level** : → *level 57*
22. **maximum load of a motor vehicle** : → *load 63*
23. **maximum observed frequency** : → *frequency 128*
24. **maximum output** : → *output 20*
25. **maximum output level** : → *level 58*
26. **maximum output power** : → *power 81*
27. **maximum permeability** : → *permeability 16*
28. **maximum permissible a.c. current of a capacitor** : → *current 123*
29. **maximum permissible a.c. voltage of a capacitor** : → *voltage 107*
30. **maximum permitted gap** : → *gap 18*
31. **maximum prospective peak current** : → *current 124*
32. **maximum rated input power** : → *power 82*
33. **maximum rated step voltage** : → *voltage 108*
34. **maximum rated supply current** : → *current 125*
35. **maximum rated through-current** : → *through-current 1*
36. **maximum rated voltage** : → *voltage 109*
37. **maximum rated X-ray tube load** : → *load 64*
38. **maximum rated X-ray tube voltage** : → *voltage 110*
39. **maximum recording audiofrequency current** : → *current 126*
40. **maximum resetting time** : → *time 86*
41. **maximum retention time** : → *time 87*
42. **maximum service output (of an internal combustion engine)** : → *output 23*
43. **maximum short-circuit currents in welding** : → *short-circuit current 6*
44. **maximum short-circuit power** : → *power 83*

45. **maximum source e.m.f.** : → *e.m.f. 3*
46. **maximum speed (of a vehicle)** : → *speed 21*
47. **maximum start time to record/reproduce speed** : → *time 88*
48. **maximum stopping time from maximum spooling speed** : → *time 89*
49. **maximum stopping time from record/reproduce speed** : → *time 90*
50. **maximum stuffing rate** (*Syn.* justification capacity) : → *capacity 12*
51. **maximum stuffing ratio** (*Syn.* maximum justification ratio) : → *ratio 54*
52. **maximum surface temperature** : → *temperature 26*
53. **maximum theoretical numerical aperture** : → *aperture 16*
54. **maximum transfer time** : → *time 91*
55. **maximum usable read number** : → *read 1*
56. **maximum usable reading time** : → *time 92*
57. **maximum usable viewing time** : → *viewing 1*
58. **maximum usable writing speed** : → *speed 25*
59. **maximum voltage** : → *voltage 111*
60. **maximum voltage between segments** : → *voltage 112*
61. **maximum welding power** : → *power 84*
62. **meter with maximum demand indicator** : → *meter 33*
63. **standing-wave maximum** (*Syn.* antinode (of a standing wave)) : the location in a propagation medium where the vectorial sum of a specified field quantity of two waves creating a standing wave is a maximum. ★ ventre → *ventre 1.* R максимум стоячей волны; пучность (стоячей волны). D Stehwellen-Maximum; Bauch. E vientre (de una onda estacionaria). I ventre (di un'onda stazionaria). N buik. P maksimum fali stojącej; przeciwwęzeł fali stojącej. S ståendevågmaximum. (726)
64. **utilisation factor of the maximum capacity of a unit** : → *factor 182*
65. **utilisation period at maximum capacity of more units** : → *period 34*
66. **utilisation period at maximum capacity of one unit** : → *period 35*
67. **writing speed, maximum** : → *speed 58*

maxwell

1. **maxwell, Mx, M** (Mx, M) : unit of magnetic flux density, the use of it is deprecated and is replaced by weber (Wb) in the SI system. ★ maxwell,Mx,M → *maxwell 2.* (100)
2. **Maxwell's equations** : → *equation 3*

Maxwell-Boltzmann

1. **Maxwell-Boltzmann statistics** : → *statistics 3*
2. **Maxwell-Boltzmann velocity-distribution law** : → *law 8*

MDT

1. **MDT** (*Syn.* mean down time) : → *time 97*

mean

1. **asymptotic mean availability** : → *availability 2*
2. **asymptotic mean unavailability** : → *unavailability 1*
3. **degree of start-stop distortion at the actual mean modulation rate** (*Syn.* degree of synchronous start-stop distortion) : → *degree 17*
4. **mean** (noun and adjective) : 1. The value obtained as the expectation of a random variable. 2. An integral whose magnitude depends on a time during a given interval divided by the time interval itself. ★ moyen → *moyen 49.* R средний. D Mittel...; Durchschnitts.... E ... medio (adjetivo); ... promedio; ... valor medio (nombre). I media. N gemiddeld. P średnia (rzeczownik i przymiotnik). S medel-. (191)
5. **mean access delay (of a communication)** : → *delay 26*
6. **mean accumulated down time** : → *time 94*
7. **mean active corrective maintenance time** : → *time 95*
8. **mean administrative delay** : → *delay 27*
9. **mean availability** : → *availability 6*
10. **mean busy hour** (*Syn.* time consistent busy hour) : → *hour 9*
11. **mean deceleration (as a function of time)** : → *deceleration 2*
12. **mean down time** : → *time 97*
13. **mean energy capability** : → *capability 5*
14. **mean energy expended in a gas per ion pair formed** : → *energy 62*
15. **mean energy imparted** : → *energy 63*
16. **mean (equivalent) noise temperature** : → *temperature 27*
17. **mean error** : → *error 49*
18. **mean failure intensity** : → *intensity 11*
19. **mean failure rate** : → *rate 54*
20. **mean free path** : → *free path 1*
21. **mean free path** : → *free path 2*
22. **mean free path** : → *free path 3*
23. **mean interruption duration** : → *duration 25*
24. **mean life** : → *life 7*
25. **mean life** : → *life 8*
26. **mean logistic delay** : → *delay 28*
27. **mean maintenance man-hours** : → *man-hours 2*
28. **(mean) noise factor** : → *factor 118*
29. **(mean) noise figure** (*Syn.* (mean) noise factor) : → *factor 118*
30. **mean noise temperature** : → *temperature 28*
31. **mean operating time between failures** : → *operating 5*
32. **mean opinion score** : → *score 1*
33. **mean phase difference between related information** : → *difference 20*
34. **mean repair rate** : → *rate 55*
35. **mean repair time** : → *time 99*
36. **mean service access delay** : → *delay 29*
37. **mean service provisioning time** : → *time 100*
38. **mean spherical luminous intensity** : → *luminous intensity 3*
39. **mean time between failures** : → *time 101*
40. **mean time between interruptions** : → *time 102*
41. **mean time to failure** : → *time 103*
42. **mean time to first failure** : → *time 104*
43. **mean time to recovery** (*Syn.* mean time to restoration) : → *time 106*
44. **mean time to restoration** : → *time 106*
45. **mean unavailability** : → *unavailability 4*
46. **mean up time** : → *time 107*
47. **mean value** : → *value 27*
48. **mean voltage between segments** : → *voltage 113*
49. **mean voltage (of a cell or battery)** : → *voltage 114*
50. **monthly mean solar radio-noise flux** : → *flux 18*
51. **rectified (mean) value** : → *value 48*
52. **reference mean error** : → *error 51*
53. **transport mean free path** : → *free path 4*
54. **variation of the mean error** : → *variation 6*

measurable

1. **(measurable) quantity** : → *quantity 18*

measure

1. **material measure** : a measuring device which reproduces, in a permanent manner during its use, one or more known values of a defined quantity. ★ mesure matérialisée → *mesure 27.* R мера. D Messverkörperung. E medida materializada. I misura materializzata. N stoffelijke maat. P wzorzec miary. S materialiserat mått. (301)
2. **measure** (in the probabilistic treatment of dependability) : a function or a quantity used to describe a random variable or a random process. *Note.* — For a random variable, examples of measures are the distribution function and the mean. ★ caractéristique → *caractéristique 2.* R показатель (в приложении теории вероятностей к надежности). D Maßgröße (im Sinne der Wahrscheinlichkeitsrechnung). E medida (en el tratamiento probabilistico de seguridad de funcionamiento). I misura. N maat. P miara. S mått. (191,531)

3. **measure equation** (*Syn.* numerical value equation) : → *equation 5*
4. **measure (of a quantity)** (*Syn.* numerical value (of a quantity)) : → *value 38*

measurement

1. **beat method (of measurement)** : → *method 3*
2. **comparison (method of) measurement** : a method of measurement based on the comparison of the value of a quantity to be measured with a known value of the same kind. ★ (méthode de) mesurage par comparaison → *méthode 13.* R метод измерений сравнением. D vergleichende Messung; Vergleichsmessverfahren. E (método de) medida por comparación; (método de) medición por comparación. I misura per comparazione. N vergelijkende methode. P metoda pomiarowa porównawcza. S komparationsmätmetod. (301)
3. **complementary (method of) measurement** : a method of measurement by comparison in which the value of the quantity to be measured is combined with a known value of the same quantity so adjusted that the sum of these two values is equal to a predetermined comparison value. ★ (méthode de) mesurage par complément → *méthode 14.* R метод дополнения. D komplementäre Messung; Komplementärmessverfahren. E (método de) medida por complemento; (método de) medición por complemento. I misura per differenza. N complementaire methode. P metoda pomiarowa przez dopełnienie. S komplementmätmetod. (301)
4. **differential (method of) measurement** : a method of measurement by comparison, based on comparing the quantity to be measured with a quantity of the same kind having a known value only slightly different from that of the quantity to be measured, and measuring the algebraic difference between the values of these two quantities. ★ (méthode de) mesurage différentielle → *méthode 9.* R дифференциальный метод измерений. D differentielle Messung; Differenzmessverfahren. E (método de) medida diferencial; (método de) medición diferencial. I misura differenziale. N verschilmethode. P metoda pomiarowa różnicowa. S differensmätmetod. (301)
5. **direct (method of) measurement** : a method of measurement in which the value of a quantity to be measured is obtained directly, without the necessity for supplementary calculations based on a functional relationship between the quantity to be measured and other quantities actually measured. *Notes. 1* — The measured quantity is considered to be obtained directly even when the scale of a measuring instrument has values which are linked to corresponding values of the measured quantity by means of a table or a graph. *2* — The method of measurement remains direct even if it is necessary to make supplementary measurements to determine the values of influence quantities in order to make corrections. ★ (méthode de) mesurage direct(e) → *méthode 10.* R прямое измерение. D direkte Messung; direktes Messverfahren. E (método de) medida directa; (método de) medición directa. I misura diretta. N directe meetmethode. P metoda pomiarowa bezpośrednia. S direkt mätmetod. (301)
6. **indirect (method of) measurement** : a method of measurement in which the value of a quantity is obtained from measurements made by direct methods of measurement of other quantities linked to the quantity to be measured by a known relationship. ★ (méthode de) mesurage indirect(e) → *méthode 11.* R косвенное измерение. D indirekte Messung; indirektes Messverfahren. E (método de) medida indirecta; (método de) medición indirecta. I misura indiretta. N indirecte meetmethode. P metoda pomiarowa pośrednia. S indirekt mätmetod. (301)
7. **(measurement) standard** : → *standard 14*
8. **normal speech power for voice-ear measurements** : → *power 93*
9. **null (method of) measurement** : a differential method of measurement where the difference between the value of the measured quantity and the known value of the same kind with which it is compared is brought to zero. ★ méthode (de mesurage) par zéro → *méthode 17.* R нулевой метод измерений. D Messung durch Nullabgleich; Messverfahren mit Nullabgleich. E (método de) medida por cero; método (de medición) por cero. I metodo di zero. N nulmethode. P metoda pomiarowa zerowa. S nollmätmetod. (301)
10. **reference speech power for the measurement of AEN** : → *power 164*
11. **resonance method (of measurement)** : → *method 21*
12. **substitution (method of) measurement** : a method of measurement by comparison in which the value of the quantity to be measured is replaced by a known value of the same kind chosen in such a manner that the effects on the measuring instrument of these two values are the same. ★ (méthode de) mesurage par substitution → *méthode 16.* R метод измерений замещением. D substituierende Messung; Substitutionsmessverfahren. E (método de) medida por sustitución; (método de) medición por sustitución. I misura per sostituzione. N substitutiemethode. P metoda pomiarowa przez podstawienie. S substitutionsmätmetod. (301)
13. **unit (of measurement)** : → *unit 76*
14. **waveform measurement** : a measurement of one or more parameters of a waveform. ★ analyse de forme d'onde → *analyse 5.* R измерение параметров, характеризующих форму кривой. D Untersuchung der Kurvenform. E análisis de forma de onda. I analisi della forma d'onda. N golfvormanalyse. P pomiar parametrów kształtu krzywej. S undersökning av kurvform. (411)

measuring

1. **dependent-time measuring relay** : → *relay 7*
2. **direct current measuring transductor** : → *transductor 3*
3. **independent-time measuring relay** : → *relay 15*
4. **measuring bridge** : → *bridge 14*
5. **measuring chain** : → *chain 8*
6. **measuring current transformer** : → *transformer 41*
7. **measuring electrode** : → *electrode 71*
8. **measuring element** : → *element 29*
9. **measuring equipment** : → *equipment 49*
10. **measuring line** : → *line 110*
11. **measuring line section** (*Syn.* measuring line) : → *line 110*
12. **measuring oscilloscope** : → *oscilloscope 2*
13. **(measuring) potentiometer** : → *potentiometer 1*
14. **measuring range** : → *range 40*
15. **measuring range** : → *range 41*
16. **measuring relay** : → *relay 17*
17. **measuring span** : → *span 7*
18. **measuring spark gap** : → *spark-gap 1*
19. **measuring system** : → *system 114*
20. **(measuring) transducer** : → *transducer 7*
21. **measuring transducer (with electric output)** : → *transducer 8*
22. **measuring transductor** : → *transductor 6*
23. **(measuring) transmitter** : → *transmitter 10*
24. **measuring voltage transformer** : → *transformer 42*
25. **radiation measuring assembly** (*Syn.* radiation meter) : → *meter 46*
26. **slotted measuring section** (*Syn.* slotted line) : → *line 147*

measuring instrument

1. **analogue (measuring) instrument** : a measuring instrument intended to present or display the output information as a continuous function of the measured quantity. ★ appareil (mesureur) analogique → *appareil mesureur 11.* R аналоговый (измерительный) прибор. D Messgerät mit analoger Ausgabe. E aparato (de medida) análogico. I strumento analogico. N analoog instrument. P przyrząd (pomiarowy) analogowy. S analogt instrument. (301)
2. **astatic measuring instrument** : an instrument in which the measuring element is so constructed as to be unaffected by uniform magnetic fields of external origin. ★ appareil astatique → *appareil 20.* R прибор астатический. D Messgerät mit magnetischer Schirmung. E aparato astático. I strumento di misura astatico. N astatisch instrument. P przyrząd astatyczny. S astatiskt instrument. (302)
3. **constant of a measuring instrument** : → *constant 9*
4. **differential measuring instrument** : an instrument intended to measure the difference between the values of two quantities of the same kind existing at practically the same time in different circuits. ★ appareil mesureur de différence → *appareil mesureur 12.* R дифференциальный прибор. D Differenz-Messgerät. E aparato de medida diferencial. I strumento di misura differenziale. N verschilmeter. P przyrząd pomiarowy różnicowy. S differensinstrument. (301)

5. **digital (measuring) instrument** : a measuring instrument in which the quantity to be measured is accepted as, or is converted into, coded discrete signals and which provides an output or display in digital form. ★ appareil (mesureur) numérique → *appareil mesureur 21.* R цифровой (измерительный) прибор. D digitales Messgerät. E aparato (de medida) digital. I strumento numerico. N digitaal instrument. P przyrząd (pomiarowy) cyfrowy. S digitalt instrument. (301)
6. **electrical measuring instrument** : a measuring instrument intended to measure an electrical or non-electrical quantity using electrical means. ★ appareil mesureur électrique → *appareil mesureur 15.* R электроизмерительный прибор. D elektrisches Messgerät. E aparato de medida eléctrico; aparato eléctrico de medida. I strumento di misura elettrico. N elektrisch meetinstrument. P przyrząd pomiarowy elektryczny. S elektriskt mätinstrument. (301)
7. **electronic measuring instrument** : a measuring instrument intended to measure an electrical or non-electrical quantity using electronic means. ★ appareil mesureur électronique → *appareil mesureur 16.* R электронный измерительный прибор. D elektronisches Messgerät. E aparato de medida electrónico; aparato electrónico de medida. I strumento di misura elettronico. N elektronisch meetinstrument. P przyrząd pomiarowy elektroniczny. S elektroniskt mätinstrument. (301)
8. **fixed (measuring) instrument** : a measuring instrument designed to be permanently mounted and which is intended to be connected to (an) external circuit(s) by means of permanently installed conductors. ★ appareil (mesureur) fixe → *appareil mesureur 18.* R стационарный (измерительный) прибор. D Einbau-Messgerät. E aparato (de medida) fijo. I apparecchio fisso. N vast instrument. P przyrząd tablicowy lub aparatowy. S instrument för fast montering; panelinstrument. (301)
9. **indicating (measuring) instrument** : a measuring instrument which displays at any time the value of the measured quantity without recording it. ★ appareil (mesureur) indicateur → *appareil mesureur 19.* R показывающий (измерительный) прибор. D anzeigendes Messgerät. E aparato (de medida) indicador. I strumento indicatore. N aanwijzend instrument. P miernik (wskazujący); przyrząd pomiarowy wskazujący. S visande instrument. (301)
10. **indication of a measuring instrument** : → *indication 3*
11. **integrating (measuring) instrument** : a measuring instrument which gives the integral of an input quantity with respect to another quantity, generally time. *Note.* — An electricity meter is an example of an integrating instrument. ★ appareil (mesureur) intégrateur → *appareil mesureur 20.* R интегрирующий (измерительный) прибор. D integrierendes Messgerät. E aparato (de medida) integrador. I strumento integratore. N integrerend instrument. P przyrząd (pomiarowy) całkujący. S integrerande instrument. (301)
12. **measuring instrument** : a device intended to detect or measure a quantity or to supply a quantity for to supply a quantity for measurement purpose. *Note.* — There is no exact English equivalent of the French term "instrument de mesurage" which includes both what are generally known as "material measures" and "measuring instruments". The term "measuring instrument" is used here as, logically, any instrument used in measurement is a measuring instrument. ★ instrument de mesurage → *instrument 3.* R средство измерений. D Messgerät. E aparato de medida; instrumento de medida; aparato de medición; instrumento de medición. I strumento di misura. N meetinstrument. P narzędzie pomiarowe. S mätdon. (301)
13. **measuring instrument** : a measuring device intended to transform the measured quantity or a related quantity into an indication or equivalent information. ★ appareil mesureur → *appareil mesureur 4.* R измерительный прибор. D Messgerät. E aparato de medida; aparato medidor. I apparecchio di misura. N meetapparaat. P przyrząd pomiarowy. S mätinstrument. (301)
14. **measuring instrument with circuit control devices** : an instrument which provides electric control signals at predetermined values of the measured quantity. ★ appareil mesureur à fonction de commande → *appareil mesureur 8.* R измерительный прибор с органами управления. D Messgerät mit Signalgeber. E aparato de medida con función de control. I strumento di misura con dispositivi di controllo del circuito. N signalerend meetapparaat. P przyrząd pomiarowy o funkcji sterującej. S mätinstrument med styrfunktion. (301)
15. **multi-function (measuring) instrument** : a measuring instrument having a single indicating device intended to measure more than one kind of quantity. ★ appareil (mesureur) à fonctions multiples → *appareil mesureur 10.* R многофункциональный (измерительный) прибор. D Vielfach-Messgerät. E aparato (de medida) de funciones múltiples. I strumento con funzioni multiple. N instrument met meer functies. P przyrząd wielofunkcyjny (uniwersalny). S flerfunktionsinstrument. (301)
16. **multi-range (measuring) instrument** : a measuring instrument having more than one measuring range. ★ appareil (mesureur) à calibres multiples → *appareil mesureur 6.* R многодиапазонный (измерительный) прибор. D Mehrbereichs-Messgerät. E aparato (de medida) de calibres múltiples. I strumento a portate multiple. N instrument met meer meetgebieden. P przyrząd wielozakresowy. S flerområdesinstrument. (301)
17. **multi-scale (measuring) instrument** : a measuring instrument having more than one scale. ★ appareil (mesureur) à échelles multiples → *appareil mesureur 7.* R многошкальный (измерительный) прибор. D Messgerät mit mehreren Skalen. E aparato (de medida) de escalas múltiples. I strumento con scale multiple. N instrument met meer schalen. P przyrząd wielopodziałkowy. S flerskaleinstrument. (301)
18. **portable (measuring) instrument** : a measuring instrument specifically designed to be carried by hand and to be connected and disconnected by the user. ★ appareil (mesureur) portatif → *appareil mesureur 22.* R переносной (измерительный) прибор. D tragbares Messgerät. E aparato (de medida) portátil. I strumento portatile. N draagbaar instrument. P przyrząd przenośny. S bärbart instrument. (301)
19. **recording (measuring) instrument** (*Syn.* recorder) : a measuring instrument which records on a recording medium information corresponding to the values of the measured quantity. *Note.* — Some recording instruments may incorporate an indicating device and record information corresponding to more than one measured quantity. ★ appareil (mesureur) enregistreur → *appareil mesureur 17.* R самопишущий (измерительный) прибор. D Registriergerät; Schreiber. E aparato (de medida) registrador. I strumento registratore; registratore. N registrerend meetinstrument; schrijver. P przyrząd (pomiarowy) rejestrujący; rejestrator. S registrerande instrument; skrivare. (301)
20. **single function (measuring) instrument** : a measuring instrument intended for the measurement of one kind of quantity only. ★ appareil (mesureur) à fonction unique → *appareil mesureur 9.* R однофункциональный (измерительный) прибор. D Messgerät für eine Grösse. E aparato (de medida) de función única. I strumento a funzione singola. N instrument met één functie. P przyrząd jednofunkcyjny. S enfunktionsinstrument. (301)
21. **single range (measuring) instrument** : a measuring instrument having only one measuring range. ★ appareil (mesureur) à calibre unique → *appareil mesureur 5.* R однодиапазонный (измерительный) прибор. D Einbereichs-Messgerät. E aparato (de medida) de calibre único. I strumento con singola portata. N instrument met één meetgebied. P przyrząd jednozakresowy. S instrument med ett mätområde. (301)

mechanical

1. **fixed trip mechanical switching device** : → *switching device 1*
2. **mechanical back-to-back test** : → *test 52*
3. **mechanical braking** : → *braking 33*
4. **(mechanical) contactor** : → *contactor 14*
5. **mechanical coupler** : → *coupler 16*
6. **mechanical crosspoint** : → *crosspoint 3*
7. **mechanical end stop** : → *stop 4*
8. **(mechanical) force** : → *force 22*
9. **mechanical impedance** : → *impedance 36*
10. **mechanical reactance** : → *reactance 9*
11. **mechanical recording** : → *recording 13*
12. **mechanical recording head** (*Syn.* cutter head) : → *head 2*
13. **mechanical resistance** : → *resistance 37*
14. **mechanical splice** : → *splice 3*
15. **mechanical spot displacement** : → *displacement 8*

16. **mechanical spot misalignment** (*Syn.* mechanical spot displacement) : → *displacement 8*
17. **(mechanical) switch** : → *switch 25*
18. **mechanical switching device** : → *switching device 2*
19. **mechanical time constant** : → *time constant 11*
20. **mechanical tuning range** : → *range 42*
21. **mechanical videodisk** : → *videodisk 2*
22. **mechanical zero** : → *zero 4*
23. **mechanical zero adjuster** : → *adjuster 3*
24. **optimum mechanical tuning range** : → *range 56*
25. **switching-off for mechanical maintenance** : → *switching-off 1*
26. **trip-free mechanical switching device** : → *switching device 6*

mechanical system

1. **accumulative latching mechanical system** : a mechanical system in push-button switches such that any number of buttons will remain operated until a separate cancelling button is operated. ★ système mécanique à touches simultanées → *système mécanique à touches 10.* R система механическая с суммирующим запиранием. D Rastmechanismus mit Fremdauslösung. E sistema mecánico de pulsadores simultáneos. I sistema meccanico a pulsanti simultanei. N vergrendeling en centrale opheffing van vergrendeling. P mechanizm zwalniania jednoczesnego. S mekanism med separat utlösare. (581)
2. **blocked mechanical system** : a mechanical system in push-button switches which prevents the operation of more than one button at a time. ★ système mécanique à touches bloquées → *système mécanique à touches 5.* R система механическая с блокировкой. D blockierende Mechanik. E sistema mecánico de pulsadores bloqueados. I sistema meccanico a pulsanti bloccati. N blokkeermechanisme. P mechanizm działania indywidualnego. S mekanism med blockering. (581)
3. **cancelling release mechanical system** : a mechanical system of a push button switch such that a predetermined number of previously operated basic cells have their mechanical systems restored to normal when a separate cancellation button or an electromechanical release system is operated. ★ système mécanique à touches d'annulation → *système mécanique à touches 6.* R система механическая со сбросом. D Mechanik mit Auslösung mit Auslösemechanismus. E sistema mecánico de pulsadores de anulación. I sistema meccanico a pulsanti di annullamento. N mechanisme met centrale opheffing van de vergrendeling van bepaalde toetsen. P mechanizm zwalniania. S mekanism med partiell utlösning. (581)
4. **double action mechanical system** : a mechanical system of a push-button switch such that the travel of the button operates the contacts of that basic cell on, or before, the release of previously operated buttons. ★ système mécanique à action double → *système 119.* R система механическая двойного действия. D ..... E sistema mecánico de acción doble. I sistema meccanico ad azione combinata. N ..... P mechanizm współzależny działania podwójnego. S mekanism med utlösning. (581)
5. **double pressure locking mechanical system** : a mechanical system of a push-button switch such that the button attains a position at first pressure, is retained there after the removal of the applied force, and is disengaged when a second pressure is applied. ★ système mécanique à touches à double pression avec enclenchement → *système mécanique à touches 1.* R система механическая с фиксацией, требующая двойного нажатия. D Mechanik mit Doppelbetätigungsauslösung. E sistema mecánico de pulsadores de doble presión con bloqueo. I sistema meccanico a pulsanti a doppia pressione con blocco. N druktoetsmechanisme met ontgrendeling bij tweede maal indrukken. P mechanizm dwunaciskowy. S mekanism med dubbeltrycksutlösning. (581)
6. **independent mechanical system** : a mechanical system of a push-button switch used with one basic cell the button of which, when subjected to the normal manual operation, has no effect other basic cells; similarly, other basic cells, when actuated, have no effect on the independent basic cell. Locking and non-locking types are included. ★ système mécanique à touches indépendantes → *système mécanique à touches 8.* R система механическая с независимым срабатыванием. D unverriegelte Mechanik. E sistema mecánico de pulsadores independientes. I sistema meccanico a pulsanti indipendenti. N onafhankelijk druktoetsmechanisme. P mechanizm niezależny. S mekanism med oberoende utlösning. (581)
7. **inter-dependent mechanical system** : a mechanical system of a push-button switch used with two or more basic cells such that the operation of the button of one of them causes the tripping of all of the others. ★ système mécanique à touches interdépendantes → *système mécanique à touches 9.* R система механическая с зависимым срабатыванием. D Mechanik mit gegenseitiger Auslösung. E sistema mecánico de pulsadores interdependientes. I sistema meccanico a pulsanti interdipendenti. N druktoetsmechanisme met onderlinge ontgrendeling. P mechanizm współzależny. S mekanism med ömsesidig utlösning. (581)
8. **locking mechanical system** : a mechanical system of a push-button switch such that the operation of a button locks a given number of other buttons in either the depressed position or the normal position. ★ système mécanique à touches de blocage → *système mécanique à touches 7.* R система механическая с запиранием. D Mechanik mit gegenseitiger Sperrung. E sistema mecánico de pulsadores de bloqueo. I sistema meccanico a pulsanti di bloccaggio. N mechanisme met vergrendeltoets. P mechanizm wybiorczoblokujący. S mekanism med spärr. (581)
9. **mechanical system** : system capable of receiving, transmitting or generating mechanical signals. ★ système mécanique → *système 118.* R механическая система. D mechanisches System. E sistema mecánico. I sistema meccanico. N mechanisch systeem. P układ mechaniczny. S mekaniskt system. (801)
10. **mechanical system of a push-button switch** : a mechanical system of a push-button switch is a device ensuring the transmission of the button movement to the part carrying the moving contacts. ★ système mécanique pour contacteur à touches → *système mécanique à touches 11.* R система механическая кнопочного переключателя. D Druckknopfschaltermechanik. E sistema mecánico para contactor pulsador. I sistema meccanico per interruttore a pulsanti. N mechanisme van een drukknop. P mechanizm (łącznika przyciskowego). S tryckströmställarmekanism. (581)
11. **momentary mechanical system** (*Syn.* single pressure non-locking mechanical system) : a mechanical system of a push-button switch such that a button attains a position at first pressure and returns to its original position on the removal of the applied force. ★ système mécanique à touches à simple pression sans enclenchement → *système mécanique à touches 4.* R система механическая без фиксации, требующая одного нажатия (система временного действия). D Tastmechanik. E sistema mecánico de pulsadores de presión simple sin bloqueo. I sistema meccanico a pulsanti a pressione senza blocco. N druktoets zonder houdstand. P mechanizm zwrotny. S mekanism med återfjädrande utlösning. (581)
12. **single action mechanical system** : a mechanical system of a push-button switch such that the first action of a button is to release previously operated buttons before effecting its own contacts. ★ système mécanique à touches à simple action → *système mécanique à touches 2.* R система механическая одиночного действия. D ..... E sistema mecánico de pulsadores de acción simple. I sistema meccanico a pulsanti ad azione semplice. N ..... P mechanizm współzależny działania pojedynczego. S mekanism med förutlösning. (581)
13. **single pressure maintained mechanical system** : a mechanical system of a push-button switch such that a button attains a position at first pressure and returns to its original position on the removal of the applied force, leaving the internal mechanism and contacts in the operated condition. Repeating the pressure on the button releases the mechanical system and contacts to their original positions. ★ système mécanique à touches à simple pression avec enclenchement → *système mécanique à touches 3.* R система механическая, требующая одного нажатия и сохраняющая внутренний механизм и контакты в положении срабатывания. D Rastmechanik. E sistema mecánico de pulsadores de presión simple mantenida. I sistema meccanico a pulsanti a mantenimento per pressione. N mechanisme waarvan de druktoets na inschakelen terugkomt. P mechanizm dwunaciskowy zwrotny. S mekanism med dubbeltrycksutlösning. (581)
14. **single pressure non-locking mechanical system** (*Syn.* momentary mechanical system) : → *mechanical system 11*

mechanism

1. **automatic transmitter with controlled tape-feed mechanism** : → *transmitter 3*
2. **chart driving mechanism** : a device for moving the chart in a way which is a function of another quantity, generally time. ★ dispositif d'entraînement du support d'enregistrement → *dispositif 65.* R механизм перемещения носителя диаграммы (приводной механизм). D Antrieb eines Aufzeichnungsträgers. E dispositivo de arrastre del soporte de registro. I strumento di trascinamento della carta. N papieraandrijving. P mechanizm napędowy nośnika wykresu. S frammatningsmekanism för diagrampapper. (302)
3. **control element drive mechanism** (of a nuclear reactor) : a device used to move a control element of a nuclear reactor. ★ mécanisme de commande → *mécanisme 4.* R механическое устройство перемещения регулирующих элементов (ядерного реактора). D Stellantrieb (für einen Kernreaktor). E mecanismo de control (de un reactor nuclear). I meccanismo di comando (di un reattore nucleare). N aandrijfmechanisme voor regelelementen (van een kernreactor). P mechanizm napędu elementu regulacyjnego. S drivdon för styrelement (i en kärnreaktor). (392)
4. **drive mechanism** : an electromechanical mechanism actuating the turntable of a recording or reproducing equipment. ★ mécanisme d'entraînement → *mécanisme 10.* R приводной механизм. D Antriebsmechanismus. E mecanismo de arrastre. I meccanismo di trascinamento. N aandrijfmechanisme. P mechanizm napędowy. S drivmekanism. (806)
5. **driving mechanism** : the means by which the drive to the tap-changer is actuated. ★ mécanisme d'entraînement → *mécanisme 9.* R приводной механизм. D Antrieb. E mecanismo de accionamiento. I dispositivo di manovra. N aandrijfmechanisme. P mechanizm napędowy. S manöverdon. (421)
6. **failure mechanism** : the physical, chemical or other process which has led to a failure. ★ mécanisme de défaillance → *mécanisme 6.* R характер возникновения отказа; механизм отказа. D Ausfallmechanismus. E mecanismo de fallo. I meccanismo di guasto. N storingsmechanisme. P mechanizm uszkodzenia. S felmekanism. (191)
7. **full cycle crimp mechanism** : a device of a crimping tool that prevents the tool from returning to the open position before the crimping operation has been completed. ★ mécanisme contrôlant le cycle de sertissage total → *mécanisme 2.* R механизм блокировочный обжимного инструмента. D Auslösesperre eines Crimpwerkzeuges. E mecanismo que controla el ciclo de engaste total. I meccanismo di controllo del ciclo totale di crimpatura. N ..... P mechanizm (zagniataka) pełnoczynnościowy. S ändlägesspärr. (581)
8. **indexing mechanism** : a mechanical device of a rotary switch to locate and to maintain each position of the rotor. ★ encliquetage → *encliquetage 1.* R фиксатор положений. D Rastmechanismus. E trinquete. I marcatura di riferimento. N stappenmechanisme. P ustalacz (położenia). S rastermekanism. (581)
9. **manual operation of motor-drive mechanism** : → *operation 32*
10. **motor-drive mechanism** : a driving mechanism which incorporates an electric motor and control circuit. ★ mécanisme d'entraînement à moteur → *mécanisme 11.* R электропривод. D Motorantrieb. E mecanismo de accionamiento por motor. I dispositivo di manovra a motore. N motoraandrijfmechanisme. P napęd silnikowy. S motormanöverdon. (421)
11. **pantograph control mechanism** (*Syn.* pantograph cylinder) : → *cylinder 3*
12. **return mechanism** : a device of a crimping tool to return the tool to the full open position when the crimping operation has been completed. ★ mécanisme de retour → *mécanisme 7.* R механизм возвратный. D Rücksetz-Mechanismus. E mecanismo de retorno. I meccanismo di ritorno. N retourmechanisme. P mechanizm (zagniataka) zwalniający. S återföringsmekanism. (581)

MED

1. **MED** (*Syn.* minimum erythema dose) : → *dose 36*

median

1. **median lethal dose** : → *dose 35*
2. **median lethal time** : → *time 108*

medical

1. **medical radiology** : → *radiology 2*

medicine

1. **nuclear medicine** : the field of medicine in which radio nuclides are used for diagnosis or therapy. ★ médecine nucléaire → *médecine 1.* R ядерная медицина. D Nuklearmedizin. E medicina nuclear. I medicina nucleare. N nucleaire geneeskunde. P medycyna nuklearna. S nuklearmedicin. (881)

medium

1. **absorbing medium** (*Syn.* dissipative medium) : a medium such that, in the direction of propagation of the energy of an electromagnetic wave, there is significant absorption in a particular frequency band. ★ milieu absorbant → *milieu 2.* D absorbierendes Medium. P środowisko stratne; środowisko absorbujące. (705)
2. **active laser medium** (*Syn.* laser medium) : the material within a laser that emits the coherent optical radiation. ★ milieu (actif) laser → *milieu 3.* R активная лазерная среда; лазерная среда. D aktives Lasermedium. E medio activo del láser; medio del láser. I mezzo (attivo) laser. N actief lasermedium; lasermedium; lasermateriaal. P materiał aktywny optycznie. S lasermedium. (731)
3. **antenna to medium coupling loss** (*Syn.* gain degradation) : → *degradation 3*
4. **birefringent medium** : a medium which exhibits birefringence. ★ milieu biréfringent → *milieu 4.* R среда с двойным лучепреломлением. D doppelbrechendes Medium. E medio birrefrigente. I mezzo birifrangente. N dubbelbrekend medium. P ośrodek dwójłomny. S dubbelbrytande medium. (731)
5. **characteristic impedance of a medium** : → *impedance 8*
6. **characteristic impedance of a medium** : → *impedance 9*
7. **conducting medium** : a medium in which a variable electric field produces an electric current density vector J whose magnitude in a given direction is large relative to that of the vector

$$\frac{\partial \vec{D}}{\partial t}$$

in a particular frequency band. *Notes. 1* — For a sinusoidal wave in an isotropic medium, the medium is conductive if the following relation is satisfied :

$$\frac{\sigma}{\varepsilon_0 \omega} \gg \varepsilon_r'$$

where ε_r' is the relative real permittivity, ε_0 is the electric constant, σ is the conductivity, ω is the angular frequency. *2* — An anisotropic medium may be conducting only in certain directions. ★ (milieu) conducteur → *conducteur 51.* D leitendes Medium. P środowisko przewodzące. (705)
8. **dielectric (medium)** : the medium in which a variable electric field produces an electric current density vector J whose magnitude in a given direction is small relative to that of the vector

$$\frac{\partial \vec{D}}{\partial t}$$

in a particular frequency band. *Notes. 1* — For a sinusoidal wave in an isotropic medium, the medium is dielectric if the following relation is satisfied :

$$\frac{\sigma}{\varepsilon_0 \omega} \ll \varepsilon_r'$$

where ε_r' is the relative real permittivity, ε_0 is the electric constant, σ is the conductivity, ω is the angular frequency. *2* — An anisotropic medium may be dielectric only in certain directions. ★ (milieu) diélectrique → *diélectrique 21.* D Dielektrikum. P dielektryk. (705)
9. **dispersive medium** : a medium in which the phase velocity depends on frequency. ★ milieu dispersif → *milieu 10.* R дисперсная среда. D dispergierendes Medium. E medio

dispersivo. I mezzo dispersivo. N schiftend medium; dispersief medium. P środowisko rozpraszające. S dispersivt medium. (101)

10. **dispersive medium** : a medium in which, in a particular frequency band, the electromagnetic characteristics vary to a significant extent with frequency. ★ milieu dispersif → *milieu 11.* D dispergierendes Medium. P środowisko rozpraszające. (705)
11. **dissipative medium** (*Syn.* absorbing medium) : → *medium 1*
12. **end of medium signal** : → *signal 77*
13. **gyromagnetic medium** (*Syn.* gyromagnetic material) : → *material 16*
14. **gyromagnetic medium** : a medium capable of displaying the gyromagnetic effect. *Note.* — The permeability of a gyromagnetic medium is expressed as a tensor permeability. ★ milieu gyromagnétique → *milieu 13.* R гиромагнитная среда. D gyromagnetisches Medium. E medio giromagnético. I mezzo giromagnetico. N gyromagnetisch medium. P środowisko giromagnetyczne. S gyromagnetiskt medium. (726)
15. **ideal magnetic medium** : a magnetic medium, the losses of which are negligible. ★ support magnétique idéal → *support 40.* R идеальный носитель магнитной записи. D idealer Magnetträger; ideales magnetisches Speichermedium. E soporte magnético ideal. I supporto magnetico ideale. N ideale magnetische informatiedrager. P nośnik magnetyczny idealny. S ideellt magnetiskt medium. (806)
16. **laser medium** (*Syn.* active laser medium) : → *medium 2*
17. **magnetic medium relative efficiency** : → *efficiency 30*
18. **magnetic recording medium** : a magnetic material used in conjunction with a magnetic recorder for retaining signals in the form of remanent magnetization. *Note.* — The material may be rigid or flexible in the form of tape, wire, disk, sheet, etc. ★ support magnétique d'enregistrement → *support 39.* R носитель магнитной записи. D Magnetträger. E soporte de registro magnético. I supporto di registrazione magnetica. N magnetische informatiedrager. P nośnik (zapisu magnetyczny). S magnetiskt inspelningsmedium. (806)
19. **medium frequency** : → *frequency 129*
20. **medium voltage** : → *voltage 116*
21. **medium voltage consumer** : → *consumer 8*
22. **medium voltage tariff** : → *tariff 20*
23. **medium wave infra-red radiation** : → *radiation 42*
24. **multiplying medium** : medium inside which fission charge reactions can take place. ★ milieu multiplicateur → *milieu 14.* D ..... E medio multiplicador. I mezzo moltiplicatore. N vermenigvuldigend medium. P ośrodek mnożący. S multiplicerande medium. (026)
25. **opaque medium** : medium which transmits no radiation in the spectral range of interest. ★ milieu opaque → *milieu 15.* R непрозрачная среда. D lichtundurchlässiges Medium. E medio opaco. I mezzo opaco. N ondoorzichtig medium. P ośrodek nieprzepuszczający. S opakt material. (845)
26. **recording medium** : strip, disc or sheet on which the measured values are intended to be recorded. ★ support d'enregistrement → *support 29.* R носитель записи. D Material des Aufzeichnungsträgers. E soporte de registro. I supporto di registrazione. N registratiemethode; registratiedrager. P nośnik zapisu. S skrivmedium. (301)
27. **recording medium** : material suitable for recording signals. ★ support d'enregistrement → *support 30.* R носитель записи; носитель. D Aufzeichnungsmittel; Aufzeichnungsträger. E soporte del registro. I supporto di registrazione. N informatiedrager. P nośnik (zapisu). S inspelningsmedium. (806)
28. **tensor permeability for a magnetostatically saturated medium** (*Syn.* Polder's tensor permeability) : → *permeability 18*
29. **translucent medium** : medium which transmits visible radiation largely by diffuse transmission, so that objects are not seen distinctly through it. ★ milieu translucide → *milieu 16.* R просвечивающая среда. D durchscheinendes Medium. E medio translúcido. I mezzo traslucido. N doorschijnend medium. P ośrodek przeświecalny. S translucent material. (845)
30. **transmission medium** : a natural medium or manufactured structure through or over which a signal is conveyed. *Note.* — The French term "support de transmission" is generally used only for a manufactured structure. ★ milieu de transmission → *milieu 7.* R среда передачи. D Übertragungsmittel. E medio de transmisión; soporte de transmisión. I mezzo di trasmissione. N transmissiemedium. P środowisko transmisyjne; środowisko transmisyjne. S överföringsmedium. (704)
31. **transparent medium** : medium in which the transmission is mainly regular and which usually has a high regular transmittance in the spectral range of interest. *Note.* — Objects may be seen distinctly through a medium which is transparent in the visible region, if the geometric form of the medium is suitable. ★ milieu transparent → *milieu 17.* R прозрачная среда. D durchsichtiges Medium. E medio transparente. I mezzo trasparente. N doorzichtig medium. P ośrodek przezroczysty. S transparent material. (845)

mel

1. **mel** : unit of pitch. A pure tone frontally presented, having a frequency of 1 000 Hz and a sound pressure level of 40 dB, causes a pitch of 1 000 mels. *Note.* — The pitch of a sound that is judged by the listener to be *n* times that of a 1 000 mels tone is *n* thousand mels. ★ mel → *mel 1.* R мел. D mel. E mel. I mel. N mel. P mel. S mel. (801)

melt-down

1. **melt-down time** : → *time 109*

melting

1. **growing by zone melting** : → *growing 3*
2. **induction "lift off coil" crucible melting furnace** : → *furnace 30*
3. **induction melting furnace** : → *furnace 31*
4. **levitation melting** : a melting process carried out without use of a crucible, the charge being maintained within a system of induction coils by the influence of the induced magnetic field. ★ fusion par lévitation → *fusion 12.* R плавка во взвешенном состоянии. D Schwebeschmelzen. E fusión por levitación. I fusione per levitazione. N zwevend smelten. P topienie lewitacyjne. S ..... (841)
5. **melting** : the change of body state from solid to liquid. ★ fusion → *fusion 10.* R плавка. D Schmelzen. E fusión. I fusione. N smelten. P topienie. S smältning. (841)
6. **melting charge** : → *charge 37*
7. **melting cycle** : → *cycle 9*
8. **melting point** : → *point 24*
9. **melting rate** : → *rate 56*
10. **melting time** (*Syn.* pre-arcing time) : → *time 132*
11. **melting time** (*Syn.* melt-down time) : → *time 109*
12. **speed of melting** (*Syn.* melting rate) : → *rate 56*
13. **vacuum melting** : a melting process in a furnace under a controlled vacuum. ★ fusion sous vide → *fusion 13.* R вакуумная плавка. D Vakuumschmelzen. E fusión al vacío. I fusione sotto vuoto. N vacuümsmelten. P topieni próżniowe. S vakuumsmältning. (841)
14. **zone melting and refining** : a melting and purification process in which a narrow zone of a bar of the metal is to be refined, this zone being displaced at a slow and constant speed along its length and the impurities being localized at the end last to become molten. ★ méthode de la zone flottante → *méthode 8.* R зонная плавка и рафинирование. D Zonenschmelz-und Raffinierverfahren. E método de la zona flotante. I metodo della zona flottante. N zonesmelten. P topienie i rafinowanie strefowe. S zonsmältning. (841)

member

1. **coarse control member** : → *control 33*
2. **contact member** : a conductive part of a contact assembly which is electrically isolated from other such parts when the contact circuit is open. ★ élément de contact → *élément 28.* R контактный элемент. D Kontaktglied. E elemento de contacto. I elemento di contatto. N contactdeel. P styk. S kontaktpart. (446)
3. **control member** : → *control 66*
4. **fine control member** : → *control 103*
5. **members of the public** : persons who are not radiation workers-category A or category B, other workers or patients. ★ personnes du public → *personne 1.* R посторонние лица. D Personen der Bevölkerung. E público en general.

I individui della popolazione. N publiek. P członkowie populacji. S allmänhet. (881)

6. **regulating member** (*Syn.* fine control member) : → *control 103*
7. **safety member** : a control member which, singly or in concert with others, provides a reserve of negative reactivity for the purpose of emergency shutdown of a reactor. ★ élément de sécurité → *élément 44.* D Sicherheitselement. E elemento de seguridad. I elemento di sicurezza. N veiligheidslichaam. P element bezpieczeństwa. S säkerhetselement. (026)
8. **shim member** : → *shim 2*

memory

1. **electrostatic memory tube** (*Syn.* charge-storage tube) : → *tube 15*
2. **thermal electrical relay with partial memory function** : → *relay 49*
3. **thermal electrical relay with total memory function** : → *relay 50*

meniscus

1. **meniscus** : a dome formed by liquid metal which rises at the central axis of a coreless induction furnace as result of the electromagnetic forces induced into the bath. ★ dôme → *dôme 2.* R мениск. D Badüberhöhung. E menisco. I menisco. N meniscushoogte. P menisk. S menisk. (841)

mercury

1. **high pressure mercury (vapour) lamp** : → *lamp 23*
2. **low pressure mercury (vapour) lamp** : → *lamp 36*
3. **mercury motor meter** : → *meter 31*
4. **mercury vapour tube** : → *tube 53*
5. **self-ballasted mercury lamp** (*Syn.* blended lamp) : → *lamp 5*

mercury-arc

1. **mercury-arc rectifier (equipment)** : → *rectifier 2*
2. **mercury-arc valve device** : → *valve device 5*

meridional

1. **meridional ray** : → *ray 16*

merit

1. **figure of merit** : → *figure 2*
2. **figure of merit** : → *figure 3*
3. **figure of merit** : → *figure 4*
4. **figure of merit of an active sonar** : → *figure 5*

mesa

1. **mesa technique** : → *technique 12*

MESG

1. **MESG** (*Syn.* maximum experimental safe gap) : → *gap 17*

mesh

1. **field mesh** (*Syn.* mesh electrode) : → *electrode 72*
2. **four-switch mesh substation with mesh opening disconnectors** : → *substation 6*
3. **four-switch mesh substation with mesh opening disconnectors** : → *substation 6*
4. **mesh** : a set of branches forming a loop and containing only one link of a given co-tree. ★ maille → *maille 4.* R контур. D Masche. E lazo básico. I maglia. N maas. P oczko. S fundamentalslinga. (131)
5. **mesh** (of a system) : an arrangement of electric lines forming a closed loop and supplied from several supply sources. ★ maille → *maille 5.* R кольцо с несколькими источниками питания. D Masche. E malla (en una red). I maglia (in una rete). N maas (van een net). P oczko (sieci). S maska. (601)
6. **mesh current** : → *current 128*
7. **mesh electrode** : → *electrode 72*
8. **mesh impedance matrix** : → *matrix 9*
9. **mesh substation** : → *substation 14*
10. **three-switch mesh substation with bypass** : → *substation 39*

mesh-connected

1. **mesh-connected device** : an *m*-phase device whose *m* branches form a single loop. ★ dispositif (connecté) en polygone → *dispositif 22.* R устройство, соединенное в многоугольник. D Betriebsmittel in Ringschaltung (Polygonschaltung). E dispositivo (conectado) en polígono. I dispositivo (collegato) a polígono. N in-veelhoek-geschakeld toestel. P człon (urządzenia elektrycznego) wielobokowy. S slingkopplat don. (151)

meshed

1. **meshed system** : → *system 115*

meson

1. **meson** : elementary very short-lived particles, with or without charge, with zero spin or integer spin, with mass between that of the electron and that of the proton. ★ méson → *méson 1.* R мезон. D Meson. E mesón. I mesone. N meson. P mezon. S meson. (391)
2. π-meson (*Syn.* pion) : → *pion 1*

mesopause

1. **mesopause** : the upper boundary of the mesosphere. ★ mésopause → *mésopause 1.* D Mesopause. P mezopauza. (705)

mesopic

1. **mesopic vision** : → *vision 2*

mesosphere

1. **mesosphere** : that part of the Earth's atmosphere located above the strastosphere and in which the temperature decreases with increasing height ; this part of the atmosphere extends to a height of around 85 km, at which height the temperature reaches a minimum value. ★ mésosphère → *mésosphère 1.* D Mesosphäre. P mezosfera. (705)

message

1. **initial address message** (*Syn.* IAM (abbreviation)) : a signal message sent as the first message in a call set-up process which contains sufficient address information to enable the routing of the call to start: it may possibly contain all the address information. ★ message initial d'adresse → *message 10.* R начальное адресное сообщение. D Anfangs-Adressierungsnachricht. E mensaje inicial de dirección. I messaggio di indirizzo iniziale. N ..... P wiadomość adresowa pierwotna. S startadress. (714)
2. **labelled message** (*Syn.* signal message) : → *message 14*
3. **message** (in telegraphy and data communication) : a group of characters and function control sequences which is transferred as an entity fom a transmitter to a receiver, where the arrangement of the characters is determined at the transmitter. ★ message → *message 7.* R сообщение (в телеграфии и в передаче данных). D Nachricht (in der Telegraphie und Datenkommunikation); Sendung (in der Telegrafie und Datenkommunikation). E mensaje (telegráfico o de datos). I messaggio. N bericht. P wiadomość (w telegrafii i teledacji). S meddelande. (721)
4. **message alignment indicator** : → *indicator 12*
5. **message priority** : → *priority 2*
6. **message spacing** : → *spacing 1*
7. **message switching** : → *switching 32*
8. **message switching exchange** : → *exchange 14*
9. **message switching network** : → *network 41*
10. **message transfer part** : → *part 6*
11. **multi-unit message** (*Syn.* MUM (abbreviation)) : a signal message which is transmitted by two or more signal units. ★ message multiple → *message 12.* R многоединичное сообщение. D Nachricht mit mehreren Elementen. E mensaje múltiple. I messaggio multi-unità. N meervoudig bericht; samengesteld bericht. P wiadomość wielojednostkowa. S flerenhetsmeddelande. (714)
12. **one-unit message** (*Syn.* single-unit message) : → *message 15*
13. **recorded message** : a facility under the control of a called subscriber, whereby incoming calls to that subscriber are connected to a transmitter for recorded messages. ★ réponse par message enregistré → *réponse 36.* R записанные сообщения. D aufgezeichnete Sendung; aufgezeichnete Nachricht. E respuesta por mensaje registrado. I messaggio

registrato. N vastgelegd bericht. P odpowiedź zarejestrowana. S inspelat meddelande. (721)

14. **signal message** (*Syn.* labelled message) : in common-channel signalling, a message containing information pertaining to a particular circuit, call, management action, etc., together with the relevant identifying information. *Note.* — The identifying information forms the label. ★ message de signalisation → *message 8.* R сигнальное сообщение; адресное сообщение. D Zeichengabe-Nachricht (-Meldung). E mensaje de señalización; mensaje etiquetado. I messaggio di segnalazione - messaggio etichettato. N signaleringsbericht. P wiadomość etykietowana. S signalmeddelande. (714)
15. **single-unit message** (*Syn.* one-unit message) : a signal message which is transmitted entirely within one signal unit. ★ message simple → *message 13.* R одноединичное сообщение. D Nachricht mit einem Element. E mensaje simple. I messaggio mono-unità. N enkelvoudig bericht. P wiadomość jednostkowa. S enkelenhetsmeddelande. (714)
16. **subsequent address message** (*Syn.* SAM (abbreviation)) : a signal message sent after the initial address message, which contains one or more additional digits of the address information and/or the end-of-pulsing signal. ★ message subséquent d'adresse → *message 14.* R последующее адресное сообщение. D Folge-Adressierungsnachricht. E mensaje posterior de dirección. I messaggio di indirizzo successivo. N ..... P wiadomość adresowa kolejna. S följdadress. (714)
17. **switch (message)** (*Syn.* message switching exchange) : → *exchange 14*
18. **unreasonable message** : a signal message with an inappropriate signal content, an incorrect signal direction, or appearing at an inappropriate place in the sequence. ★ message irrationnel → *message 11.* R нелогичное сообщение. D unplausible Nachricht. E mensaje irracional. I messaggio non verosimile. N ..... P wiadomość irracjonalna. S orimligt meddelande. (714)

messenger

1. **messenger wire** (*Syn.* catenary) : → *catenary 3*

metal

1. **filler metal** : metal added during welding or allied processes. ★ métal d'apport → *métal 3.* R присадочный металл. D Zusatzwerkstoff. E metal de aportación. I metallo d'apporto. N lastoevoegmetaal. P spoiwo. S tillsatsmaterial. (851)
2. **metal core base material** : → *material 29*
3. **metal core printed board** : → *board 12*
4. **metal filament lamp** : → *lamp 38*
5. **metal foil capacitor** : → *capacitor 47*
6. **metal halide lamp** : → *lamp 39*
7. **metal plate air seal gasket** : → *gasket 3*
8. **metal positive** (*Syn.* mother) : a direct electroplated copy of a negative. It has a groove similar to that on a disk and can be played as such. ★ mère → *mère 2.* R второй оригинал; позитив. D Positiv-Galvano («Mutter»). E positivo metálico; madre. I madre. N moeder. P pozytyw (płyty gramofonowej). S matris. (806)

metal-clad

1. **metal-clad base material** : → *material 30*
2. **metal-clad conductor** : → *conductor 46*

metal-coated

1. **metal-coated conductor** : → *conductor 47*

metal-enclosed

1. **gas insulated metal-enclosed substation** : → *substation 9*
2. **gas-insulated metal-enclosed switchgear** : → *switchgear 1*
3. **metal-enclosed switchgear and controlgear** : → *switchgear 4*

metallic

1. **balanced metallic circuit** : → *circuit 8*
2. **metallic circuit** : → *circuit 118*
3. **unbalanced metallic circuit** : → *circuit 191*

metallized

1. **metallized capacitor** : → *capacitor 48*
2. **metallized screen** : → *screen 13*

metal-oxide-semiconductor

1. **metal-oxide-semiconductor field-effect transistor** : → *transistor 8*

metamagnetism

1. **metamagnetism** : a phenomenon by which an antiferromagnetic substance is converted into a ferromagnetic substance by the application of an appropriate magnetic field. ★ métamagnétisme → *métamagnétisme 1.* R метамагнетизм. D Metamagnetismus. E metamagnetismo. I metamagnetismo. N metamagnetisme. P metamagnetyzm. S metamagnetism. (121)

metamer

1. **metamers** (*Syn.* metameric colour stimuli) : → *stimulus 8*

metameric

1. **metameric colour stimuli** : → *stimulus 8*

metastable

1. **metastable state** : → *state 23*
2. **metastable state** : → *state 24*

meteorological

1. **meteorological optical range** : → *range 43*

meter

1. **absorption frequency meter** (*Syn.* absorption wavemeter) : a frequency meter or cavity frequency meter which when coupled to an external electromagnetic source and tuned to its frequency absorbs power from that source. ★ fréquencemètre à absorption → *fréquencemètre 2.* R резонансный частотомер поглощающего типа; резонансный волномер поглощающего типа. D Absorptions-Frequenzmesser; Absorptions-Wellen (längen)messer. E frecuencímetro de absorción; ondámetro de absorción. I frequenzimetro ad assorbimento. N absorptiefrequentiemeter; absorptiegolfmeter. P falomierz absorpcyjny. S absorptionsfrekvensmeter. (726)
2. **(active) energy meter** (*Syn.* watt-hour meter) : → *meter 77*
3. **active power meter** (*Syn.* wattmeter) : → *wattmeter 2*
4. **activity meter** : a radiation meter intended to measure the activity of a radiation emitter and equipped with an indicating or recording instrument. ★ activimètre → *activimètre 1.* R радиометр активности нуклида в излучателе измеритель активности. D Gerät zur Bestimmung der Aktivität. E medidor de actividad. I misuratore di attività (attivimetro). N activiteitsmeter. P miernik aktywności. S aktivitetsmätare. (391)
5. **air contamination meter** : a radiation meter designed to measure the activity concentration of aerosols, vapours or gas in air. ★ contaminamètre atmosphérique → *contaminamètre 1.* R радиометр загрязненности воздуха. D Luftkontaminationsmeßgerät. E medidor de radiactividad en el aire. I contaminametro atmosferico. N luchtbesmettingsmeter. P miernik skażeń powietrza. S luftaktivitetsmätare. (392)
6. **ampere-hour meter** : an instrument intended to measure a quantity of electricity by integrating current with respect to time. ★ ampèreheuremètre → *ampèreheuremètre 1.* R счетчик ампер-часов. D Amperestundenzähler. E amperihorímetro. I amperorametro. N ampère-uurmeter. P licznik amperogodzin. S amperetimmätare. (301)
7. **apparent energy meter** (*Syn.* volt-ampere-hour meter) : → *meter 73*
8. **apparent power meter** (*Syn.* volt-ampere meter) : → *meter 72*
9. **back-scatter density meter** (ionizing radiation) : a density meter that utilizes the radiation back-scattered by the material being measured. ★ densimètre à rétrodiffusion → *densimètre 2.* R альбедный радиоизотопный плотномер. D Dichtemeßgerät nach dem Rückstreuprinzip (ionisierender Strahlung). E densímetro de retrodispersión (por radiaciones ionizantes). I densimetro a retrodiffusione (di

radiazione ionizzante). N dichtheidsmeter met terugverstrooiing (voor ioniserende straling). P gęstościomierz izotopowy rozproszeniowy. S densitetsmätare med återspridd strålning. (392)

10. **beryllium prospecting meter** (γ, n) : a measuring assembly designed to be used in prospecting for beryllium ores; operation is usually based on the beryllium nuclear reaction (γ, n) due to a gamma radiation source, the neutrons produced being counted after moderation. ★ ensemble de prospection de béryllium (γ, n) → *ensemble 11.* R поисковый прибор для разведки бериллия (γ, n). D Gerät für die Prospektion von Beryllium (γ, n). E detector de berilio de prospección (γ, n). I berilliotenorimetro per prospezione. N berylliumverkenningsmeter. P miernik zawartości berylu geologiczny. S berylliummätare (för prospektering). (392)

11. **beta back-scatter thickness meter** : → *back-scatter 5*

12. **bolometric power meter** : a power meter, which uses a bolometer for a power sensing element. ★ wattmètre bolométrique → *wattmètre 8.* R болометрический измеритель мощности. D bolometrischer Leistungsmesser. E vatímetro bolométrico. I wattmetro bolometrico. N bolometrische vermogenmeter. P miernik mocy bolometryczny; watomierz bolometryczny. S bolometrisk effektmeter. (726)

13. **calorimeter power meter** (*Syn.* calorimetric power meter) : → *meter 14*

14. **calorimetric power meter** (*Syn.* calorimeter power meter) : a power meter which uses temperature rise in a medium as a means of measuring absorbed power. *Note.* — The medium, often water, is either the power-absorbing agent or has heat transferred to it from a power-absorbing element. ★ wattmètre calorimétrique → *wattmètre 9.* R калориметрический измеритель мощности; измеритель мощности с калориметром. D kalorimetrischer Leistungsmesser. E vatímetro calorimétrico. I wattmetro calorimetrico. N calorimetrische vermogenmeter. P miernik mocy kalorymetryczny; watomierz kalorymetryczny. S kalorimetrisk effektmeter. (726)

15. **cavity frequency meter** (*Syn.* cavity wavemeter) : a cavity resonator whose dimension can be mechanically changed in order to adjust its resonant frequency, as indicated on a scale, to the unknown frequency of an externally oscillator coupled to the cavity. ★ fréquencemètre à cavité → *fréquencemètre 3.* R частотомер с объемным резонатором; волномер с объемным резонатором. D Hohlraum-Frequenzmesser; Hohlraum-Wellen (längen)messer. E frecuencímetro de cavidad; ondámetro de cavidad. I frequenzimetro non dissipativo; ondametro a cavità. N trilholtefrequentiemeter; trilholtegolfmeter. P falomierz wnękowy. S vågmeter. (726)

16. **crosstalk meter** : apparatus for measuring crosstalk attenuation. ★ diaphonomètre → *diaphonomètre 1.* R измеритель переходного влияния. D Nebensprechdämpfungsmesser. E diafonómetro. I diafonometro. N overspraakdempingsmeter. P miernik przesłuchu. S överhörningsmeter. (722)

17. **density meter** (ionizing radiation) : a measuring assembly that includes an ionizing radiation source and is designed to determine either the density of a material or the average specific gravity of a heterogeneous mixture, using the variation, within a defined geometry, of the absorption or diffusion of radiation. ★ densimètre → *densimètre 1.* R радиоизотопный плотномер. D Dichtemeßgerät (mittels ionisierender Strahlung). E densímetro (por radiaciones ionizantes). I densimetro (a radiazione ionizzante). N dichtheidsmeter (met behulp van ioniserende straling). P gęstościomierz izotopowy. S densitetsmätare (med joniserande strålning). (392)

18. **earth resistance meter** : an instrument intended to measure the resistance of an earth connection. ★ tellurohmètre → *tellurohmètre 1.* R измеритель сопротивления заземления. D Erdungs-Messgerät. E telurómetro; aparato de medida de resistencia de tierra. I misuratore di resistenza di terra. N aardweerstandmeter. P miernik rezystancji uziemienia. S jordresistansmeter. (301)

19. **electrodynamic meter** : an energy meter which operates by the rotation of the moving coils of an electrodynamic measuring element. ★ compteur électrodynamique → *compteur 20.* R счетчик электродинамический. D elektrodynamischer Zähler. E contador electrodinámico. I contatore elettrodinamico. N elektrodynamische meter. P licznik elektrodynamiczny. S elektrodynamisk mätare. (302)

20. **excess energy meter** : a meter intended to measure the excess energy when the power exceeds a pre-determined value. ★ compteur de dépassement → *compteur 11.* R счетчик излишков электрической энергии. D Überverbrauchszähler; Spitzenzähler. E contador de exceso. I contatore di supero. N overschrijdingsenergiemeter. P licznik ponadryczałtowy. S överförbrukningsmätare; spetsmätare. (302)

21. **flux meter** : an instrument intended to measure magnetic flux. ★ fluxmètre → *fluxmètre 1.* R флюксметр. D Kraftfluss-Messgerät (Messgerät zur Messung des magnetischen Flusses). E aparato de medida de flujo; flúxmetro. I flussometro. N fluxmeter. P fluksometr; strumieniomierz. S fluxmeter. (301)

22. **following level meter** (ionizing radiation) : a level meter including an on-off level indicator and in which the source-detector assembly is compelled to follow the level. ★ limnimètre à poursuite automatique → *limnimètre 2.* R следящий радиоизотопный уровнемер. D Füllstandsmeßgerät mit Nachlauf (mittels ionisierender Strahlung). E medidor de nivel de seguimiento automático (por radiaciones ionizantes). I livellometro ad inseguimento automatico (per mezzo di radiazioni ionizzanti). N automatisch volgende niveaumeter. P poziomomierz izotopowy nadążny. S rörlig nivåmätare (med joniserande strålning). (392)

23. **frequency meter** : an instrument intended to measure the frequency of a periodic quantity. ★ fréquencemètre → *fréquencemètre 1.* R частотомер. D Frequenz-Messgerät. E frecuencímetro. I frequenzimetro. N frequentiemeter. P miernik częstotliwości; częstościomierz. S frekvensmeter. (301)

24. **gamma back-scatter thickness meter** : a thickness meter that includes a gamma radiation source and that utilizes the radiation back-scattered by the material being measured. This assembly is frequently used for the measurement of lining or coating thicknesses. ★ épaisseurmètre à rétrodiffusion gamma → *épaisseurmètre 4.* R альбедный гамма-толщиномер. D Dickenmeßgerät nach der Gamma Rückstreumethode. E medidor de espesor por retrodispersión gamma. I spessimetro a retrodiffusione gamma. N diktemeter met gammaterugverstrooiing. P grubościomierz izotopowy rozproszeniowy gamma. S tjockleksmätare med återspridd gammastrålning. (392)

25. **illuminance meter** : instrument for measuring illuminance. ★ luxmètre → *luxmètre 1.* R люксметр. D Beleuchtungsstärkemesser (CH); Beleuchtungsmesser (CH); Luxmeter (CH). E iluminancímetro. I luxmetro. N luxmeter. P luksomierz. S luxmeter. (845)

26. **induction meter** : an energy meter which operates by the rotation of the disc of an induction measuring element. ★ compteur à induction → *compteur 4.* R счетчик индукционный. D Induktionszähler. E contador de inducción. I contatore a induzione. N inductiemeter. P licznik indukcyjny. S induktionsmätare. (302)

27. **insulation resistance meter** : an instrument intended to measure insulation resistance. ★ appareil mesureur de résistance d'isolement → *appareil mesureur 14.* R измеритель сопротивления изоляции. D Isolations-Messgerät. E aparato de medida de resistencia de aislamiento. I misuratore di resistenza di isolamento. N isolatieweerstandmeter. P miernik rezystancji izolacji. S isolationsresistansmeter. (301)

28. **level meter** (ionizing radiation) : a measuring assembly that includes an ionizing radiation source and is designed to measure or indicate the level in a container of liquid or granular substances, even when direct access to that level is not possible. ★ limnimètre → *limnimètre 1.* R радиоизотопный уровнемер. D Füllstandsmeßgerät (mittels ionisierender Strahlung). E medidor de nivel (por radiaciones ionizantes). I livellometro (per mezzo di radiazioni ionizzanti). N niveaumeter (met ioniserende straling). P poziomomierz izotopowy. S nivåmätare (med joniserande strålning). (392)

29. **liquid scintillator activity meter** : an activity meter intended to measure the activity of a solution of a radiation emitter, by mixing the solution with a liquid scintillator and detecting the scintillations produced. ★ activimètre à scintillateur liquide → *activimètre 2.* R жидкостный сцинтилляционный радиометр. D Gerät zur Bestimmung der Aktivität mit flüssigem Szintillator. E medidor de actividad de centelleador líquido. I attivimetro a scintillatore liquido. N activiteitsmeter met vloeibare scintillator. P miernik

aktywności z ciekłym scyntylatorem. S aktivitetsmätare med flytande scintillator. (391)

30. **luminance meter** : instrument for measuring luminance. ★ luminancemètre → *luminancemètre 1.* R яркометр. D Leuchtdichtemesser. E luminancímetro. I luminanzometro. N luminantiemeter. P nitomierz; miernik luminancji. S luminansmeter. (845)

31. **mercury motor meter** : a coulometer or energy meter having a disc immersed in mercury and rotating in the field produced by a permanent magnet or an electromagnet. ★ compteur à mercure → *compteur 5.* R счетчик ртутный. D Quecksilberzähler. E contador de mercurio. I contatore a mercurio. N kwikmotormeter. P licznik rtęciowy tarczowy. S kvicksilvermotormätare. (302)

32. **meter rent** : → *rent 1*

33. **meter with maximum demand indicator** : a meter fitted with a means to indicate the highest value of the power averaged over successive equal time intervals. ★ compteur à indicateur de maximum → *compteur 3.* R счетчик с показателем максимума. D Zähler mit Maximumanzeige. E contador con indicador de máximo; maxímetro. I contatore con indice di massima. N meter met maximumaanwijzing. P licznik ze wskaźnikiem maksymalnej mocy uśrednionej. S maximalmätare. (302)

34. **(microwave) power meter** : an apparatus which is able to absorb or sense microwave power in a transmission line, and is provided with a circuit which is able to sense some physical or electrical variation due to the microwave power and finally provided with an output meter calibrated in power. ★ wattmètre (à hyperfréquence) → *wattmètre 4.* R измеритель СВЧ мощности. D (Mikrowellen-)Leistungsmesser. E vatímetro (de microondas). I wattmetro (per alte frequenze). N vermogenmeter. P miernik mocy (mikrofal); watomierz mikrofalowy. S effektmeter. (726)

35. **multi-rate meter** : a meter provided with a number of registers, each becoming operative at specified time intervals corresponding to different tariffs. ★ compteur à tarifs multiples → *compteur 8.* R счетчик многотарифный. D Mehrtarifzähler. E contador de tarifas múltiples. I contatore a tariffe multiple. N meervoudigtariefmeter. P licznik wielotaryfowy. S flertariffmätare. (302)

36. **objective reference equivalent meter** : an objective instrument for measuring quantities related but not equal to reference equivalent. *Note.* — The relationship between the reference equivalent and the readings of the objective reference equivalent meter is dependent on the characteristics of the telephone set. ★ appareil de mesure objective de l'équivalent de référence → *appareil mesureur 3.* R объективный измеритель эквивалента затухания. D objektiver Bezugsdämpfungsmeßplatz; OBDM. E aparato de medida objetiva del equivalente de referencia. I apparecchiatura per la misura oggettiva dell'equivalente di riferimento; OREM. N objectieve referentie-equivalentmeter. P urządzenie do pomiarów obiektywnych tłumienności. S objektiv referensdämpningsmeter. (722)

37. **overflow meter** : a traffic meter associated with a group of circuits to records the incidence of calls which fail to find free outlets. *Note.* — In some systems, every such call is individually registered, whereas in other systems, two or more overlapping unsuccessful calls are registered merely as a single overflow event. ★ compteur de débordement → *compteur 10.* R счетчик избыточной нагрузки. D Durchdrehzaehler. E contador de desbordamiento. I contatore di disinserzione. N ..... P miernik strat ruchu. S spärräknare. (714)

38. **peak programme meter** : an instrument designed to measure the peak levels in a sound signal, which has a short attack time-constant of a few milliseconds, and a long decay time-constant of the order of a few seconds. ★ modulomètre de crête → *modulomètre 2.* R квазипиковый измеритель уровня. (723)

39. **period meter** : an electronic sub-assembly which, in association with one or more detectors, is used to indicate the time constant (period) of a nuclear reactor. ★ périodemètre → *périodemètre 1.* R измеритель периода ядерного реактора; периодомер. D Periodenmeßgerät. E periodímetro. I unità per misura della costante di tempo (periodo). N tijdconstantemeter. P miernik okresu. S tidkonstantmätare; periodmätare. (392)

40. **phase meter** : an instrument intended to measure the phase angle between two alternating electrical quantities of the same frequency, one of which is accepted as the phase reference. ★ phasemètre → *phasemètre 1.* R фазометр. D Phasen-Messgerät. E fasímetro. I fasometro. N fasemeter. P fazomierz. S fasmeter. (301)

41. **power factor meter** : an instrument intended to measure the ratio between the active end the apparent power in an electrical circuit. ★ appareil mesureur de facteur de puissance → *appareil mesureur 13.* R измеритель коэффициента мощности. D Leistungsfaktor-Messgerät. E aparato de medida de factor de potencia. I cosfimetro. N cos-meter. P miernik współczynnika mocy. S effektfaktormeter. (301)

42. **prepayment meter** : a device which is a combination of an energy meter and a coin-freed mechanism which, by insertion of a suitable coin, connects a supply of electricity and after the consumption of a pre-determined value of energy or after a pre-determined time interval, disconnects the supply. ★ compteur à prépaiement → *compteur 6.* R счетчик с предварительной оплатой. D Münzzähler. E contador de pago previo. I contatore a pagamento. N muntmeter. P licznik samoinkasujący. S myntmätare. (302)

43. **programme meter** : apparatus for measuring and checking the levels of a sound signal under dynamic conditions. *Note.* — Various types of such apparatus exist, essentially characterized by their time of response to variations in level. ★ modulomètre → *modulomètre 1.* R индикатор уровня. (723)

44. **prospecting radiation meter** : a radiation meter intended to measure fluence rate in general, regional or local prospecting or for subsurface and deep survey. ★ radiamètre de prospection → *radiamètre 2.* R поисковый радиометр. D Strahlungsmeßgerät zur Prospektion. E medidor de radiación de prospección. I misuratore di radiazione per prospezione. N stralingsmeter voor ertsverkenning. P geologiczny radiometr poszukiwawczy. S strålningsmätare för prospektering. (391)

45. **radiation charge meter** (*Syn.* charge integrator) : → *integrator 1*

46. **radiation meter** (*Syn.* radiation measuring assembly) : an assembly designed to measure quantities concerned with ionizing radiation (activity, exposure rate, etc.), and including one or several radiation detectors and associated sub-assemblies or basic function units. ★ radiamètre → *radiamètre 1.* R измеритель ионизирующих излучений; прибор (установка) для измерения ионизирующих излучений. D Strahlungsmeßgerät. E medidor de radiación; conjunto de medida (de radiación). I misuratore di radiazione. N opstelling voor stralingsmeting; stralingsmeetopstelling; stralingsmeter; meetopstelling. P radiometr; zestaw do badania promieniowania. S strålningsmätare. (391,881)

47. **radioactive aerosol contamination meter** : an air contamination meter utilizing aerosol sampling and measuring devices. ★ contaminamètre d'aérosols radioactifs → *contaminamètre 2.* R радиометр загрязненности воздуха радиоактивными аэрозолями; радиометр аэрозолей в воздуие. D Aerosol-Kontaminationsmeßgerät. E medidor de radiactividad de aerosol radiactivo. I contaminametro di aerosol radioattivi. N besmettingsmeter voor radioactieve aërosolen. P miernik skażeń powietrza aerozolami promieniotwórczymi. S (radioaktiv) aerosolaktivitetsmätare. (392)

48. **reactive energy meter** (*Syn.* var-hour meter) : → *meter 70*

49. **reactive power meter** (*Syn.* varmeter) : → *varmeter 1*

50. **reactivity meter** : an electronic sub-assembly which, in association with one or more detectors, gives an indication of the reactivity of a nuclear reactor. ★ réactimètre → *réactimètre 1.* R измеритель реактивности; реактивометр. D Gerät zur Bestimmung der Reaktivität. E medidor de reactividad. I unità per misura della reattività. N reactiviteitsmeter. P miernik reaktywności. S reaktivitetsmätare. (392)

51. **relative ionospheric opacity meter** (*Syn.* riometer) : → *riometer 1*

52. **resistance meter** (*Syn.* ohmmeter) : → *ohmmeter 2*

53. **soil moisture meter** (ionizing radiation) : a content meter including a fast neutron source and designed to determine soil water content through counting the neutrons moderated by the hydrogen nuclei in the water molecules. ★ humidimètre de sol → *humidimètre 1.* R радиоизотопный влагомер почвы. D Bodenfeuchtemesser (mittels ionisierender Strahlung). E medidor de humedad del suelo (por radiaciones ionizantes). I umidimetro del suolo (per mezzo di radiazione ionizzante).

N vochtigheidsmeter voor grond (berustend op ioniserende straling). P wilgotnościomierz gleby neutronowy. S fukthaltsmätare för jordprover. (392)

54. sound level meter : instrument for the measurement of sound level with a standard frequency weighting and a standard exponential time weighting. ★ sonomètre → *sonomètre 2.* R шумомер. D Schallpegelmesser. E sonómetro. I fonometro; sonometro normalizzato. N geluid(s)niveaumeter. P miernik poziomu dźwięku. S ljudnivåmätare; bullermätare. (801)

55. sound-level meter : an instrument, having a specified performance in respect of directivity, various frequency responses, rectification characteristic, and various dynamic responses, intended for the measurement of sound pressure levels. *Note.* — For telephony, the CCITT recommends in the CCITT Recommendation P54 from the Volume V of the Blue Book, 1989, the adoption of the sound level meter specified in the publication 651 (1979) of the IEC entitled: sound level meters. ★ sonomètre → *sonomètre 1.* R измеритель уровня звука. D Schallpegelmesser. E sonómetro. I misuratore di livello sonoro; fonometro. N geluidsniveaumeter. P miernik poziomu dźwięku; sonometr. S ljudnivåmätare. (722)

56. standing-wave meter (*Syn.* standing-wave indicator) : an instrument for measuring the standing wave ratio along a transmission line. ★ ROS-mètre → *ROS-mètre 1.* R измеритель коэффициента стоячй волны; индикатор коэффициента стоячей волны. D Stehwellenmesser. E medidor de ondas estacionarias; indicador de ondas estacionarias. I ROS metro; indicatore di onde stazionarie; apparecchio di misura di onde stazionarie. N staande-golfmeter. P miernik fali stojącej. S ståendevågmeter. (726)

57. static level meter (ionizing radiation) : a level meter for continuous measurement which includes a fixed ionizing radiation source and a detector disposed in such a way that the radiation imparted to the detector is a function of the level value. ★ statolimnimètre → *statolimnimètre 1.* R статический радиоизотопный уровнемер. D Füllstandsmeßgerät mit feststehender Strahlenquelle. E medidor fijo de nivel (por radiaciones ionizantes). I livellometro statico (per mezzo di radiazione ionizzante). N statische niveaumeter (berustend op ioniserende straling). P poziomomierz izotopowy statyczny. S fast nivåmätare (med joniserande strålning). (392)

58. subscriber usage meter (*Syn.* subscriber's check meter) : → *meter 59*

59. subscriber's check meter (*Syn.* subscriber usage meter) : a meter installed at a subscriber's premises to enable the subscriber to determine the cost of his outgoing telephone calls. ★ compteur de taxes à domicile → *compteur 14.* R абонентский контрольный счетчик. D Gebührenzähler. E contador privado de tasas. I indicatore di conteggio. N kostenteller. P licznik telefoniczny abonencki. S abonnentplacerad samtalsmätare. (722)

60. subscriber's meter : a meter provided in a local exchange and associated with a subscriber's calling equipment to record the number of call units chargeable to that subscriber. ★ compteur d'abonné → *compteur 9.* R абонентский счетчик. D Gebuehrenzaehler. E contador de abonado. I contatore d'abbonato. N abonneeteller. P licznik abonencki. S samtalsräknare. (714)

61. surface contamination meter : a radiation meter intended to determine the contamination of an object by measuring the activity of its surface. ★ contaminamètre de surface → *contaminamètre 3.* R радиометр загрязненности поверхностей. D Gerät zur Bestimmung der Oberflächenkontamination. E medidor de contaminación de superficie. I misuratore di contaminazione di superficie. N besmettingsmeter voor oppervlakken. P miernik skażeń powierzchniowych. S ytkontaminationsmätare. (391)

62. thermoelectric power meter : a power meter which uses a thermoelectric junction as the power sensing element. ★ wattmètre thermoélectrique → *wattmètre 10.* R термоэлектрический измеритель мощности. D thermoelektrischer Leistungsmesser. E vatímetro termoeléctrico. I wattmetro termoelettrico. N thermo-elektrische vermogenmeter. P miernik mocy termoelektryczny. S termoelektrisk effektmeter. (726)

63. thickness meter (ionizing radiation) : a measuring assembly that includes an ionizing radiation source and is designed to measure non-destructively the thickness of a material by means of ionizing radiation. ★ épaisseurmètre → *épaisseurmètre 1.* R радиоизотопный толщиномер. D Dickenmeßgerät (mittels ionisierender Strahlung). E medidor de espesor (por radiaciones ionizantes). I spessimetro (a radiazione ionizzante). N diktemeter (met ioniserende straling). P grubościomierz izotopowy. S tjockleksmätare (med joniserande strålning). (392)

64. tissue activity meter : an activity meter designed to locate, by means of appropriate probes, fixed radionuclides within tissues. ★ activimètre médical → *activimètre 3.* R медицинский радиометр. D ..... E medidor de actividad médico. I attivimetro medicale. N activiteitsmeter voor weefsel. P miernik aktywności tkanki. S vävnadsaktivitetsmätare. (392)

65. traffic meter (in telecommunications) : a meter for recording specific traffic data. ★ compteur de trafic → *compteur 16.* R счетчик нагрузки (в электросвязи). D Verkehrsmesser. E contador de tráfico; medidor de tráfico. I contatore di traffico. N ..... P miernik ruchu. S trafikmätare. (714)

66. transmission density meter (ionizing radiation) : a density meter that utilizes the radiation transmitted through the material being measured. The assembly is also used to check the homogeneity of a material. ★ densimètre à transmission → *densimètre 3.* R абсорбционный радиоизотопный плотномер. D Dichtemeßgerät nach der Durchstrahlmethode (mittels ionisierender Strahlung). E densímetro de transmisión (por radiaciones ionizantes). I densimetro a trasmissione (di radiazione ionizzante). N dichtheidsmeter met transmissie (van ioniserende straling). P gęstościomierz izotopowy absorpcyjny. S densitetsmätare med genomgående strålning. (392)

67. transmission frequency meter (*Syn.* transmission wavemeter) : a cavity frequency meter which when coupled to a transmission line and tuned to the frequency of the incident wave transmits electromagnetic power to its output port. ★ fréquencemètre non dissipatif → *fréquencemètre 4.* R частотомер проходного типа; волномер проходного типа. D Durchgangs-Frequenzmesser; Durchgangs-Wellen (längen)messer. E frecuencímetro no disipativo; ondámetro no disipativo. I frequenzimetro non dissipativo. N transmissiefrequentiemeter; transmissiegolfmeter. P falomierz transmisyjny. S transmissionsfrekvensmeter. (726)

68. transmission thickness meter (ionizing radiation) : a thickness meter that utilizes the radiation transmitted through the material being measured. ★ épaisseurmètre à transmission → *épaisseurmètre 5.* R абсорбционный радиоизотопный толщиномер. D Dickenmeßgerät nach der Durchstrahlmethode (mittels ionisierender Strahlung). E medidor de espesor por transmisión (por radiaciones ionizantes). I spessimetro a trasmissione (di radiazione ionizzante). N diktemeter met transmissie (van ioniserende straling). P grubościomierz izotopowy absorpcyjny. S tjockleksmätare med genomgående strålning. (392)

69. vacuum meter with alpha emitter : a vacuum meter designed to measure low pressures and comprising an alpha radiation source in an ionization chamber communicating with an enclosure, the vacuum of which is to be determined. The gas of the chamber is thus at the same pressure as the gas in the enclosure and the electric current flowing through the chamber provides the measure of this pressure. ★ manomètre de vide à émetteur alpha → *manomètre 1.* R альфа-вакуумметр. D Vakuummeßgerät mit Alpha-Strahler. E manómetro de vacío con emisor alfa. I manometro di radiazione alfa (da vuoto). N vacuümmeter met alfastraler. P próżniomierz ze źródłem alfa. S vakuummeter med alfastrålkälla. (392)

70. var-hour meter (*Syn.* reactive energy meter) : an instrument intended to measure reactive energy by integrating reactive power with respect to time. ★ compteur d'énergie réactive → *compteur 19.* R счетчик вар-часов; счетчик реактивной энергии. D Blindverbrauchszähler. E contador de energía reactiva; varhorímetro. I contatore di energia reattiva. N varuurmeter. P licznik energii biernej; licznik warogodzin. S vartimmätare. (301)

71. vibration meter : apparatus for the measurement of the displacement, velocity, or acceleration of a vibrating body. ★ vibromètre → *vibromètre 1.* R виброметр. D Schwingungsmesser. E vibrómetro. I vibrometro. N trillingsmeter. P wibrometr. S vibrationsmätare. (801)

72. volt-ampere meter (*Syn.* apparent power meter) : an instrument intended to measure apparent power. ★ voltampèremètre → *voltampèremètre 1.* R вольт-амперметр (измеритель полной мощности). D Scheinleistungs-Messgerät. E voltamperímetro; aparato de medida de potencia aparente. I voltampermetro misuratore di

potenza apparente. N voltampèremeter. P woltoamperomierz; miernik mocy pozornej. S voltamperemeter. (301)

73. **volt-ampere-hour meter** (*Syn.* apparent energy meter) : an instrument intended to measure apparent energy by integrating apparent power with respect to time. ★ compteur d'énergie apparente → *compteur 18.* R счетчик вольт-ампер-часов. D Scheinverbrauchszähler. E contador de energía aparente; voltamperihorímetro. I contatore di energia apparente. N voltampère-uurmeter. P licznik energii pozornej; licznik woltoamperogodzin. S voltamperetimmätare. (301)
74. **volume meter** (*Syn.* volume indicator) : a voltmeter of specified characteristics, used to determine the volume of an electrical signal, for instance during a telephone conversation or a sound programme transmission. *Note.* — In giving the results of the meter reading, the type of meter used and the method of reading should be stated. ★ volumètre → *volumètre 1.* R волюметр; измеритель волюма. D Volumenmeter. E volúmetro; indicador de volumen. I indicatore volume. N volumemeter. P wolumetr. S volymmeter. (722)
75. **vu meter** : volume meter standardized in the United States of America or any meter with similar characteristics. *Notes. 1* — The name vu meter was derived for Volume Unit meter. *2* — The vu meter standardized in the United States of America and its method of use are described in the supplement n°11 of Volume V of the CCITT White Book, 1969. ★ vumètre → *vumètre 1.* R Vu-метр. D VU-Meter. E vúmetro. I volumetro. N vu-meter. P vu-metr; wskaźnik vu. S vu-meter. (722)
76. **VU meter** : a programme meter with attack and decay time-constants sensibly the same, approximately 300 milliseconds. *Note.* — The readings given by this meter are expressed in logarithmic units called VU (Volume Units) ; zero VU corresponds to a certain level of a 1 kHz sinusoidal signal which may be adjustable by the operator. ★ vumètre → *vumètre 2.* R измеритель среднего значения. (723)
77. **watt-hour meter** (*Syn.* (active) energy meter) : an instrument intended to measure active energy by integrating active power with respect to time. ★ compteur d'énergie (active) → *compteur 17.* R счетчик ватт-часов; счетчик активной энергии. D Wattstundenzähler; Wirkverbrauchszähler. E contador de energía (activa); vatihorímetro. I contatore di energia attiva. N wattuurmeter; elektriciteitsmeter. P licznik energii czynnej; licznik watogodzin. S wattimmätare. (301)
78. **whole-body radiation meter** : an assembly which measures the total gamma radiation (including Bremsstrahlung) emitted by the body and uses one or several scintillation detectors heavily shielded against ionizing ambient radiation. ★ anthroporadiamètre → *anthroporadiamètre 1.* R счетчик излучения человека. D Ganzkörperzähler. E medidor de radiación total (de las personas). I radiametro biologico. N antroporadiameter; stralingsmeter voor lichaamsactiviteiten. P miernik promieniowania całego ciała. S helkroppsmätare. (392,881)
79. **X-ray fluorescence thickness meter** : a thickness meter that utilizes the X-ray fluorescence excited in the material to be measured or in the supporting material. ★ épaisseurmètre à fluorescence X → *épaisseurmètre 2.* R рентгено-флуоресцентный радиоизотопный толщиномер. D Röntgenfluoreszenz-Dickenmeßgerät. E medidor de espesor por fluorescencia X. I spessimetro a fluorescenza X. N diktemeter met röntgenfluorescentie. P grubościomierz fluorescencyjny X. S tjockleksmätare med röntgenfluorescens. (392)

method

1. **alternative test method** (for optical fibres) (*Syn.* ATM (abbreviation); practical test method) : a test method, in which a given characteristic of a specified class of optical fibres or optical cables (and associated components) is measured in a manner consistent with the definition of this characteristic and gives results which are reproducible and relatable to the reference test method and to practical use. ★ méthode de mesure de remplacement → *méthode 19.* R альтернативный метод испытаний; практический метод испытаний (для оптических волокон). D Alternativ-Testmethode. E método de prueba alternativo (para fibras ópticas); ATM (abreviatura); método de prueba práctico (para fibras ópticas). I metodo di misura alternativo. N alternatieve testmethode; alternatieve meetmethode. P metoda techniczna pomiaru światłowodu. S alternativ mätmetod. (731)
2. **bare hand method** : live working by which the worker carries out his work bare handed on live parts, after having been raised to the voltage of the equipement on which he is working. ★ travail au potentiel → *travail 25.* R работа с изолирующего устройства. D Arbeiten mit direkter Berührung. E trabajo a potencial. I lavoro in tensione. N met blote handen werken onder spanning. P praca przy wyrównanym potencjale. S bar handmetod. (604)
3. **beat method (of measurement)** : a differential method of measurement which uses the phenomenon of beating between the frequencies related to two compared quantities, one being the quantity to be measured and the other the reference quantity. ★ méthode (de mesurage) par battement → *méthode 12.* R метод измерений по биениям. D Schwebungsmessverfahren. E método de medida por batido; método (de medición) por batido. I metodo per battimento. N zwevingsmethode. P metoda pomiarowa dudnieniowa. S svävningsmätmetod. (301)
4. **comparison (method of) measurement** : → *measurement 2*
5. **complementary (method of) measurement** : → *measurement 3*
6. **differential (method of) measurement** : → *measurement 4*
7. **direct (method of) measurement** : → *measurement 5*
8. **Fresnel reflection method** : the method for measuring the refractive index profile of an optical fibre by measuring the reflectance as a function of position on the end face. ★ méthode de réflexion de Fresnel → *méthode 30.* R метод отражения Френеля. D Fresnelsche Reflexionsmethode. E método de reflexión de Fresnel. I metodo della riflessione di Fresnel. N Fresnel-terugkaatsingsmethode. P metoda odbiciowa (pomiaru rozkładu współczynnika załamania). S ..... (731)
9. **growing by Czochralski's method** (*Syn.* growing by pulling) : → *pulling 2*
10. **indirect (method of) measurement** : → *measurement 6*
11. **insulated gloves method** (*Syn.* rubber gloves method (USA)) : live working by which the worker, whose hands are electrically protected with rubber gloves and arms possibly covered with insulating arm sleeves, carries out his work in direct mechanical contact with live parts. ★ travail au contact → *travail 24.* R работа в изолирующих перчатках. D Arbeiten mit isolierender Schutzkleidung. E trabajo en conctacto. I lavoro a contatto. N met handschoenen werken onder spanning. P praca pod napięciem z izolacją osobistą. S arbete med isolerande handskar. (604)
12. **marginal cost method** : → *cost 16*
13. **non-coincident peak method** : allocating the demand-related costs to consumer classes in proportion to the class maximum demands regardless of time of occurrence with respect either to one another or to the system peak demand. ★ méthode des pointes non coïncidentes → *méthode 33.* R метод распределения затрат при несовпадении с пиком нагрузки. D Verteilung der leistungsabhängigen Kosten nach Abnehmergruppen. E método de las puntas no coincidentes. I metodo delle punte non coincidenti. N toerekening naar het aandeel in de maximale belasting van groepen van verbruikers. P metoda podziału kosztów przy udziale w obciążeniu pozaszczytowym. S maximieffektmetod. (691)
14. **null (method of) measurement** : → *measurement 9*
15. **peak responsibility method** : → *responsibility 2*
16. **practical test method** (*Syn.* alternative test method) : → *method 1*
17. **reference test method** (for optical fibres) (*Syn.* RTM (abbreviation)) : a test method, in which a given characteristic of a specified class of optical fibres or optical cables (and associated components) is measured, strictly according to the definition of this characteristic, and which gives results that are accurate, reproducible and relatable to practical use. ★ méthode de mesure de référence → *méthode 18.* R стандартный метод испытаний (для оптических волокон). D Referenz-Testmethode. E método de medida de referencia (para fibras ópticas); RTM (abreviatura). I metodo di misura di riferimento. N referentietestmethode (voor optische vezels); RTM (afkorting). P metoda wzorcowa pomiaru (światłowodu). S referensmätmetod. (731)

18. **reference-value method** : a mode of reproducing a unit of measurement (or a multiple or sub-multiple of that unit) either in terms of fixed values of certain properties of bodies or in terms of physical constants. ★ méthode étalon → *méthode 35.* R эталонный метод. D Referenzwert-Methode. E método patrón. I metodo campione. N ijkmethode. P metoda etalonowa. S referensvärdesmetod. (301)
19. **refracted near-field method** (*Syn.* refracted ray method) : the technique for measuring the refractive index profile of an optical fibre by scanning the entrance face with the vertex of a high numerical aperture cone of monochromatic light and measuring the change in power of refracted rays. ★ méthode (d'exploration) du champ réfracté proche → *méthode 34.* R метод преломленного ближнего поля; метод преломленных лучей. D Nahfeld-Brechungsmethode; Strahlenbrechungsmethode. E método de campo cercano refractado; método de rayo refractado. I metodo del campo vicino rifratto. N gebroken nabijveld-methode; gebroken-(licht)straalmethode. P metoda promienia załamanego. S refraktiv närfältsmetod. (731)
20. **refracted ray method** (*Syn.* refracted near-field method) : → *method 19*
21. **resonance method (of measurement)** : a method of measurement by comparison in which a known relationship between the compared values of a particular quantity is established by means of the attainment of a condition of resonance or near-resonance. ★ méthode de (mesurage par) résonance → *méthode 15.* R резонансный метод измерений. D Resonanzmessverfahren. E método de medida por resonancia; método (de medición) por resonancia. I metodo di risonanza. N resonantiemethode. P metoda pomiarowa rezonansowa. S resonansmätmetod. (301)
22. **rubber gloves method** (*Syn.* insulated gloves method) : → *method 11*
23. **single-signal method** : a method of measurement in which the response of a receiver to an unwanted signal is measured in the absence of the wanted signal. ★ méthode à signal unique → *méthode 3.* R односигнальный метод. D Einzelsignal-Methode. E método de señal única. I metodo a segnale unico. N enkelsignaalmethode. P metoda jednosygnałowa. S ensignalmetod. (161)
24. **substitution (method of) measurement** : → *measurement 12*
25. **terminal connection method** (in telex) : the characteristics of the interface between a telex subscriber's line and a subscriber serving exchange. ★ mode de raccordement → *mode 41.* R метод подключения оконечной установки (в службе телекс). D Anschlußart (Telex). E modo de conexión (en télex). I connessione d'utente. N aansluitmethode (bij telex). P sposób dołączenia (w teleksie). S terminalanslutningsmetod. (721)
26. **two-control-point method** : a method of determining the basic MUF based only on the properties of the ionosphere at two control points determined by the positions of the transmission and reception stations. ★ méthode des deux points directeurs → *méthode 32.* D Zwei-Kontrollpunkte-Methode. P metoda dwóch punktów kontrolnych. (705)
27. **two-signal method** : a method of measurement that determines the response of a receiver to an unwanted signal in the presence of the wanted signal. *Note.* — For this method, the detailed test procedure and the criterion to use must be defined for each type of receiver tested. ★ méthode à deux signaux → *méthode 2.* R двухсигнальный метод. D Doppelsignal-Methode. E método de dos señales. I metodo a due segnali. N twee-signaalmethode. P metoda dwusygnałowa. S tvåsignalmetod. (161)

metre

1. **candela per square metre** : → *candela 2*
2. **maximum concentrated weight per metre** : → *weight 3*
3. **roentgen-per-hour at one metre** : → *roentgen-per-hour 1*
4. **weight per metre run between outer axles** : → *weight 5*
5. **weight per metre run over buffers** : → *weight 6*

MHD

1. **MHD power station** (*Syn.* magneto-hydro-dynamic thermal power station) : → *power station 9*

MIC

1. **MIC** (*Syn.* minimum igniting current) : → *current 131*

mica

1. **block mica** : a knife-trimmed mica of a specified minimum thickness, typically about 200 μm. ★ mica bloc → *mica 4.* R колотая слюда. D Blockglimmer. E bloque de mica. I mica in blocchi. N micaplaatje. P mika blokowa. S blockglimmer. (212)
2. **built-up mica** : one or more layers of mica splittings bonded together with a suitable binder. ★ mica aggloméré → *mica 3.* R миканит. D Spaltglimmererzeugnis. E mica aglomerada. I mica agglomerata. N micaniet. P mika aglomerowana. S uppbyggt glimmer. (212)
3. **commutator mica material** : → *material 10*
4. **flexible mica material** : → *material 14*
5. **heat bondable mica material** : → *material 17*
6. **heater plate mica** : hard built-up mica or treated mica paper used as a base for heating elements. ★ micanite chauffage → *micanite 1.* R прокладочный слюдосодержащий материал для нагревательных элементов. D Heizmikanit. E micanita para calefacción. I lastra a base mica per riscaldamento. N mica voor verwarmingstoestellen. P mikanit grzejnikowy. S värmemikanit. (212)
7. **mica** : crystalline double silicates of which two main types are used for electrical purposes, namely : 1. Muscovite (aluminium-potash mica), which is relatively hard. 2. Phlogopite (aluminium-magnesium-potash mica), which is relatively soft. ★ mica → *mica 2.* R слюда. D Glimmer. E mica. I mica. N mica. P mika. S glimmer. (212)
8. **mica paper** : → *paper 13*
9. **mica splitting** : → *splitting 1*
10. **moulding mica material** : → *material 31*
11. **rigid mica material** : → *material 36*
12. **synthetic mica** : an artificially produced material having essentially the same composition and structure as natural mica. ★ mica synthétique → *mica 5.* R синтетическая слюда. D synthetischer Glimmer. E mica sintética. I mica sintetica. N synthetisch mica. P mika syntetyczna. S syntetglimmer. (212)
13. **treated mica paper** : → *paper 18*

micro-alloy

1. **micro-alloy technique** : → *technique 13*

microassembly

1. **microassembly** : a microcircuit consisting of various components and integrated microcircuits which are constructed separately and may be tested separately before being assembled and sealed. *Note.* — For this definition, a component has external connections and possibly an envelope as well and it also can be considered as a separate item. ★ microassemblage → *microassemblage 1.* R микроблок. D zusammengesetzte Mikroschaltung (Mikrobaustein). E microconjunto. I microassemblaggio. N ..... P zespół mikroukładów scalonych. S komponentblock. (521)

microbend

1. **microbend loss** : → *loss 65*

microbending

1. **microbending** : sharp curvatures of an optical fibre involving local axial displacement of the order of a few micrometers and spatial wavelengths of the order of a few millimetres. *Note.* — Such bends may result from fibre coating, cabling, packaging, installation etc. ★ microcourbures → *microcourbure 2.* R микроизгиб. D Mikrokrümmung. E microcurvaturas. I microcurvature. N het optreden van microbochten. P mikrozgięcie. S mikroböjning. (731)

microcircuit

1. **integrated microcircuit** : a microcircuit in which a number of circuit elements are inseparably associated and electrically interconnected such that, for the purpose of specification, testing, application and maintenance, it is considered indivisible. *Notes. 1* — For this definition, a "circuit element" does not have an envelope or external connection and is not specified or sold as a separate item. *2* — When no misunderstanding can occur the term may be abbreviated to "integrated circuit". ★ microcircuit intégré → *microcircuit 1.* R интегральная микросхема. D integrierte Mikroschaltung. E microcircuito

integrado. I microcircuito integrato. N geïntegreerde schakeling. P mikroukład scalony. S integrerad mikrokrets. (521)

2. **microcircuit** : a miniaturized device having a high concentration of circuit elements and components and considered as a single unit. ★ microstructure → *microstructure 1.* R микросхема. D Mikroschaltung. E microcircuito. I microcircuito. N geïntegreerde schakeling. P mikroukład. S mikrokrets. (521)

microdosimetry

1. **microdosimetry** : experimental or theoretical investigation of the microdistribution of absorbed energy, especially in biological matter. ★ microdosimétrie → *microdosimétrie 1.* R микродозиметрия. D Mikrodosimetrie. E microdosimetría. I microdosimetria. N microdosimetrie. P mikrodozymetria. S mikrodosimetri. (881)

microelectronics

1. **microelectronics** : construction and use of highly miniaturized electronic circuits. ★ microélectronique → *microélectronique 1.* R микроэлектроника. D Mikroelektronik. E microelectrónica. I microelettronica. N micro-elektronica. P mikroelektronika. S mikroelektronik. (521)

microgroove

1. **microgroove** (*Syn.* fine groove) : a groove of small depth and width, normally less than 0.12 mm in width. ★ microsillon → *microsillon 1.* R узкая канавка. D Mikrorille. E microsurco. I microsolco. N minigroef. P rowek drobny; mikrorowek. S mikrospår. (806)

microinstruction

1. **microinstruction** : an instruction of a microprogram. ★ micro-instruction → *micro-instruction 1.* R микрокоманда. D Mikroinstruktion; Mikrobefehl. E microinstrucción. I microdistribuzione. N microinstructie. P mikroinstrukcja. S mikroinstruktion. (714)

microphone

1. **anti-noise microphone** (*Syn.* noise-cancelling microphone) : microphone that discriminates against ambient noise from certain directions or distances. ★ microphone antibruit → *microphone 14.* R микрофон с шумоподавлением. D Mikrofon mit Störschallunterdruckung. E micrófono antirruidos. I microfono antirumore. N ..... P mikrofon przeciwhałasowy. S bullerokänslig mikrofon. (801)
2. **bone-conduction microphone** : microphone actuated by contact with the cranial bone. ★ microphone à conduction osseuse → *microphone 7.* R микрофон костной проводимости; остеофон. D Knochenleitungs-Mikrofon. E micrófono de conduccion ósea. I microfono per via ossea; osteofono. N botgeleidingmicrofoon. P mikrofon dotykowry kostny. S benledningsmikrofon. (801)
3. **capacitor microphone** (*Syn.* electrostatic microphone) : → *microphone 13*
4. **capsule (telephone) microphone** (*Syn.* (telephone) microphone) : → *microphone 34*
5. **carbon microphone** (*Syn.* carbon (telephone) transmitter) : → *transmitter 5*
6. **close-talking microphone** : microphone designed particularly for use close to the mouth of the talker. ★ microphone de proximité → *microphone 17.* R микрофон ближнего действия. D Nahbesprechungs-Mikrofon. E micrófono inmediato. I microfono di bocca. N microfoon voor dichtbijbespreking. P mikrofon przyustny. S närmikrofon. (801)
7. **condenser microphone** (*Syn.* electrostatic microphone) : → *microphone 13*
8. **directional microphone** : microphone the response of which is dependent on the direction of sound incidence. ★ microphone directionnel → *microphone 18.* R направленный микрофон. D Richtmikrofon. E micrófono direccional. I microfono direttivo. N richtinggevoelige microfoon. P mikrofon kierunkowy. S riktmikrofon. (801)
9. **electret microphone** : electrostatic microphone in which the electrostatic field results from an internal permanent charge in one of the capacitor electrodes. ★ microphone à électret → *microphone 8.* R электретный микрофон. D Elektretmikrofon. E micrófono de electretes. I microfono a elettrete. N elektretmicrofoon. P mikrofon elektretowy. S elektretmikrofon. (801)
10. **electrodynamic microphone** (*Syn.* moving-conductor microphone) : → *microphone 24*
11. **electromagnetic microphone** : microphone that operates by variation of the reluctance of a magnetic circuit. ★ microphone électromagnétique → *microphone 20.* R электромагнитный микрофон. D elektromagnetisches Mikrofon. E micrófono electromagnético. I microfono elettromagnetico. N elektromagnetische microfoon. P mikrofon elektromagnetyczny. S elektromagnetisk mikrofon. (801)
12. **electronic microphone** : microphone that operates by variations of electronic flux by the motion of one of the electrodes of a vacuum tube or a transistor. ★ microphone électronique → *microphone 21.* R электронный микрофон. D elektronisches Mikrofon. E micrófono electrónico. I microfono elettronico. N elektronische microfoon. P mikrofon elektronowy. S elektronisk mikrofon. (801)
13. **electrostatic microphone** (*Syn.* capacitor microphone; condenser microphone) : microphone that operates by variation of electrical capacitance. ★ microphone électrostatique → *microphone 22.* R электростатический микрофон; емкостной микрофон; конденсаторный микрофон. D elektrostatisches Mikrofon; Kondensatormikrofon. E micrófono electrostático; microfono de condensador. I microfono elettrostatico; microfono a condensatore. N condensatormicrofoon. P mikrofon elektrostatyczny; mikrofon pojemnościowy. S kondensatormikrofon. (801)
14. **hot-wire microphone** (*Syn.* thermal microphone) : → *microphone 35*
15. **ionic microphone** : microphone that operates by the interaction between an ionic plasma and the surrounding air. ★ microphone ionique → *microphone 25.* R ионный микрофон. D Ionenmikrofon; ionisches Mikrofon. E micrófono iónico. I microfono ionico. N ionenmicrofoon. P mikrofon jonowy. S jonmikrofon. (801)
16. **lapel microphone** : microphone designed for positioning on the clothing of the user. ★ microphone de boutonnière → *microphone 15.* R петличный микрофон. D Knopflochmikrofon. E micrófono de solapa. I microfono da risvolto. N knoopsgatmicrofoon. P mikrofon butonierkowy. S rockslagmikrofon. (801)
17. **line microphone** : directional microphone consisting of an array of transducing elements arranged in a straight line, or the acoustic equivalent of such an array. ★ microphone en ligne → *microphone 23.* R линейный микрофон. D Linienmikrofon. E micrófono alineado. I microfono a linea. N lijnmicrofoon. P mikrofon rzędowy. S radmikrofon. (801)
18. **lip microphone** : microphone designed for use in contact with the lips of the talker. ★ microphone labial → *microphone 26.* R губной микрофон. D Lippenmikrofon. E micrófono labial. I microfono labiale. N lipmicrofoon. P mikrofon wargowy. S läppmikrofon. (801)
19. **magnetostriction microphone** : microphone that operates by the magnetostrictive properties of a material. ★ microphone à magnétostriction → *microphone 11.* R магнитострикционный микрофон. D magnetostriktives Mikrofon. E micrófono de magnetostricción. I microfono magnetostrittivo. N magnetostrictiemicrofoon. P mikrofon magnetostrykcyjny. S magnetostriktiv mikrofon. (801)
20. **mask microphone** : microphone designed for use inside a respiratory mask. ★ microphone de masque → *microphone 16.* R масочный микрофон. D Maskenmikrofon. E micrófono de careta. I microfono da maschera. N maskermicrofoon. P mikrofon maskowy. S maskmikrofon. (801)
21. **microphone** (*Syn.* (telephone) transmitter) : → *transmitter 17*
22. **microphone** : electroacoustical transducer by which electrical signals are obtained from acoustical oscillations. ★ microphone → *microphone 2.* R микрофон. D Mikrofon. E micrófono. I microfono. N microfoon. P mikrofon. S mikrofon. (801)
23. **moving-coil microphone** : moving-conductor microphone in which the conductor has the form of a coil. ★ microphone à bobine mobile → *microphone 3.* R катушечный микрофон. D Tauchspulmikrofon. E micrófono de bobina móvil. I microfono a bobina mobile. N spoelmicrofoon; trilspoelmicrofoon. P mikrofon cewkowy. S spolmikrofon. (801)

24. **moving-conductor microphone** (*Syn.* electrodynamic microphone) : microphone that operates by generation of an electromotive force in a conductor moving in a magnetic field. ★ microphone à conducteur mobile → *microphone 6.* R электродинамический микрофон. D elektrodynamisches Mikrofon. E micrófono de conductor móvil; micrófono electrodinámico. I microfono a conduttore mobile; microfono elettrodinamico. N elektrodynamische microfoon. P mikrofon magnetoelektryczny. S elektrodynamisk mikrofon. (801)
25. **multiple microphone** : device containing two or more associated microphones in order to obtain directional effects. ★ microphone multiple → *microphone 27.* R комбинированный микрофон. D Mehrfachmikrofon. E microfono múltiple. I microfono multiplo; sistema di microfoni. N samengestelde microfoon. P mikrofon złożony; zestaw mikrofonowy. S ..... (801)
26. **noise-cancelling microphone** (*Syn.* anti-noise microphone) : → *microphone 1*
27. **omnidirectional microphone** : microphone the response of which is substantially independent of the direction of sound incidence. ★ microphone omnidirectionnel → *microphone 28.* R ненаправленный микрофон. D ungerichtetes Mikrofon. E micrófono omnidireccional. I microfono omnidirettivo. N rondommicrofoon; microfoon met alzijdige gevoeligheid. P mikrofon wszechkierunkowy. S allriktningsmikrofon; kulmikrofon. (801)
28. **piezoelectric microphone** : microphone that operates by the piezoelectric properties of a material. ★ microphone piézoélectrique → *microphone 29.* R пьезоэлектрический микрофон. D piezoelektrisches Mikrofon. E micrófono piezoeléctrico. I microfono piezoelettrico. N piëzo-elektrische microfoon. P mikrofon piezoelektryczny. S piezoelektrisk mikrofon. (801)
29. **pressure microphone** : microphone that responds substantially to sound pressure. ★ microphone à pression → *microphone 12.* R микрофон-приемник давления. D Druckmikrofon. E micrófono de presión. I microfono a pressione. N drukmicrofoon. P mikrofon ciśnieniowy. S tryckmikrofon. (801)
30. **pressure-gradient microphone** : microphone that responds substantially to the gradient of the sound pressure. ★ microphone à gradient de pression → *microphone 10.* R микрофон-приемник градиента давления. D Druckgradientenmikrophon. E micrófono a gradiente de presión. I microfono a gradiente di pressione. N drukgradiëntmicrofoon. P mikrofon gradientowy. S tryckgradientmikrofon. (801)
31. **probe microphone** : microphone adapted to explore a sound field without significantly disturbing it. ★ microphone sonde → *microphone 30.* R акустический зонд. D Sondenmikrofon. E micrófono sonda; sonda microfónica. I microfono sonda. N sondemicrofoon. P mikrofon sondujący; sonda mikrofonowa. S sondmikrofon. (801)
32. **ribbon microphone** : moving-conductor microphone in which the conductor is a thin ribbon and is driven directly by the sound waves. ★ microphone à ruban → *microphone 13.* R ленточный микрофон. D Bändchenmikrofon. E micrófono de cinta. I microfono a nastro. N bandmicrofoon. P mikrofon wstęgowy. S bandmikrofon. (801)
33. **standard microphone** : microphone whose response is determined accurately by means of a primary calibration method. ★ microphone étalon → *microphone 24.* R образцовый микрофон. D Standard-Mikrofon. E micrófono patrón. I microfono campione. N standaardmicrofoon. P mikrofon wzorcowy. S standard-mikrofon. (801)
34. **(telephone) microphone** (*Syn.* capsule (telephone) microphone) : microphone for use in a telephone system. ★ microphone (téléphonique) → *microphone 31.* R микрофон телефонного аппарата; капсюльный микрофон. D Sprechkapsel. E micrófono telefónico; cápsula telefónica. I microfono telefonico; capsula microfonica. N microfoon van telefoontoestel. P mikrofon telefoniczny; wkładka mikrofonowa. S telefonimikrofon. (801)
35. **thermal microphone** (*Syn.* hot-wire microphone) : microphone that operates by change in resistance of a hot wire produced by the cooling or heating effects of a sound wave. ★ microphone thermique → *microphone 32.* R термомикрофон; микрофон с нагретым проводником. D thermisches Mikrofon; Hitzdrahtmikrofon. E micrófono térmico; microfónó de hilo caliente o caldeado. I microfono termico; microfono a filo caldo. N thermomicrofoon. P mikrofon cieplny. S varmtrådsmikrofon. (801)
