36. **throat microphone** : microphone actuated by contact with the throat close to the larynx. ★ laryngophone → *laryngophone 1.* R ларингофон. D Kehlkopfmikrofon. E laringófono. I laringofono. N keelmicrofoon. P mikrofon krtaniowy; laryngofon. S strupmikrofon. (801)
37. **unidirectional microphone** : directional microphone the response of which has a prominent maximum for one direction of the sound wave. ★ microphone unidirectionnel → *microphone 33.* R однонаправленный микрофон. D Richtmikrofon. E micrófono unidireccional. I microfono unidirettivo. N éénzijdig gevoelige microfoon. P mikrofon jednokierunkowy. S ensidig riktmikrofon. (801)

microphonic

1. **microphonic effect** (*Syn.* microphony) : → *microphony 1*
2. **microphonics** (*Syn.* microphony) : noise produced in equipment as a result of mechanical shock or vibration. ★ bruit microphonique → *bruit 50.* R микрофонный эффект. D Mikrofonismus; Mikrofonie. E ruido microfónico. I rumore microfonico. N microfonische ruis. P mikrofonowanie. S mikrofoni. (702)

microphony

1. **microphony** (*Syn.* microphonic effect) : undesired modulation of one or more electrode currents, caused by movement or deformation of one or more tube elements. ★ microphonie → *microphonie 1.* R микрофонный эффект. D Mikrophonie. E microfonía; efecto microfónico. I effetto microfonico. N microfonie. P mikrofonowanie. S mikrofoni. (531)
2. **microphony** (*Syn.* microphonics) : → *microphonic 2*

microprogram

1. **microprogram** : a sequence of elementary instructions that corresponds to a specific computer operation, that is maintained in special storage and whose execution is initiated by the introduction of a computer instruction into an instruction register of a computer. ★ microprogramme → *microprogramme 1.* R микропрограмма. D Mikroprogramm. E microprograma. I microprogramma. N microprogramma. P mikroprogram. S mikroprogram. (714)

microradiography

1. **microradiography** : radiography of small objects or fine structure with a view to subsequent optical enlargement of the radiograph. ★ microradiographie → *microradiographie 1.* R микрорадиография. D Mikroradiographie. E microrradiografía. I microradiografia. N microradiografie. P mikroradiografia. S mikroradiografi. (881)

microscopic

1. **microscopic cross-section** : → *cross-section 19*

microscopy

1. **axial interference microscopy** (*Syn.* slab interferometry) : → *interferometry 2*

microstrip

1. **microstrip** : a transmission line consisting of a conducting strip and a parallel extended conducting surface bonded to opposite sides of a thin dielectric substrate. ★ (ligne à) microruban → *microruban 2.* R несимметричная полосковая линия. D Mikrostreifenleitung. E microcinta. I linea a microstriscia. N strokengolfgeleider; microstriplijn. P mikrolinia. S mikrostrip. (726)
2. **microstrip antenna** : → *antenna 75*

microtron

1. **microtron** : an electron accelerator in which the electrons are guided in circular orbits tangential to each other (at one point) and of increasing radii under the influence of a constant magnetic field ; they are accelerated at the beginning of each orbit by traversing a cavity resonator in which there is a radio -frequency electric field. ★ microtron → *microtron 1.* R микротрон. D Mikrotron. E microtrón. I microtrone. N microtron. P mikrotron. S mikrotron. (881)

microwave

1. **microwave applicator** : → *applicator 2*
2. **microwave emitter** : → *emitter 12*
3. **microwave gyrator** : → *gyrator 3*
4. **microwave heating** : → *heating 45*
5. **microwave heating equipment** : → *equipment 51*
6. **(microwave) isolator** : → *isolator 6*
7. **microwave oven** : → *oven 5*
8. **microwave pilot protection system** : → *system 116*
9. **(microwave) power meter** : → *meter 34*

mid-band

1. **mid-band frequency** : → *frequency 130*

mid-span

1. **mid-span tension joint** : → *joint 17*

MIG

1. **MIG/MAG gun** : → *gun 11*
2. **MIG/MAG torch** (*Syn.* MIG/MAG gun) : → *gun 11*

migration

1. **(electrochemical) migration** : the transport of charged particles due to the effects of an electric field. ★ migration (électrochimique) → *migration 4.* R (электрохимическая) миграция. D (elektrochemische) Migration. E migración (electroquímica). I migrazione (elettrochimica). N (elektrochemische) migratie. P migracja (elektrochemiczna). S elektrokemisk diffusion. (111)
2. **migration** (of plasticizer) : the transfer, usually undesirable, of a plasticizer from a plastic or elastomeric body to other contacting solids. ★ migration → *migration 3.* R миграция пластификатора. D Weichmacherwanderung. E migración (de un plastificante). I migrazione (di plastificanti). N migratie. P migracja (zmiękczacza). S migrering. (212)
3. **migration area** : → *area 27*
4. **migration length** : → *length 23*

milliampere

1. **milliampere second** (mAs) : a unit of electric charge equal to one millicoulomb. *Note.* — The mAs is commonly used as a unit to measure the product of average X-ray tube current and exposure time, particularly in radiography. ★ milliampère-seconde → *milliampère-seconde 1.* R миллиампер-секунда. D Milliampere-Sekunde. E miliamperio-segundo. I milliampere-secondo. N milliampere seconde. P miliamperosekunda. S milliamperesekund. (881)

milliken

1. **milliken conductor** : → *conductor 48*

mimic

1. **mimic diagram** : → *diagram 13*

mine

1. **mine locomotive** : → *locomotive 7*
2. **mine luminaire** : → *luminaire 14*
3. **mine rescue luminaire** : → *luminaire 15*
4. **mine safety lamp** : → *lamp 40*
5. **portable mine luminaire** : → *luminaire 20*

miner

1. **miner's (personal) lamp** : → *lamp 41*

mineral

1. **mineral insulating oil** : → *oil 2*
2. **mineral insulation** : → *insulation 43*

minimum

1. **double minimum power points** (*Syn.* twice minimum power points) : → *point 51*
2. **minimum angle of shade** : → *angle 39*
3. **minimum breaking current** : → *current 129*
4. **minimum cathode current** : → *current 130*
5. **minimum demand** : → *demand 19*
6. **minimum erythema dose** : → *dose 36*
7. **minimum field** : → *field 50*
8. **minimum idling speed** : → *speed 26*
9. **minimum igniting current** : → *current 131*
10. **minimum justification ratio** : → *ratio 56*
11. **minimum payment clause** : → *clause 2*
12. **minimum (phase frequency) shift keying** : → *keying 5*
13. **minimum safe output of the unit** : → *output 24*
14. **minimum shielding angle** (*Syn.* minimum angle of shade) : → *angle 39*
15. **minimum source e.m.f.** : → *e.m.f. 4*
16. **minimum stuffing ratio** (*Syn.* minimum justification ratio) : → *ratio 56*
17. **minimum usable erasing time** : → *time 112*
18. **minimum usable field strength** : → *field strength 9*
19. **minimum usable reading speed** : → *speed 27*
20. **minimum voltage** : → *voltage 119*
21. **minimum wavelength** : → *wavelength 10*
22. **radial air-gap (minimum)** : → *air-gap 5*
23. **standing-wave minimum** (*Syn.* node (of a standing wave)) : the location in a propagation medium where the vectorial sum of a specified field quantity of two waves creating a standing wave is a minimum. ★ nœud → *nœud 6.* R минимум стоячей волны; узел (стоячей волны). D Stehwellen-Minimum; Knoten. E nodo (de una onda estacionaria). I nodo (di un'onda stazionaria). N knoop. P minimum fali stojącej; węzeł fali stojącej. S ståendevågminimum. (726)
24. **twice minimum power points** : → *point 51*

minor

1. **minor fault** : → *fault 57*
2. **minor lobe** (*Syn.* secondary lobe) : → *lobe 7*

minority

1. **minority carrier** : → *carrier 22*

minus

1. **minus tapping** : → *tapping 5*

minute

1. **hourly, half-hourly, quarter hourly, *n* minute etc... demand** : → *demand 16*

mirror

1. **dichroic mirror** : a mirror designed to reflect light selectively according to wavelength. ★ miroir dichroïque → *miroir 2.* R дихроичное зеркало. D Spektralspiegel. E espejo dicroico. I specchio dicroico. N dichroïtisch spiegel. P zwierciadło selektywne. S dikroisk spegel. (731)
2. **mirror effect** : → *effect 43*

misalignment

1. **angular misalignment loss** : → *loss 4*
2. **mechanical spot misalignment** (*Syn.* mechanical spot displacement) : → *displacement 8*
3. **misalignment loss** (*Syn.* extrinsic joint loss) : → *loss 29*

misfire

1. **misfire** : a failure to establish a discharge between a main anode and a cathode during an intented conduction period. ★ raté d'allumage → *raté 1.* R пропуски зажигания. D Zündaussetzer. E fallo de encendido. I perdita di innesco. N mislukte ontsteking. P utrata zapłonu. S misständning. (531)

mishandling

1. **mishandling failure** : → *failure 38*
2. **mishandling fault** : → *fault 58*

mismatched

1. **mismatched termination** : → *termination 3*

misoperation

1. **misoperation** (*Syn.* maloperation) : → *maloperation 1*

misregistration

1. **dynamic misregistration** : a misregistration of the primary colour signals from a picture source which changes as a function of the picture content. ★ erreur de superposition dynamique → *erreur 31.* R динамическое рассовмещение. (723)

mistake

1. **dialling mistake probability** : → *probability 5*
2. **mistake** (*Syn.* human error) : a human action that produces an unintended result. ★ erreur (humaine) → *erreur 35.* **R** ошибка; ошибка оператора. **D** Fehlverhalten; menschliches Versagen. **E** error humano. **I** sbaglio; errore umano. **N** vergissing; menselijke fout. **P** pomyłka; błąd człowieka. **S** misstag; handhavandefel. (191)
3. **service user mistake probability** : → *probability 14*

misuse

1. **misuse failure** : → *failure 39*
2. **misuse fault** : → *fault 59*

mix

1. **generation mix forecast** : → *forecast 1*

mixed

1. **mixed dielectric capacitor** : → *capacitor 49*
2. **mixed high frequencies** : → *frequency 132*
3. **mixed phase layout** : → *layout 2*
4. **mixed radiation** : → *radiation 43*
5. **mixed reflection** : → *reflection 13*
6. **mixed transmission** : → *transmission 41*

mixer

1. **balanced mixer** (in a waveguide) : a hybrid junction with crystal diodes in one pair of uncoupled arms, the arms of the remaining pair being fed respectively from a signal source and a local oscillator; the resulting signals from the diodes are added in such a manner that the effects of noises issuing from the crystal mixers are minimized at the common output. ★ mélangeur équilibré → *mélangeur 5.* **R** балансный смеситель (в волноводе). **D** Gegentakt-Mischer (im Hohlleiter). **E** mezclador equilibrado (en una guíaonda). **I** mescolatore equilibrato. **N** balansmengtrap. **P** mieszacz zrównoważony (w falowodzie). **S** balanserad blandare. (726)
2. **crystal mixer** : a crystal diode mount which can be fed simultaneously from a local oscillator and a signal source, to produce a frequency translation on the signal. ★ mélangeur à diodes → *mélangeur 4.* **R** кристаллический смеситель. **D** Kristalldiodenmischer. **E** mezclador de diodos. **I** mescolatore a diodi (semiconduttori). **N** kristalmengtrap. **P** mieszacz diodowy. **S** kristallblandare. (726)
3. **(frequency) mixer** : a non-linear device for producing oscillations having frequencies which are linear combinations of integral multiples of the frequencies of the spectral components of two oscillations or input signals. ★ mélangeur → *mélangeur 2.* **R** (частотный) смеситель. **D** (Frequenz-) Mischer. **E** mezclador (de frecuencias). **I** miscelatore (di frequenza). **N** (frequentie)vermenigvuldiger. **P** mieszacz częstotliwości. **S** blandare. (702)
4. **mixer** : equipment for mixing programme signals. *Examples :* Sound mixer, vision mixer. ★ mélangeur → *mélangeur 3.* **R** микшер. (723)
5. **mixer diode** : → *diode 13*
6. **mixer tube** : → *tube 54*
7. **mode mixer** (*Syn.* mode scrambler) : → *scrambler 1*

mixing

1. **mixing** (in switching) : the intermingling of traffic flowing between concentration and expansion stages, usually through a group selector. ★ brassage → *brassage 1.* **R** смешивание (в коммутации). **D** mischen. **E** mezclado (en conmutación). **I** mischiamento. **N** mengen. **P** mieszanie (w komutacji). **S** blandning. (714)
2. **mixing** (programme signals) : the combination of programme signals from different sources with a view to producing the final programme signal. ★ mélange → *mélange 2.* **R** микширование (программных сигналов). (723)
3. **mixing** : a process for combining several signals appearing simultaneously from several sources into a single signal. ★ mélange → *mélange 3.* **R** микширование. **D** Abmischen. **E** mezcla. **I** miscelamento. **N** mengen. **P** mieszanie. **S** mixning. (806)
4. **mixing console** (*Syn.* mixing desk) : → *desk 2*
5. **mixing desk** : → *desk 2*
6. **mixing ratio** : → *ratio 58*

mixture

1. **additive mixture of colour stimuli** : stimulation that combines on the retina the actions of various colour stimuli in such a manner that they cannot be perceived individually. ★ mélange additif de stimulus de couleur → *mélange 4.* **R** аддитивное смешение цветовых стимулов. **D** additive Farbmischung. **E** mezcla aditiva de estímulos de color. **I** miscela additiva di stimoli di colore. **N** additieve kleurmenging. **P** mieszanina bodźców barwowych addytywna. **S** additiv blandning av färgstimuli. (845)
2. **explosive test mixture** : a specified explosive mixture used for the testing of electrical apparatus for explosive gas atmospheres. ★ mélange explosif d'épreuve → *mélange 5.* **R** взрывоопасная испытательная смесь. **D** explosionsfähiges Prüfgemisch. **E** mezcla explosiva de ensayo. **I** miscela esplosiva di prova. **N** ontplofbaar beproevingsgasmengsel. **P** mieszanina wybuchowa probiercza. **S** explosiv provgasblandning. (426)
3. **most easily ignitable mixture** : a mixture which, under specified conditions, requires the lowest electrical energy for its ignition. ★ mélange le plus facilement inflammable → *mélange 7.* **R** наиболее легко воспламеняемая смесь. **D** zündwilligstes Gemisch. **E** mezcla más fácilmente inflamable. **I** miscela la più facilmente infiammabile. **N** gemakkelijkst ontsteekbaar gasmengsel. **P** mieszanina najłatwiej zapalna. **S** lättast antändliga blandning. (426)
4. **most explosive mixture** : a mixture which, under specified conditions, gives the highest explosion pressure after ignition. ★ mélange le plus explosif → *mélange 6.* **R** наиболее взрывоопасная смесь. **D** explosionsfähigstes Gemisch. **E** mezcla más explosiva. **I** miscela la più esplosiva. **N** gasmengsel met de hoogste ontploffingsgevaar. **P** mieszanina najbardziej wybuchowa. **S** mest explosiva blandning. (426)
5. **most incendive mixture** : a mixture the flame of which, under specified conditions, most easily transmits an ignition through a joint. ★ mélange qui transmet le plus facilement → *mélange 9.* **R** наиболее воспламеняющая смесь. **D** zünddurchschlagfähigstes Gemisch. **E** mezcla más transmisible. **I** miscela a massima trasmissione di fiamma. **N** gasmengsel met de gemakkelijkste vlamdoorslag. **P** mieszanina najłatwiej przenosząca. **S** mest flamspridande blandning. (426)

MLD

1. **MLD** (*Syn.* mean logistic delay) : → *delay 28*
2. **MLD** (*Syn.* median lethal dose) : → *dose 35*

MLT

1. **MLT** (*Syn.* median lethal time) : → *time 108*

mmf

1. **mmf** (*Syn.* magnetomotive force) : → *force 21*

MMH

1. **MMH** (*Syn.* maintenance man-hours) : → *man-hours 1*

MML

1. **MML** (*Syn.* man-machine language) : → *language 7*

mnemonic

1. **mnemonic (abbreviation)** : a representation of an entity by one or more characters, so chosen that the character representation has a relationship to normal language usage such that the name of the entity serves as an aid to the memory of a human operator in remembering the appropriate coded representation used. ★ (abréviation) mnémonique → *mnémonique 1.* **R** мнемоническая схема /аббревиатура/. **D** mnemonisch. **E** (abreviación) mnemónica. **I** (codice) mnemonico. **N** mnemonic. **P** mnemonik; skrótowiec. **S** memosymbol. (714)

mobile

1. **mobile substation** : → *substation 15*
2. **mobile X-ray generator** : → *generator 24*

mobility

1. **(drift) mobility** (of a charge carrier) : a quantity equal to the quotient of the modulus of the mean velocity of a charge carrier in the direction of an electric field by the modulus of the field strength. ★ mobilité → *mobilité 1.* **R** дрейфовая подвижность (носителя заряда). **D** Driftbeweglichkeit (eines

Ladungsträgers). E movilidad (de un portador de carga). I mobilità (di un portatore di carica). N driftbeweeglijkheid (van een ladingdrager). P ruchliwość (nośnika ładunku). S driftrörlighet. (111,391,521,881)

2. **Hall mobility** (μ_H) : the product of the Hall coefficient and the electric conductivity. ★ mobilité de Hall → *mobilité 2.* R холловская подвижность. D Hallbeweglichkeit. E movilidad de Hall. I mobilità di Hall. N Hallbeweeglijkheid. P ruchliwość Halla. S hallmobilitet. (521)

modal

1. **modal distortion** : → *distortion 53*
2. **modal noise** : → *noise 41*
3. **modal numbers** : → *number 16*

mode

1. **bound mode** : in an optical fibre, a mode whose field decays monotonically in the transverse direction everywhere external to the core and which does not lose power to radiation. *Notes. 1* — Where the refractive index decreases with distance from the axis and where there is no central refractive index dip a bound mode is one for which :

$$n(a)\,k < \beta < n(0)\,k$$

where β is the imaginary part (phase coefficient) of the axial propagation coefficient, $n(a)$ is the refractive index at $r = a$, the radius, $n(0)$ is the refractive index at $r = 0$, k is the angular free space wavenumber $2\pi/\lambda$ and λ is the wavelength. *2* — Bound modes correspond to guided light rays in the terminology of geometric optics. *3* — In a multimode fibre, the power in bound modes is predominantly contained in the core of the fibre. ★ mode lié → *mode 70.* R предельная мода. D geführte Mode. E modo guiado. I modo guidato. N gebonden modus. P mod graniczny. S bunden mod. (731)

2. **cavity mode** (*Syn.* mode of resonance) : → *mode 57*
3. **cladding mode** : a mode in which the electromagnetic field is confined in the cladding and the core by virtue of there being a lower refractive index medium surrounding the outermost cladding. ★ mode de gaine → *mode 34.* R оболочечная мода. D Mantelmode. E modo de revestimiento. I modo guidato nel mantello. N mantelmodus. P mod płaszczowy. S mantelmod. (731)
4. **cladding mode stripper** : → *stripper 1*
5. **common mode conversion** : → *conversion 5*
6. **common mode failure** : → *failure 5*
7. **common mode rejection ratio** : → *ratio 15*
8. **common mode voltage** : → *voltage 30*
9. **common mode voltage** : → *voltage 31*
10. **conversational mode** : a mode of operation of a data processing system in which a sequence of alternating entries and responses between a user and the system takes place in a manner similar to a dialogue between two persons. ★ mode dialogué → *mode 54.* R диалоговый режим; разговорный режим. D Dialogbetrieb; Dialogmodus. E modo de conversación. I modo conversazionale. N dialoogvorm. P system dialogowy; rodzaj operacji dialogowy. S dialog; interaktivt arbetssätt. (714)
11. **coupled modes** : modes of oscillation which are not independent but influenced by the transfer of energy from one mode to the other. ★ modes couplés → *mode 92.* R связанные моды. D gekoppelte Schwingungsmoden. E modos acoplados. I modi accoppiati. N gekoppelde trillingswijzen. P drgania sprzężone. S kopplade moder. (731,801)
12. **cut-off frequency (for a mode)** : → *frequency 29*
13. **degenerate mode** (in a uniform transmission line) : one of a set of modes of propagation having the same exponential variation of the field components along the longitudinal axis of a uniform transmission line, but having different configurations in any transverse cross-section. ★ mode dégénéré → *mode 49.* R вырожденный тип колебаний (в однородной линии передачи). D entarteter Mode (in einer homogenen Übertragungsleitung). E modo degenerado (en una línea de transmisión uniforme). I modo degenere (in una linea di trasmissione uniforme). N ontaarde modus (in een uniforme transmissielijn). P rodzaj zdegenerowany pola (w jednorodnej linii przesyłowej). S degenererad mod i vågledare. (726)
14. **degenerate mode** (in a cavity resonator) : one of set of modes of resonance having the same natural frequency. ★ mode dégénéré → *mode 50.* R вырожденный тип колебаний (в объемном резонаторе). D entarteter Mode (im Hohlresonator). E modo degenerado (en una cavidad resonante). I modo degenere (in una cavità). N ontaarde modus (in een trilholte). P rodzaj zdegenerowany pola (w rezonatorze wnękowym). S degenererad mod i rumsresonator. (726)
15. **delay mode of operation** : a mode of operation in which a bid is allowed to wait when no suitable free resource is immediately found. ★ mode d'exploitation avec attente → *mode 52.* D Wartezeitbetrieb. P ruch z oczekiwaniem. (715)
16. **differential mode attenuation** : → *attenuation 16*
17. **differential mode delay** : → *delay 16*
18. **differential mode voltage** : → *voltage 47*
19. **dominant mode** (in a waveguide) : the mode of propagation which has the lowest critical frequency in a given uniform waveguide. ★ mode fondamental → *mode 67.* R основной тип колебаний (в волноводе). D Haupt-Mode (im Hohlleiter). E modo dominante (en una guíaonda). I modo fondamentale (in una guida d'onda); modo dominante (in una guida d'onda). N dominante modus. P rodzaj podstawowy pola (w falowodzie). S grundmod. (726)
20. **effective mode volume** : → *volume 5*
21. **(electromagnetic) mode** : one solution of Maxwell's equations representing an electromagnetic field in a certain space domain and belonging to a family of independent solutions defined by specified boundary conditions. ★ mode (électromagnétique) → *mode 61.* D (elektromagnetischer) Mode; Wellentyp. P rodzaj pola elektromagnetycznego. (705)
22. **(electromagnetic) mode** : each of the possible configurations of the electromagnetic field in a given domain of space of specified electromagnetic characteristics. ★ mode (électromagnétique) → *mode 62.* R тип (электромагнитных) колебаний. D (elektromagnetischer) Mode; Wellentyp; Schwingungstyp. E modo (electromagnético). I modo (elettromagnetico). N (elektromagnetische) modus. P rodzaj pola (elektromagnetycznego). S mod. (726)
23. **equilibrium mode distribution** : → *distribution 25*
24. **equilibrium mode distribution length** (*Syn.* equilibrium length) : → *length 13*
25. **evanescent mode** (*Syn.* evanescent field) : → *field 9*
26. **evanescent mode** (in a waveguide) : a mode characterizing the electromagnetic field in a waveguide when the applied wavelength is longer than the critical wavelength. ★ mode évanescent → *mode 66.* R затухающий тип колебаний (в волноводе). D nichtausbreitungsfähiger Mode (im Wellenleiter). E modo evanescente (en una guíaonda). I modo evanescente (in una guida d'onda). N uitgedempte modus. P rodzaj pola nadkrytyczny (w falowodzie). S avklingningsmod. (726)
27. **fault mode** : one of the possible states of a faulty item, for a given required function. *Note.* — The use of the term "failure mode" in this sense is now deprecated. ★ mode de panne → *mode 36.* R вид (существенной) неисправности; признак (существенной) неисправности. D Art des Fehlzustands. E modo de avería. I modo di avaria. N defect modus. P rodzaj niezdatności. S felmod. (191)
28. **fault modes and effects analysis** : → *analysis 6*
29. **fault modes, effects and criticality analysis** : → *analysis 7*
30. **functional mode** : a subset of the whole set of possible functions of an item. ★ mode de fonctionnement → *mode 31.* R вид функционирования. D Funktionsart. E modo de funcionamiento. I modo funzionale. N functionele modus. P funkcje obiektu. S funktionssätt. (191)
31. **fundamental mode of oscillation** : mode of oscillation of a system having the lowest natural frequency. ★ mode propre fondamental → *mode 78.* R основная мода колебаний. D Grundschwingungsform. E modo fundamental de oscilación. I modo fondamentale di vibrazione. N grondtrillingswijze. P drganie podstawowe. S grundsvängning; fundamentalt svängningssätt. (801)
32. **hybrid mode** : a mode possessing components of both electric and magnetic field vectors in the direction of propagation. *Note.* — Such modes correspond to skew (non-meridional) rays. ★ mode hybride → *mode 69.* R гибридная мода. D Hybrid-Mode. E modo híbrido. I modo ibrido; modo HE/EH. N hybride modus. P mod hybrydowy. S hybridmod. (726,731)
33. **hybrid mode horn** : → *horn 14*
34. **leaky mode** (*Syn.* tunnelling mode) : in an optical fibre, a mode which has an evanescent field in the transverse direction external to the core for a finite distance but which conveys power

in a transverse direction everywhere beyond that distance. *Note.* — Leaky modes correspond to leaky rays. ★ mode de fuite → *mode 33.* R мода утечки. D Leckmode; Tunnelmode. E modo disperso; modo túnel. I modo labile; modo evanescente; modo tunnel. N lekkende modus; tunnelende modus. P mod upływowy; mod wyciekający. S läckmod. (731)

35. **linearly polarised mode** (*Syn.* LP mode) : a mode of a weakly guiding fibre which has linear polarisation and for which the field components in the direction of propagation are small compared to components perpendicular to that direction. ★ mode LP → *mode 71.* R линейно поляризованная мода. D linear polarisierte Mode; LP-Mode. E modo de polarización lineal; modo LP. I modo linearmente polarizzato; modo LP. N lineair gepolariseerd; lineair-gepolariseerde modus. P mod liniowo spolaryzowany; mod LP. S linjärpolariserad mod. (731)
36. **loss mode of operation** : a mode of operation in which a bid is rejected when a suitable free resource is not found immediately. ★ mode d'exploitation avec perte → *mode 53.* D Verlustbetrieb. P ruch ze stratami. (715)
37. **LP mode** (*Syn.* linearly polarised mode) : → *mode 35*
38. **mode** : one solution of Maxwell's equations, representing an electromagnetic field in a certain space domain and belonging to a family of independent solutions defined by specified boundary conditions. ★ mode → *mode 27.* R мода. D Wellentyp; Mode. E modo (electromagnético). I modo. N modus. P mod. S mod. (731)
39. **mode centre** : → *centre 14*
40. **mode conversion** : → *conversion 24*
41. **mode conversion gain** : → *gain 24*
42. **mode conversion loss** : → *loss 67*
43. **mode converter** : → *converter 10*
44. **mode coupling** : → *coupling 33*
45. **mode cut-off frequency** (*Syn.* critical frequency) : → *frequency 25*
46. **mode cut-off wavelength** (*Syn.* critical wavelength) : → *wavelength 3*
47. **mode designation** : → *designation 1*
48. **mode field diameter** : → *diameter 13*
49. **mode filter** : → *filter 29*
50. **mode filter** : → *filter 30*
51. **mode hopping** : → *hopping 1*
52. **mode jumping** (*Syn.* mode hopping) : → *hopping 1*
53. **mode mixer** (*Syn.* mode scrambler) : → *scrambler 1*
54. **mode of oscillation** : characteristic pattern assumed by a vibrating system, in which the motion of every particle is simple harmonic with the same frequency. *Note.* — Two or more modes may exist concurrently in a multiple-degree-of-freedom system. ★ mode d'oscillation → *mode 57.* R мода колебаний. D Schwingungsform. E modo de oscilación; modo de vibración. I modo di vibrazione. N trillingswijze. P rodzaj drgania. S svängningsmod; vibrationsmod; svängningssätt. (801)
55. **mode of propagation** (in ionospheric propagation) : representation of a transmission path by the number of hops between the end points of the path, the ionospheric layers producing the ionospheric reflections being indicated for each hop. *Example :* 1F + 1E represents a hop with ionospheric reflection at a layer of the F region followed by reflection at the ground, followed by a hop with reflection from te E layer. ★ mode de propagation ionosphérique → *mode 39.* D Ausbreitungsart (bei ionosphärischer Ausbreitung). P rodzaj propagacji jonosferycznej. (705)
56. **mode of propagation** (in a transmission line) (*Syn.* transmission mode) : any mode characterizing the electromagnetic field of a travelling wave in a transmission line. ★ mode de propagation → *mode 37.* R тип колебаний распространения (в линии передачи); тип колебаний передачи. D ausbreitungsfähiger Mode (in einer Übertragungsleitung); Übertragungs-Mode. E modo de propagación (en una línea de transmisión). I modo di propagazione (in una linea di trasmissione). N voortplantingsmodus; transmissiemodus. P rodzaj propagacji (w linii przesyłowej). S utbredningsmod. (726)
57. **mode of resonance** (in a cavity resonator) (*Syn.* cavity mode) : a form of free electromagnetic oscillation in a cavity resonator characterized by a particular field configuration. *Note.* — In a waveguide cavity, a mode of resonance having no axial component of the electric or magnetic field is classified as a TE mode or a TM mode respectively; the corresponding transverse field pattern resembles that of a normal mode in the corresponding uniform waveguide. ★ mode de résonance → *mode 43.* R резонансный тип колебаний (в объемном резонаторе); тип колебаний в резонаторе. D Resonanz-Mode (im Hohlraumresonator); Schwingungstyp (im Hohlraumresonator). E modo de resonancia (en una cavidad). I modo di risonanza (in una cavità); modo di cavità. N trilholtemodus. P rodzaj drgań rezonansowych (w rezonatorze mikrofalowym). S resonansmod; svängninstyp. (726)
58. **mode of vibration** : the pattern of motion in a vibrating body resulting from stresses applied to the body, the frequency of oscillation and the existing boundary conditions. *Note.* — The most commonly used modes of vibration are: 1) for crystal vibrators - flexural - twist - extensional - face shear - thickness shear 2) for ceramic vibrators - radial (expander) - thickness shear. ★ mode de vibration → *mode 45.* R мода колебаний. D Schwingungsform. E modo de vibración. I modo di vibrazione. N trillingswijze. P rodzaj drgania. S svängningsmod. (561)
59. **mode scrambler** : → *scrambler 1*
60. **mode stripper** (*Syn.* cladding mode stripper) : → *stripper 1*
61. **mode top** (*Syn.* mode centre) : → *centre 14*
62. **mode volume** : → *volume 6*
63. **non-equilibrium mode distribution** : → *distribution 31*
64. **normal mode** (in a waveguide) : in a lossless waveguide any one of the infinite set of waveguide modes for which the longitudinal component of either the electric field or the magnetic field is zero. ★ mode normal → *mode 76.* R нормальный тип колебаний (в волноводе). D ..... E modo normal (en una guíaonda). I modo normale (in una guida d'onda). N normaalmodus. P rodzaj pola normalny (w falowodzie). S elementarmod. (726)
65. **normal mode of oscillation** : mode of free oscillation of an undamped system. *Note.* — In general, any composite motion of the system is analyzable into a summation of its normal modes, each of which may oscillate entirely independently of the others. ★ mode propre non amorti → *mode 79.* R нормальная мода колебаний. D Eigenschwingungsform. E modo propio no amortiguado. I modo di vibrazione non smorzato. N vrije trillingswijze. P drganie własne nietłumione. S egensvängning; fri svängning. (801)
66. **orthogonal modes** : two modes for which the total power crossing any transverse cross-section is equal to the total flux, through that cross-section, of the sum of the individual Poynting vectors of the modes; in other terms, the total flux across that cross-section, of the sum of the two cross-products

$$\vec{E}_1 \times \vec{H}_2 + \vec{E}_2 \times \vec{H}_1$$

in the total Poynting vector, is zero. ★ modes orthogonaux → *mode 93.* R ортогональные типы колебаний. D orthogonale Moden. E modos ortogonales. I modi ortogonali; polarizzazione incrociata. N orthogonale modi. P rodzaje ortogonalne (pola). S ortogonala moder. (726)
67. **packet mode terminal** : → *terminal 27*
68. **polarization (of a degenerate mode)** : → *polarization 35*
69. **radiation mode** : in an optical fibre, a mode which transfers power in the transverse direction everywhere external to the core and which exists even in the limit of zero wavelength. *Note.* — Radiation modes correspond to refracted rays. ★ mode rayonnant → *mode 80.* R мода излучения. D Strahlungsmode. E modo de radiación. I modo irradiato. N stralingsmodus. P mod radiacyjny. S strålningsmod. (731)
70. **reflection mode filter** : → *filter 34*
71. **resonant mode filter** : → *filter 35*
72. **series mode rejection ratio** : → *ratio 78*
73. **series mode voltage** : → *voltage 189*
74. **stiffened mode (of piezoelectric vibration)** : a mode of vibration in which, in the ideal stiffened mode, the electric field is parallel to the direction of elastic wave motion and influences the pattern of motion through electrical boundary conditions. ★ mode (de vibration piézoélectrique) rigidifié → *mode 48.* R жесткая мода (колебаний пьезоэлектрика). D piezoelektrische versteifte Schwingungsform. E modo (de vibración piezoeléctrica) restringido. I modo (di vibrazione piezoelettrica) rigido. N geklemde wijze van piëzo-elektrische trilling. P drganie (piezoelektryczne) usztywnione. S longitudinell mod. (561)

75. TE mode (*Syn.* transverse electric mode) : a normal mode in which the longitudinal component of the electric field strength vector is everywhere zero and the longitudinal component of the magnetic field vector is not. ★ mode TE → *mode 81.* R волна типа TE; поперечный электрический тип колебаний. D TE-Mode; transversal-elektrischer Mode. E modo TE; modo transversal eléctrico; modo H. I modo TE; modo elettrico (trasverso). N TE-modus. P rodzaj TE pola; pole TE. S TE-mod. (726)

76. TE mode (*Syn.* transverse electric mode) : → *mode 88*

77. TE_{mn} mode (in a waveguide) : a normal mode where the subscripts m and n added to the abbreviations TE are assigned by observing the cross-sectional variation of the transverse electric field vector: 1. In a rectangular waveguide subscripts m and n, in that order, indicate the number of half-period variations of the mainly transverse field vector along paths parallel to the wide and narrow walls respectively. *Note.* — The reverse notation, where the m and n paths are parallel to the narrow and wide walls respectively is deprecated. 2. In a circular waveguide subscript m indicates the number of full-period variations of the transverse field vector along a circular path concentric with the wall, and subscript n indicates the number of reversals of the same vector along a radial path, plus one. ★ mode TE_{mn} → *mode 83.* R тип колебаний TE_{mn} (в волноводе). D TE_{mn}-Mode (im Hohlleiter). E modo TE_{mn} (en una guíaonda). I modo TE_{mn} (in una guida d'onda). N TE_{mn}-modus. P rodzaj TE_{mn} pola (w falowodzie). S TE_{mn}-mod. (726)

78. TE_{mnp} mode (in a waveguide cavity) : a mode of resonance in a uniform waveguide closed by two metal planes perpendicular to the axis, where the subscripts m and n identify a TE mode in the waveguide and p indicates the number of half-period variations for the same vector along the waveguide axis between the two metal planes. ★ mode TE_{mnp} → *mode 84.* R тип колебаний TE_{mnp} (в волноводном резонаторе). D TE_{mnp}-Mode (in einem Hohlleiter-Hohlraum). E modo TE_{mnp} (en una cavidad de guíaonda). I modo TE_{mnp} (in una cavità risonante). N TE_{mnp}-modus. P rodzaj TE_{mnp} pola (w rezonatorze falowodowym). S TE_{mnp}-mod. (726)

79. telex conversation mode : a dialogue between two persons present at telex terminals. ★ conversation télex → *conversation 3.* R режим телексного разговора. D Telex-Dialogbetrieb. E conversación télex. I conversazione telex. N conversatie-telexmodus. P dialog teleksowy. S telexmod. (721)

80. TEM mode (*Syn.* transverse electromagnetic mode) : a mode in which both the longitudinal components of the electric and magnetic field strength vectors are everywhere zero. ★ mode TEM → *mode 85.* R волна типа TEM; поперечный электромагнитный тип колебаний. D TEM-Mode; transversal-elektromagnetischer Mode. E modo TEM; modo transversal electromagnético. I modo TEM; modo elettromagnetico (trasverso); modo elettrico e magnetico trasversale. N TEM-modus. P rodzaj TEM pola; pole TEM. S TEM-mod. (726)

81. TEM mode (*Syn.* transverse electromagnetic mode) : → *mode 90*

82. TM mode (*Syn.* transverse magnetic mode) : a normal mode in which the longitudinal component of the magnetic field strength vector is everywhere zero and the longitudinal component of the electric field vector is not. ★ mode TM → *mode 87.* R волна типа TM (не рекомендуется); поперечный магнитный тип колебаний. D TM-Mode; transversal-magnetischer Mode. E modo TM; modo transversal magnético. I modo TM; modo magnetico (trasversale). N TM-modus. P rodzaj TM pola; pole TM. S TM-mod. (726)

83. TM mode (*Syn.* transverse magnetic mode) : → *mode 92*

84. TM_{mn} mode (in a waveguide) : a normal mode where the subscripts m and n added to the abbreviations TM are assigned by observing the cross-sectional variation of the transverse magnetic field vector: 1. In a rectangular waveguide subscripts m and n, in that order, indicate the number of half-period variations of the mainly transverse field vector along paths parallel to the wide and narrow walls respectively. *Note.* — The reverse notation, where the m and n paths are parallel to the narrow and wide walls respectively is deprecated. 2. In a circular waveguide subscript m indicates the number of full-period variations of the transverse field vector along a circular path concentric with the wall, and subscript n indicates the number of reversals of the same vector along a radial path, plus one. ★ mode TM_{mn} → *mode 89.* R тип колебаний TM_{mn} (в волноводе). D TM_{mn}-Mode (im Hohlleiter). E modo TM_{mn} (en una guíaonda). I modo TM_{mn} (in una guida d'onda). N TM_{mn}-modus. P rodzaj TM_{mn} pola (w falowodzie). S TM_{mn}-mod. (726)

85. TM_{mnp} mode (in a waveguide cavity) : a mode of resonance in a uniform waveguide closed by two metal planes perpendicular to the axis, where the subscripts m and n identify a TM mode in the waveguide and p indicates the number of half-period variations for the same vector along the waveguide axis between the two metal planes. ★ mode TM_{mnp} → *mode 90.* R тип колебаний TM_{mnp} (в волноводном резонаторе). D TM_{mnp}-Mode (in einem Hohlleiter-Hohlraum). E modo TM_{mnp} (en una cavidad de guíaonda). I modo TM_{mnp} (in una cavità risonante). N TM_{mnp}-modus. P rodzaj TM_{mnp} pola (w rezonatorze falowodowym). S TM_{mnp}-mod. (726)

86. transmission mode (*Syn.* mode of propagation) : → *mode 56*

87. transverse electric mode (*Syn.* TE mode) : → *mode 75*

88. transverse electric mode (*Syn.* TE mode) : a mode whose electric field vector is normal and whose magnetic field vector is not normal to the direction of propagation. *Note.* — In an optical fibre, TE modes along with TM modes correspond to meridional rays. ★ mode TE → *mode 82.* R поперечная электрическая мода; TE мода. D transversale elektrische Mode; TE-Mode. E modo eléctrico transversal; modo TE. I modo trasverso elettrico; modo TE. N transversaal-elektrische modus; TE-modus. P mod poprzeczny elektryczny; mod TE. S transversell elektrisk mod; TE-mod. (731)

89. transverse electromagnetic mode (*Syn.* TEM mode) : → *mode 80*

90. transverse electromagnetic mode (*Syn.* TEM mode) : a mode whose electric and magnetic field vectors are both normal to the direction of propagation. ★ mode TEM → *mode 86.* R поперечная электромагнитная мода. D transversale elektromagnetische Mode; TEM-Mode. E modo electromagnético transversal; modo TEM. I modo trasverso elettrico e magnetico; modo TEM. N transversaal-elektromagnetische modus; TEM-modus. P mod poprzeczny elektromagnetyczny; mod TEM. S transversell elektromagnetisk mod; TEM-mod. (731)

91. transverse magnetic mode (*Syn.* TM mode) : → *mode 82*

92. transverse magnetic mode (*Syn.* TM mode) : a mode whose magnetic field vector is normal and whose electric field vector is not normal to the direction of propagation. *Note.* — In an optical fibre, TM modes along with TE modes correspond to meridional rays. ★ mode TM → *mode 88.* R поперечная магнитная мода; TM мода. D transversale magnetische Mode; TM-Mode. E modo magnético transversal; modo TM. I modo trasverso magnetico; modo TM. N transversaal-magnetische modus; TM-modus. P mod poprzeczny magnetyczny; mod TM. S transversell magnetisk mod; TM-mod. (731)

93. trapped energy mode : a mode of vibration in which the vibrating energy is mainly confined to a defined area of the vibrator. ★ mode d'énergie piégée → *mode 51.* R мода колебаний с захватом энергии. D Trapped energy mode. E modo de energía retenida. I modo energetico costretto. N lokale vibratiemodus. P drgania o pułapkowanej energii. S lokaliserad svängningsmod. (561)

94. tunnelling mode (*Syn.* leaky mode) : → *mode 34*

95. unbound mode : any mode that is not a bound mode, generally a leaky or radiation mode of the fibre. ★ mode non lié → *mode 75.* R непредельная мода. D ungebundene Mode. E modo no guiado. I modo non guidato. N niet-gebonden modus. P mod nieprowadzony. S obunden mod. (731)

96. uncoupled mode : a normal mode oscillating independently of other modes. ★ mode non couplé → *mode 74.* R несвязанная мода. D ungekoppelte Eigenschwingung. E modo no acoplado. I modi disaccoppiati. N ongekoppelde trillingswijze. P drganie własne nieprzężone. S fri mod; okopplad mod. (801)

97. unstiffened mode (of piezoelectric vibration) : a mode of vibration, in which, in the ideal unstiffened mode, the electric field is perpendicular to the direction of elastic wave motion and has no influence on the pattern of motion. ★ mode (de vibration piézoélectrique) non rigidifié → *mode 47.* R мягкая мода (колебаний пьезоэлектрика). D piezoelektrische unversteifte Schwingungsform. E modo (de vibración piezoeléctrica) no restringido. I modo (di vibrazione piezoelettrica) non rigido. N ongeklemde wijze van

piëzo-elektrische trilling. P drganie (piezoelektryczne) swobodne. S transversell mod. (561)

98. **waveguide mode** : a mode in a uniform waveguide. ★ mode de guide d'ondes → *mode 35.* R тип колебаний в волноводе. D Wellenleiter-Mode. E modo de guíaonda. I modo di guida d'onda. N golfgeleidermodus. P radzja pola w falowodzie. S vågledarmod. (726)

moded

1. **over moded waveguide** : → *waveguide 9*

model

1. **maintainability model** : a mathematical model used for prediction or estimation of maintainability performance measures of an item. *Note.* — An example is the maintenance tree. ★ modèle de maintenabilité → *modèle 11.* R модель ремонтопригодности. D Instandhaltbarkeitsmodell. E modelo de mantenibilidad. I modello di manutenibilità. N onderhoudbaarheidsmodel. P model obsługiwalności. S underhållsmässighetsmodell. (191)
2. **reliability model** : a mathematical model used for prediction or estimation of reliability performance measures of an item. ★ modèle de fiabilité → *modèle 10.* R модель безотказности. D Zuverlässigkeitsmodell. E modelo de fiabilidad. I modello di affidabilità. N betrouwbaarheidsmodel. P model niezawodnościowy. S funktionssäkerhetsmodell. (191)
3. **stress model** : a mathematical model used to describe the influence of relevant applied stresses on a reliability performance measure or any other property of an item. ★ modèle de contraintes → *modèle 9.* R нагрузочная модель. D Beanspruchungsmodell. E modelo de esfuerzos; modelo de solicitaciones. I modello sollecitazioni-affidabilità. N belastingsmodel. P model narażeń (obiektu). S stressmodell. (191)

modem

1. **modem** : an assembly comprising a modulator and a demodulator combined in the same piece of equipment. ★ modem → *modem 1.* R модем. D Modem. E modem. I modem. N modem. P modem. S modem. (721)

moderation

1. **moderation** : the process by which neutron energy is reduced through scattering collisions without appreciable capture. ★ modération → *modération 1.* D Moderierung. E moderación. I moderazione. N afremming; moderatie. P spowalnianie. S moderation. (026)

moderator

1. **moderator** : a material used to reduce, by scattering collisions and without appreciable capture, the kinetic energy of neutrons. ★ modérateur → *modérateur 2.* D Moderator. E moderador. I moderatore. N remstof; moderator. P spowalniacz; moderator. S moderator. (026)
2. **moderator control** : → *control 124*

modification

1. **ionospheric modification** : a change in the characteristics of the ionosphere and mainly in electron density, caused by man-made activity. *Note.* — Ionospheric modification may be caused by a variety of techniques including chemical release, high power radio excitation, injection of atoms and ions and nuclear explosions. The modification may be short lived or of extended duration. ★ modification ionosphérique → *modification 2.* D ionosphärische Modifikation. P modyfikacja jonosferyczna. (705)
2. **modification** (of an item) : the combination of all technical and administrative actions intended to change an item. ★ modification → *modification 1.* R модификация (объекта). D Veränderung. E modificación (de un elemento). I modifica. N wijziging (van een eenheid). P modyfikacja (obiektu). S modifiering. (191)

modified

1. **modified alternate mark inversion code** : → *code 37*
2. **modified AMI** (*Syn.* modified alternate mark inversion code) : → *code 37*
3. **modified constant voltage charge** : → *charge 38*
4. **modified Kraemer system** : → *system 117*
5. **modified refractive index** : → *index 27*

moding

1. **moding** : the operation of a tube, partly or fully, in any undesired mode. ★ moding → *moding 1.* R скачкообразный переход на паразитный вид колебаний. D Frequenzspringen, Mod-Instabilität. E «Moding». I ..... N miswerking. P przeskok rodzaju pracy. S vågtypsändring. (531)

modulate

1. **to modulate** : to vary one or more characteristics of an oscillation or wave in accordance with the variations of a signal or another oscillation or wave. ★ moduler → *moduler 2.* R модулировать. D modulieren. E modular. I modulare. N moduleren. P modulować. S modulera. (702)

modulated

1. **amplitude modulated signal generator** : → *generator 2*
2. **envelope of an amplitude modulated signal** : → *envelope 9*
3. **frequency modulated signal generator** : → *generator 15*
4. **modulated groove** : → *groove 22*
5. **modulated oscillation** (*Syn.* modulated signal) : → *signal 122*
6. **modulated section** (*Syn.* recorded surface) : → *surface 17*
7. **modulated signal** : → *signal 122*
8. **modulated wave** (*Syn.* modulated signal) : → *signal 122*

modulating

1. **group modulating equipment** : → *equipment 36*
2. **hypergroup modulating equipment** (*Syn.* 15-supergroup assembly modulating equipment) : → *equipment 86*
3. **mastergroup modulating equipment** : → *equipment 47*
4. **modulating action** : → *action 12*
5. **modulating signal** : → *signal 123*
6. **modulating stage** (*Syn.* modulator) : → *modulator 2*
7. **modulating wave** (*Syn.* modulating signal) : → *signal 123*
8. **supergroup modulating equipment** : → *equipment 74*
9. **15-supergroup assembly modulating equipment** : → *equipment 86*

modulation

1. **adaptive differential pulse code modulation** (*Syn.* ADPCM (abbreviation)) : a form of differential pulse code modulation in which the prediction law and/or the quantizing law are automatically adjusted according to some characteristic of the signal or channel concerned. ★ modulation par impulsions et codage différentiel adaptatif → *modulation 51.* R адаптивная дифференциальная импульсно-кодовая модуляция; АДИКМ. D adaptive differentielle Pulscodemodulation; ADPCM (Abkürzung). E modulación por impulsiones y codificación diferencial adaptativo. I modulazione a impulsi codificati differenziale adattativa; ADPCM (abbreviazione). N adaptieve differentiële pulscodemodulatie. P modulacja impulsowo-kodowa różnicowa adaptacyjna. S adaptiv differentiell PCM. (704)
2. **amplitude modulation** (*Syn.* AM (abbreviation)) : modulation in which the amplitude of a periodic carrier is a given function, generally linear, of the instantaneous values of the modulating signal. ★ modulation d'amplitude → *modulation 18.* R амплитудная модуляция. D Amplitudenmodulation; AM (Abkürzung). E modulación de amplitud; AM (abreviatura). I modulazione d'ampiezza. N amplitudemodulatie; AM. P modulacja amplitudowa; modulacja amplitudy. S amplitudmodulering. (303,702)
3. **amplitude modulation distortion** : → *distortion 4*
4. **amplitude modulation factor** : → *factor 7*
5. **amplitude shift modulation** (*Syn.* amplitude shift keying) : → *keying 1*
6. **angle modulation** : modulation in which the phase of a sinusoidal carrier is a given function of the instantaneous values of the modulating signal. ★ modulation angulaire → *modulation 16.* R угловая модуляция. D Winkelmodulation. E modulación angular. I modulazione angolare. N hoekmodulatie. P modulacja kątowa. S vinkelmodulering. (702)
7. **beam modulation percentage** (for image orthicons) : one hundred times the ratio of the signal current for highlight illumination to the dark current. ★ taux de modulation du faisceau → *taux 24.* R глубина модуляции пучка (для

супероргиконов). D Strahlmodulationsgrad, Kontrastübertragung (bei Superorthicons). E tasa de modulación del haz (para las imágenes orticón). I percentuale di modulazione del fascio (per orticon immagine). N bundelmodulatiepercentage. P głębokość modulacji wiązki. S strålmoduleringstal. (531)

8. **charge-density modulation** (*Syn.* density modulation) : → *modulation 15*

9. **coherent modulation** : modulation by a discretely timed signal in which there is a predetermined relationship between the instants characterizing the carrier phase prior to modulation and the significant instants of the modulated signal. *Example* of coherent modulation : Modulation in which the significant instants of the modulated signal coincide with zero crossings of the carrier. ★ modulation cohérente → *modulation 17.* R когерентная модуляция. D kohärente Umtastung. E modulación coherente. I modulazione coerente. N coherente modulatie. P modulacja spójna. S koherent modulering. (702,721)

10. **compatible single sideband modulation** (in sound radio broadcasting) : mixed amplitude and phase modulation having only a single sideband of bandwith practically equal to that of the audio frequency sound signal, together with a component at carrier frequency, suitable for reception by radio broadcast receivers, designed for conventional double sideband amplitude modulation. ★ modulation à bande latérale unique compatible → *modulation 13.* R совместимая модуляция на ОБП (в звуковом радиовещании). (723)

11. **conductivity modulation** (of a semiconductor) : the variation of the conductivity as a result of the injection of excess carriers or the removal of carriers. ★ modulation de la conductivité → *modulation 24.* R модуляция электрической проводимости (полупроводника). D Leitfähigkeitsmodulation. E modulación de la conductividad (de un semiconductor). I modulazione della conduttività (di un semiconduttore). N conductiviteitsmodulatie (van een halfgeleider). P modulacja przewodnictwa. S konduktivitetsmodulering. (521)

12. **current-density modulation** : 1. The process of varying the current density of a convection current with time. 2. The condition existing in a charge carrier stream as a result of this process. ★ modulation de densité de courant → *modulation 21.* R модуляция плотности тока. D Stromdichtemodulation. E modulación de densidad de corriente. I modulazione di densità di corrente. N stroomdichtheidsmodulatie. P modulacja gęstości prądu. S strömtäthetsmodulering. (531)

13. **degree of start-stop distortion at the actual mean modulation rate** (*Syn.* degree of synchronous start-stop distortion) : → *degree 17*

14. **delta modulation** (*Syn.* ΔM (abbreviation); DM (abbreviation)) : a form of differential pulse code modulation in which only the sign of the difference between each signal sample and its predicted value is retained and encoded by a single binary digit. ★ modulation delta → *modulation 27.* R дельта-модуляция. D Deltamodulation; ΔM (Abkürzung); DM (Abkürzung). E modulación delta. I modulazione a delta. N deltamodulatie; DM. P modulacja delta. S deltamodulering. (702,704)

15. **density modulation** (*Syn.* charge-density modulation) : 1. The process of varying the density of charge carriers with time. 2. The condition existing in a charge carrier stream as a result of this process. ★ modulation de densité → *modulation 20.* R модуляция по плотности. D Dichtemodulation. E modulación de densidad. I modulazione di densità di carica. N ladingsdichtheidsmodulatie. P modulacja gęstości ładunku. S (laddnings)täthetsmodulering. (531)

16. **differential modulation** : modulation in which each significant condition of a digital modulating signal is represented by a specified change of value of a characteristic quantity of the modulated signal, with respect to the value assigned to the preceding signal element. ★ modulation différentielle → *modulation 28.* R относительная модуляция. D differentielle Umtastung. E modulación diferencial. I modulazione differenziale. N verschilmodulatie. P modulacja różnicowa. S differentiell modulering. (702,721)

17. **differential pulse code modulation** (*Syn.* DPCM (abbreviation)) : a process in which a signal is sampled and the difference between each sample and its predicted value derived from the succession of previous samples or quantized values is quantized, and the resulting succession of quantized values is converted by encoding into a digital signal. ★ modulation par impulsions et codage différentiel → *modulation 50.* R дифференциальная импульсно-кодовая модуляция; ДИКМ. D differentielle Pulscodemodulation; DPCM (Abkürzung). E modulación por impulsos codificados diferencial. I modulazione da impulsi e codifica differenziale; DPCM (abbreviazione). N differentiële pulscodemodulatie; DPCM. P modulacja impulsowo-kodowa różnicowa. S differentiell pulskodsmodulering. (702,704)

18. **digital pulse duration modulation** (*Syn.* DPDM) : a modulation method in which the binary signal elements "0" and "1" are represented by pulses or pulse intervals of different durations. *Note.* — The ratio between the long and the short signal element duration, which depends on requirements of reliability and speed of the message transmission, is not necessarily an integer. ★ modulation numérique d'impulsions en durée → *modulation 41.* R дискретная широтно-импульсная модуляция. D digitale Puls-Dauer-Modulation; DPDM. E modulación numérica de la duración de los impulsos. I modulazione digitale a durata d'impulsi. N digitale impulsduurmodulatie. P modulacja cyfrowa długości impulsu. S digital pulslängdsmodulering. (371)

19. **frequency modulation** : the process by which the frequency of a carrier wave is varied following a specified law. *Note.* — The result of that process is a frequency modulated signal. ★ modulation de fréquence → *modulation 22.* R частотная модуляция. D Frequenzmodulation. E modulación de frecuencia. I modulazione di frequenza. N frequentiemodulatie; FM. P modulacja częstotliwościowa. S frekvensmodulering. (303)

20. **frequency modulation** (*Syn.* FM (abbreviation)) : angle modulation in which the instantaneous frequency deviation varies in accordance with a given function, generally linear, of the instantaneous value of the modulating signal. ★ modulation de fréquence → *modulation 23.* R частотная модуляция. D Frequenzmodulation; FM (Abkürzung). E modulación de frecuencia; FM (abreviatura). I modulazione di frequenza. N frequentiemodulatie; FM. P modulacja częstotliwościowa; modulacja częstotliwości. S frekvensmodulering. (702)

21. **frequency modulation distortion** : → *distortion 40*

22. **frequency shift modulation** (*Syn.* frequency shift keying) : → *keying 3*

23. **generic pulse code modulation** (*Syn.* generic PCM (abbreviation)) : any form of analogue-to-digital conversion carried out by sampling, quantizing and encoding. *Note.* — The term "pulse code modulation" and its abbreviation PCM are widely used in the generic sense defined above, though this practice is deprecated in English. ★ modulation par impulsions et codage (généralisée) → *modulation 52.* R общая импульсно-кодовая модуляция. D (allgemeine) Pulscodemodulation; PCM (Abkürzung). E modulación por impulsiones y codificación genérica. I modulazione a impulsi codificati generica; PCM generico. N generieke pulscodemodulatie; generieke PCM (afkorting). P modulacja impulsowo-kodowa (ogólnie). S ..... (704)

24. **ionospheric cross modulation** (*Syn.* Luxembourg effect) : the modulation of a radio wave by the modulating signal of another wave having a different frequency, resulting from non-linear phenomena in a region of the ionosphere through which both waves pass. ★ transmodulation ionosphérique → *transmodulation 2.* D ionosphärische Kreuzmodulation; Luxembourg-Effekt. P modulacja skrośna jonosferyczna. (705)

25. **isochronous modulation** : a telegraph modulation in which each significant interval has a duration equal to a unit interval or to a multiple of this interval. ★ sématème isochrone → *sématème 4.* R изохронная модуляция. D isochrone Modulation. E modulación isócrona. I modulazione isocrona. N isochrone modulatie. P modulacja izochroniczna. S isokron modulering. (721)

26. **linear modulation** : modulation in which a characteristic quantity of a carrier is a linear function of the instantaneous values of the modulating signal. ★ modulation linéaire → *modulation 38.* R линейная модуляция. D lineare Modulation. E modulación lineal. I modulazione lineare. N lineaire modulatie. P modulacja linearna. S linjär modulering. (702)

27. **modulation** : a process by which a quantity which characterizes an oscillation or wave follows the variations of a signal or of another oscillation or wave. *Note.* — Modulation may be

intentional or unintentional. ★ modulation → *modulation 12.* R модуляция. D Modulation. E modulación. I modulazione. N modulatie. P modulacja. S modulering. (701,702)

28. **modulation by pulses** : modulation in which the modulating signal is a sequence of pulses. ★ modulation par (une suite d')impulsions → *modulation 58.* R модуляция импульсами. D Modulation durch Pulse. E modulación por (una secuencia de) impulsos. I modulazione da impulsi. N pulsmodulatie. P modulacja impulsami. S pulsmodulering. (702)
29. **modulation converter** : → *converter 11*
30. **modulation factor** : → *factor 119*
31. **modulation index** : → *index 28*
32. **modulation index** : → *index 29*
33. **(modulation) limiter** : → *limiter 4*
34. **modulation noise** : → *noise 42*
35. **modulation of pulses** (*Syn.* pulsed carrier modulation) : modulation in which one or more characteristic quantities of a pulsed carrier vary in accordance with the value of the modulating signal. ★ modulation d'impulsions → *modulation 29.* R импульсная модуляция. D Pulsmodulation; Pulsträgermodulation. E modulación de impulsos; modulación de una secuencia de impulsos. I modulazione di (una sequenza di) impulsi. N pulsdraaggolfmodulatie. P modulacja nośnej impulsowej. S pulstågsmodulering. (702)
36. **modulation processing** : → *processing 2*
37. **modulation rate** : → *rate 57*
38. **modulation transfer function** (*Syn.* square-wave response characteristic) : → *characteristic 79*
39. **modulation transfer function** : → *function 25*
40. **modulation voltage** (*Syn.* grid/cathode driving voltage) : → *voltage 78*
41. **modulation with a fixed reference** : modulation in which the significant condition of each signal element is determined by comparison to a preceding signal element chosen as a reference. ★ modulation à référence fixe → *modulation 15.* R модуляция с фиксированным эталоном. D Referenzmodulation. E modulación con referencia fija. I modulazione coerente. N modulatie met een vaste referentie. P modulacja różnicowa z ustalonym elementem odniesienia. S referensmodulering. (702,721)
42. **multiple modulation** : a sequence of modulation processes in which the modulating signal in one stage is all or part, for instance one sideband, of the modulated signal from the preceding modulating stage. ★ modulation multiple → *modulation 39.* R многократная модуляция. D Mehrfachmodulation. E modulación múltiple. I modulazione multipla. N meervoudige modulatie. P modulacja wielokrotna. S upprepad modulering. (702)
43. **negative modulation** (in television) : modulation where a change from black to white in the modulating video signal corresponds to a decrease in the amplitude of the modulated signal when amplitude modulation is used, or a decrease in the instantaneous frequency where frequency modulation is used. ★ modulation négative → *modulation 40.* R негативная модуляция (в телевидении). (723)
44. **phase inversion modulation** : two condition phase shift keying in which the phase shift takes two different values differing by π radians. ★ modulation par inversion de phase → *modulation 53.* R обратная фазовая манипуляция. D binäre Phasenumtastung. E modulación por inversión de fase; modulación por oposición de fase. I modulazione per inversione di fase. N fase-inversiemodulatie. P modulacja odwróceniem fazy. S fasvändningsmodulering. (702)
45. **phase inversion modulation** : phase shift modulation in which the phase shift takes values differing by one half-period. ★ modulation par opposition de phase → *modulation 56.* R фазоинверсная модуляция. D Phasenumkehrmodulation. E modulación por oposición de fase; modulación por inversión de fase. I modulazione bifase. N fase-inversiemodulatie. P modulacja z odwróceniem fazy. S fasvändningsmodulering. (721)
46. **phase modulation** (*Syn.* PM (abbreviation)) : angle modulation in which the instantaneous phase deviation varies in accordance with a given function, generally linear, of the instantaneous value of the modulating signal. ★ modulation de phase → *modulation 25.* R фазовая модуляция. D Phasenmodulation; PM (Abkürzung). E modulación de fase. I modulazione di fase. N fasemodulatie; PM. P modulacja fazowa; modulacja fazy. S fasmodulering. (303,702)
47. **phase shift modulation** (*Syn.* phase shift keying) : → *keying 8*
48. **positive modulation** (in television) : modulation where a change from black to white in the modulating video signal corresponds to an increase in the amplitude of the modulated signal when amplitude modulation is used, or an increase in the instantaneous frequency where frequency modulation is used. ★ modulation positive → *modulation 59.* R позитивная модуляция (в телевидении). (723)
49. **pulse amplitude modulation** (*Syn.* PAM (abbreviation)) : modulation of pulses in which the pulse magnitude varies in accordance with a given function, generally linear, of the value of the modulating signal. ★ modulation d'impulsions en amplitude → *modulation 31.* R амплитудно-импульсная модуляция; АИМ. D Pulsamplitudenmodulation; PAM (Abkürzung). E modulación de impulsos en amplitud. I modulazione di impulsi in ampiezza. N pulsamplitudemodulatie; PAM. P modulacja amplitudy impulsów. S pulsamplitudsmodulering. (702)
50. **pulse code modulation** (*Syn.* PCM (abbreviation)) : a process in which a signal is sampled, each sample is quantized independently of other samples, and the resulting succession of quantized values is converted by encoding into a digital signal. ★ modulation par impulsions et codage → *modulation 49.* R импульсно-кодовая модуляция; ИКМ. D Pulscodemodulation; PCM (Abkürzung). E modulación por impulsos codificados; MIC (abreviatura). I modulazione da impulsi e codifica; PCM (abbreviazione). N pulscodemodulatie; PCM. P modulacja impulsowo-kodowa. S pulskodsmodulering. (702,704)
51. **pulse duration modulation** (*Syn.* PDM (abbreviation)) : pulse time modulation in which the pulse duration varies in accordance with a given function of the value of the modulating signal. ★ modulation d'impulsions en durée → *modulation 32.* R модуляция импульса по длительности; широтно-импульсная модуляция. D Pulsdauermodulation; PDM (Abkürzung). E modulación de impulsos en duración; modulación de impulsos en anchura. I modulazione di impulsi in durata. N pulsduurmodulatie; PDM. P modulacja czasu trwania impulsów. S pulslängdsmodulering. (702)
52. **pulse frequency modulation** (*Syn.* PFM (abbreviation); pulse repetition rate modulation) : pulse time modulation in which the pulse repetition frequency varies in accordance with a given function of the value of the modulating signal. ★ modulation d'impulsions en fréquence → *modulation 33.* R частотно-импульсная модуляция; ЧИМ. D Pulsfrequenzmodulation; PFM (Abkürzung); Impulswiederholratenmodulation. E modulación de impulsos en frecuencia. I modulazione di impulsi in frequenza. N pulsfrequentiemodulatie; PFM. P modulacja częstotliwości impulsów. S pulsfrekvensmodulering. (702)
53. **pulse position modulation** (*Syn.* PPM (abbreviation)) : pulse time modulation in which the positions in time of the pulses vary from their initial position in accordance with a given function of the value of the modulating signal. ★ modulation d'impulsions en position → *modulation 35.* R фазоимпульсная модуляция. D Pulslagemodulation; PLM (Abkürzung). E modulación de impulsos en posición. I modulazione di impulsi in posizione. N pulspositiemodulatie; PPM. P modulacja położenia impulsów. S pulslägesmodulering. (702)
54. **pulse repetition rate modulation** (*Syn.* pulse frequency modulation) : → *modulation 52*
55. **pulse time modulation** (*Syn.* PTM (abbreviation)) : modulation of pulses in which a time related characteristic of a pulsed carrier varies in accordance with a given function of the value of the modulating signal. *Examples :* Pulse position modulation ; pulse duration modulation ; pulse frequency modulation. ★ modulation d'impulsions dans le temps → *modulation 30.* R импульсно-временная модуляция. D Pulszeitmodulation; PZM (Abkürzung). E modulación de impulsos en el tiempo. I modulazione di impulsi nel tempo. N pulstijdmodulatie; PTM. P modulacja czasowa impulsów. S pulstidsmodulering. (702)

56. **pulsed carrier modulation** (*Syn.* modulation of pulses) : → *modulation 35*
57. **quadrature (amplitude) modulation** (*Syn.* QAM (abbreviation)) : amplitude modulation by two separate signals of two sinusoidal carriers having the same amplitude and frequency but being in phase quadrature, the modulated signals being added for transmission in a single channel. ★ modulation (d'amplitude) en quadrature → *modulation 19.* R квадратурная (амплитудная) модуляция. D Quadrat(-Amplituden)-Modulation. E modulación (de amplitud) en cuadratura. I modulazione (di ampiezza) in quadratura. N kwadratuur(amplitude)-modulatie. P modulacja (amplitudowa) kwadraturowa. S ..... (702)
58. **quadrature phase modulation** (*Syn.* quadrature phase shift keying) : → *keying 9*
59. **telegraph modulation** : succession in time of significant conditions corresponding to a signal transmitted. ★ sématème (à l'émission) → *sématème 3.* R телеграфная модуляция. D Telegrafenmodulation. E modulación telegráfica. I modulazione telegrafica; sequenza di stati significativi. N telegraafmodulatie. P modulacja telegraficzna; sekwencjowanie stanów (znamiennych). S telegrafimodulering. (721)
60. **trapezoidal modulation** (in sound radio broadcasting) : amplitude modulation after major clipping of the positive and negative excursions of the sound signal. ★ modulation trapézoïdale → *modulation 61.* R трапецеидальная модуляция (в звуковом радиовещании). (723)
61. **velocity modulation** : 1. The process of varying the velocity of charge carriers with time. 2. The condition existing in a charge carrier stream as a result of this process. ★ modulation de vitesse → *modulation 26.* R модуляция по скорости. D Geschwindigkeitsmodulation. E modulación de velocidad. I modulazione di velocità. N snelheidsmodulatie. P modulacja prędkości. S hastighetsmodulering. (531)
62. **vertical modulation angle** : → *angle 57*

modulator

1. **Hall modulator** : a Hall effect device which is specially designed for modulation purposes. ★ modulateur à effet Hall → *modulateur 2.* R модулятор холла. D Hallmodulator. E modulador Hall. I modulatore di Hall. N Hall-modulator; Hallmodulator. P modulator hallotronowy. S hallmodulator. (521)
2. **modulator** (*Syn.* modulating stage) : a non-linear device for constraining a characteristic quantity of an oscillation or wave to follow the variations of a signal or of another oscillation or wave. *Examples* of modulators : amplitude modulator ; phase modulator ; frequency modulator ; pulse modulator. ★ modulateur → *modulateur 1.* R модулятор. D Modulator; Modulationsstufe. E modulador. I modulatore; stadio di modulazione. N modulator; modulatietrap. P modulator; stopień modulujący. S modulator. (702)
3. **telegraph modulator** : a modulator controlled by a telegraph signal. ★ modulateur télégraphique → *modulateur 3.* R телеграфный модулятор. D Telegrafenmodulator. E modulador telegráfico. I modulatore telegrafico. N telegraafmodulator. P modulator telegraficzny. S telegrafmodulator. (721)

module

1. **diversity of a signalling module** : → *diversity 3*
2. **signalling module** (*Syn.* signalling link set) : a group of two or more signalling links between the same terminal points which provides security facilities within itself. ★ module sémaphore → *module 10.* R модуль сигнализации; пучок трактов сигнализации. D Zeichengabe-Modul. E módulo de señalización. I fascio di circuiti di segnalazione; modulo di segnalazione. N signaleringsverbindingsset. P moduł sygnalizacyjny. S signaleringsmodul. (714)

modulus

1. **(modulus of) admittance** : → *admittance 9*
2. **(modulus of) impedance** : → *impedance 38*
3. **modulus of the reflection coefficient** : a dimensionless measure of the degree of mismatch between two impedances Z_a and Z_b, given by the expression :

$$\left|\frac{Z_a - Z_b}{Z_a + Z_b}\right|$$

where: Z_a = the source or output impedance, Z_b = the load or input impedance. ★ facteur de réflexion en module → *facteur 137.* R модуль коэффициента отражения. D Betrag (des) Reflexionsfaktors. E módulo coeficiente de reflexión. I modulo del fattore di riflessione. N modulus van de reflectiecoëfficiënt. P moduł współczynnika odbicia. S reflexionsfaktor. (561)

4. **refractive modulus** (M) : one million times the amount by which the modified refractive index exceeds unity :

$$M = 10^6 (n + \frac{h}{a} - 1) = N + 10^6 \frac{h}{a}$$

where n is the refractive index, N is the refractivity, h is the altitude, a is the radius of the Earth. ★ module de réfraction → *module 9.* D modifizierter Brechwert. P moduł załamania. (705)

5. **standard refractive modulus gradient** : → *gradient 6*

MOF

1. **MOF** (*Syn.* maximum observed frequency) : → *frequency 128*

Mögel-Dellinger

1. **Mögel-Dellinger fade-out** (*Syn.* short-wave fade-out) : → *fade-out 3*

moire

1. **moiré** : disturbance resulting from interference beats between two sets of periodic structures or scan patterns, or between a periodic structure and a scan pattern. ★ moiré → *moiré 1.* R муар. D Moiré. E «moiré». I marezzatura. N moiré. P mora. S moaréstörning. (531)
2. **moire** (*Syn.* interference pattern) : → *pattern 14*
3. **moiré** (in television) : effect giving rise to areas of the television picture made up of wavy lines whose luminosity and colour vary slightly from those of neighbouring parts of the picture, giving an appearance similar to that of watered silk. ★ moirure → *moirure 1.* R муар (в телевидении). (723)
4. **moiré** : an interference pattern in the reproduced picture due to unwanted modulation products. ★ moirage → *moirage 4.* R муар. D Moiré. E moaré (imagen). I ombreggiamento. N moiré. P mora. S moaré. (806)
5. **moiré pattern** : → *pattern 15*

moisture

1. **moisture absorption** : → *absorption 24*
2. **soil moisture meter** : → *meter 53*

molality

1. **molality** (of solute *i*) (b_i) : the amount of solute substance *i* per unit mass of the solvent. ★ molalité → *molalité 1.* R моляльность. D Molalität (der Substanz *i*). E molalidad (de soluto *i*). I molalità (del soluto *i*). N molaliteit. P molalność. S molalitet. (111)

molar

1. **molar reaction heat** : → *heat 15*
2. **molar reduction heat** : → *heat 16*

mole

1. **mole** : the amount of substance of a system which contains as many elementary entities as there are atoms in 0.012 kilograms of carbon 12. When the mole is used, the elementary entities must be specified and may be atoms, molecules, ions, electrons, other particles, or specified groups of such particles. ★ mole → *mole 1.* R моль. D Mol. E mol; mole. I mole. N grammolecuul. P mol. S mol. (881)

molecule

1. **molecule** : a particle comprising a group of atoms bonded by valence electrons and forming a structure that persists as a unit through changes of physical state. ★ molécule → *molécule 1.* R молекула. D Molekül. E molécula. I molecola. N molecuul. P cząsteczka; molekuła. S molekyl. (111)

moment

1. **actuating moment** : the moment applied to an actuator necessary to complete the intended operation. ★ moment de commande → *moment 6.* R момент воздействия. D Betätigungsmoment. E momento de mando. I momento di azionamento. N bedieningskoppel. P moment napędowy. S manövermoment. (441)
2. **electric dipole moment** (p) : a vector quantity given by the volume integral of the electric polarization

$$p = \int P \mathrm{d}v$$

Note. — For an electric dipole, this moment is equal to the product of the magnitude of one of the charges by the distance between them, its direction being from the negative to the positive charge. ★ moment électrique → *moment 10.* R электрический момент диполя. D elektrisches Dipolmoment. E momento eléctrico. I momento di dipolo elettrico. N elektrisch dipoolmoment. P moment elektryczny. S elektriskt dipolmoment. (121)
3. **magnetic (area) moment** (m) : a vector quantity given by the volume integral of the magnetization

$$m = \int M \mathrm{d}v$$

Note. — The magnetic moment for a plane current loop is equal to the product of the current, the loop area, and the positive unit vector normal to the plane of the loop. ★ moment magnétique → *moment 11.* R магнитный момент. D magnetisches Moment. E momento magnético. I momento magnetico. N (elektro)magnetisch moment. P moment magnetyczny. S magnetiskt moment. (121)
4. **magnetic dipole moment** (j) : a vector quantity given by the volume integral of the magnetic polarization. *Note.* — The magnetic dipole moment is related to the magnetic area moment m by the expression $j = \mu_0 m$ where μ_0 is the magnetic constant. ★ moment magnétique coulombien → *moment 12.* R магнитный дипольный момент. D magnetisches Dipolmoment. E momento magnético culombiano; momento magnético de dipolo. I momento magnetico. N magnetisch dipoolmoment. P moment magnetyczny dipolowy. S magnetiskt dipolmoment. (221)
5. **moment of a force** (at a point) (M) : at a point A, the quantity given by the vector product of the vector AB by the force F applied at the point B. ★ moment d'une force → *moment 9.* R момент силы (относительно точки A). D Moment einer Kraft (in einem Punkt); Kraftmoment. E momento de una fuerza (en un punto). I momento di una forza (in un punto). N moment van een kracht. P moment siły (względem punktu). S kraftmoment (i en punkt). (111)
6. **moment of inertia** (about an axis) (I) : for a body, the sum of the products of the mass of each particle and the square of its distance from a given axis.

$$I = \sum (m_i r_i^2)$$

★ moment d'inertie → *moment 8.* R момент инерции тела (по отношению). D (Massen-) Trägheitsmoment (um eine Achse). E movimiento de inercia (referido a un eje). I momento d'inerzia. N (massa)traagheidsmoment. P moment bezwładności (względem osi). S tröghetsmoment. (111)
7. **moment of momentum** (*Syn.* angular momentum) : → *momentum 1*
8. **restoring moment** : the moment provided to restore an actuator or a contact element to its initial position. ★ moment de rappel → *moment 7.* R возвращающий момент. D Rückstellmoment. E momento de retorno. I momento di richiamo. N herstelkoppel. P moment powrotu. S återställningsmoment. (441)

momentary

1. **momentary mechanical system** : → *mechanical system 11*

momentum

1. **angular momentum** (*Syn.* moment of momentum) : 1. For a particle in motion, a quantity equal to the vector product of the radius vector and the linear momentum. 2. For a body in motion, the vector sum of the angular momenta of its constituent particles. *Note.* — The angular momentum of a rigid body rotating around a fixed axis is equal to the product of the moment of inertia and the angular velocity vector. ★ moment cinétique → *moment 5.* R момент количества движения; кинетический момент. D Drehimpuls; Drall. E momento cinético. I momento cinetico. N impulsmoment. P moment pędu. S rörelsemängdsmoment. (111)
2. **(linear) momentum** (p) : 1. for a particle, a vector quantity equal to the product of its mass and its velocity. 2. for a body, the vector sum of the momenta of its constituent particles. ★ quantité de mouvement → *quantité 3.* R количество движения. D (mechanischer) Impuls; Bewegungsgröße. E cantidad de movimiento. I quantità di moto. N impuls. P moment. S rörelsemängd. (111)
3. **moment of momentum** (*Syn.* angular momentum) : → *momentum 1*
4. **total angular momentum quantum number** : → *number 32*

monitor

1. **air contamination monitor** : a monitor designed to measure the activity concentration of aerosols, vapours or gas in air and to give a warning when it exceeds a predetermined value. ★ moniteur de contamination atmosphérique → *moniteur 5.* R измеритель-сигнализатор (монитор) загрязненности воздуха. D Luftkontaminationswarngerät. E monitor de radiactividad en el aire. I monitore di contaminazione atmosferica. N luchtbesmettingsmonitor. P monitor skażeń powietrza. S luftaktivitetsmonitor. (392)
2. **class 1 monitor** (*Syn.* picture monitor) : → *monitor 10*
3. **contamination monitor** : a monitor intended to determine whether the activity associated with the contamination is above or below a predetermined limit. ★ moniteur de contamination → *moniteur 4.* R измеритель-сигнализатор (монитор) загрязненности. D Warngerät für Oberflächenkontamination. E monitor de contaminación. I monitore di contaminazione. N monitor voor besmetting. P monitor skażeń. S kontaminationsmätare. (391)
4. **criticality monitor** : a monitor designed to measure a quantity connected with a possible criticality accident and to give a warning when it exceeds a predetermined value. ★ moniteur de criticité → *moniteur 6.* R измеритель-сигнализатор (монитор) критичности. D Kritikalitätsmonitor. E monitor de criticidad. I monitore di criticità. N kriticiteitsmonitor. P monitor stanu krytycznego. S kriticitetsmonitor. (392)
5. **failed fuel element monitor** : a radiation monitor designed to discover failures in the cladding (or coating) of the fuel elements in a nuclear reactor by measuring the concentration of radioactive materials (generally fission products) present in the reactor coolant. ★ moniteur de défauts d'éléments combustibles → *moniteur 7.* R прибор (установка) контроля герметичности оболочек тепловыделяющих элементов. D Brennelementschadensüberwachung (Spaltproduktnachweiseinrichtung). E monitor de fallos de elementos combustibles; monitor de rotura de vainas. I monitore di rotture di guaine. N lekmonitor voor splijtstof. P wykrywacz nieszczelnych elementów paliwowych. S monitor för bränsleskador. (392)
6. **hand-and-foot monitor** : an assembly to detect, measure, and give an audible or visible warning of radioactive contamination of the hands (or gloves) and feet (or shoes), particularly of persons working in, or leaving, a place that may be contaminated. ★ chiropodoradiamètre → *chiropodoradiamètre 1.* R детектор для рук и ног. D Hand-Fuss-Monitor. E monitor de manos y pies. I monitore mani-piedi. N monitor voor besmetting van handen en voeten. P monitor rąk i nóg. S hand- och fotmonitor. (881)
7. **line monitor** (*Syn.* picture monitor) : → *monitor 10*
8. **monitor** : a functional unit that observes and records, for analysis, selected activities within a switching system. ★ moniteur → *moniteur 1.* R монитор; контрольное устройство. D Monitor. E monitor. I monitor. N ..... P monitor. S monitor. (714)
9. **monitor loudspeaker** : → *loudspeaker 12*
10. **picture monitor** (*Syn.* line monitor; class 1 monitor; studio monitor) : apparatus for displaying television pictures to establish the presence of an image in order to facilitate operations on a television signal or to assess its quality. *Note.* — In French the term "moniteur" and in English the terms "class 1 monitor" and "studio monitor" apply only to high quality equipment with which measurements of picture quality can be made. ★ écran de contrôle → *écran 16.* R монитор. (723)
11. **(radiation) monitor** : an assembly having the functions of both a radiation meter and a warning assembly. ★ moniteur

(de rayonnement) → *moniteur 8.* R измеритель-сигнализатор (монитор) ионизирующего излучения. D (Strahlungs-)Monitor. E monitor (de radiación). I monitore (di radiazione). N stralingsverklikker; stralingsmonitor; monitor. P monitor promieniowania. S (strålnings)monitor. (391,881)

12. **radioactive aerosol contamination monitor** : an air contamination monitor utilizing aerosol sampling and measuring devices. ★ moniteur d'aérosols radioactifs → *moniteur 3.* R измеритель-сигнализатор (монитор) загрязненности воздуха радиоактивными аэрозолями; измеритель-сигнализатор (монитор) аэрозолей в воздухе. D Aerosol-Kontaminationswarngerät. E monitor de radiactividad de aerosol radiactivo. I monitore per aerosol radioattivi. N besmettingsverklikker voor radioactieve aërosolen. P monitor skażeń powietrza aerozolami promieniotwórczymi. S (radioaktiv) aerosolaktivitetsmonitor. (392)
13. **studio monitor** (*Syn.* picture monitor) : → *monitor 10*

monitored

1. **monitored information** : → *information 21*

monitoring

1. **area monitoring** (*Syn.* environmental monitoring) : → *monitoring 4*
2. **audio monitoring** : the operation of listening to programmes to assess their technical or artistic quality. ★ contrôle d'écoute → *contrôle 12.* R контроль звука. (723)
3. **automatic monitoring equipment** : → *equipment 7*
4. **environmental monitoring** (*Syn.* area monitoring) : the continuous, periodic or special measurement of the radiation quantities such as dose equivalent, dose equivalent rate, absorbed dose, absorbed dose rate with ambient dose or dose ratemeters, or of radioactive contamination of any particular area, building, room or equipment. ★ surveillance de l'environnement → *surveillance 8.* R контроль окружающей среды. D Ortsdosis-Kontrolle. E vigilancia de zona. I monitoraggio ambientale. N omgevingscontrole. P monitorowanie środowiska; monitorowanie terenu. S områdesövervakning. (881)
5. **level monitoring** : the supervision of the level of programme signals using measuring equipment of specified characteristics. ★ contrôle de niveau → *contrôle 6.* R контроль уровня. (723)
6. **monitoring** (*Syn.* supervision) : → *supervision 1*
7. **monitoring** : observation of the operation of a system or part of a system to verify correct functioning by detecting incorrect functioning; this being done by measuring one or more variables of the system and comparing the measured values with the specified values. ★ contrôle → *contrôle 3.* R контроль. D Überwachung. E vigilancia. I supervisione. N bewaking; controle; toezicht. P kontrola. S övervakning. (351)
8. **monitoring** : a continuing procedure for the collection and assessment or pertinent information, including measurements, for the purpose of determining the effectiveness of the plans and procedures for radiation protection. ★ surveillance → *surveillance 6.* R дозиметрический контроль. D Strahlenschutzkontrolle. E vigilancia. I monitoraggio. N controle. P monitorowanie. S strålövervakning. (881)
9. **monitoring centre** (*Syn.* monitoring station) : → *station 20*
10. **monitoring circuit** (*Syn.* indicating circuit) : → *circuit 90*
11. **monitoring of a recorded programme** : the reproduction of a recorded programme for quality checking purposes. ★ contrôle d'enregistrement → *contrôle 13.* R контроль записи программ. (723)
12. **monitoring station** : → *station 20*
13. **off-air monitoring** : the monitoring of a broadcast programme using direct reception of the transmitter broadcasting this programme. ★ retour d'antenne → *retour 23.* R эфирный контроль. (723)
14. **personal monitoring** : the measurement of external irradiation by personal dosemeters and procedures for determining internal or external radioactive contamination of the body by measurements of the radiation from the body or from exhaled air, excretions, or clothing. ★ surveillance individuelle → *surveillance 10.* R индивидуальный контроль. D Personendosis-Kontrolle. E vigilancia individual. I monitoraggio individuale. N individuele stralingscontrole. P monitorowanie indywidualne. S personalövervakning. (881)
15. **(safety) monitoring assembly** : a measuring assembly intended to follow the variation of a characteristic concerned with the reactor and comprising a data processing subassembly giving one or more output logic signals. *Example :* An assembly comprising a thermocouple, a trip amplifier and an output relay. *Note.* — A monitoring assembly generally includes several measuring channels for each characteristic to provide the necessary reliability. ★ ensemble de surveillance (de sécurité) → *ensemble 14.* R контрольный прибор (установка). D Anregekanal. E equipo de vigilancia (de seguridad). I complesso di misura di protezione. N controleopstelling. P urządzenie pomiarowosygnalizacyjne. S (säkerhets)moniteringsanordning. (392)
16. **sequential monitoring** (of programme) : monitoring of short samples from a number of programmes, one after another, in a continuous cycle. ★ contrôle séquentiel → *contrôle 20.* R последовательный контроль программ. (723)

mono

1. **(mono) filament** : → *filament 9*

monobloc

1. **monobloc battery** : → *battery 47*
2. **monobloc container** : → *container 2*

monochromatic

1. **(monochromatic) radiance temperature** : → *temperature 29*
2. **monochromatic radiation** : → *radiation 44*
3. **monochromatic radiation** : → *radiation 45*
4. **monochromatic stimulus** : → *stimulus 9*

monochromator

1. **monochromator** : an instrument for selecting narrow portions of the optical spectrum. ★ monochromateur → *monochromateur 1.* R монохроматор. D Monochromator. E monocromador. I monocromatore. N monochromator. P monochromator. S monokromator. (731)

monochrome

1. **monochrome television** (*Syn.* black and white television) : → *television 1*

monoenergetic

1. **monoenergetic radiation** : → *radiation 46*

monolithic

1. **antisymmetric frequency of a monolithic bipole vibrator** : → *frequency 9*
2. **monolithic bipole vibrator** : → *vibrator 3*
3. **monolithic filter** : → *filter 31*
4. **monolithic multiple pole vibrator** : → *vibrator 4*
5. **symmetric frequency of a monolithic bipole vibrator** : → *frequency 186*

monomotor

1. **monomotor drive** : → *drive 17*

monophonic

1. **compatible monophonic signal** : → *signal 55*
2. **monophonic record** : → *record 6*
3. **monophonic recording** : → *recording 15*
4. **monophonic recording/reproduction** : → *reproduction 2*
5. **monophonic reproduction** : → *reproduction 3*
6. **monophonic signal** : → *signal 124*

monophony

1. **monophony** : a sound control, recording, transmission, or reproduction technique which does not provide the listener with a sensation of spatial distribution of sound sources. ★ monophonie → *monophonie 1.* R монофония. (723)
2. **monophony** (*Syn.* monophonic recording/reproduction) : → *reproduction 2*

monopolar

1. **monopolar d.c. link** : → *link 29*

2. **monopolar line** : → *line 112*

monopole

1. **effective monopole radiated power** : → *power 36*
2. **folded monopole (antenna)** (*Syn.* folded unipole (antenna)) : a monopole antenna formed from half a folded dipole, with the unfed element directly connected to the conductive surface. ★ antenne unipolaire repliée → *antenne 127.* R петлевой несимметричный вибратор. D Faltmonopol; Viertelwellen-Faltantenne. E monopolo plegado (antena); antena unipolar plegada. I monopolo ripiegato. N gevouwen unipolaire antenne. P unipol pętlowy. S vikt monopol. (712)
3. **monopole** (*Syn.* simple sound source) : → *source 30*
4. **monopole (antenna)** (*Syn.* unipole (antenna)) : an antenna composed of one or more conductors usually rectilinear, perpendicular to a conductive surface, and energized between the conductive surface and the near end of the conductors. ★ antenne unipolaire → *antenne 125.* R несимметричный вибратор. D Monopol (-Antenne). E monopolo (antena); antena unipolar. I monopolo. N unipolaire antenne. P antena unipolowa; unipol. S monopol. (712)
5. **sleeve monopole (antenna)** (*Syn.* sleeve stub (antenna) (antenna)) : an antenna consisting of half a sleeve dipole projecting from a conductive plane surface. ★ antenne unipolaire à manchon → *antenne 126.* R трубчатый несимметричный вибратор; трубчатая штыревая антенна. D Hülsenmonopol; Viertelwellen-Hülsenstrahler. E monopolo de manguito (antena). I monopolo con manicotto; monopolo a cannocchiale. N unipolaire antenne met manchet. P unipol rękawowy. S ärmmonopol. (712)
6. **strength of a monopole** (*Syn.* strength of a simple sound source) : → *strength 7*
7. **vertical monopole (antenna)** (*Syn.* vertical unipole (antenna)) : a monopole antenna vertically oriented for which the conductive surface is the earth, whose conductivity in the vicinity of the antenna is enhanced by a ground system or a counterpoise. ★ antenne verticale au sol → *antenne 128.* R вертикальный несимметричный вибратор. D Vertikalantenne; Vertikalmonopol. E monopolo vertical (antena); antena unipolar vertical. I monopolo verticale. N verticale unipolaire antenne. P unipol pionowy. S vertikalantenn. (712)

monorails

1. **skip monorails** : a rail-guided charging device along which containers are continuously moved, so that each container may be tilted at the terminal point to discharge its contents. ★ monorail à balancelles → *monorail 1.* R скиповые монорельсы. D Einschienenhängebahn. E monocarril de vasijas. I benna monorotaia. N kipbakmonorail. P ładowarka szynowa o kubłach przechyłowych. S ..... (841)

monoscope

1. **monoscope** (in television) : an electron-beam tube capable of providing a picture signal derived from a fixed given image on an electrode inside the tube. ★ monoscope → *monoscope 1.* R моноскоп. D Monoskop. E monoscopio. I monoscopio. N monoscoop. P monoskop. S monoskop. (531,723)

monostable

1. **monostable circuit** (*Syn.* monostable trigger circuit) : → *circuit 121*
2. **monostable relay** : → *relay 18*
3. **monostable trigger circuit** : → *circuit 121*

monostatic

1. **(ionospheric) monostatic sounding** : → *sounding 5*

monthly

1. **annual, quarterly, monthly, weekly daily, maximum demand** : → *demand 1*
2. **monthly mean solar radio-noise flux** : → *flux 18*

Morse

1. **Morse code** : → *code 38*
2. **Morse key** : → *key 10*
3. **Morse telegraphy** : → *telegraphy 8*
4. **Morse undulator** : → *undulator 1*

mosaic

1. **mosaic** (in scanning equipment) : a surface made up of a number of mutually insulated, photo-sensitive elements that serve to convert an optical image into an electronic image. ★ mosaïque → *mosaïque 2.* R мозаика. (723)
2. **mosaic effect** : → *effect 44*
3. **mosaic telegraphy** : → *telegraphy 9*

MOSFET

1. **MOSFET** (*Syn.* metal-oxide-semiconductor field-effect transistor) : → *transistor 8*

Mössbauer

1. **Mössbauer effect** : → *effect 45*

mother

1. **mother** (*Syn.* metal positive) : → *metal 8*

mother-daughter

1. **mother-daughter board (connector)** : → *connector 35*

motion

1. **fast motion** : reproduction of a sequence of recorded pictures at a speed faster than the rated recording speed. ★ (mouvement) accéléré → *mouvement 1.* R быстрое движение. D Zeitraffer. E movimiento rápido. I sequenza accelerata. N versnelde weergave. P odtwarzanie przyspieszone. S snabbavspelning. (806)
2. **reverse motion** : reproduction of a sequence of pictures, recorded at the rated speed, in the reverse direction to that in which they were recorded. ★ mouvement arrière → *mouvement 2.* R обратное движение. D Wiedergabe rückwärts. E movimiento inverso; rebobinado. I sequenza all'indietro. N omgekeerde weergave. P odtwarzanie wsteczne. S baklängesavspelning. (806)
3. **reverse slow motion** : reproduction in slow motion of a sequence of pictures, recorded at the rated speed, in the reverse direction to that in which they were recorded. ★ ralenti arrière → *ralenti 2.* R обратное замедленное движение. D Zeitlupe rückwärts. E movimiento lento inverso; rebobinado lento. I sequenza rallentata all'indietro. N omgekeerde vertraagde weergave. P odtwarzanie wsteczne zwolnione. S långsam baklängesavspelning. (806)
4. **slow motion** : reproduction of a sequence of recorded pictures at a speed slower than the rated recording speed. ★ (mouvement) ralenti → *mouvement 6.* R замедленное движение. D Zeitlupe. E movimiento lento. I sequenza rallentata. N vertraagde weergave. P odtwarzanie zwolnione. S långsam avspelning; «slow motion». (806)
5. **step motion** : a facility for selecting the next or previous picture in the recorded sequence. ★ commande pas à pas → *commande 105.* R шаговое движение. D Einzelbild. E movimiento a pasos. I avanzamento passo passo. N weergave beeld voor beeld. P przeglądanie poklatkowe. S stegvis avspelning. (806)

motional

1. **motional admittance** : → *admittance 10*
2. **motional capacitance** : → *capacitance 12*
3. **motional impedance** : → *impedance 39*
4. **motional inductance** : → *inductance 5*
5. **motional resistance** : → *resistance 38*

motive

1. **motive power tariff** : → *tariff 21*

motor

1. **adjustable constant speed motor** : an adjustable-speed motor which behaves at all speed settings as a constant-speed motor: e.g. a direct current shunt motor with field resistance control designed for a specified range of speed adjustment. ★ moteur à vitesse réglable et constante → *moteur 63.* R двигатель с постоянной скоростью вращения на регулируемых ступенях. D Motor mit stellbaren konstanten Drehzahlen. E motor de velocidad regulable y constante. I motore a velocità costante e regolabile. N motor met instelbaar constant toerental. P silnik o nastawianych stałych prędkościach. S motor med inställbart fast varvtal. (411)

2. **adjustable speed motor** : a motor the speed of which for a given load can be adjusted to any value in a specified range. ★ moteur à vitesse réglable → *moteur 62.* R двигатель с регулируемой скоростью вращения. D Motor mit stellbarer Drehzahl. E motor de velocidad regulable. I motore a velocità regolabile. N motor met instelbaar toerental. P silnik o nastawianej prędkości. S motor med inställbart varvtal. (411)
3. **adjustable varying speed motor** : an adjustable-speed motor which behaves at all speed settings as a varying-speed motor: e.g. a direct current series motor with armature voltage control or wound rotor induction motor with continuously variable rotor resistance control. ★ moteur à vitesse réglable et variable → *moteur 64.* R двигатель с переменной скоростью вращения на регулируемых ступенях. D Motor mit stellbaren veränderlichen Drehzahlen. E motor de velocidad regulable y variable. I motore a velocità variabile e regolabile. N motor met instelbaar belastingafhankelijk toerental. P silnik o nastawianych zmiennych prędkościach. S motor med inställbart varierande varvtal. (411)
4. **air gap (of a linear traction motor)** : → *air-gap 3*
5. **alternating current commutator motor** : an alternating current motor having an armature winding connected to its commutator and included in an alternating current circuit. ★ moteur à collecteur → *moteur 23.* R коллекторный двигатель переменного тока. D Wechselstrom-Kommutatormotor. E motor de colector. I motore a collettore a corrente alternata. N wisselstroomcommutatormotor. P silnik komutatorowy prądu przemiennego. S växelströmskommutatormotor. (411)
6. **alternating current motor** : a motor for operation by alternating current. ★ moteur à courant alternatif → *moteur 27.* R двигатель переменного тока. D Wechselstrommotor. E motor de corriente alterna. I motore a corrente alternata. N wisselstroommotor. P silnik prądu przemiennego. S växelströmsmotor. (411)
7. **armature (of a linear traction motor)** : → *armature 3*
8. **asynchronous motor** : an alternating current motor in which the speed of the motor is not in a fixed ratio with the frequency of the current supplied. ★ moteur asynchrone → *moteur 66.* R асинхронный двигатель. D Asynchronmotor. E motor asíncrono. I motore asincrono. N asynchroonmotor. P silnik asynchroniczny. S asynkronmotor. (811)
9. **axle-hung motor** (*Syn.* nose-suspended motor) : a motor supported on one side by bearings on the driving axle and on the other side by a bracket called a "nose" on its frame connecting it to the frame of the bogie or vehicle. ★ moteur à suspension par le nez → *moteur 54.* R двигатель с опорно-осевой подвеской. D Tatzlagermotor. E motor con suspensión por la nariz. I motore sospeso a naso. N motor in tramophanging. P silnik zawieszony (za nos). S tasslagerupphängd motor. (811)
10. **bogie-mounted motor** : a motor carried on the bogie frame. ★ moteur à suspension dans le bogie → *moteur 52.* R двигатель с подвеской на раме тележки. D am Drehgestell befestigter Motor. E motor con suspensión en el bogie. I motore sospeso sul carrello. N motor in het draaistel. P silnik zamocowany na wózku. S boggimonterad motor. (811)
11. **cage synchronous motor** : a salient pole synchronous motor having a cage winding embedded in the pole shoes. ★ moteur synchrone à cage → *moteur 97.* R синхронный двигатель с клеткой. D Synchronmotor mit Dämpferkäfig. E motor síncrono de jaula. I motore sincrono a gabbia. N synchrone motor met kooi(wikkeling). P silnik synchroniczny wydatnobiegunowy z klatką rozruchową. S synkronmotor med burlindning. (411)
12. **capacitor motor** : a split phase motor with a capacitor normally in series with the auxiliary primary winding. ★ moteur à condensateur → *moteur 24.* R конденсаторный двигатель. D Kondensatormotor. E motor con condensador. I motore con condensatore di avviamento. N eenfasemotor met condensator; condensatormotor. P silnik kondensatorowy. S enfasmotor med kapacitiv hjälpfas. (411)
13. **capacitor start and run motor** (UK) (*Syn.* permanent split capacitor motor (USA)) : a capacitor motor in which the auxiliary primary winding and series connected capacitor remain in circuit for both starting and running. ★ moteur à condensateur permanent → *moteur 26.* R конденсаторный двигатель с постоянно включенным конденсатором. D Motor mit einem Kondensator für Anlauf und Betrieb. E motor con condensador permanente. I motore con condensatore di avviamento e marcia. N eenfasemotor met continucondensator. P silnik z kondensatorowym uzwojeniem pomocniczym. S kondensatormotor. (411)
14. **capacitor start motor** : a capacitor motor in which the auxiliary primary winding connected in series with a capacitor is in circuit only during the starting period. ★ moteur à démarrage par condensateur → *moteur 31.* R двигатель с конденсаторным пуском. D Einphasenmotor mit Anlaufkondensator. E motor de arranque con condensador. I motore con avvolgimento ausiliario per avviamento a condensatore. N eenfasemotor met aanzetcondensator. P silnik z kondensatorowym uzwojeniem rozruchowym. S enfasmotor med kapacitiv startfas. (411)
15. **compensated motor** : a motor equipped with compensating field windings to diminish the effect of armature reaction. ★ moteur compensé → *moteur 70.* R компенсированный двигатель. D kompensierter Motor. E motor compensado. I motore compensato. N motor met compensatiewikkelingen; gecompenseerde motor. P silnik skompensowany. S kompenserad motor. (811)
16. **compensated repulsion motor** : a repulsion motor in which the primary winding on the stator is connected in series with the rotor winding via a second set of brushes on the commutator in order to improve the power factor and commutation. ★ moteur à répulsion compensé → *moteur 51.* R компенсированный репульсионный двигатель. D kompensierter Repulsionsmotor. E motor de repulsión compensado. I motore a repulsione compensato. N gecompenseerde repulsiemotor. P silnik repulsyjny skompensowany. S kompenserad repulsionsmotor. (411)
17. **compound motor (cumulative or differential)** : motor with both series and shunt (or separate) excitation, the two fields assisting or opposing each other. *Note.* — When series excitation predominates and is opposed by the shunt excitation, the motor is called a "differential shunt motor". ★ moteur compound → *moteur 71.* R двигатель смешанного возбуждения (согласного или встречного). D Verbundmotor; Doppelschlußmotor. E motor compound. I motore ad eccitazione composta. N compoundmotor. P silnik szeregowo-bocznikowy. S kompoundmagnetiserad motor. (811)
18. **constant speed motor** : a motor the speed of which is constant or substantially constant over its normal range of loads: e.g. a synchronous motor, an induction motor with small slip or a direct current shunt motor with constant excitation. ★ moteur à vitesse constante → *moteur 61.* R двигатель с постоянной скоростью вращения. D Motor mit konstanter Drehzahl (Nebenschlußverhalten). E motor de velocidad constante. I motore a velocità costante. N motor met constant toerental. P silnik o (praktycznie) stałej prędkości. S enhastighetsmotor. (411)
19. **d.c. motor vehicle** : → *vehicle 3*
20. **definite purpose motor** : a motor designed, listed and offered in standard ratings with operating characteristics and mechanical construction suitable for use on a particular type of application. ★ moteur à usage déterminé → *moteur 56.* R двигатель определенного назначения. D Motor für bestimmte Zwecke. E motor de uso determinado. I motore per impiego determinato. N motor voor gerichte toepassing. P silnik określonego zastosowania. S motor för bestämt ändamål. (411)
21. **Déri motor** : a repulsion motor having two sets of brushes of which one set is fixed and the other movable. ★ moteur Déri → *moteur 79.* R репульсионный двигатель с двумя комплектами щеток (двигатель Дери). D Déri-Motor. E motor Deri. I motore Deri. N Derimotor. P silnik Deri'ego. S Derimotor. (411)
22. **diesel-electric motor vehicle** : → *vehicle 4*
23. **direct current motor** : a motor for operation by direct current. ★ moteur à courant continu → *moteur 28.* R двигатель постоянного тока. D Gleichstrommotor. E motor de corriente continua. I motore a corrente continua. N gelijkstroommotor. P silnik prądu stałego. S likströmsmotor. (411,811)
24. **double commutator motor** : a traction motor having two commutators mounted on the same shaft in the same frame. ★ moteur à double collecteur → *moteur 34.* R двухколлекторный двигатель. D Doppelkommutatormotor. E motor de doble colector. I motore a doppio collettore. N motor met dubbele commutator. P silnik dwukomutatorowy. S motor med två kommutatorer. (811)
25. **double motor** : a traction motor having two armatures mounted on parallel shafts in the same frame. ★ moteur double → *moteur 80.* R сдвоенный двигатель.

D Doppelmotor. E motor doble. I motore doppio (ad alberi paralleli). N dubbelmotor. P silnik bliźniaczy. S dubbelmotor. (811)

26. **dual frequency motor vehicle** : → *vehicle 5*
27. **dual system motor vehicle** : → *vehicle 6*
28. **dual voltage motor vehicle** : → *vehicle 7*
29. **(electric) motor** : an electric machine that converts electric energy into mechanical energy. ★ moteur (électrique) → *moteur 81.* R (электрический) двигатель. D Elektromotor; Motor. E motor (eléctrico). I motore (elettrico). N (elektro)motor. P silnik (elektryczny). S elmotor. (151)
30. **field system (of a linear traction motor)** : → *system 71*
31. **force-ventilated motor** : a ventilated motor for which the cooling air is supplied by a power source independant of its own shaft. ★ moteur à ventilation forcée → *moteur 59.* R двигатель с принудительной вентиляцией. D fremdbelüfteter Motor. E motor de ventilación forzada. I motore a ventilazione forzata. N motor met geforceerde ventilatie. P silnik o przewietrzaniu wymuszonym. S separatventilerad motor. (811)
32. **fractional horsepower motor** : a motor having a continuous rating not exceeding 1 h.p. per 1 000 rev/min. ★ moteur (de puissance) fractionnaire → *moteur 76.* R ..... D ..... E motor (de potencia) fraccionario. I motore frazionario. N ..... P ..... S ..... (411)
33. **frame-mounted motor** : a motor fixed rigidly to the vehicle or bogie frame, driving one or more axles through a flexible drive. ★ moteur entièrement suspendu → *moteur 82.* R двигатель с опорно-рамной подвеской. D Gestellmotor. E motor enteramente suspendido. I motore interamente sospeso. N motor met flexibele aandrijving. P silnik zamocowany sztywno na ramie. S styvt monterad motor. (811)
34. **full voltage motor** : a motor designed to work at the nominal supply voltage of the traction circuit. ★ moteur à pleine tension → *moteur 44.* R двигатель полного напряжения. D Vollspannungsmotor. E motor a plena tensión. I motore a piena tensione. N motor voor volle spanning. P silnik na pełne napięcie. S ..... (811)
35. **general purpose motor** : any motor designed, listed and offered in standard ratings with operating characteristics and mechanical construction suitable for use under usual service conditions without restrictions to a particular application or type of application. ★ moteur à usage général → *moteur 57.* R двигатель общего назначения. D Motor für allgemeine Zwecke. E motor de uso general. I motore di impiego generico. N motor voor algemene toepassing. P silnik ogólnego zastosowania. S motor för allmänbruk. (411)
36. **half-voltage motor** : a motor designed to work as one of two motors connected permanently in series supplied at the nominal voltage of the traction circuit. ★ moteur à demi-tension → *moteur 33.* R двигатель на 1/2 напряжения. D Halbspannungsmotor. E motor a semi-tensión. I motore a metà tensione. N motor voor halve spanning. P silnik na pół napięcia. S ..... (811)
37. **hollow shaft motor drive** : → *drive 13*
38. **hysteresis motor** : a synchronous motor with a smooth cylindrical rotor of magnetic material, preferably of hard retentivity and without direct current excitation, which starts by virtue of the hysteresis losses induced in its secondary member by the rotating field of the primary member and operates normally at synchronous speed due to the retentivity of the secondary core. ★ moteur à hystérésis → *moteur 42.* R гистерезисный двигатель. D Hysteresismotor. E motor de histéresis. I motore ad isteresi. N hysteresismotor. P silnik histerezowy. S hysteresmotor. (411)
39. **inductor type synchronous motor** : an inductor machine running as a motor, the torque being produced by forces between the stationary poles and salient rotor teeth. ★ moteur synchrone à fer tournant → *moteur 98.* R синхронный двигатель индукторного типа. D Induktor-Synchronmotor. E motor síncrono de hierro giratorio. I motore sincrono a ferro rotante. N inductormotor. P silnik induktorowy. S synkronmotor av induktortyp. (411)
40. **linear reluctance motor** : a linear synchronous motor which starts from rest as an induction motor but, owing to widely differing reluctance in parts of its magnetic circuits, creates a travelling field which enables it to lock on to synchronous speed. ★ moteur linéaire à réluctance → *moteur 86.* R линейный реактивный синхронный двигатель. D Reluktanz-Linearmotor. E motor lineal con reluctancia. I motore lineare a riluttanza. N lineaire reluctantiemotor. P silnik liniowy reluktancyjny. S linjär reluktansmotor. (811)
41. **linear synchronous motor** : a linear motor whose operation is synchronous. ★ moteur linéaire synchrone → *moteur 88.* R линейный синхронный двигатель. D Synchron-Linearmotor. E motor lineal síncrono. I motore lineare sincrono. N lineaire synchroonmotor. P silnik liniowy synchroniczny. S linjär synkromotor. (811)
42. **linear (traction) motor** : a traction motor developed on to one plane, only one element of the motor, the field or armature, being carried on the vehicle, the other being fixed to the track. ★ moteur (de traction) linéaire → *moteur 78.* R линейный двигатель. D Linear-Fahrmotor. E motor (de tracción) lineal. I motore (di trazione) lineare. N lineaire (tractie)motor. P silnik liniowy. S linjär (traktions)motor. (811)
43. **longitudinally mounted motor** : a motor whose axis is parallel to that of the track. ★ moteur longitudinal → *moteur 89.* R продольно устанавливаемый двигатель. D Längsmotor. E motor longitudinal. I motore longitudinale. N langsmotor. P silnik zamontowany wzdłużnie. S longitudinellt monterad motor. (811)
44. **maximum load of a motor vehicle** : → *load 63*
45. **mercury motor meter** : → *meter 31*
46. **motor** : a machine which converts electrical power into mechanical power. ★ moteur → *moteur 21.* R двигатель. D Motor. E motor. I motore. N (elektro)motor. P silnik. S (el) motor. (411)
47. **motor baggage car** (*Syn.* motor luggage van) : → *van 1*
48. **motor car** (*Syn.* motor coach) : → *coach 2*
49. **motor characteristic** : → *characteristic 57*
50. **motor coach** : → *coach 2*
51. **(motor) combination** : → *combination 6*
52. **motor connection box** : → *box 10*
53. **motor convertor** : → *convertor 33*
54. **motor generator set** : → *set 33*
55. **motor luggage van** : → *van 1*
56. **motor running capacitor** : → *capacitor 50*
57. **motor set** : → *set 34*
58. **motor starting capacitor** : → *capacitor 51*
59. **motor suspension bearing (for nose-suspended motor)** : → *bearing 21*
60. **motor suspension bearing (for nose-suspended motor)** : → *bearing 21*
61. **motor synchronizing** : → *synchronizing 6*
62. **(motor) train-unit** : → *train-unit 1*
63. **motor uniselector** : → *uniselector 1*
64. **motor vehicle** : → *vehicle 12*
65. **motor with combined ventilation** : a motor fitted with both forced and self-ventilation. ★ moteur à ventilation mixte → *moteur 60.* R двигатель со смешанной вентиляцией. D Motor mit Eigen- und Fremdbelueftung. E motor de ventilación mixta. I motore a ventilazione mista. N motor met gecombineerde ventilatie. P silnik o przewietrzaniu mieszanym. S själv- och separatventilerad motor. (811)
66. **multi-constant speed motor** : a multi-speed motor whose two or more definite speeds are constant or substantially constant over its normal range of loads: e.g. an induction motor with windings capable of various pole groupings. ★ moteur à plusieurs vitesses constantes → *moteur 46.* R двигатель с несколькими постоянными скоростями вращения. D Motor mit mehreren konstanten Drehzahlen. E motor de varias velocidades constantes. I motore a piú velocità costanti. N motor met verscheidene constante toerentallen. P silnik o wielu stałych prędkościach. S flerhastighetsmotor med fasta varvtal. (411)
67. **multi-speed motor** : a motor which can be operated at any one of two or more definite speeds at a given load: e.g. a change pole induction motor or a d.c. shunt motor with pre-set speed adjustment. ★ moteur à plusieurs vitesses → *moteur 45.* R многоскоростной двигатель. D Motor mit mehreren Drehzahlen. E motor de varias velocidades. I motore a piú velocità. N motor met verscheidene toerentallen. P silnik o wielu prędkościach. S flerhastighetsmotor. (411)
68. **multi-system motor vehicle** : → *vehicle 13*
69. **multi-varying speed motor** : a multi-speed motor whose two or more definite speeds, when once adjusted for a given load, will vary appreciably with change in load: e.g. a wound-rotor induction motor with contactor rotor resistance. ★ moteur à

plusieurs vitesses variables → *moteur 47.* R двигатель с несколькими переменными скоростями вращения. D Motor mit mehreren veränderlichen Drehzahlen. E motor de varias velocidades variables. I motore a piú velocità variabili. N motor met verscheidene belastingafhankelijke toerentallen. P silnik o wielu zmieniających się prędkościach. S flerhastighetsmotor med varierande varvtal. (411)

70. **non-driving motor vehicle** : → *vehicle 15*
71. **normal load of a motor vehicle** : → *load 67*
72. **nose-suspended motor** (*Syn.* axle-hung motor) : → *motor 9*
73. **output of a motor vehicle** : → *output 47*
74. **permanent magnet synchronous motor** : a synchronous motor in which the field system consists of one or more permanent magnets. ★ moteur synchrone à aimants permanents → *moteur 96.* R синхронный двигатель с постоянными магнитами. D Dauermagnet-Synchronmotor. E motor síncrono de imanes permanentes. I motore sincrono a magneti permanenti. N synchrone motor met permanente magneten. P silnik synchroniczny o magnesach trwałych. S permamagnetmotor. (411)
75. **permanent split capacitor motor** (*Syn.* capacitor start and run motor) : → *motor 13*
76. **polyphase motor** : a motor for operation by polyphase alternating current. ★ moteur polyphasé → *moteur 91.* R двигатель многофазного переменного тока. D Vielphasenwechselstrommotor. E motor polifásico. I motore polifase. N meerfasenmotor. P silnik wielofazowy. S flerfasfmotor. (811)
77. **pulsed current motor** : a motor for operation by pseudo d.c. supplied e.g. by a chopper. ★ moteur à courant pulsé → *moteur 30.* R двигатель импульсного тока. D Stromstellermotor (Chopper-Motor). E motor de corriente pulsatoria. I motore a corrente pseudo-continua. N motor voor pulserende stroom. P silnik prądu pulsującego. S motor för pulserande ström. (811)
78. **rack motor vehicle** : → *vehicle 20*
79. **reactor start split phase motor** : a split phase motor designed for starting with a reactor normally in series with the main primary winding. *Note.* — The auxiliary primary circuit is opened and the reactor is short-circuited or otherwise made ineffective when the motor has attained an appropriate speed. ★ moteur à enroulement auxiliaire de démarrage par réactance → *moteur 36.* R двигатель с расщепленной фазой и пусковым реактором. D Einphasenmotor mit Hilfswicklung und Drosselspule. E motor con devanado auxiliar de arranque por reactancia. I motore con avvolgimento ausiliario per avviamento a reattanza. N eenfasemotor met smoorspoelhulpwikkeling. P silnik z indukcyjnym uzwojeniem rozruchowym. S enfasmotor med reaktiv startfas. (411)
80. **reluctance motor** : a synchronous motor in which the secondary member has projections acting as salient poles without an excitation winding or permanent magnets. It is normally provided with a cage winding for starting as an induction motor. ★ moteur à réluctance → *moteur 48.* R реактивный двигатель. D Reluktanzmotor. E motor de reluctancia. I motore a riluttanza. N reluctantiemotor. P silnik reluktancyjny. S reluktansmotor. (411)
81. **repulsion motor** : a single-phase induction motor with a primary winding, on the stator, connected to the power source, and a secondary winding, on the rotor, connected to a commutator the brushes of which are short-circuited and can occupy different positions. ★ moteur à répulsion → *moteur 50.* R репульсионный двигатель. D Repulsionsmotor. E motor de repulsión. I motore a repulsione. N repulsiemotor. P silnik repulsyjny. S repulsionsmotor. (411)
82. **resistance start split phase motor** : a split phase motor in which the auxiliary primary winding is connected in series with a resistor or provides itself the necessary resistance. *Note.* — The auxiliary circuit is opened when the motor has attained an appropriate speed. ★ moteur à enroulement auxiliaire de démarrage par résistance → *moteur 37.* R двигатель с расщепленной фазой и пусковым активным сопротивлением. D Einphasenmotor mit Hilfswicklung und Widerstand. E motor con devanado auxiliar de arranque por resistencia. I motore con avvolgimento ausiliario per avviamento a resistenza. N eenfasemotor met weerstandshulpwikkeling. P silnik z oporowym uzwojeniem rozruchowym. S enfasmotor med resistiv startfas. (411)
83. **Schrage motor** : a polyphase commutator motor with shunt characteristic, in which the rotor carries two windings, one of the windings receiving current from the supply by means of collector rings while the other is connected to the commutator. The commutator carries two adjustable sets of brushes and supplies each of the separate phases on the stator with adjustable voltages, in order to obtain a variation of speed and of the reactive power taken from the supply. ★ moteur Schrage → *moteur 92.* R многофазный коллекторный двигатель параллельного возбуждения с двойным комплектом щеток (типа шраге). D Schrage-Motor. E motor Schrage. I motore Schrage. N Schragemotor. P silnik Schragego. S Schragemotor. (411)
84. **segmental rim motor** : a rotor in which the rim is composed of interleaved segmental plates bolted together. ★ rotor à jante empilée → *rotor 12.* R ротор с составным ободом. D Blechkettenläufer (Schichtpolrad). E rotor segmentado. I rotore a corona laminata. N rotor met samengestelde velg. P wirnik z wieńcem segmentowym. S segmentrotor. (411)
85. **self-ventilated motor** : a ventilated motor with a fan on its shaft to provide its own cooling. ★ moteur autoventilé → *moteur 69.* R двигатель с самовентиляцией. D eigenbelüfteter Motor. E motor autoventilado. I motore autoventilato. N zelfventilerende motor. P silnik samoprzewiewny. S självventilerad motor. (811)
86. **separately excited motor** : a motor with excitation provided by an independent source. ★ moteur à excitation indépendante → *moteur 39.* R двигатель независимого возбуждения. D fremderregter Motor. E motor de excitación independiente. I motore ad eccitazione separata. N motor met onafhankelijke bekrachtiging. P silnik obcowzbudny. S separatmagnetiserad motor. (811)
87. **series motor** : a motor with excitation provided by a winding connected in series with the armature winding. ★ moteur série → *moteur 93.* R двигатель последовательного возбуждения. D Reihenschlußmotor. E motor serie. I motore (ad eccitazione) in serie. N seriemotor. P silnik szeregowy. S seriemotor. (811)
88. **shaded pole motor** : a single-phase induction motor having one or more auxiliary short-circuited windings displaced in magnetic position from the main winding, all these windings being on the primary core, usually the stator. ★ moteur à bague de déphasage → *moteur 22.* R двигатель с экранированным полюсом. D Spaltpolmotor. E motor de anillos de desfase. I motore a polo schermato. N spleetpoolmotor. P silnik ze zwartym uzwojeniem pomocniczym. S skärmpolsmotor. (411)
89. **shunt motor** : a motor with excitation provided by a winding connected in parallel with the armature winding. ★ moteur à excitation en dérivation → *moteur 38.* R двигатель параллельного возбуждения. D Nebenschlußmotor. E motor shunt. I motore ad eccitazione derivata. N shuntmotor. P silnik bocznikowy. S shuntmotor. (811)
90. **simulated series motor** : an undulating or pulsed current motor with separate excitation, the field current of which is controlled to give a torque characteristic resembling that of a series motor. ★ moteur à image-série → *moteur 43.* R двигатель с возбуждением по типу последовательного возбуждения. D Motor mit simulierter Reihenschlußcharakteristik (Kennlinien). E motor serie simulado. I motore a immagine serie. N gesimuleerde seriemotor. P silnik symulowany szeregowy. S ..... (811)
91. **single-phase a.c. motor vehicle** : → *vehicle 22*
92. **single-phase motor** : a motor for operation by single-phase alternating current. ★ moteur monophasé → *moteur 90.* R двигатель однофазного переменного тока. D Einphasenwechselstrommotor. E motor monofásico. I motore monofase. N eenfasemotor; wisselstroommotor. P silnik jednofazowy. S enfasmotor. (811)
93. **slip (of a linear traction asynchronous motor)** : → *slip 7*
94. **small-power motor** : a motor having a continuous rating not exceeding a provisionally accepted limit of 1.1 kW per 1500 rev/min. ★ moteur de faible puissance → *moteur 75.* R двигатель малой мощности. D Kleinmotor. E motor de pequeña potencia. I motore di piccola potenza. N kleine motor. P silnik małej mocy. S lågeffektmotor. (411)
95. **solid pole synchronous motor** : a salient pole synchronous motor having solid steel pole shoes. ★ moteur synchrone à pôles massifs → *moteur 99.* R синхронный двигатель с массивными полюсами. D Massivpol-Synchronmotor.

E motor síncrono de polos macizos. I motore sincrono a poli massicci. N synchrone motor met massieve poolschoenen. P silnik synchroniczny o litych nabiegunnikach. S synkronmotor med massiva poler. (411)

96. **special purpose motor** : a motor with special operating characteristics or special mechanical construction, or both, designed for a particular application and not falling within the definitions of general purpose or definite purpose motors. ★ moteur à usage spécial → *moteur 58.* R двигатель специального назначения. D Motor für Sonderzwecke. E motor de uso especial. I motore per impiego speciale. N motor voor bijzondere doeleinden. P silnik specjalnego zastosowania. S specialmotor. (411)

97. **split phase motor** : a single-phase induction motor having an auxiliary primary winding, displaced in magnetic position from and connected in parallel with the main primary winding. There is a phase displacement between the currents in these two windings. *Note.* — Unless otherwise specified, the auxiliary circuit is assumed to be opened when the motor has attained an appropriate speed. ★ moteur à enroulement auxiliaire de démarrage → *moteur 35.* R двигатель с расщепленной фазой. D Einphasenmotor mit Hilfswicklung. E motor con devanado auxiliar de arranque. I motore con avvolgimento ausiliario di avviamento. N eenfasemotor met hulpwikkeling. P silnik z uzwojeniem rozruchowym. S enfasmotor med hjälpfas. (411)

98. **stabilized shunt (motor)** : → *shunt 20*

99. **standard dimensioned motor** : a general or definite purpose motor so dimensioned that it is mechanically interchangeable as a whole with any other motor of the same frame size and complying with the same standard specification. ★ moteur de dimensions normales → *moteur 74.* R двигатель со стандартными размерами. D Normmotor. E motor de dimensiones normales. I motore di dimensioni normalizzate. N motor met standaardafmetingen. P silnik o znormalizowanych wymiarach. S motor med standarddimensioner. (411)

100. **subsynchronous reluctance motor** : a reluctance motor in which the number of projections acting as salient poles is greater than the number of the poles formed by the primary winding, this causing the motor to operate at a constant average speed which is a submultiple of its apparent synchronous speed. ★ moteur à réluctance subsynchrone → *moteur 49.* R реактивный синхронный двигатель с разным числом полюсов на роторе и статоре. D Untersynchron-Reluktanzmotor; Interferenzmotor. E motor de reluctancia subsíncrono. I motore subsincrono a riluttanza. N ondersynchrone reluctantiemotor. P silnik reluktancyjny podsynchroniczny. S tandmotor. (411)

101. **synchronous motor** : an alternating current motor in which the speed of the motor is in a fixed ratio with the frequency of the current supplied. ★ moteur synchrone → *moteur 95.* R синхронный двигатель. D Synchronmotor. E motor síncrono. I motore sincrono. N synchronemotor. P silnik synchroniczny. S synkronmotor. (411,811)

102. **synchronous speed (of a linear traction motor)** : → *speed 54*

103. **tandem motor** : a traction motor having two armatures mounted on one shaft in a common frame. ★ moteur tandem → *moteur 100.* R тандем-двигатель. D Tandemmotor. E motor tandem. I motore doppio (ad albero unico). N tandemmotor. P silnik dwuwirnikowy. S tandemmotor. (811)

104. **third-voltage motor** : a motor designed to work as one of three motors connected permanently in series supplied at the nominal voltage of the traction circuit. ★ moteur à tiers-tension → *moteur 55.* R двигатель на 1/3 напряжения. D Drittelspannungsmotor. E motor a tercio de tensión. I motore (alimentato) ad un terzo della tensione. N motor voor eenderde spanning. P silnik na jedną trzecią napięcia. S ..... (811)

105. **three-phase a.c. motor vehicle** : → *vehicle 27*

106. **three-phase motor** : a motor for operation by three-phase alternating current. ★ moteur triphasé → *moteur 101.* R двигатель трехфазного переменного тока. D Dreiphasenwechselstrommotor. E motor trifásico. I motore trifase. N driefasenmotor; draaistroommotor. P silnik trójfazowy. S trefasmotor. (811)

107. **thrust (of a linear traction motor)** : → *thrust 3*

108. **torque motor** : a machine designed to exert torque through a limited movement or in a stalled position. ★ moteur couple → *moteur 72.* R ..... D Drehmomentmotor. E motor par. I motore — coppia. N koppelmotor. P silnik momentowy. S vridmomentmotor. (411)

109. **totally-enclosed motor** : a motor with no deliberate connection between the outside and inside air except for draining and breathing and not fitted with equipment for internal cooling. ★ moteur fermé → *moteur 83.* R двигатель закрытого типа. D geschlossener Motor. E motor blindado. I motore chiuso. N gesloten motor. P silnik zamknięty. S helkapslad motor. (811)

110. **traction motor** : an electric motor driving one or more axles. ★ moteur de traction → *moteur 77.* R тяговый двигатель. D Fahrmotor. E motor de tracción. I motore di trazione. N tractiemotor. P silnik trakcyjny. S traktionsmotor. (811)

111. **traction motor isolating switch** : → *switch 59*

112. **triple motor vehicle** : → *vehicle 30*

113. **turbine motor vehicle** : → *vehicle 31*

114. **twin motor vehicle** : → *vehicle 32*

115. **two-value capacitor motor** : a capacitor motor using different values of capacitance for starting and running. ★ moteur à condensateur à deux capacités → *moteur 25.* R конденсаторный двигатель с двумя емкостями. D Kondensatormotor mit Anlauf- und Betriebskondensator. E motor con condensador de dos capacidades. I motore con condensatore di avviamento e marcia a diversa capacità. N eenfasemotor met aanzet- en continucondensator. P silnik z podwójnym kondensatorem. S kondensatormotor med startkondensator. (411)

116. **underframe-mounted motor** : a motor carried on the vehicle frame. ★ moteur à suspension dans le châssis → *moteur 53.* R двигатель с подвеской на раме кузова. D Unterflurmotor. E motor con suspensión en el chasis. I motore sospeso sulla cassa. N motor in wagenbak. P silnik zamocowany w nadwoziu. S ramverksmonterad motor. (811)

117. **undulating current motor** : a motor for operation by rectified current. ★ moteur à courant ondulé → *moteur 29.* R двигатель пульсирующего тока. D Mischstrommotor. E motor de corriente ondulada. I motore a corrente ondulata. N motor voor pulserende stroom. P silnik prądu wyprostowanego. S ..... (811)

118. **universal motor** : a motor which can be operated by either direct current or single phase alternating current of normal supply frequencies. ★ moteur universel → *moteur 102.* R универсальный двигатель. D Universalmotor. E motor universal. I motore universale. N universele motor. P silnik uniwersalny. S allströmsmotor. (411)

119. **varying speed motor** : a motor the speed of which varies appreciably with the load, ordinarily decreasing when the load increases: e.g. a series or repulsion motor. ★ moteur à vitesse variable → *moteur 65.* R двигатель с переменной скоростью вращения. D Motor mit veränderlicher Drehzahl (Reihenschlußverhalten). E motor de velocidad variable. I motore a velocità variabile. N motor met veranderlijk toerental. P silnik o zmieniającej się prędkości. S motor med seriekaraktär. (411)

120. **ventilated motor** : a motor cooled by means of air introduced from outside the motor. ★ moteur ventilé → *moteur 103.* R вентилируемый двигатель. D belüfteter Motor. E motor ventilado. I motore ventilato. N geventileerde motor. P silnik przewietrzany. S ventilerad motor. (811)

121. **ventilated totally-enclosed motor** : a motor so constructed that cooling air which passes through it does not pass over the windings, commutator or slip rings. ★ moteur fermé ventilé → *moteur 84.* R вентилируемый двигатель закрытого типа. D geschlossener belüfteter Motor (z. B. Mantelkuehlung). E motor blindado ventilado. I motore chiuso con ventilazione a mantello. N uitwendig geventileerde motor. P silnik zamknięty przewiewny. S ventilerad helkapslad motor. (811)

motorcoach

1. **(reversible) motorcoach train** (*Syn.* multiple unit train) : → *train 5*

motor-drive

1. **manual operation of motor-drive mechanism** : → *operation 32*
2. **motor-drive mechanism** : → *mechanism 10*

motor-driven

1. **motor-driven camshaft equipment** : → *equipment 52*

2. **motor-driven controller** : → *controller 7*
3. **motor-driven switchgroup** : → *switchgroup 5*

motor-generator

1. **motor-generator set** : → *set 35*

motoring

1. **motoring torque** : → *torque 14*

motorized

1. **motorized keyboard** : → *keyboard 5*

mould

1. **potting mould** : an accessory used as a mould into which potting compound is placed. ★ pot de compoundage → *pot 2.* R форма для заливки компаундом. D Vergußform. E molde de encapsulado. I forma per il riempimento (per resine di riempimento). N gietmal. P forma zalewowa. S gjutform. (581)
2. **vacuum arc furnace mould** : a water-cooled container usually of copper construction into which drops of molten metal from a consumable electrode collect to form an ingot. ★ creuset de four à arc sous vide → *creuset 3.* R изложница вакуумной дуговой печи. D Kokille eines Vakuum-Lichtbogenofens. E crisol de horno de arco al vacío. I crogiolo di forno ad arco sottovuoto. N gietvorm van vacuümboogoven. P tygiel wlewkowy (pieca łukowego). S kokill för ljusbågsugn. (841)

moulded-case

1. **moulded-case circuit-breaker** : → *circuit-breaker 15*

moulding

1. **compression moulding** : a process of forming a disk by compressing a charge of suitable plastic in a cavity. ★ moulage par compression → *moulage 2.* R формование прессованием. D Pressen. E moldeado por compresión. I stampaggio per compressione. N plunjerpersen. P formowanie tłoczne. S pressformning. (806)
2. **injection moulding** : a process of forming a disk by injection of a liquefied plastic material in a cavity. ★ moulage par injection → *moulage 3.* R формование литьем. D Spritzgiessen. E moldeado por inyección. I stampaggio per iniezione. N spuitgieten. P formowanie wtryskowe. S sprutformning. (806)
3. **moulding** : a process of forming, from a metal stamper, identical recorded plastic disks. ★ moulage → *moulage 1.* R формование. D Formen. E moldeado. I stampaggio. N persen. P formowanie (płyt gramofonowych). S formning. (806)
4. **moulding mica material** : → *material 31*

mount

1. **barretter mount** (*Syn.* bolometer mount) : → *mount 2*
2. **bolometer mount** (*Syn.* thermistor mount; barretter mount) : a transmission line termination essentially incorporating a bolometer. ★ montage bolométrique → *montage 14.* R болометрическая головка; термисторная головка; барреттерная голобка. D Bolometer-Messkopf; Thermistor-Messkopf; Barretter-Messkopf. E montaje bolométrico. I montaggio bolometrico. N (bolometer)(thermistor)(barretter) montering. P głowica bolometryczna; głowica termistorowa; głowica bareterowa. S bolometerhållare. (726)
3. **detector mount** : a terminated transmission line section loaded with a detecting device such as a semi-conductor diode provided with an output for the detected signal. ★ montage détecteur → *montage 20.* R детекторная головка. D Detektormesskopf. E montaje detector. I montaggio rivelatore. N detectorhouder. P głowica detekcyjna. S detektorhållare. (726)
4. **thermistor mount** (*Syn.* bolometer mount) : → *mount 2*

mounted

1. **flush mounted antenna** (*Syn.* conformal antenna) : → *antenna 33*
2. **longitudinally mounted motor** : → *motor 43*
3. **machine mounted circulating circuit component** : → *circulating circuit 4*
4. **separately mounted circulating circuit component** : → *circulating circuit 5*
5. **shaft-end mounted exciter** : → *exciter 8*

mounting

1. **float mounting** : a mounting method permitting movement to facilitate alignment of two mating components. ★ montage flottant → *montage 25.* R монтаж «плавающий». D schwimmende Montage. E montaje flotante. I montaggio flottante. N zelfzoekende montage. P montaż luźny. S flytande montering. (581)
2. **float mounting connector** : → *connector 26*
3. **mounting flange** : → *flange 13*
4. **mounting hole** : → *hole 13*
5. **mounting system** : → *system 118*
6. **single hole mounting** : a method of mounting a component which has a shoulder and a captivating device, through a single hole in a panel. ★ méthode de montage par écrou → *méthode 29.* R установка в одном отверстии. D Einloch-Montage. E método de montaje por tuerca. I montaggio a vite. N eengatsmontage. P montaż jednootworowy. S enhålsmontering. (581)
7. **surface mounting** : electrical connection of components on the surface of a conductive pattern without utilizing component holes. ★ montage en surface → *montage 24.* R монтаж на поверхности. D Auflötverfahren; Aufschweißverfahren. E montaje en superficie. I montaggio superficiale. N oppervlaktemontage. P montaż powierzchniowy. S ytanslutning. (541)

mouth

1. **artificial mouth** (*Syn.* mouth simulator) : device consisting of a loudspeaker unit mounted in a baffle or an enclosure so shaped as to have a radiation pattern similar to that of the average human mouth. ★ bouche artificielle → *bouche 1.* R искусственный рот. D künstlicher Mund. E boca artificial. I bocca artificiale. N mondsimulator. P usta sztuczne. S artificiell mun; mätmun. (722,801)
2. **mouth simulator** (*Syn.* artificial mouth) : → *mouth 1*

movable

1. **movable substation** (*Syn.* mobile substation) : → *substation 15*

movement

1. **differential movement** : the distance between the operating position and the release position. ★ déplacement différentiel → *déplacement 8.* R ход дифференциальный. D Differenzweg. E desplazamiento diferencial. I spostamento differenziale. N schakelweg. P droga różnicowa. S skillnadsrörelse. (581)
2. **fast forward movement** : an operation the purpose of which is to move the magnetic tape rapidly from the supply spool to the take-up spool without recording, reproduction or erasing. ★ avance rapide → *avance 5.* R перемотка вперед. D schneller Vorlauf. E avance rápido. I avanzamento rapido. N snel vooruitspoelen. P przewijanie szybkie w przód. S snabbframspolning. (806)
3. **propelling movement** : running in which the motor vehicle, coupled or not and with its crew, is located at the rear of the train and pushes it. ★ marche en refoulement → *marche 23.* R следование с локомотивом в хвосте поезда. D Schiebefahrt. E marcha por cola del tren. I treno spinto. N geduwd rijden. P jazda popychowa. S ..... (811)

moving

1. **moving armature** : → *armature 7*
2. **moving element** : → *element 30*
3. **moving grid** : → *grid 23*

moving-beam

1. **moving-beam therapy** : → *therapy 4*

moving-coil

1. **moving coil galvanometer** : → *galvanometer 4*
2. **moving-coil loudspeaker** (*Syn.* moving-conductor loudspeaker) : → *loudspeaker 14*
3. **moving-coil microphone** : → *microphone 23*
4. **permanent-magnet moving-coil instrument** : → *instrument 25*

moving-conductor

1. **moving-conductor loudspeaker** : → *loudspeaker 14*
2. **moving-conductor microphone** : → *microphone 24*

moving-iron

1. **moving-iron instrument** : → *instrument 22*

moving-magnet

1. **moving-magnet instrument** : → *instrument 23*

moving-scale

1. **moving-scale instrument** : → *instrument 24*

m-phase

1. ***m*-phase circuit** (*Syn.* polyphase circuit) : → *circuit 137*
2. ***m*-phase system** (*Syn.* polyphase system) : → *system 150*
3. ***m*-phase (voltage) source** : → *voltage source 4*

MPSK

1. **MPSK** (*Syn.* multiple phase shift keying) : → *keying 6*

MRT

1. **MRT** (*Syn.* mean repair time) : → *time 99*

MSK

1. **MSK** (*Syn.* minimum (phase frequency) shift keying) : → *keying 5*

MTBF

1. **MTBF** (*Syn.* mean operating time between failures) : → *operating 5*

MTTF

1. **MTTF** (*Syn.* mean time to failure) : → *time 103*

MTTFF

1. **MTTFF** (*Syn.* mean time to first failure) : → *time 104*

MTTR

1. **MTTR** (*Syn.* mean time to restoration) : → *time 106*

mu

1. **mu factor** (*Syn.* voltage factor) : → *factor 187*
2. **primary PCM group mu** : → *group 52*

mudrib

1. **mudribs** : ribs in the bottom of the container or pieces fitted into the bottom of the container which support the plate pack and allow particles of active material detached from the plates to settle without causing a short circuit between the plates. ★ tasseaux → *tasseau 1.* **R** ребра. **D** Prisma. **E** calzo. **I** prismi di appoggio. **N** slibschot. **P** progi. **S** bottenprisma. (486)

MUF

1. **basic MUF** : the highest frequency by which a radio wave can propagate between given terminals below the ionosphere, on a specified occasion, by ionospheric refraction alone. *Notes. 1* — Where the basic MUF is restricted to a particular ionospheric mode of propagation, the values may be quoted together with an indication of that mode, for example 2F2 MUF. *2* — If the extraordinary wave is involved, then this is noted, for example, 1F2 MUF(x). Absence of a specific reference to the magneto-ionic component implies that the quoted value relates to the ordinary wave. *3* — If it is desired to quote the ground range for which the basic MUF applies, this is indicated in kilometres following the indication of the mode type, for example 1F2 (4000) MUF. ★ MUF de référence → *MUF 1.* **D** Schräg-Grenzfrequenz; Basic MUF. **P** MUF podstawowa. (705)
2. **(operational) MUF** : the highest frequency that would permit acceptable performance of a radio circuit by signal propagation via the ionosphere between given terminals below the ionosphere at a given time, under specified working conditions. *Notes. 1* — Acceptable performance may for example be quoted in terms of maximum error ratio or required signal/noise ratio. *2* — Specified working conditions may include such factors as antenna types, transmitter power, class of emission and required information rate. *3* — The acronym MUF stands for "Maximum Usable Frequency". ★ MUF (d'exploitation) → *MUF 2.* **D** (Betriebs-)MUF. **P** częstotliwość użyteczna największa; MUF. (705)

muff

1. **muff** (*Syn.* reveal (USA)) : that part of the chimney above ground level, normally shaped as a pyramid to facilitate water drainage (see fig. 4.2). ★ pointe de diamant (d'une fondation) → *pointe 13.* **R** верхняя цакстьфундамента. **D** Fundamentkappe. **E** peana. **I** ..... **N** bovenkant van de poer; poerkop. **P** piramidka (opadowa). **S** plintöverdel. (466)

muffle

1. **continuous muffle furnace** : → *furnace 11*
2. **muffle furnace** : → *furnace 35*

muldem

1. **muldem** (*Syn.* muldex) : → *muldex 2*

muldex

1. **digital muldex** : the combination of a digital multiplexer and a digital demultiplexer in the same equipment but working in opposite directions. *Note.* — A digital muldex may be qualified by the digit rate or the multiplex order of the composite digital signal it handles. ★ muldex numérique → *muldex 2.* **R** цифровой мульдекс. **D** Digitalmuldex. **E** multiplexor desmultiplexor numérico; muldex numérico; muldem numérico. **I** multiplatore-demultiplatore numerico; muldex numerico. **N** digitale muldex. **P** krotnica cyfrowa nadawczo-odbiorcza. **S** digitalt muldem. (704)
2. **muldex** (*Syn.* muldem) : an assembly of a multiplexer and a demultiplexer operating in opposite directions of transmission in the same equipment. *Note.* — When used to describe an equipment, the function of that equipment should qualify the title, e.g. PCM muldex, data muldex, digital muldex. ★ muldex → *muldex 1.* **R** мульдекс. **D** Muldex; Muldem. **E** multiplexor — desmultiplexor. **I** multiplatore-demultiplatore; muldex; muldem. **N** muldem. **P** krotnica nadawczo-odbiorcza. **S** muldem. (704,721)

multi-address

1. **multi-address call** : → *call 44*

multi-anode

1. **multi-anode valve device** : → *valve device 6*

multiband

1. **multiband amplifier with n inputs** : → *amplifier 20*
2. **single-input multiband amplifier** : → *amplifier 27*

multi-beam

1. **multi-beam antenna** : → *antenna 76*

multiburst

1. **multiburst signal** : → *signal 125*

multi-cavity

1. **multi-cavity klystron** : → *klystron 4*

multi-cell

1. **multi-cell switch** : → *switch 27*

multicellular

1. **multicellular lens** : → *lens 14*
2. **multicellular loudspeaker** : → *loudspeaker 15*

multichannel

1. **multi-channel** : pertaining to or designating a transmission system in which two or more channels are used for transmission of the same signal propagating in the same direction between the same two points. ★ multivoie → *multivoie 3.* **R** передача по нескольким каналам. **D** Mehrkanal.... **E** multicanal. **I** canale multiplo. **N** meer dan een kanaal (met betrekking tot het aantal kanalen). **P** wielołącze. **S** flerkanals-. (721)
2. **multi-channel amplifier** : → *amplifier 21*
3. **multichannel analyzer** : → *analyzer 3*
4. **multichannel carrier transmission** : → *transmission 42*
5. **multichannel FDM transmission** (*Syn.* multichannel carrier transmission) : → *transmission 42*
6. **multichannel loudspeaker** : → *loudspeaker 16*
7. **multichannel PCM transmission** : → *transmission 44*
8. **multi-channel recording** : → *recording 17*
9. **multi-channel reproduction** : → *reproduction 4*

multi-component
1. **multi-component signal** : → *signal 126*

multiconductor
1. **multiconductor cable** : → *cable 44*
2. **multi-conductor element** (*Syn.* multi-wire element) : → *element 32*

multi-constant
1. **multi-constant speed motor** : → *motor 66*

multicore
1. **flat (multicore) cable** : → *cable 29*
2. **multicore cable** : → *cable 45*
3. **multi-core type current transformer** : → *transformer 43*

multicoupler
1. **multicoupler** (of an antenna) : a multiplexer generally comprising a broadband amplifier, for the connection of several receivers to one antenna without undesired interaction between the receivers or excessive degradation of the signal-to noise ratio. *Note.* — The english term "multicoupler" is sometimes used to refer to a diplexer for an HF antenna. ★ multicoupleur → *multicoupleur 1.* R многоканальный ответвитель (антенны); мультикуплер. D Mehrfachkoppler (einer Antenne). E multiacoplador (de antena). I accoppiatore multiplo. N meervoudige koppelaar. P sprzęgacz (antenowy) wielowyjściowy. S ..... (712)

multicycle
1. **multicycle control** : → *control 125*
2. **multicycle control** : → *control 126*
3. **multicycle control factor** : → *factor 121*
4. **synchronous multicycle control** : → *control 184*

multielectrode
1. **emission characteristic of a multielectrode tube** (*Syn.* diode characteristic) : → *characteristic 32*
2. **multi-electrode voltage stabilizing tube** : → *tube 55*

multi-element
1. **multi-element insulator** : → *insulator 21*

multifibre
1. **multifibre cable** : → *cable 46*
2. **multifibre joint** : → *joint 18*

multi-field
1. **multi-field therapy** : → *therapy 5*

multiframe
1. **multiframe** : a repetitive set of consecutive frames in which the relative position of each frame in the set can be identified. ★ multitrame → *multitrame 1.* R сверхцикл. D Mehrfachraster. E multitramo. I multitrama. N ..... P wieloramka. S multiram. (704)
2. **multiframe alignment** : → *alignment 9*
3. **multiframe alignment signal** : → *signal 127*

multifrequency
1. **multifrequency key pad** : → *pad 6*
2. **multi-frequency signalling** : → *signalling 27*

multi-function
1. **multi-function (measuring) instrument** : → *measuring instrument 15*

multilayer
1. **flexible multilayer printed board** : → *board 5*
2. **flex-rigid multilayer printed board** : → *board 9*
3. **multilayer printed board** : → *board 14*
4. **rigid multilayer printed board** : → *board 19*

multimeter
1. **multimeter** : a multi-range multi-function measuring instrument intended to measure voltage, current and sometimes other electrical quantities such as resistance. ★ multimètre → *multimètre 1.* R комбинированный (измерительный) прибор. D Vielfach-Messgerät. E multímetro. I multimetro. N multimeter. P multimetr. S multimeter. (301)

multimode
1. **multimode antenna** : → *antenna 77*
2. **multimode fibre** : → *fibre 13*
3. **multimode group delay** (*Syn.* differential mode delay) : → *delay 16*
4. **multimode horn** : → *horn 16*
5. **multimode laser** : → *laser 7*
6. **multimode waveguide** : → *waveguide 7*

multi-parameter
1. **(radiation) multi-parameter analyzing assembly** : → *analyzing 1*

multi-part
1. **multi-part tariff** : → *tariff 22*

multipath
1. **multipath propagation** : → *propagation 18*

multi-pattern
1. **multi-pattern antenna** (*Syn.* multi-beam antenna) : → *antenna 76*

multiphase
1. **multiphase compensation** : → *compensation 8*

multiple
1. **monolithic multiple pole vibrator** : → *vibrator 4*
2. **multiple** : interconnection of several inlets or outlets in a switching stage to the same traffic carrying device or traffic circuit. ★ multiplage → *multiplage 1.* R многократное подключение. D Vielfach. E múltiple. I ripartizione. N multipel(en). P wielokrocie. S väljarmultipel. (714)
3. **multiple access** : → *access 10*
4. **(multiple) antenna system** : → *system 120*
5. **multiple band antenna** : → *antenna 80*
6. **multiple circuit line** : → *line 113*
7. **multiple coach lighting** : → *lighting 22*
8. **multiple connection** : → *connection 35*
9. **multiple echo** : → *echo 16*
10. **multiple echo** : → *echo 17*
11. **multiple faults** : → *fault 60*
12. **multiple folded dipole** : → *dipole 17*
13. **multiple image** : → *image 20*
14. **multiple microphone** : → *microphone 25*
15. **multiple modulation** : → *modulation 42*
16. **multiple operator power source** : → *source 19*
17. **multiple phase shift keying** : → *keying 6*
18. **multiple piezoelectric resonator** : → *resonator 4*
19. **multiple point-to-point configuration** : → *configuration 10*
20. **multiple shot reclosing** : → *reclosing 6*
21. **multiple stranded conductor** : → *conductor 49*
22. **multiple tariff** : → *tariff 23*
23. **multiple tariff** (*Syn.* time-of-day tariff) : → *tariff 45*
24. **multiple teeing** : → *teeing 1*
25. **multiple tube** : → *tube 56*
26. **multiple unit operation** : → *operation 34*
27. **multiple unit train** : → *train 5*

multiple-gun
1. **multiple-gun cathode-ray tube** : → *cathode-ray tube 7*

multiple-speed
1. **multiple-speed floating action** : → *action 13*

multiple-unit
1. **multiple-unit steerable array** : → *array 13*

multiplex
1. **digital multiplex equipment** : → *equipment 22*
2. **digital multiplex hierarchy** : → *hierarchy 1*

3. **heterogeneous multiplex** : a multiplex system in which the derived channels do not all work at the same binary rate. *Note.* — Additional conditions can be added to qualify the binary rate condition. ★ multiplex hétérogène → *multiplex 4.* R неоднородное объединение каналов. D heterogenes Multiplex. E múltiplex heterogénea. I multiplex eterogeneo. N heterogene multiplex. P ukrotnienie niejednorodne. S heterogen multiplex. (721)
4. **homogeneous multiplex** : a multiplex system in which all the derived channels are at the same binary rate. *Note.* — Additional conditions can be added to qualify the binary rate condition. ★ multiplex homogène → *multiplex 5.* R однородное объединение каналов. D homogenes Multiplex. E múltiplex homogénea. I multiplex omogeneo. N homogene multiplex. P ukrotnienie jednorodne. S homogen multiplex. (721)
5. **multiplex** : designating or pertaining to an installation in which a common transmission channel is divided into several separate tributary channels each capable of transmitting signals independently in the same direction. ★ multiplex → *multiplex 3.* R мультиплексный; многоканальный. D Multiplex. E múltiplex. I multiplex. N multiplex. P ukrotnienie; multipleks. S multiplex. (721)
6. **multiplex aggregate bit rate** : → *rate 58*
7. **multiplex lap winding** : → *winding 39*
8. **multiplex signal** : → *signal 128*
9. **multiplex transmission** : → *transmission 45*
10. **multiplex wave winding** : → *winding 40*
11. **PCM multiplex equipment** : → *equipment 56*
12. **set of voice-frequency multiplex (telegraph) circuits** : → *set 47*
13. **stereophonic (multiplex) signal** : → *signal 224*
14. **telegraph multiplex** : designating or pertaining to an installation in which a common transmission channel is divided into several individual telegraph channels each capable of transmitting a telegraph signal independently in the same direction. ★ multiplex télégraphique → *multiplex 6.* R телеграфный мультиплексор. D Telegrafenmultiplex. E múltiplex telegráfico. I multiplex telegrafico. N ..... P krotnica telegraficzna. S telegrafmultiplex. (721)
15. **time division multiplex transmission** : → *transmission 72*
16. **voice-frequency multiplex telegraphy** : → *telegraphy 16*

multiplexed

1. **multiplexed signal** (*Syn.* multiplex signal) : → *signal 128*
2. **multiplexed transmission** (*Syn.* multiplex transmission) : → *transmission 45*

multiplexer

1. **digital multiplexer** : equipment for combining, by time division multiplexing, two or more tributary digital signals into a single composite digital signal. *Note.* — A digital multiplexer may be qualified by the digit rate or the multiplex order of the composite digital signal. ★ multiplexeur numérique → *multiplexeur 12.* R цифровой мультиплексор. D Digitalmultiplexer. E multiplexor numérico. I multiplatore numerico. N digitaalmultiplexer. P krotnica cyfrowa nadawcza; multiplekser cyfrowy. S digitalmultiplexor. (704)
2. **first data multiplexer** : equipment that receives a number of binary digit trains at the same or different binary rates and combines these on a time division basis into a single stream of binary digits at a rate equivalent to that of a pulse code multiplex channel time-slot of a multi-channel PCM system. ★ multiplexeur de données du premier ordre → *multiplexeur 3.* R мультиплексор данных первого порядка. D Primärdatenmultiplexer. E multiplexor de datos de primer orden. I multiplex primario. N eerste datamultiplexer. P multiplekser teledacyjny pierwszego rzędu. S primärmultiplexor. (721)
3. **multiplexer** : an equipment for effecting multiplexing. ★ multiplexeur → *multiplexeur 1.* R мультиплексор. D Multiplexer. E multiplexor. I multiplatore. N multiplexer. P krotnica nadawcza; multiplekser. S multiplexor. (704,721)
4. **multiplexer** (for an antenna) : a device which enables several transmitters or several receivers to operate simultaneously, without interaction, using one antenna. ★ multiplexeur → *multiplexeur 2.* R устройство уплотнения; мультиплексер (для антенны). D Multiplexer (für eine Antenne). E multiplexor (de antena). I multiplatore. N multiplexer (voor een antenne). P multiplekser (antenowy). S multiplexer. (712)
5. **second data multiplexer** : equipment that receives a number of binary digit trains from several first data multiplexers or a number of signals of equal modulation rate and combines these on a time division basis into a single stream of binary digits signalled at the digit rate of a primary digital group of a multi-channel PCM system. ★ multiplexeur de données du second ordre → *multiplexeur 4.* R мультиплексор данных второго порядка. D Sekundärdatenmutiplexer. E multiplexor de datos de segundo orden. I multiplex secondario. N tweede datamultiplexer. P multiplekser teledacyjny drugiego rzędu. S sekundärmultiplexor. (721)

multiplexing

1. **code division multiplexing** (*Syn.* CDM (abbreviation)) : multiplexing in which several independent signals are allotted orthogonal signals for transmission over a common channel. *Note.* — In code division multiplexing, the signal elements allotted to distinguish the channels are so shaped that they can be easily distinguished and separated by using an appropriate operation although they may overlap in time and frequency when transmitted over a common channel. ★ multiplexage en code → *multiplexage 6.* R кодовое разделение. D Codemultiplex; CDM (Abkürzung). E multiplexado en código; multiplexado por reparto en código. I multiplazione a divisione di codice; CDM (abbreviazione). N codeverdeelde multiplex. P krotnienie kodowe. S kodmultiplexering. (704)
2. **digital multiplexing** : a form of time division multiplexing applied to digital channels which convey digital signals. ★ multiplexage numérique → *multiplexage 9.* R цифровое группообразование. D digitales Multiplexen. E multiplexado numérico. I multiplazione numerica. N digitaal multiplexen. P krotnienie cyfrowe. S digital multiplexering. (704)
3. **frequency division multiplexing** (*Syn.* FDM (abbreviation)) : multiplexing in which several independent signals are allotted separate frequency bands for transmission over a common channel. ★ multiplexage en fréquence → *multiplexage 7.* R частотное разделение каналов; ЧРК; частотное группообразование. D Frequenzmultiplex; FDM (Abkürzung). E multiplexado en frecuencia; multiplexado por reparto en frecuencia. I multiplazione a divisione di frequenza; FDM (abbreviazione). N frequentieverdeelde multiplex; FDM (afkorting). P krotnienie częstotliwościowe. S frekvensmultiplexering. (704,721)
4. **multiplexing** : a reversible process for assembling signals from several separate sources into a single composite signal for transmission over a common transmission channel ; this process is equivalent to dividing the common channel into distinct channels for transmitting independent signals in the same direction. *Note.* — Associated terms are "to multiplex" ; "multiplex". ★ multiplexage → *multiplexage 4.* R группообразование. D Multiplexen. E multiplexado. I multiplazione. N multiplexen. P krotnienie; multipleksacja. S multiplexering. (701,704,714,721)
5. **multiplexing** : a system of remote control or indication in which many discrete control and/or indication signals are transmitted over a common circuit. ★ multiplexage → *multiplexage 5.* R система с объединением звуковых каналов. D Datenübertragung (Multiplex). E multiplexado. I trasmissione multiplex. N multiplexsysteem. P obwód wielodostępny; obwód multipleksowy. S multiplexsystem. (811)
6. **time division multiplexing** (*Syn.* TDM (abbreviation)) : multiplexing in which several independent signals are allotted separate periodic time intervals for transmission over a common channel. ★ multiplexage temporel → *multiplexage 16.* R временное разделение каналов; ВРК; временное группообразование. D Zeitmultiplex; TDM (Abkürzung). E multiplexado temporal; multiplexado (por reparto) en el tiempo. I multiplazione a divisione di tempo; TDM (abbreviazione). N tijdverdeelde multiplex. P krotnienie czasowe. S tidsmultiplexering. (704)
7. **time division multiplexing** (*Syn.* TDM (abbreviation)) : multiplexing in which a separate periodic time interval is allocated to each tributary channel in the common channel. ★ multiplexage temporel → *multiplexage 17.* R временное объединение / разделение каналов; ВПК (сокращение). D Zeitmultiplex. E multiplexado por división en el tiempo; multiplexado temporal. I multiplazione a divisione di

tempo. N tijd(verdelings)multiplex; TDM (afkorting). P ukrotnianie czasowe; ukrotnianie z podziałem czasu. S tidsmultiplexering. (721)

8. **wavelength division multiplexing** (*Syn.* WDM (abbreviation)) : multiplexing in which several independent signals are allotted separate wavelengths for transmission over a common optical transmission medium. *Note.* — Wavelength division multiplexing is a form of frequency division multiplexing. The use of a special term avoids confusion with the possible use of frequency division multiplexing in assembling the baseband signal which has to be carried over the optical link by one wavelength. ★ multiplexage en longueur d'onde → *multiplexage 8.* R разделение каналов по длине волны; спектральное разделение каналов. D Wellenlängenmultiplex; optischer Frequenzmultiplex. E multiplexado en longitud de onda; multiplexado por reparto en longitud de onda. I multiplazione a divisione di lunghezza d'onda; WDM (abbreviazione). N golflengteverdeelde multiplex. P krotnienie długością fali. S våglängdsmultiplexering. (704)

9. **wavelength division multiplexing** (*Syn.* WDM (abbreviation)) : multiplexing in which several independent signals are allotted separate wavelengths for transmission over a common optical transmission medium. *Note.* — Wavelength division multiplexing is a form of Frequency Division Multiplexing (FDM). The use of a special term avoids confusion with the possible use of FDM in assembling the baseband signal which has to be carried over the optical link at one wavelength. ★ multiplexage (par répartition) en longueur d'onde → *multiplexage 14.* R спектральное разделение каналов. D Wellenlängenmultiplex; WDM (Abkürzung). E multiplexación por división de longitud de onda; WDM (abreviatura). I multiplazione in lunghezza d'onda. N golflengtestapeling. P krotnienie długością fali. S våglängdsmultiplexering. (731)

multiplication

1. **electron-gun density multiplication** (*Syn.* beam-compression factor) : → *beam-compression 1*
2. **error multiplication** (*Syn.* error extension) : a property of a device which causes more than one error to occur in its output signal when a single digital error is present in its input signal. *Note.* — Line decoders and descramblers are examples of devices whichmay cau se error multiplication. ★ multiplication d'erreurs → *multiplication 9.* R размножение ошибки. D Fehlermultiplikation; Fehlerausweitung. E multiplicación de errores. I moltiplicazione d'errore. N foutvermenigvuldiging; foutuitbreiding. P powielanie błędów. S felutökande. (704)
3. **error multiplication factor** : → *factor 70*
4. **gas multiplication** : the process whereby in a sufficiently intense electric field the ion pairs produced in a gas by incident radiation generate additional ion pairs. ★ multiplication dans le gaz → *multiplication 8.* R разовое усиление. D Gasverstärkung. E multiplicación en el gas. I moltiplicazione nel gas. N gasversterking. P wzmocnienie gazowe. S gasförstärkning. (391,531,881)
5. **gas multiplication factor** : → *factor 86*
6. **gas multiplication factor** : → *factor 87*
7. **multiplication factor** : → *factor 122*
8. **multiplication (subcritical)** : the ratio of the total number of neutrons resulting from fission and a source, which exist in equilibrium in a subcritical assembly, to the total number of neutrons which would exist in the assembly due to the source in the absence of fission. ★ multiplication sous-critique → *multiplication 11.* D Vervielfachung. E multiplicación subcrítica. I moltiplicazione subcritica. N onderkritieke (onderkritische) vermenigvuldiging. P mnożenie (podkrytyczne). S (underkritisk) multiplikation. (026)
9. **neutron multiplication** : the process in which a neutron produces on the average more than one neutron, when it is captured in a medium containing fissionable material. ★ multiplication des neutrons → *multiplication 10.* D Neutronenvervielfachung. E multiplicación de neutrones. I moltiplicazione di neutroni. N vermenigvuldiging van neutronen. P mnożenie neutronów. S neutronmultiplikation. (026)

multiplier

1. **electron multiplier** : a group of electrodes, called dynodes, subjected to increasing voltages in a vacuum and used to amplify an electron current by a cascade process by means of secondary emission. ★ multiplicateur d'électrons → *multiplicateur 4.* R электронный умножитель. D Sekundärelektronenvervielfacher; SEV. E multiplicador de electrones. I moltiplicatore di elettroni. N elektronenvermenigvuldiger. P powielacz elektronowy. S elektronmultiplikator. (391,531,881)
2. **frequency multiplier** : a non-linear device for producing oscillations having frequencies which are integral multiples of the input frequency. ★ multiplicateur de fréquence → *multiplicateur 2.* R умножитель частоты. D Frequenzvervielfacher. E multiplicador de frecuencias. I moltiplicatore di frequenza. N frequentievermenigvuldiger. P mnożnik częstotliwości; powielacz częstotliwości. S frekvensmultiplikator. (702)
3. **Hall multiplier** : a Hall effect device which contains a Hall generator and a coil as source of magnetic flux, such that the output quantity is proportional to the product of the control current and the current producing the magnetic flux. ★ multiplicateur de Hall → *multiplicateur 3.* R умножитель Холла. D Hallmultiplikator. E multiplicador Hall. I moltiplicatore di Hall. N Hallvermenigvuldiger. P mnożnik hallotronowy. S hallmultiplikator. (521)
4. **multiplier photocube** (*Syn.* photomultiplier tube) : → *tube 64*
5. **windowless multiplier phototube** (*Syn.* windowless photomultiplier tube) : → *tube 99*

multiplying

1. **multiplying medium** : → *medium 24*

multipoint

1. **multipoint connection** : → *connection 36*

multipoint-partyline

1. **multipoint-partyline configuration** : → *configuration 11*

multipoint-ring

1. **multipoint-ring configuration** : → *configuration 12*

multipoint-star

1. **multipoint-star configuration** : → *configuration 13*

multi-range

1. **multi-range (measuring) instrument** : → *measuring instrument 16*

multi-rate

1. **multi-rate meter** : → *meter 35*

multi-satellite

1. **multi-satellite link** : → *link 30*

multi-scale

1. **multi-scale (measuring) instrument** : → *measuring instrument 17*

multi-section

1. **multi-section coil** : → *coil 28*

multi-speed

1. **multi-speed motor** : → *motor 67*

multi-stage

1. **multi-stage (X-ray) tube** : → *tube 57*

multi-standard

1. **multi-standard receiver** : → *receiver 5*

multi-star

1. **multi-star network** (*Syn.* multi-star system) : → *system 121*
2. **multi-star system** : → *system 121*

multi-step

1. **multi-step action** : → *action 14*

multi-system

1. **multi-system motor vehicle** : → *vehicle 13*

multitrack

1. **multitrack recording** : → *recording 18*

2. **multitrack recording system** : → *system 122*

multi-unit

1. **multi-unit message** : → *message 11*

multivalue

1. **(uniform) multivalue digital signal** : → *signal 246*

multi-varying

1. **multi-varying speed motor** : → *motor 69*

multivibrator

1. **multivibrator** : a relaxation oscillator comprising for instance two transistors or electron tubes coupled by resistor-capacitor circuits connecting the input of each to the output of the other to produce an oscillation of high harmonic content. ★ multivibrateur → *multivibrateur 1.* R мультивибратор. D Multivibrator. E multivibrador. I multivibratore; circuito astabile. N multivibrator. P multiwibrator. S multivibrator. (702)

multi-wire

1. **multi-wire element** : → *element 32*

multi-zone

1. **multi-zone furnace** : → *furnace 36*

MUM

1. **MUM** (*Syn.* multi-unit message) : → *message 11*

M-unit

1. **M-unit** : a unit in terms of which the refractive modulus is expressed. Example : If the refractivity N is such that :

$$N + 10^6 \frac{h}{a} = 400$$

the refractive modulus is 400 M-units, or M = 400. ★ unité M → *unité 35.* D M-Einheit. P jednostka M. (705)

muon

1. **muon** : an elementary short-lived charged particle, of spin 1/1, of mass between that of the electron and that of the proton. ★ muon → *muon 1.* R мюон. D Myon. E muón. I muone. N muon. P mezon mμ. S myon. (391,881)

musa

1. **musa antenna** (*Syn.* multiple-unit steerable array) : → *array 13*

mush

1. **mush area** : → *area 28*

music

1. **music line** (*Syn.* programme line) : → *line 127*
2. **music pair** (*Syn.* programme line) : → *line 127*

musical

1. **musical hold device** : → *device 37*
2. **musical scale** : → *scale 10*
3. **standard musical pitch** (*Syn.* standard tuning frequency) : → *frequency 183*

must

1. **must value** (*Syn.* test value) : → *value 68*

MUT

1. **MUT** (*Syn.* mean up time) : → *time 107*

mutation

1. **mutation** : an abrupt heritable change in the genetic material. ★ mutation → *mutation 2.* R мутация. D Mutation. E mutacion. I mutazione. N mutatie. P mutacja. S mutation. (881)

mutilation

1. **mutilation** : a defect such that a signal element becomes changed from one significant condition to another. ★ mutilation → *mutilation 1.* R ошибка. D Verfälschung. E mutilación. I alterazione. N mutilatie. P błąd. S förvanskning. (721)
2. **mutilation (of speech)** : loss of initial or final parts of a word or syllable because of an imperfection in a voice operated switching device. ★ mutilation (de la parole) → *mutilation 2.* R дробление (речи). D Sprachverstümmelung. E mutilación (de la palabra). I multifunzione della parola. N spraakverminking; kortstondige spraakonderbreking. P obcinanie (mowy). S ordstympning. (722)

mutual

1. **mutual characteristic** (*Syn.* transfer characteristic) : → *characteristic 91*
2. **mutual conductance** : → *conductance 4*
3. **(mutual) exchange coefficient** : → *coefficient 41*
4. **mutual impedance** : → *impedance 40*
5. **mutual inductance** : → *inductance 6*
6. **mutual induction** : → *induction 32*

mutually

1. **democratic mutually synchronized network** : → *network 19*
2. **hierarchic mutually synchronized network** : → *network 29*
3. **mutually synchronized network** : → *network 43*

MV

1. **MV** (*Syn.* medium voltage) : → *voltage 116*

Mx

1. **maxwell, Mx, M** : → *maxwell 1*

N

NA
1. **NA** (*Syn.* numerical aperture) : → *aperture 17*

naphthenic
1. **naphthenic insulating oil** : → *oil 3*

Napierian
1. **Napierian spectral absorbance** (*Syn.* Napierian spectral internal transmittance density) : → *density 16*
2. **Napierian spectral absorption coefficient** : → *coefficient 42*
3. **Napierian spectral internal transmittance density** : → *density 16*

narrowband
1. **narrowband device** : → *device 38*
2. **narrowband emission** : → *emission 19*

narrow-beam
1. **narrow-beam attenuation** : → *attenuation 27*

n-ary
1. **n-ary digit** : → *digit 22*

national
1. **national standard** : → *standard 15*
2. **national subscriber's telex number** : → *number 17*

natural
1. **damped natural frequency** : → *frequency 31*
2. **natural actinic effect** : → *effect 46*
3. **natural atmosphere of a furnace** : → *atmosphere 8*
4. **natural characteristic** : → *characteristic 59*
5. **natural circulation** : → *circulation 5*
6. **natural circulation boiler** : → *boiler 8*
7. **natural excitation** (*Syn.* free current operation) : → *operation 24*
8. **natural frequency** : → *frequency 134*
9. **natural frequency** : → *frequency 135*
10. **natural load of a line** : → *load 65*
11. **natural noise** : → *noise 43*
12. **natural radiation** : → *radiation 47*
13. **natural radioactivity** : → *radioactivity 3*
14. **natural stability** (*Syn.* stable characteristic) : → *characteristic 84*
15. **natural uranium reactor** : → *reactor 20*
16. **natural ventilation** : → *ventilation 6*
17. **natural ventilation** : → *ventilation 7*
18. **thermal natural convection** : → *convection 4*
19. **undamped natural frequency** : → *frequency 192*

navigation
1. **navigation light** : → *light 43*
2. **navigation light** : → *light 44*
3. **(navigation) mark** : → *mark 10*

n-bit
1. **n-bit byte (2)** : → *byte 3*

NBS
1. **NBS test chart** : → *chart 3*

N-channel
1. **N-channel field-effect transistor** : → *transistor 9*

near
1. **near sound field** : → *sound field 4*

near-end
1. **near-end crosstalk** : → *crosstalk 12*
2. **near-end crosstalk attenuation** : → *attenuation 28*

near-field
1. **four concentric circle near-field template** : → *template 1*
2. **near-field diffraction pattern** : → *pattern 16*
3. **near-field pattern** (*Syn.* near-field radiation pattern) : → *pattern 18*
4. **near-field radiation pattern** : → *pattern 18*
5. **near-field region** : → *region 12*
6. **near-field scanning technique** : → *technique 14*
7. **radiating near field (region)** : that region of space between the reactive near field region and the far field region, wherein the predominant components of the electromagnetic field are those which represent a propagation of energy, and wherein the angular field distribution is dependent upon the distance from the antenna. *Note.* — If the antenna has a maximum overall dimension which is not large compared to the wavelength, the radiating near field region may not be identifiable in practice. ★ (région de) champ proche rayonné → *champ 75.* **R** ближняя зона излучения. **D** strahlendes Nahfeld. **E** campo radiante cercano (región). **I** zona di campo vicino d'irradiazione. **N** nabij stralingsveld. **P** strefa pola bliskiego promieniowania. **S** övergångzon. (712)
8. **reactive near field (region)** (*Syn.* induction field (region)) : that region of space immediately surrounding an antenna, where the predominant components of the electromagnetic field are those which represent an exchange of reactive energy between the antenna and the surrounding medium. ★ (région de) champ proche réactif → *champ 76.* **R** зона реактивного ближнего поля; зона поля индукции. **D** (reaktives) Nahfeld. **E** campo reactivo cercano (región); campo de inducción (región). **I** campo vicino reattivo; campo d'induzione; zona di Rayleigh. **N** reactief nabij veld; quasi-stationair veld; nabij veld. **P** strefa pola bliskiego reaktywnego; strefa pola indukcyjnego. **S** närzon; induktionszon. (712)
9. **refracted near-field method** : → *method 19*

neck
1. **neck** : the tubular part of the envelope near the base. ★ **col** → *col 1.* **R** горловина. **D** Hals. **E** cuello. **I** collo. **N** hals. **P** szyjka (bańki). **S** hals. (531)
2. **neck shadow** : → *shadow 1*

needle
1. **needle** : an implant in the form of a thin metallic cylinder. ★ aiguille → *aiguille 1.* **R** игла. **D** Nadel. **E** aguja. **I** ago. **N** naald. **P** implantant cylindryczny. **S** nål. (881)
2. **needle counter tube** : → *counter tube 18*
3. **needle drag** (*Syn.* stylus drag) : → *drag 3*

Néel
1. **Néel point** : → *point 25*
2. **Néel wall** : → *wall 8*

negative
1. **master negative** : → *master 7*
2. **negative acknowledge** : → *acknowledge 2*
3. **negative acknowledgement** : → *acknowledgement 3*
4. **negative component** : → *component 39*
5. **negative differential resistance region** : → *region 13*
6. **negative effect** : → *effect 47*
7. **negative feedback** : → *feedback 7*
8. **negative half-wave** : → *half-wave 4*
9. **negative justification** : → *justification 10*
10. **negative modulation** : → *modulation 43*
11. **negative phase difference** : → *difference 21*

12. **negative phase-sequence impedance** : → *impedance 41*
13. **negative phase-sequence reactance** : → *reactance 10*
14. **negative phase-sequence resistance** : → *resistance 40*
15. **negative plate** : → *plate 14*
16. **negative pulse stuffing** (*Syn.* negative justification) : → *justification 10*
17. **negative scanning shift** : → *shift 25*
18. **negative terminal** : → *terminal 20*
19. **negative video signal** : → *signal 131*
20. **peak negative anode voltage** : → *voltage 139*
21. **positive/zero/negative justification** : → *justification 14*
22. **positive/zero/negative pulse stuffing** (*Syn.* positive/zero/negative justification) : → *justification 14*
23. **track negative cable** (*Syn.* return cable) : → *cable 56*

negative-glow

1. **negative-glow lamp** : → *lamp 42*

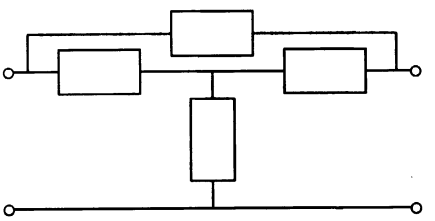
neon

1. **neon indicator tube** : → *tube 58*

NEP

1. **NEP** (*Syn.* noise equivalent power) : → *power 89*
2. **NEP** (*Syn.* noise equivalent power) : → *power 90*

neper

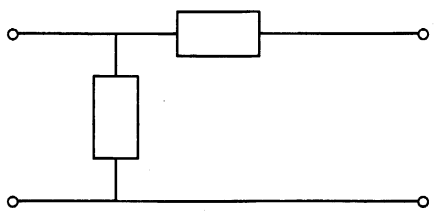


1. **neper** (Np) : a unit used to express the ratio of two field quantities by the natural logarithm of this ratio. *Notes. 1* — The value of a power ratio in nepers is one half the natural logarithm of this power ratio. The values in nepers of the ratio of two field quantities and of the two corresponding powers are equal only if the impedances are equal. *2* — Sub-multiples such as the decineper are also used with the symbol dNp. *3* — One neper equals 8.686 dB. *4* — In some disciplines the neper may be used to express the logarithm of a power ratio without the factor 1/2. An example is attenuation also called optical depth in radiometry. Such usage is deprecated in telecommunications, in order to avoid ambiguity ; in this case one neper would be equal to 4.343 dB. ★ néper → *néper 1.* R непер. D Neper. E néper. I neper. N neper. P neper. S neper. (702,801)

net

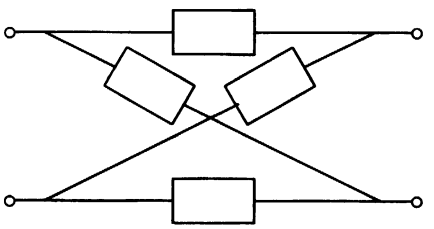
1. **net average heat rate of a unit** : → *rate 60*
2. **net brake power (of an internal combustion engine)** (*Syn.* useful service output) : → *output 71*
3. **net fade margin** : → *margin 11*
4. **net head of a hydroelectric power station** : → *head 22*
5. **net margin** : → *margin 12*
6. **net output of a power station** : → *output 25*
7. **net output of a set** : → *output 26*
8. **net thermal efficiency of a unit** : → *efficiency 31*
9. **net traffic** : → *traffic 11*

network



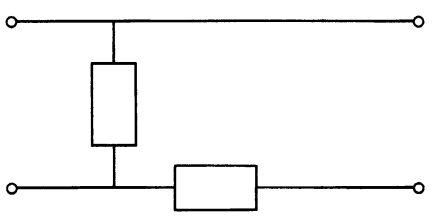
1. **access to the public telegram network** : provision for a telex terminal to send and receive telegrams to and from the public telegram service. ★ accès au réseau télégraphique public → *accès 5.* R доступ на телеграфную сеть общего пользования. D Zugang zum öffentlichen Telegrammnetz. E acceso a la red telegráfica pública. I accesso alla rete telex pubblica. N toegang tot het openbare telexnet. P dostęp do sieci telegramowej publicznej. S tillgång till allmänt telegramnät. (721)
2. **active network** : a network including voltage sources and/or current sources. ★ réseau actif → *réseau 74.* R активный многополюсник. D aktives Netz. E red activa. I rete attiva. N actief net. P sieć zawierająca źródła energii. S aktivt nät. (603)
3. **architecture of a telecommunication network** : the grouping of functional or physical structures which may be identified within a given telecommunication network when considered from different points of view. ★ architecture d'un réseau de télécommunication → *architecture 2.* D Fernmeldenetzarchitektur. P architektura sieci. (715)
4. **artificial mains network** (*Syn.* line impedance stabilization network; LISN (abbreviation) (USA)) : a network inserted in the supply mains lead of apparatus to be tested which provides, in a given frequency range, a specified load impedance for the measurement of disturbance voltages and which may isolate the apparatus from the supply mains in that frequency range. ★ réseau fictif → *réseau 121.* R эквивалент сети. D Netznachbildung. E red artificial. I rete fittizia; rete di stabilizzazione d'impedenza di linea; RISL (abbreviazione). N kunstvoedingsnetwerk; voedings-kunstimpedantie; LISN. P sieć sztuczna. S nätekvivalent. (161)
5. **balanced state of a polyphase network** : → *state 2*
6. **balanced two-port network** : a two-port network where the simultaneous interchange of the input terminals between themselves and of the output terminals between themselves does not affect the operation of the external circuits. ★ biporte équilibré → *biporte 11.* R уравновешенная схема с двумя парами зажимов; уравновешенный четырехполюсник (избегать). D erdsymmetrisches Zweitor. E bipuerta equilibrada. I doppio bipolo equilibrato. N gebalanceerde tweepoort. P dwuwrotnik zrównoważony względem ziemi); czwórnik zrównoważony (względem ziemi). S balanserad tvåport. (131)
7. **balancing network** (*Syn.* artificial balancing line) : a one-port device simulating the impedance of a two-wire line in order to ensure balancing of a differential coupler. ★ équilibreur → *équilibreur 1.* R балансирующий двухполюсник. D Ausgleichsnetzwerk; künstliche Ausgleichsleitung. E equilibrador; red de equilibrado; línea artificial de equilibrado. I rete equilibratrice. N balanceernetwerk; kunstlijn. P równoważnik (toru). S balansnät. (702)
8. **balancing of a distribution network** : → *balancing 4*
9. **bridged-T network** :

★ biporte en T-ponté → *biporte 9.* R схема Т-образного моста. D Zweitor in überbrückter T-Schaltung. E red en T-puenteada. I doppio bipolo a T-composto. N overbrugd T-netwerk. P dwuwrotnik (typu) T-zbocznikowane; czwórnik (typu) T-zbocznikowane. S överbryggad T-länk. (131)



10. **broadcast transmitter network** : 1) A group of sound or television broadcast transmitters designed to transmit the same programme simultaneously. 2) A group of sound or television broadcast transmitters belonging to a given organisation, region or country. ★ réseau d'émetteurs → *réseau 108.* R радиовещательная передающая сеть. (723)
11. **broadcasting network** : the combined installations ensuring broadcasting of sound or television programmes, for a given organisation or country. ★ réseau de radiodiffusion → *réseau 93.* R сеть радиовещания. (723)
12. **capital contribution to network costs** : → *contribution 2*
13. **circuit switched network** : a telecommunication network in which a connection is constituted upon request for exclusive use for the duration of each call. ★ réseau à commutation de circuits → *réseau 61.* D leitungsvermitteltes Netz. P sieć o komutacji łączy. (715)
14. **closed private network** : a private network that does not permit intercommunication other than between terminals connected to it. ★ réseau privé fermé → *réseau 135.* R закрытая частная сеть. D abgeschlossenes privates Anwendernetz. E red privada cerrada. I rete (privata) chiusa. N gesloten particulier net. P sieć wydzielona zamknięta. S slutet privatnät. (721)
15. **compensating network** (of an antenna) : an electrical network connected to the terminals of an antenna and intended to reduce as far as possible the variations in complex impedance occurring over a given frequency band. ★ réseau de compensation → *réseau 83.* R компенсирующая цепь (антенны). D Anpassungsnetzwerk. E red de compensación; compensador de impedancia. I rete di compensazione. N (antenne)compensatienetwerk. P układ kompensujący (anteny). S kompensationskrets. (712)

16. **connected network** : a network allowing passage from any node to any other node by a continuous path using only branches of that network. ★ réseau connexe → *réseau 82.* R связанная схема. D zusammenhängendes Netzwerk. E red conexa. I rete connessa. N samenhangend netwerk. P układ spójny. S sammanhängande nät. (131)
17. **data network** : the means providing interconnection between a set of data terminal equipment. ★ réseau de données → *réseau 89.* R сеть (передачи) данных. D Datennetz. E red de datos. I rete per dati. N datanet. P sieć teledacyjna. S datanät. (721)
18. **delta network** : an artificial mains network enabling the common mode and differential mode voltages of a single phase circuit to be measured separately. ★ réseau (fictif) en delta → *réseau 122.* R дельтаобразный эквивалент сети. D Delta-Netznachbildung. E red en delta. I rete (fittizia) a delta. N deltanetwerk. P sieć sztuczna typu delta. S deltanät. (161)
19. **democratic mutually synchronized network** : 1. In theory, a mutually synchronized network in which all the clocks are of equal status and directly exert equal amounts of control on all the other clocks. 2. In practice, a mutually synchronized network in which all the clocks are of equal status and in which each clock directly exerts equal amounts of control on a few other clocks. *Note.* — In the theoretical case, the network operating frequency or digit rate is the mean of the natural frequencies of all the clocks. ★ réseau (à synchronisation mutuelle) démocratique → *réseau 71.* R равноправная взаимно синхронизированная сеть. D demokratisch-wechselweise synchronisiertes Netzwerk. E red (con sincronización mutua) democrática. I rete a sincronizzazione mutua democratica. N ..... P sieć synchronizowana wzajemnie demokratycznie. S ..... (704)
20. **driving-point immittance of an n-port network** : → *immittance 1*
21. **earthing network** (*Syn.* grounding network (USA)) : the part of an earthing installation which is restricted to the earth electrodes and their interconnections. ★ réseau de terre → *réseau 106.* R сеть заземления. D Erdernetz. E red de tierra. I rete di terra. N aardingsnet. P sieć uziomowa. S jordtagssystem. (604)
22. **(electrical) network** : a set of interconnected electric circuit elements considered as a whole. ★ réseau (électrique) → *réseau 114.* R (электрическая) схема. D (elektrisches) Netzwerk; Netz. E red (eléctrica). I rete (elettrica). N elektrisch netwerk. P zespół (układów elektrycznych); zespół elektryczny. S nät. (702)
23. **electrical power network** (*Syn.* electrical power system) : → *system 57*
24. **equivalent network** : a network which may replace a given network without changing the state variables at specified boundary nodes. ★ réseau équivalent → *réseau 119.* R эквивалентная сеть. D Ersatznetz. E red equivalente. I rete equivalente. N equivalent net. P sieć równoważna. S nätekvivalent; ekvivalent nät. (603)
25. **gentex network** : a switched telegraph network used between administrations or recognized private operating agencies to provide an international public telegram service. ★ réseau gentex → *réseau 124.* R сеть Гентекс. D Genetex-Netz. E red gentex. I rete gentex. N gentex(netwerk). P sieć genteksowa. S gentexnät. (721)
26. **Γ-network** :

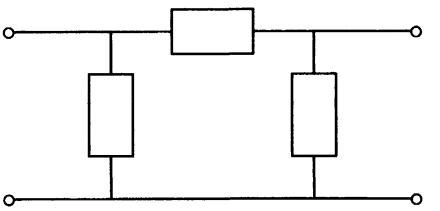


★ biporte en Γ → *biporte 5.* R Γ-схема. D Zweitor in Γ-Schaltung. E red en Γ. I doppio bipolo a Γ. N Γ-netwerk. P dwuwrotnik (typu) Γ; czwórnik (typu) Γ. S Γ-länk. (131)

27. **graph of a network** : → *graph 2*
28. **grounding network** (*Syn.* earthing network) : → *network 21*
29. **hierarchic mutually synchronized network** : a hierarchic synchronized network in which some of the status levels are themselves democratic mutually synchronized networks. ★ réseau hiérarchisé à synchronisation mutuelle → *réseau 126.* R иерархическая взаимно синхронизированная сеть. D hierarchisch-wechselweise synchronisiertes Netzwerk. E red jerarquizada con sincronización mutua. I rete a sincronizzazione mutua gerarchica. N hiërarchisch onderling gesynchroniseerd netwerk. P sieć synchronizowana wzajemnie hierarchicznie. S ..... (704)
30. **hierarchic synchronized network** : a synchronized network in which each clock is assigned a status in a hierarchy which permits it to exert control only over clocks of equal or lower status. ★ réseau à synchronisation hiérarchisée → *réseau 69.* R иерархическая синхронная сеть. D hierarchisch synchronisiertes Netzwerk. E red con sincronización jerarquizada; red jerarquizada. I rete a sincronizzazione gerarchica. N hiërarchisch gesynchroniseerd netwerk. P sieć synchronizowana hierarchicznie. S hierarkiskt synkroniserat nät. (704)
31. **input immittance of a two-port network** : → *immittance 5*
32. **input terminals of a network** : → *terminal 13*
33. **interworking between networks** : → *interworking 1*
34. **ladder network** : a two-port network consisting of L-networks connected in tandem. ★ biporte en échelle → *biporte 4.* R цепная схема. D Reihenschaltung, Serienschaltung von L-Zweitoren. E red escalonada. I rete a scala. N laddernetwerk. P dwuwrotnik drabinkowy; czwórnik drabinkowy. S stegnät. (131)
35. **lattice network** :

★ biporte en treillis → *biporte 10.* R мостовая схема. D Zweitor in Kreuzschaltung. E red en celosía. I doppio bipolo a traliccio (ponte). N kruisaknetwerk. P dwuwrotnik mostkowy; czwórnik mostkowy. S korslänk. (131)

36. **line identification by the network** : → *identification 7*
37. **line impedance stabilization network** (*Syn.* artificial mains network) : → *network 4*
38. **L-network** :



★ biporte en L → *biporte 7.* R L-схема. D Zweitor in L-Schaltung. E red en L. I doppio bipolo a L. N L-netwerk. P dwuwrotnik (typu) L; czwórnik (typu) L. S L-länk. (131)

39. **local line network** : all the lines and ancillary equipment provided to connect subscribers to their local switching entity. ★ réseau local de lignes (téléphoniques) → *réseau 127.* R местная сеть абонентских линий. D Ortsnetz. E red local de líneas. I rete urbana. N lokaal telefoonnet; aboneenet. P sieć miejscowa. S lokalnät. (722)
40. **(local line) network with link circuit** : a local line network in which several cross-connection points are linked together and some distribution cables feed serially to two or three distribution

points. ★ réseau (de lignes téléphoniques d'abonné) avec entraide → *réseau 91.* R местная сеть абонентских линий с вспомогательными цепями. D Ortsnetz mit Kettenschaltung. E red (de líneas de abonado) con circuito de enlace. I rete con distributori derivati. N ringleidingsysteem met meer voedingspunten. P sieć wewnętrzna ze wspomaganiem. S ..... (722)

41. **message switching network** (*Syn.* store and forward switched network) : a telecommunication network which works in message switching mode. ★ réseau à commutation de messages → *réseau 62.* D sendungsvermitteltes Netz. P sieć o komutacji wiadomości. (715)
42. **multi-star network** (*Syn.* multi-star system) : → *system 121*
43. **mutually synchronized network** : 1. In theory, a synchronized network in which each clock exerts direct control on all the other clocks. 2. In practice, a synchronized network in which each clock exerts direct control on a few other clocks, and indirectly influences the remaining clocks. ★ réseau à synchronisation mutuelle → *réseau 70.* R взаимно синхронизированная сеть. D wechselweise synchronisiertes Netzwerk. E red con sincronización mutua. I rete a sincronizzazione mutua. N onderling gesynchroniseerd netwerk. P sieć synchronizowana wzajemnie. S ömsesidigt synkroniserat nät. (704)
44. **network** : a set of interconnected circuit elements, considered as a whole, which can be represented by branches and nodes. ★ réseau → *réseau 60.* R схема. D Netzwerk; Netz. E red. I rete. N netwerk. P układ (elektryczny). S nät. (131)
45. **network analysis** : → *analysis 9*
46. **network calculation** : → *calculation 6*
47. **network cluster** : → *cluster 2*
48. **network control phase** : → *phase 20*
49. **network conversion** : → *conversion 27*
50. **network in terms of components** : the transformation of a polyphase network obtained by synthesis of all the circuit elements in terms of corresponding components, where their association respects the topological correspondances of the considered polyphase network. ★ réseau en composantes → *réseau 118.* R цепь, представленная составляющими. D transformiertes Netz; Komponentennetzwerk. E red en componentes. I rete in componenti. N netwerk uitgedrukt in componenten. P układ w ujęciu składowych. S ..... (131)
51. **network recall** : → *recall 2*
52. **network splitting** : → *splitting 2*
53. **network switching** (*Syn.* programme switching centre) : → *centre 17*
54. **network synthesis** : → *synthesis 1*
55. **network termination unit** : → *unit 46*
56. **network transformation** (*Syn.* network conversion) : → *conversion 27*
57. **non-synchronized network** (in TDM) (*Syn.* non-synchronous network) : a network not designed to maintain synchronism between signals. ★ réseau non synchronisé → *réseau 131.* R несинхронизированная сеть (при ВРК); несинхронная сеть (при ВРК). D nichtsynchronisiertes Netzwerk (in TDM); Nicht-Synchronnetzwerk. E red no sincronizada; red asíncrona. I rete non sincronizzata (in TDM); rete non sincrona. N asynchroon netwerk. P sieć niesynchronizowana (w transmisji cyfrowej). S icke-synkront nät. (704)
58. **non-synchronous network** (*Syn.* non-synchronized network) : → *network 57*
59. ***n*-port network** (*Syn.* n-terminal-pair network) : 1. A network with *n* pairs of terminals forming *n* ports. 2. A network with more than 2*n* terminals where only the performance at 2*n* terminals, considered as *n* ports, is of interest. ★ multiporte → *multiporte 2.* R многовходовая схема; схема входами. D Mehrtor; *n*-Tor; n-Klemmenpaar. E (red) multipuerta. I *n*-porta; *n*-bipolo. N n-poort. P wielowrotnik; układ o n parach końcówek. S n-port; mångport. (131,702)
60. **n-terminal-pair network** (*Syn.* ***n*-port network**) : → *network 59*
61. **one-port network** (*Syn.* two-terminal network) : 1. A network with two terminals. 2. A network with more than two terminals where only the performance at two terminals, considered as a port, is of interest. ★ monoporte → *monoporte 1.* R одновходовая схема; двухполюсник. D Eintor; Zweipol. E (red) unipuerta; bipolo. I monoporta; bipolo. N eenpoort. P jednowrotnik; dwójnik. S enport; tvåpol. (131,702)
62. **output immittance of a two-port network** : → *immittance 7*
63. **output terminals of a network** : → *terminal 26*
64. **packet switched network** : a telecommunication network which works in packet switching mode. ★ réseau à commutation de paquets → *réseau 63.* D paketvermitteltes Netz. P sieć o komutacji pakietów. (715)
65. **passive equivalent network** : the equivalent network resulting from a network conversion applied only to the system parameters. ★ réseau équivalent passif → *réseau 120.* R пассивная эквивалентная сеть. D passives Ersatznetz. E red pasiva equivalente. I rete passiva equivalente. N passief equivalent net. P sieć równoważna (bez źródeł energii). S passiv nätekvivalent. (603)
66. **passive network** : a network including neither voltage sources nor current sources. ★ réseau passif → *réseau 132.* R пассивный многополюсник. D passives Netz. E red pasiva. I rete passiva. N passief net. P sieć bez źródeł energii. S passivt nät. (603)
67. **plesiochronous network** : a non-synchronized network in which clocks are designed to have high accuracy and stability, such that signals are plesiochronous. *Note.* — The network effectively operates for long periods as if it were a synchronized network. ★ réseau plésiochrone → *réseau 133.* R плезиохронная сеть. D plesiochrones Netzwerk. E red plesiócrona. I rete plesiocrona. N plesiochroon netwerk. P sieć plezjochroniczna. S plesiokront nät. (704)
68. **Π-network** :

★ biporte en Π → *biporte 6.* R П-схема. D Zweitor in Π-Schaltung. E red en Π. I doppio bipolo a Π. N Π-netwerk. P dwuwrotnik (typu) Π; czwórnik (typu) Π. S Π-länk. (131)

69. **prefix giving access to the intercontinental telex network** : → *prefix 2*
70. **prefix giving access to the international telex network** : → *prefix 3*
71. **prefix giving access to the long-distance telex network** : → *prefix 4*
72. **private network** (in telegraphy and data transmission) : a group of telegraph terminals or data terminal equipment that can establish calls between one another without passing through the switching equipment of a public network. ★ réseau privé → *réseau 134.* R частная сеть (в телеграфии или передаче данных). D privates Anwendernetz (in der Telegrafie und Datenübertragung). E red privada (en telegrafía o transmisión de datos). I rete privata. N particulier netwerk (bij telegrafie - en datatransmissie). P sieć wydzielona (w telegrafii i teledacji). S privatnät. (721)
73. **private telecommunication network** : a telecommunication network which provides services to a determined set of users and which may be or not connected with a public telecommunication network. ★ réseau de télécommunication privé → *réseau 98.* D privates Fernmeldenetz. P sieć telekomunikacyjna wydzielona. (715)
74. **private telephone network** : a telephone network set up solely to meet the requirements of a particular organization. ★ réseau téléphonique privé → *réseau 146.* R ведомственная (учрежденческо-производственная) телефонная сеть. D privates Fernsprechnetz. E red telefónica privada. I rete telefonica pubblica privata. N bedrijfstelefoonnet. P sieć telefoniczna prywatna. S privat telefonnät. (722)
75. **public data network** : a telecommunication network established to provide data communication services to the public. ★ réseau public pour données → *réseau 136.* R сеть данных общего пользования. D öffentliches Datennetz.

E red pública para datos. I rete pubblica per dati. N openbaar datanet. P sieć teledacyjna publiczna. S publikt datanät. (721)

76. **(public) switched (telephone) network** (*Syn.* PSTN (abbreviation)) : the part of a public telephone network in which connections are established as and when required. ★ réseau (téléphonique) (public) à commutation → *réseau 148.* R коммутируемая (телефонная) сеть (общего пользования). D (öffentliches) Wählnetz. E red (telefónica) (pública) conmutada. I rete (telefonica) (pubblica) commutata. N (openbaar) geschakeld (telefoon)net. P sieć telefoniczna (publiczna) komutowana. S publikt telefonnät. (722)

77. **public telecommunication network** : a telecommunication network such that any person may become a user of the service provided by the network. ★ réseau de télécommunication public → *réseau 99.* D öffentliches Fernmeldenetz. P sieć telekomunikacyjna publiczna. (715)

78. **public telegram network** : a telecommunication network set up to provide a telegram service for the public. *Note.* — A public telegram network is supplied, operated and controlled by an administration or recognized private operating agency. ★ réseau télégraphique public → *réseau 144.* R телеграфная сеть общего пользования. D öffentliches Telegrammnetz. E red telegráfica pública. I rete telegrafica pubblica. N openbaar telegraafnet. P sieć telegramowa publiczna. S telegrafnät. (721)

79. **public telephone network** : a telephone network supplied, operated, and controlled by a telecommunication operating administration or recognized private operating agency, in order to provide a public service. ★ réseau téléphonique public → *réseau 147.* R телефонная сеть общего пользования. D öffentliches Fernsprechnetz. E red telefónica pública. I rete telefonica pubblica. N openbaar telefoonnet. P sieć telefoniczna publiczna. S publikt telefonnät. (722)

80. **radial operation (of a part of a network)** : → *operation 56*

81. **reciprocal two-port network** : a two-port network in which the quotient of the voltage at one port by the short-circuit current at the second port is equal to the quotient of the voltage at the second port by the short-circuit current at the first port. *Note.* — A reciprocal *n*-port network is an *n*-port network that possesses a symmetrical immittance matrix. ★ biporte réciproque → *biporte 12.* R взаимная схема с двумя парами зажимов. D kopplungssymmetrisches Zweitor; reziprokes Zweitor. E bipuerta recíproca. I doppio bipolo reciproco. N reciproke tweepoort. P dwuwrotnik odwracalny; czwórnik odwracalny; czwórnik energetycznie symetryczny. S reciprok tvåport. (131)

82. **ring operation of a part of a network** : → *operation 57*

83. **satellite network** : a combination of one satellite and all of its associated earth stations. ★ réseau à satellite → *réseau 68.* R спутниковая сеть. D Satelliten-Netzwerk. E red de un satélite. I rete a satellite. N satellietnetwerk. P sieć satelitarna. S satellitkommunikationsnät. (725)

84. **separate network operation** : → *operation 62*

85. **signalling network** : a network used for common-channel signalling, and consisting of signalling modules, and possibly some individual signalling links, between the switching nodes in a telecommunication network. ★ réseau sémaphore → *réseau 138.* R сеть сигнализации. D Zeichengabe-Netz. E red de señalización. I rete di segnalazione. N signaleringsnet. P sieć sygnalizacyjna. S signaleringsnät. (714)

86. **signalling network** : a network used for common channel signalling between the nodes in a telecommunication network where switching occurs. ★ réseau sémaphore → *réseau 139.* D Zeichengabe-Netz. P sieć sygnalizacyjna. (715)

87. **signalling network management** : → *management 5*

88. **star network** (*Syn.* star system) : → *system 197*

89. **store and forward switched network** (*Syn.* message switching network) : → *network 41*

90. **(stored) network map** (*Syn.* map-in-memory) : a symbolic logic representation of the states of paths and crosspoints in a switching network stored as data in a common control system. ★ image du réseau → *image 19.* R карта поля (записанная). D Netzabbildung (gespeicherte); Belegungsabbildung. E mapa de red (en memoria). I mappa della rete (in memoria). N padboekhouding; padregistratie. P odwzorowanie sieci komutacyjnej (w pamięci). S lagrad nätkarta. (714)

91. **(subscriber's line) flexible network** : a local line network that contains cross-connection points. ★ réseau (de lignes téléphoniques d'abonnés) à structure souple → *réseau 92.* R гибкая сеть (абонентских линий). D flexibles Anschlußnetz. E red de estructura flexible (de líneas de abonado). I rete elastica. N ..... P sieć o strukturze elastycznej. S flexibelt lokalnät. (722)

92. **(subscriber's line) rigid network** : a local line network without cross-connection points. ★ réseau (de lignes téléphoniques d'abonné) à structure rigide → *réseau 90.* R жесткая сеть (абонентских линий). D starres Anschlußnetz. E red de estructura rígida (de líneas de abonado). I rete rigida. N ..... P sieć o strukturze sztywnej. S fast lokalnät. (722)

93. **switched network** : a telecommunication network in which the setting up of a connection from a calling terminal to at least one called terminal requires the identification of the called terminal by means of the interpretation of an address provided by the calling terminal, and in which the transmission channels required for the interconnection of such terminals are established, for the necessary duration, by switching. ★ réseau commuté → *réseau 79.* D vermitteltes Netz. P sieć komutacyjna. (715)

94. **switched-star network** (*Syn.* switched-star system) : → *system 209*

95. **switching network** : the switching stages of a telecommunication exchange taken collectively. ★ réseau de connexion → *réseau 84.* R коммутационное поле. D Koppelnetz. E red de conmutación. I rete di commutazione. N schakelnetwerk. P sieć komutacyjna. S väljarnät. (714)

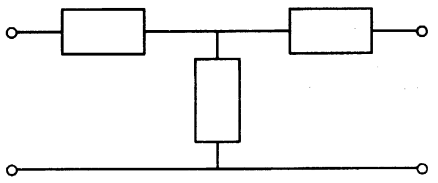
96. **symmetrical two-port network** : a two-port network where the interchange of the input terminals with the output terminals does not affect the operation of the external circuits. *Note.* — The network is said to be asymmetrical when this is not the case. ★ biporte symétrique → *biporte 13.* R симметричная схема с двумя парами зажимов; симметричный четырехполюсник (избегать). D längssymmetrisches Zweitor. E bipuerta simétrica. I doppio bipolo simmetrico. N symmetrische tweepoort. P dwuwrotnik symetryczny; czwórnik symetryczny. S symmetrisk tvåport. (131)

97. **synchronised network** (sound broadcasting) : group of sound broadcasting transmitters whose carrier frequencies are identical to within a fraction of a hertz and which transmit the same programme. ★ réseau synchronisé → *réseau 143.* R синхронная сеть (звукового радиовещания). (723)

98. **synchronization network** : an arrangement of synchronization nodes and synchronization links provided in a synchronized network to synchronize the clocks in or connected to these nodes. *Note.* — A synchronization network is usually an important constituent of a synchronized network. ★ réseau de synchronisation → *réseau 95.* R сеть синхронизации. D Synchronisationsnetzwerk. E red de sincronización. I rete di sincronizzazione. N synchronisatienetwerk. P sieć sychronizacji. S synkroniseringsnät. (704)

99. **synchronization network** : in a telecommunication network an arrangment of nodes and links provided in order to ensure that the clock rates of both digital switching and transmission equipment conform to the network standards. ★ réseau de synchronisation → *réseau 96.* D Synchronisationsnetz. P sieć synchronizacyjna. (715)

100. **synchronized network** (in TDM) (*Syn.* synchronous network (in TDM)) : a network in which clocks at designated nodes are adjusted to establish and maintain signals in synchronism. ★ réseau synchronisé → *réseau 142.* R синхронизированная сеть (при ВРК); синхронная сеть (при ВРК). D synchronisiertes Netzwerk (in TDM); Synchronnetzwerk. E red sincronizada (de transmisión numérica). I rete sincronizzata (in TDM); rete sincrona. N synchroon netwerk. P sieć synchronizowana (w transmisji cyfrowej). S synkront nät. (704)



101. **synchronous data network** : a data network which uses a method of synchronization between data circuit-terminating equipment and the data switching exchange (DSE) and between DSEs, the signalling rates being controlled by timing equipment within the network. ★ réseau synchrone de données → *réseau 141.* R синхронная сеть данных. D synchrones Datennetz. E red síncrona de datos. I rete dati sincrona. N gesynchroniseerd datanet. P sieć teledacyjna synchroniczna. S synkront datanät. (721)

102. **synchronous network** (*Syn.* synchronized network) : → *network 100*

103. **telecommunication network** (*Syn.* telecommunication system (USA)) : all the means of providing telecommunication services between a number of locations where equipment provides access to these services. ★ réseau de

télécommunication → *réseau 97.* R сеть электросвязи. D Fernmeldenetz. E red de telecomunicación. I rete di telecomunicazioni. N telecommunicatienetwerk. P radiowy. S telenät. (701,715)

104. **telephone network** : a telecommunication network primarily intended for telephony. ★ réseau téléphonique → *réseau 145.* R телефонная сеть. D Fernsprechnetz. E red telefónica. I rete telefonica. N telefoonnet. P sieć telefoniczna. S telefonnät. (722)
105. **terminal of a network** : → *terminal 50*
106. **T-network** :

★ biporte en T → *biporte 8.* R Т-схема. D Zweitor in T-Schaltung. E red en T. I doppio bipolo a T. N T-netwerk. P dwuwrotnik (typu) T; czwórnik (typu) T. S T-länk. (131)
107. **topological diagram of a network** : → *diagram 23*
108. **topology of networks** : → *topology 1*
109. **twin-T network** : a two-port network obtained by connecting in parallel the corresponding input terminals and the corresponding output terminals of two T-networks. ★ biporte en double T → *biporte 3.* R двойная Т-схема. D Parallelschaltung von T-Zweitoren. E red en doble T. I doppio bipolo a doppio T. N dubbel-T-netwerk. P ..... S dubbel T-länk. (131)
110. **two-port network** (*Syn.* two-terminal-pair network) : a network with two pairs of terminals forming two ports. ★ biporte → *biporte 1.* R четырехполюсник. D Zweitor; Vierpol. E (red) bipuerta. I biporta; doppio bipolo. N tweepoort. P dwuwrotnik; czwórnik. S tvåport; fyrpol. (131)
111. **two-terminal network** (*Syn.* one-port network) : → *network 61*
112. **two-terminal-pair network** (*Syn.* two-port network) : → *network 110*
113. **unbalanced state of a polyphase network** : → *state 47*
114. **unconnected network** : a network not allowing passage from any node to any other node by a continuous path using only branches of that network. ★ réseau non connexe → *réseau 130.* R несвязанная схема. D nicht zusammenhängendes Netzwerk. E red no conexa. I rete non connessa. N niet-samenhangend netwerk. P układ niespójny. S ej sammanhängande nät. (131)

neutral

1. **arc-suppression-coil-earth (neutral) system** (*Syn.* resonant earthed (neutral) system) : → *system 175*
2. **change-over with neutral position** : → *change-over 9*
3. **concentric neutral cable** : → *cable 24*
4. **electrically neutral** : qualifies a body or a system in which the electric charge is zero. ★ électriquement neutre → *neutre 9.* R электрически нейтральное. D elektrisch neutral. E eléctricamente neutro. I elettricamente neutro. N elektrisch neutraal. P elektrycznie obojętny. S elektriskt neutral; oladdad. (121)
5. **impedance earthed (neutral) system** : → *system 85*
6. **isolated neutral system** : → *system 98*
7. **line to neutral voltage** (*Syn.* phase to neutral voltage) : → *voltage 141*
8. **neutral** : the designation of any conductor, terminal or any element connected to the neutral point of a polyphase system. ★ neutre → *neutre 13.* R нейтральный. D ..... E neutro. I neutro. N sterpunt. P zerowy. S nolledare. (601)
9. **neutral atmosphere** : → *atmosphere 9*
10. **neutral conductor** : → *conductor 50*
11. **neutral line** : → *line 116*
12. **neutral magnetic state** : → *state 25*
13. **neutral point connection** : → *connection 37*
14. **neutral point displacement voltage** : → *voltage 123*
15. **neutral point in a polyphase system** : → *point 28*
16. **neutral region** : → *region 14*
17. **neutral section** : → *section 18*
18. **neutral step wedge** : → *wedge 1*
19. **neutral terminal** : → *terminal 21*
20. **neutral wedge** : → *wedge 2*
21. **neutral zone** : → *zone 8*
22. **neutral zone** : → *zone 9*
23. **neutral zone control** : → *control 129*
24. **phase to neutral voltage** : → *voltage 141*
25. **resonant earthed (neutral) system** : → *system 175*
26. **single-phase concentric neutral cable** : → *cable 62*
27. **solidly earthed (neutral) system** : → *system 191*
28. **three-phase concentric neutral cable** : → *cable 67*
29. **three-phase neutral reactor** : → *reactor 44*

neutralization

1. **neutralization value** (*Syn.* acid number) : → *number 1*

neutralize

1. **to neutralize** : to bring a magnetic material to a neutral magnetic state. *Note.* — Neutralization may be obtained thermally or dynamically. ★ neutraliser → *neutraliser 5.* R нейтрализовать. D neutralisieren (begriff in diesem Zusammenhang aufgegeben). E neutralizar. I neutralizzare. N neutraliseren. P neutralizować. S neutralisera. (121,221)

neutralized

1. **dynamically neutralized state** : → *state 12*
2. **statically neutralized state** (*Syn.* statically demagnetized state) : → *state 40*
3. **thermally neutralized state** : → *state 45*

neutrino

1. **neutrino** : a stable elementary particle with zero charge, of spin 1/2, of rest mass less than one-thousandth that of the electron. *Note.* — So far two kinds of neutrino have been established, one associated with the emission of electrons and one with muons. ★ neutrino → *neutrino 1.* R нейтрино. D Neutrino. E neutrino. I neutrino. N neutrino. P neutrino. S neutrino. (391,881)

neutron

1. **delayed neutron fraction** : the ratio of the mean number of delayed neutrons per fission to the mean total number of neutrons (prompt plus delayed) per fission. ★ fraction de neutrons différés → *fraction de neutron 1.* D Anteil der verzögerten Neutronen. E fracción de neutrones retardados. I frazione di neutroni ritardati. N fractie nakomende neutronen. P udział neutronów opóźnionych. S relativt antal fördröjda neutroner. (026)
2. **delayed neutrons** : neutrons emitted by fission products in the process of their chain decay. ★ neutrons différés → *neutron 19.* D verzögerte Neutronen. E neutrones retardados. I neutroni ritardati. N nakomende neutronen. P neutrony opóźnione. S fördröjda neutroner. (026)
3. **diffusion coefficient for neutron flux density** : → *coefficient 16*
4. **effective delayed neutron fraction** : the ratio of the mean number of fissions caused by delayed neutrons to the mean total number of fissions caused by delayed plus prompt neutrons. *Note :* the effective delayed neutron fraction is generally larger than the actual delayed neutron fraction. ★ fraction efficace de neutrons différés → *fraction de neutron 3.* D effektiver Anteil der verzögerten Neutronen. E fracción eficaz de neutrones retardados. I frazione efficace di neutroni ritardati. N effectieve fractie nakomende neutronen. P efektywny udział neutronów opóźnionych. S effektivt antal fördröjda neutroner. (026)
5. **epicadmium neutrons** : neutrons of kinetic energy greater than the cadmium cut-off energy. ★ neutrons épicadmiques → *neutron 20.* D Epikadmiumneutronen. E neutrones epicádmicos. I neutroni epicadmici. N epicadmiumneutronen. P neutrony nadkadmowe. S epikadmiumneutroner. (026)
6. **epithermal neutrons** : neutrons of kinetic energy greater than that of thermal agitation; the term is often restricted to energies just above thermal, that is, energies comparable with those of

chemical bonds. ★ neutrons épithermiques → *neutron 21.* D epithermische Neutronen. E neutrones epitérmicos.. I neutroni epitermici. N epithermische neutronen. P neutrony epitermiczne. S epitermiska neutroner. (026)

7. **fast neutrons** : neutrons of kinetic energy greater than some specified value. This value may vary over a wide range and is dependent upon the application, such as reactor physics, shielding, or dosimetry. In reactor physics the value is frequently chosen to be 0.1 MeV. ★ neutrons rapides → *neutron rapide 2.* D schnelle Neutronen. E neutrones rápidos. I neutroni veloci. N snelle neutronen. P neutrony prędkie. S snabba neutroner. (026,881)
8. **fission neutrons** : neutrons originating in the fission process and including both prompt and delayed neutrons. ★ neutrons de fission → *neutron 17.* D Spaltneutronen. E neutrones de fisión. I neutroni di fissione. N splijtingsneutronen. P neutrony rozszczepieniowe. S klyvningsneutroner. (026)
9. **intermediate neutrons** : neutrons of kinetic energy between the energies of slow and fast neutrons. In reactor physics the range might be 1 eV to 0.1 MeV. ★ neutrons intermédiaires → *neutron 23.* D mittelschnelle Neutronen. E neutrones intermedios. I neutroni intermedi. N middelsnelle neutronen. P neutrony pośrednie. S intermediära neutroner. (026,881)
10. **neutron** : an elementary particle having no electric charge, a rest mass approximately equal to that of a proton and in the free state a mean life of about 1000 s. ★ neutron → *neutron 16.* R нейтрон. D Neutron. E neutrón. I neutrone. N neutron. P neutron. S neutron. (026,111,391,881)
11. **neutron absorber** : → *absorber 2*
12. **neutron absorber** : → *absorber 3*
13. **neutron absorption** : → *absorption 26*
14. **neutron absorption cross-section** : → *cross-section 20*
15. **neutron converter** : → *converter 12*
16. **neutron cycle** : → *cycle 10*
17. **neutron diffusion** : → *diffusion 13*
18. **neutron economy** : → *economy 1*
19. **neutron energy group** : → *group 46*
20. **neutron excess** : → *excess 3*
21. **neutron multiplication** : → *multiplication 9*
22. **neutron (number) density** : → *density 17*
23. **neutron or particle current density** : → *current-density 4*
24. **neutron therapy** : → *therapy 6*
25. **neutron thermopile** : → *thermopile 1*
26. **neutron yield per absorption** : → *yield 6*
27. **prompt neutron fraction** : → *fraction 6*
28. **prompt neutrons** : neutrons accompanying the fission process without measurable delay. ★ neutrons instantanés → *neutron 22.* D prompte Neutronen. E neutrones instantáneos. I neutroni istantanei. N prompte neutronen. P neutrony natychmiastowe. S prompta neutroner. (026)
29. **resonance neutrons** : neutrons the energy of which corresponds to the resonance energy of a specified nuclide or element. If the nuclide is not specified the term refers to resonance neutrons of ^{238}U . ★ neutrons de résonance → *neutron 18.* D Resonanzneutronen. E neutrones de resonancia. I neutroni di risonanza. N resonantieneutronen. P neutrony rezonansowe. S resonansneutroner. (026)
30. **self-powered neutron detector** (*Syn.* collectron) : → *collectron 1*
31. **slow neutrons** : neutrons of kinetic energy less than some specified value. This value may vary over a wide range and will be dependent upon the application, such as reactor physics, shielding, or dosimetry. In reactor physics the value is frequently chosen to be 1 eV; in dosimetry the cadmium cut-off energy is used. ★ neutrons lents → *neutron 24.* D langsame Neutronen. E neutrones lentos. I neutroni lenti. N langzame neutronen. P neutrony powolne. S långsamma neutroner. (026,881)
32. **subcadmium neutrons** : neutrons of kinetic energy less than the cadmium cut-off energy. ★ neutrons subcadmiques → *neutron 25.* D Subkadmiumneutronen. E neutrones subcádmicos. I neutroni subcadmici. N subcadmiumneutronen. P neutrony podkadmowe. S subkadmiumneutroner. (026)
33. **thermal neutrons** : neutrons essentially in thermal equilibrium with the medium in which they exist. ★ neutrons thermiques → *neutron 26.* D thermische Neutronen. E neutrones térmicos.. I neutroni termici. N thermische neutronen. P neutrony termiczne. S termiska neutroner. (026,881)
34. **time-of-flight neutron spectrometer** : → *spectrometer 11*

news

1. **electronic news gathering** : → *gathering 1*
2. **satellite news gathering** : → *gathering 2*

n-FSK

1. **n-FSK** (*Syn.* n-condition frequency shift keying) : → *keying 7*

N-gate

1. **N-gate thyristor** : → *thyristor 3*

nickel-cadmium

1. **nickel-cadmium battery** : → *battery 48*

nickel-iron

1. **nickel-iron battery** : → *battery 49*

nickel-zinc

1. **nickel-zinc battery** : → *battery 50*

night

1. **day/night tariff** (*Syn.* two-rate time-of-day tariff) : → *tariff 48*
2. **night tariff** : → *tariff 25*
3. **night warning light** : → *light 45*

night-blindness

1. **night-blindness** (*Syn.* hemeralopia) : → *hemeralopia 1*

nipple

1. **electrode nipple** : a threaded part joining two sections of an arc furnace electrode of the same size. ★ raccord d'électrode → *raccord 6.* R ниппель электрода. D Elektrodennippel. E conector de electrodo; niple. I raccordo di elettrodo; nipplo. N elektrodekoppelstuk. P złączka elektrodowa. S skarvstycke. (841)

nitriding

1. **ion nitriding** : a nitriding process using a glow discharge in a gas mixture. ★ nitruration par bombardement ionique → *nitruration 3.* R ионное азотирование. D Ionitrieren. E nitruración iónica; nitruración por bombardeo iónico. I nitrurazione per bombardamento ionico; nitrurazione ionica. N plasmanitreren. P azotowanie jonowe. S jonnitrering. (841)
2. **nitriding** : a thermochemical treatment applied to a ferrous alloy, in which holding is carried out in a suitable medium to increase the surface concentration of nitrogen which diffuses into the workpiece. *Note.* — Nitriding increases the surface hardness and improves the fatigue strength and wear resistance. ★ nitruration → *nitruration 1.* R азотирование. D Nitrierhärten. E nitruración. I nitrurazione. N nitreren. P azotowanie. S nitrering. (841)

nodal

1. **nodal period** : → *period 19*

node

1. **ascending node** (of a satellite) : the point at which the orbit of a satellite intersects the principal reference plane, the third co-ordinate of the satellite being increasing on passing through that point. ★ nœud ascendant → *nœud 10.* R восходящий узел (спутника). D aufsteigender Knoten (eines Satelliten). E nodo ascendente (de un satélite). I nodo ascendente (di un satellite). N stijgend knooppunt. P węzeł wznoszenia (satelity). S uppstigande nod. (725)
2. **descending node** (of a satellite) : the point at which the orbit of a satellite intersects the principal reference plane, the third co-ordinate of the satellite being decreasing on passing through that point. ★ nœud descendant → *nœud 17.* R нисходящий узел (спутника). D absteigender Knoten (eines Satelliten). E nodo descendente (de un satélite). I nodo discendente (di un satellite). N dalend knooppunt. P węzeł zanižania (satelity). S nedstigande nod. (725)
3. **node** : in a space where a standing wave exists, a point or a locus at which the amplitude of a specified quantity has minimum value. ★ nœud → *nœud 1.* R узел. D Knoten. E nodo. I nodo. N knoop. P węzeł. S nod. (101)

4. **node** (*Syn.* vertex (USA)) : the end-point of a branch in a network or a point at which two or more branches meet. ★ nœud → *nœud 2.* R узел. D Knoten. E nudo. I nodo. N knooppunt. P węzeł. S nod; knutpunkt. (131)
5. **node** (*Syn.* panel point) : a point of concurrence of several members in a tower . ★ nœud → *nœud 3.* R узел. D Fachwerkknoten. E nudo. I nodo. N knooppunt. P węzeł zakratowania. S knutpunkt. (466)
6. **node** : in a telecommunication network, any point where two or more links are interconnected. ★ nœud → *nœud 4.* D Knoten. P węzeł. (715)
7. **node** (of a data network) : a point of a data network, where one or more functional units interconnect data channels or data circuits. ★ nœud → *nœud 5.* R узел (сети данных). D Netzknoten. E nudo; nodo. I nodo. N knooppunt. P węzeł. S nod; grenpunkt. (721)
8. **node** (*Syn.* star point) : → *point 46*
9. **node** (*Syn.* standing-wave minimum) : → *minimum 23*
10. **node** : point, line or surface in a standing wave where some specified characteristic of the wave field has essentially zero amplitude. *Notes. 1* — In practice, this amplitude is generally not zero but simply a minimum. The node is then said to be partial. *2* — The appropriate modifier should be used before the word "node" to signify the type that is intended; e.g. displacement node, particle velocity node, sound pressure node. ★ nœud → *nœud 7.* R узел. D (Schwingungs-)Knoten. E nodo. I nodo. N knoop. P węzeł. S nod. (801)
11. **polyphase node** : the ordered set of the *m* nodes of the graph of a polyphase circuit corresponding to one another by cyclic permutation. ★ nœud polyphasé → *nœud 19.* R многофазный узел. D Mehrphasenknoten. E nudo polifásico. I nodo polifase. N meerfasenknooppunt. P węzeł (obwodu wielofazowego). S ..... (131)
12. **reference node** : the node of a network where the phase of the node voltage in the complex plane is arbitrarily fixed, and with reference to which the phases of the system state variables are measured. ★ nœud de référence → *nœud 14.* R базисный узел. D Bezugsknoten. E nudo de referencia. I nodo di riferimento. N referentieknooppunt. P węzeł sieciowy odniesienia. S referensknutpunkt. (603)
13. **switching node** : in a telecommunication network, a node where switching occurs. ★ point de commutation → *point 13.* D Vermittlungsknoten. P węzeł komutacyjny. (715)
14. **synchronization node** : a point in a synchronized network at which timing information is derived, sent, or received and processed for the purpose of synchronization. ★ nœud de synchronisation → *nœud 16.* R узел синхронизации. D Synchronisationsknoten. E nudo de sincronización. I nodo di sincronizzazione. N synchronisatieknooppunt. P węzeł synchronizacji. S synkroniseringsnod. (704)

node-by-node

1. **node-by-node selecting** : → *selecting 3*

noise

1. **ambient noise** (in telephony) : acoustic noise which is present in the neighbourhood of a person using a telephone set. *Note.* — The ambient noise is usually a composite of sounds from many sources, near and far, and may interfere with the telephone conversation. ★ bruit ambiant → *bruit 11.* R местный шум (в телефонии). D Umgebungsgeräusch (bei der Telefonie). E ruido ambiente (en telefonía). I rumore ambiente. N omgevingsgeruis (bij telefonie). P szum otoczenia. S omgivningsbuller. (722,801)
2. **ambient noise sidetone** : → *sidetone 1*
3. **background noise** (*Syn.* hiss) : noise appearing at the output of a given equipment in the presence of the wanted signal. *Note.* — The term "hiss" applies particularly to the case of an audible continuous noise. ★ bruit de fond → *bruit 21.* R фоновый шум; шипение. D Hintergrundrauschen; Zischen. E ruido de fondo. I rumore di fondo; soffio. N achtergrondruis. P szum tłowy. S bakgrundsbrus. (702)
4. **background noise** : total of interference from all sources in a system used for the production, transmission, detection, measurement, or recording of a signal. ★ bruit de fond → *bruit 22.* R шумовой фон. D Grundgeräusch; Eigengeräusch. E ruido de fondo. I rumore di fondo. N achtergrondruis. P szum tła. S bakgrundsbrus. (801)
5. **background noise** : unwanted signals present at the output of a transmission channel in the absence of the wanted signal, when the channel is in normal operation. ★ bruit de fond → *bruit 23.* R шум паузы. D Grundrauschen. E ruido de fondo. I rumore di fondo. N grondruis. P szum jałowy. S bakgrundsbrus. (806)
6. **basic noise** : noise appearing at the output of a transmission channel or equipment in the absence of the wanted signal and which contributes to background noise when the signal is present. ★ bruit propre → *bruit 55.* R собственный шум. D Grundrauschen. E ruido propio. I rumore proprio; rumore di base. N basisruis. P szum własny. S grundbrus. (702)
7. **bit energy to noise spectral density ratio** : → *ratio 10*
8. **coloured noise** : random noise which has a continuous spectrum and a varying power spectral density in the frequency band considered. ★ bruit coloré → *bruit 14.* R окрашенный шум. D farbiges Rauschen. E ruido coloreado. I rumore colorato. N gekleurde ruis. P szum kolorowy. S färgat brus. (702)
9. **continuous noise** : noise the effects of which on a particular equipment cannot be resolved into a succession of distinct effects. ★ bruit continu → *bruit 15.* R непрерывный [гладкий] шум. D Dauerrauschen; dauerndes Rauschen. E ruido continuo. I rumore continuo. N continue ruis. P szum ciągły. S ihållande störning. (161,702)
10. **crosscolour noise** : an unwanted colour effect on a picture due to the introduction of noise from the luminance channel into the chrominance channel. *Note.* — This impairment occurs particularly in systems using composite colour signals. ★ bruit de diaphotie → *bruit 20.* R перекрестный шум яркость-цветность. (723)
11. **cyclic noise** (*Syn.* swish) : a spurious noise perceived at each revolution of the disk during play-back. ★ bruit rythmique → *bruit 64.* R периодическая помеха. D periodisches Schleifen. E ruido rítmico. I rumore ritmico. N slis. P ..... S periodiskt brus. (806)
12. **effective noise bandwidth** : → *bandwidth 5*
13. **effective perceived noise level** : → *level 15*
14. **electromagnetic noise** : a time-varying electromagnetic phenomenon apparently not conveying information and which may be superimposed on or combined with a wanted signal. ★ bruit électromagnétique → *bruit 40.* R электромагнитный шум. D elektromagnetisches Rauschen. E ruido electromagnético. I rumore elettromagnetico. N elektromagnetische ruis. P szum elektromagnetyczny. S elektromagnetiskt brus. (161)
15. **equivalent noise irradiation** : → *irradiation 4*
16. **equivalent noise resistance** : → *resistance 19*
17. **(equivalent) noise resistance** : → *resistance 20*
18. **equivalent noise voltage** : → *voltage 64*
19. **equivalent (spot) noise temperature** : → *temperature 16*
20. **ergodic noise** : a random noise with identical time and statistical mean values. ★ bruit ergodique → *bruit 43.* R эргодический шум. D ergodisches Rauschen. E ruido ergódico. I rumore ergodico. N ergodische ruis. P szum ergodyczny. S ergodiskt brus. (101)
21. **(exchangeable) noise power** : → *power 58*
22. **external noise** : noise present at the output of a specified equipment or system originating outside the equipment or system. ★ bruit externe → *bruit 44.* R внешний шум. D externes Rauschen. E ruido externo. I rumore esterno. N externe ruis. P szum zewnętrzny. S yttre störning. (702)
23. **flat random noise** (*Syn.* white noise) : → *noise 93*
24. **flicker noise** : current-dependent tube noise having a spectral density of power that is an inverse function of frequency. ★ bruit de scintillation → *bruit 33.* R фликкер-шумы. D Funkeleffekt. E ruido de parpadeo. I rumore di scintillazione. N flikkerruis. P szum migotania. S fladderbrus. (531)
25. **flicker noise** : random noise caused by the surface irregularity or granular nature of a medium through which an electric current flows. *Notes. 1* — Examples of irregular or granular media are : a junction between semiconductors, an oxide coated cathode and a granular resistor. *2* — Flicker noise has a continuous spectrum and its power spectral density is important only at very low frequencies where it approximates to $1/f$ noise. ★ bruit de scintillation → *bruit 34.* R мерцающий шум. D Flackerrauschen. E ruido de Flicker; ruido de parpadeo. I rumore di scintillamento. N flikkerruis. P szum migotania. S fladderbrus. (702)

26. Gaussian noise : random noise the values of which over any number n of arbitrary instants are distributed in accordance with an n-variable gaussian probability law. *Notes. 1* — Gaussian noise is entirely defined by its time varying mean and by a covariance function of two instants. If the noise is stationary the mean is independent of time, the covariance becomes a correlation function depending only on the difference between the two instants considered and the knowledge of this correlation function is equivalent to that of the power spectral density. *2* — Gaussian noise may be produced by a large number of independent pulses such that in any finite time interval each has a negligible value compared to that of the sum of the pulses. *3* — In practice thermal noise, shot noise and quantum noise are gaussian noises. ★ bruit gaussien → *bruit 45.* R гауссов шум. D gaußsches Rauschen. E ruido gaussiano. I rumore gaussiano. N Gaussruis. P szum gaussowski. S gaussfördelat brus. (702)

27. ideal noise diode : → *diode 10*

28. impulsive noise : noise which, when incident on a particular equipment, manifests itself as a succession of distinct pulses or transients. ★ bruit impulsif → *bruit 46.* R импульсный шум. D Impulsrauschen. E ruido impulsivo. I rumore impulsivo. N impulsruis. P szum impulsowy. S impulsstörning. (161,702)

29. intermodulation noise : noise due to the presence of intermodulation products not separately identifiable. ★ bruit d'intermodulation → *bruit 39.* R интермодуляционный шум. D Intermodulationsrauschen. E ruido de intermodulación. I rumore d'intermodulazione. N intermodulatieruis. P zakłócenie intermodulacyjne. S intermodulationsbrus. (702)

30. intra-system noise (*Syn.* intrinsic noise) : → *noise 31*

31. intrinsic noise (*Syn.* intra-system noise) : noise present at the output of a specified equipment or system, originating within the equipment or system. ★ bruit interne → *bruit 48.* R внутренний шум. D inneres Rauschen; systeminternes Rauschen. E ruido interno. I rumore interno. N intrinsieke ruis; systeemruis. P szum wewnętrzny. S inre störning. (702)

32. ion noise : tube noise caused by ions within the electron beam. ★ bruit ionique → *bruit 49.* R ионный шум. D Ionen-Rauschen. E ruido iónico. I rumore ionico. N ionenruis. P szum jonowy. S jonbrus. (531)

33. Johnson noise (*Syn.* thermal noise) : → *noise 88*

34. judged perceived noise level : → *level 38*

35. low noise antenna : → *antenna 70*

36. man-made noise : Electromagnetic noise having its source in man-made devices. ★ bruit artificiel → *bruit 12.* R индустриальный шум. D künstliches Rauschen. E ruido artificial. I rumore artificiale. N kunstmatige ruis. P zakłócenie powodowane działalnością ludzką. S artificiell störning. (161,702)

37. mean (equivalent) noise temperature : → *temperature 27*

38. (mean) noise factor : → *factor 118*

39. (mean) noise figure (*Syn.* (mean) noise factor) : → *factor 118*

40. mean noise temperature : → *temperature 28*

41. modal noise (*Syn.* speckle noise) : noise generated in an optical receiver by the combination of the fluctuations of energy distribution between the different modes of the optical fibre, the phase fluctuations in the oscillations propagated by these modes and the differential mode attenuation. ★ bruit modal → *bruit 51.* R модовый шум. D Modenrauschen; Fleckenrauschen. E ruido modal; ruido granular. I rumore modale; rumore di granulosità (ottica). N modale ruis; spikkelruis. P szum modowy. S modbrus. (731)

42. modulation noise : unwanted signals generated by a wanted signal, excluding those due to harmonic and intermodulation products. Their characteristics are dependent upon the recording medium as well as the signal characteristic. ★ bruit de modulation → *bruit 29.* R модуляционный шум. D Modulationsrauschen. E ruido de modulación. I rumore di modulazione. N modulatieruis. P szum modulacyjny. S modulationsbrus. (806)

43. natural noise : electromagnetic noise having its source in natural phenomena and not generated by man-made devices. ★ bruit naturel → *bruit 52.* R естественый шум. D natürliches Rauschen. E ruido natural. I rumore naturale. N natuurlijke ruis. P szum naturalny. S naturlig störning; naturligt brus. (161,702)

44. noise : any undesired signal; by extension any unwanted disturbance within a useful frequency band. ★ bruit → *bruit 3.* R шум. D Geräusch; Störsignal. E ruido. I rumore. N ruis; stoorsignaal. P szum. S brus. (101)

45. noise : unwanted deviations of the value indicated or supplied which occur more or less randomly and generally have a wide frequency spectrum. Noise is determined under specified conditions. *Note.* — Noise is a part of PARD. ★ bruit → *bruit 4.* R шумы. D Rauschen. E ruido. I rumore. N ruis. P szum. S brus. (303)

46. noise (in telecommunication) : any variable physical phenomenon apparently not conveying information and which may be superimposed on, or combined with, a wanted signal. *Notes. 1* — In certain cases a noise may convey information on some characteristics of its source, for example its nature and location. *2* — An aggregate of signals may appear as noise, when they are not separately identifiable. ★ bruit → *bruit 5.* R шум (в электросвязи). D Rauschen (in der Telekommunikation); Geräusch; Störsignal. E ruido (en telecomunicación). I rumore. N ruis; stoorsignaal. P szum (w telekomunikacji). S brus. (702)

47. noise (on a television picture) : disturbances in brightness or chromaticity that appear randomly in space and time on the picture and result from noise in the picture signal source or the transmission channel, or, in the case of digitized signals, from signal quantisation. *Note.* — Associated term : noisy. ★ bruit → *bruit 6.* R шум (в телевизионном изображении). (723)

48. noise : *a)* Erratic or statistically random oscillation. *b)* Disagreeable or undesired sound or other disturbance. ★ bruit → *bruit 7.* R шум. D Geräusch; Lärm. E ruido. I rumore. N ruis; lawaai. P szum; hałas. S störljud; brus; buller. (801)

49. noise audiogram (*Syn.* masking audiogram) : → *audiogram 1*

50. noise electromotive force (*Syn.* equivalent noise voltage) : → *voltage 64*

51. noise equivalent input : → *input 32*

52. noise equivalent irradiance : → *irradiance 4*

53. noise equivalent power : → *power 89*

54. noise equivalent power : → *power 90*

55. noise temperature : → *temperature 30*

56. partition noise : tube noise caused by random fluctuations in the distribution of current between the various electrodes. ★ bruit de répartition → *bruit 31.* R шум токораспределения. D Stromverteilungsrauschen. E ruido de reparto. I rumore di ripartizione. N verdelingsruis. P szum rozpływowy. S fördelningsbrus. (531)

57. perceived noise level : → *level 68*

58. pink noise : random noise having a continuous spectrum and such that the power spectral density is proportional to the reciprocal of the frequency in the frequency band considered. ★ bruit rose → *bruit 63.* R розовый шум. D rosa Rauschen. E ruido rosa. I rumore rosa. N rose ruis. P szum różowy. S skärt brus. (702,801)

59. primer noise (for TR and pre TR tubes) : increase in the radio frequency noise output power of the tube caused by primer current. ★ bruit d'amorçage → *bruit 17.* R шум вспомогательного разряда (для РЗП и предварительноги РЗП). D Rauschen durch Vorionisierung (bei Empfänger-und Vorsperröhren). E ruido de cebado (tubos T.R. y P.T.R.). I rumore di innesco (tubi TR e pre-TR). N activeringsruis. P szum elektrody pomocniczej. S (hjälp)tändarbrus. (531)

60. psophometrically weighted noise : noise weighted by a filter the amplitude/frequency characteristic of which corresponds to the sensitivity of the human ear at different frequencies. *Note.* — The weighting law is given in the definition of the psophometer in CCITT Recommendation O.41 for commercial telephony and in CCIR Recommendation 468 for sound programme channels. ★ bruit psophométrique → *bruit 58.* R псофометрически взвешенный шум. D psophometrisch gewichtetes Rauschen. E ruido psofométrico. I rumore psofometrico. N psofometrisch gewogen ruis. P szum ważony psofometrycznie. S psofometriskt vägt brus. (702)

61. quantizing noise (*Syn.* quantizing distortion) : → *distortion 61*

62. quantum noise : noise attributable to the discrete particle nature of electromagnetic radiation. *Note.* — At normal temperatures quantum noise is of importance only for extremely high frequencies such as those of optical radiation. ★ bruit quantique → *bruit 59.* R квантовый шум.

D Quantenrauschen. E ruido cuántico; ruido fotónico. I rumore quantico. N fotonruis. P szum kwantowy. S kvantbrus. (702,731)

63. **quasi-impulsive noise** : noise equivalent to a superposition of impulsive noise and continuous noise. ★ bruit quasi impulsif → *bruit 60.* R квази-импульсный шум. D Quasi-Impulsrauschen. E ruido quasi impulsivo. I rumore quasi-impulsivo; disturbo quasi-impulsivo. N quasi-impulsruis. P szum quasi-impulsowy. S kvasiimpulsstörning. (161,702)

64. **radiated noise** : sound radiated into water by ships, surface vessels, submarines or fixed installations. ★ bruit rayonné → *bruit 62.* R шумы кораблей. D abgestrahltes Geräusch. E ruido irradiado. I rumore irradiato. N uitgestraald geruis. P szum wypromieniowywany. S utstrålat buller. (801)

65. **radio (frequency) noise** : electromagnetic noise having components in the radio frequency range. ★ bruit radioélectrique → *bruit 61.* R радио (частотный) шум. D hochfrequentes Rauschen. E ruido radioeléctrico. I rumore radioelettrico. N radiofrequente ruis. P szum radioelektryczny. S radiofrekvent brus. (161,702)

66. **random noise** : noise the values of which at given instants are not predictable. ★ bruit aléatoire → *bruit 8.* R случайный шум. D Zufallsrauschen. E ruido aleatorio; ruido errático. I rumore aleatorio. N willekeurige ruis. P szum przypadkowy. S slumpmässigt brus. (161,702)

67. **random noise** : oscillation due to the aggregate of a large number of elementary disturbances with random occurence in time. ★ bruit aléatoire → *bruit 9.* R случайный шум. D Rauschen. E ruido errático; ruido aleatorio. I rumore casuale. N ruis. P szum losowy; hałas losowy. S slumpbrus. (801)

68. **recurrent (impulsive) noise** (*Syn.* recurrent disturbance) : noise produced by pulses or transients that repeat at equal or almost equal time intervals. ★ bruit (impulsif) récurrent → *bruit 47.* R периодический шум. D wiederkehrendes (Impuls-)Rauschen; wiederkehrende Störung. E ruido impulsivo (recurrente). I rumore (impulsivo) ricorrente. N (zich) herhalende storing. P szum cykliczny. S återkommande brus. (702)

69. **room noise** : ambient noise present in a room. ★ bruit de salle → *bruit 32.* R шум помещения. D Raumgeräusch. E ruido de sala. I rumore di sala. N ..... P szum pomieszczenia. S rumsbuller. (722)

70. **sea noise** : sound in the sea emitted by natural sources such as thermal agitation, wind, water waves, currents and rain. ★ bruit de mer → *bruit 28.* R шум моря. D Seegeräusch. E ruido de mar. I rumore del mare. N zeeruis. P szum morza. S sjöbrus. (801)

71. **shot noise** : tube noise caused by random fluctuations of the current of charge carriers passing through a surface. ★ bruit de grenaille → *bruit 26.* R дробовой шум. D Schrotrauschen. E ruido de granalla. I rumore granulare. N hagelruis. P szum śrutowy. S hagelbrus. (531)

72. **shot noise** : random noise due to the fact that electric current is constituted by movement of discrete charges. *Notes. 1* — Shot noise appears essentially in semiconductor devices or electron tubes. *2* — Shot noise has a continuous spectrum and may be considered as white noise in a frequency band between very low frequencies and the higher frequencies where effects such as transit time become dominant. ★ bruit de grenaille → *bruit 27.* R дробовой шум. D Schrotrauschen. E ruido de impacto. I rumore granulare. N hagelruis. P szum śrutowy. S hagelbrus. (702,731)

73. **signal/noise ratio** (*Syn.* signal-to-noise ratio) : → *ratio 91*

74. **signal to noise ratio of a tape recorder** : → *ratio 86*

75. **signal-to-bias noise ratio** : → *ratio 87*

76. **signal-to-noise ratio** : → *ratio 91*

77. **sonar background noise** : total noise that interferes with the reception of the desired signal and is presented to the final receiving element such as a recorder or the ear of a listener. ★ bruit de fond d'un sonar → *bruit 25.* R шумовая помеха на гидроакустической станции. D Sonar-Grundgeräusch. E ruido de fondo de un sonar. I rumore di fondo da sonar. N achtergrondgeruis van de sonar. P szum podstawowy sonaru. S sonar-bakgrundsbrus. (801)

78. **speckle noise** (*Syn.* modal noise) : → *noise 41*

79. **spot noise factor** : → *factor 168*

80. **spot noise figure** (*Syn.* spot noise factor) : → *factor 168*

81. **spot noise temperature** : → *temperature 47*

82. **stationary noise** : a disturbance having time-invariant properties. ★ bruit stationnaire → *bruit 65.* R постоянный шум. D stationäres Geräusch (Rauschen). E ruido estacionario. I rumore stazionario. N stationaire ruis; stationair stoorsignaal. P szum stacjonarny. S stationärt brus. (101)

83. **stationary random noise** : a random disturbance with time-invariant statistical properties. ★ bruit aléatoire stationnaire → *bruit 10.* R случайный постоянный шум. D (stationäres)Rauschen; (stationäres)Zufallsgeräusch. E ruido aleatorio estacionario. I rumore aleatorio stazionario. N stationaire aselecte ruis. P szum przypadkowy stacjonarny. S stationärt slumpbrus. (101)

84. **supply noise** (*Syn.* hum) : → *hum 3*

85. **surface noise** : a noise component in the electrical output of a pick-up head due to irregularities in the surface of the groove walls at the points of stylus tip contact. ★ bruit de surface → *bruit 35.* R поверхностный шум. D Grundgeräusch. E ruido de superficie. I rumore di superficie. N ruis. P szum powierzchniowy. S ytbrus. (806)

86. **switching noise** : noise produced by switching operations. ★ bruit de commutation → *bruit 19.* R коммутационный шум. D Schaltrauschen. E ruido de conmutación. I rumore di commutazione. N schakelruis. P szum komutacyjny. S kopplingsbrus. (702)

87. **telegraph noise** (*Syn.* key clicks) : noise produced by telegraph equipment or circuits. ★ bruit de télégraphe → *bruit 37.* R телеграфный шум; щелчки манипуляции. D Telegrafierauschen; Tastungs-Knacken. E ruido de telégrafo; chasquido de manipulación. I rumore telegrafico. N sleutelruis. P szum telegraficzny. S telegrafbrus. (702)

88. **thermal noise** (*Syn.* Johnson noise) : random noise due to thermal agitation of charge carriers in a conductor. *Note.* — Thermal noise has a continuous spectrum and may be considered as white noise at frequencies lower than those for which quantum phenomena are no longer negligible. ★ bruit thermique → *bruit 66.* R тепловой шум. D thermisches Rauschen; Johnson-Rauschen. E ruido térmico. I rumore termico. N thermische ruis; Johnson-ruis. P szum cieplny. S termiskt brus. (531,702)

89. **tone-corrected perceived noise level** : → *level 100*

90. **triangular noise** : random noise having a continuous spectrum and such that the square root of the power spectral density is proportional to frequency in the frequency band considered. ★ bruit triangulaire → *bruit 67.* R треугольный шум. D Dreiecksrauschen. E ruido triangular. I rumore triangolare. N driehoekruis. P szum trójkątowy. S ..... (702)

91. **tube noise** : unwanted fluctuations of power originating within the tube. ★ bruit de tube → *bruit 38.* R шумы электронной лампы. D Röhrenrauschen. E ruido de tubo. I rumore di un tubo. N buisruis. P szum lampowy. S rörbrus. (531)

92. **weighted noise** : noise having a power spectrum which is modified by a specified frequency selective network. ★ bruit pondéré → *bruit 54.* R взвешенный шум. D gewichtetes Rauschen. E ruido ponderado. I rumore pesato. N gewogen ruis. P szum ważony. S vägt brus. (702)

93. **white noise** (*Syn.* flat random noise) : random noise which has a continuous spectrum and a constant power spectral density in the frequency band considered. ★ bruit blanc → *bruit 13.* R белый шум. D weißes Rauschen; gleichmäßiges Zufallsrauschen. E ruido blanco. I rumore bianco. N witte ruis. P szum biały. S vitt brus. (702,801)

94. **1/*f* noise** : tube noise the magnitude of which is inversely proportional to frequency. ★ bruit en 1/*f* → *bruit 41.* R шумы, подчиняющиеся закону 1/ф. D 1/f-Rauschen. E ruido en 1/f. I rumore con legge 1/*f*. N 1/f-ruis. P ..... S 1/f brus. (531)

95. **1/*f* noise** : random noise having a continuous spectrum such that the power spectral density is approximately proportional to the inverse of frequency below a given frequency. ★ bruit en 1/*f* → *bruit 42.* R 1/*f* шум. D 1/f-Rauschen. E ruido en 1/*f*. I rumore a 1/*f*. N laagfrequentruis. P szum(rodzaju)1/f. S ..... (702)

noise-cancelling

1. **noise-cancelling microphone** (*Syn.* anti-noise microphone) : → *microphone 1*

noise-generator

1. **noise-generator diode** : → *diode 14*

2. **noise-generator plasma tube** : → *tube 59*

noise-level

1. **noise-level test** : → *test 54*

noise-limited

1. **noise-limited condition** : → *condition 16*

noisiness

1. **noisiness** : a prescribed function of sound pressure levels in the 24 one-third octave bands centred on 50 Hz to 10 kHz that is used in the calculation of perceived noise level. *Note.* — The prescribed function is given in ISO Standard 3891-1978. ★ bruyance → *bruyance 1.* **R** шумость. **D** ..... **E** ruidosidad. **I** rumorosità. **N** ..... **P** hałaśliwość. **S** bullrighet. (801)

noisy

1. **noisy blacks** : → *black 12*

no-load

1. **controlled conventional no-load direct voltage** : → *direct voltage 1*
2. **controlled ideal no-load direct voltage** : → *direct voltage 2*
3. **conventional no-load direct voltage** : → *direct voltage 3*
4. **ideal no-load direct voltage** : → *direct voltage 6*
5. **no-load** : the state of a machine rotating at normal speed under rated conditions, but when no output is required of it. ★ fonctionnement à vide → *fonctionnement 24.* **R** холостой ход. **D** Leerlauf. **E** funcionamiento en vacío. **I** funzionamento a vuoto. **N** nullast. **P** bieg jałowy. **S** tomgång. (411)
6. **no-load apparent power** : → *power 91*
7. **no-load characteristic** (*Syn.* open-circuit characteristic) : → *characteristic 61*
8. **no-load current** : → *current 133*
9. **no-load loss** : → *loss 68*
10. **no-load operation** : → *operation 35*
11. **no-load test** : → *test 55*
12. **no-load voltage (in arc welding and cutting)** : → *voltage 124*
13. **real no-load direct voltage** : → *direct voltage 9*
14. **secondary no-load voltage** : → *voltage 186*

nominal

1. **nominal acceleration time** : → *time 113*
2. **nominal black** : → *black 13*
3. **nominal capacity (of a cell or battery)** : → *capacity 20*
4. **nominal excitation system ceiling voltage** : → *voltage 125*
5. **nominal frequency** : → *frequency 137*
6. **nominal frequency** : → *frequency 138*
7. **nominal frequency** : → *frequency 139*
8. **nominal justification rate** : → *rate 61*
9. **nominal justification ratio** : → *ratio 60*
10. **nominal margin** : → *margin 13*
11. **nominal power of a thermo-electric vehicle** : → *power 92*
12. **nominal pull-in torque** : → *torque 15*
13. **(nominal) range** : → *range 44*
14. **nominal range** : → *range 45*
15. **nominal range of an influencing factor** : → *range 46*
16. **nominal range of an influencing quantity** : → *range 47*
17. **nominal range of use** : → *range 48*
18. **nominal stuffing rate** (*Syn.* nominal justification rate) : → *rate 61*
19. **nominal stuffing ratio** (*Syn.* nominal justification ratio) : → *ratio 60*
20. **nominal usable field strength** : → *field strength 10*
21. **nominal value** : → *value 30*
22. **nominal value of an energizing quantity** : → *value 31*
23. **nominal voltage** : → *voltage 126*
24. **nominal voltage of a cell or battery** : → *voltage 127*
25. **nominal voltage of a system** : → *voltage 128*
26. **nominal white** : → *white 3*

nominated

1. **nominated reserved circuit** : → *circuit 124*

non-adjustable

1. **non-adjustable thermostatic switch** : → *switch 28*

non-associated

1. **non-associated signalling** : → *signalling 28*

non-branch

1. **private non-branch exchange** (*Syn.* private (telephone) exchange) : → *exchange 22*

non-coincident

1. **non-coincident peak method** : → *method 13*

non-conducting

1. **effectively non-conducting output circuit** : → *circuit 67*
2. **non-conducting direction** : → *direction 16*
3. **non-conducting interval** : → *interval 13*

non-consumable

1. **non-consumable arc welding electrode** : → *electrode 73*
2. **non-consumable electrode refining arc furnace** : → *arc furnace 39*

non-controllable

1. **non-controllable connection** : → *connection 38*

non-critical

1. **non-critical failure** : → *failure 40*
2. **non-critical fault** : → *fault 61*

non-damage

1. **non-damage fault** : → *fault 62*

non-degenerate

1. **non-degenerate semiconductor** : → *semiconductor 7*

non-deviative

1. **non-deviative absorption** : → *absorption 29*

non-draining

1. **mass-impregnated non-draining insulation** : → *insulation 41*

non-driven

1. **non-driven element** (*Syn.* parasitic element) : → *element 35*

non-driving

1. **non-driving motor vehicle** : → *vehicle 15*

non-elastic

1. **non-elastic (interaction) cross-section** : → *cross-section 21*

non-encapsulated-winding

1. **non-encapsulated-winding dry-type reactor** : → *reactor 21*
2. **non-encapsulated-winding dry-type transformer** : → *transformer 44*

non-equilibrium

1. **non-equilibrium mode distribution** : → *distribution 31*

non-essential

1. **non-essential auxiliary circuits** : → *circuit 125*

non-fusing

1. **conventional non-fusing current** : → *current 35*

non-hazardous

1. **non-hazardous area** : → *area 29*

non-heating

1. **non-heating lead** (*Syn.* cold lead) : → *lead 2*

non-interchangeability

1. **non-interchangeability** : limitations on shape and/or dimensions with the object of avoiding in a specific fuse-base the

inadvertent use of fuse-links having electrical properties other than those ensuring the desired degree of protection. ★ non-interchangeabilité → *non-interchangeabilité 1.* R невзаимозаменяемость. D Unverwechselbarkeit. E no intercambiabilidad; inintercambiabilidad. I non intercambialità. N onverwisselbaarheid. P bezpiecznik kalibrowany. S oförväxelbarhet. (441)

non-interchangeable

1. **non-interchangeable accessory** : → *accessory 5*

non-linear

1. **non-linear** : pertaining to an operating characteristic, a device, an electrical network or a transmission medium for which : at a specified output port, the signal resulting from an arbitrary input signal applied to a given port is such that, when the input signal is increased by a numerical factor, the output signal does not increase by the same factor over the whole extent of the specified working range ; at a specified output port the total signal resulting from the simultaneous application of a number of arbitrary input signals, either individually to given independent ports or collectively into one given port, is not, over the whole extent of the specified working range, equal to the sum of individual outputs which would be produced by the application to the same ports of the same input signals, each acting separately. *Notes. 1* — A device which is non-linear over its specified working range may show a linear behaviour for signals within a limited working range. *2* — A device with several ports may be non-linear for a certain set of ports and linear for other sets of ports. ★ non linéaire → *linéaire 30.* R нелинейный. D nichtlinear. E no-lineal. I non lineare. N niet-lineair. P nielinearny. S olinjär. (702)
2. **non-linear conversion** : → *conversion 28*
3. **non-linear detector** : → *detector 17*
4. **non-linear distortion** (*Syn.* non-linearity distortion) : → *distortion 55*
5. **non-linear resistor** : → *resistor 8*
6. **non-linear resistor type arrester** : → *arrester 4*
7. **nonlinear scattering** : → *scattering 19*

non-linearity

1. **non-linearity correction** : → *correction 14*
2. **non-linearity distortion** : → *distortion 55*

non-locking

1. **single pressure non-locking mechanical system** (*Syn.* momentary mechanical system) : → *mechanical system 11*

non-luminous

1. **non-luminous (perceived) colour** : → *colour 61*

non-operate

1. **non-operate value** : → *value 32*

non-operating

1. **non-operating state** : → *state 26*
2. **non-operating time** : → *time 114*

non-polarized

1. **non-polarized relay** : → *relay 19*

non-print

1. **non-print cycle** : → *cycle 11*

non-quantized

1. **non-quantized system** : → *system 127*

non-reciprocal

1. **non-reciprocal phase-shifter** : → *phase-shifter 4*
2. **non-reciprocal polarization rotator** : → *rotator 1*
3. **non-reciprocal wave rotator** (*Syn.* non-reciprocal polarization rotator) : → *rotator 1*

non-release

1. **non-release value** : → *value 33*

non-relevant

1. **non-relevant failure** : → *failure 41*

non-repaired

1. **non-repaired item** : → *item 2*

non-repetitive

1. **circuit non-repetitive peak off-state voltage** : → *voltage 26*
2. **circuit non-repetitive peak reverse voltage** : → *voltage 27*

non-required

1. **non-required time** : → *time 115*

non-revert

1. **non-revert value** : → *value 34*

non-revert-reverse

1. **non-revert-reverse value** : → *value 35*

non-salient

1. **non-salient pole** : → *pole 10*

non-screen

1. **non-screen film** : → *film 9*

non-selective

1. **non-selective detector** : → *detector 18*
2. **(non-selective) quantum detector** : → *detector 19*
3. **non-selective radiator** : → *radiator 4*

non-self-maintained

1. **non-self-maintained discharge** : → *discharge 27*
2. **non-self-maintained gas conduction** : → *conduction 18*

non-self-restoring

1. **non-self-restoring insulation** : → *insulation 44*

non-shorting

1. **non-shorting contact** : → *contact 87*

non-specified-time

1. **non-specified-time relay** : → *relay 20*

non-stochastic

1. **non-stochastic effects** : → *effect 48*

non-synchronized

1. **non-synchronized network** : → *network 57*

non-synchronous

1. **non-synchronous** : qualifying two time-varying phenomena, time-scales or signals characterised by corresponding significant instants which are separated by time intervals that do not have a constant duration. ★ non synchrone → *synchrone 27.* R несинхронный. D nichtsynchron. E no síncrono. I non sincrono. N asynchroon; start/stop. P niesynchroniczny. S icke-synkron. (702,704)
2. **non-synchronous network** (*Syn.* non-synchronized network) : → *network 57*

non-transferred

1. **non-transferred arc plasma torch** : → *torch 3*

non-trigger

1. **gate non-trigger current** : → *current 97*
2. **gate non-trigger voltage** : → *voltage 74*

non-tripping

1. **conventional non-tripping current** : → *current 36*

non-uniform

1. **non-uniform connection** : → *connection 39*
2. **non-uniform ice loading** : → *loading 9*
3. **non-uniform insulation of a winding** : → *insulation 45*
4. **non-uniform quantizing** : → *quantizing 2*

non-unit

1. **non-unit protection system** (*Syn.* relatively selective protection system) : → *system 172*

nonvolatile
1. **nonvolatile store** : → *store 5*

non-woven
1. **non-woven fabric (product)** : → *fabric 3*

normal
1. **Giaever (normal electron) tunnelling** : → *tunnelling 1*
2. **normal auditory sensation area** : → *area 30*
3. **normal cathode fall** : → *fall 7*
4. **normal hysteresis loop** : → *loop 25*
5. **normal $B(H)$ loop** : → *loop 26*
6. **normal $J(H)$ loop** : → *loop 27*
7. **normal $M(H)$ loop** : → *loop 28*
8. **normal (ionospheric) absorption** : → *absorption 30*
9. **normal load** : → *load 66*
10. **normal load of a motor vehicle** : → *load 67*
11. **normal load (of a train unit)** : → *load 68*
12. **normal magnetization curve** (*Syn.* commutation curve) : → *curve 9*
13. **normal mode** : → *mode 64*
14. **normal mode of oscillation** : → *mode 65*
15. **normal or "off" position** : → *position 15*
16. **normal speech power for voice-ear measurements** : → *power 93*
17. **normal tariff** : → *tariff 26*
18. **normal threshold of hearing** : → *threshold 10*
19. **normal threshold of pain** : → *threshold 11*
20. **normal (traffic) routing** : → *routing 5*

normalized
1. **field normalized impact sound pressure level** : → *level 22*
2. **normalised frequency** : → *frequency 140*
3. **normalized admittance** : → *admittance 11*
4. **normalized complex wave amplitude** : → *amplitude 31*
5. **normalized components** : → *component 41*
6. **normalized detectivity** : → *detectivity 3*
7. **normalized impact sound pressure level** : → *level 59*
8. **normalized impedance** : → *impedance 42*
9. **symmetrical normalized components** : → *component 58*

north
1. **north pole** : → *pole 11*
2. **north pole face** : → *face 3*

nose
1. **nose extension** : → *extension 8*

nose-suspended
1. **motor suspension bearing (for nose-suspended motor)** : → *bearing 21*
2. **nose-suspended motor** (*Syn.* axle-hung motor) : → *motor 9*

NOSFER
1. **NOSFER** (*Syn.* new fondamental system for the determination of reference equivalents) : → *system 124*
2. **reference speech power for the NOSFER** (*Syn.* normal speech power for voice-ear measurements) : → *power 93*

nosing
1. **nosing** (*Syn.* hunting) : a rotary disturbing movement about the vertical axis. ★ lacet → *lacet 1.* R виляние. D Schlingern. E movimento de lanzadera. I serpeggio. N vetergang; sinusloop. P drgania wahadłowe w planie; wężykowanie. S girning. (811)

notch
1. **commutation notch** : a voltage change, with a duration much shorter than the a.c. period, which may appear on an a.c. voltage due to the commutation process in a converter. ★ encoche de commutation → *encoche 5.* R коммутационный вырез. D Umschalt-(Spannungs)-Einbruch. E corte de conmutación. I buco di commutazione. N schakelprik. P zmiana napięcia przy komutacji. S kommuteringshack. (161)
2. **notch** (*Syn.* step) : one of the different positions a traction control system (master controller, switchgroup, etc.) can take up. ★ cran de marche → *cran 1.* R позиция контролера. D Fahrstufe. E muesca. I posizione di marcia. N stap. P pozycja jazdy. S kopplingsläge. (811)

notching
1. **notching ratio** : → *ratio 62*
2. **notching relay** (*Syn.* accelerating relay) : → *relay 1*
3. **speed at end of notching** : → *speed 38*
4. **value before notching** : → *value 73*

notchless
1. **notchless control** (*Syn.* continuous control) : → *control 40*

note
1. **note** : *a)* conventional sign used to indicate graphically the pitch or frequency and duration of a musical sound, and its position in a musical scale. *b)* sound sensation or the physical oscillation causing the sensation. ★ note → *note 1.* R нота. D Note. E nota. I nota (musicale). N noot; toon. P nota. S not. (801)

notional
1. **notional value** : → *value 36*

no-volt
1. **no-volt relay** : → *relay 22*

noy
1. **noy** : unit of noisiness, equal to the noisiness of a one-third-octave band of noise centred on 1 kHz and having a sound pressure level of 40 dB. ★ noy → *noy 1.* R ной. D ..... E noi; noy. I noy. N noy. P noj. S noy. (801)

nozzle
1. **nozzle** (of a plasma torch) : a part of a plasma torch which may constitute an electrode and which is used to contract the stream of plasma, in order to increase its energy density. ★ tuyère → *tuyère 2.* R сопло (плазменной горелки). D Düse. E tobera (de una antorcha de plasma). I ugello di una torcia a plasma. N mondstuk (van een plasmatoorts). P dysza (plazmotronu). S dysa; munstycke. (841)
2. **nozzle throat** : → *throat 1*

NTSC
1. **NTSC** (*Syn.* NTSC (colour television) system) : → *system 129*
2. **NTSC (colour television) system** : → *system 129*

N-type
1. **N-type conductivity** : → *conductivity 6*
2. **N-type semiconductor** : → *semiconductor 8*

nuclear
1. **nuclear chain reaction** : → *reaction 6*
2. **nuclear disintegration** : → *disintegration 3*
3. **nuclear energy** : → *energy 65*
4. **nuclear fission** : → *fission 18*
5. **nuclear fuel** : → *fuel 18*
6. **nuclear fusion** : → *fusion 4*
7. **nuclear fusion reaction** : → *reaction 7*
8. **nuclear isomer** : → *isomer 1*
9. **nuclear isomeric transition** : → *transition 7*
10. **nuclear medicine** : → *medicine 1*
11. **nuclear poison** : → *poison 3*
12. **nuclear radiation** : → *radiation 49*
13. **nuclear reactor** : → *reactor 22*
14. **nuclear (thermal) power station** : → *power station 14*

nuclear-track
1. **nuclear-track emulsion** : → *emulsion 1*

nucleon
1. **nucleon** : generic term for a constituent of an atomic nucleus, either proton or neutron. ★ nucléon → *nucléon 1.* R нуклон. D Nukleon. E nucleón. I nucleone. N nucleon. P nukleon. S nukleon. (026,111,391,881)

nucleus

1. **compound nucleus** : excited nucleus formed as an intermediate state in a nuclear reaction. ★ noyau composé → *noyau 8.* D Zwischenkern. E núcleo compuesto. I nucleo composto. N tussenkern; samengestelde kern. P jądro złożone. S kompoundkärna. (026)
2. **nucleus** : the central part of an atom, composed of protons and neutrons, possessing a positive charge and containing nearly all the mass of the atom. ★ noyau → *noyau 7.* R ядро. D Atomkern. E nucleo. I nucleo. N kern; atoomkern. P jądro. S (atom)kärna. (026,111,881)

nuclide

1. **nuclide** : a species of atom characterized by its mass number, atomic number, and nuclear energy state, provided that the mean life in that state is long enough to be observable. ★ nucléide → *nucléide 1.* D Nuklid. E núclido. I nuclide. N nuclide. P nuklid. S nuklid. (026,111,881)

null

1. **directional null** : a very pronounced minimum in a specified direction in the radiation pattern of an antenna. *Note.* — In French the term "zéro de rayonnement" is also used when the direction is not specified. ★ zéro de rayonnement → *zéro 13.* R направленный нуль. D Nullstelle (in der Strahlungscharakteristik). E mínimo direccional. I zero d'irradiazione. N specifiek richtingsminimum. P zero kierunkowe. S nollriktning. (712)
2. **null character** : → *character 15*
3. **null (method of) measurement** : → *measurement 9*

null-steering

1. **null-steering antenna** : → *antenna 82*

number

1. **acid number** (*Syn.* neutralization value) : the number of milligrams of potassium hydroxide (KOH) required to neutralize the acid components present in one gram of product, under standardized conditions. ★ indice d'acide → *indice 8.* R кислотное число. D Säurezahl; Neutralisationszahl. E índice de acidez; índice de neutralización. I indice di acidità; número di neutralizzazione. N zuurgetal. P liczba kwasowa; liczba zobojętnienia. S syratal. (212)
2. **atomic number** : number of protons contained in the nucleus. ★ nombre de charge → *nombre 3.* D Atomzahl. E número atómico. I numero atomico. N atoomnummer. P liczba atomowa. S atomnummer. (026)
3. **atomic number** (Z) : the order of an element in the periodic (Mendeleev) chemical classification, identified with the number of protons in the nucleus. *Note.* — $Z = A - N$ where N is the number of neutrons in the nucleus. ★ numéro atomique → *numéro 4.* R атомный номер. D Ordnungszahl; Kernladungszahl. E número atómico. I numero atomico. N atoomnummer. P liczba atomowa. S protontal; atomnummer. (111,881)
4. **Avogadro's number** : the number of molecules or atoms per mole of a substance. ★ nombre d'Avogadro → *nombre 2.* R число Авогадро. D Avogadro-Konstante. E número de Avogadro. I numero di Avogadro. N getal van Avogadro. P liczba Avogadro. S Avogadros konstant. (881)
5. **band number** : a subdivision of the address label, containing the most significants bits, used for routing the signal message and possibly for identifying the circuit group containing the traffic circuit concerned. ★ numéro de bande → *numéro 9.* R номер пучка. D Band-Nummer. E número de banda. I numero del fascio (o del gruppo). N bandnummer. P numer pasma (etykiety). S bandnummer. (714)
6. **circuit number** : a subdivision of the address label, containing the least significants bits, used to identify the traffic circuit within a circuit group. ★ numéro de circuit → *numéro 11.* R номер канала. D Sprechkreis-Nummer. E número de circuito. I numero del circuito. N circuitnummer. P numer łącza. S kretsnummer. (714)
7. **commutation number** : the number of commutations from one principal arm to another during one elementary period in each commutating group. ★ indice de commutation → *indice 12.* R число коммутаций. D Kommutierungszahl. E índice de conmutación. I indice di commutazione. N commutatiegetal. P liczba komutacyjna. S kommuteringstal. (551)
8. **directory number** : the subscriber number listed in the directory against the name of the telephone subscriber. ★ numéro d'annuaire → *numéro 8.* R номер абонента по телефонному справочнику. D ..... E número de la guía. I numero telefonico (in elenco). N telefoonnummer. P numer telefoniczny. S ..... (722)
9. **effective atomic number** : the atomic number of a hypothetical element with which radiation of a specified kind would interact in the same way as it interacts with a compound or mixture of interest. ★ numéro atomique équivalent → *numéro 5.* R эффективный атомный номер. D effektive Ordnungszahl. E número atómico equivalente. I numero atomico efficace. N effectief atoomgetal. P równoważna liczba atomowa. S effektivt atomnummer. (881)
10. **first quantum number** (*Syn.* principal quantum number) : → *number 25*
11. **harmonic number** (*Syn.* harmonic order) : the integral number given by the ratio of the frequency of a harmonic to the fundamental frequency. ★ rang (d'un harmonique) → *rang 2.* R порядок (гармоники). D Ordnungszahl (der Oberschwingung); Ordnungszahl (der Harmonischen). E orden (de un armónico). I ordine di un'armonica. N rangorde van de harmonische. P rząd harmonicznej. S deltonsnummer. (101,161)
12. **international relative sunspot number** (R_i) : a number prepared by the Sunspot Index Data Center (SIDC) at the Observatoire de Belgique in Uccle, following a daily count of sunspots and groups of sunspots, and used for evaluating solar activity. *Note.* — These numbers are derived in a similar manner to that used previously at Zurich. ★ nombre relatif international de taches solaires → *nombre 20.* D internationale relative Sonnenfleckenzahl. P liczba plam słonecznych względna międzynarodowa. (705)
13. **local telex number** : a sequence of digits shorter than the national subscriber's telex number used to connect a called subscriber situated in a restricted geographical area. ★ numéro télex local → *numéro 12.* R местный телексный номер. D örtliche Telex-Anschlußnummer. E número télex local. I numero telex. N telexaansluitnummer. P numer teleksowy lokalny. S lokalt telexnummer. (721)
14. **mass number** (of a nucleus) (A) : the total number of nucleons contained in a nucleus. ★ nombre de masse → *nombre 5.* R массовое число ядра. D Massenzahl (eines Kerns); Nukleonenzahl. E número másico (de un núcleo). I numero di massa. N massagetal. P liczba masowa. S nukleontal; masstal. (026,111,881)
15. **maximum usable read number** : → *read 1*
16. **modal numbers** : set of integers by which the normal modes of oscillation of a system are ordered as to frequency. ★ rang des modes → *rang 1.* R модальные числа. D Ordnungszahl der Eigenfrequenz. E números modales. I serie di modi successivi. N rangnummers van de eigenfrequenties. P liczba rodzaju drgania. S modnummer; deltoners ordningstal. (801)
17. **national subscriber's telex number** : a sequence of digits that a caller must normally select to connect to a called subscriber situated in the same country. ★ numéro télex national d'abonné → *numéro 13.* R национальный телексный номер абонента. D nationale Telex-Anschlußnummer. E número télex nacional de abonado. I numero nazionale di utente telex. N telexlandnummer. P numer krajowy abonenta teleksowego. S nationellt telexnummer. (721)
18. **neutron (number) density** : → *density 17*
19. **number of inherent tapping positions** : the highest number of tapping positions for half a cycle of operation for which a tap-changer can be used according to its design. ★ nombre de positions de réglage disponibles → *nombre 8.* R собственное число положений регулирования. D Anzahl der möglichen Stellungen. E número de posiciones de regulación disponibles. I numero delle posizioni di regolazione disponibili. N aantal beschikbare regelstanden. P liczba pozycji zaczepowych całkowita. S antal lindningskopplarlägen. (421)
20. **number of photons** (*Syn.* photon number) (N_p; Q_p; Q) : time integral of the proton flux Φ_p over a given duration Δt.

$$N_p = \int_{\Delta t} \Phi_p \mathrm{d}t$$

Unit : 1. ★ nombre de photons → *nombre 6.* R число фотонов. D Photonenanzahl. E número de fotones. I numero di fotoni. N aantal fotonen. P liczba fotonowa. S fotonantal. (845)

21. **number of service tapping positions** : the number of tapping positions for half a cycle of operation for which a tap-changer is used in a transformer. *Note.* — When using the term "number of tapping positions" in connection with a transformer, this always refers to the number of service tapping positions of the tap-changer. ★ nombre de positions de réglage de service → *nombre 7.* R число рабочих положений регулирования. D Anzahl der Betriebsstellungen. E número de posiciones de regulación de servicio. I numero delle posizioni di regolazione di funzionamento. N aantal gebruikte regelstanden. P liczba pozycji zaczepowych wykorzystana. S antal utnyttjade lindningskopplarlägen. (421)
22. **number of significant conditions** : number of different significant conditions that a signal element can assume in accordance with a code. *Note.* — Qualifiers such as "two-condition", "three-condition" are used in accordance with the number of significant conditions. ★ valence → *valence 3.* R количество значащих положений. D Anzahl der signifikanten Merkmale. E valencia (de un elemento de señal); número de condiciones significativas. I valenza di un elemento di segnale. N aantal significante toestanden. P wartościowość kodu. S antal signifikanta tillstånd. (702,721)
23. **orbital quantum number** (*Syn.* second quantum number) (*l*) : a quantum number which can have all whole values from zero to *n*-1, *n* designating the main quantum number. *Note.* — According to the Bohr atom model, the orbital quantum number may be considered as characterizing the angular momentum of the electron in its orbital motion round the nucleus. ★ nombre quantique secondaire → *nombre 19.* R орбитальное (второе) квантовое число. D Umlauf-,(Zweit-) Quantenzahl. E número cuántico secundario. I numero quantico (secondario); orbitale. N nevenquantumgetal ; azimutaal quantumgetal. P liczba kwantowa orbitalna; liczba kwantowa druga. S bikvanttal. (521)
24. **photon number** (*Syn.* number of photons) : → *number 20*
25. **principal quantum number** (*Syn.* first quantum number) (*n*) : the positive integer number which characterizes the important changes of energy level of the electrons in an atom. *Note.* — According to the Bohr atom model, the main quantum number may be considered as characterizing the size of an electron orbit. ★ nombre quantique principal → *nombre 18.* R главное (первое) квантовое число. D Haupt-(Erst-) Quantenzahl. E número cuántico principal. I numero quantico-principale (primo). N hoofdquantumgetal. P liczba kwantowa główna; liczba kwantowa pierwsza. S huvudkvanttal. (521)
26. **pulse number** : the number of non-simultaneous symmetrical direct or indirect commutations from one principal arm to another which occur during one elementary period. ★ indice de pulsation → *indice 23.* R число пульсаций. D Pulszahl. E indice de pulsación. I indice di pulsazione. N pulsgetal; pulsental. P liczba tętnieniowa. S pulstal. (551)
27. **quantum number** (of an electron in a given atom) : each of numbers characterizing the degrees of freedom of an electron in a given atom: the principal quantum number *n*; the orbital quantum number *l*; the spin quantum number *s*; the total angular momentum number *j*. ★ nombre quantique → *nombre 14.* R квантовое число (электрона данного атома). D Quantenzahl (eines Elektrons in einem gegebenen Atom). E número cuántico (de un electrón en un átomo dado). I numero quantico (di un elettrone di un determinato atomo). N quantumgetal. P liczba kwantowa (elektronu w atomie). S kvanttal. (521)
28. **saponification number** : the number of milligrams of potassium hydroxide (KOH) consumed in neutralizing and saponifying one gram of a product, under standardized conditions. ★ indice de saponification → *indice 35.* R число омыления. D Verseifungszahl. E índice de saponificación. I numero di saponificazione. N verzepingsgetal. P liczba zmydlenia. S förtvålningstal. (212)
29. **second quantum number** (*Syn.* orbital quantum number) : → *number 23*
30. **spin (quantum number)** : → *spin 1*
31. **subscriber number** : the number to be dialled or called to reach a telephone subscriber in the same local network or numbering area. ★ numéro d'abonné → *numéro 7.* R абонентский номер. D Teilnehmerrufnummer. E número de abonado. I numero d'abbonato. N abonneenummer. P numer abonencki. S abonnentnummer; telefonnummer. (722)
32. **total angular momentum quantum number** (*j*) : the quantum number which gives the resultant of the magnetic field engendered by the electron due to its orbital movement and due to its revolving on its own axis. *Note.* — The values of this number *j* form a set of integral and semi-integral values. ★ nombre quantique interne → *nombre 16.* R квантовое число полного углового момента. D Gesamt-Drehimpulszahl. E número cuántico interno. I numero quantico del momento angolare totale. N totaal/inwendig quantumgetal. P liczba kwantowa momentu kątowego całkowitego. S kvanttal för totala impulsmomentet. (521)
33. **twelve-month running-mean sunspot number** : the mean value of the international relative sunspot number for the month n obtained by the following equation :

$$R_{12} = \frac{1}{12}\left[\frac{R_{n-6} + R_{n+6}}{2} + \sum_K R_K\right]$$

for k = n — 5, n — 4, ...n, ...n + 5 where R_k is the mean international relative sunspot number for the kth month. ★ moyenne glissante sur douze mois du nombre de taches solaires → *moyen 54.* D gleitender zwölfmonatiger Mittelwert der Sonnenfleckenzahl. P liczba plam słonecznych wybranego miesiąca. (705)
34. ***V* number** (*Syn.* normalised frequency) : → *frequency 140*
35. **wave number** (*Syn.* repetency) : → *repetency 1*
36. **wave number** (*Syn.* repetency) : the reciprocal of the waveguide wavelength or the reciprocal of the wavelength for a plane wave. *Note.* — Some authors use $2\pi/\lambda$ instead of $1/\lambda$ in this sense, but $1/\lambda$ is preferred. ★ nombre d'onde → *nombre 9.* R волновое число; повторяемость. D Wellenzahl; Repetenz. E número de onda. I numero d'onda; frequenza spaziale. N golfgetal; repetentie. P liczba falowa. S repetens. (726)
37. **wave number** (σ) : the reciprocal of the wavelength. unit : m^{-1}. ★ nombre d'onde (linéique) → *nombre 11.* R волновое число. D Wellenzahl. E número de onda. I numero d'onde. N repetentie. P liczba falowa. S repetens; vågtal. (845)

numbering

1. **automatic numbering transmitter** : → *transmitter 1*
2. **scale numbering** : numbers assigned to certain scale marks. ★ chiffraison → *chiffraison 1.* R числа отсчета. D Skalenbezifferung. E numeración. I numerazione. N schaalwaarden. P ocyfrowanie podziałki. S skalbesiffring. (301)

number-plate

1. **number-plate light** : → *light 46*

number-unobtainable

1. **number-unobtainable tone** : → *tone 20*

numerical

1. **launch numerical aperture** : → *aperture 15*
2. **maximum theoretical numerical aperture** : → *aperture 16*
3. **numerical aperture** : → *aperture 17*
4. **numerical ionospheric map** : → *map 2*
5. **numerical value equation** : → *equation 5*
6. **numerical value (of a quantity)** : → *value 38*

n-unit

1. **N-unit** : a unit in terms of which refractivity is expressed. *Example :* If the refractive index *n* is such that : $10^6(n-1) = 350$, the refractivity is 350 N-units, or N = 350. ★ unité N → *unité 37.* D N-Einheit. P jednostka N. (705)
2. **n-unit code** : → *code 39*
3. **n-unit code alphabet** : → *alphabet 6*

nut

1. **grommet nut** : → *grommet 4*
2. **outlet nut** : → *outlet 4*

Nyquist

1. **Nyquist demodulator** : → *demodulator 2*
2. **Nyquist slope bandwidth** : → *bandwidth 7*

O

OB

1. **OB** (*Syn.* outside broadcast) : → *broadcast 9*

object

1. **object backscattering differential** : → *backscattering 5*
2. **object language** : → *language 8*
3. **object program** : → *program 4*

object-colour

1. **object-colour** : colour perceived as belonging to an object. ★ couleur-objet → *couleur-objet 1.* **R** цвет объекта. **D** gebundene Farbe. **E** color-objeto (percibido). **I** colore oggetto. **N** voorwerpskleur. **P** barwa obiektu. **S** föremålsfärg. (845)

objective

1. **objective reference equivalent meter** : → *meter 36*

oblique

1. **oblique exposure** : → *exposure 13*
2. **oblique incidence ionospheric sounding** : → *sounding 7*
3. **oblique projection** : → *projection 5*

observation

1. **observation angle** : → *angle 41*
2. **observation oscilloscope** : → *oscilloscope 3*

observed

1. **maximum observed frequency** : → *frequency 128*
2. **observed data** : → *data 25*

observer

1. **CIE standard photometric observer** : ideal observer having a relative spectral responsitivy curve that conforms to the $V(\lambda)$ function for photopic vision or to the $V'(\lambda)$ function for scotopic vision, and that complies with the summation law implied in the definition of luminous flux. ★ observateur de référence photométrique CIE → *observateur 3.* **R** стандартный фотометрический наблюдатель МКО. **D** photometrischer Normalbeobachter CIE. **E** observador fotométrico patrón CIE. **I** osservatore fotometrico CIE. **N** fotometrische standaardwaarnemer (van de CIE). **P** obserwator fotometryczny CIE normalny. **S** CIE standardobservatör för fotometri. (845)
2. **CIE 1931 standard colorimetric observer** : ideal observer whose colour-matching properties correspond to the CIE colour-matching functions $\bar{x}(\lambda)$, $\bar{y}(\lambda)$, $\bar{z}(\lambda)$ adopted by the CIE in 1931. ★ observateur de référence colorimétrique CIE 1931 → *observateur 1.* **R** стандартный колориметрический наблюдатель МКО 1931 г.. **D** farbmeßtechnischer Normalbeobachter CIE 1931. **E** observador colorimétrico patrón CIE 1931. **I** osservatore colorimetrico CIE 1931. **N** colorimetrische standaardwaarnemer van de CIE 1931. **P** obserwator kolorymetryczny CIE 1931 normalny. **S** CIE 1931 standardobservatör för kolorimetri. (845)
3. **CIE 1964 supplementary standard colorimetric observer** : ideal observer whose colour-matching properties correspond to the CIE colour-matching functions $\bar{x}_{10}(\lambda)$, $\bar{y}_{10}(\lambda)$, $\bar{z}_{10}(\lambda)$ adopted by the CIE in 1964. ★ observateur de référence colorimétrique supplémentaire CIE 1964 → *observateur 2.* **R** дополнительный стандартный колориметрический наблюдатель МКО 1964 г.. **D** farbmeitechnischer 10°-oder Großfeld-Normalbeobachter CIE 1964. **E** observador colorimétrico patrón CIE 1964. **I** osservatore colorimetrico supplementare CIE 1964. **N** aanvullende colorimetrische standaardwaarnemer van de CIE 1964. **P** obserwator kolorymetryczny CIE 1964 dodatkowy normalny. **S** CIE 1964 standardobservatör för kolorimetri. (845)

obstacle

1. **clearance to obstacles** : → *clearance 6*
2. **obstacle** (*Syn.* obstruction) : a region in a dielectric medium limited by a surface at which the complex refractive index and in particular the imaginary part thereof, is subjet to a significant discontinuity. ★ obstacle → *obstacle 4.* **D** Hindernis. **P** przeszkoda. (705)
3. **obstacle** : a part preventing unintentional direct contact, but not preventing deliberate action. ★ obstacle → *obstacle 5.* **R** барьер. **D** Hindernis. **E** obstáculo. **I** ostacolo. **N** hindernis. **P** przeszkoda. **S** hinder. (826)
4. **obstacle gain** : → *gain 25*
5. **obstacle light** : → *light 47*

obstruction

1. **obstruction** (*Syn.* obstacle) : → *obstacle 2*
2. **obstruction** : anything outside a building which prevents the direct view of part of the sky. ★ obstruction → *obstruction 1.* **R** заграждение. **D** Verbauung. **E** obstrucción. **I** ostruzione. **N** obstakel. **P** przeszkoda. **S** hinder. (845)

occulting

1. **occulting light** : → *light 48*

occupancy

1. **occupancy factor** : → *factor 124*

occupation

1. **occupation** (*Syn.* busy condition) : → *condition 2*

occupied

1. **occupied area** : → *area 31*
2. **partially occupied band** : → *band 28*

occurrence

1. **rate of occurrence of voltage changes** : → *rate 77*

ocean

1. **ocean or sea temperature gradient power station** : → *power station 15*

octave

1. **octave** : logarithmic frequency interval between two sounds whose fundamental-frequency ratio is two. *Note.* — The octave is used as a unit of logarithmic frequency interval. ★ octave → *octave 1.* **R** октава. **D** Oktave. **E** octava. **I** ottava. **N** octaaf. **P** oktawa. **S** oktav. (801)

octet

1. **octet** (*Syn.* byte) : → *byte 1*
2. **octet sequence integrity** : → *integrity 2*
3. **octet slip** : → *slip 4*

octode

1. **octode** : an eight-electrode electronic tube containing an anode, a cathode, a control electrode, and five additional electrodes. ★ octode → *octode 1.* **R** октод. **D** Oktode. **E** octodo. **I** ottodo. **N** octode. **P** oktoda. **S** oktod. (531)

OCXO

1. **OCXO** (*Syn.* oven controlled crystal oscillator) : → *oscillator 3*

odd

1. **odd parity check** : → *check 10*

Oe

1. **oersted, Oe** : → *oersted 1*

oersted

1. **oersted, Oe** (Oe) : anglo-saxon unit of magnetic field, the legal unit of SI system is ampere per metre (A/m). ★ oersted, Oe → *oersted 1.* (100)

off-air

1. **off-air monitoring** : → *monitoring 13*

offered

1. **traffic offered** : → *traffic 41*

off-great-circle

1. **off-great-circle ionospheric propagation** : → *propagation 19*

off-hook

1. **off-hook** : the condition of a telephone station which is being used. ★ décroché → *décroché 1.* R токовое состояние. D besetzt. E descolgado. I con gancio sollevato. N bezet. P stan pracy (aparatu). S upptagen. (722)
2. **off-hook call** : → *call 45*
3. **off-hook signal** : → *signal 132*

offhooking

1. **offhooking** (*Syn.* unhooking) : → *unhooking 1*

office

1. **public call office** (*Syn.* public pay phone; public telephone station; pay station) : a telephone station available for use by the public, generally on payment of a fee, which may be deposited in a coin box or paid to an attendant or collected by other means. ★ poste (téléphonique) public → *poste 72.* R переговорный пункт телефонной сети общего пользования. D öffentliche Sprechstelle. E teléfono público. I apparecchio telefonico pubblico. N openbare telefooncel. P aparat (telefoniczny) publiczny. S betaltelefon. (722)
2. **switching office** (*Syn.* exchange) : → *exchange 5*

officer

1. **radiation safety officer** : a person charged with the organization of radiation protection. ★ technicien de radioprotection → *technicien 1.* R сотрудник службы радиационной безопасности. D Strahlenschutzbeauftragter. E técnico en radioprotección. I tecnico alla radioprotezione. N stralingsbeveiligingsfunctionaris. P technik ochrony przed promieniowaniem. S strålskyddsinspektör. (881)

off-load

1. **off-load voltage** (*Syn.* open circuit voltage) : → *voltage 132*

off-peak

1. **off-peak tariff** : → *tariff 27*
2. **off-peak tariff** : → *tariff 28*

offset

1. **absence of offset** (*Syn.* zero offset) : property of a control system the control characteristic of which is horizontal, i.e. whose steady-state deviation is zero. ★ astatisme → *astatisme 1.* R отсутствие статизма. D Kennliniensteigung gleich Null; P-Grad gleich Null. E astatismo. I astatismo. N overgangsgedrag. P astatyzm. S ..... (351)
2. **frequency offset** : the frequency difference, positive or negative, which should be added to the specified nominal frequency of the oscillator, when adjusting the oscillator frequency under a particular set of operating conditions in order to minimize its deviation from nominal frequency over the specified range of operating conditions. ★ décalage de fréquence → *décalage 1.* R смещение частоты. D Frequenzversatz. E decalage de frecuencia. I compenso di frequenza. N frequentieafwijking. P odstrojenie wstępne częstotliwości. S frekvensavvikelse. (561)
3. **frequency offset** : a small intentional frequency change for purposes other than that of modulation. *Note.* — A frequency offset may be effected for instance as a means of avoiding or minimizing interference. ★ décalage de fréquence → *décalage 2.* R смещение частоты. D Frequenzoffset. E compensación de frecuencia. I scostamento di frequenza. N nulfrequentieverschuiving. P przesuw częstotliwości. S frekvensändring. (702)
4. **frequency offset** (in television) : a small vision carrier or sound carrier frequency difference deliberately introduced between television transmitters in order to reduce the visibility or audibility of interference. ★ décalage de fréquence → *décalage 3.* R смещение несущих частот; СНЧ. (723)
5. **lateral offset loss** : → *loss 42*
6. **line offset** : vision carrier frequency offset by a specified fraction of the line frequency of the television system concerned. ★ décalage de ligne → *décalage 5.* R простое СНЧ. (723)
7. **longitudinal offset loss** : → *loss 45*
8. **offset angle** : → *angle 42*
9. **offset coefficient** : → *coefficient 43*
10. **off-set feed** : → *feed 16*
11. **off-set paraboloidal reflector antenna** : → *antenna 83*
12. **offset profile** (*Syn.* side slope at X metres) : → *slope 8*
13. **offset temperature** : → *temperature 32*
14. **precision offset** : vision carrier frequency offset by a value which is a specified function of the line frequency and of the field frequency of the television system concerned, maintained to a high degree of accuracy, of the order of one hertz. ★ décalage de trame → *décalage 7.* R точное СНЧ. (723)
15. **transverse offset loss** (*Syn.* lateral offset loss) : → *loss 42*
16. **zero offset** (*Syn.* absence of offset) : → *offset 1*

off-site

1. **off-site maintenance** : → *maintenance 36*

off-state

1. **circuit crest working off-state voltage** : → *voltage 23*
2. **circuit non-repetitive peak off-state voltage** : → *voltage 26*
3. **circuit off-state interval** : → *interval 2*
4. **circuit repetitive peak off-state voltage** : → *voltage 28*
5. **critical rate of rise of off-state voltage** : → *rate 15*
6. **off-state** : the condition of a thyristor corresponding to the position of the principal characteristic between the origin and the breakover point or points. ★ état bloqué → *état 6.* R закрытое состояние. D Sperrzustand. E estado bloqueado. I stato di blocco. N spertoestand. P stan blokowania. S blocktillstånd. (521)
7. **off-state** (*Syn.* forward blocking state) : the non-conducting state of a controllable valve or arm when load current in the conducting direction is not allowed to flow due to the absence of a grid (gate) pulse necessary for firing. ★ état bloqué (dans le sens direct) → *état 7.* R закрытое состояние. D Vorwärts-Sperrzustand. E estado bloqueado (en sentido directo). I stato di blocco (in senso) diretto. N blokkeertoestand (in doorlaatrichting). P stan wyłączenia; stan blokowania. S blocktillstånd. (551)
8. **off-state interval** : → *interval 14*

ohm

1. **ohm** (Ω) : SI unit of (electric) resistance. ★ ohm → *ohm 1.* (100)

ohmmeter

1. **digital ohmmeter** : an instrument employing analogue-to-digital conversion, which measures the value of a resistance and provides the result in a digital form. ★ ohmmètre numérique → *ohmmètre 2.* R цифровой омметр. D digitales Ohmmeter. E ohmímetro digital. I ohmmetro numerico. N digitale ohmmeter. P omomierz cyfrowy. S digital ohmmeter. (303)
2. **ohmmeter** (*Syn.* resistance meter) : an instrument intended to measure electric resistance. ★ ohmmètre → *ohmmètre 1.* R омметр. D Widerstands-Messgerät. E ohmímetro. I ohmmetro misuratore di resistenza. N ohmmeter. P omomierz. S ohmmeter. (301)

oil

1. **inhibited insulating oil** : a mineral insulating oil which contains an antioxidant. *Note.* — In certain countries an inhibited insulating oil is defined as a mineral insulating oil containing at least 0.15 % by mass, but no more than 0.40 % by mass of 2.6-di-tert-butyl-paracresol (DBPC) or 2.6-di-tert-butyl-phenol (DBP). ★ huile isolante inhibée → *huile 10.* R ингибитированное электроизоляционное масло. D inhibiertes Isolieröl. E aceite aislante inhibido. I olio isolante inibito. N isolatie-olie met anti-oxidant. P olej izolacyjny inhibitowany. S inhibiterad isolerolja. (212)
2. **mineral insulating oil** : an insulating liquid derived from petroleum crudes which are a complex mixture of hydrocarbons with small amounts of other natural chemical substances. ★ huile minérale isolante → *huile 13.* R нефтяное электроизоляционное масло. D Isolieröl auf Mineralölbasis.

E aceite mineral aislante. I olio minerale isolante. N minerale isolatie-olie. P olej izolacyjny mineralny. S isolerolja på mineraloljebas. (212)

3. **naphthenic insulating oil** : a mineral insulating oil derived from crudes having no or low wax content. *Note.* — Such an oil naturally has a low pour point. ★ huile naphténique isolante → *huile 14.* R нафтеновое электроизоляционное масло. D naphtenbasisches Isolieröl. E aceite nafténico aislante. I olio isolante naftenico. N naftenische isolatie-olie. P olej izolacyjny naftowy. S isolerolja på naftenbas. (212)
4. **oil circuit-breaker** : → *circuit-breaker 16*
5. **oil conservator** : → *conservator 1*
6. **oil grooves** : → *groove 23*
7. **oil immersion "o"** : → *immersion 1*
8. **oil leakage sump** : → *sump 1*
9. **oil pump** : → *pump 2*
10. **oil ring lubricated bearing** : → *bearing 22*
11. **oil seal** : → *seal 11*
12. **oil thrower** : → *thrower 1*
13. **paraffinic insulating oil** : a mineral insulating oil derived from crudes having substantial wax contents. *Note.* — A deep dewaxing process and/or the use of a pour point depressant may be required to meet pour point requirements. ★ huile paraffinique isolante → *huile 15.* R парафиновое электроизоляционное масло. D paraffinbasisches Isolieröl. E aceite parafínico aislante. I olio isolante paraffinico. N paraffinische isolatie-olie. P olej izolacyjny parafinowy. S isolerolja på paraffinbas. (212)
14. **passivated insulating oil** : a mineral insulating oil which contains a passivator in addition to an antioxidant. ★ huile isolante passivée → *huile 12.* R пассивированное электроизоляционное масло. D passiviertes Isolieröl. E aceite aislante pasivado. I olio isolante passivato. N isolatie-olie met passivator. P olej izolacyjny pasywowany. S passiviserad isolerolja. (212)
15. **polyolefin oil** : an insulating liquid consisting of straight and branched chain paraffin hydrocarbons, produced by polymerization of lower olefins. *Note.* — These oils include polybutenes. ★ huile polyoléfinique → *huile 16.* R полиолефиновое масло. D Polyolefin. E aceite poliolefínico. I olio poliolefinico. N polyolefinische olie. P olej poliolefinowy. S olefinolja. (212)
16. **uninhibited insulating oil** : a mineral insulating oil, containing no antioxidant, but which may contain other additives. *Note.* — In certain countries oil containing up to 0.08 % by mass of 2.6-di-tert-butyl paracresol (DBPC) or 2.6-di-tert-butyl-phenol (DBP) are considered as uninhibited oil. ★ huile isolante non inhibée → *huile 11.* R неингибированное электроизоляционное масло. D nichtinhibiertes Isolieröl. E aceite aislante no inhibido. I olio isolante non inibito. N isolatie-olie zonder anti-oxidant. P olej izolacyjny nieinhibitowany. S oinhibiterad isolerolja. (212)

oil-filled

1. **oil-filled cable** : → *cable 47*
2. **oil-filled pipe-type cable** : → *cable 48*

oil-immersed

1. **oil-immersed type reactor** : → *reactor 23*
2. **oil-immersed type transformer** : → *transformer 45*

oil-jacked

1. **oil-jacked bearing** : → *bearing 23*

omnibus

1. **omnibus configuration** : → *configuration 14*

omnidirectional

1. **omnidirectional antenna** : → *antenna 84*
2. **omnidirectional microphone** : → *microphone 27*

once-through

1. **once-through boiler** : → *boiler 9*

one-half-peak

1. **one-half-peak spread** (*Syn.* half-peak divergence) : → *divergence 8*

one-part

1. **one-part tariff** : → *tariff 29*

one-port

1. **one-port network** : → *network 61*

one-unit

1. **one-unit message** (*Syn.* single-unit message) : → *message 15*

one-way

1. **one-way** : pertaining to an operational mode in which the call set-up always occur in one direction. *Note.* — This term should not be used to describe the direction of transfer of users' information. ★ à sens unique → *sens 2.* R односторонний (по установлению соединения). D einfachgerichtet. E de sentido único. I (a un senso). N enkelgericht. P jednokierunkowy (sposób działania). S envägs-. (701,704,714,715,721)
2. **one-way attenuator** (*Syn.* (microwave) isolator) : → *isolator 6*
3. **one-way attenuator** (*Syn.* isolator) : → *isolator 2*

on-hook

1. **on-hook** : the condition of a telephone set which is idle. ★ raccroché → *raccroché 1.* R бестоковое состояние. D frei. E colgado. I con gancio a riposo. N vrij. P stan spoczynku (aparatu). S ledig. (722)
2. **on-hook call** : → *call 46*
3. **on-hook signal** : → *signal 133*

on-load

1. **on-load** (*Syn.* on-load operation) : the operation in which a device or circuit supplies output power. ★ (fonctionnement) en charge → *fonctionnement 29.* R под нагрузкой. D unter Last; Unter-Last- Betrieb; belastet. E (funcionamiento) en carga. I funzionamento sotto carico. N werking onder belasting; belast bedrijf. P praca pod obciążeniem. S under belastning. (151)
2. **on-load operation** (*Syn.* on-load) : → *on-load 1*
3. **on-load tap-changer** : → *tap-changer 1*
4. **(on-load) tap-changer** : → *tap-changer 2*
5. **on-load voltage (of a cell or battery)** : → *voltage 130*

on-off

1. **on-off action** : → *action 15*
2. **on-off level indicator** : → *indicator 15*
3. **on-off transmission** : → *transmission 47*

on-site

1. **on-site maintenance** : → *maintenance 37*

on-state

1. **critical rate of rise of on-state current** : → *rate 16*
2. **on-state** : the condition of a thyristor corresponding to the low-resistance low-voltage portion of its principal characteristic. *Note.* — In the case of reverse conducting devices, this definition is applicable only for positive anode voltage. ★ état passant → *état 48.* R открытое состояние. D Durchlaßzustand. E estado conductor. I stato di conduzione. N doorlaattoestand. P stan przewodzenia. S ledtillstånd. (521)
3. **on-state** (*Syn.* conducting state) : the condition when conducting current flows through a valve or arm. ★ état passant → *état 49.* R открытое состояние. D Durchlaßzustand. E estado conductor. I stato passante; stato conduttore. N geleidingstoestand. P stan włączenia; stan przewodzenia. S ledtillstånd. (551)
4. **on-state slope resistance** : → *resistance 41*

opacity

1. **opacity** (of a film) : the ratio of incident to transmitted luminous flux. ★ opacité → *opacité 1.* R коэффициент непрозрачности (пленки). D Opazität (eines Filmes). E opacidad (de una película). I opacità (di una pellicola). N opaciteit (van een film). P nieprzezroczystość (błony). S opacitet. (881)
2. **relative ionospheric opacity meter** (*Syn.* riometer) : → *riometer 1*

opal

1. **opal bulb** : → *bulb 10*

opaque

1. **opaque medium** : → *medium 25*

open

1. **clearance between open contacts** : → *clearance 3*
2. **open** : applied to a machine in which no mechanical protection as such is embodied and there is no restriction to ventilation other than that necessitated by good mechanical construction. ★ machine ouverte → *machine 61.* **R** открытая машина. **D** offene Maschine. **E** máquina abierta. **I** macchina aperta. **N** open. **P** maszyna otwarta. **S** oskyddad. (411)
3. **open position** : → *position 18*
4. **open (secondary) cell** (*Syn.* vented (secondary) cell) : → *cell 44*
5. **open terminal box** : → *terminal box 3*
6. **open transition auto-transformer starting** : → *starting 12*
7. **open windings** : → *winding 42*
8. **time to stable open condition** : → *time 212*

open-circuit

1. **direct-axis sub-transient open-circuit time constant** : → *time constant 3*
2. **direct-axis transient open-circuit time constant** : → *time constant 5*
3. **open circuit** : a circuit in which the continuity of the path for current has been broken. ★ circuit ouvert → *circuit 86.* **R** разомкнутая цепь. **D** offener Stromkreis. **E** circuito abierto. **I** circuito aperto. **N** open (stroom)kring. **P** obwód otwarty. **S** öppen strömkrets. (151)
4. **open circuit cooling** : → *cooling 11*
5. **open circuit termination** : → *termination 5*
6. **open circuit transition auto-transformer starting** (*Syn.* open transition auto-transformer starting) : → *starting 12*
7. **open circuit voltage** (*Syn.* source e.m.f.) : → *e.m.f. 6*
8. **open circuit voltage** : → *voltage 132*
9. **open-circuit characteristic** : → *characteristic 61*
10. **open-circuit impedance** : → *impedance 43*
11. **open-circuit intermediate voltage** : → *intermediate-voltage 5*
12. **open-circuit intermediate voltage (of a capacitor divider)** : → *intermediate-voltage 6*
13. **open-circuit operation** : → *operation 39*
14. **open-circuit test** : → *test 56*
15. **quadrature-axis sub-transient open-circuit time constant** : → *time constant 12*
16. **quadrature-axis transient open-circuit time constant** : → *time constant 14*
17. **temperature coefficient of open-circuit voltage** : → *coefficient 73*

open-delta

1. **open-delta connection** : → *connection 40*

open-ended

1. **open-ended coil** : → *coil 29*

opening

1. **daylight opening** : area, glazed or unglazed, that is capable of admitting daylight to an interior. ★ prise de jour → *prise 25.* **R** отверстие для дневного света. **D** Tageslichtöffnung. **E** abertura a la luz de día. **I** presa di luce diurna. **N** daglichtopening. **P** otwór świetlny. **S** dagsljusöppning. (845)
2. **four-switch mesh substation with mesh opening disconnectors** : → *substation 6*
3. **opening** (*Syn.* tripping) : the opening of a circuit-breaker by either manual or automatic control of protective devices. *Note.* — The expression "tripping" of a network item (line, transformer) in fact means tripping of the associated circuit-breakers. ★ déclenchement → *déclenchement 6.* **R** отключение. **D** Ausschalten. **E** desconexión. **I** apertura. **N** uitschakelen. **P** wyłączenie. **S** frånslag. (604)
4. **opening operation** : → *operation 40*
5. **opening time** : → *time 116*
6. **opening time of a break contact** : → *time 117*
7. **opening time of a make contact** : → *time 118*
8. **opening time of a output-break circuit** : → *time 119*
9. **opening time of a output-make circuit** : → *time 120*
10. **positive opening operation** : → *operation 48*
11. **ring opening** : 1. the transition from ring operation to radial operation. 2. breaking a ring connection. ★ débouclage → *débouclage 1.* **R** размыкание кольца. **D** Ringauftrennung. **E** apertura del anillo. **I** apertura d'anello. **N** het verbreken van een ring. **P** otwieranie pierścienia. **S** övergång till radialdrift. (603)

open-loop

1. **open loop stabilization** : → *stabilization 3*
2. **open-loop control** : → *control 131*
3. **open-loop frequency response** : → *frequency-response 8*

open-type

1. **open-type substation** : → *substation 17*

operability

1. **service operability performance** : → *performance 13*

operable

1. **operable temperature range** : → *range 49*
2. **operable temperature range** : → *range 50*

operate

1. **failure to operate** : → *failure 24*
2. **failure to operate (of protection equipment)** : → *failure 25*
3. **operate condition** : → *condition 18*
4. **operate time** : → *time 121*
5. **operate value** : → *value 39*
6. **to operate** (for an electrical relay) : to change : either from its release condition to its operate condition (general case), or from an initial condition to a final condition (case of some measuring relays or specified-time relays). *Note.* — The term "to operate" includes both the therm "to start" and the term "to switch". ★ fonctionner → *fonctionner 1.* **R** срабатывать (для электрического реле). **D** arbeiten. **E** funcionar (para un relé eléctrico); actuar (para relés de todo o nada). **I** operare; funzionare; attrarre. **N** aantrekken; opkomen. **P** załączać. **S** fungera. (446)

operating

1. **conventional operating current** : → *current 37*
2. **dynamic operating range** : → *range 14*
3. **instantaneous operating point** : → *point 21*
4. **maximum continuous operating temperature** : → *temperature 25*
5. **mean operating time between failures** (*Syn.* MTBF (abbreviation)) : the expectation of the operating time between failures. ★ moyenne des temps de bon fonctionnement → *moyen 50.* **R** средняя наработка между отказами. **D** mittlere Betriebsdauer zwischen zwei Ausfällen. **E** media de tiempos de funcionamiento entre fallos; MTBF (abreviatura). **I** tempo operativo medio tra guasti. **N** gemiddelde gebruiksduur tussen storingen; MTBF (afkorting). **P** czas funkcjonowania między uszkodzeniami średni. **S** medelfunktionstid mellan fel. (191)
6. **operating conditions** : → *condition 19*
7. **operating conditions** : → *condition 20*
8. **operating current** : → *current 134*
9. **operating curve** (*Syn.* operating line) : → *line 117*
10. **operating cycle** : → *cycle 12*
11. **operating cycle** : → *cycle 13*
12. **operating duration** : → *duration 26*
13. **operating factors** : → *factor 125*
14. **operating line** : → *line 117*
15. **operating loss** : → *loss 69*
16. **operating point** : → *point 29*
17. **operating position** : → *position 19*

18. **operating range** : → *range 51*
19. **operating range** : → *range 52*
20. **operating sequence** : → *sequence 7*
21. **operating state** : → *state 27*
22. **operating system** : → *system 130*
23. **operating temperature** : → *temperature 35*
24. **operating temperature** : → *temperature 36*
25. **operating temperature range** : → *range 53*
26. **operating temperature range** : → *range 54*
27. **operating time** : → *time 122*
28. **operating time** : → *time 123*
29. **operating time between failures** : → *time 124*
30. **operating voltage** : → *voltage 135*

operation

1. **assisted operation** : operation in which the train is worked by two or more motor vehicles, each driven by its own crew. ★ conduite multiple → *conduite 10.* R следование многократной тягой. D unterstützende Traktion. E conducción múltiple. I marcia in trazione multipla. N rijden met bemand extra krachtvoertuig. P trakcja ukrotniona. S lokkoppling. (811)
2. **asynchronous operation** : operation of a machine where the speed of the rotor is other than synchronous speed. ★ fonctionnement asynchrone → *fonctionnement 25.* R асинхронный режим. D asynchroner Lauf. E funcionamiento asíncrono. I funzionamento asincrono. N asynchroon bedrijf. P praca asynchroniczna. S asynkron drift. (411)
3. **asynchronous operation of a synchronous machine** : the non-synchronous operation of a synchronous machine in which the asynchronous generating torque is equal to the prime mover torque or in which the asynchronous motor torque is equal to the motor shaft-torque. ★ marche asynchrone d'une machine synchrone → *marche 13.* R асинхронный ход синхронной машины. D Asynchronbetrieb einer Synchronmaschine. E funcionamiento asíncrono de una máquina síncrona. I marcia asincrona di una macchina sincrona. N asynchroon bedrijf van een synchrone machine. P praca asynchroniczna maszyny synchronicznej. S asynkron drift av synkronmaskin. (603)
4. **attenuation-limited operation** : the condition prevailing in an optical fibre link when the magnitude of the received optical power is the predominant mechanism limiting the system performance. ★ fonctionnement limité par l'affaiblissement → *fonctionnement 48.* R работа с ограниченным затуханием. D dämpfungsbegrenzter Betrieb. E funcionamiento limitado por atenuación. I funzionamento limitato in attenuazione. N door verzwakking begrensd bedrijf. P ograniczenie tłumieniowe transmisji. S dämpningsbegränsad drift. (731)
5. **automatic (telephone) operation** : a method of operating in which a telephone connection can be established without operators. ★ exploitation (téléphonique) automatique → *exploitation 4.* R автоматический способ установления соединения. D Wählbetrieb. E operación (telefónica) automática. I esercizio (telefonico) automatico. N automatische (telefoon)verkeersafwikkeling. P obsługa automatyczna. S automatisk koppling. (722)
6. **automatic train operation** : a method of operation in which the movement of the train is automatically controlled without the intervention of a driver, who, if provided, exercises only a supervisory function. ★ conduite automatique → *conduite 4.* R автоматическое управление движением. D automatischer Betrieb. E conducción automática. I condotta automatica. N automatische treinbesturing. P sterowanie automatyczne. S automatisk manövrering. (811)
7. **bandwidth-limited operation** : the condition prevailing in an optical fibre link when the bandwidth of the system is the predominant distortion mechanism limiting the system performance. ★ fonctionnement limité par la largeur de bande → *fonctionnement 47.* R работа с ограниченной шириной полосы. D bandbreitenbegrenzter Betrieb. E funcionamiento limitado por ancho de banda. I funzionamento limitato in banda. N door bandbreedte begrensd bedrijf. P ograniczenie pasmowe transmisji. S bandbreddsbegränsad drift. (731)
8. **class A operation** : the operation of an electronic tube in such a way that output current flows for the whole of the electrical cycle when a pure sinusoidal input signal is used. *Note.* — The suffix 1 may be used to denote that input current does not flow. The suffix 2 may be used to denote that input current flows during some part of the cycle. ★ fonctionnement en classe A → *fonctionnement 30.* R режим класса A. D A-Betrieb. E funcionamiento en clase A. I funzionamento in classe A. N klasse A-instelling. P praca w klasie A. S klass-A-drift. (531)
9. **class AB operation** : the operation of an electronic tube in such a way that output current flows for appreciably more than half but for less than the whole of the electrical cycle when a pure sinusoidal input signal is used. *Note.* — The suffix 1 may be used to denote that input current does not flow. The suffix 2 may be used to denote that input current flows during some part of the cycle. ★ fonctionnement en classe AB → *fonctionnement 31.* R режим класса AB. D AB-Betrieb. E funcionamiento en clase AB. I funzionamento in classe AB. N klasse AB-instelling. P praca w klasie AB. S klass-AB-drift. (531)
10. **class B operation** : the operation of an electronic tube in such a way that output current flows for approximately half of each electrical cycle when a pure sinusoidal input signal is used. *Note.* — The suffix 1 may be used to denote that input current does not flow. The suffix 2 may be used to denote that input current flows during some part of the cycle. ★ fonctionnement en classe B → *fonctionnement 32.* R режим класса B. D B-Betrieb. E funcionamiento en clase B. I funzionamento in classe B. N klasse B-instelling. P praca w klasie B. S klass-B-drift. (531)
11. **class C operation** : the operation of an electronic tube in such a way that output current flows for appreciably less than half of each electrical cycle when a pure sinusoidal input signal is used. *Note.* — The suffix 1 may be used to denote that input current does not flow. The suffix 2 may be used to denote that input current flows during some part of the cycle. ★ fonctionnement en classe C → *fonctionnement 33.* R режим класса C. D C-Betrieb. E funcionamiento en clase C. I funzionamento in classe C. N klasse C-instelling. P praca w klasie C. S klass-C-drift. (531)
12. **closing operation** (of a mechanical switching device) : an operation by which the device is brought from the open position to the closed position. ★ manœuvre de fermeture → *manœuvre 11.* R операция включения (контактного коммутационного аппарата). D Schließen (eines mechanischen Schalgerätes). E maniobra de cierre (de un aparato mecánico de conexión). I operazione di chiusura (di un apparechio meccanico di manovra). N het sluiten (van een mechanische schakelaar). P zamykanie (łącznika mechanizmowego). S tillslag. (441)
13. **constrained current operation** (*Syn.* forced excitation) : a mode of operation of a transductor in which the waveshape of the current is determined by the forced waveshape of the control current. *Example* : the mode of operation of a series transductor with high control circuit impedance. ★ fonctionnement à courants harmoniques dépendants → *fonctionnement 21.* R режим вынужденного намагничивания. D erzwungene Ausbildung der Ströme; erzwungene Magnetisierung. E funcionamiento con corrientes dependientes. I funzionamento con armoniche di correnti dipendenti. N bedrijf met gedwongen stroomvorm. P działanie wymuszone. S strömstyv drift. (431)
14. **continuous operation duty-type** : → *duty-type 1*
15. **continuous operation duty-type with electric braking** : → *duty-type 2*
16. **continuous operation duty-type with related load/speed changes** : → *duty-type 3*
17. **cycle of operation** : → *cycle 5*
18. **cycle of operation** : → *cycle 6*
19. **cycle of operation of a thermal time-delay switch** : → *cycle 7*
20. **delay mode of operation** : → *mode 15*
21. **dependent manual operation** (of a mechanical switching device) : an operation solely by means of directly applied manual energy, such that the speed and force of the operation are dependent upon the action of the operator. ★ manœuvre dépendante manuelle → *manœuvre 13.* R зависимая ручная операция (контактного коммутационного аппарата). D abhängige Handbetätigung (eines mechanischen Schaltgerätes). E maniobra manual dependiente (de un aparato mecánico de conexión). I manovra manuale dipendente (di un apparecchio meccanico di manovra). N afhankelijke handbediening (van een mechanische schakelaar).

P przestawienie ręczne zależne (łącznika mechanizmowego); napęd ręczny bezpośredni. S beroende handmanöver. (441)

22. **dependent power operation** (of a mechanical switching device) : an operation by means of energy other than manual, where the completion of the operation is dependent upon the continuity of the power supply (to solenoids, electric or pneumatic motors, etc.). ★ manœuvre dépendante à source d'énergie extérieure → *manœuvre 12.* R зависимая двигательная операция (контактного коммутационного аппарата). D abhängige Kraftbetätigung (eines mechanischen Schaltgerätes). E maniobra dependiente con fuente de energía exterior (de un aparato mecánico de conexión). I manovra dipendente mediante sorgente esterna di energia (di un apparecchio meccanico di manovra). N afhankelijke servobediening (van een mechanische schakelaar). P przestawienie maszynowe zależne (łącznika mechanizmowego); napęd maszynowy bezpośredni. S beroende kraftmanöver. (441)

23. **distortion limited operation** : the condition prevailing in an optical fibre link when any form of distortion of the received signal is the predominant mechanism limiting the system performance. ★ fonctionnement limité par la distorsion → *fonctionnement 46.* R работа с ограниченным искажением. D verzerrungsbegrenzter Betrieb. E funcionamiento limitado por distorsión. I funzionamento limitato in dispersione. N door vervorming begrensd bedrijf. P ograniczenie zniekształceniowe transmisji. S distorsionsbegränsad drift. (731)

24. **free current operation** (*Syn.* natural excitation) : a mode of operation of a transductor in which the waveshape of the output current is developed without influence from the control circuit. *Example :* the mode of operation of a parallel transductor or of a series transductor with low control circuit impedance. ★ fonctionnement à courants harmoniques indépendants → *fonctionnement 22.* R режим свободного намагничивания. D freie Ausbildung der Ströme; freie Magnetisierung. E funcionamiento con corrientes independientes. I funzionamento con armoniche di correnti indipendenti. N bedrijf met vrije stroomvorm. P działanie swobodne. S friströmsdrift. (431)

25. **independent manual operation** (of a mechanical switching device) : a stored energy operation where the energy originates from manual power, stored and released in one continuous operation, such that the speed and force of the operation are independent of the action of the operator. ★ manœuvre indépendante manuelle → *manœuvre 17.* R независимая ручная операция (контактного коммутационного аппарата). D unabhängige Handbetätigung (eines mechanischen Schaltgerätes). E maniobra manual independiente (de un aparato mecánico de conexión). I manovra manuale indipendente (di un dispositivo meccanico di manovra). N onafhankelijke handbediening (van een mechanische schakelaar). P przestawienie skokowe (łącznika mechanizmowego); napęd skokowy. S oboroende handmanöver. (441)

26. **interconnected operation** : the operation of two or more networks interconnected by links (for example : lines, transformers, d.c. links) enabling the mutual exchange of electrical energy. ★ marche en interconnexion → *marche 19.* R совместная работа энергосистем. D Verbundbetrieb. E funcionamiento en redes interconectadas. I marcia interconnessa. N gekoppeld bedrijf. P praca w układzie połączonym. S samkörning. (603)

27. **inverse direction of operation** : → *direction 15*

28. **isolated operation** : the stable and temporary operation of a discrete part of a power system after network splitting. ★ marche en îlot → *marche 18.* R изолированная работа. D Inselbetrieb. E funcionamiento en isla. I marcia isolata (di una parte di rete). N eilandbedrijf. P praca wydzielona (części systemu). S sektionerad drift. (603)

29. **limiting values for operation** : → *value 22*

30. **loss mode of operation** : → *mode 36*

31. **manual operation** : a method of driving in which the controls must be operated by a driver on the train or vehicle. ★ conduite manuelle → *conduite 9.* R ручное управление движением. D Handbetrieb. E conducción manual. I condotta presenziata. N handbediening. P sterowanie ręczne. S manuell manövrering. (811)

32. **manual operation of motor-drive mechanism** : operation of the tap-changer manually by a mechanical device, blocking at the same time operation by the electric motor. ★ commande manuelle du mécanisme d'entraînement à moteur → *commande 84.* R ручное управление электроприводом. D Handantrieb. E maniobra manual del mecanismo de accionamiento por motor. I comando manuale del dispositivo di manovra a motore. N handbediening van het motoraandrijfmechanisme. P przełączanie zaczepów ręczne. S handmanövrering av motormanöverdon. (421)

33. **manual (telephone) operation** : a method of operating in which a telephone connection is established with the aid of one or more operators. ★ exploitation (téléphonique) manuelle → *exploitation 5.* R рукоой способ установления соединения. D Handbetrieb. E operación (telefónica) manual. I esercizio (telefonico) manuale. N handbediening; niet-automatische verkeersafwikkeling. P obsługa ręczna. S manuell koppling. (722)

34. **multiple unit operation** : operation in which several motor vehicles are operated from one driver's cab or driving position. ★ marche en unités multiples → *marche 27.* R следование по системе многих единиц. D Fahrt in Vielfachsteuerung (Zugsteuerung). E marcha con unidades múltiples. I comando in multiplo. N rijden in treinschakeling; rijden in multipleschakeling. P trakcja ukrotniona o sterowaniu centralnym. S multipelkörning. (811)

35. **no-load operation** : the operation of a device or a circuit from which there is no output power (but under otherwise normal operating conditions). ★ fonctionnement hors charge → *fonctionnement 42.* R работа в ненагруженном состоянии. D Betrieb ohne Last. E funcionamiento sin carga. I funzionamento senza carico. N werking bij nullast; onbelast bedrijf. P praca bez obciążenia. S tomgång. (151)

36. **one man operation** (*Syn.* one person operation) : a method of use of a train in which all the driving and other operational duties (e.g. control of doors, heating, lighting, etc.) are performed by only one man. ★ ..... → . R ..... D Ein-Mann-Betrieb. E manejo por una sola persona. I ..... N eenpersoonsbediening. P sterowanie i obsługa jednoosobowa. S enmansbetjäning. (811)

37. **one person operation** (*Syn.* one man operation) : → *operation 36*

38. **on-load operation** (*Syn.* on-load) : → *on-load 1*

39. **open-circuit operation** (of a circuit or a generator) : no-load operation with zero output current. ★ fonctionnement à vide → *fonctionnement 23.* R работа в режиме холостого хода (цепи или генератора). D Leerlauf (betrieb) (eines Stromkreises oder Generators). E funcionamiento en vacío (de un circuito o de un generador). I funzionamento a vuoto (di un circuito o di un generatore). N werking bij open (stroom)kring. P praca jałowa. S öppen utgång. (151)

40. **opening operation** (of a mechanical switching device) : an operation by which the device is brought from the closed position to the open position. ★ manœuvre d'ouverture → *manœuvre 14.* R операция отключения (контактного коммутационного аппарата). D Öffnen (eines mechanischen Schaltgerätes). E maniobra de apertura (de un aparato mecánico de conexión). I operazione di apertura (di un apparecchio meccanico di manovra). N het openen (van een mechanische schakelaar). P otwieranie (łącznika mechanizmowego). S frånslag. (441)

41. **operation** : the combination of all technical and administrative actions intended to enable an item to perform a required function, recognizing necessary adaptation to changes in external conditions. *Note.* — By external conditions are understood, for example, service demand and environmental conditions. ★ exploitation → *exploitation 2.* R обеспечение функционирования. D Betrieb. E operación. I esercizio. N gebruik; exploitatie. P użytkowanie; eksploatacja. S drift. (191)

42. **operation** (of a mechanical switching device) : the transfer of the moving contact(s) from one position to an adjacent position. *Notes. 1* — For a circuit-breaker, this may be a closing operation or an opening operation. *2* — If distinction is necessary, an operation in the electrical sense, e.g. make or break, is referred to as a switching operation, and an operation in the mechanical sense, e.g. close or open, is referred to as a mechanical operation. ★ manœuvre → *manœuvre 9.* R операция (контактного коммутационного аппарата). D Betätigen (eines mechanischen Schaltgerätes); Schalten (eines mechanischen Schaltgerätes). E maniobra (de un aparato mecánico de conexión). I operazioni (di un apparecchio meccanico di manovra). N het schakelen (van een mechanische

schakelaar). P przestawienie (łącznika mechanizmowego). S manöver. (441)

43. **operation counter** : → *counter 6*

44. **operation of a push-button switch** : the movement of a button in a push-button switch to the full extent of its permissible travel when a defined force is first applied and then subsequently removed. ★ manœuvre d'un contacteur à touches → *manœuvre 15.* R срабатывание (кнопочный переключатель). D Betätigung eines Druckknopfschalters. E maniobra de un contactor pulsador. I manovra di un interruttore o pulsante. N slag van een druktoetsschakelaar. P przestawienie (łącznika przyciskowego). S slaglängd. (581)

45. **out-of-step operation** : the operating condition of a group of interconnected synchronous machines in which the angles of deviation between two or more machines vary up to the final loss of synchronism or until synchronism is restored. ★ marche hors synchronisme → *marche 29.* R выпадение из синхронизма. D Ausser-Tritt-Zustand. E funcionamiento fuera de sincronismo. I marcia fuori sincronismo. N uit-de-pas-bedrijf. P praca niesynchroniczna. S icke-stabil drift. (603)

46. **parallel operation** : a mode of operation of stabilized supplies in which all similar output terminals are connected together, so that the total load is shared by all the supplies. ★ fonctionnement en parallèle → *fonctionnement 38.* R параллельное включение. D Parallelbetrieb. E funcionamiento en paralelo. I funzionamento in parallelo. N parallelbedrijf. P praca równoległa. S parallellverkan. (303)

47. **parallel operation** : 1. the operation of interconnected power systems in synchronism. 2. the operation of network components connected in parallel, such as lines, transformers, generators. ★ marche en parallèle → *marche 21.* R параллельная работа. D Parallelbetrieb. E funcionamiento en paralelo. I marcia in parallelo. N parallelbedrijf. P praca równoległa. S parallelldrift. (603)

48. **positive opening operation** (of a mechanical switching device) : an opening operation which, in accordance with specified requirements, ensures that all the main contacts are in the open position when the actuator is in the position corresponding to the open position of the device. ★ manœuvre positive d'ouverture → *manœuvre 18.* R полная операция отключения (контактного коммутационного аппарата). D Zwangsöffnung (eines mechanischen Schaltgerätes). E maniobra positiva de apertura (de un aparato mecánico de conexión). I operazione di apertura con rinvii meccanici rigidi (di un apparecchio meccanico di manovra). N het positief openen (van een mechanische schakelaar). P otwieranie niezawodne (łącznika mechanizmowego). S tvångsbrytning. (441)

49. **positively driven operation** : an operation which, in accordance with specified requirements, is designed to ensure that auxiliary contacts of a mechanical switching device are in the respective positions corresponding to the open or closed position of the main contacts. ★ manœuvre effectuée positivement → *manœuvre 16.* R полностью проведенная операция. D Zwangsführung (von Hilfskontakten). E maniobra efectuada positivamente. I operazione effettuata con rinvio meccanico rigido. N het positief schakelen. P przestawienie niezawodne (łącznika mechanizmowego). S tvångsstyrning. (441)

50. **pusher operation** (*Syn.* banking) : → *banking 1*

51. **push-pull operation** : the operation of two similar electronic tubes or of an equivalent double tube in a circuit such that equal signal quantities in phase opposition are applied to the input electrodes, and the two outputs are combined in a single circuit to reproduce the form of the original input signal. ★ fonctionnement en push-pull → *fonctionnement 39.* R двухтактный режим работы. D Gegentaktbetrieb. E funcionamiento en «pushpull». I funzionamento in controfase. N balansschakeling. P praca przeciwsobna. S mottaktskoppling. (531)

52. **push-pull operation** : a method of operation in which a motor vehicle is coupled to one end of the train and pushes or pulls it, the driver being always located in a driver's cab at the head of the train. ★ marche en réversibilité → *marche 26.* R челночное движение. D Wendezugbetrieb. E marcha reversible. I marcia con treni navetta; marcia con treni reversibili. N rijden met een trekduwtrein. P jazda nawrotna. S push-pulldrift. (811)

53. **push-push operation** : the operation of two similar electronic tubes or of an equivalent double tube, in a circuit such that equal signal quantities in phase opposition are applied to the input electrodes, and the two outputs are combined in a single circuit to cancel the original fundamental input frequency. This facilitates frequency multiplication. ★ fonctionnement en push-push → *fonctionnement 40.* R двукратный режим работы. D Betrieb mit Gegentakteingang und Eintaktausgang. E funcionamiento en «pushpush». I funzionamento in semicontrofase. N balansschakeling voor frequentievermenigvuldiging. P praca posobna. S mottaktskoppling för frekvensmultiplicering. (531)

54. **quantum limited operation** (*Syn.* quantum-noise-limited operation) : → *operation 55*

55. **quantum-noise-limited operation** (*Syn.* quantum limited operation) : the condition prevailing in an optical fibre link when quantum noise is the predominant mechanism limiting the system performance. ★ fonctionnement limité par le bruit quantique → *fonctionnement 49.* R работа с ограниченным квантовым шумом. D quantenrauschenbegrenzter Betrieb; quantenbegrenzter Betrieb. E funcionamiento limitado por ruido cuántico. I funzionamento limitato dal rumore quantico. N door quantumruis begrensd bedrijf. P ograniczenie szumowe transmisji. S kvantbrusbegränsad drift. (731)

56. **radial operation (of a part of a network)** : the method of operation where each point of a given part of a network is fed along one path only. ★ marche en antenne (d'une partie d'un réseau) → *marche 15.* R радиальное питание. D Stichbetrieb. E funcionamiento en antena (de una parte de una red). I marcia in antenna (di una parte di rete). N stervormig bedrijf een (vannetgedeelte). P praca promieniowa. S radialdrift. (603)

57. **ring operation of a part of a network** : the method of operation where each point of a given part of a network is fed from one or two sources along two distinct paths. *Note.* — This method of operation is called : "closed ring" if each point of the network is normally fed along two paths ; "open ring" if each point of the network can be fed along either of two paths. ★ marche en boucle d'une partie d'un réseau → *marche 16.* R двустороннее питание. D Ringbetrieb. E funcionamiento en anillo de una parte de una red. I marcia in anello di una parte di rete. N ringbedrijf met een netgedeelte. P praca pierścieniowa. S slingdrift. (603)

58. **scheduled operation** (of a generating set) : operation of a selected generating set at constant power, or on successive steps of power, the values of which are previously specified, within a given period of time. ★ marche sur programme → *marche 32.* R работа по графику. D Betrieb nach Programm (eines Generatorsatzes). E funcionamiento sobre programa (de un grupo generador). I marcia a tavoletta (di un gruppo generatore). N bedrijfsvoering volgens programma (van een produktie-eenheid). P praca programowa (generatora). S planerad aggregatdrift. (603)

59. **(secondary) power control operation** (of a generating set) : operation of a selected generating set at changing power following instructions received from the secondary control device. ★ marche en réglage (secondaire) → *marche 24.* R работа агрегата в режиме вторичного регулирования. D sekundär geregelter Betrieb (eines Generatorsatzes). E funcionamiento en regulación (secundaria) (de un grupo generador). I marcia in regolazione (secondaria) (di un gruppo generatore). N bedrijfsvoering in secundaire regeling (van een produktie-eenheid). P praca regulacyjna (generatora). S styrd aggregatdrift. (603)

60. **semi-automatic (telephone) operation** (in international service) : a manual telephone operation in which the operator in the outgoing centre controls the automatic switching operations to obtain either the called party or an operator in the incoming or transit centre. ★ exploitation (téléphonique) semi-automatique → *exploitation 6.* R полуавтоматический способ установления (телефонного) соединения (в международной службе). D halbautomatischer Betrieb (im internationalen Dienst). E operación (telefónica) semiautomática (en servicio internacional). I esercizio (telefonico) semi-automatico (in servizio internazionale). N half-automatische afwikkeling van internationaal verkeer. P obsługa półautomatyczna (połączeń międzynarodowych). S ..... (722)

61. **semi-automatic (telephone) operation** (in national service) : a method of working in which a calling party having automatic telephone service calls an operator who completes the connection to the wanted party. ★ exploitation (téléphonique) semi-automatique → *exploitation 7.*

R полуавтоматический способ установления (телефонного) соединения (в национальной службе). D halbautomatischer Betrieb (im Inlandsdienst). E operación (telefónica) semiautomática (en servicio nacional). I esercizio (telefonico) semi-automatico (in servizio nazionale). N half-automatische afwikkeling van nationaal verkeer. P obsługa półautomatyczna (połączeń krajowych). S ..... (722)

62. **separate network operation** : the operation of a power system disconnected from neighbouring power systems. ★ marche en réseau séparé → *marche 25.* R раздельная работа энергосистемы. D Teilnetzbetrieb. E funcionamiento en red separada. I marcia separata (di una rete). N gescheiden bedrijf. P praca samodzielna. S separatdrift. (603)

63. **series operation** : a mode of operation of stabilized supplies, in which the output terminals are connected in series, so that the output voltages of the supplies are additive. ★ fonctionnement en série → *fonctionnement 41.* R последовательное включение. D Serienbetrieb. E funcionamiento en serie. I funzionamento in serie. N seriebedrijf. P praca szeregowa. S serieverkan. (303)

64. **short-circuit operation** (of a circuit or a generator) : no-load operation with zero output voltage, the output terminals being short-circuited. ★ fonctionnement en court-circuit → *fonctionnement 34.* R работа в режиме короткого замыкания. D Kurzschluß (betrieb) (eines Stromkreises oder Generators). E funcionamiento en corto-circuito (de un circuito o de un generador). I funzionamento in cortocircuito (di un circuito o di un generatore). N kortsluitbedrijf. P praca zwarciowa. S kortsluten utgång. (151)

65. **single sweep operation** : the operation of a time base so that one sweep only is triggered. Further sweeps are prevented until the time base has been externally reset. ★ fonctionnement en balayage unique → *fonctionnement 26.* R режим однократной развертки. D einmalige Zeitablenkung. E funcionamiento con barrido único. I funzionamento con unica scansione. N eenmalige tijdbasis. P rozciąg pojedynczy. S engångssvepfunktion. (303)

66. **slave operation** : a mode of operation achieving co-ordinated control of interconnected control supplies by setting the "master" supply alone. *Note.* — Such cominations are characterized by substantially proportional outputs from all units. ★ fonctionnement en esclave → *fonctionnement 35.* R работа в управляемом режиме. D abhängiger Betrieb. E funcionamiento telemandado. I funzionamento asservito. N afhankelijk bedrijf. P praca zależna. S slavfunktion. (303)

67. **slave tracking operation** : an interconnection of stabilized supplies (having one or more output terminal(s) in common), the slave supplies having their outputs always held equal or proportional to the output of the "master" supply. *Note.* — A configuration in which the slave is of the opposite polarity to the "master", whith respect to the common output terminal, is called "complementary tracking". ★ fonctionnement en esclave suiveur → *fonctionnement 36.* R работа в управляемом следящем режиме. D Nachlaufbetrieb. E funcionamiento telemandado seguidor. I funzionamento asservito ad inseguimento. N afhankelijk bedrijf. P praca nadążna. S slavstyrning. (303)

68. **stored energy operation** (of a mechanical switching device) : an operation by means of energy stored in the mechanism itself prior to the completion of the operation and sufficient to complete it under predetermined conditions. *Note.* — This kind of operation may be subdivided according to: 1. The manner of storing the energy (spring, weight, etc.); 2. The origin of the energy (manual, electric, etc.); 3. The manner of releasing the energy (manual, electric, etc.). ★ manœuvre à accumulation d'énergie → *manœuvre 10.* R операция посредством запасенной энергии (контактного коммутационного аппарата). D Kraftspeicherbetätigung (eines mechanischen Schaltgerätes). E maniobra con acumulación de energía (de un aparato mecánico de conexión). I manovra ad accumulazione di energia (di un apparecchio meccanico di manovra). N onafhankelijke bediening (met geaccumuleerde energie) (van een mechanische schakelaar). P przestawienie niezależne (łącznika mechanizmowego); napęd zasobnikowy. S manöver med upplagrad energi. (441)

69. **synchronous operation** : operation of a machine where the speed of the rotor is the same as the synchronous speed. ★ fonctionnement synchrone → *fonctionnement 50.* R синхронный режим. D synchroner Lauf. E funcionamiento síncrono. I funzionamento sincrono. N synchroon bedrijf. P praca synchroniczna. S synkron drift. (411)

70. **synchronous operation of a machine** : the ideal operating condition of a synchronous machine connected to the network in which the electrical angular velocity of the machine corresponds with the network frequency. *Note.* — Under pratical operating conditions the angular velocity of the machine may slightly oscillate around the ideal value. ★ marche synchrone d'une machine → *marche 34.* R синхронная работа электрической машины. D Synchronbetrieb einer Maschine. E funcionamiento síncrono de una máquina. I marcia sincrona di una macchina. N synchroon bedrijf van een machine. P praca synchroniczna maszyny. S synkron maskindrift. (603)

71. **synchronous operation of a system** : the condition of a system in which all machines are in synchronous operation. ★ marche synchrone d'un réseau → *marche 33.* R синхронная работа энергосистемы. D Synchronbetrieb eines Netzes. E funcionamiento síncrono de una red. I marcia sincrona di una rete. N synchroon bedrijf van een systeem. P praca synchroniczna systemu elektroenergetycznego. S synkron systemdrift. (603)

72. **tap-change operation** : the complete sequence of events from the initiation to the completion of the transition of the through-current from one tap of the winding to an adjacent one. ★ opération de changement de prise → *opération 1.* R операция переключения. D Stufenschaltung. E operación de cambio de tomas. I operazione di commutazione. N schakeling. P przełączanie zaczepu. S lindningskopplarmanöver. (421)

73. **unwanted operation** : a change in the operational state of a device which should not have occurred at the time considered. ★ fonctionnement intempestif → *fonctionnement 44.* R ложное действие оборудования. D ungewollte Funktion. E funcionamiento intempestivo. I funzionamento intempestivo. N ongewenst functioneren. P zadziałanie błędne; zadziałanie fałszywe. S icke-önskad funktion. (604)

74. **unwanted operation (of a protection equipment)** : the incorrect operation of protection equipment either without any power system fault or for a system fault for which that protection equipment should not have operated. ★ fonctionnement intempestif (d'un dispositif de protection) → *fonctionnement 45.* R нежелательное срабатывание (устройства защиты). D Überfunktion (einer Schutzeinrichtung). E funcionamiento intempestivo (de un dispositivo de protección). I funzionamento intempestivo (di un dispositivo di protezione). N ongewenst aanspreken (van beveiligingsapparatuur). P zadziałanie zbędne (urządzenia zabezpieczającego). S obehörig funktion. (448)

operational

1. **operational** : qualifies a value determined under given operational conditions. ★ opérationnel → *opérationnel 2.* R эксплуатационный. D betrieblich. E ... operacional. I in condizioni operative. N operationeel; werk. P eksploatacyjny. S funktions-; drifts-. (191)
2. **operational amplifier** : → *amplifier 22*
3. **operational earthing** : → *earthing 16*
4. **operational grounding** (*Syn.* operational earthing) : → *earthing 16*
5. **(operational) MUF** : → *MUF 2*
6. **system operational diagram** : → *diagram 21*

operative

1. **operative range of an energizing quantity** : → *range 55*

operator

1. **camera operator** : person responsible for handling a television camera, in particular for determining the field of view while shooting and for focusing the image. ★ cadreur → *cadreur 1.* R оператор камеры. (723)
2. **multiple operator power source** : → *source 19*
3. **operator call-in signal** : → *signal 134*
4. **operator recall signal** : → *signal 135*
5. **special effects operator** : operator specialising in television special effects. ★ truquiste → *truquiste 1.* R оператор специальных эффектов. (723)

opinion

1. **mean opinion score** : → *score 1*
2. **opinion score** : → *score 2*

opposite-field

1. **opposite-field therapy** : → *therapy 7*

opposition

1. **in opposition** : applies to two sinusoidal quantities of the same frequency having a phase difference equal to π rad. ★ en opposition → *opposition 2.* R в противофазе. D gegenphasig. E en oposición. I in opposizione. N in tegenfase. P w opozycji. S i motfas. (101)
2. **opposition duplex** : → *duplex 9*

optic

1. **fibre optic terminal device** : → *device 25*
2. **fibre optics** : the branch of optical technology concerned with the transmission of optical radiation through fibres made of transparent materials such as glass, fused silica, or plastic. ★ optique des fibres → *optique 41.* R волоконная оптика. D Faseroptik; Lichtwellenleiter-Optik. E óptica de las fibras. I ottica delle fibre. N vezeloptica. P technika światłowodowa. S fiberoptik. (731)
3. **geometric optics** (*Syn.* ray optics) : the geometric treatment of the propagation of optical radiation as light rays. *Note.* — When geometric optics is applicable it permits the replacement of Maxwell's equations by simpler relationships. ★ optique géométrique → *optique 44.* R геометрическая оптика. D geometrische Optik; Strahloptik. E óptica geométrica; óptica de rayos. I ottica geometrica. N geometrische optica; stralenoptica. P optyka geometryczna; optyka promieniowa. S geometrisk optik. (731)
4. **geometrical optics** : an asymptotic model for wavelengths approaching zero by which the propagation of waves, in various media and at their boundaries is determined by using the geometrical concept of rays and not the general theory of waves. *Notes. 1* — Polarization of waves is generally not taken into account by geometrical optics. *2* — For geometrical optics to be applicable in practice, the following conditions are required : a) The space variations of the electrical properties of the various media must be small along a distance of one wavelength. b) The surface separating two different media must be very large and its irregularities very small with respect to wavelength. c) The grazing angle of a wave on a surface separating two different media must not be too small. ★ optique géométrique → *optique 43.* D geometrische Optik. P optyka geometryczna. (705)
5. **optic axis** : → *axis 7*
6. **physical optics** (*Syn.* wave optics) : the treatment of propagation of optical radiation as a wave phenomenon, rather than a ray phenomenon as in geometric optics. ★ optique physique → *optique 46.* R физическая оптика; волновая оптика. D physikalische Optik; Wellenoptik. E óptica física; óptica ondulatoria. I ottica fisica; ottica ondulatoria. N fysische optica; golfoptica. P optyka fizyczna; optyka falowa. S fysikalisk optik. (731)
7. **ray optics** (*Syn.* geometric optics) : → *optic 3*
8. **receive fibre optic terminal device** : → *device 47*
9. **transmit fibre optic terminal device** : → *device 58*
10. **wave optics** (*Syn.* physical optics) : → *optic 6*

optical

1. **instrument with optical index** : → *instrument 18*
2. **integrated optical circuit** : → *circuit 94*
3. **meteorological optical range** : → *range 43*
4. **optical axis** (*Syn.* fibre axis) : → *axis 4*
5. **optical cable** : → *cable 49*
6. **optical cable assembly** : → *assembly 17*
7. **optical cavity** : → *cavity 9*
8. **optical combiner** : → *combiner 1*
9. **(optical) coupler** (*Syn.* optical fibre coupler) : → *coupler 18*
10. **optical data bus** : → *data 26*
11. **(optical) density** : → *density 18*
12. **optical detector** : → *detector 20*
13. **optical fibre** : → *fibre 14*
14. **optical fibre cable** (*Syn.* optical cable) : → *cable 49*
15. **optical fibre connector** : → *connector 36*
16. **optical fibre coupler** : → *coupler 18*
17. **optical fibre distribution system** : → *system 131*
18. **optical fibre link** : → *fibre 19*
19. **optical fibre pigtail** : → *pigtail 1*
20. **optical fibre splice** : → *splice 4*
21. **(optical) filter** : → *filter 32*
22. **optical flux** (*Syn.* radiant power) : → *power 153*
23. **optical image** : → *image 21*
24. **optical light output ratio** : → *ratio 64*
25. **optical link pilot protection system** : → *system 132*
26. **optical path length** : → *length 24*
27. **optical path length** : → *length 25*
28. **optical power** (*Syn.* radiant power) : → *power 153*
29. **optical radiation** : → *radiation 50*
30. **optical regenerative repeater** : → *regenerative 1*
31. **optical repeater** : → *repeater 10*
32. **optical spectrum** : → *spectrum 21*
33. **optical splice** (*Syn.* optical fibre splice) : → *splice 4*
34. **optical thickness** : → *thickness 5*
35. **optical thickness of the atmosphere** : → *thickness 6*
36. **optical time domain reflectometry** : → *reflectometry 1*
37. **optical videodisk** : → *videodisk 3*
38. **optical viewing system** : → *system 133*
39. **optical waveguide** : → *waveguide 8*
40. **reflectance factor (optical) density** : → *density 26*
41. **reflectance (optical) density** : → *density 27*
42. **relative optical air mass** : → *mass 26*
43. **spectral optical depth** (*Syn.* spectral optical thickness) : → *thickness 7*
44. **spectral optical thickness** : → *thickness 7*
45. **thin film optical waveguide** : → *waveguide 18*
46. **transmittance (optical) density** : → *density 42*

optically

1. **optically active material** : → *material 32*

optimal

1. **optimal colour stimuli** : → *stimulus 10*
2. **optimal control** : → *control 132*

optimum

1. **optimum gain** : → *gain 26*
2. **optimum load** : → *load 69*
3. **optimum mechanical tuning range** : → *range 56*
4. **optimum output power** : → *power 95*
5. **optimum working frequency** : → *frequency 141*

opting

1. **opting out** : temporarily replacing the programme carried by some transmitters of a broadcast transmitter network, by another programme such as a local programme. ★ décrochage → *décrochage 8.* R замена программы. (723)

optoelectronic

1. **optoelectronic** : applies to optical phenomena produced by absorption of charge carriers. ★ optoélectronique → *optoélectronique 1.* R оптоэлектронный. D optoelektronisch. E optoelectrónico. I optoelettronico. N opto-elektronisch. P optoelektronowy. S optoelektrisk. (121)
2. **opto-electronic** : pertaining to a device that has at least one electrical port essential for its operation and that responds to optical power, emits or modifies optical radiation, or utilises optical radiation for its internal operation ; also used to denote the corresponding technique. *Notes. 1* — An opto-electronic device is any device that functions as an electrical-to-optical or optical-to-electrical transducer. Examples are photodiodes, LEDs and injection lasers. *2* — "Electro-optic" is often erroneously used as a synonym. ★ optoélectronique → *optoélectronique 2.* R оптоэлектронный. D opto-elektronisch. E opto-electrónica. I opto-elettronico. N opto-elektronisch. P optoelektroniczny. S optoelektronik. (731)

orbit

1. **circular orbit** (of a satellite) : a satellite orbit in which the distance between the centres of mass of the satellite and the primary body is constant. ★ orbite circulaire → *orbite 2.*

R круговая орбита (спутника). D kreisförmige Umlaufbahn (eines Satelliten). E órbita circular (de un satélite). I orbita circolare. N cirkelbaan. P orbita kołowa (satelity). S cirkulär bana. (725)

2. **direct orbit** (of a satellite) : a satellite orbit such that the projection of the centre of mass of the satellite on to the principal reference plane revolves about the axis of the primary body in the same direction as that in which the primary body rotates. ★ orbite directe → *orbite 4.* R прямая орбита (спутника). D voreilender Umlauf (eines Satelliten). E órbita directa (de un satélite). I orbita diretta (di un satellite). N meelopende baan. P orbita zgodna (satelity). S direkt bana. (725)

3. **elliptical orbit** (of a satellite) : a satellite orbit in which the distance between the centres of mass of the satellite and the primary body is not constant, but remains finite. *Note.* — In this case, the unperturbed orbit is an ellipse in a frame of reference whose centre is the centre of mass of the primary body and whose axes have fixed directions in relation to the stars. ★ orbite elliptique → *orbite 5.* R эллиптическая орбита (спутника). D elliptische Umlaufbahn (eines Satelliten). E órbita elíptica (de un satélite). I orbita ellittica. N elliptische baan. P orbita eliptyczna (satelity). S elliptisk bana. (725)

4. **equatorial orbit** (of a satellite) : a satellite orbit, the plane of which coincides with that of the equator of the primary body. ★ orbite équatoriale → *orbite 6.* R экваториальная орбита (спутника). D äquatoriale Umlaufbahn (eines Satelliten). E órbita ecuatorial (de un satélite). I orbita equatoriale. N equatoriale baan. P orbita równikowa (satelity). S ekvatorbana. (725)

5. **geostationary satellite orbit** : the unique orbit of all geostationary satellites. ★ orbite des satellites géostationnaires → *orbite 3.* R геостационарная орбита спутника. D Umlaufbahn geostationärer Satelliten. E órbita de los satélites geoestacionarios. I orbita di satellite geostazionario. N geostationaire (satelliet)baan. P orbita satelitów geostacjonarnych. S geostationnär satellitbana. (725)

6. **inclined orbit** (of a satellite) : a satellite orbit which is neither equatorial nor polar. ★ orbite inclinée → *orbite 7.* R наклонная орбита (спутника). D geneigte Umlaufbahn (eines Satelliten). E órbita inclinada (de un satélite). I orbita inclinata. N hellende baan. P orbita nachylona (satelity). S lutande bana. (725)

7. **orbit** : the path, relative to a specified frame of reference described by the centre of mass of a satellite or other object in space, subjected solely to forces of natural origin, mainly the force of gravity: by extension, the path described by the centre of mass of an object in space subjected to forces of natural origin and occasional low-energy corrective forces exerted by a propulsive device in order to achieve and maintain a desired path. ★ orbite → *orbite 1.* R орбита. D Umlaufbahn. E órbita. I orbita. N baan. P orbita. S (krets)bana (krets). (725)

8. **polar orbit** (of a satellite) : a satellite orbit, the plane of which contains the polar axis of the primary body. ★ orbite polaire → *orbite 9.* R полярная орбита (спутника). D polare Umlaufbahn (eines Satelliten). E órbita polar (de un satélite). I orbita polare. N polaire baan. P orbita biegunowa (satelity). S polbana. (725)

9. **retrograde orbit** (of a satellite) : a satellite orbit such that the projection of the centre of mass of the satellite on to the principal reference plane revolves about the axis of the primary body in reverse direction to that in which the primary body rotates. ★ orbite rétrograde → *orbite 10.* R обратная орбита (спутника). D nacheilender Umlauf (eines Satelliten). E órbita retrógrada (de un satélite). I orbita inversa (di un satellite). N tegengestelde baan. P orbita przeciwna (satelity). S retrograd bana. (725)

10. **unperturbed orbit** (of a satellite) : the orbit of a satellite in the idealized condition in which the satellite is subjected only to the attraction of the primary body, effectively concentrated at its centre of mass. *Note.* — In a frame of reference whose centre is the centre of mass of the primary body, and whose axes have fixed directions in relation to the stars, the unperturbed orbit is a conic section. ★ orbite non perturbée → *orbite 8.* R невозмущенная орбита. D ungestörte Umlaufbahn (eines Satelliten). E órbita no perturbada (de un satélite). I orbita non perturbata (di un satellite). N ongestoorde baan. P orbita niezakłócona (satelity). S ostörd bana. (725)

orbital

1. **orbital electron capture** : → *capture 4*
2. **orbital elements** : → *element 34*
3. **orbital period** (*Syn.* period of revolution) : → *period 25*
4. **orbital plane** : → *plane 12*
5. **orbital quantum number** : → *number 23*

order

1. **harmonic order** (*Syn.* harmonic number) : → *number 11*
2. **intermodulation product order** : a sum $|p| + |q| + \ldots$ of the absolute values of integral coefficients p, q, ... of the formula : $f = p f_1 + q f_2 + \ldots$ giving the combination frequency of an intermodulation product in terms of frequencies f_1, f_2, ... of the spectral components at the input of a non-linear device or transmission medium. ★ ordre d'un produit d'intermodulation → *ordre 16.* R порядок комбинационной частоты. D Ordnung eines Intermodulationsprodukts. E orden de un producto de intermodulación. I ordine di un prodotto di intermodulazione. N orde van de intermodulatieprodukten. P rząd produktu intermodulacji. S intermodulationshalt. (702)
3. **mass in working order** : → *mass 21*
4. **order signal** : → *signal 136*
5. **overtone order** : the integral numbers given to the successive overtones of a given mode of vibration, in order of increasing frequency commencing with the fundamental as unity. *Note.* — For shear and extension modes, the overtone order is the quotient of the frequency of the overtone by the fundamental frequency rounded to the nearest whole number. ★ ordre d'un partiel → *ordre 15.* R номер гармоники. D Ordnung des Obertons. E orden de un armónico. I ordine di un'armonica; rango di un'armonica. N boventoonnummer. P rząd nadpodstawowy. S övertonsnummer. (561)
6. **sequential order of the phases** : the order in which the iteration of the *m* phases is performed. ★ ordre de séquence des phases → *ordre 13.* R порядок чередования (следования) фаз. D Phasenfolge. E orden secuencial de fases. I sequenza delle fasi. N fasenvolgorde. P następstwo faz. S fasföljd. (131)

ordinary

1. **ordinary luminaire** : → *luminaire 16*
2. **ordinary wave** : → *wave 40*

ore

1. **ore content meter** : → *content meter 4*

organ

1. **blood forming organs** : organs that make the blood cells, namely the bone marrow, lymphoid tissues, and spleen. ★ organes hématopoïétiques → *organe 8.* R кроветворные органы. D blutbildende Organe. E órganos hematopoyéticos. I tessuti ematopoietici. N bloedvormende organen. P narządy krwiotwórcze. S blodbildande organ. (881)
2. critical organ (obsolescent) : that part of the body that is most susceptible to radiation damage under specified conditions of irradiation. ★ organe critique → *organe 1.* R критический орган. D kritisches Organ (veralteter Begriff). E órgano crítico. I organo critico (obsoleto). N kritiek/kritisch orgaan. P organ krytyczny. S kritiskt organ. (881)

organic

1. **synthetic organic ester** : → *ester 1*

organic-quenched

1. **organic-quenched counter tube** : → *counter tube 19*

organic-vapour-quenched

1. **organic-vapour-quenched counter tube** : → *counter tube 20*

orientation

1. **channel orientation** : the operation which consists of connecting channels of a stereophonic reproducing equipment so that the right-hand loudspeaker(s) as viewed from the audience shall be actuated by the groove wall which is further away from the centre of the disk. ★ orientation des voies → *orientation 4.* R ориентация каналов. D Kanalzuordnung. E orientación de los canales. I orientazione dei canali.

N kanaaloriëntatie. P orientacja kanałów. S kanalorientering. (806)

2. **orientation** : a system providing alternative polarization to prevent cross-mating of similar components when, for instance, used on the same equipment. ★ orientation → *orientation 1.* R кодирование поляризационное. D Orientierung. E orientación. I codifica; orientamento. N codering. P system identyfikacyjny. S orientering. (581)
3. **orientation** : 1. In synchronous transmission, systematic phase difference between the position of the receiving distributor and the position of the transmitting distributor, in order to take into account the propagation time of the signals or delays in the response of the receiving device. 2. Angular rotation of the rest position of the camsleeve of a receiver, with a view to improve its margin. ★ orientation → *orientation 2.* R смещение фазы. D Orientierung. E orientación. I orientamento. N oriëntatie. P przesunięcie fazy. S fasläge. (721)
4. **orientation of a synthetic quartz crystal** : the orientation of the seed of a synthetic quartz crystal with respect to the crystallographic axis system. ★ orientation d'un cristal de quartz synthétique → *orientation 5.* R ориентация кристалла синтетического кварца. D Orientierung eines synthetischen Quarzkristalls. E orientación de un cristal de cuarzo sintético. I orientamento di un cristallo di quarzo sintetico. N oriëntatie van een synthetisch kwartskristal. P orientacja kryształu kwarcu syntetycznego. S kristallorientering. (561)
5. **orientation range** : → *range 57*

origin

1. **origin** (of a call attempt) : the location of the calling party in the network. *Note.* — The origin may be specified with the accuracy appropriate to the situation. ★ origine → *origine 2.* D Ursprung. P źródło ruchu. (715)
2. **origin of an electrical installation** : → *installation 11*

original

1. **lacquer original** : → *lacquer 3*
2. **master original** (*Syn.* master negative) : → *master 7*
3. **master original** : → *master 9*
4. **original equipment battery** : → *battery 54*

originating

1. **originating** : pertaining to traffic in a network, to indicate that the sources generating the traffic are located within this network. ★ de départ → *départ 1.* R оконечный исходящий. D Ursprungs-. E de partida; de origen. I di partenza. N ontspringend. P początkowy; inicjujący. S avgående. (714)
2. **originating traffic** : → *traffic 13*

orthicon

1. **image orthicon** : a low-velocity image camera tube in which the electron image is stored and scanned on opposite sides of the target. ★ orthicon à transfert d'image → *orthicon 4.* R суперортикон. D Superorthikon. E orticón de transferencia de imagen; orticón de imagen. I orticon immagine. N beeldorthicon. P superortikon. S bildortikon. (531)
2. **image orthicon** : a low-electron-velocity image camera tube. ★ image orthicon → *image 31.* R суперортикон. (723)
3. **orthicon** : a low-velocity photoemissive camera tube in which the beam scans a mosaic capable of storing an electric charge pattern. ★ orthicon → *orthicon 3.* R ортикон. D Orthikon. E orticón. I orticon. N orthicon. P ortikon. S ortikon. (531)

orthodiagraphy

1. **orthodiagraphy** : the technique of point-to-point plotting of the fluoroscopic image, usually of the heart, without appreciable magnification. The result is called an orthodiagram. ★ orthoradioscopie → *orthoradioscopie 1.* R ортодиаграфия. D Orthodiagraphie. E ortorradioscopia. I ortodiagrafia. N orthodiagrafie. P ortoradioskopia. S ortodiagrafi. (881)

orthogonal

1. **orthogonal grid** : → *grid 24*
2. **orthogonal modes** : → *mode 66*
3. **orthogonal polarization** : → *polarization 24*

orthomode

1. **orthomode transducer** : → *transducer 9*

oscillating

1. **oscillating** : alternately increasing and decreasing. ★ oscillant → *oscillant 3.* R колебательный. D oszillierend; schwingend. E oscilante. I oscillante. N oscillerend; trillend. P drgający; oscylacyjny. S svängande; oscillerande. (101)

oscillation

1. **acoustical oscillation** (*Syn.* vibration; sound) : movement of particles in an elastic medium about an equilibrium position. ★ oscillation acoustique → *oscillation 3.* R акустическое колебание; вибрация; звук. D Schallschwingung. E vibración acústica; oscilación acústica. I vibrazione acustica. N geluid(s)trilling. P drganie akustyczne. S akustisk svängning. (801)
2. **damped oscillation** : an oscillation whose successive peak to valley values decrease to zero. ★ oscillation amortie → *oscillation 4.* R затухающее колебание. D gedämpfte Schwingung. E oscilación amortiguada. I oscillazione smorzata. N gedempte trilling. P drganie tłumione. S dämpad svängning. (101)
3. **forced oscillation** : an oscillation produced by an external excitation. ★ oscillation forcée → *oscillation 9.* R вынужденное колебание. D erzwungene Schwingung. E oscilación forzada. I oscillazione forzata. N gedwongen trilling. P drganie wymuszone. S påtryckt svängning. (101,801)
4. **fore-and-aft oscillation** : a linear disturbing movement along the track. ★ (mouvement d')avance et recul → *mouvement 3.* R колебания в продольном направлении. D Laengsbewegung. E oscilación longitudinal. I setacciamento. N langsrukken. P drgania wzdłużne. S longtudinell svängning. (811)
5. **free oscillation** : a damped oscillation produced solely by energy previously stored in a system. ★ oscillation libre → *oscillation 10.* R свободное колебание. D freie Schwingung. E oscilación libre. I oscillazione libera. N vrije trilling. P drganie swobodne. S fri svängning. (101)
6. **free oscillation** : oscillation that continues after removal of the external excitation. ★ oscillation libre → *oscillation 11.* R свободное колебание. D freie Schwingung. E oscilación libre. I oscillazione libera. N vrije trilling. P dragnie swobodne. S fri svängning. (801)
7. **fundamental mode of oscillation** : → *mode 31*
8. **lateral oscillation** : a linear disturbing movement across the track. ★ ballant → *ballant 1.* R колебания в поперечном направлении. D Querbewegung. E oscilación lateral. I oscillazione laterale. N zwaaien; schiftslag schommelen. P drgania poprzeczne. S lateral svängning. (811)
9. **mode of oscillation** : → *mode 54*
10. **modulated oscillation** (*Syn.* modulated signal) : → *signal 122*
11. **normal mode of oscillation** : → *mode 65*
12. **oscillation** : a physical phenomenon characterized by one or more alternately increasing and decreasing quantities. ★ oscillation → *oscillation 2.* R колебание. D Schwingung. E oscilación. I oscillazione. N oscillatie. P drganie. S svängning; oscillation. (101,702)
13. **parasitic oscillation** : an unwanted oscillation produced in an equipment at a frequency independent both of the operating frequencies and of frequencies related to the generation of desired oscillations. ★ oscillation parasite → *oscillation 12.* R паразитное колебание. D parasitäre Schwingung. E oscilación parásita. I oscillazione spuria. N parasitaire oscillatie. P drganie pasożytnicze. S parasitsvängning. (161,702)
14. **relaxation oscillation** : an oscillation where energy is accumulated relatively slowly in one element of a system and transferred rapidly to another. ★ oscillation de relaxation → *oscillation 5.* R релаксационное колебание. D Relaxationsschwingung. E oscilación de relajación. I oscillazione di rilassamento. N relaxatietrilling. P drganie relaksacyjne. S vippsvängning. (101)
15. **self-excited oscillation** (*Syn.* self-induced oscillation) : → *oscillation 16*
16. **self-induced oscillation** (*Syn.* self-excited oscillation) : a continuing oscillation that is generated in a system when non-oscillatory energy is supplied. ★ auto-oscillation

→ *auto-oscillation 1.* R самовозбужденное колебание. D selbsterregte Schwingung. E oscilación autoexcitada. I autoscillazione. N zelf opgewekte trilling. P drganie samowzbudne. S självsvängning. (801)

17. **steady-state oscillation** : oscillation that continues without change. ★ oscillation entretenue → *oscillation 8.* R установившееся колебание. D eingeschwungene Schwingung. E oscilación en regimen permanente. I oscillazione stabile. N stationaire trilling. P drganie ustalone. S stationär periodisk svängning. (801)
18. **subspan oscillation** : the periodic motion of one or more sub-conductors predominantly in a horizontal plane, of intermediate frequency of the order of a few Hz and amplitude of the order of the conductor spacing in the bundle. ★ oscillation de sous-portée → *oscillation 6.* R субколебания. D Teilfeldschwingung. E vibración de sub-vano. I oscillazione di sub-campata. N deelveldslingering. P drgania (przewodu) odcinkowe. S delspannssvängning. (466)
19. **transient oscillation** : oscillation that results from a change in external excitation. ★ oscillation transitoire → *oscillation 13.* R неустановившееся колебание. D Ausgleichsschwingungen. E oscilación transitoria. I oscillazione transitoria. N in(uit)slingerverschijnsel. P drganie przejściowe. S transient svängning. (801)

oscillator

1. **master oscillator** : an oscillator used to generate a generally sinusoidal oscillation having a frequency of high stability and accuracy. ★ (oscillateur) pilote → *pilote 13.* R задающий генератор. D Hauptoszillator. E oscilador piloto. I oscillatore pilota. N moeder-oscillator. P oscylator wzorcowy. S referensoscillator. (702)
2. **oscillator** : a device producing alternating current whose frequency is determined by the characteristics of the device. ★ oscillateur → *oscillateur 1.* R генератор колебаний. D Oszillator. E oscilador. I oscillatore. N oscillator. P generator (drgań); oscylator. S oscillator. (151,702)
3. **oven controlled crystal oscillator** (*Syn.* OCXO) : a crystal controlled oscillator in which at least the piezoelectric resonator is temperature controlled. ★ oscillateur à quartz à enceinte à température régulée → *oscillateur 3.* R термостатированный кварцевый генератор; ГКТС. D temperaturstabilisierter Quarz-Oszillator. E oscilador de cuarzo en recinto de temperatura regulada. I oscillatore a quarzo in forno regolato. N kristaloscillator met temperatuurregeling. P generator kwarcowy termostatowany. S temperaturstyrd kristalloscillator. (561)
4. **overtone controlled oscillator** : an oscillator designed to operate with the controlling piezoelectric resonator functioning in a specified mechanical overtone order of vibration. ★ oscillateur à quartz à mode partiel → *oscillateur 4.* R гармониковый кварцевый генератор. D Oberton-Quarz-Oszillator. E oscilador de cuarzo controlado por armónicos. I oscillatore a quarzo di modo parziale. N oscillator met boventoonregeling. P generator kwarcowy z rezonatorem nadpodstawowym. S övertonsoscillator. (561)
5. **relaxation oscillator** : a generator of periodic non sinusoidal oscillations using a succession of two aperiodic regularly alternating phenomena generally of widely different durations, for example the charge and discharge of a capacitor. ★ oscillateur à relaxation → *oscillateur 7.* R релаксационный генератор. D Kipp-Oszillator. E oscilador de relajación. I oscillatore a rilassamento. N relaxatie-oscillator. P oscylator relaksacyjny. S vipposcillator. (702)
6. **simple packaged crystal oscillator** (*Syn.* SPXO) : a crystal controlled oscillator having no means of temperature control or compensation, exhibiting a frequency/temperature characteristic determined substantially by the piezoelectric resonator employed. ★ oscillateur à quartz simple en boîtier → *oscillateur 6.* R простой кварцевый генератор в корпусе; ГКП. D einfacher Quarz-Oszillator. E oscilador de cuarzo simple en caja. I oscillatore a quarzo semplice in contenitore. N gewone kristaloscillator. P generator kwarcowy prosty w obudowie. S klockoscillator. (561)
7. **temperature compensated crystal oscillator** (*Syn.* TCXO) : a crystal controlled oscillator whose frequency deviation due to temperature is reduced by means of a compensation system, incorporated in the device. ★ oscillateur à quartz à compensation de température → *oscillateur 2.* R термокомпенсированный кварцевый генератор; ГКТК. D temperaturkompensierter Quarz-Oszillator. E oscilador de cuarzo con compensación de temperatura. I oscillatore a quarzo a compensazione di temperatura; pilota compensato in temperatura; PCT. N kristaloscillator met temperatuurcompensatie. P generator kwarcowy termokompensowany. S temperaturkompenserad kristalloscillator. (561)
8. **voltage controlled crystal oscillator** (*Syn.* VCXO) : a crystal controlled oscillator, the frequency of which can be deviated or modulated according to a specified relation, by application of a control voltage. ★ oscillateur à quartz commandé par une tension → *oscillateur 5.* R управляемый напряжением кварцевый генератор; ГКУН. D spannungsgesteuerter Quarz-Oszillator. E oscilador de cuarzo controlado por una tensión. I oscillatore a quarzo comandato da una tensione. N kristaloscillator met spanningsregeling. P generator kwarcowy sterowany napięciem. S spänningsstyrd kristalloscillator. (561)

oscillograph

1. **oscillograph** : an instrument intended to record, in the form of a permanent trace, instantaneous values of a quantity. ★ oscillographe → *oscillographe 1.* R осциллограф. D Oszillograph. E oscilógrafo. I oscillografo. N oscillograaf. P oscylograf. S oscillograf. (301)
2. **oscillograph tube** (*Syn.* oscilloscope tube) : → *tube 61*

oscilloscope

1. **(electron beam) oscilloscope** : an instrument for measurement or observation purposes which uses the deflection of one or more electron beams to produce a display which represents the instantaneous values or functions of varying quantities, one of them, in general, being time. ★ oscilloscope (cathodique) → *oscilloscope 4.* R осциллограф (электроннолучевой). D (Elektronenstrahl)Oszilloskop. E osciloscopio (catódico). I oscilloscopio (a raggi catodici). N (elektronenstraal)oscilloscoop. P oscyloskop (elektroniczny). S katodstråleoscilloskop. (303)
2. **measuring oscilloscope** : an oscilloscope which, by means of scales and/or calibrated switch positions associated with the controls of deflection and time coefficients, is suitable for measuring with specified error limits. ★ oscilloscope de mesurage → *oscilloscope 5.* R измерительный осциллограф. D Messoszilloskop. E osciloscopio de medida; osciloscopio de medición. I oscilloscopio di misura. N meetoscilloscoop. P oscyloskop pomiarowy. S mätoscilloskop. (303)
3. **observation oscilloscope** : an oscilloscope which is only suitable for the qualitative observation of varying quantities, with unspecified error limits. ★ oscilloscope d'observation → *oscilloscope 7.* R осциллографический индикатор. D Beobachtungsoszilloskop. E osciloscopio de observación. I oscilloscopio d'osservazione. N oscilloscoop. P oscyloskop obserwacyjny. S observationsoscilloskop. (303)
4. **oscilloscope** : an instrument intended to show, in the form of a transitory trace, instantaneous values of a quantity. ★ oscilloscope → *oscilloscope 1.* R осциллоскоп. D Oszilloskop. E osciloscopio. I oscilloscopio. N oscilloscoop. P oscyloskop. S oscilloskop. (301)
5. **oscilloscope tube** : → *tube 61*
6. **sampling oscilloscope** : an oscilloscope which employs signal sampling together with means for constructing a coherent display from the samples taken. ★ oscilloscope à échantillonnage → *oscilloscope 2.* R стробоскопический осциллограф. D Abtastoszilloskop; Samplingoszilloskop. E osciloscopio de muestro. I oscilloscopio campionatore. N bemonsteringsoscilloscoop. P oscyloskop próbkujący. S samplingoscilloskop. (303)
7. **storage oscilloscope** : an oscilloscope which retains information via a means other than normal persistance of the screen. ★ oscilloscope à mémoire → *oscilloscope 3.* R запоминающий осциллограф. D Speicheroszilloskop. E osciloscopio de memoria. I oscilloscopio a memoria. N geheugenoscilloscoop. P oscyloskop pamięciowy. S minnesoscilloskop. (303)

OTDR

1. **OTDR** (*Syn.* optical time domain reflectometry) : → *reflectometry 1*

outage

1. **outage** (*Syn.* disabled state) : → *state 9*
2. **outage** (*Syn.* unavailability) : the state of an item of being unable to perform its required function. ★ indisponibilité → *indisponibilité 9.* R неготовность элемента энергосистемы. D Nichtverfügbarkeit. E indisponibilidad. I indisponibilità. N niet-beschikbaarheid. P niedyspozycyjność. S driftavbrott. (603)
3. **outage duration** (*Syn.* down duration) : → *duration 9*
4. **outage rate** : → *rate 63*
5. **planned outage** (*Syn.* scheduled outage) : outage due to the programmed taking out of service of an item. ★ indisponibilité programmée → *indisponibilité 16.* R плановый перерыв в работе. D geplante Nichtverfügbarkeit. E indisponibilidad programada. I indisponibilità programmata. N voorziene niet-beschikbaarheid. P odstawienie planowe. S planerat avbrott. (603)

out-band

1. **out-band signalling** : → *signalling 29*

outdoor

1. **outdoor bushing** : → *bushing 12*
2. **outdoor post insulator** : → *insulator 22*
3. **outdoor substation** : → *substation 18*
4. **outdoor switchgear and controlgear** : → *switchgear 5*

outdoor-immersed

1. **outdoor-immersed bushing** : → *bushing 13*

outdoor-indoor

1. **outdoor-indoor bushing** : → *bushing 14*

outer

1. **outer diameter of the recorded surface** : → *diameter 14*
2. **outer terminal** : → *terminal 24*
3. **weight per metre run between outer axles** : → *weight 5*

outgoing

1. **direct outgoing selection** : → *selection 5*
2. **outgoing** : pertaining to traffic at a port of a device or network to indicate that the direction of the call set-up is from that port to another point. ★ sortant → *sortant 3.* R исходящий. D gehend; abgehend. E saliente. I uscente. N uitgaand. P wychodzący. S utgående. (714)
3. **outgoing circuit** : → *circuit 129*
4. **outgoing feeder** : → *feeder 16*
5. **outgoing only terminal** : → *terminal 25*
6. **outgoing traffic** : → *traffic 14*
7. **splitting of the outgoing line** : → *splitting 4*

outlet

1. **cable outlet** (*Syn.* cable adaptor) : → *adaptor 2*
2. **looped system outlet** : a device through which the spur feeder passes and to which is connected a receiver lead, without the use of a subscriber's feeder. ★ sortie directe → *sortie 41.* R абонентская розетка проходных систем. (723)
3. **outlet** : port through which the outgoing traffic leaves a switching stage or a switching matrix. ★ sortie → *sortie 38.* R выход. D Ausgang; Abnehmer. E salida. I uscita. N uitgang. P wyjście. S utgång. (714)
4. **outlet nut** : an accessory which secures the cable outlet to the body of the connector. ★ écrou de sortie de câble → *écrou 2.* R гайка кожуха. D Kabelausgangs-Überwurfmutter. E tuerca de salida de cable. I dado di uscita del cavo. N wartelmoer. P nakrętka dławikowa. S kabelmuffmutter. (581)
5. **subscriber's outlet** : device to allow connection of the subscriber's equipment to a subscriber's feeder or directly to a spur feeder. *Notes. 1* — The outlet may be multiple. *2* — The outlet may include other equipment such as filters, programme selectors, etc. ★ prise (d'usager) → *prise 32.* R абонентская розетка. (723)
6. **system outlet** : a point on a network line to which one or more subscribers outlets may be connected. ★ arrivée de réseau → *arrivée 2.* R конечная точка распределительной сети. (723)

outline

1. **outline effect** : → *effect 49*
2. **(outline) marker light** : → *light 50*

out-of-area

1. **out-of-area subscriber's line** : → *line 118*

out-of-band

1. **out-of-band emission** : → *emission 20*

out-of-frame-alignment

1. **out-of-frame-alignment time** : → *time 126*

out-of-step

1. **out-of-step operation** : → *operation 45*

output

1. **asymmetrical output** : a three terminal output circuit where the nominal values of the impedances between the common terminal and each of the other two terminals are different. *Note.* — The common terminals of the input and the output need not necessarily both be accessible, nor need they be at the same potential. ★ sortie asymétrique → *sortie 39.* R несимметричный выход. D unsymmetrischer Ausgang. E salida asimétrica. I uscita asimmetrica. N asymmetrische uitgang. P wyjście asymetryczne. S osymmetrisk utgång. (303)
2. **balanced output** (*Syn.* symmetrical output) : → *output 68*
3. **continuous output (of an internal combustion engine)** (*Syn.* continuous power (of an internal combustion engine)) : → *power 26*
4. **dimensional output** : the product of the maximum voltage and the hourly rated current of a main generator, notwithstanding the fact that it may be impossible to obtain these values simultaneously. ★ puissance de dimensionnement → *puissance 86.* R условная типовая мощность. D Dimensionierungsleistung. E potencia de dimensionamiento. I potenza di dimensionamento. N dimensionaal vermogen; ontwerpvermogen. P moc projektowa teoretyczna. S typeffekt. (811)
5. **downward light output ratio** : → *ratio 32*
6. **earthed output** (*Syn.* grounded output (USA); single-ended output) : an output circuit in which one output terminal is directly connected to measuring earth. In many cases, this is the common point terminal. ★ circuit de sortie à la terre de mesure → *circuit de sortie 2.* R заземленный выход. D geerdeter Ausgang. E circuito de salida con tierra de medida. I uscita sbilanciata. N eenzijdig geaarde uitgang. P wyjście doziemne. S jordad utgång. (303)
7. **effective induction area of the output loop** : → *area 18*
8. **effectively conducting output circuit** : → *circuit 66*
9. **effectively non-conducting output circuit** : → *circuit 67*
10. **floating output** : an output circuit which is isolated from the frame, from the supply source and from any of the externally accessible circuit terminals. ★ circuit de sortie flottant → *circuit de sortie 5.* R «плавающий» (изолированный) выход. D erdfreier Ausgang. E circuito de salida flotante. I uscita fluttuante. N zwevende uitgang. P wyjście o potencjale nieokreślonym. S flytande utgång. (303)
11. **gross output of a power station** : the electrical power produced at the terminals of the main and auxiliary generators of a power station. ★ puissance produite brute par une centrale → *puissance 144.* R суммарная нагрузка генераторов электростанции. D Bruttoleistung eines Kraftwerks. E potencia producida bruta por una central. I potenza lorda di una centrale. N bruto afgifte van een elektrische centrale. P moc brutto elektrowni. S bruttostationseffekt. (602)
12. **gross output of a set** : the electrical power produced at the terminals of the main and auxiliary generator of the set. ★ puissance produite brute par un groupe → *puissance 143.* R нагрузка генератора. D Bruttoleistung eines Generatorsatzes. E potencia producida bruta por un grupo. I potenza lorda di un gruppo. N bruto afgifte van een opwekeenheid. P moc brutto zespołu prądotwórczego. S bruttoaggregateffekt. (602)
13. **grounded output** (*Syn.* earthed output) : → *output 6*

14. **input and output with isolated common point** : → *input 16*
15. **international rated output** (*Syn.* standard power (of an internal combustion engine)) : the useful output an engine is capable of developing in type-test conditions on a specified duty cycle, corrected to standard atmospheric conditions (pressure-charged engines excepted). ★ puissance nominale internationale (d'un moteur à combustion interne) → *puissance 138.* R международная номинальная мощность; стандартная мощность (двигателя внутреннего сгорания). D internationale Bemessungsleistung einer Verbrennungskraftmaschine. E potencia nominal internacional (de un motor de combustión interna). I potenza nominale internazionale (d'un motore a combustione interna). N nominaal vermogen. P moc maksymalna standardowa międzynarodowa (silnika). S internationell märkeffekt. (811)
16. **light output ratio** : → *ratio 49*
17. **limiting continuous current of an output circuit** : → *current 117*
18. **limiting short-time current of an output circuit** : → *current 119*
19. **matched output voltage** : → *voltage 106*
20. **maximum output** : the maximum output the motors are able to produce under any condition of normal operation at rated voltage, typically that at the end of the starting period. ★ puissance maximale → *puissance 123.* R максимальная мощность. D größte Leistung. E potencia máxima. I potenza massima. N maximale vermogen. P moc maksymalna. S maximal uteffekt. (811)
21. **maximum output level** : → *level 58*
22. **maximum output power** : → *power 81*
23. **maximum service output (of an internal combustion engine)** : the maximum useful output which an engine can develop in service taking into account the particular conditions of operation e.g. ambient temperature, atmospheric pressure, load cycle, etc. ★ puissance maximale (d'utilisation) en service (d'un moteur à combustion interne) → *puissance 129.* R максимальная полезная мощность в эксплуатации (двигателя внутреннего сгорания). D maximale Betriebsleistung an der Welle einer Verbrennungskraftmaschine. E potencia máxima (de utilización) en servicio (de un motor de combustión interna). I potenza massima disponibile (d'un motore a combustione interna). N maximaal dienstvermogen. P moc maksymalna eksploatacyjna (silnika). S maximal uteffekt. (811)
24. **minimum safe output of the unit** : the power level below which a unit cannot be maintained in continuous service without risk to, at least, one of its components. ★ marche au minimum technique d'une tranche → *marche 14.* R технический минимум нагрузки агрегата. D Betrieb eines Blockes mit Mindestleistung. E funcionamiento al mínimo técnico de un grupo; marcha al mínimo técnico de un grupo. I marcia al minimo tecnico di una unità. N minimaal veilig bedrijf van een opwekeenheid. P praca bloku przy minimum technicznym. S lägsta tillåtna blockeffekt. (602)
25. **net output of a power station** : the gross output less the power consumed by the associated auxiliaries and less the losses in the associated transformers. ★ puissance produite nette par une centrale → *puissance 146.* R нагрузка электростанции. D Nettoleistung eines Kraftwerks. E potencia producida neta por una central. I potenza netta di una centrale. N netto afgifte van een elektrische centrale. P moc netto elektrowni. S nettostationseffekt. (602)
26. **net output of a set** : the gross output less the power consumed by the associated auxiliaries. ★ puissance produite nette par un groupe → *puissance 145.* R нагрузка агрегата. D Nettoleistung eines Generatorsatzes. E potencia producida neta por un grupo. I potenza netta di un gruppo. N netto afgifte van een opwekeenheid. P moc netto zespołu prądotwórczego. S nettoaggregateffekt. (602)
27. **optical light output ratio** : → *ratio 64*
28. **optimum output power** : → *power 95*
29. **output** : a qualifying term applied to quantities (voltage, current, impedance, ...) or to components (terminals, leads, ...) which are associated with the delivery of power or signals. ★ de sortie → *sortie 12.* R выход. D Ausgangs-. E de salida. I uscita. N uitgangs-. P wyjściowy. S ut; utgång. (151)
30. **output** : 1. of a generator: the useful active electrical power measured at its terminals. 2. Of a motor: the useful mechanical power measured at its shaft. ★ puissance utile → *puissance 162.* R отдаваемая мощность. D Wirkleistungsabgabe. E potencia útil. I potenza utile. N afgegeven vermogen; nuttig vermogen. P moc wydawana. S avgiven effekt. (411)
31. **output** (for a detector of optical radiation) : physical quantity yielded by a detector in response to an optical input. *Note.* — This quantity, usually electrical, may for example be current, voltage or a change in resistance ; the output may also be chemical, as in a photographic film or an actinometer, or mechanical as in a Golay detector. ★ réponse → *réponse 22.* R выходная величина (приёмника оптического излучения). D Ausgangsgröße (eines Empfängers optischer Strahlung). E respuesta del detector. I segnale di uscita. N transductoruitvoer. P wielkość wyjściowa (odbiornika). S utsignal. (845)
32. **output admittance** : → *admittance 12*
33. **output angle** (*Syn.* radiation angle) : → *angle 48*
34. **output at the draw-bar** : the output developed at the draw-bar of the vehicle. *Note.* — It is obtained by multiplying the draw-bar pull by the speed of the vehicle. ★ puissance au crochet → *puissance 73.* R мощность на сцепке. D Leistung am Zughaken. E potencia en el gancho. I potenza al gancio. N vermogen aan de trekhaak. P moc na haku. S dragkrokseffekt. (811)
35. **output at the wheel rim** : the output developed at the driving axles by the traction motors taking into account the overall efficiency of the transmission system. *Note.* — It is obtained by multiplying the tractive effort by the speed of the vehicle. ★ puissance à la jante → *puissance 52.* R мощность на ободе колеса. D Leistung am Radumfang. E potencia en la llanta. I potenza ai cerchioni. N vermogen aan de wielomtrek. P moc na obwodzie kół. S effekt vid hjulperiferi. (811)
36. **output break circuit** : → *circuit 130*
37. **output cable** : → *cable 52*
38. **output circuit** : → *circuit 131*
39. **output current** : → *current 135*
40. **output immittance of a two-port network** : → *immittance 7*
41. **output impedance** : → *impedance 44*
42. **output impedance** : → *impedance 45*
43. **output impedance** : → *impedance 46*
44. **output level** : → *level 62*
45. **output level instability** : → *instability 4*
46. **output make circuit** : → *circuit 132*
47. **output of a motor vehicle** : the total output developed at the traction motor shafts. ★ puissance d'un véhicule moteur → *puissance 110.* R мощность тяговой единицы подвижного состава. D Leistung eines Triebfahrzeuges. E potencia de un vehículo motor. I potenza d'un veicolo motore. N krachtvoertuigvermogen. P moc pojazdu silnikowego. S motoraxeleffekt. (811)
48. **output power** : → *power 96*
49. **output power** : → *power 97*
50. **output power control** : → *control 133*
51. **output signal (of a transmission system)** : → *signal 137*
52. **output state** : → *state 28*
53. **output terminals of a network** : → *terminal 26*
54. **output variable** : → *variable 5*
55. **output voltage** : → *voltage 136*
56. **overload output (of an internal combustion engine)** (*Syn.* overload power (of an internal combustion engine)) : → *power 99*
57. **peak pulse output power** : → *power 100*
58. **power output of a high voltage generator** : conventionally the product VIf expressed in watts or kilowatts where V is the peak value of the high voltage output, I is the average value of the output current and f is a coefficient depending on the waveform of the current and the voltage. ★ puissance d'un groupe radiogène → *puissance 109.* R выходная мощность высоковольтного генератора. D Leistungsabgabe eines Röntgengenerators. E potencial de salida de un generador de rayos X. I potenza di uscita di un generatore di alta tensione. N uitgangsvermogen van een hoogspanningsgenerator. P moc wyjściowa generatora wysokiego napięcia. S generatoreffekt. (881)

59. **pulse output power** : → *power 152*
60. **rated output** (of an instrument transformer) : the value of the apparent power at a specified power factor which the instrument transformer is intended to supply to the secondary circuit at the rated secondary current (or voltage) and with rated burden connected to it. ★ puissance de sortie assignée → *puissance 96.* R номинальная мощность (измерительного трансформатора). D Bemessungsleistung (eines Meßwandlers). E potencia de salida asignada (de un transformador de medida). I potenza nominale (di un trasformatore di misura); potenza di precisione. N toegekend afgegeven schijnbaar vermogen (van een meettransformator). P moc znamionowa (przekładnika). S märkuteffekt (för mättransformator). (321)
61. **rated output** : the value of the output included in the rating. ★ puissance nominale → *puissance 136.* R номинальная отдаваемая мощность. D Nennleistung. E potencia nominal. I potenza nominale. N nominaal (afgegeven) vermogen. P moc wydawana znamionowa. S märkeffekt. (411)
62. **rated output of a capacitor** : the reactive power for which the capacitor has been designed. ★ puissance assignée d'un condensateur → *puissance 71.* R номинальная мощность конденсатора. D Nennleistung eines Kondensators. E potencia asignada de un condensador. I potenza nominale di un condensatore. N toegekend vermogen van een condensator (Q_N). P moc znamionowa kondensatora. S märkeffekt. (436)
63. **single-ended output** (*Syn.* earthed output) : → *output 6*
64. **specific output** (*Syn.* power-to-mass ratio) : the continuous rated traction output of a train unit divided by its gross mass in working order. ★ puissance massique → *puissance 122.* R удельная мощность; мощность на единицу массы. D spezifische Leistung. E potencia específica. I potenza massica. N vermogen per gewichtseenheid; specifiek vermogen. P moc jednostkowa (odniesiona do masy). S specifik effekt. (811)
65. **stabilized output characteristic** : → *characteristic 82*
66. **static relay with output contact** : → *relay 42*
67. **static relay without output contact** : → *relay 43*
68. **symmetrical output** (*Syn.* balanced output) : a three terminal output circuit where the nominal values of the impedances between the common terminal and each of the other two terminals are equal. *Note.* — The common terminals of the input and the output need not necessarily both be accessible, nor need they be at the same potential. ★ sortie symétrique → *sortie 42.* R симметричный выход; сбалансированный выход. D symmetrischer Ausgang. E salida simétrica. I uscita simmetrica; uscita bilanciata. N symmetrische uitgang. P wyjście symetryczne. S symmetrisk utgång; balanserad utgång. (303)
69. **traction output (of a thermo-electric vehicle)** : the output absorbed only by the traction motors and the exciter for the main generator or alternator. ★ puissance de traction (d'un véhicule thermoélectrique) → *puissance 102.* R тяговая мощность (теплоэлектрического подвижного состава). D Traktionsleistung eines thermo-elektrischen Fahrzeugs. E potencia de tracción (de un vehículo termoeléctrico). I potenza di trazione (d'un veicolo termoelettrico). N tractievermogen (van een verbrandingsmotor). P moc trakcyjna (pojazdu). S traktionseffekt. (811)
70. **useful output power** : → *power 200*
71. **useful service output** (*Syn.* net brake power (of an internal combustion engine)) : the power measured at the engine driving shaft for propelling the vehicle and driving the auxiliary machines not essential for the running of the engine, including cooling fans but not including the power for driving essential auxiliaries, e.g. fuel, oil and water pumps, pressure charger, etc. ★ puissance utile en service (d'un moteur à combustion interne) → *puissance 163.* R полезная мощность в эксплуатации; полезная тормозная мощность (двигателя внутреннего сгорания). D nutzbare Betriebsleistung an der Welle einer Verbrennungskraftmaschine. E potencia útil en servicio (de un motor de combustión interna). I potenza disponibile (d'un motore a combustione interna). N nuttig dienstvermogen. P moc użytkowa (silnika). S användbar uteffekt. (811)
72. **welding output connections** : → *connection 62*

output-break

1. **closing time of a output-break circuit** : → *time 26*
2. **opening time of a output-break circuit** : → *time 119*

output-make

1. **closing time of a output-make circuit** : → *time 27*
2. **opening time of a output-make circuit** : → *time 120*

outside

1. **outside broadcast** : → *broadcast 9*
2. **outside broadcast equipment** : → *equipment 54*
3. **outside broadcast vehicle** : → *vehicle 18*

out-slot

1. **out-slot signalling** : → *signalling 30*

oven

1. **dielectric heating oven** : a dielectric heating appliance having a heating chamber. ★ four à chauffage diélectrique → *four 11.* R печь с диэлектрическим нагревом. D dielektrischer Erwärmungsofen. E horno de calentamiento dieléctrico. I forno a riscaldamento dielettrico. N diëlektrische oven. P piec pojemnościowy. S dielektrisk värmningsugn. (841)
2. **electrode oven** : a heated receptable in which covered electrodes can be dried or dry-stored in a specified manner. ★ étuve pour électrodes → *étuve 3.* R печь для сушки электродов. D Elektrodentrockenofen. E estufa para electrodos. I forno per elettrodi. N droogoven. P suszarka elektrod. S elektrodugn. (851)
3. **indirect resistance oven** (*Syn.* indirect resistance kiln; indirect resistance furnace) : a resistance furnace in which the heat is generated by heating elements and transferred by conduction, convection and radiation to the material to be heated. ★ four à chauffage indirect par résistance → *four 14.* R печь сопротивления косвенного нагрева. D Ofen zur indirekten Widerstandserwärmung. E horno de calentamiento indirecto por resistencia. I forno a riscaldamento indiretto a resistenza. N indirecte weerstandsoven. P piec rezystancyjny pośredni. S indirekt motståndsugn. (841)
4. **infra-red oven** : an infra-red heating appliance comprising a heating chamber and emitters. ★ four à (rayonnement) infrarouge → *four 31.* R печь с инфракрасным нагревом. D Infrarotofen. E horno de infrarrojos. I forno a (raggi) infrarossi. N infraroodoven. P piec promiennikowy. S infraugn. (841)
5. **microwave oven** : a microwave heating appliance comprising a heating chamber. ★ four à chauffage hyperfréquence → *four 13.* R печь для нагрева токами сверхвысокой частоты. D Mikrowellenofen. E horno de microondas. I forno a microonde. N microgolfoven. P piec mikrofalowy. S mikrovågsugn. (841)
6. **oven controlled crystal oscillator** : → *oscillator 3*

overall

1. **overall channel unbalance** : → *unbalance 1*
2. **overall frequency tolerance** : → *tolerance 12*
3. **overall response time** : → *response time 2*
4. **overall transfer time** : → *time 127*

overcast

1. **CIE standard overcast sky** : → *sky 2*

overcharge

1. **overcharge (of a cell or battery)** : continued charging after the full charge of a cell or battery. ★ surcharge (d'un accumulateur) → *surcharge 13.* R перезаряд (вторичного химического источника тока). D Überladung. E sobrecarga (de un elemento o batería). I sovraccarica. N overladen. P przeładowanie. S överladdning. (486)

over-compounded

1. **over-compounded** : applied to a compound generator to denote that the series winding is so proportioned that the terminal voltage at rated load is greater than at no load. ★ génératrice à excitation hypercompound → *générateur 32.* R генератор перекомпаундированного возбуждения. D Generator mit Über-Verbunderregung. E generador con excitación «hipercompound». I generatore ad eccitazione sovracompensata. N overgecompoundeerde machine. P prądnica z przewzbudzeniem szeregowym. S överkompounderad. (411)

overcurrent

1. **definite time-delay over-current release** : → *release 4*
2. **direct over-current release** : → *release 5*
3. **indirect over-current release** : → *release 10*
4. **inverse time-delay over-current release** : → *release 12*
5. **overcurrent** : any current exceeding the rated value. For conductors, the rated value is the current carrying capacity. ★ surintensité → *surintensité 4.* R сверхток. D Überstrom. E sobreintensidad. I sovracorrente. N overstroom. P przeciążalność. S överström. (151,441,826)
6. **overcurrent blocking device** : → *device 39*
7. **overcurrent detection** : → *detection 11*
8. **over-current discrimination** : → *discrimination 4*
9. **overcurrent relay** : → *relay 24*
10. **over-current release** : → *release 15*

overcutting

1. **overcutting** (with gramophone records) : a fault caused by an excessive level during recording and characterized by one groove cutting in an adjacent one. ★ chevauchement → *chevauchement 2.* R перерезание. D Rillenanschneidung. E sobrecorte. I accavallamento. N oversnijding. P przesterowanie rowka. S överskärning. (806)

overflow

1. **overflow** : a condition which occurs when the numerical value of the output information exceeds the maximum value which can be displayed or represented. ★ dépassement → *dépassement 3.* R переполнение. D Überlauf. E exceso. I traboccamento. N ..... P nadmiar. S spill. (303)
2. **overflow** (in telegraphy) : redirection by the network of calls or messages to a designated position when a connection to the called position cannot be established, with a view to a later retransmission. ★ débordement → *débordement 2.* R сброс избыточной нагрузки (в телеграфии). D Überlauf (in der Telegrafie). E desbordamiento (en telegrafía). I trabocco. N overloop (bij telegrafie). P przekierowanie (w telegrafii). S spill. (721)
3. **overflow meter** : → *meter 37*
4. **overflow position** : → *position 20*
5. **overflow route** : → *route 4*
6. **overflow traffic** : → *traffic 15*

overhang

1. **overhang packing** : → *packing 2*
2. **winding overhang** : that portion of a winding extending beyond the ends of the core. ★ tête de bobine → *bobine 40.* R лобовая часть обмотки. D Wickelkopf. E cabeza de bobina. I sporgenza. N spoelkoppen. P połączenia czołowe. S härvändar. (411)
3. **winding overhang support** : → *support 33*
4. **winding overhang support insulation** : → *insulation 58*

overhead

1. **circuit (of an overhead line)** : → *circuit 23*
2. **conductor (of an overhead line)** : → *conductor 21*
3. **overhead conductor rail** : → *rail 11*
4. **overhead contact line** : → *line 119*
5. **overhead contact line with catenary suspension** : → *line 120*
6. **overhead contact line with longitudinal suspension** (*Syn.* overhead contact line with catenary suspension) : → *line 120*
7. **overhead crossing** : → *crossing 2*
8. **overhead digits** (*Syn.* service digits) : → *digit 26*
9. **overhead earth wire** : → *wire 17*
10. **overhead ground wire** (*Syn.* earth wire) : → *wire 6*
11. **overhead ground wire peak** (*Syn.* earth wire peak) : → *peak 6*
12. **overhead line** : → *line 122*
13. **overhead system** : → *system 135*
14. **section (of an overhead line)** : → *section 22*
15. **structure (of an overhead line)** (*Syn.* support) : → *support 24*

overlap

1. **angle of overlap** : → *angle 7*
2. **band overlap** : a part of the frequency range common to two adjacent frequency bands (thereby ensuring continuity of the measuring range). ★ recouvrement → *recouvrement 3.* R перекрытие поддиапазонов. D Bandüberlappung. E recubrimiento. I sovraposizione delle bande. N bandoverlapping. P zachodzenie pasm. S bandöverlappning. (303)
3. **insulated overlap** : a sectioning point formed by overlapping the ends of adjacent sections of contact line, allowing parallel running, insulation being provided by a suitable air gap between the two sets of equipment. ★ sectionnement à lame d'air → *sectionnement 11.* R секционирование воздушным промежутком. D Streckentrennung. E seccionamiento por lámina de aire. I sezionamento a spazio d'aria. N overnameveld van een openspaninrichting. P punkt sekcjonowania izolowany (zakładkowy). S ..... (811)
4. **overlap** (*Syn.* differential gap) : → *gap 3*
5. **overlap** (in facsimile) : a defect in facsimile reproduction due to the fact that the width of the scanning line is greater than the scanning pitch or that the latter is irregular. ★ chevauchement → *chevauchement 1.* R перекрытие; нахлестка. D überlappen (bei Faksimile). E recubrimiento; solape; superposición. I accavallamento. N overlap (bij facsimile). P zachodzenie linii. S överlappning. (721)
6. **overlap angle** : → *angle 44*
7. **overlap signalling** : → *signalling 31*

overlay

1. **colour separation overlay** (*Syn.* chromakey) : → *chromakey 1*
2. **overlay** : the substitution of part of a picture by another picture using masking. *Examples :* inset, colour separation overlay. ★ incrustation → *incrustation 1.* R электронная рирпроекция; рирпроекция. (723)
3. **overlay equipment** : → *equipment 55*

overline

1. **overline service** : → *service 14*

overload

1. **magnetic overload release** : → *release 14*
2. **overload** (as a noun) : the excess of actual load over full load. *Note.* — The term "overload" should not be used as a synonym for overcurrent. ★ surcharge → *surcharge 11.* R перегрузка. D Überbelastung; Überlast. E sobrecarga. I sovraccarico. N overbelasting. P przeciążenie. S överlast. (151)
3. **overload** : operating conditions in an electrically undamaged circuit, which cause an over-current. ★ surcharge → *surcharge 12.* R перегрузка. D Überlast. E sobrecarga. I sovraccarico. N overbelasting. P przeciążenie; prąd przeciążeniowy. S överlast. (441)
4. **overload capacity** : → *capacity 21*
5. **overload characteristics** : → *characteristic 62*
6. **overload current** : → *current 136*
7. **overload distortion** : → *distortion 56*
8. **overload factor** : → *factor 126*
9. **overload output (of an internal combustion engine)** (*Syn.* overload power (of an internal combustion engine)) : → *power 99*
10. **overload power (of an internal combustion engine)** : → *power 99*
11. **overload protection system** : → *system 136*
12. **overload release** : → *release 16*
13. **slope overload distortion** : → *distortion 64*
14. **thermal overload release** : → *release 31*

overmodulation

1. **overmodulation** : the condition in which some peak values of the modulating signal exceed the maximum value permitted by the system or the equipment considered. *Note.* — In full carrier amplitude modulation, the maximum value is that corresponding to a 100 % modulation factor. ★ surmodulation → *surmodulation 1.* R перемодуляция. D Übermodulation. E sobremodulación. I sovramodulazione. N overmodulatie. P przemodulowanie. S övermodulering. (702)

overplay

1. **overplay** (in television) : production of a television programme sequence in which the artists act their parts guided by the sounds which they have prerecorded, played through a loudspeaker. ★ surjeu → *surjeu 1.* **R** переигровка (в телевидении); дублирование. (723)

overpressure

1. **overpressure disconnector for a capacitor** : → *disconnector 8*

overreach

1. **blocking overreach distance protection system** : → *system 18*
2. **permissive overreach distance protection system** : → *system 141*

overreaching

1. **overreaching (for a distance protection system)** : the condition of a distance protection system when the shortest zone setting corresponds to an equivalent distance longer than the length of the protected circuit. ★ zone étendue (pour un système de protection de distance) → *zone 46.* **R** расширенная зона (для системы дистанционной защиты). **D** Überreichweite eines Distanzschutzsystems (Übergreifen). **E** zona ampliada (para un sistema de protección de distancia). **I** zona estesa (per un dispositivo di protezione a distanza). **N** verlengd meetgebied. **P** strefa wydłużona (zabezpieczenia odległościowego). **S** överräckning (för distansskyddssystem). (448)

override

1. **in local override** : a facility of the network to override a terminal working in local, for the purpose of connecting an incoming call to that terminal. ★ priorité sur le fonctionnement en local → *priorité 4.* **R** приоритет над местным режимом. **D** Priorität gegenüber Lokalbetrieb. **E** prioridad sobre el funcionamiento en local. **I** priorità su funzionamento in locale. **N** ..... **P** priorytet nad pracą lokalną. **S** lokalt åsidosättande. (721)
2. **override** (*Syn.* intrusion) : → *intrusion 1*

overscanning

1. **overscanning** : excessive line and/or field sweep amplitude of the line scan or field scan relative to the nominal value resulting in the disappearance of picture edges if the phenomenon is in the display, or in the appearance of the surrounds of the active area of the image sensor if the phenomenon occurs at the source. ★ surbalayage → *surbalayage 1.* **R** чрезмерная развертка. (723)

oversheath

1. **oversheath** : a non-metallic sheath applied over a metallic covering, constituting outermost sheath of the cable. ★ gaine externe → *gaine 17.* **R** защитная оболочка. **D** Schutzhülle. **E** cubierta exterior. **I** guaina esterna. **N** buitenmantel. **P** osłona. **S** yttermantel. (461)

overshoot

1. **overshoot** (for a step change) : difference between the extreme transient indicated value and the steady state value in response to a step change of the measured quantity. ★ dépassement → *dépassement 2.* **R** переброс (при скачкообразном изменении). **D** Überschwingen. **E** exceso (para una respuesta a un escalón). **I** sovraelongazione (per una funzione gradino). **N** doorschot. **P** wyskok (od zmiany skokowej); przelot. **S** översväng. (301)
2. **overshoot** : for a step response, the maximum transient deviation from the final steady state value of the output variable, expressed in per cent of the difference between the final and the original steady-state values. ★ taux de dépassement → *taux 11.* **R** перерегулирование. **D** Überschwingweite. **E** sobreexceso; tasa de exceso. **I** sovraoscillazione. **N** doorzwaai; doorslag; doorschot. **P** przeregulowanie. **S** översvängning. (351)
3. **overshoot** (*Syn.* transient overshoot) : a transient phenomenon caused by a sudden variation of a signal at the input of a two-port device and characterized by a temporary exaggeration of the values of the output signal above the steady state value that it should reach, generally followed by a damped oscillation around this steady state value. *Note.* — An overshoot may affect a step transition such as the leading edge or trailing edge of a pulse. ★ suroscillation → *suroscillation 1.* **R** выброс. **D** Überschwingen; Transienten-Überschwingen. **E** sobremodulación. **I** sovraelongazione (oscillatoria). **N** doorschot; overgangsdoorschot. **P** wyskok. **S** översväng. (702)
4. **transient overshoot** (*Syn.* overshoot) : → *overshoot 3*

overspeed

1. **overspeed** (of a rotating electric machine) : the maximum rotational speed to which traction motors and rotating machines forming part of the electrical equipment are subjected on the test bed to check their mechanical strength. ★ vitesse d'emballement → *vitesse 74.* **R** разгонная скорость (вращающейся электрической машины). **D** Schleuderdrehzahl. **E** velocidad de embalamiento. **I** velocità massima di prova. **N** overtoerental. **P** prędkość obrotowa nadmierna. **S** rusningsvarvtal. (811)
2. **overspeed** (of an internal combustion engine) : the maximum speed to which an internal combustion engine is subjected on the test-bed, under specified conditions. ★ vitesse de pointe → *vitesse 66.* **R** предельная скорость (двигателя внутреннего сгорания). **D** Höchstdrehzahl der Verbrennungskraftmaschine. **E** velocidad de punta. **I** velocità massima di prova. **N** overtoerental (van een thermo-elektrisch voertuig). **P** prędkość szczytowa. **S** rusningsvarvtal. (811)
3. **overspeed device** : → *device 40*
4. **overspeed test** : → *test 57*

over-synchronous

1. **over-synchronous braking** : → *braking 34*

overtone

1. **overtone controlled oscillator** : → *oscillator 4*
2. **overtone frequency** : → *frequency 143*
3. **overtone order** : → *order 5*

over-travel

1. **over-travel** : the distance between the operating position and the total travel position. ★ sur-course → *sur-course 2.* **R** ход дополнительный. **D** Nachlaufweg. **E** sobrecarrera. **I** sovracorsa. **N** ingeschakelde naloopweg. **P** droga dodatkowa. **S** överrörelse. (581)
2. **total over-travel force** : → *force 33*

overvoltage

1. **external overvoltage** : a temporary or transient overvoltage occurring in the system and resulting from an atmospheric discharge or from an induction phenomenon. ★ surtension externe → *surtension 15.* **R** внешнее перенапряжение. **D** äußere Überspannung. **E** sobretensión externa. **I** sovratensione esterna. **N** uitwendig opgewekte overspanning. **P** przepięcie zewnętrzne. **S** yttre överspänning. (604)
2. **internal overvoltage** : a temporary or transient overvoltage in the system, resulting from switching or from a fault in the system itself. ★ surtension interne → *surtension 16.* **R** внутреннее перенапряжение. **D** innere Überspannung. **E** sobretensión interna. **I** sovratensione interna. **N** inwendig opgewekte overspanning. **P** przepięcie wewnętrzne. **S** inre överspänning. (604)
3. **lightning overvoltage** : a transient overvoltage, the shape of which can be regarded for insulation coordination purposes as similar to that of the standard lightning impulse. ★ surtension de (type) foudre → *surtension 13.* **R** атмосферное перенапряжение. **D** Blitzüberspannung. **E** sobretensión de (tipo) rayo. **I** sovratensione atmosferica. **N** bliksemoverspanning. **P** przepięcie piorunowe. **S** åsköverspänning. (604)
4. **over-voltage** : a voltage of a value exceeding the highest rated value. ★ surtension → *surtension 9.* **R** перенапряжение. **D** Überspannung. **E** sobretensión. **I** sovratensione. **N** overspanning. **P** przepięcie. **S** överspänning. (151)
5. **overvoltage** (of a Geiger-Müller counter tube) : the difference between the operating voltage and the Geiger-Müller threshold. ★ surtension → *surtension 10.* **R** перенапряжение (счетчика Гейгера-Мюллера). **D** Überspannung (eines Auslösezählrohres). **E** sobretensión (de un tubo contador Geiger-Müller). **I** sovratensione (di un tubo contatore di Geiger-Müller). **N** overspanning (v.e. geiger-müller-telbuis). **P** różnica pomiędzy napięciem pracy i napięciem progowym (w liczniku G-M). **S** överspänning (för GM-rör). (391)

6. **overvoltage (in a system)** : any voltage between one phase and earth or between phases having a peak value exceeding the corresponding peak of the highest voltage for the equipment. ★ surtension (dans un réseau) → *surtension 11.* R перенапряжение в электрической сети. D Überspannung. E sobretensión (en una red). I sovratensione (in una rete). N overspanning (in een net). P przepięcie (w systemie). S överspänning. (604)
7. **overvoltage protector** : → *protector 3*
8. **overvoltage protector of a capacitor** : → *protector 4*
9. **overvoltage relay** : → *relay 26*
10. **phase-to-earth overvoltage per unit** : the ratio of the peak value of a phase-to-earth overvoltage to the phase-to-earth peak value of the voltage corresponding to the highest voltage for equipment expressed in p.u. ★ valeur relative d'une surtension phase-terre → *valeur 75.* R кратность фазного перенапряжения. D relative Außenleiter-Erde-Überspannung. E valor relativo de una sobretensión fase-tierra. I valore relativo di una sovratensione fase-terra. N relatieve ovespanning tussen fase en aarde. P watość względna przepięcia faza-ziemia. S överspänning mellan fas och jord uttryckt i relativtal. (604)
11. **phase-to-phase overvoltage per unit** : the ratio of the peak value of a phase-to-phase overvoltage to the phase-to-earth peak value of the voltage corresponding to the highest voltage for equipment expressed in p.u. ★ valeur relative d'une surtension entre phases → *valeur 74.* R кратность междуфазного перенапряжения. D relative Außenleiter-Überspannung. E valor relativo de una sobretensión entre fases. I valore relativo di una sovratensione tra fasi. N relatieve overspanning tussen de fasen. P wartość względna przepięcia międzyfazowego. S överspänning mellan faser uttryckt i relativtal. (604)
12. **resonant overvoltage** : overvoltage resulting from a resonant oscillation sustained within the supply system. ★ surtension de résonance → *surtension 12.* R резонансое перенапряжения. D Resonanzüberspannung. E sobretensión de resonancia. I sovratensione di risonanza. N resonantieoverspanning. P przepięcie rezonansowe. S resonansöverspänning. (604)
13. **switching overvoltage** : a transient overvoltage, the shape of which can be regarded for insulation coordination purposes as similar to that of the standard switching impulse. ★ surtension de (type) manœuvre → *surtension 14.* R коммутационное перенапряжение. D Schaltüberspannung. E sobretensión de (tipo) maniobra. I sovratensione di manovra. N schakeloverspanning. P przepięcie łączeniowe. S kopplingsöverspänning. (604)
14. **temporary overvoltage** : an oscillatory overvoltage (at power frequency) at a given location, of relatively long duration and which is undamped or weakly damped. *Note.* — Temporary overvoltages usually originate from switching operations or faults (e.g. sudden load rejection, single-phase faults) and/or from non-linearities (ferroresonance effects, harmonics). ★ surtension temporaire → *surtension 17.* R квазиустановившееся перенапряжение. D zeitweilige Überspannung. E sobretensión temporal. I sovratensione a frequenza industriale. N oscillerende overspanning van langere duur. P przepięcie długotrwałe wolnozmienne. S temporär överspänning. (604)
15. **transient overvoltage** : a short duration overvoltage of few milliseconds or less, oscillatory or non-oscillatory, usually highly damped. ★ surtension transitoire → *surtension 18.* R перенапряжение переходного процесса. D transiente Überspannung. E sobretensión transitoria. I sovratensione transitoria. N transiënte overspanning. P przepięcie krótkotrwałe. S transient överspänning. (604)

OWF

1. **OWF** (*Syn.* optimum working frequency) : → *frequency 141*

owned

1. **private owned circuit** (*Syn.* private circuit) : → *circuit 144*

oxidation

1. **(electrochemical) oxidation** (*Syn.* anodic reaction) : → *reaction 1*
2. **oxidation** : a reaction removing electrons from atoms, molecules or ions. ★ oxydation → *oxydation 2.* R окисление. D Oxidation. E oxidación. I ossidazione. N oxidatie. P utlenianie. S oxidation. (111)
3. **oxidation inhibitor** (*Syn.* antioxidant) : → *antioxidant 1*
4. **oxidation stability** : → *stability 10*

oxide

1. **oxide cathode** (*Syn.* oxide-coated cathode) : → *cathode 28*
2. **oxide shedding** : → *shedding 2*

oxide-coated

1. **oxide-coated cathode** : → *cathode 28*

oxidizing

1. **oxidizing atmosphere** : → *atmosphere 11*

oxy-arc

1. **oxy-arc cutting electrode** : → *electrode 75*

P

PABX

1. **PABX** (*Syn.* private automatic branch exchange) : → *exchange 16*

pack

1. **plate pack** : an assembly of the positive and negative plate groups with separators. ★ bloc de plaques → *bloc 5.* R блок пластин. D Plattenblock. E bloque de placas. I pacco di piastre. N platenpakket. P zestaw płyt (akumulatorowych). S plattpaket. (486)
2. **to pack** : to store data in a compact form in a storage medium by taking advantage of known characteristics of the data and of the storage medium, in such a way that the original form of the data can be recovered. *Example :* To make use of bit or byte locations that would otherwise go unused. ★ condenser → *condenser 1.* R упаковывать. D packen. E empaquetar. I compattare. N samenpakken. P pakietować (informacje). S packa. (714)

packaged

1. **simple packaged crystal oscillator** : → *oscillator 6*

packet

1. **packet** : a sequence of digital data representing a message or part of a message together with service digits including an address, organized to suit the transmission process and transmitted as a whole. ★ paquet → *paquet 8.* R пакет. D Paket. E paquete. I pacchetto. N pakket. P pakiet. S (data)paket. (721)
2. **packet assembly** : → *assembly 18*
3. **packet disassembly** : → *disassembly 1*
4. **packet format** : → *format 3*
5. **packet mode terminal** : → *terminal 27*
6. **packet sequencing** : → *sequencing 2*
7. **packet switched network** : → *network 64*
8. **packet switching** : → *switching 36*

packing

1. **call packing** (USA) : a method of selecting a new switching path by rearranging the existing connections in a more favourable manner. ★ reconfiguration d'itinéraire → *reconfiguration 1.* R изменение конфигурации маршрута. D ..... E reconfiguración de itinerario. I riconfigurazione del percorsi. N ..... P upakowanie (połączenia). S ..... (714)
2. **overhang packing** : insulation inserted in the winding overhang to provide spacing and bracing. ★ calage de tête de bobine → *calage 3.* R распорка в лобовой части обмотки. D Wickelkopf-Distanzstücke. E separador de cabeza de bobina. I distanziatori di testata. N afstandhouder (tussen de spoelkoppen). P wstawka dystansowa czół. S härvändsmellanlägg. (411)
3. **packing fraction** : → *fraction 5*
4. **slot packing** : additional insulation used to pack embedded coil sides to ensure a tight fit in the slots. ★ bourrage d'encoche → *bourrage 2.* R уплотнение паза. D Nutenbeilage (Nutenfüllstück). E relleno de ranura. I spessoramento di cava. N gleufopvulling; groefoprulling. P wykładzina żłobkowa. S spårutfyllnad. (411)

P-action

1. **P-action** (*Syn.* proportional action) : → *proportional-action 1*

pad

1. **cleat (in a pad and chimney foundation)** : → *cleat 1*
2. **decadic key pad** (*Syn.* decadic push-button) : a key pad which produces the same signals as a rotary dial. ★ clavier à émission décimale → *clavier 3.* R импульсный кнопочный номеронабиратель. D Impulswahl-Tastenwahlblock. E teclado decimal. I tastiera decadica. N impulsdruktoetskieseenheid. P klawiatura dekadowa impulsowa. S impulsgivande knappsats. (722)
3. **heating resistance pad** (*Syn.* heating resistance mat; heating resistance collar) : a heating element constituted of wire woven into sheet or special shapes, for example wrapping around flasks, vessels or pipework. ★ enveloppe chauffante → *enveloppe 16.* R нагреватель сопротивления в форме подушки, мата или воротника. D Heizformteil, Heizmatte und Heizbandage. E envolvente de calentamiento. I involucro riscaldante. N (weerstands)verwarmingskussen; - mat of - kraag. P powłoka rezystancyjna; mata rezystancyjna. S värmeduk. (841)
4. **key pad** (*Syn.* push-button dial) : dial consisting of an array of push-buttons the operation of which produces the calling signals. ★ clavier → *clavier 1.* R кнопочный номеронабиратель. D Tastenwahlblock. E teclado (telefónico) (de numeración). I tastiera (di selezione). N druktoetskieseenheid. P klawiatura wybiórcza. S knappsats. (722)
5. **key pad (telephone) set** (*Syn.* push-button (telephone) set) : → *set 38*
6. **multifrequency key pad** (*Syn.* frequency push-button dial) : a key pad which produces signals of specified frequencies. ★ clavier multifréquence → *clavier 8.* R многочастотный кнопочный номеронабиратель. D Mehrfrequenz-Tastenwahlblock. E teclado multifrecuencia. I tastiera multifrequenza. N toondruktoetskieseenheid. P klawiatura częstotliwościowa. S tonvalsknappsats. (722)
7. **pad and chimney foundation** : → *foundation 6*
8. **pad attenuator** : → *attenuator 13*
9. **pad (of a foundation)** : the wide portion of a foundation, embedded in the soil to ensure proper distribution of the load (see fig. 4.8). ★ dalle (d'une fondation) → *dalle 2.* R плита (фундамента). D Grundplatte (einer Pilzgründung). E zapata. I piastra (di una fondazione); soletta (di una fondazione). N funderingsplaat. P stopa (fundamentu). S platta. (466)
10. **pad type bearing** : → *bearing 24*
11. **reinforcing rods (in a pad and chimney foundation)** : → *rod 13*
12. **tilting pad bearing** : → *bearing 36*

paddy

1. **paddy lamp** : → *lamp 43*

page

1. **page teleprinter** : → *teleprinter 1*

pain

1. **normal threshold of pain** : → *threshold 11*
2. **threshold of pain** : → *threshold 26*

pair

1. **average energy expended per ion pair formed** : → *energy 5*
2. **coaxial pair** : a uniform transmission line consisting of two cylindrical conductors with the same axis. ★ paire coaxiale → *paire 4.* R коаксиальная пара. D koaxiales Paar. E por coaxial. I coppia coassiale. N coaxiaal paar. P tor współosiowy. S koaxialledning. (704)
3. **(electron) pair production** : → *production 1*
4. **electron-positron pair** : → *electron-positron 1*
5. **manufacture's spare pair** : an extra cable pair provided by the cable manufacturer to replace a defective normal pair in order to keep the cable consistent within its technical specification. ★ paire de réserve → *paire 10.* R заводская резервная пара. D (Herstellungs-)Reservepaar. E par de reserva. I coppia di scorta. N reserve-aders. P pary kablowe rezerwowe. S extrapar. (722)
6. **mass attenuation coefficient (pair production)** : → *coefficient 34*
7. **mean energy expended in a gas per ion pair formed** : → *energy 62*
8. **music pair** (*Syn.* programme line) : → *line 127*

9. **pair gain system** : → *system 139*
10. **pair of anti-parallel arms** : → *arm 9*
11. **pair of arms** : → *arm 10*
12. **plate pair** (of a battery) (*Syn.* plate couple) : a sub-assembly of a secondary cell consisting of one positive plate and one negative plate. ★ couple → *couple 2.* R пара пластин. D Plattenpaar eines Akkumulators. E par de placas (de una baretía). I coppia (di piastre di un accumulatore). N platenpaar (van een batterij). P para płyt. S plattpar. (486)
13. **short-circuit impedance of a pair of windings** : → *impedance 53*
14. **sound pair** (*Syn.* programme line) : → *line 127*
15. **spare pair** : a cable pair in the local line network, left unterminated at one or both ends and held in reserve for future use. ★ paire d'ascension → *paire 5.* R свободая пара. D Vorratspaar. E par de repuesto. I coppia derivata. N vrije aders. P pary kablowe zapasowe. S reservpar. (722)
16. **symmetric pair** : a uniform transmission line consisting of two identical metallic conductors, symmetrically arranged in relation to earth and to other circuits. ★ paire symétrique → *paire 12.* R симметричная пара. D symmetrisches Paar. E por simétrico. I coppia simmetrica. N symmetrisch paar. P tor symetryczny. S parledning. (704)
17. **tapping voltage ratio (of a pair of windings)** : → *ratio 99*
18. **terminal pair** (*Syn.* port) : → *port 4*

paired-disparity

1. **paired-disparity code** : → *code 41*

pairing

1. **line pairing** (*Syn.* twinning) : imperfect interlacing of the scanning lines. ★ pairage → *pairage 1.* R слипание строк. (723)

PAL

1. **PAL** (*Syn.* PAL (colour television) system) : → *system 140*
2. **PAL (colour television) system** : → *system 140*

PAM

1. **PAM** (*Syn.* pulse amplitude modulation) : → *modulation 49*

pan

1. **pan charger** : → *charger 5*
2. **pantograph pan** (*Syn.* pantograph head) : → *head 23*

pancake

1. **pancake inductor** : → *inductor 19*

panel

1. **bat-wing panel** : a panel whose radiating elements are made up of bat-wing antennas. ★ panneau de papillons → *panneau 8.* R Ж-образное полотно. D Schmetterlings-Strahlerfeld. E panel de mariposa. I pannello di antenne a farfalla. N vlindervormig paneel. P panel motylkowy. S fjärilsslitspanel. (712)
2. **electroluminescent panel** : luminous panel in which the light is produced by electroluminescence. ★ plaque électroluminescente → *plaque 22.* R электролюминесцентная панель. D Elektrolumineszenz-leuchtplatte. E placa electroluminiscente. I pannello elettroluminescente. N elektroluminescentiepaneel. P panel elektroluminescencyjny. S elektroluminiscent platta. (845)
3. **infra-red ceramic panel emitter** : → *emitter 8*
4. **infra-red glass panel emitter** : → *emitter 11*
5. **infra-red radiation panel** : a panel construction housing one or more infra-red emitters the whole of which radiates on to a charge. ★ panneau à rayonnement infrarouge → *panneau 4.* R панель инфракрасного излучения. D Infrarotflächenstrahler. E panel de radiación infrarroja. I pannello a raggi infrarossi. N (infrarood)stralingspaneel. P promiennik płytowy. S infrastrålningspanel. (841)
6. **K panel** (*Syn.* K bracing) : → *bracing 2*
7. **panel** (of radiating elements) : a rigid assembly consisting of an array of radiating elements supported by a reflecting plane. ★ panneau → *panneau 2.* R полотно (излучающих элементов). D Strahlerfeld. E panel (de elementos radiantes). I pannello (di elementi irradianti). N veld (van stralende elementen). P panel (elementów promieniujących). S antennpanel. (712)
8. **panel cut-out** : → *cut-out 1*
9. **panel form bias-cut fabric** : → *fabric 4*
10. **panel of radiating dipoles** : a panel whose radiating elements are dipoles. ★ panneau de doublets → *panneau 7.* R полотно симметричных вибраторов. D Dipolfeld; Dipolstrahlerfeld. E panel de dipolos radiantes. I pannello di dipoli. N veld van stralende dipolen. P panel dipoli promieniujących. S dipolpanel. (712)
11. **panel point** (*Syn.* node) : → *node 5*
12. **panel seal** : → *seal 12*
13. **slotted cylinder panel** : a panel whose radiating elements are made up of slotted cylinder antennas. ★ panneau cylindre à fentes → *panneau 5.* R щелевое цилиндрическое полотно. D Schlitzzylinder-Strahlerfeld. E panel de cilindros ranurados. I pannello a cilindri a fessura. N cilindrisch sleufpaneel. P panel cylindrów ze szczelinami. S cylinderslitspanel. (712)
14. **slotted panel** : a panel whose radiating elements are made up of slot antennas. ★ panneau à fentes → *panneau 3.* R щелевое полотно. D Schlitzstrahlerfeld. E panel ranurado. I pannello a fessura. N sleufpaneel. P panel szczelinowy. S slitspanel. (712)

pantograph

1. **pantograph** : apparatus for collecting current from one or more contact wires, formed of a hinged device designed to allow vertical movement of the pantograph head. ★ pantographe → *pantographe 6.* R пантограф. D Scheren- oder Einholmstromabnehmer. E pantógrafo. I (presa di corrente a) pantografo. N pantograaf. P pantograf; odbierak nożycowy. S strömavtagare för kontaktledning. (811)
2. **pantograph adherence pressure** (*Syn.* pantograph contact pressure) : → *pressure 12*
3. **pantograph bounce** : → *bounce 4*
4. **pantograph clearance gauge** : → *gauge 4*
5. **pantograph contact pressure** : → *pressure 12*
6. **pantograph control mechanism** (*Syn.* pantograph cylinder) : → *cylinder 3*
7. **pantograph cylinder** : → *cylinder 3*
8. **pantograph damper** : → *damper 2*
9. **pantograph dropping device** : → *device 41*
10. **pantograph head** : → *head 23*
11. **pantograph pan** (*Syn.* pantograph head) : → *head 23*
12. **pantograph sway** : → *sway 1*

paper

1. **cellulosic paper** : paper made from cellulose fibres. ★ papier cellulosique → *papier 6.* R целлюлозная бумага. D Zellulosepapier. E papel celulósico. I carta cellulosica. N cellulosepapier. P papier celulozowy. S cellulosapapper. (212)
2. **cotton paper** : paper made entirely from cotton or cotton linters. ★ papier de coton → *papier 9.* R хлопковая бумага. D Baumwollpapier. E papel de algodón. I carta di cotone. N lompenpapier. P papier bawełniany. S bomullspapper. (212)
3. **crepe paper** : paper that has been subjected to creping . ★ papier crêpé → *papier 8.* R крепированная бумага. D Kreppapier. E papel crepado; papel corrugado. I carta crespata. N crêpepapier. P papier marszczony. S krăppapper. (212)
4. **electrolytic capacitor paper** : cellulosic paper of high porosity, intended for containing the electrolyte in an electrolytic capacitor. ★ papier électrolytique (pour condensateurs) → *papier 10.* R электролитическая конденсаторная бумага. D Elektrolyt-Kondensatorpapier. E papel para condensadores electrolíticos. I carta elettrolitica (per condensatori). N papier voor elektrolytische condensatoren. P papier kondensatorowy nasiąkliwy. S elektrolytkondensatorpapper. (212)
5. **greaseproof (paper)** : paper free from mechanical pulp, having a high resistance to penetration by grease or fats. This resistance is obtained by intensive mechanical treatment during stock preparation. ★ papier ingraissable → *papier 11.* R жиронепроницаемая бумага. D fettdichtes Papier. E papel antigrasa. I carta ingrassabile. N vetvrij papier. P papier tłuszczoodporny. S fettavvisande papper. (212)

6. **impregnated paper insulation** : → *insulation 19*
7. **Japanese tissue paper** : lightweight cellulosic paper characterized by long fibres and high tensile strength in the machine direction. ★ papier japon → *papier 12.* R японская бумага. D Japanseidenpapier; Japanpapier. E papel japón. I carta giapponese. N zijdepapier; Japans papier. P bibuła japońska. S japanpapper. (212)
8. **kraft capacitor paper** : a lightweight kraft paper usually of high density, and high chemical purity obtained by thorough washing of the pulp. ★ papier kraft condensateur → *papier 14.* R конденсаторная крафтбумага. D Kraft-Kondensatorpapier. E papel kraft para condensadores. I carta Kraft per condensatori. N kraftcondensatorpapier. P papier kondensatorowy. S kondensatorpapper. (212)
9. **kraft paper** : paper made almost entirely from pulp of high mechanical strength, manufactured from soft-wood by the sulphate process. ★ papier kraft → *papier 13.* R крафтбумага. D Kraft-Papier. E papel kraft. I carta Kraft. N kraftpapier. P papier "kraft". S kraftpapper. (212)
10. **manila/kraft-mixture paper** : paper made from manila hemp fibre with the addition of soft-wood pulp manufactured by the sulphate process. ★ papier manille-kraft → *papier 16.* R манильская крафтбумага. D Manila/Kraft-Mischpapierung. E papel mixto manila-kraft. I carta manila Kraft. N manilla/kraftpapier. P papier "manila-kraft". S ..... (212)
11. **manila paper** : paper made entirely from manila hemp fibre. ★ papier manille → *papier 15.* R манильская бумага. D Manilapapier. E papel manila. I carta manila. N manillapapier. P papier "manila". S manillapapper. (212)
12. **mass-impregnated (paper) insulation** : → *insulation 42*
13. **mica paper** : a paper made entirely of tiny flakes of mica. ★ papier mica → *papier 17.* R слюдяная бумага. D Glimmerpapier. E papel de mica. I carta di mica. N micapapier. P papier mikowy. S glimmerpapper. (212)
14. **paper** : the generic term for a range of materials made in a coherent sheet or sheeting by depositing from a fluid suspension on to a suitable forming device vegetable, animal or synthetic fibres, or mineral fibres or flakes, or their mixtures, with or without the addition of other substances. ★ papier → *papier 5.* R бумага. D Papier. E papel. I carta. N papier. P papier. S papper. (212)
15. **paper board** (*Syn.* board) : → *board 1*
16. **paper capacitor** : → *capacitor 52*
17. **pre-impregnated (paper) insulation** : → *insulation 48*
18. **treated mica paper** : a mica paper with a suitable binder. ★ papier mica traité → *papier 18.* R пропитанная слюдяная бумага. D bindemittelhaltiges Glimmerpapier. E papel de mica tratada. I carta di mica trattata. N geïmpregneerd micapapier. P papier mikowy nasycony. S behandlat glimmerpapper. (212)

parabolic

1. **parabolic cylinder antenna** : → *antenna 85*
2. **parabolic profile** : → *profile 8*
3. **parabolic torus reflector** : → *reflector 13*

paraboloidal

1. **off-set paraboloidal reflector antenna** : → *antenna 83*
2. **paraboloidal reflector** : → *reflector 14*
3. **paraboloidal reflector antenna** : → *antenna 86*

paraffin

1. **paraffin wax** : → *wax 1*

paraffinic

1. **paraffinic insulating oil** : → *oil 13*

parallel

1. **degree of early anisochronous parallel distortion** : → *degree 4*
2. **degree of late anisochronous parallel distortion** : → *degree 10*
3. **parallel cathode heating** : → *heating 47*
4. **parallel cathode preheating** : → *preheating 2*
5. **parallel connection** : → *connection 41*
6. **parallel control devices** : → *device 42*
7. **parallel (digital) transmission** : → *transmission 49*
8. **parallel earth continuity conductor** : → *conductor 52*
9. **parallel operation** : → *operation 46*
10. **parallel operation** : → *operation 47*
11. **parallel resonance frequency** : → *frequency 144*
12. **parallel transductor** : → *transductor 7*
13. **parallel transmission** : → *transmission 50*

paralleling

1. **ideal paralleling** : paralleling by arranging that the conditions of a machine are as close as possible to those of the machine or system with which it is being paralleled. ★ mise en parallèle précise → *mise 8.* R точное включение на параллельную работу. D Feinparallelschalten. E acoplamiento en paralelo preciso. I messa in parallelo precisa. N fijn parallelschakelen. P włączenie równoległe idealne. S sammankoppling efter finjustering. (411)
2. **paralleling** : the process by which a generator is adjusted and connected to run in parallel with another generator or system. *Note.* — This term is deprecated for synchronous generators. ★ mise en parallèle → *mise 6.* R включение на параллельную работу. D Parallelschalten. E acoplamiento en paralelo. I messa in parallelo. N parallelschakelen. P włączenie do pracy równoległej. S sammankoppling. (411)
3. **random paralleling** : paralleling by arranging that the conditions of a machine are of the same order as, but not necessarily as close as possible to, those od the machine or system with which it is being paralleled. ★ mise en parallèle approchée → *mise 7.* R неточное включение на параллельную работу. D angenähertes Parallelschalten. E acoplamiento en paralelo aproximado. I messa in parallelo approssimata. N grof parallelschakelen. P włączenie równoległe pospieszne. S sammankoppling efter grovjustering. (411)
4. **track paralleling cabin** (*Syn.* track sectioning cabin) : → *cabin 2*

parallelism

1. **parallelism** : a section where the exposure is such that the distance between lines does not vary by more than five per cent. ★ parallélisme → *parallélisme 1.* R параллельное расположение линий. D parallele Näherung. E paralelismo. I parallelismo. N evenwijdigheid. P równoległość tras; współbieżność tras. S parallellföring. (604)

parallel-plate

1. **parallel-plate lens** : → *lens 15*

parallel-resonant

1. **parallel-resonant circuit** : → *circuit 133*

parallel-to-serial

1. **parallel-to-serial converter** : → *converter 13*

paralysis

1. **paralysis time** : → *time 128*

paramagnetic

1. **paramagnetic substance** : → *substance 8*

paramagnetism

1. **paramagnetism** : a phenomenon by which the magnetic moments of neighbouring atoms in a substance are thermally disordered so that in the absence of an externally applied magnetic field they have no alignment, but when subjected to such a field acquire a degree of alignment in the direction of that field. ★ paramagnétisme → *paramagnétisme 1.* R парамагнетизм. D Paramagnetismus. E paramagnetismo. I paramagnetismo. N paramagnetisme. P paramagnetyzm. S paramagnetism. (121)

parameter

1. **complex parameter** : complex quantity representing a real quantity which varies sinusoidally with time (such as sound pressure, vibration velocity, voltage), or the quotient of two such complex quantities of the same frequency, which can be expressed in the form $(a+jb)$ with real part a and imaginary part b, or as a phasor $Ae^{j\theta}$ with modulus A and argument θ. *Notes. 1* — Throughout this section, all parameters (mechanical, acoustic, or electric) are considered to be complex, unless specified otherwise. *2* — The convention of $+j$ is observed here, whereby a positive-going sine wave is represented by

$$R_e\,(e^{j(\omega t - kx)})$$

a mass reactance by $+ j\omega M$, and a stiffness reactance by $-jS/\omega$. Wave number $k = \omega/c$ is the quotient of angular frequency ω by speed of sound c; mass M; stiffness S. ★ **grandeur complexe** → *grandeur 10.* R комплексный параметр. D komplexer Parameter. E magnitud compleja. I parametro complesso. N complexe systeemgrootheid. P parametr zespolony. S komplex parameter. (801)

2. **core hysteresis parameter** (*Syn.* core factor C_2) : → *factor 30*
3. **core inductance parameter** (*Syn.* core factor C_1) : → *factor 29*
4. **material dispersion parameter** (M) : the quantity which characterizes the material dispersion defined as :

$$M(\lambda) = -\frac{1}{c}\frac{dN}{d\lambda} = \frac{\lambda\, d^2n}{c\, d\lambda^2}$$

where n is the refractive index, N is the group index, λ is the wavelength in vacuum, and c is the velocity of light in vacuum. *Notes. 1* — For many optical fibre materials, M is zero at a specific wavelength λ_0, usually around 1300 nm. The sign convention is such that M is positive for wavelengths shorter than λ_0 and negative for wavelengths longer than λ_0. *2* — Pulse broadening caused by material dispersion in a unit length of optical fibre is give by M times spectral linewidth ($\Delta\lambda$), except at or near $\lambda = \lambda_0$, where terms proportional to $(\Delta\lambda)^2$ are important. ★ coefficient de dispersion du matériau → *coefficient 33.* R параметр дисперсии в материале. D Materialdispersions-Parameter. E parámetro de dispersión del material. I parametro di dispersione di materiale. N materiaaldispersie-parameter. P parametr dyspersji materiałowej. S materialdispersionsparameter. (731)

5. **parameter** : a variable that is given a constant value for a specified application and that may denote the application. ★ paramètre → *paramètre 1.* R параметр. D Parameter. E parámetro. I parametro. N parameter. P parametr. S parameter. (714)
6. **profile dispersion parameter** (P) : the quantity which characterizes that part of profile dispersion due to a variation of refractive index contrast with wavelength given by :

$$P(\lambda) = \frac{n_1\, \lambda\, d\Delta}{N_1\, \Delta\, d\lambda}$$

where n_1 is the maximum refractive index of the core, N_1 is the group index corresponding to n_1 calculated from the formula :

$$N_1 = n_1 = \lambda\,(dn_1/d\lambda)$$

Δ is the refractive index contrast, λ is the wavelength in vacuum. ★ facteur de dispersion de profil → *facteur 74.* R параметр дисперсии профиля. D Profildispersions-Parameter. E parámetro de dispersión del perfil. I parametro di dispersione di profilo. N (brekingsindex-) dispersieparameter. P parametr dyspersji profilu. S profildispersionsparameter. (731)

7. **profile parameter** (g) : the parameter defining the shape of a power-law index profile. *Note.* — α has often been used in place of g but is deprecated. ★ paramètre de profil → *paramètre 3.* R параметр профиля. D Profilparameter. E parámetro del perfil. I parametro di profilo. N (brekingsindex)profielparameter. P parametr profilu. S profilparameter. (731)
8. **scattering parameter** (*Syn.* scattering coefficient) (S_{ij}) : an element of a scattering matrix *Note.* — The subscripts j and i of a typical scattering parameter S_{ij} refer to the input and output ports respectively. ★ facteur de répartition → *facteur 152.* R коэффициент рассеяния (символ); коэффициент рассеяния. D Streuparameter; Streukoeffizient. E parámetro de distribución; coeficiente de distribución. I parametro di diffusione. N verstrooiingsparameter. P współczynnik rozproszenia (symbol). S spridningsparameter; S-parameter. (726)
9. **system parameters** (*Syn.* system constants) : the quantities considered as being fixed and which characterize the system components. *Examples :* impedance, admittance, transformation ratio. ★ paramètres d'un réseau → *paramètre 8.* R параметр электрической сети. D Netzparameter; Netzkonstanten. E parámetros de una red; constantes de una red. I parametri di una rete; costanti di una rete. N systeemparameters; systeemconstanten. P parametry stałe systemu elektroenergetycznego. S konstanta storheter. (603)

parasitic

1. **parasitic element** : → *element 35*
2. **parasitic oscillation** : → *oscillation 13*

paraxial

1. **paraxial ray** : → *ray 17*

parcel

1. **traffic parcel** (*Syn.* point-to-point traffic) : the traffic from a particular origin to a particular destination. ★ courant de trafic → *courant 105.* D Punkt-zu-Punkt-Verkehr. P strumień ruchu. (715)

PARD

1. **PARD** (*Syn.* periodic and/or random deviation) : → *deviation 15*

parent

1. **parent station** (*Syn.* main station) : → *station 16*

parity

1. **event parity check** : → *check 9*
2. **odd parity check** : → *check 10*
3. **parity code** : → *code 42*
4. **parity digit** : → *digit 25*

parked

1. **parked** (*Syn.* unavailable (USA)) : pertaining to a non-active network terminal when it cannot be used for a call until it has been restored to the quiescent state, usually by a return-to-normal action by the user. ★ en faux-appel → *faux-appel 1.* R недоступный. D nichtverfuegbar. E estacionado; en falsa llamada. I in condizione di incapsulamento; in condizione di permanente. N niet beschikbaar; in de afwerpstand. P zaparkowany; w stanie szczególnym. S parkerad. (714)

parking

1. **parking brake** : → *brake 22*
2. **parking light** : → *light 51*

part

1. **allowance for rotating parts** : → *allowance 1*
2. **conductive part** : a part which is capable of conducting current although it may not necessary be used for carrying service current. ★ partie conductrice → *partie 5.* R токопроводящая часть. D leitfähiges Teil. E parte conductora. I parte conduttrice; massa. N geleidend deel. P część przewodząca. S ledande del. (441)
3. **exposed conductive part** : a conductive part which can readily be touched and which is not normally alive, but which may become alive under fault conditions. *Note.* — Typical exposed conductive parts are walls of enclosures, operating handles, etc. ★ masse → *masse 10.* R открытая токопроводящая часть. D berührbares (inaktives) leitfähiges Teil. E masa; parte conductora accesible. I parte conduttrice accessibile. N aanraakbaar geleidend deel. P część bierna przewodząca dostępna. S utsatt del. (441,826)
4. **extraneous conductive part** : a conductive part not forming part of the electrical installation and liable to propagate a potential, including earth potential. ★ élément conducteur (étranger à l'installation électrique) → *élément 12.* R сторонняя проводящая часть. D fremdes leitfähiges Teil. E elemento conductor (extraño a la instalación eléctrica). I massa estranea. N vreemd geleidend deel. P część przewodząca obca. S ledande del ej tillhörande elinstallationen. (826)
5. **live part** : any conductor or conductive part intended to be energized in normal use, including a neutral conductor but, by convention, not a PEN conductor. *Note.* — This term does not necessarily imply a risk of electric shock. ★ partie active → *partie 3.* R токоведущая часть. D aktives Teil. E parte activa. I parte attiva. N actief deel. P część czynna. S spänningsförande del. (826)
6. **message transfer part** : the part of a common-channel signalling system which transfers signal messages as required by all the users, and which performs the necessary subsidiary functions, for example error control and signalling security. ★ sous-système transport de messages → *sous-système 1.*

R часть передачи сообщений. D Nachrichtentransferteil. E subsistema de transporte de mensajes. I sottosistema di trasferimento dei messaggi. N berichtenoverdrachtsdeel. P część informacyjna. S meddelandeöverföringsdel. (714)

7. **radial operation (of a part of a network)** : → *operation 56*
8. **removable part** (of an assembly) : a part of an assembly that may be removed entirely from the assembly and replaced even though the main circuit is alive. ★ partie amovible → *partie 4.* R выдвижная отделяемая часть (комплекта). D herausnhembarer Teil; herausnehmbarer Einschub. E parte desmontable (de un conjunto). I parte mobile (di un complesso). N wegneembaar deel (van een inrichting). P człon ruchomy (pola dwuczłonowego). S borttagbar del. (441)
9. **ring operation of a part of a network** : → *operation 57*
10. **service-oriented part** (*Syn.* user part) : → *part 12*
11. **simultaneously accessible parts** : conductors or conductive parts that can be touched simultaneously by a person or where applicable by livestock. *Note.* — Simultaneously accessible parts may be: live parts, exposed conductive parts, extraneous conductive parts, protective conductors, earth electrodes. ★ parties simultanément accessibles → *partie 10.* R части, доступные одновременному прикосновению.... D gleichzeitig berührbare Teile. E partes simultáneamente accesibles. I parti simultaneamente accessibili. N gelijktijdig aanraakbare delen. P części przewodzące jednocześnie dostępne. S samtidigt berörbara delar. (826)
12. **user part** (*Syn.* service-oriented part) : a part of a common-channel signalling system which is permanently assigned to a particular telecommunication service. ★ sous-système utilisateur → *sous-système 2.* R часть пользователя. D Anwenderteil. E subsistema usuario. I sottosistema utilizzatore. N gebruikersdeel. P część użytkowa. S användardel. (714)
13. **withdrawable part** (of an assembly) : a removable part of an assembly that can be moved to one or more positions in which an isolating distance or a segregation between open contacts is established while the part remains mechanically attached to the assembly. *Note.* — The isolating distance or the segregation always relates to the main circuit. It may or may not refer to the auxiliary circuits or to control circuits. ★ partie débrochable → *partie 7.* R выдвижная неотделяемая часть (комплекта). D Trennteil; Trenneinschub. E parte desenchufable (de un conjunto). I parte estraibile (di un complesso). N uittrekbaar deel (van een inrichting). P człon wysuwny (pola dwuczłonowego). S utdragbar del. (441)

partial

1. **partial** : sinusoidal component of a complex sound wave. ★ partiel → *partiel 14.* R тоновая составляющая. D Teilton; Partialton. E parcial. I componente. N deeltoon. P przyton. S delton. (801)
2. **partial body dose** : → *dose 37*
3. **partial coherence** : → *coherence 5*
4. **partial discharge** : → *discharge 28*
5. **partial discharge inception test** : → *test 58*
6. **partial discharge intensity** : → *intensity 12*
7. **partial effective area** : → *area 32*
8. **partial failure** : → *failure 43*
9. **partial fault** : → *fault 63*
10. **partial gain** : → *gain 28*
11. **partial tone reversal** : → *reversal 1*
12. **thermal electrical relay with partial memory function** : → *relay 49*

partially

1. **partially clamped capacitance** : → *capacitance 13*
2. **partially closed user group** : → *group 47*
3. **partially occupied band** : → *band 28*

particle

1. **alpha particle** : a stable particle having the same bound configuration of 2 protons and 2 neutrons as a helium-4 nucleus and emitted during a nuclear disintegration. ★ particule alpha → *particule 12.* R альфа-частица. D Alpha-Teilchen. E partícula alfa. I particella alfa. N alfadeeltje. P cząstka alfa. S alfapartikel. (026,391,881)
2. **beta particle** : an electron, of either positive or negative charge, which has been emitted by an atomic nucleus during a nuclear transformation or which results from the disintegration of a neutron or of an instable particle. ★ particule bêta → *particule 13.* R бета-частица. D Beta-Teilchen. E partícula beta. I particella beta. N bêtadeeltje. P cząstka beta. S betapartikel. (026,391,881)
3. **charged particle equilibrium** : → *equilibrium 1*
4. **directly ionizing particle** : charged particle (electron, proton, alpha particle, etc.), having sufficient kinetic energy to produce ionization by collision. ★ particule directement ionisante → *particule 14.* R непосредственно ионизирующая частица. D direkt ionisierende Teilchen. E partícula directamente ionizante. I particella direttamente ionizzata. N direct ioniserende deeltjes. P cząstka bezpośrednio jonizująca. S direkt joniserande partikel. (391)
5. **directly ionizing particles** (*Syn.* directly ionizing radiation) : → *radiation 19*
6. **elementary particle** : a particle presently considered to be a non-dissociable entity, as distinguished from those which are considered to be assemblies, such as nuclei and ions. Examples are : photons, electrons, protons, neutrons, mesons, baryons. ★ particule élémentaire → *particule 15.* R элементарная частица. D Elementarteilchen. E partícula elemental. I particella elementare. N elementair deeltje. P cząstka elementarna. S elementarpartikel. (881)
7. **indirectly ionizing particle** : uncharged particle (neutron, photon, etc.), which can liberate directly ionizing particles or can initiate a nuclear transformation. ★ particule indirectement ionisante → *particule 16.* R косвенно ионизирующая частица. D indirekt ionisierende Teilchen. E partícula indirectamente ionizante. I particella indirettamente ionizzata. N indirect ioniserende deeltjes. P cząstka pośrednio jonizująca. S indirekt joniserande partikel. (391)
8. **indirectly ionizing particles** (*Syn.* indirectly ionizing radiation) : → *radiation 34*
9. **instantaneous particle acceleration** : → *acceleration 3*
10. **instantaneous particle displacement** : → *displacement 6*
11. **instantaneous particle velocity** : → *velocity 9*
12. **magnetic particle coupling** : → *coupling 32*
13. **neutron or particle current density** : → *current-density 4*
14. **particle** : portion of a medium whose volume has dimensions small compared to the wavelength of the sound. ★ particule → *particule 10.* R частица. D Teilchen; Partikel. E partícula. I particella. N deeltje. P cząstka. S partikel. (801)
15. **particle** : minute portion of matter or energy. ★ particule → *particule 11.* R частица. D Teilchen. E partícula. I particella. N deeltje. P cząstka. S partikel. (881)
16. **(particle) accelerator** : → *accelerator 6*
17. **particle beam** : → *beam 24*
18. **particle displacement** : → *displacement 10*
19. **(particle) energy fluence** : → *fluence 3*
20. **(particle) fluence** : → *fluence 4*
21. **(particle) fluence rate** : → *rate 64*
22. **particle fluence ratemeter** : → *ratemeter 6*
23. **particle flux density** : → *flux density 10*
24. **(particle) flux density** (*Syn.* (particle) fluence rate) : → *rate 64*
25. **particle velocity** : → *velocity 10*
26. **particle velocity level** : → *level 64*
27. **peak particle displacement** : → *displacement 11*
28. **peak particle velocity** : → *velocity 12*

partition

1. **partition** (of an assembly) : a part of an assembly separating one compartment from other compartments. ★ cloison → *cloison 2.* R перегородка (комплекта). D Zwischenwand. E tabique (de un conjunto). I diaframma (di un complesso). N schot (van een inrichting). P przegroda. S mellanvägg; avskärmning. (441)
2. **partition noise** : → *noise 56*

part-winding

1. **part-winding starting** : → *starting 13*

party

1. **called party** (in telecommunication) : a telecommunication network user that is the destination of a call attempt. ★ demandé → *demander 2.* R вызываемый абонент (в электросвязи). D gerufener Teilnehmer. E destinatario (en

telecomunicación); usuario llamado. I (utente) chiamato. N opgeroepene. P użytkownik wywoływany; abonent wywoływany. S anropad part; B-abonnent. (714,722)

2. **called party release** : → *release 1*
3. **calling party** (in telecommunication) : a telecommunication network user initiating a call attempt. ★ demandeur → *demandeur 1.* R вызывающий абонент (в электросвязи). D rufender Teilnehmer. E demandador que llama (en telecomunicación); usuario (en telecomunicación); peticionario. I (utente) chiamante. N oproeper. P użytkownik wywołujący; abonent wywołujący. S anropande part; A-abonnent. (714,722)
4. **calling party release** : → *release 2*
5. **party line** : → *line 123*

pass

1. **pass bandwidth** : → *bandwidth 8*

pass-band

1. **pass-band** : a frequency band throughout which the attenuation is less than a specified value. ★ bande passante → *bande 44.* R полоса пропускания. D Durchlaßband. E banda pasante. I banda passante. N doorgelaten band; doorlaatband. P pasmo przepustowe. S passband. (151,561)
2. **pass-band ripple** : → *ripple 4*

passing

1. **passing contact** : → *contact 94*

passivated

1. **passivated insulating oil** : → *oil 14*

passivation

1. **surface passivation** : the application or growth of a protective layer on the surface of a semiconductor after the formation of regions of P-type, N-type or both. ★ passivation de surface → *passivation 1.* R поверхностная пассивация. D Oberflächenpassivierung. E pasivación de superficie. I passivazione di superficie. N oppervlaktepassivering. P pasywacja powierzchniowa. S ytpassivering. (521)

passivator

1. **passivator** (*Syn.* deactivator) : an additive incorporated in an insulating liquid to improve its oxidation resistance by deactivating solid or dissolved metals which act as oxidation catalysts. ★ passivant → *passivant 1.* R пассиватор. D Passivator; Deaktivator. E pasivante; desactivador. I passivante; deattivatore. N passivator; metaaldeactivator. P pasywator; dezaktywator. S passivator. (212)

passive

1. **passive** : pertaining to an electrical network or device which functions without any source of energy other than the input signals. ★ passif → *passif 4.* R пассивный. D passiv. E pasivo. I passivo. N passief. P bierny; pasywny. S passiv. (702)
2. **passive bus** : → *bus 11*
3. **passive (electric) circuit** : → *circuit 134*
4. **passive (electric) circuit element** : → *circuit element 6*
5. **passive equivalent network** : → *network 65*
6. **passive network** : → *network 66*
7. **passive reflector** : → *reflector 16*
8. **passive sonar** : → *sonar 3*
9. **passive station** : → *station 22*
10. **passive transducer** : → *transducer 10*

passivity

1. **passivity** : the state of a surface of a metal by which its electrochemical corrosion becomes negligible. ★ passivité → *passivité 1.* R пассивность. D Passivität. E pasivado. I passività. N passiviteit. P pasywność. S passivitet. (111)

pasted

1. **pasted plate** : → *plate 15*

patch

1. **patch rods** : → *rod 12*
2. **to patch** : to make an improvised modification. ★ rapiécer → *rapiécer 1.* R делать вставку. D provisorisch korrigieren; einfuegen; flicken. E componer. I inserire modifiche provvisorie. N ..... P modyfikowanie. S lappa. (714)

path

1. **chrominance path** : path followed by the chrominance signal in a piece of television equipment. ★ voie (de) chrominance → *voie 34.* R канал цветности. (723)
2. **coupling path** : the path over which part or all of the electromagnetic energy from a specified source is transferred to another circuit or device. ★ trajet de couplage → *trajet 5.* R путь связи; путь распространения электромагнитной энергии. D Kopplungspfad. E trayecto de acoplamiento. I via di accoppiamento. N koppelpad. P droga sprzężenia. S kopplingsväg. (161)
3. **direct ray path** : a ray path which is straight or slightly curved by refraction in the propagation medium. ★ trajet (radioélectrique) direct → *trajet 11.* D direkter Strahlenweg. P droga promienia bezpośredniego. (705)
4. **electrical path length difference** (*Syn.* path length difference) : → *difference 23*
5. **feedback path** : functional chain linking an output of the controlled system to one input of the relevant comparing element. ★ chaîne de réaction → *chaîne 10.* R цепь обратной связи. D Rückführpfad. E cadena de realimentación. I catena di retroazione. N terugkoppelpad. P tor sprzężenia zwrotnego. S återkoppling(sväg). (351)
6. **forward path** : functional chain linking the output of a comparing element to the output of the controlled system. ★ chaîne d'action → *chaîne 1.* R основная цепь воздействий. D Vorwärtspfad. E cadena de acción. I catena diretta. N commandopad. P tor główny (sterowania). S framväg. (351)
7. **indirect ray path** : the ray path resulting from significant refraction or other phenomena such as reflection, diffraction or scatter occurring on the path. ★ trajet (radioélectrique) indirect → *trajet 12.* D indirekter Strahlenweg. P droga promienia pośredniego. (705)
8. **ionization path** : the trail of ion clusters produced by an ionizing particle in its passage through matter. ★ trajectoire d'ionisation → *trajectoire 1.* R след нонизирующей частицы. D Bahn eines ionisierenden Teilchens. E trayectoria de ionización. I traccia di ionizzazione. N ionisatiespoor. P droga jonizacji. S jonspår. (881)
9. **length of flame path** (*Syn.* length of flameproof joint) : → *length 20*
10. **luminance path** : path followed by the luminance signal in a piece of television equipment. ★ voie (de) luminance → *voie 37.* R канал яркости. (723)
11. **M path** (*Syn.* M reflection) : → *reflection 12*
12. **main feedback path** : feedback path linking the output of the controlled system to one input of the comparing element nearest the input of the controlling system. ★ chaîne de réaction principale → *chaîne 11.* R главная обратная связь. D Hauptrückführpfad. E cadena de realimentación principal. I catena di reazione principale. N hoofd terugkoppelpad. P tor sprzężenia zwrotnego. S huvudåterkoppling(sväg). (351)
13. **optical path length** : → *length 24*
14. **optical path length** : → *length 25*
15. **path** : in a telecommunication network, a sequence of branches between two nodes or terminal points through other nodes if necessary. ★ chemin → *chemin 1.* D Verbindungsweg. P droga (w sieci telekomunikacyjnej). (715)
16. **path** (of a data network) : a route between any two nodes in a data network. ★ chemin → *chemin 2.* R путь; маршрут (сети данных). D Fernmeldeweg. E camino. I percorso. N knooppuntenverbinding; pad van een datanetwerk. P droga. S väg. (721)
17. **path allocation** : → *allocation 4*
18. **path antenna gain** : → *gain 29*
19. **path length difference** : → *difference 23*
20. **path setting** : → *setting 4*
21. **phase path length** (*Syn.* optical path length) : → *length 24*
22. **propagation path** (*Syn.* ray path) : at each point, the path tangential to the direction of propagation of energy at this point. *Notes. 1* — The concept of ray is the basis of the geometrical optics which, when applicable, permits the substitution of simple relationships for Maxwell's equations. *2* — In some cases, several paths may exist between two points. *3* — In an isotropic medium, the propagation path is a trajectory orthogonal to the wave fronts and the term "ray" is often defined as this trajectory.

In an anisotropic medium, the trajectories orthogonal to the wave fronts do not always coincide with physical paths between a source and a receiving point and should not be called rays. ★ trajet radioélectrique → *trajet 10.* D Ausbreitungsweg; Strahlenweg. P droga propagacji. (705)

23. **ray path** (*Syn.* propagation path) : → *path 22*
24. **ray path transmission loss** : → *loss 79*
25. **signalling path** (in common channel signalling) : the path taken by a signal message through the signalling network. ★ itinéraire de signalisation → *itinéraire 7.* R тракт сигнализации (в сигнализации по общему каналу). D Zeichengabe-Pfad (im ZZG); Signalpfad. E itinerario de señalización. I percorso della segnalazione. N signaleringsweg. P droga sygnalizacyjna. S signaleringsväg. (714)
26. **(switching) path** : a set of switching links joined in series to form a connection. *Note.* — Switching paths differ if one or more switching links differ. ★ itinéraire → *itinéraire 4.* R коммутируемый тракт. D Koppelweg. E itinerario (en una red de conmutación). I percorso della connessione. N (schakel)weg. P droga (połączeniowa). S kopplingsväg. (714)
27. **(transmission) path** : the course taken by a signal during its transmission between two points. *Note.* — The path includes the transmission media and the means used for connecting them together. ★ trajet (de transmission) → *trajet 7.* R трасса, путь передачи. D Uebertragungspfad (-Weg). E trayecto (de transmisión). I percorso (di trasmissione). N (transmissie)weg. P droga przesyłowa (sygnału). S överföringsväg; via. (701,704,714)

patient

1. **patients** (in radiation protection) : in radiation protection, persons who are being exposed to ionizing radiation for medical purposes. ★ patient → *patient 1.* R пациенты (в радиационной защите). D Patienten (im Sinne des Strahlenschutzes). E paciente (en radioproteccion). I pazienti. N patiënten. P pacjenci (w ochronie przed promieniowaniem). S patienter. (881)

pattern

1. **Buchmann and Meyer pattern** (*Syn.* light band width) : a method of measurement of the levels recorded on test disks which are used for the calibration of disk recording/reproducing equipment. It consists of observing the pattern obtained by the light reflected from a parallel beam at a grazing incidence, from either of the groove walls when the groove is viewed from the direction of the light source. ★ méthode de Buchmann et Meyer → *méthode 4.* R блик. D Methode von Buchmann und Meyer (Lichtbandbreiten-Messung). E método de Buchmann y Meyer; método del ancho del haz reflejado. I metodo di Buchmann e Meyer; metodo dell'immagine ottica. N lichtbandbreedte-methode. P szerokość pasa świetlnego. S Buchmann-Meyer-bild. (806)
2. **conductive pattern** : configuration formed by the electrically conductive material of a printed board. ★ impression conductrice → *impression 2.* R проводящий рисунок. D Leiterbild. E impresión conductora. I tracciato conduttore. N geleidend patroon. P mozaika przewodząca. S ledningsmönster. (541)
3. **co-polar pattern** (of an antenna) : the radiation pattern of an antenna corresponding to that polarization for which the antenna was designed. ★ diagramme copolaire → *diagramme 2.* R диаграмма направленности по основной поляризации антенны. D Kopolarisationscharakteristik; Nutzpolaristionscharakteristik (einer Antenne). E diagrama copolar (de una antena). I diagramma di polarizzazione diretta; diagramma co-polare. N copolair stralingspatroon. P charakterystyka promieniowania polaryzacyjna (anteny). S kopolarisationsdiagram. (712)
4. **cross-polar pattern** (of an antenna) : the radiation pattern of an antenna corresponding to the polarization orthogonal to that of the co-polar pattern. ★ diagramme contrapolaire → *diagramme 1.* R диаграмма направленности по кроссполяризации антенны. D Kreuzpolarisationscharakteristik (einer Antenne). E diagrama contrapolar (de una antena). I diagramma di polarizzazione incrociata; diagramma cross-polare. N kruispolair stralingspatroon. P charakterystyka promieniowania ortogonalna (anteny). S korspolarisationsdiagram. (712)
5. **directional pattern** : description, usually presented graphically in polar coordinates, of the sensitivity level of an electroacoustic transducer as a function of the direction of propagation of the radiated or incident sound, in a specified plane and at a specified frequency. ★ diagramme directionnel → *diagramme 27.* R диаграмма направленности. D Richtcharakteristik. E diagrama direccional. I diagramma direttivo. N richtingsdiagram. P charakterystyka kierunkowa. S riktningsdiagram. (801)
6. **equilibrium radiation pattern** : the output radiation pattern of an optical fibre having an equilibrium mode distribution. ★ diagramme de rayonnement à l'équilibre → *diagramme 20.* R диаграмма направленности равномерного излучения. D ausgeglichenes Strahlungsmuster. E diagrama de radiación de equilibrio. I diagramma di radiazione nello (dello) stato stazionario. N evenwichtsstralingspatroon. P rozkład promieniowania stacjonarny. S strålningsfördelning vid modjämvikt. (731)
7. **far-field diffraction pattern** (*Syn.* Fraunhofer diffraction pattern) : the diffraction pattern of a source observed in the far-field region. ★ diagramme de diffraction en champ lointain → *diagramme 11.* R дифракционная картина дальнего поля; дифракционная картина Фраунгофера. D Fernfeldbeugungsmuster; Fraunhofer Beugungsmuster. E diagrama de difracción de campo lejano; diagrama de difracción de Fraunhofer. I figura di diffrazione di campo lontana; figura di diffrazione di Fraunhofer. N ver-veldbuigingspatroon; Fraunhofer-buigingspatroon. P charakterystyka dyfrakcyjna w polu dalekim; charakterystyka dyfrakcyjna Fraunhofera. S ..... (731)
8. **far-field pattern** (*Syn.* far-field radiation pattern) : → *pattern 9*
9. **far-field radiation pattern** (*Syn.* far-field pattern) : that radiation pattern which describes the relative distribution of the irradiance as a function of angle in the far-field region of the exit face of an optical fibre. ★ diagramme de rayonnement en champ lointain → *diagramme 21.* R диаграмма направленности излучения дальнего поля. D Fernfeldstrahlungsmuster; Fernfeldmuster. E diagrama de radiación de campo lejano; diagrama de campo lejano. I diagramma di radiazione in campo lontano. N ver-veldstralingspatroon; ver-veldpatroon. P charakterystyka promieniowania w polu dalekim. S fjärrfältsfördelning. (731)
10. **field strength pattern** (of a radio transmitter) : a geographical map carrying curves of equal values of the field strength from a transmitter. ★ carte de champ → *carte 1.* D Feldstärkekarte (eines Senders). P charakterystyka natężenia pola. (705)
11. **Fraunhofer diffraction pattern** (*Syn.* far-field diffraction pattern) : → *pattern 7*
12. **Fresnel diffraction pattern** (*Syn.* near-field diffraction pattern) : → *pattern 16*
13. **illumination pattern** (*Syn.* illumination diagram) : a graphical representation of the distribution of the electromagnetic field over the aperture of an antenna. ★ diagramme d'illumination → *diagramme 26.* R диаграмма распределения поля в раскрыве. D Aperturbelegungsdiagramm; Aperturausleuchtungsdiagramm. E diagrama de iluminación. I diagramma d'illuminazione. N belichtingspatroon; belichtingsdiagram. P charakterystyka oświetlenia (ujęcie graficzne). S fältfördelningsdiagram. (712)
14. **interference pattern** (in facsimile) (*Syn.* moire) : a defect appearing in facsimile reproduction in the form of a more or less regular pattern of lines or density variations superimposed on the picture. *Note.* — The interference pattern is generally caused by recurrent interference. ★ moirage → *moirage 2.* R муар; интерференционное искажение. D Störmuster. E interferencia de imagen; reflejo. I effetto interferenza. N interferentiepatroon. P mora. S störningsmönster; moiré. (721)
15. **moiré pattern** (*Syn.* patterning) : an abnormal watered aspect of the recorded surface, due to a very low frequency modulation of the width and depth of the groove, produced during cutting. ★ moirage → *moirage 3.* R муар. D Moiré-Muster. E moaré (sonido). I moiré. N moiré. P mora. S moarémönster. (806)
16. **near-field diffraction pattern** (*Syn.* Fresnel diffraction pattern) : the diffraction pattern observed in the near-field region. ★ diagramme de diffraction en champ proche → *diagramme 12.* R дифракционная картина ближнего

поля; дифракционная картина Френеля. D Nahfeldbeugungsmuster; Fresnel Beugungsmuster. E diagrama de difracción de campo cercano; diagrama de difracción de Fresnel. I figura di diffrazione in campo vicino; figura di diffrazione in Fresnel. N nabij-veld buigingspatroon; Fresnel-buigingspatroon. P charakterystyka dyfrakcyjna w polu bliskim; charakterystyka dyfrakcyjna Fresnela. S ..... (731)

17. **near-field pattern** (*Syn.* near-field radiation pattern) : → *pattern 18*

18. **near-field radiation pattern** (*Syn.* near-field pattern) : that radiation pattern which describes relative distribution of the radiant emittance as a function of position in the plane of the exit face of an optical fibre. ★ diagramme de rayonnement en champ proche → *diagramme 22.* R диаграмма направленности излучения ближнего поля. D Nahfeldstrahlungsmuster; Nahfeldmuster. E diagrama de radiación de campo cercano; diagrama de campo cercano. I diagramma di radiazione in campo vicino. N nabij-veld-stralingspatroon; nabij-veld-patroon. P charakterystyka promieniowania w polu bliskim. S närfältsfördelning. (731)

19. **pattern generator** : → *generator 26*

20. **phase pattern** : the distribution in space of the phase of a specified component of the field produced by an antenna, with respect to a specified reference phase. *Note.* — In the far-field region, the phase is generally determined over a sphere whose centre is defined with respect to the antenna. ★ caractéristique de phase → *caractéristique 28.* R фазовая диаграмма. D Phasencharakteristik. E diagrama de fase; característica de fase (de una antena). I distribuzione spaziale della fase. N fasepatroon. P charakterystyka fazowa. S fasfördelning. (712)

21. **phase pattern** (function) : a mathematical expression giving the phase pattern of an antenna in terms of spatial coordinates. ★ fonction de phase → *fonction 22.* R функция фазовой диаграммы. D Phasencharakteristik (Funktion). E diagrama de fase (función). I funzione di fase. N fasepatroon (wiskundige weergave). P charakterystyka fazowa (zależność matematyczna). S fasfunktion. (712)

22. **phase pattern** (graphical representation) (*Syn.* phase diagram) : a graphical representation of the phase pattern of an antenna. ★ diagramme de phase → *diagramme 17.* R графическое представление фазовой диаграммы. D Phasencharakteristik (graphische Darstellung); Phasendiagramm. E diagrama de fase (representación gráfica). I diagramma di fase. N fasepatroon (grafische weergave); fasediagram. P charakterystyka fazowa (ujęcie graficzne). S fasdiagram. (712)

23. **radiation pattern** : the distribution in space of a quantity which characterizes the electromagnetic field produced by an antenna. *Notes. 1* — The distribution in the far-field region is most frequently considered. *2* — The quantity which characterizes the field, may be for instance the magnitude of a specified component of the electromagnetic field or of the field strength-distance product, the radiation intensity, the directivity, the absolute gain or a relative gain. *3* — In French, the term "caractéristique de directivité" is the preferred term when the quantity used to characterize the field does not depend upon the power fed to the antenna. ★ caractéristique de rayonnement → *caractéristique 29.* R диаграмма направленности антенны. D Strahlungscharakteristik; Richtcharakteristik. E diagrama de radiación (de una antena); característica de directividad (de una antena). I distribuzione dell'irradiazione. N stralingspatroon. P charakterystyka promieniowania. S strålningsfördelning. (712)

24. **radiation pattern** (function) : a mathematical expression giving the distribution in space of a quantity which characterizes the electromagnetic field produced by an antenna. ★ fonction (caractéristique) de rayonnement → *fonction 13.* R функция диаграммы направленности антенны. D Strahlungscharakteristik; Richtcharakteristik (Funktion). E diagrama de radiación (función); función característica de directividad (de una antena). I funzione d'irradiazione. N stralingspatroon (wiskundige weergave). P charakterystyka promieniowania (zależność matematyczna). S strålningsfunktion. (712)

25. **radiation pattern** (surface) : the surface described by the extremity of a radius vector whose magnitude is a specified function of the magnitude of a component of the field produced by an antenna at a constant distance in the direction of the vector. *Notes. 1* — The radiation pattern surface in the far-field region is most frequently considered. *2* — In French, the terme "surface de directivité" is the preferred term when the surface does not depend upon the power fed to the antenna. ★ surface (caractéristique) de rayonnement → *surface 33.* R поверхность диаграммы направленности антенны. D Strahlungscharakteristik; Richtcharakteristik (Fläche). E diagrama de radiación (superficie); superficie característica de directividad (de una antena). I solido d'irradiazione. N stralingspatroon (oppervlak). P charakterystyka promieniowania (powierzchniowa). S ..... (712)

26. **radiation pattern** (graphical representation) (*Syn.* radiation diagram) : a graphical representation of the distribution in space of a quantity which characterizes the electromagnetic field produced by an antenna. *Notes. 1* — For example, a radiation pattern may be a plot of the magnitude of a far field component, or alternatively contours of equal value of a far field component, at a given distance from the antenna, as a function of the direction. *2* — In French, the term "diagramme de directivité" is the preferred term when the quantity used to characterize the field does not depend upon the power fed to the antenna. ★ diagramme de rayonnement → *diagramme 18.* R графическое представление диаграммы направленности антенны; диаграмма излучения. D Strahlungscharakteristik (graphische Darstellung); Strahlungsdiagramm; Richtdiagramm; Richtdiagramm. E diagrama de radiación (representación gráfica); diagrama de directividad (de una antena); diagrama de antena. I diagramma d'irradiazione. N stralingspatroon (grafische weergave); stralingsdiagram. P charakterystyka promieniowania (ujęcie graficzne). S strålningsdiagram; antenndiagram. (712)

27. **radiation pattern** (of an optical fibre) : relative power distribution as a function of position or angle radiated from the output of an optical fibre. ★ diagramme de rayonnement → *diagramme 19.* R диаграмма направленности излучения (оптического волокна). D Strahlungsmuster (einer optischen Faser). E diagrama de radiación (de una fibra óptica). I diagramma (figura) di radiazione (di una fibra ottica). N stralingspatroon (van een optische vezel). P charakterystyka promieniowania kierunkowa. S strålningsfördelning. (731)

28. **streak test pattern** : a television test card for assessing streaking effects in a picture. ★ mire de traînage → *mire 8.* R испытательная таблица полос. (723)

29. **subcarrier dot pattern** : a pattern of spots of different brightness in a display caused by the superimposition of the colour subcarrier on the luminance signal. ★ visibilité de la sous-porteuse → *visibilité 3.* R точечный узор поднесущей. (723)

30. **system pattern** : a repetitive arrangement of the nodes in a system and their connections, e.g. feeder, ring, mesh, etc. ★ structure élémentaire d'un réseau → *structure 8.* R структурный элемент электрической сети. D Netz-Strukturelement. E estructura elemental de una red. I struttura di una rete. N netstructuur. P struktura sieci podstawowa. S nätmönster. (601)

31. **television test pattern** (*Syn.* television test card) : a standard pattern or picture, produced by optical or electronic means, for estimating the quality of a television transmission or the performance of television equipment. ★ mire (de télévision) → *mire 7.* R телевизионная испытательная таблица; ТИТ. (723)

32. **test pattern generator** (*Syn.* pattern generator) : → *generator 26*

patterning

1. **patterning** (*Syn.* moiré pattern) : → *pattern 15*

Pauli

1. **Pauli principle** (*Syn.* Pauli-Fermi principle) : → *principle 3*

Pauli-Fermi

1. **Pauli-Fermi principle** : → *principle 3*

pavement

1. **raised pavement marker** (*Syn.* road stud) : → *stud 2*

Pawsey

1. **Pawsey stub balun** (*Syn.* folded balun) : → *balun 2*

PAX

1. **PAX** (*Syn.* private automatic exchange) : → *exchange 17*

pay

1. **pay station** (*Syn.* public call office) : → *office 1*
2. **pay television** : → *television 22*
3. **pay tone** : → *tone 22*
4. **public pay phone** (*Syn.* public call office) : → *office 1*

payload

1. **payload (of a train)** : the total mass of the passengers, luggage and goods in the train. ★ charge utile (d'un train) → *charge 87.* R полезная масса (поезда). D Nutzlast (eines Zuges). E carga útil (de un tren). I carico utile (di un treno); massa netta (di un treno). N nuttige treinbelading. P ładunek (handlowy) pociągu. S nyttolast. (811)

payment

1. **fixed payment tariff** : → *tariff 9*
2. **minimum payment clause** : → *clause 2*

PBX

1. **PBX** (*Syn.* private branch exchange) : → *exchange 18*
2. **PBX group** : → *group 48*
3. **PBX hunting** : → *hunting 6*
4. **preferential (PBX) access line** : → *line 126*

PCA

1. **PCA** (*Syn.* polar cap absorption) : → *absorption 32*

PCB

1. **PCB** (*Syn.* polychlorinated biphenyls) : → *biphenyl 1*

PCC

1. **PCC** (*Syn.* point of common coupling) : → *point 33*

PCD

1. **PCD** (*Syn.* arc furnace electrode pitch circle diameter) : → *pitch 1*

P-channel

1. **P-channel field-effect transistor** : → *transistor 10*

PCM

1. **generic PCM** (*Syn.* generic pulse code modulation) : → *modulation 23*
2. **multichannel PCM transmission** : → *transmission 44*
3. **PCM** (*Syn.* pulse code modulation) : → *modulation 50*
4. **PCM binary code** : → *code 43*
5. **PCM codec** : → *codec 1*
6. **PCM decoder** : → *decoder 3*
7. **PCM digital reference sequence** : → *sequence 8*
8. **PCM encoder** : → *encoder 3*
9. **PCM encoder-decoder** (*Syn.* PCM codec) : → *codec 1*
10. **PCM multiplex equipment** : → *equipment 56*
11. **(PCM) (telephone) channel** : → *channel 35*
12. **PCM word** (*Syn.* code word) : → *word 2*
13. **primary PCM group A** : → *group 51*
14. **primary PCM group mu** : → *group 52*

PCS-fibre

1. **PCS-fibre** (*Syn.* plastic clad silica fibre) : → *fibre 22*

PDC

1. **PDC** (*Syn.* programme delivery control) : → *control 144*

PDM

1. **PDM** (*Syn.* pulse duration modulation) : → *modulation 51*

peak

1. **average daily peak hour traffic intensity** : → *intensity 1*
2. **circuit non-repetitive peak off-state voltage** : → *voltage 26*
3. **circuit non-repetitive peak reverse voltage** : → *voltage 27*
4. **circuit repetitive peak off-state voltage** : → *voltage 28*
5. **circuit repetitive peak reverse voltage** : → *voltage 29*
6. **earth wire peak** (*Syn.* overhead ground wire peak (USA)) : a component which is part of a top hamper of a tower and illustrated by figure 3.11. ★ chevalet (de câble de garde) → *chevalet 1.* R тросостойка. D Erdseilspitze. E castillete de cable de tierra; cuerno de cable de tierra. I cimino (di corda di guardia). N top voor bliksemdraad. P wieżyczka odgromowa. S jordlinetopp. (466)
7. **instantaneous peak power** : → *power 74*
8. **maximum prospective peak current** : → *current 124*
9. **non-coincident peak method** : → *method 13*
10. **overhead ground wire peak** (*Syn.* earth wire peak) : → *peak 6*
11. **peak absorbed dose** (*Syn.* maximum absorbed dose) : → *dose 34*
12. **peak arc voltage** : → *voltage 137*
13. **peak busy hour** : → *hour 6*
14. **peak capacity cost** : → *cost 18*
15. **peak current** : → *current 137*
16. **peak detector** : → *detector 21*
17. **peak factor** : → *factor 127*
18. **peak forward anode voltage** : → *voltage 138*
19. **peak (frequency) deviation** : → *deviation 12*
20. **peak frequency-weighted sound pressure level** : → *level 65*
21. **peak intensity wavelength** : → *wavelength 12*
22. **peak level** : → *level 66*
23. **peak limiting** : → *limiting 24*
24. **peak negative anode voltage** : → *voltage 139*
25. **peak particle displacement** : → *displacement 11*
26. **peak particle velocity** : → *velocity 12*
27. **peak (phase) deviation** : → *deviation 13*
28. **peak point** : → *point 31*
29. **peak programme meter** : → *meter 38*
30. **peak pulse output power** : → *power 100*
31. **peak responsibility factor** : → *factor 128*
32. **peak responsibility method** : → *responsibility 2*
33. **peak scatter factor** : → *factor 129*
34. **peak sound level** (*Syn.* peak frequency-weighted sound pressure level) : → *level 65*
35. **peak sound pressure** : → *sound pressure 9*
36. **peak speech power** : → *power 101*
37. **peak speech power** : → *power 102*
38. **peak torque** : → *torque 16*
39. **peak value** : → *value 40*
40. **peak value** : → *value 41*
41. **peak voltmeter** : → *voltmeter 3*
42. **peak withstand current** : → *current 138*
43. **photoelectric peak** : in X or gamma radiation, the peak of the spectral response curve corresponding to the absorption, in a detecting material, by a photoelectric effect, of the photon energy. *Note.* — In general, this peak has nearly the same energy as the total absorption peak, the only one that can be measured. ★ pic photoélectrique → *pic 3.* R фотоэлектрический пик. D Photolinie. E pico fotoeléctrico. I picco fotoelettrico. N foto-elektrische piek. P szczyt fotoelektryczny. S fototopp. (391)
44. **projected peak point** : → *point 39*
45. **prospective peak current** : → *current 147*
46. **total absorption peak** : in X or gamma radiation, the peak of the spectral response curve corresponding to the total absorption in a detecting material, of the photon energy. *Note.* — This peak differs from the photoelectric peak in that it takes into account the total absorption due to Compton effect and pair production effect. ★ pic d'absorption totale → *pic 2.* R пик полного поглощения. D Totalabsorptionslinie. E pico de absorción total. I picco di assorbimento totale. N piek van totale absorptie. P szczyt pochłaniania całkowitego; szczyt absorpcji całkowitej. S totalabsorptionstopp. (391)

peaked

1. **peaked traffic** : → *traffic 16*

peakedness

1. **peakedness factor** : → *factor 130*

peak-load

1. **peak load** : maximum value of load during a given period of time, e.g. a day, a month, a year. ★ pointe de charge → *pointe 12.* R максимум нагрузки. D Lastspitze. E punta de carga. I punta di carico. N piekbelasting. P obciążenie szczytowe. S toppbelastning. (601)
2. **peak load set** : → *set 37*
3. **peak-load tariff** : → *tariff 30*

peak-ripple

1. **peak-ripple factor** : → *factor 131*

peak-switching

1. **peak-switching current** : → *current 139*

peak-to-peak

1. **peak to peak phase difference between related information** : → *difference 24*
2. **peak-to-peak (frequency) deviation** : → *deviation 14*

peak-to-valley

1. **peak-to-valley value** : → *value 42*

pedestal

1. **bearing pedestal** : a structure mounted from base-plate or foundations of a machine to support a bearing. ★ chaise de palier → *chaise 1.* R опора подшипника. D Lagerbock. E pedestal de cojinete. I piedestallo del supporto. N lagerstoel; lagerbok. P stojak łożyskowy. S lagerbock. (411)
2. **insulated bearing pedestal** : a bearing pedestal which is electrically insulated from its supporting structure to prevent the circulation of shaft currents. ★ palier à chaise isolée → *palier 8.* R изолированная опора подшипника. D isolierter Lagerbock. E pedestal de cojinete aislado. I piedestallo isolato. N geïsoleerde lagerstoel; lagerbok. P izolowany stojak łożyskowy. S isolerad lagerbock. (411)
3. **pedestal** : the difference in level between the black level and the blanking level of a video signal. ★ décollement du niveau du noir → *décollement 1.* R защитный интервал. (723)
4. **pedestal bearing** : → *bearing 25*
5. **pedestal post insulator** : → *insulator 23*

pelmet

1. **pelmet lighting** (*Syn.* valance lighting) : → *lighting 31*

Peltier

1. **Peltier effect** : → *effect 50*

Pelton

1. **Pelton turbine** : → *turbine 7*

pen

1. **light pen** : a pen containing an optoelectronic circuit which an operator can use to draw upon the screen of a cathode ray tube or to indicate a position on the screen. ★ photostyle → *photostyle 1.* R световой карандаш. (723)
2. **PEN conductor** : → *conductor 53*
3. **pen recorder** : → *recorder 11*

pencil-beam

1. **pencil-beam antenna** : → *antenna 88*

pendant

1. **pendant luminaire** : → *luminaire 17*
2. **rise and fall pendant** : pendant luminaire of which the height is adjustable by means of a suspension with pulleys, counterweights, etc. ★ luminaire à suspension réglable → *luminaire 4.* R светильник с регулируемой высотой подвеса. D Zugleuchte. E luminaria suspendida de altura regulable. I apparecchio di illuminazione a saliscendi. N trekpendelarmatuur. P oprawa ściągana. S hissarmatur. (845)

penetrability

1. penetrability (deprecated) : the ability of a material to be traversed. *Note.* — This term should not be used as a synonym for radiation quality. ★ pénétrabilité → *pénétrabilité 1.* R проницаемость (не рекомендуется). D Durchlässigkeit (veralteter Begriff). E penetrabilidad (desaconsejado). I penetrabilità (sconsigliato). N doordringbaarheid. P przenikalność (termin nie zalecany). S genomtränglighet. (881)

penetrameter

1. **penetrameter** (*Syn.* image quality indicator) : → *indicator 8*

penetration

1. **depth of penetration** : → *depth 2*
2. **electron penetration depth** : → *depth 3*
3. **penetration depth** : → *depth 8*
4. **(telephone) penetration** (*Syn.* (telephone) line density) : → *density 36*
5. **water penetration** : the amount of liquid water passing through a specimen in unit time under specified conditions. ★ pénétration d'eau → *pénétration 2.* R водопроницаемость. D Wasserpenetration; Wasserdurchlässigkeit. E penetración de agua. I penetrazione dell'acqua. N waterindringing. P przenikanie wody. S vattengenomsläpplighet. (212)

penstock

1. **penstock** : a pipeline bringing water under pressure to the turbine. ★ conduite forcée → *conduite 8.* R турбинный водовод. D Druckrohr. E tubería forzada. I condotta forzata. N drukleiding. P rurociąg zasilający. S tilloppstub. (602)

pentode

1. **pentode** : a five-electrode electronic tube containing an anode, a cathode, a control electrode, and two additional electrodes, usually a screen grid and a suppressor grid. ★ pentode → *pentode 1.* R пентод. D Pentode. E pentodo. I pentodo. N pentode. P pentoda. S pentod. (531)

perceived

1. **achromatic (perceived) colour** : → *colour 1*
2. **adaptive (perceived) colour shift** : → *shift 2*
3. **chromatic (perceived) colour** : → *colour 5*
4. **effective perceived noise level** : → *level 15*
5. **illuminant (perceived) colour shift** : → *shift 20*
6. **judged perceived noise level** : → *level 38*
7. **luminous (perceived) colour** : → *colour 58*
8. **non-luminous (perceived) colour** : → *colour 61*
9. **(perceived) color** (*Syn.* (perceived) colour) : → *colour 65*
10. **(perceived) colour** : → *colour 65*
11. **(perceived) light** : → *light 52*
12. **perceived noise level** : → *level 68*
13. **related (perceived) colour** : → *colour 72*
14. **resultant (perceived) colour shift** : → *shift 34*
15. **tone-corrected perceived noise level** : → *level 100*
16. **unrelated (perceived) colour** : → *colour 81*

percentage

1. **beam modulation percentage** : → *modulation 7*
2. **disengaging percentage** : the disengaging ratio expressed as a percentage. ★ pourcentage de dégagement → *pourcentage 1.* R процент трогания при возврате. D prozentuales Rückfallverhältnis. E porcentaje de liberación. I percentuale di disimpegno. N afvalverhoudingspercentage. P ..... S procentuellt frånslagsförhållande. (446)
3. **immediate appreciation percentage** : the percentage of unrelated sentences, each conveying a simple, easily understandable idea, spoken during a telephonometry test, which the listener declares as having been immediately understood without conscious deductive effort. ★ taux de compréhension immédiate → *taux 6.* R коэффициент фразовой разборчивости. D Rate des unmittelbaren Verständnisses. E porcentaje de apreciación inmediata. I tasso di comprensione immediato. N zinsverstaanbaarheidspercentage. P wskaźnik bezpośredniego pojmowania. S relativ meningsuppfattbarhet. (722)
4. **percentage depth dose** : → *dose 39*
5. **percentage relay** : → *relay 27*
6. **percentage ripple** : → *ripple 5*

7. **resetting percentage** : the resetting ratio expressed as a percentage. ★ pourcentage de retour → *pourcentage 2.* R процент возврата. D prozentuales Rückkehrverhältnis. E porcentaje de reposición. I percentuale di rilascio. N herstelpercentage. P współczynnik powrotu procentowy. S procentuellt återvändsförhållande. (446)

perceptibility

1. **threshold of flicker perceptibility** : → *threshold 23*

perfect

1. **perfect conductor** : → *conductor 54*
2. **perfect dielectric** : → *dielectric 22*
3. **perfect (discrete) signal** : → *signal 138*
4. **perfect reflecting diffuser** : → *diffuser 3*
5. **perfect transmitting diffuser** : → *diffuser 4*

perforated

1. **perforated lens** : → *lens 16*

perforated-tape

1. **perforated-tape retransmitter** : → *retransmitter 2*

perforation

1. **chadless perforation** : perforation in tape in which the holes are only partially perforated, the chads or cuttings remaining attached hinged to the tape. ★ perforation partielle → *perforation 4.* R частичная (неполная) перфорация. D Schuppenlochung. E perforación parcial; perforación chadless. I perforazione parziale. N Chadless-perforatie. P perforacja częściowa. S lockperforering. (721)

perforator

1. **keyboard perforator** : a perforator in which the punching is controlled by an alphanumeric keyboard. ★ perforateur à clavier → *perforateur 1.* R клавиатурный перфоратор. D Tastaturlocher. E perforador con teclado. I perforatore a tastiera. N toetsenbordponser. P perforator klawiaturowy. S tangentbordsperforator. (721)
2. **printing perforator** : a tape perforator which, when perforating, also prints on the tape the corresponding character or the symbol representing the function control. ★ perforateur imprimeur → *perforateur 3.* R печатающий перфоратор. D Schreiblocher. E perforador impresor. I perforatore a stampa. N ponser met afdruk. P perforator drukujący. S typtryckande perforator. (721)
3. **receiving perforator** (*Syn.* reperforator) : → *reperforator 4*
4. **(tape) perforator** : an apparatus which records telegraph signals on a paper tape by a combination of holes punched in accordance with a predetermined code. ★ perforateur (de bande) → *perforateur 2.* R ленточный перфоратор. D (Streifen-)Locher. E perforador (de banda); perforadora. I perforatore (di nastro). N (band)ponser. P perforator (taśmy). S perforator. (721)

performance

1. **availability (performance)** : → *availability 4*
2. **effectiveness (performance)** : → *effectiveness 1*
3. **maintainability (performance)** : → *maintainability 6*
4. **maintenance support performance** : the ability of a maintenance organization, under given conditions, to provide upon demand, the resources required to maintain an item, under a given maintenance policy. *Note.* — The given conditions are related to the item itself and to the conditions under which the item is used and maintained. ★ logistique de maintenance → *logistique 4.* R обеспеченность технического обслуживания и ремонта. D Instandhaltungsbereitschaft. E logística de mantenimiento. I supporto logistico di manutenzione. N onderhoudsondersteuning-prestatie. P zdolność naprawcza. S underhållssäkerhet. (191)
5. **performance** : the degree to which intended functions of an instrument are accomplished. ★ qualités de fonctionnement → *qualité 20.* R качество функционирования. D Leistungsfähigkeit. E características de funcionamiento. I qualità di funzionamento. N doelmatigheid. P jakość działania. S prestanda. (303)
6. **performance index** : → *index 30*
7. **performance tests** : → *test 59*
8. **propagation performance** (in telecommunications) : the ability of a propagation medium, in which a wave propagates without artificial guide, to transmit a signal within the given tolerances. *Note.* — The given tolerances may apply to variations in signal level, noise, interference levels, etc. ★ caractéristiques de propagation → *caractéristique 81.* R характеристика распространения (в дальней связи). D Ausbreitungsverhalten. E características de propagación (en telecomunicación). I caratteristica di propagazione. N voortplantingskarakteristiek (bij telecommunicatie). P jakość propagacji. S utbredningsförmåga. (191)
9. **reference apparatus for the determination of transmission performance ratings** : → *apparatus 13*
10. **reliability (performance)** : → *reliability 15*
11. **serveability performance** (*Syn.* serviceability performance) : the ability of a service to be obtained within specified tolerances and other given conditions when requested by the user and continue to be provided for a requested duration. *Note.* — Serveability performance may be subdivided into the service accessibility performance and the service retainability performance. ★ servibilité → *servibilité 1.* R природность услуги. D Dienstverfügbarkeit. E servibilidad (de un servicio). I prestazioni di servibilità. N beschikbaarheid van een dienst(verlening). P osiągalność serwisu. S tjänstbarhet. (191)
12. **service accessibility performance** : the ability of a service to be obtained, within specified tolerances and other given conditions, when requested by the user. *Notes. 1* — For example in telecommunications this takes into account the transmission tolerance and the combined aspects of propagation performance, trafficability performance and availability performance of the related systems. *2* — In French, the term "accessibilité" is also used as a measure of this performance . ★ accessibilité → *accessibilité 1.* R доступность услуги (свойство). D Dienstzugängglichkeit. E accesibilidad (de un servicio). I prestazioni di accessibilità al servizio. N toegankelijkheid van een dienst(verlening). P dostępność serwisu. S tjänsteåtkomlighet. (191)
13. **service operability performance** : the ability of a service to be successfully and easily operated by a user. ★ facilité d'utilisation → *facilité 1.* R эффективность услуги. D Dienstanwendbarkeit. E facilidad de utilización (de un servicio). I facilità di utilizzazione (di un servizio). N gebruiksgemak van een dienst(verlening). P operatywność serwisu. S användarvänlighet. (191)
14. **service retainability performance** : the ability of a service, once obtained, to continue to be provided under given conditions for a requested duration. *Notes. 1* — For example in telecommunications this takes into account the transmission tolerance and the combined aspects of propagation performance, trafficability performance and availability performance of the related systems. *2* — In French, the term "continuabilité" is also used as a measure of this performance. ★ continuabilité → *continuabilité 1.* R непрерывность услуги (свойство). D Dienstbeständigkeit. E retenibilidad (de un servicio). I prestazioni di continuabilità di un servizio. N continuïteit van een dienst(verlening). P ciągłość serwisu. S tjänstekontinuitet. (191)
15. **service support performance** : the ability of an organization to provide a service and assist in its utilization. *Note.* — An example of service support performance in telecommunications is the ability to provide assistance in commissioning a basic service, or a supplementary service such as call waiting service or directory enquiry service. ★ logistique de service → *logistique 5.* R обеспеченность услуги. D Dienstbereitschaft. E logística del servicio. I logistica del servizio. N ondersteuning van een dienst(verlening). P wydolność serwisu. S tjänstestöd. (191)
16. **serviceability performance** (*Syn.* serveability performance) : → *performance 11*
17. **trafficability performance** : the ability of an item to meet a traffic demand with a given size and other characteristics, under given internal conditions. *Note.* — Internal conditions refer for example to any combination of faulty and not faulty sub-items. ★ traficabilité → *traficabilité 1.* R пропускная способность. D Verkehrsfähigkeit. E traficabilidad; capacidad de evacuación del tráfico. I trafficabilità. N verkeerscapaciteit. P przelotowość. S trafikmässighet. (191)
18. **transmission performance** : the ability of a telecommunication system to reproduce an offered signal under given conditions, when this system is in an up state. ★ qualité de transmission → *qualité 14.* R качество передачи.

D Übertragungsqualität. E calidad de transmisión. I qualità di trasmissione. N transmissiekwaliteit. P jakość transmisji. S transmissionskvalitet. (191,702)

19. **transmission performance** (in telephony) : the effectiveness of a complete connection for transmitting or reproducing speech under actual conditions. *Note.* — The specification of transmission performance generally requires the consideration of more than one attribute or test method. ★ qualité de transmission → *qualité 15.* R качество передачи (в телефонии). D Übertragungsgüte. E calidad de transmisión (en telefonía). I qualità di trasmissione (in telefonia). N transmissiekwaliteit. P jakość transmisji (telefonicznej). S transmissionskvalitet. (722)
20. **transmission performance rating** : → *rating 17*
21. **visual performance** : performance of the visual system as measured for instance by the speed and accuracy with which a visual task is performed. ★ performance visuelle → *performance 1.* R зрительная работа. D Sehleistung. E actuación visual. I prestazione visiva. N visuele prestatie. P wydolność wzrokowa. S synprestation. (845)

periapsis

1. **periapsis** (*Syn.* perifocus) : the point in the orbit of a satellite or planet which is at a minimum distance from the centre of mass of the primary body. ★ périapside → *périapside 1.* R периапсида; периастр. D Periapside. E periápside; ápside inferior; periastro. I apside inferiore. N periapsis; perifocus. P perifokus. S periapsis. (725)

perifocus

1. **perifocus** (*Syn.* periapsis) : → *periapsis 1*

perigee

1. **altitude of the perigee** : → *altitude 2*
2. **perigee** : the point in the orbit of an earth satellite which is at a minimum distance from the centre of the Earth. *Note.* — The perigee is the periapsis of an earth satellite. ★ périgée → *périgée 2.* R перигей. D Perigäum. E perigeo. I perigeo. N perigeum. P perigeum. S perigeum. (725)

period

1. **anomalistic period** : the time elapsing between two successive passages of a satellite through its periapsis. ★ période anomalistique → *période 4.* R аномалистический период. D unregelmässige Periode. E período anomalístico. I periodo anomalistico. N anomalistische periode. P okres anomalny. S anomalistisk period. (725)
2. **blanking period** (*Syn.* blanking interval) : → *interval 1*
3. **blocking period** (of a gas-filled tube) : that part of the idle period during which a control electrode prevents conduction. ★ temps de blocage → *temps 42.* R период блокирования. D Blockierzeit. E tiempo de bloqueo; período de bloqueo. I durata di interdizione; tempo di interdizione. N blokkeertijd. P czas zaporowy. S blockeringsintervall. (531)
4. **conducting period** (of a gas-filled tube) (*Syn.* on period (of a gas-filled tube)) : that part of an alternating voltage cycle during which a stated discharge path is carrying current. ★ temps de conduction → *temps 50.* R проводящий период. D Durchlaßzeit. E tiempo de conducción; período de conducción. I durata di conduzione; tempo di conduzione. N geleidingsperiode. P czas przewodzenia. S arbetsintervall. (531)
5. **constant failure intensity period** : that period, if any, in the life of a repaired item during which the failure intensity is approximately constant. ★ période d'intensité constante de défaillance → *période 22.* R период постоянного параметра потока отказов. D Phase konstanter Ausfalldichte. E período de intensidad de fallos constante. I periodo della intensità di guasto costante. N periode met constante storingsintensiteit. P okres stałego strumienia uszkodzeń. S bästperiod. (191)
6. **constant failure rate period** : that period, if any, in the life of a non-repaired item during which the failure rate is approximately constant. ★ période de taux constant de défaillance → *période 17.* R период постоянной интенсивности отказов. D Phase konstanter Ausfallrate. E período de tasa de fallos constante. I periodo del tasso di guasto costante. N periode met constant storingstempo. P okres stałej intensywności uszkodzeń. S bästperiod. (191)
7. **demand integration period** : → *integration 1*
8. **early failure period** : that early period, if any, in the life of an item, beginning at a given instant of time and during which the instantaneous failure intensity for a repaired item or the instantaneous failure rate for a non-repaired item is considerably higher than that of the subsequent period. ★ période de défaillance précoce → *période 10.* R период приработки. D Frühausfallphase. E período de fallo inicial. I periodo dei guasti precoci. N aanloopstoringsperiode. P okres uszkodzeń wczesnych. S begynnelseperiod. (191)
9. **elementary period** : the duration of one cycle of the phenómena that are periodically repeated. ★ période élémentaire → *période 25.* R период повторяемости. D Taktperiode. E período elemental. I periodo elementare. N elementaire periode. P okres podstawowy. S grundperiod. (551)
10. **field period** : the time taken for the scanning of a single field, including fly-back. ★ période de trame → *période 18.* R период полей. (723)
11. **frame period** (*Syn.* picture period) : the time taken for the scanning of a complete picture. ★ période d'image → *période 19.* R период кадров. (723)
12. **hold-off period** (*Syn.* off-state interval) : → *interval 14*
13. **idle period** (of a gas-filled tube) (*Syn.* off period (of a gas-filled tube)) : that part of an alternating voltage cycle during which a stated discharge path is not carrying current. ★ temps de repos → *temps 108.* R непроводящий период. D Sperrzeit. E tiempo de reposo; período de reposo. I durata di riposo; tempo di riposo. N stroomloze periode. P czas jałowy; czas nieprzewodzenia. S vilointervall. (531)
14. **idle period** (*Syn.* non-conducting interval) : → *interval 13*
15. **induction period** : period of time during which an insulating liquid shows no significant degradation under standardized conditions of accelerated oxidation. ★ période d'induction → *période 20.* R индукционный период. D Induktionsperiode. E período de inducción. I periodo di induzione. N inductieperiode. P okres indukcyjny. S induktionstid. (212)
16. **inverse period** (*Syn.* reverse blocking interval) : → *interval 16*
17. **line period** : the time taken for a single line scan, including fly-back. ★ période de ligne → *période 13.* R период строк. (723)
18. **long period fading** (*Syn.* slow fading) : → *fading 16*
19. **nodal period** : the time elapsing between two consecutive passages of a satellite through the ascending node of its orbit. ★ période nodale → *période 26.* R узловой период. D Knoten-Periode. E período nodal. I periodo nodale. N knooppuntsperiode. P okres międzywęzłowy. S nodperiod. (725)
20. **off period** (*Syn.* idle period) : → *period 13*
21. **on period** (*Syn.* conducting period) : → *period 4*
22. **orbital period** (*Syn.* period of revolution) : → *period 25*
23. **period** (*T*) : the smallest repetitive difference between two values of the independent variable at which the values of a periodic quantity are identically repeated. *Note.* — in radiation the independent variable is time a nd the corresponding quantity is known as the periode time. ★ période → *période 3.* R период. D Periodendauer. E período. I periodo. N periode. P okres. S period. (101)
24. **period meter** : → *meter 39*
25. **period of revolution** (of a satellite) (*Syn.* orbital period (of a satellite)) : the time elapsing between two consecutive passages of a satellite through a characteristic point on its orbit. *Note.* — In the absence of further information, it shall be understood that the period of revolution is the anomalistic period. ★ période de révolution → *période 14.* R период обращения (спутника); орбитальный период (спутника). D Umlaufperiode (eines Satelliten). E período de revolución (de un satélite); período orbital (de un satélite). I periodo di rivoluzione. N baanperiode. P okres orbitalny. S omloppstid; banperiod. (725)
26. **picture period** (*Syn.* frame period) : → *period 11*
27. **reactor period** (*Syn.* reactor time constant) : → *time constant 16*
28. **recovery period** (for blocking tubes) : the time interval between the instant at which the radio frequency ionizing pulse ceases and the instant at which the attenuation of a low-power signal by the blocking tube falls to a stated level. ★ durée de

désionisation → *durée 37.* R время восстановления (газовые разрядники). D Erholzeit (bei Sperröhren). E tiempo de desionización (tubos de conmutación en hiperfrecuencias). I durata di deionizzazione (tubi TR e pre-TR). N hersteltijd (blokkeerbuizen). P czas dejonizacji (zwieraka). S återhämtningstid. (531)

29. **scanning line period** : in facsimile the time interval between the scanning instants of two corresponding points in two consecutive scanning lines at transmission or reception. ★ période de ligne → *période 12.* R период строчной развертки. D Zeilenabtastzeit. E período de línea. I tempo di scansionamento di riga. N lijnaftastperiode. P czas rozwinięcia linii. S linjetid. (721)

30. **short period fading** (*Syn.* fast fading) : → *fading 10*

31. **sidereal period of revolution** (of a satellite) : the time elapsing between two consecutive intersections of the projection of a satellite on to a reference plane which passes through the centre of mass of the primary body with a line in that plane extending from the centre of mass to infinity, the normal to the reference plane and the direction of the line both being fixed in relation to the stars. ★ période de révolution sidérale → *période 15.* R звездный период обращения (спутника). D siderische Periode (eines Satelliten). E período de revolución sideral (de un satélite). I periodo di rivoluzione siderale. N siderale omwentelingstijd. P okres gwiezdny obiegu (satelity). S siderisk omloppstid. (725)

32. **sidereal period of rotation** (of an objet in space) : period of rotation around its own centre of mass of an object in space in a frame of reference fixed in relation to the stars. ★ période de rotation sidérale → *période 16.* R звездный период вращения (объекта в космосе). D siderische Umdrehungszeit (eines Weltraumobjektes). E período de rotación sideral (de un objeto espacial). I periodo di rotazione siderale. N siderale rotatietijd. P okres gwiezdny rotacji (obiektu w kosmosie). S siderisk rotationsperiod. (725)

33. **silent period** : in alternating current signalling, the designed interval during which there is no transmission of alternating current and which precedes or follows the sending of an a.c. signal. ★ intervalle de silence → *intervalle 16.* R пауза. D Pausenzeit. E intervalo de silencio. I intervallo di silenzio. N ..... P przerwa (w sygnalizacji prądem przemiennym). S tystperiod. (714)

34. **utilisation period at maximum capacity of more units** : the quotient of the energy generated by more units during a given period of time and the corresponding maximum capacity. ★ durée d'utilisation de la puissance maximale possible d'un ensemble de tranches → *durée 95.* R число часов использования ыстановленной мощности группы агрегатов. D Ausnutzungsdauer mehrerer Blöcke. E duración de utilización de la potencia máxima posible de un conjunto de grupos; tiempo de utilización de la potencia máxima posible de un conjunto de grupos. I durata di utilizzazione della potenza massima ammissibile di un complesso di unità. N bedrijfstijd van verscheidene opwekeenheden. P czas użytkowania mocy maksymalnej wielu zespołów prądotwórczych. S ekvivalent fullasttid för flera block. (602)

35. **utilisation period at maximum capacity of one unit** : the quotient of the energy generated by one unit during a given period of time and the corresponding maximum capacity. ★ durée d'utilisation de la puissance maximale possible d'une tranche → *durée 96.* R число часов использования установленной мощности агрегата. D Ausnutzungsdauer eines Blockes. E duración de utilización de la potencia máxima posible de un grupo; tiempo de utilización de la potencia máxima posible de un grupo. I durata di utilizzazione della potenza massima ammissibile di una unità. N bedrijfstijd van een opwekeenheid. P czas użytkowania mocy maksymalnej zespołu prądotwórczego. S ekvivalent fullasttid för ett block. (602)

36. **wear-out failure period** : that final period, if any, in the life of an item during which the instantaneous failure intensity for a repaired item or the instantaneous failure rate for a non-repaired item is considerably higher than that of the preceding period. ★ période de défaillance par vieillissement → *période 9.* R период роста интенсивности отказов; период роста параметра потока отказов. D Spätausfallphase. E período de fallos por envejecimiento. I periodo dei guasti per invecchiamento. N periode van storingen door slijtage. P okres uszkodzeń starzeniowych. S slutperiod. (191)

periodic

1. **intermittent periodic duty-type** : → *duty-type 6*
2. **intermittent periodic duty-type with starting** : → *duty-type 7*
3. **intermittent periodic duty-type with electric braking** : → *duty-type 8*
4. **periodic** : identically recurring at equal intervals of the independent variable. ★ périodique → *périodique 2.* R периодический. D periodisch. E periódico. I periodico. N periodiek. P okresowy; periodyczny. S periodisk. (101)
5. **periodic and/or random deviation** : → *deviation 15*
6. **periodic duty** : → *duty 10*
7. **periodic duty** : → *duty 11*

periodically

1. **periodically loaded waveguide** : → *waveguide 10*

peripheral

1. **peripheral seal** : → *seal 13*
2. **peripheral speed** : → *speed 30*

periscope

1. **periscope antenna** : → *antenna 89*

peritelevision

1. **peritelevision** : techniques which utilize a household television receiver, together with other apparatus, for purposes other than the direct viewing of a broadcast or cable distributed television programme. *Examples :* Video games, videography, the use of a household tape recorder or home computer. ★ péritélévision → *péritélévision 2.* R перителевидение. (723)
2. **peritelevision connector** : → *socket 2*

permanent

1. **permanent fault** (*Syn.* persistent fault) : → *fault 66*
2. **permanent fault** : → *fault 65*
3. **permanent split capacitor motor** (*Syn.* capacitor start and run motor) : → *motor 13*
4. **permanent store** : → *store 6*
5. **permanent supplementary artificial lighting** : → *lighting 24*
6. **permanent virtual circuit** : → *circuit 135*

permanently

1. **permanently locked envelopes** : → *envelope 11*
2. **permanently manned substation** : → *substation 19*

permanent-magnet

1. **permanent magnet** : a magnet which requires no current to maintain its field. ★ aimant permanent → *aimant 4.* R постоянный магнит. D Dauermagnet. E imán permanente. I magnete permanente. N permanente magneet. P magnes trwały. S permanentmagnet. (151)
2. **permanent magnet generator** : → *generator 27*
3. **permanent magnet synchronous motor** : → *motor 74*
4. **permanent-magnet moving-coil instrument** : → *instrument 25*

permeability

1. **(absolute) permeability** : the scalar or matrix quantity whose product by the magnetic field strength is the magnetic flux density. *Note.* — For isotropic media, the permeability is a scalar; for anisotropic media, a matrix. ★ perméabilité (absolue) → *perméabilité 10.* R абсолютная магнитная проницаемость. D (absolute) Permeabilität. E permeabilidad (absoluta). I permeabilità (assoluta). N (absolute) permeabiliteit. P przenikalność magnetyczna (bezwzględna). S (absolut) permeabilitet. (121,705)
2. **absolute permeability of vacuum** (*Syn.* magnetic constant) : → *constant 24*
3. **amplitude permeability** (μ_a) : the relative permeability obtained from the peak value of the magnetic flux density and the peak value of the applied magnetic field strength, at a stated amplitude of either, when the field strength is varying periodically with time and with an average of zero, and the material is initially in a specified neutralized state. *Notes. 1* — Two amplitude permeabilities are in common use, namely : i) that in which the peak values apply to the actual waveforms, ii)

that in which the peak values apply to the fundamental components, in which case it should be distinguished which of the waveforms, if either, is sinusoidal. *2* — In the limit, $\hat{B}$ and $\hat{H}$ may be static values provided the material is in a cyclic magnetic condition. ★ perméabilité d'amplitude → *perméabilité 15.* **R** амплитудная магнитная проницаемость. **D** Amplitudenpermeabilität. **E** permeabilidad de amplitud. **I** permeabilità d'ampiezza. **N** amplitudepermeabiliteit. **P** przenikalność magnetyczna amplitudowa. **S** amplitudpermeabilitet. (221)

4. **apparent permeability** (μ_{app}) : the ratio of the inductance, L, of a coil when assembled in a specified position on a given core, to the inductance, L', of the same coil measured without the core:

$$\mu_{app} = \frac{L}{L'}$$

★ perméabilité apparente → *perméabilité 12.* **R** кажущаяся магнитная проницаемость. **D** scheinbare Permeabilität. **E** permeabilidad aparente. **I** permeabilità apparente. **N** schijnbare permeabiliteit. **P** przenikalność magnetyczna pozorna. **S** skenbar permeabilitet. (221)

5. **complex permeability** (symb. : μ) : the complex quotient of the magnetic flux density and magnetic field strength in a material when one of these quantities varies sinusoidally with time and that component of the other is chosen which varies sinusoidally with time at the same frequency, that is, the fundamental component. The vectors representing the flux density and field strength are assumed to be collinear:

$$\mu = \mu' - \mathrm{j}\,\mu''$$

where μ' and μ'' are the real and imaginary components respectively of the complex permeability. *Note.* — In general, a number of the permeabilities defined herein may be expressed as complex permeability. Where such permeabilities are expressed by symbols not indicating that they are complex or that they are components of a complex number, the real part is assumed. ★ perméabilité complexe → *perméabilité 14.* **R** комплексная магнитная проницаемость. **D** komplexe Permeabilität. **E** permeabilidad compleja. **I** permeabilità complessa. **N** complexe permeabiliteit. **P** przenikalność magnetyczna zespolona. **S** komplex permeabilitet. (221)

6. **differential permeability** (μ_{dif}) : the relative permeability corresponding to the slope at a given point on a magnetization curve of magnetic flux density:

$$\mu_{dif} = \frac{1}{\mu_0}\frac{\mathrm{d}B}{\mathrm{d}H}$$

★ perméabilité différentielle → *perméabilité 18.* **R** дифференциальная магнитная проницаемость. **D** differentielle Permeabilität. **E** permeabilidad diferencial. **I** permeabilità differenziale. **N** differentiële permeabiliteit. **P** przenikalność magnetyczna różniczkowa. **S** differentialpermeabilitet. (221)

7. **disaccommodation coefficient (of permeability)** : → *coefficient 17*

8. **disaccommodation factor (of permeability)** : → *factor 46*

9. **disaccommodation (of permeability)** (D) : the fractional decrease of permeability of a magnetic material measured at constant temperature at the beginning and at the end of a given time interval:

$$D = \frac{\mu_1 - \mu_2}{\mu_1}$$

where μ_1 and μ_2 are the values of the permeabilities at the beginning and at the end of the given interval respectively. ★ désaccommodation (de la perméabilité) → *désaccommodation 2.* **R** дезаккомодация (магнитной проницаемости). **D** Desakkommodation (der Permeabilität). **E** desacomodación (de la permeabilidad). **I** disaccomodazione (della permeabilità). **N** desaccommodatie (van de permeabiliteit). **P** dezakomodacja (przenikalności magnetycznej). **S** desackomodation. (221)

10. **effective permeability** (μ_e) : for a magnetic circuit constructed of different materials or non-homogeneous materials or both, the permeability of a hypothetical homogeneous material which, when used to construct a circuit of identical dimensions, would provide the same reluctance. *Notes. 1* — Where the different materials are in series along the magnetic path and the permeability may be assumed constant over any cross-section, the following equation is applicable:

$$\frac{1}{\mu_e}\sum\frac{l}{A} = \sum\frac{l}{\mu_r A}$$

where l is the length, measured along the magnetic path, of each part of the core of uniform cross-section A and homogeneous permeability μ_r. *2* — The effective permeability is used particulary in relation to cores having (air) gaps and it is usually restricted to cases where the leakage flux is relatively small. ★ perméabilité effective → *perméabilité 19.* **R** эффективная магнитная проницаемость. **D** effektive Permeabilität. **E** permeabilidad efectiva. **I** permeabilità effettiva. **N** effectieve permeabiliteit. **P** przenikalność magnetyczna równoważna. **S** effektiv permeabilitet. (221)

11. **effective scalar permeability** (symb. : $\mu_\perp$) : of a material saturated by a magnetostatic field, the complex permeability when it is subjected to a plane electromagnetic wave propagating in the direction of, and having an H -field component perpendicular to, the magnetostatic field strength:

$$\mu_\perp = \frac{\mu_r^2 - \kappa_r^2}{\mu_r}$$

where μ_r and κ_r are components of Polder's tensor permeability. ★ perméabilité scalaire effective → *perméabilité 27.* **R** эффективная скалярная магнитная проницаемость. **D** effektive skalare Permeabilität. **E** permeabilidad escalar efectiva. **I** permeabilità scalare effettiva. **N** effectieve scalaire permeabiliteit. **P** przenikalność magnetyczna skalarna dla fali płaskiej. **S** effektiv skalär permeabilitet för plana vågor. (221)

12. **incremental permeability** (μ_Δ) : the relative permeability obtained from the peak-to-valley value of the magnetic flux density and the peak-to-valley value of the applied magnetic field strength, at a stated amplitude of either, when the field strength is varying periodically with time about a specified static value. *Notes. 1* — The notes following the definition of amplitude permeability apply to this definition also. *2* — The incremental permeability depends on the way in which the magnetic material was brought to its static value of field strength. The definition implies that the alternating and static field are collinear; if they are not, the permeability becomes a tensor quantity. ★ perméabilité avec champ statique superposé → *perméabilité 13.* **R** магнитная проницаемость при наличии постоянного поля. **D** inkrementale Permeabilität. **E** permeabilidad con campo estático superpuesto; permeabilidad incremental. **I** permeabilità con campo statico sovrapposto. **N** incrementele permeabiliteit. **P** przenikalność magnetyczna przy podmagnesowaniu. **S** överlagringspermeabilitet. (221)

13. **initial permeability** (μ_i) : the limiting value of the amplitude permeability when the magnetic field strength tends to zero:

$$\mu_i = \lim_{H \to 0} \mu_a$$

★ perméabilité initiale → *perméabilité 21.* **R** начальная магнитная проницаемость. **D** Anfangspermeabilität. **E** permeabilidad inicial. **I** permeabilità iniziale. **N** initiële permeabiliteit; aanvangspermeabiliteit. **P** przenikalność magnetyczna początkowa. **S** initialpermeabilitet; begynnelsepermeabilitet. (221)

14. **instability factor (of permeability)** : → *factor 94*

15. **instability (of permeability)** : → *instability 2*

16. **maximum permeability** (μ_{max}) : the maximum value of the amplitude permeability observed when the amplitude of the magnetic field strength is varied. ★ perméabilité maximale → *perméabilité 22.* **R** максимальная амплитудная магнитная проницаемость. **D** Maximalpermeabilität. **E** permeabilidad máxima. **I** permeabilità massima. **N** maximale permeabiliteit. **P** przenikalność magnetyczna maksymalna. **S** maximipermeabilitet. (221)

17. **permeability rise factor** : → *factor 132*

18. **Polder's tensor permeability** (*Syn.* tensor permeability for a magnetostatically saturated medium) (symb. : μ_p) : the tensor permeability of a material saturated by a static magnetic field that is collinear with the time-varying field, with the direction of the static field defining the z-axis:

$$\mu_p = \begin{pmatrix} \mu_r & -\mathrm{j}\,\kappa_r & 0 \\ \mathrm{j}\,\kappa_r & \mu_r & 0 \\ 0 & 0 & 1 \end{pmatrix}$$

where μ_r and κ_r are complex permeabilities. ★ perméabilité tensorielle de Polder → *perméabilité 30.* **R** тензорная магнитная проницаемость по Полдеру; тензорная

магнитная проницаемость среды, намагниченной до насыщения в постоянном поле. **D** Polderscher Permeabilitätstensor; Permeabilitätstensor für ein magnetostatisch gesättigtes Medium. **E** permeabilidad tensorial de Polder; permeabilidad tensorial de una sustancia magnetostáticamente saturada. **I** permeabilità tensoriale di Polder; permeabilità tensoriale di un materiale magnetostaticamente saturo. **N** tensorpermeabiliteit voor een statisch verzadigd medium. **P** przenikalność magnetyczna tensorowa Poldera; przenikalność magnetyczna tensorowa dla środowiska nasyconego statycznie. **S** Polders tensorpermeabilitet. (221)

19. **pulse permeability** (μ_p) : the relative permeability obtained from the total change of magnetic flux density and the corresponding change of the magnetic field strength when either quantity is alternating with an arbitrary wave-form between stated limits:

$$\mu_p = \frac{1}{\mu_0}\frac{\Delta B}{\Delta H}$$

Notes. 1 — The value of the pulse permeability depends strongly on the limits of the flux density or field strength excursions ; these limits need not be symmetrical with respect to zero. *2* — Often pulse permeability refers to the special case of rectangular voltage pulses being applied to an exciting winding, the flux density waveform is then approximately triangular provided saturation is not approached. ★ perméabilité impulsionnelle → *perméabilité 20.* **R** импульсная магнитная проницаемость. **D** Impuls-Permeabilität. **E** permeabilidad impulsional. **I** permeabilità impulsiva. **N** impulspermeabiliteit. **P** przenikalność magnetyczna impulsowa. **S** pulspermeabilitet. (221)

20. **recoil permeability** (μ_{rec}) : the permeability corresponding to the slope of the recoil line. ★ perméabilité de recul → *perméabilité 17.* **R** магнитная проницаемость возврата. **D** Permeabilität der rückläufigen Schleifen; permanente Permeabilität. **E** permeabilidad de retroceso. **I** permeabilità di ritorno. **N** teruglooppermeabiliteit. **P** przenikalność magnetyczna powrotu. **S** återgångspermeabilitet. (221)

21. **relative complex permeability** : for a sinusoidal wave and using complex notation, the scalar $\tilde{\mu}_r$ or the tensor quantity $\underline{\tilde{\mu}}_r$, generally frequency-dependent, defined by the equation :

$$\vec{B} = \mu_0 \mu_r \vec{H} \quad \text{or} \quad \vec{B} = \mu_0 \underline{\tilde{\mu}}_r \vec{H}$$

in a medium where the magnetic flux density vector $\vec{B}$ and the magnetic field vector $\vec{H}$ are linearly related, μ_0 being the magnetic constant. *Note.* — For an isotropic medium $\tilde{\mu}_r$ is generally expressed as :

$$\mu_r = \mu_r' - j\,\mu_r''$$

where μ_r' is the relative real permeability and μ_r'' represents the magnetic losses. ★ perméabilité relative complexe → *perméabilité 24.* **D** komplexe Permeabilitätszahl; komplexe relative Permeabilität. **P** przenikalność magnetyczna względna zespolona. (705)

22. **relative permeability** (μ_r) : the ratio of the absolute permeability of a substance to the magnetic constant. ★ perméabilité relative → *perméabilité 23.* **R** относительная магнитная проницаемость. **D** Permeabilitätszahl. **E** permeabilidad relativa. **I** permeabilità relativa. **N** relatieve permeabiliteit. **P** przenikalność magnetyczna (względna). **S** relativ permeabilitet. (121,221,705)

23. **relative (real) permeability** : the real part μ_r' of the relative complex permeability $\tilde{\mu}_r$ of an isotropic medium. ★ perméabilité relative (réelle) → *perméabilité 25.* **D** (reelle) Permeabilitätszahl; (reelle) relative Permeabilität. **P** przenikalność magnetyczna względna rzeczywista. (705)

24. **reversible permeability** (μ_{rev}) : the limiting value of the incremental permeability when the alternating magnetic field strength tends to zero:

$$\mu_{rev} = \lim_{H \sim \to 0} \mu_\Delta$$

★ perméabilité réversible → *perméabilité 26.* **R** обратимая магнитная проницаемость. **D** reversible Permeabilität. **E** permeabilidad reversible. **I** permeabilità reversibile. **N** omkeerbare permeabiliteit; reversibele permeabiliteit. **P** przenikalność magnetyczna odwracalna. **S** reversibel permeabilitet. (221)

25. **r.m.s. amplitude permeability** : → *amplitude 38*

26. **scalar permeability for circularly polarized fields** (symb. : μ_+, μ_-) : of a material saturated by a magnetostatic field, the complex permeability when it is subjected to an electromagnetic wave having a circularly polarized H field component in the plane perpendicular to the magnetostatic field strength:

$$\mu_+ = \mu_r + \kappa_r$$
$$\mu_- = \mu_r - \kappa_r$$

where μ_r and κ_r are components of Polder's tensor permeability. *Note.* — The subscript of μ corresponds to the sign in the mathematical expression; μ_+ is applicable where H field rotates counterclockwise as a function of time when seen in the direction of the applied magnetostatic field; μ_- is applicable to the reverse rotation. ★ perméabilité scalaire pour des champs à polarisation circulaire → *perméabilité 28.* **R** скалярная магнитная проницаемость для поляризованных по кругу полей. **D** skalare Permeabilität für zirkular polarisierte Felder. **E** permeabilidad escalar para campos de polarización circular. **I** permeabilità scalare per campi a polarizzazione circolare. **N** scalaire permeabiliteit voor cirkelvormig gepolariseerde velden. **P** przenikalność magnetyczna skalarna dla pola spolaryzowaneago kołowo. **S** skalär permeabilitet för cirkulärpolariserat fält. (221)

27. **temperature coefficient of effective permeability** : → *coefficient 71*

28. **temperature coefficient of permeability** : → *coefficient 74*

29. **tensor permeability** (symb. : $\underline{\mu}$) : the tensor quantity giving the relation between the space vectors representing the magnetic flux density and the magnetic field strength inside a material:

$$\underline{\mu} = \begin{pmatrix} \mu_{xx} & \mu_{xy} & \mu_{xz} \\ \mu_{yx} & \mu_{yy} & \mu_{yz} \\ \mu_{zx} & \mu_{zy} & \mu_{zz} \end{pmatrix}$$

★ perméabilité tensorielle → *perméabilité 29.* **R** тензорная магнитная проницаемость. **D** Permeabilitätstensor. **E** permeabilidad tensorial. **I** permeabilità tensoriale. **N** tensorpermeabiliteit. **P** przenikalność magnetyczna tensorowa. **S** tensorpermeabilitet. (221)

30. **tensor permeability for a magnetostatically saturated medium** (*Syn.* Polder's tensor permeability) : → *permeability 18*

31. **water vapour permeability** : the amount of water vapour passing through a specimen in unit time under specified conditions. ★ perméabilité à la vapeur d'eau → *perméabilité 9.* **R** проницаемость водяного пара. **D** Wasserdampf-Durchlaessigkeit. **E** permeabilidad al vapor de agua. **I** permeabilità al vapore d'acqua. **N** waterdampdoorlaatbaarheid. **P** przenikalność pary wodnej. **S** ånggenomsläpplighet. (212)

permeameter

1. **permeameter** : an apparatus used to determine the relation between the magnetic flux density and the magnetic field strength in a sample of magnetic material which may be in the form of a stack of flat strips, a flat rectangular bar or a straight rod and which is placed centrally in a coil former carrying test windings of the apparatus, the ends of the sample protruding beyond the coil former so that the magnetic circuit may be completed with one or more yokes. ★ perméamètre → *perméamètre 1.* **R** пермеаметр. **D** Permeameter. **E** permeámetro. **I** permeametro. **N** permeameter. **P** permeametr. **S** permeameter. (221,301)

permeance

1. **permeance** : the reciprocal of reluctance. ★ perméance → *perméance 1.* **R** магнитная проводимость. **D** Permeanz; magnetischer Leitwert. **E** permeancia. **I** permeanza. **N** permeantie. **P** permeancja. **S** permeans. (131)

permissible

1. **maximum permissible a.c. current of a capacitor** : → *current 123*
2. **maximum permissible a.c. voltage of a capacitor** : → *voltage 107*
3. **permissible luminaire** : → *luminaire 18*

permissive

1. **permissive overreach distance protection system** : → *system 141*
2. **permissive protection system** : → *system 142*
3. **permissive underreach distance protection system** : → *system 143*

permitted

1. **maximum permitted gap** : → *gap 18*
2. **permitted band** : → *band 29*

permittivity

1. **(absolute) permittivity** : the quantity whose product by the electric field strength is the electric flux density. *Note.* — For isotropic media, the permittivity is a scalar; for anisotropic media, a matrix. ★ permittivité (absolue) → *permittivité 1.* R абсолютная диэлектрическая проницаемость. D Permittivität. E permitividad (absoluta). I permettività (assoluta). N (absolute) permittiviteit. P przenikalność elektryczna (bezwzględna). S absolut permittivitet. (121,212,705)
2. **absolute permittivity of vacuum** (*Syn.* electric constant) : → *constant 18*
3. **complex permittivity** : the permittivity in complex representation, under steady sinusoidal field conditions. *Note.* — The relative complex permittivity is usually expressed as :

$$\underline{\varepsilon}_r = \varepsilon'_r - j\,\varepsilon''_r = \varepsilon_r \exp(-j\,\delta)$$

where ε'_r and ε''_r have positive values, and

$$\tan\delta = \frac{\varepsilon''_r}{\varepsilon'_r}$$

$\underline{\varepsilon}_r$ is customarily quoted either in terms of ε'_r and ε''_r, or in terms of ε_r and $\tan\delta$. If $\varepsilon'_r \gg \varepsilon''_r$ then $\varepsilon_r \approx \varepsilon'_r$ which are both called relative permittivity. ε''_r is termed *loss index* and $\tan\delta$ is termed dielectric dissipation factor. ★ permittivité complexe → *permittivité 3.* R комплексная диэлектрическая проницаемость. D komplexe Permittivitaet. E permitividad compleja. I permettività complessa. N complexe permittiviteit. P przenikalność elektryczna względna zespolona. S komplex permittivitet. (212)
4. **relative complex permittivity** : for a sinusoidal wave and using complex notation, the scalar quantity $\underline{\varepsilon}_r$ or tensor quantity $\underline{\underline{\varepsilon}}_r$, generally frequency dependent, defined by the equation :

$$\underline{\vec{D}} = \varepsilon_0\,\underline{\varepsilon}_r\,\underline{\vec{E}} \quad \text{or} \quad \underline{\vec{D}} = \varepsilon_0\,\underline{\underline{\varepsilon}}_r\,\underline{\vec{E}}$$

in a medium where the electric flux density vector $\underline{\vec{D}}$ and the electric field vector $\underline{\vec{E}}$ are linearly related, ε_0 being the electric constant. *Notes. 1* — The relative complex permittivity is a scalar quantity in an isotropic medium and a tensor quantity in an anisotropic medium. *2* — In an isotropic medium, $\underline{\varepsilon}_r$ is generally expressed as

$$\underline{\varepsilon}_r = \varepsilon'_r - j\,\varepsilon''_r$$

where ε'_r is the relative real permittivity, and ε''_r represents both dielectric losses and losses due to conductivity σ, the part due to conductivity being equal to $\sigma/\varepsilon_0\,\omega$, where ω is the angular frequency. ★ permittivité relative complexe → *permittivité 5.* D komplexe Permittivitätszahl; komplexe relative Permittivität. P przenikalność elektryczna względna zespolona. (705)
5. **relative permittivity** : the ratio of the absolute permittivity to the electric constant ε_0. *Notes. 1* — In the case of constant fields and alternating fields of sufficiently low frequency the relative permittivity of an isotropic or quasi-isotropic dielectric is equal to the ratio of the capacitance of a capacitor, in which the space between and around the electrodes is entirely and exclusively filled with the dielectric, to the capacitance of the same configuration of electrodes in vacuum. *2* — In practical engineering, it is usual to employ the term permittivity when referring to relative permittivity. ★ permittivité relative → *permittivité 4.* R относительная диэлектрическая проницаемость. D Permittivitätszahl; relative Permittivität. E permitividad relativa. I permettività relativa. N relatieve permittiviteit. P przenikalność elektryczna względna. S relativ permittivitet. (121,212,705)
6. **(relative) (real) permittivity** : real part ε'_r of the relative complex permittivity $\underline{\varepsilon}_r$ of an isotropic medium. ★ permittivité (relative) (réelle) → *permittivité 6.* D (reelle) Permittivitätszahl; (reelle) relative Permittivität. P przenikalność elektryczna (rzeczywista). (705)
7. **static permittivity** : the permittivity under steady direct field conditions. ★ permittivité statique → *permittivité 7.* R статическая диэлектрическая проницаемость. D statische Permittivität. E permitividad estática. I permettività statica. N statische permittiviteit. P przenikalność elektryczna statyczna. S statisk permittivitet. (212)

perpendicular

1. **perpendicular magnetization** : → *magnetization 7*

persistence

1. **persistence** (*Syn.* after-glow) : the continuation of luminance after the excitation has been reduced or removed. ★ persistance → *persistance 4.* R послесвечение (экрана). D Nachleuchten. E persistencia. I persistenza. N nalichten. P poświata; fosforescencja. S efterlysning. (531)
2. **persistence characteristic** : → *characteristic 63*
3. **time of persistence** : → *time 196*
4. **(von Kries') persistence law** : → *law 14*

persistent

1. **persistent command** : → *command 14*
2. **persistent fault** : → *fault 66*
3. **persistent information** : → *information 23*
4. **persistent regulating command** : → *command 15*

person

1. **one person operation** (*Syn.* one man operation) : → *operation 36*

personal

1. **miner's (personal) lamp** : → *lamp 41*
2. **personal dose** : → *dose 40*
3. **personal dosemeter** : → *dosemeter 12*
4. **personal exposure meter** : → *exposure meter 7*
5. **personal monitoring** : → *monitoring 14*
6. **photoluminescent personal dosemeter** : → *dosemeter 13*
7. **photoluminescent personal exposure meter** : → *exposure meter 8*
8. **thermoluminescent personal dosemeter** : → *dosemeter 17*
9. **thermoluminescent personal exposure meter** : → *exposure meter 13*

perturbograph

1. **perturbograph** (*Syn.* disturbance recorder) : → *recorder 4*

perveance

1. **diode perveance** : the quotient of the space-charge-limited cathode current by the three-halves power of the anode voltage. ★ pervéance de diode → *pervéance 2.* R первеанс диода. D Diodenperveanz. E perveancia de diodo. I perveanza di diodo. N diodeperveantie. P perweancja diody. S diodperveans. (531)
2. **perveance** : the quotient of the mean convection current by the three-halves power of the voltage that corresponds to the mean kinetic energy of the charge carriers within a stated cross-section of the beam, or by the three-halves power of the voltage of the accelerating electrode. *Note.* — The perveance is a characteristic parameter of an electron gun. ★ pervéance → *pervéance 1.* R постоянная пространственного заряда. D Perveanz. E perveancia. I perveanza. N perveantie. P perweancja. S perveans. (531,841)

PFM

1. **PFM** (*Syn.* pulse frequency modulation) : → *modulation 52*

P-gate

1. **P-gate thyristor** : → *thyristor 4*

pH

1. **pH** : a number quantifying the acid or the alkaline character of a solution, conventionally expressed by the decimal logarithm of the ratio of the ion activity of a hydrogen cation under standardized conditions to the actual ion activity of the same cation. *Note.* — Aqueous solutions with a pH : -less than 7 are

acid ; - equal to 7 are neutral : - greater than 7 are alkaline. ★ pH → *pH 1.* R пХ. D pH-Wert. E pH. I pH. N pH. P pH. S pH-värde; pH. (111)

phantom

1. **double phantom circuit** : → *circuit 61*
2. **earth-return double phantom circuit** : → *circuit 64*
3. **earth-return phantom circuit** : → *circuit 65*
4. **phantom circuit** : → *circuit 136*
5. **phantom (radiology)** : a volume of material behaving in essentially the same manner as tissue of the same dimensions, with respect to absorption and scattering of the radiation in question, used for dosimetry or for the evaluation of radiographic images in diagnostic radiology and nuclear medicine. ★ fantôme (radiologique) → *fantôme 4.* R фантом (радиология). D Phantom in der Radiologie. E fantoma (radiología). I fantoccio (radiologico). N fantoom (radiologie). P fantom. S fantom. (881)
6. **sun phantom** : false light signal created by radiation from the sun striking a signal light. ★ feu fantôme → *feu 28.* R ложный сигнал. D Phantomlicht. E luz fantasma. I luce fantasma. N fantoomeffect. P złudzenie słoneczne. S spökljus. (845)

phase

1. **acoustic phase coefficient** : → *coefficient 2*
2. **associated phase layout** : → *layout 1*
3. **asymmetrical phase control** : → *control 6*
4. **character in phase** : → *character 6*
5. **data transfer phase** : that phase of a data call during which user's data signals may be transferred between data terminal equipments which are interconnected via the network. ★ phase de transfert de données → *phase 73.* R фаза передачи данных. D Datentransferphase. E fase de transferencia de datos. I fase di trasferimento dati. N data-overdrachtfase. P faza wymiany danych. S dataöverföringsfas. (721)
6. **dead phase** (of an arc furnace) (*Syn.* lagging phase (of an arc furnace)) : the circuit phase in which the arc power is diminished as a result of asymmetry of the impedances in the three-phase circuit of an arc furnace. ★ phase morte → *phase 75.* R «мертвая» фаза (дуговой печи); отстающая фаза. D tote oder nacheilende Phase (eines Lichtbogenofens). E fase muerta (de un horno de arco); fase retrasada (de un horno de arco). I fase morta (di un forno ad arco). N gedempte fase (van een boogoven). P martwa faza (pieca łukowego). S död fas. (841)
7. **differential phase distortion** : → *distortion 27*
8. **differential phase shift keying** : → *keying 2*
9. **effective turns per phase** : → *turn 2*
10. **(electronic) phase convertor** : → *convertor 21*
11. **generalized phase control** : → *control 112*
12. **(instantaneous) phase deviation** : → *deviation 10*
13. **lagging phase** (*Syn.* dead phase) : → *phase 6*
14. **leading phase** (*Syn.* wild phase) : → *phase 110*
15. **mean phase difference between related information** : → *difference 20*
16. **minimum (phase frequency) shift keying** : → *keying 5*
17. **mixed phase layout** : → *layout 2*
18. **multiple phase shift keying** : → *keying 6*
19. **negative phase difference** : → *difference 21*
20. **network control phase** : the phase of a data communication during which network control signals are exchanged between data terminal equipment and the network for the purpose of call establishment, call disconnection or for control signalling during the data transfer phase. ★ phase de commande du réseau → *phase 72.* R фаза управления сетью. D Netzsteuerphase. E fase de control de red. I fase di comando della rete. N netwerkbesturingsfase. P faza sygnalizacji sieciowej. S nätstyrningsfas. (721)
21. **peak (phase) deviation** : → *deviation 13*
22. **peak to peak phase difference between related information** : → *difference 24*
23. **phase** : the argument $\omega t + \alpha$ of a sinusoidal quantity $A \cos(\omega t + \alpha)$ or $A \sin(\omega t + \alpha)$ *Note.* — term α is called phase-angle. ★ phase → *phase 68.* R фаза. D Phasenwinkel. E fase. I fase. N fase. P faza. S fas. (101)
24. **phase** (of a polyphase circuit) : the subgraph iterated m times on the polyphase circuit. ★ phase → *phase 69.* R фаза (многофазной цепи). D Strang eines Mehrphasenstromkreises. E fase (de un circuito polifásico). I fase (di un circuito polifase). N fase. P faza (obwodu wielofazowego). S fas (i flerfassystem); fas (i m-fassystem). (131)
25. **phase** : the designation of any conductor, bundle of conductors, terminal, winding or any other element of a polyphase system, which is intended to be energized under normal use. ★ phase → *phase 70.* R фаза. D Aussenleiter. E fase. I fase. N fase. P fazowy. S fas. (601)
26. **phase** (of a signal) : the argument $\varphi(t)$ of the analytic signal representing a real signal f(*t*), written in the form :

$$f(t) + j\,g(t) = A(t)\,e^{j\varphi(t)}$$

★ phase → *phase 71.* R фаза (сигнала). D Phasenwinkel (eines Signals). E fase de una señal. I fase (di un segnale). N fase (van een signaal). P faza (sygnału). S fas. (702)

27. **phase advancer** : → *advancer 1*
28. **phase/amplitude distortion** : → *distortion 57*
29. **phase angle** : → *angle 45*
30. **phase angle** : → *angle 46*
31. **phase centre** : → *centre 16*
32. **phase changer** (*Syn.* phase shifter) : → *phase-shifter 6*
33. **phase coil insulation** : → *insulation 46*
34. **phase comparator relay** : → *relay 28*
35. **phase comparison protection system** : → *system 144*
36. **phase constant** (*Syn.* phase-change coefficient) : → *coefficient 44*
37. **phase control** : → *control 136*
38. **phase control** : → *control 137*
39. **phase control factor** : → *factor 133*
40. **phase convertor** : → *convertor 35*
41. **phase convertor** : → *convertor 36*
42. **phase delay** : → *delay 34*
43. **phase delay time** : → *delay-time 5*
44. **phase demodulation** : → *demodulation 7*
45. **phase detector** : → *detector 22*
46. **phase diagram** (*Syn.* phase pattern) : → *pattern 22*
47. **phase difference** : → *difference 25*
48. **phase difference** (*Syn.* phase displacement) : → *displacement 13*
49. **phase displacement** : → *displacement 12*
50. **phase displacement** : → *displacement 13*
51. **phase distortion** : → *distortion 58*
52. **phase equalization** : → *equalization 7*
53. **phase/frequency characteristic** : → *characteristic 64*
54. **phase/frequency distortion** : → *distortion 59*
55. **phase insulated terminal box** : → *terminal box 4*
56. **phase interference** : → *interference 18*
57. **phase inversion modulation** : → *modulation 44*
58. **phase inversion modulation** : → *modulation 45*
59. **(phase) lag** : → *lag 3*
60. **phase lag** (*Syn.* positive phase difference) : → *difference 27*
61. **(phase) lead** : → *lead 11*
62. **phase lead** (*Syn.* negative phase difference) : → *difference 21*
63. **phase margin** : → *margin 14*
64. **phase meter** : → *meter 40*
65. **phase modulation** : → *modulation 46*
66. **phase (of an a.c. line)** : the designation of any conductor, or bundle of conductors, of a polyphase a.c. line which is intended to be energized under normal use. ★ phase (d'une ligne à courant alternatif) → *phase 74.* R фаза (линии электропередачи переменного тока). D Aulenleiter (einer Wechsel- oder Drehstromleitung). E fase (de una línea de corriente alterna). I fase (di una linea a corrente alternata). N fase (van een wisselstroomlijn). P faza (linii prądu przemiennego). S fas. (466)
67. **phase path length** (*Syn.* optical path length) : → *length 24*
68. **phase pattern** : → *pattern 20*
69. **phase pattern** : → *pattern 21*

70. **phase pattern** : → *pattern 22*
71. **phase relationship** : → *relationship 1*
72. **phase relationship** : → *relationship 2*
73. **phase segregated terminal box** : → *terminal box 5*
74. **phase separated terminal box** : → *terminal box 6*
75. **phase sequence indicator** : → *indicator 16*
76. **phase shift** : → *shift 26*
77. **phase shift** : → *shift 27*
78. **phase shift keying** : → *keying 8*
79. **phase shift modulation** (*Syn.* phase shift keying) : → *keying 8*
80. **phase shift signalling** (*Syn.* phase shift keying) : → *keying 8*
81. **phase sound spectrum** : → *spectrum 22*
82. **phase spectrum** : → *spectrum 23*
83. **phase swinging** : → *swinging 1*
84. **phase to neutral voltage** : → *voltage 141*
85. **phase velocity** : → *velocity 13*
86. **phase velocity** : → *velocity 14*
87. **phase velocity** : → *velocity 15*
88. **phase velocity** : → *velocity 16*
89. **phase velocity (vector)** : → *velocity 17*
90. **phase winding** : → *winding 44*
91. **positive phase difference** : → *difference 27*
92. **quadrature phase modulation** (*Syn.* quadrature phase shift keying) : → *keying 9*
93. **quadrature phase shift keying** : → *keying 9*
94. **reactor start split phase motor** : → *motor 79*
95. **resistance start split phase motor** : → *motor 82*
96. **rotary phase changer** : → *changer 9*
97. **separated phase layout** : → *layout 3*
98. **sequential order of the phases** : → *order 6*
99. **sequential phase control** : → *control 166*
100. **(set of) components of a polyphase (or *m*-phase) linear quantity** : → *component 50*
101. **single phase automatic reclosing control equipment** (*Syn.* single pole automatic reclosing control equipment) : → *equipment 69*
102. **space phase difference** : → *difference 28*
103. **split phase motor** : → *motor 97*
104. **sub-channel phase transmission** : → *transmission 64*
105. **symmetrical phase control** : → *control 182*
106. **termination phase control** : → *control 189*
107. **transducer phase** : the phase difference between the output of a given filter with a specified load impedance and the source connected to its input. ★ déphasage de transmission → *déphasage 7.* R рабочая фаза. D Betriebsphasenmass. E desfase de transmisión. I sfasamento di trasmissione. N faseverschil tussen uitgangs- en bronsignaal. P przesuwność skuteczna (filtru). S inlänkningsfasskift. (561)
108. **vapour phase axial deposition technique** : → *technique 17*
109. **voltage phase control** : → *control 202*
110. **wild phase** (of an arc furnace) (*Syn.* leading phase (of an arc furnace)) : the circuit phase in which the arc power is increased as a result of asymmetry of the impedances in the three-phase circuit of an arc furnace. ★ phase sauvage → *phase 76.* R «дикая» фаза (дуговой печи); определяющая фаза. D scharfe oder voreilende Phase (eines Lichtbogenofens). E fase salvaje (de un horno de arco); fase avanzada (de un horno de arco). I fase selvaggia (di un forno ad arco). N onstabiele fase (van een boogoven). P dzika faza (pieca łukowego). S vild fas. (841)
111. **zero phase reference** : → *reference 76*

phase-change

1. **phase-change coefficient** : → *coefficient 44*

phased

1. **phased array antenna** : → *antenna 90*

phase-sequence

1. **negative phase-sequence impedance** : → *impedance 41*
2. **negative phase-sequence reactance** : → *reactance 10*
3. **negative phase-sequence resistance** : → *resistance 40*
4. **phase sequence indicator** : → *indicator 16*
5. **phase-sequence test** : → *test 60*
6. **positive phase-sequence reactance** : → *reactance 11*
7. **positive phase-sequence resistance** : → *resistance 42*
8. **zero phase-sequence impedance** : → *impedance 69*
9. **zero phase-sequence reactance** : → *reactance 20*
10. **zero phase-sequence resistance** : → *resistance 76*

phase-shift

1. **differential phase-shift** (of a non-reciprocal phase-shifter) : the difference in phase-shift between the two directions of propagation in a non-reciprocal phase-shifter. *Note.* — The use of this term for other types of phase difference such as between states in a digital phase-shifter is deprecated. ★ déphasage différentiel → *déphasage 8.* R невзаимный фазовый сдвиг (в невзаимном фазовращателе). D Phasenverschiebungsdifferenz (eines nicht-reziproken Phasenschiebers). E desfase diferencial (de un desfasador no recíproco). I sfasamento differenziale (di uno sfasatore non-reciproco). N differentiële faseverschuiving. P przesunięcie fazy różnicowe. S fasändringsskillnad. (221,726)
2. **phase shift keying** : → *keying 8*
3. **phase shift modulation** (*Syn.* phase shift keying) : → *keying 8*
4. **phase shift signalling** (*Syn.* phase shift keying) : → *keying 8*
5. **phase-shift circulator** : → *circulator 9*

phase-shifter

1. **analogue phase shifter** : a non-reciprocal phase shifter by which the amount of phase-shift may be changed continuously. ★ déphaseur analogique → *déphaseur 4.* R аналоговый фазовращатель. D analoger Phasenschieber. E desfasador analógico. I sfasatore analogico. N analoge fasedraaier. P przesuwnik fazy analogowy. S analog fasändrare. (726)
2. **digital phase shifter** : a non-reciprocal phase shifter by which the amount of phase-shift may be changed step-wise. ★ déphaseur numérique → *déphaseur 8.* R цифровой фазовращатель. D digitaler Phasenschieber. E desfasador digital. I sfasatore numerico. N digitale fasedraaier. P przesuwnik fazy cyfrowy. S digital fasändrare. (726)
3. **magnetic phase shifter** (for trigger equipment) : a transductor utilized as a phase shifter for trigger equipment. ★ déphaseur magnétique → *déphaseur 6.* R магнитный фазорегулятор (для переключающих приборов). D magnetischer Phasenschieber. E defasador magnético (para equipos de disparo). I sfasatore magnetico. N magnetische faseverschuiver. P przesuwnik fazy magnetyczny. S magnetisk fasvinkelgivare (för styrutrustningar). (431)
4. **non-reciprocal phase-shifter** : a two-port device whose propagation medium provides different phase shifts for the two directions of propagation. *Note.* — The amount of phase-shift may be changed continuously (analogue phase-shifter) or step-wise (digital phase-shifter). ★ déphaseur non réciproque → *déphaseur 7.* R невзаимный фазовращатель. D nicht-reziproker Phasenschieber. E desfasador no recíproco; desfasador director. I sfasatore non-reciproco; sfasatore direzionale. N onomkeerbare faseverschuiving. P przesuwnik fazy nieodwracalny. S irreciprok fasändrare. (221,726)
5. **phase shifter** : an electric transducer that introduces a phase change between input and output. ★ déphaseur → *déphaseur 2.* R фазовращатель. D Phasenschieber. E desfasador. I sfasatore. N faseverschuiver. P przesuwnik fazy. S fasändrare. (151)
6. **phase shifter** (*Syn.* phase changer) : a linear two-port device for supplying at each frequency in a given frequency band sinusoidal output signals having a specified phase difference relative to the phase of the sinusoidal input signals without modifying the other characteristics of the signal, in particular the amplitude/frequency characteristic. ★ déphaseur → *déphaseur 3.* R фазовращатель. D Phasenschieber; Phasenwechsler. E defasador; cambiador de fase. I sfasatore. N faseverschuiver. P przesuwnik fazy. S fasändrare. (702,726)
7. **phase-shifter tube** : → *tube 62*
8. **rotary phase shifter** (*Syn.* rotary phase changer) : → *changer 9*

phase-to-earth

1. **phase to earth voltage** : → *voltage 140*
2. **phase-to-earth clearance** : → *clearance 14*
3. **phase-to-earth fault** : → *fault 67*
4. **phase-to-earth overvoltage per unit** : → *overvoltage 10*

phase-to-phase

1. **phase to phase voltage** : → *voltage 142*
2. **phase-to-phase clearance** : → *clearance 15*
3. **phase-to-phase fault (clear of earth)** : → *fault 68*
4. **phase-to-phase overvoltage per unit** : → *overvoltage 11*
5. **phase-to-phase spacing** : → *spacing 2*

phasing

1. **channel phasing** : the correct connection of stereophonic reproducing equipment so that signals applied in phase to the input of both channels are in phase at corresponding points in each channel. ★ mise en phase des voies → *mise 10.* R фазировка каналов. D Kanalpolung. E puesta en fase de canales. I messa in fase dei canali. N in-fase-aansluiting. P fazowanie kanałów. S kanalfasning. (806)
2. **phasing** (in facsimile) : aligning a specified point of the scanning field at the receiver with the corresponding point at the transmitter so as to ensure the correct page layout of the picture on the recording medium. ★ mise en phase → *mise 9.* R фазирование (в факсимильной связи). D Einphasen (bei Faksimile). E puesta en fase (en telecopia). I messa in fase su bianco. N ..... P fazowanie (w symilografii). S fasning. (721)
3. **phasing on black** : → *black 14*
4. **phasing on white** : → *white 4*
5. **phasing signal** : → *signal 139*

phasor

1. **phasor** : a complex quantity $\underline{A} = A \cdot e^{j\alpha}$ or $\underline{\hat{A}} = \hat{A} \cdot e^{j\alpha}$ whose argument is equal to the phase angle and whose modulus is equal either to the r.m.s. value A, or to the amplitude $\hat{A}$ of a sinusoidal quantity

$$a = A \cdot \sqrt{2} \cdot \cos(\omega t + \alpha) = \hat{A} \cdot \cos(\omega t + \alpha).$$

★ phaseur → *phaseur 1.* R фазор (комплексная амплитуда, комплексное действующее значение). D Zeiger. E fasor. I ..... N fasor. P wskaz. S visare. (101)

2. **phasor** (*Syn.* complexor) : → *complexor 1*

phenomenon

1. **Abney phenomenon** : change of hue produce by decreasing the purity of a colour stimulus while keeping its dominant wavelength and luminance constant. ★ phénomène d'Abney → *phénomène 1.* R явление Эбни. D Bezold-Abney-Phänomen. E fenómeno de Abney. I fenomeno di Abney. N verschijnsel van Abney. P zjawisko Abneya. S Abneys fenomen. (845)
2. **Bezold-Brücke phenomenon** : change of hue produced by changing the luminance (within the range of photopic vision) of a colour stimulus while keeping its chromaticity constant. *Note.* — With certain monochromatic stimuli, hue remains constant over a wide range of luminances (for a given condition of adaptation). The wavelengths of these stimuli are sometimes referred to as invariant wavelengths. ★ phénomène de Bezold-Brücke → *phénomène 2.* R явление Бецольда-Брюкке. D Bezold-Brücke-Phänomen. E fenómeno de Bezold-Brücke. I fenomeno di Bezold-Brücke. N verschijnsel van Bezold en Brücke. P zjawisko Bezolda-Brückego. S Bezold-Brückes fenomen. (845)
3. **Helmholtz-Kohlrausch phenomenon** : change in brightness of perceived colour produced by increasing the purity of a colour stimulus while keeping its luminance constant within the range of photopic vision. *Note.* — For related perceived colours, a change in lightness can also accur when the purity is increased while keeping the luminance factor of the colour stimulus constant. ★ phénomène d'Helmholtz-Kohlrausch → *phénomène 5.* R явление Гельмгольца-Кольрауша. D Helmholtz-Kohlrausch-Phänomen. E fenómeno de Helmholtz-Kohlrausch. I fenomeno di Helmholtz-Kohlrausch. N verschijnsel van Helmholtz en Kohlrausch. P zjawisko Helmholtza-Kohlrauscha. S Helmholtz-Kohlrauschs fenomen. (845)
4. **Purkinje phenomenon** : reduction in the brightness of a predominantly long-wavelength colour stimulus relative to that of a predominantly short-wavelength colour stimulus when the luminances are reduced in the same proportion from photopic to mesopic or scotopic levels without changing the respective relative spectral distributions of the stimuli involved. *Note.* — In passing from photopic to mesopic or scotopic vision, the spectral luminous efficiencies change, the wavelength of maximum efficiency being displaced towards the shorter wavelenths. ★ phénomène de Purkinje → *phénomène 4.* R эффект Пуркине. D Purkinje-Phänomen. E fenómeno de Purkinje. I fenomeno di Purkinje. N verschijnsel van Purkinje. P zjawisko Purkinjego. S Purkinjes fenomen. (845)

philosophy

1. **maintenance philosophy** : a system of principles for the organization and execution of the maintenance. ★ doctrine de maintenance → *doctrine 1.* R стратегия технического обслужнвания и ремонта. D Instandhaltungssystematik. E filosofía de mantenimiento. I filosofia di manutenzione. N onderhoudsfilosofie. P zasady obsługi. S underhållspolicy. (191)

phon

1. **phon** : unit of loudness level, judged or calculated. ★ phone → *phone 1.* R фон. D Phon. E fono. I phon. N foon. P fon. S phon. (801)

phone

1. **public pay phone** (*Syn.* public call office) : → *office 1*

phonetically

1. **phonetically balanced word list** : → *list 2*

phonograph

1. **phonograph** (*Syn.* gramophone) : → *gramophone 1*

phonon

1. **phonon** : a quantum of mechanical vibratory energy with particle-like characteristics. ★ phonon → *phonon 1.* R фонон. D Phonon. E fonón. I fonone. N fonon. P fonon. S fonon. (111)

phosphor

1. **phosphor** : special material which emits light, generally coloured, when bombarded by an electron beam or under the influence of an electromagnetic field. ★ luminophore → *luminophore 1.* R люминофор. (723)
2. **phosphor** (*Syn.* luminophor) : → *luminophor 1*

phosphorescence

1. **phosphorescence** : photoluminescence delayed by storage of energy in an intermediate energy level. *Notes. 1* — For organic substances, the term phosphorescence applies generally to triplet-singlet transitions. *2* — This term is sometimes used as a loose expression to designate other types of luminescence. ★ phosphorescence → *phosphorescence 1.* R фосфоресценция. D Phosphoreszenz. E fosforescencia. I fosforescenza. N fosforescentie. P fosforescencja. S fosforescens. (845)
2. **phosphorescence** : luminescence that continues for an appreciable time after excitation. ★ phosphorescence → *phosphorescence 2.* R фосфоресценция. D Phosphoreszenz. E fosforescencia. I fosforescenza. N fosforescentie. P fosforescencja. S fosforescens. (881)

photobiology

1. **photobiology** : branch of biology which deals with the effects of optical irradiation on living systems. ★ photobiologie → *photobiologie 1.* R фотобиология. D Photobiologie. E fotobiología. I fotobiologia. N fotobiologie. P fotobiologia. S fotobiologi. (845)

photocathode

1. **photocathode** (*Syn.* photoelectric cathode) : a cathode that functions by photoelectric emission. ★ photocathode → *photocathode 1.* R фотокатод. D Photokathode. E fotocátodo; cátodo fotoeléctrico. I fotocatodo. N fotokathode. P fotokatoda. S fotokatod. (531,881)
2. **photocathode** (in a camera tube) : a semi-transparent photo-sensitive electrode, in certain types of camera tube, on which the optical image is focussed and whose elements emit electrons under the influence of light. ★ photocathode

→ *photocathode 2.* R фотокатод (в передающей трубке). (723)

3. **photocathode** : metallic or semiconducting layer designed for efficient photoemission of electrons and used in a photoelectric detector. ★ photocathode → *photocathode 3.* R фотокатод. D Photokathode. E fotocátodo. I fotocatodo. N fotokathode. P fotokatoda; katoda fotoelektryczna. S fotokatod. (845)
4. **(photocathode) sensitivity** : → *sensitivity 16*

photoconductive

1. **photoconductive camera tube** : → *camera tube 7*
2. **photo-conductive camera tube** : → *camera tube 8*
3. **photoconductive cell** : → *cell 26*
4. **photoconductive cell** (*Syn.* photoresistor) : → *photoresistor 1*
5. **photoconductive effect** : → *effect 51*

photo-conductivity

1. **photo-conductivity** (*Syn.* internal photo-electric effect) : a photo-electric effect characterized by a variation of electrical conductivity. ★ photoconductivité → *photoconductivité 1.* R фотопроводимость; внутренний фотоэлектрический эффект. D Photoleitfähigkeit; interner photoelektrischer Effekt. E fotoconductividad; efecto foto-eléctrico interno. I foto-conduttività; effetto foto-elettrico interno. N fotogeleidbaarheid. P zjawisko fotoelektryczne wewnętrzne; fotoprzewodność. S fotokonduktiv effekt. (731)

photoconductor

1. **photoconductor** : a substance whose conductivity increases when photons are absorbed. ★ photoconducteur → *photoconducteur 3.* R фотопроводник. D Photoleiter. E fotoconductor. I fotoconduttore. N fotogeleider. P fotoprzewodnik. S fotoledare. (121)

photocube

1. **multiplier photocube** (*Syn.* photomultiplier tube) : → *tube 64*

photocurrent

1. **photocurrent** (I_{ph}) : that part of the output current of a photoelectric detector which is caused by incident radiation. *Note.* — In photomultipliers a distinction must be made between the cathode photocurrent and the anode photoccurent. ★ courant photoélectrique → *courant 148.* R фототок. D Photostrom. E corriente fotoeléctrica. I corrente fotoelettrica. N fotostroom. P prąd fotoelektryczny. S fotoström. (531,731,845)

photodesensitization

1. **photodesensitization** : process by which a substance or a system becomes less susceptible to photoeffects by the action of another substance or system. ★ photodésensibilisation → *photodésensibilisation 1.* R фотодесенсибилизация. D Photodesensibilisierung. E fotodesensibilización. I fotodesensibilizzazione. N fotodesensibilisatie. P desensybilizacja optyczna; fotodesensybilizacja. S fotodesensibilisering. (845)

photodiode

1. **avalanche photodiode** (*Syn.* APD (acronym)) : a photodiode operating with a bias voltage such that the primary photocurrent undergoes amplification by cumulative multiplication of charge carriers. *Note.* — As the reverse-bias voltage approaches the breakdown voltage, hole-electron pairs created by absorbed photons acquire sufficient energy to create additional hole-electron pairs when they collide with ions. ★ photodiode à avalanche → *photodiode 3.* R лавинный фотодиод; ЛФД (сокращение). D Lawineneffekt-Photodiode. E fotodiodo de avalancha; APD (abreviatura). I fotodiodo a valanga. N lawine-fotodiode. P fotodioda lawinowa. S lavinfotodiod. (731,845)
2. **photodiode** : a photoelectric device in which absorption of electromagnetic radiation in the junction and its neighbourhood or at a contact between a semiconductor and a metal, produces a change of resistance or a change of voltage. ★ photodiode → *photodiode 1.* R фотодиод. D Photodiode. E fotodiodo. I fotodiodo. N fotodiode. P fotodioda. S fotodiod. (521)
3. **photodiode** : photoelectric detector in which a photocurrent is generated by absorption of optical radiation in the neighbourhood of a p-n junction between two semiconductors or a junction between a semiconductor and a metal. ★ photodiode → *photodiode 2.* R фотодиод. D Photodiode. E fotodiodo. I fotodiodo. N fotodiode. P fotodioda; dioda fotoelektryczna. S fotodiod. (731,845)
4. **PIN photodiode** : a photodiode with a large intrinsic region sandwiched between P- and N-doped semiconducting regions used for the detection of optical radiation. *Note.* —Photons absorbed in this region create electron-hole pairs that are then separated by an electric field, thus generating a photocurrent. ★ photodiode PIN → *photodiode 4.* R PIN - фотодиод. D PIN-Photodiode. E fotodiodo PIN. I fotodiodo PIN. N PIN-fotodiode. P fotodioda PIN. S PIN-fotodiod. (731)

photoeffect

1. **photoeffect** : physical, chemical or biological change produced by the interaction of optical radiation with matter. *Note.* — Such changes include photoelectric, photo-optical, photochemical and photobiological effects, but radiant heating is normally not considered a photoeffect. ★ photoeffet → *photoeffet 1.* R фотоэффект. D Photoeffekt. E fotoefecto. I fotoeffetto. N foto-effect. P zjawisko fotoelektryczne. S fotoeffekt. (845)

photoelectric

1. **external photo-electric effect** (*Syn.* photo-emissive effect) : → *effect 55*
2. **internal photo-electric effect** (*Syn.* photo-conductivity) : → *photo-conductivity 1*
3. **mass attenuation coefficient (photoelectric)** : → *coefficient 35*
4. **photoelectric** : applies to electrical phenomena produced by absorption of photons. ★ photoélectrique → *photoélectrique 5.* R фотоэлектрический. D photoelektrisch. E fotoeléctrico. I fotoelettrico. N foto-elektrisch. P fotoelektryczny. S fotoelektrisk. (121)
5. **photoelectric cathode** (*Syn.* photocathode) : → *photocathode 1*
6. **photoelectric detector** : → *detector 23*
7. **photoelectric device** : a device whose essential characteristics are due to the emission of electrons caused by the absorption of photons. ★ dispositif photo-électrique → *dispositif 77.* R фотоэлектрическое устройство. D photoelektrisches Bauelement. E dispositivo fotoeléctrico. I dispositivo fotoelettrico. N foto-elektrisch element. P element fotoelektryczny; przyrząd fotoelektryczny. S fotoelektrisk komponent. (151)
8. **photo-electric effect** : → *effect 52*
9. **photoelectric emission** : → *emission 21*
10. **photoelectric emission** : → *emission 22*
11. **photoelectric peak** : → *peak 43*
12. **photoelectric tube** (*Syn.* photosensitive tube) : → *tube 65*

photoelectron

1. **photoelectron** : the electron ejected from an atom in the photoelectric effect. ★ photoélectron → *photoélectron 1.* R фотоэлектрон. D Photoelektron. E fotoelectrón. I fotoelettrone. N foto-elektron. P fotoelektron. S fotoelektron. (026,881)

photoelement

1. **photoelement** (*Syn.* photovoltaic cell) : photoelectric detector that utilizes the electromotive force produced by the absorption of optical radiation. ★ photopile → *photopile 1.* R вентильный фотоэлемент; фотоэлемент с запирающим слоем. D Photoelement. E célula fotovoltaica. I cellula fotovoltaica. N fotospanningscel. P fotoogniwo; ogniwo fotoelektryczne. S fotoelektromotorisk cell. (845)

photoemissive

1. **photoemissive camera tube** : → *camera tube 9*
2. **photo-emissive camera tube** : → *camera tube 10*
3. **photoemissive cell** (*Syn.* phototube) : → *phototube 2*
4. **photoemissive cell** : → *cell 29*
5. **photoemissive effect** (*Syn.* photoelectric emission) : → *emission 22*
6. **photoemissive effect** : → *effect 54*
7. **photo-emissive effect** : → *effect 55*

photoflash

1. **photoflash lamp** : → *lamp 44*

photoflood

1. **photoflood lamp** : → *lamp 45*

photofluorograph

1. **photofluorograph** : a device by means of which the normal sized image of a fluorescent screen is photographed on a small film. ★ appareil de radiophotographie → *appareil 29.* R флюорограф. D Schirmbildaufnahmegerät. E aparato de radiofotografía; fotofluorógrafo. I schermografo. N schermbeeldtoestel. P aparat do radiofotografii. S skärmbildsapparat. (881)

photofluorography

1. **photofluorography** : photography of an image produced on a fluorescent screen, on film, usually much smaller than the image. ★ radiophotographie → *radiophotographie 3.* R флюорография. D Schirmbildaufnahme. E radiofotografía. I schermografia. N fotoradiografie. P fotofluorografia. S skärmbildsfotografering. (881)

photofraction

1. **photofraction** : for a given photon energy, the ratio of the number of photons detected in the total absorption peak to the total number of photons detected in the same time interval. ★ photofraction → *photofraction 1.* R фоточасть. D Totalabsorptions-Wahrscheinlichkeit. E fotofracción. I fotofrazione. N fotofraktie. P fotofrakcja. S fotobråkdel. (391)

photograph

1. **photograph facsimile telegram** : → *telegram 3*

photo-ionization

1. **photo-ionization** : ionization of atoms or molecules due to the action of electromagnetic radiation such as ultraviolet radiation or X-rays. ★ photo-ionisation → *photo-ionisation 1.* D Photo-Ionisation. P fotojonizacja. (705)

photoluminescence

1. **photoluminescence** : luminescence caused by absorption of optical radiation. ★ photoluminescence → *photoluminescence 6.* R фотолюминесценция. D Photolumineszenz. E fotoluminiscencia. I fotoluminescenza. N fotoluminescentie. P fotoluminescencja. S fotoluminiscens. (845)
2. **photoluminescence detector** : → *detector 24*
3. **photoluminescence quantum yield** : → *yield 7*
4. **photoluminescence radiant yield** : → *yield 8*

photoluminescent

1. **photoluminescent personal dosemeter** : → *dosemeter 13*
2. **photoluminescent personal exposure meter** : → *exposure meter 8*
3. **reader for photoluminescent dosemeter** : → *reader 3*
4. **reader for photoluminescent exposure meter** : → *reader 4*

photomagnetoelectric

1. **photomagnetoelectric effect** : → *effect 56*

photometer

1. **equality of brightness photometer** : visual photometer in which parts of the comparison field are viewed simultaneously and are adjusted to equality of brightness. ★ photomètre à égalisation de luminosité → *photomètre 3.* R фотометр с равносветлотными полями сравнения. D Gleichheitsphotometer. E fotómetro de igualación de claridad. I fotometro a uguaglianza di brillanza. N helderheidsfotometer. P fotometr równoluminancyjny. S likhetsfotometer. (845)
2. **equality of contrast photometer** : visual photometer in which parts of the comparison field are viewed simultaneously and are adjusted to equality of contrast. ★ photomètre à égalisation de contraste → *photomètre 2.* R фотометр с равноконтрастными полями сравнения. D Kontrastphotometer. E fotómetro de igualación de contraste. I fotometro a uguaglianza di contrasto. N contrastfotometer. P fotometr równokontrastowy. S kontrastfotometer. (845)
3. **flicker photometer** : visual photometer in which the observer sees either an undivided field illuminated successively, or two adjacent fields illuminated alternately, by two sources to be compared, the frequency of alternation being conveniently chosen so that it is above the fusion frequency for colours but below the fusion frequency for brightnesses. ★ photomètre à papillotement → *photomètre 4.* R мигающий фотометр. D Flimmerphotometer. E fotómetro de parpadeo. I fotometro a sfarfallamento. N flikkerfotometer. P fotometr migający. S flimmerfotometer. (845)
4. **integrating photometer** : photometer for measuring luminous flux, generally incorporating an integrating sphere. ★ lumenmètre → *lumenmètre 1.* R интегрирующий фотометр. D Lichtstrommeßgerät. E lumenómetro. I fotometro integratore. N integrerende fotometer. P lumenomierz. S integrerande fotometer. (845)
5. **photometer** : instrument for measuring photometric quantities. ★ photomètre → *photomètre 1.* R фотометр. D Photometer. E fotómetro. I fotometro. N lichtmeter. P fotometr. S fotometer. (845)

photometric

1. **CIE standard photometric observer** : → *observer 1*
2. **primary photometric standard** : → *standard 16*
3. **secondary photometric standard** : → *standard 19*
4. **working photometric standard** : → *standard 47*

photometry

1. **photometry** : measurement of quantities referring to radiation as evaluated according to a given spectral luminous efficiency function, e.g. $V(\lambda)$ or $V'(\lambda)$. *Note.* — In Russian publications, photometry refers only to the evaluation according to $V(\lambda)$. The term photometry is also often used in publications in Russian and in other languages in a broader sense covering the science of optical radiation measurement (radiometry). ★ photométrie → *photométrie 1.* R фотометрия. D Photometrie. E fotometría. I fotometria. N fotometrie; lichtmeting. P fotometria. S fotometri. (845)
2. **physical photometry** : photometry in which physical detectors are used to make the measurements. ★ photométrie physique → *photométrie 2.* R физическая фотометрия. D physikalische Photometrie. E fotometría física. I fotometria fisica. N fysische fotometrie. P fotometria fizyczna. S fysikalisk fotometri. (845)
3. **visual photometry** : photometry in which the eye is used to make quantitative comparisons between light stimuli. ★ photométrie visuelle → *photométrie 3.* R визуальная фотометрия. D visuelle Photometrie. E fotometría visual. I fotometria visiva. N visuele fotometrie. P fotometria wzrokowa. S visuell fotometri. (845)

photomultiplier

1. **photomultiplier** : photoelectric detector comprising a photocathode, an anode and an electron multiplication device that uses the secondary emission of dynodes or channels between photocathode and anode. ★ photomultiplicateur → *photomultiplicateur 2.* R фотоэлектронный умножитель. D Photovervielfacher. E fotomultiplicador. I fotomoltiplicatore. N fotomultiplicator. P fotopowielacz; krotnik fotoelektryczny. S fotomultiplikator. (845)
2. **photomultiplier tube** : → *tube 64*
3. **windowless photomultiplier tube** : → *tube 99*

photon

1. **number of photons** : → *number 20*
2. **photon** : the elementary quantity of energy of electromagnetic radiation. For electromagnetic energy of frequency ν, the quantum energy is $h\nu$, where h is Planck's constant. *Note.* — A photon is an elementary particle without a rest mass. ★ photon → *photon 5.* R фотон. D Photon. E fotón. I fotone. N foton. P foton. S foton. (026,111,391,731,881)
3. **photon counter** : → *counter 7*
4. **photon emission curve** : → *curve 31*
5. **photon equilibrium** : → *equilibrium 7*
6. **photon exitance** : → *exitance 2*
7. **photon exposure** : → *exposure 14*
8. **photon flux** : → *flux 20*
9. **photon intensity** : → *intensity 14*

10. **photon irradiance** : → *irradiance 5*
11. **photon number** (*Syn.* number of photons) : → *number 20*
12. **photon radiance** : → *radiance 3*

photoneutron

1. **photoneutron** : neutron emitted during a photonuclear reaction. ★ photoneutron → *photoneutron 1.* D Photoneutron. E fotoneutrón. I fotoneutrone. N fotoneutron. P fotoneutron. S fotoneutron. (026,881)

photonuclear

1. **photonuclear reaction** : → *reaction 8*

photopathology

1. **photopathology** : branch of biology and medicine which deals with pathologic effects linked to optical irradiation. ★ photopathologie → *photopathologie 1.* R фотопатология. D Photopathologie. E fotopatología. I fotopatologia. N fotopathologie. P fotopatologia. S fotopatologi. (845)

photoperiod

1. **photoperiod** : natural or artificial cycle of light and darkness alternation to which living organisms may be exposed. *Note.* — For instance, for the natural cycle of light at the time of the equinoxes, the ratio of light duration (L= 12 h) to darkness duration (D= 12 h) is expressed as LD 12:12. ★ photopériode → *photopériode 1.* R фотопериод. D Photoperiode. E fotoperíodo. I fotoperiodo. N licht-donker cyclus. P cykl świetlny. S fotoperiod. (845)

photopic

1. **photopic vision** : → *vision 3*

photoresistor

1. **photoresistor** (*Syn.* photoconductive cell) : photoelectric device that utilizes the change of electrical conductivity produced by the absorption of optical radiation. ★ photorésistance → *photorésistance 1.* R фоторезистор. D Photowiderstand; Photoleiter. E célula fotoconductora. I cellula fotoconduttrice; fotoresistore. N fotoweerstand; fotogeleidingscel. P fotorezystor; rezystor fotoelektryczny. S fotokonduktiv cell. (845)

photosensitive

1. **photosensitive tube** : → *tube 65*

photosensitization

1. **photosensitization** : process by which a substance or a system becomes more susceptible to photoeffects by the action of another substance or system. ★ photosensibilisation → *photosensibilisation 1.* R фотосенсибилизация. D Photosensibilisierung. E fotosensibilización. I fotosensibilizzazione. N fotosensibilisatie. P sensybilizacja optyczna; fotosensybilizacja. S fotosensibilisering. (845)

phototelecopy

1. **phototelecopy** (*Syn.* phototelegraphy) : picture facsimile using a photographic process for the reproduction. ★ phototélécopie → *phototélécopie 1.* R фототелеграфия; фототелеграфная связь. D Fototelegrafie. E fototelecopia; fototelegrafía. I foto facsimile. N foto-overdracht. P symilografia fotograficzna; fototelegrafia. S fotofaksimil. (721)

phototelegraphy

1. **phototelegraphy** (*Syn.* phototelecopy) : → *phototelecopy 1*

phototherapy

1. **phototherapy** : treatment of disease by the use of optical irradiation. ★ photothérapie → *photothérapie 1.* R фототерапия. D Phototherapie. E fototerapia. I fototerapia. N fototherapie. P fototerapia. S fototerapi. (845)

phototransistor

1. **phototransistor** : a transistor in which the photoelectric effect is utilized. ★ phototransistor → *phototransistor 1.* R фототранзистор. D Phototransistor. E fototransistor. I fototransistore. N fototransistor. P fototranzystor. S fototransistor. (521)
2. **phototransistor** : photoelectric detector that uses semiconductors in which the photoelectric effect is produced in the neighbourhood of a double p-n junction (p-n or n-p-n) which possesses amplification properties. ★ phototransistor → *phototransistor 2.* R фототранзистор. D Phototransistor. E fototransistor. I fototransistore. N fototransistor. P fototranzystor; tranzystor fotoelektryczny. S fototransistor. (845)

phototube

1. **gas-filled phototube** : a phototube that utilizes the gas multiplication effect of contained gas. ★ phototube à gaz → *phototube 2.* R газонаполненный фотоэлемент. D gasgefüllte Photozelle. E fototubo de gas. I fototubo a gas. N met gas gevulde fotobuis. P fotodioda gazowana. S gasfyllt fotorör. (531)
2. **phototube** (*Syn.* photoemissive cell) : a photosensitive tube in which the photoemissive effect is utilized. ★ tube photoélectronique → *tube 91.* R фотоэлемент. D Photozelle. E tubo fotoelectrónico; célula fotoemisora; fototubo. I tubo fotoelettronico; fototubo; cella fotoemissiva. N fotobuis. P lampa fotoelektronowa. S fotocell. (531)
3. **phototube** (*Syn.* photoemissive cell) : → *cell 29*
4. **windowless multiplier phototube** (*Syn.* windowless photomultiplier tube) : → *tube 99*

photovoltaic

1. **photovoltaic cell** : → *cell 30*
2. **photovoltaic cell** (*Syn.* photoelement) : → *photoelement 1*
3. **photovoltaic effect** : → *effect 57*

physical

1. **physical colorimetry** : → *colorimetry 2*
2. **physical optics** : → *optic 6*
3. **physical photometry** : → *photometry 2*

physicist

1. **radiation physicist** : a physicist dealing with the theoretical, experimental, or applied aspects of radiation, usually ionizing radiation. ★ radiophysicien → *radiophysicien 1.* R радиационный физик. D Strahlenphysiker. E físico radiólogo. I radiofisico. N stralingsfysicus. P fizyk radiacyjny. S strålfysiker. (881)

physics

1. **health physics** : that part of physics relating to all scientific and professional aspects concerning the protection of man against the detrimental effects on health of environmental conditions. ★ protection sanitaire → *protection 36.* R физические основы безопасности. D physikalischer Strahlenschutz. E física sanitaria; protección sanitaria. I fisica sanitaria. N beschermingsfysica. P fizyka zdrowia. S hälsofysik. (881)
2. **radiation physics** : that part of physics which deals with the properties and physical effects of radiation. *Note.* — this term usually refers to ionizing radiati on but other radiation may be included. ★ physique des rayonnements → *physique 4.* R радиационная физика. D Strahlenphysik. E física de las radiaciones. I fisica delle radiazioni. N stralingsfysica. P fizyka radiacyjna. S strålningsfysik. (881)
3. **radiological physics** : that branch of physics which deals with the medical and industrial application of ionizing radiation. ★ radiophysique → *radiophysique 1.* R радиологическая физика. D medizinische Strahlenphysik. E física radiológica. I fisica radiologica. N radiologische fysica. P fizyka radiologiczna. S radiofysik. (881)

piano

1. **piano key button** : → *button 3*

pick-up

1. **image pick-up tube** (*Syn.* camera tube) : → *camera tube 2*
2. **pick-up arm** : → *arm 11*
3. **pick-up cartridge** : → *cartridge 3*

pick-up head

1. **capacitance pick-up head** : a pick-up head which depends for its operation upon the variation in capacitance of an electric circuit. ★ tête de lecture électrostatique → *tête de*

lecture 7. R емкостная головка звукоснимателя. D kapazitiver Abtaster. E cabeza de lectura electrostática. I testina di riproduzione a condensatore. N capacitieve pick-upkop. P adapter pojemnościowy. S kapacitiv nålmikrofon. (806)

2. **ceramic pick-up head** : a pick-up head which depends for its operation upon the piezoelectric properties of ceramic material. ★ tête de lecture céramique → *tête de lecture 5.* R керамическая головка звукоснимателя. D keramischer Abtaster. E cabeza de lectura cerámica. I testina di riproduzione ceramica. N keramische pick-upkop. P adapter ceramiczny. S keramisk nålmikrofon. (806)
3. **crystal pick-up head** : a pick-up head which depends for its operation upon the piezoelectric properties of certain crystalline materials. ★ tête de lecture piézoélectrique → *tête 16.* R кристаллическая головка звукоснимателя. D piezoelektrischer Abtaster. E cabeza de lectura piezoeléctrica. I testina di riproduzione piezoelettrica. N kristal pick-upkop. P adapter kryształowy. S kristallnålmikrofon. (806)
4. **electrodynamic pick-up head** : a pick-up head which depends for its operation upon the motion of a coil in a magnetic field. ★ tête de lecture électrodynamique → *tête de lecture 6.* R магнитная головка звукоснимателя. D elektrodynamischer Abtaster. E cabeza de lectura electrodinámica. I testina di riproduzione elettrodinamica. N elektrodynamische pick-upkop. P adapter elektrodynamiczny. S elektrodynamisk nålmikrofon. (806)
5. **magnetic variable reluctance pick-up head** : a pick-up head which depends for its operation upon the variation in reluctance of a magnetic circuit. ★ tête de lecture à réluctance variable → *tête de lecture 4.* R магнитная головка звукоснимателя с переменным магнитным сопротивлением. D auf magnetischer Widerstandsänderung beruhender Abtaster. E cabeza de lectura de reluctancia variable. I testina di riproduzione a riluttanza variabile. N magnetische pick-upkop. P adapter reluktancyjny. S reluktansnålmikrofon. (806)
6. **magnetodynamic pick-up head** : a pick-up head which depends for its operation upon the motion of a magnet with respect to a fixed coil. ★ tête de lecture magnétodynamique → *tête de lecture 9.* R магнитная головка звукоснимателя с движущимся магнитом. D magnetodynamischer Abtaster. E cabeza de lectura magnetodinámica. I testina di riproduzione magnetodinamica. N magnetodynamische pick-upkop. P adapter o ruchomym magnesie. S magnetodynamisk nålmikrofon. (806)
7. **pick-up head** (*Syn.* reproducing head) : an electromechanical transducer which, when actuated by the groove modulation, converts a mechanical signal input to an electrical signal output. ★ tête de lecture → *tête de lecture 2.* R головка звукоснимателя. D Tonarm; Abtaster; Tonabnehmer. E cabeza de lectura; fonocaptor. I testina di riproduzione. N pick-upkop; groeftaster. P adapter. S nålmikrofon. (806)

picture

1. **black-and-white picture tube** : → *tube 10*
2. **colour picture tube** : → *tube 17*
3. **complementary picture effect** : → *effect 8*
4. **complete picture** (*Syn.* frame) : → *frame 14*
5. **electronic picture** (*Syn.* computer-generated image) : → *image 2*
6. **half tone picture** : a picture having a range of tones within the picture black and the picture white limits in a facsimile system. ★ image en demi-teinte → *image 21.* R полутоновое изображение. D Halbtonbild. E imagen de control de tono. I immagine a mezza tonalità. N halftoonprent. P obraz półcieniowy. S tvåtonsbild. (721)
7. **horizontal picture slip** : → *slip 3*
8. **picture black** : → *black 15*
9. **picture blemish** : → *blemish 3*
10. **picture element** : → *element 36*
11. **picture element** : → *element 37*
12. **picture facsimile** : → *facsimile 9*
13. **picture frequency** (*Syn.* frame frequency) : → *frequency 40*
14. **picture monitor** : → *monitor 10*
15. **picture period** (*Syn.* frame period) : → *period 11*
16. **picture signal** (*Syn.* video signal) : → *signal 251*
17. **picture sticking** (*Syn.* after image) : → *image 1*
18. **picture tube** : → *tube 66*
19. **picture white** : → *white 5*
20. **primary colour picture** : display produced by scanning in one of the constituent primary colours. ★ image primaire de couleur → *image 32.* R изображение в основном цвете. (723)
21. **still picture video-telephony** : → *video-telephony 1*
22. **vertical picture slip** : → *slip 11*

picture-signal

1. **average picture-signal level** : → *level 4*

picture-sound

1. **picture-sound desynchronisation** (*Syn.* picture-sound lag) : → *lag 5*
2. **picture-sound lag** : → *lag 5*

piece

1. **pole piece** : a piece of magnetically soft material attached to a pole or yoke of a magnet for the purpose of guiding or concentrating the magnetic flux. ★ pièce polaire → *pièce 9.* R полюсный наконечник. D Polstück. E pieza polar (de un imán). I pezzo polare (di un magnete). N poolschoen. P zwora (magnetyczna). S polsko. (221)

pier

1. **pier (of a foundation)** (*Syn.* chimney (of a foundation)) : → *chimney 1*
2. **spread footing with pier** (*Syn.* pad and chimney foundation) : → *foundation 6*

Pierce

1. **Pierce gun** : → *gun 12*

piezoelectric

1. **multiple piezoelectric resonator** : → *resonator 4*
2. **piezoelectric ceramic element** : → *element 38*
3. **piezoelectric crystal element** : → *element 39*
4. **piezoelectric crystal or ceramic vibrator** : → *vibrator 5*
5. **piezoelectric effect** : → *effect 58*
6. **piezoelectric filter** : → *filter 33*
7. **piezoelectric loudspeaker** : → *loudspeaker 17*
8. **piezoelectric microphone** : → *microphone 28*
9. **piezoelectric resonator** : → *resonator 5*
10. **stiffened mode (of piezoelectric vibration)** : → *mode 74*
11. **unstiffened mode (of piezoelectric vibration)** : → *mode 97*

piezoresistive

1. **piezoresistive effect** : → *effect 59*

pigtail

1. **optical fibre pigtail** (*Syn.* launching fibre) : a short length of optical fibre, usually permanently attached to a component and intended to facilitate jointing between that component and another optical fibre or component. *Note.* — "Launching fibre" is synonymous with optical fibre pigtail only when the latter is connected to an optical source. ★ (fibre) amorce → *amorce 3.* R вывод в виде отрезка оптического волокна; "пигтейл"; волокно ввода излучения. D LWL-Anschlußfaser; Einkoppelfaser. E pigtail de fibra óptica; fibra de inyección. I codino in fibra ottica. N optisch vezelaansluitsnoer met één niet-afgewerkt uiteinde; aanstralingsvezel. P złączka włóknowa. S kopplingsfiber. (731)

pile

1. **augered pile** (*Syn.* bored pile) : a foundation type in which a long cylindrical hole is first bored out of the ground and then filled in with concrete into which the stub is embedded. ★ pieu foré → *pieu 5.* R буронабивная свая. D Bohrpfahl. E pilote in situ. I palo trivellato. N boorpaal. P pal wwiercany. S ..... (466)
2. **bored pile** (*Syn.* augered pile) : → *pile 1*
3. **bulb pile** (*Syn.* expanded pile) : → *pile 5*
4. **driven pile** : a column sunk into the ground by hammering or vibrations without previous excavation. ★ pieu battu

→ *pieu 4.* R забивная свая. D Rammpfahl. E pilote hincado. I palo battuto. N heipaal. P pal wbijany. S slagen pâle. (466)

5. **expanded pile** (*Syn.* bulb pile; under-reamed pile) : an augered pile whose excavation is widened at the lower end. ★ pieu à bulbe → *pieu 2.* R буронабивная свая с уширением. D erweiterter Pfahl; Pfahl mit Birne; unterschnittener Pfahl. E pilote con bulbo. I palo trivellato con bulbo; palo trivellato con sottosquadro. N boorpaal met verzwaarde voet. P pal poszerzony (u dołu). S ..... (466)
6. **pile** (*Syn.* nuclear reactor) : → *reactor 22*
7. **pile foundation** : → *foundation 9*
8. **pressure injected pile** : a pile in which concrete is poured into the bored or augered hole under pressure to achieve a better contact with undisturbed soil. ★ pieu injecté → *pieu 6.* R буронабивная свая, бетонируемая под давлением. D verpreßter Bohrpfahl. E pilote inyectado. I palo gettato a pressione. N injectiepaal. P pal betonowany ciśnieniowo. S ..... (466)
9. **under-reamed pile** (*Syn.* expanded pile) : → *pile 5*

pile-up

1. **pile-up** (in a counting assembly) : a phenomenon where a pulse occurs on the tail of the preceding pulse so as to result in an incorrect indication of pulse amplitude. The pile-up can also result in failure to resolve some pulses. ★ empilement → *empilement 1.* R наложения (в счетном приборе). D Aufstocken (in einer Zählanordnung). E apilamiento (en un conjunto contador). I sovrapposizione (in un insieme di conteggio). N pulsenstapeling (in een telopstelling). P efekt nakładania się impulsów (w urządzeniu zliczającym). S pulsöverlagring. (391)

piling

1. **pressure piling** : a phenomenon resulting from ignition, in one compartment or subdivision of an enclosure, of a gas mixture pre-compressed by a previous ignition in another compartment or sub-division. ★ phénomène de précompression → *phénomène 3.* R поджатие. D Drucküberhöhung. E fenómeno de precompresión. I (fenomeno di) precompressione. N abnormale drukopbouw. P sprężanie wstępne. S tryckstegring. (426)

pill-box

1. **pill-box antenna** : → *antenna 91*

pilot

1. **frequency comparison pilot** : a reference pilot used either for comparing the frequencies, and possibly the phases, of the carriers generated at the sending and receiving terminals of a multichannel carrier system, or for maintaining the synchronism of these carriers. ★ onde pilote de comparaison des fréquences → *onde 87.* R сигнал контрольной частоты сличения. D Frequenz(vergleichs)pilot; Synchronisierpilot (veralteter Begriff). E onda piloto de comprobación de frecuencias; señal piloto de sincronización. I frequenza pilota di comparazione frequenze; frequenza pilota di sincronismo. N normfrequentiepiloot. P sygnał pilotowy do porównania częstotliwości. S synkroniseringspilot. (704)
2. **group reference pilot** : a reference pilot applied where a group is assembled and which accompanies the group over the system up to the point where it is broken down into its constituent elements. *Notes. 1* — Various frequencies have been standardized by the CCITT for group reference pilots within the frequency band of a basic group. *2* — In certain cases, two reference pilots may be applied where a basic group is assembled. *3* — Similar definitions can be given for : "supergroup reference pilot", "mastergroup reference pilot", "supermastergroup reference pilot", "15-supergroup assembly reference pilot" or "hypergroup reference pilot". ★ (onde) pilote de groupe primaire → *pilote 10.* R опорный сигнал контрольной частоты первичной группы. D Primärbezugspilot. E (Onda) piloto de grupo primario. I frequenza pilota di gruppo primario. N groepreferentiepiloot. P sygnał pilotowy grupy pierwotnej. S gruppreferenspilot. (704)
3. **microwave pilot protection system** : → *system 116*
4. **optical link pilot protection system** : → *system 132*
5. **pilot arc** : → *arc 37*
6. **pilot cell** : → *cell 32*
7. **pilot exciter** : → *exciter 7*
8. **pilot lamp** : → *lamp 46*
9. **pilot light** (*Syn.* pilot lamp) : → *lamp 46*
10. **pilot protection system** (*Syn.* protection system associated with signalling system) : → *system 162*
11. **pilot (signal)** : a signal, usually a single frequency, transmitted in a telecommunication network for measurement, supervision, or control purposes. ★ onde pilote → *onde 85.* R сигнал контрольной частоты. D Pilot(signal). E onda piloto; señal piloto. I frequenza pilota; pilota. N piloot(signaal). P sygnał pilotowy; pilot. S pilot(signal). (704)
12. **pilot switch** : → *switch 30*
13. **pilot wire protection system** : → *system 146*
14. **power line carrier pilot protection system** : → *system 152*
15. **reference pilot** : a pilot signal used to facilitate the maintenance and adjustment of a multichannel carrier system. ★ onde pilote de référence → *onde 89.* R опорный сигнал контрольной частоты. D Bezugspilot. E onda piloto de referencia; señal piloto de referencia. I frequenza pilota di riferimento. N referentiepiloot; vergelijkingspiloot. P sygnał pilotowy odniesienia. S referenspilot. (704)
16. **regulating pilot** : a reference pilot used to maintain the level of the line signal of the multichannel carrier system at the prescribed value, and to ensure that the attenuation-equalization is continuously satisfactory. ★ onde pilote de régulation (de ligne) → *onde 90.* R сигнал контрольной частоты регулировки линии. D Steuerpilot. E onda piloto de regulación (de línea); señal piloto de regulación (de línea). I frequenza pilota di regolazione (di linea). N regelpiloot. P sygnał pilotowy regulacyjny. S styrpilot. (704)
17. **switching control pilot** (*Syn.* switching pilot (USA)) : a reference pilot used to control a maintenance switching function at a distant point. *Note.* — Examples of such switching functions are, to busy the channels of a multichannel carrier system, or to replace a normal repeater by a standby repeater in the case of a fault. ★ onde pilote de commutation → *onde 86.* R сигнал контрольной частоты управления переключением; переключающий сигнал. D Schaltpilot. E onda piloto de conmutación; señal piloto de conmutación. I frequenza pilota di commutazione. N schakelpiloot. P sygnał pilotowy do sterowania przełączenia. S kopplingspilot. (704)
18. **switching pilot** (*Syn.* switching control pilot) : → *pilot 17*

pilot-tone

1. **pilot-tone** (in stereophonic broadcasting) : a component of the modulating signal in the pilot-tone system at half the frequency of the suppressed carrier. ★ signal pilote → *signal 222.* R пилот-тон (в стереофоническом радиовещании). (723)
2. **pilot-tone system** : → *system 147*

pin

1. **bayonet pin** : small piece of metal which projects from the shell of a cap, particularly a bayonet cap, and which engages in a slot in a lampholder to fix the cap. ★ ergot → *ergot 4.* R штифтцоколь. D Bajonettstift. E tetón. I piolo. N bajonetpen. P zaczep boczny. S styrstift. (845)
2. **cap and pin insulator** : → *insulator 3*
3. **drive pin** : an eccentrically located pin on the turntable, intended to fit into a suitable hole on the record to prevent it from slipping on the turntable. ★ téton d'entraînement → *téton 1.* R фиксирующий шпенек. D Mitnehmerstift. E tetón de guía. I spina di trascinamento. N meeneempen. P ..... S medbringarstift. (806)
4. **guide pin** : a pin, rod or projection extending beyond the mating face of a component designed to guide the mating of the component to ensure proper alignment of the contacts. ★ doigt de guidage → *doigt 1.* R штырь направляющий. D Führungsstift. E dedo de guía. I elemento di guida. N geleidepen. P kołek prowadzący. S styrstift. (581)
5. **pin** : a rigid terminal that may also serve to locate and fix the tube in its socket. ★ broche → *broche 2.* R штырек. D Kontaktstift. E patilla. I spina; piedino. N pen. P nóżka; końcówka szpilkowa. S stift. (531)
6. **pin** (*Syn.* post) : piece of metal, usually of cylindrical shape, fixed at the end of the cap so as to engage in the corresponding hole in a lampholder for fixing the cap and/or for making contact. *Note.* — The terms pin and post generally indicate a difference in size, a pin being smaller than a post. ★ broche → *broche 3.* R штырек. D Stift. E patilla. I spina. N contactpen. P kołek. S stift. (845)

7. **pin base** (*Syn.* pin cap) : → *cap 6*
8. **pin cap** : → *cap 6*
9. **pin insulator** : → *insulator 24*
10. **PIN photodiode** : → *photodiode 4*
11. **pin resistor** : → *resistor 10*
12. **pin type bond** : → *bond 1*

pinch

1. **pinch effect** : → *effect 60*
2. **pinch effect** : → *effect 61*
3. **pinch roller** (*Syn.* pressure roller) : → *roller 3*

pin-cushion

1. **pin-cushion distortion** : → *distortion 60*

PIN-FET

1. **PIN-FET integrated receiver** : → *receiver 6*

pink

1. **pink noise** : → *noise 58*

pion

1. **pion** (*Syn.* π-meson) : elementary short-lived particle with mass approximately 270 times the mass of the electron. *Note* — There are three pions: π+, π− and π°. ★ pion → *pion 1.* R пионы; пи-мезоны. D Pion. E pion; π meson. I pione; mesone π. N pion; π-meson. P pion; mezon π. S pimeson; π-meson. (881)

pip

1. **pip** (*Syn.* tip) : → *tip 6*

pipe

1. **air pipe** : any separate structure designed for attaching to a machine to guide the inlet cooling air to the machine or the exhaust air away from the machine. ★ canalisation d'air → *canalisation 1.* R воздухоподводы. D Luftleitung. E canalización de aire. I canalizzazione di ventilazione. N luchtbuis. P przewód powietrzny. S lufttrumma. (411)

pipe-type

1. **oil-filled pipe-type cable** : → *cable 48*
2. **pipe-type cable** : → *cable 53*

pipe-ventilated

1. **pipe-ventilated** : applied to a machine which is so constructed that its cooling air can be conveyed to or from it through piping connected to the side or top of the machine. ★ machine à canalisation d'air → *machine 4.* R вентилируемая машина с подводом охлаждающего воздуха по трубам. D Maschine für Rohranschluß. E máquina con canalización de aire. I macchina con canalizzazione di ventilazione. N met buisaansluiting. P maszyna z wentylacją przelotową i doprowadzeniem powietrza rurami. S ventilerad med röranslutning. (411)

pirate

1. **pirate transmitter** : → *transmitter 11*

piston

1. **bucket piston** (*Syn.* quarter-wave contact piston) : → *piston 6*
2. **choke piston** (*Syn.* choke plunger) : a piston in which metallic contact between the edges of the reflecting surface and the waveguide walls is replaced by a low impedance path created by a choke system. ★ piston à piège → *piston 5.* R дроссельный поршень; дроссельный плунжер. D kontaktloser Kolben. E pistón choque. I pistone con blocco. N smoorgroefzuiger. P zwieracz dławikowy. S resonanskolv. (726)
3. **contact piston** (*Syn.* contact plunger) : a piston having rubbing metallic contact to the walls of a waveguide. ★ piston à contact → *piston 4.* R контактный поршень; контактный плунжер. D Kontaktkolben. E pistón de contacto. I pistone con contatto. N contactzuiger. P zwieracz stykowy. S kontaktkolv. (726)
4. **piston** (*Syn.* plunger; adjustable short circuit) : in a transmission line, a longitudinally movable obstacle which reflects essentially all of the incident energy. ★ piston → *piston 3.* R поршень; плунжер; подвижный короткозамыкатель. D Kolben; verstellbarer Kurzschlussschieber. E pistón; cortocircuito ajustable. I pistone; cortocircuito mobile. N kortsluitzuiger. P zwieracz ruchomy. S kolv. (726)
5. **piston attenuator** : → *attenuator 14*
6. **quarter-wave contact piston** (*Syn.* bucket piston; bucket plunger) : a contact piston in which rubbing contact is made at the free ends of thin quarter-wave length long metal strips which extend from the plunger face and lie close to the waveguide walls. *Note.* — The actual contact is thus made in a region of low current and high voltage, so that the effects of contact resistance are minimized. ★ piston quart d'onde (à contact) → *piston 6.* R четвертьволновый контактный поршень; поршень стаканного типа; плунжер стаканного типа. D λ/4-Schieber. E pistón de contacto en cuarto de onda. I pistone quarto d'onda (a contatto). N 1/4λ-contactzuiger. P zwieracz stykowy ćwierćfalowy. S kvartvågskolv. (726)

pistonphone

1. **pistonphone** : apparatus having a rigid piston which can be given a reciprocating motion of known frequency and amplitude so permitting the establishment of a known sound pressure in a closed cavity of small dimensions. ★ pistonphone → *pistonphone 1.* R пистофон. D Pistonphon. E pistófono. I pistonofono. N pistonfoon. P pobudnik tłokowy; pistonfon. S pistonfon. (801)

pit

1. **pit furnace** : → *furnace 38*

pitch

1. **arc furnace electrode pitch circle diameter** (*Syn.* PCD) : the diameter of the circle defined by the centres of the electrodes of a three-phase arc furnace. ★ diamètre du cercle d'électrodes de four à arc triphasé → *diamètre 6.* R диаметр распада электродов дуговой печи. D Elektroden-Teilkreisdurchmesser; ETD (abgekürzt). E diámetro del círculo de electrodos de horno de arco trifásico. I diametro del cerchio elettrodi di un forno ad arco trifase. N middellijn van de cirkel door de elektrodemiddelpunten. P średnica koła elektrod (układu trójfazowego). S ..... (841)
2. **coil pitch** (*Syn.* coil span) : → *span 2*
3. **commutator pitch** : the number of commutator segments between the corresponding start and finish of a single-coil section. ★ pas au collecteur → *pas 8.* R шаг по коллектору. D Kommutatorschritt. E paso en el colector. I passo al collettore. N commutatorspoed. P poskok komutatorowy. S lamellsteg. (411)
4. **difference limen for pitch** : → *limen 2*
5. **full pitch winding** : → *winding 31*
6. **long pitch winding** : → *winding 36*
7. **pitch** : that attribute of auditory sensation in terms of which sounds may be ordered on a scale extending from low to high. *Notes. 1* — The pitch of a complex wave depends primarily upon the frequency content of the stimulus, but it also depends upon the sound pressure and the waveform. *2* — The pitch of a sound may be described by the frequency of that pure tone having a specified sound pressure level that is judged by subjects to produce the same pitch. ★ tonie → *tonie 2.* R высота тона (звука). D Tonhöhe; Verhältnistonhöhe. E tono. I altezza. N toonhoogte. P wysokość dźwięku. S tonhöjd. (801)
8. **pitch** : the reciprocal of the number of grooves per unit width. *Note.* — The centimetre is generally taken as unit. ★ pas de sillonnage → *pas 15.* R шаг записи. D Rillensteigung. E paso de los surcos. I passo del solco. N spoed. P skok rowka. S stigning. (806)
9. **pitch factor** : → *factor 134*
10. **pole pitch** : the peripheral distance between points in corresponding positions on two consecutive poles; also expressed as a number of tooth pitches. ★ pas polaire → *pas 18.* R полюсное деление. D Polteilung. E paso polar. I passo polare. N poolsteek. P podziałka biegunowa. S poldelning. (411)
11. **scanning pitch** : the distance between the corresponding edges of two facsimile scanning lines. ★ pas d'exploration → *pas 17.* R шаг развертки. D Abtastvorschub. E paso de exploración. I passo di scansionamento. N aftaststeek. P skok rozwinięcia. S linjedelning. (721)
12. **short pitch winding** : → *winding 67*
13. **standard musical pitch** (*Syn.* standard tuning frequency) : → *frequency 183*
14. **tooth pitch** : the peripheral distance between fixed points in corresponding positions on two consecutive teeth. ★ pas

dentaire → *pas 16.* R зубцовый шаг. D Nutteilung. E paso de diente. I passo di cava. N tandsteek. P podziałka żłobkowa. S tanddelning. (411)

15. **variable groove pitch** : a groove, the spacing of which varies in relation to the lateral and/or vertical modulation displacement of the cutting stylus. ★ sillon à pas variable → *sillon 13.* R канавка с переменным шагом. D Rille mit variabler Steigung. E surco de paso variable. I solco con passo variabile. N variabele spoed. P rowek o zmiennym skoku. S variabel spårstigning. (806)
16. **winding pitch** : the ratio of the coil span to the total number of tooth pitches per pole, usually expressed as a percentage. ★ pas de bobinage rapporté au pas polaire → *pas 13.* R отношение шага обмотки к полюсному делению. D (relativer) Wicklungsschritt. E paso de bobina referido al paso polar. I rapporto tra passo di avvolgimento e passo polare. N relatieve spoelwijdte. P względna rozpiętość zezwoju. S lindningssteg. (411)

pitching

1. **pitching** (*Syn.* galloping) : a rotary disturbing movement about the transverse axis. ★ galop → *galop 1.* R галопирование; продольная качка. D Nicken. E galope. I galoppo. N stampen; galopperen. P drgania wahadłowe w pionie; galopowanie. S nickning. (811)

pivot

1. **pivot support frame** : → *frame 39*

pivot-type

1. **pivot-type suspension clamp** : → *clamp 13*
2. **trunnion (of a pivot-type suspension clamp)** : → *trunnion 1*

pixel

1. **pixel** (*Syn.* picture element) : → *element 36*
2. **pixel** (*Syn.* picture element) : → *element 37*

pixelation

1. **pixelation** (*Syn.* mosaic effect) : → *effect 44*

pixelisation

1. **pixelisation** (*Syn.* mosaic effect) : → *effect 44*

plain

1. **plain conductor** : → *conductor 55*
2. **plain flange** (*Syn.* flat flange) : → *flange 12*
3. **plain groove** : → *groove 24*
4. **plain joint** : → *joint 19*

plan

1. **plan bracing** : → *bracing 4*
2. **reliability and maintainability plan** : a document setting out the specific practices, resources and activities necessary to ensure that an item will satisfy given reliability performance and maintainability performance requirements relevant to a given contract or project. ★ plan de fiabilité et de maintenabilité → *plan 24.* R план безотказности и ремонтопригодности. D Zuverlässigkeits-Sicherungsplan. E plan de fiabilidad y de mantenibilidad. I piano di affidabilità e manutenibilità. N plan voor betrouwbaarheid en onderhoudbaarheid. P plan niezawodności i obsługiwalności. S tillförlitlighetsplan. (191)
3. **traffic routing plan** : a set of rules which govern the setting up of connections in a circuit switched network. *Note.* — Such rules settle, among others : — the class of each exchange, — the circuit groups interconnecting two circuit switching exchanges, as well as the connection line groups, — at least one potential route for each call, between the terminal points involved. ★ plan d'acheminement → *plan 23.* D Verkehrsführungsplanung; Verkehrslenkungsplanung. P plan kierowania ruchu. (715)

planar

1. **planar array** : → *array 15*
2. **planar graph** : → *graph 3*
3. **planar implant** : → *implant 2*
4. **planar technique** : → *technique 15*

Planck

1. **Planck's constant** : → *constant 27*
2. **Planck's law** : → *law 9*

Planckian

1. **Planckian locus** : → *locus 2*
2. **Planckian radiator** : → *radiator 5*

plane

1. **E-plane lens** : → *lens 8*
2. **E-plane sectoral horn** : → *horn 7*
3. **E-plane T circulator** : → *circulator 2*
4. **E-plane Y circulator** : → *circulator 3*
5. **ground (reference) plane** : a flat conductive surface whose potential is used as a common reference. ★ plan de sol → *plan 28.* R (эталонный) лист заземления; эквивалент "земли". D Bezugserde. E plano de suelo. I piano di terra (di riferimento). N (referentie-)aardingsvlak. P płaszczyzna ziemi (odniesienia). S jordplan. (161)
6. **heterogeneous plane wave** : → *wave 21*
7. **homogeneous plane wave** : → *wave 22*
8. **H-plane lens** : → *lens 11*
9. **H-plane sectoral horn** : → *horn 13*
10. **H-plane T circulator** : → *circulator 4*
11. **H-plane Y circulator** : → *circulator 5*
12. **orbital plane** (of a satellite) : the plane containing the centre of mass of the primary body and the velocity vector of a satellite, the frame of reference being that specified for defining the orbital elements. ★ plan de l'orbite → *plan 25.* R плоскость орбиты (спутника). D Umlaufbahnebene (eines Satelliten). E plano de la órbita (de un satélite). I piano dell'orbita (di un satellite). N baanvlak. P płaszczyzna orbity (satelity). S banplan. (725)
13. **plane flange** (*Syn.* flat flange) : → *flange 12*
14. **plane of incidence** : the plane containing the normal to a surface at a point and the direction of propagation of an incident wave at this point. ★ plan d'incidence → *plan 31.* D Einfallsebene. P płaszczyzna padania fali. (705)
15. **plane of polarization** : the plane containing the polarization ellipse. *Note.* — For a linearly polarized wave, the ellipse degenerates into a line segment and then the plane of polarization is not uniquely defined. In an isotropic medium, the plane of polarization is now conventionally taken to be normal to the direction of propagation. This is a change from previous practice when the plane of polarization was conventionally taken to be the plane containing the direction of propagation and a field vector, generally the electric field vector in radio waves or the magnetic flux density vector in optics. ★ plan de polarisation → *plan 26.* D Polarisationsebene. P płaszczyzna polaryzacji. (705,726)
16. **plane wave** : → *wave 41*
17. **plane wave** : → *wave 42*
18. **reference plane** : a specified plane of the input or output connector or coupler, which may be either integral with the tube or with the associated mount. ★ plan de référence → *plan 27.* R контрольная плоскость. D Bezugsebene. E plano de referencia. I piano di riferimento. N referentievlak. P płaszczyzna odniesienia. S referensplan. (531)
19. **travelling plane wave** : → *travelling-wave 1*
20. **uniform plane wave** : → *wave 72*
21. **work plane** (*Syn.* working plane) : reference surface defined as the plane at which work is usually done. *Note.* — In interior lighting and unless otherwise indicated, this plane is assumed to be a horizontal plane 0.85 m above the floor and limited by the walls of the room. In the USA the work plane is usually assumed to be 0.76 m above the floor, in the USSR 0.8 m above the floor. ★ plan utile → *plan 33.* R рабочая поверхность. D Nutzebene. E plano de trabajo. I piano utile. N werkvlak. P płaszczyzna robocza. S arbetsplan. (845)
22. **working plane** (*Syn.* work plane) : → *plane 21*

planned

1. **planned outage** : → *outage 5*

planned-outage

1. **planned-outage duration** : → *duration 28*

planning

1. **power system planning** : the whole range of studies involved in the development of a technically and economically sound system of electricity supply. ★ planification de réseau → *planification 1.* R планирование развития энергосистемы. D Netzplanung. E planificación de redes. I pianificazione della rete. N het ontwerpen van een elektrisch energiesysteem. P planowanie rozwoju systemu elektroenergetycznego. S planering av elkraftsystem. (603)

plant

1. **welding plant** (*Syn.* welding equipment) : → *equipment 85*

Planté

1. **Planté plate** : → *plate 16*

plasma

1. **extended-interaction plasma tube** : → *tube 31*
2. **laminar plasma torch** : → *torch 1*
3. **noise-generator plasma tube** : → *tube 59*
4. **non-transferred arc plasma torch** : → *torch 3*
5. **plasma** : a conductive gaseous medium composed of free electrons, ions and neutral particles which macroscopically is approximately electrically neutral. ★ plasma → *plasma 6.* R плазма. D Plasma. E plasma. I plasma. N plasma. P plazma. S plasma. (111,531,705,841)
6. **plasma arc rotation rate** : → *rotation 2*
7. **plasma frequency** : → *frequency 148*
8. **plasma furnace** : → *furnace 39*
9. **plasma gas** : → *gas 28*
10. **plasma gun** (*Syn.* plasma torch) : → *torch 5*
11. **plasma heater** : → *heater 14*
12. **plasma heating** : → *heating 48*
13. **plasma stabilization** : → *stabilization 4*
14. **plasma temperature** : → *temperature 39*
15. **plasma torch** : → *torch 4*
16. **plasma torch** : → *torch 5*
17. **superimposed arc plasma torch** : → *torch 6*
18. **transferred arc plasma torch** : → *torch 10*
19. **turbulent plasma torch** : → *torch 11*

plasmapause

1. **plasmapause** : the outer boundary of the plasmaphere, characterized by a steep decrease of the electron density. ★ plasmapause → *plasmapause 1.* D Plasmapause. P plazmopauza. (705)

plasmasphere

1. **plasmasphere** : that ionized region, toroidal in shape, which encircles the Earth around the equator and which follows the rotation of the Earth. *Note.* — In the equatorial plane, the plasmaphere extends to a distance of 3 to 7 Earth radii depending on local time and geomagnetic activity. ★ plasmasphère → *plasmasphère 1.* D Plasmasphäre. P plazmosfera. (705)

plastic

1. **casting plastic** (*Syn.* casting resin) : → *resin 1*
2. **cellular plastic** (*Syn.* foamed plastic) : a plastic whose density is reduced by the presence of numerous small cavities (cells), interconnecting or not, dispersed throughout the mass. ★ plastique alvéolaire → *plastique 8.* R пенопласт. D Schaumstoff. E plástico celular; plástico expandido. I plastica cellulare; plastica espansa. N schuimplastic. P masa plastyczna piankowa. S cellplast. (212)
3. **foamed plastic** (*Syn.* cellular plastic) : → *plastic 2*
4. **plastic** (noun) : a material which contains as an essential ingredient a high polymer and which at some stage in its processing into finished products can be shaped by flow. *Note.* — Elastomeric materials, which are also shaped by flow, are not considered as plastics. ★ plastique → *plastique 6.* R пластмасса. D Kunststoff. E plástico; material plástico. I plastica; materia plastica. N kunststof; plastic. P masa plastyczna; tworzywo sztuczne. S plast. (212)
5. **plastic** : a resin or polymer suitable for moulding disks by application of heat to the mould cavity. ★ matériau plastique → *matériau 20.* R пластмасса. D Plastikmasse. E material plástico. I materiale plastico. N kunststof. P masa (plastyczna). S plast. (806)
6. **plastic clad silica fibre** : → *fibre 22*
7. **plastic effect** : → *effect 62*
8. **(plastic) film** : → *film 10*

plasticizer

1. **plasticizer** : a substance of low or negligible volatility incorporated in a plastic to move its softening range to lower temperatures and to increase its workability, flexibility, or extensibility. ★ plastifiant → *plastifiant 1.* R пластификатор. D Weichmacher. E plastificante. I plastificante. N weekmaker. P zmiękczacz; plastyfikator. S mjukningsmedel. (212)

plate

1. **contact plate** (*Syn.* eyelet) : piece of metal, insulated from the shell of the cap, which is connected to one of the lead-in wires and provides connection to the electric supply. ★ plot → *plot 1.* R контактная пластинка цоколь. D Bodenkontakt; Kontaktplättchen. E contacto. I piastrina di contatto. N contactplaatje. P płytka stykowa. S bottenkontakt. (845)
2. **core end plate** : a plate or structure at the end of a laminated core to maintain axial pressure on the laminations. ★ plaque d'extrémité (de noyau) → *plaque 20.* R нажимная плита сердечника. D Endplatte (Preßplatte). E placa de extremidad (de núcleo). I flangia pressapacco. N drukplaat (van een plaatpakket). P płytka krańcowa rdzenia. S stödplåt; tryckplatta. (411)
3. **deflector plates** (*Syn.* deflecting electrodes) : → *electrode 22*
4. **earth plate** (*Syn.* ground plate (USA)) : an earth electrode consisting of a metal plate buried in the ground. ★ plaque de terre → *plaque 18.* R пластинчатый заземлитель. D Plattenerder. E placa de tierra. I piastra di terra. N plaataardelektrode. P uziom płytowy. S jordplåt. (604)
5. **end plate (of a rotor)** : an annular disk fitted at the outer end of the retaining ring. ★ fond de capot → *fond 6.* R нажимная плита (ротора). D Kappen-Endplatte. E disco de extremidad. I flangia di rotore. N rotorkapbodem. P płyta dociskowa kołpaka. S stödring. (411)
6. **Faure plate** : a pasted plate used for a lead-acid battery. ★ plaque Faure → *plaque 24.* R пластина Фора. D Faure Platte. E placa Faure. I piastra Faure. N Fauré-plaat; gepasteerde plaat. P płyta Faure'a. S Faure-platta. (486)
7. **grid type plate** (*Syn.* pasted plate) : → *plate 15*
8. **ground plate** (*Syn.* earth plate) : → *plate 4*
9. **half-wave plate** (in a waveguide) : in a waveguide capable of propagating two waves of orthogonal polarizations having the same phase coefficient, a device which introduces a phase-shift of π radians of one wave with respect to the other. ★ plaque demi-onde → *plaque 19.* R полуволновая пластина (в волноводе). D $\lambda/2$-Platte (in Hohlleiter). E placa en media onda (en una guíaonda). I placca mezz'onda (in una guida d'onda). N halvegolfplaat. P wkładka półfalowa (w falowodzie). S halvvågsplatta. (726)
10. **hearth plate** : solid piece for supporting charge materials. ★ plaque de sole → *plaque 16.* R подовая плита. D Herdplatte. E placa de crisol. I piastra di suola. N chargeplaat. P dno płaskie. S häll. (841)
11. **heater plate mica** : → *mica 6*
12. **knurled plate gasket** : → *gasket 2*
13. **metal plate air seal gasket** : → *gasket 3*
14. **negative plate** : a plate of a secondary battery which constitutes the anode during discharge and cathode during charge. ★ plaque négative → *plaque 26.* R отрицательная пластина. D negative Platte. E placa negativa. I piastra negativa. N negatieve plaat. P płyta ujemna. S negativ platta. (486)
15. **pasted plate** (*Syn.* grid type plate) : a plate consisting of a conductive grid which supports the active material. ★ plaque empâtée → *plaque 23.* R пастированная пластина; решетчатая пластина. D Gitterplatte. E placa de tipo rejilla; placas empastadas. I piastra a griglia impastata. N roosterplaat. P płyta pastowana; płyta kratkowa. S pasterad platta. (486)
16. **Planté plate** : a plate of very large effective surface area, usually of lead, the active material of which is formed by electrochemical oxidation of the lead in thin layers. ★ plaque Planté → *plaque 27.* R пластина Планте. D Planté Platte. E placa Planté. I piastra Planté. N Planté-plaat; plaat met groot

oppervlak. P płyta wielkopowierzchniowa; płyta Plantégo. S Planté-platta. (486)

17. **plate couple** (*Syn.* plate pair) : → *pair 12*
18. **plate electrodes** : → *electrode 76*
19. **plate gasket** : → *gasket 4*
20. **plate group** : → *group 49*
21. **plate (of a secondary battery)** : an electrode consisting of active material and if necessary, a support conductor. ★ plaque (d'accumulateur) → *plaque 12.* R (электродная) пластина (аккумуляторной батареи). D Platte (eines Akkumulators). E placa (de una batería). I piastra (di un accumulatore). N plaat (van een batterij). P płyta (akumulatorowa). S (elektrod)platta. (486)
22. **plate pack** : → *pack 1*
23. **plate pair** : → *pair 12*
24. **pocket type plate** : a plate consisting of an assembly of perforated metal pockets filled with active material. ★ plaque à pochettes → *plaque 10.* R ламельная пластина. D Taschenplatte. E placa de tipo cavidad. I piastra a tasche. N pakketjesplaat. P płyta kieszonkowa. S fickplatta. (486)
25. **pole end plate** : a plate or structure at the end of a laminated pole to maintain axial pressure on the laminations. ★ plaque d'extrémité (d'un pôle) → *plaque 21.* R торцевая полюсная плита. D Polendplatte. E placa de extremidad (de un polo). I piastra polare. N pooldrukplaat. P płytka krańcowa bieguna. S tryckplatta för pol. (411)
26. **positive plate** : a plate of a secondary battery which constitutes the cathode during discharge and anode during charge. ★ plaque positive → *plaque 28.* R положительная пластина. D positive Platte. E placa positiva. I piastra positiva. N positieve plaat. P płyta dodatnia. S positiv platta. (486)
27. **quarter-wave plate** (in a waveguide) : in a waveguide capable of propagating two waves of orthogonal polarizations having the same phase change coefficient, a device which introduces a phase-shift of $\pi/2$ radians of one wave with respect to the other. ★ plaque quart d'onde → *plaque 29.* R четвертьволновая пластина (в волноводе). D λ/4-Platte (im Hohlleiter). E placa en cuarto de onda (en una guíaonda). I placca quarto d'onda (in una guida d'onda). N kwartgolfplaat. P wkładka ćwierćfalowa (w falowodzie). S kvartvågsplatta. (726)
28. **reverberation plate** : artificial reverberation equipment consisting of a metal plate with several input and output transducers. ★ plaque de réverbération artificielle → *plaque 15.* R листовой реверберatор. (723)
29. **signal plate** : the metal back plate insulated from the mosaic and serving as a common output electrode for the signals from the photo-sensitive elements of the mosaic in certain types of camera tube. ★ anode collectrice → *anode 2.* R сигнальный электрод. (723)
30. **sintered plate** : a plate of an alkaline cell the support of which is made by sintering metal powder and into which the active material is introduced. ★ plaque frittée → *plaque 25.* R спеченная пластина. D Sinterplatte. E placa sinterizada. I piastra sinterizzata. N gesinterde plaat. P płyta spiekana. S sintrad platta. (486)
31. **tubular plate** : a positive plate which is composed of an assembly of porous tubes which hold the active material. ★ plaque à tubes → *plaque 11.* R трубчатая пластина. D Röhrchenplatte. E placa tubular. I piastra a tubetti. N buisjesplaat. P płyta rurkowa. S rörplatta. (486)
32. **vertex plate** (of a paraboloidal reflector) : a circular plate placed near the vertex of a paraboloidal reflector and at right angles to its axis in order to reduce the standing waves on the feed line. ★ plaque de sommet → *plaque 17.* R пластина у вершины (параболоидального рефлектора). D Scheitelplatte (eines Paraboloidreflektors); Abstimmplatte; Erregerreflektor. E placa de vértice (de un reflector parabólico). I piastra di adattamento. N antireflectieplaat. P płyta wierzchołkowa (reflektora paraboidalnego). S vertexplatta. (712)
33. **yoke plate** : a special fitting for the attachment of several insulator strings or other parallel elements. (see figure 466-9). ★ palonnier → *palonnier 1.* R коромысло. D Astandhalter. E yugo. I giogo. N brug. P orczyk. S ok. (466)

plateau

1. **plateau** (of a counter tube) : that portion of the characteristic curve of any Geiger-Müller counter tube over which the counting rate is substantially independent of the applied voltage. ★ palier → *palier 5.* R плато. D Plateau. E meseta. I pianerottolo. N plateau. P plato; równia. S platå. (391)
2. **plateau** : the portion of the counting-rate-versus-voltage characteristic with constant irradiation, in which the counting rate is substantially independent of the applied voltage. ★ plateau → *plateau 2.* R плато. D Plateau. E meseta. I pianerottolo. N plateau. P plato; równia. S platå. (531)
3. **plateau relative slope** : → *slope 6*
4. **plateau slope** : → *slope 7*
5. **plateau threshold voltage** : → *voltage 143*

plated-through

1. **plated-through hole** : → *hole 14*

platen

1. **induction platen heater** : → *heater 11*

platform

1. **arc furnace platform** : a platform in cradle form supporting the furnace shell and possibly the swivel gantry, the whole of which is allowed to tilt in the forward position for discharging molten metal and the backward position for slagging off. ★ berceau de four à arc → *berceau 2.* R платформа дуговой печи. D Ofenbühne. E cuna de horno de arco. I piattaforma del forno ad arco. N boogovenbordes. P kołyska (pieca łukowego). S ugnsplattform. (841)

playback

1. **playback** (*Syn.* reproduction) : → *reproduction 5*

player

1. **record player** : a mechanical device of a reproducing equipment consisting of a turntable with its driving system, a tone arm and a pick-up head. ★ platine tourne-disque → *platine 2.* R электропроигрывающее устройство; проигрыватель. D Plattenspieler. E giradiscos. I piastra gira-dischi. N platenspeler. P odczytywacz gramofonowy. S skivspelare. (806)
2. **rumble in a record player unit** : → *rumble 1*

plesiochronous

1. **plesiochronous** : qualifying two time-varying phenomena, time-scales, or signals in which corresponding significant instants occur at the same rate, any variations in rate being constrained within specified limits. *Note.* — Corresponding significant instants are separated by time intervals having durations which may vary without limit. ★ plésiochrone → *plésiochrone 1.* R плезиохронный. D plesiochron. E plesiocrono. I plesiocrono. N plesiochroon. P plezjochroniczny. S plesiokron. (704)
2. **plesiochronous network** : → *network 67*

plug

1. **filler plug** : an accessory used to fill grommet cavities in a connector. ★ plot de remplissage → *plot 3.* R пробка. D Blindstopfen. E clavija de relleno. I otturatore; spina per riempimento. N blindstop. P korek. S utfyllnadspropp. (581)
2. **flame-arrester vent plug** : a special design of vent plug which provides protection against internal explosion when the cell or battery is exposed to a naked flame or external spark. ★ bouchon anti-déflagrant → *bouchon 2.* R взрывобезопасная пробка. D Flammschutz-Stopfen. E tapón antillama. I tappo antideflagrante. N vlamkerende stop. P korek przeciwzapłonowy. S flamspärrande ventil. (486)
3. **plug** : 1. piece of material used for plugging a hole in a screen of protective material so as to prevent the passage of radiation. 2. a part welded to the cladding, so as to make it radiation proof. ★ bouchon → *bouchon 1.* D Stopfen. E tapón. I tappo. N plug; sluitstuk. P korek. S plugg. (026)
4. **plug braking** : → *braking 35*
5. **telephone plug** : a free connector consisting of two or more contacts on a common shank. ★ fiche téléphonique → *fiche 2.* R штеккер телефонный. D Stöpsel. E clavija telefónica. I spina teleferica. N telefoonstop. P wtyk (telefoniczny). S telefonpropp. (581)
6. **vent plug** (of a cell or battery) : a part closing the filling hole which is also employed to permit the escape of gas. ★ bouchon (d'accumulateur) → *bouchon 3.* R вентиляционная пробка (вторичного химического источника тока). D Entgasungsstopfen. E tapón. I tappo sfogatoio. N ontluchtingsdop. P korek (akumulatorowy). S ventil. (486)

plug-in

1. **plug-in termination** : → *termination 6*
2. **plug-in type bearing** : → *bearing 26*
3. **plug-in unit** : → *unit 50*

plumbicon

1. **plumbicon** (trade mark) : a low-electron-velocity camera tube whith a photo-conductive layer based on lead oxide. ★ plumbicon → *plumbicon 1.* R плюмбикон. (723)

plunger

1. **bucket plunger** (*Syn.* quarter-wave contact piston) : → *piston 6*
2. **choke plunger** (*Syn.* choke piston) : → *piston 2*
3. **contact plunger** (*Syn.* contact piston) : → *piston 3*
4. **plunger** (*Syn.* piston) : → *piston 4*

plus

1. **plus tapping** : → *tapping 8*

plutonium

1. **plutonium reactor** : → *reactor 24*

PM

1. **PM** (*Syn.* phase modulation) : → *modulation 46*

PMBX

1. **PMBX** (*Syn.* private manual branch exchange) : → *exchange 19*

PMX

1. **PMX** (*Syn.* private manual exchange) : → *exchange 20*

PN

1. **PN boundary** : → *boundary 2*
2. **PN junction** : → *junction 16*

pneumatic

1. **pneumatic loudspeaker** : → *loudspeaker 18*

Pockels

1. **Pockels effect** : → *effect 63*

pocket

1. **direct reading pocket dosemeter** : → *dosemeter 3*
2. **direct reading pocket exposure meter** : → *exposure meter 1*
3. **indirect reading pocket dosemeter** : → *dosemeter 10*
4. **indirect reading pocket exposure meter** : → *exposure meter 6*
5. **pocket dosemeter** : → *dosemeter 14*
6. **pocket exposure meter** : → *exposure meter 9*
7. **pocket ionization chamber** : → *ionization chamber 17*
8. **pocket radio** : → *radio 6*
9. **pocket type plate** : → *plate 24*

point

1. **aniline point** : the lowest temperature at which equal volumes of aniline and of the product under test are completely miscible, under standardized conditions. ★ point d'aniline → *point 12.* R анилиновая точка. D Anilinpunkt. E punto de anilina. I punto di anilina. N anilinepunt. P punkt anilinowy. S anilinpunkt. (212)
2. **breakover point** : a point on the principal characteristic for which the differential resistance is zero and where the principal voltage reaches a maximum value. ★ point de retournement → *point 38.* R точка переключения. D Kippunkt. E punta de retorno. I punto di discontinuità. N ontstekingspunt. P punkt przełączania. S vippunkt. (521)
3. **cloud point** : the temperature at which a clear insulating liquid becomes hazy or cloudy when it is cooled under standardized conditions. ★ point de trouble → *point 47.* R температура потери прозрачности. D Cloudpoint. E punto de enturbiamiento (niebla). I punto di intorbidamento. N troebelingspunt. P temperatura zmętnienia. S grumlingspunkt. (212)
4. **cold point** (of a radiating element) : a point on a radiating element which may be considered to be at ground or frame potential. ★ point froid → *point 55.* R точка нулевого потенциала (излучающего элемента). D kalter Punkt; kaltes Ende; Erdungspunkt (eines Strahlerelementes). E punto frío (de un elemento radiante). I punto freddo. N koud punt. P punkt zimny (elementu promieniującego). S spänningsnod. (712)
5. **contact point** (*Syn.* contact tip) : → *tip 2*
6. **control point** : for each station of a radio link using ionospheric reflection, the point in a layer whose projection on the surface of the Earth is at a specified distance from the station on the great circle arc joining it to the second station when the length of this arc is greater than twice the specified distance. When this length is less than twice the specified distance, the control points are coincident at a point vertically above the mid-point of the great circle arc. *Note.* — For reflection from the E and F2 layers, the specified distance is generally chosen as 1000 km and 2000 km respectively. ★ point directeur → *point 52.* D Kontrollpunkt. P punkt kontrolny. (705)
7. **cross-connection point** (*Syn.* CCP (abbreviation)) : in the local line network, equipment which enables an incoming pair to be connected to any of the outgoing pairs. *Note.* — Cross-connection points are designated as primary or secondary according to their form and importance in the network. They are located between the main distribution frame and a number of distribution points. ★ sous-répartiteur → *sous-répartiteur 1.* R точка кроссировки. D Verzweigungseinrichtung. E subrepartidor. I armadio di distribuzione. N verdeler. P przełącznica pośrednia. S korskoppling. (722)
8. **crossover point** : the first point of convergence of an electron beam. ★ point de première convergence → *point 34.* R точка кроссовера. D Bündelknoten. E punto de primera convergencia. I punto di incrocio. N eerste bundelknoop. P punkt skrzyżowania. S konvergenspunkt. (531,841)
9. **Curie point** (of a magnetic substance) : a temperature below which a substance is ferromagnetic or ferrimagnetic and above which it is paramagnetic. ★ point de Curie → *point 21.* R точка Кюри (магнитного вещества). D Curie-Punkt (eines magnetischen Werkstoffes). E punto de Curie (de una sustancia magnética). I punto di Curie (di una sostanza magnetica). N Curiepunt. P punkt Curie (substancji magnetycznej). S Curiepunkt. (121,841)
10. **direct through-connection point** : a point at which a direct through-connection filter is used for the interconnection of two FDM links. ★ point de transfert direct → *point 45.* R пункт прямого транзита. D Durchgangspunkt; Direktdurchverbindungspunkt. E punto de transparencia directa. I punto di trasferimento diretto. N direct doorverbindingspunt. P punkt transferu bezpośredniego. S genomkopplingspunkt. (704)
11. **distribution point** : the final point in the local line network from which pairs are run to individual subscribers's premises. ★ point de concentration → *point 14.* R точка распределения. D Endverzweiger. E punto de concentración; punto de distribución. I distributore terminale; box. N (kabel)verdeelpunt. P szafka rozdzielcza abonencka. S fördelningspunkt. (722)
12. **distribution point** : a point where signals are taken from the trunk feeder or branch feeder to energize branch feeders or spur feeders. ★ point de distribution → *point 23.* R распределительный пункт. (723)
13. **double minimum power points** (*Syn.* twice minimum power points) : → *point 51*
14. **end (point) voltage** (*Syn.* cut off voltage (USA)) : the conventional voltage, measured at the terminals of a cell, at which the discharge of the cell on a specified load is considered finished. ★ tension d'arrêt → *tension 127.* R конечное напряжение. D Endspannung. E tensión de parada; tensión final. I tensione finale. N eindspanning. P napięcie końcowe. S slutspänning. (111)
15. **fire point** : the lowest temperature at which a product ignites and continues to burn for a specified time after a small flame has been applied to its surface under standardized conditions. ★ point de feu → *point 24.* R температура воспламенения. D Brennpunkt. E punto de combustión. I punto di combustione. N ontbrandingspunt. P temperatura palenia. S antändningstemperatur. (212)
16. **flash point** : the lowest liquid temperature at which, under certain standardized conditions, a liquid gives off vapours in quantity such as to be capable of forming an ignitable vapour/air mixture. ★ point d'éclair → *point 49.* R температура вспышки. D Flammpunkt. E punto de inflamación.

I temperatura di infiammabilità. N vlampunt. P punkt zapłonu. S flampunkt. (212,426)

17. **focal point** : centre of the focal spot. ★ point focal → *point 54.* R фокальная точка. D Brennpunkt. E punto focal. I punto focale. N inslagpunt. P ognisko. S fokalpunkt. (841)
18. **freezing point** : → *freezing 2*
19. **gel point** : the stage at which a liquid begins to exhibit pseudoelastic (jellylike) properties. *Note.* — This stage may be conveniently observed from the inflection point on a viscosity-time plot. ★ point de gélification → *point 30.* R точка гелеобразования. D Gelierpunkt. E punto de gelificación. I punto di gelificazione. N geleerpunt. P punkt żelowania. S gelpunkt. (212)
20. **input and output with isolated common point** : → *input 16*
21. **instantaneous operating point** : the point on an operating line corresponding to the total instantaneous simultaneous voltage and current of the electrode. ★ point de fonctionnement instantané → *point 27.* R мгновенная рабочая точка. D momentaner Betriebspunkt. E punto de funcionamiento instantáneo. I punto di funzionamento istantaneo. N moment-werkpunt. P punkt pracy chwilowy. S momentan arbetspunkt. (531)
22. **knee point** : a reference point on the light-signal transfer characteristic at which the gamma has a stated value. ★ coude → *coude 1.* R точка загиба. D Kniepunkt. E codo. I gomito. N kniepunt. P kolano charakterystyki. S knäpunkt. (531)
23. **knee point voltage** : → *voltage 93*
24. **melting point** : the temperature at which a chimically pure substance changes from solid to liquid state by application of heat at a given pressure. ★ point de fusion → *point 29.* R точка плавления. D Schmelzpunkt. E punto de fusión. I punto di fusione. N smeltpunt. P temperatura topnienia. S smältpunkt. (841)
25. **Néel point** : a temperature below which a substance is antiferromagnetic and above which it is paramagnetic. ★ point de Néel → *point 32.* R точка Нееля. D Néel-Punkt. E punto de Néel. I punto di Néel. N Néelpunt. P punkt Néela. S Néelpunkt. (121)
26. **neutral point connection** : → *connection 37*
27. **neutral point displacement voltage** : → *voltage 123*
28. **neutral point in a polyphase system** : the common point of the *n*-windings in a star-connected equipment such as a power transformer, or an earthing transformer. ★ point neutre dans un réseau polyphasé → *point 57.* R нейтральная точка многофазной системы; нейтраль. D Sternpunkt in einem Mehrphasensystem. E punto neutro en una red polifásica. I punto neutro in una rete polifase. N sterpunt van een meerfasenet. P punkt zerowy sieci wielofazowej. S nollpunkt. (601)
29. **operating point** (of an electronic tube) (*Syn.* working point (of an electronic tube)) : the point on the family of characteristic curves corresponding to the average voltages or currents of the electrodes in the presence of a signal. ★ point de fonctionnement → *point 26.* R рабочая точка. D Arbeitspunkt. E punto de funcionamiento. I punto di funzionamento. N werkpunt. P punkt pracy. S arbetspunkt. (531)
30. **panel point** (*Syn.* node) : → *node 5*
31. **peak point** (of a tunnel diode) : the point on the current-voltage characteristic of a tunnel diode corresponding to the lowest voltage in the forward direction, for which the differential conductance is zero. ★ point de pic → *point 33.* R точка пик (туннельного диода). D Gipfel-, Höckerpunkt (einer Tunneldiode). E punta de pico (de un diodo túnel). I punto di picco (di un diodo tunnel). N toppunt (van een tunneldiode). P punkt szczytowy (diody tunelowej); szczyt. S toppunkt. (521)
32. **point brilliance** : → *brilliance 1*
33. **point of common coupling** (*Syn.* PCC (abbreviation)) : the point of the public supply network, electrically nearest to a particular consumer's installation, and at which other consumers installations are, or may be, connected. ★ point commun de raccordement au réseau public → *point 9.* R точка общего подключения. D Verknüpfungspunkt; PCC (Abkürzung). E punto de acoplamiento común; PCC (abreviatura). I punto comune di connessione alla rete pubblica; PCC (abbreviazione). N gemeenschappelijk koppelpunt. P punkt wspólnego powiązania sieci publicznej. S gemensam anslutningspunkt. (161)
34. **point of supply** : a point in the electrical system where the technical and commercial criteria of supply are specified. *Note.* — The point of supply may be different from the boundary between the supply system and the consumer's own installation or from the metering point. ★ point de livraison → *point 31.* R пункт питания электрической энергией. D Übergabestelle. E punto de suministro. I punto di fornitura. N leveringspunt. P punkt zasilający (przyłącze). S leveranspunkt. (604)
35. **point sound source** : → *source 20*
36. **point vision** : → *vision 4*
37. **pour point** : the lowest temperature at which an insulating liquid will continue to flow when it is cooled under standardized conditions. ★ point d'écoulement → *point 50.* R температура текучести. D Pourpoint. E punto de fluidez crítica. I punto di scorrimento. N vloeipunt. P temperatura płynności. S flytpunkt. (212)
38. **pour point depressant** : → *depressant 1*
39. **projected peak point** (of a tunnel diode) : the point on the current-voltage characteristic of a tunnel diode where the current is equal to the peak point current, but where the voltage is greater than the valley point voltage. ★ point isohypse → *point 56.* R проекционная точка пик (туннельного диода). D projizierter Gipfel-, Höckerpunkt (einer Tunneldiode). E punta de pico proyectada (de un diodo túnel). I proiezione del punto di picco (di un diodo tunnel). N geprojecteerd toppunt (van een tunneldiode). P punkt szczytowy przesunięty (diody tunelowej). S projicerad toppunkt. (521)
40. **reference point** : point, whose position is specified with respect to the transducer geometry, to which electroacoustic characteristics of a transducer are referred, preferably at the origin of angular coordinates on the principal axis. ★ point de référence → *point 37.* R опорная точка. D Bezugspunkt. E punto de referencia. I punto di riferimento di un trasduttore. N referentiepunt. P punkt odniesienia. S referenspunkt. (801)
41. **sectioning point** : an arrangement of the contact line equipment to provide insulation between adjacent sections of contact line and yet allow continuous current collection. ★ point de sectionnement → *point 40.* R точка секционирования. D Trennstelle. E punto de seccionamiento. I punto di sezionamento. N sectieschakelaar. P punkt sekcjonowania. S sektionspunkt. (811)
42. **separation point** (in FDM transmission) : a defined point at the end of a transmission system where standard defined conditions exist such that interconnection with another transmission system may be achieved. *Note.* — Separation points permit interconnection with other equipments such as direct through-connection filters, translating equipment, etc. ★ point de séparation → *point 41.* R точка разделения (при передаче с ЧРК). D Trennungspunkt (in FM Nachrichtenübertragung). E punto de separación (en transmisión de corrientes portadoras). I punto di separazione (in trasmissione FDM). N scheidingspunt (bij FDM-transmissie). P punkt rozdziału (w transmisji częstotliwościowej). S gränsnitt. (704)
43. **signal transfer point** : a node in a signalling network, handling signal messages and transferring them from one signalling link to another. ★ point de transfert sémaphore → *point 46.* R пункт передачи сигнализации. D Zeichengabe-Durchschaltepunkt; Zeichengabenuebertragungsknoten. E punto de transferencia de señal. I punto di trasferimento della segnalazione. N signaleringstransietpunt. P punkt przekazywania sygnałów. S signalöverföringsnod. (714)
44. **singing point** : the threshold point of the operating characteristics of an equipment or transmission channel where a small increase in positive feedback will produce singing. ★ point d'amorçage → *point 11.* R точка зуммирования. D Einsatzpunkt. E punto de cebado (de una oscilación no deseada). I punto di innesco (di un'oscillazione spuria). N punt van rondzingen. P punkt gwizdu. S tjutpunkt. (702)
45. **solidification point** (*Syn.* freezing point) : → *freezing 2*
46. **star point** (*Syn.* node (of a cabled distribution system)) : point of origin of subscriber feeders in a star-system. ★ nœud de répartition → *nœud 15.* R узловая точка (радиальной распределительной сети). (723)
47. **terminal point** : a point in a telecommunication network at which a terminal may be connected. ★ point terminal → *point 58.* D Endgeräteschnittstelle. P punkt końcowy. (715)

48. **termination point** : the part of a contact, terminal of a contact, terminal or terminal end to which a conductor is normally attached. ★ point de raccordement → *point 35.* R место подсоединения проводника. D Anschlußpunkt. E punto de unión. I punto di raccordo. N draadaansluitpunt. P ..... S anslutningspunkt. (581)
49. **through-group connection point** : a point in a group link at which two consecutive group sections are connected in tandem, via a through-group filter, where appropriate. *Note.* — Similar definitions can be given for : "through-supergroup connection point", "through-mastergroup connection point", "through-supermastergroup connection point" and "through 15-supergroup assembly connection point" or "through-hypergroup connection point". ★ point de transfert de groupe primaire → *point 44.* R тракт первичного группового транзита. D Primärgruppendurchgangs(verbindungs-)punkt. E punto de transparencia de grupo primario. I punto di trasferimento di gruppo primario. N doorverbindingspunt voor een doorgaande groep. P punkt transferu grupy pierwotnej. S gruppgenomkopplingspunkt. (704)
50. **triple point** : the temperature at which the solid, liquid and gas phases of a chemically pure substance may co-exist in equilibrium. ★ point triple → *point 59.* R тройная точка. D Tripelpunkt. E punto triple. I punto triplo. N tripelpunt. P temperatura w punkcie potrójnym; punkt potrójny. S trippelpunkt. (841)
51. **twice minimum power points** (*Syn.* double minimum power points) : the two positions on either side of a standing wave minimum along a slotted line at which the power extracted by the coupling probe is twice the power at the minimum. *Note.* — To more accurately determine very high standing-wave ratios, the mid-point between these two points is used to determine the exact position of the minimum and the standing wave ratio can be determined from the distance between the two points. ★ points de puissance minimale doublée → *point 60.* R точки удвоенной минимальной мощности; точки двойной минимальной мощности. D Zweipunktverfahren zur Messung der Knotenbreite. E puntos de potencia doble del mínimo. I punti di potenza minima doppia. N tweemaal minimum vermogenspunten. P punkty podwójnej mocy. S ..... (726)
52. **valley point** (of a tunnel diode) : the point on the current-voltage characteristic of a tunnel diode corresponding to the lowest voltage greater than the peak point voltage, for which the differential conductance is zero. ★ point de vallée → *point 48.* R точка впадины (туннельного диода). D Talpunkt (einer Tunneldiode). E punta de valle (de un diodo túnel). I punto di valle (di un diodo tunnel). N dalpunt (van een tunneldiode). P punkt dolinowy (diody tunelowej); dolina. S dalpunkt. (521)
53. **working point** : of a permanent magnet material forming part of a given magnetic circuit, the point on a demagnetization curve or recoil line whose co-ordinates are the operating magnetic flux density and the magnetic field strength. ★ point de fonctionnement → *point 25.* R рабочая точка. D Arbeitspunkt. E punto de funcionamiento. I punto di funzionamento. N werkpunt. P punkt pracy. S arbetspunkt. (221)
54. **working point** (*Syn.* operating point) : → *point 29*

pointer

1. **back pointer** : a device used to indicate the point of exit of the beam axis. ★ rétrocentreur → *rétrocentreur 1.* R задний центратор. D Gegenpunktanzeiger. E retrocentrador. I retrocentratore di fascio. N ..... P centrator tylny. S riktpinne för utgående strålar. (881)
2. **front pointer** : a device used to indicate the location of the incident beam axis. ★ centreur → *centreur 1.* R передний центратор. D Frontpunktanzeiger. E centrador. I centratore di fascio. N ..... P centrator frontowy. S riktpinne. (881)
3. **pointer instrument** : → *instrument 26*

point-source

1. **point source** : source of radiation the dimensions of which are small enough, compared with the distance between the source and the irradiated surface, for them to be neglected in calculations and measurements. *Note.* — A point source which emits uniformly in all directions is called an isotropic point source or uniform point source. ★ source ponctuelle → *source 28.* R точечный источник. D punktartige Strahlungsquelle. E fuente puntual. I sorgente puntiforme. N puntbron. P źródło punktowe. S punktstrålare. (845)

point-to-point

1. **multiple point-to-point configuration** : → *configuration 10*
2. **point-to-point configuration** : → *configuration 15*
3. **point-to-point connection** : → *connection 42*
4. **point-to-point traffic** (*Syn.* traffic parcel) : → *parcel 1*

poison

1. **burnable poison** : poison purposely included in a reactor to help control long-term reactivity changes by its progressive burn-up. ★ poison consommable → *poison 2.* D abbrennbares Reaktorgift. E veneno quemable. I veleno consumabile (bruciabile). N slijtend gif; verdwijnend gif. P trucizna wypalająca się. S brännbart gift. (026)
2. **fluid poison control** : → *control 105*
3. **nuclear poison** : a substance which, because of its high neutron absorption cross-section, can reduce reactivity. ★ poison nucléaire → *poison 3.* D Reaktorgift. E veneno nuclear. I veleno nucleare. N kerntechnisch gif. P trucizna reaktorowa. S reaktorgift. (026)

Poisson

1. **Poisson traffic** : → *traffic 18*

polar

1. **polar cap** : → *cap 7*
2. **polar cap absorption** : → *absorption 32*
3. **polar orbit** : → *orbit 8*

polarity

1. **polarity** : an indication of which poles or pole faces of a magnet are north poles or north pole faces and which are south poles or south pole faces. ★ polarité → *polarité 3.* R полярность. D Polarität. E polaridad. I polarità. N polariteit. P biegunowość magnesu. S polaritet. (221)
2. **polarity indicator** : → *indicator 17*
3. **polarity test** : → *test 61*

polarization

1. **anodic polarization** : an electrode polarization associated with an anodic reaction. ★ polarisation anodique → *polarisation 27.* R анодная поляризация. D Anodenpolarisation. E polarización anódica. I polarizzazione anodica. N anodische polarisatie. P polaryzacja anodowa. S anodisk polarisation. (111)
2. **cathodic polarization** : an electrode polarization associated with a cathodic reaction. ★ polarisation cathodique → *polarisation 28.* R катодная поляризация. D Kathoden polarisation. E polarización catódica. I polarizzazione catodica. N kathodische polarisatie. P polaryzacja katodowa. S katodisk polarisation. (111)
3. **cell polarization** : the sum of the absolute values of anodic and cathodic polarizations. ★ polarisation d'un élément → *polarisation 35.* R поляризация электрохимического элемента. D Zellenpolarisation. E polarización de un elemento (electroquímico). I polarizzazione di un elemento (elettrochimico). N celpolarisatie. P polaryzacja ogniwa. S cellpolarisation. (111)
4. **circular polarization** : an elliptical polarization in the special case where the extremity of the electic flux density vector, at a given point, describes a circle. ★ polarisation circulaire → *polarisation 29.* D zirkulare Polarisation. P polaryzacja kołowa. (705)
5. **circular polarization** : a polarization for which the extremity of the electric field strength vector or of a specified field vector at a fixed point in space describes a fixed circle. ★ polarisation circulaire → *polarisation 30.* R круговая поляризация. D zirkulare Polarisation. E polarización circular. I polarizzazione circolare. N circulaire polarisatie. P polaryzacja kołowa. S cirkulär polarisation. (726)
6. **clockwise polarization** (*Syn.* right-hand polarization) : → *polarization 42*
7. **counter-clockwise polarization** (*Syn.* left-hand polarization) : → *polarization 19*
8. **cross polarization** : the appearance, in the course of propagation, of a polarization component which is orthogonal to the expected polarization. ★ transpolarisation

→ *transpolarisation 1.* D Kreuzpolarisation. P polaryzacja skrośna. (705)

9. **cross polarization discrimination** : → *discrimination 1*
10. **cross polarization isolation** : → *isolation 1*
11. **direction of polarization** : → *direction 7*
12. **electric polarization** (*P*) : a vector quantity given by the electric flux density minus the product of the electric constant and the electric field strength

$$P = D - \varepsilon_0 E$$

★ polarisation électrique → *polarisation 38.* R электрическая поляризация. D elektrische Polarisation. E polarización eléctrica. I polarizzazione elettrica. N elektrische polarisatie. P polaryzacja elektryczna. S elektrisk polarisation. (121)

13. **electric polarization curve** : → *curve 14*
14. **(electrode) polarization** : the difference between the potential of an electrode and its equilibrium potential. ★ polarisation (d'électrode) → *polarisation 33.* R поляризация электрода. D Elektrodenpolarisation (spannung). E polarizacio'n (de electrodo). I polarizzazione (d'elettrodo). N (elektrode)polarisatie. P polaryzacja elektrody. S (elektrod)polarisation. (111)
15. **elliptical polarization** : the polarization of an electromagnetic wave such that the extremity of the electric flux density vector relative to a given point describes an ellipse whose centre coincides with this point. *Note.* — In a linear medium with properties independent of time, generally all sinusoidal waves ar elliptically polarized, including linear polarization and circular polarization as special cases. ★ polarisation elliptique → *polarisation 40.* D elliptische Polarisation. P polaryzacja eliptyczna. (705)
16. **elliptical polarization** : a polarization for which the extremity of the electric field strength vector or of a specified field vector at a fixed point in space describes a fixed ellipse. ★ polarisation elliptique → *polarisation 41.* R эллиптическая поляризация. D elliptische Polarisation. E polarización elíptica. I polarizzazione ellittica. N elliptische polarisatie. P polaryzacja eliptyczna. S elliptisk polarisation. (726)
17. **fullness factor related to the polarization** : → *factor 84*
18. **horizontal polarization** : a linear polarization in which the electric flux density vector is horizontal. ★ polarisation horizontale → *polarisation 42.* D waagerechte Polarisation; horizontale Polarisation. P polaryzacja pozioma. (705)
19. **left-hand polarization** (*Syn.* counter-clockwise polarization) : polarization such that the electric field strength vector or a specified field vector rotates in function of time in a counter-clockwise sense in any fixed plane normal to the direction of propagation or to a specified reference direction, as seen by an observer looking in this direction. *Note.* — The reference direction must be specified when the direction of propagation is parallel to the plane of polarization. ★ polarisation senestrorsum → *polarisation 50.* R левосторонняя поляризация; поляризация против часовой стрелки. D linksdrehende Polarisation; Polarisation gegen den Uhrzeigersinn. E polarización levógira; polarización sinistrórsum; polarización en sentido anti-horario. I polarizzazione sinistrorsa. N linksdraaiende polarisatie. P polaryzacja lewoskrętna. S moturspolarisation. (705,726)
20. **linear polarization** : the polarization of an electromagnetic wave such that the extremity of the electric flux density vector relative to a given point describes a fixed straight line whose centre coincides with this point. ★ polarisation rectiligne → *polarisation 48.* D lineare Polarisation. P polaryzacja linearna. (705)
21. **linear polarization** : a polarization for which the extremity of the electric field strength vector or of a specified field vector at a fixed point in space describes a fixed straight line. ★ polarisation rectiligne → *polarisation 49.* R линейная поляризация. D lineare Polarisation. E polarización lineal. I polarizzazione rettilinea. N lineaire polarisatie. P polaryzacja liniowa. S linjär polarisation. (726)
22. **magnetic polarization** : the product of magnetization and magnetic constant. ★ polarisation magnétique → *polarisation 43.* R магнитная поляризация. D magnetische Polarisation. E polarización magnética. I polarizzazione magnetica. N magnetische polarisatie. P polaryzacja magnetyczna. S magnetisk polarisation. (121)
23. **non-reciprocal polarization rotator** : → *rotator 1*
24. **orthogonal polarization** : 1) The polarization of an elliptically polarized wave compared to the polarization of another wave of the same kind and such that : a) the directions of propagation are the same b) the planes of polarization are the same c) the polarization ellipses have the same eccentricity, but perpendicular major axes and opposite senses of rotation. 2) The polarization of a linearly polarized wave compared to the polarization of another wave of the same kind and such that : a) the directions of propagation are the same b) the electric flux density vectors are perpendicular. *Note.* — In English, the term "cross-polarization" has another connotation . ★ polarisation orthogonale → *polarisation 47.* D orthogonale Polarisation. P polaryzacja ortogonalna. (705,726)
25. **plane of polarization** : → *plane 15*
26. **polarization** : features on mating components to prevent incorrect mating. ★ polarisation → *polarisation 23.* R поляризация компонентов. D Polarisation. E polarización. I irreversibilità; polarizzazione. N polarisatie. P identyfikator. S förväxlingsspärr. (581)
27. **polarization** (of an electromagnetic wave) : that attribute of an electromagnetic wave characterized by the curve described with time by the extremity of the electric flux density vector at a fixed point, and by the direction along this curve. ★ polarisation → *polarisation 24.* D Polarisation (einer elektromagnetischen Welle). P rodzaj fali (elektromagnetycznej). (705)
28. **polarization** (of a wave or field vector) : the property of a sinusoidal electromagnetic wave or field vector defined at a fixed point in space by the direction of the electric field strength vector or of any specified field vector; when this direction varies with time the property may be characterized by the locus described by the extremity of the considered field vector. ★ polarisation → *polarisation 25.* R поляризация (волны или вектора поля). D Polarisation (einer Welle oder eines Feldvektors). E polarización (de una onda o de un vector de campo). I polarizzazione (di un'onda o di un vettore di campo). N polarisatie (van een golf of veldvector). P polaryzacja (fali lub wektora pola). S polarisation. (726)
29. **polarization coupling loss** : → *loss 70*
30. **polarization current** : → *current 140*
31. **polarization (decoupling) ratio** : → *ratio 65*
32. **polarization ellipse** : → *ellipse 1*
33. **polarization ellipse** : → *ellipse 2*
34. **polarization match** : → *match 1*
35. **polarization (of a degenerate mode)** (in a waveguide) : the polarization of a specific field vector of a particular mode within a set of degenerate modes in a waveguide. *Note.* — The main application of this concept is to waveguide having circular or square cross-sections, where there are two independent modes of propagation. In these particular cases, the polarization of the mode may be taken as that of the electric field strength vector on an axis of symmetry of the waveguide. ★ polarisation (d'un mode dégénéré) → *polarisation 36.* R поляризация (вырожденного типа колебаний) (в волноводе). D Polarisation (eines entarteten Modes) (im Wellenleiter). E polarización (de un modo degenerado) (en una guíaonda). I polarizzazione (di un modo degenere) (in una guida d'onda). N polarisatie (van een ontaarde modus) (in een golfgeleider). P polaryzacja rodzaju zdegenerowanego (w falowodzie). S polarisation för modkomponent. (726)
36. **polarization of an antenna** (in a given direction) : that polarization of the wave radiated by an antenna in the far field region and in a specified direction. *Note.* — If no direction is specified, the direction is assumed to be that of maximum radiation intensity. ★ polarisation d'une antenne → *polarisation 37.* R поляризация антенны (в данном направлении). D Polarisation einer Antenne (in einer bestimmten Richtung). E polarización de una antena (en una dirección dada). I polarizzazione di un'antenna (in una data direzione). N polarisatie van een antenne (in een gegeven richting). P polaryzacja anteny (w danym kierunku). S polarisation. (712)
37. **polarization ratio** : → *ratio 66*
38. **polarization ratios** : → *ratio 67*
39. **receiving polarization** (of an antenna, in a given direction) : that polarization of a plane wave of given power flux density incident from a specified direction, which results in maximum received power at the antenna terminals, for that direction. *Notes. 1* — If no direction is specified, the direction is

assumed to be that of the highest maximum received power, over all the directions in space. *2* — The receiving polarization of an antenna can be determined from the polarization of the antenna employed as transmitting antenna, since, in the same plane of polarization, the polarization ellipses have the same axial ratio, the same sense of polarization and the same spatial orientation. ★ polarisation à la réception → *polarisation 26.* R поляризация антенны в режиме приема (в данном направлении). D Empfangspolarisation (einer Antenne in eines bestimmten Richtung). E polarización en recepción (de una antena en una dirección dada). I ..... N ..... P ..... S ..... (712)

40. **remanent magnetic polarization** : the value of the magnetic polarization remaining in a magnetized body when, in the absence of a self-demagnetizing field, the applied magnetic field strength is brought to zero. ★ polarisation (magnétique) rémanente → *polarisation 46.* R остаточная магнитная поляризация. D remanente magnetische Polarisation. E polarización (magnética) remanente. I polarizzazione (magnetica) residua. N remanente magnetische polarisatie. P polaryzacja magnetyczna szczątkowa. S remanent magnetisk polarisation. (121,221)
41. **residual electric polarization** : the electric polarization of a dielectric after the electric field is removed. ★ polarisation électrique résiduelle → *polarisation 39.* R остаточная электрическая поляризация. D remanente elektrische Polarisation. E polarización eléctrica residual. I polarizzazione elettrica residua. N remanente elektrische polarisatie. P polaryzacja elektryczna szczątkowa. S elektrisk restpolarisation. (121)
42. **right-hand polarization** (*Syn.* clockwise polarization) : polarization such that the electric field strength vector or a specified field vector rotates in function of time in a clockwise sense in any fixed plane normal to the direction of propagation or to a specified reference direction, as seen by an observer looking in this direction. *Note.* — The reference direction must be specified when the direction of propagation is parallel to the plane of polarization. ★ polarisation dextrorsum → *polarisation 34.* R правосторонняя поляризация; поляризация по часовой стрелке. D rechtsdrehende Polarisation; Polarisation im Uhrzeigersinn. E polarización dextrógira; polarización dextrórsum; polarización en sentido horario. I polarizzazione destrorsa. N rechtsdraaiende polarisatie. P polaryzacja prawoskrętna. S medurspolarisation. (705,726)
43. **saturation magnetic polarization** (J_s) : the maximum obtainable magnetic polarization for a given substance at a given temperature. ★ polarisation magnétique à saturation → *polarisation 45.* R магнитная поляризация насыщения. D magnetische Sättigungspolarisation. E polarización magnética de saturación. I polarizzazione magnetica a saturazione. N magnetische verzadigingspolarisatie. P polaryzacja magnetyczna nasycenia. S (magnetisk) mättningspolarisation. (221)
44. **vertical polarization** : a linear polarization in which the electric flux density vector is in the vertical plane containing the direction of propagation. ★ polarisation verticale → *polarisation 51.* D senkrechte Polarisation; vertikale Polarisation. P polaryzacja pionowa. (705)

polarized

1. **circularly polarized** : pertaining to a wave or field vector exhibiting circular polarization. ★ polarisé circulairement → *polarisé 3.* R поперечный поляризованный. D zirkular polarisiert. E polarizado circularmente. I polarizzato in modo circolare. N circulair gepolariseerd. P spolaryzowany kołowo. S cirkulärt polariserad. (726)
2. **clockwise polarized wave** (*Syn.* right-hand polarized wave) : → *wave 49*
3. **counter-clockwise polarized wave** (*Syn.* left-hand polarized wave) : → *wave 29*
4. **elliptically polarized** : pertaining to a wave or field vector exhibiting elliptical polarization. ★ polarisé elliptiquement → *polarisé 4.* R эллиптически поляризованный. D elliptisch polarisiert. E polarizado elípticamente. I polarizzato in modo ellittico. N elliptisch gepolariseerd. P spolaryzowany eliptycznie. S elliptiskt polariserad. (726)
5. **left-hand polarized wave** : → *wave 29*
6. **linearly polarised mode** : → *mode 35*
7. **linearly polarized** : pertaining to a wave or field vector exhibiting linear polarization. ★ polarisé rectilignement → *polarisé 5.* R линейно поляризованный. D linear polarisiert. E polarizado linealmente. I polarizzato in modo rettilineo. N lineair gepolariseerd. P spolaryzowany liniowo. S linjärt polariserad. (726)
8. **polarized radiation** : → *radiation 51*
9. **polarized relay** : → *relay 29*
10. **polarized ringer** (*Syn.* magneto (telephone) bell) : → *bell 4*
11. **right-hand polarized wave** : → *wave 49*
12. **scalar permeability for circularly polarized fields** : → *permeability 26*

polar-modulation

1. **polar-modulation system (for stereophonic broadcasting)** : → *system 148*

Polder

1. **Polder's tensor permeability** : → *permeability 18*

pole

1. **"A" pole** (*Syn.* "A" frame (USA)) : a double-member support in which the tops of each member are shaped, keyed and bolted together as at the apex of the letter "A" and are joined by a common cross-block. ★ poteau en «A» → *poteau 4.* R А-образная опора. D A-Mast. E apoyo en «A». I palo ad «A». N A-paal; bokpaal. P słup A-owy. S ..... (466)
2. **auxiliary pole shunting** : → *shunting 1*
3. **clearance between poles** : → *clearance 4*
4. **commutating pole** (*Syn.* interpole) : → *interpole 1*
5. **field pole** : that part of a core which carries or in which is embedded an excitation winding or is constituted by a permanent magnet. ★ pièce polaire → *pièce 10.* R полюс. D Feldpol (Polstück). E pieza polar. I polo. N pool. P biegun. S pol. (411)
6. **"H" pole** (*Syn.* portal support) : → *support 16*
7. **hand pole** (*Syn.* hand stick) : a working pole used to operate on network components at a distance by means of universal tool attachments fixed at its end. ★ perche à main → *perche 1.* R ..... D Handstange. E pértiga de mano. I asta portautensile. N handstok. P drążek operacyjny. S isolerstång. (604)
8. **main pole** : the part of the magnetic circuit which provides the main flux. ★ pôle principal → *pôle 17.* R главный полюс. D Hauptpol. E polo principal. I polo principale. N hoofdpool. P biegun główny. S huvudpol. (811)
9. **monolithic multiple pole vibrator** : → *vibrator 4*
10. **non-salient pole** : that part of a cylindrical core which acts as a pole by virtue of excitation of a distributed winding. ★ pôle lisse → *pôle 15.* R неявновыраженный полюс. D Vollpol. E polo liso. I polo liscio. N niet-uitspringende pool. P biegun utajony. S icke-utpräglad pol. (411)
11. **north pole** (of a magnet) : the pole of a magnet, away from which the external magnetic flux is directed. *Note.* — The north pole of a magnet is attracted by the terrestrial magnetic pole nearest to the geographical North Pole of the Earth. ★ pôle nord → *pôle 16.* R северный полюс (магнита). D Nordpol (eines Magneten). E polo norte (de un imán). I polo nord (di un magnete). N noordpool. P biegun (magnesu) północny. S nordpol. (221)
12. **north pole face** : → *face 3*
13. **pole** : a vertical single member support in wood, concrete, steel or other material, with one end buried in the ground, either directly or by means of a foundation. ★ poteau → *poteau 2.* R одностоечная опора. D einstieliger Mast. E poste. I palo. N paal. P słup jednożerdziowy. S stolpben. (466)
14. **pole** (of an equipment) : in certain types of equipment such as switchgear, the part corresponding to one of the phases in a.c. or to one of the polarities in d.c. *Note.* — According to the number of poles within the equipment, it is called: single-pole equipment, two-pole equipment, etc. ★ pôle → *pôle 10.* R полюс (аппарата). D Pol (eines Gerätes). E polo (de un aparato). I polo (di un apparecchio). N pool (van een eenfasetoestel). P biegun (aparatu). S pol. (601)
15. **pole** (of a d.c. system) : the designation of a conductor, terminal or any other element of a d.c. system which is likely to be energized under normal conditions; e.g. positive pole, negative pole. ★ pôle → *pôle 11.* R полюс (сети постоянного тока). D Pol (in einem Gleichstromnetz). E polo (de una red de corriente continua). I polo (di una rete a corrente continua). N pool (van een gelijkspanningssysteem). P biegun (sieci prądu stałego). S pol i likströmsnät. (601)

16. **pole** (in electric traction) (*Syn.* mast) : a main vertical support in solid wood, concrete or steel, or of steel lattice construction, with one end planted in the ground at the side of the track, either directly or through a separate base or foundation. ★ poteau → *poteau 3.* R столб (в электрической тяге). D Mast. E poste (en tracción eléctrica). I palo. N paal; mast. P słup. S stolpe. (811)
17. **pole body** : that part of a salient pole around which a field coil is fitted. ★ noyau polaire → *noyau 16.* R сердечник полюса. D Polschaft. E núcleo polar. I nucleo polare. N poolkern. P pieniek bieguna. S polkärna. (411)
18. **pole body insulation** : → *insulation 47*
19. **pole end plate** : → *plate 25*
20. **pole face** : → *face 4*
21. **pole face** : → *face 5*
22. **pole face level** : → *level 69*
23. **pole face shaping** : → *shaping 1*
24. **pole hook** : → *hook 1*
25. **pole (of a d.c. line)** : the designation of a conductor, or bundle of conductors, of a d.c. line which is intended to be energized under normal use. ★ pôle (d'une ligne à courant continu) → *pôle 14.* R полюс (линии электропередачи постоянного тока). D Pol (einer Gleichstromleitung). E polo (de una línea de corriente continua). I polo (di una linea a corrente continua). N pool. P biegun (linii prądu stałego). S pol. (466)
26. **pole of a switching device** : the portion of a switching device associated exclusively with one electrically separated conducting path of its main circuit and excluding those portions which provide a means for mounting and operating all poles together. *Note.* — A switching device is called single-pole if it has only one pole. If it has more than one pole, it may be called multipole (two-pole, three-pole, etc.) provided the poles are or can be coupled in such a manner as to operate together. ★ pôle d'un appareil de connexion → *pôle 13.* R полюс коммутационного аппарата. D Pol eines Schaltgerätes. E polo de un aparato de conexión. I polo di un apparecchio di manovra. N pool van een schakeltoestel. P biegun łącznika. S pol. (441)
27. **pole piece** : → *piece 1*
28. **pole pitch** : → *pitch 10*
29. **pole retriever** : → *retriever 1*
30. **pole shoe** : → *shoe 3*
31. **pole slipping** : → *slipping 1*
32. **pole tips** : → *tip 4*
33. **pole tips** : → *tip 5*
34. **poles** (of a magnet) : the parts of a magnet from which the useful external magnetic flux enters or leaves the magnet. ★ pôles → *pôle 20.* R полюса магнита. D Pole eines Magneten. E polos de un imán. I poli di un magnete. N magneetpolen. P bieguny magnesu. S magnetpoler. (151)
35. **salient pole** : a type of field pole which projects from the yoke or hub towards the air-gap. ★ pôle saillant → *pôle 18.* R явновыраженный полюс. D ausgeprägter Pol (Schenkelpol). E polo saliente. I polo saliente. N uitspringende pool. P biegun wydatny. S utpräglad pol. (411)
36. **salient pole machine** : → *machine 23*
37. **salient pole synchronous induction motor** : → *induction motor 7*
38. **shaded pole motor** : → *motor 88*
39. **single pole automatic reclosing control equipment** : → *equipment 69*
40. **solid pole synchronous motor** : → *motor 95*
41. **south pole** (of a magnet) : the pole of a magnet into which the external magnetic flux is directed. *Note.* — The south pole of a magnet is attracted by the terrestrial magnetic pole nearest to the geographical South Pole of the Earth. ★ pôle sud → *pôle 19.* R южный полюс (магнита). D Südpol (eines Magneten). E polo sur (de un imán). I polo sud (di un magnete). N zuidpool. P biegun (magnesu) południowy. S sydpol. (221)
42. **south pole face** : → *face 8*
43. **support pole** : a working pole used to hold or move conductors or other equipment. ★ perche de maintien → *perche 2.* R изолирующая тяга. D Haltestange. E pértiga de soporte. I asta di spostamento. N steunstok. P żerdź izolacyjna. S stödstång. (604)
44. **three pole automatic reclosing control equipment** : → *equipment 82*
45. **working pole** (*Syn.* working stick) : an insulating tool made of insulating tube or/and rod with end fittings. ★ perche de travail → *perche 3.* R изолирующая штанга. D Arbeitsstange. E pértiga de trabajo. I asta di lavoro. N werkstok. P drążek izolacyjny. S manöverstång. (604)

pole-changing

1. **pole-changing control** : → *control 139*

pole-mounted

1. **pole-mounted substation** : → *substation 20*

policy

1. **maintenance policy** : a description of the interrelationship between the maintenance echelons, the indenture levels and the levels of maintenance to be applied for the maintenance of an item. ★ politique de maintenance → *politique 2.* R правила технического обслуживания и ремонта. D Instandhaltungsgrundsätze. E política de mantenimiento. I politica di manutenzione. N onderhoudsbeleid. P polityka obsługi. S underhållsplan. (191)

polling

1. **polling** : the process whereby data sources are invited, one at a time, to transmit. ★ invitation à émettre → *invitation 2.* R циклический опрос; приглашение к передаче; временное сканировани. D zyklisches Abarbeiten; zyklische Absuche. E invitación a emitir. I invito a trasmettere (condizionato dalla scansione). N afvragen. P zaproszenie do nadawania. S avfrågning. (714,721)
2. **polling telecontrol system** : → *system 149*

pollution

1. **artificial pollution test** : → *test 4*

polychlorinated

1. **polychlorinated benzenes** : → *benzene 1*
2. **polychlorinated biphenyls** : → *biphenyl 1*

polygon

1. **polygon connection** : → *connection 43*

polygonal

1. **polygonal equipment** : → *equipment 57*

polymer

1. **high conductivity polymer** : a polymer the electrical conductivity of which is sufficient to enable it to be used for current carrying applications. ★ polymère de forte conductivité → *polymère 2.* R электропроводящий полимер. D starkleitendes Polymer. E polímero de alta conductividad. I polimero ad elevata conduttività. N goedgeleidend polymeer. P polimer o dużej przewodności. S ledande polymer. (212)
2. **low conductivity polymer** : a polymer the electrical conductivity of which is sufficient to dissipate any electrostatic charge on it. ★ polymère de faible conductivité → *polymère 1.* R полупроводящий полимер. D schwachleitendes Polymer. E polímero de baja conductividad. I polimero a bassa conduttività. N zwakgeleidend polymeer. P polimer o małej przewodności. S lågledande polymer. (212)

polymerization

1. **degree of polymerization** : → *degree 11*
2. **degree of polymerization** : → *degree 12*

polyolefin

1. **polyolefin oil** : → *oil 15*

polyphase

1. **balanced polyphase source** : → *source 2*
2. **balanced polyphase system** : → *system 15*
3. **balanced state of a polyphase network** : → *state 2*
4. **element of a polyphase circuit** : → *element 18*
5. **neutral point in a polyphase system** : → *point 28*
6. **polyphase circuit** : → *circuit 137*
7. **polyphase circuit** : → *circuit 138*
8. **polyphase device** : → *device 44*
9. **polyphase linear quantity** : → *quantity 22*

10. **polyphase machine** : → *machine 21*
11. **polyphase motor** : → *motor 76*
12. **polyphase node** : → *node 11*
13. **polyphase port** : → *port 3*
14. **polyphase source** : → *source 21*
15. **polyphase system** : → *system 150*
16. **polyphase (voltage) source** : → *voltage source 5*
17. **(set of) components of a polyphase (or *m*-phase) linear quantity** : → *component 50*
18. **symmetrical polyphase circuit** : → *circuit 174*
19. **symmetrical polyphase (voltage) source** : → *voltage source 8*
20. **unbalanced state of a polyphase network** : → *state 47*
21. **zero-sequence impedance (of a polyphase winding)** : → *impedance 70*

pondage

1. **pondage power station** : → *power station 16*

pool

1. **pool cathode** : → *cathode 32*
2. **pool rectifier tube** : → *tube 67*

pop

1. **pop** (*Syn.* click) : → *click 3*

population

1. **population as a whole** : the entire population, that is to say classified workers, non-classified workers, patients and members of the public. ★ population dans son ensemble → *population 1.* R население в целом. D Gesamtbevölkerung. E conjunto de la población. I popolazione nel suo insieme. N gehele populatie. P cała populacja. S totalbefolkning. (881)

porch

1. **back porch (of line-synchronising signal)** : portion of the line blanking interval situaded after the line synchronising pulse. ★ palier arrière → *palier 25.* R задняя площадка (синхронизирующего импульса строк). (723)
2. **front porch (of line-synchronising signal)** : portion of the line blanking interval situated in advance of the line synchronising pulse. ★ palier avant → *palier 27.* R передняя площадка (синхронизирующего импульса строк). (723)

porosity

1. **porosity** : ratio of the volume of the voids in a porous absorbing material to the total volume. ★ porosité → *porosité 1.* R пористость. D Porosität. E porosidad. I porosità. N porositeit. P porowatość. S porositet. (801)

porous

1. **porous absorber** : → *absorber 4*

port

1. **driving-point immittance of an n-port network** : → *immittance 1*
2. ***n*-port network** : → *network 59*
3. **polyphase port** : the ordered set of the *m* ports of the graph of a polyphase circuit corresponding to one another by cyclic permutation. ★ accès polyphasé → *accès 9.* R многофазный вход. D Mehrphasentor. E puerta polifásica. I ingresso polifase. N meerfasenpoort. P wrota (obwodu wielofazowego). S ..... (131)
4. **port** (*Syn.* terminal pair) : a set of two terminals of a network such that the current entering at one terminal is identical with the current leaving the other. ★ porte → *porte 3.* R вход; пара зажимов. D Tor; Klemmenpaar. E puerta. I porta; coppia di morsetti. N poort; klemmenpaar. P wrota; para końcówek. S port; polpar. (131)
5. **port** (of a network) : a termination through which signals can enter or leave a network. ★ accès → *accès 3.* R порт (сети). D (Netz-) Übergang. E acceso (de una red); puerta (de una red). I ..... N aansluiting. P linia abonencka; łącze abonenckie. S transmissionsväg. (701,721)
6. **port** : a place of access in a device or network where energy may be supplied or withdrawn or where the device or network variables may be observed or measured. *Note.* — In the case of a transmission line or waveguide, a port is characterized by a specified reference plane and a specified mode, as a separate port is assigned symbolically to each independent mode. ★ accès → *accès 4.* R плечо. D Tor. E puerta. I assorbimento; porta (di un n-porte). N poort. P wrota. S port. (726)
7. **terminating immittance of a port** : → *immittance 8*

portable

1. **infra-red portable heater** : → *heater 13*
2. **portable barrier** : → *barrier 8*
3. **portable equipment** : → *equipment 58*
4. **portable luminaire** : → *luminaire 19*
5. **portable (measuring) instrument** : → *measuring instrument 18*
6. **portable mine luminaire** : → *luminaire 20*
7. **portable X-ray generator** : → *generator 28*

portal

1. **portal structure** : → *structure 3*
2. **portal support** : → *support 16*

position

1. **alternative insert position** : orientation achieved by rotating insert in circular connectors. ★ orientation de l'isolant → *orientation 3.* R поляризация положением изолятора. D Orientierung durch Verdrehen des Einsatzes. E orientación del aislante. I orientamento dell'isolante. N oriëntatie van het isolatieblok. P identyfikator alternatywny. S alternativt insatsläge. (581)
2. **change-over with neutral position** : → *change-over 9*
3. **closed position** (of a mechanical switching device) : the position in which the predetermined continuity of the main circuit of the device is secured. ★ position de fermeture → *position 12.* R включенное положение (контактного коммутационного аппарата). D geschlossene Stellung (eines mechanischen Schaltgerätes). E posición cerrado (de un aparato mecánico de conexión); posición de cierre (de un aparato mecánico de conexión). I posizione di «chiuso» (di un apparecchio meccanico di manovra). N gesloten stand (van een mechanische schakelaar). P stan zamknięcia (łącznika mechanizmowego). S tillläge. (441)
4. **connected position** (*Syn.* service position) : → *position 32*
5. **depressed or "on" position** : the position assumed by the button of a push-button switch when a manual force is exerted on it, resulting in its displacement. ★ position enfoncée « en service » → *position 32.* R положение «включено». D Schaltstellung «gedrückt». E posición hundida «en circuito». I posizione premuta «acceso». N ingedrukte of aan-stand. P położenie załączenia. S till-läge. (581)
6. **digit position** : the position in time or space into which a representation of a digit may be placed. ★ position d'un élément de signal → *position 29.* R позиция символа. D Digitalposition. E posición de un elemento de señal; posición de un elemento numérico. I posizione di un elemento numerico. N plaats van het cijfer. P pozycja cyfry. S sifferposition. (704)
7. **disconnected position** (of a withdrawable part) (*Syn.* isolated position (of a withdrawable part)) : the position of a withdrawable part in which an isolating distance or segregation is established in all the circuits of the withdrawable part, that part remaining mechanically attached to the assembly. *Note.* — In enclosed high-voltage switchgear and controlgear the auxiliary circuits may not be disconnected. ★ position de sectionnement → *position 20.* R изолированное положение (выдвижной неотделяемой части); отсоединенное положение (выдвижной неотделяемой части). D Trennstellung (eines Trennteils). E posición de seccionamiento (de una parte desenchufable). I posizione di sezionamento (di una parte estraibile). N scheidingsstand (van een uittrekbaar deel). P stan spoczynku (zespołu wysuwnego). S frånskiljt läge. (441)
8. **driving position** : a part of vehicle used for driving the vehicle or train, not in a separate compartment. ★ poste de conduite → *poste 25.* R пост управления. D Führerraum (ohne Trennwand). E puesto de conducción. I posto di guida. N stuurstand. P stanowisko sterownicze. S förarplats. (811)
9. **earthing position** (of a removable part) : the position of a removable part in which the closing of a mechanical switching device causes a main circuit to be short-circuited and earthed. ★ position de mise à la terre → *position 15.* R положение

заземления (выдвигаемой части). D Erdungsstellung (eines herausnehmbaren Teiles). E posición de puesta a tierra (de una parte desmontable). I posizione di messa a terra (di una parte mobile). N aardingsstand (van een wegneembaar deel). P stan uziemienia (zespołu przestawnego). S jordningsläge. (441)

10. **free position** : the position of the actuator, or auxiliary actuator, when no external mechanical force is applied to it. ★ position normale → *position 33.* R положение начальное. D Ruhestellung. E posición normal. I posizione di riposo. N vrije stand. P położenie swobodne. S friläge. (581)
11. **front position light** : → *light 18*
12. **guard's position** : a part of a vehicle containing controls used by the guard e.g. heating, lighting and door controls, emergency brake, etc. ★ ..... → . R пост кондуктора. D Begleiterraum. E puesto de control. I ..... N conducteursruimte. P przedział sterowniczy odbiorów nietrakcyjnych. S betjäningsplats. (811)
13. **home position** : the position of rest in a device using a homing function. ★ position d'origine → *position 25.* R исходное положение. D Dauer-bzw. Ruhestellung. E posición de origen. I posizione di zero. N nulstand; nultoestand. P pozycja początkowa. S hemmaläge. (714)
14. **isolated position** (*Syn.* disconnected position) : → *position 7*
15. **normal or "off" position** : the position which the button of a push-button switch assumes when no force has been exerted on it. ★ position normale « hors service » → *position 34.* R положение «выключено». D Schaltstellung «ungedrückt». E posición normal «fuera de circuito». I posizione di riposo «spento». N normale of uit-stand. P położenie wyłączenia. S från-läge. (581)
16. **number of inherent tapping positions** : → *number 19*
17. **number of service tapping positions** : → *number 21*
18. **open position** (of a mechanical switching device) : the position in which the predetermined clearance between open contacts in the main circuit of the device is secured. ★ position d'ouverture → *position 26.* R отключенное положение (контактного коммутационного аппарата). D geöffnete Stellung (eines mechanischen Schaltgerätes). E posición abierto (de un aparato mecánico de conexión); posición de apertura (de un aparato mecánico de conexión). I posizione di «apertura» (di un apparecchio meccanico di manovra). N open stand (van een mechanische schakelaar). P stan otwarcia (łącznika mechanizmowego). S frånläge. (441)
19. **operating position** : the position of the actuator, or auxiliary actuator, at the instant when an increasing applied force has just caused the snap-action mechanism to operate. ★ position de fonctionnement → *position 14.* R положение прямого срабатывания. D Schaltpunkt. E posición de funcionamiento. I posizione di funzionamento. N werkstand. P położenie robocze. S funktionsläge. (581)
20. **overflow position** : a nominated terminal of a private network to which an incoming call is redirected if the terminal identification has been omitted or if connection to the selected terminal in not possible. ★ poste principal d'un réseau privé → *poste 49.* R рабочее место сброса нагрузки в частной сети. D Überlaufplatz. E centro principal de una red privada. I postazione di riferimento. N overloopstation. P stacja główna sieci wydzielonej. S svarsställe för mertrafik. (721)
21. **position indicating device** : → *device 45*
22. **position of a push-button switch** : the point of rest (including non-locking) that the button may occupy. ★ position d'un contacteur à touches → *position 28.* R положение (кнопочный переключатель). D Schaltstellung eines Druckknopfschalters. E posición de un contactor pulsador. I posizione di un interruttore a pulsanti. N ruststand van een druktoetsschakelaar. P położenie (łącznika przyciskowego). S vilolăge hos tryckknapp. (581)
23. **position of a rotary switch** : a point of rest of the rotor with respect to the stator resulting in a particular circuit condition. ★ position d'un commutateur rotatif → *position 27.* R положение (поворотный переключатель). D Schaltstellung eines Drehschalters. E posición de un conmutador rotativo. I posizione di un commutatore rotativo. N stand van een draaischakelaar. P położenie (łącznika obrotowego). S rotorläge hos vridomkopplare. (581)
24. **position of a toggle switch** : a setting of the lever which results in a particular circuit condition. ★ position d'un interrupteur à bascule → *position 31.* R положение (переключатель типа «тумблер»). D Schaltstellung eines Kippschalters. E posición de un interruptor de báscula. I posizione di un contactor de palanca. N stand van een tuimelschakelaar. P położenie (łącznika dźwigniowego). S vipparmsläge hos vippströmställare. (581)
25. **position of rest** (of a contactor) : the position which the moving elements of the contactor take up when its electromagnet or its compressed-air device is not energized. ★ position de repos → *position 17.* R начальное положение (контактора). D Ruhestellung (eines Schützes). E posición de reposo (de un contactor). I posizione di riposo (di un contattore). N ruststand (van een contactor). P stan spoczynkowy (stycznika); położenie spoczynkowe (styków ruchomych stycznika). S viloläge. (441)
26. **position switch** : → *switch 34*
27. **pulse position modulation** : → *modulation 53*
28. **rear position light** : → *light 57*
29. **release position** (of a biased switch) : the position of the actuator, or auxiliary actuator, at the instant when a decreasing applied force allows the snap-action mechanism to revert to its initial state. ★ position de retour → *position 18.* R положение обратного срабатывания (переключатель без фиксации положения). D Rückschaltpunkt. E posición de retorno (de un contactor polarizado). I posizione di ritorno (di un interruttore non polarizzato). N vrijgavestand. P położenie zwalniania. S frigöringsläge. (581)
30. **removed position** (of a removable part) : a position of a removable part when it is outside and mechanically and electrically separated from the assembly. ★ position de retrait → *position 19.* R отделенное положение (выдвижной отделяемой части). D Aussenstellung (eines herausnehmbaren Teiles). E posición de desmontaje (de una parte desmontable). I posizione *(–di parte aspirata–*) (di una parte mobile). N verwijderde toestand (van een wegneembaar deel). P stan rozdzielenia (zespołu przestawnego). S frigjort läge. (441)
31. **reset position** (of a non-biased switch) : the position of the reset actuator, or auxiliary actuator, at the instant when an increasing applied force causes the snap-action mechanism to revert to its initial state. ★ position de remise à zéro → *position 16.* R положение установки на арретир (снятия с арретира) — переключатель с фиксацией положения. D Rückstellpunkt. E posición de puesta a cero (de un contactor no polarizado). I posizione di funzionamento. N herstelstand. P położenie zwrotne. S återställningsläge. (581)
32. **service position** (of a removable part) (*Syn.* connected position (of a removable part)) : the position of a removable part in which it is fully connected for its intended function. ★ position de service → *position 21.* R рабочее положение (выдвигаемой части); присоединенное положение (выдвигаемой чацти). D Betriebsstellung (eines herausnehmbaren Teiles). E posición de servicio (de una parte desmontable); posición conectada (de una parte desmontable). I posizione di servizio (di una parte mobile); posizione «collegato» (di una parte mobile). N bedrijfsstand (van een wegneembaar deel). P stan pracy (zespołu przestawnego). S driftläge. (441)
33. **shunting control position** : a driving position for use in shunting operations. ★ poste de conduite auxiliaire → *poste 26.* R вспомогательный пост управления. D Hilfsführerraum. E puesto de conducción auxiliar. I posto di guida ausiliario. N (rangeer)hulpstuurstand. P kabina sterownicza dodatkowa. S operatörsplats för växling. (811)
34. **switchboard position** : that portion of a switchboard normally provided for the use of one operator. ★ position (d'opérateur) → *position 23.* R рабочее место телефонистки. D ..... E posición (de operador). I posizione d'operatore (o d'operatrice). N ..... P stanowisko. S växelbordsplats. (714)
35. **tap position indicator** : → *indicator 25*
36. **test position** (of a withdrawable part) : the position of a withdrawable part in which an isolating distance or segregation is established in the main circuit and in which the auxiliary circuits are connected. ★ position d'essai → *position 22.* R испытательное положение (выдвижной неотделяемой части). D Prüfstellung (eines Trennteils). E posición de ensayo (de una parte desenchufable). I posizione di prova (di una parte estraibile). N beproevingsstand (van een uitrrekbaar deel). P stan próby (zespołu wysuwnego). S provningsläge. (441)
37. **total-travel position** : the position of the actuator, or auxiliary actuator, when an increasing applied force has caused it to move to the actual limit of the permissible travel. ★ position de fin de course totale → *fin de course 5.* R положение конечное.

D Endstellung. E posición de fin de carrera total. I posizione di fine-corsa. N eindstand. P położenie krańcowe. S ändläge. (581)

positioner

1. **positioner of a crimping tool** : a locator with additional features which control the depth of the crimp. ★ positionneur régleur d'un outil de sertissage → *positionneur 3.* R фиксатор с регулятором. D Positionierstück des Crimpwerkzeuges. E posicionador regulador de un útil de engaste. I posizionatore regolatore di un attrezzo di crimpatura. N diepteregelaar van het wurggereedschap. P ogranicznik (zagniataka). S anslag. (581)
2. **valve positioner** : an auxiliary control system designed to increase the accuracy and speed of the positioning of the moving part of the valve. ★ positionneur de vanne → *positionneur 1.* R позиционер вентиля. D Ventil-Stellungsregler. E posicionador de válvula. I posizionatore (di valvola). N instelbare aandrijving. P ustawnik pozycyjny (zaworu). S ventilinställare. (351)

positive

1. **metal positive** : → *metal 8*
2. **positive acknowledgement** : → *acknowledgement 4*
3. **positive component** : → *component 42*
4. **positive feedback** : → *feedback 8*
5. **positive half-wave** : → *half-wave 5*
6. **positive justification** : → *justification 13*
7. **positive modulation** : → *modulation 48*
8. **positive opening operation** : → *operation 48*
9. **positive phase difference** : → *difference 27*
10. **positive phase-sequence reactance** : → *reactance 11*
11. **positive phase-sequence resistance** : → *resistance 42*
12. **positive plate** : → *plate 26*
13. **positive pulse stuffing** (*Syn.* positive justification) : → *justification 13*
14. **positive scanning shift** : → *shift 31*
15. **positive terminal** : → *terminal 28*
16. **positive video signal** : → *signal 142*
17. **positive/zero/negative justification** : → *justification 14*
18. **positive/zero/negative pulse stuffing** (*Syn.* positive/zero/negative justification) : → *justification 14*

positively

1. **positively driven operation** : → *operation 49*

positive-negative

1. **positive-negative action** : → *action 16*
2. **positive-negative three-step action** : → *action 17*

positron

1. **positron** : an elementary particle with approximately the same mass as the electron but with a positive elementary charge. ★ positon → *positon 1.* R позитрон. D Positron. E positrón. I positrone. N positron. P pozytron. S positron. (111,881)

possible

1. **possible sunshine duration** : → *duration 29*

post

1. **bar and post transformer** (*Syn.* crossbar transformer) : → *transformer 22*
2. **clip post** : a termination to accept a clip connection. ★ borne pour connexion par clip → *borne 21.* R вывод под зажим контактный. D Klammerstift. E borne para conexión por clip. I terminale per connessione a clip. N pen voor schuifklem. P gniazdo zatrzasku. S anslutningspunkt för klämma. (581)
3. **cylindrical post insulator** : → *insulator 7*
4. **indoor post insulator** : → *insulator 11*
5. **marker post** : post erected at the edge of a carriageway to indicate a hazard or the line of the edge. It may incorporate a retroreflector. ★ balise routière → *balise 4.* R маркерная стойка. D Straßenbake. E marca luminosa. I paletto segnaletico. N bermplank. P słupek pobocza drogi. S ..... (845)
6. **outdoor post insulator** : → *insulator 22*
7. **pedestal post insulator** : → *insulator 23*
8. **post** (*Syn.* pin) : → *pin 6*
9. **post dubbing** (*Syn.* dubbing) : → *dubbing 1*
10. **post insulator** : → *insulator 25*
11. **post insulator unit** : → *insulator 26*
12. **post selected busy hour** (*Syn.* peak busy hour) : → *hour 6*
13. **waveguide post** : a cylindrical rod placed in a transverse cross-section of a waveguide and behaving substantially as a shunt susceptance. ★ tige dans un guide d'ondes → *tige 9.* R волноводный штырь. D Hohlleiter-Stiftblende. E varilla en una guíaonda. I vite in una guida d'onda. N golfgeleiderpen. P kołek falowodowy. S reaktanspinne. (726)
14. **wrap post** : a termination to accept a wrapped connection. ★ borne pour connexion enroulée → *borne 20.* R вывод под навивку. D Wickelstift. E borne para conexión enrollada. I terminale per connessione avvolta. N draadwikkelpen. P koniec (styku) do okręcania. S virstift. (581)

post-deflection

1. **helical post-deflection accelerator** : → *accelerator 4*
2. **post-deflection acceleration factor** : → *factor 135*
3. **post-deflection acceleration ratio** : → *ratio 68*
4. **post-deflection accelerator** : → *accelerator 7*

post-dialling

1. **post-dialling delay** : → *delay 35*
2. **post-dialling delay** : → *delay 36*

post-echo

1. **post-echo** : the cross-talk from the adjacent groove preceding the groove being played. ★ post-écho → *post-écho 1.* R запаздывающее эхо. D Nach-Echo. E posteco. I post-eco. N na-echo. P echo. S eftereko. (806)

post-equalization

1. **post-equalization** (*Syn.* de-emphasis) : → *de-emphasis 2*

posterisation

1. **posterisation** (*Syn.* countouring) : → *countouring 1*

postero-anterior

1. **postero-anterior projection** : → *projection 6*

post-insulated

1. **post-insulated connection** : → *connection 44*

post-negative

1. **post-negative** : a stamper generated from a lacquer original. ★ pelure → *pelure 1.* R матрица; первый оригинал. D Originalmatrize. E cáscara. I negativo. N persvader. P ..... S presspatris. (806)

post-production

1. **post-production** : the compilation of complete programmes from recorded sound and vision sequences or individual shots by editing, signal processing, and the introduction of visual special effects or sound effects. ★ postproduction → *postproduction 1.* R окончательная обработка программы. (723)

post-selection

1. **post-selection time** : → *time 130*

post-signal

1. **post-signal** : a class of service signal transmitted after the sequence of digits characterizing the called terminal. ★ postsignal → *postsignal 1.* R постсигнал. D Nachsignal. E postseñal. I post segnale. N kenmerksluitsignaal. P sygnał powybierczy. S eftersignal. (721)

pot

1. **pot life** : → *life 9*
2. **pot-type furnace** : → *furnace 40*

potential

1. **contact potential difference** : → *difference 6*
2. **contact potential difference** : → *difference 7*
3. **diffuse layer potential** : → *layer 7*
4. **electric potential** (*V*) : a scalar potential of the electric field strength. ★ potentiel électrique → *potentiel 14.* R электрический потенциал. D elektrisches Potential.

E potencial eléctrico. I potenziale elettrico. N elektrische potentiaal. P potencjał elektryczny. S elektrisk potential. (121)

5. **electrode potential** : the difference between the internal electric potentials of the electrode and of the electrolyte. *Note.* — This voltage can not be measured directly. ★ potentiel d'électrode → *potentiel 12.* R электродный потенциал. D Elektrodenspannung. E potencial de electrodo. I potenziale d'elettrodo. N elektrodepotentiaal. P potencjał elektrody. S elektrodpotential. (111)
6. **equilibrium (electrode) potential** : → *electrode 60*
7. **instantaneous potential sound energy density** : → *density 12*
8. **magnetic vector potential** (*A*) : a vector potential of the magnetic flux density. ★ potentiel vecteur magnétique → *potentiel 19.* R векторный магнитный потенциал. D magnetisches Vektorpotential. E potencial vector magnético. I potenziale vettore magnetico. N magnetische vectorpotentiaal. P potencjał magnetyczny (wektorowy). S magnetisk vektorpotential. (121)
9. **potential barrier** : → *barrier 9*
10. **potential barrier** : → *barrier 10*
11. **scalar magnetic potential** : a potential function whose gradient with the sign reversed is the irrotational component of the magnetic field strength. ★ potentiel magnétique (scalaire) → *potentiel 15.* R скалярный магнитный потенциал. D skalares magnetisches Potential. E potencial magnético (escalar). I potenziale magnetico scalare. N scalaire magnetische potentiaal. P potencjał magnetyczny (skalarny). S skalär magnetisk potential. (121)
12. **(scalar) potential** (of a vector field) : when it exists, the negative of the scalar field whose gradient is the given vector field. ★ potentiel (scalaire) → *potentiel 17.* R (скалярный) потенциал (векторного поля). D (skalares) Potential (eines Vektorfeldes). E potencial (escalar) (de un campo vectorial). I potenziale (scalare) (di un campo vettoriale). N potentiaal. P potencjał skalarny. S potential. (101)
13. **standard (electrode) potential** : an equilibrium electrode potential under standardized chemical and physical conditions. ★ potentiel normalisé → *potentiel 16.* R стандартный (электродный) потенциал. D Norm(elektroden)spannung. E potencial normalizado (de un electrodo). I potenziale normale (di un elettrodo). N standaardpotentiaal (van een elektrode). P potencjał normalny (elektrody). S normalpotential. (111)
14. **vector potential** (of a vector field) : when it exists, a vector field whose curl is the given field. ★ potentiel vecteur → *potentiel 18.* R векторный потенциал (векторного поля). D Vektorpotential (eines Vektorfeldes). E potencial vector (de un campo vectorial). I potenziale vettore (di un campo vettoriale). N vectorpotentiaal. P potencjał wektorowy. S vektorpotential. (101)
15. **zeta potential** (*Syn.* diffuse layer potential) : → *layer 7*

potentiometer

1. **(measuring) potentiometer** : a voltage measuring instrument in which the voltage to be measured is opposed to a known voltage of the same waveform, frequency and value. ★ potentiomètre de mesurage → *potentiomètre 2.* R измерительный потенциометр. D Kompensator. E potenciómetro de medida; potenciómetro de medición. I potenziometro. N compensator. P potencjometr (pomiarowy). S mätpotentiometer. (301)
2. **potentiometer** (*Syn.* voltage divider) : a resistor with one or more intermediate tappings allowing fractions of the voltage across the resistor to be obtained. ★ potentiomètre → *potentiomètre 1.* R потенциометр; делитель напряжения. D Drehwiderstand; Spannungsteiler. E potenciómetro; divisor de tensión. I potenziometro; divisore di tensione. N potentiometer; spanningsdeler. P potencjometr. S potentiometer; spänningsdelare. (811)

Potier

1. **Potier reactance** : → *reactance 12*

Potter

1. **Potter horn** : → *horn 17*

potting

1. **potting** : an embedding process in which the mould remains attached to the embedded article. ★ empotage → *empotage 2.* R герметизация. D Vergießen in verlorener Form. E revestimiento con molde perdido. I incapsulamento. N ingieten. P zalewanie (w obudowie). S ingjutning. (212)
2. **potting** : the sealing of components and associated conductors with a compound to exclude contaminants. ★ compoundage → *compoundage 3.* R заливка компаундом. D Vergießen. E encapsulado. I isolamento per riempimento (isolante); riempimento (isolante). N afgieten. P zalewanie. S ingjutning. (581)
3. **potting compound** : → *compound 12*
4. **potting mould** : → *mould 1*

pour

1. **pour point** : → *point 37*
2. **pour point depressant** : → *depressant 1*

pouring

1. **pouring time** : → *time 131*

powder

1. **coating powder** : a powder with after being made to adhere to the surface of an object is converted to a continuous coating. See also, *fluidized bed coating.* ★ poudre d'enduction → *poudre 3.* R покрывающий порошок. D Beschichtungspulver. E polvo de recubrimiento. I polvere da rivestimento. N poederlak. P proszek pokryciowy. S ytbeläggningspulver. (212)
2. **magnetic powder core** : → *core 31*

power

1. **absolute power level** : → *level 1*
2. **acoustical speech power** : the power of the sound emitted by a source of voice-frequency signals. ★ puissance vocale → *puissance 164.* R акустическая мощность речи. D akustische Sprachleistung. E potencia vocal. I potenza vocale. N akoestisch vermogen van de spraak. P moc mowy. S taleffekt. (722)
3. **active power** : the mean value, taken over one period, of the instantaneous power.

$$P = \frac{1}{T}\int_0^T ui\,dt$$

Notes. 1 — For sinusoidal voltage and current, the real part of the complex power is the active power.

$$P = Re\,\underline{S} = S\cos\varphi$$

2 —For periodic non-sinusoidal voltage and current, the active power is the power of the direct components and of the active power of the fundamental and of the harmonics.

$$P = \sum_{k=0}^{\infty} P_k$$

★ puissance (active) → *puissance 59.* R (активная) мощность. D Wirkleistung. E potencia activa. I potenza (attiva). N actief vermogen; werkzaam vermogen. P moc czynna. S aktiv effekt. (131)

4. **active power meter** (*Syn.* wattmeter) : → *wattmeter 2*
5. **anode input power** (*Syn.* anode supply power) : → *power 6*
6. **anode supply power** (*Syn.* anode input power) : the direct power delivered to the anode by the high tension supply. ★ puissance d'alimentation anodique → *puissance 80.* R мощность питания анода; мощность, подводимая к аноду. D Anodenspeiseleistung. E potencia de alimentación anódica. I potenza di alimentazione anodica. N ingangsvermogen van de anode. P moc zasilania anody. S tillförd anodeffekt; inmatad effekt. (531)
7. **apparent power** : the product of the r.m.s. values of voltage and current at a port. $S = UI$. ★ puissance apparente → *puissance 60.* R полная мощность. D Scheinleistung. E potencia aparente. I potenza apparente. N schijnbaar vermogen. P moc pozorna. S skenbar effekt. (131)
8. **apparent power (mass) density** : → *density 1*
9. **apparent power meter** (*Syn.* volt-ampere meter) : → *meter 72*
10. **apparent power (volume) density** : → *density 2*
11. **arc power** : the active power in an electric arc. ★ puissance d'arc → *puissance 82.* R мощность дуги. D Bogenleistung. E potencia de arco. I potenza d'arco. N boogvermogen. P moc łuku. S ljusbågseffekt. (841)

12. **auxiliary power supply contactor** (*Syn.* heating contactor) : → *contactor 10*
13. **auxiliary power supply line** (*Syn.* heating train line) : → *line 44*
14. **available power** : the maximum active power that can be theoretically delivered at a given frequency by a source having an impedance of positive real part to a directly connected load when the impedance of the load is widely varied. *Notes. 1* — The available power is obtained when the resistance of the load is equal to that of the source and its reactance is equal in magnitude but of opposite sign. *2* — In some cases, conditions such as overheating or overvoltage prevent the available power from being obtained. ★ puissance disponible → *puissance 106.* R мощность в согласованной нагрузке. D verfügbare Leistung. E potencia disponible. I potenza disponibile. N beschikbaar vermogen. P moc dysponowana. S tillgänglig effekt. (561,702)
15. **available power gain** : → *gain 4*
16. **average power** (in a transmission line) : for a periodic wave, the time average of the instantaneous power passing through a given transverse cross-section of a transmission line in an interval equal to the fundamental period. ★ puissance (moyenne) → *puissance 134.* R средняя мощность (в линии передачи). D mittlere Leistung (in einer Übertragungsleitung). E potencia media (en una línea de transmisión). I potenza media (in una linea di trasmissione). N gemiddeld vermogen. P moc średnia (w linii przesyłowej). S medeleffekt. (726)
17. **average speech power** : for a stated time interval, the arithmetic mean instantaneous speech power during that interval. ★ puissance vocale moyenne → *puissance 170.* R средняя мощность речи. D durchschnittliche Sprachleistung. E potencia vocal media. I potenza vocale media. N gemiddeld vermogen van de spraak. P moc mowy średnia. S medelvärde för taleffekt. (801)
18. **bolometric power meter** : → *meter 12*
19. **calorimeter power meter** (*Syn.* calorimetric power meter) : → *meter 14*
20. **calorimetric power meter** : → *meter 14*
21. **collision mass stopping power** (S_{col}/ρ) : the quotient of dE_{col} by the product of ρ and dl, where dE_{col} is the energy lost by a charged particle of specified energy by collisions in traversing the path length dl in a material of density ρ:

$$\frac{S_{col}}{\rho} = \frac{1}{\rho} \cdot \left(\frac{dE}{dl}\right)_{col}$$

Note. — The energy losses included are those that produce excitation and ionization of atoms as well as those producing recoil atoms. ★ pouvoir d'arrêt massique par collisions → *pouvoir 3.* R массовая тормозная способность вследствие столкновений. D Massen-Stossbremsvermögen. E poder de frenado másico por colisión. I potere frenante massico per collisione. N energieverlies per massadichtheid door botsing. P masowa zderzeniowa zdolność hamowania. S massbromsförmåga genom kollisionsförluster. (881)
22. **combined heat and power** : → *heat 1*
23. **complex power** (for sinusoidal voltage and current) : the product of the voltage phasor and the conjugate of the current phasor. *Note.* — Its modulus is the apparent power and its argument the angle between the two phasors.

$$\underline{S} = P + jQ = \underline{U}\underline{I}^* = Se^{j(\alpha_u - \alpha_i)} = Se^{j\varphi}$$

★ puissance complexe → *puissance 75.* R комплексная мощность (синусоидального напряжения и тока). D komplexe Leistung; komplexe Scheinleistung (für sinusförmige Spannung und sinusförmigen Strom). E potencia compleja (para una tensión y corriente senoidal). I potenza complessa. N complex vermogen. P moc zespolona. S komplex effekt; komplex konjugateffekt. (131)
24. **complex power** (in a transmission line) : the surface integral of the complex Poynting vector over a transverse cross-section of a transmission line. ★ puissance complexe → *puissance 76.* R комплексная мощность (в линии передачи). D komplexe Leistung (in einer Übertragungsleitung). E potencia compleja (en una línea de transmisión). I potenza complessa (in una linea di trasmissione). N complex vermogen. P moc zespolona (w linii przesyłowej). S komplex effekt. (726)
25. **conditional stability of a power system** : → *stability 4*
26. **continuous power (of an internal combustion engine)** (*Syn.* continuous output (of an internal combustion engine)) : the power which an engine is able to deliver continuously under stated conditions. ★ puissance continue (d'un moteur à combustion interne) → *puissance 77.* R продолжительная мощность (двигателя внутреннего сгорания). D Dauerleistung einer Verbrennungskraftmaschine. E potencia continua (de un motor de combustión interna). I potenza continua (d'un motore a combustione interna). N continu vermogen. P moc ciągła (silnika). S kontinuerlig effekt. (811)
27. **controlling power range** : → *range 9*
28. **d.c. power** : the product of the direct voltage and the direct current (mean values). ★ puissance en courant continu → *puissance 113.* R мощность постоянного тока. D Gleichstromleistung. E potencia en corriente continua. I potenza in corrente continua. N gelijkstroomvermogen. P moc prądu stałego. S ls-effekt. (551)
29. **dependent power operation** : → *operation 22*
30. **direct a.c.(power) convertor** : → *convertor 13*
31. **disturbance power** : electromagnetic disturbance power, measured under specified conditions. ★ puissance perturbatrice → *puissance 142.* R мощность возмущения. D Störleistung. E potencia perturbadora. I potenza di disturbo. N storingsvermogen. P moc zaburzenia. S störningseffekt. (161)
32. **double minimum power points** (*Syn.* twice minimum power points) : → *point 51*
33. **driving power** (*Syn.* radio-frequency input power) : the radio-frequency power delivered to the amplifier tube at the input terminal or input reference plane. ★ puissance d'excitation → *puissance 105.* R мощность возбуждения; входная высокочастотная мощность. D Steuerleistung; H. F.-Eingangsleistung. E potencia de excitación; potencia RF de entrada. I potenza di eccitazione; potenza di ingresso a radiofrequenza. N hoogfrequent ingangsvermogen. P moc wejściowa; moc sterowania. S driveffekt; radiofrekvent ineffekt. (531)
34. **drooping characteristic (of an arc welding power source)** : → *characteristic 34*
35. **dynamic characteristic (of an arc welding power source)** : → *characteristic 36*
36. **effective monopole radiated power** (in a given direction) (*Syn.* EMRP (abbreviation)) : the product of the power supplied to an antenna and the relative gain of the antenna in a given direction with respect to a short vertical antenna. ★ puissance apparente rayonnée sur une antenne verticale courte → *puissance 64.* R эффективная излучаемая мощность по отношению к несимметричному вибратору (в данном направлении). D äquivalente monopole Strahlungsleistung. E potencia efectiva radiada del monopolo (en una dirección dada); PERM (abreviatura). I potenza irradiata apparente riferita al monopolo. N effectief uitgestraald vermogen (ten opzichte van een korte verticale antenne). P moc skuteczna promieniowania odniesiona do krótkiej anteny pionowej (w danym kierunku). S ..... (712)
37. **effective radiated power** (of any device in a given direction) : the power required at the input of a lossless reference antenna to produce, in a given direction at any specified distance, the same power flux density as that radiated by a given device. *Note.* — For the ITU the term "effective radiated power" without qualification is used only when the reference antenna is a half-wave dipole. ★ puissance apparente rayonnée → *puissance 63.* R эффективная излучаемая мощность (любого устройства в данном направлении). D effektive Strahlungsleistung (eines Gerätes in einer vorgegebenen Richtung). E potencia efectiva radiada (de un dispositivo en una dirección dada). I potenza apparente irradiata (da un dispositivo in una data direzione). N effectief uitgestraald vermogen (van een toestel in een gegeven richting). P moc skutecznie promieniowana (urządzenia w danym kierunku). S effektiv utstrålad effekt. (161,712)
38. **electrical power network** (*Syn.* electrical power system) : → *system 57*
39. **electrical power system** : → *system 56*
40. **electrical power system** : → *system 57*
41. **electronic a.c. power controller** : → *controller 3*
42. **electronic a.c. (power) switch** : → *switch 17*

43. **(electronic) a.c.(power) convertor** : → *convertor 17*
44. **electronic d.c. power controller** : → *controller 4*
45. **electronic d.c. (power) switch** : → *switch 18*
46. **(electronic) d.c.(power) conversion** : → *conversion 18*
47. **(electronic) (power) inverter** : → *inverter 1*
48. **electronic (power) switch** : → *switch 19*
49. **(electronic)(power) a.c. conversion** : → *conversion 19*
50. **(electronic)(power) conversion** : → *conversion 20*
51. **(electronic)(power) convertor** : → *convertor 22*
52. **(electronic)(power) inversion** : → *inversion 4*
53. **(electronic)(power) rectification** : → *rectification 1*
54. **(electronic)(power) resistance control** : → *control 95*
55. **(electronic)(power) switching** : → *switching 19*
56. **emergency power system** (*Syn.* supply system for safety services) : → *system 207*
57. **equivalent isotropically radiated power** (in a given direction) (*Syn.* EIRP (abbreviation)) : the product of the power supplied to an antenna and the absolute gain of the antenna in a given direction. ★ puissance isotrope rayonnée équivalente → *puissance 120.* R эквивалентная изотропно-излучаемая мощность (в данном направлении); Э.И.И.М.. D äquivalente isotrope Strahlungsleistung (in einer bestimmten Richtung). E potencia isotrópica radiada equivalente (en una dirección dada); PIRE (abreviatura). I potenza isotropa irradiata equivalente; EIRP (abbreviazione). N equivalent isotroop uitgestraald vermogen. P moc zastępcza promieniowania izotropowego (w danym kierunku). S ekvivalent isotropt utstrålad effekt. (712)
58. **(exchangeable) noise power** (of a one-port device) : the exchangeable power at the terminals of a one-port device due solely to its sources of noise. *Notes. 1* — A receiving antenna can be regarded as a one-port device when viewed from its output port. *2* — If the impedance of the device has a constant real part at thermodynamic temperature T and if quantum effects are neglected, the exchangeable noise power spectral density due solely to thermal noise of the device is independent of frequency and equal to kT where k is Boltzmann's constant. ★ puissance (échangeable) de bruit → *puissance 112.* R (обменная) мощность шума (двухполюсника). D (abgebbare) Rauschleistung (eines Eintors). E potencia (intercambiable) de ruido (de un dispositivo monopuerta). I potenza (trasferibile) di rumore (di un elemento a una porta). N (vervangend) thermisch ruisvermogen (van een eenpoort). P moc (wymienialna) szumu (jednowrotnika). S utväxlingsbar bruseffekt. (702)
59. **exchangeable power** : the extreme value of the active power that can be delivered at a given frequency by a source directly connected to a load when the complex reflection factor at the interface is widely varied. *Notes. 1* — The extreme value of power is obtained with matching of the load to the source. *2* — By convention the exchangeable power assumes the sign of the real part of the source impedance. If this real part is positive the extreme value is a maximum and the exchangeable power is identical to the available power. ★ puissance échangeable → *puissance 111.* R обменная мощность. D abgebbare Leistung. E potencia intercambiable. I potenza trasferibile. N uitwisselbaar vermogen. P moc wymienialna. S utväxlingsbar effekt. (702)
60. **exchangeable power gain** : → *gain 10*
61. **firing power** : the minimum incident radio frequency power that causes the blocking tube to fire, under stated conditions of operation. ★ puissance d'allumage → *puissance 81.* R мощность зажигания. D Zündleistung. E potencia de encendido. I potenza di accensione. N ontsteekvermogen. P moc zapłonu. S tändeffekt. (531)
62. **flat characteristic (of an arc welding power source)** : → *characteristic 40*
63. **flat leakage power** : the power transmitted through a TR or pre TR tube during the period when the tube is fully fired. ★ puissance de fuite pendant le palier → *puissance 88.* R мощность, просачивающаяся на плоской части характеристики. D Leckleistung der gezündeten Röhre. E potencia de fuga en marcha normal. I potenza di dispersione durante il pianerottolo. N doorgelaten vermogen. P moc przeciekowa części płaskiej (impulsu). S läckeffekt. (531)
64. **fundamental power** : the active power determined by the fundamental components of voltage and current. ★ puissance fondamentale → *puissance 116.* R мощность основной гармоники. D Grundschwingungsleistung. E potencia fundamental. I potenza fondamentale. N grondgolfvermogen. P moc podstawowa. S grundtonseffekt. (551)
65. **grid driving power** (*Syn.* grid input power) : → *power 66*
66. **grid input power** (*Syn.* grid driving power) : the product of instantaneous components of the alternating grid input current and voltage averaged over a complete cycle. ★ puissance d'attaque de grille → *puissance 83.* R входная мощность сеточной лампы; мощность возбуждения сеточной лампы. D Gitter-Eingangsleistung; Gitter-Steuerleistung. E potencia de ataque de rejilla. I potenza fornita alla griglia. N roosterstuurvermogen. P moc wejściowa; moc sterowania. S gallerstyreffekt; gallerdriveffekt. (531)
67. **gyromagnetic power limiter** : → *limiter 2*
68. **high reliability power line** : → *line 45*
69. **incremental power gain** : → *gain 20*
70. **indirect a.c.(power) convertor** : → *convertor 28*
71. **inherent stability of a power system** : → *stability 7*
72. **input power** : the total power supplied to a device or assembly of devices. ★ puissance absorbée → *puissance 54.* R потребляемая мощность. D Eingangsleistung, zugeführte Leistung. E potencia de entrada. I potenza assorbita; potenza di ingresso. N opgenomen vermogen; toegevoerd vermogen. P moc wejściowa. S ineffekt. (151)
73. **input power control** : → *control 118*
74. **instantaneous peak power** (in a transmission line) : the maximum instantaneous power passing through a given transverse cross-section of a transmission line during the interval of interest. ★ puissance de crête → *puissance 85.* R мгновенная пиковая мощность (в линии передачи). D Höchstwert der Augenblicksleistung (in einer Übertragungsleitung). E potencia instantánea de cresta (en una línea de transmisión). I potenza di cresta (in una linea di trasmissione). N momenteel piekvermogen. P moc chwilowa szczytowa (w linii przesyłowej). S toppeffekt. (726)
75. **instantaneous power** : the product of the instantaneous values of voltage and current at a port. $p = ui$. ★ puissance instantanée → *puissance 119.* R мгновенная мощность. D Augenblickswert (Momentanwert) der Leistung. E potencia instantánea. I potenza istantanea. N ogenbliksvermogen. P moc chwilowa. S momentan effekt. (131)
76. **instantaneous speech power** ★ puissance vocale instantanée → *puissance 169.* R мгновенная мощность речи. D momentane Sprachleistung. E potencia vocal instantánea. I potenza vocale istantanea. N ogenbliksvermogen van de spraak. P moc mowy chwilowa. S momentanvärde för taleffekt. (801)
77. **linear collision stopping power** (S_{col}) : the quotient of the energy dE_{col} lost by a charged particle of specified energy, by collision in traversing a path length dl in a material : $S_{col} = (dE/dl)_{col}$. *Note.* — The energy losses included are those that produce excitation and ionization of atoms as well as those producing recoil atoms. ★ pouvoir d'arrêt linéique, par collisions → *pouvoir 1.* R линейная тормозная способность вследствие столкновений. D lineares Stoss-Bremsvermögen. E poder de frenado lineal por colisión. I potere frenante lineare per collisione. N lineair botsingsenergieverlies. P liniowa zderzeniowa zdolność hamowania. S bromsförmåga genom kollisionsförluster. (881)
78. **linear radiative stopping power** (S_{rad}) : the quotient of the energy dE_{rad} lost by a charged particle of specified energy by radiation in traversing a path length dl in an material $S_{rad} = (dE/dl)_{rad}$. *Note.* — The energy losses included are those that produce bremsstrahlung. ★ pouvoir d'arrêt linéique par radiation → *pouvoir 2.* R линейная тормозная способность вследствие создания излучения. D lineares Strahlungs-Bremsvermögen. E poder de frenado lineal por radiación. I potere frenante lineare radiativo. N lineair stralingsenergieverlies. P liniowa radiacyjna zdolność hamowania. S bromsförmåga genom strålningsförluster. (881)
79. **load power** (*Syn.* useful output power) : → *power 200*
80. **load voltage (of a welding power source)** : → *voltage 101*
81. **maximum output power** : the greatest power which can be delivered by the signal generator into the rated load impedance. ★ puissance de sortie maximale → *puissance 99.* R максимальная выходная мощность. D maximale Ausgangsleistung. E potencia de salida máxima. I massima potenza di uscita. N maximaal uitgangsvermogen. P moc wyjściowa maksymalna. S maximal uteffekt. (303)

82. **maximum rated input power** : the maximum apparent power, in kVA, taken from the supply mains by the X-ray generator. On single phase it is equal to the product of the declared supply voltage and the maximum rated supply current. For three-phase use it is necessary to multiply this product by $\sqrt{3}$. ★ puissance nominale maximale au réseau → *puissance 139.* R максимальная номинальная входная мощность. D Nennleistungsaufnahme. E potencia de entrada maxima asignada. I massima potenza nominale di entrata. N maximaal toegekend ingangsvermogen. P maksymalna moc znamionowa. S anslutningseffekt. (881)

83. **maximum short-circuit power** : the maximum apparent power measured at the input terminals of the machine, at maximum short-circuit current corresponding to the minimum impedance. ★ puissance maximale de court-circuit → *puissance 125.* R максимальная мощность короткого замыкания. D größte Kurzschlußleistung. E potencia máxima de cortocircuito. I potenza massima di cortocircuito. N maximaal kortsluitvermogen. P moc zwarciowa maksymalna. S maximal kortslutningseffekt. (851)

84. **maximum welding power** : the power equal to 80 % of the maximum short-circuit power. ★ puissance maximale de soudage → *puissance 126.* R максимальная сварочная мощность. D größte Schweißleistung. E potencia máxima de soldadura. I potenza massima di saldatura. N maximaal lasvermogen. P moc zgrzewania maksymalna. S maximal svetseffekt. (851)

85. **(microwave) power meter** : → *meter 34*

86. **motive power tariff** : → *tariff 21*

87. **multiple operator power source** : → *source 19*

88. **net brake power (of an internal combustion engine)** (*Syn.* useful service output) : → *output 71*

89. **noise equivalent power** (*Syn.* NEP (abbreviation)) : the value of the radiant power at the input to an optical detector which produces at the outpout a signal-to-noise ratio equal to one, for a given wavelength, modulation frequency and equivalent noise bandwidth. ★ puissance équivalente de bruit → *puissance 115.* R эквивалентная мощность шума. D äquivalente Geräuschleistung; NEP (Abkürzung). E potencia equivalente de ruido; NEP (abreviatura). I potenza equivalente del rumore. N ruisequivalent vermogen; NEP (afkorting). P moc równoważna szumów. S brusekvivalent effekt. (731)

90. **noise equivalent power** (of a detector) (*Syn.* NEP (abbreviation) (of a detector)) (Φ_m) : name given to the noise equivalent input when the quantity that the detector is being used to measure or detect is radiant flux. ★ flux (énergétique) équivalent au bruit → *flux énergétique 4.* R эквивалентная мощнхость шума (приёмника). D rauschäquivalente Leistung (eines Empfängers). E flujo equivalente al ruido. I flusso energetico equivalente al rumore. N ruisequivalent vermogen; NEP. P moc równoważna szumów. S brusekvivalent strålningsflöde. (845)

91. **no-load apparent power** : the apparent power absorbed when a voltage, equal to the rated supply voltage at the rated frequency of the transformer, is applied to the terminals of the primary winding of the transformer, corresponding to the highest secondary voltage, the secondary winding(s) being open-circuited. ★ puissance apparente à vide → *puissance 61.* R кажущаяся мощность холостого хода. D Leerlaufscheinleistung. E potencia aparente en vacío. I potenza apparente a vuoto. N schijnbaar nullastvermogen. P moc pozorna stanu jałowego. S skenbar tomgångseffekt. (851)

92. **nominal power of a thermo-electric vehicle** : the maximum power available at the shafts of the traction motors, but not exceeding the sum of the traction motor outputs at their shafts at the continuous rating of either the main generators or the traction motors. ★ puissance nominale d'un véhicule thermoélectrique → *puissance 137.* R номинальная мощность теплоэлектрического подвижного состава. D Nennleistung eines thermo-elektrischen Fahrzeuges. E potencia nominal de un vehículo termoeléctrico. I potenza nominale d'un veicolo termoelettrico. N nominaal vermogen van een thermo-elektrisch voertuig. P moc nominalna (pojazdu). S nominell effekt. (811)

93. **normal speech power for voice-ear measurements** (*Syn.* reference speech power for the NOSFER) : the acoustical speech power which causes the ARAEN speech voltmeter connected at the output of the sending system to the new fundamental system for the determination of reference equivalent or NOSFER to indicate −10 under specified conditions. *Note.* — The specified conditions are defined in the CCITT Recommendations P42 and P72 from the volume V of the Red Book, 1985. ★ puissance vocale normale pour les mesures téléphonométriques → *puissance 171.* R нормальная мощность речи для акустических измерений; эталонная мощность речи для NOSFER. D NOSFER-Normalpegel. E potencia vocal normal para la medida telefonométrica; potencia vocal de referencia para el NOSFER. I potenza vocale normale per le misure telefonometriche. N NOSFER referentievermogen van de spraak. P moc mowy normalna do pomiarów telefonometrycznych. S NOSFER-normalnivå. (722)

94. **optical power** (*Syn.* radiant power) : → *power 153*

95. **optimum output power** : the highest output power that can be obtained by adjustment when the tube is operated under stated conditions. ★ puissance optimale de sortie → *puissance 140.* R оптимальная выходная мощность. D optimale Ausgangsleistung. E potencia óptima de salida. I potenza ottima di uscita. N optimaal uitgangsvermogen. P moc wyjściowa optymalna. S maximal uteffekt. (531)

96. **output power** : the power delivered by a device in a specific form and for a specific purpose. ★ puissance utile → *puissance 161.* R полезная мощность. D Ausgangsleistung, abgegebene Leistung. E potencia de salida. I potenza utile; potenza di uscita. N afgegeven vermogen. P moc wyjściowa. S uteffekt. (151)

97. **output power** : the total power transferred from the electronic tube to the output circuit or through the output reference plane. ★ puissance de sortie → *puissance 95.* R выходная мощность. D Ausgangsleistung. E potencia de salida. I potenza di uscita. N uitgangsvermogen. P moc wyjściowa. S uteffekt. (531)

98. **output power control** : → *control 133*

99. **overload power (of an internal combustion engine)** (*Syn.* overload output (of an internal combustion engine)) : the power which an engine is able to deliver satisfactorily under stated conditions immediately after working at the continuous power, expressed as a percentage of the continuous power for a stated period, typically 110 % for one hour. ★ puissance de surcharge (d'un moteur à combustion interne) → *puissance 101.* R перегрузочная мощность (двигателя внутреннего сгорания). D Überlastleistung einer Verbrennungskraftmaschine. E potencia de sobrecarga (de un motor de combustión interna). I sovraccarico (di potenza) (d'un motore a combustione interna). N vermogen bij overbelasting (van een verbrandingsmotor). P moc przeciążeniowa (silnika). S överlasteffekt. (811)

100. **peak pulse output power** : the maximum value of output power during a stated time interval, spikes excluded. ★ puissance de sortie en crête de modulation → *puissance 97.* R максимальная импульсная выходная мощность. D Puls-Spitzenausgangsleistung. E potencia de salida en cresta de modulación. I potenza di uscita alla cresta di modulazione. N top-impulsuitgangsvermogen. P moc wyjściowa (impulsowa szczytowa). S pulstopputeffekt. (531)

101. **peak speech power** : the maximum value of the acoustical speech power during the interval of time considered. ★ puissance vocale de crête → *puissance 165.* R пиковая мощность речи. D Spitzensprachleistung. E potencia vocal de cresta. I potenza vocale di picco. N topvermogen van de spraak. P moc mowy szczytowa. S taleffektens toppvärde. (722)

102. **peak speech power** : maximum value of the instantaneous speech power within the time interval considered. ★ puissance vocale de crête → *puissance 166.* R мгновенная мощность речи. D maximale Sprachleistung. E potencia vocal de cresta; punta de potencia vocal. I potenza vocale di cresta. N topvermogen van de spraak. P moc mowy szczytowa. S toppvärde för taleffekt. (722,801)

103. **power** (*P*) : the time rate of transferring or transforming energy, or of doing work. ★ puissance → *puissance 50.* R мощность. D Leistung. E potencia. I potenza. N vermogen. P moc. S effekt. (111)

104. **power amplification** : → *amplification 3*

105. **power/brake changeover switch** : → *switch 35*

106. **power capacitor** : → *capacitor 54*

107. **power car** : → *car 5*

108. **power circuit** : → *circuit 139*

109. **power controller** : → *controller 8*

110. **power demand from the system** : → *demand 20*

111. **power divider** : → *divider 4*
112. **power divider** : → *divider 5*
113. **power electronic capacitor** : → *capacitor 55*
114. **power electronics** : → *electronics 3*
115. **power flux density** : → *flux density 12*
116. **power frequency** : → *frequency 149*
117. **power/frequency characteristic** (*Syn.* regulating energy of a system) : → *energy 71*
118. **power/frequency control** : → *control 140*
119. **power frequency recovery voltage** : → *recovery voltage 2*
120. **power frequency withstand voltage** : → *voltage 144*
121. **power gain** : → *gain 30*
122. **power inserter** : → *inserter 1*
123. **power line carrier pilot protection system** : → *system 152*
124. **power losses** : → *loss 71*
125. **power output of a high voltage generator** : → *output 58*
126. **power range** : → *range 58*
127. **power rating of an arc furnace transformer** : → *rating 10*
128. **power reactor** : → *reactor 25*
129. **power reflection coefficient** : → *coefficient 45*
130. **power reflection factor** : → *factor 136*
131. **power reflection factor** : → *factor 137*
132. **power relay** : → *relay 30*
133. **power shortfall** : → *shortfall 2*
134. **power sound spectrum** : → *spectrum 24*
135. **power spectral density** : → *density 19*
136. **power spectral density** : → *density 20*
137. **power spectral density of fractional frequency deviations** : → *density 21*
138. **power spectrum** : → *spectrum 25*
139. **power spectrum** : → *spectrum 26*
140. **power spectrum density** (*Syn.* power spectral density) : → *density 19*
141. **power spectrum density** (*Syn.* power spectral density) : → *density 20*
142. **power splitter** (*Syn.* power divider) : → *divider 5*
143. **power switchgroup** : → *switchgroup 6*
144. **power system management** : → *management 2*
145. **power system planning** : → *planning 1*
146. **power system stability** : → *stability 11*
147. **power transformer** : → *transformer 47*
148. **power transmission factor** : → *factor 138*
149. **power winding** : → *winding 45*
150. **protection (of a power system component)** : → *protection 38*
151. **psophometric power** : the power which would be absorbed by a resistance of 600 Ω to which a given psophometric voltage has been applied. ★ puissance psophométrique → *puissance 147.* **R** псофометрическая мощность. **D** Geräuschleistung. **E** potencia psofométrica. **I** potenza psofometrica. **N** psofometrisch vermogen. **P** moc psofometryczna. **S** psofometrisk effekt. (722)
152. **pulse output power** : the ratio of the average output power to the pulse duty factor. ★ puissance de sortie en impulsions → *puissance 98.* **R** импульсная выходная мощность. **D** Impulsausgangsleistung. **E** potencia de salida de impulsos. **I** potenza di uscita impulsiva. **N** impulsuitgangsvermogen. **P** moc wyjściowa impulsowa. **S** pulsuteffekt. (531)
153. **radiant power** (*Syn.* optical power; optical flux; radiant flux) : the time rate of flow of radiant energy with time. ★ puissance rayonnante → *puissance 149.* **R** мощность излучения; оптическая мощность; поток излучения. **D** Strahlungsleistung; optische Leistung. **E** potencia radiante; potencia óptica; flujo óptico; flujo radiante. **I** potenza radiante; potenza ottica; flusso ottico; flusso radiante. **N** stralingsvermogen; optisch vermogen; optische stralingsstroom; stralingsstroom. **P** strumień energetyczny; strumień promienisty. **S** strålningsflöde; strålningseffekt. (731)
154. **radiant power** (*Syn.* radiant flux) : → *flux 22*
155. **radiative mass stopping power** (S_{rad}/ρ) : the quotient of dE_{rad} by the product of ρ and dl, where dE_{rad} is the energy lost by a charged particle of specified energy by radiation in traversing a path length dl in a material of density ρ:

$$\frac{S_{rad}}{\rho} = \frac{1}{\rho}\left(\frac{dE}{dl}\right)_{rad}$$

Note. — The energy losses included are those that produce bremsstrahlung. ★ pouvoir d'arrêt massique par radiation → *pouvoir 4.* **R** массовая тормозная способность вследствие создания излучения. **D** Massen-Strahlungsbremsvermögen. **E** poder de frenado másico por radiación. **I** potere frenante massico radiativo. **N** stralingsenergieverlies per massadichtheid. **P** masowa radiacyjna zdolność hamowania. **S** massbromsförmåga genom strålningsförluster. (881)

156. **radio-frequency input power** (*Syn.* driving power) : → *power 33*
157. **rated power** : a conventional value of apparent power, establishing a basis for the design of a transformer, a shunt reactor or an arc-suppression coil, the manufacturer's guarantees and the tests, determining a value of the rated current that may be carried with rated voltage applied, under specified conditions. *Note.* — Both windings of a two-winding transformer have the same rated power, which by definition is the rated power of the transformer. For multi-winding transformers the rated power for each of the windings may differ. ★ puissance assignée → *puissance 69.* **R** номинальная мощность. **D** Bemessungsleistung. **E** potencia asignada. **I** potenza nominale. **N** toegekend vermogen. **P** moc znamionowa. **S** märkeffekt. (421)
158. **rated power** (of a type of lamp) : the value of the power of a given type of lamp declared by the manufacturer or the responsible vendor, the lamp being operated under specified conditions.Unit: W *Notes. 1* — The rated power is usually marked on the lamp. *2* — In French, formerly "puissance nominale". ★ puissance assignée → *puissance 70.* **R** номинальная мощность (типа ламп). **D** Bemessungswert der elektrischen Leistung (eines Lampentyps). **E** potencia nominal. **I** potenza nominale. **N** toegekend vermogen. **P** moc znamionowa (typu lampy). **S** märkeffekt. (845)
159. **rated power of an energizing circuit** (*Syn.* rated burden of an energizing circuit) : the power or burden (voltamperes if a.c.) absorbed under the reference conditions by a given energizing circuit of a relay and determined under specified conditions. ★ valeur assignée de la puissance absorbée par un circuit d'alimentation → *valeur 7.* **R** установленное значение мощности, потребляемой цепью возбуждения; установленное потребление цепи возбуждения. **D** Bemessungsleistung eines Erregungskreises. **E** valor asignado de la potencia absorbida por un circuito de alimentación; consumo asignado de un circuito de alimentación. **I** valore specificato della potenza assorbita da un circuito d'alimentazione; consumo specificato di un circuito d'alimentazione. **N** toegekend vermogen van een bekrachtigingsschakeling; toegekende belasting van een bekrachtigingsschakeling. **P** moc wejściowa znamionowa; obciążenie wejściowe znamionowe. **S** märkeffekt för matningskrets. (446)
160. **reactive power** (for sinusoidal voltage and current) : the imaginary part of the complex power.

$$Q = Im\,\underline{S} = S\sin\varphi$$

Note. — The reactive power supplied to an inductance is positive. ★ puissance réactive → *puissance 151.* **R** реактивная мощность. **D** Blindleistung (für sinusförmige Spannung und sinusförmigen Strom). **E** potencia reactiva (para una tensión o corriente senoidal). **I** potenza reattiva. **N** reactief vermogen; blindvermogen. **P** moc bierna. **S** reaktiv effekt. (131)

161. **reactive power compensation** : → *compensation 9*
162. **reactive power meter** (*Syn.* varmeter) : → *varmeter 1*
163. **reactive-power voltage control** : → *control 153*
164. **reference speech power for the measurement of AEN** : the acoustical speech power which causes the ARAEN speech voltmeter connected at the output of the sending system of the reference system for the determination of AEN or SRAEN to indicate 0 under specified conditions. *Note.* — The specified conditions are defined in the CCITT Recommendation P45 from the Volume V of the Yellow Book, 1981. ★ puissance vocale de référence pour l'ARAEN → *puissance 167.* **R** эталонная мощность речи при измерениях AEN. **D** Bezugssprachleistungen für ARAEN. **E** potencia vocal de referencia para el ARAEN. **I** potenza vocale di riferimento per

l'ARAEN. N AEN referentievermogen van de spraak. P moc mowy odniesienia dla ARAEN. S ARAEN-normalnivå. (722)

165. **reference speech power for the NOSFER** (*Syn.* normal speech power for voice-ear measurements) : → *power 93*
166. **relative power level** : → *level 78*
167. **reserve power of a system** : the difference between the total available capacity and the power demand from the system. ★ puissance de réserve d'un réseau → *puissance 92.* R резерв мощности энергосистемы. D Reserveleistung (eines Netzes). E potencia de reserva de una red. I potenza di riserva di una rete. N reservevermogen van een net. P rezerwa mocy (w systemie elektroenergetycznym). S effektreserv. (602)
168. **resolving power** (*Syn.* resolution) : → *resolution 6*
169. **restricted linear collision stopping power** (*Syn.* linear energy transfer) : → *transfer 14*
170. **(safety) power cutback system** : → *system 179*
171. **saturation power** : the first maximum value of output power observed as the driving power is gradually increased from a low level with the tube operating under stated conditions. ★ puissance de saturation → *puissance 93.* R мощность насыщения. D Sättigungsleistung. E potencia de saturación. I potenza di saturazione. N verzadigingsvermogen. P moc nasycenia. S mättnadseffekt. (531)
172. **(secondary) power control operation** : → *operation 59*
173. **self-balancing power bridge** : → *bridge 15*
174. **sensitivity to electric power** : → *sensitivity 30*
175. **short-circuit power** : the product of the current in the short circuit at a point of a system and a conventional voltage, generally the operating voltage. ★ puissance de court-circuit → *puissance 84.* R мощность короткого замыкания. D Kurzschlussleistung. E potencia de cortocircuito. I potenza di cortocircuito. N kortsluitvermogen van een net. P moc zwarciowa. S kortslutningseffekt. (601)
176. **slowing-down power** : for a given medium, the product of the average logarithmic energy decrement and the macroscopic neutron scattering cross-section. ★ pouvoir de ralentissement → *pouvoir 13.* D Bremsvermögen. E poder de moderación. I potere di rallentamento. N afrem(mings)vermogen. P zdolność spowalniania. S nedbromsningsförmåga. (026)
177. **source power efficiency** : → *efficiency 40*
178. **specific apparent power** (*Syn.* apparent power (mass) density) : → *density 1*
179. **specific power** : the power produced per unit mass of fuel in a reactor. ★ puissance massique → *puissance 121.* D spezifische Leistung. E potencia específica. I potenza massica; potenza specifica. N specifiek vermogen; massiek vermogen. P moc właściwa. S specifik effekt. (026)
180. **spill-over power** : for a reflector antenna, that part of the power radiated from the feed towards the corresponding reflector but not intercepted by it. ★ (énergie de) débordement → *débordement 4.* R мощность, не перехватываемая рефлектором. D Überstrahlungsleistung. E potencia de desborde. I potenza di spillover. N overloopvermogen. P moc rozproszona (poza reflektorem). S förbistrålad effekt. (712)
181. **standard power (of an internal combustion engine)** (*Syn.* international rated output) : → *output 15*
182. **static characteristic (of an arc welding power source)** : → *characteristic 87*
183. **steady state stability of a power system** : → *stability 19*
184. **synchronizing power coefficient** : → *coefficient 69*
185. **tapping power of a winding** : a conventional value of apparent power, establishing for the relevant tapping connection of the transformer a basis for the manufacturer's guarantees and, in certain cases, for the tests. ★ puissance de prise d'un enroulement → *puissance 91.* R мощность ответвления обмотки. D Anzapfungsleistung einer Wicklung. E potencia de toma de un arrollamiento. I potenza di presa di un avvolgimento. N aftakkingsvermogen van een wikkeling. P moc zaczepowa uzwojenia. S reglerlägeseffekt. (421)
186. **temperature compensated power bridge** : → *bridge 18*
187. **thermal power unit** : → *unit 66*
188. **thermoelectric power meter** : → *meter 62*
189. **total leakage power** (fired conditions) : the total power transmitted through a TR or pre TR tube when a high-power radio frequency pulse is applied under stated conditions. ★ puissance totale de fuite → *puissance 160.* R полная просачивающаяся мощность (в условиях зажигания). D Gesamtleckleistung. E potencia total de fuga (condición encendido). I potenza totale di dispersione (in accensione). N totaal lekvermogen (in ontstoken toestand). P moc przeciekowa całkowita. S total läckeffekt. (531)
190. **total linear stopping power** : of a medium traversed by charged particles of a specified energy, the average energy loss per particle, along an element of path divided by the length of that element. ★ pouvoir d'arrêt total linéique → *pouvoir 5.* R полная линейная тормозная способность. D lineares Bremsvermögen. E poder de frenado total lineal. I potere di arresto totale lineico. N lineïek energieverlies; totaal lineïek energieverlies. P zdolność hamowania linearna całkowita. S längdbromsförmåga. (391)
191. **total linear stopping power** (S) : the quotient of the energy dE lost by a charged particle of specified energy in traversing a path length dl in a material: $S = dE/dl$. *Note.* — For energies at which nuclear interactions can be neglected, the total linear stopping power is the sum of the linear collision stopping power and the linear radiative stopping power. ★ pouvoir d'arrêt total linéique → *pouvoir 6.* R полная линейная тормозная способность. D lineares Gesamtbremsvermögen. E poder de frenado total lineal. I potere frenante lineare totale. N totaal lineair energieverlies. P całkowita liniowa zdolność hamowania. S (längd)bromsförmåga. (881)
192. **total mass stopping power** (S/ρ) : the quotient of dE by the product of ρ and dl, where dE is the energy lost by a charged particle of specified energy in traversing a path length dl in a material of density ρ

$$\frac{S}{\rho} = \frac{1}{\rho}\frac{dE}{dl}$$

Note. — For energies at which nuclear interaction can be neglected, the total mass stopping power is the sum of the collision mass stopping power and the radiative mass stopping power. ★ pouvoir d'arrêt total massique → *pouvoir 7.* R полная массовая тормозная способность. D Massen-Gesamtbremsvermögen. E poder de frenado total másico. I potere frenante massico totale. N totaal energieverlies per massadichtheid. P całkowita masowa zdolność hamowania. S massbromsförmåga. (881)
193. **train power supply circuit** : → *circuit 187*
194. **train power supply contactor** (*Syn.* heating contactor) : → *contactor 10*
195. **train power supply generator** : → *generator 40*
196. **train power supply jumper** (*Syn.* heating jumper) : → *jumper 1*
197. **train power supply line** (*Syn.* heating train line) : → *line 44*
198. **transient stability of a power system** : → *stability 21*
199. **twice minimum power points** : → *point 51*
200. **useful output power** (*Syn.* load power) : that part of the output power which is transferred to the load proper and which is not reflected by it. ★ puissance de sortie utile → *puissance 100.* R полезная выходная мощность. D Nutzleistung. E potencia de salida útil. I potenza resa. N nuttig uitgangsvermogen. P moc wyjściowa użyteczna. S nyttig uteffekt. (531)
201. **utilization time of power losses** : → *time 224*
202. **welding power source** : → *source 48*

power factor

1. **power factor** : the ratio of the active power to the apparent power. *Note.* — In the case of a convertor, the two quantities apply to the same a.c. side. ★ facteur de puissance → *facteur de puissance 7.* R коэффициент мощности. D Leistungsfaktor. E factor de potencia. I fattore di potenza. N arbeidsfactor. P współczynnik mocy. S effektfaktor. (131,551)
2. **power factor clause** : → *clause 3*
3. **power factor correction capacitor** : → *capacitor 56*
4. **power factor meter** : → *meter 41*
5. **power factor of the fundamental** (*Syn.* displacement factor) : → *factor 48*
6. **unity power-factor test** : → *test 99*
7. **zero power-factor characteristic** : → *characteristic 96*
8. **zero power-factor test** : → *test 102*

power station

1. **auxiliary transformer of a power station** : → *transformer 6*
2. **available capacity of a power station** : → *capacity 2*
3. **compressed air power station** : a power station equipped with gas turbines using stored compressed air. ★ centrale par accumulation d'air comprimé → *centrale 15.* R газотурбинная воздухоаккумулирующая электростанция. D Luftspeicherkraftwerk. E central de acumulación de aire comprimido. I impianto ad accumulazione d'aria compressa. N persluchtcentrale. P elektrownia pneumatyczna. S tryckluftskraftstation. (602)
4. **conventional thermal power station** : a thermal power station in which the thermal energy is obtained by a combustion of coal or hydrocarbons. ★ centrale thermique classique → *centrale 17.* R электростанция на органическом топливе. D konventionelles thermisches Kraftwerk. E central térmica convencional. I impianto termoelettrico convenzionale (o di tipo classico); impianto termoelettrico di tipo classico. N conventionele thermische centrale. P elektrownia cieplna konwencjonalna. S fossileldad värmekraftstation. (602)
5. **geothermal power station** : a thermal power station in which thermal energy is extracted from suitable parts of the Earth's crust. ★ centrale géothermique → *centrale 10.* R геотермальная электростанция. D geothermisches Kraftwerk. E central geotérmica. I impianto geotermoelettrico. N geothermische centrale. P elektrownia geotermiczna. S jordvärmekraftstation. (602)
6. **gross head of a hydroelectric power station** : → *head 5*
7. **gross output of a power station** : → *output 11*
8. **hydroelectric power station** : a power station in which the gravitational energy of water is converted into electricity. ★ centrale hydro-électrique → *centrale 11.* R гидроелэктростанция. D Wasserkraftwerk. E central hidroeléctrica. I centrale idroelettrica. N waterkrachtcentrale. P elektrownia wodna. S vattenkraftstation. (602)
9. **magneto-hydro-dynamic thermal power station** (*Syn.* MHD power station) : a thermal power station generating electricity by means of an electromagnetic field acting on a plasma stream. ★ centrale magnétohydrodynamique → *centrale 12.* R магнитогидродинамическая электростанции; МГД-электростанции. D magnetohydrodynamisches Kraftwerk; MHD-Kraftwerk. E central magnetohidrodinámica; central MHD. I centrale magnetoidrodinamica; centrale MHD. N magnetohydrodynamische centrale. P elektrownia magneto-hydro-dynamiczna; elektrownia MHD. S magnetohydrodynamisk kraftstation; MHD-krafstation. (602)
10. **maximum capacity of a power station** : → *capacity 18*
11. **MHD power station** (*Syn.* magneto-hydro-dynamic thermal power station) : → *power station 9*
12. **net head of a hydroelectric power station** : → *head 22*
13. **net output of a power station** : → *output 25*
14. **nuclear (thermal) power station** : a thermal power station in which the thermal energy is obtained by a nuclear reaction. ★ centrale (thermique) nucléaire → *centrale 18.* R атомная электростанция. D Kernkraftwerk. E central nuclear. I impianto nucleotermoelettrico. N kerncentrale. P elektrownia jądrowa. S kärnkraftstation. (602)
15. **ocean or sea temperature gradient power station** : a thermal power station producing electricity by means of the difference between the temperatures at the surface of the ocean/sea and that at a lower depth. ★ centrale d'énergie thermique des mers → *centrale 6.* R электростанция на перепаде температур моря. D Meereswärme-Kraftwerk. E central de aprovechamiento del gradiente térmico de los mares. I centrale a saldo termico del mare. N zeetemperatuurgradiëntcentrale. P elektrownia wykorzystująca ciepło wody morskiej. S temperaturgradientkraftstation; OTEC. (602)
16. **pondage power station** : a hydroelectric power station in which the filling period of the reservoir based on the cumulative water flows permits the storage of water over a period of a few weeks at the most. *Note.* — In particular, a pondage station permits the cumulative water flows to be stored during periods of low load to enable the turbine to operate during high load periods on the same or following days. ★ centrale d'éclusée → *centrale 5.* R гидроэлектростанция с недельным регулированием. D ..... E central de represada. I centrale con serbatoio settimanale. N riviercentrale met buffering. P elektrownia zbiornikowa o krótkotrwałym wyrównaniu. S vattenkraftstation med korttidsmagasin. (602)
17. **power station** (*Syn.* electrical generating station) : an installation whose purpose is to generate electricity and which includes civil engineering works, energy conversion equipment and all the necessary ancillary equipment. ★ centrale électrique → *centrale 7.* R электростанция. D Kraftwerk. E central eléctrica. I centrale elettrica. N elektriciteitscentrale. P elektrownia. S kraftstation. (601,602)
18. **pumped storage power station** : a hydroelectric power station employing high level and low level reservoirs permitting repeated pumping and generating cycles to be carried out. ★ centrale de pompage → *centrale 3.* R гидроаккумулирующая электростанция. D Pumpspeicherkraftwerk. E central de bombeo. I centrale di pompaggio. N pompcentrale. P elektrownia pompowa. S pumpkraftstation. (602)
19. **reservoir power station** : a hydroelectric power station in which the filling period of the reservoir based on the cumulative water flows is longer than several weeks. *Note.* — A reservoir power station generally permits the cumulative water flows to be stored during the high water periods to enable the turbine to operate during later high load periods. ★ centrale de lac → *centrale 2.* R гидроэлектростанция с сезонным регулированием. D ..... E central de embalse. I centrale con serbatoio stagionale. N waterkrachtcentrale met spaarbekken. P elektrownia zbiornikowa o długotrwałym wyrównaniu. S vattenkraftstation med långtidsmagasin. (602)
20. **run-of-river power station** : a hydroelectric power station which uses the river flow as it occurs, the filling period of its own reservoir by the cumulative water flows being practically negligible. ★ centrale au fil de l'eau → *centrale 1.* R гидроэлектростанция на бытовом стоке. D Laufwasserkraftwerk. E central de agua fluyente. I centrale ad acqua fluente. N riviercentrale. P elektrownia przepływowa. S strömkraftstation. (602)
21. **solar power station** : a power station producing electrical energy from solar radiation directly by photovoltaic effect, or indirectly by thermal transformation. ★ centrale solaire → *centrale 16.* R солнечная электростанция. D Sonnenkraftwerk. E central solar. I centrale solare. N zonne-energiecentrale. P elektrownia słoneczna. S solkraftstation. (602)
22. **thermal power station** : a power station in which electricity is generated by conversion of thermal energy. *Note.* — The thermal energy may be obtained from a variety of sources. ★ centrale (électrique) thermique → *centrale 8.* R тепловая электростанция. D Wärmekraftwerk. E central termoeléctrica; central térmica. I impianto termoelettrico. N thermische centrale. P elektrownia cieplna. S värmekraftstation. (602)
23. **tidal power station** : a hydroelectric power station which uses the differences in water height due to the tides. ★ centrale marémotrice → *centrale 13.* R приливная гидроэлектростанция. D Gezeitenkraftwerk. E central mareomotriz. I centrale mareomotrice. N getijdecentrale. P elektrownia pływowa. S tidvattenkraftstation. (602)
24. **wind power station** : a power station in which wind energy is converted into electricity. ★ centrale éolienne → *centrale 9.* R ветроэлектростанция. D Windkraftwerk. E central eólica. I centrale eolica. N windenergiecentrale. P elektrownia wiatrowa. S vindkraftstation. (602)

power-feeding

1. **power-feeding (repeater) station** : → *station 24*

power-law

1. **power-law index profile** : → *profile 9*

power-regulation

1. **power-regulation coefficient of load** : → *coefficient 46*

power-to-mass

1. **power-to-mass ratio** (*Syn.* specific output) : → *output 64*

Poynting

1. **complex Poynting vector** : → *vector 2*
2. **Poynting vector** : → *vector 8*

PPM

1. **PPM** (*Syn.* pulse position modulation) : → *modulation 53*

practical

1. **practical test method** (*Syn.* alternative test method) : → *method 1*

preamplifier

1. **preamplifier** : an electronic amplifier designed to be connected to the radiation detector output prior to transmission to the main amplifier (for example, to transform the output characteristics of the detector to match the input of the main amplifier). ★ préamplificateur → *préamplificateur 1.* R предусилитель. D Vorverstärker. E preamplificador. I preamplificatore. N voorversterker. P przedwzmacniacz. S förförstärkare. (391)

pre-arcing

1. **pre-arcing time** : → *time 132*

pre-assignment

1. **pre-assignment** : the assignment of traffic-carrying capacity in a manner determined by traffic forecasts. ★ préassignation → *préassignation 1.* R предварительное распределение. D Vorauszuteilung. E preasignación. I pre-assegnazione. N capaciteitsreservering. P potwierdzenie wstępne. S planerad styrning. (714)

precipitation

1. **precipitation rate** : → *rate 66*
2. **precipitation scatter (propagation)** : → *scatter 2*

precision

1. **precision offset** : → *offset 14*

precompressed

1. **precompressed pressboard** : → *pressboard 1*

preconditioning

1. **preconditioning** : the treatment of a specimen with the object of removing or partly counteracting the effect of its previous history with respect, principally, to the tempature and humidity to which it has been exposed. *Notes 1* — The preconditioning is sometimes known as *normalizing. 2* — Preconditioning usually precedes conditioning of a specimen. When the combination of temperature and humidity for conditioning is the same as that prescribed for preconditioning, the preconditioning may be said to take the place of conditioning. ★ préconditionnement → *préconditionnement 2.* R подготовка. D Vorbehandlung. E acondicionamiento previo; preacondicionamiento. I precondizionamento. N conditionering vooraf. P kondycjonowanie wstępne. S förkonditionering. (212)
2. **pre-conditioning supply** (*Syn.* energy-supply station) : → *station 12*
3. **preconditioning time** : → *time 133*

pre-cooling

1. **pre-cooling** : cooling the passenger accomodation by operating the air conditioning system of a vehicle before it enters service. ★ refroidissement préalable → *refroidissement 9.* R предварительное охлаждение. D Vorkühlen. E refrigeración previa. I prerefrigerazione. N voorkoeling. P chłodzenie wstępne. S föravkylning. (811)

pre-correction

1. **pre-correction** : application of an artificial time distortion to signals at the sending end of a channel, in order to compensate completely or partly, for the effect of the characteristic distortion of this channel. ★ précorrection → *précorrection 2.* R предварительная коррекция. D Vorkorrektur. E precorrección. I precorrezione. N voorcorrectie. P korekcja wstępna. S förkorrigering. (721)

precursor

1. **precursor** (of a nuclide) : any radioactive nuclide which precedes that nuclide in a decay chain. The term is often restricted to the immediately preceding nuclide. ★ précurseur → *précurseur 1.* D Mutternuklid. E precursor (de un núclido.). I precursore (di un nuclide.). N moedernuclide. P nuklid poprzednik. S modernuklid. (026)

predicted

1. **predicted** : qualifies a value assigned to a quantity, before the quantity is actually observable, computed on the basis of earlier observed or estimated values of the same quantity or of other quantities using a mathematical model. *Note.* — A predicted value may also be designated by the term "prediction". ★ prévu → *prévu 1.* R ожидаемый; прогнозируемый. D vorhergesagt. E ... previsto; ... predicho. I previsto. N voorspeld. P prognozowany. S predikterad. (191)

prédiction

1. **adaptive prediction** (in ADPCM) : prediction in which one or more parameters of this process are automatically adjusted according to some characteristic of the signal or channel concerned. *Note.* — An associated term is "adaptive predictor". ★ prédiction adaptative → *prédiction 3.* R адаптивное предсказание. D adaptive Vorhersage (in ADPCM). E predicción adaptativa. I predizione adattativa (nell'ADPCM). N adaptieve voorspelling (bij ADPCM). P przewidywanie adaptacyjne; predykcja adaptacyjna. S adaptiv prediktering. (704)
2. **ionospheric prediction** (*Syn.* ionospheric forecast) : the prediction of properties of the ionosphere based on the extrapolation of previous ionospheric observations, the periodicity of solar phenomena, the most recent solar observations and theoretical considerations. ★ prévision ionosphérique → *prévision 6.* D ionosphärische Vorhersage; Funkwettervorhersage. P prognoza jonosferyczna. (705)
3. **maintainability prediction** : an activity performed with the intention of forecasting the numerical values of a maintainability performance measure of an item, taking into account the maintainability performance and reliability performance measures of its subitems, under given operational and maintenance conditions. ★ prévision de la maintenabilité → *prévision 3.* R прогнозирование ремонтопригодности. D Instandhaltbarkeitsvorhersage. E previsión de mantenibilidad; predicción de la mantenibilidad. I previsioni di manutenibilità. N onderhoudbaarheidsvoorspelling. P prognozowanie obsługiwalności. S underhållsmässighetsprediktering. (191)
4. **prediction** : the process of computation used to obtain the predicted value(s) of a quantity. *Note.* — The term "prediction" may also be used to denote the predicted value(s) of a quantity. ★ prévision → *prévision 1.* R прогнозирование. D Vorhersage. E previsión; predicción. I previsione. N voorspelling. P prognozowanie. S prediktering. (191)
5. **prediction** (in differential pulse code modulation) : the process of estimating the value of a sample from the succession of previous samples or quantized values. *Note.* — Associated terms are : "prediction law" ; "predictor". ★ prédiction → *prédiction 2.* R предсказание (в дифференциальной ИКМ). D Vorhersage; Prädiktion (in der differentiellen Pulscodemodulation). E predicción. I predizione (nel DPCM). N voorspelling (bij differentie le pulscodemodulatie). P przewidywanie (w modulacji impulsowo-kodowej różnicowej); predykcja. S prediktering. (704)

pre-dimensioned

1. **pre-dimensioned bar** : → *bar 10*

pre-echo

1. **pre-echo** : the cross-talk from the adjacent groove following the groove being played. ★ pré-écho → *pré-écho 1.* R опережающее эхо. D Vor-Echo. E preeco. I pre-eco. N voor-echo. P echo wyprzedzające. S föreko. (806)

pre-emphasis

1. **pre-emphasis** : a process which deliberately increases the magnitude of certain spectral components of a signal with respect to the magnitude of others, in order to facilitate its transmission or recording. ★ préaccentuation → *préaccentuation 1.* R преэмфазис. D Preemphase; Vorverzerrung. E preacentuación; preénfasis. I preenfasi. N pre-emfase. P preemfaza. S förbetoning. (702)
2. **pre-emphasis** (*Syn.* pre-equalization) : the operation which consists in modifying the amplitude/frequency characteristic of the signal to be recorded. ★ pré-accentuation → *préaccentuation 2.* R частотные предыскажения. D Preemphasis; Vorverzerrung. E preacentuación; preecualización. I pre-enfasi. N voorcorrectie; pre-emfasis. P korekcja zapisu; preemfaza. S betoning. (806)

pre-equalization

1. **pre-equalization** : an intentional change to a signal made in a transmission channel or amplification system in order to compensate for distortions occurring after this point. ★ précorrection → *précorrection 1.* R предвыравнивание. D Vorverzerrung. E preecualización; precorrección; precorrección. I precorrezioni; preequalizzazione. N voorvereffening; vooregalisatie. P korekcja wstępna. S förutjämning. (702)
2. **pre-equalization** (*Syn.* pre-emphasis) : → *pre-emphasis 2*

pre-excitation

1. **pre-excitation** : in electric braking when using a traction motor as a generator, the establishment of excitation from an external source, e.g. a battery, where residual magnetism is unable to initiate proper excitation or the response time is too long. ★ préexcitation → *préexcitation 1.* R предвозбуждение. D Vorerregung. E preexcitación. I preeccitazione. N voorbekrachtiging. P dowzbudzenie; wzbudzenie wstępne. S fältväckningsmagnetisering. (811)

prefade

1. **prefade listening** : → *listening 1*

preferential

1. **preferential (PBX) access line** : → *line 126*

prefix

1. **prefix** (in ac signalling) : the initial portion of a multi-component signal which has the function of preparing or sensitizing a circuit for the receipt of the signalling information. ★ préfixe → *préfixe 1.* R префикс (в сигнализации переменным током). D Vorausbegleitzeichen. E prefijo (en señalización en corriente alterna). I pre-segnale (nella segnalazione in c.a.). N ..... P prefiks (sygnału wieloelementowego). S prefix. (714)
2. **prefix giving access to the intercontinental telex network** : a digit or a sequence of digits that must be selected by a subscriber possibly after the prefix giving access to the long-distance telex network, to connect with the intercontinental network. ★ préfixe d'accès à l'intercontinental → *préfixe 3.* R префикс доступа к межконтинентальной сети телекс. D Zugangskennzahl für interkontinentalen Verkehr. E prefijo de acceso a la red intercontinental. I prefisso intercontinentale. N voorcijfer voor toegang tot het intercontinentale telexnet. P prefiks dostępu do sieci międzykontynentalnej. S interkontinentalt prefix. (721)
3. **prefix giving access to the international telex network** : a digit or a sequence of digits that must be selected by a subscriber, possibly after the prefix giving access to the long-distance telex network to connect with the international network. ★ préfixe d'accès à l'international → *préfixe 4.* R префикс доступа к международной сети телекс. D Zugangskennzahl für internationalen Verkehr. E prefijo de acceso a la red internacional. I prefisso internazionale. N voorcijfer voor toegang tot het internationale telexnet. P prefiks dostępu do sieci międzynarodowej. S internationellt prefix. (721)
4. **prefix giving access to the long-distance telex network** : a digit or a sequence of digits giving access to the remainder of a national telex network from an area inside which local telex numbers are used. ★ préfixe d'accès à grande distance → *préfixe 2.* R префикс доступа к междугородной сети телекс. D Zugangskennzahl für Weitverkehr. E prefijo de acceso a grandes distancias. I prefisso interurbano. N voorcijfer voor toegang tot lange-afstand-telexnet. P prefiks dostępu do sieci teleksowej międzymiastowej. S långdistansprefix. (721)

prefocus

1. **prefocus base** (*Syn.* prefocus cap) : → *cap 9*
2. **prefocus cap** : → *cap 9*
3. **prefocus lamp** : → *lamp 47*

preform

1. **preform** : a structure from which an optical fibre may be drawn. ★ préforme → *préforme 1.* R заготовка. D Vorform. E preforma. I preforma. N voorvorm. P preforma. S preform. (731)

preformed

1. **partly preformed winding** : → *winding 43*
2. **preformed winding** : → *winding 46*

preheat

1. **preheat lamp** : → *lamp 48*

preheating

1. **cathode preheating time** : → *time 18*
2. **parallel cathode preheating** (of a discharge lamp) : type of preheating of the electrodes of a discharge lamp in which these electrodes are fed by separate circuits. *Note.* — Each electrode is usually connected across a low voltage winding which may be part of the ballast and provides the preheating current. In certain circuits, this low voltage is automatically decreased after the arc has struck. ★ préchauffage en parallèle des électrodes → *préchauffage 7.* R предварительный нагрев параллельно включенного катода (разрядной лампы). D Parallelvorheizung einer Kathode. E precaldeo en paralelo de cátodos. I preriscaldamento in parallelo del catodo. N parallelvoorverwarming van de kathoden. P podgrzewanie katody, równoległe. S parallellkatodförvärmning. (845)
3. **pre-heating (of a vehicle)** : heating a vehicle before it enters service. ★ préchauffage (d'un véhicule) → *préchauffage 6.* R подогрев (единицы подвижного состава). D Vorheizen. E precalefacción (de un vehículo). I preriscaldamento (d'un veicolo). N voorverwarming (van een voertuig). P podgrzewanie wstępne. S föruppvärmning. (811)
4. **pre-heating supply** (*Syn.* energy-supply station) : → *station 12*
5. **series cathode preheating** (of a discharge lamp) : type of preheating of the electrodes of a discharge lamp in which the preheating current flows through the electrodes in series. ★ préchauffage en série des électrodes → *préchauffage 8.* R предварительный нагрев последовательно включенного катода (разрядной лампы). D Serienvorheizung einer Kathode. E precaldeo en serie de cátodos. I preriscaldamento in serie del catodo. N serievoorverwarming van de kathoden. P podgrzewanie katody szeregowe. S seriekatodförvärmning. (845)

pre-impregnated

1. **pre-impregnated material** : → *material 33*
2. **pre-impregnated (paper) insulation** : → *insulation 48*

pre-insulated

1. **pre-insulated connection** : → *connection 45*
2. **pre-insulated terminal end** : → *end 15*

preliminary

1. **preliminary adjustments** : → *adjustment 9*

premix

1. **premix** (for electrical insulation) : a pre-impregnated material not in a definite shape. ★ prémix → *prémix 1.* R премикс (для электрической изоляции). D Premix (für die elektrische Isolierung). E mezcla previa (para aislamiento eléctrico). I massa preimpregnata (per isolamento elettrico). N voorgemengd materiaal. P premiks (do izolacji elektrycznej). S förblandning. (212)

prepayment

1. **prepayment meter** : → *meter 42*

prepreg

1. **prepreg** (*Syn.* pre-impregnated material) : → *material 33*

pre-sag

1. **contact wire pre-sag** : the initial value of sag deliberately given to the contact wire during erection. ★ flèche initiale du plan de contact → *flèche 4.* R предварительное провисание контактного провода. D Vordurchhang des Fahrdrahtes. E flecha inicial del plano de contacto. I freccia iniziale (del filo). N voordoorhang. P zwis przewodu jezdnego wstępny. S initialnedhäng. (811)

preselection

1. **preselection delay** : → *delay 37*

preselector

1. **preselector** (*Syn.* subscriber's uniselector) : a selector associated with a calling line for the purpose of connecting this line to a free outlet. ★ présélecteur → *présélecteur 2.* R предыскатель. D Vorwaehler. E preselector. I preselettore. N voorkiezer (tussen eindtoestellen). P wybierak wstępny. S förväljare. (714)

present

1. **present value of cost losses** : → *value 43*
2. **present worth of cost of losses** (*Syn.* present value of cost losses) : → *value 43*

presentation

1. **presentation control area** : → *area 33*

preserving

1. **record preserving sensor hole** : → *hole 15*

pre-signal

1. **pre-signal** : a class of service signal transmitted at the beginning of the selection signals. ★ présignal → *présignal 1.* R предварительный сигнал. D Vorsignal. E preseñal. I presegnale. N voorsignaal. P sygnał przedwybierczy. S försignal. (721)

pressboard

1. **precompressed pressboard** : pressboard to which heat has been applied during pressing to remove excess water, consolidate the plies and close up the material. ★ pressboard précomprimé → *pressboard 2.* R уплотненный прессшпан. D heißgepreßter Tafelpreßspan. E cartón precomprimido. I cartone precompresso. N voorgeperst karton. P płyta utwardzona na gorąco. S HD-presspan. (212)
2. **pressboard** : board made normally on an intermittent board machine from pulp of entirely vegetable origin and of high chemical purity. It is characterized by its relatively high density, even thickness, surface smoothness, high mechanical strength, flexibility and electrical insulating properties. For some purposes, the surface may be textured. ★ pressboard → *pressboard 1.* R прессшпан. D Tafelpreßspan. E cartón comprimido. I cartone pressato. N karton. P płyta utwardzona. S presspan. (212)

pressed

1. **pressed glass lamp** : → *lamp 49*

presspaper

1. **presspaper** : multilayer paper made by a continuous process from pulp of entirely vegetable origin and of high chemical purity. It is characterized by its density, even thickness, surface smoothness, high mechanical strength, ageing resistance and electrical insulating properties. ★ presspaper → *presspaper 1.* R многослойная бумага. D Rollenpreßspan. E papel comprimido. I carta pressata. N karton. P preszpan; papier utwardzony. S presspanpapper. (212)

pressure

1. **acoustic radiation pressure** : unidirectional steady pressure exerted on a surface by an acoustic wave. ★ pression acoustique de radiation → *pression acoustique 11.* R акустическое радиационное давление. D Schallstrahlungsdruck. E presión acústica de radiación. I pressione di radiazione. N akoestische stralingsdruk. P ciśnienie akustyczne promieniowania. S ljudstrålningstryck. (801)
2. **bearing pressure** : the load carried by the bearing per unit of projected area; this latter being the product of the length and diameter of the journal. ★ charge spécifique du coussinet → *charge 84.* R давление на подшипник. D Lagerdruck. E carga específica de cojinete. I carico specifico del cuscinetto. N specifieke lagerbelasting. P nacisk średni łożyska. S lagertryck. (411)
3. **condensation pressure** : at a given temperature, the pressure at which an insulating gas begins to deposit as a liquid. ★ point de condensation → *point 15.* R давление конденсации. D Kondensationsdruck. E presión de condensación. I pressione di condensazione. N condensatiedruk. P ciśnienie skraplania. S kondensationstryck. (212)
4. **double pressure locking mechanical system** : → *mechanical system 5*
5. **external gas pressure cable** : → *cable 27*
6. **high pressure mercury (vapour) lamp** : → *lamp 23*
7. **high pressure sodium (vapour) lamp** : → *lamp 24*
8. **internal gas pressure cable** : → *cable 37*
9. **low pressure mercury (vapour) lamp** : → *lamp 36*
10. **low pressure sodium (vapour) lamp** : → *lamp 37*
11. **pantograph adherence pressure** (*Syn.* pantograph contact pressure) : → *pressure 12*
12. **pantograph contact pressure** (*Syn.* pantograph adherence pressure) : the force applied by the pantograph to the contact wire. ★ pression de contact (du pantographe) → *pression 21.* R контактное давление пантографа. D Anpreßdruckkraft (Scheren- oder Einholmstromabnehmers). E presión de contacto; presión de aplicación (del pantógrafo). I forza di contatto (del pantografo). N pantograafcontactdruk. P nacisk stykowy pantografu. S uppkraft. (811)
13. **pressure** (in a fluid) (*p*) : a type of stress, characterized by its uniformity in all directions. ★ pression → *pression 19.* R давление (в некристаллическом веществе). D Druck (in einem Fluid). E presión (en un fluidop). I pressione (in un fluido). N druk. P ciśnienie. S tryck (i fluid). (111)
14. **pressure cable** : → *cable 54*
15. **pressure containing terminal box** : → *terminal box 7*
16. **pressure injected pile** : → *pile 8*
17. **pressure lubricated bearing** : → *bearing 27*
18. **pressure microphone** : → *microphone 29*
19. **pressure piling** : → *piling 1*
20. **pressure relief terminal box** : → *terminal box 8*
21. **pressure reservoir** (*Syn.* pressure tank) : → *tank 4*
22. **pressure roller** : → *roller 3*
23. **pressure sensitivity** : → *sensitivity 17*
24. **pressure switch** : → *switch 36*
25. **pressure tank** : → *tank 4*
26. **self-contained pressure cable** : → *cable 58*
27. **single pressure maintained mechanical system** : → *mechanical system 13*
28. **single pressure non-locking mechanical system** (*Syn.* momentary mechanical system) : → *mechanical system 11*
29. **static pressure** : at a point in a medium, the pressure that would exist at that point in the absence of sound waves. ★ pression statique → *pression 22.* R статическое давление. D statischer Druck. E presión estática. I pressione statica. N statische druk. P ciśnienie statyczne. S statiskt tryck. (801)

pressure-gradient

1. **pressure-gradient microphone** : → *microphone 30*

pressure-sensitive

1. **pressure-sensitive adhesive tape** : → *tape 9*

pressure-sleeve

1. **pressure-sleeve** : a tubular elastomeric sleeve forming part of a pressure-sleeve cable clamp. *Note.* — The purpose of the pressure-sleeve is three-fold: *1)* it converts some of the axial force imparted by the outlet-nut to inward radial force, thereby achieving electrical contact pressure between the cable braid and a ferrule inserted beneath the braid. *2)* it exerts an axial thrust against the flange of the ferrule thereby achieving electrical contact pressure between the ferrule and the connector body. *3)* it provides mechanical anchorage and *Note :* sealing between the cable and the connector body by the action of the combined inward and outward radial pressures. ★ manchon de pression → *manchon 8.* R втулка уплотнительная. D elastischer Druckring. E manguito de presión. I manicotto di pressione. N drukmanchet. P odciążka (przewodu). S tryckhylsa. (581)

pressurization

1. **pressurization "p"** (of electrical apparatus for explosive gas atmospheres) : a type of protection of electrical apparatus in which safety is achieved by means of a protective gas maintained at a pressure above that of the surrounding atmosphere. *Note.* — This type of protection is indicated by the letter "p". ★ surpression interne "p" → *surpression 4.*

R заполнение оболочки под избыточным давлением (взрывозащищенного электрооборудования). D Überdruckkapselung "p". E sobrepresión interna "p" (de un material eléctrico para atmósferas explosivas gaseosas). I sovrapressione interna "p" (di una costruzione elettrica per atmosfere esplosive per la presenza di gas). N inwendige overdruk "p" (van elektrisch materieel voor plaatsen met ontploffingsgevaar). P nadciśnienie wewnętrzne "p" (urządzenia elektrycznego przeciwwybuchowego). S utförande med övertrycksventilation. (426)

pressurized

1. **pressurized** : applied to a sealed machine in which the internal coolant is kept at a higher pressure than the surrounding medium. ★ machine à surpression interne → *machine 31.* R машина с повышенным внутренним давлением. D Maschine mit innerem Überdruck. E máquina con sobrepresión interna. I macchina a sovrapressione interna. N met overdruk. P maszyna z podwyższonym ciśnieniem wewnętrznym. S trycksatt. (411)
2. **pressurized enclosure** : → *enclosure 10*

pre-transmit/receive

1. **pre-transmit/receive tube** (*Syn.* pre T.R. tube) : → *tube 68*

pre-travel

1. **pre-travel** : the distance between the free position and the operating position. ★ pré-course → *pré-course 1.* R ход рабочий. D Vorlaufweg. E precarrera. I corsa a vuoto. N uitgeschakelde heenweg. P droga wstępna. S förrörelse. (581)

preventing

1. **circuit-breaker with lock-out preventing closing** : → *circuit-breaker 7*

preventive

1. **active preventive maintenance time** : → *time 5*
2. **preventive maintenance** : → *maintenance 38*
3. **preventive maintenance time** : → *time 134*

PRF

1. **PRF** (*Syn.* pulse repetition frequency) : → *frequency 158*

price

1. **average price per kWh** : the quotient of the total amount billed for a specified supply and the number of kilowatthours supplied. ★ prix moyen du kWh → *prix 7.* R средний тариф за квт.ч. D Durchschnittspreis; Durchschnittserlös. E precio medio del kilovatio hora. I prezzo medio del kWh. N gemiddelde opbrengst per kWh. P średnia cena za kWh. S medelpris. (691)
2. **price** : an amount to be paid for a quantity purchased or for a service received. ★ prix → *prix 2.* R сумма оплаты. D Rechnungsbetrag; Entgelt. E precio. I prezzo. N prijs; totaalbedrag. P suma opłat. S totalpris; avgift. (691)
3. **price adjustment clause** : → *clause 4*
4. **price per kilowatt or kilovolt-ampere** (*Syn.* demand rate) : → *rate 20*

primary

1. **bar primary bushing type current transformer** : → *transformer 10*
2. **bar primary type current transformer** : → *transformer 11*
3. **display primaries** : the primary colours, usually red, green and blue, that are mixed additively to form the colours of the reproduced television picture. ★ primaires de synthèse → *primaire 33.* R основные цвета воспроизводящего устройства. (723)
4. **primary body** : → *body 11*
5. **primary circuit** : → *circuit 140*
6. **primary coating** : → *coating 4*
7. **primary (colour)** : → *colour 66*
8. **primary colour field** (*Syn.* colour field) : → *field 2*
9. **primary colour picture** : → *picture 20*
10. **primary colour signal** : → *signal 143*
11. **primary control** : → *control 142*
12. **primary coolant circuit** : → *circuit 141*
13. **primary coverage area** : → *area 34*
14. **primary current** : → *current 141*
15. **primary digital group** : → *group 50*
16. **primary failure** : → *failure 44*
17. **primary fission yield** : → *fission 19*
18. **primary light source** : → *source 22*
19. **primary load** (*Syn.* normal load) : → *load 66*
20. **primary PCM group A** : → *group 51*
21. **primary PCM group mu** : → *group 52*
22. **primary photometric standard** : → *standard 16*
23. **primary protection** (*Syn.* main protection) : → *protection 23*
24. **primary protective barrier** : → *barrier 11*
25. **primary radiation** : → *radiation 52*
26. **primary radiator** : → *radiator 6*
27. **primary relay** : → *relay 31*
28. **primary route** : → *route 5*
29. **primary series circuit** : → *circuit 142*
30. **primary standard** : → *standard 17*
31. **primary station** : → *station 25*
32. **primary system for the determination of reference equivalents** : → *system 156*
33. **primary voltage** : → *voltage 145*
34. **primary winding** : → *winding 47*
35. **primary winding** : → *winding 48*
36. **primary winding** : → *winding 49*
37. **primary winding** : → *winding 50*
38. **rated accuracy limit primary current** : → *current 153*
39. **rated instrument limit primary current** : → *current 159*
40. **rated primary current** : → *current 160*
41. **rated primary voltage** : → *voltage 163*
42. **short-circuit time constant of primary windings** : → *time constant 18*
43. **transmission primaries** : the set of three colours, either physical or non-physical, obtained by matrixing, so chosen that each corresponds to one of the three signals used for the transmission of the colour picture signal. ★ primaires de transmission → *primaire 34.* R основные цвета передачи. (723)
44. **wound primary type current transformer** : → *transformer 80*

primary-electron

1. **primary-electron emission** : → *emission 24*

primer

1. **primer electrode** (*Syn.* keep-alive electrode) : → *electrode 69*
2. **primer ignition** : → *ignition 7*
3. **primer noise** : → *noise 59*
4. **primer voltage** : → *voltage 146*

priming

1. **priming** : charging storage elements to a potential suitable for writing. ★ apprêtage → *apprêtage 1.* R подготовка. D Vorbereitung. E preinscripción. I predisposizione. N activering. P ..... S föraktivering. (531)
2. **priming rate** : → *rate 67*
3. **priming speed** : → *speed 31*

principal

1. **impedance voltage at rated current (for the principal tapping)** : → *voltage 86*
2. **principal arm** : → *arm 12*
3. **principal axis** : → *axis 9*
4. **principal carrier** (*Syn.* main catenary) : → *catenary 10*
5. **principal current** : → *current 142*
6. **principal quantum number** : → *number 25*
7. **principal tapping** : → *tapping 9*
8. **principal voltage** : → *voltage 147*

9. **principal (voltage-current) characteristic** : → *characteristic 66*

principle

1. **Bragg-Gray principle** : the principle which enables the absorbed dose in irradiated material to be determined by inserting a small cavity ionization chamber at the point of interest. ★ principe de Bragg-Gray → *principe 1.* R принцип Брегга-Грея. D Bragg-Gray-Prinzip. E principio de Bragg-Gray. I principio di Bragg-Gray. N Bragg-Grayprincipe. P prawo Bragga-Graya. S Bragg-Gray-teknik. (881)
2. **Pauli principle** (*Syn.* Pauli-Fermi principle) : → *principle 3*
3. **Pauli-Fermi principle** (*Syn.* Pauli principle) : the principle stating that each energy level of a quantized system can include only none, one or two particles. *Note.* — In the case of two electrons, the spins are of opposite sign. ★ principe d'exclusion de Pauli-Fermi → *principe 3.* R принцип Паули-Ферми; принцип Паули. D Pauli-Fermi-Prinzip; Pauli-Prinzip. E principio de exclusión de Pauli-Fermi. I principio di esclusione di Pauli-Fermi; principio di Pauli. N Pauliverbod. P zasada Pauliego-Fermiego; zakaz Pauliego. S Pauli-Fermis princip. (521)
4. **reciprocity principle** : for an electroacoustic transducer that is linear, passive and reversible, principle according to which : a) the relation between the voltage sensitivity of the transducer functioning as a receiver of sound (e.g. a microphone), and the sensitivity to current of the transducer functioning as an emitter of sound, and b) the relation between the current sensitivity of the transducer functioning as a receiver of sound (e.g. a microphone) and the sensitivity to voltage of the transducer functioning as an emitter of sound, depend only on the geometry of the transducer, the frequency, and physical properties of the medium. ★ principe de réciprocité → *principe 2.* R принцип взаимности. D Reziprozitätsgesetz. E principio de reciprocidad. I principio di reciprocità. N reciprociteitsprincipe. P zasada wzajemności. S reciprocitetsprincipen. (801)

printed

1. **double-sided printed board** : → *board 3*
2. **flexible double-sided printed board** : → *board 4*
3. **flexible multilayer printed board** : → *board 5*
4. **flexible printed board** : → *board 6*
5. **flexible single-sided printed board** : → *board 7*
6. **flex-rigid double-sided printed board** : → *board 8*
7. **flex-rigid multilayer printed board** : → *board 9*
8. **flex-rigid printed board** : → *board 10*
9. **metal core printed board** : → *board 12*
10. **multilayer printed board** : → *board 14*
11. **printed board** : → *board 16*
12. **printed board connector** : → *connector 37*
13. **printed circuit** : → *circuit 143*
14. **printed wiring** : → *wiring 4*
15. **rigid double-sided printed board** : → *board 18*
16. **rigid multilayer printed board** : → *board 19*
17. **rigid printed board** : → *board 20*
18. **rigid single-sided printed board** : → *board 21*
19. **single-sided printed board** : → *board 22*

printer

1. **direct printer** : telegraph printer used in systems employing unequal length codes such as Morse-code, two-condition cable code, in which printing is performed directly from the incoming signals. ★ récepteur traducteur imprimeur → *récepteur 32.* R печатающий аппарат с прямой записью. D Direktdrucker. E impresor directo; receptor transductor impresor. I ricevitore a stampa. N direct-systeemschrijver. P drukarka telegraficzna. S direktskrivare. (721)
2. **tape printer** : apparatus which reads the signals recorded, for instance, on perforated tape and prints the corresponding characters on a paper tape or page without the intervention of transmission. ★ lecteur imprimeur → *lecteur 6.* R считывающе-печатающее устройство. D Streifendrucker. E lector impresor. I lettore di nastro con stampante. N bandlezer met drukker. P drukarka taśmowa. S remsskrivare. (721)

printing

1. **printing perforator** : → *perforator 2*
2. **printing recorder** : → *recorder 12*
3. **printing reperforator** : → *reperforator 3*
4. **printing telegraphy** : → *telegraphy 10*

print-through

1. **print-through effect** : → *effect 64*
2. **print-through level** : the ratio, generally expressed in decibels, of the voltage generated by a spurious signal due to a print-through effect which appears during reproduction of a recorded signal on a magnetic tape, to the voltage energized by the signal generating the print-through. ★ niveau d'empreinte magnétique → *niveau 56.* R относительный уровень копирэффекта. D Kopier-Echo-Pegel. E nivel de impresión magnética. I livello di impronta magnetica. N doordrukniveau. P poziom przekopiowania. S kopieringseffektnivå. (806)

priority

1. **absolute priority** : the possibility of setting up a call from a nominated terminal on a private network or closed user group, by assigning to it at each stage or certain stages of selection, priority over all other calls of lower priority that are established. The possibility may apply either to every call or only to nominated calls from such a privileged terminal. ★ priorité absolue → *priorité 1.* R абсолютный приоритет. D absolute Priorität. E prioridad absoluta. I precedenza assoluta. N absolute prioriteit. P priorytet absolutny. S absolut prioritet. (721)
2. **message priority** : a facility within a store-and-forward, or message switching system that enables a subscriber to attribute to his message one of a number of provided levels of priority. ★ priorité des messages → *priorité 2.* R приоритет сообщения. D Sendungspriorität. E prioridad de mensajes. I priorità sui messaggi. N prioriteit in de berichten. P priorytet wiadomości. S meddelandeprioritering. (721)
3. **priority** : the possibility of setting up a call from a nominated terminal on a private network or closed user group, by assigning to it, at each stage of selection, priority over all other calls of lower priority that are in the process of being established. The possibility may apply either to every call or only to nominated calls from such a privileged terminal. ★ priorité relative → *priorité 3.* R относительный приоритет. D Priorität. E prioridad relativa. I precedenza. N prioriteit. P priorytet. S prioritet. (721)
4. **priority for called subscriber** : a subscriber who has the facility of priority or absolute priority for all calls or for certain calls only to his terminal. This facility is activated by the sending of an appropriate signal by the calling terminal. *Note.* — There may be several priority levels, each conferring relative or absolute priority with respect to lower levels. ★ abonné prioritaire en demandé → *abonné 3.* R приоритет для вызываемого абонента; абонент, имеющий приоритет при входящем вызове. D Priorität für den angerufenen Teilnehmer. E prioridad para llamada de abonado. I utente a chiamata prioritaria. N prioriteit voor opgeroepen aansluiting. P priorytet dla abonenta wywołującego. S abonnent med prioritetsval. (721)

private

1. **closed private network** : → *network 14*
2. **private automatic branch exchange** : → *exchange 16*
3. **private automatic exchange** : → *exchange 17*
4. **private branch exchange** : → *exchange 18*
5. **private circuit** : → *circuit 144*
6. **private manual branch exchange** : → *exchange 19*
7. **private manual exchange** : → *exchange 20*
8. **private network** : → *network 72*
9. **private non-branch exchange** (*Syn.* private (telephone) exchange) : → *exchange 22*
10. **private owned circuit** (*Syn.* private circuit) : → *circuit 144*
11. **private telecommunication network** : → *network 73*
12. **private (telephone) exchange** : → *exchange 22*
13. **private (telephone) installation** : → *installation 12*
14. **private telephone network** : → *network 74*
15. **private wire (telephone) circuit** : → *circuit 146*

probability

1. **billing error probability** : the probability of an error when billing a user of a service. ★ probabilité d'erreur de facturation → *probabilité 6.* R вероятность ошибочного оформления. D Wahrscheinlichkeit für fehlerhafte Gebührenabrechnung. E probabilidad de error de facturación. I probabilità di errata fatturazione. N kans op optreden van een fout in de rekening. P prawdopodobieństwo błędnego rachunku. S sannolikhet för debiteringsfel. (191)
2. **bit error probability** (in telecontrol) : the probability that a received bit will be inverted with respect to the corresponding bit sent. ★ probabilité d'erreurs sur les éléments binaires → *probabilité 11.* R вероятность искажений бита (в телемеханике). D Bitfehlerwahrscheinlichkeit (beim Fernwirken). E probabilidad de error en los bits (en telecontrol). I probabilità d'errore sui bit (nel telecontrollo). N bitfoutkans. P prawdopodobieństwo błędnego elementu (sygnału). S bitfelssannolikhet. (371)
3. **block error probability** (in telecontrol) : the probability that a block be incorrectly received. ★ probabilité d'erreurs sur les blocs → *probabilité 10.* R вероятность искажения блока (в телемеханике). D Blockfehlerwahrscheinlichkeit (beim Fernwirken). E probabilidad de error en los bloques (en telecontrol). I probabilità d'errore sui blocchi (nel telecontrollo). N blokfoutkans. P prawdopodobieństwo błędnego bloku (w sterowaniu zdalnym). S blockfelssannolikhet. (371)
4. **call abandonment probability** : the probability that a user abandons the call attempt to a telecommunication network. ★ probabilité d'abandon → *probabilité 3.* R вероятность отказа от вызова. D Verzichtswahrscheinlichkeit (auf eine Belegung). E probabilidad de abandono (de una tentativa de llamada). I probabilità di abbandono di una chiamata. N kans op afbreken van een oproep. P prawdopodobieństwo rezygnacji z połączenia. S sannolikhet att anropsförsök avbryts. (191)
5. **dialling mistake probability** : the probability that the user of a telecommunication network will make dialling mistakes during his call attempts. ★ probabilité d'erreur de numérotation → *probabilité 7.* R вероятность ошибочного набора. D Falschwahlwahrscheinlichkeit. E probabilidad de error de marcación. I probabilità di sbaglio nella selezione. N kans op kiesfouten. P prawdopodobieństwo błędu przy wybieraniu numeru. S sannolikhet för nummertagningsfel. (191)
6. **probability density** : → *density 24*
7. **probability distribution** (*Syn.* cumulative distribution) : a function of a random variable expressing the probability that its value is less than a given value. ★ fonction de répartition → *fonction 23.* R функция распределения; кумулятивное распределение. D Verteilungsfunktion. E función de distribución. I distribuzione di probabilità; distribuzione cumulativa. N waarschijnlijkheidsverdeling. P dystrybuanta zmiennej losowej. S sannolikhetsfördelning. (101)
8. **probability of information loss** (in telecontrol) : the probability that a message be lost. ★ probabilité de perte d'information → *probabilité 4.* R вероятность потери сообщения (в телемеханике). D Wahrscheinlichkeit des Informationsverlustes (beim Fernwirken). E probabilidad de pérdida de información (en telecontrol). I probabilità di perdita d'informazione (nel telecontrollo). N informatieverlieskans. P prawdopodobieństwo strat informacji. S meddelandeförlustsannolikhet. (371)
9. **probability of ionization (by collision)** : → *ionization 15*
10. **probability of residual information loss** (in telecontrol) : the probability that the loss of a message be undetected. ★ probabilité de perte résiduelle d'information → *probabilité 5.* R вероятность необнаруженных потерь сообщений (в телемеханике). D Wahrscheinlichkeit des Restinformationsverlustes (beim Fernwirken). E probabilidad de pérdida residual de información (en telecontrol). I probabilità di perdita d'informazione residua (nel telecontrollo). N ..... P prawdopodobieństwo strat wynikowych informacji. S kvarstående meddelandeförlustsannolikhet. (371)
11. **residual error probability** (in telecontrol) : the probability that a received message will contain undetected errors. ★ probabilité d'erreurs résiduelles → *probabilité 9.* R вероятность появления необнаруженных ошибок (в телемеханике). D Restfehlerwahrscheinlichkeit (beim Fernwirken). E probabilidad de error residual (en telecontrol). I probabilità d'errore residua (nel telecontrollo). N restfoutkans. P prawdopodobieństwo błędu wynikowego. S kvarstående felsannolikhet. (371)
12. **service access probability** (*Syn.* service accessibility) : → *accessibility 1*
13. **service user abandonment probability** : the probability that a user abandons the attempt to use a service. *Note.* — Abandonments may be caused by excessive user mistake rates, by excessive service access delays, etc. ★ probabilité d'abandon → *probabilité 2.* R вероятность отказа абонента от услуги. D Verzichtswahrscheinlichkeit. E probabilidad de abandono. I probabilità di abbandono dell'utilizzatore di un servizio. N kans op opgegeven door gebruiker. P prawdopodobieństwo rezygnacji z serwisu. S sannolikhet att försök att utnyttja tjänst avbryts. (191)
14. **service user mistake probability** : probability of a mistake made by a user in his attempt to utilize a service. ★ probabilité d'erreur d'un usager → *probabilité 8.* R вероятность ошибки абонента. D Fehlbedienungswahrscheinlichkeit. E probabilidad de error de un usuario. I probabilità di sbaglio dell'utilizzatore di un servizio. N kans op gebruikersfouten. P prawdopodobieństwo błędu użytkownika serwisu. S sannolikhet för användarfel. (191)

probe

1. **(coupling) probe** : a probe which is inserted into a transmission line, a cavity resonator or a waveguide for the purpose of transferring energy to or from an external circuit. ★ sonde (de couplage) → *sonde 6.* R штырь (связи). D (Koppel-)Sonde. E sonda (de acoplamiento). I sonda (di accoppiamento). N sonde. P sonda (sprzęgająca). S kopplingspinne. (726)
2. **current probe** : a device for measuring the current in a conductor without interrupting the conductor and without introducing significant impedance into the associated circuits. ★ sonde de courant → *sonde 7.* R пробник тока. D Stromzange. E sonda de corriente. I sonda di corrente. N stroomsonde. P sonda prądowa. S strömsond. (161)
3. **deep space probe** : space probe intended to go into deep space. ★ sonde spatiale lointaine → *sonde 12.* R космический зонд для дальнего космоса. D Sonde für den äusseren Weltraum. E sonda del espacio lejano. I sonda spaziale lontana. N verre-ruimtesonde. P sonda głębokiego kosmosu. S fjärrymdsond. (725)
4. **Hall probe** (*Syn.* Hall effect magnetometer) : a Hall effect specifically designed for the measurement of magnetic flux density. ★ sonde de Hall → *sonde 8.* R зонд Холла магнитометр; использованием эффекта Холла. D Hallsonde; Halleffekt-Magnetometer. E sonda de Hall; magnetómetro de efecto Hall. I sonda di hall; magnetometro a effetto Hall. N Hallsonde. P sonda Halla; magnetometr hallotronowy. S hallsond. (521)
5. **probe** : an input device of an instrument, in general made as a separate unit and connected to it by means of a flexible cable, which transmits in a suitable form the quantity to be measured. ★ sonde → *sonde 4.* R пробник. D Tastkopf. E sonda. I sonda. N ..... P sonda. S sond. (303)
6. **probe** (of a radiation measuring assembly) : that part of a radiation measuring assembly consisting of an envelope of convenient geometrical form containing a radiation detector and possibly a preamplifier and certain functional units. Its form and construction are usually such as to permit its operation in places of difficult access, or remote from the associated apparatus, or for scanning of a surface or volume. ★ sonde → *sonde 5.* R зонд [прибора (установки) для измерения ионизирующих излучений]. D Sonde (eines Strahlungsmessgerätes). E sonda (de un conjunto de medida de radiación). I sonda (di un misuratore di radiazione). N sonde. P sonda (urządzenia do pomiaru promieniowania). S sond. (391)
7. **probe current** : → *current 143*
8. **probe microphone** : → *microphone 31*
9. **probe voltage** : → *voltage 148*
10. **space probe** : a spacecraft designed for making observations or measurements in space. ★ sonde spatiale → *sonde 11.* R космический зонд. D Weltraumsonde. E sonda espacial. I sonda spaziale. N ruimtesonde. P sonda kosmiczna. S rymdsond. (725)
11. **test probe proof** : → *proof 3*
12. **tuning probe** (*Syn.* tuning screw) : → *screw 5*

procedure

1. **call control procedure** : the entire set of interactive signals necessary to establish, maintain and release a data call. ★ procédure de commande d'appel → *procédure 2.* R процедура управления соединением. D Verbindungssteuerungsverfahren. E procedimiento de control de llamada. I procedura di comando di chiamata. N oproepprocedure. P procedura wywołania. S samtalsstyrning. (721)
2. **procedure call** (*Syn.* call) : → *call 7*
3. **recovery procedure** : an assembly of rules designed to resolve contentions between stations or to correct certain errors produced during a transmission. ★ procédure de redressement → *procédure 4.* R процедура восстановления. D Lösung des Zugangskonflikts. E procedimiento de recuperación. I procedura di recupero. N herstelprocedure. P procedura zabezpieczająca przed kolizją. S återhämtning. (721)

proceed-to-select

1. **proceed-to-select signal** : → *signal 144*

proceed-to-send

1. **proceed-to-send signal** : → *signal 145*

process

1. **additive process** : process for obtaining conductive patterns by the selective deposition of conductive material on unclad base material. ★ procédé additif → *procédé 1.* R аддитивный процесс. D Additiv-Verfahren. E proceso aditivo. I procedimento additivo. N additief proces. P proces addytywny; metoda (technologia) addytywna. S additiv process. (541)
2. **Gaussian process** : a random process with a Gaussian probability distribution. ★ processus gaussien → *processus 3.* R гауссов процесс. D Gauß-Prozeß. E proceso Gaussiano. I processo gaussiano. N Gaussproces. P proces Gaussa. S Gauss-process. (101)
3. **learning process** (for reliability) : growth in experience by personnel which improves the reliability performance of an item. ★ apprentissage → *apprentissage 1.* R процесс обучения (свойству безотказности). D Lernprozess (für Zuverlässigkeit). E aprendizaje. I processo di apprendimento. N leerproces (voor betrouwbaarheid). P nabywanie doświadczenia (w niezawodności). S inlärningsprocess. (191)
4. **process** : set of operations which perform a physical or chemical transformation or a series of such transformations. *Note.* — Transportation of matter or energy, transmission of information can be considered as processes. ★ processus → *processus 2.* R процесс (технический). D Prozeß. E proceso. I processo. N proces. P proces. S process. (351)
5. **process computer** : → *computer 5*
6. **semi-additive process** : process for obtaining conductive patterns by a combination of electroless metal deposition with etching and/or electroplating. ★ procédé semi-additif → *procédé 10.* R полуаддитивный процесс. D Semiadditiv-Verfahren. E proceso semiaditivo. I procedimento semiadditivo. N semi-additief proces. P proces semiaddytywny; metoda (technologia) semiaddytywna. S semiadditiv process. (541)
7. **subtractive process** : process for obtaining conductive patterns, by selective removal of the unwanted portions of the conductive foil. ★ procédé soustractif → *procédé 11.* R субтрактивный процесс. D Subtragtiv-Verfahren. E proceso substractivo. I procedimento sottrattivo. N subtractief proces. P proces subtraktywny; metoda (technologia) subtraktywna. S subtraktiv process. (541)

processed

1. **processed disk record** : → *record 7*

processing

1. **call processing** : the execution of all the functions required to set up, hold, supervise and release connections. ★ traitement d'appel → *traitement 9.* R обработка вызова. D Anrufverarbeitung. E proceso de llamada. I trattamento della chiamata. N gespreksafhandeling. P tworzenie połączenia. S kopplingshantering. (714)
2. **modulation processing** (*Syn.* signal processing) : various operations carried out on a programme signal either to facilitate transmission, to provide sound or vision more appropriate to the receiving conditions, to introduce special effects, or sound effects, or to reduce interference into adjacent channels. ★ traitement des signaux (de programme) → *traitement 10.* R обработка сигнала. (723)
3. **processing atmosphere** : → *atmosphere 12*
4. **signal processing** (*Syn.* modulation processing) : → *processing 2*
5. **signal processing antenna** : → *antenna 104*

processor

1. **central processor** : a unit for centralized control and generally containing one or more processors, one or more stores and possibly changeover equipment. ★ processeur central → *processeur 2.* R центральный процессор (в автоматической коммутации). D zentraler Prozessor. E procesador central. I elaboratore centrale. N centrale besturingseenheid. P procesor centralny. S centralenhet. (714)
2. **processor** : a functional unit that interprets and executes instructions. ★ processeur → *processeur 1.* R процессор. D Prozessor. E procesador. I elaboratore. N besturingseenheid. P procesor. S processor. (714)
3. **supervisory processor** : a processor responsible for control of a call after a path has been established ; this may include signalling and metering. ★ processeur de supervision → *processeur 3.* R контрольный процессор (в коммутации). D Ueberwachungsprozessor; Supervisor-Prozessor. E procesador de supervisión. I elaboratore di supervisione. N ..... P procesor sterujący. S övervakningsenhet. (714)

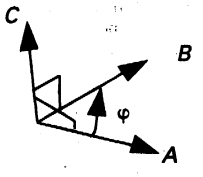
product

1. ***BH* product** : the product of the magnetic flux density and magnetic field strength of a permanent magnet at any point of any demagnetization curve. *Notes. 1* — The maximum value attained on the demagnetization curve is denoted $(BH)_{max}$. *2* — The *BH* product is equal to twice the total energy stored in the external field of the magnet per unit volume of the magnet. ★ produit *BH* → *produit 6.* R произведение *BH.* D *BH*-Produkt. E producto *BH.* I prodotto *BH.* N *BH*-produkt. P iloczyn *BH.* S *BH*-produkt. (221)
2. **decay product** : nuclide originating from the disintegration of a radioactive nuclide. ★ descendant → *descendant 1.* D Zerfallsprodukt. E descendiente. I prodotto di decadimento. N vervalprodukt. P produkt rozpadu. S sönderfallsprodukt. (026)
3. **field strength-distance product** (abbreviation) (*Syn.* cymotive force (in a given direction); c.m.f. (abbreviation)) : for any point along a given direction in the far-field region of a transmitting antenna, the product of the distance from the antenna and the electric field vector produced by the antenna at that point. *Notes. 1* — The field strength-distance product depends on the direction but not on the distance. Its magnitude expressed in volts is numerically equal to the magnitude of the field strength at a distance of 1 km expressed in millivolts per meter. *2* — The field strength-distance product depends on the electrical characteristics of the antenna and the power fed to it. *3* — The terme "cymomotive force" is used in the International Radio Consultative Committee (CCIR). ★ force cymomotrice → *force 3.* R волнодвижущая сила (в данном направлении); ВДС. D Feldstärke-Entfernungs-Produkt. E producto intensidad de campo-distancia (en una dirección dada); fuerza cimomotriz (en una dirección dada); FCM (abreviatura). I forza cyanomotrice (prodotto campo distanza). N cymomotorische spanning. P siła symomotoryczna (w danym kierunku). S cymomotorisk styrka. (712)
4. **fission products** : the nuclides produced either by fission or by the subsequent radioactive disintegration of the nuclides thus formed. ★ produits de fission → *produit 10.* D Spaltprodukte. E productos de fisión. I prodotti di fissione. N splijtingsprodukten. P produkty rozszczepienia. S klyvningsprodukt. (026)
5. **intermodulation product** (*Syn.* intermodulation component) : each spectral component produced by intermodulation. ★ produit d'intermodulation → *produit 4.* R составляющая интермодуляции. D Intermodulationsprodukt; Intermodulationskomponente. E producto de intermodulación; componente de intermodulación. I prodotto d'intermodulazione. N intermodulatieprodukt. P produkt intermodulacji. S intermodulationsprodukt. (702)

6. **intermodulation product order** : → *order 2*
7. **non-woven fabric (product)** : → *fabric 3*
8. **scalar product** (of one vector quantity *A* by another *B*) : a scalar quantity *P* defined: *a)* using cartesian co-ordinates, in an *n*-dimensional euclidian space, by the sum of the products of each component a_i of the first quantity and the corresponding component b_i of the second.

$$P = A \cdot B = \sum_{i=1}^{n} a_i\, b_i$$

b) in a three-dimensional space, by the product of the magnitudes of the two quantities and the cosine of the angle φ between them.



$$P = A \cdot B = |A|\ |B| \cos \varphi$$

★ produit scalaire → *produit 8.* R скалярное произведение (одной векторной величины *A* на druguy vektornuy veliçinu *B*). D skalares Produkt (aus einer vektoriellen Größe *A* und einer anderen *B*). E producto escalar (de una magnitud vectorial *A* por otra *B*). I prodotto scalare (di una grandezza vettoriale *A* per un'altra *B*). N scalair produkt. P iloczyn skalarny (wektora *B* przez wektor *B*). S skalär produkt. (101)

9. **specific field strength-distance product** (*Syn.* specific cymomotive force (in a given direction); s.c.m.f. (abbreviation)) : field strength-distance product produced in a given direction when the power supplied to the antenna is 1 kilowatt. ★ force cymomotrice spécifique → *force 4.* R удельная волнодвижущая сила (в данном направлении); УВДС. D spezifisches Feldstärke-Entfernungs-Produkt. E producto especificado de intensidad de campo-distancia (en una dirección); fuerza cimomotriz especificada (en una dirección dada); FCME (abreviatura). I forza cyanomotrice specifica. N specifieke cymomotorische spanning. P siła symomotoryczna jednostkowa (w danym kierunku). S specifik cymomotorisk styrka. (712)
10. **vector product** (of one vector quantity *A* by another *B*) : a vector quantity $C = A \times B$ that, in a three-dimensional space, is perpendicular to the plane formed by the two quantities, and whose magnitude is

$$|C| = |A|\ |B|\ |\sin \varphi|$$

Its direction is such that the three vectors in the order *A*, *B*, *C* form a positively oriented trihedron.

★ produit vectoriel → *produit 9.* R векторное произведение (одной векторной величины на другую). D vektorielles Produkt; Vektorprodukt (aus einer vektoriellen Größe *A* und einer anderen *B*). E producto vectorial (de una magnitud vectorial *A* por otra *B*). I prodotto vettoriale (di una grandezza vettoriale *A* per un'altra *B*). N vectorprodukt. P iloczyn wektorowy (wektora *A* przez wektor *B*). S vektoriell produkt. (101)

production

1. **(electron) pair production** : the simultaneous formation of a positive and a negative electron as a result of the interaction of a photon of sufficient energy (higher than 1.02 MeV) with the field of an atomic nucleus or other particle. ★ production de paires (d'électrons) → *production 6.* R образование пар (электронов). D Paarerzeugung. E producción de pares (de electrones). I produzione di coppie (di elettroni). N paarvorming (van elektronen). P tworzenie pary (elektronów). S (elektron)parproduktion. (391,881)
2. **electronic field production** (*Syn.* EFP (abbreviation)) : the production of a television programme using equipment sufficiently light to be carried by one or two operators, the signals generally being recorded. ★ production légère → *production 9.* R видеожурналистика. (723)
3. **mass attenuation coefficient (pair production)** : → *coefficient 34*
4. **production cycle** : → *cycle 14*
5. **production per cycle** : the mean value of amount of molten metal of a furnace per production cycle. ★ production par cycle → *production 10.* R производительность за цикл плавки. D Ausbringen je Zyklus. E producción por ciclo. I produzione di un ciclo. N produktie per cyclus. P produkcja na cykl. S produktion per cykel. (841)
6. **production rate** : → *rate 68*
7. **production reactor** : → *reactor 26*

profile

1. **diagonal leg profile** : the representation of the ground contour in the vertical plane containing diagonally opposite legs of a support. ★ profil dans le plan diagonal du support → *profil 4.* R профиль в диагональной плоскости опоры. D Diagonalprofil am Maststandort. E perfil diagonal entre patas. I profilo nel piano diagonale del sostegno. N diagonaalprofiel over het steunpunt. P profil przekątny kotwowy. S ..... (466)
2. **electron density profile** (*Syn.* ionization profile) : → *profile 5*
3. **equivalent step index profile** (*Syn.* ESI-profile (abbreviation)) : the refractive index profile of a hypothetical step index fibre with cladding of constant refractive index, having the same propagation characteristics as a given singlemode fibre. ★ profil d'indice à saut équivalent → *profil 10.* R эквивалентный ступенчатый профиль. D äquivalentes Stufenindexprofil; ESI-Profil (Abkürzung). E perfil de salto de índice equivalente; perfil ESI (abreviatura). I profilo d'indice a gradino equivalente; profilo-ESI (abbreviazione). N equivalent stapindexprofiel; ESI-profiel (afkorting). P równoważny profil skokowy. S ekvivalent stegindexprofil. (731)
4. **graded index profile** : an index profile in which the refractive index varies continuously in the core as a function of distance from the axis. ★ profil d'indice à gradient → *profil 7.* R градиентный профиль. D Gradientenindexprofil. E perfil de índice gradual. I profilo d'indice (di rifrazione) graduale (a variazione graduale). N gradiënt-indexprofiel. P profil gradientowy. S gradient(index)profil. (731)
5. **ionization profile** (*Syn.* electron density profile) : the electron density as a function of height. ★ profil d'ionisation → *profil 12.* D Ionisationsprofil; Elektronendichteprofil. P profil jonizacji; profil gęstości elektronów. (705)
6. **longitudinal profile** : a representation of the ground contour in the vertical plane through the axis of the line (see fig. 1). ★ profil en long → *profil 14.* R продольный профиль. D Längenprofil. E perfil longitudinal. I profilo longitudinale. N lengteprofiel. P profil podłużny. S längsprofil. (466)
7. **offset profile** (*Syn.* side slope at X metres) : → *slope 8*
8. **parabolic profile** : a power-law index profile for which the profile parameter g is equal to two. ★ profil (d'indice) parabolique → *profil 11.* R параболический профиль; квадратичный профиль. D parabolisches Profil; quadratisches Profil. E perfil parabólico. I profilo parabolico. N parabolisch profiel; kwadratisch profiel. P profil paraboliczny. S parabolisk indexprofil. (731)
9. **power-law index profile** : a graded index profile with the square of refractive index in the core decreasing according to a law involving a power of the distance from the axis.

$$n^2(r) = n_1^2 [1 - 2\Delta (r/a)^g]$$

$r \leqslant a$ where : $n(r)$ is the refractive index as a function of radius, n_1 is the refractive index on axis, a is the core radius, g is a parameter that defines the shape of the profile and Δ is a parameter which is the same as the refractive index contrast when the refractive index of the cladding is constant. ★ profil (d'indice) à loi en puissance → *profil 8.* R экспоненциальный профиль; альфа-профиль. D Potenzprofil; Alpha-Profil. E perfil de índice según ley potencial. I profilo d'indice (di rifrazione) a legge di potenza. N machtreeks-indexprofiel; alfaprofiel. P profil potęgowy. S potenslagsprofil. (731)
10. **profile dispersion** : → *dispersion 8*
11. **profile dispersion parameter** : → *parameter 6*
12. **profile parameter** : → *parameter 7*
13. **profile spotlight** : → *spotlight 3*

14. **refractive index profile** : the distribution of the refractive index along a diameter of a cross section of an optical fibre. ★ profil d'indice → *profil 6.* R профиль показателя преломления. D Brechzahlprofil. E perfil del índice de refracción. I profilo d'indice di rifrazione. N brekingsindex-profiel. P profil współczynnika załamania. S indexprofil. (731)
15. **section profile** (*Syn.* transverse profile) : → *profile 17*
16. **step index profile** : a refractive index profile characterized by a constant refractive index within the core and a sharp decrease in the refractive index at the core/cladding interface. ★ profil d'indice à saut → *profil 9.* R ступенчатый профиль. D Stufenindexprofil. E perfil de salto de índice. I profilo d'indice (di rifrazione) a gradino. N stapindex-profiel. P profil skokowy (współczynnika załamania). S steg(index)profil. (731)
17. **transverse profile** (*Syn.* section profile) : the profile in a vertical plane perpendicular to the axis of the line (see fig. 1). ★ profil en travers → *profil 15.* R поперечный профиль. D Querprofil. E perfil transversal. I profilo trasversale. N dwarsprofiel. P profil poprzeczny. S tvärprofil. (466)

program

1. **assembly program** (*Syn.* assembler) : → *assembler 1*
2. **compiling program** (*Syn.* compiler) : → *compiler 1*
3. **executive program** (*Syn.* supervisory program) : → *program 9*
4. **object program** (*Syn.* target program) : a program in an object language that has been translated from a source language. ★ programme-objet → *programme-objet 1.* R выходная/конечная/программа; программа на выходном языке. D Zielprogramm; Objektprogramm. E programa objeto; programa resultante. I programma oggetto. N objectprogramma; doelprogramma. P program wynikowy. S målprogram; objektprogram. (714)
5. **program** (in switching) : a set of instructions arranged in a predetermined sequence to direct the performance of a planned action or actions. ★ programme → *programme 10.* R программа (в коммутации). D Programm. E programa (en conmutación). I programma. N programma. P program (w komutacji). S program. (714)
6. **program (of a control system)** : a set of command and information signals necessary for the achievement of a specific sequence of operations. ★ programme (d'un système de commande) → *programme 18.* R программа (управляющей системы). D Programm (eines Steuersystems). E programa (de un sistema de control). I programma (di un sistema di controllo). N programma (van een regelsysteem). P program (systemu sterowania). S styrprogram. (161)
7. **stored program control** : → *control 177*
8. **stored program control** : → *control 178*
9. **supervisory program** (*Syn.* executive program; supervisor) : a program, usually part of an operating system, that controls the execution of other programs and regulates the flow of work in a data processing system. ★ (programme) superviseur → *superviseur 1.* R управляющая программа; супервизор. D Ueberwachungsprogramm; Verwaltungsprogramm; Supervisor-Programm. E (programa) supervisor. I programma supervisore; programma esecutivo. N supervisor. P program nadzorujący. S övervakningsprogram. (714)
10. **target program** (*Syn.* object program) : → *program 4*
11. **wired program control** : → *control 204*

programme

1. **(broadcast) programme** : sound or visual sequences specially designed and prepared for broadcasting. *Note.* — By common usage, programmes may be classified : By type : sound programmes, television, music programmes, talks, etc. ; By purpose : news programmes, educational programmes, etc. ; By origin : broadcasts from a given transmitter, broadcasts from a given organisation, live broadcasts, recorded broadcasts, etc. ★ programme → *programme 11.* R программа (в радиовещании). (723)
2. **monitoring of a recorded programme** : → *monitoring 11*
3. **peak programme meter** : → *meter 38*
4. **programme delivery control** : → *control 144*
5. **programme line** : → *line 127*
6. **programme meter** : → *meter 43*
7. **programme signal** : → *signal 146*
8. **programme switching centre** : → *centre 17*
9. **reliability and maintainability programme** : a documented set of time scheduled activities, resources and events serving to implement the organization structure, responsibilities, procedures, activities, capabilities, and resources that together ensure that an item will satisfy given reliability performance and maintainability performance requirements relevant to a given contract or project. ★ programme de fiabilité et de maintenabilité → *programme 14.* R программа (обеспечения) безотказности и ремонтопригодности. D Zuverlässigkeits-Programm. E programa de fiabilidad y de mantenibilidad. I programma di affidabilità e manutenibilità. N programma voor betrouwbaarheid en onderhoudbaarheid. P program niezawodności i obsługiwalności. S tillförlitlighetsprogram. (191)
10. **sequential programme** : a plan which prescribes the actions on a system in a predetermined order and in which some actions depend on the execution of preceding ones or on the fulfilment of certain conditions. ★ programme séquentiel → *programme 22.* R последовательная программа. D Ablaufprogramm. E programa secuencial. I programma sequenziale. N programmaregeling. P program sekwencyjny. S sekvensprogram. (351)
11. **sound programme** : a programme consisting solely of sound elements. ★ programme sonore → *programme 23.* R звуковая программа. (723)
12. **sound programme channel** : → *channel 47*
13. **television programme** : a programme consisting of pictures with the associated sound. ★ programme de télévision → *programme 16.* R телевизионная программа. (723)

programmed

1. **programmed control** : → *control 145*

programme-sensitive

1. **programme-sensitive fault** : → *fault 69*

programming

1. **programming system** : → *system 158*

progress

1. **tap-change in progress indicator** : → *indicator 26*

progression

1. **progression of equipment** : the direction of operation corresponding to the notching up of the master controller. ★ progression de l'équipement → *progression 1.* R прямой ход аппарата. D Auf-Steuerung der Schaltausrüstung. E progresión del equipo. I sequenza diretta (dell'equipaggiamento). N het opschakelen. P kierunek przełączeń nastawnika do przodu. S uppkoppling. (811)

progressive

1. **free progressive wave** (*Syn.* free wave) : → *wave 16*
2. **free progressive wave** : → *wave 15*
3. **progressive junction** : → *junction 17*
4. **progressive scanning** : → *scanning 9*

projected

1. **projected peak point** : → *point 39*

projection

1. **antero-posterior projection** : an investigation for which the useful beam traverses the body from front to back. ★ vue antéropostérieure → *vue 5.* R передне-задняя проекция. D Antero-posterior-Projektion. E proyección anteroposterior. I proiezione antero-posteriore. N voor-achter projectie. P projekcja przednio-tylna. S AP-projektion. (881)
2. **axial projection** : an investigation for which the useful beam traverses the part of the body to be radiographed in a direction parallel to the longitudinal axis of the body. ★ vue axiale → *vue 6.* R аксиальная проекция. D Axial-Projektion. E proyección axial. I proiezione assiale. N axiale projectie. P projekcja osiowa. S axialprojektion. (881)
3. **lateral projection** : an investigation for which the useful beam traverses the body from side to side. ★ vue latérale → *vue 7.* R боковая проекция. D Lateral-Projektion. E proyección lateral. I proiezione laterale. N laterale projectie. P projekcja boczna. S sidoprojektion. (881)

4. **lordotic projection** : an investigation of the chest for which the body is arched backwards from the waist and the useful beam enters from behind. ★ projection lordotique → *projection 3.* R лордотическая проекция. D Iordiotische Projektion. E proyección lordótica. I proiezione in lordosi. N lordotische projectie. P projekcja lordyczna. S lordotisk projektion. (881)
5. **oblique projection** : an investigation for which the useful beam traverses the body obliquely. ★ vue oblique → *vue 8.* R косая проекция. D Schräg-Projektion. E proyección oblicua. I proiezione obliqua. N scheve projectie. P projekcja ukośna. S snedprojektion. (881)
6. **postero-anterior projection** : an investigation for which the useful beam traverses the body from back to front. ★ vue postéroantérieure → *vue 9.* R задне-передняя проекция. D Postero-Anterior-Projektion. E proyección posteroanterior. I proiezione postero-anteriore. N achter/voor projectie. P projekcja tylno-przednia. S PA-projektion. (881)
7. **projection lamp** : → *lamp 50*
8. **projection television receiver** : → *receiver 7*
9. **projection tube** : → *tube 70*
10. **tangential projection** : an investigation for which the useful beam is directed tangentially to the surface. ★ vue tangentielle → *vue 10.* R тангенциальная проекция. D Tangential-Projektion. E proyección tangencial. I proiezione tangenziale. N tangentiële projectie. P projekcja styczna. S tangentialprojektion. (881)
11. **tip projection** : the difference between the radius of the circle described by the extremities of the pole tips and the radius of the head wheel. ★ dépassement des têtes → *dépassement 5.* R выступ головки. D Kopfüberstand. E penetración de cabeza. I proiezione delle testine. N tipprojectie. P wystawanie (głowicy). S polutskjutning. (806)

projector

1. **cathode ray tube (television) projector** (*Syn.* CRT projector) : television projector using one or three picture tubes of greater than normal brightness and an optical projection system. ★ projecteur (de télévision) à tube cathodique → *projecteur 11.* R электронно-лучевой (телевизионный) проектор; ЭЛТ - проектор. (723)
2. **CRT projector** (*Syn.* cathode ray tube (television) projector) : → *projector 1*
3. **effects projector** : projection apparatus with optics designed to give even field illumination of slides and, with a suitable objective lens, well defined projection of detail. *Note.* —Slides can be of stationary or moving-effects type. ★ appareil à effets → *appareil 11.* R диапроектор с насадками для эффектов. D Effekt-Scheinwerfer; Bühnenbildprojektor. E proyector de efectos. I fondografo. N projector voor lichteffecten. P projektor efektowy. S projektionsapparat. (845)
4. **GE (television) projector** (trade mark) : a large-screen television projector in which the intensity of a beam of light is spatially modulated by reflection and scattering from an oil film which is deformed by an electron beam which is modulated by the video signal, and where the oil film is divided into sectors for each of the primary colours, enabling a single device to project a colour picture. ★ projecteur (de télévision) GE → *projecteur 12.* R телевизионный проектор GE (торговая марка). (723)
5. **light-valve (television) projector** : television projector in which the picture signal modulates a beam of light produced from a conventional light source, and an optical projection system. ★ projecteur (de télévision) à modulation de lumière → *projecteur 10.* R светоклапанный (телевизионный) проектор. (723)
6. **projector** : luminaire using reflection and/or refraction to increase the luminous intensity within a limited solid angle. ★ projecteur → *projecteur 2.* R прожектор. D Scheinwerfer; Strahler(-Leuchte). E proyector. I proiettore. N bundellicht. P projektor. S strålkastare. (845)
7. **projector lamp** : → *lamp 51*
8. **television projector** : equipment used for generating an image from a video signal and projecting it onto a screen by means of special optical equipment, generally with a view to providing a large picture. ★ projecteur de télévision → *projecteur 9.* R телевизионный проектор. (723)
9. **underwater sound projector** : electroacoustic transducer that converts electric signals to sound signals in water. ★ projecteur sonore sous-marin → *projecteur 14.* R гидроакустический излучатель. D Unterwasser-Schallstrahler. E proyector sonoro submarino. I proiettore sonoro subacqueo. N onderwaterluidspreker. P promiennik dźwięku podwodny. S undervattensljudstrålare. (801)

promoter

1. **promoter** (*Syn.* accelerator) : → *accelerator 1*

prompt

1. **prompt critical** : → *critical 32*
2. **prompt gamma radiation** : → *radiation 53*
3. **prompt neutron fraction** : → *fraction 6*
4. **prompt neutrons** : → *neutron 28*

proof

1. **proof tracking index** : → *index 32*
2. **proof voltage** : → *voltage 149*
3. **test probe proof** : a design feature incorporated in a female contact and/or insert to prevent damage by the insertion of a test probe. ★ protection à la sonde d'essai → *protection 20.* R защита от повреждения испытательным калибром. D Prüfspitzensicherung. E protección de la sonda de ensayo. I protezione per la sonda di prova. N testpenbeveiliging. P ochrona przeciwsondowa. S testpinnesäker. (581)

propagation

1. **axial propagation coefficient** : → *coefficient 6*
2. **direction of propagation** : → *direction 8*
3. **direction of propagation (of energy)** : → *direction 9*
4. **direction of propagation of energy** : → *direction 10*
5. **elementary attenuation of propagation** : → *attenuation 17*
6. **elementary dephasing of sound propagation** : → *dephasing 1*
7. **elementary exponent of sound propagation** : → *exponent 1*
8. **free space propagation** : propagation of an electromagnetic wave in a homogeneous ideal dielectric medium which may be considered of infinite extent in all directions. *Note.* — For propagation in free space, the magnitude of each vector of the electromagnetic field in any given direction from the source is proportional to the reciprocal of the distance from the source beyond a distance determined by the size of the source and the wavelength. ★ propagation en espace libre → *propagation 26.* D Freiraumausbreitung. P propagacja w wolnej przestrzeni. (705)
9. **guided propagation** : propagation of electromagnetic waves in the form of guided waves. ★ propagation guidée → *propagation 28.* D geführte Ausbreitung (elektromagnetischer Wellen). P propagacja prowadzona. (705)
10. **ionospheric propagation** : radio propagation involving the ionosphere. ★ propagation ionosphérique → *propagation 29.* D Ionosphärische Ausbreitung. P propagacja jonosferyczna. (705)
11. **(ionospheric) propagation forecast** : → *forecast 3*
12. **laterally deviated (ionospheric) propagation** : ionospheric propagation along a propagation path deviated slightly from the vertical plane containing the transmission point and the reception point. *Note.* — Laterally deviated ionospheric propagation may be a result of tilt of the ionospheric layers. ★ propagation (ionosphérique) déviée (latéralement) → *propagation 30.* D lateral abweichende (ionosphärische) Ausbreitung. P propagacja (jonosferyczna) o bocznym odchyleniu. (705)
13. **line of sight propagation** : → *line 80*
14. **linear exponent of sound propagation** : → *exponent 2*
15. **longitudinal propagation** : propagation such that, in the ionosphere, the direction of propagation is at a small or zero angle to the direction of the Earth's magnetic field. ★ propagation longitudinale → *propagation 32.* D longitudinale Ausbreitung. P propagacja (jonosferyczna) wzdłużna. (705)
16. **mode of propagation** : → *mode 55*
17. **mode of propagation** : → *mode 56*
18. **multipath propagation** : propagation between a transmission point and a reception point over a number of separate propagation paths simultaneously. ★ propagation par trajets

multiples → *propagation 36.* D Mehrwegeausbreitung. P propagacja wielodrożna. (705)

19. **off-great-circle ionospheric propagation** : ionospheric propagation along a propagation path deviated significantly from the vertical plane containing the transmission point and the reception point. *Note.* — Off-great-circle ionospheric propagation may result from the existence of sporadic ionization or irregularities within the F region or ground scattering. ★ propagation (ionosphérique) hors du grand cercle → *propagation 31.* D vom Großkreis abweichende (ionosphärische) Ausbreitung. P odchylenie od wielkiego koła (w propagacji jonosferycznej). (705)
20. **precipitation scatter (propagation)** : → *scatter 2*
21. **propagation** : energy transfer between two points without displacement of matter. *Note.* — Examples of propagation are the propagation of electromagnetic energy in space, the propagation of heat along a rod. ★ propagation → *propagation 25.* D Ausbreitung. P propagacja. (705)
22. **propagation anomaly** : → *anomaly 1*
23. **(propagation by) ionospheric scatter** : → *scatter 3*
24. **propagation coefficient** : → *coefficient 47*
25. **propagation constant** (*Syn.* propagation coefficient) : → *coefficient 47*
26. **propagation loss** (*Syn.* transmission loss) : → *loss 109*
27. **propagation path** : → *path 22*
28. **propagation performance** : → *performance 8*
29. **radio propagation** : energy transfer in the form of radio waves. ★ propagation radioélectrique → *propagation 37.* D Funkwellenausbreitung. P propagacja radiowa. (705)
30. **sound propagation coefficient** (*Syn.* linear exponent of sound propagation) : → *exponent 2*
31. **standard propagation** : tropospheric propagation above a spherical Earth with uniform properties surrounded by a standard radio atmosphere. ★ propagation (troposphérique) normale → *propagation 43.* D Standard-Ausbreitung. P propagacja standardowa. (705)
32. **trans-horizon propagation** : tropospheric propagation between points close to the ground, the reception point being beyond the radio horizon of the transmission point. *Note.* — Trans-horizon propagation may be due to a variety of tropospheric mechanisms suchs as diffraction, scattering, reflection from tropospheric layers. However, ducting is not included because in a duct there is no radio horizon. ★ propagation transhorizon → *propagation 38.* D Überhorizont-Ausbreitung; Transhorizontausbreitung. P propagacja pozahoryzontowa. (705)
33. **trans-ionospheric propagation** : radio propagation between two points situated below and above the height of maximum electron density of the ionosphere. *Note.* — For frequencies higher than a few gigahertz, the ionosphere has practically no effect on trans-ionospheric propagation. ★ propagation transionosphérique → *propagation 39.* D transionosphärische Ausbreitung. P propagacja transjonosferyczna. (705)
34. **transverse propagation** : propagation such that, in the ionosphere, the direction of propagation is perpendicular or almost perpendicular to the direction of the Earth's magnetic field. ★ propagation transversale → *propagation 40.* D transversale Ausbreitung. P propagacja (jonosferyczna) poprzeczna. (705)
35. **tropospheric propagation** : propagation within the troposphere, and by extension, propagation beneath the ionosphere, when not influenced by the ionosphere. ★ propagation troposphérique → *propagation 41.* D troposphärische Ausbreitung. P propagacja troposferyczna. (705)
36. **tropospheric scatter (propagation)** : → *scatter 5*
37. **velocity (vector) of propagation** : → *velocity 24*

propeller

1. **propeller turbine** : → *turbine 8*

propelling

1. **propelling movement** : → *movement 3*

proportion

1. **cumulative downward flux proportion** (of a source, for a solid angle) : ratio of the cumulative flux for the solid angle under consideration to the downward flux of the source. ★ proportion de flux cumulé inférieur → *proportion 1.* R соотношение потока , сконцентрированного в нижней полусфере (источника, для данного телесного угла). D unterer kumulierter Zonenlichtstromanteil (einer Lichtquelle, für einen Raumwinkel). E factor de flujo acumulado inferior. I rapporto di flusso cumulato inferiore. N aandeel van de gesommeerde neerwaartse lichtstroom (voor een ruimtehoek, van een bron). P ..... S relativ andel av nedåtriktat ljusflöde. (845)

proportional

1. **proportional amplifier** (*Syn.* linear pulse amplifier) : → *amplifier 15*
2. **proportional band** : → *band 30*
3. **proportional counter tube** : → *counter tube 21*
4. **proportional region** : → *region 15*
5. **proportional region** : → *region 16*

proportional-action

1. **proportional action** (*Syn.* P-action) : type of continuous action in which the variations of the output variable are proportional to the concomitant variations of the input variable. ★ action proportionnelle → *action 24.* R пропорциональное воздействие; п-воздействие. D proportionales Verhalten; P-Verhalten. E acción proporcional; acción P. I azione proporzionale P. N proportionele werking; P-actie. P działanie proporcjonalne; działanie P. S proportionalverkan; P-verkan. (351)
2. **proportional-action coefficient** : → *coefficient 48*

proportionality

1. **region of limited proportionality** : → *region 20*
2. **region of limited proportionality** : → *region 21*

prospecting

1. **beryllium prospecting meter (γ, n)** : → *meter 10*
2. **prospecting audio-radiation indicator** : → *indicator 18*
3. **prospecting radiation meter** : → *meter 44*

prospective

1. **maximum prospective peak current** : → *current 124*
2. **prospective breaking current** : → *current 144*
3. **prospective current** : → *current 145*
4. **prospective making current** : → *current 146*
5. **prospective peak current** : → *current 147*
6. **prospective symmetrical current** : → *current 148*
7. **prospective touch voltage** : → *voltage 150*
8. **prospective transient recovery voltage** : → *recovery voltage 3*

protected

1. **protected** : applied to a machine in which the internal moving parts and live parts are protected mechanically from accidental or inadvertent contact, while ventilation is not materially impeded. ★ machine protégée → *machine 63.* R защищенная машина. D geschützte Maschine. E máquina protegida. I macchina protetta. N gedeeltelijk beschermd. P maszyna półotwarta. S beröringssäker. (411)
2. **protected creepage distance** : → *distance 18*
3. **protected heating element** : → *heating element 5*
4. **protected luminaire** : → *luminaire 21*

protection

1. **... protection equipment** : → *equipment 1*
2. **absolutely selective protection system** : → *system 1*
3. **accelerated distance protection system** : → *system 3*
4. **back-up protection** : protection equipment or system which is intended to operate when a system fault is not cleared in due time because of failure or inability of the main protection to operate or in case of failure to operate of a circuit-breaker other than the associated circuit-breaker. ★ protection de secours → *protection 28.* R резервная защита. D Reserveschutz. E protección de socorro. I protezione di soccorso. N reservebeveiliging. P zabezpieczenie rezerwowe (urządzenia lub układu). S reservskydd. (448)
5. **blocking overreach distance protection system** : → *system 18*

6. **blocking protection system** : → *system 19*
7. **capacitor bank protection** : a general term for protective equipment for a capacitor bank. ★ protection de batterie de condensateurs → *protection 25.* R защита конденсаторной батареи. D Kondensatorbatterieschutz. E protección de batería de condensadores. I protezione di una batteria di condensatori. N beschermmiddelen van een condensatorbank. P ochrona baterii kondensatorów. S skydd för kondensatorbatteri. (436)
8. **cathodic protection** : an immunity produced by an appropriate cathodic polarization. ★ protection cathodique → *protection 21.* R катодная защита. D kathodischer Schutz. E protección catódica. I protezione catodica. N kathodische bescherming. P ochrona katodowa. S katodiskt skydd. (111)
9. **cathodic protection** : the protection of a buried metallic structure against stray currents by forcing it to behave as a cathode. ★ protection cathodique → *protection 22.* R катодная защита. D kathodischer Schutz. E protección catódica. I protezione catodica. N kathodische bescherming. P ochrona katodowa. S katodiskt skydd. (604)
10. **(circuit) local back-up protection** : back-up protection equipment or system which is energized either from those measuring transformers which energize the main protection equipment or from measuring transformers associated with the same primary circuit as the main protection equipment. ★ protection de secours locale (de cellule) → *protection 30.* R ближняя резервная защита (цепи). D örtlicher Reserveschutz (im Feld). E protección de socorro local (de celda). I protezione di soccorso locale (di stacco). N (circuit) reservebeveiliging ter plaatse. P zabezpieczenia rezerwowe lokalne. S (sidoordnat) lokalt reservskydd. (448)
11. **circuit-breaker failure protection system** : → *system 28*
12. **cooling and protection shield for a coil** : → *shield 5*
13. **degree of protection provided by enclosures** : → *degree 13*
14. **directional comparison protection system** : → *system 47*
15. **distance protection system** : → *system 48*
16. **error protection code** : → *code 31*
17. **failure to operate (of protection equipment)** : → *failure 25*
18. **fire protection wall** : → *wall 6*
19. **frame leakage protection system** : → *system 73*
20. **inductor coil earth leakage protection** : a device for measuring the electrical insulation level between the earthed charge and the induction coil. In the case of abnormally low levels of insulation the power is disconnected automatically. ★ système de protection contre les défauts d'isolement à la terre → *système 58.* R защита индукционной катушки от утечек в землю. D Erdschlussüberwachung der Induktionsspule. E dispositivo de protección contra fallos de aislamiento a tierra. I sistema di protezione contro difetti di isolamento verso terra. N aardlekbeveiliging van een inductor. P zespół ochronny wzbudnika przed doziemieniem. S jordfelsskydd för induktor. (841)
21. **lightning protection cable** : → *cable 39*
22. **(longitudinal) differential protection system** : → *system 108*
23. **main protection** (*Syn.* primary protection (USA)) : protection equipment or system expected to have priority in initiating either a fault clearance or an action to terminate an abnormal condition in a power system. *Note.* — For a given item of plant, two main protection systems may be provided. ★ protection principale → *protection 34.* R основная защита. D Hauptschutz. E protección principal. I protezione principale. N hoofdbeveiliging. P zabezpieczenie podstawowe (urządzenia lub układu). S huvudskydd. (448)
24. **microwave pilot protection system** : → *system 116*
25. **non-unit protection system** (*Syn.* relatively selective protection system) : → *system 172*
26. **optical link pilot protection system** : → *system 132*
27. **overload protection system** : → *system 136*
28. **overreaching (for a distance protection system)** : → *overreaching 1*
29. **permissive overreach distance protection system** : → *system 141*
30. **permissive protection system** : → *system 142*
31. **permissive underreach distance protection system** : → *system 143*
32. **phase comparison protection system** : → *system 144*
33. **pilot protection system** (*Syn.* protection system associated with signalling system) : → *system 162*
34. **pilot wire protection system** : → *system 146*
35. **power line carrier pilot protection system** : → *system 152*
36. **primary protection** (*Syn.* main protection) : → *protection 23*
37. **protection** : the provisions for detecting abnormal conditions in a power system and then initiating fault clearance or actuating signals or indications. *Example :* The arrangement to be provided for protection of a 400 kV network. ★ protection → *protection 19.* R защита. D Selektivschutz. E protección. I protezione. N beveiliging. P zabezpieczenie. S reläskydd. (448)
38. **protection (of a power system component)** : a term designating the protection equipment or systems intended to protect an item of a plant in a power system. *Examples :* Transformer protection, line protection, generator protection. ★ protection (d'un élément de réseau) → *protection 33.* R защита (элемента энергосистемы). D Selektivschutz (für ein Netzbetriebsmittel). E protección (de un elemento de red). I protezione (di un elemento di rete). N beveiliging (van een onderdeel van een elektrisch energiesysteem). P zabezpieczenie (elementu systemu elektroenergetycznego). S reläskydd (för del av elkraftsystem). (448)
39. **protection ratio** : → *ratio 70*
40. **protection ratio against lightning impulses** : → *ratio 71*
41. **protection ratio against switching impulses** : → *ratio 72*
42. **protection relay** : → *relay 32*
43. **protection survey** : → *survey 1*
44. **protection system** : → *system 160*
45. **protection system** : → *system 161*
46. **protection system associated with signalling system** : → *system 162*
47. **radiation protection** : that branch of science and technology which deals with the protection of persons and their environment against deleterious effects arising from ionizing and non-ionizing radiation. ★ radioprotection → *radioprotection 3.* R радиационная защита. D Strahlenschutz. E radioprotección. I radioprotezione. N beveiliging tegen straling. P ochrona przed promieniowaniem. S strålskydd. (881)
48. **radiation protection technician** : → *technician 2*
49. **radiological protection** : radiation protection in radiology. ★ protection radiologique → *protection 35.* R радиологическая защита. D Strahlenschutz in der Radiologie. E protección radiológica. I radioprotezione in radiologia. N bescherming tegen ioniserende straling. P ochrona radiologiczna. S (radiologiskt) strålskydd. (881)
50. **relatively selective protection system** : → *system 172*
51. **remote back-up protection** : back-up protection equipment or system located in a substation remote from that substation in which the corresponding main protection is located. ★ protection de secours éloignée → *protection 29.* R дальняя резервная защита. D Fern-Reserveschutz. E protección de socorro remota. I protezione di soccorso lontana. N reservebeveiliging op afstand. P zabezpieczenie rezerwowe zdalne. S fjärreservskydd. (448)
52. **selectivity (for a protection system)** : → *selectivity 5*
53. **(substation) local back-up protection** : back-up protection equipment or system which is energized from measuring transformers located within the same substation as the corresponding main protection equipment. ★ protection de secours locale (de poste) → *protection 31.* R ближняя резервная защита (подстанции). D örtlicher Reserveschutz (in der Station). E protección de socorro local (de subestación). I protezione di soccorso locale (di stazione). N (onderstations) reservebeveiliging ter plaatse. P zabezpieczenia rezerwowe lokalne umieszczone w tej samej stacji co zabezpieczenie podstawowe. S (överordnat) lokalt reservskydd. (448)
54. **transverse differential protection system** : → *system 241*
55. **type of protection** : → *type 32*
56. **unbalance protection for a capacitor bank** : a protection system employing device(s) sensitive to the current or voltage difference between parts of a bank. ★ protection de déséquilibre de batterie de condensateurs → *protection 26.* R дисбалансная защита конденсаторной батареи. D Unsymmetrieschutz einer Kondensatorbatterie. E protección de desequilibrio de batería de condensadores.

I protezione a squilibrio di una batteria di condensatori. N onbalansbeveiliging van een condensatorbank. P ochrona przed nierównowagą baterii kondensatorów. S obalansskydd. (436)

57. **underreaching (for a distance protection system)** : → *underreaching 1*
58. **unit protection system** (*Syn.* absolutely selective protection system) : → *system 1*
59. **unwanted operation (of a protection equipment)** : → *operation 74*
60. **wheel slide protection device** : → *device 61*

protective

1. **diagnostic-type protective tube housing** : → *housing 4*
2. **insulator protective fitting** : → *fitting 1*
3. **lightning impulse protective level** : → *level 52*
4. **primary protective barrier** : → *barrier 11*
5. **protective apron** : → *apron 1*
6. **protective barrier** : → *barrier 12*
7. **protective capacitor** : → *capacitor 57*
8. **protective circuit** : → *circuit 147*
9. **protective conductor** : → *conductor 56*
10. **protective cover** : → *cover 4*
11. **protective cover** : → *cover 5*
12. **protective current transformer** : → *transformer 48*
13. **protective device** : → *device 46*
14. **protective gas** : → *gas 29*
15. **protective glass** : → *glass 8*
16. **protective gloves** : → *glove 3*
17. **protective material** : → *material 34*
18. **protective shroud** : → *shroud 2*
19. **(protective) spark gap** : → *spark-gap 2*
20. **protective voltage transformer** : → *transformer 49*
21. **secondary protective barrier** : → *barrier 14*
22. **structural protective barrier** : → *barrier 15*
23. **switching impulse protective level** : → *level 96*
24. **therapeutic-type protective tube housing** : → *housing 9*

protector

1. **ear protector** (*Syn.* hearing protector) : → *protector 2*
2. **hearing protector** (*Syn.* ear protector; ear defender) : device placed over the ear (earmuff) or within the external ear canal earplug to protect the hearing organ from intense noise. ★ protecteur d'oreille → *protecteur 11.* R ушной протектор. D Gehörschützer. E protector de oído. I protettore auricolare; mezzo di protezione uditiva individuale. N gehoorbeschermer. P ochtonnik słuchu. S hörselskydd. (801)
3. **overvoltage protector** : a capacitor, non-linear resistor or other device intended to absorb internal overvoltages. ★ parasurtension → *parasurtension 1.* R устройство защиты от перенапряжений. D Überspannungsschutz. E parasobretensión. I scaricatore. N overspanningsbeveiliging. P ochronnik przepięciowy. S överspänningsskydd. (811)
4. **overvoltage protector of a capacitor** : a fast-acting device intended to limit the voltage across the capacitor terminals to a permissible value. ★ dispositif de protection d'un condensateur contre les surtensions → *dispositif de protection 4.* R защитное устройство от перенапряжения. D Überspannungsschutzvorrichtung eines Kondensators. E dispositivo de protección de un condensador contra las sobretensiones. I dispositivo di protezione contro le sovratensioni di un condensatore. N overspanningsafleider van een condensator. P ochronnik przepięciowy kondensatora. S överspänningsskydd. (436)

protocol

1. **link protocol** : an assembly of rules which controls the operation of a data link by means of a data code, a transmission mode, control procedure and a recovery procedure. ★ procédure de liaison → *procédure 3.* R протокол звена данных. D Übermittlungsprotokoll. E protocolo de conexión. I protocollo di linea. N schakelprotocol. P procedura wymiany. S länkprotokoll. (721)

proton

1. **proton** : a stable elementary particle with one positive elementary charge and a rest mass of 1.67265×10^{-27} kg. ★ proton → *proton 3.* R протон. D Proton. E protón. I protone. N proton. P proton. S proton. (026,111,391,881)
2. **recoil proton counter tube** : → *counter tube 23*
3. **recoil proton ionization chamber** : → *ionization chamber 19*
4. **recoil proton spectrometer** : → *spectrometer 7*

protraction

1. **dose protraction** : a method of administration of radiation by delivering it continuously over a relatively long period at a low absorbed dose rate. ★ étalement de la dose → *étalement 1.* R растягивание дозы. D (Dosis-)Protahierung. E protraccion de la dosis. I irradiazione protratta. N protractie van de dosis. P przedłużanie dawki. S dosprotrahering. (881)

provided

1. **fully provided circuit group** : → *group 12*

provisioning

1. **mean service provisioning time** : → *time 100*

proximity

1. **proximity** (in an installation in an interior) : distance between a wall and the light centres of the luminaires of the nearest row. ★ proximité → *proximité 4.* R приближенность (осветительной установки в помещении). D Wandabstand (in einer Innenraum-Beleuchtungsanlage). E proximidad. I prossimità. N ..... P odstęp skrajnych opraw od ściany. S väggavstånd. (845)
2. **proximity effect** : → *effect 65*
3. **proximity indicator** : → *indicator 19*
4. **proximity switch** : → *switch 37*

pseudo

1. **pseudo frequency** (*Syn.* damped natural frequency) : → *frequency 31*
2. **pseudo n-ary signal** : → *signal 147*
3. **pseudo stereo** (*Syn.* spatial effect) : → *effect 74*

pseudo-Brewster

1. **pseudo-Brewster angle incidence** : → *incidence 8*

pseudo-ternary

1. **pseudo-ternary signal** : → *signal 148*

PSK

1. **PSK** (*Syn.* phase shift keying) : → *keying 8*

psophometer

1. **psophometer** : apparatus for measuring the psophometric voltage of circuit noises. *Note.* — The psophometer incorporates a weighting network, the characteristics of which differ according to the circuit under consideration, commercial telephone or sound program transmission circuits. The psophometric weights correspond to the aural effect of disturbing voltages of various frequencies. The psophometer recommended by the CCITT is defined in the CCITT Recommendation O.41 from the Fascicle IV-4 of the Blue Book, 1989, for telephony, in the CCITT Recommendation J.16 from the fascicule III.6 of the Blue Book, 1989, for sound program channels. ★ psophomètre → *psophomètre 1.* R псофометр. D Geräuschspannungsmesser. E psofómetro. I psofometro. N psofometer. P psofometr. S psofometer. (722)

psophometric

1. **psophometric electromotive force** : → *force 25*
2. **psophometric power** : → *power 151*
3. **psophometric voltage** : → *voltage 152*

psophometrically

1. **psophometrically weighted noise** : → *noise 60*

PSTN

1. **PSTN** (*Syn.* (public) switched (telephone) network) : → *network 76*

PTI

1. **PTI** (*Syn.* proof tracking index) : → *index 32*

PTM

1. **PTM** (*Syn.* pulse time modulation) : → *modulation 55*

P-type

1. **P-type conductivity** : → *conductivity 7*
2. **P-type semiconductor** : → *semiconductor 9*

public

1. **access to the public telegram network** : → *network 1*
2. **members of the public** : → *member 5*
3. **public call office** : → *office 1*
4. **public data network** : → *network 75*
5. **public lighting tariff** : → *tariff 31*
6. **public pay phone** (*Syn.* public call office) : → *office 1*
7. **(public) switched (telephone) network** : → *network 76*
8. **public telecommunication network** : → *network 77*
9. **public telegram network** : → *network 78*
10. **public telegram service** (*Syn.* telegram service) : → *service 49*
11. **public telephone network** : → *network 79*
12. **public telephone station** (*Syn.* public call office) : → *office 1*
13. **public telex booth** : → *booth 1*

published

1. **published tariff** (*Syn.* normal tariff) : → *tariff 26*

pull

1. **draw-bar pull** : the force measured at the draw-bar of a motor vehicle ; unless otherwise indicated the draw-bar pull is referred to level tangent track. ★ effort au crochet → *effort 2.* R сила тяги на сцепке. D Zugkraft am Zughaken. E esfuerzo en el gancho. I forza (di trazione) al gancio. N trekkracht aan de trekhaak. P siła na haku. S dragkrokskraft. (811)
2. **magnetic pull** : the force of attraction between two magnetic poles of opposite polarity. *Note.* — In the case of two parallel pole faces of equal area separated by a very small air gap, the magnetic pull is given by:

$$F = \frac{1}{2\,\mu_0} \int B^2 \, \mathrm{d}A$$

integrated over the area A of one of the pole faces. ★ force portante magnétique → *force 21.* R магнитное притяжение. D magnetische Anziehungskraft. E fuerza portante magnética. I forza portante magnetica. N magnetische aantrekkingskracht. P przyciąganie magnetyczne. S magnetisk dragkraft. (221)

pull-in

1. **nominal pull-in torque** : → *torque 15*
2. **pull-in test** : → *test 63*
3. **pull-in torque** : → *torque 17*

pulling

1. **frequency pulling** : the phenomenon of the change in the frequency of oscillation with a change of load impedance. ★ effet d'entraînement de fréquence → *effet 52.* R затягивание частоты. D Lastverstimmung. E alargamiento de frecuencia. I effetto di trascinamento di frequenza. N belastingverstemming. P przeciąganie (częstotliwości) obciążeniowe. S frekvensglidning (vid belastningsändring). (531)
2. **growing by pulling** (of a single crystal) (*Syn.* growing by Czochralski's method) : the production of a single crystal by gradually withdrawing the developing crystal from the melt. ★ croissance par tirage → *croissance 4.* R выращивание (монокристалла) путем вытягивания; выращивание методом цохральского. D Züchtung (eines Einkristalls) durch Ziehen; Einkristallziehen (nach Czochralski). E crecimiento por extracción (de un monocristal); crecimiento por el método de Czochralski. I accrescimento; crescita per tiraggio (di un mono-cristallo); accrescimento con il metodo di Czochralski. N eenkristalgroei volgens de methode van Czochralski. P metoda monokrystalizacji Czochralskiego. S kristalldragning. (521)
3. **pulling** (*Syn.* flagging) : picture distortion resulting from a synchronisation fault in the display, appearing as a displacement of scanning line to the right in the upper part of the picture. ★ distorsion en drapeau → *distorsion 60.* R загибание растра. (723)
4. **pulling figure** : the difference between the extremes of frequency of oscillation occurring when the phase of the reflection coefficient of a stated load mismatch varies through 360°, thermal effects excluded. ★ entraînement de fréquence → *entraînement 6.* R коэффициент затягивания частоты. D Lastverstimmungsmaß. E valor del alargamiento. I trascinamento di frequenza. N belastingverstemmingsfactor. P wskaźnik przeciągania obciążeniowego. S relativ frekvensglidning (vid blastningsändring). (531)
5. **pulling into synchronism** : → *synchronism 2*
6. **pulling out of synchronism** : → *synchronism 3*
7. **(short-term) sync pulling** : localised sync pulling affecting only a few lines. ★ frisette → *frisette 1.* R подергивание строк. (723)
8. **sync pulling** : oscillatory movement of picture lines in the scanning direction appearing as a periodic or random waviness of the edges of objects due to a synchronisation fault. ★ gigue → *gigue 3.* R воднистость краев. (723)

pull-off

1. **pull-off** : a device used on curves, or at track turn-outs, to keep the conductors in their correct position. ★ rappel → *rappel 6.* R фиксирующая оттяжка. D Abzug; Bogenabzug. E tirante; desviador. I dispositivo di poligonazione. N bochtaftrek. P odciąg sieciowy. S avhåll. (811)
2. **pull-off connector** : → *connector 38*
3. **pull-off coupling** : → *coupling 36*

pull-out

1. **conductor pull-out force** (*Syn.* conductor tensile force) : → *force 8*
2. **pull-out test** : → *test 64*
3. **pull-out torque** : → *torque 18*
4. **pull-out torque** (*Syn.* synchronous pull-out torque) : → *torque 26*
5. **synchronous pull-out torque** : → *torque 26*

pull-through

1. **pull-through winding** : → *winding 51*

pull-up

1. **pull-up torque (of an a.c. motor)** : → *torque 20*

pulsating

1. **pulsating** : applies to a periodic quantity of non-zero mean value. ★ pulsatoire → *pulsatoire 2.* R пульсирующая. D Misch- (mit Gleich- und Wechselanteil). E pulsatoria. I pulsante. N pulserend. P pulsujący. S pulserande. (101,161)
2. **pulsating current** : → *current 150*
3. **pulsating voltage** : → *voltage 153*

pulsation

1. **current pulsation** : the difference between maximum and minimum amplitude of the motor current during a single cycle corresponding to one revolution of the driven load expressed as a percentage of the average value of the current during this cycle. *Note.* — For a.c. motors, all currents in this definition are r.m.s. currents. ★ pulsation de courant → *pulsation 4.* R пульсация тока. D (relative) Strompendelung. E pulsación de corriente. I pulsazione di corrente. N oneenparigheid van de stroom. P pulsowanie prądu. S strömpulsation. (411)
2. **pulsation factor** : → *factor 139*

pulse

1. **adaptive differential pulse code modulation** : → *modulation 1*
2. **biased pulse amplifier** : → *amplifier 4*
3. **broad pulse** (*Syn.* half-line pulse) : pulses, usually repetitive at twice the line frequency, a number of which collectively form the field synchronising signal. ★ impulsions de demi-ligne → *impulsion 32.* R широкий импульс; полустрочный импульс. (723)
4. **clamping pulse** : a pulse used for determining the part of the

picture signal to be clamped. ★ impulsion de clampage → *impulsion 22.* R импульс фиксации. (723)

5. **delta light pulse** : a light pulse having finite integrated light flux and infinitesimal width. ★ impulsion lumineuse de Dirac → *impulsion 26.* R световой дельта-импульс. D Delta-Lichtimpuls. E impulso luminoso de Dirac. I impulso luminoso di Dirac. N lichtflits. P impuls świetlny Diraca. S deltaljuspuls. (531)
6. **differential pulse code modulation** : → *modulation 17*
7. **digital pulse duration modulation** : → *modulation 18*
8. **duration of shock pulse** : → *duration 12*
9. **edit pulses** (*Syn.* frame pulses) : a series of pulses recorded on the video tape control track to assist in the location of the correct editing point and to provide synchronization information to the servo-mechanisms during the start-up period of the reproduce mode. ★ impulsions de montage → *impulsion 33.* R монтажная метка. D Schneidimpulse. E impulsos de montaje. I impulsi di quadro. N montagepulsen. P impulsy montażowe. S redigeringspuls. (806)
10. **electron collection pulse chamber** : → *chamber 8*
11. **equalising pulses** : pulse trains occurring just before and after the field synchronising signal in some television systems ; these are used to improve interlacing in the display. ★ signaux d'égalisation → *signal 254.* R уравнивающие импульсы. (723)
12. **field sync pulse** (*Syn.* field synchronizing signal) : → *signal 89*
13. **frame pulses** (*Syn.* edit pulses) : → *pulse 9*
14. **Gaussian pulse** : a pulse that has the waveform of a Gaussian distribution. *Note.* — In the time domain, the waveform is :

$$f(t) = A \exp[-(t/a)^2]$$

where A is a constant, and a is the pulse half duration at the 1/e points. ★ impulsion gaussienne → *impulsion 25.* R импульс Гаусса. D Gauß'scher Impuls. E pulso gausiano. I impulso gaussiano. N Gausspuls. P impuls gaussowski. S gausspuls. (731)

15. **generic pulse code modulation** : → *modulation 23*
16. **half-line pulse** (*Syn.* broad pulse) : → *pulse 3*
17. **ion collection pulse chamber** : → *chamber 11*
18. **line sync pulse** (*Syn.* line synchronizing signal) : → *signal 116*
19. **linear pulse amplifier** : → *amplifier 15*
20. **logarithmic pulse amplifier** : → *amplifier 17*
21. **modulation by pulses** : → *modulation 28*
22. **modulation of pulses** : → *modulation 35*
23. **negative pulse stuffing** (*Syn.* negative justification) : → *justification 10*
24. **peak pulse output power** : → *power 100*
25. **positive pulse stuffing** (*Syn.* positive justification) : → *justification 13*
26. **positive/zero/negative pulse stuffing** (*Syn.* positive/zero/negative justification) : → *justification 14*
27. **pulse** : an abrupt variation of short duration of a physical quantity followed by a rapid return to the initial state. ★ impulsion → *impulsion 18.* R импульс. D Impuls; Stoß. E impulso. I impulso. N puls. P impuls. S puls. (101,161,702)
28. **pulse amplifier** : → *amplifier 24*
29. **pulse amplitude modulation** : → *modulation 49*
30. **(pulse) amplitude selector** : → *selector 7*
31. **pulse broadening** : → *broadening 3*
32. **pulse code** : → *code 44*
33. **pulse code modulation** : → *modulation 50*
34. **(pulse) coincidence** : → *coincidence 5*
35. **pulse command** : → *command 16*
36. **pulse control** : → *control 146*
37. **pulse control factor** : → *factor 140*
38. **(pulse) counting assembly** : → *assembly 19*
39. **pulse detector** : → *detector 25*
40. **pulse dispersion** (*Syn.* pulse broadening) : → *broadening 3*
41. **pulse duration** : → *duration 30*
42. **pulse duration control** : → *control 148*
43. **pulse duration discriminator** : → *discriminator 8*
44. **pulse duration modulation** : → *modulation 51*
45. **pulse duration selector** : → *selector 8*
46. **pulse duty factor** : → *factor 141*
47. **pulse fall time discriminator** : → *discriminator 9*
48. **pulse frequency control** : → *control 149*
49. **pulse frequency modulation** : → *modulation 52*
50. **pulse interlacing** : → *interlacing 3*
51. **pulse interleaving** (*Syn.* pulse interlacing) : → *interlacing 3*
52. **pulse ionization chamber** : → *ionization chamber 18*
53. **pulse magnitude** : → *magnitude 3*
54. **pulse number** : → *number 26*
55. **pulse output power** : → *power 152*
56. **pulse permeability** : → *permeability 19*
57. **pulse position modulation** : → *modulation 53*
58. **pulse regeneration** : → *regeneration 1*
59. **pulse regenerator** : → *regenerator 2*
60. **pulse repetition frequency** : → *frequency 158*
61. **pulse repetition rate** (*Syn.* pulse repetition frequency) : → *frequency 158*
62. **pulse repetition rate modulation** (*Syn.* pulse frequency modulation) : → *modulation 52*
63. **pulse response characteristic** : → *characteristic 67*
64. **pulse rise time** : → *rise time 1*
65. **pulse rise time discriminator** : → *discriminator 10*
66. **(pulse) selector** : → *selector 9*
67. **pulse shape discriminator** : → *discriminator 11*
68. **pulse shape selector** : → *selector 10*
69. **pulse shaping** : → *shaping 2*
70. **pulse signal** : → *signal 149*
71. **pulse spacing** : → *spacing 3*
72. **pulse spreading** (*Syn.* pulse broadening) : → *broadening 3*
73. **pulse stuffing** (*Syn.* justification) : → *justification 1*
74. **pulse time modulation** : → *modulation 55*
75. **pulse train** : → *train 8*
76. **pulse width** (*Syn.* pulse duration) : → *duration 30*
77. **rectangular pulse** : a unidirectional pulse having negligibly short rise time and decay time with respect to its duration and a practically constant instantaneous value within this duration. ★ impulsion rectangulaire → *impulsion 28.* R прямоугольный импульс. D Rechteckimpuls. E impulso rectangular. I impulso rettangolare. N vierkantspuls. P impuls prostokątny. S rektangelpuls. (702)
78. **response pulse duration** : → *duration 37*
79. **rise time (of a pulse)** : → *rise time 6*
80. **shock pulse** : excitation of a system characterized by rise and fall in a time interval short in comparison with the half-period of any mode of oscillation of the system. ★ impulsion de choc → *impulsion 21.* R ударный импульс. D Stoß. E impulso de choque. I impulso da urto. N puls. P udar. S stöt; puls. (801)
81. **sine-squared pulse** : a unidirectional pulse defined as a function of time t by the expressions :

$$y = k \sin^2(\pi t/2T) \qquad \text{for } 0 \leqslant t \leqslant 2T$$
$$y = 0 \qquad \text{for } t < 0 \text{ and } t > 2T$$

where : y is the instantaneous value of the characteristic quantity, k is the peak value of the pulse, $2T$ is the duration of the pulse, T being the length of time during which the characteristic quantity is greater than k/2. ★ impulsion en sinus carré → *impulsion 24.* R синус-квадратичный импульс. D Sinusquadratimpuls. E impulsos en seno cuadrado. I impulso a seno quadrato. N sinuskwadraatpuls. P impuls sinus kwadrat. S sinkvadratpuls. (702)

82. **square pulse train** : → *train 12*
83. **synchronization pulse separator** : → *separator 6*
84. **synchronizing pulse generator** : → *generator 37*
85. **synchronizing pulse regenerator** : → *regenerator 4*
86. **T pulse** : test signal consisting of a sine squared pulse, the mid-amplitude duration of which is T, where T is the approximate duration of the semi-period corresponding to the normal limiting frequency of the video band of the television system under consideration. *Notes. 1* — Other test signals designated 2T...nT, and consisting of sine squared pulses of half

amplitude duration of $2T_r...nT_r$. *2* — In the case of 625 line systems T is standardised at 0.1μs. ★ impulsion T → *impulsion 29.* R Т-импульс. (723)

87. **unidirectional pulse** : a pulse in which the instantaneous values of the physical quantity are all greater than or all less than the common initial and final value. ★ impulsion unidirectionnelle → *impulsion 30.* R односторонний импульс. D gerichteter Impuls. E impulso unidireccional. I impulso unidirezionale. N enkelgerichte puls. P impuls jednokierunkowy; impuls jednobiegunowy. S monopolär puls. (702)
88. **unit pulse** (*Syn.* unit impulse (USA); Dirac function) : a distribution (generalized function) $\delta(t)$ that can be considered as the limit of a positive function, equal to zero outside a small interval around the origin and the integral of which remains equal to unity when this interval goes to zero. *Notes. 1* — The unit pulse can be consi dered as the derivative of the unit step. *2* — The Dirac functio n can be used to express the value, for $t_0 \in [t_1, t_2]$, , of a function $f(t)$, continuous and single valued for $t \in [t_1, t_2]$. .

$$f(t_0) = \int_{t_1}^{t_2} \delta(t - t_0) \cdot f(t) \cdot dt$$

★ distribution de Dirac → *distribution 5.* R импульсная функция первого порядка; единичный импульс; функция (распределение) дирака. D Einheits-Stoß; Dirac-Funktion. E impulso unidad; función de Dirac. I distribuzione di Dirac; impulso unitario. N deltafunctie; Dirac-puls; eenheidspuls. P impuls jednostkowy. S diracfunktion; enhetspuls. (101)
89. **unit pulse response** : → *response 26*

pulsed

1. **pulsed carrier** : → *carrier 26*
2. **pulsed carrier modulation** (*Syn.* modulation of pulses) : → *modulation 35*
3. **pulsed current motor** : → *motor 77*
4. **pulsed magnetron** : → *magnetron 6*
5. **pulsed quantity** : → *quantity 23*
6. **pulsed voltage** : → *voltage 154*

pulverised

1. **pulverised fuel boiler** : → *boiler 10*

pump

1. **manual air pump** : a manually operated pump used to produce compressed air before a power-driven compressor operates. ★ pompe à air manuelle → *pompe 1.* R воздушный насос с ручным приводом. D handbetätigte Luftpumpe; Handluftpresser. E bomba de aire manual. I pompa a mano. N handluchtpomp. P sprężarka ręczna. S handdriven luftpump. (811)
2. **oil pump** : a pump which circulates oil in a pressure or cooling circuit. ★ pompe à huile → *pompe 2.* R масляный насос. D Ölpumpe. E bomba de aceite. I pompa dell'olio. N oliepomp. P pompa olejowa. S oljepump. (811)

pumped

1. **pumped storage** : → *storage 10*
2. **pumped storage power station** : → *power station 18*
3. **separately pumped electron gun** (*Syn.* external gun) : → *gun 4*

pumping

1. **pumping tariff** : → *tariff 33*

punch-through

1. **punch-through** (between two PN junctions) : conductivity between the space charge regions of two PN junctions as a result of widening of one or both of them. ★ pénétration → *pénétration 1.* R явление смыкания (между двумя P-N переходами). D Durchgriff (zwischen zwei PN-Übergängen). E penetración (entre dos uniones PN). I penetrazione (fra due giunzioni PN). N doorbraak. P zwarcie skrośne (między dwu złączami PN). S penetration. (521)

puncture

1. **puncture** (of an insulant) : 1. A disruptive breakdown through a solid insulant. 2. The path made by this breakdown. ★ perforation → *perforation 1.* R ..... D Durchschlag (eines Isolierstoffes). E perforación (de un aislante). I perforazione (di un isolante). N perforatie. P przebicie niszczące; droga przebicia niszczącego. S genomslag i isolerande ämne; punktering. (121,212,471)

pure

1. **pure sound** : → *sound 16*
2. **pure tone** (*Syn.* pure sound) : → *sound 16*
3. **pure tone audiogram** : → *audiogram 3*

purging

1. **purging** : the passing of sufficient volume of protective gas through a pressurized enclosure and its ducts before the application of voltage to the apparatus to reduce any explosive gas atmosphere to a concentration well below the lower explosive limit. ★ balayage → *balayage 3.* R продувка оболочки под избыточным давлением. D Vorspülung. E barrido. I lavaggio. N spoelen. P przewietrzanie. S renspolning. (426)

purity

1. **colorimetric purity** (p_c) : quantity defined by the relation $p_c = L_d/(L_n + L_d)$ where L_d and L_n are the respective luminances of the monochromatic stimulus and of the specified achromatic stimulus that match the colour stimulus considered in an additive mixture. *Notes. 1* — In the CIE 1931 standard colorimetric system, colorimetric purity, p_c, is related to excitation purity, p_e, by the equation $p_c = p_e\, y_d/y$ where y_d and y are the y-chromaticity coordinates respectively, of the monochromatic stimulus and the colour stimulus considered. *2* — In the CIE 1964 supplementary standard colorimetric system, a measure, $p_{c,10}$, is defined by the relation given in Note 1, but using $p_{e,10}$, $y_{d,10}$ and y_{10} instead of p_e, y_d, and y. ★ pureté colorimétrique → *pureté 2.* R колориметрическая чистота цвета. D spektraler Leuchtdichteanteil. E pureza colorimétrica. I purezza colorimetrica. N verzadigingsgraad (in luminantie-eenheden). P czystość kolorymetryczna. S kolorimetrisk renhet. (845)
2. **excitation purity** (p_e) : quantity defined by the ratio NC/ND of two collinear distances on the chromaticity diagram of the CIE 1931 or 1964 standard colorimetric systems, the first distance being that between the point C representing the colour stimulus considered and the point N representing the specified achromatic stimulus ; the second distance is that between the point N and the point D on the spectrum locus at the dominant wavelength of the colour stimulus considered. The definition leads to the following expressions :

$$p_e = \frac{y - y_n}{y_d - y_n}$$

or

$$p_e = \frac{x - x_n}{x_d - x_n}$$

where (x, y), (x_n, y_n), (x_d, y_d) are the x, y-chromaticity coordinates of the point s C, N, and D, respectively. *Notes. 1* — The formulae in x and y are equivalent, but greater precision is given by the formula which has the greater value in the numerator. *2* — Excitation purity p_e, is related to colorimetric purity, p_c, by the equation : $p_c = p_e\, y/y_d$. ★ pureté d'excitation → *pureté 3.* R условная чистота цвета. D spektraler Farbanteil. E pureza de excitación. I purezza di eccitazione. N verzadigingsgraad (in afstandseenheden). P czystość pobudzenia. S spektral renhet. (845)
3. **purity** (in a colour television display) : the freedom from contamination of one display primary colour by another. *Notes. 1* — Contamination may be caused by the excitation of the display phosphor for one colour by the electron beam intended for another. 2 — In television the concept of purity is different from the concept of purity used in colourimetry . ★ pureté (d'une couleur primaire) → *pureté 4.* R чистота (в цветном воспроизводящем устройстве). (723)
4. **purity** (of a colour stimulus) : a measure of the proportions of the amounts of the monochromatic stimulus and of the specified achromatic stimulus that, when additively mixed, match the colour stimulus considered. *Notes. 1* — In the case of purple stimuli, the monochromatic stimulus is replaced by a stimulus whose chromaticity is represented by a point on the purple boundary. *2* — The proportions can be measured in various ways : see "colorimetric purity" and "excitation purity". ★ pureté → *pureté 1.* R чистота (цветового стимула).

D ..... E pureza. I purezza. N verzadiging. P czystość (bodźca barwowego). S färgstimulusrenhet. (845)

5. **radiochemical purity** : the proportion of the total activity of the radionuclide in the sample considered, which is due to the nuclide in the stated chemical form. ★ pureté radiochimique → *pureté 6.* R радиохимическая чистота. D radiochemische Reinheit. E pureza radioquímica. I purezza radiochimica. N radiochemische zuiverheid. P czystość radiochemiczna. S radiokemisk renhet. (881)
6. **radionuclidic purity** : the proportion of the total activity which is the activity of the stated radionuclide. ★ pureté radioactive → *pureté 5.* R радионуклидная чистота. D Radionuklideinheit. E pureza radiactiva. I purezza radioisotopica. N radionuclidische zuiverheid. P czystość radionuklidu. S radionuklidrenhet. (881)

Purkinje

1. **Purkinje phenomenon** : → *phenomenon 4*

purple

1. **purple boundary** : → *boundary 3*
2. **purple stimulus** : → *stimulus 11*

purpose

1. **definite purpose motor** : → *motor 20*
2. **dual purpose voltage transformer** : → *transformer 28*
3. **general purpose motor** : → *motor 35*
4. **special purpose motor** : → *motor 96*

push-button

1. **decadic push-button** (*Syn.* decadic key pad) : → *pad 2*
2. **frequency push-button dial** (*Syn.* multifrequency key pad) : → *pad 6*
3. **mechanical system of a push-button switch** : → *mechanical system 10*
4. **operation of a push-button switch** : → *operation 44*
5. **position of a push-button switch** : → *position 22*
6. **push-button** : a control switch having an actuator intended to be operated by force exerted by a part of the human body, usually the finger or palm of the hand, and having stored energy (spring) return. ★ bouton-poussoir → *bouton-poussoir 1.* R кнопочный выключатель. D Drucktaster. E pulsador. I pulsante. N drukknopschakelaar. P przycisk. S tryckknapp. (441)
7. **push-button dial** (*Syn.* key pad) : → *pad 4*
8. **push-button (telephone) set** : → *set 38*

pusher

1. **pusher** : a mechanical device to push the charge and its carrier into and through the furnace chamber. ★ pousseuse → *pousseuse 1.* R толкатель. D Stossvorrichtung. E empujador. I dispositivo di spinta. N doorduwer; doorstoter. P popychacz (wsadu). S inskjutare. (841)
2. **pusher furnace** : → *furnace 41*
3. **pusher operation** (*Syn.* banking) : → *banking 1*

pushing

1. **frequency pushing** : the phenomenon of the change in the frequency of oscillation with a change of electrode current. ★ effet de poussée de fréquence → *effet 35.* R электронное смещение частоты. D Stromverstimmung. E acortamiento de frecuencia. I spinta di frequenza. N stroomverstemming. P przeciąganie (częstotliwości) prądowe. S frekvensförskjutning (genom strömändring). (531)
2. **pushing figure** : the quotient of the difference between the extremes of frequency of oscillation to the change in electrode current that produces the change in frequency, thermal effects excluded. ★ coefficient de poussée → *coefficient 41.* R коэффициент электронного смещения частоты. D Stromverstimmungsmaß. E coeficiente de acortamiento. I coefficiente di spinta. N stroomverstemmingsfactor. P wskaźnik przeciągania prądowego. S relativ frekvensförskjutning (genom strömändring). (531)

push-on

1. **push-on contact** : → *contact 95*

push-pull

1. **push-pull connector** : → *connector 39*
2. **push-pull coupling** : → *coupling 37*
3. **push-pull operation** : → *operation 51*
4. **push-pull operation** : → *operation 52*
5. **push-pull train** : → *train 9*

push-push

1. **push-push operation** : → *operation 53*

push-through

1. **push-through winding** : → *winding 52*

pyramidal

1. **pyramidal horn** : → *horn 18*

pyroelectric

1. **pyroelectric detector** : → *detector 26*

Pythagorean

1. **Pythagorean scale** : → *scale 11*

Q

Q

1. **Q factor** (*Syn.* quality factor) : → *factor 143*

QAM

1. **QAM** (*Syn.* quadrature (amplitude) modulation) : → *modulation 57*

QPSK

1. **QPSK** (*Syn.* quadrature phase shift keying) : → *keying 9*

quad

1. **quad bundle** : → *bundle 6*

quadrant

1. **four quadrant convertor** : → *convertor 24*
2. **one quadrant convertor** : → *convertor 34*
3. **quadrant antenna** : → *antenna 93*
4. **quadrant electrometer** : → *electrometer 3*
5. **two quadrant convertor** : → *convertor 44*

quadrature

1. **in quadrature** : applies to two sinusoidal quantities of the same frequency having a phase difference of $\pm\pi/2$rad. ★ en quadrature → *quadrature 2.* R в квадратуре. D in Quadratur. E en cuadratura. I in quadratura. N in kwadratuur. P w kwadraturze. S i tvärfas. (101)
2. **quadrature (amplitude) modulation** : → *modulation 57*
3. **quadrature crosstalk** : → *crosstalk 14*
4. **quadrature hybrid** : → *hybrid 12*
5. **quadrature phase modulation** (*Syn.* quadrature phase shift keying) : → *keying 9*
6. **quadrature phase shift keying** : → *keying 9*
7. **quadrature signal** : → *signal 151*
8. **quadrature (voltage) control** : → *control 150*

quadrature-axis

1. **quadrature-axis component of current** : → *component 44*
2. **quadrature-axis component of magnetomotive force** : → *component 45*
3. **quadrature-axis component of synchronous generated voltage** : → *component 46*
4. **quadrature-axis component of voltage** : → *component 47*
5. **quadrature-axis sub-transient open-circuit time constant** : → *time constant 12*
6. **quadrature-axis sub-transient reactance** : → *reactance 13*
7. **quadrature-axis sub-transient short-circuit time constant** : → *time constant 13*
8. **quadrature-axis sub-transient voltage** : → *voltage 158*
9. **quadrature-axis synchronous reactance** : → *reactance 14*
10. **quadrature-axis transient open-circuit time constant** : → *time constant 14*
11. **quadrature-axis transient reactance** : → *reactance 15*
12. **quadrature-axis transient short-circuit time constant** : → *time constant 15*
13. **quadrature-axis transient voltage** : → *voltage 159*

quadruplex

1. **quadruplex system** : → *system 163*

quality

1. **image quality indicator** : → *indicator 8*
2. **(magnetic) quality factor** : → *factor 116*
3. **quality factor** : → *factor 143*
4. **quality factor** : → *factor 144*
5. **quality factor** : → *factor 145*
6. **quality of display** (of a teletext system) : the property of a teletext system whereby it provides a very clear image, characterised, for example, by the shape, dimensions and colour of the characters, their contrast in regard to the background and any flashing. ★ qualité de visualisation → *qualité 16.* R качество воспроизведения (системы телетекст). (723)
7. **quality of service** : the collective effect of service performance which determines the degree of satisfaction of a user of the service. *Notes. 1* — The quality of service is characterized by the combined aspects of service support performance, service operability performance, serveability performance, service integrity and other factors specific to each service. *2.* — ISO defines "quality" as the ability of a product or service to satisfy user's needs. ★ qualité de service → *qualité 12.* R качество услуги. D Dienstgüte. E calidad de servicio. I qualità del servizio. N kwaliteit van een dienst(verlening). P jakość serwisu. S tjänstekvalitet. (191)
8. **quality of service** : the collective effect of service performances which determine the degree of satisfaction of a user of the service. *Note.* — These characteristic performances may, for example, relate to : transmission quality, dial-tone delay, failures, fault frequency and duration. ★ qualité de service → *qualité 13.* D Dienstgüte. P jakość usługi. (715)
9. **quality of supply** : an appraisal of the deviations of technical criteria outside a defined range (explicit or implicit) of the electricity supply or of the aggregate of electricity supplies within an electrical system. ★ qualité du service → *qualité 18.* R качество электроэнергии. D Versorgungsqualität. E calidad del servicio. I qualità del servizio. N kwaliteit van de voorziening. P jakość dostawy. S leveranskvalitet. (604)
10. **quality scale** : → *scale 12*
11. **radiation quality** : the characteristic of ionizing radiation determined by the spectral distribution of radiation with respect to energy or wavelength. It is usually expressed in terms of effective wavelength, effective energy, half-value layer, or X-ray tube voltage, waveform and filtration. ★ qualité (d'un rayonnement) → *qualité 19.* R качество излучения. D Strahlenqualität. E calidad (de una radiacion). I qualità di una radiazione. N stralingskwaliteit. P jakość promieniowania. S strålkvalitet. (881)
12. **riding quality** : a qualitative or quantitative indication of the body or bogie movements of a vehicle travelling along the rails. *Note.* — The body and bogies of a moving vehicle may be affected by linear and rotational disturbing movements which are defined by reference to a set of three mutually perpendicular axes, one along the track (longitudinal direction), one across it (transverse direction) and one vertical (perpendicular to the track surface). ★ qualité de roulement → *qualité 11.* R ходовые качества. D Laufeigenschaft. E calidad de rodadura. I qualità di marcia. N loopeigenschappen. P jakość jazdy. S gångegenskap. (811)
13. **signal quality detection** : → *detection 12*
14. **(signal) quality detection** : → *detection 13*

quantity

1. **auxiliary energizing quantity** : any energizing quantity other than the input energizing quantity(ies). ★ grandeur d'alimentation auxiliaire → *grandeur 13.* R вспомогательная воздействующая величина. D Hilfs(erregungs)grösse. E magnitud de alimentación auxiliar. I relè d'alimentazione ausiliaria. N hulpbekrachtigingswaarde. P wielkość zasilająca pomocnicza; wielkość sterująca pomocnicza. S hjälpmatningsstorhet. (446)
2. **base quantity** : one of the quantities of a set, by convention considered as dimensionally independent of the other quantities of that set. ★ grandeur de base → *grandeur 15.* R основная величина. D Basisgröße. E magnitud base. I grandezza fondamentale. N basisgrootheid. P wielkość podstawowa. S grundstorhet. (111)
3. **calibrating quantity** : a quantity such as current, voltage or frequency, having known values with specified tolerances and intended to be used for calibration. ★ grandeur d'étalonnage → *grandeur 25.* R опорная величина. D Kalibriergrösse. E magnitud de calibrado. I grandezza di taratura.

N kalibratiegrootheid. P wielkość wzorcowa. S kalibreringsstorhet. (301)

4. **continuous (quantity)** : the value of an electrical or mechanical quantity (output, current, speed, tractive effort, torque, etc.) corresponding to the continuous rating of the machine or vehicle with half-worn wheels and at full field or other specified field values. ★ grandeur en régime continu → *grandeur 28.* R (величина) продолжительного режима. D Dauer.... E magnitud en régimen continuo. I grandezza continua; grandezza in servizio continuo. N ononderbroken grootheid; continue grootheid. P wartość wielkości przy pracy ciągłej. S kontinuerlig. (811)
5. **correcting quantity** : a quantity modifying the characteristics of the relay in a specified manner. *Examples :* For a thermal electrical relay : the oil temperature of the protected equipment, the air temperature. ★ grandeur corrective → *grandeur 11.* R корректирующая величина. D Korrekturgrösse. E magnitud correctiva. I grandezza correttiva. N wijziging. P wielkość korygująca; wielkość dopasowująca. S korrektionsstorhet. (446)
6. **derived quantity** : one of the quantities of a set, defined as a function of the base quantities of the set by a quantity equation. ★ grandeur dérivée → *grandeur 24.* R производная величина. D abgeleitete Größe. E magnitud derivada. I grandezza derivata. N afgeleide grootheid. P wielkość pochodna. S härledd storhet. (111)
7. **disengaging value of the characteristic quantity** : → *value 9*
8. **energizing quantity** : an electrical quantity (either current or voltage) which alone, or in combination with other such quantities, applied to a relay under specified conditions enables it to fulfil its purpose. ★ grandeur d'alimentation → *grandeur 12.* R воздействующая величина. D Erregungsgrösse. E magnitud de alimentación. I grandezza d'alimentazione. N bekrachtigingsgrootheid. P wielkość zasilająca; wielkość sterująca. S matningsstorhet. (446)
9. **extreme range of an influencing quantity** : → *range 24*
10. **field quantity** : a quantity such as a voltage, current, sound pressure, electric field strength, the square of which in linear systems is proportional to power. ★ grandeur de champ → *grandeur 16.* R величина поля. D Feldgröße. E magnitud de campo. I grandezza di campo. N veldgrootheid. P wielkość polowa. S fältstorhet. (702)
11. **flux of a vector quantity** : → *flux 11*
12. **influence quantity** : any quantity, generally external to the measuring instrument, which may affect its performance. ★ grandeur d'influence → *grandeur 26.* R влияющая величина. D Einflussgrösse. E magnitud de influencia. I grandezza d'influenza; grandezze di influenza. N beïnvloedende grootheid. P wielkość wpływająca. S influensstorhet. (301)
13. **influencing quantity** : any quantity likely to modify any of the specified characteristics of a relay (operating, releasing, accuracy, etc.). ★ grandeur d'influence → *grandeur 27.* R влияющая величина. D Einflussgrösse. E magnitud de influencia. I grandezza d'influenza. N beïnvloedende grootheid. P wielkość wpływająca; wielkość wpływowa. S påverkande storhet. (446)
14. **input energizing quantity** : for an all-or-nothing relay : that energizing quantity to which the relay is designed to respond when the quantity is applied under specified conditions. For a measuring relay : that energizing quantity which either by itself constitutes the characteristic quantity or helps to constitue it. ★ grandeur d'alimentation d'entrée → *grandeur 14.* R входная воздействующая величина. D Eingangs(erregungs)grösse. E magnitud de alimentación de entrada. I grandezza d'alimentazione d'entrata. N ingangsbekrachtigingsgrootheid. P wielkość zasilająca wejściowa; wielkość sterująca wejściowa. S huvudmatningsstorhet. (446)
15. **limiting continuous thermal withstand value of an energizing quantity** : → *value 17*
16. **limiting dynamic value of an energizing quantity** : → *value 18*
17. **limiting short-time thermal withstand value of an energizing quantity** : → *value 19*
18. **(measurable) quantity** : an attribute of a phenomenon or of a body which is susceptible to qualitative identification and quantitative determination. ★ grandeur (mesurable) → *grandeur 31.* R величина (измеряемая). D (meßbare) Größe. E magnitud (medible). I grandezza (misurabile). N (meetbare) grootheid. P wielkość (mierzalna). S (fysikalisk) storhet. (111)
19. **nominal range of an influencing quantity** : → *range 47*
20. **nominal value of an energizing quantity** : → *value 31*
21. **operative range of an energizing quantity** : → *range 55*
22. **polyphase linear quantity** : a vector X_m associated with an electric quantity obeying the superposition principle, in relation to the nodes or the branches of a polyphase circuit element, in an order according to the order of phases sequence. ★ grandeur linéaire polyphasée → *grandeur 30.* R многофазная линейная величина. D lineare Mehrphasengröße. E magnitud lineal polifásica. I grandezza lineare polifase. N lineaire meerfasengrootheid. P wektor wielkości linearnych obwodu. S ..... (131)
23. **pulsed quantity** : a quantity that has zero value during a relatively long time compared to the time when it has non-zero values. ★ grandeur pulsée → *grandeur 32.* R импульсная величина. D impulsartige Größe. E magnitud pulsada. I grandezza impulsiva. N pulsvormige grootheid. P wielkość pulsująca. S pulsad storhet. (101)
24. **quantity equation** : → *equation 6*
25. **quantity of light** : → *light 55*
26. **rated value of an energizing quantity** : → *value 47*
27. **reference conditions of influencing quantities and factors** : → *condition 22*
28. **reference value of an influencing quantity** : → *value 51*
29. **scalar quantity** : a quantity characterized in a given system of units by a single number, either real or complex. ★ grandeur scalaire → *grandeur 35.* R скалярная величина. D skalare Größe. E magnitud escalar. I grandezza scalare. N scalaire grootheid; scalar. P skalar; wielkość skalarna. S skalar; skalär storhet. (101)
30. **(set of) components of a polyphase (or *m*-phase) linear quantity** : → *component 50*
31. **short-time (quantity)** : the value of an electrical or mechanical quantity (output, current, speed, tractive effort, torque, etc.) corresponding to the short-time rating of the machine or vehicle with half-worn wheels and at full field or other specified field value. ★ grandeur en régime de courte durée → *grandeur 29.* R (величина) кратковременного режима. D Kurzzeit.... E magnitud en régimen de corta duración. I grandezza (in servizio) di durata limitata. N kortstondige grootheid. P wartość wielkości przy pracy krótkotrwałej. S korttids-. (811)
32. **stochastic quantity** : a quantity whose value is subject to random fluctuations. *Note.* — The mean of a stochastic quantity is a non-stochastic quantity. ★ grandeur stochastique → *grandeur 36.* R стохастическая величина. D stochastische Grösse. E magnitudes estocásticas. I grandezza stocastica. N stochastische grootheid. P wielkość stochastyczna (losowa). S stokastisk storhet. (881)
33. **tapping quantities** : those quantities the numerical values of which define the tapping duty. The tapping quantities include for each winding and for each tapping : a) a tapping voltage, b) a tapping power, c) a tapping current. *Note.* — Tapping quantities are related to a given tapping connection of the transformer and apply therefore to any winding, including any untapped winding. ★ grandeurs de prise → *grandeur 39.* R величины ответвления. D Anzapfungsgrößen. E magnitudes de toma. I grandezze di presa. N aftakkingsgrootheden. P wielkości zaczepowe. S reglerlägesstorheter. (421)
34. **value (of a quantity)** : → *value 74*
35. **variation (due to influence quantity)** : → *variation 5*
36. **vector quantity** : a quantity characterized in an *n* dimensional space by *n* scalar quantities in a given order. ★ grandeur vectorielle → *grandeur 38.* R векторная величина. D vektorielle Größe; Vektorgröße. E magnitud vectorial. I grandezza vettoriale. N vectorgrootheid; vector. P wektor; wielkość wektorowa. S vektor; vektoriell storhet. (101)

quantization

1. **quantization** : process by which the range of a variable is divided into a finite number of distinct sub-ranges not necessarily equal, each of which is represented by an assigned value named quantized value. ★ quantification → *quantification 5.* R квантование. D Quantisierung. E cuantificación. I quantizzazione. N kwantificering. P kwantowanie. S kvantisering. (351,702,704,721)

quantized

1. **quantized signal** : → *signal 152*
2. **quantized systems** : → *system 164*
3. **quantized value** : → *value 44*

quantizer

1. **quantizer** : a device intended for quantizing a quantity. ★ quantificateur → *quantificateur 1.* R квантизатор. D Quantifizierer. E cuantificador. I quantizzatore. N kwantificeertoestel. P kwantyzator. S kvantiserare. (702)

quantizing

1. **adaptive quantizing** : quantizing in which one or more parameters of this process are automatically adjusted according to some characteristic of the signal or channel concerned. ★ quantification adaptative → *quantification 6.* R адаптивное квантование. D adaptive Quantisierung. E cuantificación adaptativa. I quantizzazione adattativa. N adaptieve kwantificering. P kwantowanie adaptacyjne. S adaptiv kvantisering. (704)
2. **non-uniform quantizing** : quantizing in which not all the quantizing intervals lying between the two virtual decision values are equal. ★ quantification non uniforme → *quantification 7.* R неравномерное квантование. D Nicht-Einheitsquantisierung. E cuantificación no uniforme. I quantizzazione non-uniforme. N niet-uniforme kwantificering. P kwantowanie nierównomierne. S olikformig kvantisering. (704)
3. **quantizing distortion** : → *distortion 61*
4. **quantizing interval** : → *interval 15*
5. **quantizing law** : → *law 10*
6. **quantizing noise** (*Syn.* quantizing distortion) : → *distortion 61*
7. **uniform quantizing** : quantizing in which all the quantizing intervals lying between the two virtual decision values are equal. ★ quantification uniforme → *quantification 8.* R равномерное квантование. D Einheitsquantisierung. E cuantificación uniforme. I quantizzazione uniforme. N uniforme kwantificering. P kwantowanie równomierne. S likformig kvantisering. (704)

quantum

1. **conversion quantum efficiency** : → *efficiency 8*
2. **differential quantum efficiency** : → *efficiency 14*
3. **first quantum number** (*Syn.* principal quantum number) : → *number 25*
4. **(non-selective) quantum detector** : → *detector 19*
5. **orbital quantum number** : → *number 23*
6. **photoluminescence quantum yield** : → *yield 7*
7. **principal quantum number** : → *number 25*
8. **quantum** : the smallest amount of a physical quantity that can be associated with a given phenomenon, when the observable quantity is restricted to a discrete set of values. ★ quantum → *quantum 1.* R квант. D Quant. E cuanto. I quantum. N quant. P kwant. S kvantum. (111)
9. **quantum efficiency** : → *efficiency 32*
10. **quantum efficiency characteristic** : → *characteristic 68*
11. **quantum limited operation** (*Syn.* quantum-noise-limited operation) : → *operation 55*
12. **quantum noise** : → *noise 62*
13. **quantum number** : → *number 27*
14. **second quantum number** (*Syn.* orbital quantum number) : → *number 23*
15. **spin (quantum number)** : → *spin 1*
16. **total angular momentum quantum number** : → *number 32*

quantum-noise-limited

1. **quantum-noise-limited operation** : → *operation 55*

quarter

1. **hourly, half-hourly, quarter hourly, *n* minute etc... demand** : → *demand 16*

quarterly

1. **annual, quarterly, monthly, weekly daily, maximum demand** : → *demand 1*

quarter-phase

1. **quarter-phase (voltage) source** : → *voltage source 6*

quarter-wave

1. **quarter-wave choke** : → *choke 6*
2. **quarter-wave contact piston** : → *piston 6*
3. **quarter-wave plate** : → *plate 27*
4. **quarter-wave sleeve balun** : → *balun 4*
5. **quarter-wave sleeve element** : → *element 40*
6. **quarter-wave transformer** : → *transformer 50*
7. **stop (quarter-wave) filter** : → *filter 38*

quartet

1. **quartet (byte)** : → *byte 4*

quartz

1. **fused quartz** : a vitreous substance made by melting natural quartz crystals. *Note.* — Fused quartz is often less pure than vitreous silica. ★ quartz fondu → *quartz 12.* R плавленый кварц. D geschmolzener Quarz. E cuarzo fundido. I quarzo fuso. N gesmolten kwarts. P kwarc topiony. S kvartsglas. (731)
2. **lumbered synthetic quartz crystal** (*Syn.* pre-dimensioned bar) : → *bar 10*
3. **orientation of a synthetic quartz crystal** : → *orientation 4*
4. **synthetic quartz crystal** : → *crystal 14*
5. **synthetic quartz crystal batch** : → *batch 2*

quasi

1. **quasi bit sequence independence** : → *independence 3*

quasi-associated

1. **quasi-associated signalling** : → *signalling 34*

quasi-impulsive

1. **quasi-impulsive noise** : → *noise 63*

quasi-peak

1. **quasi-peak detector** : → *detector 27*
2. **quasi-peak voltmeter** : → *voltmeter 4*

quaternary

1. **quaternary digital group** : → *group 53*

quenching

1. **hardening by quenching** : → *hardening 2*
2. **quenching** : the process of terminating continuous or multiple discharges following a single ionizing event in a Geiger-Müller counter tube. ★ coupage → *coupage 1.* R гашение. D Löschen. E extinción. I interruzione. N doven; doving. P gaszenie. S släckning. (391)
3. **quenching** : the termination of current conduction in an arm without commutation. ★ extinction sans commutation → *extinction 10.* R запирание за счет спада тока. D Verlöschen. E extinción sin conmutación. I estinzione senza commutazione. N doven. P gaszenie; zanikanie. S kväsning. (551)
4. **quenching** : an operation which consists of rapid cooling of a metal, which is at a high temperature, so that it is at a state of desequilibrium upon its return to ambient temperature. ★ trempe → *trempe 2.* R закалка. D Abschrecken. E temple. I tempra. N afschrikken. P hartowanie. S släckning. (841)
5. **quenching circuit** : → *circuit 148*
6. **quenching gas** : → *gas 30*
7. **quenching voltage** : → *voltage 160*
8. **quenching water** : → *water 1*

queuing

1. **queuing delay** : → *delay 38*
2. **queuing time** (*Syn.* waiting time) : → *time 225*

quick

1. **quick action contact** : → *contact 97*

quick-disconnect

1. **quick disconnect connector** : → *connector 40*
2. **quick-disconnect coupling** : → *coupling 38*

quiescent

1. **quiescent** : pertaining to a network terminal that is not being used but which is available for use on a call. ★ passif → *passif 5.* **R** пассивный. **D** nichtbelegt; verfuegbar; bereit. **E** pasivo. **I** a riposo. **N** in rust; in de wachtstand. **P** bierny. **S** passiv. (714)
2. **quiescent telecontrol system** : → *system 165*

quill

1. **quill drive** : → *drive 18*
2. **quill shaft** : → *shaft 5*

quintet

1. **quintet (byte)** : → *byte 5*

quotient-meter

1. **quotient-meter** : an instrument intended to measure the quotient of the values of two quantities of different kinds. ★ quotientmètre → *quotientmètre 1.* **R** измеритель отношения. **D** Quotienten-Messgerät. **E** aparato de medida de cociente. **I** misuratore di quoziente. **N** quotiëntmeter. **P** przyrząd ilorazowy (dwóch wielkości różnego rodzaju). **S** kvotmeter. (301)

R

rabbling

1. **rabbling bar** : → *bar 11*

race

1. **rat race** (*Syn.* hybrid ring) : → *ring 9*

rack

1. **battery rack** (*Syn.* battery stand; battery stillage) : a support with one or more levels for stationary cells. ★ étagère → *étagère 1.* **R** батарейный стеллаж. **D** Batteriegestell. **E** estante de baterías. **I** scaffale. **N** batterijrek; batterijstelling. **P** stojak akumulatorowy; rusztowanie akumulatorowe. **S** batteriställning. (486)
2. **cable rack** : a shelf intended to receive cables which are usually arranged to run side by side. ★ tablette à câbles → *tablette 1.* **R** кабельная полка. **D** Kabelpritsche. **E** bandeja de cables. **I** passerella cavi. **N** ..... **P** półka kablowa. **S** kabelstege. (605)
3. **combined rack and adhesion drive** : → *drive 2*
4. **rack motor vehicle** : → *vehicle 20*

rack-and-panel

1. **rack-and-panel connector** : → *connector 41*

rad

1. **rad** : the earlier special unit of absorbed dose, kerma and specific energy imparted. 1 rad = 10^{-2} J.kg^{-1}. ★ rad → *rad 1.* **R** рад. **D** rad. **E** rad. **I** rad. **N** rad. **P** rad. **S** rad. (391,881)

radar

1. **radar duplexer** (*Syn.* T-R switch) : → *switch 58*
2. **radar reflectivity factor** : → *factor 146*
3. **radar speedometer** : → *speedometer 1*

radial

1. **radial air-gap (minimum)** : → *air-gap 5*
2. **radial component** : → *component 48*
3. **radial feeder** (*Syn.* single feeder) : → *feeder 19*
4. **radial field cable** (*Syn.* individually screened cable) : → *cable 34*
5. **radial flow fan** : → *fan 6*
6. **radial operation (of a part of a network)** : → *operation 56*
7. **radial system** : → *system 166*
8. **radial tracking control** : → *control 151*
9. **radial transmission line** : → *line 128*
10. **radial ventilation** : → *ventilation 8*

radially

1. **transformer with radially laminated core** : → *transformer 74*

radiance

1. **conservation of radiance** : → *conservation 1*
2. **(monochromatic) radiance temperature** : → *temperature 29*
3. **photon radiance** (in a given direction, at a given point of a real or imaginary surface) (L_p; L) : quantity defined by the formula

$$L_p = \frac{d\Phi_p}{dA \cdot \cos\theta \cdot d\Omega}$$

where $d\Phi_p$ is the photon flux transmitted by an elementary beam passing through the given point and propagating in the solid angle $d\Omega$ containing the given direction ; dA is the area of a section of that beam containing the given point ; θ is the angle between the normal to that section and the direction of the beam. Unit : $s^{-1} \cdot m^{-2} \cdot sr^{-1}$ *Note.* — See notes 1 to 5 to "radiance". ★ luminance photonique → *luminance 25.* **R** фотонная яркость (в данном направлении, в данной точке реальной или воображаемой поверхности). **D** Photonenstrahldichte (in einer gegebenen Richtung, in einem gegebenen Punkt einer realen oder imaginären Oberfläche). **E** radiancia fotónica. **I** radianza fotonica. **N** fotonenradiantie. **P** luminancja fotonowa. **S** fotonradians. (845)
4. **radiance** (L) : the radiant power in a given direction and at a given point of a real or hypothetical surface transmitted by an elementary beam passing through the given point and propagating in the solid angle containing the given direction divided by the product of the value of this solid angle, the area of section of that beam containing the given point and the cosine of the angle between the normal to that section and the direction of the beam. *Note.* — The surface may be that of a source or a surface emitting, receiving or intersecting a light beam. ★ luminance (énergétique) → *luminance 18.* **R** энергетическая яркость. **D** Strahlung; Helligkeit. **E** radiación. **I** radianza. **N** radiantie; helderheid. **P** luminancja energetyczna. **S** radians. (731)
5. **radiance** : the quotient of the radiant flux leaving, arriving at or passing through an element of surface at a point and propagated in direction defined by an elementary cone containing a given direction, by the product of the solid angle of the cone and the area of the orthogonal projection of the element of surface on a plane perpendicular to the given direction. ★ luminance énergétique → *luminance 19.* **R** излучательная способность. **D** Strahlungsdichte. **E** radiancia; luminancia energética. **I** luminanza energetica; radianza. **N** radiantie. **P** gęstość powierzchniowa natężenia promieniowania. **S** radians. (841)
6. **radiance** (in a given direction, at a given point of a real or imaginary surface) (L_e; L) : quantity defined by the formula

$$L_e = \frac{d\Phi_e}{dA \cdot \cos\theta \cdot d\Omega}$$

where $d\Phi_e$ is the radiant flux transmitted by an elementary beam passing through the given point and propagating in the solid angle $d\Omega$ containing the given direction ; dA is the area of a section of that beam containing the given point ; θ is the angle between the normal to that section and the direction of the beam. Unit : $W \cdot m^{-2} \cdot sr^{-1}$ *Notes.* —In the five following notes the symbols for the quantities are without subscripts *1* — For an area dA of the surface of a source, since the intensity dI of dA in the given direction is $dI = d\Phi/d\Omega$, then an equivalent formula is

$$L = \frac{dI}{dA \cdot \cos\theta}$$

a form mostly used in illuminating engineering. *2* — For an area dA of a surface receiving the beam, since the irradiance or illuminance dE produced by the beam on dA is $dE = d\Phi/dA$, then an equivalent formula is

$$L = \frac{dE}{d\Omega \cdot \cos\theta}$$

a form useful when the source has no surface (e.g. the sky, the plasma of a discharge). *3* — Making use of the geometric extent dG of the elementary beam, since $dG = dA \cdot \cos\theta \cdot d\Omega$, then an equivalent formula is $L = d\Phi/dG$. *4* — Since the optical extent $G \cdot n^2$ is invariant, then the quantity $L \cdot n^{-2}$ is also an invariant along the path of the beam if the losses by absorption, reflection and diffusion are taken as zero. That quantity is called the "basic radiance" or "basic luminance" or "basic photon radiance". *5* — The relation between $d\Phi$ and L given in the formulae above is sometimes called basic law of radiometry and photometry :

$$d\Phi = L\frac{dA \cdot \cos\theta \cdot dA' \cdot \cos\theta'}{l^2}$$

$$= L \cdot dA \cdot \cos\theta \cdot d\Omega = L \cdot dA' \cdot \cos\theta' \cdot d\Omega'$$

with the notation given here. ★ luminance énergétique → *luminance 20.* **R** энергетическая яркость (в данном направлении, в данной точке реальной или воображаемой поверхности). **D** Strahldichte (in einer gegebenen Richtung, in einem gegebenen Punkt einer realen oder imaginären

Oberfläche). E radiancia. I radianza. N radiantie. P luminancja energetyczna. S radians. (845)

7. **radiance coefficient** : → *coefficient 49*
8. **radiance factor** : → *factor 147*
9. **spectral radiance** : the radiance contained in an elementary range of wavelengths at a given wavelength divided by that range. ★ luminance (énergétique) spectrique → *luminance 21.* R спектральная яркость. D spektrale Strahlung. E radiación espectral. I radianza spettrale. N spectrale radiantie. P gęstość widmowa luminancji (energetycznej); gęstość monochromatyczna luminancji (energetycznej). S spektral radians. (731)

radiant

1. **photoluminescence radiant yield** : → *yield 8*
2. **radiant cylindrical exposure** : → *exposure 15*
3. **radiant efficiency** : → *efficiency 34*
4. **radiant element** : → *element 41*
5. **radiant emittance** : → *emittance 1*
6. **radiant energy** : → *energy 67*
7. **radiant energy** : → *energy 68*
8. **radiant exitance** (*Syn.* radiant emittance) : → *emittance 1*
9. **radiant exitance** : → *exitance 4*
10. **radiant exposure** : → *exposure 16*
11. **radiant exposure meter** : → *exposure meter 10*
12. **radiant fluence** (*Syn.* radiant spherical exposure) : → *exposure 17*
13. **radiant fluence rate** (*Syn.* spherical irradiance) : → *irradiance 7*
14. **radiant flux** (*Syn.* radiant power) : → *power 153*
15. **radiant flux** : → *flux 22*
16. **radiant flux density** (*Syn.* power flux density) : → *flux density 12*
17. **radiant intensity** : → *intensity 15*
18. **radiant intensity** : → *intensity 16*
19. **radiant power** : → *power 153*
20. **radiant power** (*Syn.* radiant flux) : → *flux 22*
21. **radiant sensitivity** : → *sensitivity 18*
22. **radiant spherical exposure** : → *exposure 17*

radiated

1. **effective monopole radiated power** : → *power 36*
2. **effective radiated power** : → *power 37*
3. **equivalent isotropically radiated power** : → *power 57*
4. **radiated noise** : → *noise 64*

radiating

1. **panel of radiating dipoles** : → *panel 10*
2. **radiating aperture** (*Syn.* aperture) : → *aperture 1*
3. **radiating element** : → *element 42*
4. **radiating near field (region)** : → *near-field 7*
5. **symmetrical radiating element** : → *element 57*

radiation

1. **acoustic radiation pressure** : → *pressure 1*
2. **alpha radiation** : radiation composed of alpha particles. ★ rayonnement alpha → *rayonnement 46.* R альфа-излучение. D Alpha-Strahlung. E radiación alfa. I radiazione alfa. N alfastraling. P promieniowanie alfa. S alfastrålning. (026,391,881)
3. **ambient radiation** (*Syn.* background radiation) : → *radiation 5*
4. **annihilation radiation** : radiation that is produced when a particle and its antiparticle interact and cease to exist. *Note.* — When, for example, a decelerated positron and an extra-nuclear electron interact, usually two quanta of energy equal to 0.511 MeV are emitted in opposite directions. ★ rayonnement d'annihilation → *rayonnement 56.* R аннигиляционное излучение. D Vernichtungsstrahlung. E radiación de aniquilación. I radiazione di annichilazione. N annihilatie-straling. P promieniowanie anihilacyjne. S förintelsestrålning. (881)
5. **background radiation** (*Syn.* ambient radiation) : ionizing radiation from any origin, natural or artificial, other than the radiation it is desired to detect or measure. ★ fond naturel de rayonnement → *fond 7.* R фоновое излучение; излучение в окружающей среде. D Untergrundstrahlung. E radiación de fondo; radiación ambiente. I radiazione di fondo; radiazione ambientale. N achtergrondstraling; nuleffectstraling; omgevingsstraling. P tło promieniowania. S bakgrundsstrålning. (881)
6. **bactericidal radiation** : optical radiation capable of making bacteria inactive. ★ rayonnement bactéricide → *rayonnement 49.* R бактерицидное излучение. D bakterientötende Strahlung. E radiación bactericida. I radiazione battericida. N bacteriëndodende straling. P promieniowanie bakteriostatyczne. S bakteriedödande strålning. (845)
7. **beta radiation** : radiation composed of beta particles. ★ rayonnement bêta → *rayonnement 50.* R бета-излучение. D Beta-Strahlung. E radiación beta. I radiazione beta. N bêtastraling. P promieniowanie beta. S betastrålning. (391,881)
8. **cabinet radiation** : radiation from an enclosure containing equipment, excluding radiation from connected antennas or cables. ★ rayonnement d'enceinte → *rayonnement 61.* R излучение от корпуса. D Gehäuseabstrahlung. E radiación en un recinto. I radiazione d'armadio. N straling van de kast. P promieniowanie obudowy. S strålning från apparatskåp. (161)
9. **capture gamma radiation** : gamma radiation emitted immediately when a neutron is captured by a nucleus. ★ rayonnement gamma de capture → *rayonnement 71.* D Einfang-Gammastrahlung. E radiación gamma de captura. I radiazione gamma di cattura. N vangstgammastraling. P promieniowanie γ przy wychwycie neutronu. S infångningsgammastrålning. (026)
10. **Cerenkov radiation** : electromagnetic radiation produced by the passage of electrons or other charged particles through a substance at speeds greater than the speed of light in that substance. ★ rayonnement de Cerenkov → *rayonnement 57.* R черенковское излучение. D Cerenkov-Strahlung. E radiación de Cerenkov. I radiazione Cerenkov. N Cerenkovstraling. P promieniowanie Czerenkowa. S Cerenkov-strålning. (881)
11. **characteristic radiation** : X-radiation with a discontinuous energy spectrum emitted in the transition of atoms from an excited state of the electron shell to a lower state. ★ rayonnement caractéristique → *rayonnement 51.* R характеристическое излучение. D charakteristische Strahlung. E radiación característica. I radiazione caratteristica. N karakteristieke straling. P promieniowanie charakterystyczne. S karakteristisk röntgenstrålning. (881)
12. **coherent radiation** : radiation characterised by the phenomenon of coherence. ★ rayonnement cohérent → *rayonnement 52.* R когерентное излучение. D kohärente Strahlung. E radiación coherente. I radiazione coerente. N coherente straling. P promieniowanie spójne; promieniowanie koherentne. S koherent strålning. (731)
13. **coherent radiation** : monochromatic radiation whose electromagnetic oscillations maintain constant phase differences from one point to another. ★ rayonnement cohérent → *rayonnement 53.* R когерентное излучение. D kohärente Strahlung. E radiación coherente. I radiazione coerente. N coherente straling. P promieniowanie spójne. S koherent strålning. (845)
14. **concomitant radiation** : radiation which is associated with the radiation to be measured but which is not the object of the measurement, and whose effects on the measurement should preferably be eliminated. ★ rayonnement concomitant → *rayonnement 54.* R сопутствующее излучение. D begleitende Störstrahlung. E radiación concomitante. I radiazione concomitante. N begeleidende straling; nevenstraling. P promieniowanie towarzyszące. S beledsagande strålning. (391)
15. **cosmic radiation** : radiation comprising very high energy primary particles of extra terrestrial origin and the secondary particles generated by interaction of these particles with high layers of the atmosphere. ★ rayonnement cosmique → *rayonnement 55.* R космическое излучение. D kosmische Strahlung. E radiación cósmica. I radiazione cosmica. N kosmische straling. P promieniowanie kosmiczne. S kosmisk strålning. (391)
16. **delta radiation** (*Syn.* delta rays) : electrons, having sufficient energy to produce excitation or ionization, that are impelled by charged particles moving through matter. ★ rayonnement delta → *rayonnement 60.*

R дельта-излучение. D Delta-Strahlung. E radiación delta; rayos δ. I radiazione delta; raggi delta. N deltastraling; deltastralen. P promieniowanie delta; promienie delta. S deltastrålning. (881)

17. **diffuse sky radiation** : that part of solar radiation which reaches the Earth as a result of being scattered by the air molecules, aerosol particles, cloud particles or other particles. ★ rayonnement diffus du ciel → *rayonnement 62.* R диффузное излучение небосвода. D diffuse Himmelsstrahlung. E radiación del cielo. I radiazione diffusa dal cielo. N diffuse hemelstraling. P promieniowanie nieboskłonu; promieniowanie słoneczne rozproszone. S himmelsstrålning. (845)
18. **direct solar radiation** : that part of extraterrestrial solar radiation which as a collimated beam reaches the Earth's surface after selective attenuation by the atmosphere. ★ rayonnement solaire direct → *rayonnement 98.* R прямое солнечное излучение. D direkte Sonnenstrahlung. E radiación solar directa. I radiazione solare diretta. N directe zonnestraling. P promieniowania słoneczne bezpośrednie; insolacja. S direkt solstrålning. (845)
19. **directly ionizing radiation** (*Syn.* directly ionizing particles) : radiation comprising charged particles (electrons, protons, alpha-particles, etc.) having sufficient kinetic energy to produce ionization by collision. ★ rayonnement directement ionisant → *rayonnement 64.* R непосредственно ионизирующее излучение. D direkt ionisierende Strahlung; direkt ionisierende Teilchen. E radiación directamente ionizante. I radiazione direttamente ionizzante; particelle direttamente ionizzanti. N direct ioniserende straling; direct ioniserende deeltjes. P promieniowanie jonizujące bezpośrednio. S direkt joniserande strålning. (881)
20. **(electromagnetic) radiation** : 1. The phenomenon by which energy in the form of electromagnetic waves emanates from a source into space. 2. Energy transferred through space in the form of electromagnetic waves. *Note.* — By extension, the term "electromagnetic radiation" sometimes also covers induction phenomena. ★ rayonnement (électromagnétique) → *rayonnement 65.* R (электромагнитная) радиация. D (elektromagnetische) Strahlung. E radiación electromagnética. I radiazione elettromagnetica. N (elektromagnetische) straling. P promieniowanie (elektromagnetyczne). S elektromagnetisk strålning. (161,702,705,731)
21. **(electromagnetic) radiation** : 1. Emission or transfer of energy in the form of electromagnetic waves with the associated photons. 2. These electromagnetic waves or these photons. *Note.* — The French term "radiation" applies preferably to a single element of any radiation, characterized by one wavelength or one frequency. ★ rayonnement (électromagnétique) → *rayonnement 66.* R (электромагнитное) излучение. D (elektromagnetische) Strahlung. E radiación (electromagnética). I radiazione. N (elektromagnetische) straling. P promieniowanie (elektromagnetyczne). S (elektromagnetisk) strålning. (845)
22. **equilibrium radiation pattern** : → *pattern 6*
23. **erythemal radiation** : optical radiation effective in causing actinic erythema. ★ rayonnement érythémal → *rayonnement 67.* R эритемное излучение. D erythemwirksame Bestrahlung. E radiación eritemal. I radiazione eritemale. N erytheemstraling. P promieniowanie erytemalne ; promieniowanie rumieniotwórcze. S erytemstrålning. (845)
24. **extra-focal radiation** : X-radiation emitted from parts of the X-ray tube other than the focal spot. ★ rayonnement extrafocal → *rayonnement 68.* R афокальное излучение. D extrafokale Strahlung. E radiación extrafocal. I radiazione extra-focale. N buiten-focale straling. P promieniowanie pozaogniskowe. S extrafokal strålning. (881)
25. **extraterrestrial solar radiation** : solar radiation incident on the outer limit of the Earth's atmosphere. ★ rayonnement solaire extraterrestre → *rayonnement 99.* R заатмосферное солнечное излучение. D extraterrestrische Sonnenstrahlung. E radiación solar extraterrestre. I radiazione solare extraterrestre. N buitenaardse zonnestraling. P ..... S extraterrester solstrålning. (845)
26. **far-field radiation pattern** : → *pattern 9*
27. **gamma radiation** : electromagnetic radiation emitted in the process of nuclear transition or particle annihilation. ★ rayonnement gamma → *rayonnement 69.* R ..... D Gammastrahlung. E radiación gamma. I radiazione gamma. N gammastraling. P promieniowanie γ. S gammastrålning. (026)
28. **gamma radiation** : radiation consisting of photons emitted in the process of nuclear transition or particle annihilation. ★ rayonnement gamma → *rayonnement 70.* R гамма-излучение. D Gammastrahlung. E radiación gamma. I radiazione gamma. N gammastraling. P promieniowanie gamma. S gammastrålning. (391)
29. **gamma radiation** (*Syn.* gamma rays) : radiation consisting of photons emitted in the process of nuclear transformation or of particle annihilation. ★ rayons gamma → *rayon 27.* R гамма-излучение. D Gammastrahlung. E rayos gamma; radiación gamma. I radiazione gamma; raggi gamma. N gammastraling; gammastralen. P promieniowanie gamma; promienie gamma. S gammastrålning. (881)
30. **germicidal radiation** : optical radiation capable of killing pathogenic micro-organisms. ★ rayonnement germicide → *rayonnement 73.* R гермицидное излученне. D keimtötende Strahlung. E radiación germicida. I radiazione germicida. N kiemdodende straling. P promieniowanie bakteriobójcze. S ..... (845)
31. **global solar radiation** : combined direct solar radiation and diffuse sky radiation. ★ rayonnement solaire global → *rayonnement 100.* R общее солнечное излучение. D Globalstrahlung. E radiación solar global. I radiazione solare globale. N totale zonnestraling. P promieniowanie słoneczne całkowite. S globalstrålning. (845)
32. **heterogeneous radiation** : ionizing radiation consisting of photons of various energies, or corpuscles of one kind having different kinetic energies. ★ rayonnement hétérogène → *rayonnement 74.* R немоноэнергетическое излучение. D inhomogene Strahlung. E radiación heterogénea. I radiazione eterogenea. N heterogene straling. P promieniowanie niejednorodne. S heterogen strålning. (881)
33. **incoherent radiation** : radiation characterised by a very low degree of coherence. ★ rayonnement incohérent → *rayonnement 75.* R некогерентное излучение. D inkohärente Strahlung. E radiación incoherente. I radiazione incoerente. N incoherente straling. P promieniowanie niespójne; promieniowanie niekoherentne. S inkoherent strålning. (731)
34. **indirectly ionizing radiation** (*Syn.* indirectly ionizing particles) : radiation comprising uncharged particles (neutrons, photons) which ca liberate directly ionizing particles or can initiate nuclear transformations. ★ rayonnement indirectement ionisant → *rayonnement 76.* R косвенно-ионизирующее излучениеие. D indirekt ionisierende Strahlung; indirekt ionisierende Teilchen. E radiación indirectamente ionizante. I radiazione indirettamente ionizzante; particelle indirettamente ionizzanti. N indirect ioniserende straling; indirect ioniserende deeltjes. P promieniowanie jonizujące pośrednio; cząstki jonizujące pośrednio. S indirekt joniserande strålning. (881)
35. **infrared radiation** : optical radiation for which the wavelenghts are longer than those for visible radiation. *Note.* — For infrared radiation, the range between 780 nm and 1 mm is commonly subdivided into: IR-A 780.....1400nm, IR-B 1,4.....3μm, IR-C 3μm.....1mm. ★ rayonnement infrarouge → *rayonnement 77.* R инфракрасное излучение. D infrarote Strahlung. E radiación infrarroja. I radiazione infrarossa. N infrarode straling. P promieniowanie podczerwone. S infraröstrålning. (731,841,845)
36. **infra-red radiation panel** : → *panel 5*
37. **ionizing radiation** : radiation consisting of directly or indirectly ionizing particles (including photons) or a mixture of both. *Note.* — By convention, visible and ultra-violet radiation are excluded. ★ rayonnement ionisant → *rayonnement 81.* R ионизирующее излучение. D ionisierende Strahlung. E radiación ionizante. I radiazione ionizzante. N ioniserende straling. P promieniowanie jonizujące. S joniserande strålning. (391,881)
38. **leakage radiation** : the radiation passing through a source housing except for that in the useful beam. ★ rayonnement de fuite → *rayonnement 59.* R излучение утечки. D Durchlassstrahlung. E radiación de fuga. I radiazione di fuga. N lekstraling. P promieniowanie upływowe. S läckstrålning. (881)
39. **long wave infra-red radiation** : the infra-red radiation having maximum emission at a wavelength above 4 micrometers. ★ rayonnement infrarouge long → *rayonnement 79.*

R инфракрасное длинноволновое излучение. D lange Infrarotstrahlung. E radiación infrarroja de onda larga. I raggi infrarossi a lunghezza d'onda lunga. N langegolf-infraroodstraling. P promieniowanie podczerwone długofalowe. S långvågig infrastrålning. (841)

40. **luminous efficacy of radiation** : → *efficacy 2*

41. **man-made radiation** : ionizing radiation emitted by artificial or concentrated natural, radioactive material or resulting from the operation of high voltage apparatus, such as X-ray apparatus or particle accelerators, of nuclear reactors, or from nuclear explosions. ★ rayonnement artificiel → *rayonnement 48.* R излучение источников, созданных человеком. D künstlich erzeugte Strahlung. E radiación artificial. I radiazione artificiale. N kunstmatige straling. P promieniowanie sztuczne. S artificiell strålning. (881)

42. **medium wave infra-red radiation** : the infra-red radiation having maximum emission at a wavelength between 2 and 4 micrometers. ★ rayonnement infrarouge moyen → *rayonnement 80.* R средневолновое инфракрасное излучение. D mittlere Infrarotstrahlung. E radiación infrarroja de onda media. I raggi infrarossi a lunghezza d'onda media. N middengolf-infraroodstraling. P promieniowanie podczerwone średniofalowe. S infrastrålning av medelvåglängd. (841)

43. **mixed radiation** : ionizing radiation consisting of different kinds of particles (for example, corpuscles and photons). ★ rayonnement mixte → *rayonnement 83.* R смешанное излучение. D Mischstrahlung. E radiación mixta. I radiazione mista. N gemengde straling. P promieniowanie mieszane. S blandad strålning. (881)

44. **monochromatic radiation** : 1 — In theory, radiation consisting of a single wavelength or frequency. 2 — In practice, radiation of a very small range of wavelengths or frequencies which can be described by stating a single wavelength or frequency. ★ rayonnement monochromatique → *rayonnement 84.* R монохроматическое излучение. D monochromatische Strahlung. E radiación monocromática. I radiazone monocromatica. N monochromatische straling. P promieniowanie monochromatyczne. S monokromatisk strålning. (731)

45. **monochromatic radiation** : radiation characterized by a single frequency. In practice, radiation of a very small range of frequencies which can be described by stating a single frequency. *Note.* — The wavelength in air or *in vacuo* is also used to characterize a monochromatic radiation. ★ radiation monochromatique → *radiation 6.* R монохроматическое излучение. D monochromatische Strahlung. E radiación monocromática. I radiazione monocromatica. N monochromatische straling. P promieniowanie monochromatyczne. S monokromatisk strålning. (845)

46. **monoenergetic radiation** : ionizing radiation consisting of photons with nearly the same energy, or corpuscles of one kind having nearly the same kinetic energy. ★ rayonnement monoénergétique → *rayonnement 86.* R моноэнергетическое излучение. D monoenergetische Strahlung. E radiación monoenergética. I radiazione monoenergetica. N monoënergetische straling. P promieniowanie monoenergetyczne. S monoenergetisk strålning. (881)

47. **natural radiation** : ionizing radiation at a point attributable to natural sources, including those in the terrestrial environment, such as those in living organisms and extra-terrestrial sources. ★ rayonnement naturel → *rayonnement 87.* R естественное излучение. D natürliche Strahlung. E radiación natural. I radiazione naturale. N natuurlijke straling. P promieniowanie naturalne. S naturlig strålning. (881)

48. **near-field radiation pattern** : → *pattern 18*

49. **nuclear radiation** : radiation emitted from atomic nuclei : alpha and beta particles, neutrons, gamma radiation, etc. ★ rayonnement nucléaire → *rayonnement 89.* R ядерное излучение. D Kernstrahlung. E radiación nuclear. I radiazione nucleare. N nucleaire straling. P promieniowanie jądrowe. S nukleär strålning. (881)

50. **optical radiation** : electromagnetic radiation at wavelengths between the region of transition to X-rays ($\lambda \approx$ 1 nm) and the region fo transition to radio waves ($\lambda \approx$ 1 mm). ★ rayonnement optique → *rayonnement 90.* R оптическое излучение. D optische Strahlung. E radiación óptica. I radiazione ottica. N optische straling. P promieniowanie optyczne. S optisk strålning. (731,845)

51. **polarized radiation** : radiation whose electromagnetic field, which is transversal, is oriented in defined directions. *Note.* — The polarization can be rectilinear, elliptic or circular. ★ rayonnement polarisé → *rayonnement 92.* R поляризованное излучение. D polarisierte Strahlung. E radiación polarizada. I radiazione polarizzata. N gepolariseerde straling. P promieniowanie spolaryzowane. S polariserad strålning. (845)

52. **primary radiation** : the radiation coming directly from the target of the X-ray tube or accelerator or from the source of gamma-rays. ★ rayonnement primaire → *rayonnement 93.* R первичное излучение. D Primärstrahlung. E radiación primaria. I radiazione primaria. N primaire straling. P promieniowanie pierwotne. S primärstrålning. (881)

53. **prompt gamma radiation** : gamma radiation accompanying the fission process without measurable delay. ★ rayonnement gamma instantané → *rayonnement 72.* D prompte Gammastrahlung. E radiación gamma instantánea. I radiazione gamma istantanea. N prompte gammastraling. P natychmiastowe promieniowanie γ. S prompt gammastrålning. (026)

54. **prospecting radiation meter** : → *meter 44*

55. **radiation** : the emission of energy or of particles of matter. ★ radiation → *radiation 4.* R ..... D Strahlung. E radiación. I radiazione. N straling. P promieniowanie. S strålning. (026)

56. **radiation** : 1. The phenomenon by which energy, in the form of waves or particles, emanates from a source into space. 2. Energy transferred through space in the form of waves or particles. *Note.* — The associated verb is : "to radiate". ★ rayonnement → *rayonnement 44.* R радиация. D Strahlung. E radiación. I radiazione. N straling. P promieniowanie. S strålning. (702)

57. **radiation** : emission or propagation of energy in the form of waves or particles. ★ rayonnement → *rayonnement 45.* R излучение. D Strahlung. E radiación. I radiazione. N straling. P promieniowanie. S strålning. (841,881)

58. **radiation angle** : → *angle 48*

59. **radiation biology** : → *biology 1*

60. **radiation charge meter** (*Syn.* charge integrator) : → *integrator 1*

61. **radiation counter tube** : → *counter tube 22*

62. **radiation damage** : → *damage 2*

63. **radiation detector** : → *detector 28*

64. **radiation diagram** (*Syn.* radiation pattern) : → *pattern 26*

65. **radiation efficiency** : → *efficiency 35*

66. **radiation factor** : → *factor 148*

67. **radiation field** : → *field 54*

68. **radiation hazard** : → *hazard 3*

69. **radiation hygiene** : → *hygiene 1*

70. **radiation index** : → *index 33*

71. **(radiation) indicator** : → *indicator 20*

72. **radiation intensity** : → *intensity 17*

73. **radiation intensity** : → *intensity 18*

74. **radiation lobe** : → *lobe 5*

75. **radiation measuring assembly** (*Syn.* radiation meter) : → *meter 46*

76. **radiation meter** : → *meter 46*

77. **radiation mode** : → *mode 69*

78. **(radiation) monitor** : → *monitor 11*

79. **(radiation) multi-parameter analyzing assembly** : → *analyzing 1*

80. **radiation pattern** : → *pattern 23*

81. **radiation pattern** : → *pattern 24*

82. **radiation pattern** : → *pattern 25*

83. **radiation pattern** : → *pattern 26*

84. **radiation pattern** : → *pattern 27*

85. **radiation physicist** : → *physicist 1*

86. **radiation physics** : → *physics 2*

87. **radiation protection** : → *protection 47*

88. **radiation protection technician** : → *technician 2*

89. **radiation quality** : → *quality 11*

90. **radiation resistance** : → *resistance 43*

91. **radiation safety officer** : → *officer 1*
92. **radiation sensitivity** : → *sensitivity 19*
93. **radiation sickness** : → *sickness 1*
94. **radiation source** : → *source 23*
95. **radiation spectrometer** : → *spectrometer 6*
96. **radiation survey** (*Syn.* protection survey) : → *survey 1*
97. **(radiation) test site** : → *site 1*
98. **(radiation) thermocouple** : → *thermocouple 1*
99. **(radiation) thermopile** : → *thermopile 2*
100. **(radiation) warning assembly** : → *assembly 22*
101. **radiation workers - category A** : → *worker 2*
102. **radiation workers - category B** : → *worker 3*
103. **reflected (global) solar radiation** : radiation that results from reflection of the global solar radiation by the surface of the Earth and by any surface intercepting that radiation. ★ rayonnement solaire (global) réfléchi → *rayonnement 101.* R отражённое солнечное излучение. D reflektierte Globalstrahlung. E radiación solar (global) reflejada. I radiazione solare globale riflessa. N gereflecteerde zonnestraling. P promieniowanie słoneczne całkowite odbite. S reflekterad globalstrålning. (845)
104. **relative biological effectiveness (of radiation)** : → *effectiveness 2*
105. **residual radiation** : unwanted remainder of the useful beam after it has fulfilled its purpose. ★ rayonnement résiduel → *rayonnement 94.* R остаточное озлучение. D Reststrahlung des Nutzstrahlenbündels. E radiación residual. I radiazione residua. N reststraling. P promieniowanie szczątkowe. S reststrålning. (881)
106. **scattered radiation** : radiation which, during passage through a material, has been deviated from its original direction or changed in energy by scattering. ★ rayonnement diffusé → *rayonnement 63.* R рассеянное излучение. D Streustrahlung. E radiación dispersa; radiación difusa. I radiazione diffusa. N verstrooide straling. P promieniowanie rozproszone. S spridd strålning. (881)
107. **secondary radiation** (*Syn.* re-radiation) : → *re-radiation 1*
108. **secondary radiation** : the ionizing radiation emitted by matter as a result of an interaction of the primary radiation with the medium under consideration. ★ rayonnement secondaire → *rayonnement 96.* R вторичное излучение. D Sekundärstrahlung. E radiación secundaria. I radiazione secondaria. N secundaire straling. P promieniowanie wtórne. S sekundärstrålning. (881)
109. **short wave infra-red radiation** : the infra-red radiation having maximum emission at a wavelength equal to or below 2 micrometers. ★ rayonnement infrarouge court → *rayonnement 78.* R коротковолновое инфракрасное излучение. D kurze Infrarotstrahlung. E radiación infrarroja de onda corta. I raggi infrarossi a lunghezza d'onda corta. N kortegolf-infraroodstraling. P promieniowanie podczerwone krótkofalowe. S kortvågig infrastrålning. (841)
110. **solar radiation** : electromagnetic radiation from the Sun. ★ rayonnement solaire → *rayonnement 97.* R солнечное излучение. D Sonnenstrahlung. E radiación solar. I radiazione solare. N zonnestraling. P promieniowanie słoneczne. S solstrålning. (845)
111. **stray radiation** : radiation not serving any useful purpose. *Note.* — It includes leakage radiation, residual radiation, and scattered radiation from irradiated objects. ★ rayonnement parasite → *rayonnement 91.* R паразитное излучение. D Störstrahlung. E radiación parásita. I radiazione parassita. N strooistraling. P promieniowanie pasożytnicze. S ströstrålning. (881)
112. **synchrotron radiation** : emission from highly accelerated electrically charged free particles, e.g. in circular orbits. ★ rayonnement synchrotron → *rayonnement 102.* R синхротронное излучение. D Synchrotron-Strahlung. E radiación sincrotrónica. I radiazione da sincrotrone. N synchrotronstraling. P promieniowanie synchrotronowe; promieniowanie rozpędzonych ładunków elektrycznych w synchrotonie. S synkrotonstrålning. (845)
113. **thermal detector of radiation** : → *detector 38*
114. **thermal radiation** : 1. Process of emission in which the radiant energy originates in the thermal agitation of the particles of matter such as atoms, molecules, ions. 2. The radiation emitted by that process. ★ rayonnement thermique → *rayonnement 103.* R тепловое излучение. D Temperaturstrahlung. E radiación térmica. I emissione termica. N thermische straling; warmtestraling. P promieniowanie temperaturowe. S temperaturstrålning. (845)
115. **thermal (radiation) detector** (*Syn.* thermal detector of radiation) : → *detector 38*
116. **ultraviolet radiation** : optical radiation for which the wavelenghts are shorter than those for visible radiation. *Note.* — For ultraviolet radiation, the range between 100 nm and 400 nm is commonly subdivided into: UV-A 315.....400nm, UV-B 280.....315nm, UV-C 100.....280nm. ★ rayonnement ultraviolet → *rayonnement 104.* R ультрафиолетовое излучение. D ultraviolette Strahlung. E radiación ultravioleta. I radiazione ultravioletta. N ultraviolette straling. P promieniowanie nadfioletowe. S ultraviolettstrålning. (731,845)
117. **visible radiation** (*Syn.* light) : → *light 25*
118. **visible radiation** : any optical radiation capable of causing a visual sensation directly. *Note.* — There are no precise limits for the spectral range of visible radiation since they depend upon the amount of radiant power reaching the retina and the responsivity of the observer. The lower limit is generally taken between 360 nm and 400 nm and the upper limit between 760 nm and 830 nm. ★ rayonnement visible → *rayonnement 106.* R видимое излучение. D sichtbare Strahlung. E radiación visible. I radiazione visibile. N zichtbare straling. P promieniowanie widzialne. S synlig strålning. (845)
119. **whole-body radiation meter** : → *meter 78*
120. **Wien's law (of radiation)** : → *law 15*
121. **X radiation** : electromagnetic penetrating radiation having a much shorter wavelength than that of visible light. In nuclear reactions it is customary to refer to photons originating in the nucleus as gamma rays, and those originating in the extranuclear part of the atom as X rays. ★ rayonnement X → *rayonnement 107.* R ..... D Röntgenstrahlung. E radiación X. I radiazione X. N röntgenstraling. P promieniowanie X. S röntgenstrålning. (026,391)
122. **2π[4π] radiation detector** : → *detector 43*

radiative

1. **linear radiative stopping power** : → *power 78*
2. **radiative capture** : → *capture 5*
3. **radiative inelastic scattering** : → *scattering 20*
4. **radiative inelastic scattering cross-section** : → *cross-section 22*
5. **radiative mass stopping power** : → *power 155*

radiator

1. **complete radiator** (*Syn.* black body (UK); blackbody (USA)) : a thermal radiator which absorbs completely all electromagnetic incident radiation, whatever the wavelength, the direction of incidence or the polarization. ★ corps noir → *corps 8.* R полный излучатель; абсолютно черное тело. D schwarzer Körper (Gesamtstrahler). E cuerpo negro. I corpo nero. N zwarte straler. P promiennik zupełny; ciało czarne. S totalstrålare; svart kropp. (841)
2. **isotropic radiator** : an hypothetical antenna, without loss, having equal radiation intensities in all directions and serving as a convenient reference for expressing the directionnal properties of actual antennas. ★ antenne isotrope → *antenne 98.* R изотропная антенна; изотропный излучатель. D isotroper Strahler. E radiador isotrópico; antena isotrópica. I radiatore isotropo. N bolstraler; isotrope straler. P radiator izotropowy. S isotrop antenn. (712)
3. **Lambertian radiator** (*Syn.* Lambertian source) : a radiator or surface for which the radiation emitted is distributed angularly according to Lambert's cosine law. ★ source lambertienne → *source 25.* R излучатель Ламберта. D Lambertscher Strahler; Lambertsche Quelle. E radiador lambertiano; fuente lambertiana. I radiatore lambertiano; sorgente lambertiana. N straler van Lambert; Lambertstraler; bron van Lambert; Lambertbron. P powierzchnia lambertowska; źródło lambertowskie. S Lambert-strålare. (731)
4. **non-selective radiator** : thermal radiator whose spectral emissivity is constant with respect to wavelength over the spectral range considered. ★ radiateur non sélectif → *radiateur 4.* R неселективный излучатель. D aselektiver Strahler. E radiador no selectivo. I radiatore non selettivo. N niet-selectieve straler. P promiennik nieselektywny. S icke-selektiv strålare. (845)

5. **Planckian radiator** (*Syn.* blackbody) : ideal thermal radiator that absorbs completely all incident radiation, whatever the wavelength, the direction of incidence or the polarization. This radiator has, for any wavelength and any direction, the maximum spectral concentration of radiance for a thermal radiator in thermal equilibrium at a given temperature. ★ radiateur de Planck → *radiateur 3.* R излучатель Планка; чёрное тело. D Planckscher Strahler; Schwarzer Körper. E radiador planckiano. I radiatore di Planck; corpo nero. N zwarte straler. P ciało czarne; promiennik zupełny; promiennik Plancka. S Planck-strålare; svart kropp. (845)
6. **primary radiator** : the radiating element of a reflector or lens antenna which is coupled to the transmitter or receiver directly, or through a feed line, and which illuminates the reflector or the lens. *Notes. 1* — An antenna may include more than one primary radiator. *2* — In the case of a multiple reflector antenna, the primary radiator illuminates a sub-reflector. ★ source primaire → *source 29.* R первичный излучатель (антенны). D Primärstrahler; Primärerreger. E radiador primario; fuente primaria. I radiatore primario. N primaire straler. P radiator pierwotny. S primärstrålare. (712)
7. **radiator** : a component through which the transformer oil or cooling liquid circulates and is cooled. ★ réfrigérant → *réfrigérant 1.* R радиатор трансформатора. D Kühler. E refrigerante. I radiatore. N radiator. P radiator. S kylare; radiator. (811)
8. **selective radiator** : thermal radiator whose spectral emissivity varies with wavelength over the spectral range considered. ★ radiateur sélectif → *radiateur 6.* R селективный излучатель. D selektiver Strahler. E radiador selectivo. I radiatore selettivo. N selectieve straler. P promiennik selektywny. S selektiv strålare. (845)
9. **slot radiator** : a radiating element formed by a slot in a conducting surface. ★ fente rayonnante → *fente 7.* R щелевой излучатель. D Schlitzstrahler. E radiador de ranura. I fessura irradiante. N sleufstraler. P radiator szczelinowy. S slits(strålare). (712)
10. **thermal radiator** : source emitting thermal radiation. ★ radiateur thermique → *radiateur 7.* R тепловой излучатель. D Temperaturstrahler. E radiador térmico. I radiatore termico. N thermische straler; warmtestraler. P promiennik temperaturowy. S temperaturstrålare. (845)

radio

1. **basic transmission loss (of a radio link)** : → *loss 7*
2. **car radio** : radio broadcast receiver specially designed for listening in a vehicle in motion. ★ récepteur autoradio → *récepteur 6.* R автомобильный радиоприемник. (723)
3. **digital radio link** : → *link 10*
4. **digital radio section** : → *section 6*
5. **digital radio system** : → *system 43*
6. **pocket radio** : radio broadcast receiver of small dimensions, which can be carried in a pocket of the clothing. ★ récepteur de poche → *récepteur 9.* R карманный радиоприемник. (723)
7. **radio** : pertaining to the use of radio waves. ★ radio → *radio 1.* R радио. D Funk. E radio. I radio - radioelettrico. N radio. P droga przesyłowa (sygnału) radiowy. S radio. (701)
8. **radio control** : → *control 152*
9. **radio echo** : → *echo 18*
10. **radio environment** : → *environment 4*
11. **radio frequency** : → *frequency 159*
12. **radio (frequency) disturbance** : → *disturbance 13*
13. **radio frequency heating apparatus** : → *apparatus 12*
14. **radio frequency interference** : → *interference 19*
15. **radio (frequency) noise** : → *noise 65*
16. **radio frequency vision signal** : → *signal 153*
17. **radio horizon** : → *horizon 2*
18. **radio horizon distance** : → *distance 19*
19. **radio horizon range** (*Syn.* radio horizon distance) : → *distance 19*
20. **radio link** : → *link 33*
21. **radio propagation** : → *propagation 29*
22. **radio wave** : → *wave 43*
23. **(radio wave) lens** : → *lens 17*
24. **standard radio atmosphere** : → *atmosphere 16*
25. **standard radio horizon** : → *horizon 5*
26. **total loss (of a radio link)** : → *loss 103*
27. **transmission loss (of a radio link)** : → *loss 111*

radioactive

1. **closed radioactive source** : → *source 5*
2. **implant (radioactive)** : → *implant 1*
3. **radioactive aerosol** : → *aerosol 1*
4. **radioactive aerosol contamination meter** : → *meter 47*
5. **radioactive aerosol contamination monitor** : → *monitor 12*
6. **radioactive cemetery** : → *cemetery 1*
7. **radioactive concentration** : → *concentration 8*
8. **(radioactive) contamination** : → *contamination 7*
9. **radioactive decay** : → *decay 9*
10. **radioactive decay** : → *decay 10*
11. **(radioactive) decontamination** : → *decontamination 2*
12. **radioactive equilibrium** : → *equilibrium 8*
13. **radioactive fallout** : → *fallout 1*
14. **radioactive half-life** : → *half-life 3*
15. **radioactive material** : → *material 35*
16. **radioactive source** : → *source 24*
17. **radioactive tracer** : → *tracer 1*
18. **radioactive waste** : → *waste 1*
19. **radioactive waste management** : → *management 3*
20. **sealed radioactive source** : → *source 27*
21. **standard radioactive solution** : → *solution 1*
22. **standard radioactive source** : → *source 44*

radioactivity

1. **artificial radioactivity** : radioactivity originating from an induced nuclear reaction. ★ radioactivité artificielle → *radioactivité 2.* D künstliche Radioaktivität. E radiactividad artificial. I radioattività artificiale. N kunstmatige radioactiviteit; geïnduceerde radioactiviteit. P promieniotwórczość sztuczna. S artificiell radioaktivitet. (026,881)
2. **induced radioactivity** : radioactivity induced by irradiation. ★ radioactivité induite → *radioactivité 3.* R наведенная радиоактивность. D induzierte Radioaktivität. E radiactividad inducida. I radioattività indotta. N geïnduceerde radioactiviteit. P radioaktywność wywołana. S inducerad radioaktivitet. (881)
3. **natural radioactivity** : radioactivity of naturally occurring nuclides. ★ radioactivité naturelle → *radioactivité 4.* D natürliche Radioaktivität. E radiactividad natural. I radioattività naturale. N natuurlijke radioactiviteit. P promieniotwórczość naturalna. S naturlig radioaktivitet. (026,881)
4. **radioactivity** : the property of certain nuclides of spontaneously emitting corpuscles or gamma radiation, or of emitting X-radiation following orbital electron capture, or of undergoing spontaneous nuclear fission. ★ radioactivité → *radioactivité 1.* R радиоактивность. D Radioaktivität. E radiactividad. I radioattività. N radioactiviteit. P radioaktywność. S radioaktivitet. (026,881)

radiocartograph

1. **(body) radiocartograph** : an assembly designed to establish the chart of the radioactivity distribution of a part of the human body, after absorption of a suitable radionuclide. ★ (anthropo) radiocartographe → *radiocartographe 1.* R радиокартограф (тела человека). D (Körper-) Radiokartograph. E radiocartógrafo (para personas). I radiocartografo. N lichaamsradiocartograaf; radiocartograaf. P radiokartograf (ciała). S radiokartograf. (392)

radio-cassette

1. **car radio-cassette** : car radio which includes means for the reproduction of previously recorded cassettes. ★ récepteur autoradio-cassettes → *récepteur 7.* R автомобильная магнитола. (723)
2. **radio-cassette recorder** : → *recorder 13*

radiochemical

1. **radiochemical purity** : → *purity 5*

radiochromatograph

1. **radiochromatograph** : a measuring assembly designed to draw a representative curve of the activity of different components of a mixture, labelled with radionuclides and deposited, by a chromatograph method, on a paper strip moving in front of a radiation detector. ★ radiochromatographe → *radiochromatographe 1.* R радиохроматограф. D Radiochromatograph. E radiocromatógrafo. I radiocromatografo. N radiochromatograaf. P radiochromatograf. S strålningskromatograf. (392)

radio-colloid

1. **radio-colloid** : a colloid in which some atoms are radioactive. ★ radiocolloïde → *radiocolloïde 1.* R радиоколлоид. D Radiokolloid. E radiocoloide. I radiocolloide. N radioacrief coloïde. P koloid radioaktywny. S radiokolloid. (881)

radiocommunication

1. **radiocommunication** : telecommunication by means of radio waves. ★ radiocommunication → *radiocommunication 1.* R радиосвязь. D Funk; Informationsübertragung über Funkwellen. E radiocomunicación. I radiocomunicazione. N radiocommunicatie. P radiokomunikacja rozsiewcza; radiodyfuzja. S radiokommunikation. (701)
2. **space radiocommunication** : any radiocommunication involving the use of one or more space stations or the use of one or more reflecting satellites or other objects in space. *Notes. 1* — Communication between two places on Earth by means of space radiocommunication is often called "satellite communication". *2* — Any radiocommunication other than space radiocommunication or radioastronomy is called "terrestrial radiocommunication" and a station effecting terrestrial radiocommunication is a "terrestrial station". ★ radiocommunication spatiale → *radiocommunication 2.* R космическая радиосвязь. D Nachrichtenübertragung im Weltraum. E radiocomunicación espacial. I radiocomunicazione spaziale. N ruimtecommunicatie. P radiokomunikacja satelitarna. S rymdradiokommunikation. (725)

radiodermatitis

1. **radiodermatitis** : an inflammation of the skin produced by exposure to X-rays or other ionizing radiations. ★ radiodermite → *radiodermite 1.* R лучевой дерматит. D Strahlen-Dermatitis. E radiodermatitis. I radiodermite. N stralingsdermatitis. P popromienne zapalenie skóry. S stråldermatit. (881)

radiodetermination

1. **satellite radiodetermination** : radiodetermination which makes use of a satellite system. *Note.* — Radiodetermination: the determination of position, or the obtaining of information relative to position, by means of the propagation properties of radiowaves. ★ radiorepérage par satellite → *radiorepérage 1.* R спутниковое радиоопределение. D Satelliten-Funkortung. E radiodeterminación por satélite. I radiodeterminazione via satellite. N satelliet-radiopeiling. P radionamierzanie satelitarne. S satellitradiolokalisering. (725)

radio-duct

1. **tropospheric (radio-)duct** : a quasi-horizontal stratification in the troposphere within which radio energy of a sufficiently high frequency is substantially confined and propagates with much lower attenuation than would be obtained in a homogeneous atmosphere. *Note.* — The tropospheric radio-duct consists of a ducting layer and, in the case of an elevated duct, a portion of the underlaying atmosphere. ★ conduit (troposphérique) → *conduit 6.* D (troposphärischer) Duct; troposphärischer Wellenleiter. P dukt (radiowy) troposferyczny. (705)

radioelement

1. **radioelement** : radioactive chemical element. ★ radioélément → *radioélément 1.* D Radioelement. E radioelemento. I radioelemento. N radioëlement. P pierwiastek promieniotwórczy. S radioelement. (026)
2. **radioelement** : a chemical element having one or more naturally occurring radioisotopes. ★ radio-élément → *radioélément 2.* R радиоактивный элемент. D radioaktives Element. E radioelemento. I radioelemento. N radio-element. P radioelement. S radioelement. (881)

radio-frequency

1. **radio-frequency input power** (*Syn.* driving power) : → *power 33*

radiograph

1. **radiograph** : the image produced by radiography. ★ radiogramme → *radiogramme 1.* R радиографическое изображение. D Röntgenaufnahme. E radiografía. I radiogramma. N röntgenopname; radiogram. P radiogram. S röntgenbild. (881)

radiographer

1. **radiographer** : a person specializing in the practical application of radiation in diagnostic radiology, radiotherapy or industrial radiography. ★ technicien en radiologie → *technicien 2.* R техник-радиограф. D Medizinisch-Technische(r) Radiologieassistent(in). E técnico en radiología. I tecnico di radiologia. N röntgenassistent. P operator urządzeń radiologicznych. S röntgenassistent. (881)

radiographic

1. **radiographic cassette** : → *cassette 3*
2. **radiographic contrast** : → *contrast 13*
3. **radiographic film** : → *film 11*
4. **serial radiographic device** (*Syn.* spot-film device) : → *device 53*

radiography

1. **electron radiography** (*Syn.* ionography) : → *ionography 1*
2. **radiography** (*Syn.* roentgenography (USA)) : the production of an image of an object on film, or other kind of sensitized plate, usually by means of X-radiation or gamma radiation, the contrast between different areas of the image being the result of differential interaction of the radiation in the object. ★ radiographie → *radiographie 1.* R радиография; рентгенография. D Röntgenaufnahme. E radiografía; roentgenografía. I radiografia. N radiografie; röntgenorgrafie. P radiografia; rentgenografia. S radiografi. (881)

radioisotope

1. **radioisotope** : a radioactive isotope of a specified element. ★ radio-isotope → *radio-isotope 2.* R радиоизотоп. D Radioisotop. E radioisotopo. I radioisotopo. N radioisotoop. P radioizotop. S radioisotop. (026,881)

radiological

1. **radiological physics** : → *physics 3*
2. **radiological protection** : → *protection 49*
3. **radiological technologist** : → *technologist 1*

radiologist

1. **radiologist** : in medical radiology, a medical specialist employing ionizing radiation for the diagnosis or treatment of disease. ★ (médecin) radiologiste → *médecin 1.* R радиолог. D Radiologe. E radiólogo. I radiologo. N radioloog. P radiolog. S radiolog. (881)

radiology

1. **diagnostic radiology** : medical radiology applied to diagnosis. ★ radiodiagnostic → *radiodiagnostic 1.* R диагностическая радиология. D Röntgendiagnostik; (Strahlendiagnostik). E radiodiagnóstico; diagnóstico radiológico. I radiodiagnostica. N diagnostische radiologie. P radiodiagnostyka. S diagnostisk radiologi. (881)
2. **medical radiology** : the applications of ionizing radiation in medicine. ★ radiologie médicale → *radiologie 4.* R медицинская радиология. D medizinische Radiologie. E radiología médica. I radiologia medica. N medische radiologie. P radiologia medyczna. S medicinsk radiologi. (881)
3. **phantom (radiology)** : → *phantom 5*
4. **radiology** : the fields of application of ionizing radiation, e.g., medical radiology and industrial radiology. ★ radiologie → *radiologie 3.* R радиология. D Radiologie. E radiología. I radiologia. N radiologie. P radiologia. S radiologi. (881)

radioluminescence

1. **radioluminescence** : luminescence caused by X-rays or radioactive radiations. ★ radioluminescence → *radioluminescence 1.* R радиолюминесценция.

D Radioluminezenz. E radioluminiscencia. I radioluminescenza. N stralingsluminescentie. P radioluminescencja. S radioluminiscens. (845)

radiometer

1. **acoustic radiometer** : instrument for measuring acoustic radiation pressure. ★ radiomètre acoustique → *radiomètre 3.* R акустический радиометр. D Schallstrahlungsdruckmesser. E radiómetro acústico. I radiometro acustico. N stralingsdrukmeter. P radiometr akustyczny. S ljudstrålningstryckmätare. (801)
2. **radiometer** : instrument for measuring radiometric quantities. ★ radiomètre → *radiomètre 1.* R радиометр. D Radiometer. E radiómetro. I radiometro. N stralingsmeter; radiometer. P radiometr. S radiometer; strålningsmätare. (845)

radiometric

1. **radiometric bore-hole logging assembly** : → *logging 1*

radiometry

1. **radiometry** : measurement of the quantities associated with radiant energy. ★ radiométrie → *radiométrie 1.* R радиометрия. D Radiometrie. E radiometría. I radiometria. N radiometrie; stralingsmeting. P radiometria. S radiometri; strålningsmätning. (845)

radionavigation

1. **satellite radionavigation** : satellite radiodetermination used for radionavigation. *Note.* — Radionavigation: radiodetermination used for the purposes of navigation, including obstruction warning. ★ radionavigation par satellite → *radionavigation 1.* R спутниковая радионавигация. D Satelliten-Funknavigation. E radionavegación por satélite. I radionavigazione via satellite. N satelliet-radionavigatie. P radionawigacja satelitarna. S satellitnavigering. (725)

radio-noise

1. **monthly mean solar radio-noise flux** : → *flux 18*

radionuclide

1. **radionuclide** : a radioactive nuclide. ★ radionucléide → *radionucléide 1.* R радионуклид. D Radionuklid. E radionucléido. I radionuclide. N radionuclide. P radionuklid. S radionuklid. (026,391,881)
2. **radionuclide therapy** : → *therapy 8*

radionuclidic

1. **radionuclidic purity** : → *purity 6*

radiophonics

1. **radiophonics** : unusual audible effects deliberately produced by the mixing and processing of sound signals. ★ effet sonore → *effet 87.* R радиофоны. (723)

radiosensitivity

1. **radiosensitivity** : the property of a biological system to respond to ionizing radiation. ★ sensibilité aux rayonnements → *sensibilité 18.* R радиационная чувствительность. D Strahlenempfindlichkeit. E sensibilidad a las radiaciones; radiosensibilidad. I radiosensibilità. N stralingsgevoeligheid. P wrażliwość na promieniowanie. S strålkänslighet. (881)

radiotelegram

1. **radiotelegram** : a telegram, originating in or intended for a mobile station or a mobile earth station, transmitted on all or part of its route over the radiocommunication channels of a mobile service or the mobile-satellite service. ★ radiotélégramme → *radiotélégramme 1.* R радиотелеграмма. D Funktelegramm. E radiotelegrama. I radio telegramma. N radiogram. P radiotelegram. S radiotelegram. (721)

radiotelegraph

1. **radiotelegraph converter** : → *converter 14*
2. **Van Duuren radiotelegraph system** : → *system 248*

radiotelex

1. **radiotelex call** : → *call 49*

radiotherapist

1. **radiotherapist** : a radiologist employing ionizing radiation for radiotherapy. ★ (médecin) radiothérapeute → *médecin 2.* R радиотерапевт. D Strahlentherapeut. E radioterapista. I radioterapista. N radiotherapeut. P radioterapeuta. S radioterapeut. (881)

radiotherapy

1. **intracavitary radiotherapy** : radiotherapy in which the radiation source is introduced directly into a body cavity. ★ radiothérapie intracavitaire → *radiothérapie 8.* R внутриполостная радиотерапия. D intrakavitäre Kontakttherapie. E radioterapia intracavitaria. I radioterapia endocavitaria. N radiotherapie van lichaamsholte. P terapia wnękowa. S intrakavitär radioterapi. (881)
2. **radiotherapy** : medical radiology applied to therapy. ★ radiothérapie → *radiothérapie 1.* R радиотерапия. D Strahlentherapie. E radioterapia. I radioterapia. N stralingstherapie. P radioterapia. S radioterapi; strålbehandling. (881)

radius

1. **bottom radius** : the radius of the bottom of a groove. ★ rayon du fond du sillon → *rayon 12.* R радиус дна канавки. D Verrundungsradius. E radio de fondo del surco. I raggio del fondo del solco. N groefbodemradius. P promień dna rowka. S bottenradie. (806)
2. **effective radius of the Earth** : the radius of an ideal spherical Earth without atmosphere for which propagation paths are along straight lines, the heights and ground distances being the same as for the actual Earth in an atmosphere with a constant vertical gradient of refractivity. *Notes. 1* — The concept of effective radius of the Earth implies that the angles with the horizontal planes made at all points by the transmission paths are not too large. *2* — For an atmosphere having a standard refractivity gradient, the effective radius of the Earth is taken as equal to 8500 km, which corresponds approximately to 4/3 of the actual radius of the Earth. ★ rayon terrestre équivalent → *rayon 23.* D äquivalenter Erdradius. P promień Ziemi skuteczny. (705)
3. **effective stylus tip radius** : → *stylus tip 2*
4. **equivalent radius** (of a conductor or a multi-wire element) : the radius of a cylindrical conductor of circular cross-section having the same values for certain electrical characteristics as those of a conductor of arbitrary cross-section or a multi-wire element. ★ rayon équivalent → *rayon 14.* R эквивалентный радиус (провода или многопроводного элемента). D äquivalenter Radius (eines Leiters in einem Mehrdrahtelement). E radio equivalente (de un conductor o de un elemento multiconductor). I raggio equivalente. N equivalente straal. P promień zastępczy (przewodnika lub elementu wielodrutowego). S ekvivalent radie. (712)
5. **spherical reproducing stylus tip radius** : stylus tip radius in a plane passing along its axis. ★ rayon de la pointe de lecture sphérique → *rayon 10.* R радиус сферической воспроизводящей иглы. D Abspielnadelspitzen-Kugelradius. E radio de la punta de lectura esférica. I raggio dell'estremità della puntina di riproduzione sferica. N radius van de bolvormige weergavenaaldpunt. P promień kulistego wierzchołka igły. S radie hos sfärisk nålspets. (806)
6. **stylus tip radius** : the radius in a plane perpendicular to the record surface and passing through the line joining the stylus tip to the record centre. ★ rayon de la pointe de lecture → *rayon 9.* R радиус воспроизводящей иглы. D Abspielnadelspitzenradius. E radio de la punta de lectura. I raggio dell'estremità della puntina. N radius van de naaldpunt. P promień wierzchołka igły. S nålspetsradie. (806)

radome

1. **radome** : a cover usually intended for protecting an antenna from the effects of its physical environment without degrading significantly its electrical performance. ★ radome → *radome 1.* R защитный кожух (антенны). D Radom. E radomo; domo. I radome. N antennekoepel. P osłona. S radom. (712)

radon

1. **radon content meter** : → *content meter 5*

rail

1. **bonded rail joint** (*Syn.* electrical rail joint) : → *joint 8*
2. **centre conductor rail** : a conductor rail placed between the two running rails. ★ rail central de contact → *rail 6.* R центральный контактный рельс. D Mittelstromschiene. E rail central de contacto. I rotaia di contatto centrale. N stroomrail tussen beide benen. P trzecia szyna środkowa. S central strömskena. (811)
3. **conductor rail** (*Syn.* third rail) : a rigid metallic section or rail mounted on insulators and forming an overhead conductor or located near the running rails. ★ rail de contact → *rail 7.* R контактный рельс; третий рельс. D Stromschiene. E rail de contacto; tercer rail. I rotaia di contatto; terza rotaia. N stroomrail. P trzecia szyna. S strömskena. (811)
4. **conductor rail anchor** : → *anchor 4*
5. **conductor rail gap** : → *gap 1*
6. **conductor rail gauge** : → *gauge 1*
7. **conduit conductor rail** : a side or centre conductor rail located in a trough below running rail level. ★ rail de contact en caniveau → *rail 8.* R щелевой контактный рельс. D Schlitzkanalstromschiene. E rail de contacto en conducto. I rotaia di contatto incassata. N ..... P trzecia szyna kanałowa. S inbyggd strömskena. (811)
8. **electrical rail joint** : → *joint 8*
9. **electro-magnetic rail brake** (*Syn.* electro-magnetic track brake) : → *brake 14*
10. **insulated rail joint** : → *joint 13*
11. **overhead conductor rail** : a rigid rolled section forming an overhead contact line. ★ rail aérien de contact → *rail 5.* R воздушный контактный рельс. D Hängestromschiene. E rail aéreo de contacto. I linea aerea (di contatto) rigida. N stroomrail boven het spoor. P trzecia szyna górna. S överliggande strömskena. (811)
12. **rail joint bond** : → *bond 2*
13. **reaction rail** : a solid armature consisting of a rail. ★ rail de réaction → *rail 9.* R реактивный рельс. D Reaktionsschiene. E rail de reacción; rail inducido. I rotaia di reazione. N inductierail. P szyna reakcyjna; bieżnik. S reaktionsräls. (811)
14. **return conductor rail** (*Syn.* return current rail) : a conductor rail used instead of the running rail for the return currents. ★ rail de retour de courant → *rail 10.* R рельс обратного тока. D Stromrückleitungsschiene. E rail de retorno de corriente. I rotaia di contatto di ritorno. N retourstroomgeleiderrail. P szyna ślizgowa powrotna. S återgångsräl. (811)
15. **return current rail** (*Syn.* return conductor rail) : → *rail 14*
16. **side conductor rail** : a conductor rail placed on one or other side of the running rails. ★ rail latéral de contact → *rail 12.* R боковой контактный рельс. D seitliche Stromschiene. E rail lateral de contacto. I rotaia di contatto laterale. N stroomrail naast het spoor. P trzecia szyna boczna. S sidoströmskena. (811)
17. **third rail** (*Syn.* conductor rail) : → *rail 3*
18. **third rail collector** (*Syn.* shoegear) : → *shoegear 1*

rain

1. **rain rate** (*Syn.* precipitation rate) : → *rate 66*

rainfall

1. **rainfall rate** (*Syn.* precipitation rate) : → *rate 66*

raised

1. **raised pavement marker** (*Syn.* road stud) : → *stud 2*

rake

1. **rake of stylus** (*Syn.* recording angle or dig) : the angular deviation between the longitudinal axis of the stylus and a line perpendicular to the disk surface, both of which lie in a plane perpendicular to the record surface and tangent to the groove motion at the stylus tip. ★ inclinaison longitudinale → *inclinaison 5.* R продольный наклон резца (иглы). D Vorneigung des Schneidstichels bzw. des Abtasters. E inclinación longitudinal (de un buril de grabación o de una cabeza de lectura). I inclinazione longitudinale (di una puntina di incisione o di una testina di riproduzione). N sleephoek. P nachylenie wzdłużne. S nålvinkel (i spårriktningen). (806)

ram

1. **arc furnace ram** : a device similar to the swivel gantry system except that lifting and swivelling of the roof is by means of a power-operated ram. ★ bélier de four à arc → *bélier 1.* R плунжер дуговой печи. D Stempel. E martinete de horno de arco. I dispositivo di sollevamento di forno ad arco; cilindro volta del forno ad arco. N kipcilinder (van een boogoven). P suwak (pieca łukowego). S ..... (841)

rammed

1. **induction furnace rammed lining** : → *lining 4*

ramp

1. **ramp** : deviation of the conductor rail at each end of a section to facilitate the running on (leading ramp) and running off (trailing ramp) of the collector shoe. ★ plan incliné (d'engagement ou de dégagement) → *plan 32.* R отвод. D Auflauf oder Auslauf. E plano inclinado. I raccordo. N helling van oploopstuk (van stroomrail). P wślizg i ześlizg trzeciej szyny. S strömskeneramp. (811)
2. **unit ramp** : a continuous function, zero for all negative values of the independent variable and increasing linearly for all positive values, the increase being one unit for every unit of the independent variable. ★ rampe unité → *rampe 2.* R линейно-возрастающая единичная функция. D linearer Anstiegsvorgang. E rampa unidad. I rampa unitaria. N eenheidshellingfunctie. P funkcja o nachyleniu jednostkowym. S enhetsramp. (101)

random

1. **equivalent random circuit group** : → *group 8*
2. **equivalent random traffic intensity** : → *intensity 6*
3. **flat random noise** (*Syn.* white noise) : → *noise 93*
4. **periodic and/or random deviation** : → *deviation 15*
5. **random** : governed by the laws of chance, unpredictable, non-deterministic. ★ aléatoire → *aléatoire 1.* R случайный. D zufällig. E aleatorio. I aleatorio. N aselect. P przypadkowy; losowy. S slump-; slumpmässig. (101)
6. **random coincidence** : → *coincidence 6*
7. **random hunting** : → *hunting 7*
8. **random incidence** : → *incidence 9*
9. **random noise** : → *noise 66*
10. **random noise** : → *noise 67*
11. **random paralleling** : → *paralleling 3*
12. **random synchronizing** : → *synchronizing 7*
13. **random traffic** (*Syn.* Poisson traffic) : → *traffic 18*
14. **random winding** : → *winding 53*
15. **stationary random noise** : → *noise 83*

random-incidence

1. **random-incidence sensitivity** : → *sensitivity 20*

range

1. **adjustment range** (of a thermostatic switch) : the range of operating temperatures within which an operating temperature of a thermostatic switch may be set and the switch retain its stated characteristics. ★ gamme de réglage → *gamme 8.* R диапазон регулировки (термостатический выключатель). D Einstellbereich (eines Thermoschalters). E margen de regulación (de un conductor termostático). I gamma di regolazione (di un interruttore termostatico). N instelgebied van een thermostaat. P zakres nastawienia (łącznika termostatowego). S inställningsområde (hos termostatströmställare). (581)
2. **compression of the luminance range** : → *compression 9*
3. **contact wire range** : the sizes of conductors accommodated by a particular conductor barrel.(See also contact size.). ★ gamme des conducteurs → *gamme 12.* R ряд размеров проводников. D Drahtbereich des Kontaktes. E margen de los conductores (hilos desnudos). I gamma dei conduttori accoppiabili. N draaddoorsnedegebied waarvoor contact geschikt is. P ..... S ledarareor tillåtna för kontakt. (581)
4. **contrast range** (in television) : the ratio of the maximum to the minimum luminance levels of a scene or reproduced picture. ★ contraste maximal → *contraste 7.* R диапазон контраста (в телевидении). (723)
5. **contrast range** (of a picture signal source) : the maximum ratio of the output levels from a picture signal source.

★ contraste maximal → *contraste 8.* R диапазон контраста (датчика сигнала изображения). (723)

6. **contrast range** (of a display) : the maximum ratio of the luminance levels available on a display device. ★ contraste maximal d'un dispositif synthétiseur → *contraste 9.* R диапазон контраста (воспроизводящего устройства). (723)
7. **control range** : interval defined by the two extreme values that the controlled variable can assume under specified operating conditions. ★ étendue de régulation → *étendue 6.* R диапазон регулируемой величины. D Regelbereich. E margen de control. I campo di controllo. N regelgebied. P zakres regulacji. S reglerområde. (351)
8. **control range** (of a generating set) : the specified range of active power within which a power-controlled generating set must be able to operate. ★ bande de réglage → *bande 25.* R регулировочный диапазон мощности агрегата. D Wirkleistungs-Regelbereich (eines Generatorsatzes). E banda de regulación (de un grupo generador). I banda di regolazione (di un gruppo generatore). N regelband (van een produktie-eenheid). P zakres regulacyjny mocy (generatora). S styrområde. (603)
9. **controlling power range** : the sum of active power control ranges of the generating sets acted upon by the system regulator. ★ puissance réglante → *puissance 152.* R регулировочный диапазон энергосистемы. D Regelleistung. E potencia reglante. I potenza regolante. N (gebied van het) regelvermogen. P moc regulacyjna systemu. S effektreglerområde. (603)
10. **correcting range** (*Syn.* manipulated range) : interval defined by the two extreme values that the manipulated variable can assume. ★ étendue réglante → *étendue 9.* R диапазон регулирования. D Stellbereich. E margen de corrección. I campo di escursione della grandezza manipolata. N corrigerend gebied; regelend gebied. P zakres nastawiania. S ställområde. (351)
11. **counter range** : the range of reactor power level within which a particle counter is required for adequate measurement of the neutron flux density. ★ domaine de comptage → *domaine 3.* D Zählrohrbereich. E margen de recuento. I campo di conteggio. N tellergebied. P zakres licznikowy. S räknarområde. (026)
12. **cross-over range** : range at which the propagation loss caused by divergence is greater than that caused by absorption. ★ distance critique → *distance 8.* R критическая дистанция. D kritische Reichweite. E distancia crítica. I distanza critica. N kritische afstand. P zasięg krytyczny. S kritisk räckvidd. (801)
13. **current setting range** (of an over-current release) : the range between the minimum and maximum values over which the current setting of the release can be adjusted. ★ domaine du courant de réglage → *domaine 19.* R диапазон токов уставки (максимального расцепителя тока). D Strom-Einstellbereich (eines Überstromauslösers). E margen de corriente (intensidad) de regulación (de un disparador de sobreintensidad). I campo di taratura di corrente (di uno sganciatore di massima corrente). N instelbereik (van een overstroomlosser). P zakres nastawczy (wyzwalacza nadprądowego). S strömінställningsområde för överströmsutlösare. (441)
14. **dynamic operating range** (of an equipment) (*Syn.* working range (of an equipment)) : the range of values of a given characteristic of an input signal over which an equipment is designed to operate with a specified performance. *Note.* — The English term "working range" and the French term "dynamique d'un appareil" are generally used to define a quality of the equipment related to the dynamic range of the signal. ★ plage de fonctionnement → *plage 3.* R динамический рабочий диапазон (оборудования). D dynamischer Operationsbereich (einer Ausrüstung); Arbeitsbereich (einer Ausrüstung). E margen de funcionamiento (de un aparato). I campo di funzionamento dinamico (di un apparecchio); dinamica (di un apparecchio). N dynamisch werkgebied (van een toestel). P zakres pracy (urządzenia); dynamika (urządzenia). S dynamiskt driftområde. (702)
15. **dynamic range** (of a signal) : the difference, over a given period of time, between maximum and minimum signal levels, expressed in decibels. *Note.* — The minimum signal level must be greater than a specified usable signal level. ★ dynamique → *dynamique 13.* R динамический диапазон (сигнала). D dynamischer Bereich (eines Signals). E dinámica (de una señal); rango dinámico (de una señal). I campo dinamico di un segnale; dinamica di un segnale. N dynamiek (van een signaal). P zakres dynamiki sygnału. S dynamiskt område. (702)
16. **dynamic range** (of a sound signal) : the difference at a given point of the transmission chain over a given period of time between the maximum and minimum usable levels or a sound signal, expressed in decibels. ★ dynamique → *dynamique 16.* R динамический диапазон (звукового сигнала). (723)
17. **dynamic range** (of a piece of equipment or a sound channel) (*Syn.* system dynamic range) : the difference between the maximum and minimum sound signal levels that can be conveyed by a piece of equipment or a sound channel, expressed in decibels, between specified limits determined by the onset of non-linearity distortion at the upper extreme, and by an inadequate signal to noise ratio at the lower extreme. ★ dynamique → *dynamique 17.* R динамический диапазон (части оборудования или звукового канала); динамический диапазон системы. (723)
18. **dynamic range control** : → *control 91*
19. **effective range** (*Syn.* measuring range) : → *range 40*
20. **effective range** : that part of the operative range of an input energizing quantity (or characteristic quantity) within which the accucary requirements are met. ★ étendue de mesure → *étendue 4.* R область точной работы. D (Bemessungs-)Messbereich. E campo efectivo de medida. I campo di lavoro. N effectief gebied. P zakres działania w klasie. S effektivt område. (446)
21. **electronic tuning range** : the continuous frequency range in which the output power exceeds a stated value when only the electronic tuning voltage is varied. ★ plage de l'accord électronique → *plage 8.* R диапазон электронной перестройки. D elektronischer Durchstimmbereich. E gama de sintonía electrónica. I intervallo di accordo elettronico. N elektronisch afstemgebied. P zakres przestrajania elektronowego. S elektroniskt avstämningsområde. (531)
22. **expansion of the luminance range** : → *expansion 7*
23. **extreme range of an influencing factor** : the range of values of an influencing factor within which the relay suffers only spontaneously reversible changes while not necessarily complying with any other requirements. ★ domaine extrême d'un facteur d'influence → *domaine 20.* R предельный диапазон влияющего фактора. D Extrembereich eines Einflussfaktors. E campo extremo de un factor de influencia. I campo esterno di un fattore d'influenza. N uiterst gebied van een beïnvloedende factor. P zakres graniczny czynnika wpływającego. S gränsområde för påverkande faktor. (446)
24. **extreme range of an influencing quantity** : the range of values of an influencing quantity [factor] within which the relay suffers only spontaneously reversible changes while not necessarily complying with any other requirements. ★ domaine extrême d'une grandeur d'influence → *domaine 21.* R предельный диапазон влияющей величины. D Extrembereich einer Einflussgrösse. E campo extremo de una magnitud de influencia. I campo esterno di una grandezza d'influenza. N uiterst gebied van een beïnvloedende grootheid. P zakres graniczny wielkości wpływającej. S gränsområde för påverkande storhet. (446)
25. **flicker voltage range** : voltage fluctuations within a range of frequencies and amplitudes causing flicker to appear in the output of certain lighting equipment. ★ tension de papillotement → *tension 160.* R область миганий. D flickerverursachende Spannungsschwankung. E fliker; fluctuaciones rápidas de tensión. I flicker. N spanningsflikkering. P fluktuacja napięcia powodująca migotanie światła. S flickerorsakande spänningsvariation. (604)
26. **frequency adjustment range** : the range over which the oscillator frequency may be varied by means of some variable element, for the purpose of: a) setting the frequency to a particular value, or b) to correct the oscillator frequency to a prescribed value after deviation due to ageing, or other changed conditions. ★ gamme d'ajustage de la fréquence → *gamme 4.* R пределы перестройки частоты. D Frequenz-Ziehbereich. E intervalo de ajuste de la frecuencia. I gamma d'aggiustaggio della frequenza. N afregelfrequentiegebied. P zakres nastawczy częstotliwości. S frekvensjusterområde. (561)
27. **frequency range** : the measuring range of frequency. ★ gamme de fréquences → *gamme 5.* R диапазон частот. D Frequenzbereich. E gama de frecuencia. I campo di frequenza.

N frequentiegebied. P zakres częstotliwości. S frekvensområde. (303)

28. **frequency range** (of an equipment) : the set of frequencies over which an equipment can be adjusted to operate satisfactorily. *Note.* — The frequency range of an equipment can be subdivided into switched sub-ranges which may or may not be contiguous. ★ gamme de fréquences → *gamme 6.* R диапазон частот (оборудования). D Frequenzbereich (einer Ausrüstung). E gama de frecuencias (de un aparato); margen de frecuencias. I campo di frequenza; gamma di frequenza (di un apparecchio). N frequentiebereik. P zakres częstotliwości (urządzenia). S frekvensområde. (702)

29. **frequency tolerance (over a temperature range)** : → *tolerance 11*

30. **frequency tuning range** (oscillators) : the frequency range over which an oscillator tube can be tuned, when operated under stated conditions, while delivering output power that exceeds a stated value. ★ plage de fréquences d'accord → *plage 5.* R диапазон перестройки частоты (генераторы). D Durchstimmbereich (eines Oszillators). E gama de frecuencias de sintonía (osciladores). I intervallo di frequenza di accordo (oscillatori). N frequentieafstemgebied (oscillatoren). P zakres przestrajania generatora. S frekvens(avstämnings)område (för oscillator). (531)

31. **frequency tuning range** (amplifiers) : the frequency range over which an amplifier tube can be adjusted, when operated under stated conditions, to give a power gain that exceeds a stated value or an output power that exceeds a stated value. ★ plage de fréquences d'accord → *plage 6.* R диапазон перестройки частоты (усилители). D Durchstimmbereich (eines Verstärkers). E gama de frecuencias de sintonía (amplificadores). I intervallo di frequenza di accordo (amplificatori). N frequentieafstemgebied (versterkers). P zakres przestrajania wzmacniacza. S frekvens(avstämnings)-område (för förstärkare). (531)

32. **geographic range** (*Syn.* geographical range) : → *range 33*

33. **geographical range** (of an object or a light source) (*Syn.* geographic range (USA)) : greatest distance at which an object or a light source could be seen under conditions of perfect visibility, as limited only by the curvature of the Earth, by refraction in the atmosphere, and by the heights of the observer and the object or light source. ★ portée géographique → *portée 9.* R географическая дальность видимости (объекта или источника света). D geodätische Sichtweite (eines Objektes oder einer Lichtquelle). E alcance geográfico. I portata geografica. N geografische reikwijdte. P zasięg geograficzny. S geografisk siktsträcka. (845)

34. **grommet wire range** : the range of diameters of wire insulation accommodated by a grommet. ★ dimension des fils du passe-fil → *dimension 1.* R ряд проводов под крепежную втулку. D Leiterbereich der Dichtung. E dimensiones de los hilos de pasahilos. I calibro del passacavo. N draaddoorvoermaten. P ..... S ledardiametrar tillåtna för införingsskydd. (581)

35. **incremental range** : the width of the band of values covered by an incremental control around the value preset by the main control. ★ gamme de réglage fin → *gamme 9.* R диапазон точной регулировки. D Feinbereich. E campo de regulación fina. I portata variabile. N (bandbreedte van de) fijnregeling. P zakres regulacji precyzyjnej. S skalutbredningsområde. (301)

36. **lower range limit** : → *limit 14*

37. **lower range value** : → *value 26*

38. **luminous range** : greatest distance at which a given signal light can be recognized in any particular circumstances, as limited only by the atmospheric transmissivity and by the threshold of illuminance at the eye of the observer. ★ portée lumineuse → *portée 13.* R оптическая дальность видимости (сигнального огня). D Tragweite (eines Lichtsignals). E alcance luminoso. I portata luminosa. N lichtsignaalreikwijdte. P zasięg świetlny. S lysvidd. (845)

39. **manipulated range** (*Syn.* correcting range) : → *range 10*

40. **measuring range** (*Syn.* effective range) : the range defined by two values of the measured quantity, or quantity to be supplied, within which the limits of error of the measuring instrument are specified. *Note.* — An instrument can have several measuring ranges. ★ étendue de mesurage → *étendue 2.* R диапазон измерений. D Messbereich. E campo de medida; campo de medición. I campo di misura; campo effettivo. N meetgebied. P zakres pomiarowy. S mätområde. (301)

41. **measuring range** : interval defined by two values of the measured variable and within which measurements are made within the specified accuracy. ★ étendue de mesure → *étendue 3.* R диапазон измерения. D Meßbereich. E margen de medida. I campo di misura. N meetgebied. P zakres pomiarowy. S mätområde. (351)

42. **mechanical tuning range** : the continuous frequency range in which the output power exceeds a stated value when only the mechanical tuning system is varied. ★ plage d'accord du dispositif mécanique → *plage 1.* R диапазон механической перестройки. D mechanischer Durchstimmbereich. E gama de sintonía del dispositivo mecánico. I intervallo di accordo del dispositivo meccanico. N mechanisch afstemgebied. P zakres przestrajania mechanicznego. S mekaniskt avstämningsområde. (531)

43. **meteorological optical range** (v) : length of the path in the atmosphere that is required to attenuate by 95% the luminous flux in a collimated beam from a light source at a colour temperature of 2700 K. *Notes. 1* — The value of the attenuation has been chosen so that the term provides an approximate measure of the commonly used concept of (meteorological) visibility, which is the greatest distance at which a black object of suitable dimensions can be recognized by day against the horizon sky. *2* — The meteorological optical range v is related to the atmospheric transmissivity T, assumed to be uniform, by the formula

$$v = d_0 \frac{\log 0{,}05}{\log T}$$

or

$$T = 0{,}05^{\,d_0/v}$$

where d_0 is the length specified in the definition of T. These formulas are sometimes written

$$\mathrm{v} = \frac{\log 0{,}05}{\log \mathrm{T}}$$

or

$$\mathrm{T} = 0{,}05^{\,1/\mathrm{v}}$$

it being understood that v is the numerical value of the meteorological optical range v measured with the "unit" d_0 and T the numerical value of T. ★ portée optique météorologique → *portée 18.* R метеорологическая оптическая дальность. D meteorologisch optische Sichtweite. E alcance óptico meteorológico. I portata ottica meteorologica. N meteorologische lichtreikwijdte. P zasięg meteorologiczny optyczny. S meteorologisk lysvidd. (845)

44. **(nominal) range** : the fiducial value or the upper limit of the measuring (effective) range. ★ calibre → *calibre 3.* R ..... D Nennbereich. E alcance. I portata (nominale). N maximale aanwijzing. P granica (górna) zakresu (pomiarowego). S nominellt område. (301)

45. **nominal range** : luminous range of a maritime signal light in a homogeneous atmosphere having a meteorological optical range of 10 nautical miles. ★ portée nominale → *portée 16.* R номинальная оптическая дальность видимости. D Nenntragweite. E alcance nominal. I portata nominale. N nominale reikwijdte. P zasięg znamionowy. S nominell lysvidd. (845)

46. **nominal range of an influencing factor** : the range of values of an influencing factor within which, under specified conditions, the relay meets the specified requirements (operating, releasing, error and variations, etc.). ★ domaine nominal d'un facteur d'influence → *domaine 22.* R номинальный диапазон влияющей фактора. D Nennbereich eines Einflussfaktors. E campo nominal de un factor de influencia. I campo nominale di un fattore d'influenza. N nominaal gebied van een beïnvloedende factor. P zakres znamionowy czynnika wpływającego. S nominellt område för påverkande faktor. (446)

47. **nominal range of an influencing quantity** : the range of values of an influencing quantity within which, under specified conditions, the relay meets the specified requirements (operating, releasing, error and variations, etc.). ★ domaine nominal d'une grandeur d'influence → *domaine 23.* R номинальный диапазон влияющей величины. D Nennbereich einer Einflussgrösse. E campo nominal de una magnitud de influencia. I campo nominale di una grandezza d'influenza. N nominaal gebied van een beïnvloedende

grootheid. P zakres znamionowy wielkości wpływającej. S nominellt område för påverkande storhet. (446)

48. nominal range of use : a specified range of values which an influence quantity may assume without causing a variation exceeding specified limits. ★ domaine nominal d'utilisation → *domaine 24.* R рабочая область применения. D Nenngebrauchsbereich. E alcance nominal de utilización. I campo nominale di utilizzazione. N nominaal gebruiksgebied. P zakres znamionowy (wielkości wpływającej). S nominellt användningsområde. (302)

49. operable temperature range (of a piezoelectric resonator) : the range of temperature, as measured on the enclosure, over which a piezoelectric resonator must be capable of meeting the resistance requirements but not necessarily within the specified frequency tolerances. ★ gamme des températures de service → *gamme 15.* R интервал температур работоспособности (пьезоэлектрического резонатора). D Temperaturbereich der Betriebsfähigkeit (eines piezoelektrischen Resonators). E intervalo de temperaturas de servicio (de un resonador piezoeléctrico). I gamma di temperature di servizio (di un risuonatore piezoelettrico). N bruikbaar temperatuurgebied. P zakres temperatury działania (rezonatora piezoelektrycznego). S funktionstemperaturområde. (561)

50. operable temperature range (of a crystal controlled oscillator) : the range of temperature, over which the oscillator will continue to provide an output signal, though not necessarily within the specified tolerances of frequency, level, waveform, etc. ★ gamme des températures de service → *gamme 16.* R интервал температур работоспособности (кварцевого генератора). D Temperaturbereich der Betriebsfähigkeit (eines Quarz-Oszillators). E intervalo de temperaturas de servicio (de un oscilador controlado por resonador de cuarzo). I gamma delle temperature di servizio (di un oscillatore comandato da risuonatore a quarzo). N bruikbaar temperatuurgebied. P zakres temperatury działania (generatora). S funktionstemperaturområde. (561)

51. operating range : the range of reactor power level within which a reactor is designed to operate in a steady-state condition. ★ domaine de fonctionnement → *domaine 5.* D Betriebsbereich. E margen de funcionamiento. I campo di funzionamento. N instrumentengebied. P zakres pracy. S driftområde. (026)

52. operating range (of a battery-electric vehicle) : the maximum distance over which a given vehicle can operate without recharge of the battery, assuming that the battery is fully charged at the time of departure. ★ autonomie → *autonomie 1.* R рабочий диапазон (аккумуляторного электрического подвижного состава). D Aktionsradius (eines Batterie-Fahrzeuges). E autonomía (de un vehículo alimentado por una batería de acumuladores). I autonomia (d'un veicolo ad accumulatori). N actieradius (van een elektrische batterijvoertuig). P zasięg (jazdy). S aktionsradie. (811)

53. operating temperature range (of a piezoelectric resonator) : the range of temperature as measured on the enclosure over which a piezoelectric resonator must function within the specified tolerances. ★ gamme des températures de fonctionnement → *gamme 13.* R интервал рабочих температур (пьезоэлектрического резонатора). D Arbeitstemperaturbereich (eines piezoelektrischen Resonators). E intervalo de temperaturas de funcionamiento (de un resonador piezoeléctrico). I gamma delle temperature di funzionamento (di un risuonatore piezoelettrico). N werktemperatuurgebied. P zakres temperatury pracy (rezonatora piezolelektrycznego). S arbetstemperaturområde. (561)

54. operating temperature range (of a crystal controlled oscillator) : the range of temperature over which the oscillator will function, maintaining frequency and other output signal characteristics within specified tolerances. ★ gamme des températures de fonctionnement → *gamme 14.* R интервал рабочих температур (кварцевого генератора). D Arbeitstemperaturbereich (eines Quarz-Oszillators). E intervalo de temperaturas de funcionamiento (de un oscilador cotrolado por resonador de cuarzo). I gamma delle temperature di funzionamento (di un oscillatore comandato da risuonatore a quarzo). N werktemperatuurgebied. P zakres temperatury pracy (generatora). S arbetstemperaturområde. (561)

55. operative range of an energizing quantity : the range of values of a given energizing quantity for which the relay under specified conditions, is able to perform its intended function(s) according to the specified requirements. *Note.* — For measuring relays and when accuracy requirements have to be met, see effective range. ★ domaine de fonctionnement d'une grandeur d'alimentation → *domaine 7.* R рабочий диапазон воздействующей величины. D Arbeitsbereich einer Erregungsgrösse. E campo de funcionamiento de una magnitud de alimentación. I campo di funzionamento di una grandezza d'alimentazione. N werkgebied. P zakres roboczy wielkości zasilającej; zakres roboczy wielkości sterującej; zakres roboczy sterowania przekaźnikiem. S driftområde för matningsstorhet. (446)

56. optimum mechanical tuning range : the continuous frequency range in which the optimum output power exceeds a stated value throughout the total variation of the mechanical tuning system. ★ plage optimale d'accord du dispositif mécanique → *plage 14.* R оптимальный диапазон механической перестройки. D optimaler mechanischer Durchstimmbereich. E gama óptima de sintonía del dispositivo mecánico. I intervallo ottimo di accordo del dispositivo meccanico. N optimaal mechanisch afstemgebied. P zakres przestrajania mechanicznego optymalny. S maximalt mekaniskt avstämningsområde. (531)

57. orientation range : limits in either direction of the orientation compatible with the correct translation of signals. ★ plage d'orientation → *plage 13.* R диапазон смещений фазы. D Orientierungsbereich. E margen de orientación. I limiti di orientamento. N oriëntatiegebied. P tolerancja przesunięcia fazy. S faslägesvidd. (721)

58. power range : the range of power level within which the control of a reactor is primarily based upon measurement of temperature or neutron flux density rather than time constant (period). ★ domaine de puissance → *domaine 8.* D Leistungsbereich. E margen de potencia. I campo di potenza. N vermogensgebied. P zakres mocy. S effektområde. (026)

59. radio horizon range (*Syn.* radio horizon distance) : → *distance 19*

60. range (of a radio transmitter) : the maximum distance in a given direction in which a radio transmitter with specified installation and operating conditions, produces the usable field strength. ★ portée → *portée 4.* D Reichweite (eines Senders). P zasięg radiostacji. (705)

61. range extender : → *extender 3*

62. reference range : a specified range of values of one of a set of reference conditions. ★ domaine de référence → *domaine 10.* R нормальная область. D Referenzbereich. E alcance de referencia. I campo di riferimento. N referentiegebied. P zakres odniesienia. S referensområde. (302)

63. setting range of a specified time : the range of the setting values of a specified time. ★ domaine d'ajustement d'une temporisation → *domaine 2.* R диапазон уставок выдержки времени. D Einstellbereich der Zeitverzögerung. E campo de ajuste de una temporización. I campo di regolazione di una temporizzazione. N instelgebied van een gespecificeerde tijd. P zakres wartości nastawy czasowej. S inställningsområde för specificerad tid. (446)

64. setting range of the characteristic quantity (or its parameters) : the range of the setting values of the characteristic quantity or each of its setting parameters (e.g. the voltage or current for a power relay). ★ domaine d'ajustement de la grandeur caractéristique → *domaine 1.* R диапазон уставок по характеристической величине (или по ее составляющим). D Einstellbereich der charakteristischen Grösse (oder deren Parameter). E campo de ajuste de la magnitud característica (o de sus parámetros). I campo di regolazione della grandezza caratteristica (o dei suoi parametri). N instelgebied van de karakteristieke grootheid. P zakres nastawczy wielkości charakterystycznej. S inställningsområde för karakteristisk storhet (eller för dess parametrar). (446)

65. single range (measuring) instrument : → *measuring instrument 21*

66. source range : the range of reactor operation within which a supplementary neutron source is required to facilitate the measurement of neutron flux density. ★ domaine des sources → *domaine 18.* D Quellenbereich. E intervalo de fuente. I campo di reattore con sorgente ausiliaria. N brongebied. P zakres źródła. S källområde. (026)

67. storage temperature range (of a piezoelectric resonator) : the range of temperature within which a

piezoelectric resonator can be stored, without causing any permanent deviation of characteristics outside the specified tolerances. ★ gamme des températures de stockage → *gamme 17.* R интервал температур хранения (пьезоэлектрического резонатора). D Lagertemperaturbereich (eines piezoelektrischen Resonators). E intervalo de temperaturas de almacenamiento (de un resonador piezoeléctrico). I gamma di temperature di immagazzinaggio (di un risuonatore piezoelettrico). N opslagtemperatuurgebied. P zakres temperatury magazynowania (rezonatora piezoelektrycznego). S lagringstemperaturområde. (561)

68. **system dynamic range** (*Syn.* dynamic range) : → *range 17*

69. **tapping range** : the variation range of the tapping factor expressed as a percentage, compared with the value "100". *Note.* — If this factor ranges from 100 + a to 100 — b, the tapping range is said to be : + a % - b % or ± a % if a = b. ★ étendue de prises → *étendue 5.* R диапазон регулирования. D Anzapfungsbereich. E extensión de tomas. I campo di regolazione. N regelgebied. P zakres regulacji przekładni. S reglerområde. (421)

70. **time constant range** : the range of power level within which the reactor time constant (reactor period) rather than reactor power is of primary importance for reactor control. (Also called: period range). ★ domaine de divergence → *domaine 4.* D Zeitkonstantenbereich. E margen de constante de tiempo; margen del período. I campo del tempo di divergenza. N tijdconstantegebied. P zakres okresu reaktora. S periodområde. (026)

71. **upper range limit** : highest value of the variable that a measuring device can be adjusted to measure within a specified accuracy. *Note.* — For a multi-range device, the upper range limit is the highest of the different upper range values. ★ portée limite supérieure → *portée 12.* R верхний предел диапазона. D kleinster Meßbereichs-Anfangswert. E límite superior del margen. I limite superiore del campo di misura. N maximale meetgrens. P górna granica zakresu pomiarowego (przyrządu wielozakresowego). S övre mätgräns. (351)

72. **upper range value** : → *value 71*

73. **visual range** : greatest distance at which a given object can be recognised in any particular circumstances, as limited only by the atmospheric transmissivity and by the visual contrast threshold. *Notes. 1* — In aviation terminology, the term is also used for the luminous range of a signal light. *2* — In aviation terminology, the runway visual range of a runway at an aerodrome is the greatest distance at which the runway surface markings, or the runway centre-line lights, or the runway edge lights, can be seen from a given height above the centre line of the runway. ★ portée visuelle → *portée 22.* R дальность видимости. D Sichtweite. E alcance visual. I portata visiva. N zicht. P zasięg optyczny. S siktsträcka. (845)

74. **working range** (*Syn.* dynamic operating range) : → *range 14*

75. **working range** (of a quantizer) : the range of input values to a quantizer lying between the two virtual decision values. *Note.* — The distortion in quantizing is conventionally attributed to overload distortion for values falling outside the working range. ★ plage de fonctionnement → *plage 4.* R рабочий диапазон (квантователя). D Arbeitsbereich (eines Quantisierers). E margen de funcionamiento (de un cuantificador); gama de funcionamiento; dinámica. I campo di funzionamento (di un quantizzatore). N werkgebied (van een kwantificeerder). P zakres pracy (kwantyzatora). S utstyrningsområde. (704)

rapid

1. **rapid charge** (*Syn.* boost charge) : → *charge 3*

rapidity

1. **rapidity of fading** : the slope of the curve of signal level versus time in the presence of fading. This slope is generally expressed in decibels per second. ★ rapidité d'évanouissement → *rapidité 13.* D Schwundschnelle. P szybkość zaniku. (705)

raster

1. **raster** : a predetermined regular pattern of scanning lines that provides substantially uniform coverage of an area of the screen or target. ★ trame → *trame 19.* R растр. D Raster. E trama. I trama. N raster. P raster; osnowa. S raster. (531)

2. **raster** : a predetermined pattern of scanning lines that provides substantially uniform coverage of an area. ★ canevas → *canevas 1.* R растр. (723)

3. **raster burn** : → *burn 4*

rat

1. **rat race** (*Syn.* hybrid ring) : → *ring 9*

rate

1. **absorbed dose rate** ($\dot{D}$) : the quotient of dD by dt, where dD is the increment of absorbed dose in time interval dt

$$\dot{D} = \frac{dD}{dt}$$

Note. — The SI unit of absorbed dose rate is joule per kilogram and second, whose special name is gray per second. The earlier special unit of absorbed dose rate, still in temporary use, was the rad per second. $1\ Gy.s^{-1} = 100\ rad.s^{-1} = 1\ J\ kg^{-1}.s^{-1}$. ★ débit de dose absorbée → *débit 10.* R мощность поглощенной дозы. D Energiedosisleistung. E intensidad de dosis absorbida. I ratieo di dose assorbita. N dosistempo. P moc dawki pochłoniętej. S absorberad dosrat; stråldosrat. (391,881)

2. **actual transfer rate** (*Syn.* transfer rate) : the average number of binary digits, characters or blocks transferred per unit time between two points. ★ cadence brute de transfert → *cadence 1.* R фактическая скорость передачи; скорость передачи. D Transfergeschwindigkeit. E candencia bruta de transferencia; velocidad de transferencia. I velocità di trasferimento. N (actuele) overdrachtssnelheid. P przepustowość; szybkość wymiany. S överföringsrat. (721)

3. **ambient dose rate** : the dose equivalent rate or absorbed dose rate to soft tissue measured by an ambient dose ratemeter at a point in an occupied area. ★ débit de dose ambiant → *débit 11.* R мощность дозы в окружающей среде. D Ortsdosisleistung. E intensidad de dosis ambiente. I rateo di dose ambientale. N omgevingsdosistempo. P moc dawki w otoczeniu. S omgivningsdosrat. (881)

4. **binary digit rate** (*Syn.* bit rate) : the number of binary digits transferred per second. ★ débit binaire → *débit 5.* R скорость передачи двоичных символов. D Bitrate; Binär; (Digital)Rate. E gasto binario. I velocità di cifra binaria; cadenza di cifra binaria. N binair-cijfersnelheid; bitsnelheid. P przepływność cyfrowa binarna. S bitrat. (704)

5. **binary rate** (*Syn.* signalling rate) : the aggregate transfer rate of signal elements in a transmission link, expressed in normalized form in binary digits per second. *Notes. 1* — The signalling rate is given by

$$\sum_{i=1}^{i=m} \frac{1}{T_i} \log_2 n_i$$

where m is the number of parallel transmission channels, T_i is the shortest theoretical duration of signal element for the i-th channel expressed in seconds, and n_i is the number of significant conditions of the modulation in the i-th channel. *2* — The symbol of the unit of binary rate is bit/s. ★ débit binaire → *débit 6.* R скорость передачи сигналов; двоичная скорость. D Übertragungsgeschwindigkeit. E velocidad binaria; velocidad de señalización. I velocità di segnalazione. N binaire snelheid; snelheid in bits per seconde. P szybkość transmisji. S bitrat. (721)

6. **bit error rate** : → *error 8*

7. **bit rate** (*Syn.* binary digit rate) : → *rate 4*

8. **block error rate** (in telecontrol) : the ratio of the number of blocks incorrectly received to the total number of blocks sent. ★ taux d'erreurs sur les blocs → *taux 42.* R частота искажений блока (в телемеханике). D Blockfehlerrate (beim Fernwirken). E tasa de error en los bloques (en telecontrol). I tasso d'errore sui blocchi (nel telecontrollo). N blokfoutfractie. P stopa błędów blokowa (w sterowaniu zdalnym). S blockfelsfrekvens. (371)

9. **cathode heating rate** : the time required for the rate of the cathode current increase to reach its maximum value under stated conditions. ★ rapidité d'échauffement de la cathode → *rapidité 11.* R время разогрева катода по скорости изменения катодного тока. D Kathodenanheizzeit. E rapidez de calentamiento del cátodo. I rapidità di riscaldamento del catodo. N kathode-opwarmsnelheid. P szybkość nagrzewania katody. S uppvärmningshastighet för katod. (531)

10. **charge rate** : the current at which a battery is charged. ★ régime de charge → *régime 18.* R режим заряда.

D Lade-Rate. E régimen de carga. I regime di carica. N ladingspatroon; ladingsregime. P prąd ładowania. S laddningsström. (486)

11. click rate : the number of clicks per unit of time, generally per minute, that exceed a specified level. ★ cadence des claquements → *cadence 5.* R частота следования кратковременных помех. D Knackrate. E cadencia de chasquido. I frequenza di click. N klikstoringgetal. P częstość trzasków. S klickfrekvens. (161)

12. constant failure rate period : → *period 6*

13. conversion rate : the number of complete conversions obtained per unit time. ★ cadence de conversion → *cadence 2.* R скорость преобразования. D Umsetzungsrate. E velocidad de conversión. I ritmo di conversione. N omzetfrequentie. P szybkość przetwarzania. S omvandlingshastighet. (303)

14. counting rate : number of counts per unit time. ★ taux de comptage → *taux 7.* R скорость счета. D Zählrate. E tasa de cuenta. I tasso di conteggio; rateo di conteggio. N teltempo. P szybkość zliczania. S pulsrat. (391,531)

15. critical rate of rise of off-state voltage : the lowest value of the rate of rise of principal voltage that will cause switching from the off-state to the on-state under specified conditions. ★ vitesse critique de croissance de la tension à l'état bloqué → *vitesse 40.* R критическая скорость нарастания напряжения в закрытом состоянии. D kritische Spannungssteilheit. E velocidad crítica de crecimiento de la tensión de estado bloqueado. I velocità critica di salita allo stato di blocco. N kritische stijgsnelheid van de sperspanning. P prędkość wzrostu napięcia blokowania krytyczna. S kritisk blockspänningsderivata. (521)

16. critical rate of rise of on-state current : the highest value of the rate of rise of on-state current which a thyristor can withstand without deleterious effect. ★ vitesse critique de croissance du courant à l'état passant → *vitesse 41.* R критическая скорость нарастания тока в открытом состоянии. D kritische Stromsteilheit. E velocidad crítica de crecimiento de la corriente de estado conductor. I velocità critica di salita della corrente di conduzione. N kritische stijgsnelheid van de doorlaatstroom. P prędkość wzrostu napięcia przewodzenia krytyczna. S kritisk ledströmsderivata. (521)

17. decay rate : at a given frequency, the rate at which the sound pressure level decreases with time, for example in a reverberant room. *Note.* — The unit of decay rate is the decibel per second. ★ taux de décroissance → *taux 10.* R скорость спада. D Pegelabnahme. E tasa de decrecimiento. I decremento. N uitklinksnelheid. P prędkość zaniku. S fallhastighet. (801)

18. degree of start-stop distortion at the actual mean modulation rate (*Syn.* degree of synchronous start-stop distortion) : → *degree 17*

19. de-ionization rate : the number of pairs of ions recombined per unit volume per unit time. ★ vitesse volumique de désionisation → *vitesse 93.* R скорость рекомбинации. D Entionisierungsrate. E tasa de desionización. I velocità volumica di deionizzazione; tasso di deionizzazione. N deïonisatietempo. P szybkość dejonizacji. S ..... (111)

20. demand rate (*Syn.* price per kilowatt or kilovolt-ampere) : an amount to be paid per unit of chargeable demand (kilowatt, kilovoltampere) for a specified period of supply. ★ prix du kilowatt ou du kilovoltampère → *prix 4.* R плата за киловатт (киловольтампер). D Leistungspreis. E precio del kilovatio (kilovoltio amperio). I prezzo del kilowatt kilovoltampere; corrispettivo unitario di potenza. N vergoeding per kW; vergoeding per kVa. P opłata za moc za kW lub kVA. S effektpris (räknat per kW eller kVA). (691)

21. digit rate (in digital transmission) : the number of digits transferred per second. *Notes. 1* — The term digit rate may be qualified, for example ternary digit rate. *2* — The term digit rate should not be used to express the transmission rate of a line signal for which the appropriate term is "line digit rate". ★ débit numérique → *débit 24.* R скорость передачи (при цифровой передаче). D (digitale) Übertragungsgeschwindigkeit; Digitalrate. E gasto numérico (en transmisión numérica). I velocità di cifra (in trasmissione numerica). N cijfersnelheid (bij digitale transmissie). P przepływność cyfrowa (w transmisji cyfrowej); przepustowość cyfrowa (urządzenia, traktu). S sifferrat. (702,704)

22. discharge rate : the current at which a battery is discharged. ★ régime de décharge → *régime 19.* R режим разряда. D Entlade-Rate. E régimen de descarga. I regime di scarica. N ontladingspatroon; ontladingsregime. P prąd wyładowania. S urladdningsström. (486)

23. dose equivalent rate ($\dot{H}$) : the quotient of dH by dt, when dH is the increment of dose equivalent in the time interval dt. $\dot{H} = dH/dt$ *Note.* — The SI unit of dose equivalent rate is joule per kilogram second, whose special name is sievert per second ; sub-multiples, such as $\mu Sv \cdot h^{-1}$, are used in practice. The earlier special unit of dose equivalent rate, still in temporary use, was remper second (or its submultiples). 1 Sv s^{-1} = 100 rem s^{-1} = 1 J . kg^{-1} s^{-1}. ★ débit d'équivalent de dose → *débit 18.* R мощность эквивалентной дозы (P). D Äquivalentdosisleistung. E intensidad de dosis equivalente. I rateo di equivalente di dose. N dosistempo-equivalent. P równoważnik mocy dawki. S dosekvivalentrat. (881)

24. dose rate : term used in photochemistry, phototherapy and photobiology for the quantity-irradiance. Unit: $W \cdot m^{-2}$ *Notes. 1* — As in the case of dose, the spectral distribution of the radiation must be specified. *2* — The notion of rate applies similarly to actinic dose and effective dose. ★ débit de dose → *débit 9.* R мощность дозы. D Dosisrate. E tasa de dosis. I rateo di dose. N bestralingssterke. P natężenie dawki. S dosrat. (845)

25. effective digit rate (of a time-slot) : the number of digits per second provided by a time-slot, equal to the product of the number of digit time-slots and the number of repetitions of that time-slot per second. *Note.* — The term may be qualified, for example, "effective bit rate". ★ débit numérique → *débit 25.* R эффективная скорость передачи (временного интервала). D effektive Digitalrate (eines Zeitschlitzes). E ..... I velocità di cifra effettiva; cadenza di cifra effettiva. N effectieve cijfersnelheid (van een tijdslot). P przepływność cyfrowa skuteczna (w szczelinie czasowej). S effektiv sifferrat. (704)

26. effective transfer rate : the average number of binary digits, characters or blocks transferred per unit time between two points and accepted as valid at the reception point. ★ cadence utile de transfert → *cadence 7.* R эффективная скорость передачи. D effektive Transfergeschwindigkeit. E cadencia útil de transferencia; velocidad útil de transferencia. I velocità effettiva di trasferimento. N effectieve overdrachtssnelheid. P przepustowość efektywna; efektywna szybkość wymiany. S effektiv överföringsrat. (721)

27. end-of-charge rate (*Syn.* finishing rate) : the value of current during the final stage of charging a battery. ★ courant de fin de charge → *courant 78.* R ток конца заряда. D Ladeschlußstrom. E final del régimen de carga. I corrente finale di carica. N eindlaadstroom. P prąd ładowania końcowy. S laddningsslutström. (486)

28. energy fluence rate (*Syn.* energy flux density) (ψ) : increment of energy fluence $d\Psi$ during a suitably small interval of time dt divided by that interval of time.

$$\psi = \frac{d\Psi}{dt}$$

Note. — Energy fluence rate is identical to the product of the particle fluence rate and the average energy of the particles. ★ débit de fluence énergétique → *débit 14.* R плотность потока энергии излучения; интенсивность. D Energieflußdichte. E tasa de fluencia energética. I tasso rateo di fluenza energetica. N energiefluxdichtheid. P szybkość fluencji energii; gęstość strumienia energii. S energifluensrat; energiflödestäthet. (391,881)

29. energy rate (*Syn.* kilowatthour rate) : → *rate 48*

30. equivalent bit rate : the minimum value of the bit rate strictly necessary to convey the same information in the same time as a given digital signal at a given digit rate. ★ débit binaire équivalent → *débit 8.* R эквивалентная скорость передачи. D gleichwertige Bitrate. E contenido binario equivalente. I velocità binaria equivalente. N equivalente bitsnelheid. P przepływność binarna równoważna. S ekvivalent bitrat. (704)

31. erasing rate : the time rate of erasing a storage element or area from one stated level to another. ★ rapidité d'effacement → *rapidité 12.* R интенсивность стирания. D Löschzeit. E rapidez de borrado. I rapidità di cancellazione. N wistempo. P szybkość kasowania. S släckningstakt. (531)

32. exposure rate ($\dot{X}$) : the quotient of dX by dt, where dX is the increment of the exposure in time dt. $\dot{X} = dX/dt$. *Note.* — The SI unit of exposure rate is $Ckg^{-1}s^{-1}$ (Akg^{-1}). The earlier special units of exposure rate, still in temporary use, were R s^{-1}, R min^{-1},

R h^{-1}. ★ débit d'exposition → *débit 19.* R мощность экспозиционной дозы. D Standardionendosis-Leistung. E intensidad de exposición; tasa de exposición. I rateo di esposizione. N exposietempo. P moc ekspozycji. S expositionsrat. (391,881)

33. **exposure rate constant** : → *constant 20*

34. **fading rate** (*Syn.* fading frequency) : the rate of occurrence of the time intervals during which a given fading depth is exceeded. *Note.* — The fading rate is characterized by a mean period determined under specified conditions. ★ cadence d'évanouissement → *cadence 6.* D Schwundrate; Schwundhäufigkeit. P wskaźnik zaniku; częstotliwość zaniku. (705)

35. **failure rate acceleration factor** : → *factor 77*

36. **final rate** (*Syn.* follow-on rate) : → *rate 39*

37. **finishing rate** (*Syn.* end-of-charge rate) : → *rate 27*

38. **flat rate tariff** : → *tariff 10*

39. **follow-on rate** (*Syn.* final rate) : the final kilowatthour rate of a two-part or multi-part tariff or the kilowatthour rate of the final block of a block tariff. ★ prix du kilowattheure de développement → *prix 6.* R итоговая величина ставки тарифа. D ..... E precio del kilovatio hora de desarrollo. I prezzo del kilowattora addizionale. N marginale vergoeding per kWh. P stawka wynikowa za kWh; cena wynikowa za kWh. S fortsättningspris. (691)

40. **gross average heat rate of a unit** : during a given period of time, the ratio of the thermal energy of the fuel consumed to the gross electricity generated by a unit during the same period. ★ consommation spécifique moyenne brute de chaleur d'une tranche → *consommation 7.* R удельный расход тепла. D spezifischer mittlerer Brutto-Wärmeverbrauch eines Blockes. E consumo específico medio bruto de calor de un grupo. I consumo specifico medio lordo di calore di una unità. N bruto gemiddeld specifiek warmteverbruik van een opwekeenheid. P zużycie ciepła średnie brutto przez zespół prądotwórczy. S specifik brutto-värmeförbrukning för ett block. (602)

41. **information transfer rate** (in telecontrol) : the average number of bits of information per second transferred from a data source and accepted as valid by a data sink. ★ cadence de transfert de l'information significative → *cadence 4.* R скорость передачи информации (в телемеханике). D Informationsübermittlungsrate (beim Fernwirken). E rapidez de transferencia de la información (en telecontrol). I tasso di trasferimento dell'informazione (nel telecontrollo). N informatietransmissiesnelheid. P szybkość przesyłu informacji (w sterowaniu zdalnym). S meddelandeöverföringshastighet. (371)

42. **(instantaneous) failure rate** ($\lambda(t)$) : the limit, if this exists, of the ratio of the conditional probability that the instant of time, T, of a failure of an item falls within a given time interval, $(t,\ t+\Delta t)$ and the length of this interval, Δt, when Δt tends to zero, given that the item is in an up state at the beginning of the time interval. *Note.* — In this definition T may also denote the time to failure or the time to first failure, as the case may be. ★ taux (instantané) de défaillance → *taux 58.* R интенсивность отказов. D momentane Ausfallrate. E tasa (instantánea) de fallos. I tasso di guasto (istantaneo). N (momenteel) storingstempo. P intensywność uszkodzeń (chwilowa). S (momentan) felbenägenhet. (191)

43. **(instantaneous) repair rate** ($\mu(t)$) : the limit if this exists, of the ratio, of the conditional probability that the corrective maintenance action terminates in a time interval, $(t,\ t+\Delta t)$ and the length of this time interval, Δt, when Δt tends to zero, given that the action had not terminated at the beginning of the time interval. ★ taux (instantané) de réparation → *taux 59.* R интенсивность восстановления. D (momentane) Instandsetzungsrate. E tasa (instantánea) de reparaciones. I tasso di riparazione (istantaneo). N (momenteel) reparatietempo. P intensywność napraw (chwilowa). S (momentan) återställningsrat. (191)

44. **ion-dose rate** : the increment of ion-dose during a suitably small interval of time divided by that interval of time. ★ débit de dose ionique → *débit 12.* R мощность ионной дозы. D Ionendosis-Leistung. E intensidad de dosis iónica; tasa de dosis iónica. I rateo di dose ionica. N ionendosistempo. P moc dawki jonowej. S jondosrat. (881)

45. **ionization rate** : the number of pairs of ions produced per unit volume per unit time. ★ vitesse volumique d'ionisation → *vitesse 95.* R скорость ионизации. D Ionisationsrate. E tasa de ionización. I velocità volumica di ionizzazione. N ionisatietempo. P szybkość jonizacji. S jonisations(täthets)rat. (111)

46. **justification rate** (*Syn.* stuffing rate) : the number of instants per second at which a digital signal is justified either by the insertion of a justifying digit or by the transmission of one of the digits of that signal by other means. ★ débit de justification → *débit 16.* R скорость цифрового выравнивания. D Justierungsrate; Füllungsrate. E gasto de justificación. I frequenza di giustificazione. N justeersnelheid. P częstotliwość dopełniania. S taktanpassningsrat. (704)

47. **kerma rate** ($\dot{K}$) : the quotient of dK by dt, where dK is the increment in kerma in the time interval dt. $\dot{K} = dK/dt$. ★ débit de kerma → *débit 17.* R мощность кермы. D Kermaleistung. E intensidad de kerma; tasa de kerma. I rateo di kerma. N kermatempo. P moc kermy. S kermarat. (881)

48. **kilowatthour rate** (*Syn.* energy rate) : the amount to be paid per unit of energy (kilowatthour) consumed. ★ prix du kilowattheure → *prix 5.* R плата за киловаттчас; плата за электроэнергию. D Arbeitspreis. E precio del kilovatio hora. I prezzo del kilowattora; prezzo dell'energia; prezzo proporzionale. N vergoeding per kWh. P stawka za kWh; cena za kWh. S energipris. (691)

49. **line digit rate** : in digital transmission, the number of signal elements of the line signal transmitted per second, expressed in bauds. *Note.* — In English, the term "modulation rate" is used in telegraphy and data communication ; it is the reciprocal of the duration of the unit interval or of the shortest signal element. In French, the term "rapidité de modulation" is the only term used in this field. ★ rapidité de modulation → *rapidité 5.* R линейная скорость передачи. D Leitungsdigitalrate; Schrittgeschwindigkeit; Modulationsrate (in diesem Zusammenhang abgelehnt). E gasto en línea; rapidez en modulación; gasto en línea. I velocità di cifra in linea. N cijfersnelheid van de lijn. P przepływność cyfrowa liniowa. S linjesifferrat. (704)

50. **load/rate tariff** : → *tariff 16*

51. **maximum counting rate** (of a Geiger-Müller counter tube) : the maximum in a curve of measured counting rate as a function of radiation fluence rate. ★ taux de comptage maximal → *taux 8.* R максимальная скорость счета (счетчика Гейгера-Мюллера). D maximale Zählrate (eines Auslösezählrohres). E tasa de cuenta máxima (de un tubo contador Geiger-Müller). I tasso di conteggio massimo (di un tubo contatore di Geiger-Müller); rateo di conteggio massimo (di un tubo contatore di Geiger-Müller). N maximaal teltempo (v.e. geiger-müller-telbuis). P maksymalna szybkość zliczania (licznika Geigera-Müllera). S maximal räknerat. (391)

52. **maximum justification rate** (*Syn.* justification capacity) : → *capacity 12*

53. **maximum stuffing rate** (*Syn.* justification capacity) : → *capacity 12*

54. **mean failure rate** $\bar{\lambda}(t_1, t_2)$: the mean of the instantaneous failure rate over a given time interval (t_1, t_2). *Note.* — The mean failure rate relates to instantaneous failure rate $\lambda(t)$ as

$$\bar{\lambda}(t_1, t_2) = \frac{1}{t_2 - t_1} \int_{t_1}^{t_2} \lambda(t)\, dt$$

★ taux moyen de défaillance → *taux 62.* R средняя интенсивность отказов. D mittlere Ausfallrate. E tasa media de fallos. I tasso di guasto, medio. N gemiddeld storingstempo. P intensywność uszkodzeń średnia. S medelfelbenägenhet. (191)

55. **mean repair rate** $\bar{\mu}(t_1, t_2)$: the mean of the instantaneous repair rate over a given time interval, (t_1, t_2). *Note.* — The mean repair rate is related to instantaneous repair rate $\mu(t)$ as

$$\bar{\mu}(t_1, t_2) = \frac{1}{t_2 - t_1} \int_{t_1}^{t_2} \mu(t)\, dt$$

★ taux moyen de réparation → *taux 63.* R средняя интенсивность восстановления. D mittlere Instandsetzungsrate. E tasa media de reparaciones. I tasso medio di riparazione. N gemiddeld reparatietempo. P intensywność napraw średnia. S medelåterställningsrat. (191)

56. **melting rate** (*Syn.* speed of melting) : the quotient of production per cycle over melting time. ★ vitesse de fusion → *vitesse 52.* R скорость плавки. D Schmelzgeschwindigkeit. E velocidad de fusión. I velocità di fusione. N smeltcapaciteit. P szybkość topienia. S smälthastighet. (841)

57. **modulation rate** : the reciprocal of the duration of the unit interval or of the shortest theoretical duration of signal element. ★ rapidité de modulation → *rapidité 6.* R скорость модуляции. D Schrittgeschwindigkeit. E velocidad de modulación. I velocità di modulazione. N modulatiesnelheid. P szybkość modulacji. S moduleringsrat. (721)

58. **multiplex aggregate bit rate** : that bit rate in a time-division multiplex which is equal to the sum of the derived channel binary rates available to the user plus the rate of the overhead bits required in each frame of the multiplex. ★ débit binaire cumulé d'un multiplex → *débit 7.* R групповая скорость передачи битов. D Multiplex-Gesamtübertragungsgeschwindigkeit. E velocidad binaria acumulada de un múltiplex. I velocità di bit aggregata. N ..... P szybkość transmisji sygnału zbiorczego. S sammansatt bitrat. (721)

59. **n-ary digit rate** : the number of n-ary digits transferred per second. ★ débit n-aire → *débit 22.* R скорость передачи *n*-ичных символов. D (n-när)-(Digital)Rate. E gasto n-ario; gasto numérico (de un intervalo temporal). I velocità di cifra *n*-aria; cadenza di cifra n-aria. N n-tallig-cijfersnelheid. P przepływność cyfrowa n-kowa. S n-när sifferrat. (704)

60. **net average heat rate of a unit** : during a given period of time, the ratio of the thermal energy of the fuel consumed to the net electricity generated by a unit during the same period. ★ consommation spécifique moyenne nette de chaleur d'une tranche → *consommation 8.* R удельный расход тепла. D spezifischer mittlerer Netto-Wärmeverbrauch eines Blockes. E consumo específico medio neto de calor de un grupo. I consumo specifico medio netto di calore di una unità. N netto gemiddeld specifiek warmteverbruik van een opwekeenheid. P zużycie ciepła średnie netto przez zespół prądotwórczy. S specifik netto-värmeförbrukning för ett block. (602)

61. **nominal justification rate** (*Syn.* nominal stuffing rate) : the justification rate which theoretically would occur if the original digital signal and the channel provided for conveying it by justification were both to have their nominal digit rates. ★ débit nominal de justification → *débit 23.* R номинальная скорость цифрового выравнивания. D nominelle Justierungsrate; nominelle Füllungsrate. E gasto nominal de justificación. I frequenza nominale di giustificazione. N nominale justeersnelheid. P częstotliwość dopełniania znamionowa. S nominell taktanpassningsrat. (704)

62. **nominal stuffing rate** (*Syn.* nominal justification rate) : → *rate 61*

63. **outage rate** : for a particular class of outage and a specified period of time, the quotient of the number of outages by the up duration for an item. *Note.* — This concept may be applicable for example to scheduled-outage rate, forced-outage rate. ★ ..... → . R частота переывов в работе. D Nichtverfügbarkeitsrate. E tasa de parada. I frequenza di indiponibilità. N niet-beschikbaarheidsfrequentie. P wskaźnik częstości odstawień. S avbrottsfrekvens. (603)

64. **(particle) fluence rate** (*Syn.* (particle) flux density) (φ) : increment of fluence $d\Phi$ during a suitably small interval of time dt divided by that interval of time.

$$\varphi = \frac{d\Phi}{dt}$$

Note. — Fluence rate is identi cal to the product of the volume particle density and the average speed. ★ débit de fluence → *débit 13.* R плотность потока частиц. D Teilchen-Flußdichte. E tasa de fluencia (de partículas). I tasso di fluenza (di particelle); rateo di fluenza (di particelle). N deeltjesfluxdichtheid; fluxdichtheid (van deeltjes). P szybkość fluencji cząstek; gęstość strumienia cząstek. S (partikel)fluensrat (partikel); (partikel)flödestäthet (partikel). (391,881)

65. **plasma arc rotation rate** : → *rotation 2*

66. **precipitation rate** (*Syn.* rainfall rate; rain rate) : a measure of the intensity of precipitation expressed by the height of water reaching the ground during a given time interval divided by the duration of this time interval. *Note.* — Rain rate is generally expressed in millimetres per hour. ★ intensité de précipitation → *intensité 8.* D Niederschlagsintensität; Regenintensität; Regenrate. P intensywność opadów. (705)

67. **priming rate** : the time rate of priming a storage element or area from one stated level to another. ★ rapidité d'apprêtage → *rapidité 4.* R интенсивность подготовки. D Vorbereitungszeit. E rapidez de preinscripción. I rapidità di predisposizione. N activeringstempo. P ..... S föraktiveringstakt. (531)

68. **production rate** : the quotient of production per cycle over its duration. ★ productivité → *productivité 1.* R производительность. D Chargenleistung. E productividad. I produttività. N produktiecapaciteit. P produkcja w czasie cyklu. S produktionstakt. (841)

69. **pulse repetition rate** (*Syn.* pulse repetition frequency) : → *frequency 158*

70. **pulse repetition rate modulation** (*Syn.* pulse frequency modulation) : → *modulation 52*

71. **radiant fluence rate** (*Syn.* spherical irradiance) : → *irradiance 7*

72. **rain rate** (*Syn.* precipitation rate) : → *rate 66*

73. **rainfall rate** (*Syn.* precipitation rate) : → *rate 66*

74. **rate** : an amount to be paid per unit purchased (e.g., 1 kWh, 1 kW, 1 kVA). ★ prix unitaire → *prix 9.* R ставка, цена. D Preis. E precio unitario. I prezzo unitario. N vergoeding per eenheid. P stawka jednostkowa; cena jednostkowa. S pris. (691)

75. **rate of change of...relay** : an electrical measuring relay intended to operate when its characteristic quantity changes by a given amount per unit of time. *Example :* A rate of change of frequency relay. ★ relais à dérivée de... → *relais 2.* R реле производной.... D ... änderungsrelais. E relé de derivada de .... I relè a variazione di .... N ... gradiëntrelais. P przekaźnik stromościowy. S derivatarelä. (448)

76. **rate of information loss** (in telecontrol) : the ratio of the number of lost messages to the total number of messages sent. ★ taux de perte d'information → *taux 27.* R частота потери сообщения (в телемеханике). D Informationsverlustrate (beim Fernwirken). E tasa de pérdida de información (en telecontrol). I tasso di perdita d'informazione (nel telecontrollo). N informatieverliesfractie. P stopa strat informacji. S meddelandeförlustfrekvens. (371)

77. **rate of occurrence of voltage changes** : the number of voltage changes occurring per unit of time. ★ densité temporelle des variations de tension → *densité 32.* R частота изменений напряжения. D Häufigkeit von Spannungsänderungen. E número de variaciones de tensión por unidad de tiempo. I densità temporale delle variazioni di turno; numero di variazioni di tensione per unità di tempo. N aantal spanningsvariaties per tijdseenheid. P wskaźnik występowania zmian napięcia. S spänningsändringsrat. (161)

78. **rate of residual information loss** (in telecontrol) : the ratio of the number of undetected lost messages to the total number of messages sent. ★ taux de perte résiduelle d'information → *taux 28.* R частота необнаруженных потерь сообщений (в телемеханике). D Restinformationsverlustrate (beim Fernwirken). E tasa de pérdida residual de información (en telecontrol). I tasso di perdita d' informazione residuo (nel telecontrollo). N ..... P stopa strat wynikowych informacji. S kvarstående meddelandeförlustsfrekvens. (371)

79. **rate of rise** : the average rate of change with time over a defined interval of values of a quantity, e.g., between 10 % and 90 % of its peak value. ★ vitesse de montée → *vitesse 61.* R скорость нарастания. D Anstiegsgeschwindigkeit. E velocidad de subida. I velocità di salita. N gemiddelde stijgtijd. P szybkość narastania. S stighastighet. (161)

80. **rate time** : → *time 138*

81. **recombination rate** : the number of pairs of charge carriers recombined per unit volume per unit time. ★ vitesse volumique de recombinaison → *vitesse 94.* R скорость рекомбинации. D Rekombinationsrate. E tasa de recombinación. I velocita volumica di ricombinazzione. N recombinatietempo. P szybkość rekombinacji. S rekombinations(täthets)rat. (111)

82. **repetition rate** (in telephony) : the average number of repetitions requested by the parties to a telephone conversation in a given time interval and under normal service conditions or under test conditions which simulate normal service. *Note.* — The time interval generally adopted is 100 secondes. ★ fréquence des répétitions → *fréquence 103.* R частость переспросов. D Rückfragehäufigkeit. E frecuencia de repetición (en telefonia). I tasso di ripetizione. N frequentie van het aantal herhalingen (in een telefoongesprek). P częstość powtórzeń (w telefonii); współczynnik powtórzeń. S omfrågningsrat. (722)

83. **residual error rate** (in telecontrol) : the ratio of the number of undetected wrong messages to the total number of messages

sent. ★ taux d'erreurs résiduelles → *taux 40.* R частота появления необнаруженных ошибок (в телемеханике). D Restfehlerrate (beim Fernwirken). E tasa de error residual (en telecontrol). I tasso d'errore residuo (nel telecontrollo). N restfoutfractie. P stopa błędów wynikowa (w sterowaniu zdalnym). S kvarstående felfrekvens. (371)

84. **sampling rate** (*Syn.* sampling frequency) : the number of samples of a signal taken per unit time. ★ fréquence d'échantillonnage → *fréquence 100.* R частота дискретизации. D Abtastrate; Abtastfrequenz. E frecuencia de modelización. I frequenza di campionamento. N bemonstersnelheid. P częstotliwość próbkowania. S samplingsrat. (704)
85. **signalling rate** (*Syn.* binary rate) : → *rate 5*
86. **stuffing rate** (*Syn.* justification rate) : → *rate 46*
87. **sweep rate** : the reciprocal of the time coefficient. ★ vitesse de balayage → *vitesse 45.* R скорость развертки. D Zeitablenkgeschwindigkeit. E velocidad de barrido. I velocità di scansione. N tijdbasissnelheid. P szybkość rozciągu. S svephastighet. (303)
88. **ternary digit rate** : the number of ternary digits transferred per second. ★ débit ternaire → *débit 26.* R скорость передачи троичных символов. D Ternär-(Digital)Rate. E gasto ternario. I velocità di cifra ternaria; cadenza di cifra ternaria. N ternair-cijfersnelheid. P przepływność cyfrowa trójkowa. S ternär sifferrat. (704)
89. **transfer rate** (*Syn.* actual transfer rate) : → *rate 2*

rated

1. **continuous rated current** : → *current 28*
2. **deviation from rated speed** : → *deviation 6*
3. **impedance voltage at rated current (for the principal tapping)** : → *voltage 86*
4. **international rated output** : → *output 15*
5. **maximum rated input power** : → *power 82*
6. **maximum rated step voltage** : → *voltage 108*
7. **maximum rated supply current** : → *current 125*
8. **maximum rated through-current** : → *through-current 1*
9. **maximum rated voltage** : → *voltage 109*
10. **maximum rated X-ray tube load** : → *load 64*
11. **maximum rated X-ray tube voltage** : → *voltage 110*
12. **rated accuracy limit primary current** : → *current 153*
13. **rated burden** : → *burden 4*
14. **rated burden of an energizing circuit** (*Syn.* rated power of an energizing circuit) : → *power 159*
15. **rated capacitance of a capacitor** : → *capacitance 14*
16. **rated capacity (of a cell or battery)** : → *capacity 23*
17. **rated continuous thermal current** : → *current 154*
18. **rated current** : → *current 155*
19. **rated current of a capacitor** : → *current 156*
20. **rated current of an arc suppression coil** : → *current 157*
21. **rated dynamic current** : → *current 158*
22. **rated frequency** : → *frequency 165*
23. **rated frequency** : → *frequency 166*
24. **rated frequency of a capacitor** : → *frequency 167*
25. **rated impedance of an energizing circuit** : → *impedance 47*
26. **rated input voltage** : → *voltage 162*
27. **rated instrument limit primary current** : → *current 159*
28. **rated insulation level** : → *level 71*
29. **rated level** : → *level 72*
30. **rated load torque** : → *torque 21*
31. **rated luminous flux** : → *luminous flux 6*
32. **rated output** : → *output 60*
33. **rated output** : → *output 61*
34. **rated output of a capacitor** : → *output 62*
35. **rated power** : → *power 157*
36. **rated power** : → *power 158*
37. **rated power of an energizing circuit** : → *power 159*
38. **rated primary current** : → *current 160*
39. **rated primary voltage** : → *voltage 163*
40. **rated recording level** : → *level 73*
41. **rated secondary current** : → *current 161*
42. **rated secondary voltage** : → *voltage 164*
43. **rated short time thermal current** : → *current 162*
44. **rated short-time current** : → *current 163*
45. **rated speed** : → *speed 32*
46. **rated step voltage** : → *voltage 165*
47. **rated temperature** : → *temperature 40*
48. **rated temperature category of a capacitor** : → *temperature 41*
49. **rated through-current** : → *through-current 2*
50. **rated transformation ratio of a current transformer** : → *ratio 73*
51. **rated transformation ratio of a voltage transformer** : → *ratio 74*
52. **rated value** : → *value 45*
53. **rated value** : → *value 46*
54. **rated value of an energizing quantity** : → *value 47*
55. **rated voltage factor** : → *factor 149*
56. **rated voltage of a capacitor** : → *voltage 168*
57. **rated voltage of a winding** : → *voltage 169*
58. **rated voltage ratio** : → *ratio 75*

ratemeter

1. **(counting) ratemeter** : a sub-assembly designed to provide a continuous indication of the average counting rate. ★ ictomètre → *ictomètre 1.* R измеритель скорости счета. D Zählratenmesser. E medidor de tasa de cuenta. I ittometro; rateometro di conteggio. N teltempometer. P integrator. S pulsratmätare; pulsfrekvensmätare. (391)
2. **dose ratemeter** : a radiation meter intended to measure or to permit evaluation of absorbed dose rate. ★ débitmètre de dose → *débitmètre 1.* R измеритель мощности дозы. D Dosisleistungsmesser. E medidor de tasa de dosis absorbida. I misuratore di tasso rateometro di dose. N dosistempometer. P miernik mocy dawki. S dosratsmätare. (391,881)
3. **exposure ratemeter** : a radiation meter intended to measure exposure rate. ★ débitmètre d'exposition → *débitmètre 3.* R измеритель мощности экспозиционной дозы. D Dosisleistungsmesser. E medidor de tasa de exposión. I misuratore di tasso rateometro di esposizione. N exposietempometer. P miernik mocy dawki ekspozycyjnej. S expositionsratsmätare. (391,881)
4. **linear ratemeter** : a ratemeter in which the indication is proportional to the counting rate. ★ ictomètre linéaire → *ictomètre 2.* R линейный измеритель скорости счета. D linearer Zählratenmesser. E medidor de tasa de cuenta lineal. I ittometro lineare; rateometro lineare. N lineaire teltempometer. P integrator linearny. S linjär (puls)ratmätare. (391)
5. **logarithmic ratemeter** : a ratemeter in which the indication is proportional to the logarithm of the counting rate. ★ ictomètre logarithmique → *ictomètre 3.* R логарифмический измеритель скорости счета. D logarithmischer Zählratenmesser. E medidor de tasa de cuenta logarítmico. I ittometro; rateometro logaritmico. N logaritmische teltempometer. P integrator logarytmiczny. S logaritmisk (puls)ratmätare. (391)
6. **particle fluence ratemeter** : a radiation meter intended to measure particle fluence rate. ★ débitmètre de fluence de particules → *débitmètre 2.* R измеритель плотности потока частиц. D Teilchenflußdichtemessgerät. E medidor de tasa de fluencia de partícula. I misuratore di tasso rateometro di fluenza di particelle. N (deeltjes-)fluxdichtheidsmeter; fluxdichtheidsmeter (deeltjes-). P miernik szybkości fluencji cząstek. S (partikel)fluensratsmätare. (391)

rating

1. **continuous rating** : the combination of rated values at which the vehicle, machine or apparatus is able to operate continuously without exceeding for any part the specified limits of temperature rise. ★ (caractéristiques en) régime continu → *régime 1.* R параметр продолжительного режима. D Bemessungsdaten für Dauerbetrieb. E caracteristicas en régimen continuo. I servizio continuo. N ononderbroken toegekende grootheden; toegekend continue bedrijf. P charakterystyki znamionowe pracy ciagłej. S märkdata för kontinuerlig drift. (811)
2. **duty-cycle rating** : the statement of the loads and conditions assigned to the machine by the manufacturer, at which the

machine may be operated on specified duty cycles. ★ service nominal cyclique → *service 53.* R номинальные рабочие режимы. D Nennspiel. E servicio nominal cíclico. I servizio nominale ciclico. N nominale bedrijfscyclus. P znamionowa praca okresowa. S märkning för intermittent drift. (411)

3. **equivalent continuous rating** : the statement of the load and conditions assigned to the machine for test purposes, by the manufacturer, at which the machine may be operated until thermal equilibrium is reached, and which is considered to be equivalent to the duty or duty-type. ★ service nominal continu équivalent → *service 51.* R режим эквивалентной длительной нагрузки. D gleichwertiger Dauerbetrieb. E servicio nominal continuo equivalente. I servizio nominale continuo equivalente. N nominaal gelijkwaardig continu bedrijf. P zastępcza praca ciągła. S märkning för ekvivalent kontinuerlig drift. (411)
4. **extended rating current** : → *current 81*
5. **extended rating type current transformer** : → *transformer 31*
6. **heating conductor surface rating** : the power per unit of surface area of a heating element. ★ puissance surfacique d'un élément chauffant → *puissance 159.* R номинальная поверхностная мощность нагревателя сопротивления. D Oberflächenleistung eines Heizelementes. E potencia superficial de un elemento calentador. I potenza per unità di superficie di un elemento riscaldante. N oppervlaktebelasting. P moc jednostkowa powierzchniowa grzejnika. S effekttäthet hos motståndselement. (841)
7. **intermittent rating** : a combination of rated values at which the vehicle, machine or apparatus is able to operate when on a specified duty whith on-load intervals alternating with off-load intervals without exceeding for any part the specified limits of temperature rise. ★ (caractéristiques en) régime intermittent → *régime 3.* R параметр переменного режима. D Bemessungsdaten fuer Aussetzbetrieb. E característica en régimen intermitente. I servizio intermittente. N toegekend intermitterend bedrijf. P charakterystyki znamionowe pracy przerywanej. S märkdata för intermittent drift. (811)
8. **loudness rating** : a measure expressed in decibels for charaterizing the loudness performance of complete telephone connections or of parts thereof such as sending system, line, receiving system. *Note.* — The CCITT is studying how to implement the principles described in the CCITT Recommendation P.76 from the Volume V of the Blue Book, 1989 so as to overcome certain serious difficulties experienced in applying reference equivalents. ★ équivalent pour la sonie → *équivalent 40.* R показатель громкости. D Lautheitsbeurteilung. E índice de sonoridad. I indice di intensità soggettiva. N luidheidsgetal. P wskaźnik głośności. S hörstyrkedämpning. (722)
9. **maximum continuous rating** : the statement of the load and conditions assigned to the machine by the manufacturer at which the machine may be operated for an unlimited period. ★ service nominal continu maximal → *service 52.* R режим максимальной длительной нагрузки. D Nenn-Dauerbetrieb. E servicio nominal continuo máximo. I servizio nominale continuo massimo. N nominaal maximum continu bedrijf. P znamionowa praca ciągła. S märkning för kontinuerlig drift. (411)
10. **power rating of an arc furnace transformer** : the maximum admissible continuous power of an arc furnace transformer. ★ puissance assignée d'un transformateur de four à arc → *puissance 72.* R номинальная мощность трансформатора дуговой печи. D Nennleistung eines Lichtbogenofentransformators. E potencia asignada de un transformador de horno de arco. I potenza nominale di un trasformatore di forno ad arco. N nominaal vermogen (van een boogoventransformator). P moc znamionowa transformatora urządzenia elektrotermicznego łukowego. S märkeffekt för ugnstransformator. (841)
11. **rating** : the set of rated values and operating conditions of a machine or a device or an equipment. ★ caractéristiques assignées → *caractéristique 78.* R номинальный режим. D ..... E características asignadas. I caratteristiche assegnate. N toegekende grootheden. P dane znamionowe. S märkning. (151,811,845,851)
12. **rating** : the whole of the numerical values of the electrical and mechanical quantities with their duration and sequences, assigned to the machine by the manufacturer and stated on the rating plate, the machine complying with the specified conditions. *Note.* — The duration may be indicated by a qualifying term. ★ service nominal → *service 50.* R номинальные данные. D Nennbetrieb. E servicio nominal. I servizio nominale. N nominaal bedrijf. P znamiona. S märkning. (411)
13. **rating of an electric vehicle** : the rating or, where appropriate the sum of the ratings, of the machines or other apparatus which limit the performance of the vehicle in a specified operating condition. ★ caractéristiques assignées d'un véhicule électrique → *caractéristique 79.* R параметр единицы электрического подвижного состава. D Bemessungsdaten eines Elektrofahrzeuges. E características asignadas de un vehículo eléctrico. I caratteristiche di targa di un veicolo elettrico. N toegekende grootheden van een elektrisch voertuig. P charakterystyki znamionowe pojazdu elektrycznego. S märkdata för elfordon. (811)
14. **reference apparatus for the determination of transmission performance ratings** : → *apparatus 13*
15. **short-time rating** : the statement of the load time and conditions assigned to the machine by the manufacturer at which the machine may be operated for a limited and short period, starting at the ambient temperature. ★ service nominal temporaire → *service 54.* R режим кратковременной нагрузки. D Nenn-Kurzzeitbetrieb. E servicio nominal temporal. I servizio nominale di breve durata. N nominaal kortstondig bedrijf. P znamionowa praca dorywcza. S märkning för korttidsdrift. (411)
16. **short-time rating** : the combination of rated values at which the vehicle, machine or apparatus is able to operate for a specified short time without exceeding for any part the specified limits of temperature rise. *Note.* — If the specified time is one hour, the rating is called the one-hour rating. ★ (caractéristiques en) régime de courte durée → *caractéristique 85.* R параметр кратковременного режима. D Bemessungsdaten fuer Kurzzeitbetrieb. E características en régimen de corta duración. I servizio di durata limitata. N toegekend korstondig bedrijf. P charakterystyki znamionowe pracy krótkotrwałej. S märkdata för korttidsdrift. (811)
17. **transmission performance rating** : the loss expressed in decibels, constant at all frequencies transmitted which it is necessary to add to, or remove from, a specified telephone reference system, so as to obtain the same transmission performance in a given direction, when a system to be assessed is added to, or used to replace the whole or appropriate part of the reference system. *Note.* — The transmission performance rating is positive or negative according to whether it has been necessary to add or remove the corresponding loss. ★ affaiblissement équivalent pour la qualité de transmission → *affaiblissement 35.* R показатель качества передачи. D Übertragungsgüte-Index. E índice de calidad de transmisión; atenuación equivalente para la calidad de transmisión. I indice di qualità della trasmissione. N kwaliteit ten opzichte van een gespecificeerd referentiesysteem. P tłumienność równoważna jakości transmisji; wskaźnik jakości transmisji. S transmissionsindex. (722)

ratio

1. **abundance ratio** : quotient of two isotopic abundances in a given element. ★ rapports des teneurs isotopiques → *rapport 67.* D Isotopenhäufigkeitsverhältnis. E relación de abundancia. I abbondanza isotopica relativa. N isotopenverhouding. P stosunek zawartości izotopów. S ymnighetskvot. (026)
2. **actual transformation ratio of a current transformer** : the ratio of the actual primary current to the actual secondary current of a current transformer. ★ rapport de transformation d'un transformateur de courant → *rapport 43.* R действительный коэффициент трансформации трансформатора тока. D Übersetzung eines Stromwandlers. E relación de transformación de un transformador de intensidad. I rapporto di trasformazione di un trasformatore di corrente. N werkelijke transformatieverhouding van een stroomtransformator. P przekładnia rzeczywista przekładnika prądowego. S verklig strömomsättning. (321)
3. **actual transformation ratio of a voltage transformer** : the ratio of the actual primary voltage to the actual secondary voltage of a voltage transformer. ★ rapport de transformation d'un transformateur de tension → *rapport 44.* R действительный коэффициент

трансформации трансформатора напряжения. D Übersetzung eines Spannungswandlers. E relación de transformación de un transformador de tensión. I rapporto di trasformazione di un trasformatore di tensione. N werkelijke transformatieverhouding van een spanningstransformator. P przekładnia rzeczywista przekładnika napięciowego. S verklig spänningsomsättning. (321)

4. **alpha ratio** : as applied to fissionable nuclei, the ratio of the radiative capture cross-section to the fission cross-section. ★ facteur alpha → *facteur 8.* D Verhältniszahl α bei spaltbaren Kernen. E factor alfa. I fattore alfa. N alfafactor. P współczynnik α. S alfavärde. (026)
5. **answer bid ratio** (*Syn.* ABR (abbreviation)) : for a given circuit group or destination code and during a specified time interval, the ratio of the number of bids that result in an answer signal to the total number of bids. *Note.* — At some points of the network this ratio may be lower than answer seizure ratio due to unsuccessful bids. ★ taux de tentatives de prise avec réponse → *taux 33.* D bezogene Anzahl der erfolgreichen Belegungsversuche. P sprawność użytkowa. (715)
6. **answer seizure ratio** (*Syn.* ASR (abbreviation)) : for a given circuit group or destination code and during a specified time interval, the ratio of the number of seizures that result in an answer signal to the total number of seizures. *Note.* — At some points of the network this ratio may be lower than completion ratio due to automatic reattempts. ★ taux de prises avec réponse → *taux 30.* D bezogene Anzahl der erfolgreichen Belegungen. P współczynnik zgłoszeń załatwionych. (715)
7. **aspect ratio** : in facsimile the ratio of width to height of a picture or a scanning field. ★ rapport de format → *rapport 21.* R коэффициент формата изображения. D Seitenverhältnis. E relación de formato; relación de aspecto. I rapporto di formato. N breedte/hoogte-verhouding. P format rozwinięcia. S bildkvot. (721)
8. **aspect ratio** : the ratio of the width to the height of a rectangular picture. ★ format → *format 2.* R формат. (723)
9. **axial ratio** : the ratio of the major axis to the minor axis of a polarization ellipse. ★ rapport d'axes → *rapport 11.* R отношение осей. D Achsenverhältnis. E relación axial. I rapporto d'assi. N assenverhouding. P stosunek osi. S axelförhållande. (726)
10. **bit energy to noise spectral density ratio** (E/N_0) : at a point in a transmission channel, the ratio, generally expressed in decibels, of the energy used to transmit a binary digit to the noise power spectral density. ★ rapport énergie par bit sur densité spectrale de bruit → *rapport 52.* R отношение энергии бита к спектральной плотности шума. D Rauschabstand bei digitaler Übertragung. E relación de energía por bit sobre densidad espectral de ruido. I rapporto energia per bit/densità spettrale di rumore. N verhouding van de bitenergie tot de ruisspectrumenergie-dichtheid. P stosunek energii bitu do gęstości widmowej szumu. S ..... (702)
11. **bit error ratio** (*Syn.* BER (abbreviation)) : the error ratio for a binary signal. ★ taux d'erreur binaire → *taux 38.* R коэффициент ошибок по битам. D Bitfehlerverhältnis. E tasa de error binario; tasa de error sobre los bits. I tasso d'errore binario; tasso d'errore di bit; BER (Bit error rate) (abbreviazione). N bitfoutenverhouding. P stopa błędów binarna. S bitfelskvot. (704)
12. **block error ratio** : the ratio of the number of erroneous blocks received to the total number of correct blocks sent during homologous time intervals. ★ taux d'erreurs sur les blocs → *taux 43.* R коэффициент ошибок по блокам. D Blockfehlerhäufigkeit; Blockfehlerquote. E tasa de errores sobre los bloques. I tasso di errori sui blocchi. N blokfoutendichtheid. P stopa błędów blokowa. S blockfelskvot. (721)
13. **breeding ratio** : the conversion ratio when it is greater than unity. ★ rapport de surrégénération → *rapport 33.* D Brutverhältnis. E razón de reproducción. I rapporto di surrigenerazione. N kweekverhouding. P współczynnik powielania. S bridförhållande. (026)
14. **character error ratio** : the ratio of the number of erroneous characters received to the total number of correct characters sent during homologous time intervals. ★ taux d'erreurs sur les caractères → *taux 44.* R коэффициент ошибок по знакам. D Zeichenfehlerhäufigkeit; Zeichenfehlerquote. E tasa de errores sobre los caracteres. I tasso di errori sui caratteri. N karakterfoutendichtheid. P stopa błędów znakowa. S teckenfelskvot. (721)
15. **common mode rejection ratio** (*Syn.* CMRR (abbreviation)) : the ratio of the voltage applied between a specified reference point and the input terminals when connected together by a specified circuit, to the voltage required between the input terminals to produce the same output. *Notes. 1* — The common mode rejection ratio is usually expressed in decibels and may depend upon frequency. *2* — Common mode rejection ratio may also apply to quantities other than voltages. ★ facteur de rejection de mode commun → *facteur 147.* R коэффициент подавления помех общего вида (синфазных помех). D Gleichtaktunterdrückungsmass. E factor de rechazo de modo común. I rapporto di reiezione di modo comune; CMRR. N ..... P współczynnik tłumienia sygnału wspólnego. S gemensammodundertryckning; CMRR. (303)
16. **compensation ratio** (of a compensated ionization chamber) : the inverse of the compensation factor. It is used as an index of performance of a compensated ionization chamber. ★ rapport de compensation → *rapport 13.* R степень компенсации (скомпенсированной ионизационной камеры). D Kompensationsverhältnis (einer kompensierten Ionisationskammer). E relación de compensación (de una cámara de ionización compensada). I rapporto di compensazione (di una camera di ionizzazione compensata). N compensatieverhouding (v.e. compensatie-ionisatievat). P stosunek kompensacji (skompensowanej komory jonizacyjnej). S kompensationskvot. (391)
17. **completion ratio** (*Syn.* efficiency (in teletraffic)) : the ratio of the number of completed call attempts to the total number of call attempts, at a given point of the network and during a specified time interval. ★ taux d'efficacité → *taux 35.* D Verhältnis der Anzahl erfolgreicher Verbindungsversuche. P skuteczność. (715)
18. **conduction ratio** : the ratio of the conduction interval to the sum of the conduction interval and the idle interval. ★ rapport de conduction → *rapport 14.* R коэффициент проводимости. D Stromflußverhältnis. E relación de conducción. I rapporto di conduzione. N geleidingsverhouding. P współczynnik przewodzenia. S ledfaktor. (551)
19. **constant ratio code** : → *code 23*
20. **contrast ratio correction** (*Syn.* gamma correction) : → *correction 13*
21. **control ratio** : the slope of the control characteristic at a stated point. ★ facteur de commande → *facteur 39.* R коэффициент управления возникновением разряда. D Durchgriff. E factor de control. I fattore di comando. N regelfactor. P współczynnik sterowania. S styrgradient. (531)
22. **conversion ratio** : the ratio of the number of fissile nuclei produced by conversion to the number of fissile nuclei destroyed. The term can refer to an instant of time or to a period of time. ★ rapport de conversion → *rapport 15.* D Konversionsverhältnis. E razón de conversión. I rapporto di conversione. N conversieverhouding; omzettingsverhouding. P współczynnik konwersji. S konversionsförhållande. (026)
23. **current ratio** (*Syn.* current amplification) : the ratio under steady-state conditions of a small change of the output current to the corresponding change of the control current at specified load and operating conditions. ★ rapport des courants → *rapport 46.* R коэффициент усиления тока. D Stromverhältnis; Stromverstärkung. E relación de corrientes; factor de amplificación de corriente. I guadagno di corrente. N stroomversterkingsfactor. P wzmocnienie prądowe; współczynnik wzmocnienia prądowego. S strömförstärkning. (431)
24. **damping ratio** : for a linear system of the second order described by the differential equation

$$\frac{d^2x}{dt^2} + 2D\omega_0\frac{dx}{dt} + \omega_0^2 x = 0$$

the damping ratio is the value of the factor *D*. *Note.* — ω_0 is called the angular resonance frequency of the system. ★ taux d'amortissement → *taux 4.* R коэффициент демпфирования. D Dämpfungsgrad. E factor de amortiguamiento. I coefficiente di smorzamento. N dempingsfactor. P współczynnik tłumienia. S relativ dämpning. (351)
25. **damping ratio** : ratio of the actual damping to the critical damping. ★ facteur d'amortissement → *facteur 26.* R отношение затуханий. D Dämpfungsgrad. E factor de amortiguamiento. I fattore di smorzamento.

N dempingsverhouding. P współczynnik tłumienia. S dämpningsförhållande. (801)

26. **day to busy hour ratio** : the ratio of the traffic volume of a 24 consecutive hours period to the busy hour traffic volume. *Note.* — "Busy-hour to day ratio" is also used. ★ rapport du trafic journalier au trafic à l'heure chargée → *rapport 51.* D Verkehrsverhältnis Tag zu Hauptverkehrsstunde. P stosunek ruchu pełnodobowego do godzinowego. (715)

27. **differential absorption ratio** : the ratio of concentration of a nuclide in a given organ or tissue to the concentration that would be obtained if the same administered quantity of this nuclide were uniformly distributed throughout the body. ★ affinité différentielle → *affinité 1.* R коэффициент избирательного поглощения. D differentielles Konzentrationsverhältnis. E afinidad diferencial. I rapporto di assorbimento differenziale. N differentiële absorptieverhouding. P stosunek absorbcji rożnicowej. S differentiell absorptionskvot. (881)

28. **digit error ratio** : the ratio of the number of erroneous digits received to the total number of correct digits sent during homologous time intervals. ★ taux d'erreurs sur les éléments numériques → *taux 46.* R коэффициент ошибок по символам. D Ziffernfehlerhäufigkeit; Ziffernfehlerquote. E tasa de errores sobre los dígitos. I tasso di errori sul bit. N digitfoutendichtheid. P stopa błędów elementowa. S sifferfelskvot. (721)

29. **direct ratio** (of an interior lighting installation) : ratio of the direct flux on the working plane to the downward flux of the installation. ★ rapport direct → *rapport 49.* R прямая составляющая светового потока (осветительной установки в помещении). D Direktanteil (einer Innenraumbeleuchtungsanlage). E fracción directa. I rapporto diretto. N aandeel van de directe neerwaartse lichtstroom. P wskaźnik wykorzystania. S direktflödets relativa andel. (845)

30. **discrimination ratio** (of an antenna between two received waves) : the ratio, generally expressed in decibels, of the power available at the terminals of a receiving antenna from the desired electromagnetic wave, to the available power resulting from an undesired wave having the same field strength but differing by some other specified characteristic such as direction of propagation, polarization, signal frequency. ★ rapport de discrimination → *rapport 20.* R коэффициент избирательности (антенны между двумя принимаемыми волнами). D Trennung; Entkopplung (einer Antenne zwischen zwei empfangenen Wellen). E relación de discriminación (de una antena entre dos ondas recibidas). I rapporto di discriminazione. N discriminatieverhouding. P współczynnik dyskryminacji (anteny między dwiema odbieranymi falami). S selektivitet. (712)

31. **disengaging ratio** : the ratio of the disengaging value to the operate value. ★ rapport de dégagement → *rapport 19.* R коэффициент трогания при возврате. D Rückfallverhältnis. E relación de liberación. I rapporto di disimpegno. N afvalverhoudingswaarde. P ..... S frånslagsförhållande. (446)

32. **downward light output ratio** (of a luminaire) : ratio of the downward flux of the luminaire, measured under specified practical conditions with its own lamps and equipment, to the sum of the individual luminous fluxes of the same lamps when operated outside the luminaire with the same equipment, under specified conditions. ★ rendement normalisé inférieur → *rendement 37.* R коэффициент полезного действия светового потока в нижней полусфере (светильника). D unterer Betriebswirkungsgrad (einer Leuchte). E eficiencia hemiesférica inferior de luminarias. I rendimento normale inferiore. N neerwaarts armatuurendement. P sprawność eksploatacyjna dolnoprzestrzenna. S ..... (845)

33. **duty ratio** (of a device or equipement) : the ratio, for a given time interval, of the on-load duration used in the total time. ★ facteur de marche → *facteur 99.* R продолжительность включения. D relative Einschaltdauer. E factor de marcha. I fattore di funzionamento. N inschakelfactor. P względny czas pracy. S driftfaktor. (151)

34. **(effective) field ratio** : as applied to series motors, the ratio of the main field ampere-turns remaining after field weakening to the maximum ampere-turns for the same current in the armature. *Note.* — The sum of the field weakening ratio and the effective field ratio is equal to unity. ★ (taux de) champ résiduel → *champ 81.* R степень возбуждения; коэффициент поля возбуждения. D (effektiver) Erregergrad. E porcentaje de campo residual. I grado d'eccitazione; tasso d'eccitazione. N veldverhouding. P współczynnik wzbudzenia (resztkowego). S magnetiseringsgrad. (811)

35. **electron-gun convergence ratio** (*Syn.* beam-compression factor) : → *beam-compression 1*

36. **error ratio** : the ratio of the number of digital errors received in a specified period to the total number of digits received in the same period. *Note.* — Numerical values of this ratio are usually expressed in the form : $n.10^{-p}$ where p is a positive integer. ★ taux d'erreur → *taux 37.* R коэффициент ошибок. D Fehlerverhältnis. E tasa de error; porcentaje de error. I tasso d'errore. N foutenverhouding. P stopa błędów. S felkvot. (702,704)

37. **excitation response ratio** : the relative excitation response calculated by replacing the actual change in excitation voltage by a linear variation leading to the same mean value during the first half-second. ★ facteur de réponse (de l'excitation) → *facteur 153.* R кратность скорости нарастания возбуждения. D mittlere Erregungsgeschwindigkeit. E factor de respuesta (de la excitación). I fattore di risposta. N gemiddelde responsie van de bekrachtigingsspanning. P średnia szybkość wzrostu napięcia wzbudzającego. S magnetiseringsresponsförhållande. (411)

38. **(field) weakening ratio** : as applied to series motors, the ratio of the reduction in ampere-turns in the main field winding to the maximum ampere-turns for the same current in the armature. ★ (taux d')affaiblissement de champ → *affaiblissement 61.* R степень ослабления возбуждения. D Feldschwächgrad. E porcentaje de shuntado. I grado d'indebolimento (del campo); tasso d'indebolimento (del campo). N veldverzwakkinggraad; veldverzwakkingsverhouding. P współczynnik osłabienia wzbudzenia. S shuntningsgrad. (811)

39. **flexibility ratio** : the ratio of the speed at minimum field to the speed at maximum field at rated full field current. ★ taux de souplesse → *taux 32.* R коэффициент гибкости поля. D (Feldschwäch) Drehzahlverhältnis. E flexibilidad de la tracción. I coefficiente d'elasticità. N regelbereik. P współczynnik elastyczności (obrotowej). S shuntområde. (811)

40. **frequency of unity current transfer ratio** (f_1) : the frequency at which the modulus of the common-emitter small-signal short-circuit forward current transfer ratio $|h_{21e}|$ has decreased to unity. ★ fréquence du rapport de transfert unité de courant → *fréquence 106.* R частота единичного коэффициента передачи по току. D Einsfrequenz. E frecuencia de relación de transferencia unidad de corriente. I frequenza del rapporto di trasferimento dell'unità di corrente. N ..... P częstotliwość graniczna. S enhetsgränsfrekvens. (521)

41. **gyromagnetic ratio** (γ) : the ratio of the magnetic area moment due to spin to the angular moment of the spin of an electron in a gyromagnetic medium. *Note.* — The gyromagnetic ratio of a free electron approximately equals: $176\ 10^6\ C\ kg^{-1}$. ★ rapport gyromagnétique → *rapport 53.* R гиромагнитное отношение (обозначение). D gyromagnetisches Verhältnis. E relación giromagnética. I rapporto giromagnetico. N gyromagnetische verhouding. P stosunek giromagnetyczny; współczynnik giromagnetyczny. S gyromagnetiska kvoten. (726)

42. **image rejection ratio** : the ratio of the level of a specified signal at the image frequency of a receiver to the level of a signal at the tuned frequency, producing equal output powers. ★ affaiblissement sur la fréquence conjuguée → *affaiblissement 49.* R коэффициент ослабления сигнала на зеркальной частоте. D Spiegelfrequenz-Unterdrückungsfaktor. E decaimiento en la frecuencia conjugada. I rappporto di ricezione alla frequenza immagine. N spiegelonderdrukkingsverhouding. P osłabienie sygnałów lustrzanych. S spegelfrekvensdämpning. (161)

43. **intermediate frequency rejection ratio** : the ratio of the level of a specified signal at any intermediate frequency used in a receiver to the level of the wanted signal producing equal output powers. ★ affaiblissement sur la fréquence intermédiaire → *affaiblissement 50.* R коэффициент ослабления сигнала на промежуточной частоте. D Zwischenfrequenz-Unterdrückungsfaktor. E decaimiento en la frecuencia intermedia. I rapporto di ricezione alla frequenza intermedia. N middenfrequentie-onderdrukkingsverhouding. P osłabienie sygnałów o częstotliwości pośredniej. S mellanfrekvensdämpning. (161)

44. **interreflection ratio** : ratio of the radiant or luminous flux Φ_i indirectly reaching a surface in a cavity to the primary flux Φ_0 directly received by another surface, the flux Φ_i resulting from

the interreflection undergone by the flux Φ_b. ★ facteur de réflexions mutuelles → *facteur 143.* R коэффициент многократных отражений. D Interflexionswirkungsgrad. E factor de forma. I fattore di riflessioni mutue. N interreflectie-aandeel. P sprawność odbicia wielokrotnego. S interreflexionsgrad. (845)

45. **isolation ratio** (of a multiport antenna) : the ratio, generally expressed in decibels, of the incident power at one port of a multiport antenna, to the available power produced at another port by that incident power. ★ rapport de découplage entre accès → *rapport 18.* R коэффициент развязки (многоканальной антенны). D Entkopplung (einer Antenne mit mehreren Anschlüssen). E relación de desacoplamiento (para una antena de entradas múltiples). I rapporto d'isolamento. N ontkoppelfactor. P współczynnik izolacji (anteny z wieloma wejściami). S isolation. (712)

46. **justification ratio** (*Syn.* stuffing ratio) : the ratio of the justification rate to the justification capacity. ★ taux de justification → *taux 20.* R коэффициент цифрового выравнивания. D Justierungsverhältnis; Füllungsverhältnis. E tasa de justificación. I rapporto di giustificazione. N justeerverhouding. P współczynnik dopełniania. S taktanpassningsgrad. (704)

47. **lay ratio** : the ratio of the length of lay to diameter of the helix formed by one cable component. *Note.* — Depending on the circumstances, the diameter to consider is either the internal diameter, or the mean diameter, of the external diameter of the layer in which the component is laid in the helix. ★ rapport de pas → *rapport 25.* R кратность шага скрутки. D Verseilfaktor. E relacio'n de paso. I rapporto di passo. N spoed-iameterverhouding. P współczynnik skętu. S stigningsgrad. (461)

48. **lay ratio** (*Syn.* lay factor) : the ratio of the length of lay to the diameter of the helix. ★ rapport de câblage → *rapport 12.* R коэффициент скрутки. D Schlaglängenverhältnis. E relación de cableado. I rapporto di cordatura. N slag-lengteverhouding. P skok skrętu względny. S stigningstal. (466)

49. **light output ratio** (of a luminaire) (*Syn.* luminaire efficiency) : ratio of the total flux of the luminaire, measured under specified practical conditions with its own lamps and equipment, to the sum of the individual luminous fluxes of the same lamps when operated outside the luminaire with the same equipment, under specified conditions. ★ rendement normalisé → *rendement 36.* R коэффициент полезного действия (светильника). D Betriebswirkungsgrad (einer Leuchte). E eficiencia de la luminaria. I rendimento normale. N armatuurrendement. P sprawność eksploatacyjna. S driftverkningsgrad för armatur. (845)

50. **loss ratio** : the ratio of the reverse loss to the forward loss, both expressed in decibels, along a transmission path in a microwave isolator or a circulator. ★ facteur d'affaiblissement → *facteur 25.* R отношение потерь. D Verlustverhältnis. E factor de atenuación; factor de pérdidas. I fattore di smorzamento; fattore di perdita. N verliesverhouding. P stosunek tłumień. S dämpningskvot. (221,726)

51. **luminance/synchronizing ratio** : the ratio of the white level to the synchronising level, both with reference to the blanking level. ★ rapport luminance/synchronisation → *rapport 54.* R отношение сигналов яркости и синхронизации. (723)

52. **magnetoresistive ratio** : the ratio of the resistance of a magnetoresistor at a specified magnetic flux density corresponding to the resistance at zero magnetic flux density. ★ rapport de magnétorésistance → *rapport 23.* R магниторезистивное отношение. D Widerstandsverhältnis eines Magnetowiderstandes. E relación de magnetorresistencia. I rapporto di magnetoresistenza. N magnetoweerstandsverhouding. P stosunek rezystancji magnetorezystora. S magnetoresistiv kvot. (521)

53. **magnification ratio** (of a luminaire) : ratio of the maximum luminous intensity of the luminaire, generally a projector, to the mean spherical luminous intensity of its lamp. *Note.* — In certain countries, the definition of the magnification ratio varies according to the types of luminaires or lamps. ★ facteur de multiplication → *facteur 108.* R коэффициент усиления (светильника). D Verstärkungszahl (einer Leuchte); Verstärkungsfaktor. E factor multiplicador. I fattore di moltiplicazione. N versterkingsfactor (van een armatuur). P współczynnik wzmocnienia oprawy. S förstärkningstal. (845)

54. **maximum justification ratio** (*Syn.* maximum stuffing ratio) : the justification ratio that occurs when the digit rate of the original digital signal is at its lower tolerance limit and the digit rate of the channel provided for conveying it by justification is at its upper tolerance limit. *Note.* — The maximum justification ratio is the limiting value that can actually occur under practical operating conditions. ★ taux maximal de justification → *taux 60.* R максимальный коэффициент цифрового выравнивания. D maximales Justierungsverhältnis; maximales Füllungsverhältnis. E tasa máxima de justificación. I rapporto massimo di giustificazione. N maximale justeerverhouding. P współczynnik dopełniania największy. S maximal taktanpassningsgrad. (704)

55. **maximum stuffing ratio** (*Syn.* maximum justification ratio) : → *ratio 54*

56. **minimum justification ratio** (*Syn.* minimum stuffing ratio) : the justification ratio that occurs when the digit rate of the original digital signal is at its upper tolerance limit and the digit rate of the channel provided for conveying it by justification is at its lower tolerance limit. *Note.* — The minimum justification ratio is the limiting value that can actually occur under practical operating conditions. ★ taux minimal de justification → *taux 61.* R минимальный коэффициент цифрового выравнивания. D minimales Justierungsverhältnis; minimales Füllungsverhältnis. E tasa mínima de justificación. I rapporto minimo di giustificazione. N minimale justeerverhouding. P współczynnik dopełniania najmniejszy. S minimal taktanpassningsgrad. (704)

57. **minimum stuffing ratio** (*Syn.* minimum justification ratio) : → *ratio 56*

58. **mixing ratio** (of water vapour) : the ratio of the mass of water vapour to the mass of dry air in a given volume of air. *Note.* — This ratio is generally expressed in grams per kilogram. ★ rapport de mélange → *rapport 24.* D Mischungsverhältnis (von Wasserdampf). P stosunek mieszaniny (pary wodnej). (705)

59. **(frequency) deviation ratio** : in frequency modulation and under specified conditions the ratio of the peak frequency deviation to the maximum frequency of the modulating signal. ★ facteur de déviation → *facteur 68.* R индекс частотной модуляции. D Frequenzmodulationsgrad (Frequenz). E factor de desviación (de frecuencia). I fattore di deviazione (di frequenza); rapporto di deviazione (di frequenza). N (frequentie)afwijkings-verhouding; frequentiezwaai. P wskaźnik modulacji częstotliwościowej. S moduleringsindex. (702)

60. **nominal justification ratio** (*Syn.* nominal stuffing ratio) : the justification ratio that occurs when the original digital signal and the channel provided for conveying it by justification both have their nominal digit rates. ★ taux nominal de justification → *taux 64.* R номинальный коэффициент цифрового выравнивания. D nominelles Justierungsverhältnis; nominelles Füllungsverhältnis. E tasa nominal de justificación. I rapporto nominale di giustificazione. N nominale justeerverhouding. P współczynnik dopełniania znamionowy. S nominell taktanpassningsgrad. (704)

61. **nominal stuffing ratio** (*Syn.* nominal justification ratio) : → *ratio 60*

62. **notching ratio** : the ratio of the tractive effort produced immediately after taking a notch to that existing immediately before it was taken. ★ finesse de réglage → *finesse 2.* R степень плавности регулирования. D Ungleichförmigkeit. E finura de regulación. I finezza di regolazione. N aanzetkoppelsprong bij schakelen. P stopień płynności regulacji. S dragkraftskvot vid uppkoppling. (811)

63. **nth harmonic ratio** : the ratio of the r.m.s. value of the nth harmonic to that of the fundamental component. ★ taux de l'harmonique (de rang) n → *taux 21.* R отношение *n*-ой гармоники. D n-tes Oberschwingungsverhältnis. E tasa del armónico (derango) n. I tasso dell'armonica (di ordine)n; tasso dell'nesima armonica. N verhouding van de n-de harmonische. P współczynnik n-tej harmonicznej. S n:te övertonsförhållande. (161)

64. **optical light output ratio** (of a luminaire) : ratio of the total flux of the luminaire, measured under specified conditions, to the sum of the individual luminous fluxes of the lamps when inside the luminaire. *Note.* — For luminaires using incandescent lamps only, the optical light output ratio and the light output ratio are the same in practice. ★ rendement optique → *rendement 38.* R оптический коэффициент полезного действия светильника. D Leuchtenwirkungsgrad (einer leuchte); optischer Wirkungsgrad. E eficiencia óptica.

I rendimento ottico. N optisch armatuurrendement. P sprawność optyczna. S optisk armaturverkningsgrad. (845)

65. **polarization (decoupling) ratio** (of an antenna) : the ratio, generally expressed in decibels, of the power radiated with the polarization for which an antenna was designed to the power radiated with orthogonal polarization in the same direction. ★ rapport de (découplage de) polarisation → *rapport 17.* R коэффициент поляризационной развязки (антенны). D Polarisationsentkopplung (einer Antenne). E relación de desacoplamiento de polarización (de una antena). I disaccoppiamento di polarizzazione. N polarisatie-ontkoppelverhouding. P współczynnik (odchylenia) polaryzacji (anteny). S korspolarisationsdämpning. (712)

66. **polarization ratio** (of a field vector) : the ratio of the two complex numbers that represent the components of a field vector along two orthogonal directions in the plane of polarization. ★ rapport de polarisation → *rapport 26.* R поляризационное отношение (вектора поля). D Polarisationsverhältnis (eines Feldvektors). E relación de polarización (de un vector de campo). I rapporto di polarizzazione (di un vettore di campo). N polarisatieverhouding (van een veldvector). P współczynnik polaryzacji (wektora pola). S polarisationskvot. (726)

67. **polarization ratios** (of a degenerate mode) (in a waveguide) : the ratios of the coefficients of the linear combination of independent modes of propagation that represents a degenerate mode in a waveguide. *Notes. 1* — If there are exactly n independent modes of propagation there will be at most n-1 independent ratios that describe completely the polarization of a given degenerate mode. *2* — In a waveguide with square or circular cross-section there are two independent modes of propagation, and a single ratio describes the polarization of a given degenerate mode. ★ rapports de polarisation → *rapport 66.* R поляризационные отношения (вырожденного типа колебаний) (в волноводе). D Polarisationsverhältnisse (eines entarteten Modes) (im Wellenleiter). E relaciones de polarización (de un modo degenerado) (en una guíaonda). I rapporto di polarizzazione (di un modo degenere) (in una guida d'onda). N polarisatieverhoudingen (van een ontaarde modus). P współczynnik polaryzacji (dla rodzaju zdegenerowanego w falowodzie). S polarisationskvoter för degenererade moder. (726)

68. **post-deflection acceleration ratio** : the ratio of the screen potential to the potential of the last accelerating electrode preceding the deflecting system. ★ rapport de post-accélération → *rapport 27.* R коэффициент послеускорения. D Nachbeschleunigungsverhältnis. E relación de aceleración posterior; relación de postaceleración. I rapporto di post-accelerazione. N naversnellingsverhouding. P wskaźnik napięcia poodchyleniowego. S efteraccelerationsförhållande. (531)

69. **power-to-mass ratio** (*Syn.* specific output) : → *output 64*

70. **protection ratio** : the minimum value of the signal-to-disturbance ratio required to achieve a specified performance of a device or equipment. ★ rapport de protection → *rapport 28.* R защитное отношение. D (Sicherheits- bzw.) Schutzabstand. E relación de protección. I rapporto di protezione. N minimale signaal/ruisverhouding. P współczynnik ochronny. S erforderligt signal-störningsförhållande. (161)

71. **protection ratio against lightning impulses** : the ratio of the lightning impulse protective level of a protective device to the rated lightning impulse withstand voltage of this device. ★ rapport de protection aux surtensions de foudre → *rapport 29.* R защитный коэффициент при грозовых перенапряжениях. D Blitz-Überspannungsschutzfaktor. E factor de protección contra sobretensiones tipo rayo. I rapporto di protezione alle sovratensioni a impulso. N bliksemstootspanningsbeschermingsfactor. P piorunowy współczynnik ochrony. S skyddsfaktor för kort stöt. (604)

72. **protection ratio against switching impulses** : the ratio of the switching impulse protective level of a protective device to the rated switching impulse withstand voltage of this device. ★ rapport de protection aux surtensions de manœuvre → *rapport 30.* R защитный коэффициент при коммутационных перенапряжениях. D Schalt-Überspannungsschutzfaktor. E factor de protección contra sobretensiones tipo maniobra. I rapporto di protezione alle sovratensioni di manovra. N schakelstootspanningsbeschermingsfactor. P łączeniowy współczynnik ochrony. S skyddsfaktor för lång stöt. (604)

73. **rated transformation ratio of a current transformer** : the ratio of the rated primary current to the rated secondary current of a current transformer. ★ rapport de transformation assigné d'un transformateur de courant → *rapport 40.* R номинальный коэффициент трансформации трансформатора тока. D Bemessungsübersetzung eines Stromwandlers. E relación de transformación asignada de un transformador de intensidad. I rapporto di trasformazione nominale di un trasformatore di corrente. N toegekende transformatieverhouding van een stroomtransformator. P przekładnia znamionowa przekładnika prądowego. S strömtransformators märkomsättning. (321)

74. **rated transformation ratio of a voltage transformer** : the ratio of the rated primary voltage to the rated secondary voltage of a voltage transformer. ★ rapport de transformation assigné d'un transformateur de tension → *rapport 41.* R номинальный коэффициент трансформации трансформатора напряжения. D Bemessungsübersetzung eines Spannungswandlers. E relación de transformación asignada de un transformador de tensión. I rapporto di trasformazione nominale di un trasformatore di tensione. N toegekende transformatieverhouding van een spanningstransformator. P przekładnia znamionowa przekładnika napięciowego. S spänningstransformators märkomsättning. (321)

75. **rated voltage ratio** (of a transformer) : the ratio of the rated voltage of a winding to the rated voltage of another winding associated with a lower or equal rated voltage. ★ rapport de transformation assigné → *rapport 39.* R номинальный коэффициент трансформации (трансформатора). D Bemessungsübersetzung (eines Transformators). E relación de transformación asignada (de un transformador). I rapporto di trasformazione nominale (di un trasformatore). N toegekende transformatieverhouding (van een transformator). P przekładnia znamionowa (transformatora). S märkomsättning. (421)

76. **reproduction ratio** : the ratio of the linear dimensions of the document reproduced by facsimile to the corresponding dimensions of the original document. ★ rapport de reproduction → *rapport 31.* R коэффициент воспроизведения. D Wiedergabeverhältnis. E relación de reproducción. I rapporto di riproduzione. N reproduktieverhouding. P skala odtwarzania. S reproduktionsförhållande. (721)

77. **resetting ratio** : the ratio of a resetting value to an operate value. *Note.* — Regarding a standard these values may be either just values or must values. ★ rapport de retour → *rapport 32.* R коэффициент возврата. D Rückkehrverhältnis. E relación de reposición. I rapporto di rilascio. N herstelverhouding. P współczynnik powrotu. S återvändsförhållande. (446)

78. **series mode rejection ratio** (*Syn.* SMRR (abbreviation)) : the ratio of the series mode voltage causing a given change in output information to the voltage initiated by the quantity to be measured which would produce the same change. *Note.* — The series mode rejection ratio is usually expressed in decibels and may depend upon frequency. ★ facteur de rejection de mode série → *facteur 148.* R коэффициент подавления помех последовательного вида. D Serientaktunterdrückungsmass. E factor de rechazo de modo serie. I rapporto di reiezione di modo serie; SMRR. N ..... P współczynnik tłumienia sygnału szeregowego. S seriemodundertryckning; SMRR. (303)

79. **setting ratio of a specified time** : the ratio of the maximum setting value of a specified time to its minimum value. ★ rapport d'ajustement d'une temporisation → *rapport 7.* R кратность уставок выдержки времени. D Einstellverhältnis der Zeitverzögerung. E relación de ajuste de una temporización. I rapporto di regolazione di una temporizzazione. N instelverhouding van een gespecificeerde tijd. P krotność nastawcza. S inställningsförhållande för specificerad tid. (446)

80. **setting ratio of the characteristic quantity** : the ratio of the maximum setting value of the characteristic quantity to the corresponding minimum value. ★ rapport d'ajustement de la grandeur caractéristique → *rapport 6.* R кратность уставок по характеристической величине. D Einstellverhältnis der charakteristischen Grösse. E relación de ajuste de la magnitud característica. I rapporto di regolazione

della grandezza caratteristica. N instelverhouding van de karakteristieke grootheid. P krotność nastawcza wielkości charakterystycznej. S inställningsförhållande för karakteristisk storhet. (446)

81. short-circuit ratio : the ratio of the excitation current for rated primary voltage on open-circuit to the excitation current for rated primary current on sustained symmetrical short-circuit, both with the machine running at rated speed. ★ rapport de court-circuit → *rapport 16.* R отношение короткого замыкания. D Leerlauf-Kurzschluß-Verhältnis. E relación de cortocircuito. I rapporto di cortocircuito. N kortsluitverhouding. P stosunek zwarcia. S kortslutningsförhållande. (411)

82. signal/interference ratio (*Syn.* signal to interference ratio) : → *ratio 85*

83. signal/noise ratio (*Syn.* signal-to-noise ratio) : → *ratio 91*

84. signal to crosstalk ratio : a ratio, usually expressed in decibels, of the apparent power without crosstalk at a given point of a disturbed channel, to the apparent power developed by crosstalk from a single disturbing channel at the same point when the disturbed and disturbing channels are transmitting a given apparent power at a point of zero relative level. ★ écart diaphonique → *écart 13.* R защищенность от переходного влияния. D Signal-Nebensprechverhältnis. E relación señal/diafonía. I scarto diafonico. N signaal/overspraakverhouding. P odstęp od przesłuchu. S signal-överhörningsförhållande. (722)

85. signal to interference ratio (*Syn.* signal/interference ratio) : the ratio, generally expressed in decibels, of the power of the wanted signal to the total power of interfering signals and noise, evaluated in specified conditions at a specified point of a transmission channel. ★ rapport signal sur brouillage → *rapport 60.* R отношение сигнал-помеха. D Signal-zu-Überlagerung-Verhältnis; Signal/Überlagerungsverhältnis. E relación señal/interferencia. I rapporto segnale/disturbo. N signaal/stoorsignaal-verhouding. P stosunek sygnału do zakłócenia. S signal-interferensförhållande. (702)

86. signal to noise ratio of a tape recorder : the ratio, expressed in decibels, of a wanted signal voltage to the noise voltage at the output of a tape recorder. *Notes. 1* — The signal output voltage is expressed with respect to a given amount of harmonic distortion, obtained by recording a specified frequency signal on a specified recording medium. *2* — The noise voltage is measured weighted or unweighted in the absence of a wanted signal. ★ rapport signal/bruit d'un magnétophone → *rapport 58.* R отношение сигналшум магнитофона. D Störspannungsabstand. E relación señal/ruido en un magnetófono. I rapporto segnale/disturbo di un magnetofono. N signaal/ruisverhouding. P stosunek sygnału do zakłóceń. S signal-brusförhållande hos en bandspelare. (806)

87. signal-to-bias noise ratio : the ratio, expressed in decibels, of the reference output level, to the specified weighted noise output level after erasure with reference bias applied. *Note.* — The frequency weighting employed should always be specified, but if no weighting is stated, the "A" frequency weighting should be understood. ★ rapport signal sur bruit de polarisation → *rapport 63.* R отношение сигнала к шуму паузы. D Signal-zu-Vormagnetisierungsgeräusch Verhältnis. E relación señal/ruido de polarización. I attenuazione di cancellazione dopo cancellazione della traccia. N verhouding tussen het signaal en de voormagnetisatieruis. P odstęp sygnału od szumu podkładu. S signalbrusförhållande efter radering på bandspelare. (806)

88. signal-to-disturbance ratio : the ratio of the wanted signal level to the electromagnetic disturbance level as measured under specified conditions. *Note.* — The term "signal-to-interference ratio" is deprecated in the sense of "signal-to-disturbance ratio". ★ rapport signal sur perturbation → *rapport 64.* R отношение сигнал-помеха. D Verhältnis des Nutz- zum Störsignal. E relación señal/perturbación. I rapporto segnale/disturbo. N signaal/ruisverhouding. P stosunek sygnału do zaburzenia. S signal-störningsförhållande. (161)

89. signal-to-erased signal ratio after bulk erasure : the ratio, expressed in decibels, of the reference output level to the specified weighted noise output level after bulk erasure (without machine erase and bias). *Note.* — The frequency weighting employed should always be specified, but if no weighting is stated, the "A" frequency weighting should be understood. ★ rapport signal sur signal résiduel après effacement total → *rapport 65.* R стираемость в размагничивающем устройстве. D Signal-zu-Restsignal Verhältnis nach Gesamtlöschung. E relación señal/señal residual después del borrado total. I attenuazione di cancellazione dopo cancellazione di tutta la bobina. N signaalverzwakking na totaal wissen. P odstęp sygnału od sygnału podkładu. S signalbrusförhållande efter totalradering. (806)

90. signal-to-noise ratio : in a stated bandwidth, the ratio of the peak-to-peak signal current to the r.m.s. noise in the output current. ★ rapport signal à bruit → *rapport 55.* R отношение сигнал-шум. D Signal-Rausch-Verhältnis. E relación señal-ruido. I rapporto segnale/rumore. N signaal-ruisverhouding. P stosunek sygnału do szumu. S signal-brusförhållande. (531)

91. signal-to-noise ratio (*Syn.* signal/noise ratio) (*S/N*) : the ratio, generally expressed in decibels, of the power of the wanted signal to that of the coexistent noise at a specified point in a transmission channel under specified conditions. *Note.* — The signal cannot generally be separated from noise, and in practice the ratio (signal + noise) to noise is measured. ★ rapport signal sur bruit → *rapport 62.* R отношение сигнал-шум. D Signal-zu-Rausch-Verhältnis; Signal/Rauschverhältnis. E relación señal/ruido. I rapporto segnale/rumore. N signaal/ruisverhouding. P stosunek sygnału do szumu. S signal-brusförhållande. (161,702)

92. small-signal short-circuit forward current transfer ratio : the ratio of the alternating output current to the small input current producing it under low-frequency conditions, the output being short-circuited to alternating current. ★ rapport de transfert direct du courant en petits signaux, avec sortie en court-circuit → *rapport 38.* R коэффициент прямой передачи тока при короткозамкнутом выходе в режиме малого сигнала. D Kurzschlußstromverstärkung; Stromverstärkungsfaktor (bei kleiner Aussteuerung). E relación de transferencia directa de corriente en pequeñas señales, con salida en cortocircuito. I rapporti di trasferimento diretto della corrente per piccoli segnali, per uscita in cortocircuito. N voorwaartse stroomoverdrachtsverhouding voor kleine signalen bij kortgesloten uitgang. P współczynnik przenoszenia prądowego zwarciowy małosygnałowy. S (småsignal)strömförstärkningsfaktor. (521)

93. speed ratio : the ratio of the maximum service speed to the rated speed at full field with the motors grouped for maximum speed. ★ taux de variation de vitesse → *taux 34.* R коэффициент скорости. D Geschwindigkeitsverhältnis (eigentlich Feldschwächverhältnis). E tasa de variación de velocidad. I supporto di elasticità. N snelheidsverhouding. P współczynnik prędkości. S ..... (811)

94. spurious response rejection ratio : the ratio of the level of a specified signal at a spurious response frequency, producing a specified output power from an equipment, to the level of the wanted signal producing the same output power. ★ affaiblissement sur la fréquence parasite → *affaiblissement 51.* R коэффициент ослабления сигнала на побочной частоте приёма. D Störanregungs-Unterdrückungsfaktor. E decaimiento en la frecuencia parásita. I rapporto di ricezione della risposta spuria. N verhouding van parasitaire responsiefrequentie tot gewenst signaal. P tłumienie przy częstotliwości pasożytniczej. S falskfrekvensdämpning. (161)

95. standing-wave ratio (in a transmission line) (*Syn.* SWR (abbreviation); voltage standing-wave ratios; VSWR (abbreviation)) : the ratio, along a transmission line, of a maximum to an adjacent minimum magnitude of a particular field component of a standing wave. *Note. 1* — This ratio is equal to: $(1 + r)/(1 - r)$ where r is the modulus of the amplitude reflection factor. *2* — The standing wave ratio expressed as the reciprocal of the ratio defined above is occasionally used, but this usage is deprecated. ★ rapport d'onde stationnaire → *rapport 50.* R коэффициент стоячей волны (в линии передачи); КСВ (сокращение); коэффициент стоящей волны напражения; КСВН (сокращение). D Stehwellenverhältnis (in einer Übertragungsleitung); SWR (Abkürzung) (in einer Übertragungsleitung); Welligkeitsfaktor (in einer Übertragungsleitung); Spannungsstehwellenverhältnis (in einer Übertragungsleitung); VSWR (Abkürzung) (in einer Übertragungsleitung); Spannungswelligkeitsfaktor (in einer Übertragungsleitung). E relación de onda estacionaria (en una línea de transmisión);; ROE (abreviatura). I rapporto d'onda stazionaria (in una linea di trasmissione); ROS (abbreviazione). N staande-golfverhouding. P współczynnik fali stojącej (w linii przesyłowej); WFS. S ståendevågförhållande; SVF. (726)

96. **static forward current transfer ratio** : the ratio of the direct output current to the direct input current, the output voltage being held constant. ★ valeur statique du rapport de transfert direct du courant → *valeur 76.* R статический коэффициент прямой передачи тока. D Gleichstromverhältnis. E valor estático de la relación de transferencia directa de corriente. I valore statico del rapporto di trasferimento diretto della corrente. N statische voorwaartse gelijkstroomoverdrachtsverhouding. P współczynnik przenoszenia prądowego statyczny. S total strömförstärkningsfaktor. (521)
97. **stuffing ratio** (*Syn.* justification ratio) : → *ratio 46*
98. **system impedance ratio** : at a given measurement location, commonly at one end of a line, the ratio of the power system source impedance to the impedance of the protected zone. ★ rapport d'impédance du réseau → *rapport 48.* R отношение величин полного сопротивления энергосистемы. D Impedanzverhältnis. E relación de impedancia de la red. I rapporto d'impedenza della rete. N verhouding tussen systeem en circuitimpedantie. P stosunek impedancji systemu. S systemimpedansförhållande. (448)
99. **tapping voltage ratio (of a pair of windings)** : the ratio which is equal to the rated voltage ratio : — multiplied by the tapping factor of the tapped winding if this is the high voltage winding. — divided by the tapping factor of the tapped winding if this is the low voltage winding. ★ rapport de transformation de prise (d'une paire d'enroulements) → *rapport 42.* R коэффициент трансформации ответвления (пары обмоток). D Anzapfungsübersetzung (eines Wicklungspaares). E relación de transformación de toma (de un par de arrollamientos). I rapporto di trasformazione di presa (di una coppia di avvolgimenti). N aftakkingstransformatieverhouding (van twee wikkelingen). P przekładnia zaczepowa (pary uzwojeń). S omsättning för visst reglerläge. (421)
100. **transfer ratio** : a transfer function in which the two signal quantities are of the same kind. *Note.* — A transfer ratio is for instance a voltage transfer ratio or a current transfer ratio. ★ rapport de transfert → *rapport 37.* R коэффициент передачи. D Übersetzung; Übertragungsverhältnis. E relación de transferencia. I rapporto di trasferimento. N overdrachtsverhouding. P przekładnia transferowa. S överföringsfaktor. (131,702)
101. **uniformity ratio of illuminance** (on a given plane) : ratio of the minimum illuminance to the average illuminance on the plane. *Note.* — Use is made also of *a)* the ratio of the minimum to the maximum illuminance and *b)* the inverse of either of these two ratios. ★ facteur d'uniformité de l'éclairement → *facteur 187.* R коэффициент равномерности освещености (на заданной поверхности). D Gleichmäßigkeitsgrad der Beleuchtungsstärke (einer gegebenen Fläche); Gleichmäßigkeit der Beleuchtungsstärke. E grado de uniformidad de iluminancia. I fattore di uniformità dell'illuminamento. N gelijkmatigheidsgraad. P równomierność oświetlenia. S likformighetsgrad. (845)
102. **voltage ratio** (*Syn.* voltage amplification) : the ratio under steady-state conditions of a small change of the output voltage to the corresponding change of the control voltage at specified load and operating conditions. ★ rapport des tensions → *rapport 47.* R коэффициент усиления напряжения. D Spannungsverhältnis; Spannungsverstärkung. E relación de tensiones; factor de amplificación de tensión. I guadagno di tensione. N spanningsversterkingsfactor. P wzmocnienie napięciowe; współczynnik wzmocnienia napięciowego. S spänningsförstärkning. (431)
103. **voltage ratio of a capacitor divider** : ratio between the sum of the capacitances of the high voltage and intermediate voltage capacitors and the capacitance of the high voltage capacitor. ★ rapport de tension d'un diviseur capacitif → *rapport 34.* R коэффициент трансформации емкостного делителя. D Spannungsverhältnis des kapazitiven Teilers. E relación de tensión de un divisor capacitivo. I rapporto di tensione di un divisore capacitivo. N spanningsverhouding van een capacitieve spanningsdeler. P przekładnia dzielnika pojemnościowego. S spänningsomsättning hos kondensatorspänningsdelare. (321)
104. **(voltage) ratio of a capacitor divider** : the ratio of the voltage applied to the capacitor divider to the open circuit intermediate voltage. *Note.* — This ratio corresponds to the sum of the capacitances of the high-voltage and intermediate voltage capacitors divided by the capacitance of the high-voltage capacitor. ★ rapport de tension (d'un diviseur capacitif) → *rapport 35.* R коэффициент деления (напряжения) емкостного делителя. D Übersetzungsverhältnis eines kapazitiven Spannungsteilers. E relación de tensión (de un divisor capacitivo). I rapporto di tensione di un divisore capacitivo. N delerverhouding van een capacitieve deler. P stosunek napięć (dzielnika kondensatorowego). S spänningsdelaromsättning. (436)
105. **voltage standing-wave ratios** (*Syn.* standing-wave ratio) : → *ratio 95*

ratio-meter

1. **ratio-meter** : an instrument intended to measure the ratio of the values of two quantities of the same kind. ★ logomètre → *logomètre 1.* R логометр. D verhältnisbildendes Messgerät. E aparato de medida de relación; logómetro. I logometro. N verhoudingsmeter. P logometr; przyrząd ilorazowy. S kvotmeter. (301)

ray

1. **alpha ray spectrometer** : → *spectrometer 1*
2. **axial ray** : a light ray which is coincident with the fibre axis. ★ rayon axial → *rayon 6.* R осевой луч. D axialer Strahl. E rayo axial. I raggio assiale. N axiale straal. P promień osiowy. S axiell stråle. (731)
3. **beta ray spectrometer** : → *spectrometer 3*
4. **beta ray spectrum** : → *spectrum 4*
5. **cathode ray tube (television) projector** : → *projector 1*
6. cathode rays (deprecated) : stream of electrons emitted from the surface of a cathode. ★ rayons cathodiques → *rayon 25.* R катодные лучи (не рекомендуется). D Kathodenstrahlung. E rayos catodicos. I raggi catodici (sconsigliato). N kathodestralen. P promienie katodowe (termin nie zalecany). S katodstrålar. (881)
7. **delta rays** (*Syn.* delta radiation) : → *radiation 16*
8. **direct ray path** : → *path 3*
9. **Grenz rays** : X-radiation generated with X-ray tube voltages below about 20 kV. ★ rayons de Bucky → *rayon 26.* R граничное излучение. D Grenzstrahlung. E rayos limite; rayos de Grenz; rayos de Bucky. I raggi limite. N grensstralen. P promieniowanie graniczne. S gränsstrålning. (881)
10. **high-angle ray** : the higher of two ray paths between two points on the surface of the Earth beyond the skip distance which can exist at a given frequency with reflection from a given ionospheric layer. ★ trajet haut → *trajet 9.* D Fernstrahl. P promień o dużym kącie. (705)
11. **indirect ray path** : → *path 7*
12. **leaky ray** (*Syn.* tunnelling ray) : in an optical fibre, a light ray for which geometric optics would predict total reflection at the core boundary, but which suffers a loss unexplained by this theory, by virtue of the curved core boundary. *Note.* — Leaky rays correspond to leaky modes. ★ rayon de fuite → *rayon 8.* R луч утечки; туннелирующий луч. D Leckwelle. E rayo disperso; rayo túnel. I raggio labile; raggio evanescente; raggio tunnel. N lekstraal. P promień wyciekający. S läckande stråle. (731)
13. **light ray** : the path which is tangential at each point to the direction of propagation of the radiant energy at this point. *Notes. 1* — The concept of a ray is the basis of geometric optics. *2* — Several rays may exist between two points. *3* — In an isotropic medium the ray is normal to the wavefront. ★ rayon → *rayon 5.* R луч света. D Lichtstrahl; geometrischer Lichtstrahl. E rayo de luz. I raggio di luce. N lichtstraal. P promień świetlny. S ljusstråle. (731)
14. **limiting ray** : ray that is tangential to a horizontal plane at which the propagation velocity is a maximum. ★ rayon limite → *rayon 16.* R граничный луч. D Grenzstrahl. E rayo límite. I raggio limite. N begrenzend geluid(s)pad. P promień graniczny. S gränsstråle. (801)
15. **low-angle ray** : the lower of two ray paths between two points on the surface of the Earth beyond the skip distance which can exist at a given frequency with reflection from a given ionospheric layer. ★ trajet bas → *trajet 4.* D Nahstrahl. P promień o małym kącie. (705)
16. **meridional ray** : a light ray that passes through the fibre axis of an optical fibre. ★ rayon méridien → *rayon 18.* R меридиональный луч. D meridionaler Strahl. E rayo meridional. I raggio meridiano. N meridionale lichtstraal. P promień południkowy. S axialplansstråle. (731)

17. **paraxial ray** : a light ray that is close to and nearly parallel with the fibre axis. *Note* — For purposes of computation, the angle, θ, between the ray and the optical axis is small enough for sin θ or tan θ to be replaced by θ (radians). ★ rayon paraxial → *rayon 20.* R приосевой луч. D achsenparaller Strahl. E rayo paraxial. I raggio parassiale. N paraxiale (licht)straal. P promień przyosiowy. S paraxiell stråle. (731)
18. **ray optics** (*Syn.* geometric optics) : → *optic 3*
19. **ray path** (*Syn.* propagation path) : → *path 22*
20. **ray path transmission loss** : → *loss 79*
21. **refracted ray** (in an optical fibre) : in an optical fibre, a light ray which is refracted from the core into the cladding. *Note.* — Refracted rays correspond to radiation modes. ★ rayon réfracté → *rayon 22.* R преломленный луч (в оптическом волокне). D gebrochener Strahl. E rayo refractado (en una fibra óptica). I raggio rifratto (in una fibra ottica). N gebroken (licht)straal (in een optische vezel). P promień załamany. S bruten stråle. (731)
22. **refracted ray method** (*Syn.* refracted near-field method) : → *method 19*
23. **skew ray** : a light ray that does not intersect the fibre axis of an optical fibre. ★ rayon non méridien → *rayon 19.* R косой луч. D schiefer Strahl. E rayo no meridional. I raggio sghembo. N scheve straal. P promień skośny. S skev stråle. (731)
24. **tunnelling ray** (*Syn.* leaky ray) : → *ray 12*

Rayleigh

1. **Rayleigh criterion** : → *criterion 1*
2. **Rayleigh disk** : → *disk 12*
3. **Rayleigh region** : → *region 18*
4. **Rayleigh scattering** : → *scattering 22*
5. **Rayleigh wave** : → *wave 45*

RBE

1. **RBE** (*Syn.* relative biological effectiveness (of radiation)) : → *effectiveness 2*

RDF

1. **RDF** (*Syn.* repeater distribution frame) : → *frame 40*

reach

1. **arm's reach** : a zone extending from any point on a surface where persons usually stand or move about, to the limits which a person can reach with the hand in any direction without assistance. ★ volume d'accessibilité au toucher → *volume 8.* R зона досягаемости. D Handbereich. E volumen accesible a la mano. I parti a portata di mano. N handbereik. P zasięg ręki. S armräckvidd. (826)

reactance

1. **acoustic reactance** : imaginary part of the acoustic impedance. ★ réactance acoustique → *réactance 6.* R акустический реактанс. D akustische Reaktanz. E reactancia acústica. I reattanza acustica. N akoestische reactantie. P reaktancja akustyczna. S akustisk reaktans. (801)
2. **arc furnace low reactance connection** : → *connection 3*
3. **asynchronous reactance** : the quotient of the reactive component of the average voltage at rated frequency, assumed to be sinusoidal and balanced, applied to the primary winding of a machine rotating out of synchronism, and the average current component at the same frequency. ★ réactance asynchrone → *réactance 8.* R асинхронное индуктивное сопротивление. D Asynchronreaktanz. E reactancia asíncrona. I reattanza asincrona. N asynchrone reactantie. P reaktancja asynchroniczna. S asynkronreaktans. (411)
4. **direct-axis sub-transient reactance** : the quotient of the initial value of a sudden change in that fundamental a.c. component of primary voltage, which is produced by the total direct-axis primary flux, and the value of the simultaneous change in fundamental a.c. component of direct-axis primary current, the machine running at rated speed. ★ réactance subtransitoire longitudinale → *réactance 16.* R сверхпереходное индуктивное сопротивление по продольной оси. D Subtransient-Längsreaktanz. E reactancia subtransitoria longitudinal. I reattanza subtransitoria diretta. N aanvangslangsreactantie. P reaktancja podprzejściowa podłużna. S subtransient längsreaktans. (411)
5. **direct-axis synchronous reactance** : the quotient of the sustained value of that fundamental a.c. component of primary voltage, which is produced by the total direct-axis primary flux due to direct-axis primary current, and the value of the fundamental a.c. component of this current, the machine running at rated speed. ★ réactance synchrone longitudinale → *réactance 19.* R синхронное индуктивное сопротивление по продольной оси. D Synchron-Längsreaktanz. E reactancia síncrona longitudinal. I reattanza sincrona diretta. N synchrone langsreactantie. P reaktancja synchroniczna podłużna. S synkronreaktans i längsled. (411)
6. **direct-axis transient reactance** : the quotient of the initial value of a sudden change in that fundamental a.c. component of primary voltage, which is produced by the total direct-axis primary flux, and the value of the simultaneous change in fundamental a.c. component of direct-axis primary current, the machine running at rated speed and the high decrement components during the first cycles being excluded. ★ réactance transitoire longitudinale → *réactance 21.* R переходное индуктивное сопротивление по продольной оси. D Transient-Längsreaktanz. E reactancia transitoria longitudinal. I reattanza transitoria diretta. N overgangslangsreactantie. P reaktancja przejściowa podłużna. S transient längsreaktans. (411)
7. **effective synchronous reactance** : an assumed value of synchronous reactance used to represent a machine in a system study calculation for a particular operating condition. ★ réactance synchrone équivalente → *réactance 18.* R эквивалентное синхронное индуктивное сопротивление. D gleichwertige Synchronreaktanz. E reactancia síncrona equivalente. I reattanza sincrona equivalente. N effectieve synchrone reactantie. P reaktancja synchroniczna zastępcza. S ekvivalent synkronreaktans. (411)
8. **electrode reactance** : the imaginary component of the complex electrode impedance. ★ réactance d'électrode → *réactance 11.* R реактивное сопротивление электрода. D innerer Elektrodenblindwiderstand. E reactancia de electrodo. I reattanza di elettrodo. N elektrodereactantie. P rektancja elektrody. S elektrodreaktans. (531)
9. **mechanical reactance** : imaginary part of a mechanical impedance. ★ réactance mécanique → *réactance 15.* R механическая реактивность. D mechanische Reaktanz. E reactancia mecánica. I reattanza meccanica. N mechanische reactantie. P reaktancja mechaniczna. S mekanisk reaktans. (801)
10. **negative phase-sequence reactance** : the quotient of (a) the reactive fundamental component of negative phase-sequence primary voltage due to sinusoidal negative phase-sequence primary current of rated frequency, and (b) the value of this current, the machine running at rated speed. ★ réactance inverse → *réactance 14.* R индуктивное сопротивление обратной последовательности. D Inversreaktanz. E reactancia inversa. I reattanza di sequenza inversa. N inverse reactantie. P reaktancja składowej przeciwnej. S minusföljdsreaktans. (411)
11. **positive phase-sequence reactance** : the quotient of (a) the reactive fundamental component of the positive phase-sequence primary voltage due to the sinusoidal positive phase-sequence primary current of rated frequency, and (b) the value of this current, the machine running at rated speed. ★ réactance directe → *réactance 12.* R индуктивное сопротивление прямой последовательности. D Mitreaktanz. E reactancia directa. I reattanza di sequenza positiva. N directe reactantie. P reaktancja składowej zgodnej. S plusföljdsreaktans. (411)
12. **Potier reactance** : an equivalent reactance used in place of the primary leakage reactance, to calculated the excitation on load by means of the Potier method. *Note.* — It takes into account the additional leakage of the excitation winding on load and in the over-excited region and is accordingly greater than the real value of the primary leakage reactance. ★ réactance de Potier → *réactance 9.* R индуктивное сопротивление потье. D Potier-Reaktanz. E reactancia de Potier. I reattanza di Potier. N Potier-reactantie. P reaktancja Potiera. S Potierreaktans. (411)
13. **quadrature-axis sub-transient reactance** : the quotient of the initial value of a sudden change in that fundamental a.c. component of primary voltage, which is produced by the total quadrature-axis primary flux and the value of the simultaneous change in fundamental a.c. component of quadrature-axis primary current, the machine running at rated speed. ★ réactance subtransitoire transversale → *réactance 17.* R сверхпереходное индуктивное сопротивление по поперечной оси. D Subtransient-Querreaktanz. E reactancia subtransitoria transversal. I reattanza subtransitoria in

quadratura. N aanvangsdwarsreactantie. P reaktancja podprzejściowa poprzeczna. S subtransient tvärreaktans. (411)

14. **quadrature-axis synchronous reactance** : the quotient of the sustained value of that fundamental a.c. component of primary voltage, which is produced by the total quadrature-axis primary flux due to quadrature-axis primary current, and the value of the fundamental a.c. component of this current, the machine running at rated speed. ★ réactance synchrone transversale → *réactance 20.* R синхронное индуктивное сопротивление по поперечной оси. D Synchron-Querreaktanz. E reactancia síncrona transversal. I reattanza sincrona in quadratura. N synchrone dwarsreactantie. P reaktancja synchroniczna poprzeczna. S synkronreaktans i tvärled. (411)
15. **quadrature-axis transient reactance** : the quotient of the initial value of a sudden change in that fundamental a.c. component of primary voltage, which is produced by the total quadrature-axis primary winding flux, and the value of the simultaneous change in fundamental a.c. component of quadrature-axis primary current, the machine running at rated speed and the high decrement components during the first cycles being excluded. ★ réactance transitoire transversale → *réactance 22.* R переходное индуктивное сопротивление по поперечной оси. D Transient-Querreaktanz. E reactancia transitoria transversal. I reattanza transitoria in quadratura. N overgangsdwarsreactantie. P reaktancja przejściowa poprzeczna. S transient tvärreaktans. (411)
16. **reactance** : the imaginary part of a complex impedance. ★ réactance → *réactance 5.* R реактивное сопротивление. D Reaktanz; Blindwiderstand. E reactancia. I reattanza. N reactantie. P reaktancja. S reaktans. (131)
17. **reactance relay** : → *relay 34*
18. **saturation reactance** : the reactance corresponding to the saturation inductance at the frequency of the alternating current power source. ★ réactance de saturation → *réactance 10.* R реактивное сопротивление насыщения. D Sättigungsreaktanz. E reactancia de saturación. I reattanza di saturazione. N verzadigingsreactantie. P reaktancja nasyceniowa. S mättningsreaktans. (431)
19. **specific acoustic reactance** : imaginary part of the specific acoustic impedance. ★ réactance acoustique spécifique → *réactance 7.* R удельный акустический реактанс. D spezifische Schallreaktanz; Feldreaktanz. E reactancia acústica específica. I reattanza acustica specifica. N specifieke akoestische reactantie. P reaktancja akustyczna jednostkowa. S ljudfältsreaktans. (801)
20. **zero phase-sequence reactance** : the quotient of (a) the reactive fundamental component of zero phase-sequence primary voltage, due to the presence of fundamental zero phase-sequence primary current of rated frequency, and,(b) this component of current, the machine running at rated speed. ★ réactance homopolaire → *réactance 13.* R индуктивное сопротивление нулевой последовательности. D Nullreaktanz. E reactancia homopolar. I reattanza omopolare. N homopolaire reactantie. P reaktancja składowej zerowej. S nollföljdsreaktans. (411)

reaction

1. **anodic reaction** (*Syn.* (electrochemical) oxidation) : an electrode reaction at the interface of which electrons are supplied to it by the elctrolyte and flow into the external circuit. ★ réaction anodique → *réaction 7.* R анодная реакция; окисление (электрохимическое). D Anodenreaktion; (elektrochemische) Oxidation. E reacción amódica; oxidación (electroquímica). I reazione anodica; ossidazione (elettrochimica). N anodereactie; (elektrochemische) oxidatie. P reakcja anodowa; utlenianie (elektrochemiczne). S anodreaktion. (111)
2. **armature reaction** : the magnetomotive force set up by the current(s) in the primary winding or, in a wider sense, the resulting alteration in the air-gap flux. *Note.* — This term, although derived for d.c. machines, may also be used for synchronous machines. ★ réaction d'induit → *réaction 10.* R реакция якоря. D Ankerrückwirkung. E reacción de inducido. I reazione di indotto. N ankerreactie. P oddziaływanie twornika. S ankarreaktion. (411)
3. **cathodic reaction** (*Syn.* (electrochemical) reduction) : an electrode reaction at the interface of which electrons from the external circuit are supplied to the electrolyte. ★ réaction cathodique → *réaction 8.* R катодная реакция; восстановление (электроимическое). D Kathodenreaktion; (elektrochemische) Reduktion. E reacción catódica; reacción (electroquímica). I reazione catodica; riduzione (elettrochimica). N kathodereactie; (elektrochemische) reductie. P reakcja katodowa; redukcja (elektrochemiczna). S katodreaktion. (111)
4. **electrode reaction** : a reaction involving the transfer of charge between electrolyte and electrode. ★ réaction à l'électrode → *réaction 6.* R электродная реакция. D Elektrodenreaktion. E reacción en el electrodo. I reazione all'elettrodo. N elektrodereactie. P reakcja elektrodowa. S elektrodreaktion. (111)
5. **molar reaction heat** : → *heat 15*
6. **nuclear chain reaction** : a series of nuclear reactions in which one of the agents necessary to the series is itself produced by the reactions so as to cause like reactions. Depending on whether the number of reactions so caused directly by one reaction is on the average less than, equal to, or greater than unity, the reaction is convergent (subcritical), self-sustained (critical), or divergent (supercritical). ★ réaction nucléaire en chaîne → *réaction 11.* D Kernkettenreaktion. E reacción nuclear en cadena. I reazione nucleare a catena. N nucleaire kettingreactie. P jądrowa reakcja łańcuchowa. S kedjereaktion. (026)
7. **nuclear fusion reaction** : a reaction between two light nuclei resulting in the production of at least one nuclear species heavier than either initial nucleus, together with excess energy. ★ réaction de fusion nucléaire → *réaction 9.* D Kernfusion. E reacción de fusión nuclear. I reazione di fusione nucleare. N kernversmeltingsreactie; kernfusiereactie. P reakcja syntezy jądrowej. S fusionsreaktion. (026)
8. **photonuclear reaction** : a nuclear reaction produced by the interaction of a photon and an atomic nucleus usually with the emission of nuclear radiation. ★ réaction photonucléaire → *réaction 13.* R фотоядерная реакция. D Kernphotoeffekt. E reacción fotonuclear; fotodesintegración. I reazione fotonucleare. N fotoreactie; kernreactie door fotonen. P reakcja fotojądrowa. S kärnfotoreaktion. (026,881)
9. **reaction rail** : → *rail 13*
10. **reaction type turbine** : → *turbine 9*
11. **side reaction** : an electrode reaction which occurs in addition to the main process. ★ réaction parallèle → *réaction 12.* R параллельная реакция. D Nebenreaktion. E reacción paralela. I reazione parallela. N nevenreactie. P reakcja uboczna. S sekundärreaktion. (111)

reactive

1. **reactive** : applies to an inductive or capacitive device or circuit. ★ réactif → *réactif 8.* R реактивный. D Blind-. E reactivo. I reattivo. N reactief. P reaktancyjny. S reaktiv. (151)
2. **reactive attenuator** : → *attenuator 15*
3. **reactive energy** : → *energy 69*
4. **reactive energy meter** (*Syn.* var-hour meter) : → *meter 70*
5. **reactive near field (region)** : → *near-field 8*
6. **reactive power** : → *power 160*
7. **reactive power compensation** : → *compensation 9*
8. **reactive power meter** (*Syn.* varmeter) : → *varmeter 1*
9. **reactive reflector antenna** (*Syn.* reflective array antenna) : → *antenna 95*
10. **reactive-power voltage control** : → *control 153*

reactivity

1. **reactivity** : a parameter, ρ, giving the deviation from criticality of a nuclear chain reacting medium which is such that positive values correspond to a supercritical state and negative values to a subcritical state. Quantitatively:

$$\rho = 1 - \frac{1}{k_{\text{eff}}}$$

where k_{eff} is the effective multiplication factor. ★ réactivité → *réactivité 2.* D Reaktivität.. E reactividad. I reattività. N reactiviteit. P reaktywność. S reaktivitet. (026)
2. **reactivity meter** : → *meter 50*
3. **reactivity temperature coefficient** : → *coefficient 50*

reactor

1. **air-cored reactor** : a reactor in which the magnetic circuit is completed in air. ★ inductance dans l'air → *inductance 6.* R реактор без стали. D Luftdrossel. E inductancia en el aire.

I induttore in aria. N luchtsmoorspoel. P dławik bezrdzeniowy. S reaktor med omagnetisk kärna; luftspole. (811)

2. **arc furnace reactor** : an inductive winding sometimes connected in series with the primary circuit of the arc furnace transformer in order to limit the short-circuit current and to improve arc stability for each stage of the melting and refining process. ★ inductance de four à arc → *inductance 8.* R стабилизатор в системе питания дуговой печи. D Lichtbogenofen-Drosselspule. E inductancia de horno de arco. I reattore per forno ad arco. N boogovensmoorspoel. P dławik pieca łukowego. S reaktor för ljusbågsugn. (841)

3. **braking reactor** : a reactor in the electric braking circuit. ★ inductance de freinage → *induetance 9.* R тормозной реактор. D Bremsdrossel. E inductancia de frenado. I induttore di frenatura. N remsmoorspoel. P dławik obwodu hamowania. S reaktor i bromskrets. (811)

4. **breeder reactor** : a reactor which produces more fissile material than it consumes, i.e. has a conversion ratio greater than unity. ★ réacteur surrégénérateur → *réacteur 27.* D Brutreaktor; Brüter. E reactor reproductor. I reattore surrigeneratore. N kweekreactor. P reaktor powielający. S bridreaktor. (026)

5. **circulating reactor** : nuclear reactor in which the fissile material circulates through the core. Usually this means using fissile material in fluid form or in the form of small particles in suspension in a fluid. ★ ..... → . D Kreislaufreaktor. E reactor de circulación. I reattore a circolazione. N reactor met circulerende splijtstof. P reaktor z cyrkulującym paliwem. S cirkulationsreaktor. (026)

6. **converter reactor** : a reactor in which significant conversion takes place. *Note.* — in some countries recovery of the new fissile material is implied. In France if the fissile material produced is the same as that consumed, the reactor is called a "regenerator". ★ réacteur convertisseur → *réacteur 17.* D Konversionsreaktor. E reactor convertidor. I reattore convertitore. N conversiereactor. P reaktor-konwertor. S konverterreaktor. (026)

7. core-type reactor (deprecated) : a reactor in which the magnetic circuit takes the form of columns (legs). *Note.* — Since there are types of reactor which do not come clearly within the categories of "core-type" and "shell-type", the use of these terms is deprecated. Generally they can be avoided by indicating whether or not the magnetic circuit has unwound magnetic return paths. ★ bobine d'inductance à colonnes → *bobine d'inductance 2.* R стержневой реактор (нерекомендуемый). D Kerndrosselspule. E reactancia de columnas (desaconsejado). I reattore con nucleo a colonna. N spoel van het kerntype. P dławik rdzeniowy. S reaktor av kärntyp. (421)

8. **dry-type reactor** : a reactor of which the magnetic circuit and winding are not immersed in an insulating liquid. ★ bobine d'inductance de type sec → *bobine d'inductance 4.* R сухой реактор. D Trockendrosselspule. E reactancia de tipo seco. I reattore a secco. N droge spoel. P dławik suchy. S torrisolerad reaktor. (421)

9. **earthing reactor** : a reactor inserted in the equipment earth circuit before its connection to the mass of the vehicle, encouraging return current to flow through the earth-brushes but preventing the vehicle being made alive in the event of an interruption in the earth-brush circuit. ★ inductance de mise à la terre → *inductance 12.* R заземляющий реактор. D Erdstrom-Schutzdrossel. E inductancia de puesta a tierra. I induttore di messa a terra. N aardingssmoorspoel. P dławik uziemiający. S jordningsreaktor. (811)

10. **encapsulated-winding dry-type reactor** : a dry-type reactor having its winding encapsulated with solid insulation. ★ bobine d'inductance de type sec à enroulement encapsulé → *bobine d'inductance 5.* R сухой реактор с обмоткой, покрытой оболочкой. D Gießharzdrosselspule. E reactancia de tipo seco con arrollamientos cubiertos. I reattore a secco con avvolgimento incapsulato. N droge spoel met omsloten wikkelingen. P dławik suchy z uzwojeniami w izolacji monilitycznej. S torrisolerad reaktor med inkapslad lindning. (421)

11. **enriched reactor** : reactor fuelled with a nuclear fuel obtained from natural uranium, enriched with uranium 235, or with any other fissile matter (uranium 233, plutonium, etc.) added to it. ★ réacteur enrichi → *réacteur 22.* D angereicherter Reaktor. E reactor enriquecido. I reattore arricchito. N reactor met verrijkte splijtstof. P reaktor z uranem wzbogaconym. S anrikad reaktor. (026)

12. **epithermal reactor** : a reactor in which the fission is induced predominantly by epithermal neutrons. ★ réacteur à neutrons épithermiques → *réacteur 10.* D epithermischer Reaktor. E reactor epitérmico.. I reattore a neutroni epitermici. N reactor met epithermische neutronen; epithermische reactor. P reaktor epitermiczny. S epitermisk reaktor. (026)

13. **experimental reactor** : a reactor operated primarily to obtain reactor physics or engineering data for the design or development of a reactor or reactor type. Reactors in this class include: zero-power reactor (may also be a research reactor), reactor experiment, prototype reactor. ★ réacteur expérimental → *réacteur 23.* D Versuchsreaktor. E reactor experimental. I reattore sperimentale. N experimentele reactor. P reaktor doświadczalny. S experimentreaktor. (026)

14. **fast reactor** : a reactor in which fission is induced predominantly by fast neutrons. ★ réacteur à neutrons rapides → *réacteur 12.* D schneller Reaktor. E reactor rápido. I reattore a neutroni veloci. N reactor met snelle neutronen; snelle reactor. P reaktor prędki. S snabb reaktor. (026)

15. **fluidized reactor** : reactor using a fuel of which certain characteristics are very nearly those of a fluid. ★ réacteur à combustible fluidisé → *réacteur 8.* D Reaktor mit flüssiger Brennstoffsuspension. E reactor de combustible fluidificado. I reattore a combustibile fluidificato. N reactor met gefluïdiseerde splijtstof. P reaktor z paliwem kwasicieklym. S flytbäddsreaktor. (026)

16. **heterogeneous reactor** : a reactor in which the core materials are segregated to such an extent that its neutron characteristics cannot be accurately described by the assumption of homogeneous distribution of the materials throughout the core. ★ réacteur hétérogène → *réacteur 24.* D heterogener Reaktor. E reactor heterogéneo.. I reattore eterogeneo. N heterogene reactor. P reaktor niejednorodny. S heterogen reaktor. (026)

17. **homogeneous reactor** : a reactor in which the core materials are distributed in such a manner that its neutron characteristics can be accurately described by the assumption of homogeneous distribution of the materials throughout the core. ★ réacteur homogène → *réacteur 25.* D homogener Reaktor. E reactor homogéneo.. I reattore omogeneo. N homogene reactor. P reaktor jednorodny. S homogen reaktor. (026)

18. **intermediate reactor** (*Syn.* intermediate spectrum reactor) : a reactor in which fission is induced predominantly by intermediate neutrons. ★ réacteur à neutrons intermédiaires → *réacteur 11.* D mittelschneller Reaktor. E reactor intermedio; reactor de espectro intermedio. I reattore a neutroni intermedi; reattore a spettro intermedio. N reactor met middelsnelle neutronen. P reaktor pośredni. S intermediär reaktor. (026)

19. **intermediate spectrum reactor** (*Syn.* intermediate reactor) : → *reactor 18*

20. **natural uranium reactor** : reactor fuelled with natural uranium. ★ réacteur à uranium naturel → *réacteur 15.* D Natururanreaktor. E reactor de uranio natural. I reattore a uranio naturale. N reactor met natuurlijk uranium. P reaktor z uranem naturalnym. S natururanreaktor. (026)

21. **non-encapsulated-winding dry-type reactor** : a dry-type reactor having its winding non-encapsulated with solid insulation. ★ bobine d'inductance de type sec à enroulement non encapsulé → *bobine d'inductance 6.* R сухой реактор с обмоткой, не покрытой оболочкой. D Trockendrosselspule außer Gießharzdrosselspule. E reactancia de tipo seco con arrollamientos no cubiertos. I reattore a secco con avvolgimento non incapsulato. N droge spoel met niet-omsloten wikkelingen. P dławik suchy bez uzwojenia w izolacji monolitycznej. S ..... (421)

22. **nuclear reactor** (*Syn.* pile) : a device in which a self-sustaining nuclear fission chain reaction can be maintained and controlled (fission reactor). The term is sometimes applied to a device in which a nuclear fusion reaction can be produced and controlled (fusion reactor). ★ réacteur nucléaire → *réacteur 26.* D Kernreaktor; Atommeiler. E reactor nuclear; pila atómica. I reattore nucleare; pila atomica. N kernreactor. P reaktor jądrowy. S kärnreaktor. (026)

23. **oil-immersed type reactor** : a reactor of which the magnetic circuit and winding are immersed in oil. ★ bobine d'inductance immergée dans l'huile → *bobine d'inductance 8.* R масляный реактор. D Öldrosselspule. E reactancia sumergida en aceite. I reattore in olio. N oliespoel. P dławik olejowy. S oljeisolerad reaktor. (421)

24. **plutonium reactor** : reactor fuelled with fissile material, of which plutonium is the fissile constituent. ★ réacteur au plutonium → *réacteur 16.* D Plutoniumreaktor. E reactor de plutonio. I reattore a plutonio. N plutoniumreactor. P reaktor plutonowy. S plutoniumreaktor. (026)
25. **power reactor** : a reactor whose primary purpose is to produce power. Reactors in this class include: electricity production reactor, propulsion reactor, heat-production reactor. ★ réacteur de puissance → *réacteur 19.* D Leistungsreaktor. E reactor de potencia. I reattore di potenza. N energiereactor. P reaktor energetyczny. S kraftreaktor. (026)
26. **production reactor** : a reactor whose primary purpose is to produce fissile or other materials or to perform irradiation on an industrial scale. Unless otherwise specified the term usually refers to a plutonium-production reactor. Reactors in this class include: fissile-material production reactor, isotope-production reactor, irradiation reactor. ★ réacteur de production → *réacteur 18.* D Produktionsreaktor. E reactor de producción. I reattore di produzione. N produktiereactor. P reaktor produkcyjny. S produktionsreaktor. (026)
27. **reactor containment** : → *containment 1*
28. **reactor control** : → *control 154*
29. **reactor lattice** : → *lattice 3*
30. **reactor period** (*Syn.* reactor time constant) : → *time constant 16*
31. **reactor safety fuse** : → *fuse 7*
32. **reactor start split phase motor** : → *motor 79*
33. **reactor starting** : → *starting 14*
34. **reactor time constant** : → *time constant 16*
35. **reactor vessel** : → *vessel 3*
36. **research reactor** : a reactor of any power level used primarily as a research tool for basic or applied research. Reactors in this class include: low-flux research reactor, high-flux research reactor, pulsed reactor, testing reactor, zero-power reactor (may also be an experimental reactor). ★ réacteur de recherche → *réacteur 20.* D Forschungsreaktor. E reactor de investigación. I reattore di ricerca. N speurwerkreactor. P reaktor badawczy. S forskningsreaktor. (026)
37. **saturable reactor** : a reactor whose magnetic circuit in normal operation becomes saturated when the current exceeds a certain value. ★ inductance saturable → *inductance 20.* R насыщающий реактор. D Sättigungsdrossel. E inductancia saturable. I induttore saturabile. N verzadigbare smoorspoel. P dławik nasycalny. S mättningsbar reaktor. (811)
38. **sealed reactor** : a reactor which is non-breathing, that is, so sealed that there can be no significant interchange between its contents and the external atmosphere. *Notes. 1* — In the case of oil-immersed reactors, these may or may not have a cushion of air (or other gas). *2* — Sealed reactors fall into two categories : a) reactors in which the total volume of oil, together with air (or other gas), or any combination thereof, remains constant over the temperature range. b) reactors in which the total volume of oil, air (or other gas), or any combination thereof, varies over the temperature range and this variation is accommodated by a sealed flexible container or a flexible membrane. ★ bobine d'inductance hermétique → *bobine d'inductance 7.* R герметичный реактор. D Hermetik-Drosselspule. E reactancia hermética. I reattore sigillato. N hermetische gesloten spoel. P dławik hermetyczny. S (hermetiskt) sluten reaktor. (421)
39. **series reactor** : a reactor intended for series connection in a network, either for limiting the current under fault conditions or for load-sharing in parallel circuits. ★ (bobine d')inductance série → *inductance 1.* R реактор последовательного включения. D Reihendrosselspule. E reactancia serie. I reattore in serie. N seriesmoorspoel. P dławik szeregowy. S seriereaktor. (421)
40. **shell-type reactor (deprecated)** : a reactor where the packets of laminations forming the core and yokes surround the windings and enclose generally the major part of them. *Note.* — Since there are types of reactor which do not come clearly within the categories of "core-type" and "shell-type", the use of these terms is deprecated. Generally they can be avoided by indicating whether or not the magnetic circuit has unwound magnetic return paths. ★ bobine d'inductance cuirassée → *bobine d'inductance 3.* R броневой реактор (нерекомендуемый). D Manteldrosselspule. E reactancia acorazada (desaconsejado). I reattore con nucleo corazzato. N spoel van het manteltype. P dławik płaszczowy. S mantelreaktor. (421)
41. **shunt reactor** : a reactor intended for shunt connection in a network to compensate for capacitive current. ★ (bobine d')inductance shunt → *inductance 2.* R шунтирующий реактор. D Kompensations-Drosselspule. E reactancia shunt. I reattore in derivazione. N laadstroomcompensatiespoel. P dławik kompensacyjny (bocznikujący). S shuntreaktor. (421)
42. **spectral shift reactor** : a reactor in which, for control or other purposes, the neutron spectrum may be adjusted by varying the properties or amount of moderator. ★ réacteur à déviation spectrale → *réacteur 9.* D Reaktor mit Spektralsteuerung. E reactor de corrimiento espectral. I reattore a spostamento spettrale. N reactor met spectrumverschuiving. P reaktor o zmiennym widmie. S spektrumskiftreaktor. (026)
43. **thermal reactor** : a reactor in which fission is induced predominantly by thermal neutrons. ★ réacteur à neutrons thermiques → *réacteur 13.* D thermischer Reaktor. E reactor térmico.. I reattore a neutroni termici. N reactor met thermische neutronen; thermische reactor. P reaktor termiczny. S termisk reaktor. (026)
44. **three-phase neutral reactor** : a three-phase reactor intended for connection in a network without a neutral to provide an artificial neutral. ★ (bobine d')inductance triphasée de mise à la terre → *inductance 3.* R трехфазный заземляющий реактор. D Sternpunktbildner-Drosselspule. E reactancia trifásica de puesta a tierra. I reattore formatore di neutro. N driefasensterpuntspoel. P dławik trójfazowy zerujący. S ..... (421)
45. **training reactor** : a reactor operated primarily for training in reactor operation and instructing in reactor behaviour. ★ réacteur d'entraînement → *réacteur 21.* D Ausbildungsreaktor. E reactor de adiestramiento. I reattore di allenamento. N opleidingsreactor. P reaktor szkoleniowy. S utbildningsreaktor. (026)
46. **transductor reactor** : a transductor utilized as a reactor. ★ transducteur-réactance → *transducteur-réactance 1.* R регулируемая индуктивная катушка. D Reaktanz-Transduktor. E transductor-reactancia. I trasduttore reattore. N transductorreactantiespoel. P dławik transduktorowy. S transduktor-induktor. (431)
47. **transition reactor** : a reactor the central point of which is permanently connected to the load circuit and whose terminals are successively connected to various tapping points on the transformer. ★ inductance de passage → *inductance 13.* R переходной реактор. D Überschaltdrossel. E inductancia de paso. I induttore di transizione. N koppelsmoorspoel. P dławik wyrównawczy. S reglerbar reaktor. (811)
48. **valve reactor** : a reactor connected in series with a valve. ★ inductance de valve → *inductance 15.* R вентильный реактор. D Ventildrossel; Anodendrossel. E inductancia de válvula. I induttore di valvola. N ventielsmoorspoel. P dławik zaworu. S greninduktor. (551)

read

1. **maximum usable read number** : the maximum number of times a storage element, line or surface can be read, under stated conditions and without rewriting, before a stated degree of decay has occurred. ★ nombre de lectures maximal utilisable → *lecture 21.* R максимальное число считываний. D maximale nutzbare Abfragehäufigkeit. E número de lecturas máximo utilizable. I massimo numero di letture utilizzabile. N maximum bruikbaar leestal. P liczba odczytów maksymalna. S maximalt antal användbara läsningar. (531)

reader

1. **dosemeter charger reader** : instrument intended to charge an indirect reading pocket dosemeter and to allow reading of the dosemeter from the residual charge measurement. ★ chargeur-lecteur de dosimètre → *chargeur-lecteur 1.* R зарядно-измерительное устройство. D Lade- u. Ablesegerät für Dosimeter. E cargador-lector de dosímetro. I caricatore-lettore di dosimetro. N ladende meter. P przyrząd do ładowania i odczytywania dawkomierzy. S dosmätare med laddningsavläsare. (391)
2. **exposure meter charger reader** : instrument intended to charge an indirect reading pocket exposure meter and to allow reading of the dosemeter from the residual charge measurement. ★ chargeur-lecteur d'exposimètre → *chargeur-lecteur 2.* R зарядно-измерительное устройство. D Lade- u. Ablesegerät für Dosimeter. E cargador-lector de exposímetro. I caricatore-lettore di esposimetro. N ladende meter. P przyrząd

do ładowania i odczytywania dawkomierzy. S expositionsmätare med laddningsavläsare. (391)

3. **reader for photoluminescent dosemeter** : an instrument intended for reading of a photoluminescent personal dosemeter by measuring the light emitted by the dosemeter when receiving radiation of certain wavelength. ★ lecteur de dosimètre à photoluminescence → *lecteur 2.* R считывающее устройство для радиофотолюминесцентного дозиметра. D Ablesegerät für Photoluminiszenzdosimeter. E lector de dosímetro de fotoluminiscencia. I lettore di dosimetro a fotoluminescenza. N aflezer voor dosismeter met fotoluminescentie. P czytnik dla dawkomierzy fotoluminescencyjnych. S avläsare för fotoluminiscensdosmätare. (391)
4. **reader for photoluminescent exposure meter** : an instrument intended for reading of a photoluminescent personal exposure meter by measuring the light emitted by the exposure meter when receiving radiation of certain wavelength. ★ lecteur d'exposimètre à photoluminescence → *lecteur 4.* R считывающее устройство для радиофотолюминесцентного измерителя экспозиционной дозы. D Ablesegerät für Photoluminiszenzdosimeter. E lector de exposímetro de fotoluminiscencia. I lettore di esposimetro a fotoluminescenza. N aflezer voor exposiemeter met fotoluminescentie. P miernik dawki ekspozycyjnej fotoluminescencyjnej. S avläsare för fotoluminiscensexpositionsmätare. (391)
5. **reader for thermoluminescent dosemeter** : an instrument intended for reading of a thermoluminescent personal dosemeter by measuring the light emitted by thermal stimulation of the dosemeter in a predetermined temperature interval. ★ lecteur de dosimètre à thermoluminescence → *lecteur 3.* R считывающее устройство для термолюминесцентного дозиметра. D Ablesegerät für Thermoluminiszenzdosimeter. E lector de dosímetro de termoluminiscencia. I lettore di dosimetro a termoluminescenza. N aflezer voor dosismeter met thermoluminescentie. P czytnik dla dawkomierzy termoluminescencyjnych. S avläsare för termoluminiscensdosmätare. (391)
6. **reader of thermoluminescent exposure meter** : an instrument intended for reading of a thermoluminescent personal exposure meter by measuring the light emitted by thermal stimulation of the exposure meter in a predetermined temperature interval. ★ lecteur d'exposimètre à thermoluminescence → *lecteur 5.* R считывающее устройство для термолюминесцентного измерителя экспозиционной дозы. D Ablesegerät für Thermoluminiszenzdosimeter. E lector de exposímetro de termoluminiscencia. I lettore di esposimetro a termoluminescenza. N aflezer met exposiemeter voor thermoluminescentie. P miernik dawki ekspozycyjnej termoluminescencyjnej. S avläsare för termoluminiscensexpositionsmätare. (391)

reading

1. **direct reading pocket dosemeter** : → *dosemeter 3*
2. **direct reading pocket exposure meter** : → *exposure meter 1*
3. **indirect reading pocket dosemeter** : → *dosemeter 10*
4. **indirect reading pocket exposure meter** : → *exposure meter 6*
5. **maximum usable reading time** : → *time 92*
6. **minimum usable reading speed** : → *speed 27*
7. **reading** : generating output information corresponding to the stored information. ★ lecture → *lecture 14.* R считывание. D Lesen. E lectura. I lettura. N lezen. P odczytywanie. S avläsning. (531)
8. **reading gun** : → *gun 14*
9. **reading speed** : → *speed 33*

readjustment

1. **readjustments** : adjustments, specified by the manufacturer, that must be made during the use of the instrument so that it will continue to operate with the specified accuracy. ★ réajustage → *réajustage 1.* R настройка. D Nachkalibrierung. E reajuste. I regolazione ripetuta. N bijregeling. P adiustacja robocza. S omjustering. (301)

read-only

1. **read-only store** : → *store 7*

readout

1. **digital readout** : presentation of the values of the measured quantity by means of figures appearing discontinuously, forming a number which directly indicates each of those values. ★ affichage numérique → *affichage 2.* R цифровое показание. D Digitalanzeige. E lectura numérica; lectura digital. I indicazione numerica. N digitale aflezing. P wskazanie cyfrowe. S digital visning; sifferavläsning. (301)
2. **readout time** : → *time 140*
3. **semi-digital readout** : presentation of the values of the measured quantity by the combination of a digital readout and an indication by a scale and index. ★ affichage semi-numérique → *affichage 3.* R полуцифровое показание. D kombinierte Analog/Digitalanzeige. E lectura seminumérica; lectura semidigital. I indicazione semi numerica. N semi-digitale aflezing. P wskazanie półcyfrowe. S semi-digital visning. (301)

ready

1. **not ready** : the condition at the DTE/DCE interface which denotes that the data circuit terminating equipment is not ready to accept a call request signal or that the data terminal equipment is not ready to accept an incoming signal. ★ indisponible → *indisponible 1.* R неготовность. D nicht bereit. E no disponible. I non disponibile. N niet gereed. P niegotowość. S ej disponibel. (721)
2. **ready** : the condition at the DTE/DCE interface which denotes that the data circuit terminating equipment is ready to accept a call request signal or that the data terminal equipment is ready to accept an incoming signal. ★ disponible → *disponible 1.* R готовность. D bereit. E disponible. I disponibile. N gereed. P gotowość. S disponibel. (721)
3. **ready for data signal** : → *signal 154*

real

1. **real no-load direct voltage** : → *direct voltage 9*
2. **real time** : → *time 141*
3. **relative (real) permeability** : → *permeability 23*
4. **(relative) (real) permittivity** : → *permittivity 6*

rear

1. **assisting in rear** (*Syn.* banking) : → *banking 1*
2. **connector rear** : → *connector 15*
3. **rear fog light** : → *light 56*
4. **rear position light** : → *light 57*
5. **rear registration-plate light** (*Syn.* number-plate light) : → *light 46*

rear-release

1. **rear-release contact** : → *contact 98*

reasonableness

1. **reasonableness check** : → *check 11*

reattempt

1. **reattempt** (*Syn.* repeated call attempt) : → *attempt 9*

rebroadcast

1. **rebroadcast receiver** : → *receiver 8*
2. **rebroadcast transmitter** : → *transmitter 12*

rebroadcasting

1. **rebroadcasting** : receiving a sound or television broadcast and retransmitting the same programme simultaneously. *Note.* — Associated term : to rebroadcast. ★ réémission → *réémission 1.* R ретрансляция. (723)

recall

1. **camp-on with recall** : → *camp-on 2*
2. **network recall** : the recall of the network by a subscriber during the message phase of the call to request facilities. ★ rappel du réseau → *rappel 8.* R повторный вызов сети. D Netzrückruf. E llamada de red. I richiamo di rete. N ..... P przywołanie sieci. S nätanrop. (721)
3. **operator recall signal** : → *signal 135*

4. **register recall** : a request for a register function during an already established connection. ★ rappel d'enregistreur → *rappel 7.* R повторный вызов регистра. D Registerherbeiruf. E rellamada de registro. I richiesta di registro. N ..... P przywołanie rejestru. S registeranrop. (714)

receive

1. **receive channel** (*Syn.* return channel) : → *channel 41*
2. **receive channel** : → *channel 37*
3. **receive fibre optic terminal device** : → *device 47*

received

1. **received source signal** (*Syn.* output signal (of a transmission system)) : → *signal 137*

receiver

1. **cable (distribution system) receiver** : a sound or television receiver especially designed for receiving signals provided by a cabled distribution system at the subscribers outlet. *Note.* — Such receivers may be tuned to channels outside the broadcasting frequency bands. ★ récepteur pour télédistribution → *récepteur 22.* R приемник кабельной системы распределения. (723)
2. **continuous facsimile receiver** : a facsimile receiver that records line by line on a medium which moves on by a constant pitch between two consecutive lines so as to record several messages in succession without the need for the operator to change the medium between consecutive messages. ★ récepteur de télécopie à déroulement continu → *récepteur 13.* R рулонный приемник. D Endlosempfänger. E receptor de telecopia con desarrollo continuo. I ricevitore a scorrimento continuo. N ononderbroken-ontvanger. P odbiornik z przesuwem ciągłym. S kontinuerlig mottagare. (721)
3. **drum facsimile receiver** : a facsimile receiver in which the recording medium is fastened to a rotating drum and scanned helically by a recording head. ★ récepteur de télécopie à cylindre → *récepteur 12.* R приемник с барабанной разверткой. D Trommelempfänger. E receptor de telecopia de cilindro. I ricevitore a tamburo. N trommelontvanger. P odbiornik bębnowy. S trummottagare. (721)
4. **margin of a synchronous receiver** : → *margin 10*
5. **multi-standard receiver** : television receiver which permits television transmissions to be received from television stations operating on different standards. ★ récepteur (de télévision) multinorme → *récepteur 16.* R многостандартный телевизор. (723)
6. **PIN-FET integrated receiver** : an optical receiver formed by the combination of a PIN photodiode and a Field Effect Transistor (FET) and packaged in a single housing. *Note.* — These components are often packaged in such a way as to improve the performance of the combinations over what it would have been had the individual components been employed as discrete components. ★ récepteur intégré PIN-TEC → *récepteur 17.* R PIN-FET интегральный приемник. D integrierter PIN-FET Empfänger. E receptor integrado PIN-FET. I ricevitore a PIN-FET integrato. N PIN-FET-geïntegreerde ontvanger. P odbiornik scalony PIN-FET. S PINFET-mottagare. (731)
7. **projection television receiver** : a television receiver in which an image of the television picture is displayed using a television projector. ★ récepteur (de télévision) à projection → *récepteur 15.* R проекционный телевизор. (723)
8. **rebroadcast receiver** : a radio receiver specially designed to receive transmissions from a sound or television broadcasting transmitter and to supply audio and videofrequency programme signals for retransmission. ★ récepteur de retransmission → *récepteur 11.* R ретрансияционный приемник. (723)
9. **receiver** (in signalling) : a device that receives signals for interpretation and action. ★ récepteur → *récepteur 3.* R приемник (сигнализации). D Empfaenger. E receptor (de señalización). I ricevitore. N ontvanger. P odbiornik (sygnalizacyjny). S mottagare. (714)
10. **receiver lead** : → *lead 13*
11. **sound broadcasting receiver** (*Syn.* sound receiver) : radio receiver capable of reproducing programmes transmitted by a sound broadcasting transmitter. ★ récepteur de radiodiffusion sonore → *récepteur 10.* R радиовещательный приемник (звуковой); радиоприемник. (723)
12. **sound receiver** (*Syn.* sound broadcasting receiver) : → *receiver 11*
13. **stereophonic receiver** : sound broadcasting receiver designed for receiving stereophonic sound transmissions. ★ récepteur stéréophonique → *récepteur 28.* R стереофонический радиоприемник. (723)
14. **telephone receiver** : an electro-acoustic transducer used in a telephone set to convert speech currents to acoustic signals. *Examples :* Telephone earphone, telephone loud-speaker. ★ récepteur téléphonique → *récepteur 29.* R телефонный приемник. D Telefonempfänger. E receptor telefónico. I ricevitore telefonico. N telefoon. P słuchawka telefoniczna. S hörtelefon. (722)
15. **television receiver** (*Syn.* TV set) : a receiver designed to reproduce the picture and accompanying sound of a television programme. ★ récepteur de télévision → *récepteur 14.* R телевизор. (723)
16. **TV set** (*Syn.* television receiver) : → *receiver 15*

receiving

1. **receiving perforator** (*Syn.* reperforator) : → *reperforator 4*
2. **receiving polarization** : → *polarization 39*
3. **receiving reference equivalent** : → *equivalent 58*
4. **receiving system** : → *system 167*
5. **relative equivalent for receiving** : → *equivalent 61*

reception

1. **community reception** (in satellite broadcasting) : the reception of terrestrial or satellite broadcasting transmissions by means of installations intended for a group of the general public, either at the same location, or by means of a cabled distribution system serving a limited area. *Note.* — Satellite broadcasting with community reception must not be confused with direct distribution by satellite. ★ réception communautaire → *réception 8.* R коллективный прием. (723)
2. **community reception** (in satellite broadcasting) : the reception of emissions from a broadcasting satellite by receiving installations, which may be more complex and have an antenna larger than those used for individual reception, and are intended for a group of the general public, either at one location and with a small number of receivers, or through a distribution network covering a limited area. *Note.* — Satellite broadcasting with community reception must not be confused with the transmission by satellite of programmes to terrestrial broadcasting transmitters (which is called "direct distribution by satellite", see CCIR Rec. 566 nº 2.2). ★ réception communautaire → *réception 9.* R коллективный прием (в спутниковом радиовещании). D Gemeinschaftsempfang (bei Satelliten-Rundfunk). E recepción comunal (en la radiodifusión por satélite). I ricezione generale (via satellite). N collectieve ontvangst. P odbiór zbiorowy (w radiodyfuzji satelitarnej). S kollektiv mottagning. (725)
3. **individual reception** (in satellite broadcasting) : the reception of emissions from a broadcasting satellite by simple receiving installations generally using an antenna of small dimensions, intended to serve a single dwelling. ★ réception individuelle → *réception 10.* R индивидуальный прием (в спутниковом радиовещании). D Einzelempfang (bei Satelliten-Rundfunk). E recepción individual (en la radiodifusión por satélite). I ricezione individuale (via satellite). N individuele ontvangst. P odbiór indywidualny (w radiodyfuzji satelitarnej). S individuell mottagning. (723,725)

receptive

1. **receptive substation** : → *substation 21*

recessed

1. **recessed luminaire** : → *luminaire 22*

rechargeable

1. **(rechargeable) battery** (*Syn.* (secondary) battery) : → *battery 60*
2. **(rechargeable) cell** (*Syn.* (secondary) cell) : → *cell 35*

reciprocal

1. **reciprocal transducer** : → *transducer 11*
2. **reciprocal two-port network** : → *network 81*

reciprocating

1. **reciprocating compressor** : → *compressor 5*
2. **reciprocating lights** : → *light 59*

reciprocity

1. **reciprocity coefficient** : → *coefficient 51*
2. **reciprocity principle** : → *principle 4*

reclaiming

1. **reclaiming** : the elimination of soluble and insoluble contaminants from an insulating liquid by chemical absorption means, in addition to mechanical means, in order to restore properties as close as possible to the original values. *Note.* — The process may include the use of antioxidants. ★ régénération → *régénération 1.* R регенерация. D Regenerierung. E regeneración. I rigenerazione. N chemische zuivering. P regeneracja. S kemisk rening. (212)

reclosing

1. **automatic reclosing** : the automatic reclosing of a circuit-breaker associated with a faulted section of a network after an interval of time which permits that section to recover from a transient fault. ★ réenclenchement automatique → *réenclenchement 2.* R автоматическое повторное включение; АПВ. D automatische Wiedereinschaltung. E reenganche automático. I richiusura automatica. N automatische wederinschakeling. P samoczynne powtórne załączenie; SPZ. S återinkoppling. (604)
2. **automatic reclosing control equipment** : → *equipment 8*
3. **dead time (for automatic reclosing equipment)** : → *time 41*
4. **delayed automatic reclosing** : an automatic reclosing which occurs after a time interval of the order of one minute after tripping on fault. ★ réenclenchement lent → *réenclenchement 5.* R АПВ с выдержкой времени. D automatische verzögerte Wiedereinschaltung. E reenganche lento. I richiusura lenta. N vertraagde automatische wederinschakeling. P SPZ powolne. S fördröjd återinkoppling. (604)
5. **high speed automatic reclosing** : an automatic reclosing which occurs after a time interval of the order of one second after tripping on fault. ★ réenclenchement rapide → *réenclenchement 7.* R быстродействующее АПВ. D automatische Schnellwiedereinschaltung. E reenganche rápido. I richiusura rapida. N snelle automatische wederinschakeling. P SPZ szybkie. S snabb återinkoppling. (604)
6. **multiple shot reclosing** : an automatic reclosing repeated two or three times, usually not more, if it is not successful. ★ réenclenchement automatique multiple → *réenclenchement 3.* R многократное автоматическое повторное включение. D mehrmalige Kurzunterbrechung. E reenganche automático múltiple. I richiusura automatica ripetuta. N meermalige wederinschakeling. P wielokrotne samoczynne ponowne załączenie. S återinkoppling med flera försök. (448,604)
7. **single phase automatic reclosing control equipment** (*Syn.* single pole automatic reclosing control equipment) : → *equipment 69*
8. **single pole automatic reclosing control equipment** : → *equipment 69*
9. **single shot reclosing** : an automatic reclosing which is not repeated if unsuccessful. ★ réenclenchement automatique unique → *réenclenchement 4.* R однократное автоматическое повторное включение. D einmalige Kurzunterbrechung. E reenganche automático único. I richiusura automatica singola. N éénmalige wederinschakeling. P jednokrotne samoczynne ponowne załączenie. S återinkoppling med ett försök. (448,604)
10. **successful reclosing** : non-recurrence of the fault following reclosing. ★ réenclenchement réussi → *réenclenchement 8.* R успешное АПВ. D erfolgreiche Wiedereinschaltung. E reenganche con éxito. I richiusura riuscita. N geslaagde wederinschakeling. P SPZ skuteczne (udane). S lyckad återinkoppling. (604)
11. **three phase automatic reclosing control equipment** (*Syn.* three pole automatic reclosing control equipment) : → *equipment 82*
12. **three pole automatic reclosing control equipment** : → *equipment 82*
13. **unsuccessful reclosing** : recurrence of the fault following reclosing. ★ réenclenchement non réussi → *réenclenchement 6.* R неуспешное АПВ. D erfolglose Wiedereinschaltung. E reenganche sin éxito. I richiusura non riuscita. N niet-geslaagde wederinschakeling. P SPZ nieskuteczne (nieudane). S misslyckad återinkoppling. (604)

recognition

1. **fault recognition** : the event of a fault being recognized. ★ détection de panne → *détection 5.* R установление наличия (существенной) неисправности; обнаружение (существенной) неисправности. D Fehlererkennung. E detección (de une avería). I rilevazione di avaria. N vaststellen van een defect. P rozpoznanie przyczyny niezdatności. S felupptäckt. (191)
2. **recognition differential** (*Syn.* detection differential) : → *differential 3*

recoil

1. **recoil curve** (*Syn.* recoil line) : → *line 129*
2. **recoil electron** (*Syn.* Compton electron) : → *electron 3*
3. **recoil line** : → *line 129*
4. **recoil loop** (*Syn.* recoil line) : → *line 129*
5. **recoil permeability** : → *permeability 20*
6. **recoil proton counter tube** : → *counter tube 23*
7. **recoil proton ionization chamber** : → *ionization chamber 19*
8. **recoil proton spectrometer** : → *spectrometer 7*
9. **recoil state** : → *state 29*

recombination

1. **recombination** : union of charge carriers of opposite signs. ★ recombinaison → *recombinaison 2.* R рекомбинация. D Rekombination. E recombinación. I ricombinazione. N recombinatie. P rekombinacja. S rekombination. (111)
2. **recombination** : interaction between a negative and a positive charge carrier with resulting neutralization of their charges and conservation of their masses. ★ recombinaison → *recombinaison 3.* R рекомбинация. D Rekombination. E recombinación. I ricombinazione. N recombinatie. P rekombinacja. S rekombination. (391,881)
3. **recombination coefficient** : → *coefficient 52*
4. **recombination rate** : → *rate 81*
5. **surface recombination velocity** : → *velocity 20*

reconditioning

1. **reconditioning** : a process by which the solid content and the water content of a used insulating liquid is reduced to an acceptable level by mechanical means. *Note.* — Often reconditioning includes degassing as well. ★ retraitement → *retraitement 1.* R восстановление. D Aufbereitung. E reacondicionamiento. I ritrattamento. N mechanische zuivering. P oczyszczanie mechaniczne. S mekanisk rening. (212)

record

1. **frequency record** : a disk on which are recorded various sinewave signals, at stated frequencies and levels for the purpose of measuring the reproducing system characteristics. ★ disque de fréquences → *disque 5.* R измерительная грампластинка. D Frequenzplatte. E disco de frecuencias. I disco di frequenza. N frequentieplaat. P ..... S frekvens(mät)skiva. (806)
2. **local record** : display of a transmitted message made on a receiver associated with the transmitting apparatus. ★ contrôle local → *contrôle 15.* R местный контроль. D örtliche Aufzeichnung. E control local. I visualizzazione locale. N lokaalschrift. P kontrola lokalna. S lokalutskrift. (721)
3. **long-playing record** : a record with an appreciably increased playing time compared to a coarse groove, due to the use of a microgroove at a very fine pitch which is recorded at a rated speed of 33 1/3 r.p.m. or 45 r.p.m. ★ disque de longue durée → *disque 8.* R долгоиграющая грампластинка. D Langspielplatte. E disco de larga duración. I disco di lunga durata. N langspeelplaat. P płyta długogrająca. S långspel(ning)sskiva; LP-skiva. (806)
4. **maximum start time to record/reproduce speed** : → *time 88*

5. **maximum stopping time from record/reproduce speed** : → *time 90*
6. **monophonic record** : a record which carries one channel of information in the form of lateral displacement of a spiral groove. ★ enregistrement monophonique sur disque → *enregistrement 28.* R монофоническая грампластинка. D Mono-Platte. E registro monofónico en disco. I registrazione monofonica su disco. N monoplaat. P zapis monofoniczny. S monofonisk grammofonskiva; monoskiva. (806)
7. **processed disk record** : a disk produced in a moulding press from a stamper. ★ disque moulé → *disque 12.* R грампластинка. D gepresste Schallplatte. E disco impresso. I disco stampato. N geperste plaat. P płyta gramofonowa. S tillverkad grammofonskiva. (806)
8. **record** : a set of related data or words treated as a unit. ★ enregistrement → *enregistrement 14.* R запись. D Datensatz. E registro. I dati strutturati. N record, staat. P jednostka pliku. S post. (714)
9. **record** (*Syn.* disk) : → *disk 6*
10. **record changer** : → *changer 8*
11. **record player** : → *player 1*
12. **record preserving sensor hole** : → *hole 15*
13. **record spindle** : → *spindle 1*
14. **rumble in a record player unit** : → *rumble 1*
15. **stereophonic record** : a record which carries two channels of information in the form of displacements of a single spiral groove in two mutually perpendicular directions. *Note* — In stereophonic 45° × 45° recording, the modulation axes intersect at right angles and each of them is inclined at 45° to the surface of the recording medium. ★ enregistrement stéréophonique sur disque → *enregistrement 34.* R стереофоническая грампластинка. D Stereo-Platte. E registro estereofónico en disco. I registrazione stereofonica su disco. N stereoplaat. P zapis stereofoniczny. S stereofonisk grammofonskiva; stereoskiva. (806)
16. **trial record** : a record for evaluating the quality of a pressing before release. ★ disque d'essai → *disque 10.* R пробная грампластинка. D Musterplatte. E disco de ensayo. I disco di prova. N proefpersing. P ..... S provskiva. (806)
17. **video record current** : → *current 218*

recorded

1. **inner diameter of the recorded surface** : → *diameter 12*
2. **monitoring of a recorded programme** : → *monitoring 11*
3. **outer diameter of the recorded surface** : → *diameter 14*
4. **recorded broadcast** : → *broadcast 12*
5. **recorded level** : → *level 74*
6. **recorded message** : → *message 13*
7. **recorded surface** : → *surface 17*
8. **recorded velocity** : → *velocity 18*

recorder

1. **continuous line recorder** : a recording instrument in which the record is a continuous line. ★ enregistreur à tracé continu → *enregistreur 13.* R самопишущий прибор с непрерывной записью. D Linienschreiber. E registrador de traza continua. I strumento registratore a traccia continua. N lijnschrijver. P rejestrator o zapisie linią ciągłą. S linjeskrivare. (302)
2. **disc recorder** : a recording instrument in which the chart is a disc which is rotated by the chart driving mechanism. ★ enregistreur à disque → *enregistreur 5.* R самопишущий прибор с дисковой диаграммой. D Kreisblattschreiber. E registrador de disco. I strumento registratore a disco. N schijfschrijver. P rejestrator tarczowy. S skivskrivare. (302)
3. **disk recorder** : a mechanical device consisting of a turntable capable of being rotated at a constant velocity, and a cutter head mounted above the turntable, actuated by a radial movement, to enable a spiral groove to be cut in a disk. ★ machine à graver les disques → *machine 19.* R станок записи. D Schneidgerät. E máquina de grabar discos. I apparecchiatura per incidere dischi. N plaatsnijmachine. P zapisywacz (mechaniczny płytowy); maszyna do zapisywania płytowego. S graververk. (806)
4. **disturbance recorder** (*Syn.* perturbograph) : an instrument in continuous operation, provided with a memory making it possible to record events and transient variables before and during fault conditions. ★ enregistreur de perturbation → *enregistreur 14.* R аварийный осциллограф. D Störungsaufzeichnungsgerät; Störungsschreiber. E registrador de perturbaciones; perturbógrafo. I registratore di perturbazioni; perturbografo. N storingsschrijver. P rejestrator zakłóceń; oscyloperturbograf. S störningsskrivare. (604)
5. **dotted line recorder** : a printing recorder in which the record comprises a series of successive impressions which may be points, numerals, etc. ★ enregistreur par points → *enregistreur 19.* R самопишущий прибор с точечной записью. D Punktschreiber. E registrador por puntos. I strumento registratore per punti. N gebroken-lijn-schrijver. P rejestrator o zapisie linią punktową. S punktskrivare. (302)
6. **drum recorder** : a recording instrument in which the chart is wrapped as a single turn around a cylindrical drum which is rotated by the chart driving mechanism. ★ enregistreur à tambour → *enregistreur 12.* R самопишущий прибор с барабанной диаграммой. D Trommelschreiber. E registrador de tambor. I strumento registratore a tamburo. N trommelschrijver. P rejestrator bębnowy. S trumskrivare. (302)
7. **event recorder** : a recording instrument which records the presence or absence of a quantity or the state of a two-state device as a function of time. ★ enregistreur d'événements → *enregistreur 15.* R самопишущий прибор для записи события. D Ereignisschreiber. E registrador de sucesos. I strumento registratore di eventi. N gebeurtenisschrijver. P rejestrator zdarzeń. S händelseskrivare. (302)
8. **ionospheric recorder** (*Syn.* ionosonde) : → *ionosonde 1*
9. **jet recorder** : a recording instrument in which the record is made by directing a jet of ink on to the chart. ★ enregistreur à jet d'encre → *enregistreur 6.* R самопишущий прибор со струйной записью. D Tintenstrahl-Schreiber. E registrador de chorro de tinta. I strumento registratore a getto d'inchiostro. N inktstraalschrijver. P rejestrator o zapisie natryskowym. S vätskestrålskrivare. (302)
10. **magnetic recorder** : an apparatus consisting of a recording medium transport system, recording heads, erasing heads, and associated electronic devices. ★ enregistreur magnétique → *enregistreur 17.* R устройство магнитной записи. D magnetisches Aufnahmegerät. E registrador magnético. I registratore magnetico. N magnetische opnemer. P zapisywacz magnetyczny; urządzenie do zapisywania magnetycznego. S magnetisk inspelningsapparat. (806)
11. **pen recorder** : a recording instrument in which the record on the chart is made by a pen supplied with ink. ★ enregistreur à plume → *enregistreur 7.* R самопишущий прибор с записью пером. D Tintenschreiber. E registrador de pluma. I strumento registratore a penna. N penschrijver. P rejestrator piórkowy. S pennskrivare. (302)
12. **printing recorder** : a recording instrument in which the record is made by a succession of printed marks. ★ enregistreur imprimeur → *enregistreur 16.* R самопишущий прибор со знакопечатающей записью. D druckender Schreiber. E registrador impresor. I stampante. N drukkende schrijver. P rejestrator drukujący. S tryckare. (302)
13. **radio-cassette recorder** : sound broadcasting receiver which includes means for the recording and reproduction of audio cassettes and which can also be used to record the received sound programmes. ★ récepteur radio-cassette → *récepteur 25.* R магнитола. (723)
14. **recorder** (*Syn.* recording (measuring) instrument) : → *measuring instrument 19*
15. **recorder adjustment sensor hole** : → *hole 16*
16. **siphon recorder** : a Morse undulator in which the stylus is fed with ink via a fine siphon. ★ enregistreur à siphon → *enregistreur 8.* R ондулятор с сифонной подачай чернил. D Heberschreiber. E registrador de sifón. I registratore Morse a sifone. N hevelschrijver. P undulator syfonowy. S pennskrivare. (721)
17. **spot recorder** : a recording instrument in which the record is made by a spot of light (visible or invisible) on a light-sensitive chart. ★ enregistreur à spot → *enregistreur 9.* R самопишущий прибор с записью световым лучом. D Lichtstrahlschreiber. E registrador de haz luminoso. I strumento registratore a macchia luminosa. N puntschrijver. P rejestrator plamkowy. S ljusskrivare. (302)
18. **strip chart recorder** : a recording instrument in which the chart is a strip driven by the chart driving mechanism. ★ enregistreur à bande déroulante → *enregistreur 4.*

R самопищущий прибор с записью на диаграммной ленте. D ..... E registrador de banda. I strumento registratore a svolgimento continuo. N papierbandschrijver. P rejestrator taśmowy. S remsskrivare. (302)

19. **stylus recorder** : a recording instrument in which the record on the chart is made by a stylus requiring no ink. ★ enregistreur à style → *enregistreur 10.* R самопишущий прибор с записью пишущим острием (стержнем). D Nadelschreiber. E registrador de estilete. I strumento registratore a stilo. N stiftschrijver. P rejestrator rylcowy. S nålskrivare. (302)
20. **thermal recorder** : a recording instrument in which the record is made by a heated stylus on a heat-sensitive chart. ★ enregistreur à style chauffant → *enregistreur 11.* R самопишущий прибор с тепловой записью. D thermischer Schreiber. E registrador de estilete caliente. I strumento registratore a stilo caldo. N thermische schrijver. P rejestrator cieplny. S värmeskrivare. (302)
21. **vertical incidence ionospheric recorder** (*Syn.* vertical incidence ionosonde) : → *ionosonde 2*
22. **XY recorder** : a recording instrument in which the marking device is moved along two orthogonal axes by two separate devices, to each of which a quantity to be recorded is applied. *Note.* — When one of the quantities is time, the instrument is called an X (t) or a Y (t) recorder. ★ enregistreur XY → *enregistreur 21.* R координатный самописец. D XY-Schreiber. E registrador XY. I registratore XY. N X-Y-schrijver. P rejestrator XY. S XY-skrivare. (301)

recorder-warning

1. **recorder-warning tone** (*Syn.* recording tone) : → *tone 26*

recording

1. **constant amplitude recording** : a recording such that, for a constant amplitude sinusoidal signal, the resulting recorded amplitude is independent of the frequency. ★ enregistrement à amplitude constante → *enregistrement 16.* R запись с постоянной амплитудой. D Aufzeichnung mit konstanter Amplitude. E registro de amplitud constante. I registrazione con ampiezza costante. N geluidregistratie met constante amplitude. P zapis o stałym wychyleniu. S inspelning med konstant amplitud. (806)
2. **constant velocity recording** : a recording such that for a constant amplitude sinusoidal signal, the resulting recorded amplitude is inversely proportional to the signal frequency. ★ enregistrement à vélocité constante → *enregistrement 17.* R запись с постоянной колебательной скоростью. D Aufzeichnung mit konstanter Schnelle. E registro de velocidad constante. I registrazione con velocità costante. N geluidregistratie met constante snelheid. P zapis o stałej prędkości. S inspelning med konstant tvärhastighet. (806)
3. **efficiency loss in magnetic recording** : → *loss 25*
4. **full track recording** : a recording process in which a single track occupies substantially the whole width of the magnetic tape. ★ enregistrement pleine piste → *enregistrement 32.* R запись по всей ширине ленты. D Vollspuraufzeichnung. E registro de pista llena. I registrazione con pista piena. N volspooropname. P zapis pełnościeżkowy; zapis pełnośladowy. S enspårsinspelning. (806)
5. **hill-and-dale recording** (*Syn.* vertical recording) : → *recording 49*
6. **instantaneous recording** : a disk which is cut and intended for direct reproduction. ★ enregistrement direct → *enregistrement 18.* R диск прямого воспроизведения. D Abhörfolie. E registro directo. I registrazione diretta. N opname voor onmiddellijke weergave. P płyta do bezpośredniego odtwarzania. S graverad skiva (för spelning). (806)
7. **lateral recording** : a recording in which the movement of the cutting stylus is parallel to the surface of the recording medium. ★ enregistrement latéral → *enregistrement 20.* R поперечная запись. D laterale Aufzeichnung (Seitenschrift). E registro lateral. I registrazione laterale. N laterale opname. P zapis wboczny. S lateral gravering. (806)
8. **magnetic recording** : a technique whereby the recording medium is magnetic. ★ enregistrement magnétique → *enregistrement 21.* R магнитная запись. D magnetische Aufzeichnung. E registro magnético. I registrazione magnetica. N magnetische opname. P zapisywanie magnetyczne; nagrywanie magnetyczne; rejestrowanie magnetyczne. S magnetisk inspelning. (806)
9. **magnetic recording head** : → *head 18*
10. **magnetic recording medium** : → *medium 18*
11. **magnetic recording/reproducing head** : → *head 19*
12. **maximum recording audiofrequency current** : → *current 126*
13. **mechanical recording** : a recording process, wherein recorded signals are embodied in the form of a permanent mechanical set on a recording support by cutting, embossing or moulding. ★ enregistrement mécanique → *enregistrement 26.* R механическая запись. D mechanische Aufzeichnung. E registro mecánico. I registrazione meccanica. N mechanische plaatopname. P zapisywanie mechaniczne. S mekanisk inspelning. (806)
14. **mechanical recording head** (*Syn.* cutter head) : → *head 2*
15. **monophonic recording** : recording of audiofrequency signals via a single recording channel. ★ enregistrement monophonique → *enregistrement 27.* R монофоническая запись. D monophone Aufnahme. E registro monofónico. I registrazione monofonica. N monofonische opname. P zapisywanie monofoniczne. S monofonisk inspelning; monoinspelning. (806)
16. **monophonic recording/reproduction** : → *reproduction 2*
17. **multi-channel recording** : a recording technique using several channels. *Note.* — e.g.: stereophony (two channels), quadrophony (four channels). ★ enregistrement multivoie → *enregistrement 30.* R многоканальная запись. D Mehrkanal-Aufnahme. E registro multicanal. I registrazione pluricanale. N meerkanalenopname. P zapisywanie wielokanałowe. S flerkanalsinspelning. (806)
18. **multitrack recording** : a recording process in which several longitudinal and parallel tracks are recorded on the same tape. *Note.* — In monophonic recording, the tracks may be successively recorded in alternate directions; in stereophonic recording, the tracks may be successively recorded in pairs not necessarily adjacent, in alternate opposite directions. For an endless loop contained in a cartridge, all single tracks (monophonic recording) or pairs of tracks (stereophonic recording) are recorded in the same direction. ★ enregistrement multipiste → *enregistrement 29.* R многодорожечная запись. D Mehrspuraufzeichnung. E registro multipista. I registrazione con molte piste. N meersporenopname. P zapis wielościeżkowy; zapis wielośladowy. S flerspårsinspelning. (806)
19. **multitrack recording system** : → *system 122*
20. **rated recording level** : → *level 73*
21. **recording** : the inscriptions made on the recording chart or the change of state of the recording medium. ★ enregistrement → *enregistrement 13.* R запись. D Schrieb. E registro. I registrazione. N registratie. P zapis. S registrering. (301)
22. **recording** : *a)* action by which signals are suitably embodied in a material base. *b)* techniques whereby information is embodied in a material base with the aim of preserving them with a view to their subsequent reproduction. *c)* material base for signals after embodiment and, through extension, the signals themselves after reproduction. ★ enregistrement → *enregistrement 15.* R запись. D Aufzeichnung. E registro; grabación. I registrazione. N opname. P zapisywanie; nagrywanie; rejestrowanie. S inspelning. (806)
23. **recording angle or dig** (*Syn.* rake of stylus) : → *rake 1*
24. **recording audio-frequency current** : → *current 165*
25. **recording chain** : → *chain 10*
26. **recording channel** : → *channel 38*
27. **recording characteristic** : → *characteristic 69*
28. **recording chart** : → *chart 4*
29. **recording device** : → *device 48*
30. **recording head relative efficiency** : → *efficiency 36*
31. **recording level** : → *level 75*
32. **recording level indicator** : → *indicator 21*
33. **recording loss** : → *loss 80*
34. **recording (measuring) instrument** : → *measuring instrument 19*
35. **recording medium** : → *medium 26*
36. **recording medium** : → *medium 27*

37. **recording/reproducing electro-acoustical frequency response** : → *frequency-response 9*
38. **recording/reproducing harmonic distortion** : → *distortion 62*
39. **recording/reproducing overall amplitude/frequency response** : → *response 10*
40. **recording studio** : → *studio 2*
41. **recording stylus** (*Syn.* cutting stylus) : → *stylus 2*
42. **recording system** : → *system 168*
43. **recording tone** : → *tone 26*
44. **reel-to-reel recording/reproducing equipment** : → *equipment 60*
45. **signal recording telegraphy** : → *telegraphy 11*
46. **stereophonic recording** : recording of two signals from two recording channels, in such a way that after the reproducing process the information on each recording channel is separately available. This process is intended to provide an impression of sound source location during reproduction. ★ enregistrement stéréophonique → *enregistrement 33.* R стереофоническая запись. D stereophone Aufnahme. E registro estereofónico. I registrazione stereofonica. N stereofonische opname. P zapisywanie stereofoniczne. S stereofonisk inspelning; stereoinspelning. (806)
47. **synchronous recording** : a recording process in which several related signals separately recorded may be simultaneously reproduced without phase shift. ★ enregistrement magnétique synchrone → *enregistrement 24.* R синхронная запись. D Synchronaufzeichnung. E registro síncrono. I registrazione sincrona. N synchroonopname. P zapisywanie synchroniczne. S synkron inspelning. (806)
48. **telephone answering and recording set** : → *set 54*
49. **vertical recording** (*Syn.* hill-and-dale recording) : a recording in which the movement of the recording stylus is perpendicular to the surface of the recording medium. ★ enregistrement vertical → *enregistrement 35.* R глубинная запись. D vertikale Aufzeichnung (Tiefenschrift). E registro vertical, grabación en profundidad. I registrazione verticale (in profondità). N verticale opname. P zapis wgłębny. S vertikal gravering. (806)

record-stacking

1. **record-stacking height** : the available height reserved for stacking disks on the vertical spindle of a record changer. ★ hauteur d'empilage des disques → *hauteur 5.* R высота укладки. D Plattenstapelhöhe (Fassungsvermögen der Stapelachse). E altura de apilado de discos. I altezza di impilamento dei dischi. N stapelhoogte. P wysokość stosu płyt. S skivstapelhöjd. (806)

recovered

1. **recovered charge** : → *charge 41*

recovery

1. **carrier recovery** : the process of recovering the original carrier from a modulated signal. ★ extraction de porteuse → *extraction 2.* R выделение несущей. D Trägerrückgewinnung. E estado de portadora; recuperación de portadora. I estrazione di portante; ricupero di portante. N draaggolfherstel. P odzysk nośnej. S bärvågsåtervinning. (702)
2. **forward recovery time** : → *time 64*
3. **frame alignment recovery time** : → *time 65*
4. **half amplitude recovery time** : → *time 71*
5. **load recovery** : after voltage recovery, the increase in load of a consumer or system, at a rate depending on the characteristics of that load. ★ reprise de la charge → *reprise 2.* R восстановление нагрузки. D Lastwiederkehr. E recuperación de carga. I ripresa del carico. N terugkeer van de belasting. P powrót obciążenia. S belastningsåtergång. (604)
6. **mean time to recovery** (*Syn.* mean time to restoration) : → *time 106*
7. **recovery** (*Syn.* restoration) : → *restoration 3*
8. **recovery** (from radiation effects) : the change(s) in response in a cell, an organ or an organism after irradiation that tend to restore functional integrity. ★ récupération → *récupération 6.* R выздоровление (после радиационного поражения). D Erholung (von Strahlenwirkungen). E restablecimiento (por efectos de las radiaciones). I recupero (dagli effetti delle radiazioni). N herstel (van stralingseffecten). P wyzdrowienie (popromienne). S återhämtning. (881)
9. **recovery period** : → *period 28*
10. **recovery procedure** : → *procedure 3*
11. **recovery time** : → *time 142*
12. **recovery time** : → *time 143*
13. **recovery time** : → *time 144*
14. **recovery time** : → *time 145*
15. **reverse recovery time** : → *time 157*
16. **time to recovery** (*Syn.* time to restoration) : → *time 210*
17. **timing recovery** : the derivation of a cyclic timing signal from a received digital signal, based on the periodicity of the digit time-slots. ★ récupération du rythme → *récupération 8.* R восстановление хронирующего сигнала. D Zeitmaßstabrückgewinnung. E recuperación del ritmo. I recupero del segnale di orologio. N herstel van het ritme. P przywrócenie taktu. S taktåtervinning. (704)
18. **voltage recovery** : the restoration of voltage to a value near to its previous value after a reduction, a collapse or a loss of voltage. ★ retour de la tension → *retour 25.* R восстановление напряжения. D Spannungswiederkehr. E retorno de la tensión. I ritorno della tensione. N terugkeer van de spanning. P powrót napięcia. S spänningsåterkomst. (604)

recovery voltage

1. **d.c. steady-state recovery voltage** : the recovery voltage in a d.c. circuit after the transient voltage phenomena have subsided, expressed by the mean value where ripple is present. ★ tension de rétablissement en courant continu en régime établi → *tension de rétablissement 4.* R установившееся восстанавливающееся напряжение постоянного тока. D wiederkehrende Dauergleichspannung. E tensión de restablecimiento en corriente continua en régimen permanente. I tensione di ritorno a regime in corrente continua. N stationair wederkerende gelijkspanning. P napięcie powrotne ustalone (przy prądzie stałym). S brytspänning i likströmsnät. (441)
2. **power frequency recovery voltage** : the recovery voltager after the transient voltage phenomena have subsided. ★ tension de rétablissement à fréquence industrielle → *tension de rétablissement 3.* R восстанавливающееся напряжение промышленной частоты. D betriebsfrequente wiederkehrende Spannung. E tensión de restablecimiento a frecuencia industrial. I tensione di ritorno a frequenza di esercizio. N wederkerende spanning van netfrequentie. P napięcie powrotne podstawowe; składowa podstawowa napięcia powrotnego. S driftfrekvent brytspänning. (441)
3. **prospective transient recovery voltage** (of a circuit) : the transient recovery voltage following the breaking of the prospective symmetrical current by an ideal switching device. *Note.* — The definition assumes that the switching device or the fuse, for which the prospective transient recovery voltage is sought, is replaced by an ideal switching device, i.e. having instantaneous transition from zero to infinite impedance at the very instant of zero current, i.e. at the "natural" zero. For circuits where the current can follow several different paths, e.g. a polyphase circuit, the definition further assumes that the breaking of the current by the ideal switching device takes place only in the pole considered. ★ tension transitoire de rétablissement présumée → *tension 254.* R ожидаемое переходное восстанавливающееся напряжение (цепи). D unbeeinflusste Einschwingungspannung (eines Stromkreises). E tensión transitoria de restablecimiento prevista (de un circuito). I tensione transitoria di ritorno presunta (di un circuito). N ideële wederkerende overgangsspanning (van een stroomketen). P napięcie powrotne przejściowe spodziewane (obwodu). S prospektiv transient återvändande spänning. (441)
4. **recovery voltage** : the power frequency voltage which appears across each set of main switching or transition contacts of the diverter switch or selector switch after these contacts have broken the switched current. ★ tension de rétablissement → *tension de rétablissement 1.* R восстанавливающееся напряжение. D wiederkehrende Spannung. E tensión de restablecimiento. I tensione di ristabilimento. N wederkerende spanning. P napięcie powrotne. S brytspänning. (421)
5. **recovery voltage** : the voltage which appears across the terminals of a pole of a switching device or a fuse after the breaking of the current. *Note.* — This voltage may be considered in two successive intervals of time, one during which a transient voltage exists, followed by a second one during which the power frequency or the steady-state recovery voltage alone exists. ★ tension de rétablissement → *tension de rétablissement 2.* R восстанавливающееся напряжение.

D wiederkehrende Spannung. E tensión de restablecimiento. I tensione di ritorno. N wederkerende spanning. P napięcie powrotne. S återvändande spänning. (441)

6. **transient recovery voltage** (*Syn.* TRV (abbreviation)) : the recovery voltage during the time in which it has a significant transient character. *Notes. 1* — The transient recovery voltage may be oscillatory or non-oscillatory or a combination of these depending on the characteristics of the circuit and the switching device. It includes the voltage shift of the neutral of a polyphase circuit. *2* — The transient recovery voltages in three-phase circuits is, unless otherwise stated, that across the first pole to clear, because this voltage is generally higher than that which appears across each of the other two poles. ★ tension transitoire de rétablissement → *tension 253.* R переходное восстанавливающееся напряжение; ПВН. D Einschwingspannung. E tensión transitoria de restablecimiento; TTR (abreviatura). I tensione transitoria di ritorno; TTR (abbreviazione). N wederkerende overgangsspanning. P napięcie powrotne przejściowe. S transient återvändande spänning. (441)

recruitment

1. **recruitment** : in certains cases of hearing impairment, for example of cochlear origin, an increase of loudness with increasing stimulus magnitude at a rate greater than for a normal ear. ★ recrutement auditif → *recrutement 1.* R рекруйтмент. D Rekruitment. E incremento auditivo. I reclutamento. N regressie. P przyrost głośności; wzmocnienie. S rekruitment. (801)

rectangular

1. **compound rectangular horn** : → *horn 4*
2. **rectangular connector** : → *connector 42*
3. **rectangular pulse** : → *pulse 77*
4. **rectangular waveguide** : → *waveguide 11*

rectification

1. **(electronic)(power) rectification** : electronic conversion from a.c. to d.c. ★ redressement (électronique) (de puissance) → *redressement 5.* R (электронное)(силовое) выпрямление. D Gleichrichten. E rectificación (electrónica)(de potencia). I raddrizzamento (elettronico) (di potenza). N gelijkrichting. P prostowanie elektroniczne. S likriktning. (551)
2. **rectification effect** : → *effect 66*
3. **rectification factor** : → *factor 150*

rectified

1. **rectified (mean) value** : → *value 48*

rectifier

1. **controlled rectifier** : a rectifier provided with an element, such as a gate or grid, to which a control voltage may be applied to regulate or prevent the passage of current. ★ redresseur commandé → *redresseur 12.* R управляемый выпрямитель. D gesteuerter Gleichrichter. E rectificador controlado. I raddrizzatore controllato. N gestuurde gelijkrichter. P prostownik sterowany. S styrd likriktare. (811)
2. **mercury-arc rectifier (equipment)** : a rectifier using mercury-arc valves. ★ redresseur à vapeur de mercure → *redresseur 11.* R ртутный выпрямитель. D Quecksilberdampfgleichrichter. E rectificador de vapor de mercurio. I raddrizzatore a vapore di mercurio. N kwikdampgelijkrichter. P prostownik rtęciowy. S kvicksilverlikriktare. (811)
3. **pool rectifier tube** : → *tube 67*
4. **rectifier** : an electric energy transducer that converts alternating current to unidirectional current. ★ redresseur → *redresseur 8.* R выпрямитель. D Gleichrichter. E rectificador. I raddrizzatore. N gelijkrichter; motorgenerator. P prostownik. S likriktare. (151,551,811,881)
5. **rectifier connection** : → *connection 46*
6. **rectifier instrument** : → *instrument 28*
7. **rectifier substation** : → *substation 22*
8. **rectifier tube** : → *tube 71*
9. **ripple harmonics of a rectifier** : → *harmonic 18*
10. **semi-conductor rectifier** : a rectifier comprising elements made from semiconductors such as silicon diodes. ★ redresseur à semiconducteurs → *redresseur 10.* R полупроводниковый выпрямитель. D Halbleitergleichrichter. E rectificador de semiconductores. I raddrizzatore a semiconduttori. N halfgeleidergelijkrichter. P prostownik półprzewodnikowy. S halvledarlikriktare. (811)
11. **semiconductor rectifier diode** : → *diode 19*
12. **single-phase bridge (rectifier)** : → *bridge 16*
13. **solid-state rectifier** : a rectifier using the unidirectional conductivity of semi-conducting materials. ★ redresseur à semi-conducteur → *redresseur 9.* R полупроводниковый выпрямитель. D Halbleiter-Gleichrichter. E rectificador semiconductor. I rettificatore a stato solido. N vastestofgelijkrichter. P prostownik półprzewodnikowy. S halvledarlikriktare. (881)
14. **three-phase bridge (rectifier)** : → *bridge 20*

rectifying

1. **rectifying valve** : → *valve 9*

recuperative

1. **recuperative heat** : → *heat 18*

recurrent

1. **recurrent disturbance** (*Syn.* recurrent (impulsive) noise) : → *noise 68*
2. **recurrent (impulsive) noise** : → *noise 68*

redirection

1. **call redirection** : a facility that permits a call to be redirected to a previously nominated alternative destination upon the request of the called subscriber with advice by a service signal to the calling terminal. ★ renvoi d'appel → *renvoi 1.* R перенаправление вызовов. D Anrufweiterleitung. E reenvío de llamada. I trasferimento di chiamata. N oproep-omrouteering. P przekierowanie wywołania. S alternativ anropsadress. (721)
2. **redirection address** : → *address 13*

reduced

1. **reduced carrier** : → *carrier 28*
2. **reduced utilance** : → *utilance 1*
3. **reduced utilization factor** : → *factor 151*

reduced-power

1. **reduced-power tapping** : → *tapping 10*

reducing

1. **hazard reducing device** : → *device 29*
2. **impact-sound reducing material** : → *material 19*
3. **reducing atmosphere** : → *atmosphere 13*
4. **voltage reducing device** : → *device 59*

reduction

1. **bit-rate reduction** (of a video signal) : the processing of a digital video signal, to achieve a reduction in the bit rate whilst maintaining acceptable picture quality. ★ compression de débit (numérique) → *compression 3.* R сокращение цифрового потока. (723)
2. **(electrochemical) reduction** (*Syn.* cathodic reaction) : → *reaction 3*
3. **frequency reduction** : a prolonged reduction in the system frequency generally due to overload. ★ baisse de fréquence → *baisse 1.* R снижение частоты. D Frequenzabsenkung. E bajada de frecuencia. I abbassamento di frequenza. N frequentieverlaging. P obniżenie częstotliwości. S frekvenssänkning. (604)
4. **molar reduction heat** : → *heat 16*
5. **reduction** : a reaction adding electrons to atoms, molecules or ions. ★ réduction → *réduction 6.* R восстаиовление. D Reduktion. E reducción. I riduzione. N reductie. P redukcja. S reduktion. (111)
6. **sound reduction index** : → *index 40*
7. **voltage reduction** : a relatively small decrease in the system operating voltage. ★ baisse de tension → *baisse 3.* R снижение напряжения. D Spannungsrückgang. E bajada de tensión. I abbassamento di tensione. N spanningsverlaging. P obniżka napięcia. S spänningssänkning. (604)
8. **wavelength reduction factor** : → *factor 188*

redundancy

1. **active redundancy** : that redundancy wherein all means for performing a required function are intended to operate

simultaneously. ★ redondance active → *redondance 3.* R параллельное резервирование. D funktionsbeteiligte Redundanz. E redundancia activa. I ridondanza attiva. N actieve redundantie. P redundancja czynna. S aktiv redundans. (191)

2. **redundancy** : in an item, the existence of more than one means for performing a required function. ★ redondance → *redondance 2.* R резерв ; резервирование. D Redundanz. E redundancia. I ridondanza. N redundantie. P redundancja. S redundans. (191)
3. **redundancy factor** : → *factor 152*
4. **standby redundancy** : that redundancy wherein a part of the means for performing a required function is intended to operate, while the remaining part(s) of the means are inoperative until needed. ★ redondance en attente → *redondance 4.* R резервирование замещением. D nicht funktionsbeteiligte Redundanz. E redundancia pasiva; redundancia de reserva. I ridondanza in attesa. N parate redundantie. P redundancja rezerwowa. S passiv redundans. (191)

redundant

1. **double lacing redundant support** (*Syn.* double warren redundant support) : → *support 8*
2. **double warren redundant support** : → *support 8*
3. **redundant bracings** : → *bracing 5*
4. **redundant code** : → *code 46*
5. **redundant digital signal** : → *signal 156*
6. **redundant line code** : → *code 47*

reed

1. **reed contact** : → *contact 99*
2. **vibrating reed instrument** : → *instrument 34*

reel

1. **wire reel** (*Syn.* wire spool) : a carrier for a coil of filler wire. ★ unité de dévidage → *unité 18.* R кассета для проволоки. D Drahtspule. E devanadera. I rocchetto di filo; bobina di filo. N draadhaspel. P bęben do drutu spawalniczego. S trådbobin. (851)

reel-to-reel

1. **reel-to-reel recording/reproducing equipment** : → *equipment 60*

re-enterable

1. **re-enterable** (*Syn.* re-entrant) : → *re-entrant 1*

re-entrant

1. **re-entrant** (*Syn.* re-enterable) : qualifies a program, a routine or a subroutine that may be entered repeatedly and may be entered before prior executions of the same program, routine or subroutine have been completed, subject to the requirement that neither its external program parameters nor any instructions are modified during its execution. ★ rentrant → *rentrant 1.* R абсолютная, повторно вводимая (программа). D ablaufinvariant; wiederverwendbar. E reentrante. I programma rientrante; programme ad accesso ripetuto. N herbetreedbaar. P (program) wtrącony. S multikörbart. (714)
2. **re-entrant trunking** : → *trunking 3*

reference

1. **(american) reference volume** : → *volume 1*
2. **articulation reference equivalent** : → *equivalent 1*
3. **average reference surface diameter** : → *diameter 4*
4. **colour (reference) burst** : → *burst 9*
5. **core/reference surface concentricity error** : → *error 18*
6. **corrected reference equivalent** : → *equivalent 6*
7. **crosstalk reference equivalent** : → *equivalent 7*
8. **echo reference equivalent** : → *equivalent 12*
9. **european master reference for telephone transmission** (*Syn.* SFERT (abbreviation)) : a fundamental reference system of the CCITT now replaced by the new fundamental system for the determination of reference equivalents or NOSFER. *Notes. 1* — The values of reference equivalent previously determined with the SFERT remain valid. *2* — The SFERT is described in the pages 27 to 43 of the Volume IV of the CCIF Green Book, 1956. ★ système fondamental européen de référence pour la transmission téléphonique → *système 111.* R европейская основная эталонная система телефонного соединения, SFERT. D SFERT. E sistema fundamental europeo de referencia para la transmisión; SFERT (abreviación). I sistema campione europeo di riferimento per la trasmissione telefonica. N SFERT. P podstawowy europejski układ odniesienia dla transmisji telefonicznej; SFERT. S SFERT. (722)
10. **fundamental reference system of the CCITT** : → *system 74*
11. **ground (reference) plane** : → *plane 5*
12. **group reference pilot** : → *pilot 2*
13. **hypothetical reference connection** : → *connection 29*
14. **hypothetical reference connection** : → *connection 30*
15. **insertion reference signal** (*Syn.* insertion test signal) : → *signal 108*
16. **intermediate reference system** : → *system 93*
17. **modulation with a fixed reference** : → *modulation 41*
18. **new fondamental system for the determination of reference equivalents** : → *system 124*
19. **non circularity of reference surface** : → *circularity 3*
20. **objective reference equivalent meter** : → *meter 36*
21. **PCM digital reference sequence** : → *sequence 8*
22. **primary system for the determination of reference equivalents** : → *system 156*
23. **receiving reference equivalent** : → *equivalent 58*
24. **reference apparatus for the determination of transmission performance ratings** : → *apparatus 13*
25. **reference atmosphere for refraction** : → *atmosphere 14*
26. **reference axis** (*Syn.* principal axis) : → *axis 9*
27. **reference ballast** : → *ballast 3*
28. **reference boresight** : → *boresight 3*
29. **reference clock** : → *clock 3*
30. **reference colour stimuli** : → *stimulus 12*
31. **reference conditions** : → *condition 21*
32. **reference conditions of influencing quantities and factors** : → *condition 22*
33. **reference consistency** : → *consistency 2*
34. **reference data** : → *data 29*
35. **reference edge** : → *edge 7*
36. **reference electrode** : → *electrode 78*
37. **reference equivalent** : → *equivalent 59*
38. **reference illuminant** : → *illuminant 6*
39. **reference impedance** : → *impedance 48*
40. **reference lamp** : → *lamp 52*
41. **reference level** : → *level 77*
42. **reference lighting** : → *lighting 26*
43. **reference limiting error** : → *error 50*
44. **reference mean error** : → *error 51*
45. **reference node** : → *node 12*
46. **reference pilot** : → *pilot 15*
47. **reference plane** : → *plane 18*
48. **reference point** : → *point 40*
49. **reference range** : → *range 62*
50. **reference sound pressure** : → *sound pressure 10*
51. **reference source** : → *source 26*
52. **reference speech power for the measurement of AEN** : → *power 164*
53. **reference speech power for the NOSFER** (*Syn.* normal speech power for voice-ear measurements) : → *power 93*
54. **reference standard** : → *standard 18*
55. **reference surface** : → *surface 18*
56. **reference surface** : → *surface 19*
57. **reference surface centre** : → *centre 18*
58. **reference surface diameter** : → *diameter 15*
59. **reference surface diameter tolerance** : → *tolerance 13*
60. **reference surface tolerance field** : → *field 55*
61. **reference system for the determination of AEN** : → *system 169*
62. **reference tape** : → *tape 10*
63. **reference temperature** : → *temperature 43*
64. **reference test method** : → *method 17*

65. **reference usable field strength** (*Syn.* nominal usable field strength) : → *field strength 10*
66. **reference value** : → *value 49*
67. **reference value of an influencing factor** : → *value 50*
68. **reference value of an influencing quantity** : → *value 51*
69. **reference variable** : → *variable 6*
70. **reference white** : → *white 6*
71. **reference-value method** : → *method 18*
72. **sending reference equivalent** : → *equivalent 64*
73. **sidetone reference equivalent** : → *equivalent 65*
74. **voltage reference diode** : → *diode 27*
75. **voltage reference tube** : → *tube 96*
76. **zero phase reference** : the positive direction of the axis of the Usignal, in the PAL colour television system. ★ référence de phase zéro → *référence 58.* R опорная нулевая фаза. (723)

refill-unit

1. **refill-unit** : a set of replacement parts intended to restore a fuse-link to its original condition after an operation. ★ recharge → *recharge 1.* R запасные детали. D Reparatur-Satz. E recarga. I unità di ricarica. N vulling. P komplet wymienny wkładki bezpiecznikowej. S ersättningsenhet. (441)

refining

1. **alloying and refining time** : → *time 6*
2. **non-consumable electrode refining arc furnace** : → *arc furnace 39*
3. **refining slag** : → *slag 1*
4. **zone melting and refining** : → *melting 14*
5. **zone refining** : the passing of one or more molten zones along a semiconductor crystal for the purpose of reducing the impurity concentration in the crystal. ★ purification par zone → *purification 1.* R зонная очистка. D Zonenreinigen. E purificación por zona. I purificazione a zone. N zuivering door zonesmelting. P oczyszczanie strefowe. S zonrening. (521)

reflectance

1. **diffuse reflectance** (ρ_d) : ratio of the diffusely reflected part of the (whole) reflected flux, to the incident flux.Unit: 1 *Notes. 1* — $\rho = \rho_r + \rho_d$. *2* — The results of the measurements of ρ_r and ρ_d depend on the instruments and the measuring techniques used. ★ facteur de réflexion diffuse → *facteur 136.* R коэффициент диффузного отражения. D Grad der gestreuten Reflexion. E reflectancia difusa. I fattore di riflessione diffusa. N diffuse reflectiefactor. P współczynnik odbicia rozproszonego. S diffus reflektans. (845)
2. **reflectance** (*Syn.* power reflection factor) : → *factor 136*
3. **reflectance** (*Syn.* power reflection coefficient) : → *coefficient 45*
4. **reflectance** (for incident radiation of given spectral composition, polarization and geometrical distribution) (ρ) : ratio of the reflected radiant or luminous flux to the incident flux in the given conditions.Unit: 1. ★ facteur de réflexion → *facteur 131.* R коэффициент отражения (для падающего излучения данного спектрального состава, поляризации и геометрического распределения). D Reflexionsgrad (für auftreffende Strahlung mit gegebener spektraler Verteilung, Polarisation und geometrischer Verteilung). E reflectancia. I fattore di riflessione. N reflectiefactor. P współczynnik odbicia. S reflektans; reflexionsfaktor. (845)
5. **reflectance density** : → *density 25*
6. **reflectance factor** : → *factor 155*
7. **reflectance factor (optical) density** : → *density 26*
8. **reflectance (optical) density** : → *density 27*
9. **regular reflectance** (ρ_r) : ratio of the regularly reflected part of the (whole) reflected flux, to the incident flux.Unit : 1. ★ facteur de réflexion régulière → *facteur 142.* R коэффициент зеркального отражения. D Grad der gerichteten Reflexion. E reflectancia regular. I fattore di riflessione regolare. N spiegelreflectiefactor. P współczynnik odbicia kierunkowego. S reguljär reflektans. (845)

reflected

1. **externally reflected component of daylight factor** : → *component 23*
2. **internally reflected component of daylight factor** : → *component 34*
3. **reflected current** : → *current 166*
4. **reflected (global) solar radiation** : → *radiation 103*
5. **reflected wave** : → *wave 46*
6. **reflected wave** : → *wave 47*

reflecting

1. **perfect reflecting diffuser** : → *diffuser 3*
2. **reflecting satellite** : → *satellite 7*
3. **reflecting surface** (*Syn.* reflector) : → *reflector 19*

reflection

1. **(amplitude) reflection factor** : → *factor 8*
2. **(amplitude) reflection factor** : → *factor 9*
3. **(complex) reflection factor** : → *factor 23*
4. **diffuse reflection** : reflection of a wave when the sizes of irregularities of the surface are not negligible. *Note.* — Diffuse reflection may be considered as specular reflection accompanied by scattering due to surface irregularities. ★ réflexion diffuse → *réflexion 29.* D diffuse Reflexion. P odbicie rozproszone. (705)
5. **diffuse reflection** : diffusion by reflection in which, on the macroscopic scale, there is no regular reflection. ★ réflexion diffuse → *réflexion 30.* R диффузное отражение. D gestreute Reflexion; diffuse Reflexion. E reflexión difusa. I riflessione diffusa. N diffuse reflectie. P odbicie rozproszone. S diffus reflexion. (845)
6. **Fresnel reflection** : the reflection of a portion of the light incident on a planar interface between two homogeneous media having different refractive indices. ★ réflexion de Fresnel → *réflexion 28.* R отражение Френеля. D Fresnel-Reflexion. E reflexión de Fresnel. I riflessione di Fresnel. N Fresnel-terugkaatsing. P odbicie Fresnela. S fresnelreflexion. (731)
7. **Fresnel reflection factor** : → *factor 82*
8. **Fresnel reflection method** : → *method 8*
9. **glare by reflection** : → *glare 5*
10. **ionospheric reflection** : ionospheric propagation at a sufficiently low frequency that, for given conditions, trans-ionospheric propagation is not possible ; the radio wave is then subject to progressive refraction which, when considered fro a sufficiently large distance may be considered as equivalent to reflection from a hypothetical surface. ★ réflexion ionosphérique → *réflexion 33.* D (Ausbreitung infolge von) ionosphärische(r) Reflexion. P propagacja jonosferyczna odbiciowa. (705)
11. **isotropic diffuse reflection** : diffuse reflection in which the spatial distribution of the reflected radiation is such that the radiance or luminance is the same in all directions in the hemisphere into which the radiation is reflected. ★ réflexion diffuse isotrope → *réflexion 31.* R изотропное диффузное отражение. D vollkommen gestreute Reflexion; isotrope diffuse Reflexion. E reflexión difusa isótropa. I riflessione diffusa isotropa. N isotrope diffuse reflectie. P odbicie rozproszone równokierunkowe. S likformigt diffus reflexion. (845)
12. **M reflection** (*Syn.* M path) : a propagation path with a single hop, schematically represented by ionospheric reflection from the F region, reflection from the upper side of a lower layer, generally in the E region, and another reflection from the F region. *Example :* An M path may be represented by a notation such as F, E, F or F -E + F. ★ trajet en M → *trajet 8.* D M-Reflektion; M-Weg. P odbicie M; droga M. (705)
13. **mixed reflection** : partly regular and partly diffuse reflection. ★ réflexion mixte → *réflexion 34.* R смешанное отражение. D gemischte Reflexion. E reflexión mixta. I riflessione mista; riflessione semidiffusa; riflessione semiregolare. N gemengde reflectie. P odbicie kierunkowo-rozproszone, S blandad reflexion. (845)
14. **(complex) reflection coefficient** (*Syn.* (complex) reflection factor) : → *factor 23*
15. **modulus of the reflection coefficient** : → *modulus 3*
16. **power reflection coefficient** : → *coefficient 45*
17. **power reflection factor** : → *factor 136*
18. **power reflection factor** : → *factor 137*
19. **reflection** : the change in direction of an incident wave at an interface between two dissimilar media so that the wave returns partially or totally into the medium from which it originated.

★ réflexion → *réflexion 25.* R отражение. D Reflexion. E reflexión. I riflessione. N reflectie; terugkaatsing. P odbicie. S reflexion. (731)

20. **reflection** : process by which radiation is returned by a surface or a medium, without change of frequency of its monochromatic components. *Notes. 1* — Part of the radiation falling on a medium is reflected at the surface of the medium (surface reflection) ; another part may be scattered back from the interior of the medium (volume reflection). *2* — The frequency is unchanged only if there is no Doppler effect due to the motion of the materials from which the radiation is returned. ★ réflexion → *réflexion 26.* R отражение. D Reflexion. E reflexión. I riflessione. N reflectie; terugkaatsing. P odbicie. S reflexion. (705,841,845)
21. **reflection loss** : → *loss 81*
22. **reflection mode filter** : → *filter 34*
23. **reflection target** : → *target 1*
24. **regular reflection** (*Syn.* specular reflection) : → *reflection 28*
25. **regular reflection** (*Syn.* specular reflection) : reflection in accordance with the laws of geometrical optics, without diffusion. ★ réflexion régulière → *réflexion 36.* R зеркальное отражение. D gerichtete Reflexion. E reflexión regular. I riflessione regolare; riflessione speculare. N spiegelende reflectie. P odbicie kierunkowe. S reguljär reflexion. (845)
26. **sound (power) reflection coefficient** : → *coefficient 58*
27. **sound pressure reflection coefficient** : → *coefficient 59*
28. **specular reflection** (*Syn.* regular reflection) : reflection of a wave when the sizes of irregularities of the surface are negligible. ★ réflexion (spéculaire) → *réflexion 39.* D (ordentliche) Reflexion; Spiegelreflexion; gerichtete Reflexion. P odbicie normalne; odbicie zwierciadlane. (705)
29. **specular reflection** : phenomenon by which a sound wave is returned from a surface separating two media, at an angle to the normal equal to the angle of incidence. ★ réflexion acoustique → *réflexion 27.* R зеркальное отражение. D Reflexion. E reflexión acústica. I riflessione acustica. N terugkaatsing. P odbicie. S reflexion. (801)
30. **specular reflection** (*Syn.* regular reflection) : → *reflection 25*
31. **total reflection** : reflection for which the modulus of the reflection factor of a specular surface separating two dielectric media is unity. *Notes. 1* — Total reflection occurs when the refractive index of the second medium is less than that of the first and the angle of incidence is greater than a critical value. *2* — When total reflection occurs, there is an evanescent field in the second medium. ★ réflexion totale → *réflexion 41.* D Totalreflexion. P odbicie całkowite. (705)
32. **total reflection** : the total reflection that occurs when light strikes an interface at angles of incidence, with respect to the normal, greater than the critical angle. ★ réflexion totale → *réflexion 42.* R полное отражение; полное внутреннее отражение. D Totalreflexion. E reflexión total. I riflessione totale. N totale reflectie; totale inwendige reflectie. P odbicie całkowite wewnętrzne. S totalreflexion. (731)
33. **veiling reflections** : specular reflections that appear on the object viewed and that partially or wholly obscure the details by reducing contrast. ★ réflexions-voile → *réflexions-voile 1.* R отражения вуали. D Schleierreflexionen. E reflejos velantes. I riflessioni di velo. N verblindende reflecties. P olśnienie dekontrastujące. S slöjreflexer. (845)

reflective

1. **reflective array antenna** : → *antenna 95*

reflectivity

1. **radar reflectivity factor** : → *factor 146*
2. **reflectivity** (of a material) ((ρ_∞)) : reflectance of a layer of the material of such a thickness that there is no change of reflectance with increase in thickness.Unit : 1. ★ réflectivité → *réflectivité 2.* R коэффициент отражения толстого слоя (вещества). D Eigenreflexionsgrad (eines Materials). E reflectividad. I ..... N reflectiviteit. P odbijalność. S reflektivitet. (845)

reflectometer

1. **reflectometer** : an instrument for the measurement of the ratio of some quantity of a reflected wave to the corresponding quantity of the incident wave in a transmission line. ★ réflectomètre → *réflectomètre 1.* R рефлектометр. D Reflektometer. E reflectómetro; ecómetro. I riflettometro. N reflectiemeter. P reflektometr. S reflektometer. (726)
2. **reflectometer** : instrument for measuring quantities pertaining to reflection. ★ réflectomètre → *réflectomètre 2.* R рефлектрометр. D Reflektometer. E reflectómetro. I riflettometro. N reflectiemeter. P reflektometr. S reflektometer; reflexionsmätare. (845)
3. **reflectometer value** : → *value 53*

reflectometry

1. **optical time domain reflectometry** (*Syn.* OTDR (abbreviation); backscattering technique) : a technique for characterizing an optical fibre whereby an optical pulse is transmitted through the optical fibre and the optical power of the resulting light scattered and reflected back to the input is measured as a function of time. *Note.* — Useful in estimating attenuation coefficient for uniform fibres, and identifying and localising defects and localised losses. ★ technique de rétrodiffusion → *rétrodiffusion 10.* R рефлектометрия оптической временной области; метод обратного рассеяния. D LWL-Laufzeit-Reflexionsmessung; Rückstreutechnik; OTDR (Abkürzung). E reflectómetro óptico en el dominio del tiempo; OTDR (abreviatura); método de la retrodispersión. I riflettometria ottica nel dominio del tempo; OTDR (abbreviazione); tecnica della retrodiffusione. N optische tijddomein-reflectometrie; terugverstrooiingstechniek. P metoda rozproszenia wstecznego; metoda OTDR. S återspridningsteknik. (731)

reflector

1. **Cassegrain reflector antenna** : → *antenna 26*
2. **corner reflector antenna** : → *antenna 35*
3. **cylindrical reflector** : a reflector which is a portion of the surface of a cylinder. ★ réflecteur cylindrique → *réflecteur 17.* R цилиндрический рефлектор. D Zylinderreflektor. E reflector cilíndrico. I riflettore cilindrico. N cilindrische reflector. P reflektor cylindryczny. S cylindrisk reflektor. (712)
4. **dihedral corner reflector** : a reflector composed of two mutually intersecting flat conductive surfaces, generally at right angles. ★ réflecteur en dièdre → *réflecteur 22.* R двугранный уголковый рефлектор. D Zweiflächen-Winkelreflektor. E reflector dihédrico. I riflettore a diedro. N tweevlakshoekreflector. P reflektor kątowy dwuścienny. S vinkelreflektor. (712)
5. **focusing reflector** : a reflector whose shape is such that when it is fed from one or more primary radiators the reflected energy is focused to a given point or a given direction. ★ réflecteur focalisant → *réflecteur 25.* R фокусирующий рефлектор. D bündelnder Reflektor; fokussierender Reflektor. E reflector focalizador. I riflettore focalizzato. N focusserende reflector. P reflektor ogniskujący. S fokuserande reflektor. (712)
6. **gregorian reflector antenna** : → *antenna 57*
7. **horn reflector** (antenna) : an antenna consisting of a part of a paraboloidal reflector fed with an off-set horn which physically intersects the reflector, part of the wall of the horn being removed to form the antenna aperture. *Note.* — The horn is usually either pyramidal or conical, with an axis perpendicular to that of the paraboloid. ★ cornet à réflecteur → *cornet 7.* R рефлекторная рупорная антенна. D Hornreflektor; Hornreflektorantenne. E bocina reflectora (antena). I trombetta a riflettore. N hoornreflector (antenne). P antena rożkowa z reflektorem paraboidalnym. S hornreflektorantenn. (712)
8. **infra-red emitter reflector** : a surface which enables the emitter to concentrate infra-red energy on the charge. ★ réflecteur de l'émetteur infrarouge → *réflecteur 18.* R отражатель инфракрасного излучателя. D Reflektor des Infrarotstrahlers. E reflector de infrarrojos. I riflettore dell'emettitore a raggi infrarossi. N reflector voor infraroodstraler. P odbłyśnik grzejników promiennikowych. S reflektor för infrastrålare. (841)
9. **Lambertian reflector** : a reflector, the radiance from which is reflected angularly according to Lambert's cosine law. ★ réflecteur lambertien → *réflecteur 27.* R рефлектор Ламберта. D Lambertscher Reflektor. E reflector lambertiano. I riflettore lambertiano. N reflector van Lambert; Lambertreflector. P odbłyśnik lambertowski. S Lambert-reflektor. (731)
10. **lattice reflector** : a reflector composed of parallel reflecting rods or strips. ★ réflecteur grille → *réflecteur 26.*

R решетчатый рефлектор. D Gitterreflektor. E reflector de rejilla. I riflettore a griglia. N roosterreflector. P reflektor kratowy. S gallerreflektor. (712)

11. **main reflector** : the largest reflector of a multiple reflector antenna. ★ réflecteur principal → *réflecteur 29.* R главный рефлектор. D Hauptreflektor. E reflector principal. I riflettore principale. N hoofdreflector. P reflektor główny. S huvudreflektor. (712)
12. **off-set paraboloidal reflector antenna** : → *antenna 83*
13. **parabolic torus reflector** : a reflector formed by rotating a segment of a parabola about a non-intersecting coplanar line perpendicular to its axis. ★ réflecteur en tore parabolique → *réflecteur 23.* R параболический тороидальный рефлектор. D Parabolringreflektor; Parabol-Toroid-Reflektor. E reflector en toro parabólico. I riflettore a toro parabolico. N parabolische toroïdreflector (ringreflector). P reflektor torusowy paraboidalny. S parabolisk toroidreflektor. (712)
14. **paraboloidal reflector** : a reflector which is a portion of the surface of a paraboloid, generally of revolution. ★ réflecteur parabolique → *réflecteur 28.* R параболоидальный рефлектор. D Paraboloidreflektor. E reflector parabólico. I riflettore parabolico. N parabolische reflector. P reflektor paraboidalny. S parabolisk reflektor; parabol. (712)
15. **paraboloidal reflector antenna** : → *antenna 86*
16. **passive reflector** : a reflector, generally not part of an antenna, designed to divert the incident radiation into a desired direction. ★ réflecteur déviateur → *réflecteur 19.* R пассивный рефлектор. D passiver Reflektor. E reflector pasivo. I riflettore passivo. N passieve reflector; spiegel. P reflektor pasywny. S fri reflektor. (712)
17. **reactive reflector antenna** (*Syn.* reflective array antenna) : → *antenna 95*
18. **reflector** (in a reactor) : a material or a body of material which reflects incident radiation. In nuclear reactor technology, this term is usually restricted to designate a part of a reactor placed adjacent to the core for the purpose of returning some of the escaping neutrons back into the core by scattering collisions. ★ réflecteur → *réflecteur 14.* D Reflektor. E reflector. I riflettore. N reflector. P reflektor. S reflektor. (026)
19. **reflector** (*Syn.* reflecting surface) : a conductive surface or conductive assembly which acts as a practically continuous surface, whose dimensions are large compared to the wavelength, used to reinforce or divert the incident radiation in desired directions. *Note.* — The term "reflector" may be used also for a reflector element. ★ réflecteur → *réflecteur 15.* R рефлектор; рефлекторная поверхность. D Reflektor; Reflektorfläche. E reflector; superficie reflectora. I riflettore; superficie riflettente. N reflector. P reflektor; powierzchnia odbijająca. S reflektor. (712)
20. **reflector** : device used to alter the spatial distribution of the luminous flux from a source and depending essentially on the phenomenon of reflection. ★ réflecteur → *réflecteur 16.* R отражатель. D Reflektor. E reflector. I riflettore. N reflector. P odbłyśnik. S reflektor. (845)
21. **reflector antenna** : → *antenna 96*
22. **reflector control** : → *control 155*
23. **reflector (element)** (of an antenna) : a radiating element generally located to the rear of one or more driven elements with respect to the desired direction of radiation, so as to increase radiation in that direction and to reduce it in other directions. *Note.* — The term "reflector" may be used also for a reflecting surface. ★ (élément) réflecteur → *réflecteur 11.* R рефлектор (антенны); рефлекторный элемент (антенны). D Reflektor (-Element) (einer Antenne). E elemento reflector (de una antena). I (elemento) riflettore. N reflectorelement (van een antenne). P reflektor (element) antenowy. S reflektor. (712)
24. **reflector infra-red lamp** : → *lamp 53*
25. **reflector lamp** : → *lamp 54*
26. **reflector spotlight** : → *spotlight 4*
27. **spherical reflector** : a reflector which is a portion of the surface of a sphere. ★ réflecteur sphérique → *réflecteur 31.* R оферический рефлектор. D sphärischer Reflektor. E reflector esférico. I riflettore sferico. N bolvormige reflector. P reflektor sferyczny. S sfärisk reflektor. (712)
28. **spherical reflector antenna** : → *antenna 108*
29. **toroidal reflector** : a reflector formed by rotating a plane curve about a non-intersecting coplanar line. ★ réflecteur toroïdal → *réflecteur 32.* R тороидальный рефлектор. D Ringreflektor; Toroid-Reflektor. E reflector toroidal. I riflettore toroidale. N toroïdale reflector. P reflektor toroidalny. S toroidreflektor. (712)
30. **total reflector current** : → *current 212*
31. **trihedral corner reflector** : a reflector composed of three mutually intersecting flat conductive surfaces, generally at right angle. ★ réflecteur en trièdre → *réflecteur 24.* R трехгранный уголковый рефлектор. D Dreiflächen-Winkelreflektor. E reflector trihédrico. I riflettore a triedro. N drievlakshoekreflector. P reflektor kątowy trójścienny. S hörnreflektor. (712)
32. **umbrella reflector antenna** : → *antenna 120*

reflectorized

1. **reflectorized bulb** : → *bulb 11*

reflex

1. **reflex klystron** : → *klystron 5*

refracted

1. **refracted near-field method** : → *method 19*
2. **refracted ray** : → *ray 21*
3. **refracted ray method** (*Syn.* refracted near-field method) : → *method 19*
4. **refracted wave** : → *wave 48*

refraction

1. **magneto-ionic double refraction** : the division into two separate waves of a radio wave propagating within the ionosphere as a result of the Earth's magnetic field making the medium birefringent. ★ dédoublement magnéto-ionique → *dédoublement 1.* D magneto-ionische Doppelbrechung. P załamanie podwójne magnetojonowe. (705)
2. **reference atmosphere for refraction** : → *atmosphere 14*
3. **refraction** : the bending of a beam of light in transmission through an interface between two dissimilar media or in a medium whose refractive index is a continuous function of position, for example graded index medium. ★ réfraction → *réfraction 10.* R преломление. D Brechung. E refracción. I rifrazione. N breking. P załamanie. S refraktion; brytning. (731)
4. **refraction** : phenomenon by which the direction of propagation of a sound wave is changed due to spatial variation in the speed of sound. ★ réfraction acoustique → *réfraction 12.* R акустическая рефракция. D Refraktion; Brechung. E refracción acústica. I rifrazione acustica. N breking. P refrakoja; załamanie. S refraktion; brytning. (801)
5. **refraction** : process by which the direction of a radiation is changed as a result of changes in its velocity of propagation in passing through an optically non-homogeneous medium, or in crossing a surface separating different media. ★ réfraction → *réfraction 11.* R преломление. D Brechung. E refracción. I rifrazione. N breking. P załamanie. S refraktion; brytning. (705,845)
6. **refraction loss** : → *loss 82*
7. **standard refraction** : the refraction which would occur in a standard radio atmosphere. ★ réfraction normale → *réfraction 13.* D Standard-Brechung. P załamanie standardowe. (705)

refractive

1. **complex refractive index** : → *index 7*
2. **complex refractive index** : → *index 8*
3. **ESI refractive index difference** : → *difference 17*
4. **four concentric circle refractive index template** : → *template 2*
5. **modified refractive index** : → *index 27*
6. **refractive index** : → *index 34*
7. **refractive index contrast** : → *contrast 14*
8. **refractive index profile** : → *profile 14*
9. **refractive modulus** : → *modulus 4*
10. **standard refractive modulus gradient** : → *gradient 6*

refractivity

1. **refractivity** (N) : one million times the amount by which the index of refraction in the atmosphere exceeds unity : $N = 10^6(n-1)$. ★ coïndice → *coïndice 1.* D Brechwert. P refraktywność. (705)

2. **standard refractivity gradient** : → *gradient 7*

refractor

1. **refractor** : device used to alter the spatial distribution of the luminous flux from a source and depending on the phenomenon of refraction. ★ réfracteur → *réfracteur 1.* R преломлятель. D Refraktor. E refractor. I rifrattore. N refractor. P refraktor. S refraktor. (845)

refractory

1. **arc furnace roof refractories** (*Syn.* crown roof) : refractories forming a rising domed roof structure, all contained in a roof ring. ★ réfractaires de voûte d'un four à arc → *réfractaire 3.* R огнеупоры свода дуговой печи. D Feuerfestmaterial des Lichtbogenofendeckels. E refractarios del abovedado de un horno de arco. I refrattario della volta di un forno ad arco. N plafondbekleding van een boogoven. P wykładzina sklepienia (pieca łukowego). S ugnsvalv. (841)
2. **refractory hot spot of an arc furnace** : → *spot 10*

refreshment

1. **refreshment time** (*Syn.* updating time) : → *time 222*

regenerated

1. **elementary regenerated section** (*Syn.* elementary regenerator section) : → *section 10*

regeneration

1. **pulse regeneration** : a process in which incoming pulses which may be distorted are used to control the generation of new pulses having timing, shape and magnitude close to those of the original pulses. ★ régénération d'impulsions → *régénération 4.* R регенерация импульсов. D Impulsregeneration. E regeneración de impulsos. I rigenerazione di impulsi. N pulsregeneratie. P regeneracja impulsów. S pulsåterbildning. (702)
2. **regeneration** (of a digital signal) : the process of receiving a digital signal and reconstructing it in a form in which the timing, waveforms, and amplitudes of the signal elements are constrained within specified limits. ★ régénération → *régénération 2.* R регенерация (цифрового сигнала). D Regeneration (eines Digitalsignals). E regeneración. I rigenerazione (di un segnale numerico). N regeneratie (van een digitaal signaal). P regeneracja (sygnału cyfrowego). S regenerering. (704)

regenerative

1. **optical regenerative repeater** : an optical repeater for receiving a digital signal and reconstructing it in a form in which the timing, waveforms and amplitudes of the signal elements are constrained within specified limits. ★ répéteur régénérateur optique → *répéteur 9.* R оптический регенерационный ретранслятор. D LWL-Zwischenverstärker. E repetidor regenerativo óptico. I ripetitore ottico di rigenerazione. N optisch regenererende versterker. P wzmacniak-regenerator optyczny. S optoregenerator. (731)
2. **regenerative arm** : → *arm 13*
3. **regenerative braking** : → *braking 36*
4. **regenerative braking** : → *braking 37*
5. **regenerative braking of a d.c. machine** : → *machine 22*
6. **regenerative repeater** : → *repeater 12*
7. **telegraph regenerative repeater** : → *repeater 18*

regenerator

1. **elementary regenerator section** : → *section 10*
2. **pulse regenerator** : a device used for pulse regeneration. ★ régénérateur d'impulsions → *régénérateur 3.* R импульсный регенератор. D Impulsregenerator. E regenerador de impulsos. I rigeneratore di impulsi. N pulsregenerator. P regenerator impulsów. S pulsregenerator. (702)
3. **regenerator** : a device which performs regeneration of a digital signal. ★ régénérateur → *régénérateur 1.* R регенератор. D Regenerator. E regenerador. I rigeneratore. N regenerator. P regenerator (sygnału cyfrowego). S regenerator. (704)
4. **synchronizing pulse regenerator** : equipment for regenerating the correct shape and amplitude of the synchronizing signals from a degraded video signal. ★ régénérateur de synchronisation → *régénérateur 2.* R регенератор синхронизирующих импульсов. (723)

region

1. **D region** : the lower part of the Earth's ionosphere lying approximately between 50 and 90 km in height. *Note.* — The electron density of the D region is very low during the night and is generally of the order of 10^8 to 10^9 electrons per cubic metre during the day. ★ région D → *région 1.* D D-Region. P rejon D (jonosfery); obszar D (jonosfery). (705)
2. **diffraction region** : a region on or near the ground, and beyond the radio horizon of a source of radio waves, within which the field is basically due to diffraction for most of the time. *Note.* — A diffraction region is a part of the shadow region for the source of radio waves under consideration. ★ zone de diffraction → *zone 30.* D Beugungszone. P strefa ugięciowa; strefa dyfrakcyjna. (705)
3. **E region** : that part of the Earth's ionosphere lying approximately between 90 and 130 km in height. *Note.* — The electron density of the E region is of the order of 10^{11} electrons per cubic metre during the day and 390^9 electrons per cubic metre during the night. ★ région E → *région 22.* D E-Region. P rejon E (jonosfery); obszar E (jonosfery). (705)
4. **F region** : that part of the Earth's ionosphere lying approximately beyond a height of 130 km. *Note.* — The electron density of the F region may exceed 10^{12} electrons per cubic metre at moderate latitudes during periods of high solar activity. ★ région F → *région 23.* D F-Region. P rejon F (jonosfery); obszar F (jonosfery). (705)
5. **far field region** : that region of the electromagnetic field of an antenna wherein the predominant components of the field are those which represent a propagation of energy and wherein the angular field distribution is essentially independent of the distance from the antenna. *Notes. 1* — In the far field region, all the components of the electromagnetic field decrease in inverse proportion to the distance from the antenna. *2* — For a broadside antenna having a maximum overall dimension D which is large compared to the wavelength λ, the far field region is commonly taken to exist at distances greater than $2D^2/\lambda$ from the antenna in the direction of maximum radiation. ★ (région de) champ lointain → *champ 72.* R дальняя зона. D Fernfeld. E región de campo lejano. I zona di campo lontano. N ver-veldgebied. P strefa pola dalekiego. S strålningszon. (712)
6. **far-field region** : the region far from a source or aperture where the radiation pattern does not vary with distance from the source. ★ région de champ lointain → *région 3.* R область дальнего поля. D Fernfeldgebiet. E región de campo lejano. I regione di campo lontano. N ver-veldgebied. P obszar pola dalekiego. S fjärrzon. (731)
7. **Fraunhofer region** : that region along the beam axis of a beam antenna, at each point of which, the phases of any specified field component emanating from all elements or sub-areas of the antenna may be considered to be in-phase with negligible error. ★ région de Fraunhofer → *région 9.* R зона Фраунгофера. D Fraunhofer-Bereich. E región de Fraunhofer. I zona di Fraunhofer. N Fraunhofergebied. P strefa Frauenhofera. S fjärrzon; fraunhoferzon. (712)
8. **Fresnel region** : the region or regions adjacent to the Fraunhofer region. *Note.* — The extent of the Fresnel region is dependent on the electrical size of the antenna. ★ région de Fresnel → *région 10.* R зона Френеля. D Fresnel-Bereich. E región de Fresnel. I zona di Fresnel. N Fresnel-gebied. P strefa Fresnela. S fresnelzon. (712)
9. **Geiger-Müller region** : the range of applied voltage of a counter tube in which the gas multiplication factor is much greater than one, the pulse amplitude being substantially independent of the total number of ion pairs initially produced in the sensitive volume as a result of an ionizing event. ★ région de Geiger-Müller → *région 11.* R область Гейгера-Мюллера. D Geiger-Müller-Bereich, Auslösebereich. E región de Geiger-Müller. I regione di Geiger-Müller. N Geigergebied. P zakres Geigera-Müllera. S Geiger-Müller-område. (391,531,881)
10. **induction field (region)** (*Syn.* reactive near field (region)) : → *near-field 8*
11. **interaction region** : a region in which interaction takes place between an impressed radiofrequency field and space-charge waves of an electron beam. ★ région d'interaction → *région 21.* R область взаимодействия. D Wechselwirkungsraum. E región de interacción. I regione di interazione. N wisselwerkingsgebied. P obszar oddziaływania. S område för växelverkan. (531)

12. **near-field region** : the region close to a source, or aperture where the radiation pattern varies with distance from the source. ★ région de champ proche → *région 4.* R область ближнего поля. D Nahfeldgebiet. E región de campo cercano. I regione di campo vicino. N nabij-veld-gebied. P obszar pola bliskiego. S närzon. (731)
13. **negative differential resistance region** : any portion of the voltage-current characteristic within which the differential resistance is negative. ★ région de résistance différentielle négative → *région 18.* R область отрицательного дифференциального сопротивления. D negativer differentieller Widerstandsbereich. E región de resistencia diferencial negativa. I regione a resistenza differenziale negativa. N gebied met negatieve differentiële weerstand. P obszar ujemnej rezystancji różniczkowej. S område med negativ differentiell resistans. (521)
14. **neutral region** : a region which is virtually electrically neutral, the negative charges of the electrons and of the ionized acceptor atoms balancing the positive charges of the holes and the ionized donor atoms. ★ région neutre → *région 24.* R нейтральная зона. D neutrale Zone. E región neutra. I regione neutra. N neutraal gebied. P obszar neutralny. S neutralt område. (521)
15. **proportional region** : the range of applied voltage of a counter tube in which the gas multiplication factor is greater than one and practically independent of the total number of ion pairs initially produced in the sensitive volume as a result of an ionizing event, the pulse amplitude being proportional to this number. ★ région de proportionnalité → *région 12.* R область пропорциональности. D Proportionalbereich. E región proporcional. I regione di proporzionalità. N proportionaliteitsgebied. P zakres proporcjonalności. S proportionalområde. (391,881)
16. **proportional region** : the range of applied voltages over which the charge collected per isolated count is proportional to the charge liberated by the initial ionizating event because the gas multiplication factor is greater than unity and independent of the charge liberated by the initial ionizing event. ★ région de proportionnalité → *région 13.* R область пропорциональности. D Proportionalbereich. E región de proporcionalidad. I regione di proporzionalità. N evenredigheidsgebied. P zakres proporcjonalności. S proportionellt område. (531)
17. **radiating near field (region)** : → *near-field 7*
18. **Rayleigh region** : in a graphic representation of the relation between the magnetic flux density and the magnetic field strength relation in a material, a region near the origin within which the flux density can be described by a quadratic function of the field strength:

$$\frac{B}{\mu_0} = (\mu_i + \nu \hat{H})\, H \pm \frac{\nu}{2}(\hat{H}^2 - H^2)$$

where B is the magnetic flux density, μ_0 is the magnetic constant μ_i is the initial permeability, H is the magnetic field strength, $\hat{H}$ is the peak value of H and ν is the Rayleigh hysteresis coefficient. ★ domaine de Rayleigh → *domaine 9.* R область Релея. D Rayleighgebiet. E dominio de Rayleigh; región de Rayleigh; campo de Rayleigh. I campo di Rayleigh. N Rayleighgebied. P obszar Rayleigha. S Rayleighområde. (221)
19. **reactive near field (region)** : → *near-field 8*
20. **region of limited proportionality** : the range of applied voltage of a counter tube, between the Geiger-Müller region and the proportional region, in which the gas multiplication factor is dependent on the total number of ion pairs initially produced in the sensitive volume as a result of an ionizing event, and on the applied voltage. ★ région de proportionnalité limitée → *région 14.* R область ограниченной пропорциональности. D begrenzter Proportionalbereich; Auslösebereich. E región proporcional limitada. I regione di proporzionalità limitata. N gebied van de beperkte evenredigheid. P obszar proporcjonalności ograniczonej. S område för begränsad proportionalitet. (391)
21. **region of limited proportionality** : the range of applied voltages over which the charge collected per isolated count depends on the charge liberated by the initial ionizing event because the gas multiplication factor depends upon the charge liberated by the initial ionizing event. ★ région de proportionnalité limitée → *région 15.* R область ограниченной пропорциональности. D Bereich eingeschränkter Proportionalität. E región de proporcionalidad limitada. I regione di proporzionalità limitata. N gebied van beperkte evenredigheid. P zakres proporcjonalności ograniczonej. S område med avpassad begränsning. (531)
22. **scattering region** : a region on or near the grund and far beyond the radio horizon of a source of radio waves, within which the field is basically due to tropospheric scatter for most of the time. ★ zone de (réception par) diffusion → *zone 35.* D Streuzone. P strefa rozpraszania (troposferycznego). (705)
23. **shadow region** : the region in space which cannot be reached by an incident wave with a given direction of propagation, according to geometrical optics, because of the presence of an obstacle. ★ zone d'ombre → *zone 43.* D Schattenregion. P strefa cienia. (705)
24. **space-charge region** : a region in which the net charge density is not zero. *Note.* — The net charge is caused by electrons, holes, ionized acceptors and donors. ★ région de charge d'espace → *région 7.* R зона пространственного заряда. D Raumladungszone. E región de carga de espacio. I regione di carica spaziale. N riumteladingsgebied. P obszar ładunku przestrzennego. S rymdladdningsområde. (521)
25. **space-charge region** (of a PN junction) : a space charge region contained between two neutral regions of types P and N respectively. ★ région de charge spatiale → *région 8.* R зона пространственного заряда (P-N перехода). D Raumladungszone (eines PN-Übergangs). E región de carga de espacio (de una unión PN). I regione di carica spaziale (di una giunzione PN). N ruimteladingsgebied (van een PN-junctie). P obszar ładunku przestrzennego (złącza PN). S rymdladdningsområde (i en PN-övergång). (521)
26. **transition region** : a region between two homogeneous semiconducting regions, in which the electric properties change. *Note.* — The two homogeneous regions are not necessary of the same semiconductor material. ★ région de transition → *région 19.* R область перехода. D Übergangszone. E región de transición. I regione di transizione. N overgangsgebied. P obszar przejścia. S övergångsområde. (521)

register

1. **register** (of an integrating instrument) : the part of an integrating instrument which allows the measured value to be determined. ★ dispositif indicateur → *dispositif 72.* R счетный механизм (интегрирующего прибора). D Zähleinrichtung (eines integrierenden Messgerätes). E elemento indicador (de un aparato integrador). I numeratore. N telwerk (van een integrerend instrument). P urządzenie wskazujące (przyrządu całkującego). S räkneverk. (302)
2. **register** : logic system composed of n identical cells having each a logic output and a set of common control inputs (inhibition input, clear input, etc.) and which is intended to store an n-digit binary number. ★ registre → *registre 1.* R регистр. D Register. E registro. I registro. N register. P rejestr. S register. (351)
3. **register** (in switching) : a functional unit accessible to all or a number of input circuits which fulfils the register function. *Note* — In stored program control, the register consists of a storage zone ; in the other modes of control it is a device. ★ enregistreur → *enregistreur 3.* R регистр (в коммутации). D Register. E registrador (en conmutación). I registro. N register. P rejestr (w komutacji). S register. (714)
4. **register function** : → *function 26*
5. **register recall** : → *recall 4*
6. **register signalling** : → *signalling 35*
7. **shift register** : an assembly of storage cells in which the state of each cell is transferred to the adjacent cell in a predetermined direction by the application of a shift pulse applied to all stages of the register. ★ registre à décalage → *registre 2.* R регистр сдвига; сдвиговый регистр. D Schieberegister. E registro con desfaseje; registro con desplazamiento. I registro a scorrimento. N schuifgeheugen; schuifregister. P rejestr przesuwny. S skiftregister. (721)

register-translator

1. **register-translator** : a functional unit in which the functions of a register and translator are combined. ★ enregistreur-traducteur → *enregistreur-traducteur 1.* R регистр-преобразователь. D Registerumwerter. E registrador-traductor. I registro-traduttore. N ..... P rejestr-przelicznik. S registeröversättare. (714)

registration

1. **registration** : adjustement of the three primary colour scanning signal, so that the corresponding images coincide. ★ superposition (des primaires) → *superposition 2.* R сведение. (723)
2. **registration arm** : → *arm 14*
3. **registration chart** : → *chart 5*

registration-plate

1. **rear registration-plate light** (*Syn.* number-plate light) : → *light 46*

regular

1. **regular reflectance** : → *reflectance 9*
2. **regular reflection** (*Syn.* specular reflection) : → *reflection 28*
3. **regular reflection** : → *reflection 25*
4. **regular signalling link** : → *link 34*
5. **regular transmission** : → *transmission 55*
6. **regular transmittance** : → *transmittance 3*

regulated

1. **automatically regulated** : applied to a machine which can regulate its own characteristics when associated with other apparatus in a suitable closed loop circuit. ★ machine à réglage automatique → *machine 22.* R автоматически регулируемая машина. D Maschine mit Regelung. E máquina con regulación automática. I macchina a regolazione automatica. N machine met automatische regeling. P maszyna z automatyczną regulacją. S automatiskt styrd. (411)
2. **compensated regulated** : applied to a machine which, in conjunction with a separate source of excitation, can inherently regulate its own characteristics such as voltage, power factor, speed. ★ machine à réglage de compensation → *machine 23.* R компенсированная регулируемая машина. D Maschine mit Fremderregung und Selbststeuerung. E máquina con regulación por compensación. I macchina a regolazione compensata. N ..... P maszyna obcowzbudna skompensowana o samoczynnej regulacji. S kompenserat styrd. (411)
3. **regulated line section** : → *section 19*
4. **regulated (telephone) set** : → *set 39*

regulating

1. **persistent regulating command** : → *command 15*
2. **regulating element** (*Syn.* fine control member) : → *control 103*
3. **regulating energy of a system** : → *energy 71*
4. **regulating member** (*Syn.* fine control member) : → *control 103*
5. **regulating pilot** : → *pilot 16*
6. **regulating resistor** : → *resistor 11*
7. **regulating step command** : → *command 17*
8. **regulating transformer** : → *transformer 53*
9. **regulating winding** : → *winding 55*

regulation

1. **automatic load regulation equipment** : → *equipment 3*
2. **auxiliary transformer regulation** : a method of varying the voltage supplied to the motors using a buck-boost transformer in series with the main transformer. ★ régulation à transformateur auxiliaire → *régulation 13.* R регулирование напряжения линейным (регулировочным) трансформатором. D Steuerung mit Zusatztransformatoren. E regulación por transformador auxiliar. I regolazione con trasformatore ausiliario (serie). N sturing met regeltransformator. P regulacja transformatorem pomocniczym. S reglering med tillsatslindning. (811)
3. **direct voltage regulation** : the difference between the conventional no-load direct voltage and the direct voltage at load at the same current delay angle. ★ variation de tension continue → *variation 16.* R падение постоянного напряжения. D Gleichspannungsänderung. E variación de tensión continua. I variazione della tensione continua. N gelijkspanningsverandering. P spadek napięcia wyprostowanego. S likspänningsfall. (551)
4. **high-voltage regulation** : a method of controlling the voltage supplied to the traction motors effected on the high-voltage side of the transformer. ★ régulation par la haute tension → *régulation 30.* R стабилизация высокого напряжения. D Hochspannungssteuerung. E regulación por la alta tensión. I regolazione (di tensione) lato alta tensione. N hoogspaningsregeling. P regulacja wysokonapięciowa. S högspänningsreglering. (811)
5. **inductive direct voltage regulation** : the direct voltage regulation due to the commutation inductance. ★ variation inductive de tension continue → *variation 19.* R индуктивная составляющая падения постоянного напряжения. D induktive Gleichspannungsänderung. E variación inductiva de tensión continua. I variazione induttiva della variazione della tensione continua. N inductieve gelijkspanningsverandering. P spadek napięcia wyprostowanego indukcyjny. S induktivt likspänningsfall. (551)
6. **inherent direct voltage regulation** : the direct voltage regulation excluding the effect of the a.c. system impedance and the correcting effect of voltage stabilizing means if any. ★ variation propre de tension continue → *variation 21.* R внутреннее падение постоянного напряжения. D innere Gleichspannungsänderung. E variación propia de tensión continua. I variazione propria della tensione continua. N eigen gelijkspanningsverandering. P spadek napięcia wyprostowanego wewnętrzny. S inre likspänningsfall. (551)
7. **inherent regulation** (of a generator) : the change in voltage resulting from a load change, the speed being maintained constant, and due solely to the fundamental characteristics of the generator itself. ★ variation propre de tension → *variation 20.* R саморегулирование (генератора). D Spannungsänderung (eines Generators) bei gleichbleibender Drehzahl. E variación propia de tensión (de un generador). I variazione intrinseca di tensione. N natuurlijke spanningsverandering (van een generator). P naturalna zmienność napięcia. S egen spänningsändring vid belastningsändring. (411)
8. **inherent regulation** (of a motor) : the change in speed resulting from a load change, the supply voltage and frequency being maintained constant, and due solely to the fundamental characteristics of the motor itself. ★ variation propre de vitesse → *variation 22.* R саморегулирование (двигателя). D Drehzahländerung (eines Motors) bei gleichbleibender Spannung und Frequenz. E variación propia de velocidad (de un motor). I variazione intrinseca di velocità. N natuurlijke toerentalverandering (van een motor). P naturalna zmienność prędkości. S egen varvtalsändring vid belastningsändring. (411)
9. **low-voltage regulation** : a method of controlling the voltage supplied to the traction motors effected on the low-voltage side of the transformer. ★ régulation par la basse tension → *régulation 28.* R стабилизация низкого напряжения. D Niederspannungssteuerung. E regulación por la baja tensión. I regolazione (di tensione) lato bassa tensione. N laagspanningsregeling. P regulacja niskonapięciowa. S låspänningsreglering. (811)
10. **regulation** (of a generator) : the change in voltage resulting from a load change. *Note.* — The change in voltage is often considered between rated load and no-load operation. ★ variation de tension → *variation 15.* R ..... D Spannungsänderung (eines Generators). E variación de tensión (de un generador). I variazione di tensione. N spanningsverandering (van een generator). P zmienność napięcia. S spänningsändring vid belastningsändring. (411)
11. **regulation** (of a motor) : the change in speed resulting from a load change. *Note.* — The change in speed is often considered between rated load and no-load operation. ★ variation de vitesse → *variation 17.* R ..... D Drehzahländerung (eines Motors). E variación de velocidad (de un motor). I variazione di velocità. N toerentalverandering (van een motor). P zmienność prędkości. S varvtalsändring vid belastningsändring. (411)
12. **regulation** : the difference between the maximum and minimum values of the tube voltage drop of a voltage stabilizing tube within a stated range of anode current. ★ régulation → *régulation 12.* R регулирование. D Bereich der Brennspannung. E regulación. I regolazione — intervallo di regolazione. N vlakheid. P odchylenie napięcia stabilizacji. S reglerområde. (531)
13. **resistive direct voltage regulation** : the direct voltage regulation due to resistance (threshold voltages of electronic valve devices excluded). ★ variation résistive de tension continue → *variation 24.* R резистивная составляющая падения постоянного напряжения. D ohmsche Gleichspannungsänderung. E variación resistiva de tensión

continua. I variazione resistiva della variazione della tensione continua. N resistieve gelijkspanningsverandering. P spadek napięcia wyprostowanego rezystancyjny. S resistivt likspänningsfall. (551)

14. **speed regulation characteristic** : → *characteristic 78*
15. **total direct voltage regulation** : the direct voltage regulation including the effect of the a.c. system impedance but excluding the correcting effect of stabilizing means if any. ★ variation totale de tension continue → *variation 25.* R полное падение постоянного напряжения. D (gesamte) Gleichspannungsänderung. E variación total de tensión continua. I variazione totale della tensione continua. N totale gelijkspanningsverandering. P spadek napięcia wyprostowanego całkowity. S totalt likspänningsfall. (551)
16. **voltage regulation characteristic** : → *characteristic 95*
17. **voltage regulation for a specified load condition** (*Syn.* voltage drop or rise for a specified load condition) : → *voltage drop 3*

regulator

1. **electrode control regulator** : a device to move the electrodes of an arc furnace in order to regulate the arc power. ★ régulateur d'électrodes → *régulateur 8.* R регулятор управления электродами. D Elektroden-Regelung. E regulador de electrodos. I regolatore degli elettrodi. N elektroderegelaar. P regulator elektrod. S elektrodregulator. (841)
2. **slip regulator** : a device arranged to produce a reduction in speed below synchronous speed greater than would be obtained inherently. Such a device is usually in the form of a variable impedance connected in the secondary circuit of a wound-rotor induction motor. ★ régulateur de glissement → *régulateur 5.* R регулятор скольжения. D Schlupfsteller. E regulador de deslizamiento. I regolatore di scorrimento. N slipregelaar. P regulator poślizgu. S eftersläpningsdon. (411)
3. **transductor regulator** : a transductor for regulating an electrical quantity. ★ régulateur à transducteur → *régulateur 3.* R ..... D Transduktor-Regler. E transductor regulador. I trasduttore regolatore. N transductorregelaar. P regulator transduktorowy. S transduktorregulator. (431)
4. **voltage regulator diode** : → *diode 28*
5. **voltage regulator tube** (*Syn.* voltage stabilizing tube) : → *tube 98*
6. **welding current regulator** : a means of controlling the welding current. ★ régulateur de courant de soudage → *régulateur 4.* R регулятор сварочного тока. D Schweißstromsteller. E regulador de corriente de soldadura. I regolatore della corrente di saldatura. N lasstroomregelaar. P regulator prądu spawania. S reglerdon. (851)

reheat

1. **condensing set with reheat** : → *set 9*

reheater

1. **reheater** : the part of the boiler in which the exhaust steam of the high-pressure part is superheated again. ★ resurchauffeur → *resurchauffeur 1.* R промежуточный перегреватель. D Zwischenüberhitzer. E recalentador. I risurriscaldatore. N heroververhitter. P przegrzewacz międzystopniowy. S mellanöverhettare. (602)

re-ignition

1. **re-ignition** (of an a.c. mechanical switching device) : a resumption of current between the contacts of a mechanical switching device during a breaking operation with an interval of zero current of less than a quarter cycle of power frequency. ★ réallumage → *réallumage 1.* R повторное зажигание (контактного коммутационного аппарата переменного тока). D Wiederzündung (eines Wechselstromschalters). E reencendido (de un aparato mecánico de conexión en corriente alterna). I riaccensione (di un apparecchio meccanico di manovra a corrente alternata). N herontsteking binnen 1/4 periode (van een mechanische schakelaar voor wisselstroom). P zapłon ponowny łuku wczesny. S nytändning. (441)
2. **re-ignition** : the generation of spurious counts by atoms or molecules excited or ionized in the discharge initiating a count. ★ réamorçage → *réamorçage 2.* R повторное зажигание. D Nachimpuls. E recebado. I reinnesco. N herontsteking. P zapłon powtórny. S (falsk) återtändning. (531)
3. **re-ignition voltage** : → *voltage 172*

reinforced

1. **alloy reinforced aluminium conductor** : → *conductor 3*
2. **aluminium clad steel reinforced aluminium conductor** : → *conductor 4*
3. **core (of a reinforced conductor)** : → *core 16*
4. **reinforced conductor** : → *conductor 57*
5. **steel reinforced aluminium alloy conductor** : → *conductor 68*
6. **steel reinforced aluminium conductor** : → *conductor 69*

reinforcement

1. **reinforcement** : tapes or strips or wires, usually metallic, applied over a sheath to enable it to withstand mechanical stresses generally due to internal pressure. ★ frettage → *frettage 1.* R упрочняющий покров. D Druckschutz. E blindaje. I blindatura. N drukbandage. P bandaż; wzmocnienie (mechaniczne). S tryckarmering. (461)
2. **reinforcement of a system** : addition or substitution of some items in a power system (transformers, lines, generators, etc.) so that it will be able to meet an increased load or provide a better quality of supply. ★ renforcement d'un réseau → *renforcement 2.* R усиление энергосистемы. D Verstärkung eines Netzes. E refuerzo de una red. I rafforzamento di una rete. N versterking van een systeem. P rozbudowa systemu. S systemförstärkning. (603)

reinforcing

1. **reinforcing rods (in a pad and chimney foundation)** : → *rod 13*

reiteration

1. **reiteration** : the repetition of the signal elements of a given digital signal to change the digit rate from its original value to a value which is an integral multiple of the original digit rate. *Note.* — The associated verb is "to reiterate". ★ réitération → *réitération 1.* R ..... D Re-Iteration. E resteración. I reiterazione. N re-iteratie. P wypełnienie przez powtarzanie. S ..... (704)

reject

1. **reject control** : → *control 156*

rejection

1. **common mode rejection ratio** : → *ratio 15*
2. **image rejection ratio** : → *ratio 42*
3. **intermediate frequency rejection ratio** : → *ratio 43*
4. **series mode rejection ratio** : → *ratio 78*
5. **spurious response rejection ratio** : → *ratio 94*

related

1. **fullness factor (related to the flux density)** : → *factor 83*
2. **fullness factor related to the polarization** : → *factor 84*
3. **mean phase difference between related information** : → *difference 20*
4. **related (perceived) colour** : → *colour 72*

relation

1. **Boltzmann relation** : the equation stating that, apart from an additive constant, the entropy of a system of particles is equal to the product of the Napierian (natural) logarithm of the probability of its macroscopic state and the Boltzmann constant. ★ relation de Boltzmann → *relation 1.* R уравнение Больцмана. D Boltzmannsche Beziehung. E relación de Boltzmann. I relazione di Boltzmann. N Boltzmannvergelijking. P zależność Boltzmanna. S Bolzmann-ekvationen. (521)

relationship

1. **phase relationship** (in timing) : the difference in time between two significant instants in a cyclic time-scale or between corresponding significant instants in two cyclic time-scales. *Note.* — The phase relationship may be expressed in units of time, or as a proportion or percentage of the cycle duration. ★ relation de phase → *relation 2.* R соотношение фаз (при хронировании). D Phasenbeziehung bei der Synchronisation. E relación de fase (en sincronización). I relazione di fase (nella temporizzazione). N faseverhouding. P związek fazowy (w taktowaniu). S fasförhållande. (704)
2. **phase relationship** : in synchronous transmission, the relative phase of receiving apparatus and incoming signals, or receiving

and sending apparatus. ★ relation de phase → *relation 3.* R фазовое соотношение. D Phasenbeziehung. E relación de fase. I relazione di fase. N fasebetrekking. P położenie fazy względne. S fasförhållande. (721)

relative

1. **international relative sunspot number** : → *number 12*
2. **magnetic medium relative efficiency** : → *efficiency 30*
3. **plateau relative slope** : → *slope 6*
4. **recording head relative efficiency** : → *efficiency 36*
5. **relative attenuation** : → *attenuation 29*
6. **relative biological effectiveness (of radiation)** : → *effectiveness 2*
7. **relative colour stimulus function** : → *function 27*
8. **relative complex permeability** : → *permeability 21*
9. **relative complex permittivity** : → *permittivity 4*
10. **relative differential limen of frequency** : → *limen 3*
11. **relative equivalent** : → *equivalent 60*
12. **relative equivalent for receiving** : → *equivalent 61*
13. **relative equivalent for sending** : → *equivalent 62*
14. **relative error** : → *error 52*
15. **relative error** : → *error 53*
16. **relative frequency spacing** : → *spacing 4*
17. **relative gain** : → *gain 31*
18. **relative harmonic content** : → *content 7*
19. **relative humidity** : → *humidity 1*
20. **relative importance** : → *importance 2*
21. **relative ionospheric opacity meter** (*Syn.* riometer) : → *riometer 1*
22. **relative optical air mass** : → *mass 26*
23. **relative permeability** : → *permeability 22*
24. **relative permittivity** : → *permittivity 5*
25. **relative power level** : → *level 78*
26. **relative (real) permeability** : → *permeability 23*
27. **(relative) (real) permittivity** : → *permittivity 6*
28. **relative responsivity** : → *responsivity 1*
29. **relative reverberation level** : → *level 79*
30. **relative sensitivity** : → *sensitivity 21*
31. **relative sensitivity** (*Syn.* relative responsivity) : → *responsivity 1*
32. **relative spectral distribution** : → *distribution 34*
33. **relative spectral responsivity** : → *responsivity 2*
34. **relative spectral sensitivity** : → *spectral-sensitivity 3*
35. **relative spectral sensitivity** (*Syn.* relative spectral responsivity) : → *responsivity 2*
36. **relative spectral sensitivity characteristic** : → *characteristic 70*
37. **relative sunshine duration** : → *duration 35*
38. **relative temperature index** : → *index 37*
39. **relative voltage change** : → *change 7*
40. **relatively selective protection system** : → *system 172*
41. **reverse relative tape efficiency** : → *efficiency 38*

relaxation

1. **magnetic relaxation** : a process of reaching equilibrium in a magnetic system after it has been subjected to a disturbance, the process taking a finite time due to the dynamics of atomic or sub-atomic particles. *Note.* — When unqualified, this term usually relates to short-term processes having time constants in the order of microseconds. ★ relaxation magnétique → *relaxation 4.* R магнитная релаксация. D magnetische Relaxation. E relajación magnética. I rilassamento magnetico. N magnetische relaxatie. P relaksacja magnetyczna. S magnetisk relaxation. (221)
2. **relaxation oscillation** : → *oscillation 14*
3. **relaxation oscillator** : → *oscillator 5*

relay

1. **accelerating relay** (*Syn.* notching relay) : an adjustable relay controlling the starting current of the traction motors to regulate the acceleration of the vehicle. ★ relais d'accélération → *relais 15.* R реле ускорения; реле ручного пуска. D Beschleunigungsrelais. E relé de aceleración. I relè d'accelerazione. N begrenzingsrelais. P przekaźnik samoczynnego rozruchu. S accelerationsrelä; kopplingsrelä. (811)
2. **all-or-nothing relay** : an electrical relay which is intended to be energized by a quantity whose value is either within its operative range or effectively zero. ★ relais de tout ou rien → *relais 26.* R логическое реле. D Schaltrelais. E relé de todo o nada. I relè a tutto o niente. N relais. P przekaźnik z wejściem skokowym. S icke mätande relä. (446)
3. **biased relay** : an electrical measuring relay the characteristic of which is changed by means of an electrical bias. ★ relais à retenue → *relais 9.* R реле с торможением. D stabilisiertes Relais. E relé polarizado. I relè compensato. N niet-neutraal afgeregeld relais. P przekaźnik stabilizowany. S stabiliserat relä. (448)
4. **bistable relay** : an electrical relay which, having responded to an input energizing quantity (or characteristic quantity) and having changed its condition, remains in that condition after the quantity has been removed. A further appropriate energization is required to make it change over. ★ relais bistable → *relais 13.* R двустабильное реле. D bistabiles Relais. E relé biestable. I relè bistabile. N bistabiel relais. P przekaźnik bistabilny. S bistabilt relä. (446)
5. **contactor relay** : → *contactor 6*
6. **current relay** : an electrical measuring relay the characteristic quantity of which is current. ★ relais de courant → *relais 16.* R реле тока. D Stromrelais. E relé de corriente. I relè di corrente. N stroomrelais. P przekaźnik prądowy. S strömrelä. (448)
7. **dependent-time measuring relay** : a specified-time measuring relay for which times depend, in a specified manner, on the value of the characteristic quantity. ★ relais de mesure à temps dépendant → *relais 19.* R измерительное реле с зависимым временем. D Messrelais mit abhänginger Zeitkennlinie. E relé de medida de tiempo dependiente. I relè di misura a tempo dipendente. N tijdafhankelijk meetrelais. P przekaźnik pomiarowy zwłoczny zależny. S mätande relä med beroende fördröjning. (446)
8. **differential relay** : an electrical measuring relay the characteristic quantity of which is the result of the comparison of the input energizing quantities either in magnitude or in phase and magnitude. ★ relais différentiel → *relais 27.* R дифференциальное реле. D Differentialrelais. E relé diferencial. I relè differenziale. N differentiaalrelais. P przekaźnik różnicowy. S differentialrelä. (448,811)
9. **directional relay** : an electrical measuring relay intended to detect the direction in which a phenomenon, for instance a fault, occurs with reference to a given point in the system. ★ relais directionnel → *relais 29.* R направленное реле. D Richtungsrelais. E relé direccional. I relè direzionale. N richtingsrelais. P przekaźnik kierunkowy. S riktningsrelä. (448)
10. **earth fault relay** : a relay which operates when a failure of insulation to earth is detected in the equipment or circuits protected. ★ relais de mise à la terre → *relais 21.* R реле заземления. D Erdstromrelais. E relé de puesta a tierra. I relè di terra. N aardfoutrelais. P przekaźnik ziemnozwarciowy. S jordfelsrelä. (811)
11. **electrical relay** : a device designed to produce sudden, predetermined changes in one or more electrical output circuits when certain conditions are fulfilled in the electrical input circuits controlling the device. *Notes. 1* — The term relay shall be restricted to a relay unit having a single relaying function between its input circuits and its output circuits. *2* — The term relay includes all the components which are necessary for the specified operation. *3* — For protection and automatic control purposes, the name of the single relaying function (see Note 1) shall be added to qualify the relay. In the case and according to the specified function (defined by the standards or by the manufacturer), the relay may include an auxiliary relay in order to perform as required. Examples : differential relays, impedance relay, tripping relay. ★ relais électrique → *relais 30.* R электрическое реле. D elektrisches Relais. E relé eléctrico. I relè elettrici. N elektrisch relais. P przekaźnik elektryczny. S relä. (151,446)
12. **electromechanical relay** : an electrical relay in which the designed response is developed by the relative movement of mechanical elements under the action of a current in the input circuit. ★ relais électromécanique → *relais 34.* R электромеханическое реле. D elektromechanisches Relais. E relé electromecánico. I relè elettromeccanico.

N elektromechanisch relais. P przekaźnik elektromechaniczny. S elektromekaniskt relä. (446)

13. **frequency relay** : an electrical measuring relay the characteristic quantity of which is frequency. ★ relais de fréquence → *relais 17.* R реле частоты. D Frequenzrelais. E relé de frecuencia. I relè di frequenza. N frequentierelais. P przekaźnik częstotliwos'ciowy. S frekvensrelä. (448)
14. **impedance relay** : an electrical measuring relay the characteristic quantity of which is impedance. ★ relais d'impédance → *relais 28.* R реле полного сопротивления. D Impedanzrelais. E relé de impedancia. I relè di impedenza. N impedantierelais. P przekaźnik impedancyjny. S impedansrelä. (448)
15. **independent-time measuring relay** : a specified-time measuring relay the specified time of which can be considered as being independent, within specified limits, of the value of the characteristic quantity. ★ relais de mesure à temps indépendant → *relais 20.* R измерительное реле с независимым временем. D Messrelais mit unabhängiger Zeitkennlinie. E relé de medida de tiempo independiente. I relè di misura a tempo indipendente. N onafhankelijk tijdmeetrelais. P przekaźnik pomiarowy zwłoczny niezależny. S mätande relä med oberoende fördröjning. (446)
16. **instantaneous contactor relay** : → *contactor 12*
17. **measuring relay** : an electrical relay intended to operate when its characteristic quantity, under specified accuracy, attains its operate value. ★ relais de mesure → *relais 18.* R измерительное реле. D Messrelais. E relé de medida. I relè di misura. N meetrelais; relais voor meetdoeleinden. P przekaźnik pomiarowy. S mätande relä. (446)
18. **monostable relay** : an electrical relay which, having responded to an input energizing quantity (or characteristic quantity) and having changed its condition, returns to its previous condition when the quantity is removed. ★ relais monostable → *relais 35.* R одностабильное реле. D monostabiles Relais. E relé monoestable. I relè monostabile. N monostabiel relais. P przekaźnik monostabilny. S monostabilt relä. (446)
19. **non-polarized relay** (d.c.) : a direct current relay, the change of condition of which does not depend upon the polarity of its input energizing quantity(ies). ★ relais non polarisé → *relais 36.* R неполяризованное реле (постоянного тока). D nichtpolarisiertes Relais. E relé no polarizado (de corriente continua). I relè non polarizzato (a corrente continua). N neutraal relais. P przekaźnik niespolaryzowany. S opolariserat relä. (446)
20. **non-specified-time relay** : an electrical relay for which the times are not subject to any accuracy specification. ★ relais à temps non spécifié → *relais 10.* R реле с ненормируемым временем. D Relais ohne festgelegtes Zeitverhalten. E relé de tiempo no especificado. I relè a tempo non specificato. N onbepaald tijdrelais. P przekaźnik czasowy nienastawny. S icke tidspecificerat relä. (446)
21. **notching relay** (*Syn.* accelerating relay) : → *relay 1*
22. **no-volt relay** : a relay which operates when the voltage of an electric circuit is lost. ★ relais à tension nulle → *relais 12.* R реле нулевого напряжения. D Nullspannungsrelais. E relé de tensión nula. I relè di tensione nulla. N nulspanningsrelais. P przekaźnik napięcia zerowego. S nollspänningrelä. (811)
23. **over and under...relay** : an electrical measuring relay with two set values and which is designed to operate when its characteristic quantity reaches either one set value by increasing values or the other set value by decreasing values. ★ relais à maximum et à minimum de... → *relais 6.* R максимально-минимальное реле.... D Über-und Unter ... relais. E relé de máximo y de mínimo de .... I relè di massima e di minima .... N maximum-en minimum ... relais, over-en onder ... relais. P przekaźnik nadmiarowo-niedomiarowy. S maximal-och minimalrelä. (448)
24. **overcurrent relay** : a measuring relay which operates when the value of the current exceeds the setting (operating value) of the relay. ★ relais à maximum de courant → *relais 4.* R реле максимального тока. D Überstromrelais. E relé de máxima intensidad. I relè di massima (corrente). N overstroomrelais; maximaal-stroomrelais. P przekaźnik nadprądowy. S överströmsrelä. (811)
25. **over...relay** : an electrical measuring relay intented to operate when its characteristic quantity reaches the set value by increasing values. ★ relais à maximum de... → *relais 3.* R максимальное реле.... D Über ... relais. E relé de máximo de .... I relè di massima .... N maximum ... relais, over ... relais. P przekaźnik nadmiarowy. S maximalrelä. (448)
26. **overvoltage relay** : a measuring relay which operates when the value of the voltage exceeds the setting (operating value) of the relay. ★ relais à maximum de tension → *relais 5.* R реле максимального напряжения. D Überspannungsschutz. E relé de máxima tensión. I relè di massima tensione. N maximaal-spanningsrelais. P przekaźnik nadnapięciowy. S överspänningsrelä. (811)
27. **percentage relay** : a biased relay the characteristic of which is changed according to a percentage relationship of given input energizing quantity(ies). ★ relais à pourcentage → *relais 8.* R процентное реле. D Prozentrelais. E relé de porcentaje. I relè proporzionale. N percentagerelais. P przekaźnik procentowy stabilizowany. S procentrelä. (448)
28. **phase comparator relay** : an electrical measuring relay with more than one input energizing quantity which is designed to respond to a specified comparison of the phase angles of those quantities. ★ relais comparateur de phases → *relais 14.* R реле сравнения фаз. D Phasenvergleichsrelais. E relé comparador de fases. I relè a confronto di fase. N fasehoekvergelijkingsrelais. P przekaźnik z komparatorem fazowym. S faskomparatorrelä. (448)
29. **polarized relay** (d.c.) : a direct current relay, the change of condition of which depends upon the polarity of its input energizing quantity(ies). ★ relais polarisé → *relais 37.* R поляризованное реле (постоянного тока). D polarisiertes Relais. E relé polarizado (de corriente continua). I relè polarizzato (a corrente continua). N polair relais. P przekaźnik spolaryzowany. S polariserat relä. (446)
30. **power relay** : an electrical measuring relay with two input energizing quantities, current and voltage and which, by its design, is intended to respond only to power. ★ relais de puissance → *relais 23.* R реле мощности. D Leistungsrelais. E relé de potencia. I relè di protezione. N vermogensrelais. P przekaźnik mocowy. S effektrelä. (448)
31. **primary relay** : a relay which is directly energized by the current or voltage in a main circuit, without an intermediate instrument transformer or shunt or transducer. ★ relais primaire → *relais 38.* R первичное реле. D Primärrelais. E relé primario. I relè primario. N primair relais; stuurrelais. P przekaźnik pierwotny. S primärrelä. (446)
32. **protection relay** : an electrical measuring relay which either solely or in combination with other electrical relays constitutes a protection equipment. ★ relais de protection → *relais 22.* R реле защиты. D Schutzrelais. E relé de protección. I relé di protezione. N beveiligingsrelais. P przekaźnik zabezpieczeniowy. S skyddsrelä. (448)
33. **rate of change of...relay** : → *rate 75*
34. **reactance relay** : an electrical measuring relay the characteristic quantity of which is reactance. ★ relais de réactance → *relais 24.* R реле реактивного сопротивления. D Reaktanzrelais. E relé de reactancia. I relè di reattanza. N reactantierelais. P przekaźnik reaktanacyjny. S reaktansrelä. (448)
35. **relay station** (*Syn.* rebroadcast transmitter) : → *transmitter 12*
36. **relay station** : → *station 28*
37. **relay switch** : → *switch 38*
38. **secondary relay** : a relay which is energized by the current or voltage derived from an instrument transformer or a transducer. ★ relais secondaire → *relais 39.* R вторичное реле. D Sekundärrelais. E relé secundario. I relè secondario. N secundair relais; volgrelais. P przekaźnik wtórny. S sekundärrelä. (446)
39. **shunt relay** : a relay which is energized by the current derived from a shunt in a main circuit. ★ relais sur shunt → *relais 43.* R шунтовое реле. D Nebenschlussrelais. E relé shunt. I relè su derivatore. N shuntrelais. P ..... S shuntrelä. (446)
40. **specified-time relay** : an electrical relay such that one or more of the times which characterize it (e.g. operate time) are subject to specified requirements, in particular concerning accuracy. ★ relais à temps spécifié → *relais 11.* R реле с нормируемым временем. D Relais mit festgelegtem Zeitverhalten; Zeitrelais. E relé de tiempo especificado. I relè a tempo specificato. N tijdrelais. P przekaźnik czasowy nastawny. S tidspecificerat relä. (446)
41. **static relay** : an electrical relay in which the designed response is developed by electronic, magnetic, optical or other

components without mechanical motion. ★ relais statique → *relais 40.* R статическое реле. D statisches Relais. E relé estático. I relè statico. N statisch relais. P przekaźnik statyczny. S statiskt relä. (446)

42. **static relay with output contact** : a static relay having a contact in one or more of its output circuits. ★ relais statique à contact de sortie → *relais 41.* R статическое реле с выходным контактом. D statisches Relais mit Ausgangskontakt. E relé estático con contacto de salida. I relè statico con contatto di uscita. N statisch relais met uitgangscontact. P przekaźnik statyczny zestykowy. S statiskt relä med utgångskontakt. (446)
43. **static relay without output contact** : a static relay having no contacts in its output circuits. ★ relais statique sans contact de sortie → *relais 42.* R статическое реле без выходного контакта. D statisches Relais ohne Ausgangskontakt. E relé estático sin contacto de salida. I relè statico senza contatto di uscita. N statisch relais zonder uitgangscontact. P przekaźnik statyczny bezstykowy. S statiskt relä utan utgångskontakt. (446)
44. **substation relay building** : → *building 2*
45. **substation relay kiosk** (*Syn.* substation relay building) : → *building 2*
46. **substation relay room** : → *room 19*
47. **telegraph relay** : an electric relay designed primarily to follow telegraphic signals, for example to constitute a telegraph repeater. ★ relais télégraphique → *relais 44.* R телеграфное реле. D Telegrafenrelais. E relé telegráfico. I relè telegrafico. N telegraafrelais. P przekaźnik telegraficzny. S telegrafrelä. (721)
48. **thermal electrical relay** : a dependent-time measuring relay which is intended to protect an equipment from electrical thermal damage by the measurement of the current flowing in the protected equipment and by a characteristic curve simulating its thermal behaviour. ★ relais électrique thermique → *relais 31.* R электротепловое реле. D Messrelais zum Schutz vor thermischer Überlastung; Überlastrelais. E relé eléctrico térmico. I relè elettrico termico. N thermorelais. P przekaźnik cieplny. S termiskt relä. (446)
49. **thermal electrical relay with partial memory function** : a thermal electrical measuring relay which, in its operating characteristics, takes into account the thermal effects of the input currents existing before the operation of the relay only when they exceed a given threshold level which establishes the overload condition. ★ relais électrique thermique à fonction de mémoire partielle → *relais 32.* R электротепловое реле с функцией частичной памяти. D Überlastrelais mit teilweiser Gedächtnisfunktion. E relé electrotérmico con función de memoria parcial. I relè termico a memoria limitata. N thermisch relais met beperkt geheugen. P przekaźnik elektryczny cieplny z częściową pamięcią. S termiskt relä med partiell minnesfunktion. (448)
50. **thermal electrical relay with total memory function** : a thermal electrical measuring relay which, in its operating characteristics, takes into account the thermal effects of the load and overload currents before the operation of the relay. ★ relais électrique thermique à fonction de mémoire totale → *relais 33.* R электротепловое реле с функцией полной памяти. D Überlastrelais mit vollständiger Gedächtsnisfunktion. E relé electrotérmico con función de memoria total. I relè termico a memoria totale. N thermisch relais met onbeperkt geheugen. P przekaźnik elektryczny cieplny z całkowitą pamięcią. S termiskt relä med fullständig minnesfunktion. (448)
51. **time-delay contactor relay** : → *contactor 16*
52. **to energize a relay** : → *energize 1*
53. **under...relay** : an electrical measuring relay intended to operate when its characteristic quantity reaches the set value by decreasing values. ★ relais à minimum de... → *relais 7.* R минимальное реле.... D Unter ... relais. E relé de mínimo de .... I relè di minima .... N minimum ... relais, onder ... relais. P przekaźnik niedomiarowy. S minimalrelä. (448)
54. **vibrating relay** (telegraph) : a telegraph relay with additional windings so excited as to produce a certain regular oscillation of the armature between its stops in the absence of line current in the normal winding, with the object of increasing the sensitivity of the relay. ★ relais vibrateur télégraphique → *relais 45.* R вибрационное (телеграфное) реле. D vorerregtes Telegrafenrelais. E relé vibrador telegráfico. I relè a vibrazione. N resonantierelais. P przekaźnik wibracyjny. S vibratorrelä. (721)
55. **voltage relay** : an electrical measuring relay the characteristic quantity of which is voltage. ★ relais de tension → *relais 25.* R реле напряжения. D Spannungsrelais. E relé de tensión. I relè di tensione. N spanningsrelais. P przekaźnik napięciowy. S spänningsrelä. (448)

release

1. **called party release** : a method of operation in which the release of a connection commences when the called party restores his network terminal to its quiescent condition. ★ libération par le côté demandé → *libération 9.* R разъединение со стороны вызываемого абонента. D Ausloesung durch Gerufenen. E liberación lado destinatario. I rilascio al riaggancio del chiamato. N terugwaarts vrijgeven. P rozłączenie od abonenta wywoływanego. S B-styrd nedkoppling. (714)
2. **calling party release** : a method of operation in which the release of a connection commences when the calling party restores his network terminal to its quiescent condition. ★ libération par le côté demandeur → *libération 10.* R разъединение со стороны вызывающего абонента. D Ausloesung durch Rufenden. E liberación lado peticionario. I rilascio al riaggancio del chiamante. N voorwaarts vrijgeven. P rozłączenie od abonenta wywołującego. S A-styrd nedkoppling. (714)
3. **cancelling release mechanical system** : → *mechanical system 3*
4. **definite time-delay over-current release** : an over-current release which operates with a definite time-delay, which may be adjustable, but is independent of the value of the over-current. ★ déclencheur à maximum de courant à retard indépendant → *déclencheur 4.* R максимальный расцепитель тока с независимой выдержкой времени. D unabhängig verzögerter Überstromauslöser. E disparador de sobreintensidad con retardo independiente. I sganciatore di massima corrente a ritardo indipendente. N onafhankelijk vertraagde overstroomlosser. P wyzwalacz nadprądowy o charakterystyce niezależnej. S överströmsutlösare med konstant fördröjning. (441)
5. **direct over-current release** : an over-current release directly energized by the current in the main circuit of a mechanical switching device. ★ déclencheur direct à maximum de courant → *déclencheur 9.* R первичный максимальный расцепитель тока. D Primärstromauslöser. E disparador directo de sobreintensidad. I sganciatore primario di massima corrente. N primaire overstroomlosser. P wyzwalacz nadprądowy bezpośredni. S direkt överströmsutlösare. (441)
6. **first-party release** : a method of operation in which the release of a connection commences when either the calling party or the called party, whoever is first, restores his network terminal to its quiescent condition. ★ libération par la première des extrémités → *libération 8.* R односторонний отбой. D Ausloesung durch den Teilnehmer, der zuerst das Gespraech beendet. E liberación por el primero de los terminales. I rilascio al primo riaggancio. N ..... P rozłączenie od abonenta pierwszego. S nedkoppling vid enkel slutsignal. (714)
7. **forced release** : release initiated from other than the calling or called network terminals. ★ libération forcée → *libération 6.* R принудительное освобождение. D Zwangsausloesen. E liberación forzada. I rilascio forzato. N geforceerd vrijgeven. P rozłączenie przymusowe. S tvångsnedkoppling. (714)
8. **gas release** : the liberation of dissolved gases from an insulating liquid due to changes in solubility conditions. ★ dégagement de gaz → *dégagement 1.* R выделение газа. D Entgasung. E desprendimiento de gas. I sviluppo di gas. N ontwijken van gas. P wydzielanie gazu. S gasutveckling. (212)
9. **guarded release** (*Syn.* release guard) : → *guard 8*
10. **indirect over-current release** : an over-current release energized by the current in the main circuit of a mechanical switching device through a current transformer or a shunt. ★ déclencheur indirect à maximum de courant → *déclencheur 10.* R вторичный максимальный расцепитель тока. D Sekundärstromauslöser. E disparador indirecto de sobreintensidad. I sganciatore secondario di massima corrente. N secundaire overstroomlosser. P wyzwalacz nadprądowy pośredni. S indirekt överströmsutlösare. (441)
11. **instantaneous release** : a release which operates without any intentional time-delay. ★ déclencheur instantané → *déclencheur 11.* R мгновенный расцепитель. D unverzögerter Auslöser. E disparador instantáneo.

I sganciatore istantaneo. N directe losser. P wyzwalacz bezzwłoczny. S momentanutlösare. (441)

12. **inverse time-delay over-current release** : an over-current release which operates after a time-delay inversely dependent upon the value of the over-current. *Note.* — Such a release may be designed so that the time-delay approaches a definite minimum value for high values of over-current. ★ déclencheur à maximum de courant à temps inverse → *déclencheur 5.* R максимальный расцепитель тока с обратно зависимой выдержкой времени. D abhängig verzögerter Überstromauslöser. E disparador de sobreintensidad de tiempo inverso. I sganciatore di massima corrente a ritardo dipendente. N afhankelijk vertraagde overstroomlosser. P wyzwalacz nadprądowy o charakterystyce zależnej. S överströmsutlösare med invert fördröjning. (441)
13. **last-party release** : a method of operation in which the release of a connection commences when, but not until, both the calling and the called parties have restored their network terminals to their quiescent conditions. ★ libération par la dernière des extrémités → *libération 7.* R двусторонний отбой. D Ausloesung durch den Teilnehmer, der das Gespraech zuletzt beendet. E liberación por el último de los terminales. I rilascio al riaggancio di entrambi. N ..... P rozłączenie od abonenta ostatniego. S nedkoppling vid dubbel slutsignal. (714)
14. **magnetic overload release** : an overload release depending for its operation on the force exerted by the current in the main circuit exciting the coil of an electromagnet. *Note.* — Such a release usually has an inverse time-delay/current characteristic. ★ déclencheur magnétique de surcharge → *déclencheur 12.* R электромагнитный расцепитель перегрузки. D magnetischer Überlastauslöser. E disparador magnético de sobrecarga. I sganciatore magnetico di sovraccarico. N elektromagnetische overbelastingslosser. P wyzwalacz przeciążeniowy elektromagnetyczny. S magnetisk överlastutlösare. (441)
15. **over-current release** : a release which permits a mechanical switching device to open with or whithout time-delay when the current in the release exceeds a predetermined value. *Note.* — This value can in some cases depend upon the rate-of-rise of current. ★ déclencheur à maximum de courant → *déclencheur 3.* R максимальный расцепитель тока. D Überstromauslöser. E disparador de sobreintensidad. I sganciatore di massima corrente. N overstroomlosser. P wyzwalacz nadprądowy. S överströmsutlösare. (441)
16. **overload release** : an over-current release intended for protection against overloads. ★ déclencheur de surcharge → *déclencheur 8.* R расцепитель перегрузки. D Überlastauslöser. E disparador de sobrecarga. I sganciatore di sovraccarico. N overbelastingslosser. P wyzwalacz przeciążeniowy. S överlastutlösare. (441)
17. **release** (of a mechanical switching device) : a device, mechanically connected to a mechanical switching device, which releases the holding means and permits the opening or the closing of the switching device. ★ déclencheur → *déclencheur 1.* R расцепитель (контактного коммутационного аппарата). D Auslöser (eines mechanischen Schaltgerätes). E disparador (de un aparato mecánico de conexión); mecanismo de disparo (de un aparato mecánico de conexión). I sganciatore (di un apparecchio di manovra meccanico). N losser (van een mechanische schakelaar). P wyzwalacz (łącznika mechanizmowego). S utlösare. (441)
18. **release** : the act of changing the state of a traffic-carrying device or a switching path from busy to free. ★ libération → *libération 2.* R освобождение. D ausloesen; freigeben; Freigabe. E liberación. I rilascio. N vrijgeven; vrijmaken. P zwalnianie. S frigöra. (714)
19. **release** : the change of the state of a resource from busy to idle. ★ libération → *libération 3.* D Auslösen. P zwolniony. (715)
20. **release condition** : → *condition 23*
21. **release force** : → *force 27*
22. **release guard** : → *guard 8*
23. **release guard signal** : → *signal 157*
24. **release position** : → *position 29*
25. **release time** : → *time 147*
26. **release travel** : → *travel 1*
27. **release value** : → *value 54*
28. **reverse current release** (d.c. only) : a shunt release which permits a mechanical switching device to open, with or without time-delay, when the current flows in reverse direction and exceeds a predetermined value. ★ déclencheur à retour de courant → *déclencheur 7.* R расцепитель обратного тока (только для постоянного тока). D Rückstromauslöser (nur bei Gleichstrom). E disparador de corriente inversa (solo en corriente continua). I sganciatore a corrente inversa (solo in corrente continua). N terugstroomlosser (alleen bij gelijkstroom). P wyzwalacz zwrotno-prądowy. S bakströmsutlösare. (441)
29. **shunt release** : a release energized by a source of voltage. *Note.* — The source of voltage may be independent of the voltage of the main circuit. ★ déclencheur shunt → *déclencheur 13.* R шунтовой расцепитель. D Spannungsauslöser. E disparador shunt. I sganciatore di tensione. N spanningslosser. P wyzwalacz napięciowy. S shuntutlösare. (441)
30. **source of release** : → *source 38*
31. **thermal overload release** : an inverse time-delay overload release depending for its operation, including its time-delay, on the thermal action of the current flowing in the release. ★ déclencheur thermique de surcharge → *déclencheur 14.* R тепловой расцепитель перегрузки. D thermischer Überlastauslöser. E disparador térmico de sobrecarga. I sganciatore termico di sovraccarico. N thermische overbelastingslosser. P wyzwalacz przeciążeniowy cieplny; przerywacz przeciążeniowy termiczny. S termisk överlastutlösare. (441)
32. **to release** (for an electrical relay) : to change : either from its operate condition to its release condition, or from a final condition to an initial condition (case of some measuring or specified-time relays). *Note.* — The terme "to release" includes both the terme "to disengage" and the term "to reset". ★ relâcher → *relâcher 1.* R возвращаться (для электрического реле). D rücksetzen. E desactivar (para un relé eléctrico). I rilasciare. N afvallen. P zwalniać. S återgå. (446)
33. **under-voltage release** : a shunt release which permits a mechanical switching device to open or close, with or without time-delay, when the voltage across the terminals of the release falls below a predetermined value. ★ déclencheur à minimum de tension → *déclencheur 6.* R минимальный расцепитель напряжения. D Unterspannungsauslöser. E disparador de mínima tensión. I sganciatore di minima tensione. N minimumspanningslosser. P wyzwalacz podnapięciowy. S underspänningsutlösare. (441)

released

1. **electrically released spring brake** : → *brake 12*

releasing

1. **releasing current** : → *current 167*

relevant

1. **relevant failure** : → *failure 45*

reliability

1. **high reliability power line** : → *line 45*
2. **reliability** ($R(t_1, t_2)$) : the probability that an item can perform a required function under given conditions for a given time interval, (t_1, t_2). *Notes. 1* — It is generally assumed that the item is in a state to perform this required function at the beginning of the time interval. *2* — The term "reliability" is also used to denote the reliability performance quantified by this probability . ★ fiabilité → *fiabilité 7.* R безотказность. D Überlebenswahrscheinlichkeit. E fiabilidad. I affidabilità. N betrouwbaarheid. P niezawodność (parametr). S funktionssannolikhet. (191)
3. **reliability and maintainability assurance** : → *assurance 1*
4. **reliability and maintainability audit** : → *audit 1*
5. **reliability and maintainability control** : → *control 157*
6. **reliability and maintainability management** : → *management 4*
7. **reliability and maintainability plan** : → *plan 2*
8. **reliability and maintainability programme** : → *programme 9*
9. **reliability and maintainability surveillance** : → *surveillance 1*
10. **reliability block diagram** : → *diagram 16*
11. **reliability growth** : → *growth 2*
12. **reliability improvement** : → *improvement 1*

13. **reliability model** : → *model 2*
14. **reliability of an item** : the ability of an item to perform a required function under stated conditions for a specified period of time. ★ fiabilité d'un dispositif → *fiabilité 9.* R надежность элемента энергосистемы. D Zuverlässigkeit einer Betrachtungseinheit. E fiabilidad de un dispositivo. I affidabilità di un dispositivo. N betrouwbaarheid van een onderdeel. P niezawodność elementu systemu. S tillförlitlighet. (603)
15. **reliability (performance)** : the ability of an item to perform a required function under given conditions for a given time interval. *Notes. 1* — It is generally assumed that the item is in a state to perform this required function at the beginning of the time interval. *2* — The term "reliability" is also used as a measure of reliability performance. ★ fiabilité → *fiabilité 6.* R безотказность (свойство). D Funktionsfähigkeit. E fiabilidad. I affidabilità. N betrouwbaarheid. P niezawodność (zdolność). S funktionssäkerhet. (191,303)
16. **service reliability** : the ability of a power system to meet its supply function under stated conditions for a specified period of time. ★ fiabilité de l'alimentation → *fiabilité 8.* R надежность энергоснабжения. D Versorgungszuverlässigkeit. E fiabilidad de servicio. I affidabilità dell'alimentazione. N betrouwbaarheid van de elektriciteitsvoorziening. P niezawodność zasilania. S leveranssäkerhet. (603)

relief

1. **pressure relief terminal box** : → *terminal box 8*

relieving

1. **stress relieving** : a heat treatment to reduce stresses existing in the workpiece involving: -a heating and holding at an adequate temperature so that the concomitant lowering of elastic limit and possibly creeping will permit stress relieving, -a slow cooling. ★ relaxation → *relaxation 3.* R термообработка для снятия напряжений. D Spannungsfreiglühen. E relajamiento. I distensione. N spanningsarm gloeien. P wyżarzanie odprężające. S avspänningsglödgning. (841)

relocatable

1. **relocatable address** : → *address 14*

relocate

1. **to relocate** : to move a computer program or part of a computer program, and to adjust the necessary address references so that the computer program can be executed after being moved. ★ translater ↦ *translater 1.* R перераспределять; перемещать. D verschieben. E trasladar. I rilocare. N verplaatsen. P relokować; przemieszczać. S relokera. (714)

reluctance

1. **linear reluctance motor** : → *motor 40*
2. **magnetic variable reluctance pick-up head** : → *pick-up head 5*
3. **reluctance** : the quotient of the magnetomotive force by the associated flux. ★ réluctance → *réluctance 4.* R магнитное сопротивление. D Reluktanz; magnetischer Widerstand. E reluctancia. I riluttanza. N reluctantie. P reluktancja. S reluktans. (131)
4. **reluctance motor** : → *motor 80*
5. **reluctance synchronizing** : → *synchronizing 8*
6. **subsynchronous reluctance motor** : → *motor 100*

reluctivity

1. **reluctivity** : the reciprocal of the permeability. ★ réluctivité → *réluctivité 2.* R удельное магнитное сопротивление. D spezifischer (magnetischer) Widerstand; Reluktivität. E reluctividad. I riluttività. N reluctiviteit. P reluktywność. S reluktivitet. (121)
2. **temperature factor (of reluctivity)** : → *factor 173*

rem

1. **rem** : the earlier special of dose equivalent. 1 rem = 10^{-2} J . gk^{-1}. ★ rem → *rem 1.* R бэр. D rem. E rem. I rem. N rem. P rem. S rem. (881)

remanence

1. **magnetic remanence** (from saturation) : the value of the remanent magnetic flux density when the substance is brought from saturation by monotonically changing the applied magnetic field strength to zero. ★ rémanence magnétique → *rémanence 3.* R остаточная магнитная индукция (из состояния насыщения). D magnetische Remanenz (von der Sättigung ausgehend). E remanencia magnética (de saturación). I induzione residua (della saturazione). N magnetische remanentie. P remanencja magnetyczna. S magnetisk remanens. (121)

remanent

1. **remanent flux density** : → *flux density 14*
2. **remanent magnetic polarization** : → *polarization 40*
3. **remanent magnetization** : → *magnetization 8*

remelting

1. **electroslag remelting** : a consumable electrode remelting process employing an electrical conducting slag heated by direct passage of high current to achieve a refining process. ★ refusion sous laitier électroconducteur → *refusion 1.* R электрошлаковый переплав. D Elektroschlacke-Umschmelzen (ESU). E refusión con electroescorias. I rifusione per elettro-scoria. N elektroslakraffinage. P przetop elektrożużlowy. S elektroslaggomsmältning. (841)
2. **vacuum remelting** : the remelting of metal in a furnace under a controlled vacuum in order to achieve further refinement. ★ refusion sous vide → *refusion 2.* R вакуумный переплав. D Vakuum-Umschmelzen. E refusión al vacío. I rifusione sotto vuoto. N raffinerend vacuümsmelten. P przetop próżniowy. S vakuumomsmältning. (841)
3. **vacuum remelting arc furnace** : → *arc furnace 46*

remote

1. **remote alarm** : → *alarm 5*
2. **remote back-up protection** : → *protection 51*
3. **remote concentrator** : → *concentrator 7*
4. **remote control** : → *control 158*
5. **remote cut-off tube** (*Syn.* variable-mu tube) : → *tube 95*
6. **remote earth** : → *earth 33*
7. **remote ground** (*Syn.* remote earth) : → *earth 33*
8. **remote maintenance** : → *maintenance 40*

remotely-controlled

1. **remotely controlled substation** : → *substation 23*
2. **remotely-controlled (repeater) station** : → *station 29*

remotely-derived

1. **remotely-derived synchronization signal** : → *signal 158*

removable

1. **removable part** : → *part 8*

removal

1. **group removal cross-section** : → *cross-section 14*

removed

1. **removed position** : → *position 30*

rendering

1. **CIE 1974 general colour rendering index** : → *index 2*
2. **CIE 1974 special colour rendering index** : → *index 3*
3. **colour rendering** : effect of an illuminant on the colour appearance of objects by conscious or subconscious comparison with their colour appearance under a reference illuminant. *Note.* — In German, the term "Farbwiedergabe" is also applied to colour reproduction. ★ rendu des couleurs → *rendu 5.* R цветопередача. D Farbwiedergabe. E rendimiento en color. I resa dei colori. N kleurweergave. P oddawanie barw. S färgåtergivning. (845)
4. **colour rendering index** : → *index 5*
5. **contrast rendering factor** : → *factor 26*

renewable

1. **renewable fuse-link** : → *fuse-link 5*

rent

1. **meter rent** : an amount to be paid for a specified period for metering and allied equipment installed. ★ redevance de comptage → *redevance 2.* R плата за прокат счетчиков. D Meßpreis; Entgelt für Meßeinrichtungen A. E alquiler del equipo de medida. I canone per complesso di misura; nolo

contatore. N meterhuur. P opłata za dzierżawę aparatury pomiarowej. S mätarhyra. (691)

repair

1. **(instantaneous) repair rate** : → *rate 43*
2. **mean repair rate** : → *rate 55*
3. **mean repair time** : → *time 99*
4. **p-fractile repair time** : → *time 129*
5. **repair** : that part of corrective maintenance in which manual actions are performed on the item. ★ réparation → *réparation 9.* R активный ремонт. D Reparatur. E reparación. I riparazione. N reparatie. P naprawa. S reperation. (191)
6. **repair** (after radiation effects) : the partial or complete restoration of functional integrity in cells following damage caused by radiation. ★ restauration → *restauration 1.* R восстановление (после радиационного поражения). D Reparatur (nach Strahlenwirkungen). E recuperacion (después de los efectos de las radiaciones). I riparazione (dopo gli effetti delle radiazioni). N genezing (van stralingselfecten). P odtworzenie (popromienne). S läkning. (881)
7. **repair coverage** : → *coverage 6*
8. **repair duration** : → *duration 36*
9. **repair sleeve** : → *sleeve 4*
10. **repair time** : → *time 148*

repaired

1. **repaired item** : → *item 4*

repeat

1. **repeat broadcast** : → *broadcast 13*

repeatability

1. **repeatability** (of measurements) : the closeness of agreement between the results of sucessive measurements of the same value of the same quantity carried out: — by the same method — with the same measuring instruments — by the same observer — in the same laboratory — at quite short intervals of time — in unchanged conditions. . ★ répétabilité → *répétabilité 1.* R сходимость (измерений). D Wiederholbarkeit (von Messungen). E repetibilidad (de las medidas). I ripetibilità. N herhaalbaarheid. P powtarzalność (pomiarów). S repeterbarhet. (301)

repeated

1. **repeated call attempt** : → *attempt 9*
2. **repeated signal** : → *signal 159*

repeater

1. **analogue repeater** : a repeater for amplifying analogue signals or digital signals, but not capable of regenerating digital signals. ★ répéteur analogique → *répéteur 3.* R аналоговый ретранслятор. D Analog-Leitungsverstärker. E repetidor analógico. I ripetitore analogico. N analoge versterker. P wzmacniak analogowy. S analogt överdrag. (704)
2. **controlling (repeater) station** : → *station 6*
3. **dependent (repeater) station** : → *station 8*
4. **directly-powered (repeater) station** : → *station 9*
5. **elementary repeater section** : → *section 11*
6. **four-wire repeater** (*Syn.* 4-wire repeater) : a repeater for use at a point in a four-wire circuit and which provides gain for both directions of transmission. ★ répéteur (pour circuit) à quatre fils → *répéteur 7.* R четырехпроводный ретранслятор. D Vierdraht-Leitungsverstärker; 4-Draht-Leitungsverstärker. E repetidor (por circuito) de cuatro hilos. I ripetitore a quattro fili. N vierdraadsversterker. P wzmacniak dwutorowy. S fyrtrådsöverdrag. (704)
7. **high-frequency repeater distribution frame** : → *frame 33*
8. **locally-controlled (repeater) station** : → *station 15*
9. **optical regenerative repeater** : → *regenerative 1*
10. **optical repeater** : equipment, essentially including one or several amplifiers and associated devices whose input and output signals are optical, inserted at a point in a transmission medium. ★ répéteur optique → *répéteur 5.* R оптический ретранслятор. D LWL-Verstärker. E repetidor óptico. I ripetitore ottico. N optische versterker. P wzmacniak optyczny. S optoöverdrag. (731)
11. **power-feeding (repeater) station** : → *station 24*
12. **regenerative repeater** : a repeater for regenerating digital signals. *Note.* — A regenerative repeater is sometimes referred to as a "regenerator". ★ répéteur régénérateur → *répéteur 8.* R регенерационный ретранслятор. D regenerierender Leitungsverstärker; Regenerationsverstärker. E repetidor regenerador. I ripetitore rigeneratore. N regeneratieve versterker. P wzmacniak regenerujący (sygnały cyfrowe). S regenerator. (704)
13. **remotely-controlled (repeater) station** : → *station 29*
14. **repeater** : an equipment, essentially including one or more amplifiers and/or regenerators and associated devices, inserted at a point in a transmission medium. *Note.* — A repeater may operate in one or both directions of transmission. ★ répéteur → *répéteur 1.* R ретранслятор. D Leitungsverstärker. E repetidor. I ripetitore. N versterker. P wzmacniak. S överdrag. (704)
15. **repeater** : a contact, lamp or equipment used for remote indication of the position of equipment. ★ organe de répétition → *organe 3.* R повторитель. D Stellungsrückmelder. E órgano de repetición. I (organo) ripetitore. N afstandssignalering. P powtarzacz. S fjärrindikering. (811)
16. **repeater distribution frame** : → *frame 40*
17. **repeater station** : → *station 30*
18. **telegraph regenerative repeater** : a telegraph repeater designed to retransmit signals free from time distortion. ★ régénérateur (télégraphique) → *régénérateur 4.* R телеграфный регенератор. D Telegrafieentzerrer. E regenerador (telegráfico); repetidor regenerador telegráfico. I ripetitore telefrafico rigenerativo. N telegraafversterker met regeneratie. P regenerator telegraficzny. S regenerativt telegraföverdrag. (721)
19. **telegraph repeater** : a device which receives telegraph signals and immediately retransmits signals having the same meaning on the next line section. ★ translation télégraphique → *translation 7.* R телеграфный транслятор. D Telegrafiewiederholer. E repetidor telegráfico. I ripetitore telegrafico. N telegraafversterker. P translacja telegraficzna. S telegraföverdrag. (721)
20. **two-wire repeater** (*Syn.* 2-wire repeater) : a repeater for use at a point in a two-wire circuit and which provides gain for both directions of transmission. ★ répéteur (pour circuit) à deux fils → *répéteur 6.* R двухпроводный ретранслятор. D Zweidraht-Leitungsverstärker; 2-Draht-Leitungsverstärker. E repetidor (por circuito) de dos hilos. I ripetitore a due fili. N tweedraadsversterker. P wzmacniak jednotorowy. S tvåtrådsöverdrag. (704)
21. **2-wire repeater** (*Syn.* two-wire repeater) : → *repeater 20*
22. **4-wire repeater** (*Syn.* four-wire repeater) : → *repeater 6*

repeatered

1. **elementary repeatered section** (*Syn.* elementary repeater section) : → *section 11*

reperforator

1. **coupled reperforator and tape reader** (*Syn.* fully automatic reperforator transmitter distributor (USA); FRXD (abbreviation)) : a perforated tape retransmitter which ensures the retransmission of all the signals recorded by perforation including the last one. ★ réémetteur à bande perforée (à lecture complète) → *réémetteur 4.* R перфоленточный ретрансмиттер с полным считыванием. D gekoppelter Empfangslocher und Streifenleser. E reemisor con banda perforada (de lectura completa); reemisor FRXD. I lettore/perforatore di nastro. N gekoppelde bandponser en lezer. P nadajnik retransmisyjny taśmowy z czytnikiem. S kopplad reperforator och remsläsare. (721)
2. **fully automatic reperforator transmitter distributor** (*Syn.* coupled reperforator and tape reader) : → *reperforator 1*
3. **printing reperforator** : a reperforator which, when perforating, also prints on the tape the corresponding character or the symbol representing the function control. ★ récepteur-perforateur imprimeur → *récepteur-perforateur 2.* R печатающий реперфоратор. D Schreib-Empfangslocher. E receptor-perforador impresor. I ricevitore perforatore con stampa. N ontvangponser met afdruk. P reperforator drukujący. S typtryckande reperforator. (721)

4. **reperforator** (*Syn.* receiving perforator) : a receiver comprising essentially a tape perforator controlled by the received telegraph signals or data signals. ★ récepteur-perforateur → *récepteur-perforateur 1.* R реперфоратор; приемный перфоратор. D Empfangslocher. E receptor-perforador. I ricevitore perforatore. N ontvangponser. P reperforator. S reperforator. (721)
5. **reperforator switching** : → *switching 39*

repertoire

1. **repertoire of signals** : a complete set of signals used for telecommunication signalling, each having a name. ★ répertoire des signaux → *répertoire 1.* R состав сигналов. D Zeichenvorrat. E repertorio de señales (en señalización). I elenco dei segnali. N signaalalfabet; signaalrepertoire. P zestaw sygnałów. S signaluppsättning. (714)

repetency

1. **repetency** (*Syn.* wave number) : the reciprocal of the wavelength. ★ répétence → *répétence 1.* R коэффициент фазы; волновое число (при отсутствии потерь). D Wellenzahl; Wellendichte; Repetenz. E número de onda (lineal). I numero d'onda. N repetentie. P liczba falowa. S repetens. (101)
2. **repetency** (*Syn.* wave number) : → *number 36*

repetition

1. **automatic repetition Verdan system** : → *system 14*
2. **error correction by information feedback and repetition** : → *correction 10*
3. **error detection without repetition** : → *detection 10*
4. **pulse repetition frequency** : → *frequency 158*
5. **pulse repetition rate** (*Syn.* pulse repetition frequency) : → *frequency 158*
6. **pulse repetition rate modulation** (*Syn.* pulse frequency modulation) : → *modulation 52*
7. **repetition cycle** : → *cycle 16*
8. **repetition rate** : → *rate 82*
9. **signal repetition** : a function signal which is used in an error detecting and feedback system to request a repetition or to process a retransmission. *Note.* — In the International Telegraph Alphabet No.3 this signal corresponds to the code combination A Z Z A Z A A. ★ signal de répétition → *signal 138.* R сигнал повторения. D Wiederholungssignal. E señal de repetición. I richiesta di ripetizione. N signaalherhaling. P sygnał powtórzenia. S repeteringssignal. (721)
10. **testing repetition cycle** : → *cycle 21*

repetitive

1. **circuit repetitive peak off-state voltage** : → *voltage 28*
2. **circuit repetitive peak reverse voltage** : → *voltage 29*

replacement

1. **replacement battery** : → *battery 58*

replay

1. **replay** (*Syn.* reproduction) : → *reproduction 5*
2. **standard replay chain** : a replay chain having the same response as that equipped with an ideal reproducing head, the opencircuit voltage of which is applied to an amplifier having a specified response curve. ★ chaîne de lecture normale → *chaîne 7.* R стандартный канал воспроизведения. D Standard-Wiedergabekette. E cadena de lectura normal. I catena di riproduzione normale. N standaard weergeefketen. P tor odczytu standardowy. S normerad avspelningsutrustning. (806)

repopulation

1. **repopulation** (after radiation effects) : the replacement of functional cells (usually by proliferation) following or during irradiation. ★ régénération → *régénération 3.* R восстановление популяции (после радиационного поражения). D Repopulation (nach Strahlenwirkungen). E regeneración (después de los efectos de las radiaciones). I ripopolazione (dopo gli effetti delle radiazioni). N opnieuw plaatsen van cellen (na stralingseffecten). P regeneracja (popromienna). S återväxt. (881)

representation

1. **code representation** (*Syn.* code combination) : → *combination 2*
2. **representation unit** : → *unit 52*
3. **spectral representation** (*Syn.* complex spectrum) : a complex function of frequency representing a signal or noise by its Fourier transform or by the sequence of the complex coefficients of its Fourier series. *Note.* — The modulus and the argument of the complex spectrum are the amplitude spectrum and the phase spectrum respectively. ★ spectre complexe → *spectre 12.* R спектральное представление. D spektrale Darstellung; komplexes Spektrum. E espectro complejo; representación espectral. I rappresentazione spettrale; spettro complesso. N spectrale afbeelding; complex spectrum. P widmo zespolone. S komplext spektrum. (702)

reprocessing

1. **fuel reprocessing** : the processing of nuclear fuel, after its use in a reactor, to remove fission products and recover fissile and fertile material. ★ traitement du combustible irradié → *traitement 11.* D Brennstoffaufarbeitung. E relaboreo del combustible. I trattamento del combustibile irradiato. N opwerken van splijtstof. P przeróbka paliwa wypalonego. S bränsleupparbetning. (026)

reproduce

1. **maximum start time to record/reproduce speed** : → *time 88*
2. **maximum stopping time from record/reproduce speed** : → *time 90*
3. **reproduce channel unbalance** : → *unbalance 2*

reproducer

1. **magnetic reproducer** : an apparatus consisting of a magnetic recording medium transport system, reproducing heads, and associated electronic devices. ★ lecteur magnétique → *lecteur 7.* R устройство воспроизведения магнитной записи. D magnetisches Wiedergabegerät. E lector magnético. I riproduttore magnetico. N magnetische weergever. P odczytywacz magnetyczny; urządzenie do odczytywania magnetycznego. S magnetisk avspelningsapparat. (806)
2. **video tape reproducer** : an equipment for reproducing video and audio signals on magnetic tape. ★ magnétoscope de lecture → *magnétoscope 5.* R видеомагнитофон воспроизводящий. D Video-Bandwiedergabegerät; Videobandspieler. E magnetoscopio de lectura. I video-riproduttore. N beeldbandweergever. P magnetowid taśmowy odczytujący. S videobandavspelare. (806)

reproducibility

1. **reproducibility** (of measurements) : the closeness of the agreement between the results of measurements of the same value of the same quantity, where the individual measurements are made: by different methods with different measuring instruments by different observers in different laboratories after intervals of time quite long compared with the duration of a single measurement under different customary conditions of use of the instruments employed. *Note.* — The term "reproducibility" also applies to the case where only certain of the preceding conditions are taken into account. ★ reproductibilité → *reproductibilité 1.* R воспроизводимость (измерений). D Reproduzierbarkeit (von Messungen). E reproductibilidad (de las medidas). I riproducibilita. N reproduceerbaarheid. P odtwarzalność (pomiarów). S reproducerbarhet. (301)

reproducible

1. **reproducible failure** (*Syn.* systematic failure) : → *failure 49*

reproducing

1. **elliptic reproducing stylus tip** : → *stylus tip 3*
2. **Hall effect reproducing head** : → *head 6*
3. **ideal reproducing head** : → *head 12*
4. **included angle of a reproducing stylus tip** : → *angle 32*
5. **magnetic recording/reproducing head** : → *head 19*
6. **magnetic reproducing head** : → *head 20*
7. **recording/reproducing electro-acoustical frequency response** : → *frequency-response 9*

8. **recording/reproducing harmonic distortion** : → *distortion 62*
9. **recording/reproducing overall amplitude/frequency response** : → *response 10*
10. **reel-to-reel recording/reproducing equipment** : → *equipment 60*
11. **reproducing chain** : a chain for transmission of the signals from the recording medium to the output of the system. ★ chaîne de lecture → *chaîne 6.* R канал воспроизведения. D Wiedergabekette. E cadena de lectura. I catena di riproduzione. N weergeefketen. P tor odczytu. S avspelningskedja; återgivningskedja. (806)
12. **reproducing channel** ; → *channel 40*
13. **reproducing characteristic** : → *characteristic 71*
14. **reproducing electrical amplitude/frequency response** : → *response 11*
15. **reproducing head** (*Syn.* pick-up head) : → *pick-up head 7*
16. **reproducing head absolute efficiency** : → *efficiency 37*
17. **reproducing loss** : → *loss 83*
18. **reproducing stylus tip** : → *stylus tip 5*
19. **reproducing system** : → *system 173*
20. **spherical reproducing stylus tip** : → *stylus tip 6*
21. **spherical reproducing stylus tip radius** : → *radius 5*

reproduction

1. **magnetic reproduction** : a process of reproducing recorded signals from a magnetic medium. ★ lecture magnétique → *lecture 16.* R воспроизведение магнитной записи. D magnetische Wiedergabe. E lectura magnética. I riproduzione magnetica. N magnetische weergave. P odczytywanie magnetyczne; odgrywanie magnetyczne; odtwarzanie magnetyczne. S magnetisk avspelning. (806)
2. **monophonic recording/reproduction** (*Syn.* monophony) : recording and reproducing techniques using one channel. ★ monophonie → *monophonie 2.* R монофоническая записьвоспроизведение. D monophone Aufnahme/Wiedergabe; Monophonie. E monofonia. I monofonia. N monofonische opname/weergave. P monofonia. S monofonisk inspelning/återgivning. (806)
3. **monophonic reproduction** : reproduction of a single or multichannel recording through a single channel. ★ lecture monophonique → *lecture 17.* R монофоническое воспроизведение. D monophone Wiedergabe. E lectura monofónica. I riproduzione monofonica. N monofonische weergave. P odczytywanie monofoniczne. S monofonisk återgivning; monoåtergivning. (806)
4. **multi-channel reproduction** : a reproducing technique using several channels. *Note :* e.g.: stereophony (two channels), quadrophony (four channels). ★ lecture multivoie → *lecture 18.* R многоканальное воспроизведение. D Mehrkanal-Wiedergabe. E lectura multicanal. I riproduzione pluricanale. N meerkanalenweergave. P odczytywanie wielokanałowe. S flerkanalsåtergivning. (806)
5. **reproduction** (*Syn.* playback; replay) : the regeneration of recorded signals in their original form. ★ lecture → *lecture 15.* R воспроизведение. D Wiedergabe. E lectura; reproducción. I riproduzione. N weergave. P odczytywanie; odgrywanie; odtwarzanie. S avspelning; återgivning. (806)
6. **reproduction ratio** : → *ratio 76*
7. **stereophonic reproduction** : reproduction of a multi-channel recording through two channels. ★ lecture stéréophonique → *lecture 19.* R стереофоническое воспроизведение. D stereophone Wiedergabe. E lectura estereofónica. I riproduzione stereofonica. N stereofonische weergave. P odczytywanie stereofoniczne. S stereofonisk återgivning; stereoåtergivning. (806)

repulsion

1. **compensated repulsion motor** : → *motor 16*
2. **repulsion induction motor** : → *induction motor 5*
3. **repulsion motor** : → *motor 81*
4. **repulsion start induction motor** : → *induction motor 6*

request

1. **facility request signal** : → *signal 87*
2. **identification request** : a transmission control used as a request for a response from a remote terminal ; the response may include the terminal identification, or the state of the terminal. ★ demande d'identification → *demande 3.* R запрос идентификации. D Identifizierungsaufforderung. E demanda de identificación. I richiesta di identificazione. N vraag om identificatie. P żądanie znamienia. S identitetsförfrågning. (721)
3. **request cycle** (*Syn.* RQ cycle) : → *cycle 19*
4. **request data transfer** : → *transfer 23*
5. **statistics on request** : → *statistics 4*

required

1. **required function** : → *function 28*
2. **required time** : → *time 149*

re-radiation

1. **re-radiation** (*Syn.* secondary radiation) : radiation from a conductive or dielectric body excited by an incident radio wave, resulting in a wave superimposed upon the incident wave. ★ rerayonnement → *rerayonnement 2.* R переизлучение; вторичное излучение. D Rückstrahlung; Streustrahlung. E rerradiación; radiación secundaria. I reirradiazione; radiazione secondaria. N secundaire straling. P promieniowanie wtórne. S sekundärstrålning. (712)

re-recording

1. **re-recording** : an operation consisting in obtaining, by any method, on a recording medium all or part of a previously recorded programme. ★ réenregistrement → *réenregistrement 1.* R перезапись. D Umspielen; Umschnitt. E nuevo registro. I riregistrazione. N heropname. P przepisywanie. S överspelning. (806)

re-refining

1. **re-refining** : the use of refining techniques on used insulating liquids to obtain products that are substantially equivalent in quality to the unused ones intended for the same purpose. ★ reraffinage → *reraffinage 1.* R повторная очистка. D Zweitraffination. E refino de aceite usado. I riraffinazione. N herraffinage. P rafinacja wtórna. S omraffinering. (212)

re-routing

1. **re-routing** : the recommencement of route selection from the first point of routing control upon encountering congestion at some exchange or on some route at an intermediate point in the connection being established. ★ réacheminement → *réacheminement 2.* R перенаправление. D Verkehrsumlenkung (erneute Wegsuche). E reencaminamiento. I reinstradamento. N herrouteren. P przekierowanie. S omdirigering. (714)
2. **re-routing** (in a signalling network) : the selection of a permitted alternative signalling route when a signal message encounters congestion, fault conditions, etc. ★ réacheminement → *réacheminement 3.* R перенаправление (в сети сигнализации). D Verkehrsumlenkung. E reencaminamiento (en una red de senjalización). I reinstradamento. N herroutering. P przekierowanie sygnalizacji. S omdirigering. (714)
3. **re-routing** : when there is congestion in a transit exchange, the re-direction of the call backwards to a preceding exchange in the already partly established connection with a view to finding an alternative traffic routing from that exchange. ★ réacheminement → *réacheminement 4.* R перемаршрутизация. D Verkehrsumleitung. E reencaminamiento. I reistradamento. N omroutering. P przekierowanie. S omdirigering. (721)

rescue

1. **mine rescue luminaire** : → *luminaire 15*

research

1. **research reactor** : → *reactor 36*

reserve

1. **cold reserve** : the total available capacity of generating sets in reserve for which the starting up may take several hours. ★ réserve froide → *réserve 7.* R неоперативный резерв мощности. D Kaltreserve. E reserva fría. I riserva fredda. N koude reserve. P rezerwa zimna. S kall reserv; långsam reserv. (602)
2. **energy reserve of a reservoir** : the amount of electricity which could be generated by power stations supplied by a reservoir by the complete draining of its useful water reserve.

★ réserve en énergie électrique d'un réservoir → *réserve 6.* R энергетический эквивалент запаса воды. D Arbeitsvorrat eines Speichers. E reserva en energía eléctrica de un embalse. I riserva in energia di un serbatoio. N elektrische energiereserve van een stuwmeer. P rezerwa energii elektrycznej w zbiorniku. S energiinnehåll i ett magasin. (602)

3. **reserve battery** : → *battery 59*
4. **reserve busbar** : → *busbar 12*
5. **reserve power of a system** : → *power 167*
6. **reserve signalling link** : → *link 35*
7. **spinning reserve of a system** : the difference between the total available capacity of all generating sets already coupled to the system and their actual loading. ★ réserve tournante d'un réseau → *réserve 8.* R включенный резерв мощности энергосистемы. D rotierende Reserve (eines Netzes). E reserva rodante de una red. I riserva rotante di una rete. N draaiende reserve van een net. P rezerwa wirująca systemu elektroenergetycznego. S rullande reserv; momentan reserv. (602)
8. **useful water reserve of a reservoir** : the volume of water contained at a given moment above the lowest normally allowable working level. ★ réserve utile en eau d'un réservoir → *réserve 9.* R наличный запас воды в водохранилище. D Speichernutzinhalt. E reserva útil en agua de un embalse. I riserva utile in acqua di un serbatoio. N nuttige waterreserve van een stuwmeer. P rezerwa użyteczna pojemności wody w zbiorniku. S magasinsinnehåll. (602)

reserved

1. **nominated reserved circuit** : → *circuit 124*

reservoir

1. **energy capability of a reservoir** : → *capability 4*
2. **energy reserve of a reservoir** : → *reserve 2*
3. **gas reservoir** (*Syn.* reservoir) : → *reservoir 5*
4. **pressure reservoir** (*Syn.* pressure tank) : → *tank 4*
5. **reservoir** (*Syn.* gas reservoir) : a device used to maintain the required gas pressure within the tube. ★ réservoir → *réservoir 5.* R генератор газа. D Reservoir. E depósito. I serbatoio. N gasreservoir. P zbiornik gazu. S gasreservoar. (531)
6. **reservoir fullness factor** : → *factor 157*
7. **reservoir power station** : → *power station 19*
8. **tail water reservoir** : a reservoir for regulating the waterflow in the river and to downstream hydroelectric power stations. ★ bassin de compensation → *bassin 1.* R водохранилище компенсирующего регулорования. D Ausgleichsbecken. E embalse de compensación. I bacino di compenso. N uitloopmeer. P zbiornik wyrównawczy dolny. S nedströmsmagasin. (602)
9. **useful water capacity of a reservoir** : → *capacity 30*
10. **useful water reserve of a reservoir** : → *reserve 8*

reset

1. **reset force** : → *force 28*
2. **reset position** : → *position 31*
3. **reset time** : → *time 150*
4. **to reset** (for an electrical relay) (see Figure 446-1) : to re-attain an initial condition or release condition. ★ retourner → *retourner 1.* R завершать возврат (для электрического реле). D rückkehren. E reponer (para un relé eléctrico). I ripristinare; ritornare. N herstellen; terugzetten. P powrócić do stanu spoczynku. S återvända. (446)
5. **to reset** : to change the state of a traffic carrying device or logic unit from active to idle or to erase a variable value. ★ remettre à zéro → *remettre 1.* R вернуть в исходное положение. D zuruecksetzen. E poner a cero. I rilasciare; mandare a riposo. N terugstellen; terugzetten. P zwolnienie. S återställa. (714)

resetting

1. **maximum resetting time** : → *time 86*
2. **resetting percentage** : → *percentage 7*
3. **resetting ratio** : → *ratio 77*
4. **resetting time** : → *time 151*
5. **resetting value** : → *value 55*
6. **resetting voltage** : → *voltage 174*

residual

1. **probability of residual information loss** : → *probability 10*
2. **rate of residual information loss** : → *rate 78*
3. **residual acceleration** : → *acceleration 7*
4. **residual attenuation** : → *attenuation 30*
5. **residual current** : → *current 168*
6. **residual current** : → *current 169*
7. **residual current** : → *current 170*
8. **residual current transformer** : → *transformer 54*
9. **residual electric polarization** : → *polarization 41*
10. **residual error probability** : → *probability 11*
11. **residual error rate** : → *rate 83*
12. **residual error-rate** : → *error-rate 1*
13. **residual loss** : → *loss 84*
14. **residual radiation** : → *radiation 105*
15. **residual time constant** : → *time constant 17*
16. **residual voltage** : → *voltage 175*
17. **residual voltage for zero current control** : → *voltage 176*
18. **residual voltage for zero magnetic field** : → *voltage 177*
19. **residual voltage (of an arrester)** : → *voltage 178*
20. **residual voltage transformer** : → *transformer 55*
21. **residual voltage winding** : → *winding 56*

resilience

1. **lateral resilience** (*Syn.* lateral elasticity) : → *elasticity 1*
2. **vertical resilience** (*Syn.* vertical elasticity) : → *elasticity 2*

resilient

1. **resilient contact** : → *contact 100*
2. **resilient gearing** : → *gearing 4*

resin

1. **casting resin** (*Syn.* casting plastic) : a liquid compound based on a thermosetting plastic, that can be poured or otherwise introduced into a mould and which hardens without pressure into solid articles. *Note.* — The cured product has self supporting properties, and usually is removed from the mould. See also, *embedding.* ★ résine de coulée → *résine 2.* R литьевая смола; литьевой пластик. D Gießharzmasse. E resina de colada; plástico de colada. I resina da colata; plastica da colata. N giethars; gietplastic. P żywica lana. S gjutharts. (212)
2. **encapsulating resin** : a high viscosity compound which is used for encapsulating. It is normally highly filled and not expected to provide impregnation of fine wires, etc. See also, *encapsulating.* ★ résine d'encapsulage → *résine 4.* R капсулирующий состав. D Harzmasse zum Umgießen. E resina de encapsulado. I resina da incapsulamento. N hars voor ingieten. P żywica pokryciowa. S inkapslingsharts. (212)
3. **impregnating resin** : a solventless compound which is applied by casting or dipping techniques and is of low viscosity, to permit complete penetration of resin into fine windings, etc., and which solidifies after application. See also, *varnish.* ★ résine d'imprégnation → *résine 5.* R пропиточный состав. D Tränkharzmasse. E resina de impregnación. I resina da impregnazione. N impregneerhars. P żywica impregnacyjna. S impregneringsharts. (212)
4. **resin** : a solid, semi-solid or pseudo-solid organic material that has an indefinite and often high relative molecular mass, exhibits a tendency to flow when subjected to stress, usually has a softening or melting range, and usually fractures conchoidally. In a broad sense, the term is used to designate any polymer that is a basic material for plastics. *Note.* — Liquids used for impregnation and subsequently solidified are also called *resins* ★ résine → *résine 1.* R смола. D Harz. E resina. I resina N hars. P żywica. S harts. (212)
5. **trickle resin** : an impregnating resin applied by means of a trickle procedure. ★ résine de goutte à goutte → *résine 3.* R капельный состав. D Träufelharzmasse. E resina de impregnación gota a gota. I resina da goccia a goccia. N spuithars. P żywica kroplowa. S droppimpregneringsharts. (212)

resistance

1. **acoustic resistance** : real part of the acoustic impedance. ★ résistance acoustique → *résistance 35.* R акустическое сопротивление. D akustischer Widerstand. E resistencia acústica. I resistenza acustica. N akoestische weerstand. P rezystancja akustyczna. S akustisk resistans. (801)
2. **anode a.c. resistance** : see "electrode a.c. resistance". ★ résistance d'anode en courant alternatif → *résistance 46.* R внутреннее сопротивление анода переменному току. D Innenwiderstand. E resistencia de ánodo en corriente alterna. I resistenza anodica in corrente alternata. N inwendige weerstand. P rezystancja dynamiczna anody. S anodresistans för växelström. (531)
3. **(apparent) internal resistance** (of a cell) : for a cell the quotient of the change of voltage to the corresponding change of current, under specified conditions. ★ résistance interne (apparente) → *résistance 76.* R внутреннее сопротивление (элемента). D (Schein-)Innenwiderstand (einer Zelle). E resistencia interna (aparente) (de un elemento). I resistenza interna (apparente) (di un elemento). N (schijnbare) inwendige weerstand (van een cel). P rezystancja wewnętrzna ogniwa (pozorna). S inre resistans. (111,486)
4. **arc resistance** : the ability of an insulating material to resist the influence of an electric arc along its surface under specified conditions. ★ résistance à l'arc → *résistance 33.* R дугостойкость диэлектрика. D Lichtbogenbeständigkeit; Lichtbogenwiderstand. E resistencia al arco. I resistenza all'arco. N boogvastheid. P odporność na łuk elektryczny. S ljusbågshärdighet. (212)
5. **arc resistance heating** (*Syn.* submerged arc heating) : → *heating 52*
6. **asynchronous resistance** : the quotient of (a) the active component of the average voltage at rated frequency assumed to be sinusoidal and balanced, applied to the primary winding of a machine rotating out of synchronism, and (b) the average current component at the same frequency. ★ résistance asynchrone → *résistance 40.* R асинхронное активное сопротивление. D Asynchronwiderstand. E resistencia asíncrona. I resistenza asincrona. N asynchrone weerstand. P rezystancja asynchroniczna. S asynkronresistans. (411)
7. **contact resistance** : the electrical resistance of a mated set of contacts under specified conditions. ★ résistance de contact → *résistance 48.* R сопротивление контактное. D Durchgangswiderstand. E resistencia de contacto. I resistenza di contatto. N overgangsweerstand; contactweerstand. P rezystancja stykowa; rezystancja zestykowa. S övergångsresistans. (581)
8. **critical build-up resistance** : the highest resistance of the shunt winding circuit supplied from the primary winding, for which the machine voltage builds up under specified conditions. ★ résistance critique d'amorçage → *résistance 44.* R критическое сопротивление в цепи возбуждения. D kritischer Selbsterregungs-Widerstand. E resistencia crítica de cebado. I resistenza critica di autoeccitazione. N kritische weerstand voor zelfbekrachting. P krytyczna rezystancja samowzbudzenia. S kritisk resistans. (411)
9. **critical resistance** (of a permanent-magnet moving-coil measuring element) : the minimum value of resistance to be connected across the terminals of the measuring element in order to cause its movement to be aperiodic. ★ résistance critique → *résistance 43.* R критическое сопротивление (магнитоэлектрического измерительного механизма с подвижной катушкой). D kritischer Widerstand (eines Drehspul-Messgerätes). E resistencia crítica (de un elemento de bobina móvil e imán fijo). I resistenza critica nominale. N kritische weerstand (van een draaispoelinstrument). P rezystancja krytyczna (przyrządu magnetoelektrycznego). S kritisk resistans. (302)
10. **critical speed in resistance braking** : → *speed 10*
11. **dark resistance** : the quotient of the voltage across the device by the current through the device in the absence of illuminance. ★ résistance d'obscurité → *résistance 65.* R темновое сопротивление. D Dunkelwiderstand. E resistencia de oscuridad. I resistenza di oscuramento. N donkerweerstand. P rezystancja ciemna. S mörkerresistans. (531)
12. **direct resistance furnace** : → *furnace 14*
13. **direct resistance heating** : → *heating 10*
14. **direct resistance heating equipment** : → *heating 11*
15. **earth resistance meter** : → *meter 18*
16. **electrode a.c. resistance** : the real component of the electrode impedance. ★ résistance d'électrode en courant alternatif → *résistance 60.* R сопротивление электрода переменному току. D Innenwiderstand. E resistencia de electrodo en corriente alterna. I resistenza di elettrodo in corrente alternata. N wisselstroomweerstand van een elektrode. P rezystancja dynamiczna elektrody; opór dynamiczny elektrody. S elektrodresistans för växelström. (531)
17. **electrode d.c. resistance** : at a stated operating point, the quotient of the direct electrode voltage by the direct electrode current. ★ résistance d'électrode en courant continu → *résistance 61.* R сопротивление электрода постоянному току. D innerer Elektrodengleichstromwiderstand. E resistencia de electrodo en corriente continua. I resistenza di elettrodo in corrente continua. N gelijkstroomweerstand van een elektrode. P rezystancja statyczna elektrody; opór statyczny elektrody. S elektrodresistans för likström. (531)
18. **(electronic)(power) resistance control** : → *control 95*
19. **equivalent noise resistance** : the resistance that, if introduced into the input circuit of an ideal, noiseless tube, would produce at 290 K, over the appropriate frequency band, noise of the same level as that occurring in the actual tube. ★ résistance équivalente de bruit → *résistance 71.* R эквивалентное сопротивление шумов. D äquivalenter Rauschwiderstand. E resistencia equivalente de ruido. I resistenza equivalente di rumore. N equivalente ruisweerstand. P rezystancja zastępcza szumów. S ekvivalent brusresistans. (531)
20. **(equivalent) noise resistance** (of a one-port device) (R_{eq}) : quantity R_{eq}, having the dimensions of resistance, used to express the equivalent noise voltage E_n of a one-port device through the relationship :

$$R_{eq} = \frac{E_n^2}{4\,k\,T_0\,\Delta f}$$

where T_0 is a reference thermodynamic temperature, fixed by convention around 290 K, Δf is the bandwidth considered and k is Boltzmann's constant. *Note.* — A receiving antenna can be regarded as a one-port device when viewed from its output port. ★ résistance (équivalente) de bruit → *résistance 72.* R (эквивалентное) шумовое сопротивление (двухполюсника). D (äquivalenter) Rauschwiderstand (eines Eintors). E resistencia (equivalente) de ruido (de un dispositivo monopuerta). I resistenza (equivalente) di rumore (di un elemento a una porta). N (vervangende) ruisweerstand (van een eenpoort). P rezystancja (równoważna) szumu (jednowrotnika). S ekvivalent brusresistans. (702)
21. **(equivalent) resistance** : the real part of a complex impedance. ★ résistance (équivalente) → *résistance 70.* R (активное) сопротивление. D Resistanz; Wirkwiderstand. E resistencia (equivalente). I resistenza (equivalente). N resistantie. P rezystancja. S resistans. (131)
22. **equivalent series resistance (of a capacitor)** : a virtual resistance which, if connected in series with an ideal capacitor of capacitance value equal to that of the capacitor in question, would have a power loss equal to the active power dissipated in that capacitor under specified operating conditions. ★ résistance-série équivalente (d'un condensateur) → *résistance-série 1.* R эквивалентное последовательное сопротивление (конденсатора). D äquivalenter Serienwiderstand (eines Kondensators). E resistencia serie equivalente (de un condensador). I resistenza equivalente serie (di un condensatore). N equivalente serieweerstand van een condensator. P rezystancja szeregowa równoważna (kondensatora). S ekvivalent serieresistans. (436)
23. **flow resistance** : quotient of the difference of air pressure between the two faces of a sheet of porous material by the volume velocity of airflow through the sheet. ★ résistance à l'écoulement → *résistance 34.* R сопротивление продуванию. D ..... E resistencia al flujo. I resistenza al flusso. N stromingsweerstand. P rezystancja (akustyczna) przepływu objętościowego. S strömningsmotstånd. (801)
24. **forward slope resistance** : the value of the resistance calculated from the slope of the straight line approximation of the forward current-voltage characteristic. ★ résistance apparente directe → *résistance 39.* R динамическое сопротивление прямой ветви характеристики. D (Vorwärts-)Ersatzwiderstand. E resistencia aparente directa.

I resistenza apparente diretta. N schijnbare. P rezystancja nachyleniowa. S differentiell framresistans. (521)

25. **heating resistance collar** (*Syn.* heating resistance pad) : → *pad 3*
26. **heating resistance mat** (*Syn.* heating resistance pad) : → *pad 3*
27. **heating resistance pad** : → *pad 3*
28. **indirect resistance furnace** (*Syn.* indirect resistance oven) : → *oven 3*
29. **indirect resistance heating** : → *heating 41*
30. **indirect resistance kiln** (*Syn.* indirect resistance oven) : → *oven 3*
31. **indirect resistance oven** : → *oven 3*
32. **insulation resistance** : the resistance under specified conditions between two conductive bodies separated by insulating material. ★ résistance d'isolement → *résistance 64.* R сопротивление изоляции. D Isolationswiderstand. E resistencia de aislamiento. I resistenza di isolamento. N isolatieweerstand. P rezystancja izolacji. S isolationsresistans. (151,212)
33. **insulation resistance meter** : → *meter 27*
34. **insulation resistance test** : → *test 40*
35. **load resonance resistance** (of a piezoelectric resonator) (R_L) : the equivalent resistance of a piezoelectric resonator in series with a stated load capacitance at the load resonance frequency f_L. ★ résistance de résonance avec capacité de charge → *résistance 56.* R резонансное сопротивление под нагрузкой (пьезоэлектрического резонатора). D Lastresonanzwiderstand (eines piezoelektrischen Resonators). E resistencia de resonancia con capacidad de carga (de un resonador piezoeléctrico). I resistenza di risonanza con capacità di carico (di un risuonatore piezoelettrico). N resonantieweerstand bij capacitieve belasting. P rezystancja rezonatora obciążonego pojemnością. S lastresonansresistans. (561)
36. **magnetic loss resistance** : in an equivalent electrical circuit representing a magnetic circuit with a winding or other coupling device, the series or parallel resistance in which the dissipated power is equal to the magnetic losses in the magnetic circuit. ★ résistance de pertes magnétiques → *résistance 52.* R сопротивление магнитных потерь. D magnetischer Verlustwiderstand. E resistencia de pérdidas magnéticas. I resistenza di perdite magnetiche. N weerstand ten gevolge van magnetische verliezen. P rezystancja strat magnetycznych. S magnetisk förlustresistans. (221)
37. **mechanical resistance** : real part of a mechanical impedance. ★ résistance mécanique → *résistance 78.* R механическое сопротивление. D mechanische Resistanz; mechanischer Reibwiderstand. E resistencia mecánica. I resistenza meccanica. N mechanische weerstand. P rezystancja mechaniczna. S mekanisk resistans. (801)
38. **motional resistance** (of a piezoelectric resonator) (R_1) : the resistance of the motional or series arm of the equivalent circuit. ★ résistance dynamique → *résistance 66.* R динамическое сопротивление (пьезоэлектрического резонатора). D dynamischer Verlustwiderstand (eines piezoelektrischen Resonators). E resistencia dinámica (de un resonador piezoeléctrico). I resistenza dinamica (di un risuonatore piezoelettrico). N dynamische weerstand. P rezystancja dynamiczna. S dynamisk resistans. (561)
39. **negative differential resistance region** : → *region 13*
40. **negative phase-sequence resistance** (of a polyphase system) : the quotient of (a) the in-phase fundamental component of negative phase-sequence primary voltage, due to sinusoidal negative phase-sequence primary current of rated frequency, and (b) the value of this current, the machine running at rated speed. ★ résistance inverse → *résistance 77.* R активное сопротивление обратной последовательности. D Inverswiderstand. E resistencia inversa. I resistenza di sequenza inversa. N inverse weerstand. P rezystancja składowej przeciwnej. S minusföljdsresistans. (411)
41. **on-state slope resistance** : a resistance equal to the slope of the straight line used when determining the threshold voltage from the current-voltage characteristic. ★ résistance apparente à l'état passant → *résistance 38.* R динамическое сопротивление в открытом состоянии. D Ersatzwiderstand. E resistencia aparente en estado conductor. I resistenza differenreziale in stato di conduzione. N ..... P rezystancja dynamiczna przewodzenia. S differentiell ledresistans. (521)
42. **positive phase-sequence resistance** (of a polyphase system) : the quotient of (a) the in-phase component of positive phase-sequence primary voltage corresponding to losses in the primary winding, and stray load losses due to sinusoidal positive phase-sequence primary current, and (b) the value of this current the machine running at rated speed. ★ résistance directe → *résistance 63.* R активное сопротивление прямой последоватльности. D Mitwiderstand. E resistencia directa. I resistenza di sequenza positiva. N directe weerstand. P rezystancja składowej zgodnej. S plusföljdsresistans. (411)
43. **radiation resistance** (of an antenna) : the ratio of the total power radiated by an antenna to the square of the effective value of the antenna current at a given point, usually the feed point or a current standing wave maximum. ★ résistance de rayonnement → *résistance 53.* R сопротивление излучения (антенны). D Strahlungswiderstand (einer Antenne). E resistencia de radiación (de una antena). I resistenza d'irradiazione. N stralingsweerstand (van een antenne). P rezystancja promieniowania (anteny). S strålningsresistans. (712)
44. **resistance** (of an ideal resistor) : the quotient of the voltage by the current. ★ résistance → *résistance 30.* R сопротивление (идеального резистора). D Widerstandswert; Resistanz (eines idealen Widerstandes). E resistencia (de una resistencia ideal). I resistenza (di un resistore ideale). N weerstand (van een ideale weerstand). P rezystancja (rezystora idealnego). S resistans (hos en ideal resistor). (131)
45. **resistance braking** : → *braking 39*
46. **resistance control** : → *control 160*
47. **resistance furnace** : → *furnace 42*
48. **resistance grading (of corona shielding)** : → *grading 3*
49. **resistance heating** : → *heating 50*
50. **resistance meter** (*Syn.* ohmmeter) : → *ohmmeter 2*
51. **resistance start split phase motor** : → *motor 82*
52. **resistance switchgroup** : → *switchgroup 7*
53. **resistance test** : → *test 67*
54. **resistance to abrasion** (of enamelled wire) : the force required to remove the enamel from the wire in a specified test. ★ résistance à l'abrasion → *résistance 32.* R сопротивление истиранию (эмалированного провода). D Abriebwiderstand (eines Lackdrahtes). E resistencia a la abrasión (de un hilo esmaltado). I resistenza all'abrasione (di un filo smaltato). N slijtvastheid. P odporność na ścieranie (drutu emaliowanego). S nötningstålighet. (212)
55. **resistance under illumination** : the quotient of the voltage across the device by the current through the device under stated illuminance. ★ résistance sous éclairement → *résistance 81.* R световое сопротивление. D Hellwiderstand. E resistencia bajo iluminación. I resistenza in presenza d'illuminamento. N weerstand bij belichting. P rezystancja przy naświetlaniu. S brinnresistans. (531)
56. **resistance welding** : → *welding 17*
57. **resistance welding electrode** : → *electrode 79*
58. **resonance resistance** (of a piezoelectric resonator) (R_r) : the equivalent resistance of a piezoelectric resonator alone at its resonance frequency f_r. ★ résistance de résonance → *résistance 55.* R резонансное сопротивление (пьезоэлектрического резонатора). D Resonanzwiderstand (eines piezoelektrischen Resonators). E resistencia de resonancia (de un resonador piezoeléctrico). I resistenza di risonanza (di un risuonatore piezoelettrico). N resonantieweerstand. P rezystancja rezonansowa. S resonansresistans. (561)
59. **rotor resistance starting** : → *starting 15*
60. **specific acoustic resistance** : real part of the specific acoustic impedance. ★ résistance acoustique spécifique → *résistance 36.* R удельное акустическое сопротивление. D spezifische Schallresistanz; Feldresistanz. E resistencia acústica específica. I resistenza acustica specifica. N specifieke akoestische weerstand. P rezystancja akustyczna jednostkowa. S ljudfältsresistans. (801)
61. **specific air resistance** : the specific resistance due to the effect of air pressure on the front of the train and of air friction on the sides, top, bottom, etc. ★ résistance spécifique de l'air → *résistance 84.* R удельное сопротивление воздуха. D spezifischer Luftwiderstand. E resistencia específica al aire. I resistenza specifica dell'aria. N specifieke luchtweerstand.

P opór jednostkowy aerodynamiczny. S specifikt luftmotstånd. (811)

62. **specific flow resistance** : quotient of the difference in air pressure between the two faces of a sheet of porous material by the particle velocity of airflow through the sheet. ★ résistance spécifique à l'écoulement → *résistance 82.* R удельное сопротивление продуванию. D Strömungsfeldwiderstand. E resistencia específica al flujo. I resistenza al flusso specifica. N specifieke stromingsweerstand. P rezystancja (akustyczna) przepływu czątek. S specifikt strömningsmotstånd. (801)

63. **specific resistance due to curves** : the specific resistance due to the component of rolling friction produced in curves. ★ résistance spécifique due aux courbes → *résistance 86.* R удельное сопротивление движению в кривой. D spezifischer Kurvenwiderstand. E resistencia específica a las curvas. I resistenza specifica in curva. N specifieke boogweerstand. P opór jednostkowy jazdy na łukach. S specifikt kurvmotstånd. (811)

64. **specific resistance on inclined track (gradient)** : the specific resistance due to the component of gravitational force on a given gradient. *Note.*—If the slope is downward in the direction of travel the value will be negative. ★ résistance spécifique due à la rampe ou à la pente → *résistance 85.* R удельное сопротивление на уклоне (на подъеме). D spezifischer Steigungswiderstand. E resistencia específica a la pendiente. I resistenza specifica dovuta alla livelletta o alla pendenza. N specifieke hellingweerstand. P opór jednostkowy na wzniesieniach i spadkach. S specifikt stigningsmotstånd. (811)

65. **specific rolling resistance** : the specific resistance due to friction between wheel and rail and between other moving parts, on straight and level track. ★ résistance spécifique au roulement → *résistance 83.* R удельное сопротивление движению на прямом; горизонтальном пути. D spezifischer Rollwiderstand. E resistencia específica a la ródadura. I resistenza specifica al rotolamento. N specifieke rolweerstand. P opór jednostkowy toczenia. S specifikt rullmotstånd. (811)

66. **specific train resistance** : the resistance to motion per unit mass of a vehicle or train. ★ résistance spécifique (d'un train) → *résistance 87.* R удельное сопротивление движению. D spezifischer Fahrwiderstand. E resistencia específica. I resistenza specifica (di un treno). N specifieke treinweerstand. P opór trakcji jednostkowy. S specifikt tågmotstånd. (811)

67. **stator resistance starting** : → *starting 42*

68. **submerged resistance furnace** (*Syn.* submerged arc furnace) : → *arc furnace 44*

69. **surface resistance** : that part of the insulation resistance which is due to conduction along the surface. *Notes. 1* — The surface resistance is in general strongly affected by the environment. *2* — The surface current generally depends strongly on the time of electrification and often varies in an erratic manner. In practice the electrification time is taken by convention as one minute. ★ résistance superficielle → *résistance 88.* R поверхностное сопротивление. D Oberflächenwiderstand. E resistencia superficial. I resistenza superficiale. N oppervlakteweerstand. P rezystancja powierzchniowa. S ytresistans. (212)

70. **thermal resistance** (of an element of a cable) : the temperature difference between the interior and the exterior surfaces of that element, divided by the heat flux which traverses it. ★ résistance thermique → *résistance 90.* R тепловое сопротивление (элемента кабеля). D thermischer Widerstand (eines Kabelaufbauelements). E resistencia térmica (de un elemento de cable). I resistenza termica (di un componente del cavo). N warmteweerstand (van een onderdeel van een leiding). P rezystancja cieplna (elementu kabla). S termisk resistans. (461)

71. **thermal resistance** (of a semiconductor device) : the quotient of the difference between the virtual temperature of the device and the temperature of a stated external reference point, by the steady-state power dissipation in the device. *Note.* — it is assumed that the total thermal power, caused by the power dissipation, passes through this thermal resistance. ★ résistance thermique → *résistance 91.* R тепловое сопротивление (полупроводникового прибора). D Wärmewiderstand (eines Halbleiterbauelements). E resistencia térmica (de un dispositivo semiconductor). I resistenza termica (di un dispositivo a semiconduttore). N thermische weerstand. P rezystancja cieplna (przyrządu półprzewodnikowego). S termisk resistans. (521)

72. **total earthing resistance** : the resistance between the main earthing terminal and the earth. ★ résistance globale de mise à la terre → *résistance 73.* R суммарное сопротивление заземляющего устройства. D Gesamterdungswiderstand. E resistencia total de puesta a tierra. I resistenza di terra. N aardverspreidingsweerstand. P rezystancja uziemienia. S resulterande jordningsresistans. (826)

73. **total (train) resistance** : the sum of the forces opposing the movement of a train or vehicle. ★ effort résistant total → *effort 10.* R полное сопротивление движению. D Gesamtfahrwiderstand. E esfuerzo resistente total. I forza resistente totale. N totale treinweerstand. P opór trakcji całkowity. S totalt tågmotstånd. (811)

74. **(volume) d.c. resistance** : the quotient of a direct voltage applied between two electrodes in contact with an insulating medium and the current through it, at a given time of electrification. ★ résistance en courant continu → *résistance 67.* R (объёмное) сопротивление постоянному току. D Durchgangswiderstand bei Gleichstrom. E resistencia en corriente continua. I resistenza (volumica) in corrente continua. N (volume)weerstand voor gelijkstroom. P rezystancja (objętościowa) przy prądzie stałym. S likströmsresistans. (212)

75. **volume resistance** : that part of the insulation resistance which is due to conduction through the volume and excluding surface current. ★ résistance volumique → *résistance 93.* R объемное сопротивление. D Durchgangswiderstand. E resistencia transversal. I resistenza volumica. N volumeweerstand. P rezystancja objętościowa. S volymresistans. (212)

76. **zero phase-sequence resistance** : the quotient of (a) the in-phase fundamental component of zero phase-sequence primary voltage, due to the presence of fundamental zero phase-sequence primary current of rated frequency, and (b) the value of this current, the machine running at rated speed. ★ résistance homopolaire → *résistance 74.* R активное сопротивление нулевой последовательности. D Nullwiderstand. E resistencia homopolar. I resistenza omopolare. N homopolaire weerstand. P rezystancja składowej zerowej. S nollföljdsresistans. (411)

resistant

1. **environment resistant connector** : → *connector 23*

resistive

1. **resistive** : applies to a device or circuit in which, under given conditions, the predominant quantity is resistance. ★ résistif → *résistif 3.* R резистивный. D ohmsch. E resistivo. I resistivo. N resistief. P rezystancyjny. S resistiv. (151)
2. **resistive attenuator** : → *attenuator 16*
3. **resistive cut-off frequency** : → *frequency 172*
4. **resistive direct voltage regulation** : → *regulation 13*
5. **resistive fault** : → *fault 70*

resistivity

1. **flow resistivity** : specific flow resistance divided by the thickness of the porous sheet. ★ résistivité à l'écoulement → *résistivité 2.* R удельное сопротивление потоку. D längenbezogener Strömungswiderstand. E resistividad al flujo. I resistività al flusso. N specifieke stromingsweerstand per eenheid van weglengte. P rezystywność (akustyczna) przepływu. S flödesresistivitet. (801)
2. **resistivity** : the reciprocal of the conductivity. ★ résistivité → *résistivité 1.* R удельное электрическое сопротивление. D spezifischer (elektrischer) Widerstand; Resistivität. E resistividad. I resistività. N soortelijke weerstand; resistiviteit. P rezystywność. S resistivitet. (121)
3. **surface resistivity** : the surface resistance reduced to a square area. *Notes. 1* — The surface resistivity includes the effect of possible polarization phenomena at the electrodes. *2* — The numerical value of the surface resistivity is independent of the size of the square. ★ résistivité superficielle → *résistivité 4.* R поверхностное удельное сопротивление. D spezifischer Oberflächenwiderstand. E resistividad superficial. I resistività. N soortelijke oppervlakteweerstand. P rezystywność powierzchniowa. S ytresistivitet. (212)
4. **(volume) d.c. resistivity** : the quotient of a d.c. electric field strength and the current density within an insulating medium, at a given time of electrification. ★ résistivité en courant continu → *résistivité 3.* R (объёмное) удельное сопротивление постоянному току. D spezifischer

Durchgangswiderstand bei Gleichstrom. E resistividad en corriente continua. I resistività (volumica) in corrente continua. N soortelijke (volume)weerstand voor gelijkstroom. P rezystywność (objętościowa) przy prądzie stałym. S likströmsresistivitet. (212)

5. **volume resistivity** : the volume resistance reduced to a cubical unit volume. *Note.* — According to Chapter 121 of IEV : Electromagnetism, "conductivity" is defined as "the scalar or matrix quantity whose product by the electric field strength is the conduction current density" and "resistivity" as "the reciprocal of the conductivity". The volume resistivity is an average of this quantity over possible heterogeneities in the volume incorporated in the measurement, and includes the effect of possible polarization phenomena at the electrodes. ★ résistivité volumique → *résistivité 6.* R объемное удельное сопротивление. D spezifischer Durchgangswiderstand. E resistividad transversal. I resistività di volume. N soortelijke volumeweerstand. P rezystywność objętościowa. S volymresistivitet. (212)

resistor

1. **braking resistor** : a resistor connected in the circuit of the traction motors during electric braking to absorb the energy which they produce. ★ résistance de freinage → *résistance 50.* R тормозной резистор. D Bremswiderstand. E resistencia de frenado. I resistore di frenatura; reostato di frenatura. N remweerstand. P rezystor hamowania. S bromsmotstånd. (811)
2. **charging resistor** : a resistor connected in the charging circuit of a battery or capacitor to control the charging current. ★ résistance de charge → *résistance 47.* R зарядный резистор. D Ladewiderstand. E resistencia de carga. I resistore di carica (batteria). N laadweerstand. P rezystor obciążeniowy. S laddningsmotstånd. (811)
3. **damping resistor** : a resistor connected in any kind of circuit in order to reduce the current peaks which can be generated there. ★ résistance d'amortissement → *résistance 45.* R гасящий резистор. D Dämpfungswiderstand. E resistencia de amortiguamiento. I resistore limitatore. N dempingsweerstand. P rezystor przeciwzakłóceniowy. S dämpmotstånd. (811)
4. **excitation resistor** : a resistor connected in the excitation circuit of a generator or motor to control or limit the current. ★ résistance d'excitation → *résistance 62.* R резистор возбуждения. D Erregerwiderstand. E resistencia de excitación. I resistore d'eccitazione. N veldserieweerstand. P rezystor wzbudzenia. S reglermotstånd för magnetiseringskrets. (811)
5. **heating resistor** (*Syn.* heating conductor) : → *conductor 39*
6. **heating resistor battery** : → *battery 40*
7. **ideal resistor** : an ideal 2-terminal circuit element for which the instantaneous voltage is proportional to the instantaneous current. ★ résistance idéale → *résistance 75.* R идеальный резистор. D ohmscher Widerstand; idealer Widerstand. E resistencia ideal. I resistore ideale. N ideale weerstand. P rezystor idealny. S ideal resistor. (131)
8. **non-linear resistor** : a resistor in which the voltage across the terminals is not proportional to the current passing through it. ★ résistance non linéaire → *résistance 79.* R нелинейный резистор. D nichtlinearer Widerstand. E resistencia no lineal. I resistore non lineare. N niet-lineaire weerstand. P warystor. S icke-linjärt motstånd. (811)
9. **non-linear resistor type arrester** : → *arrester 4*
10. **pin resistor** : a heating resistor constituted by a heating conductor of hair-pin form. ★ résistance en épingle à cheveux → *résistance 68.* R нагреватель сопротивления -образной формы. D Haarnadelwiderstand. E resistencia de horquilla. I resistore a mollétta (per capelli). N haarspeldelement. P rezystor szpilkowy. S hårnålsmotstånd. (841)
11. **regulating resistor** : a resistor connected in any kind of circuit to control the current or voltage. ★ résistance de réglage → *résistance 54.* R регулирующий резистор. D Regelwiderstand. E resistencia de regulación. I resistore di regolazione. N regelweerstand. P rezystor regulacyjny. S reglermotstånd. (811)
12. **resistor** : a device used because of its resistance. ★ résistance → *résistance 31.* R резистор. D Widerstand. E resistencia. I resistore. N weerstand. P opornik; rezystor. S resistor; motstånd. (151)
13. **resistor block** : → *block 18*
14. **resistor case** : → *case 7*
15. **resistor element** : → *element 45*
16. **resistor frame** (*Syn.* resistor case) : → *case 7*
17. **resistor section** : → *section 20*
18. **ribbon resistor** : a heating resistor constituted by a heating conductor of metallic ribbon. ★ résistance en ruban → *résistance 69.* R нагреватель сопротивления в форме ленты. D Bandwiderstand. E resistencia de cinta. I resistori a nastro. N bandelement. P rezystor taśmowy. S bandmotstånd. (841)
19. **rocking resistor rod furnace** : → *furnace 43*
20. **rod resistor** : a heating resistor constituted by a heating conductor of rectilinear form. ★ résistance-baguette → *résistance-baguette 1.* R стержневой нагреватель сопротивления. D Stabwiderstand. E resistencia de varilla. I resistore ad asta. N staafelement. P rezystor prętowy. S stångmotstånd. (841)
21. **series resistor** : resistor connected in series with the voltage circuit of a measuring instrument in order to extend its effective range. ★ résistance additionnelle → *résistance 37.* R добавочный резистор. D Reihenwiderstand. E resistencia adicional. I resistore addizionale. N voorschakelweerstand. P rezystor szeregowy. S förkopplingsmotstånd. (301)
22. **shunt resistor** : a resistor connected in a shunt circuit, e.g. across the main pole windings of traction motors, during field-weakening. ★ résistance de shuntage → *résistance 57.* R шунтирующий резистор. D Nebenschlußwiderstand. E resistencia de shuntado. I derivatore (resistivo). N veldverzwakkingsweerstand. P rezystor bocznikujący. S shuntningsmotstånd. (811)
23. **spiral resistor** : a heating resistor constituted by a heating conductor helical in shape. ★ résistance boudinée → *résistance 41.* R нагреватель сопротивления в форме винтовой спирали. D Widerstandsspirale. E resistencia en espiral. I resistore a spirale. N spiraalelement. P rezystor spiralny. S spiralmotstånd. (841)
24. **stabilizing resistor** : a resistor inserted in a circuit to equalize the currents between parallel branches, for example to reduce the undesirable effects of variation in line voltage in regenerative braking. ★ résistance de stabilisation → *résistance 58.* R стабилизирующий резистор. D Stabilisierungswiderstand; Pufferwiderstand. E resistencia de estabilización. I resistore stabilizzatore. N vereffeningsweerstand. P rezystor stabiliacyjny. S stabiliseringsmotstånd. (811)
25. **starting resistor** : a resistor temporarily connected in series with d.c. or undulating current traction motors to vary the voltage applied and limit the current during starting. ★ résistance de démarrage → *résistance 49.* R пусковой резистор. D Anfahrwiderstand. E resistencia de arranque. I resistore di avviamento; reostato di avviamento. N aanzetweerstand. P rezystor rozruchowy. S startmotstånd. (811)
26. **transition resistor** : a resistor connected temporarily between two tappings of a transformer at the moment of progressing from one tap to another. ★ résistance de passage → *résistance 51.* R переходной резистор. D Überschaltwiderstand. E resistencia de paso. I resistore di transizione. N overgangsweerstand. P rezystor przełączeniowy. S överkopplingsmostånd. (811)
27. **undulate resistor** : a ribbon resistor constituted by a heating conductor of undulate form. ★ résistance ondulée → *résistance 80.* R зигзагообразный нагреватель. D gewellter Widerstand. E resistencia ondulada. I resistore ondulato. N meandervormig weerstandselement. P rezystor falkowy; rezystor falisty. S korrugerat bandmotstånd. (841)

resolution

1. **energy resolution** (of a radiation spectrometer) : a measure, at a given energy, of the smallest relative difference between the energy of two particles capable of being distinguished by a radiation spectrometer. *Note.* — In common practice, the energy resolution is expressed by a factor which is the full width at half maximum divided by the energy at the peak of the distribution curve for monoenergetic particles. ★ résolution en énergie → *résolution 6.* R энергетическое разрешение (спектрометра ионизирующих излучений). D Energieauflösung (eines Spektrometers). E resolución en energía (de un espectrómetro de radiación). I risoluzione in

energia (di uno spettrometro di radiazione). N energieresolutie (v.e. stralingsspectrometer); energiescheiding. P energetyczna zdolność rozdzielcza (spektrometru promieniowania). S energiupplösning (hos spektrometer). (391)

2. **longitudinal resolution** (of a facsimile transmitter) : the dimension along a scanning line of the finest recognizable detail of an image produced by the shortest signal transmitted by a facsimile transmitter under specified conditions. *Notes. 1* — In phototelegraphy, the transmission resolution is dependent on the dimensions and the effective luminance of the finest detail in question. *2* — In document facsimile, assuming that the contrast of the finest detail is adequate, the transmitted signal must correspond to a nominal black or a nominal white. ★ définition longitudinale → *définition 2.* R разрешающая способность (четкость) по горизонтали (факсимильного передатчика). D Längsauflösung eines Faksimile-Senders. E definición longitudinal (de un emisor de telecopia). I definizione longitudinale (in trasmissione). N scheidende vermogen in de lengterichting (van een beeldzender). P zdolność rozdzielcza wzdłużna (nadajnika symilograficznego). S upplösning i längsled. (721)
3. **longitudinal resolution** (of a facsimile receiver) : the dimension along a scanning line of the smallest recognizable detail of the image produced by the shortest signal capable of actuating a facsimile receiver under specified conditions. *Notes. 1* — In phototelegraphy , the longitudinal and transverse dimensions of the finest detail correspond to those of the picture element. *2* — In document facsimile, the longitudinal resolution is determined by the length of the line produced by the shortest nominal black or nominal white signal capable of actuating the receiver. ★ définition longitudinale → *définition 3.* R разрешающая способность по горизонтали (факсимильного премника). D Längsauflösung eines Faksimile-Empfängers. E definición longitudinal (de un receptor de telecopia). I frequenza di punto. N scheidend vermogen in de lengterichting (van een dontvanger). P zdolność rozdzielcza wzdłużna (odbiornika symilograficznego). S upplösning i längsled. (721)
4. **resolution** : the smallest change in the measured or supplied quantity to which a numerical value can be assigned without interpolation. ★ résolution → *résolution 3.* R разрешающая способность. D Auflösung. E resolución. I risoluzione. N resolutie; oplossend vermogen. P rozdzielczość. S upplösning. (301)
5. **resolution** : the indication characterizing the finest detail that can be recognized on the picture by a given system. ★ résolution → *résolution 4.* R разрешающая способность. D Auflösung. E resolución. I risoluzione. N oplossend vermogen. P zdolność rozdzielcza. S upplösningsförmåga. (531)
6. **resolution** (*Syn.* resolving power) : a measure of the quantity of information that may be written into a storage tube and then read. ★ pouvoir de résolution → *pouvoir 14.* R разрешающая способность. D Auflösung. E poder de resolución. I potere di risoluzione; risoluzione. N oplossend vermogen (geheugenbuizen). P zdolność rozdzielcza. S upplösning(sförmåga). (531)
7. **resolution** (*Syn.* definition) : → *definition 1*
8. **resolution test chart** : → *chart 6*
9. **time resolution** (*Syn.* limit of accuracy of chronology) : the minimum time by which two events must be separated in order that the corresponding time tags be different. *Note.* — The time resolution cannot be shorter than the separating capability. ★ temps de résolution → *temps 111.* R разрешающая способность по времени. D zeitliche Auflösung. E recisión de la cronología; resolución en tiempo. I risoluzione temporale; limite di precisione della cronologia. N resolutietijd. P rozdzielczość chronologiczna. S tid(markerings)upplösning. (371)
10. **transverse resolution** (of a facsimile transmitter) : the dimension perpendicular to a scanning line of the finest recognizable detail of an image produced by the shortest signal transmitted by a facsimile transmitter under specified conditions. *Notes. 1* — In phototelegraphy, the transmission resolution is dependent on the dimensions and the effective luminance of the finest detail in question. *2* — In document facsimile, assuming that the contrast of the finest detail is adequate, the transmitted signal must correspond to a nominal black or a nominal white. ★ définition transversale → *définition 4.* R разрешающая способность (четкость) по вертикали (факсимильного передатчика). D Querauflösung eines Faksimile-Senders. E definición transversal (de un emisor de telecopia). I definizione longitudinale (in ricezione). N scheidend vermogen in de breedterichting (van een beeldzender). P zdolność rozdzielcza poprzeczna (nadajnika symilograficznego). S upplösning i tvärled. (721)
11. **transverse resolution** (of a facsimile receiver) : the dimension perpendicular to a scanning line of the smallest recognizable detail of the image produced by the shortest signal capable of actuating a facsimile receiver under specified conditions. *Notes. 1* — In phototelegraphy, the longitudinal and transverse dimensions of the finest detail correspond to those of the picture element. *2* — In document facsimile, the transverse definition is equal to the scanning pitch. ★ définition transversale → *définition 5.* R разрешающая способность по вертикали (факсимильного приемника). D Querauflösung eines Faksimile-Empfängers. E definición transversal (de un receptor de telecopia). I messa in fase. N scheidend vermogen in de breedterichting (van een beeldontvanger). P zdolność rozdzielcza poprzeczna (odbiornika symilograficznego). S upplösning i tvärled. (721)
12. **visual resolution** (*Syn.* visual acuity) : → *acuity 2*

resolving

1. **coincidence resolving time** : → *time 29*
2. **resolving power** (*Syn.* resolution) : → *resolution 6*
3. **resolving time** : → *time 152*
4. **resolving time correction** : → *correction 16*

resonance

1. **gyromagnetic resonance** : the resonance associated to the gyromagnetic effect where the frequency of an imposed periodic disturbance coincides with the frequency of the precessional motion. ★ résonance gyromagnétique → *résonance 21.* R гиромагнитный резонанс. D gyromagnetische Resonanz. E resonancia giromagnética. I risonanza giromagnetica. N gyromagnetische resonantie. P rezonans giromagnetyczny. S gyromagnetisk resonans. (221,726)
2. **gyromagnetic resonance loss** : → *loss 36*
3. **harmonic resonance** : a phenomenon producing amplification of voltage or current harmonics resulting from sustained oscillation between the inductance and capacitance of adjacent items of equipment. ★ résonance harmonique → *résonance 22.* R гармонический резонанс. D Oberschwingungsresonanz. E resonancia armónica. I risonanza armonica. N harmonische resonantie. P rezonans harmonicznych. S övertonsresonans. (604)
4. **load resonance frequency** : → *frequency 123*
5. **load resonance resistance** : → *resistance 35*
6. **mode of resonance** : → *mode 57*
7. **parallel resonance frequency** : → *frequency 144*
8. **resonance** : a phenomenon appearing in an oscillating system, in which the period of a forced oscillation is very close to that of a free oscillation. A resonance of a system in forced oscillation exists when any change, however small, in the frequency of excitation causes a decrease in a reponse of a system. ★ résonance → *résonance 20.* R резонанс. D Resonanz. E resonancia. I risonanza. N resonantie. P rezonans. S resonans. (101,801)
9. **resonance (absorption) isolator** : → *isolator 7*
10. **resonance frequency** : → *frequency 173*
11. **resonance frequency** : → *frequency 174*
12. **resonance frequency** : → *frequency 175*
13. **resonance line** : → *line 132*
14. **resonance method (of measurement)** : → *method 21*
15. **resonance neutrons** : → *neutron 29*
16. **resonance resistance** : → *resistance 58*
17. **resonance state** : → *state 30*
18. **series resonance frequency** : → *frequency 180*
19. **subsynchronous resonance** : a resonance between adjacent equipment in a system, generating oscillations at a frequency below the nominal system frequency and generally sustained for a minute or more. ★ résonance hyposynchrone → *résonance 23.* R субсинхронный резонанс. D untersynchrone Resonanz. E resonancia hiposíncrona. I risonanza iposincrona. N subsynchrone resonantie. P rezonans podsynchroniczny. S undertonsresonans. (604)
20. **unwanted resonance** (of a piezoelectric resonator) (*Syn.* unwanted response (of a piezoelectric resonator)) : a state

of resonance of a piezoelectric resonator other than that associated with its working frequency. ★ résonance indésirable → *résonance 24.* R нежелательный резонанс (пьезоэлектрического резонатора). D Nebenresonanz (eines piezoelektrischen Resonators). E resonancia indeseable (de un resonador piezoeléctrico). I risonanza parassita (di un risuonatore piezoelettrico). N ongewenste resonantie. P rezonans niepożądany. S oönskad resonans. (561)

resonant

1. **resonant cavity** (*Syn.* optical cavity) : → *cavity 9*
2. **resonant circuit** : → *circuit 152*
3. **resonant earthed (neutral) system** : → *system 175*
4. **resonant iris** : → *iris 2*
5. **resonant mode filter** : → *filter 35*
6. **resonant overvoltage** : → *overvoltage 12*
7. **resonant window** (*Syn.* resonant iris) : → *iris 2*

resonator

1. **cavity resonator** (*Syn.* cavity) : a volume bounded by conducting surfaces, capable of supporting at least one mode of resonance. ★ cavité → *cavité 1.* R объемный резонатор; резонатор. D Hohlraumresonator. E cavidad; cavidad resonante. I cavità; cavità risonante. N trilholte. P rezonator wnękowy. S (hål)rumsresonator. (726)
2. **gyromagnetic resonator** : a piece of gyromagnetic material designed to exhibit gyromagnetic resonance. ★ résonateur gyromagnétique → *résonateur 2.* R гиромагнитный резонатор. D gyromagnetischer Resonator. E resonador giromagnético. I risonatore giromagnetico. N gyromagnetische resonator. P rezonator giromagnetyczny. S gyromagnetisk resonator. (221,726)
3. **Helmholtz resonator** : resonator consisting of a relatively large volume and a small orifice. ★ résonateur de Helmholtz → *résonateur 1.* R резонатор Гельмгольца. D Helmholtz-Resonator. E resonador de Helmholtz. I risonatore di Helmholtz. N Helmholtz-resonator. P rezonator Helmholtza. S Helmholz resonator. (801)
4. **multiple piezoelectric resonator** : a unit comprising two or more piezoelectric crystal vibrators or piezoelectric ceramic vibrators in a single enclosure. ★ résonateur multiple → *résonateur 3.* R многоэлементный пьезоэлектрический резонатор. D piezoelektrischer Mehrfachresonator. E resonador múltiple. I risuonatore multiplo. N meervoudige kwartsresonator. P rezonator piezoelektryczny wielowibratorowy. S piezoelektrisk multipelresonator. (561)
5. **piezoelectric resonator** : a unit comprising a piezoelectric crystal vibrator or a piezoelectric ceramic vibrator in its enclosure. ★ résonateur (piézoélectrique) → *résonateur 4.* R пьезоэлектрический резонатор. D piezoelektrischer Resonator. E resonador(piezoeléctrico). I risuonatore (piezoelettrico). N kwartsresonator. P rezonator piezoelektryczny. S piezoelektrisk resonator. (561)

resource

1. **resource** : any physically or conceptually identifiable entity whose use and state at any time can be unambiguously determined. ★ ressource → *ressource 1.* D Fernmeldeeinrichtung. P środki; zasoby. (715)

response

1. **amplitude response** (*Syn.* square-wave response) : → *response 19*
2. **baseband response function** (*Syn.* baseband transfer function) : → *function 3*
3. **braking response** : a diagram of braking force variation as a function of time from the moment of operation of the control device for the brake to the moment the braking force has effectively attained a specified value. ★ réponse du freinage → *réponse 27.* R характеристика срабатывания тормоза. D Bremsreaktion. E respuesta de frenado. I risposta di frenatura. N remdiagram. P charakterystyka zadziałania (hamulca). S bromsdiagram. (811)
4. **excitation response** : the rate of increase or decrease of the excitation system voltage when a change in this voltage is demanded. *Note.* — This rate can also be expressed by its relative value in relation to the excitation voltage for the rated conditions of the main machine. ★ (rapidité de) réponse de l'excitation → *réponse 17.* R скорость нарастания напряжения системы возбуждения. D Erregungsgeschwindigkeit (einer Erregerstromquelle). E (velocidad de) respuesta de la excitación. I rapidità di risposta dell'eccitazione. N responsie van de bekrachtigingsspanning. P szybkość wzrostu napięcia wzbudzającego. S magnetiseringsrespons. (411)
5. **excitation response ratio** : → *ratio 37*
6. **exciter response** : the rate of increase or decrease of the exciter voltage when a change in this voltage is demanded. ★ rapidité de réponse d'une excitatrice → *rapidité 8.* R скорость изменения напряжения возбудителя. D Erregungsgeschwindigkeit. E velocidad de repuesta de una excitatriz. I velocità di risposta di una eccitatrice. N responsie van de opwekkerspanning. P szybkość wzrostu napięcia wzbudzenia. S matareraspons. (411)
7. **incoming response delay** : → *delay 24*
8. **initial excitation system response** : the initial rate of increase in the excitation system voltage when a sudden transition is made from the excitation voltage at the rated conditions of the main machine to the conditions which enable the excitation ceiling voltage to be attained in the shortest possible time. *Note.* — This rate can also be expressed by its relative value in relation to the excitation voltage for the rated conditions of the main machine. ★ (rapidité de) réponse initiale d'excitation → *réponse 19.* R начальная скорость нарастания напряжения возбуждения. D Anfangs-Erregungsgeschwindigkeit. E (velocidad de) respuesta inicial de excitación. I rapidità di risposta iniziale dell'eccitazione. N initiële responsie van de bekrachtigingsspanning. P początkowa szybkość wzrostu napięcia wzbudzającego. S begynnelserespons i magnetiseringssystem. (411)
9. **pulse response characteristic** : → *characteristic 67*
10. **recording/reproducing overall amplitude/frequency response** : a curve, representing the variations, with respect to frequency, of the level at the output of a tape recorder when reproducing a tape on which a constant level signal applied to the input of the apparatus has been recorded. ★ courbe de réponse totale amplitude-fréquence en enregistrement-lecture → *courbe 26.* R амплитудно-частотная характеристика канала записи‌ЩУвоспроизведения«ГФ960· D Gesamtfrequenzgang. E respuesta total amplitud/frecuencia en registrolectura. I risposta globale ampiezza-frequenza in registrazione-riproduzione. N opneem/weergeef-frequentie-karakteristiek. P charakterystyka (częstotliwościowa zapis-odczyt). S elektrisk frekvensåtergivning vid in- och avspelning. (806)
11. **reproducing electrical amplitude/frequency response** : a curve representing the variations of the level, expressed in decibels, at the output of a tape recorder when reproducing a frequency magnetic tape under specified conditions. ★ courbe de réponse électrique amplitude-fréquence en lecture → *courbe 23.* R амплитудно-частотная характеристика канала воспроизведения по измерительной ленте. D Wiedergabefrequenzgang. E respuesta amplitud/frecuencia en lectura. I risposta elettrica ampiezza-frequenza in riproduzione. N weergeef-frequentiekarakteristiek. P charakterystyka (częstotliwościowa odczytu). S elektrisk frekvensåtergivning vid avspelning. (806)
12. **response** : of a device or system, the motion, or other output, that results from a stimulus (excitation) under specified conditions. The kinds of input and output being utilized must be indicated. ★ réponse → *réponse 21.* R отклик. D Erregungsantwort. E respuesta. I risposta. N responsie. P odpowiedź. S svar; respons. (801)
13. **response cycle** (*Syn.* BQ cycle) : → *cycle 1*
14. **response function** (*Syn.* transfer function (2)) : → *function 35*
15. **response pulse duration** : → *duration 37*
16. **spectral response curve** : → *curve 35*
17. **spurious response frequency** : → *frequency 182*
18. **spurious response rejection ratio** : → *ratio 94*
19. **square-wave response** (*Syn.* amplitude response) : the ratio of the peak-to-peak signal amplitude given by a test pattern consisting of alternative black and white bars of equal widths to the difference in signal between large-area blacks and large-area whites having the same luminances as the black and white bars in the test pattern. ★ réponse en signaux carrés → *réponse 31.* R отношение амплитуд сигналов (модуляции) при прямоугольном распределении

освещенности. D Rechteckmodulationsgrad. E respuesta en señales cuadradas; respuesta en amplitud. I risposta all'onda rettangolare; risposta in ampiezza. N kanteelsignaalweergave. P odpowiedź na falę prostokątną. S fyrkantvågssvar. (531)

20. **square-wave response characteristic** : → *characteristic 79*
21. **step response** : the time response of a system produced by a step-wise variation of one of the input variables. *Note.* — When the variation of the input variable is equal to one unit, the step response is called the unit step response. ★ réponse indicielle → *réponse 34.* R переходная характеристика. D Sprungantwort; Übergangsfunktion. E respuesta a un escalón. I risposta al gradino. N stapresponsie. P charakterystyka skokowa; odpowiedź skokowa. S stegsvar. (351)
22. **subharmonic response** : periodic response of a system at a frequency that is a submultiple of the excitation frequency. ★ réponse sous-harmonique → *réponse 37.* R отклик на субгармонике. D subharmonische Schwingung. E respuesta subarmónica. I sottoarmonica. N subharmonische responsie. P drganie podharmoniczne. S subharmonisk svängning; undertonssvar. (801)
23. **threshold of response** : → *threshold 27*
24. **time response** : the variation in time of an output variable of a system, produced by a specified variation of one of the input variables. ★ réponse temporelle → *réponse 38.* R временная характеристика. D Zeitverhalten. E respuesta en tiempo. I risposta temporale. N tijdresponsie. P charakterystyka czasowa; odpowiedź czasowa. S tidsvar. (351)
25. **unit impulse response** (*Syn.* unit pulse response) : → *response 26*
26. **unit pulse response** (*Syn.* unit impulse response; weighting function) : the time response of a two-port device produced by the application to the input of a unit impulse represented by a Dirac delta function. *Notes. 1* — The delta function representing the unit pulse may be considered as the limit of a function of zero value except within a small time interval around the origin, positive in this interval and having an integral constantly equal to unity when the width of the interval tends to zero. *2* — The unit pulse may be considered as the time derivative of the unit step. *3* — The unit pulse response may be considered as the time derivative of the unit step response of a linear and time-invariant two-port device. ★ réponse impulsionnelle → *réponse 33.* R переходная характеристика. D Impulsantwort; Stoßantwort; Impulsverhalten; Einheitsimpulsverhalten; Wichtungsfunktion. E respuesta impulsional. I risposta impulsiva. N eenheidspulsresponsie. P odpowiedź impulsowa. S diracpulssvar. (351,702,731)
27. **unwanted response** (*Syn.* unwanted resonance) : → *resonance 20*

response time

1. **electrode response time** : the overall time taken from receipt of signal to the electrode regulator to either raise or lower an electrode to the time of achieving a specified speed. ★ temps de réponse d'une électrode → *temps de réponse 4.* R время срабатывания электрода. D Antwortzeit der Elektrodenregelung. E tiempo de respuesta de un electrodo. I tempo di risposta di un elettrodo. N elektrodereactietijd. P czas odpowiedzi elektrody. S responstid. (841)
2. **overall response time** (in telecontrol) : the time interval between the initiation of an event in a sending station and the out put, in the same station, of the associated response coming from the receiving station. ★ temps de réponse total → *temps de réponse 5.* R общее время реакции системы (в телемеханике). D Gesamtreaktionszeit (beim Fernwirken). E tiempo de respuesta total (en telecontrol). I tempo di risposta totale (nel telecontrollo). N totale responsietijd. P czas odpowiedzi całkowity. S total svarstid. (371)
3. **response time** : the time from a sudden change of a control quantity until the corresponding change of an output quantity has reached a specified fraction of its final value. ★ durée de réponse → *durée 62.* R время реакции. D Ansprechzeit. E tiempo de respuesta. I tempo di risposta. N responsietijd. P czas odpowiedzi. S svarstid. (431)
4. **response time** (of a thermostatic switch) : the time interval between the time when the temperature capable of operating a thermostatic switch occurs and the time of effective operation. ★ temps de réponse → *temps de réponse 1.* R время срабатывания (термостатический выключатель). D Ansprechzeit (eines Thermoschalters). E tiempo de respuesta (de un contactor termostático). I tempo di risposta di un interruttore termostatico. N reactietijd. P czas odpowiedzi (łącznika termostatowego). S svarstid (hos termostatströmställare). (581)
5. **response time** (of a detector) : time required for the change of detector output to reach, after a step variation of a steady detector input, a given percentage of its final value. ★ temps de réponse → *temps de réponse 2.* R время реакции (приёмника). D Ansprechzeit (eines Empfängers). E tiempo de respuesta. I tempo di risposta. N aanspreektijd; reactietijd. P czas reagowania; czas odpowiedzi. S svarstid. (391,845)
6. **response time (of braking)** : the time between the moment of operation of the brake control and the moment the brake force has attained a specified value at a given speed. ★ temps d'établissement (du freinage) → *temps d'établissement 2.* R время срабатывания (торможения). D Reaktionszeit (der Bremse). E tiempo de estabilización (de frenado). I tempo di ritardo. N aanspreektijd (van het remmen). P czas zadziałania (hamulca). S ansättningstid. (811)
7. **step response time** : the time interval between the instant when the quantity measured or supplied is subjected to a specified abrupt change and the instant when the indication or output quantity reaches and remains within specified limits of its final steady value. ★ temps de réponse à un échelon → *temps de réponse 3.* R время установления показания. D Einstellzeit. E tiempo de respuesta a un escalón. I tempo di risposta alla funzione gradino. N stapresponsietijd. P czas odpowiedzi na skok. S stegsvarstid. (301)

responsibility

1. **peak responsibility factor** : → *factor 128*
2. **peak responsibility method** : allocating the demand-related costs to consumer classes according to the demand they set up at the time of system peak demand. ★ méthode de la participation à la pointe → *méthode 7.* R метод распределения затрат при участии в максимуме нагрузки. D Höchstlastanteilverfahren; Spitzenlastanteilverfahren. E método de la participación en la punta. I metodo della partecipazione alla punta. N toerekening naar het aandeel in de maximale belasting. P metoda podziału kosztów przy udziale w obciążeniu szczytowym. S effektansvarighetsmetod. (691)

responsivity

1. **relative responsivity** (of a detector) (*Syn.* relative sensitivity) (s_r) : ratio of the responsivity $s(Z)$ when the detector is irradiated with radiation Z to the responsivity $s(N)$ when it is irradiated with a reference radiation N. $s_r = s(Z)/s(N)$. ★ sensibilité relative → *sensibilité 39.* R относительная чувствительность (приёмника). D relative Empfindlichkeit (eines Empfängers). E responsividad relativa. I sensibilità relativa. N relatieve gevoeligheid (van een fototransductor). P czułość względna. S relativ känslighet. (845)
2. **relative spectral responsivity** (*Syn.* relative spectral sensitivity) ($s_r(\lambda)$) : ratio of the spectral responsivity $s(\lambda)$ of the detector at wavelength λ to a given reference value s_m. $s_r(\lambda) = s(\lambda)/s_m$ *Note.* — The given reference value s_m can be an average value, a maximum value or an arbitrarily chosen value of $s(\lambda)$. ★ sensibilité spectrale relative → *sensibilité 42.* R относительная спектральная чувствительность (приёмника). D relative spektrale Empfindlichkeit (eines Empfängers). E responsividad espectral relativa. I sensibilità spettrale relativa. N relatieve spectrale gevoeligheid (van een fototransductor). P czułość widmowa względna. S relativ spektral känslighet. (845)
3. **responsivity** : the ratio of an optical detector's electrical output to its optical input. *Notes. 1* — Generally expressed in amperes per watt or volts per watt of incident radiant power. *2* — "Sensivity" is sometimes used as an imprecise synonym for responsivity. ★ sensibilité → *sensibilité 8.* R чувствительность. D Empfindlichkeit. E respuesta. I responsività. N gevoeligheid. P czułość. S responsivitet. (731)
4. **responsivity** (of a detector) (*Syn.* sensitivity) (s) : quotient of the detector output Y by the detector input X. $s = Y/X$ *Note.* — If the detector output is Y_o in the absence of input, and is Y_i when there is a detector input X, the responsivity is $s = (Y_i - Y_o)/X$. ★ sensibilité → *sensibilité 10.* R чувствительность (приёмника). D Empfindlichkeit (eines Empfängers). E responsividad. I sensibilità. N gevoeligheid (van een fototransductor). P czułość. S känslighet. (845)
5. **spectral responsivity** : responsivity per unit wavelength interval at a given wavelength. ★ sensibilité spectrale

→ *sensibilité 40.* **R** спектральная чувствительность. **D** spektrale Empfindlichkeit. **E** respuesta espectral. **I** responsività spettrale. **N** spectrale gevoeligheid. **P** czułość widmowa. **S** spektral responsivitet. (731)

6. **spectral responsivity** (of a detector) (*Syn.* spectral sensitivity) ($s(\lambda)$) : quotient of the detector output $dY(\lambda)$ by the monochromatic detector input $dX_e(\lambda) = X_{e,\lambda}(\lambda) \cdot d\lambda$ in the wavelength interval $d\lambda$ as a function of the wavelength λ.

$$s(\lambda) = \frac{dY(\lambda)}{dX_e(\lambda)}$$

★ sensibilité spectrale → *sensibilité 41.* **R** спектральная чувствительность (приёмника). **D** spektrale Empfindlichkeit (eines Empfängers). **E** responsividad espectral. **I** sensibilità spettrale. **N** spectrale gevoeligheid (van een fototransductor). **P** czułość widmowa. **S** spektral känslighet. (845)

rest

1. **inter-character rest condition** : → *condition 13*
2. **position of rest** : → *position 25*
3. **rest and de-energized** : the complete absence of all movement and of all electrical or mechanical supply. ★ repos → *repos 19.* **R** отключенное неподвижное состояние машины. **D** Pause. **E** reposo. **I** riposo. **N** rust(toestand). **P** postój. **S** stillestånd utan krafttillförsel. (411)
4. **rest energy** : → *energy 72*
5. **rest frequency** : → *frequency 176*
6. **rest mass** : → *mass 27*

restart

1. **restart time** : → *time 154*

restitution

1. **restitution** : succession in time of significant conditions resulting from a received signal. ★ (sématème à la) restitution → *restitution 2.* **R** восстановление. **D** Wiedergabe. **E** restitución. **I** restituzione. **N** restitutie. **P** wydawanie; restytucja. **S** restituering. (721)

restoration

1. **DC restoration** : the operation of reconstructing a video signal or complete video signal, with its DC component, from a signal not carrying a DC component or from a signal influenced by any standing DC component. ★ restitution de la composante continue → *restitution 1.* **R** восстановление постоянной составляющей. (723)
2. **mean time to restoration** : → *time 106*
3. **restoration** (*Syn.* recovery) : that event when the item regains the ability to perform a required function, after a fault. ★ rétablissement → *rétablissement 2.* **R** восстановление. **D** Wiederherstellung. **E** restablecimiento. **I** ripristino. **N** herstel. **P** przywrócenie zdatności. **S** återställning. (191)
4. **synchronism restoration** : the process by which a synchronous machine recovers the synchronous operation after having operated out of synchronism. ★ reprise de synchronisme → *reprise 4.* **R** ресинхронизация. **D** Resynchronisierung. **E** recuperación de sincronismo. **I** ripresa di sincronismo. **N** herstel van synchroon bedrijf; in de pas vallen. **P** odbudowa synchronizmu. **S** återställande av synkronism. (603)
5. **time to restoration** : → *time 210*

restoring

1. **restoring force** : → *force 29*
2. **restoring moment** : → *moment 8*
3. **restoring temperature** : → *temperature 45*
4. **restoring torque** : → *torque 22*

restraint

1. **bias electrical restraint** : a feature derived from the input energizing quantity(es), applied to a relay or protection equipment providing restraint which changes the characteristic of that relay or protection equipment in a specified manner. *Examples :* — Load bias: derived from load. — Harmonic bias: a bias derived from harmonics contained in an input energizing quantity. — Through fault current bias: a bias derived from through fault current bias. ★ retenue électrique → *retenue 5.* **R** электрическое торможение. **D** Stabilisierung. **E** polarización eléctrica. **I** compensazione elettrica. **N** niet-neutrale (elektrische) afregeling. **P** stabilizacja elektryczna. **S** stabilisering. (448)

restricted

1. **completely restricted extension** : → *extension 2*
2. **restricted conference call** : → *call 51*
3. **restricted entry** : → *entry 3*
4. **restricted hour tariff** : → *tariff 34*
5. **restricted linear collision stopping power** (*Syn.* linear energy transfer) : → *transfer 14*
6. **restricted service** : → *service 18*

restriction

1. **speed restriction** : the maximum speed authorized over a particular length of track limited by factors such as the construction or condition of the track and the type of signalling. *Note.* — It is possible for a section of track to have more than one speed limit, each applicable to a different category of vehicle. ★ vitesse limite (sur une section de ligne) → *vitesse 86.* **R** ограничение скорости. **D** Streckenhoechstgeschwindigkeit. **E** velocidad límite en una sección de la línea. **I** velocità limite (di tracciato). **N** snelheidsbeperking. **P** prędkość dopuszczalna (na odcinku toru). **S** hastighetsbegränsning. (811)

restrike

1. **restrike** (of an a.c. mechanical switching device) : a resumption of current between the contacts of a mechanical switching device during a breaking operation with an interval of zero current of a quater cycle of power frequency or longer. ★ réamorçage → *réamorçage 1.* **R** повторный пробой (контактного коммутационного аппарата переменного тока). **D** Rückzündung (eines Wechselstromschalters). **E** recebado (de un aparato mecánico de conexión en corriente alterna). **I** riadescamento (di un apparecchio meccanico di manovra a corrente alternata). **N** herontsteking na 1/4 periode (van een mechanische schakelaar voor wisselstroom). **P** zapłon ponowny łuku późny. **S** återtändning. (441)

resultant

1. **resultant colorimetric shift** : → *shift 33*
2. **resultant (perceived) colour shift** : → *shift 34*

retainability

1. **connection retainability** (in telecommunication) : the probability that a connection, once obtained, will continue to be provided for a communication under given conditions for a given time duration. ★ continuabilité → *continuabilité 3.* **R** непрерывность соединения (в технике связи). **D** Bestandswahrscheinlichkeit bestehender Verbindungen. **E** retenibilidad (de una cadena de conexión). **I** continuabilità di una connessione (in telecomunicazioni). **N** instandhoudingskans (van een telecommunicatieverbinding). **P** prawdopodobieństwo ciągłości połączenia. **S** förbindelsekontinuitet. (191)
2. **service retainability** : the probability that a service, once obtained, will continue to be provided under given conditions for a given time duration. *Note.* — In French, the term "continuabilité" is also used to denote the performance quantified by this probability. ★ continuabilité → *continuabilité 2.* **R** непрерывность услуги. **D** Dienstbestandswahrscheinlichkeit. **E** retenibilidad (de un servicio). **I** continuabilità di un servizio. **N** continuïteitskans van een dienst(verlening). **P** prawdopodobieństwo ciągłości serwisu. **S** tjänstekontinuitet. (191)
3. **service retainability performance** : → *performance 14*

retainer

1. **contact retainer** : a device either on the contact or in the connector insert to retain the contact (in the insulation). ★ dispositif de rétention du contact → *dispositif 58.* **R** замок контакта. **D** Kontakthalterung. **E** dispositivo de retención del contacto. **I** dispositivo di ritegno del contatto. **N** contactbevestiging. **P** trzymadełko (styku). **S** kontaktfasthållare. (581)

retaining

1. **retaining ring** : → *ring 11*
2. **rotor end-winding retaining ring** : → *ring 19*

retardation

1. **retardation test** : → *test 69*

retarding

1. **retarding brake** : → *brake 24*
2. **retarding force** (*Syn.* decelerating force) : → *force 14*

retention

1. **capacity retention** (*Syn.* charge retention) : → *retention 2*
2. **charge retention** (*Syn.* capacity retention (USA)) : the ability of a battery to retain charge on open circuit under specified conditions. ★ conservation de la charge → *conservation 1.* R сохранность заряда; сохранность емкости. D Ladungserhaltung. E retención de la carga. I conservazione della carica. N behoud van lading. P zdolność zachowania ładunku. S laddningshållning. (486)
3. **electrolyte retention** : the ability of a cell or battery to retain electrolyte under specified mechanical and environmental conditions. ★ rétention d'électrolyte → *rétention 3.* R непроливаемость электролита. D Elektrolytdichtheit. E retención del electrolito. I tenuta dell'elettrolita. N elektrolytretentie. P zdolność zachowania elektrolitu. S elektrolythållningsförmåga. (486)
4. **image retention** : effect seen when the picture content changes and a positive or negative residue of the preceding picture is superimposed on the new picture. ★ (défaut de) rémanence → *rémanence 1.* R затягивание изображения. (723)
5. **maximum retention time** : → *time 87*
6. **retention** (*Syn.* uptake) : the permanent or transient presence of radioactive materials in the body following intake and after these materials have been metabolized. ★ rétention → *rétention 2.* R удержание. D Aktivitätsretention. E retencion. I ritenzione; captazione. N retentie. P gromadzenie. S retention. (881)

retiming

1. **retiming** : adjustment of the intervals between the significant instants of a digital signal by reference to a cyclic timing signal. ★ réajustement du rythme → *réajustement 1.* R восстановление хронирования; синхронизация по битам. D Zeitmaßstabwiederherstellung. E reajuste del ritmo. I riaggiustamento del ritmo. N ritmeherstel. P wyrównanie taktowania. S taktkorrektion. (704)

retina

1. **retina** : membrane situated inside the back of the eye that is sensitive to light stimuli ; it contains photoreceptors, the cones and the rods, and nerve cells that transmit to the optic nerve the signals resulting from stimulation of the photoreceptors. ★ rétine → *rétine 1.* R сетчатка. D Netzhaut; Retina. E retina. I retina. N netvlies; retina. P siatkówka. S näthinna. (845)

retort

1. **retort chamber** : → *chamber 13*
2. **rotary retort furnace** : → *furnace 46*

retrace

1. **retrace** (*Syn.* fly-back) : → *fly-back 1*

retransmission

1. **automatic retransmission** : the automatic transmission, usually after a short delay, of signals previously received and recorded. ★ retransmission automatique → *retransmission 4.* R автоматический переприем. D automatische Weitersendung. E retrasmisión automática. I ritrasmissione automatica. N automatische zendherhaling. P retransmisja automatyczna. S automatisk återutsändning. (721)

retransmitter

1. **automatic retransmitter** : an apparatus which automatically retransmits telegraph signals in accordance with recorded incoming signals. ★ réémetteur (télégraphique) → *réémetteur 6.* R автоматический ретрансмиттер. D automatischer Weitersender. E reemisor. I ritrasmettitore automatico. N automatische signaalterugzender. P nadajnik automatyczny retransmisyjny. S automatisk återutsändare. (721)
2. **perforated-tape retransmitter** : an automatic retransmitter comprising a reperforator feeding a tape directly into an automatic transmitter. ★ réémetteur à bande perforée → *réémetteur 3.* R перфоленточный ретрансмиттер; реперфотрансмиттер. D Lochstreifen-Weitersender. E reemisor con banda perforada. I trasmettitore con lettore di nastro perforato. N ponsband-signaalterugzender. P nadajnik retransmisyjny taśmowy. S hålremsmatad återutsändare. (721)

retrieval

1. **retrieval** (in common channel signalling) : the procedure for ensuring that signal messages are not lost during changeover. ★ récupération → *récupération 5.* R перевыделение (в сигнализации по общему каналу). D Informationsrueckgewinnung. E recuperación (en señalización por canal común). I recupero (nella segnalazione a canale comune). N ..... P odzysk (w sygnalizacji). S återhämtning. (714)
2. **retrieval of stored call content** : the transmission of the call content to subscribers who had previously requested storage of call content. ★ consultation d'archivage → *consultation 1.* R поиск записанных содержаний вызовов. D Ausgabe der gespeicherten Sendungen. E consulta de archivo. I consultazione archivio. N opvragen van opgeslagen gespreksinhoud. P odbiór wiadomości zmagazynowanej. S sökning av lagrat meddelande. (721)

retriever

1. **pole retriever** : a device which, in the event of the dewirement of the trolley, automatically lowers the pole. ★ rattrapeur de perche → *rattrapeur 1.* R штангоулавливатель. D Stromabnehmerfangeinrichtung. E recuperador de la pértiga. I dispositivo antiscarrucolamento. N trolleyvanger. P ściągacz drążka samoczynnego. S neddragare. (811)

retrograde

1. **retrograde orbit** : → *orbit 9*

retroreflected

1. **coefficient of retroreflected luminance** : → *coefficient 8*

retroreflection

1. **coefficient of retroreflection** : → *coefficient 9*
2. **retroreflection** : reflection in which radiation is returned in directions close to the opposite of the direction from which it came, this property being maintained over wide variations of the direction of the incident rays. ★ rétroréflexion → *rétroréflexion 2.* R световозвращающее отражение. D Retroreflexion (CH); Rückstrahler (CH). E retroreflexión. I riflessione catadiottrica. N retroreflectie. P odbicie współdrożne. S retroreflexion. (845)

retroreflector

1. **retroreflector** : a surface or device from which most of the reflected radiation is retroreflected. ★ rétroréflecteur → *rétroréflecteur 1.* R световозвращающий отражатель. D Retroreflektor; Rückstrahler. E retroreflector. I catadiottro. N retroreflector. P urządzenie odblaskowe. S retroreflektor. (845)

return

1. **carriage return** : a format effector that returns the printing or display position to the commencement point of the line. ★ retour chariot → *retour 22.* R возврат каретки. D Wagenrücklauf. E retorno de carro. I ritorno carrello. N terugloop van de wagen. P powrót wózka. S radretur. (721)
2. **earth return** : a natural electrically conducting path provided through the earth or the sea between two points. ★ retour par la terre → *retour 28.* R возврат тока через землю. D Erderückleitung. E retorno por tierra. I ritorno a terra. N retouraarde. P droga elektryczna ziemna. S jord(återledare). (704)
3. **insulated return system** : → *system 90*
4. **return attenuation** : → *attenuation 31*
5. **return cable** : → *cable 56*
6. **return channel** : → *channel 41*
7. **return channel** (*Syn.* backward channel) : → *channel 3*
8. **return circuit** : → *circuit 153*
9. **return conductor rail** : → *rail 14*

10. **return current rail** (*Syn.* return conductor rail) : → *rail 14*
11. **return information** : → *information 28*
12. **return light** : → *light 60*
13. **return loss** : → *loss 85*
14. **return mechanism** : → *mechanism 12*
15. **return switching signal** : → *signal 161*
16. **track return system** : → *system 237*
17. **welding current return clamp** : → *clamp 19*
18. **welding return cable** : → *cable 74*

reusable

1. **reusable** : qualifies a program or a routine that may be loaded once and executed repeatedly subject to the requirements, that any instructions that are modified during execution are returned to their initial states and that external program parameters are preserved unchanged. ★ réutilisable → *réutilisable 1.* R повторно используемая (программа). D wiederverwendbar (es Programm). E reutilizable. I programma riusabile. N opnieuw bruikbaar. P (program) **powtarzalny**. S återanvändbart. (714)

reveal

1. **reveal** (*Syn.* muff) : → *muff 1*

reverberant

1. **reverberant sound field** : → *sound field 5*

reverberation

1. **artificial reverberation** : sound effect obtained by processing a sound signal in special equipment, giving the impression of reverberation. ★ réverbération artificielle → *réverbération 11.* R искусственная реверберация. (723)
2. **relative reverberation level** : → *level 79*
3. **reverberation** : persistence of sound decreasing with time in an enclosed or partly enclosed space after the signal from an acoustic source is interrupted. ★ réverbération → *réverbération 9.* R реверберация. (723)
4. **reverberation** : sound that persists in a space as a result of repeated reflection or scattering. ★ réverbération → *réverbération 10.* R реверберация. D Nachhall. E reverberación. I riverberazione. N nagalm. P pogłos. S efterklang. (801)
5. **reverberation chamber** : → *chamber 14*
6. **reverberation plate** : → *plate 28*
7. **reverberation room** : → *room 10*
8. **reverberation time** : → *time 155*
9. **reverberation time** : → *time 156*

reverberation-limited

1. **reverberation-limited condition** : → *condition 24*

reversal

1. **partial tone reversal** : a defect in facsimile reproduction such that the reproduced picture instead of proceeding smoothly from white to black, may proceed from white to black and then towards white again or vice versa. *Note.* — This defect may be due, for example, to incorrect setting of black and white limits in a sub-carrier frequency modulation. ★ inversion partielle des teintes → *inversion 8.* R частичный переход полутонов; частичная инверсия полутонов. D teilweise Tönungsumkehr. E inversión parcial de tono. I inversione parziale di tonalità. N solarisatie; gedeeltelijke toonomkering. P inwersja cieniowania. S partiellt nyansfel. (721)
2. **reversal** (of a cell or battery) : a change in the normal polarity of a cell or battery. ★ inversion (d'un accumulateur) → *inversion 7.* R реверсирование (вторичного химического источника тока). D Umpolung. E inversión (de un elemento o una batería). I inversione (di un accumulatore). N ompolen. P przebiegunowanie (akumulatora). S polvändning. (486)
3. **reversals** : the continuous sequence of alternating binary signal elements all of the same duration, as that of a unit interval. ★ roulement → *roulement 6.* R телеграфные "точки". D Wechsel. E inversor; cambio de marcha; rodadura. I alternanze. N omkeringen. P sygnał 1:1. S omslag. (721)

reverse

1. **circuit crest working reverse voltage** : → *voltage 24*
2. **circuit non-repetitive peak reverse voltage** : → *voltage 27*
3. **circuit repetitive peak reverse voltage** : → *voltage 29*
4. **circuit reverse blocking interval** : → *interval 3*
5. **reverse blocking diode thyristor** : → *thyristor 5*
6. **reverse blocking interval** : → *interval 16*
7. **reverse blocking state** : → *state 31*
8. **reverse blocking state** : → *state 32*
9. **reverse blocking triode thyristor** : → *thyristor 6*
10. **reverse breakdown** : → *breakdown 14*
11. **reverse compatibility** : → *compatibility 8*
12. **reverse conducting diode thyristor** : → *thyristor 7*
13. **reverse conducting triode thyristor** : → *thyristor 8*
14. **reverse current** : → *current 174*
15. **reverse current release** : → *release 28*
16. **reverse direction** : → *direction 17*
17. **reverse direction** : → *direction 18*
18. **reverse direction** : → *direction 19*
19. **reverse direction** : → *direction 20*
20. **reverse electrode current** : → *current 176*
21. **reverse loss** : → *loss 86*
22. **reverse loss** : → *loss 87*
23. **reverse motion** : → *motion 2*
24. **reverse recovery time** : → *time 157*
25. **reverse relative tape efficiency** : → *efficiency 38*
26. **reverse slow motion** : → *motion 3*
27. **reverse voltage** : → *voltage 181*
28. **to revert reverse** : → *revert 3*

reverser

1. **disconnecting switch reverser** : a switchgroup providing the dual function of reverser and traction motor disconnector. ★ inverseur-sectionneur → *inverseur-sectionneur 1.* R реверсор-разъединитель. D Richtungswender-Fahrmotoren-Trennschalter (kombiniert). E inversor — seccionador. I invertitore-escluditore. N rijrichtingsscheiderschakelaar. P nawrotnik odłączający. S motorfrånskiljare med fram-backomkopplare. (811)
2. **reverser** : a switchgroup for reversing the direction of motion. ★ inverseur (de marche) → *inverseur 2.* R реверсор. D Richtungswender. E inversor (de marcha). I invertitore (di marcia). N rijrichtingschakelaar. P nawrotnik. S fram-backomkopplare. (811)

reversible

1. **reversible antenna** : → *antenna 97*
2. **reversible convertor** : → *convertor 37*
3. **reversible hydroelectric set** : → *set 40*
4. **(reversible) motorcoach train** (*Syn.* multiple unit train) : → *train 5*
5. **reversible permeability** : → *permeability 24*
6. **reversible scaler** : → *scaler 2*
7. **reversible transducer** : → *transducer 12*

reversing

1. **reversing light** : → *light 61*
2. **reversing switch** : → *switch 39*

reversion

1. **code reversion** (*Syn.* shift in) : a function control for changing a code which terminates the use of a set of characters initiated by code shift character and reverts to the normal set of characters. ★ en code → *code 39.* R вхождение в код. D Rückschaltung. E en código. I ritorno codice. N ..... P powrót do kodu. S inskift. (721)

revert

1. **revert value** : → *value 56*
2. **to revert** : for a certain type of polarized (d.c.) relay being in an operate condition to change from this condition to the release condition by increasing the value of the energizing quantity. ★ relâcher par suralimentation → *relâcher 2.* R возвращаться возбуждением. D wiederrrückfallen (durch Übererregung). E desactivar por sobrealimentación. I rilasciare

per sovralimentazione. N afvallen door bekrachtiging groter dan de aantrekwaarde. P ..... S återgå genom övermatning. (446)

3. **to revert reverse** : for a certain type of polarized (d.c.) relay being in a release condition by reverting, to change from this condition to the operate condition by increasing the value of the energizing quantity. ★ fonctionner par suralimentation → *fonctionner 2.* R срабатывать реверсивным возбуждением. D wiederansprechen (durch Übererregung). E funcionar por sobrealimentación. I operare per sovralimentazione. N opkomen door bekrachtiging groter dan de afvalwaarde. P ..... S fungera genom övermatning. (446)

revert-reverse

1. **revert-reverse value** : → *value 57*

review

1. **design review** : a formal and independent examination of an existing or proposed design for the purpose of detection and remedy of deficiencies in the requirements and design which could affect such things as reliability performance, maintainability performance, maintenance support performance requirements, fitness for the purpose and the identification of potential improvements. *Note.* — Design review by itself is not sufficient to ensure proper design. ★ revue de conception → *revue 1.* R экспертиза проекта. D Entwurfsüberprüfung. E revisión de proyecto; revisión de diseño. I riesame del progetto. N ontwerpdoorlichting. P przegląd projektu. S konstruktionsgenomgång. (191)

revision

1. **revision clause** : → *clause 5*

revolution

1. **period of revolution** : → *period 25*
2. **sidereal period of revolution** : → *period 31*

rewinding

1. **rewinding** : an operation the purpose of which is to move the magnetic tape rapidly from the take-up spool to the supply spool. ★ rebobinage → *rebobinage 1.* R перемотка назад. D Zurückspulen. E rebobinado. I riavvolgimento. N snel terugspoelen. P przewijanie. S backspolning. (806)

RF

1. **RF** (*Syn.* radio frequency) : → *frequency 159*

RFI

1. **RFI** (*Syn.* radio frequency interference) : → *interference 19*

rheostatic

1. **rheostatic control** (*Syn.* resistance control) : → *control 160*
2. **rheostatic rotor starter** : → *starter 5*
3. **rheostatic starter** : → *starter 6*

rhombic

1. **rhombic antenna** : → *antenna 98*

rhythm

1. **biological rhythm** : characteristic periodic change in a living organism or life-related process. *Note.* — Biological rhythms may be influenced by optical radiation. ★ rythme biologique → *rythme 4.* R биологический ритм. D biologischer Rhythmus. E ritmo biológico. I bioritmo. N biologisch ritme. P rytm biologiczny. S biorytm. (845)

rhythmic

1. **rhythmic light** : → *light 62*

ribbon

1. **ribbon cable** : → *cable 57*
2. **ribbon microphone** : → *microphone 32*
3. **ribbon resistor** : → *resistor 18*
4. **tungsten ribbon lamp** : → *lamp 69*

Riblet

1. **Riblet coupler** (*Syn.* short slot coupler) : → *coupler 20*

ridge

1. **ridge waveguide** : → *waveguide 12*

ridged

1. **ridged horn** : → *horn 19*

riding

1. **riding quality** : → *quality 12*

right

1. **right (stereophonic) signal** : → *signal 162*

right-angle

1. **right-angle connector** : → *connector 43*

right-angled

1. **right-angled drive** : → *drive 19*

right-hand

1. **right-hand polarization** : → *polarization 42*
2. **right-hand polarized wave** : → *wave 49*

rigid

1. **rigid busbar** : → *busbar 13*
2. **rigid double-sided printed board** : → *board 18*
3. **rigid insulator** : → *insulator 27*
4. **rigid mica material** : → *material 36*
5. **rigid multilayer printed board** : → *board 19*
6. **rigid printed board** : → *board 20*
7. **rigid single-sided printed board** : → *board 21*
8. **rigid support** : → *support 17*
9. **rigid surface heater** : → *heater 15*
10. **(subscriber's line) rigid network** : → *network 92*

rim

1. **output at the wheel rim** : → *output 35*
2. **segmental rim motor** : → *motor 84*
3. **tractive effort (at the wheel rim)** : → *effort 1*

ring

1. **arc furnace roof ring** : → *roof 4*
2. **arcing ring** : a protective fitting in the shape of a ring. ★ anneau de garde → *anneau 2.* R защитное кольцо. D Lichtbogenring. E anillo de guarda. I anello di guardia. N overslagring. P pierścień ochronny przeciwłukowy. S ljusbågsring. (466)
3. **brush ring** : in electrical machines so fitted, a ring mechanically supporting the brush holders, sometimes rotatable to give access to the brushes and to regulate the neutral zone. ★ couronne porte-balais → *couronne 2.* R траверса щеткодержателя. D Bürstenträgerring. E corona portaescobillas. I arco portaspazzole. N borstelkrans. P jarzmo szczotkowe; obsada szczotek. S borstdon. (811)
4. **collector ring** : a conducting ring against which brushes bear, used to enable current to flow from one part of a circuit to another by sliding contact. ★ bague collectrice → *bague 4.* R контактное кольцо. D Schleifring. E anillo rozante. I anello collettore. N sleepring. P pierścień ślizgowy. S släpring. (411)
5. **collector ring** (*Syn.* slip ring) : → *ring 20*
6. **coupling ring** : a cylindrical device used for coupling and uncoupling mating connectors. ★ bague d'accouplement → *bague 6.* R кольцо соединительное. D Kupplungsring. E anillo de acoplamiento. I anello d'accoppiamento. N koppelbus; koppelingsring. P pierścień sprzęgający. S kopplingsring. (581)
7. **floating ring drive** : → *drive 10*
8. **guard ring** : an auxiliary electrode which is intended to reduce the flow of leakage current between collecting electrode and other electrodes of an ionization chamber or a counter tube and/or to define the potential gradients and sensitive volume. ★ anneau de garde → *anneau 1.* R охранное кольцо. D Schutzring. E anillo de guarda. I anello di guardia. N schutring (v.e. ionisatievat); waakring (v.e. ionisatievat). P pierścień ochronny. S skyddselektrod. (391)
9. **hybrid ring** (*Syn.* rat race) : a hybrid junction consisting of a transmission line formed into a rectangular or circular path into which lead four transmission lines appropriately spaced around the rectangular or circular configuration. ★ anneau

hybride → *anneau 5.* R гибридное кольцо; соединение типа «крысиные бега». D Hybrid-(Ring-)Koppler. E anillo híbrido. I anello ibrido. N hybride ring. P sprzęgacz pierścieniowy. S delningsring. (726)

10. **oil ring lubricated bearing** : → *bearing 22*
11. **retaining ring** : a mechanical structure surrounding parts of a rotor to restrain radial movement due to centrifugal action. ★ anneau de retenue → *anneau 3.* R бандажное кольцо. D Tragring. E anillo de retención. I anello di blindaggio. N houdring. P pierścień bandażowy. S återhållarring. (411)
12. **ring array** (*Syn.* circular array) : → *array 7*
13. **ring closing** : → *closing 9*
14. **ring feeder** : → *feeder 18*
15. **ring opening** : → *opening 11*
16. **ring operation of a part of a network** : → *operation 57*
17. **ring substation** : → *substation 24*
18. **ring system** (*Syn.* loop system) : → *system 109*
19. **rotor end-winding retaining ring** : a retaining ring surrounding the end winding of a high speed rotor, usually in the form of a steel cylinder. ★ capot d'extrémité (du rotor) → *capot 3.* R бандажное кольцо ротора. D Läuferkappe (Läuferkappenring). E anillo de retención de extremidad (del rotor). I anello di blindaggio (Cappa). N rotorkap. P kołpak. S rotorkapsel. (411)
20. **slip ring** (*Syn.* collector ring) : a conducting ring against which the brushes are maintained and used to enable current to flow from a moving to a stationary part of a circuit by sliding contact. ★ bague (collectrice) → *bague 5.* R контактное кольцо. D Schleifring. E anillo colector. I anello. N sleepring. P pierścień ślizgowy. S släpring. (811)

ringback

1. **ringback tone** (*Syn.* ringing tone) : → *tone 28*

ringer

1. **harmonic telephone ringer** (*Syn.* tuned telephone ringer) : a telephone bell which responds only to alternating current within a very narrow frequency band and which may be used for selective ringing. ★ sonnerie accordée → *sonnerie 3.* R звонок избирательного вызова. D Resonanzwecker. E timbre sintonizado. I soneria sintonizzata. N afgestemde wisselstroombel; selectieve wisselstroombel. P dzwonek selektywny. S frekvensavstämd ringklocka. (722)
2. **polarized ringer** (*Syn.* magneto (telephone) bell) : → *bell 4*
3. **ringer** (*Syn.* (telephone) bell) : → *bell 5*
4. **tone ringer** : a call indicating device, other than a telephone bell or buzzer, providing an audible tone. ★ annonciateur acoustique → *annonciateur 1.* R устройство тонального вызова. D Tonwecker. E avisador acústico. I soneria a frequenza vocale. N toonwekker. P odbiornik przywołania tonalny. S tonringare. (722)
5. **tuned telephone ringer** (*Syn.* harmonic telephone ringer) : → *ringer 1*

ringing

1. **ringing** (in telephony) : an action whereby a telephone station is advised that another station wishes to establish a connection with it. *Note.* — The term is also applied to the process of applying ringing current to a telephone station. ★ sonnerie → *sonnerie 2.* R посылка вызова (в телефонии). D Rufen. E timbrazo (en telefonía). I squillo della chiamata. N wekken; bellen. P dzwonienie. S påringning. (714,722)
2. **ringing** (in television) : phenomenon of an oscillatory nature appearing as a series of closely spaced bands to the right of high contrast vertical edges in a television image. *Note.* — In colour television, ringing may produce colour fringes. ★ suroscillation → *suroscillation 2.* R звон. (723)
3. **ringing tone** : → *tone 28*
4. **selective ringing** (in telephony) (*Syn.* selective calling (in telephony)) : ringing on a party line or a shared-service line such that only the call indicating device of the desired telephone station is activated. ★ appel sélectif → *appel 18.* R избирательный вызов. D selektives Rufen. E llamada selectiva (en telefonía). I chiamata selettiva (in telefonia). N selectieve oproep (voor een gedeelde abonneelijn). P wywoływanie selektywne. S selektivt anrop. (722)

ring-switch

1. **ring-switch** : a waveguide switch in which the switching element is one or several resonant metallic rings. ★ commutateur à anneau → *commutateur 9.* R кольцевой переключатель. D Resonanz-Ringschalter. E conmutador de anillos. I commutatore ad anello. N ringschakelaar. P przełącznik pierścieniowy. S vågledaromkopplare med resonansring(ar). (726)

riometer

1. **riometer** (*Syn.* relative ionospheric opacity meter) : a calibrated radio receiver tuned to a fixed frequency between 10 and 100 MHz, used to record the flux of cosmic noise ; this flux can be used to determine time variations of ionospheric absorption. *Note.* — The term "riometer" is a contraction of "Relative Ionospheric Opacity Meter". ★ riomètre → *riomètre 1.* D Riometer. P riometr; miernik względnej nieprzepuszczalności jonosfery. (705)

ripple

1. **d.c. ripple factor** : → *factor 36*
2. **gain ripple** : the maximum difference in power gain between adjacent peaks and valleys in the gain-versus-frequency characteristic at the most unfavourable part in the operating frequency range. ★ ondulation du gain → *ondulation 5.* R пульсация коэффициента усиления. D Verstärkungsschwankung. E ondulación de la ganancia. I ondulazione del guadagno. N vermogenversterkingsvariatie. P falistość charakterystyki wzmocnienia. S förstärkningsvariation. (531)
3. **having a ripple** (*Syn.* rippled) : → *rippled 1*
4. **pass-band ripple** (of a filter) : the maximum variation of the attenuation within a defined portion of the pass-band of a filter. ★ ondulation dans la bande passante → *ondulation 4.* R неравномерность в полосе пропускания (фильтра). D Durchlassbereich-Welligkeit (eines Filters). E ondulación en la banda pasante (de un filtro). I ondulazione nella banda passante (di un filtro). N doorlaatbandrimpel (van een filter). P nierównomierność tłumienności w pasmie przepustowym (filtru). S passbandspulsation. (561)
5. **percentage ripple** : for a unidirectional X-ray tube accelerating voltage, the ratio

$$\frac{V_{max} - V_{min}}{V_{max}}$$

expressed as a percentage, the accelerating voltage varying cyclically between its maximum value V_{max} and its minimum value V_{min}. ★ taux d'oscillation → *taux 56.* R пульсация (в процентах). D Welligkeit. E porcentaje de ondulacion. I ondulazione percentuale. N procentuele rimpel. P procentowa wartość tętnień napięcia. S relativ vågighet (i procent). (881)

6. **ripple** : periodic deviations around an average measured or supplied value, occurring at frequencies which may be related to that of the mains supply or of some other definite source, such as chopper. Ripple is determined under specified conditions. *Note.* — Ripple is a part of PARD. ★ ondulation → *ondulation 3.* R пульсации. D Welligkeit. E ondulación. I ondulazione. N rimpel. P tętnienie. S vågighet; rippel. (303)
7. **ripple content** : → *content 9*
8. **ripple harmonics of a rectifier** : → *harmonic 18*
9. **ripple voltage** : → *voltage 182*
10. **r.m.s.-ripple factor** : the ratio of the r.m.s. value of the ripple content to the absolute value of the direct component of a pulsating quantity. ★ taux d'ondulation efficace → *taux 55.* R среднеквадратичный коэффициент пульсаций; коэффициент пульсации по среднему значению. D effektiver Welligkeitsgehalt. E tasa de ondulación efectiva. I tasso di ondulazione efficace. N effektieve rimpelfactor. P wartość skuteczna współczynnika falowania. S pulsationsfaktor. (131,161)

rippled

1. **rippled** (*Syn.* having a ripple) : applies to a pulsating quantity having always the same sign. The ratio of the peak-to-valley value to the mean value is generally much smaller than 1. ★ ondulé → *ondulé 6.* R волнообразная. D gewellt; geriffelt. E ondulada. I ondulata. N met een rimpel. P tętniący. S vågig; krusig. (101)

rise

1. **critical rate of rise of off-state voltage** : → *rate 15*
2. **critical rate of rise of on-state current** : → *rate 16*
3. **permeability rise factor** : → *factor 132*
4. **rate of rise** : → *rate 79*
5. **rise and fall pendant** : → *pendant 2*
6. **rise-time broadening** (*Syn.* leading-edge broadening) : → *broadening 2*

rise time

1. **pulse rise time** : interval of time required for the leading edge of a pulse to rise from some specified small fraction to some specified larger fraction of the maximum value. ★ temps de montée d'une impulsion → *temps de montée 6.* R время нарастания импульса. D Impulsanstiegszeit. E tiempo de subida de un impulso. I tempo di salita. N stijgtijd van een puls. P czas narastania impulsu. S stigtid hos en stöt(puls). (801)
2. **pulse rise time discriminator** : → *discriminator 10*
3. **rise time** (of a pulse) : the interval of time between the instants at which the instantaneous value of a pulse first reaches a specified lower value and then a specified upper value. *Note.* — Unless otherwise specified, the lower and upper values are fixed at 10 % and 90 % of the pulse magnitude. ★ temps de montée → *temps de montée 2.* R время нарастания (импульса). D Anstiegszeit (eines Impulses). E tiempo de subida. I tempo di salita (di un impulso). N stijgtijd. P czas narastania (impulsu). S stigtid. (161,702)
4. **rise time** (for a semiconductor device) : the time interval between the instants at which the magnitude of the pulse at the output terminals reaches specified lower and upper limits respectively when the semiconductor device is being switched from non-conducting to its conducting state. *Note.* — The lower and upper limits are usually 10% and 90% respectively of the final amplitude of the output pulse. ★ temps de croissance → *temps 54.* R время нарастания. D Anstiegszeit. E tiempo de subida. I tempo di salita. N stijgtijd. P czas narastania (w przyrządzie półprzewodnikowym). S stigtid. (521)
5. **rise time** (of a detector) : time required for a detector output to rise from a stated low percentage to a stated higher percentage of the maximum value when a steady input is instantaneously applied. *Note.* — It is usual to consider a low percentage of 10% and a high percentage of 90%. ★ temps de montée → *temps de montée 4.* R время нарастания (приёмника). D Anstiegszeit (eines Empfängers). E tiempo de subida. I tempo di salita. N stijgtijd. P czas narastania. S stigtid. (351,391,531,845)
6. **rise time (of a pulse)** (*Syn.* settling time) : the time required after a step variation in the measured quantity for the output signal to reach and remain within a specified percentage of its final steady-state value. ★ durée d'établissement → *durée 74.* R время установления. D Einstellzeit. E tiempo de establecimiento. I tempo di stabilimento. N insteltijd. P czas ustalania. S reglertid. (391)
7. **scintillation rise time** : the time required for the rate of the emission of photons after a single excitation to rise from 10% to 90% of its maximum value. ★ temps de montée d'une scintillation → *temps de montée 7.* R время нарастания сцинтилляции. D Anstiegszeit der Szintillation. E tiempo de subida de un centelleo. I tempo di salita di una scintillazione. N stijgtijd (v.e. scintillatie). P czas narastania scyntylacji. S scintillationsstigtid. (391)

riser

1. **commutator riser** : a conducting element for connecting a commutator segment to a coil. ★ radiale → *radial 6.* R петушок коллектора. D Kommutatorfahne. E conexión de delga. I forcella. N commutatorveer. P chorągiewka komutatora. S nedledare. (411,811)

rising

1. **rising characteristic** : → *characteristic 72*
2. **rising out of synchronism** : → *synchronism 4*

r.m.s.

1. **r.m.s. amplitude permeability** : → *amplitude 38*
2. **r.m.s. value** (*Syn.* root-mean-square value) : → *value 59*
3. **r.m.s.-ripple factor** : → *-ripple 10*

road

1. **battery-electric road vehicle** : → *vehicle 2*
2. **road marking** : → *marking 2*
3. **road stud** : → *stud 2*

rocker

1. **arc furnace tilt rockers** : generally toothed arc segment, attached to the underside of the furnace platform, to allow tilting of same. ★ berceaux de basculement de four à arc → *berceau 4.* R сектор наклона дуговой печи. D Lichtbogenofen-Wiege. E cunas de basculamiento de un horno de arco. I culle di ribaltamento di un forno ad arco. N boogovenwieg. P ramię wahacza (kołyski pieca łukowego). S ..... (841)
2. **brush rocker** : → *brush 7*
3. **brush rocker gear** : → *brush 8*
4. **rocker button** : → *button 4*

rocking

1. **rocking arc furnace** : → *arc furnace 42*
2. **rocking resistor rod furnace** : → *furnace 43*

Rocky-Point

1. **Rocky-Point effect** (*Syn.* flash-arc) : → *flash-arc 1*

rod

1. **anchor rod** : a rod, or other metallic element, connecting the stay, or guy, to the anchor. ★ tirant → *tirant 2.* R анкерный стержень. D Ankerstab. E anclaje del tirante. I tirante di ancoraggio (per stralli). N tuistang. P pręt kotwiczący. S staglänk. (466)
2. **armour rods** : a set of protective metal rods wound helically around a conductor at the suspension point, preformed and placed prior to the installation of the suspension clamp. ★ garniture en hélice → *garniture 3.* R армирующие прутки. D Schutzspirale. E varillas de protección. I sbarrette (preformate) di protezione. N beschermingsspiraal. P uzbrojenie uchwytu przewodu. S skyddslindning. (466)
3. **control rod** : a control member in the form of a rod. ★ barre de commande d'un réacteur → *barre 3.* D Steuerstab. E barra de control de un reactor. I barra di regolazione. N regelstaaf. P pręt sterowniczy. S styrstav. (026)
4. **dielectric rod antenna** : → *antenna 38*
5. **earth rod** (*Syn.* ground rod (USA)) : an earth electrode consisting of a metal rod driven into the ground. ★ piquet de terre → *piquet 1.* R стержневой заземлитель. D Staberder. E pica de tierra. I picchetto di terra. N stafaardelektrode. P uziom prętowy. S jordningsspett. (604)
6. **emergency shutdown rod** : rod-shaped safety member for immediate action if required. ★ barre d'arrêt d'urgence → *barre 1.* D Regelstab für Notabschaltung. E elemento de parada de emergencia. I barra per arresto (spegnimento) d'emergenza. N regelstaaf voor noodstop. P pręt awaryjny. S snabbavställningsstav. (026)
7. **ferrite rod antenna** : → *antenna 49*
8. **filler rod** : filler metal in the form of a rod. ★ baguette d'apport → *baguette 1.* R присадочный пруток. D Zusatzstab. E varilla de metal de aportación. I bacchetta d'apporto. N lasdraad (als staaf). P pręt spawalniczy. S tillsatstråd. (851)
9. **fuel rod** : assembly of small rods of nuclear fuel placed end to end or a rod of large dimensions, usually contained in a can. ★ barre de combustible → *barre 2.* D Brennstab. E barra combustible. I barra di combustibile. N splijtstofstaaf. P pręt paliwowy. S bränslestav. (026)
10. **ground rod** (*Syn.* earth rod) : → *rod 5*
11. **long rod insulator** : → *insulator 20*
12. **patch rods** : a set of preformed metal rods, wound helically around a conductor over damaged areas to restore the electrical properties of the conductor. ★ garniture de câble → *garniture 1.* R ремонтный шунт. D Reparaturspirale. E varillas de reparación. I sbarrette (preformate) di riparazione. N reparatiespiraal. P uzbrojenie naprawcze przewodu. S reparationslindning. (466)
13. **reinforcing rods (in a pad and chimney foundation)** : metallic rods embedded in concrete to ensure proper connection between chimney and pad (see fig. 4.6). ★ épingles de renforcement (dans une fondation à dalle et cheminée) → *épingle 1.* R арматурные стержни (для грибовидных

фундаментов). D Bewehrungsstäbe (in einem Pilzfundament). E varillas de armado. I armatura (di una fondazione a piastra e pilastrino). N stekeinden. P pręty zbrojeniowe (stopy słupa). S armeringsstål. (466)

14. **rocking resistor rod furnace** : → *furnace 43*
15. **rod drive** : → *drive 20*
16. **rod line** : → *line 133*
17. **rod resistor** : → *resistor 20*
18. **rods** : photoreceptors in the retina containing a light-sensitive pigment capable of initiating the process of scotopic vision. ★ bâtonnets → *bâtonnet 1.* R палочки. D Stäbchen. E bastones. I bastoncini. N staafjes. P pręciki. S stavar. (845)

rod-in-tube

1. **rod-in-tube technique** : → *technique 16*

roentgen

1. **roentgen** (*R*) : the unit of exposure equal to $2{,}58 \times 10^{-4}$C/kg. ★ röntgen → *röntgen 1.* R рентген. D Röntgen. E roentgen. I roentgen. N röntgen. P rentgen. S röntgen. (391,881)

roentgenography

1. **roentgenography** (*Syn.* radiography) : → *radiography 2*

roentgenology

1. **roentgenology** (USA) : that part of radiology which pertains to X-radiation. ★ ..... → . R рентгенология. D Röntgenologie (USA). E renguenologia; roentgenologia. I roentgenologia. N röntgenologie. P rentgenologia. S röntgenologi. (881)

roentgen-per-hour

1. roentgen-per-hour at one metre (deprecated) (Rhm) : a unit formerly used for exposure rate at 1 m from a point gamma-ray source. ★ röntgen par heure à un mètre → *röntgen 2.* R рентген в час на расстоянии одного метра (не рекомендуется). D Röntgen pro Stunde in 1 Meter Abstand (veralteter Begriff). E roentgen por hora a 1 metro (desaconsejado). I roentgen/ora a 1 metro (sconsigliato). N ..... P rentgen na godzinę z odległości 1 m (jednostka nie zalecana). S ..... (881)

roll

1. **contact roll** : when a contact is making, the relative rolling movement of the contact tips after they have just touched. ★ roulement des pièces de contact → *roulement 8.* R перекат контакт-деталей. D Kontaktrollen. E rodadura de las cabezas de contacto. I rotolamento delle parti di contatto. N contactrol. P obtaczanie styczek. S kontaktrullning. (446)

roller

1. **arc furnace tilt roller track** : → *track 1*
2. **pinch roller** (*Syn.* pressure roller) : → *roller 3*
3. **pressure roller** (*Syn.* pinch roller) : an idler roller which holds the magnetic tape against the capstan. ★ galet presseur → *galet 1.* R прижимной ролик. D Andruckrolle. E cilindro de presión. I rullo di pressione. N aandrukrol. P rolka dociskowa. S tryckrulle. (806)
4. **roller bearing** : → *bearing 28*
5. **roller hearth furnace** : → *furnace 44*

rolling

1. **rolling** (*Syn.* swaying) : a rotary disturbing movement about the longitudinal axis. ★ roulis → *roulis 1.* R боковые колебания; поперечные колебания. D Wanken. E inclinación lateral. I rollio. N waggelgang; waggelen. P drgania wahadłowe w płaszczyznie poprzecznej; kołysanie. S vaggning. (811)
2. **rolling contact** : → *contact 101*
3. **rolling stock** : → *stock 1*
4. **specific rolling resistance** : → *resistance 65*

roof

1. **arc furnace fixed roof** : a roof which sits normally on the furnace shell and is only removed for replacement of refractory lining. ★ voûte fixe de four à arc → *voûte 6.* R неподвижный свод дуговой печи. D Lichtbogenofen mit festem Deckel. E bóveda fija de un horno de arco. I volta fissa di un forno ad arco. N vast plafond van een boogoven. P sklepienie stałe (pieca łukowego). S fast valv. (841)
2. **arc furnace roof lift and swing aside** : a suspended roof, lifted and swung aside, when drop charging scrap materials into open top of furnace shell. ★ voûte pivotante d'un four à arc → *voûte 7.* R подъем и поворот свода дуговой печи. D Lichtbogenofendeckel-Hub-und Schwenkwerk. E bóveda pivotante de un horno de arco. I volta girevole di un forno ad arco. N boogoven met hefbaar en draaibaar deksel. P sklepienia unoszone i odchylane (pieca łukowego). S svängvalv. (841)
3. **arc furnace roof refractories** : → *refractory 1*
4. **arc furnace roof ring** : a steel constructed ring frame, normally water-cooled, which contains the roof refractories and which sits on top of the furnace shell. ★ anneau de voûte d'un four à arc → *anneau 4.* R кольцо свода дуговой печи. D Deckelring des Lichtbogenofens. E anillo de bóveda de un horno de arco. I anello volta di un forno ad arco. N plafondring van een boogoven. P rama sklepieniowa (pieca łukowego). S valvring. (841)
5. **crown roof** (*Syn.* arc furnace roof refractories) : → *refractory 1*
6. **suspended roof** : a particular type of construction in which the roof of the heating chamber is suspended from the furnace casing. ★ voûte suspendue → *voûte 8.* R подвесной свод. D Hängedecke. E bóveda suspendida. I volta sospesa. N opgehangen plafond. P sklepienie zawieszone. S hängvalv. (841)

rooflight

1. **rooflight** (*Syn.* skylight) : daylight opening on the roof or on a horizontal surface of a building. ★ lucarne → *lucarne 1.* R фонарь верхнего освещения. D Oberlicht. E claraboya. I lucernario. N daklicht. P świetlik. S takfönster. (845)

room

1. **anechoic room** (*Syn.* free-field room) : → *room 8*
2. **audiometric room** : room insulated against outside noise and having some sound absorption, intended for testing of hearing. ★ salle d'audiométrie → *salle 5.* R аудиометрическая камера. D audiometrischer Meßraum. E cámara audiométrica. I cabina audiometrica. N audiometrische kamer. P pomieszczenie audiometryczne. S audiometriskt mätrum. (801)
3. **average sound pressure level in a room** : → *level 5*
4. **central control room** : a room to which programme sound signals from different studios or other programme sources are directed to continuity control rooms, recording channels, broadcast transmitting stations, or other destinations. ★ centre nodal (audio) → *centre 19.* R центральная аппаратная. (723)
5. **continuity control room** (sound) : a room containing the apparatus for the assembly of sound programmes from various studios or other programme sources. *Note.* — In some cases the continuity control room and the continuity studio are combined with the main studio. ★ régie finale audio → *régie 3.* R аппаратная монтажа (звуковых) программ. (723)
6. **control room** (television studio) : room associated with a television studio in which video and sound signals are processed, including such operations as level adjustments, switching of various sources, mixing and signal monitoring. It also includes various items of equipment required for the studio. ★ régie → *régie 1.* R аппаратная (телевизионная студия). (723)
7. **dead room** : room characterized by a relatively large amount of sound absorption. ★ salle sourde → *salle 11.* R заглушенная камера. D reflexionsarmer Raum. E cámara sorda. I camera sorda. N zachte kamer. P pomieszczenie wytłumione. S (akustiskt) dött rum. (801)
8. **free-field room** (*Syn.* anechoic room) : room whose boundaries absorb substantially all the sound incident thereon, thereby affording free-field conditions. ★ salle anéchoïque → *salle 3.* R помещение свободного поля безэховая камера; безэховая камера. D Freifeld-Raum; reflexionsfreier Raum. E cámara anecoica. I camera anecoica. N echovrije kamer; dode kamer. P komora bezechowa. S ekofritt rum. (801)
9. **live room** : room characterized by a relatively small amount of sound absorption. ★ salle claire → *salle 4.* R гулкая камера. D halliger Raum. E sala viva. I camera semiriverberante. N harde kamer. P pomieszczenie niewytłumione. S (akustiskt) levande rum. (801)
10. **reverberation room** : room having a long reverberation time, especially designed to make the sound field therein as diffuse as possible. *Note.* — Reverberation rooms are used in particular for the measurement of absorption coefficients of material and of the sound power of sound sources. ★ salle réverbérante

→ *salle 10.* R реверберационная камера. D Hallraum. E sala reverberante. I camera riverberante. N galmkamer. P komora pogłosowa. S efterklangsrum. (801)

11. **room absorption** : → *absorption 34*
12. **room index** : → *index 38*
13. **room noise** : → *noise 69*
14. **screened room** (*Syn.* shielded enclosure) : → *enclosure 12*
15. **sound control room** : a room associated with a sound control studio, containing a sound control desk and monitoring loudspeakers and including other facilities such as recording and replay equipment. ★ régie audio → *régie 2.* R кабина управления звуком. (723)
16. **sound isolation between rooms** (*Syn.* level difference) : → *difference 18*
17. **standardized sound isolation between rooms** (*Syn.* normalized level difference) : → *difference 22*
18. **substation control room** : a room of a substation in which are located facilities necessary to monitor and control substation items. ★ salle de commande d'un poste → *salle 6.* R щит управления подстанции (помещение). D Wartenraum einer Station. E sala de control de una subestación. I sala di comando di una stazione. N bedieningsruimte van een station. P nastawnia stacyjna. S kontrollrum. (605)
19. **substation relay room** : a room of a substation in which protection and automatic equipment is located in a centralized arrangement. ★ salle de relayage d'un poste → *salle 8.* R помещение релейной защиты подстанции. D Relaisraum einer Station. E sala de relés de una subestación. I sala relè di protezione di una stazione. N ..... P centralne pomieszczenie przekaźnikowe. S relärum. (605)
20. **substation telecontrol room** : a room of a substation in which is located the equipment necessary to transmit and receive information relating to telecontrol. ★ salle de téléconduite d'un poste → *salle 9.* R помещение телеуправления подстанции. D Fernwirkraum einer Station. E sala de telecontrol de una subestación. I sala di telecomando di una stazione. N ..... P pomieszczenie telemechaniki. S telerum. (605)
21. **X-ray room** : a room containing X-ray apparatus installed and in working condition, designed for radiological examinations or treatment. ★ salle de radiologie → *salle 7.* R рентгеновскнй кабинет. D Röntgenraum. E sala de rayos X. I sala radiologica. N röntgenkamer. P gabinet rentgenowski. S röntgenrum. (881)

root-mean-square

1. **r.m.s. amplitude permeability** : → *amplitude 38*
2. **r.m.s.-ripple factor** : → *-ripple 10*
3. **root-mean-square detector** : → *detector 29*
4. **root-mean-square value** : → *value 59*

ropewinder

1. **ropewinder** : a device for taking up slack in the trolley rope. ★ enrouleur de corde → *enrouleur 1.* R натяжное устройство для веревки штангового токоприемника. D Seilaufzug. E enrollador de cuerda. I tenditore (della corda). N koordtrommel. P bęben ściągacza. S linsträckare. (811)

Rosenblum

1. **Rosenblum detector** : → *detector 30*

rostrum

1. **rostrum television camera** (*Syn.* electronic animation bench) : → *bench 1*

rot

1. **heating conductor green rot** : an effect in certain metal heating conductors caused by a reduction of the protecting oxide film through selective oxidation of the chromium and probably carburization. The elements become brittle. ★ carie verte d'un élément chauffant → *carie 1.* R явление «зеленой гнили» в нагревателе сопротивления. D Grünfäule von Heizelementen. E ataque verde de un elemento calentador. I carie verde di un elemento riscaldante. N chroomoxydatie; green rot. P murszenie zielone przewodu grzejnego. S grönröta. (841)

rotary

1. **position of a rotary switch** : → *position 23*
2. **rotary amplifier** : → *amplifier 25*
3. **rotary compressor** : → *compressor 6*
4. **rotary (control) switch** : → *switch 40*
5. **rotary convertor** : → *convertor 38*
6. **rotary dial** : → *dial 8*
7. **rotary dial (telephone) set** : → *set 41*
8. **rotary hearth furnace** : → *furnace 45*
9. **rotary joint** : → *joint 21*
10. **rotary phase changer** : → *changer 9*
11. **rotary phase shifter** (*Syn.* rotary phase changer) : → *changer 9*
12. **rotary retort furnace** : → *furnace 46*
13. **rotary selector** (*Syn.* uniselector) : → *uniselector 3*
14. **rotary vane attenuator** : → *attenuator 17*

rotatable

1. **rotatable frame** : → *frame 42*

rotating

1. **allowance for rotating parts** : → *allowance 1*
2. **(electrical) rotating machine** : → *machine 11*
3. **rotating convertor** : → *convertor 39*
4. **rotating disc electrode** : → *electrode 81*
5. **rotating joint** (*Syn.* rotary joint) : → *joint 21*
6. **speed (of a rotating machine)** : → *speed 44*

rotating-anode

1. **rotating-anode tube** : → *tube 73*

rotating-field

1. **rotating-field antenna** : → *antenna 99*

rotation

1. **Faraday rotation** (*Syn.* Faraday effect) : → *effect 23*
2. **plasma arc rotation rate** : rotation speed, expressed in number of revolutions per second or Hertz, of a maintained arc radially between two coaxial electrodes and rotating in the space between the central electrode and the tubular electrode concentric with the former. ★ fréquence de rotation de l'arc plasma → *fréquence 97.* R скорость вращения плазменной дуги. D Rotationsfrequenz eines Plasmabogens. E velocidad de giro del arco de plasma. I frequenza di rotazione dell'arco plasma. N draaisnelheid van de plasmaboog. P częstotliwość rotacyjna łuku plazmy. S rotationsfrekvens för plasmabåge. (841)
3. **rotation** (*Syn.* curl) : → *curl 1*
4. **rotation test** : → *test 70*
5. **rotation therapy** : → *therapy 9*
6. **sidereal period of rotation** : → *period 32*
7. **speed of rotation** : → *speed 47*
8. **(wave) rotation circulator** : → *circulator 11*
9. **(wave) rotation isolator** : → *isolator 8*

rotational

1. **rotational control electromechanism** : → *control 162*
2. **rotational hysteresis loss** : → *loss 88*
3. **rotational wave** : → *wave 50*

rotationally

1. **rotationally symmetrical luminous intensity distribution** : → *distribution 36*

rotator

1. **non-reciprocal polarization rotator** (*Syn.* non-reciprocal wave rotator) : a waveguide structure, usually of circular cross-section, whose propagation medium provides that the direction of polarization, that is, that of the electric field vector, for a linearly polarized wave is rotated clockwise in one direction of propagation and anti-clockwise in the other direction, in both cases as seen in the direction of propagation. ★ rotateur de polarisation non réciproque → *rotateur 1.* R невзаимный вращатель поляризации. D nicht-reziproker Polarisations-Rotator; nicht-reziproker Faraday-Rotator. E rotador de polarización; rotador de onda no recíproco. I rotatore di polarizzazione non reciproco; rotatore d'onda non reciproco. N onomkeerbare polarisator. P rotator polaryzacji

nieodwracalny. S irreciprok polarisationsvridare; irreciprok vågvridare. (221,726)

2. **non-reciprocal wave rotator** (*Syn.* non-reciprocal polarization rotator) : → *rotator 1*

rotor

1. **conical rotor machine** : → *machine 6*
2. **cylindrical rotor machine** : → *machine 7*
3. **rheostatic rotor starter** : → *starter 5*
4. **rotor** : the rotating portion of a machine. ★ rotor → *rotor 11.* R ротор. D Läufer. E rotor. I rotore. N rotor. P wirnik. S rotor. (411,811)
5. **rotor contact** : → *contact 102*
6. **rotor end-winding retaining ring** : → *ring 19*
7. **rotor resistance starting** : → *starting 15*
8. **rotor winding** : → *winding 57*
9. **(stator or rotor) lamination** : → *lamination 2*

rough

1. **rough surface** : → *surface 26*

round

1. **round the world echo** : → *echo 19*

route

1. **alternate route** (*Syn.* alternative route) : → *route 2*
2. **alternative route** (*Syn.* alternate route) : a second or subsequent choice route between two designated exchanges or terminal points. ★ itinéraire détourné → *itinéraire 8.* D Alternativweg. P droga alternatywna. (715)
3. **first choice route** (*Syn.* primary route) : → *route 5*
4. **overflow route** (*Syn.* spill-over route (USA)) : a circuit group carrying that portion of the traffic which cannot, due to traffic load, be carried on the first choice circuit group without delay. ★ faisceau de débordement → *faisceau 27.* R маршрут избыточной нагрузки. D Ueberlaufweg; Direktweg. E grupo de desbordamiento. I fascio di trabocco. N overloopbundel. P droga przelewowa. S andrahandsval. (714)
5. **primary route** (*Syn.* first choice route) : The route selected as first choice between two designated exchanges or terminal points. ★ itinéraire de premier choix → *itinéraire 6.* D Primärweg; Erstwahlweg. P droga pierwszego wyboru. (715)
6. **route** (in switching) : a potential path for traffic between two designated terminal points. ★ itinéraire → *itinéraire 3.* R маршрут (в коммутации). D Weg; Route; Pfad. E ruta (en conmutación). I instradamento. N route. P trasa (połączeniowa). S via; väg. (714)
7. **route** (in switching) : a potential path for traffic between two designated exchanges or terminal points. *Note.* — The path need not be a single circuit group, though it frequently is. ★ itinéraire → *itinéraire 5.* D Weg; Wegabschnitt (in der Vermittlung). P drga (połączeniowa). (715)
8. **route selection** : → *selection 11*
9. **route selector** : → *selector 12*
10. **signalling route** : a predetermined path to be taken by signal messages sent from a specified node to another specified node, but which may be dependent on the condition of the signalling network at the time of use. ★ route sémaphore → *route 2.* R маршрут сигнализации. D Zeichengabeweg; Zeichengaberoute. E ruta de señalización. I via di segnalazione. N signaleringsroute. P trasa sygnalizacji. S nätberoende signaleringsväg. (714)
11. **spill-over route** (*Syn.* overflow route) : → *route 4*

routine

1. **routine** : an ordered set of instructions that may have some general or frequent use. ★ routine → *routine 1.* R стандартная программа. D Routine; Programmteil. E rutina. I procedura (di un programma); sottoprogramma; routine. N routine. P program rutynowy; procedura. S rutin. (714)
2. **routine check tests** : → *test 71*
3. **routine test** : → *test 72*

routing

1. **adaptative routing** : a method of modifying the routing of the data packets corresponding to the same message, according to the state of the network. ★ acheminement adaptatif → *acheminement 4.* R адаптивная маршрутизация. D angepaßte Leitweglenkung. E encaminamiento adaptativo. I istradamento adattativo. N ..... P marszrutyzacja adaptacyjna. S adaptiv dirigering. (721)
2. **alternative routing** : the successive choice of less direct or desirable circuit groups from an exchange where congestion has been encountered on the first choice circuit group. ★ acheminement détourné → *acheminement 6.* R выбор обходного пути. D alternative Verkehrslenkung; Leitweglenkung. E encaminamiento alternativo. I instradamento su vie alternative. N alternatief routeren. P kierowanie alternatywne. S alternativt vägval. (714)
3. **alternative traffic routing** : designation in accordance with given rules of the set of circuits to be taken when no circuit is available in the set of normal traffic routing circuits for a given call attempt. ★ acheminement détourné → *acheminement 7.* R обходная маршрутизация. D alternative Verkehrslenkung. E encaminamiento alternativo. I istradamento alternativo. N overloopverkeerscentrale. P kierowanie rucheur alternatywne. S alternativ trafikdirigering. (721)
4. **emergency routing** : the routing to be chosen exceptionally if neither the normal traffic routing nor any alternative traffic routing set of circuits is available. ★ acheminement de secours → *acheminement 5.* R резервная маршрутизация. D Ersatzverkehrslenkung. E encaminamiento de socorro. I istradamento di emergenza. N noodroutering. P kierowanie rezerwowe. S nöddirigering. (721)
5. **normal (traffic) routing** : designation in accordance with given rules of the set of circuits on a first priority basis from which a circuit is to be selected provided that a free circuit exists in that set for a given call attempt. ★ acheminement normal → *acheminement 8.* R основная маршрутизация. D Regelverkehrslenkung. E encaminamiento normal. I istradamento normale (di prima scelta). N normale (verkeers)routering. P kierowanie (rucheur) normalne. S normal trafikdirigering. (721)
6. **routing** (*Syn.* traffic routing) : designating, in accordance with given rules, the circuit group to be used for setting up a connection from a given exchange for a given call attempt. ★ acheminement → *acheminement 1.* R выбор направления. D Verkehrslenkung. E encaminamiento; recorrido. I instradamento. N routeren. P kierowanie ruchem (w komutacji). S (trafik)dirigering. (714,715)
7. **routing** (in packet switched data communication) : the choice of the path taken in the network by a data packet. ★ acheminement → *acheminement 3.* R маршрутизация (при передаче данных с коммутацией пакетов). D Leitweglenkung (bei Datenpaketübertragung). E encaminamiento (en transmisión de datos por paquetes). I istradamento (nella trasmissione dati a commutazione di pacchetto). N ..... P marszrutyzacja (w teledacyjnej sieci z komutacją pakietów). S dirigering. (721)
8. **signalling routing** : a procedure for selecting and allocating signalling paths. ★ acheminement sémaphore → *acheminement 10.* R выбор маршрута сигнализации. D Zeichengabe-Verkehrslenkung. E encaminamiento de señalización. I instradamento della segnalazione. N signaleringsroutering. P trasowanie sygnalizacji. S signalvägsval. (714)
9. **traffic routing** (*Syn.* routing) : → *routing 6*
10. **traffic routing** (in circuit switching) : designation in accordance with given rules of the set of circuits to be used for setting up a connection from a given exchange for a given call attempt. ★ acheminement → *acheminement 2.* R маршрутизация (трафика); направление (трафика) (прикоммутации каналов). D Verkehrslenkung (bei Leitungsvermittlung). E encaminamiento (en conmutación de circuitos); ruta de tráfico (en conmutación de circuitos). I istradamento del traffico (nella commutazione di circuito). N verkeersroutering. P kierowanie rucheur (w komutacji łączy). S trafikdirigering. (721)
11. **traffic routing plan** : → *plan 3*

roving

1. **roving** : a collection of parallel strands or parallel filaments assembled without intentional twist. ★ stratifil → *stratifil 1.* R ровница. D Roving. E mecha; roving. I filato. N streng. P niedoprzęd. S förgarn. (212)

RQ

1. **gated RQ** : a procedure in which a check is made for the presence of a signal repetition during the non-print cycle. *Note.* — See CCIR Recommendation 342. ★ pointage de RQ → *pointage 1.* R проверка наличия запроса. D begrenztes RQ. E punteado de RQ. I ricerca ciclo di richiesta. N poort-RQ. P kontrola obecności sygnału powtórzenia. S förfrågningskontroll. (721)
2. **RQ cycle** : → *cycle 19*
3. **tested RQ** : a procedure in which a check is made for the presence of a signal repetition and a check is made for the ratio of the number of elements A to number of elements Z in each of characters received after the signal repetition within the non-print cycle. *Note.* — See CCIR Recommendation 342. ★ contrôle de RQ → *contrôle 10.* R контроль запроса. D geprüftes RQ. E control de RQ. I controllo ciclo di richiesta. N test-RQ. P kontrola poprawności powtórzeń. S provad förfrågning. (721)

RT

1. **RT** (*Syn.* reverberation time) : → *time 155*

RTI

1. **RTI** (*Syn.* relative temperature index) : → *index 37*

RTM

1. **RTM** (*Syn.* reference test method) : → *method 17*

rubber

1. **lead rubber** : rubber, containing a high proportion of lead compounds, used as a flexible protective barrier. ★ caoutchouc au plomb → *caoutchouc 1.* R просвинцованная резина. D Bleigummi. E caucho al plomo. I gomma piombifera. N loodrubber. P guma ołowiowa. S blygummi. (881)
2. **rubber gloves method** (*Syn.* insulated gloves method) : → *method 11*
3. **rubber spring drive** : → *drive 21*

ruling

1. **ruling span** (*Syn.* equivalent span) : → *span 3*

rumble

1. **rumble in a record player unit** : a low frequency vibration mechanically transmitted to the recording or reproducing turntable and superimposed on the reproduction of the recorded signal. ★ ronronnement d'une platine tourne-disque → *ronronnement 2.* R рокот. D Rumpelgeräusch eines Plattenspielers. E ronroneo de un giradiscos. I tremolio di una piastra giradischi. N dreun. P dudnienie. S buller. (806)
2. **rumble level** : → *level 81*

run

1. **capacitor start and run motor** : → *motor 13*
2. **weight per metre run between outer axles** : → *weight 5*
3. **weight per metre run over buffers** : → *weight 6*

runaway

1. **runaway speed** : → *speed 34*
2. **thermal runaway** : a critical condition arising during constant voltage charging in which the current and the temperature of the battery produce a cumulative mutually-reinforcing effect which further increases them and can lead to the destruction of the battery. ★ emballement thermique → *emballement 1.* R тепловой разгон. D thermische Instabilität; thermischer Runaway. E fuga térmica. I valanga termica. N thermal runaway. P rozbieg cieplny. S termisk rusning. (486)

run-back

1. **run-back of equipment** : the direction of operation corresponding to the notching back of the master controller. ★ régression de l'équipement → *régression 1.* R обратный ход аппарата. D Ab-Steuerung der Schaltausrüstung. E regresión del equipo. I sequenza inversa (dell'equipaggiamento). N het terugschakelen. P kierunek przełączeń nastawnika wstecz. S nedkoppling. (811)

running

1. **continuous running duty-type** : → *duty-type 4*
2. **empty running** : the running of a motor coach or a train unit without passengers or luggage. ★ marche à vide → *marche 12.* R пробег порожняком. D Leerfahrt (Leerzug). E marcha sin carga. I marcia a vuoto. N onbeladen rijden. P przebieg próżny. S tomkörning. (811)
3. **light running** (*Syn.* locomotive running light) : the running of a locomotive not coupled to a train. ★ marche haut-le-pied → *marche 28.* R следование резервом; пробег локомотива порожняком. D Leerfahrt (Lz, Lok allein). E marcha de máquina aislada. I marcia di una locomotiva isolata. N rijden als losse locomotief. P przebieg luzem (lokomotywy). S ensamt lok. (811)
4. **locomotive running light** (*Syn.* light running) : → *running 3*
5. **motor running capacitor** : → *capacitor 50*
6. **running angle support** (*Syn.* flying angle support) : → *support 10*
7. **running test** : → *test 73*

running-mean

1. **twelve-month running-mean sunspot number** : → *number 33*

run-of-river

1. **run-of-river power station** : → *power station 20*

runway

1. **runway lights** : → *light 63*

S

S

1. **S distortion** : → *distortion 63*
2. **S effect** : → *effect 68*
3. **siemens, S** : → *siemens 1*

Sabine

1. **Sabine absorption** : → *absorption 35*
2. **Sabine absorption coefficient** : → *coefficient 53*

saddle

1. **saddle** (of a socket) : metal part of a socket used for mounting the socket on the chassis. ★ collerette → *collerette 1.* R фланец (ламповой панели). D Sattel (einer Fassung). E collarín (de un zócalo). I flangia. N flens. P podłoże montażowe (gniazda). S krage. (581)

safe

1. **associated electrical apparatus** : → *apparatus 3*
2. **fail safe** : a design property of an item which prevents its failures from resulting in critical faults. ★ de sécurité intrinsèque → *sécurité 5.* R отказоустойчивость. D gefahrlos bei Ausfall. E prevención de fallos. I sicuro al guasto. N beveiligd tegen storingen. P bezpieczeństwo strukturalne (obiektu). S felsäker. (191)
3. **intrinsically safe luminaire** : → *luminaire 10*
4. **maximum experimental safe gap** : → *gap 17*
5. **minimum safe output of the unit** : → *output 24*
6. **safe clearance working** : → *working 7*
7. **spark test apparatus (for intrinsically-safe circuits)** : → *apparatus 14*

safety

1. **driver's safety device** : → *device 21*
2. **increased safety "e"** (for electrical apparatus for explosive gas atmospheres) : a type of protection in which additional measures are applied so as to give increased security against the possibility of excessive temperatures and of the occurrence of arcs and sparks inside and on external parts of electrical apparatus which does not produce arcs or sparks in normal service. *Notes. 1* — This type of protection is indicated by the letter "e". *2* — Increased security in electrical apparatus which does not produce electric arcs or sparks in normal service is achieved only by the application of the specific additional measures prescribed in IEC Publication 79-7. ★ sécurité augmentée "e" → *sécurité 19.* R защита вида "e" (для взрывозащищенного электрооборудования). D Erhöhte Sicherheit "e". E seguridad aumentada "e" (para material eléctrico para atmósferas explosivas gaseosas). I sicurezza aumentata "e" (per costruzioni elettriche per atmosfere esplosive per la presenza di gas). N verhoogde veiligheid "e" (van elektrisch materieel voor plaatsen met gasontploffingsgevaar). P budowa wzmocniona "e" (dla urządzeń elektrycznych przeciwwybuchowych). S utförande med höjd säkerhet. (426)
3. **mine safety lamp** : → *lamp 40*
4. **radiation safety officer** : → *officer 1*
5. **reactor safety fuse** : → *fuse 7*
6. **safety actuator** : → *actuator 8*
7. **safety alarm** : → *alarm 6*
8. **(safety) alarm system** : → *alarm 7*
9. **safety barrier** : → *barrier 13*
10. **(safety) interlock system** : → *interlock 4*
11. **safety lighting** : → *lighting 27*
12. **safety logic assembly** : → *assembly 24*
13. **safety member** : → *member 7*
14. **(safety) monitoring assembly** : → *monitoring 15*
15. **(safety) power cutback system** : → *system 179*
16. **safety shut-down system** (*Syn.* emergency shut-down system) : → *system 63*
17. **supply system for safety services** : → *system 207*

sag

1. **catenary sag** : the difference in height between the support points of the catenary and its lowest point. ★ flèche du câble porteur → *flèche 2.* R провисание несущего троса. D Durchhang des Tragseiles. E flecha del cable portador. I freccia della corda (portante). N doorhang van de draagkabel. P zwis linki nośnej. S nedhäng av bärlina. (811)
2. **contact wire sag** : the difference in height of the contact wire at the support points and at the middle of the span. ★ flèche du fil de contact → *flèche 3.* R провисание контактного провода. D Durchhang des Fahrdrahtes. E flecha del hilo de contacto. I freccia del filo di contatto. N doorhang van de rijdraad. P zwis przewodu jezdnego. S nedhäng av kontakttråd. (811)
3. **sag** : the maximum vertical distance in a span of an overhead line between a conductor and the straight line joining its points of support (see fig. 1). ★ flèche → *flèche 1.* R стрела провеса. D größter Durchhang. E flecha. I freccia. N maximale zeeg. P zwis. S nedhängning. (466)

salient

1. **salient pole** : → *pole 35*
2. **salient pole machine** : → *machine 23*
3. **salient pole synchronous induction motor** : → *induction motor 7*

salt

1. **salt bath electrode furnace** : → *furnace 47*
2. **salt bath furnace with immersed electrodes** : → *furnace 48*
3. **salt bath furnace with submerged electrodes** : → *furnace 49*

SAM

1. **SAM** (*Syn.* subsequent address message) : → *message 16*

sample

1. **sample** (of a signal) : a representative value of a signal at a chosen instant obtained from the values of that signal near this instant. *Notes 1* — Ideally, the value of a sample is equal to the value of the signal at a chosen instant ; in practice it is equal or proportional to a weighted average of the varying value of the signal near this instant. *2* — Associated terms are : "to sample"; "sampling". ★ échantillon → *échantillon 1.* R отсчет (сигнала). D Abtastwert (eines Signals). E muestra (de una señal). I campione. N monster (van een signaal). P próbka (sygnału). S sampel. (702,704)

sampled

1. **sampled signal** : → *signal 164*
2. **sampled signal** : → *signal 165*

sampler

1. **sampler** (*Syn.* sampling element) : signal converter which changes a continuous signal into a sampled signal. ★ échantillonneur → *échantillonneur 1.* R квантизатор; импульсный элемент. D Abtaster. E muestreador. I campionatore. N aftaster. P człon próbkujący. S samplare. (351)

sampling

1. **sampling** (of a signal) : the process of taking samples of a signal, usually at equal time intervals. *Note.* — The associated verb is "to sample" (a signal). ★ échantillonnage → *échantillonnage 3.* R дискретизация (сигнала). D Abtasten (eines Signals); Sampling. E modelización (de una señal). I campionamento (di un segnale). N bemonsteren (van een signaal). P próbkowanie (sygnału). S sampling. (704,721)
2. **sampling action** : → *action 19*
3. **sampling element** (*Syn.* sampler) : → *sampler 1*
4. **sampling frequency** (*Syn.* sampling rate) : → *rate 84*

5. **sampling oscilloscope** : → *oscilloscope 6*
6. **sampling rate** : → *rate 84*
7. **sampling spoon** : → *spoon 1*
8. **sampling test** : → *test 74*

sand

1. **sand filling "q"** : → *filling 2*

sandwich

1. **sandwich windings** : → *winding 58*

saponification

1. **saponification number** : → *number 28*

satellite

1. **active satellite** : a satellite carrying a space station. ★ satellite actif → *satellite 11.* R активный спутник. D aktiver Satellit. E satélite activo. I satellite attivo. N actieve satelliet. P satelita aktywny. S aktiv satellit. (725)
2. **attitude-stabilized satellite** : a satellite with at least one axis maintained in a specified direction, e.g. toward the centre of the Earth, the Sun or a specified point in space. ★ satellite à commande d'orientation → *satellite 10.* R спутник с управляемой ориентацией. D Satellit mit Fluglageregelung. E satélite de actitud estabilizada. I satellite a orientamento controllato. N satelliet met gestabiliseerde oriëntatie. P satelita o sterowanej orientacji. S attitydstabiliserad satellit. (725)
3. **direct distribution by satellite** : → *distribution 9*
4. **geostationary satellite** : a stationary satellite having the Earth as its primary body. ★ satellite géostationnaire → *satellite 12.* R геостационарный спутник. D geostationärer Satellit. E satélite geoestacionario. I satellite geostazionario. N geostationaire satelliet. P satelita geostacjonarny. S geostationär satellit. (725)
5. **geostationary satellite orbit** : → *orbit 5*
6. **geosynchronous satellite** : a synchronous satellite of the Earth. *Note.* — The sidereal period of rotation of the Earth is about 23 hours 56 minutes. ★ satellite géosynchrone → *satellite 13.* R геосинхронный спутник. D geosynchroner Satellit. E satélite geosincrónico. I satellite geosincrono. N geosynchrone satelliet. P satelita geosynchroniczny. S geosynkron satellit. (725)
7. **reflecting satellite** : a satellite intended to reflect radiocommunication signals. ★ satellite réflecteur → *satellite 15.* R пассивный спутник. D reflektierender Satellit. E satélite reflector. I satellite di riflessione. N passieve satelliet. P satelita pasywny. S passiv satellit. (725)
8. **satellite** : a body which revolves around another body of preponderant mass and which has a motion primarily and permanently determined by the force of attraction of that other body. *Note.* — A body so defined which revolves around the Sun is called a planet or planetoid. ★ satellite → *satellite 9.* R спутник. D Satellit. E satélite. I satellite. N satelliet. P satelita. S satellit. (725)
9. **satellite broadcasting** : → *broadcasting 9*
10. **satellite link** : → *link 36*
11. **satellite network** : → *network 83*
12. **satellite news gathering** : → *gathering 2*
13. **satellite radiodetermination** : → *radiodetermination 1*
14. **satellite radionavigation** : → *radionavigation 1*
15. **satellite substation** : → *substation 25*
16. **satellite system** : → *system 181*
17. **stationary satellite** : a satellite which remains fixed in relation to the surface of the primary body; by extension, a satellite which remains approximately fixed relative to the surface of the primary body. *Note.* — A stationary satellite is a synchronous satellite with an equatorial, circular and direct orbit. ★ satellite stationnaire → *satellite 16.* R стационарный спутник. D stationärer Satellit. E satélite estacionario. I satellite stazionario. N stationaire satelliet. P satelita stacjonarny. S stationär satellit. (725)
18. **station-keeping satellite** : a satellite, the position of the centre of mass of which is controlled to follow a specified law, either in relation to the positions of other satellites belonging to the same space system or in relation to a point on Earth which is fixed or moves in a specified way. ★ satellite maintenu en position → *satellite 14.* R спутник с управляемым положением. D geführter Satellit. E satélite de posición controlada. I satellite a posizione controllata. N satelliet met gestuurde positie. P satelita o sterowanej pozycji. S stationsföljande satellit. (725)
19. **synchronized satellite** : a satellite controlled so as to have an anomalistic period or a modal period equal to that of another satellite or planet, or to the period of a given phenomenon, and to pass a characteristic point in its orbit at specified instants. ★ satellite synchronisé → *satellite 18.* R синхронизированный спутник. D synchronisierter Satellit. E satélite sincronizado. I satellite sincronizzato. N gesynchroniseerde satelliet. P satelita synchronizowany. S synkroniserad satellit. (725)
20. **synchronous satellite** : a satellite for which the mean sidereal period of revolution is equal to the sidereal period of rotation of the primary body; by extension, a satellite for which the mean sidereal period of revolution is approximately equal to the sidereal period of rotation of the primary body. ★ satellite synchrone → *satellite 17.* R синхронный спутник. D synchroner Satellit. E satélite sincrónico. I satellite sincrono. N synchrone satelliet. P satelita synchroniczny. S synkron satellit. (725)

saticon

1. **saticon** (trade mark) : a low-electron-velocity camera tube with a photo-conductive layer based on selenium, arsenic and tellurium. ★ saticon → *saticon 1.* R сатикон. (723)

saturable

1. **saturable reactor** : → *reactor 37*

saturated

1. **tensor permeability for a magnetostatically saturated medium** (*Syn.* Polder's tensor permeability) : → *permeability 18*

saturation

1. **(colour) saturation control** : → *control 36*
2. **magnetic saturation** : the state of a ferromagnetic or ferrimagnetic substance in which magnetization cannot be significantly increased by increasing the magnetic field strength. ★ saturation magnétique → *saturation 25.* R магнитное насыщение. D magnetische Sättigung. E saturación magnética. I saturazione magnetica. N magnetische verzadiging. P nasycenie magnetyczne. S magnetisk mättning. (121)
3. **saturation** : phenomenon represented by the part of a characteristic curve for which the ordinates (which represent the output variable) show a negligible additional change for any further increase of the abscissae (which represent the input variable). ★ effet de saturation → *effet 40.* R зона насыщения. D Sättigung. E saturación. I saturazione. N verzadiging. P nasycenie. S mättning. (351)
4. **saturation** (of a colour) : the property of a colour characterised by the proportion of a monochromatic colour stimulus, in an additive mixture with a specified achromatic stimulus, which matches the stimulus of the colour under consideration. *Notes. 1* — In television the concept of saturation is analogous to the concept of colour purity utilised in colorimetry. *2* — The saturation of a colour becomes the greater as it approaches a monochromatic colour. *3* — In the case of purple stimuli the monochromatic stimulus is replaced by a stimulus which corresponds to a point on the purple boundary. ★ saturation → *saturation 22.* R насыщенность цвета. (723)
5. **saturation** : 1. The state of a ferromagnetic material subjected to an external magnetic field of such intensity that the induced magnetization cannot be substantially increased by further strengthening of that magnetic field. 2. (Deprecated in this sense.) The state of remanent magnetization which results from having subjected a ferromagntic material to such an external magnetic field. It is more accurately called "saturation remanence". ★ saturation → *saturation 23.* R магнитное насыщение. D Sättigung. E saturación. I saturazione. N verzadiging. P nasycenie. S mättning. (806)
6. **saturation** : chromaticness, colourfulness, of an area judged in proportion to its brightness. *Note.* — For given viewing conditions and at luminance levels within the range of photopic vision, a colour stimulus of a given chromaticity exhibits approximately constant saturation for all luminance levels, except when the brightness is very high. ★ saturation → *saturation 24.* R чистота цвета. D Sättigung. E saturación. I saturazione. N verzadiging. P nasycenie. S mättnad. (845)

7. **saturation characteristic** : → *characteristic 73*
8. **saturation current** : → *current 177*
9. **saturation current** : → *current 178*
10. **saturation curve** : → *curve 33*
11. **saturation factor** : → *factor 159*
12. **saturation gain** : → *gain 32*
13. **saturation hysteresis loop** : → *loop 30*
14. **saturation $B(H)$ loop** : → *loop 31*
15. **saturation $J(H)$ loop** : → *loop 32*
16. **saturation $M(H)$ loop** : → *loop 33*
17. **saturation inductance** : → *inductance 7*
18. **saturation magnetic polarization** : → *polarization 43*
19. **saturation magnetization** : → *magnetization 9*
20. **saturation magnetization (mass) density** : → *density 28*
21. **saturation power** : → *power 171*
22. **saturation reactance** : → *reactance 18*
23. **saturation state** : → *state 33*
24. **saturation voltage** : → *voltage 183*
25. **saturation voltage** : → *voltage 184*
26. **saturation voltage** : → *voltage 185*
27. **specific saturation magnetization** (*Syn.* saturation magnetization (mass) density) : → *density 28*

savart

1. **savart** : logarithmic frequency interval between two sounds having a fundamental-frequency ratio of the thousandth root of ten. *Notes. 1* — One octave is approximately equal to 300 savarts. *2* — The savart is used as a unit of logarithmic frequency interval. ★ savart → *savart 1.* R савар. D Savart. E savart. I savart. N savart. P sawart. S savart. (801)

saw-tooth

1. **saw-tooth keyboard** : → *keyboard 6*

scalar

1. **effective scalar permeability** : → *permeability 11*
2. **scalar line integral** : → *integral 6*
3. **scalar magnetic potential** : → *potential 11*
4. **scalar permeability for circularly polarized fields** : → *permeability 26*
5. **(scalar) potential** : → *potential 12*
6. **scalar product** : → *product 8*
7. **scalar quantity** : → *quantity 29*

scale

1. **comparison scale** : a scale, generally of 7 steps, making it possible to quantify, subjectively, the difference in technical quality between two given pictures, under specified conditions of observation. ★ échelle de comparaison → *échelle 8.* R шкала сравнения. (723)
2. **equally tempered scale** : musical scale formed by division of the octave into 12 equal intervals. ★ gamme à tempérament égal → *gamme 2.* R равномерно темперированный строй. D gleichschwebende temperierte Stimmung. E escala igualmente templada. I scala temperata. N toonladder in de evenredig zwevende stemming. P gama temperowana równomiernie. S liksvävande skala; tempererad skala. (801)
3. **expanded scale instrument** : → *instrument 7*
4. **grey scale** : a television test pattern representing different grey levels from black to white. ★ échelle des gris → *échelle 12.* R серая шкала. (723)
5. **grey scale distortion** : → *distortion 42*
6. **grey scale tracking** : → *tracking 2*
7. **impairment scale** : a scale, generally of 5,6 or 7 steps, making it possible to quantify a subjective evaluation of the technical degradation of a picture due to a particular unwanted effect under specified conditions of observation. ★ échelle de dégradation → *échelle 9.* R шкала ухудшения. (723)
8. **just scale** : musical scale whose frequency intervals are chosen to give major and minor triads with frequencies in the ratio 4:5:6 and 10:12:15 respectively. ★ gamme juste → *gamme 18.* R чистый строй. D reine Stimmung. E escala justa. I scala di Zarlino (o naturale). N toonladder in de reine stemming. P skala naturalna; gama Zarlina. S ren stämning; ren skala. (801)
9. **length of a scale division** : → *length 18*
10. **musical scale** : a fixed series of sounds, ascending or descending in order of frequency according to a specified scheme of frequency intervals. ★ gamme → *gamme 1.* R музыкальный строй. D musikalische Stimmung. E escala musical. I scala musicale. N toonladder. P skala muzyczna; gama (muzyczna). S tonskala. (801)
11. **Pythagorean scale** : musical scale whose frequency intervals are represented by ratios of integral powers of 3 and 2. ★ gamme de Pythagore → *gamme 7.* R пифагоров строй. D pythagoräische Stimmung. E escala pitagórica. I scala pitagorica (o diatonica). N toonladder in de stemming van Pythagoras. P gama pitagorejska. S Pythagoras tonskala. (801)
12. **quality scale** : a scale, generally of 5,6 or 7 steps, making it possible to quantify a subjective evaluation of the technical quality of a picture, under specified conditions of observation. ★ échelle de qualité → *échelle 10.* R шкала качества. (723)
13. **scale** (of an analogue instrument) : a series of marks, figures or other signs on the indicating device. ★ échelle → *échelle 7.* R шкала (аналогового прибора). D Skala. E escala (de un aparato analógico). I scala (di uno strumento analogico). N schaal. P podziałka (przyrządu analogowego). S skala. (301)
14. **scale division** : → *division 7*
15. **scale interval** : → *interval 17*
16. **scale length** : → *length 28*
17. **scale marking** : → *marking 3*
18. **scale numbering** : → *numbering 2*
19. **scale of turbulence** : a length representative of the average size in space of irregularities in velocity within a turbulent medium. ★ échelle de turbulence → *échelle 11.* D Turbulenzradius; Ausdehnung von Turbulenzzellen. P skala turbulencji. (705)
20. **zero scale mark** : → *mark 11*

scaler

1. **difference scaler** : a scaler having two inputs, which adds one to its contents for each incoming signal pulse at one input and substracts one from its contents for each incoming signal pulse at the other input. ★ échelle de comptage à différence → *échelle de comptage 2.* R разностное пересчетное устройство. D Differenzzähler. E contador de escala de diferencia. I scalatore di conteggio a differenza. N verschilpulsteller. P przelicznik różnicowy. S differenspulsräknare. (391)
2. **reversible scaler** : a scaler having a single input, which, for each incoming signal pulse, adds one to its contents or subtracts one from its contents, according to an auxiliary control. ★ échelle de comptage réversible → *échelle de comptage 3.* R реверсивное пересчетное устройство. D Vor-Rück-Zähler. E contador de escala reversible. I scalatore di conteggio reversibile. N omkeerbare pulsteller. P przelicznik rewersyjny. S reversibel pulsräknare. (391)
3. **scaler** : an electronic sub-assembly designed for counting electrical pulses and containing one or more scaling circuits. ★ échelle de comptage → *échelle de comptage 1.* R пересчетное устройство. D Zähler. E contador de escala. I scalatore di conteggio. N pulsteller. P przelicznik. S pulsräknare. (391,881)

scaling

1. **scaling** (for analogue-to-digital conversion) : an operation, generally preceding analogue-to-digital conversion either by amplification or by attenuation, to match the range of the input signal to that of the convertor. ★ mise à l'échelle → *échelle 17.* R масштабирование (для аналого-цифрового преобразования). D Normierung (für eine Analog-Digital-Umsetzung). E puesta en escala (para la conversión analógica-digital). I messa in scala (per conversione analogica-numerica). N meetgebiedaanpassing (voor AD-omzetters). P dopasowanie (w przetwarzaniu analogowo-cyfrowym). S skalning. (303)
2. **scaling circuit** : → *circuit 154*
3. **scaling factor** : → *factor 160*

scan

1. **field scan** (*Syn.* vertical scan) : the component of the movement of the scanning spot in a direction perpendicular to the scanning line during a field with its corresponding flyback. ★ balayage de trame → *balayage 9.* R полевая развертка. (723)

2. **line scan** (*Syn.* horizontal sweep) : the movement of a scanning spot along the scanning line and the corresponding flyback. ★ balayage de ligne → *balayage 8.* R строчная развертка. (723)
3. **scan** (*Syn.* trace) : → *trace 1*
4. **vertical scan** (*Syn.* field scan) : → *scan 1*

scanned

1. **scanned element** (*Syn.* picture element) : → *element 36*

scanner

1. **flying-spot scanner** : scanning equipment in television in which a small spot of light scans the image, the reflected or transmitted light being converted into an electrical signal. ★ analyseur à spot lumineux → *analyseur 3.* R установка с бегущим лучом. (723)
2. **flying-spot scanner tube** : → *tube 34*
3. **slide scanner** : equipment for permitting a still image recorded as a photographic slide to be converted into a television signal. ★ analyseur d'images fixes → *analyseur 9.* R телевизионный диапроектор. (723)

scanning

1. **electron beam scanning system** : → *system 61*
2. **high-velocity scanning** : the scanning of a target with electrons of such velocity that the secondary emission factor is greater than unity. ★ balayage à électrons rapides → *balayage 6.* R развертка быстрыми электронами. D Abtastung mit schnellen Elektronen. E exploración a alta velocidad. I spazzolamento con elettroni veloci. N hoog-energetische aftasting. P wybieranie elektronami szybkimi. S höghastighetssvep. (531)
3. **interlaced scanning** : a form of scanning (in television) in which the complete picture is explored through successive fields. The lines of each field are scanned sequentially and are located between the lines of the preceding and succeeding fields. ★ balayage (ligne par ligne) entrelacé → *balayage 13.* R чересстрочная развертка. (723)
4. **limited scanning** : scanning at double or other integral multiples of the scanning pitch normally used so as to shorten the facsimile transmission time. ★ exploration réduite → *exploration 6.* R сокращенная развертка. D begrenztes Abtasten. E exploración reducida; exploración limitada. I scansionamento ridotto. N beperkt aftasten. P rozwinięcie ograniczone. S begränsad avsökning. (721)
5. **low-velocity scanning** : the scanning of a target with electrons of such velocity that the secondary emission factor is appreciably less than unity. ★ balayage à électrons lents → *balayage 5.* R развертка медленными электронами. D Abtastung mit langsamen Elektronen. E exploración a baja velocidad. I spazzolamento con elettroni lenti. N laag-energetische aftasting. P wybieranie elektronami wolnymi. S låghastigetssvep. (531)
6. **near-field scanning technique** : → *technique 14*
7. **negative scanning shift** : → *shift 25*
8. **positive scanning shift** : → *shift 31*
9. **progressive scanning** (*Syn.* sequential scanning) : scanning (in television) in which a picture is fully explored by means of one field. ★ balayage (ligne par ligne) progressif → *balayage 14.* R построчная развертка. (723)
10. **scanning** (in switching) : a process of sequential interrogation, generally initiated periodically, that determines the status of each device within a group of common control devices. ★ exploration → *exploration 2.* R сканирование (в коммутации). D abtasten; absuchen. E exploración (en conmutación). I esplorazione a scansione. N aftasten. P przepatrywanie (w komutacji). S avsökning. (714)
11. **scanning** (of a surface) : the systematic exploration of a surface, element by element, for example, by the movement of a scanning spot. *Note.* — Associated term : to scan. ★ balayage → *balayage 4.* R развертка (поверхности). (723)
12. **scanning** (of a source) : the systematic exploration of a surface, element by element, in order to produce an electrical signal which represents the luminous characteristics of each element. *Note.* — Associated term : to scan. ★ analyse → *analyse 1.* R развертка (в датчике сигнала). (723)
13. **scanning** (of a display) : the process of building up an image on a display device, element by element, these derived successively from the electrical signal. *Note.* — Associated term : to scan. ★ synthèse → *synthèse 4.* R развертка (в воспроизводящем устройстве). (723)
14. **scanning** (in television) : scanning in which the elements of a rectangular surface are explored in equidistant straight lines substantially parallel to the largest side of the rectangle, which are traversed at constant speed in the same sense. ★ balayage ligne par ligne → *balayage 12.* R развертка (в телевидении). (723)
15. **scanning antenna** : → *antenna 100*
16. **scanning density** : → *density 29*
17. **scanning equipment** : → *equipment 64*
18. **scanning equipment** : → *equipment 65*
19. **scanning field** : → *field 57*
20. **scanning (in facsimile receiver)** : the process of building up the image reproduced by facsimile from elements derived in succession from the received signal. ★ exploration (à la réception) → *exploration 3.* R развертка (на приеме); синтез (изображения); сканирование. D abtasten (im Faksimile-Empfänger). E exploración (en recepción); síntesis (de imagen). I scansionamento (in ricezione). N aftasten (bij facsimile-ontvanger). P rozwinięcie (w odbiorniku symilograficznym); synteza (obrazu). S uppbyggnad. (721)
21. **scanning (in facsimile transmitter)** : the process of resolving an image to be reproduced by facsimile into picture elements which are then represented in succession by the value of a characteristic of an electrical signal according to the luminous characteristics of the element considered. ★ exploration (à l'émission) → *exploration 4.* R развертка (на передаче); анализ (изображения). D abtasten (im Faksimile-Sender). E exploración (en emisión); análisis (de imagen). I scansionamento (in trasmissione). N aftasten (bij facsimilezender). P rozwinięcie (w nadajniku symilograficznym); analiza (obrazu). S avsökning. (721)
22. **scanning line** : → *line 135*
23. **(scanning) line** : → *line 136*
24. **scanning line frequency** : → *frequency 178*
25. **scanning line period** : → *period 29*
26. **scanning pitch** : → *pitch 11*
27. **scanning speed** : → *speed 35*
28. **scanning speed** : → *speed 36*
29. **scanning spot** : → *spot 11*
30. **scanning spot (at reception)** : → *spot 12*
31. **scanning spot (at transmission)** : → *spot 13*
32. **sequential scanning** (*Syn.* progressive scanning) : → *scanning 9*
33. **total scanning line length** : → *length 33*
34. **usable scanning line length** : → *length 34*
35. **vector scanning** : a method of displaying a synthesised image on screen in which the scanning spot only follows the shortest path necessary to draw the image, moving directly from one point to another, whatever the positions of the points. ★ balayage vectoriel → *balayage 16.* R векторная развертка. (723)

scatter

1. **peak scatter factor** : → *factor 129*
2. **precipitation scatter (propagation)** : tropospheric propagation due to scattering caused by hydrometeors, mainly rain. ★ (propagation par) diffusion par les précipitations → *propagation 34.* D (Ausbreitung durch) Niederschlagsstreuung. P rozpraszanie opadowe. (705)
3. **(propagation by) ionospheric scatter** : ionospheric propagation involving scatter from irregularities in the electron density in the ionosphere. ★ (propagation par) diffusion ionosphérique → *diffusion 39.* D (Ausbreitung infolge von) ionosphärische(r) Streuung. P propagacja jonosferyczna rozproszeniowa. (705)
4. **scatter factor** : → *factor 161*
5. **tropospheric scatter (propagation)** : tropospheric propagation due to scattering from many inhomogeneities and discontinuities in the refractive index of the atmosphere. *Note.* — Tropospheric scatter may result in trans-horizon propagation. ★ (propagation par) diffusion troposphérique → *diffusion 41.* D troposphärische Streuausbreitung; Troposcatter. P rozpraszanie troposferyczne (propagacji). (705)

scattered

1. **scattered radiation** : → *radiation 106*
2. **scattered wave** : → *wave 51*

scattering

1. **back scattering** : scattering of an electromagnetic beam in which the directions of propagation of the scattered waves under consideration are at obtuse angles in the region of 180 degrees to the average direction of propagation of the original beam. ★ rétrodiffusion → *rétrodiffusion 6.* D Rückstreuung. P rozpraszanie tylne. (705)
2. **back scattering area** (*Syn.* back scattering cross section) : → *cross-section 2*
3. **back scattering cross section** : → *cross-section 2*
4. **coherent scattering** : a process in which radiation is scattered in such a manner that a definite phase relation exists between the scattered and incident waves. ★ diffusion cohérente → *diffusion 17.* D kohärente Streuung. E dispersión coherente. I sparpagliamento coerente. N coherente verstrooiing. P rozpraszanie spójne. S koherent spridning. (026,881)
5. **coherent scattering cross-section** : → *cross-section 6*
6. **Compton scattering** : incoherent scattering of photons by the Compton effect. ★ diffusion Compton → *diffusion 18.* R комптоновское рассеяние. D Compton-Streuung. E dispersion de Compton. I diffusione Compton. N Comptonverstrooiing. P rozproszenie Comptona. S Compton-spridning. (881)
7. **deep scattering layer** : → *layer 4*
8. **elastic scattering** : scattering in which the total kinetic energy is unchanged. ★ diffusion élastique → *diffusion 23.* R упругое рассеяние. D elastische Streuung. E difusión elástica. I diffusione elastica. N elastische verstrooiing. P rozpraszanie sprężyste. S elastisk spridning. (026,391,881)
9. **elastic scattering cross-section** : → *cross-section 12*
10. **fibre scattering** : in an optical fibre, that part of the total scattering attributable to variations of geometry and refractive index profile of the fibre. ★ diffusion de fibrage → *diffusion 19.* R рассеяние в волокне. D Faserstreuung. E difusión de la fibra. I diffusione propria della fibra. N verstrooiing in de vezel. P rozpraszanie światłowodowe. S fiberberoende spridning. (731)
11. **forward scattering** : scattering of an electromagnetic beam in which the directions of propagation of the scattered waves under consideration are at small acute angles to the average direction of propagation of the original beam. ★ prodiffusion → *prodiffusion 1.* D Vorwärtsstreuung. P rozpraszanie przednie. (705)
12. **group transfer scattering cross-section** : → *cross-section 15*
13. **incoherent scattering** : a process in which radiation is scattered in such a manner that no definite phase relation exists between the scattered and incident waves. ★ diffusion incohérente → *diffusion 24.* D inkohärente Streuung. E dispersión incoherente. I sparpagliamento incoerente. N incoherente verstrooiing. P rozpraszanie niespójne. S inkoherent spridning. (026,881)
14. **incoherent scattering cross-section** : → *cross-section 16*
15. **inelastic scattering** : scattering in which the total kinetic energy changes. ★ diffusion inélastique → *diffusion 25.* R неупругое рассеяние. D inelastische Streuung. E difusión inelástica. I diffusione anelastica. N inelastische verstrooiing. P rozpraszanie niesprężyste. S inelastisk spridning. (026,391,881)
16. **inelastic scattering cross-section** : → *cross-section 17*
17. **mass attenuation coefficient (scattering)** : → *coefficient 36*
18. **material scattering** : in an optical fibre, that part of the total scattering attributable to the properties of the materials used for fibre fabrication. ★ diffusion du matériau → *diffusion 22.* R рассеяние в материале. D Materialstreuung. E difusión del material. I diffusione del materiale. N materiaalverstrooiing. P rozpraszanie materiałowe. S materialberoende spridning. (731)
19. **nonlinear scattering** : scattering accompanied by a change of optical radiation from one wavelength to one more other wavelengths. *Note.* — Examples are Raman and Brillouin scattering. ★ diffusion non-linéaire → *diffusion 29.* R нелинейное рассеяние. D nichtlineare Streuung. E difusión no lineal. I diffusione non lineare. N niet-lineaire verstrooiing. P rozpraszanie nielinearne. S olinjär spridning. (731)
20. **radiative inelastic scattering** : inelastic scattering in which some of the kinetic energy of an incident particle goes into excitation of the target nucleus followed by subsequent de-excitation through the emission of one or more photons. ★ diffusion inélastique radiative → *diffusion 26.* R радиационное неупругое рассеяние. D inelastische Streuung mit Strahlungsemission. E difusión inelástica radiativa. I diffusione anelastica radiativa. N stralende inelastische verstrooiing. P niesprężyste rozpraszanie radiacyjne. S radiativ inelastisk spridning. (391)
21. **radiative inelastic scattering cross-section** : → *cross-section 22*
22. **Rayleigh scattering** : light scattering in a medium due to inhomogeneities in material density or composition of that medium which are small with respect to wavelength. *Note.* — The scattered power is inversely proportional to the fourth power of the wavelength. ★ diffusion de Rayleigh → *diffusion 20.* R рэлеевское рассеяние. D Rayleighstreuung. E difusión de Rayleigh. I diffusione di Rayleigh. N Rayleigh-verstrooiing. P rozpraszanie Rayleigh'a. S Rayleigh-spridning. (731)
23. **scattering** : a process in which a change in direction or energy of an incident particle or incident radiation is caused by a collision with a particle or a system of particles. ★ diffusion → *diffusion 11.* R рассеяние. D Streuung. E difusión. I diffusione. N verstrooiing. P rozpraszanie. S spridning. (026,391,881)
24. **scattering** : the distribution in many directions of the energy of an incident wave which strikes randomly distributed particles or a rough surface. ★ diffusion → *diffusion 13.* R рассеяние. D Streuung. E difusión. I diffusione. N verstrooiing. P rozpraszanie. S spridning. (731)
25. **scattering** : irregular diffraction and reflection of a sound wave in many directions. ★ diffusion acoustique → *diffusion 15.* R акустическое рассеяние (рассеяние звука). D Streuung. E difusión acústica. I diffusione acustica. N verstrooiing. P rozproszenie. S diffusion; spridning. (801)
26. **scattering** (*Syn.* diffusion) : → *diffusion 3*
27. **scattering area** (*Syn.* scattering cross section) : → *cross-section 23*
28. **scattering coefficient** (*Syn.* scattering parameter) : → *parameter 8*
29. **scattering cross section** : → *cross-section 23*
30. **scattering cross-section** : → *cross-section 24*
31. **scattering cross-section of a surface or a bottom** : → *cross-section 25*
32. **scattering cross-section of an object or volume** : → *cross-section 26*
33. **scattering indicatrix** (*Syn.* indicatrix of diffusion) : → *diffusion 12*
34. **scattering matrix** : → *matrix 10*
35. **scattering parameter** : → *parameter 8*
36. **scattering region** : → *region 22*
37. **spectral linear scattering coefficient** : → *coefficient 64*
38. **surface or bottom scattering coefficient** : → *coefficient 67*
39. **surface or bottom scattering strength** (*Syn.* surface or bottom backscattering differential) : → *differential 37*
40. **thermal inelastic scattering** : inelastic scattering in which a slow neutron or other particle exchanges energy with a molecule or lattice. ★ diffusion inélastique thermique → *diffusion 27.* R тепловое неупругое рассеяние. D inelastische Streuung thermischer Neutronen. E difusión inelástica térmica. I diffusione anelastica termica. N thermische inelastische verstrooiing. P niesprężyste rozpraszanie termiczne. S termisk inelastisk spridning. (391)
41. **thermal inelastic scattering cross-section** : → *cross-section 28*
42. **volume scattering coefficient** : → *coefficient 77*
43. **volume scattering strength** (*Syn.* volume backscattering differential) : → *backscattering 7*

scavenger

1. **scavenger** : an additive incorporated in an insulating liquid to react with ionic components resulting from its degradation.

★ épurateur → *épurateur 1.* R акцептор. D Scavenger. E precipitante. I stabilizzante. N ionenvanger. P oczyszczacz. S stabilisator. (212)

2. **scavenger equivalent** : → *equivalent 63*

s.c.f.m.

1. **s.c.m.f.** (*Syn.* specific field strength-distance product) : → *product 9*

schedule

1. **economic loading schedule** : the most economic use of the available components of the network. ★ répartition optimale des charges → *répartition 26.* R экономичное распределение нагрузок. D wirtschaftliche Auslastung. E reparto óptimo de cargas. I ripartizione ottimale dei carichi. N economische belastingsverdeling. P ekonomiczny rozkład obciążeń. S ekonomisk driftsplan. (603)
2. **generation schedule** : the scheduling of generation facilities for a specified period. ★ programme de production → *programme 15.* R распределение мощности. D Kraftwerkseinsatzplan. E programma de generación. I programma di produzione. N produktieprogramma. P program wytwarzania. S produktionsplanering. (603)
3. **schedule speed** : → *speed 37*

scheduled

1. **scheduled maintenance** : → *maintenance 41*
2. **scheduled operation** : → *operation 58*

scheduled-outage

1. **scheduled outage** (*Syn.* planned outage) : → *outage 5*
2. **scheduled-outage duration** (*Syn.* planned-outage duration) : → *duration 28*

Scherbius

1. **Scherbius machine** : → *machine 24*

Schottky

1. **Schottky effect** : → *effect 69*

Schrage

1. **Schrage motor** : → *motor 83*

scintigram

1. **scintigram** : the record of a scintiscanner usually of variations in density on paper or photographic film. ★ scintigramme → *scintigramme 1.* R сцинтиграмма. D Szintigramm. E escintilograma. I scintigramma. N scintigram. P scyntygram. S scintigram. (881)

scintillating

1. **scintillating material** : → *material 37*

scintillation

1. **scintillation** (of a scintillator) : luminescence of short duration (of the order of a few microseconds or less) caused by an ionizing particle. ★ scintillation → *scintillation 6.* R сцинтилляция (сцинтиллятора). D Szintillation. E centelleo (de un centelleador). I scintillazione (di uno scintillatore). N scintillatie (v.e. scintillator). P scyntylacja (scyntylatora). S scintillation. (391,881)
2. **scintillation** : irregular fluctuations of a parameter of the field, such as amplitude, phase, polarization or direction of arrival, which is due to variations in the refractive index of certain media through which the radio wave passes. ★ scintillation → *scintillation 7.* D Szintillation. P scyntylacja. (705)
3. **scintillation counter** : → *counter 8*
4. **scintillation decay time** : → *time 159*
5. **scintillation detector** : → *detector 31*
6. **scintillation duration** : → *duration 39*
7. **scintillation fall time** : → *time 160*
8. **scintillation rise time** : → *rise time 7*
9. **scintillation spectrometer** : → *spectrometer 8*

scintillator

1. **liquid scintillator activity meter** : → *meter 29*
2. **scintillator** : the element sensitive to ionizing radiation in a scintillation detector. It consists of a defined quantity of scintillating material, in a suitable form. ★ scintillateur → *scintillateur 2.* R сцинтиллятор. D Szintillator. E centelleador. I scintillatore. N scintillator. P scyntylator. S scintillator. (391,881)
3. **scintillator** : luminescent material, usually liquid or solid, showing radioluminescence with a short afterglow. ★ scintillateur → *scintillateur 3.* R сцинтиллирующее вещество. D Szintillator. E escintilador. I scintillatore. N scintillator. P scyntylator. S scintillator. (845)

scintiscanner

1. **scintiscanner** : an apparatus that analyzes or measures radiation successively from radioactive material in elementary volumes of a part of the body and a device for indicating or recording a two-dimensional diagram of the distribution of the material. ★ scanner → *scanner 1.* R сканер. D Szintiscanner. E escintilógrafo; explorador; dispositivo de barrido. I scintigrafo lineare dinamico. N scinti-aftaster. P scyntygraf. S scintigraf. (881)

scoop-proof

1. **scoop-proof connector** : → *connector 44*

score

1. **mean opinion score** : the mean value on a given telephone transmission system, of the opinion scores taken over all the subjects in an experiment. ★ note moyenne d'opinion → *note 3.* R среднее значение оценок методом мнений. D mittlere Beurteilungsnote. E nota media de opinión. I indice d'opinione media. N gemiddeld waarderingscijfer. P wskaźnik opinii średni. S medelbedömningstal. (722)
2. **opinion score** (in telephony) : the value on a predefined scale that a subject allocates to his opinion of the performance of the telephone transmission system used either for conversation or only for listening to spoken material. *Note.* — The scale generally consists of five values, for example: excellent, good, fair, bad, unfair. ★ note d'opinion → *note 2.* R оценка методом мнений (в телефонии). D Beurteilungsnote (bei der Telefonie). E nota de opinión (en telefonía). I indice d'opinione. N (subjectief) waarderingscijfer. P wskaźnik opinii (w telefonii). S bedömningstal. (722)

scotopic

1. **scotopic vision** : → *vision 6*

Scott

1. **Scott connection** : → *connection 47*

scram

1. **scram** (*Syn.* emergency shutdown) : → *shutdown 1*

scrambled

1. **scrambled television** : → *television 25*

scrambler

1. **mode scrambler** (*Syn.* mode mixer) : a device for producing transfer of power between modes in an optical fibre, effectively scrambling the modes. *Note.* — Frequently used to provide a mode distribution that is independent of source characteristics. ★ embrouilleur de modes → *embrouilleur 2.* R смеситель мод. D Modenmischer. E mezclador de modos. I scambiatore; miscelatore (di modo). N modusmenger. P mieszacz modów. S modblandare. (731)
2. **scrambler** (in digital transmission) : a device used to combine a digital signal with a pseudo random sequence and intended to produce a randomized digital signal which conveys the same information and facilitates its transmission. *Note.* — The associated verb is "to scramble". ★ embrouilleur → *embrouilleur 1.* R скремблер (в цифровой передаче). D Scrambler (in digitaler Nachrichtenübertragung); Verwürfler. E escamoteamiento (en transmisión digital). I scrambler (in una trasmissione numerica). N versleutelschakeling (bij digitale transmissie). P mieszacz (w transmisji cyfrowej). S krypterare. (704)

scrap

1. **electrode scrap** (*Syn.* electrode breakages) : the amount of electrodes lost by breakage during the operation and not by consumption through the action of the arc current or oxidation. ★ débris d'électrode → *électrode 15.* R электродный скрап. D Elektrodenbruch. E desecho de electrodo; rotura de electrodo. I rottame di elettrodo; rottura di elettrodo. N elektrodeafval. P stłuczka elektrodowa. S elektrodskrot. (841)

screen

1. **cable screen clamp** : → *clamp 6*
2. **conductor screen** : an electrical screen of non-metallic and/or metallic material covering the conductor. ★ écran sur âme → *écran 34.* R экран по жиле. D innere Leitschicht. E pantalla sobre conductor. I schermo sul conduttore. N geleider scherm. P ekran żyły przewodzącej. S inre ledande skikt. (461)
3. **core screen** (*Syn.* insulation screen) : → *screen 9*
4. **electric screen** : a screen of conductive material intended to reduce the penetration of an electric field into an assigned region. ★ écran électrique → *écran 21.* R электрический экран. D elektrischer Schirm. E pantalla eléctrica. I schermo elettrico. N elektrische afscherming. P ekran elektryczny. S elektrisk skärm. (151)
5. **electromagnetic screen** : a screen of conductive material intended to reduce the penetration of a varying electromagnetic field into an assigned region. ★ écran électromagnétique → *écran 22.* R электромагнитный экран. D elektromagnetischer Schirm. E pantalla electromagnética. I schermo elettromagnetico. N elektromagnetische afscherming. P ekran elektromagnetyczny. S elektromagnetisk skärm. (151,161)
6. **fluorescent screen** : a sheet of material coated with a fluorescent substance which emits visible light when irradiated with ionizing radiation. ★ écran fluorescent → *écran 23.* R флуоресцентный экран. D Leuchtschirm. E pantalla fluorescente. I schermo fluorescente. N fluorescerend scherm. P ekran fluorescencyjny. S fluorescensskärm. (881)
7. **fluoroscopic screen** : a fluorescent screen used for fluoroscopy without an image intensifier. ★ écran fluoroscopique → *écran 24.* R флуороскопический экран. D Durchleuchtungsschirm. E pantalla radioscópica. I schermo per radioscopia. N doorlichtscherm. P ekran fluoroskopowy. S genomlysningsskärm. (881)
8. **grading screen** : a component of conductive material intended to provide voltage grading. ★ écran de répartition des potentiels → *écran 19.* R экран распределения потенциалов. D Schirm zur Potentialsteuerung. E pantalla de reparto de potenciales. I schermo ripartitore dei potenziali. N potentiaalscherm. P ekran stopniujący (napięcie). S utjämningsskärm. (151)
9. **insulation screen** (*Syn.* core screen) : an electrical screen of non-metallic and/or metallic material covering the insulation. ★ écran sur enveloppe isolante → *écran 35.* R экран по изоляции; экран по изолированной жиле. D äußere Leitschicht. E pantalla sobre aislamiento. I schermo sull'isolante; schermo sull'anima. N aderscherm. P ekran na izolacji. S yttre ledande skikt. (461)
10. **intensifying screen** : a layer of suitable material which reinforces the action of X-radiation on photographic emulsion. *Note.* — The material may emit fluorescent light or ultraviolet radiation or it may be a sheet of metal (lead), or a support coated with a lead compound, which emits electrons. ★ écran renforçateur → *écran 31.* R усиливающий экран. D Verstärkerfolie. E pantalla intensificadora. I schermo di rinforzo. N versterkingsscherm. P ekran wzmacniający. S förstärkningsskärm. (881)
11. **luminescent screen** : a single or multiple layer, on the inside of the face-plate, in which the luminescence is produced. ★ écran luminescent → *écran 25.* R люминесцентный экран. D Leuchtschirm. E pantalla luminiscente. I schermo luminescente. N luminescerend scherm. P ekran luminescencyjny. S lysskärm. (531)
12. **magnetic screen** : a screen of ferromagnetic material intended to reduce the penetration of a magnetic field into an assigned region. ★ écran magnétique → *écran 26.* R магнитный экран. D magnetischer Schirm. E pantalla magnética. I schermo magnetico. N magnetische afscherming. P ekran magnetyczny. S magnetisk skärm. (151)
13. **metallized screen** : a luminescent screen covered, on the side nearer the electron gun, with a metallic film that is permeable to electrons. ★ écran métallisé → *écran 27.* R металлизированный экран. D metallhinterlegter Schirm. E pantalla metalizada. I schermo metallizzato. N gemetalliseerd scherm. P ekran metalizowany. S metalliserad lysskärm. (531)
14. **screen** : a device used to reduce the penetration of a field into an assigned region. ★ écran → *écran 9.* R экран. D Schirm. E pantalla. I schermo. N afscherming; scherm. P ekran. S skärm. (151,161)
15. **screen** (of a cable) : conducting layer(s) having the function of control of the electric field within the insulation. It may also provide smooth surfaces at the boundaries of the insulation and assist in the elimination of spaces at these boundaries. ★ écran → *écran 10.* R экран по изоляции (кабеля). D Leitschicht (eines Kabels). E pantalla (de un cable). I schermo di un cavo (funzionale). N afscherming (van een leiding). P ekran. S ledande skikt. (461)
16. **screen burn** : → *burn 5*
17. **screen efficiency** : → *efficiency 39*
18. **screen film** : → *film 12*
19. **screen grid** : → *grid 25*
20. **(television) screen** : surface on which a television picture appears. ★ écran (de télévision) → *écran 20.* R (телевизионный) экран. (723)
21. **(television) wall-mounted screen** : television screen of small thickness, having dimensions markedly larger than the screen of current receivers, which may be fixed to the wall of a room. ★ écran mural (de télévision) → *écran 28.* R настенный (телевизионный) экран. (723)

screened

1. **individually screened cable** : → *cable 34*
2. **screened room** (*Syn.* shielded enclosure) : → *enclosure 12*

screening

1. **screening factor** : → *factor 162*
2. **screening test** : → *test 75*

screen-protected

1. **screen-protected** : applied to a machine in which the internal moving parts and live parts are protected mechanically against danger of contact by means of screens of wire mesh, expanded metal, perforated metal or other suitable covers. ★ machine grillagée → *machine 55.* R машина, защищенная сеткой. D gegen Berührung geschützte Maschine. E máquina protegida con rejilla. I macchina con griglie di protezione. N beschermd. P maszyna chroniona. S beröringsskärmad. (411)

screw

1. **screw base** (*Syn.* screw cap) : → *cap 10*
2. **screw cap** : → *cap 10*
3. **screw conveyor furnace** : → *furnace 50*
4. **slide screw tuner** : → *tuner 2*
5. **tuning screw** (*Syn.* tuning probe) : a screw or post inserted with variable penetration into the electromagnetic field of a transmission line to cause reflection in a controlled manner. ★ vis de réglage → *vis 7.* R настроечный винт; настроечный штырь. D Abgleichschraube; Abgleichstift. E tornillo de sintonización; sonda de sintonización. I vite di adattamento; sonda (di adattamento). N aanpasschroef. P wgłębnik; kołek strojeniowy. S pinnanpassare. (726)

scrolling

1. **scrolling** : special effect in which images appear to move, one after the other, sideways across the screen, or to roll smoothly upwards or downwards. ★ effet de rouleau → *effet 39.* R эффект свертывания. (723)

sea

1. **ocean or sea temperature gradient power station** : → *power station 15*
2. **sea noise** : → *noise 70*

seal

1. **barrier seal** : a seal provided through the connector between housing and insert and contacts to inhibit the ingress of contaminants. ★ barrière d'étanchéité → *barrière 5.* R уплотнение внутреннее. D Barrierendichtung. E junta de estanqueidad. I barriera di ermeticità; sigillatura di giunzione. N afdichting. P uszczelnienie (w złączu). S insatstätning. (581)
2. **cable seal** : a device designed to seal a jacketed cable to a component. ★ presse-étoupe de câble → *presse-étoupe 1.* R уплотнение кабеля. D Kabeldichtung. E prensaestopa de cable. I serracavo. N kabelaansluitafdichting. P uszczelnienie kabla. S kabeltätning. (581)
3. **door seal** : seal around the door to prevent ingress of air and keep in furnace atmosphere gas. ★ joint d'étanchéité de la porte → *joint 7.* R уплотнение дверцы. D Türdichtung.

E junta de estanqueidad de la puerta. I giunto di tenuta della porta. N deurafdichting. P uszczelnienie drzwi. S lucktätning. (841)

4. **dust seal** : a sealing arrangement intended to prevent the entry of a specified dust into a bearing. ★ joint étanche aux poussières → *joint 12.* R уплотнение от пыли. D Staubdichtung. E junta estanca al polvo. I tenuta antipolvere. N stofafdichting. P uszczelnienie łożyska przed pyłem. S dammtätning. (411)
5. **gas seal** : a sealing arrangement in a bearing assembly intended to minimize the leakage of gas to or from the machine through a bearing. ★ joint étanche aux gaz → *joint 11.* R газовое уплотнение. D Gasdichtung. E junta estanca al gas. I tenuta gas. N gasafdichting. P uszczelnienie łożyska przed gazem. S gastätning. (411)
6. **hearth seal** : seal around the hearth to prevent ingress of air and to keep in furnace chamber atmosphere gas. ★ joint d'étanchéité de la sole → *joint 8.* R уплотнение пода. D Herddichtung. E junta de estanqueidad de crisol. I giunto di tenuta della suola. N warmteslot. P uszczelnienie dna. S ugnstätning; ugnslås. (841)
7. **hermetic seal** : a seal is hermetic when the specified rate of leakage is several orders smaller than that of a barrier seal. ★ joint hermétique → *joint 13.* R уплотнение герметичное. D hermetische Dichtung. E junta hermética. I giunzione ermetica. N hermetische afdichting. P połączenie szczelne. S hermetisk tätning. (581)
8. **housing seal** : a seal provided between the housing to prevent the ingress of moisture and contaminants into the interior of connectors when mated. ★ joint de boîtier → *joint 4.* R уплотнение по стыку корпусов. D Gehäusedichtung. E junta de caja. I giunzione di connettori. N afdichting van het huis. P uszczelnienie na oprawie. S donhustätning. (581)
9. **interfacial seal** : a seal provided at the interface to prevent the ingress of moisture or contaminants across a set of connectors when mated. ★ joint d'interface → *joint 9.* R уплотнение по лицевой поверхности. D Stirnflächendichtung. E junta de intercara. I giunzione di interfaccia. N afdichting van de raakvlakken. P uszczelnienie na styczni złącza. S tätning mellan mötande ytor. (581)
10. **metal plate air seal gasket** : → *gasket 3*
11. **oil seal** : a sealing arrangement in a bearing assembly intended to prevent leakage of oil from the bearing. ★ joint étanche à l'huile → *joint 10.* R масляное уплотнение. D Öldichtung. E junta estanca al aceite. I tenuta olio. N olieafdichting. P uszczelnienie olejowe łożyska. S oljetätning. (411)
12. **panel seal** : a seal provided between a component and a panel. ★ joint de panneau → *joint 5.* R уплотнение по панели. D Dichtung am Montageausschnitt. E junta de panel. I giunzione di pannello. N paneelafdichting. P ..... S paneltätning. (581)
13. **peripheral seal** : a seal at the periphery of an insert designed to prevent the ingress of moisture or contaminants on the perimeter of a componant. ★ joint périphérique → *joint 15.* R уплотнение по периметру. D Umfangsdichtung. E junta periférica. I giunzione periferica. N afdichting van de buitenrand. P uszczelnienie na obwodzie. S periferisk tätning. (581)

sealed

1. **gastight sealed (secondary) cell** : → *cell 17*
2. **hermetically sealed (secondary) cell** : → *cell 18*
3. **sealed** : a machine provided with special seals to minimize the leakage of either the internal coolant out of the enclosure or the leakage of medium surrounding the enclosure into the machine. ★ machine hermétique → *machine 56.* R герметичная машина. D dicht gekapselte Maschine. E máquina hermética. I macchina a chiusura stagna. N dicht. P maszyna hermetyczna. S tätad. (411)
4. **sealed beam lamp** : → *lamp 55*
5. **sealed connector** : → *connector 45*
6. **sealed radioactive source** : → *source 27*
7. **sealed reactor** : → *reactor 38*
8. **sealed source** : → *source 28*
9. **sealed transformer** : → *transformer 56*
10. **valve-regulated sealed (secondary) cell** : → *cell 43*

sealing

1. **lid sealing compound** : → *compound 11*
2. **sealing** : the ability of a component to resist the ingress of contaminants. ★ étanchéité → *étanchéité 2.* R герметичность. D Dichten. E estanqueidad. I impermeabilità. N afdichting. P szczelność. S täthet. (581)
3. **sealing end** : → *end 16*

seamless

1. **seamless bias-cut fabric** : → *fabric 5*

search

1. **chaining search** : a search in which each item contains means for locating the next item to be considered in the search. ★ recherche en chaîne → *recherche 7.* R цепной поиск. D Suche in verketteter Liste. E búsqueda en cadena. I ricerca concatenata. N ketenzoekproces. P szukanie w łańcuchu. S kedjesökning. (714)
2. **dichotomizing search** : a search in which an ordered set of items is partitioned into two parts one of which is rejected, the process being repeated on the accepted part until the search is completed. ★ recherche dichotomique → *recherche 5.* R дихотомический поиск. D dichotomische Suche; eliminierende Suche; Einstichverfahren. E búsqueda dicotómica. I ricerca dicotomica. N tweedelingszoekproces. P szukanie dychotomiczne; szukanie dwudzielne. S tudelningssökning. (714)
3. **search coil** : → *coil 32*

searchlight

1. **searchlight** : a high intensity projector having an aperture usually greater than 0.2 m and giving an approximately parallel beam of light. ★ ..... → . R поисковый прожектор. D Suchscheinwerfer. E proyector de búsqueda. I proiettore a fascio parallelo. N zoeklicht. P szperacz. S sökarstrålkastare. (845)

seasonal

1. **seasonal tariff** : → *tariff 35*
2. **seasonal time-of-day tariff** : → *tariff 36*

seated

1. **spherically seated bearing** : → *bearing 31*
2. **straight seated bearing** : → *bearing 34*

SECAM

1. **SECAM** (*Syn.* SECAM (colour television) system) : → *system 182*
2. **SECAM (colour television) system** : → *system 182*

secondary

1. **alkaline secondary battery** : → *battery 1*
2. **charged drained (secondary) battery** : → *battery 17*
3. **conserved charge (secondary) battery** (*Syn.* charged drained (secondary) battery) : → *battery 17*
4. **discharged drained (secondary) battery** : → *battery 28*
5. **dry charged (secondary) battery** : → *battery 30*
6. **dry discharged (secondary) battery** : → *battery 31*
7. **filled and charged (secondary) battery** : → *battery 37*
8. **filled discharged (secondary) battery** : → *battery 38*
9. **gastight sealed (secondary) cell** : → *cell 17*
10. **hermetically sealed (secondary) cell** : → *cell 18*
11. **maintenance-free (secondary) battery** : → *battery 45*
12. **open (secondary) cell** (*Syn.* vented (secondary) cell) : → *cell 44*
13. **plate (of a secondary battery)** : → *plate 21*
14. **rated secondary current** : → *current 161*
15. **rated secondary voltage** : → *voltage 164*
16. **(secondary) battery** : → *battery 60*
17. **(secondary) battery for specific application** : → *battery 61*
18. **secondary bracings** (*Syn.* redundant bracings) : → *bracing 5*
19. **(secondary) cell** : → *cell 35*
20. **secondary circuit** : → *circuit 155*
21. **secondary coating** : → *coating 5*

22. **secondary control** : → *control 163*
23. **secondary coolant circuit** : → *circuit 156*
24. **secondary coverage area** : → *area 36*
25. **secondary current** : → *current 179*
26. **secondary digital group** : → *group 54*
27. **secondary electron** : → *electron 27*
28. **secondary failure** : → *failure 47*
29. **secondary filter** : → *filter 36*
30. **secondary light source** : → *source 29*
31. **secondary limiting e.m.f.** : → *e.m.f. 5*
32. **secondary limiting thermal current** : → *current 180*
33. **secondary lobe** : → *lobe 7*
34. **secondary no-load voltage** : → *voltage 186*
35. **secondary photometric standard** : → *standard 19*
36. **(secondary) power control operation** : → *operation 59*
37. **secondary protective barrier** : → *barrier 14*
38. **secondary radiation** (*Syn.* re-radiation) : → *re-radiation 1*
39. **secondary radiation** : → *radiation 108*
40. **secondary relay** : → *relay 38*
41. **secondary standard** : → *standard 20*
42. **secondary standard lamp** : → *lamp 56*
43. **secondary station** : → *station 31*
44. **secondary voltage** : → *voltage 187*
45. **secondary winding** : → *winding 59*
46. **secondary winding** : → *winding 60*
47. **secondary winding** : → *winding 61*
48. **secondary winding** : → *winding 62*
49. **unformed dry (secondary) battery** : → *battery 67*
50. **unspillable (secondary) cell** : → *cell 42*
51. **valve-regulated sealed (secondary) cell** : → *cell 43*
52. **vented (secondary) cell** : → *cell 44*

secondary-electron

1. **secondary-electron emission** : → *emission 25*
2. **secondary-electron emission current** : → *current 181*
3. **secondary-electron emission factor** : → *emission 27*

secondary-emission

1. **secondary emission detector** : → *detector 32*

secretary

1. **manager and secretary service** : → *service 9*

section

1. **busbar section** : the part of a busbar located between two switching devices (or disconnectors) put in series or between a switching device and the end of the busbar. ★ tronçon d'un jeu de barres → *tronçon 4.* R секция системы шин. D Sammelschienenabschnitt. E sector de barras. I tronco di sistema di sbarre. N railsectie. P sekcja systemu szyn zbiorczych. S samlingsskenesektion. (605)
2. **busbar section disconnector** : → *disconnector 1*
3. **coil section** : the basic electrical element of a winding comprising an assembly of one or more turns insulated from one another. ★ section de bobine → *section 7.* R секция катушки. D Teilspule (Wicklungselement). E sección de bobina. I sezione di matassa. N deelspoel. P zezwój. S härvdel. (411)
4. **convertor section of a double convertor** : that part of a double convertor in which the main direct current when viewed from the d.c. terminals always flows in the same direction. ★ section d'un convertisseur double → *section 13.* R комплект вентилей двухкомплектного преобразователя. D Teilstromrichter (eines Doppelstromrichters). E sección de un convertidor doble. I sezione di un convertitore doppio. N omzettersectie van een tweevoudige omzetter. P sekcja przekształtnika obukierunkowego. S strömriktargrupp. (551)
5. **digital line section** : a digital section implemented on a manufactured transmission medium, such as a symmetric pair, a coaxial pair, or an optical fibre. ★ section de ligne numérique → *section 9.* R цифровой линейный участок. D digitaler Leitungsabschnitt. E sección de línea numérica. I sezione di linea numerica. N digitale lijnsectie. P odcinek toru cyfrowego. S digital linjesektion. (704)
6. **digital radio section** : a digital section implemented by means of radio waves. ★ section radioélectrique numérique → *section 22.* R цифровой радиоучасток. D digitaler Funkabschnitt. E sección radioeléctrica numérica. I sezione radio numerica. N digitale radiosectie. P trakt radiowy cyfrowy. S digital radiosektion. (704)
7. **digital section** : the whole of the means of transmission, in both directions unless otherwise specified, for digital signals of specified digit rate between two consecutive digital distribution frames, or equivalent points. *Note.* — A digital section may be qualified to indicate its digit rate or multiplex order. ★ section numérique → *section 21.* R цифровой участок. D Digitalabschnitt. E sección numérica. I sezione numerica. N digitale sectie. P trakt cyfrowy. S digital sektion. (704)
8. **elementary cable section** : the whole of the physical transmission medium and accessories, such as splices, connectors, flexible connecting cables, included between two consecutive section terminations. *Note.* — The main transmission medium usually consists of several factory lengths of cable connected together. ★ section élémentaire de câble → *section 17.* R элементарный кабельный участок. D Grundkabelabschnitt. E sección elemental de cable; sección elemental de amplificación. I sezione elementare di cavo. N elementaire kabelsectie. P odcinek kablowy. S kabelsektion. (704)
9. **elementary regenerated section** (*Syn.* elementary regenerator section) : → *section 10*
10. **elementary regenerator section** (*Syn.* elementary regenerated section) : in a given direction of transmission, an elementary cable section together with the immediately following regenerative repeater, all included between two section terminations. ★ section élémentaire régénérée → *section 18.* R элементарный регенерационный участок. D Grund-Regeneratorabschnitt; regenerierter Grundabschnitt. E sección elemental regenerada; sección elemental de regeneración. I sezione elementare di rigenerazione. N elementaire geregenereerde sectie. P odcinek regeneratorowy. S regeneratorsektion. (704)
11. **elementary repeater section** (*Syn.* elementary repeatered section) : in a given direction of transmission, an elementary cable section together with the immediately following analogue repeater, all included between two section terminations. ★ section élémentaire amplifiée → *section 16.* R элементарный ретрансляционный участок. D Grund-Leitungsverstärkerabschnitt; verstärkter Grundabschnitt. E sección elemental amplificada; sección elemental de repetidor. I sezione elementare di amplificazione. N elementaire versterkte sectie. P odcinek wzmacniakowy. S analog överdragssektion. (704)
12. **elementary repeatered section** (*Syn.* elementary repeater section) : → *section 11*
13. **elementary section** : the length of cable system between any adjacent pair of the following items : sectionalising joints, terminations and inter-shield bonds. ★ section élémentaire → *section 15.* R элементарная секция. D Grundabschnitt. E seccio'n elemental. I sezione elementare. N sectie. P odcinek elementary (układu kabla). S ..... (461)
14. **group section** : the whole of the means of transmission, including one or more FDM links, for signals occupying a standardized frequency band of a group between two consecutive group distribution frames, or equivalent points. *Notes. 1* — A group section provides transmission in both directions unless otherwise specified. *2* — Similar definitions can be given for : "supergroup section", "mastergroup section", "supermastergroup section" and "15-supergroup assembly section" or "hypergroup section". ★ section de groupe primaire → *section 8.* R участок первичной группы. D Primärgruppen-Abschnitt. E sección de grupo primario. I sezione di gruppo primario. N groepsectie. P odcinek traktu pierwotnogrupowy. S gruppsektion. (704)
15. **matching section** : a length of transmission line of modified transverse cross-section or with metal or dielectric inserts, used for impedance transformation. ★ tronçon d'adaptation → *tronçon 1.* R согласующая секция. D Anpassungsglied. E sección de adaptación. I tronco di adattamento; sezione di adattamento. N aanpasstuk. P odcinek (linii przesyłowej) dopasowujący. S anpassningsstycke. (726)
16. **measuring line section** (*Syn.* measuring line) : → *line 110*
17. **modulated section** (*Syn.* recorded surface) : → *surface 17*

18. **neutral section** : a section of a contact line provided with a sectioning point at each end, to prevent successive electrical sections differing in voltage or phase being connected together by the passage of current collectors. ★ section de séparation → *section 12.* R нейтральная вставка. D Schutzstrecke. E sección de separación; sección neutra. I sezione neutra. N neutrale sectie. P wstawka neutralna. S skyddssektion. (811)
19. **regulated line section** : a succession of tandem-connected elementary repeater sections over which the line signal and one or more regulating pilots are transmitted from end to end, with this signal and the pilots passing through the same amplitude regulating devices at intermediate points. *Note.* — At the end of a regulated line section, the initial pilot signals are removed, or reconstituted, or replaced by new pilot signals sent at reference level. ★ section de régulation de ligne → *section 10.* R участок регулирования линии. D geregelter Leitungsabschnitt. E sección de regulación de línea. I sezione di regolazione (di linea). N geregelde lijnsectie. P odcinek regulacyjny linii. S styrd linjesektion. (704)
20. **resistor section** : part of a resistive circuit contained between two consecutive terminals connected to apparatus such as contactors or controllers. ★ section de résistance → *section 11.* R секция резистора. D Widerstandsabschnitt. E sección de resistencia. I sezione di reostato. N weerstandssectie. P sekcja rezystorów. S motståndsektion; inkopplingssteg. (811)
21. **section insulator** : → *insulator 28*
22. **section (of an overhead line)** : a part of a line between two tension supports. ★ canton (d'une ligne aérienne) → *canton 1.* R анкерованный участок. D Abspannabschnitt (einer Freileitung). E cantón. I tratta (di una linea aerea). N vak (van een bovengrondse lijn). P sekcja odciągowa. S ledningssektion. (466)
23. **section profile** (*Syn.* transverse profile) : → *profile 17*
24. **section termination** : → *termination 7*
25. **slotted measuring section** (*Syn.* slotted line) : → *line 147*
26. **squeeze section** : a length of rectangular waveguide so constructed as to permit variation of the broad dimension to obtain a corresponding alteration in the electrical length. ★ tronçon (de largeur) réglable → *tronçon 2.* R сжимаемая секция. D Quetschleitung. E sección ajustable. I tronco di larghezza regolabile. N knijpstuk. P odcinek nastawny (falowodu). S tvärsnittsändrare. (726)
27. **uniform major section** : a major section consisting of three substantially equal elementary sections. ★ section ternaire uniforme → *section 23.* R однородная главная секция. D gleichmäßiger Hauptabschnitt. E seccio'n ternaria uniforme. I sezione ternaria uniforme. N ..... P ..... S ..... (461)

sectionalised

1. **sectionalised cross-bonding** : → *cross-bonding 3*

sectionalising

1. **sectionalising joint** : → *joint 23*

sectioning

1. **sectioning** : the division of the contact line into electrical sections, each of which may be isolated from the adjacent sections e.g. by means of switches. ★ sectionnement → *sectionnement 9.* R секционирование. D Fahrleitungsgruppe oder -abschnitt. E seccionamiento. I sezionamento. N sectie; sectionering. P sekcjonowanie. S sektionering. (811)
2. **sectioning point** : → *point 41*
3. **track sectioning cabin** : → *cabin 2*

sector

1. **dead sector** : that portion of the drum surface of a drum facsimile transmitter, the scanning time of which cannot be used for picture signal transmission. ★ secteur mort → *secteur 4.* R мертвый сектор. D Totzone. E sector muerto. I settore morto. N dode sector. P sektor martwy. S död sektor. (721)
2. **sector** : the part of equipment permanently associated with one of the derived channels provided by a time-division multiplex. ★ secteur (de multiplex) → *secteur 2.* R сектор. D Sektor. E sector (de múltiplex). I settore. N sektor. P sektor. S sektor. (721)
3. **sector light** : → *light 65*

sectoral

1. **E-plane sectoral horn** : → *horn 7*
2. **H-plane sectoral horn** : → *horn 13*
3. **sectoral horn** : → *horn 20*

sector-shaped

1. **sector-shaped conductor** : → *conductor 59*

secular

1. **secular equilibrium** : → *equilibrium 9*

security

1. **information security** : the protection of information against unauthorized disclosure, transfer, modification, or destruction, whether accidental or intentional. ★ sécurité des informations → *sécurité 22.* R защита информации (1). D Datensicherung. E seguridad de las informaciones. I sicurezza delle informazioni. N informatiebeveiliging. P bezpieczeństwo przesyłania informacji. S informationsskydd. (721)
2. **instrument security factor** : → *factor 95*
3. **security arrangements** : → *arrangement 6*
4. **service security** : the capability of a power system at a given moment in time to perform its supply function in the case of a fault. ★ sécurité d'alimentation → *sécurité 20.* R эксплуатационная надежность энергоснабжения. D Versorgungssicherheit. E seguridad de servicio. I sicurezza d'alimentazione. N bedrijfszekerheid van de elektriciteitsvoorziening. P pewność zasilania. S funktionssäkerhet. (603)
5. **signalling security** (in common channel signalling) : the ability to maintain continuity of service of the signalling system in the presence of certain faults. ★ sécurité de signalisation → *sécurité 21.* R надежность сигнализации. D Zeichengabesicherheit (in ZZG). E seguridad de señalización. I sicurezza della segnalazione. N signaleringsbetrouwbaarheid. P zabezpieczenie ciągłości pracy sygnalizacji. S signaleringssäkerhet. (714)
6. **telecommunication security** : protection of informations in which signals are treated in such a manner that only authorized persons in possession of suitable equipment can have access to the said information. ★ secret des communications → *secret 1.* R безопасность электросвязи; защита информации (2). D Fernmeldesicherheit. E secreto de las comunicaciones. I riservatezza della comunicazione. N telefoongeheim. P dyskrecja telekomunikacyjna. S telekommunikationssäkerhet. (721)

Seebeck

1. **Seebeck effect** : → *effect 70*

seed

1. **seed** (of quartz) : the quartz plate or bar used as a nucleus for synthetic quartz crystal growth. ★ germe → *germe 1.* R затравка (кварца). D Kristallkeim (aus Quarz). E germen (de cuarzo). I germe (di quarzo). N ent (van kwarts). P zarodek (kryształu). S grodd. (561)
2. **seed veil** : → *veil 1*

segment

1. **commutator segment** : a conducting member of a commutator, which is connected to the common end of two consecutive sections of a winding. ★ lame de collecteur → *lame 7.* R пластина коллектора. D Kommutatorsteg (Stromwendersteg). E delga de colector. I lamella di commutatore. N commutatorlamel. P wycinek komutatora. S kommutatorlamell. (411,811)
2. **commutator segment insulation** : → *insulation 9*
3. **maximum voltage between segments** : → *voltage 112*
4. **mean voltage between segments** : → *voltage 113*

segmental

1. **segmental or locked coil conductor** (*Syn.* smooth body conductor) : → *conductor 65*
2. **segmental rim motor** : → *motor 84*

segregated

1. **phase segregated terminal box** : → *terminal box 5*

segregation

1. **segregation** (of conductors) : an arrangement of conductors with earthed metal interposed between them in such a manner that disruptive discharges can only occur to earth. ★ cloisonnement métallique → *cloisonnement 2.* R металлическое разгораживание (проводников). D Trennschottung (von Leitern). E separación metálica (entre conductores). I segregazione (di conduttori). N metalen scheiding (tussen geleiders). P przegrodzenie (między przewodami); przegroda metalowa (między przewodami). S segregation. (441)

seizing

1. **seizing signal** : → *signal 166*

seizure

1. **answer seizure ratio** : → *ratio 6*
2. **double seizure** : an unwanted condition arising if a device is seized as a result of a second call attempt arriving during an unguarded interval. ★ double prise → *prise 9.* R двойное занятие. D Doppelbelegung. E doble retención. I doppio blocco. N dubbelbelegging. P zajęcie podwójne; wejście na trzeciego. S dubbelanrop. (714)
3. **forward seizure** (*Syn.* forward busying) : → *busying 2*
4. **seizure** : the act of changing the state of a traffic-carrying device or switching path from free to busy. ★ prise → *prise 19.* R занятие. D belegen; Belegung. E retención. I impegno. N inbeslagneming; belegging. P zajmowanie. S anropa. (714)
5. **seizure** : a successful bid. ★ prise → *prise 20.* D Belegung. P zajęcie; wzięcie do pracy. (715)

select

1. **select and execute command** : → *command 18*

selected

1. **post selected busy hour** (*Syn.* peak busy hour) : → *hour 6*
2. **selected value** : → *value 60*

selecting

1. **channel selecting telecontrol system** : → *system 25*
2. **conjugate selecting** (*Syn.* end-to-end selection (USA)) : the selecting of a path through the whole or part of a link connected switching network having due regard to the state of all the crosspoints and links involved in the connection of an inlet to an outlet. ★ sélection conjuguée → *sélection 8.* R обусловленное искание. D konjugierte Wahl; Ende-zu-Ende Wahl. E selección conjugada. I selezione coniugata. N ..... P wybieranie od końca do końca. S samordnat val. (714)
3. **node-by-node selecting** : selection of paths through a sequence of switching nodes, one at a time, without regard to the states of subsequent nodes. ★ sélection nœud par nœud → *sélection 14.* R поузловое искание. D knotenweise Auswahl. E selección nudo a nudo. I selezione nodo per nodo. N knoopunt-voor-knooppunt selectie. P wybieranie węzłowe; wybieranie węzeł po węźle. S nod-för-nodval. (714)
4. **selecting** (in switching) : the conditional choice of an inlet or outlet to be connected to a link or device. ★ sélection → *sélection 6.* R искание (в коммутации). D Auswahl. E selección (en conmutación). I selezione. N kiezen. P wybieranie (w komutacji). S kopplingsvägsval. (714)
5. **selecting** : the process of requesting one or more data stations to receive. ★ invitation à recevoir → *invitation 3.* R селекция; приглашение к приему. D Empfangsaufruf. E invitación a recibir. I selecting (invito a ricevere). N keuze. P zaproszenie do odbioru. S selektering. (721)
6. **stage-by-stage selecting** : selecting of paths through a sequence of switching stages without regard to the states of subsequent switching stages. ★ sélection étage par étage → *sélection 13.* R искание по ступеням. D stufenweise Auswahl. E selección etapa a etapa. I selezione stadio per stadio. N trap-voor-trap-selectie. P wybieranie stopniowe; wybieranie stopień po stopniu. S steg-för-stegval. (714)

selection

1. **alternative selection signals** : → *signal 11*
2. **call without selection signals** : → *call 30*
3. **dial selection** (in telegraphy switching) : in automatic telegraph switching, the use of dial pulse trains from a dial or an automatic equipment to form the selection signals. ★ numérotation au cadran → *numérotation 11.* R дисковый набор (в телеграфии). D Nummernschalterwahl. E numeración por disco; numeración en cuadrante. I selezione impulsiva. N kiesschijfkeuze (bij telegrafie). P wybieranie tarczą. S fingerskivsval. (721)
4. **direct incoming selection** : a facility that permits a terminal in a telex network to set up a call to a terminal designated by the caller in a private network without human intervention in the private network. ★ sélection directe à l'arrivée → *sélection 10.* R прямой входящий набор. D direkte ankommende Wahl; direkte Durchwahl. E selección directa a la llegada. I selezione diretta entrante. N doorkiezen. P wywołanie przychodzące bezpośrednie. S direkt inkommande val. (721)
5. **direct outgoing selection** : a facility that permits a terminal in a private network to set up a call to another network without human intervention in the private network. ★ prise directe → *prise 31.* R прямой исходящий набор. D direkte abgehende Wahl. E toma directa. I selezione diretta uscente. N automatisch uitgaand verkeer. P wywołanie wychodzące bezpośrednie. S direkt utgående val. (721)
6. **end-to-end selection** (*Syn.* conjugate selecting) : → *selecting 2*
7. **free line selection** (*Syn.* PBX hunting) : → *hunting 6*
8. **international selection sequence** : → *sequence 5*
9. **international two-stage selection** : the process of establishing international calls using two sequences of digits, the first sequence characterizing the called country or network and the second sequence characterizing the called subscriber in that country or network. ★ numérotation internationale en deux temps → *numérotation 13.* R международный двухэтапный набор. D internationale Zweistufenwahl. E numeración internacional en dos tiempos. I selezione internazionale a due tempi. N internationaal twee-stapskiezen. P wybieranie międzynarodowe dwustopniowe. S tvåstegsval. (721)
10. **keyboard selection** : in automatic telegraph switching, the use of telegraph alphabet signals sent from the teleprinter's keyboard or from an automatic equipment to form the selection signals. ★ numérotation au clavier (télégraphique) → *numérotation 12.* R клавиатурный набор. D Tastaturwahl. E numeración en el teclado. I selezione a tastiera. N kiezen met toesenbord. P wybieranie z klawiatury. S tangentbordsval. (721)
11. **route selection** : the process of choosing one of the possible circuit groups suitable for the establishment of a desired connection. ★ sélection de faisceau → *sélection 9.* R выбор маршрута. D Wegauswahl. E selección de grupo. I selezione del fascio. N bundelkeuze. P wybieranie kierunku. S vägval. (714)
12. **selection** (in a telegraph receiver) : primary operation of translation, by which the control function or the symbol to be printed or translated is chosen from the received signal. ★ sélection → *sélection 7.* R селекция (в телеграфном приемнике). D Selektion (in einem Telegrafenempfänger); Auswahl. E selección (en recepción de telegrafía). I selezione. N selectie (bij een telegrafieontvanger). P wybieranie (w odbiorniku telegraficznym). S val. (721)
13. **selection command** : → *command 19*
14. **selection error correction** : → *correction 17*
15. **selection signals** : → *signal 167*
16. **selection time** : → *time 161*
17. **short code selection** : the setting up of a connection by using a code shorter than the full address. *Note.* — A short code could also apply to a group of addresses. ★ numérotation abrégée → *numérotation 10.* R сокращенный набор номера. D Kurzwahl. E numeración abreviada. I selezione abbreviata. N verkort kiezen. P numeracja skrócona. S kortnummerval. (721)

selective

1. **absolutely selective protection system** : → *system 1*
2. **frequency selective fading** : → *fading 11*
3. **relatively selective protection system** : → *system 172*
4. **selective calling** (*Syn.* selective ringing) : → *ringing 4*
5. **selective detector** : → *detector 33*
6. **selective erasing** : → *erasing 8*
7. **selective interrogation command** : → *command 20*
8. **selective localization** : → *localization 4*
9. **selective radiator** : → *radiator 8*

10. **selective ringing** : → *ringing 4*

selectivity

1. **adjacent channel selectivity** : the selectivity measured with a signal spacing equal to the channel spacing. ★ sélectivité pour le canal adjacent → *sélectivité 5.* R избирательность по соседнему каналу. D Nahkanalselektion. E selectividad por canal adyacente. I selettività per il canale adiacente. N aangrenzend-kanaal-selectiviteit. P selektywność sąsiedniokanałowa. S grannkanalselektivitet. (161)
2. **effective selectivity** : selectivity under specified special conditions such as when receiver input circuits are overloaded. ★ sélectivité effective → *sélectivité 3.* R эффективная избирательность. D effektive Trennschärfe. E selectividad efectiva. I selettività effettiva. N effectieve selectiviteit. P selektywność skuteczna. S effektiv selektivitet. (161)
3. **selectivity** : the ability or a measure of the ability of a receiver to discriminate between a given wanted signal and unwanted signals. ★ sélectivité → *sélectivité 1.* R избирательность. D Trennschärfe. E selectividad. I selettività. N selectiviteit. P selektywność. S selektivitet. (161)
4. **selectivity** (of a detector) : the ratio of the sensitivity of the detector to the ionizing radiation to be measured to the sensitivity of the same detector to the concomitant radiation. ★ sélectivité → *sélectivité 2.* R избирательность (детектора). D Selektivität. E selectividad (de un detector). I selettività (di un rivelatore). N selectiviteit (v.e. detector). P selektywność (detektora). S selektivitet (för detektor). (391)
5. **selectivity (for a protection system)** : the ability of a protection system to detect a fault within a specified zone of a network and to trip the appropriate circuit-breakers to clear this faults with a minimum disturbance to the rest of that network. ★ sélectivité (pour un système de protection) → *sélectivité 6.* R селективность (для системы защиты). D Selektivität. E selectividad (para un sistema de protección). I selettività (di un sistema di protezione). N selectiviteit (voor een beveiligingssysteem). P wybiorczość (zabezpieczenia). S selektivitet (för reläskyddssystem). (448)

selector

1. **anticoincidence selector** : a time selector with two or more inputs and designed to provide within a specified time interval an output signal only when input pulses occur at one or more specified inputs and no input pulse occurs at other specified inputs. ★ sélecteur d'anticoïncidence → *sélecteur 6.* R селектор антисовпадений. D Antikoinzidenzstufe. E selector de anticoincidencia. I selettore di anticoincidenza. N anticoïncidentiekiezer. P selektor antykoincydencyjny. S antikoincidensväljare. (391,881)
2. **change-over selector** : a device designed to carry, but not to make or break, current, used in connection with a tap selector or selector switch to enable its contacts and the connected tappings to be used more than once when moving from one extreme position to the other. ★ présélecteur → *présélecteur 1.* R предыбиратель. D Vorwähler. E preselector. I preselettore. N voorkiezer. P zmieniacz. S grov-finomkopplare; plus-minusomkopplare. (421)
3. **coincidence selector** : a time selector with two or more inputs designed to provide an output signal only when specified inputs all receive pulses within a specified time interval. ★ sélecteur de coïncidence → *sélecteur 7.* R селектор совпадений. D Koinzidenzstufe. E selector de coincidencia. I selettore di coincidenza. N coïncidentiekiezer. P selektor koincydencyjny. S koincidensväljare. (391,881)
4. **discriminating selector** : a digit absorption selector which discriminates between calls to be completed locally and calls to be routed to some other exchange. ★ sélecteur discriminateur → *sélecteur 14.* R районный переключатель. D Umsteuerwaehler. E selector discriminador. I selettore liberatore. N ..... P wybierak rozróżniający. S medlöpare. (714)
5. **final selector** : a selector or switch whose outlets are wired to subscribers lines. ★ sélecteur final → *sélecteur 16.* R линейный искатель. D Leitungswaehler. E selector final. I selettore di linea. N eindkiezer. P wybierak liniowy. S ledningsväljare. (714)
6. **group selector** : a selector or switch that first selects a group of links under the direct or indirect control of the respective digit of the address information and then selects a free link within this group by hunting. ★ sélecteur de groupe → *sélecteur 10.* R групповой искатель. D Gruppenwaehler. E selector de grupo. I selettore di gruppo. N groepkiezer. P wybierak grupowy. S gruppväljare. (714)
7. **(pulse) amplitude selector** (nuclear) : a selector designed to provide an output pulse for each input pulse the amplitude of which lies between two specified limits. ★ sélecteur d'amplitude → *sélecteur 4.* R амплитудный селектор (импульсов). D Einkanal-Amplituden-Diskriminator. E selector de amplitud. I selettore di ampiezza. N pulshoogtekiezer. P selektor amplitudy (impulsów). S pulshöjdsväljare. (391)
8. **pulse duration selector** : a selector designed to provide an output signal for each input pulse the duration of which falls between two specified values. ★ sélecteur de durée → *sélecteur 8.* R селектор импульсов по длительности. D Einkanal-Impulsdauer-Diskriminator. E selector de duración. I selettore di durata. N pulsduurselector. P selektor szerokości impulsów. S pulslängdsväljare. (391)
9. **(pulse) selector** : a sub-assembly designed to provide an output signal for each input pulse of which a specified characteristic (amplitude, rise time, duration, etc.) lies between two specified limits. ★ sélecteur (d'impulsions) → *sélecteur 13.* R селектор (импульсов). D Einkanaldiskriminator. E selector (de impulsos) (de impulsos). I selettore (di impulsi). N pulsselector; selector. P selektor (impulsów). S pulsväljare. (391,881)
10. **pulse shape selector** : a selector designed to provide an output signal for each input signal of which a specified characteristic of the shape meets specified conditions. ★ sélecteur de forme → *sélecteur 9.* R селектор формы импульсов. D Einkanal-Impulsform-Diskriminator. E selector de forma. I selettore di forma. N pulsvormselector. P selektor kształtu impulsów. S pulsformsväljare. (391)
11. **rotary selector** (*Syn.* uniselector) : → *uniselector 3*
12. **route selector** : a selector or switch that uses one or more digits of the address information to select a circuit group and then selects a free circuit within this group by hunting. ★ sélecteur d'acheminement → *sélecteur 3.* R маршрутный искатель. D Durchgangswaehler. E selector de encaminamiento. I selettore instradatore. N ..... P wybierak kierunkowy. S viaväljare. (714)
13. **selector** (in switching) : a switch having either only one inlet and a plurality of outlets or a plurality of inlets and only one outlet and capable of making a single connection. ★ sélecteur → *sélecteur 1.* R искатель (в коммутации). D Waehler. E selector (en conmutación). I selettore. N kiezer. P wybierak (w komutacji). S väljare. (714)
14. **selector switch** (*Syn.* change-over switch) : → *switch 5*
15. **selector switch** : → *switch 42*
16. **selector with disconnector** : → *disconnector 9*
17. **step-by-step selector** : a bank and wiper selector in which the wipers are moved by electromagnetic ratchet mechanisms individual to each selector. *Note.* — This type of selector may have either one or two directions of wiper motion. ★ sélecteur pas-à-pas → *sélecteur 18.* R шагвбый искатель. D schritthaltender Waehler; Direktwaehler. E selector paso a paso. I selettore passo-passo. N stapschakelaar. P wybierak krokowy. S steg-för-stegväljare. (714)
18. **Strowger selector** : a type of a two-motion selector, one wiper motion being vertical, the other one rotary. ★ sélecteur Strowger → *sélecteur 21.* R подъемно-вращательный искатель. D Strowger-Wähler. E selector Strowger. I selettore Strowger. N hefdraaikiezer. P wybierak Strowgera. S Strowger-väljare. (714)
19. **(subscriber's) channel selector** : device intended to allow the subscriber to choose a channel from those provided by a cabled distribution system. *Note.* — This device may be included in a cabled distribution system receiver or in the subscriber's outlet, or in the subscriber's convertor. ★ sélecteur (individuel) de programme → *sélecteur 17.* R (абонентский) селектор каналов. (723)
20. **tap selector** : a device designed to carry, but not to make or break current, used in conjunction with a diverter switch to select tapping connections. ★ sélecteur de prises → *sélecteur 11.* R избиратель. D Feinwähler. E selector de tomas. I selettore di prese. N trappenkiezer. P wybierak zaczepów. S väljare. (421)
21. **time selector** : a selector designed to provide an output signal for each input pulse which appears within a specified time interval. ★ sélecteur de temps → *sélecteur 12.* R временной селектор. D Einkanal-Zeit-Diskriminator.

E selector de tiempo. I selettore di tempo. N tijdselector. P selektor czasowy. S tidväljare. (391,881)

22. **two-motion selector** : a step-by-step selector having two directions of wiper motion. ★ sélecteur à double mouvement → *sélecteur 2.* R подъемно-шаговый искатель. D Zwei-Richtungswaehler. E selector de doble movimiento. I selettore a sollevamento e rotazione. N ..... P wybierak dwuruchowy. S två-rörelseväljare. (714)

self

1. **self absorption** : → *absorption 37*
2. **self field** : → *field 58*
3. **self impedance** : → *impedance 49*

self-baking

1. **self-baking electrode** : → *electrode 85*

self-balancing

1. **self-balancing power bridge** : → *bridge 15*

self-ballasted

1. **self-ballasted mercury lamp** (*Syn.* blended lamp) : → *lamp 5*

self-calibrating

1. **self-calibrating thermal detector** (*Syn.* absolute thermal detector) : → *detector 1*

self-commutation

1. **self-commutation** : a commutation where the commutating voltage is supplied by components within the convertor or the electronic switch. ★ autocommutation → *autocommutation 1.* R внутренняя коммутация. D Selbstführung. E autoconmutación. I autocommutazione. N zelfcommutatie. P komutacja własna. S självkommutering. (551)

self-contained

1. **self-contained pressure cable** : → *cable 58*
2. **self-contained X-ray generator** : → *generator 30*

self-demagnetization

1. **self-demagnetization field strength** : → *field strength 12*

self-discharge

1. **self-discharge** (*Syn.* local action) : loss of chemical energy due to spontaneous reactions within the battery when not connected to an external circuit. ★ auto-décharge → *auto-décharge 1.* R саморазряд. D Selbstentladung. E autodescarga; acción local. I autoscarica. N zelfontlading (verlies van lading). P samowyładowanie. S självurladdning. (486)

self-exchange

1. **self-exchange coefficient** : → *coefficient 55*

self-excitation

1. **auto self-excitation** (*Syn.* self-saturation) : the procedure by means of which self-excitation is obtained with the aid of the power winding. ★ auto-saturation → *auto-saturation 1.* R самоподмагничивание; внутренняя обратная связь. D direkte Selbsterregung; Selbstsättigung (innere Mitkopplung). E autoexcitación directa; autosaturación. I autoeccitazione diretta; autosaturazione. N directe zelfbekrachtiging. P samowzbudzenie bezpośrednie. S sparsjälvmagnetisering. (431)
2. **auto self-excitation valve** : → *valve 2*
3. **critical self-excitation** : the self-excitation which results in infinite steepness of part of the static characteristic of a transductor. ★ auto-excitation critique → *auto-excitation 4.* R критическая обратная связь. D kritische Mitkopplung. E autoexcitación crítica. I autoeccitazione critica. N kritieke zelfbekrachtiging. P samowzbudzenie krytyczne. S kritisk självmagnetisering. (431)
4. **ideal self-excitation** : the degree of self-excitation which would result in critical self-excitation of a transductor whose cores have infinite permeability in the unsaturated range and whose self-excitation rectifier is ideal. ★ auto-excitation complète → *auto-excitation 3.* R идеальное самоподмагничивание. D ideale Selbsterregung. E autoexcitación ideal. I autoeccitazione ideale. N ideale kritieke zelfbekrachtiging. P samowzbudzenie zupełne; samowzbudzenie idealne. S full självmagnetisering. (431)
5. **self-excitation** : the procedure by means of which the value of an output quantity influences the excitation of a transductor. ★ auto-excitation → *auto-excitation 1.* R обратная связь. D Rückkopplung. E autoexcitación. I autoeccitazione. N zelfbekrachtiging. P samowzbudzenie transduktora. S självmagnetisering. (431)
6. **self-excitation** : the natural establishment of excitation from residual magnetism when using a traction motor as a series generator in electric braking. ★ auto-excitation → *auto-excitation 2.* R самовозбуждение. D Selbsterregung. E autoexcitación. I autoeccitazione. N zelfbekrachtiging. P samowzbudzenie. S självmagnetisering. (811)
7. **self-excitation winding** : → *winding 63*
8. **separate self-excitation** : the procedure by means of which self-excitation is obtained with the aid of a separate excitation winding. ★ auto-excitation indirecte → *auto-excitation 6.* R внешняя обратная связь. D äußere Mitkopplung (getrennte Selbsterregung). E autoexcitación indirecta. I autoeccitazione indiretta. N indirecte zelfbekrachtiging. P samowzbudzenie pośrednie. S separat självmagnetisering. (431)

self-excited

1. **auto self-excited transductor** : → *transductor 1*
2. **self-excited** : applied to a machine to denote that the excitation is supplied by the machine itself. ★ machine auto-excitée → *machine 39.* R машина с самовозбуждением. D Maschine mit Selbsterregung. E máquina autoexcitada. I macchina autoeccitata. N machine met zelfbekrachtiging. P maszyna samowzbudna. S självmagnetiserad. (411)
3. **self-excited oscillation** (*Syn.* self-induced oscillation) : → *oscillation 16*

self-extinguishing

1. **self-extinguishing current limit** : → *current 182*
2. **self-extinguishing fault** : → *fault 71*

self-healing

1. **self-healing capacitor** : → *capacitor 58*

self-induced

1. **self-induced oscillation** : → *oscillation 16*

self-induction

1. **self-induction** : the electromagnetic induction in an electrical circuit due to the current flowing in that circuit. ★ auto-induction → *auto-induction 1.* R самоиндукция. D Selbstinduktion. E autoinducción. I autoinduzione. N zelfinductie. P indukcja własna; samoindukcja. S självinduktion. (121)

self-lubricating

1. **self-lubricating bearing** : → *bearing 29*

self-maintained

1. **self-maintained discharge** : → *discharge 31*
2. **self-maintained gas conduction** : → *conduction 19*

self-neutralization

1. **self-neutralization frequency** : → *frequency 179*

self-noise

1. **sonar self-noise** : that part of sonar background noise caused by the sonar and machines and movement of the ship or platform on which the sonar is located. *Note.* — Self-noise is usually described in terms of the equivalent plane wave arriving at the transducer from the direction of maximum response. ★ bruit propre d'un sonar → *bruit 56.* R собственные шумы гидроакустической станции. D Sonar-Eigenräusch. E ruido propio de un sonar. I rumore interno di un sonar. N eigen stoorgeruis van de sonar. P szum własny sonaru. S sonar-egenbrus. (801)

self-powered

1. **self-powered neutron detector** (*Syn.* collectron) : → *collectron 1*

self-quenched

1. **self-quenched counter tube** : → *counter tube 24*
2. **self-quenched counter tube** : → *counter tube 25*

self-rectifying

1. **self-rectifying (X-ray) tube** : → *tube 74*

self-regulated

1. **self-regulated** : applied to a machine having a single magnetic core structure and inherently controlling its own characteristics such as voltage, power factor, speed, without the use of external apparatus. ★ machine autoréglée → *machine 40.* R саморегулируемая машина. D Maschine mit Selbststeuerung. E máquina autorregulada. I macchina autoregolata. N zelfregelende machine. P maszyna o samoczynnej regulacji. S självstyrd. (411)

self-regulation

1. **self-regulation** : an inherent tendency under certain conditions of a reactor to operate at a constant power level because of the effect on reactivity of a change in power level. ★ autorégulation → *autorégulation 1.* D Selbstregelung. E auto-regulación; control intrínseco. I autoregolazione. N zelfregeling. P samoregulacja. S självreglering. (026)

self-restoring

1. **self-restoring insulation** : → *insulation 50*

self-saturation

1. **self-saturation** (*Syn.* auto self-excitation) : → *self-excitation 1*

self-supporting

1. **self-supporting support** : → *support 19*

self-synchronization

1. **self-synchronization** : the process of synchronization of an unloaded and unexcited synchronous machine that is excited either at the same time as it is coupled to the system or shortly afterwards. ★ autosynchronisation → *autosynchronisation 1.* R самосинхронизация. D Selbstsynchronisierung. E autosincronización. I autosincronizzazione. N zelfsynchronisatie. P samosynchronizacja. S självfasning. (603)

self-ventilated

1. **self-ventilated motor** : → *motor 85*

self-ventilation

1. **self-ventilation** : a cooling system in which the air is moved by the rotor of the machine itself. ★ autoventilation → *autoventilation 1.* R самовентиляция. D Eigenbelüftung. E autoventilación. I autoventilazione. N eigenventilatie. P przewietrzanie własne. S självventilation. (811)

semi-additive

1. **semi-additive process** : → *process 6*

semi-automatic

1. **semi-automatic switching** : → *switching 41*
2. **semi-automatic (telephone) operation** : → *operation 60*
3. **semi-automatic (telephone) operation** : → *operation 61*

semiconducting

1. **semiconducting glaze** : → *glaze 4*

semiconductor

1. **compensated semiconductor** : a semiconductor in which the effects of the impurities of a given type on the charge carrier density partially or completely cancel those of the other type. Such a semiconductor has properties which are similar to those of an intrinsic semiconductor. ★ semi-conducteur compensé → *semiconducteur 16.* R скомпенсированный полупроводник. D kompensierter Halbleiter. E semiconductor compensado. I semiconduttore compensato. N gecompenseerde halfgeleider. P półprzewodnik skompensowany. S kompenserad halvledare. (391,521)
2. **compound semiconductor** : a semiconductor which in the pure state consists of several elements in proportions close to that of their stochiometric formula. ★ semiconducteur composé → *semiconducteur 17.* R сложный полупроводник. D Verbindungshalbleiter. E semiconductor compuesto. I semiconduttore composto. N samengestelde halfgeleider. P półprzewodnik złożony. S sammansatt halvledare. (521)
3. **degenerate semiconductor** : a semiconductor in which the Fermi level is situated in the conduction band or in the valence band or is closer than twice the product of Boltzmann's constant and thermodynamic temperature to either band. *Note.* — The charge carriers of a degenerate semiconductor are governed by Fermi-Dirac statistics. ★ semiconducteur dégénéré → *semiconducteur 18.* R вырожденный полупроводник. D entarteter Halbleiter. E semiconductor degenerado. I semiconduttore degenerato. N ontaarde halfgeleider. P półprzewodnik zdegenerowany. S ..... (521)
4. **extrinsic semiconductor** : a semiconductor having impurities or other imperfections and in which the charge carrier densities of each sign are different. ★ semiconducteur extrinsèque → *semiconducteur 20.* R примесный полупроводник. D Störstellenhalbleiter. E semiconductor extrínseco. I semiconduttore estrinseco. N extrinsieke halfgeleider. P półprzewodnik niesamoistny. S stör(halv)ledare. (391,521)
5. **intrinsic semiconductor** (I-type) : an effectively pure semiconductor in which, under conditions of thermal equilibrium, the charge carrier densities of each sign are nearly equal. *Note.* — By extension, this term is incorrectly used to designate compensated semi-conductors. ★ semi-conducteur intrinsèque → *semiconducteur 21.* R собственный полупроводник (ĩ -полупроводник). D eigenleitender Halbleiter. E semiconductor intrínseco (tipo I). I semiconduttore intrinseco (tipo I). N intrinsieke halfgeleider (I-type). P półprzewodnik właściwy (typu I). S egenhalvledare. (391,521)
6. **ionic semiconductor** : a semiconductor in which the conductivity due to the flow of ions predominates over that due to the motion of electrons and holes. ★ semiconducteur ionique → *semiconducteur 22.* R ионный полупроводник. D Ionenhalbleiter. E semiconductor iónico. I semiconduttore ionico. N ionenhalfgeleider. P półprzewodnik jonowy. S jonhalvledare. (521)
7. **non-degenerate semiconductor** : a semiconductor in which the Fermi level is situated in the energy gap away from the boundaries at a distance at least twice as great as the product of Boltzmann's constant and thermodynamic temperature. *Note.* — The charge carriers in a non-degenerate semiconductor are governed by Maxwell-Boltzmann statistics. ★ semiconducteur non dégénéré → *semiconducteur 23.* R невырожденный полупроводник. D nichtentarteter Halbleiter. E semiconductor no degenerado. I semiconduttore non degenerato. N niet-ontaarde halfgeleider. P półprzewodnik niezdegenerowany. S ..... (521)
8. **N-type semiconductor** : extrinsic semiconductor in which the conduction electron density exceeds the mobile hole density. ★ semi-conducteur type N → *semiconducteur 24.* R N-полупроводник. D N-Störstellenhalbleiter. E semiconductor tipo N. I semiconduttore tipo N. N halfgeleider N-type. P półprzewodnik typu N. S N-halvledare. (391,521)
9. **P-type semiconductor** : extrinsic semiconductor in which the mobile hole density exceeds the conduction electron density. ★ semi-conducteur type P → *semiconducteur 25.* R P-полупроводник. D P-Störstellenhalbleiter. E semiconductor tipo P. I semiconduttore tipo P. N halfgeleider P-type. P półprzewodnik typu P. S P-halvledare. (391,521)
10. **semiconductor** : a substance whose total conductivity due to charge carriers of both signs is normally in the range between that of metals and insulants and in which the charge carrier density can be changed by external means. *Note.* — The term "semiconductor" generally applies where the charge carriers are electrons or holes. ★ semiconducteur → *semiconducteur 15.* R полупроводник. D Halbleiter. E semiconductor. I semiconduttore. N halfgeleider. P półprzewodnik. S halvledare. (121,391,521)
11. **semiconductor ballast** : → *ballast 4*
12. **semiconductor convertor** : → *convertor 40*
13. **semiconductor device** : → *device 49*
14. **semiconductor diode** : → *diode 17*
15. **semiconductor frequency-multiplication diode** : → *diode 18*
16. **semiconductor integrated circuit** : → *integrated circuit 3*
17. **semiconductor laser** (*Syn.* injection laser diode) : → *diode 11*

18. **semi-conductor rectifier** : → *rectifier 10*
19. **semiconductor rectifier diode** : → *diode 19*
20. **semiconductor spectrometer** : → *spectrometer 9*
21. **semiconductor switching device** : → *switching device 4*
22. **semiconductor thermoelement** : → *thermoelement 1*
23. **semiconductor valve device** : → *valve device 7*
24. **single-element semiconductor** : a semiconductor which in the pure state consists of a single element. ★ semiconducteur élémentaire → *semiconducteur 19.* R простой полупроводник. D Einzelelementleiter. E semiconductor elemental. I semiconduttore elementare. N elementaire halfgeleider. P półprzewodnik pierwiastkowy. S ett-elementshalvledare. (521)

semiconductor detector

1. **amplifying semiconductor detector** : a semiconductor detector in which charge multiplication is produced by a secondary process such as an avalanche. ★ semicteur à amplification interne → *semicteur 2.* R усиливающий полупроводниковый детектор. D Halbleiterdetektor mit innerer Verstärkung. E detector semiconductor de amplificación interna. I rivelatore semiconduttore ad amplificazione interna. N halfgeleiderdetector met inwendige versterking. P wzmacniający detektor półprzewodnikowy. S förstärkande detektor. (391)
2. **boron coated semiconductor detector** : a semiconductor detector intended to detect neutrons and containing for that purpose boron-10 in the form of a coating on its surface. Ionization is initiated by alpha particles produced by nuclear reactions of neutrons in the coating. ★ semicteur à dépôt de bore → *semicteur 4.* R полупроводниковый детектор с покрытием из бора. D Halbleiterdetektor mit Borbelag. E detector semiconductor de depósito de boro. I rivelatore semiconduttore a deposito di boro. N halfgeleiderdetector met borium- bekleding. P detektor półprzewodnikowy z pokryciem borowym. S borbelagd halvledardetektor. (391)
3. **compensated semiconductor detector** : a semiconductor detector consisting of a region of compensated semiconductor between a P type region and an N type region. ★ semicteur compensé → *semicteur 10.* R скомпенсированный полупроводниковый детектор. D kompensierter Halbleiterdetektor. E detector semiconductor compensado. I rivelatore semiconduttore compensato. N compensatiehalfgeleiderdetector. P skompensowany detektor półprzewodnikowy. S kompenserad detektor. (391)
4. **differential dE/dx semiconductor detector** : a transmission semiconductor detector in which the thickness of the depletion layer is small compared to the range of the incident particles in the semiconductor material. ★ semicteur différentiel dE/dx → *semicteur 12.* R дифференциальный полупроводниковый детектор. D dE/dx-Halbleiterdetektor. E detector semiconductor diferencial dE/dx. I rivelatore semiconduttore differenziale. N differentiële dE/dx halfgeleiderdetector. P różniczkowy (dE/dx) detektor półprzewodnikowy. S differentialdetektor. (391)
5. **diffused junction semiconductor detector** : a semiconductor detector in which the P-N or N-P junction is produced by diffusion of an impurity of one type into a semiconductor of opposite type. *Note.* — The first letter P or N designates the type of the diffused impurities. ★ semicteur à jonction diffusée → *semicteur 7.* R диффузионный полупроводниковый детектор. D Detektor mit diffundierter Sperrschicht. E detector semiconductor de unión difusa. I rivelatore semiconduttore a giunzione diffusa. N halfgeleiderdetector met gediffundeerde grenslaag. P dyfuzyjny detektor złączowy. S diffusionsövergångsdetektor. (391)
6. **fission semiconductor detector** : a semiconductor detector intended to detect neutrons and containing for that purpose a coating of fissile material. Ionization is initiated by fission fragments resulting from nuclear reactions of neutrons with the fissile material. ★ semicteur à fission → *semicteur 6.* R полупроводниковый детектор делений. D Halbleiter-Spaltdetektor. E detector semiconductor de fisión. I rivelatore semiconduttore a fissione. N halfgeleiderdetector met splijtstofbekleding. P rozszczepieniowy detektor półprzewodnikowy. S fissionshalvledardetektor. (391)
7. **lithium coated semiconductor detector** : a semiconductor detector intended to detect neutrons and containing for that purpose lithium-6 in the form of a coating on its surface. Ionization is initiated by alpha particles produced by nuclear reactions of neutrons in the coating. ★ semicteur à dépôt de lithium → *semicteur 5.* R полупроводниковый детектор с покрытием из лития. D Halbleiterdetektor mit Lithiumbelag. E detector semiconductor de depósito de litio. I rivelatore semiconduttore a deposito di litio. N halfgeleiderdetector met lithium bekleding. P detektor półprzewodnikowy z pokryciem litowym. S litiumbelagd halvledardetektor. (391)
8. **lithium drifted semiconductor detector** : a compensated semiconductor detector in which the compensated region is obtained by causing lithium ions to move through a P-type crystal under an applied electric field in such a way as to compensate the charge of the bound impurities. ★ semicteur compensé au lithium → *semicteur 11.* R литий-дрейфовый полупроводниковый детектор. D Halbleiterdetektor mit Kompensation durch Lithium. E detector semiconductor compensado de litio. I rivelatore semiconduttore compensato al litio. N gelithiumde halfgeleiderdetector. P detektor półprzewodnikowy dyfundowany litem. S litiumdriftad detektor. (391)
9. **semiconductor detector** : an ionization detector using a semi-conductor medium in which an electric field is provided for the collection at the electrodes of the excess charge carriers produced by ionizing radiation. ★ détecteur semi-conducteur → *détecteur 35.* R полупроводниковый детектор. D Halbleiterdetektor. E detector semiconductor. I rivelatore semiconduttore. N halfgeleiderdetector. P detektor półprzewodnikowy. S halvledardetektor. (391,881)
10. **surface barrier semiconductor detector** : a semiconductor detector in which the potential barrier due to the junction results from a superficial inversion layer. ★ semicteur à barrière de surface → *semicteur 3.* R поверхностно-барьерный полупроводниковый детектор. D Oberflächensperrschicht-Detektor. E detector semiconductor de barrera de superficie. I rivelatore semiconduttore a barriera superficiale. N halfgeleiderdetector met oppervlaktebarrière. P detektor półprzewodnikowy z barierą powierzchniową. S ytskiktsdetektor. (391)
11. **totally depleted semiconductor detector** : a semiconductor detector in which the thickness of the depletion layer is essentially equal to the thickness of the semiconductor material. ★ semicteur à zone de déplétion totale → *semicteur 9.* R полностью обедненный полупроводниковый детектор. D Halbleiterdetektor mit völliger Ladungsträgerverarmung. E detector semiconductor de agotamiento total. I rivelatore semiconduttore a zona di svuotamento totale. N totaal verarmde halfgeleiderdetector. P detektor półprzewodnikowy całkowicie zamknięty. S totalbristdetektor. (391)
12. **transmission semiconductor detector** : a semiconductor detector whose thickness, including its entrance and exit windows, is sufficiently small to permit the radiation to pass completely through the detector. ★ semicteur à transmission → *semicteur 8.* R пролетный полупроводниковый детектор. D Durchschuss-Halbleiterdetektor. E detector semiconductor de transmisión. I rivelatore semiconduttore a trasmissione. N doordringbare halfgeleiderdetector. P transmisyjny detektor półprzewodnikowy. S transmissiondetektor. (391)

semi-digital

1. **semi-digital readout** : → *readout 3*

semi-direct

1. **semi-direct lighting** : → *lighting 28*

semi-horizontal

1. **semi-horizontal configuration** : → *configuration 16*

semi-indirect

1. **semi-indirect lighting** : → *lighting 29*

semi-processed

1. **semi-processed electrical steel** : → *steel 3*

semi-rigid

1. **semi-rigid coaxial line** : → *line 140*

semitone

1. **tempered semitone** (*Syn.* half-step) : logarithmic frequency interval between two sounds whose fundamental-frequency ratio is the twelfth root of two. *Notes. 1* — One octave is equal to 12 tempered semitones. *2* — The tempered semitone is used as a

unit of logarithmic frequency interval. ★ demi-ton tempéré → *demi-ton 1.* R темперированный полутон, полушаг. D temperierter Halbton; Halbtonschritt. E semitono templado. I semitono temperato. N halve toon (in de evenredig zwevende stemming). P półton temperowany. S tempererad halvton. (801)

semi-vertical

1. **double circuit semi-vertical configuration** : → *configuration 6*
2. **semi-vertical configuration** : → *configuration 17*

sender

1. **sender** (in signalling) : a device that generates and transmits signals. ★ envoyeur → *envoyeur 1.* R передатчик (сигнализации). D Sender. E emisor (en señalización). I inviatore. N zender. P nadajnik (sygnalizacyjny). S sändare. (714)

sending

1. **relative equivalent for sending** : → *equivalent 62*
2. **sending** (in telecommunication) : the production of a signal at an input port of a transmission line or into a transmission medium. ★ émission → *émission 18.* R посылка (в электросвязи). D Aussenden (in der Telekommunikation); Übertragung (in diesem Sinne abgelehnt). E emisión (en telecomunicación). I emissione (in telecomunicazione). N (ver)zending (bij telecommunicatie); transmissie. P emisja (w telekomunikacji); nadawanie. S sändning. (702)
3. **sending reference equivalent** : → *equivalent 64*
4. **sending system** : → *system 184*

sensation

1. **auditory sensation area** : → *area 3*
2. **normal auditory sensation area** : → *area 30*
3. **sensation level** : → *level 82*

sensitive

1. **sensitive lining** : → *lining 6*
2. **sensitive material** : → *material 38*
3. **sensitive switch** : → *switch 44*
4. **sensitive time** : → *time 162*
5. **sensitive volume** : → *volume 7*
6. **sensitive volume** : → *volume 8*

sensitivity

1. **axial sensitivity** : of a microphone, for a specified frequency, free-field sensitivity to a plane-progressive sound wave whose direction of propagation is toward the reference point and along the principal axis. ★ sensibilité axiale → *sensibilité 19.* R осевая чувствительность. D axiale Empfindlichkeit. E sensibilidad axial. I sensibilità assiale. N gevoeligheid op de as. P skuteczność osiowa. S axiell känslighet. (801)
2. **channel sensitivity** (at 1000 Hz) : if U is the voltage at a given output derived from playing a reference signal of 1 000 Hz recorded at a velocity of v cm/s, sensitivity at 1 000 Hz is given by:

$$\frac{U}{v}\ \mathrm{mV/cm \cdot s^{-1}}$$

where U and v are both either r.m.s. or peak values. ★ sensibilité d'une voie → *sensibilité 25.* R чувствительность канала (на частоте 1000 гц). D Kanalempfindlichkeit (bei 1000 Hz). E sensibilidad de un canal (a 1000 Hz). I sensibilità. N kanaalgevoeligheid (bij 1000 Hz). P skuteczność toru (przy 1000 Hz); czułość toru (przy 1000 Hz). S kanalkänslighet (vid 1000 Hz). (806)
3. **close-talking sensitivity** : of a microphone, for a specified frequency, quotient of the output open-circuit voltage by the sound pressure, at the position previously occupied by the microphone reference point, in the undisturbed sound field produced by a human head and mouth, or by a specified source that simulates the acoustical characteristics of a human head and mouth. *Notes. 1* — If the load impedance is other than that of an open-circuit, it shall be specified. *2* — This definition is relevant only to microphones used close to the mouth. ★ sensibilité paraphonique → *sensibilité 37.* R парафоническая чувствительность. D Nahbesprechungsempfindlichkeit; Nahbesprechungs-Übertragungskoeffizient. E sensibilidad parafónica. I sensibilità a distanza ravvicinata. N gevoeligheid op korte afstand. P skuteczność parafoniczna. S närkänslighet. (801)
4. **contrast sensitivity** (S_c) : reciprocal of the least perceptible (physical) contrast, usually expressed as $L/\Delta L$, where L is the average luminance and ΔL is the luminance difference threshold. *Note.* — The value of S_c depends on the luminance and on the viewing conditions, including the state of adaptation. ★ sensibilité au contraste → *sensibilité 13.* R контрастная чувствительность. D Unterschiedsempfindlichkeit; Kontrasttempfindlichkeit. E sensibilidad de contraste. I sensibilità al contrasto. N contrastgevoeligheid. P czułość kontrastowa. S kontrastkänslighet. (845)
5. **control current sensitivity** (of a Hall probe) : the quotient of the Hall voltage by the control current in the linear operating range of a Hall probe. ★ sensibilité au courant de commande → *sensibilité 16.* R чувствительность по управляющему току (зонда Холла). D Steuerstromempfindlichkeit (einer Hallsonde). E sensibilidad a la corriente de control (de una sonda de Hall). I sensibilità della corrente di comando (di una sonda di Hall). N stuurstroomgevoeligheid (van een Hallsonde). P czułość prądowa (magnetometru Halla). S styrströmskänslighet. (521)
6. **deflection sensitivity** (electrostatic) : the quotient of the displacement of the spot by the change in deflection voltage under stated conditions. ★ sensibilité de déviation → *sensibilité 21.* R чувствительность к отклонению (электростатическому). D Ablenkempfindlichkeit (elektrostatisch). E sensibilidad de desviación (eléctrica). I sensibilità di deflessione (elettrica). N afbuiggevoeligheid (elektrostatische). P czułość odchylania (elektrycznego). S elektrostatisk avböjningskänslighet. (531)
7. **deflection sensitivity** (magnetic) : the quotient of the displacement of the spot by the change in deflection current under stated conditions. ★ sensibilité de déviation → *sensibilité 22.* R чувствительность к отклонению (магнитному). D Ablenkempfindlichkeit (magnetisch). E sensibilidad de desviación (magnética). I sensibilità di deflessione (magnetica). N afbuiggevoeligheid (magnetische). P czułość odchylania (magnetycznego). S magnetisk avböjningskänslighet. (531)
8. **diffuse-field sensitivity** : of an electroacoustic transducer for sound reception, at a specified location, for a specified frequency, quotient of the root-mean-square open-circuit output voltage due to sound waves arriving more or less simultaneously with equal probability from all directions, by the root-mean-square sound pressure at that location due to the same sound waves but in the absence of the electroacoustic transducer. ★ sensibilité en champ diffus → *sensibilité 27.* R чувствительность по диффузному полю. D Diffusfeldempfindlichkeit; Diffusfeldübertragungskoeffizient. E sensibilidad en campo difuso. I sensibilità in campo diffuso; risposta in campo diffuso. N gevoeligheid in het diffuse veld. P skuteczność w polu rozproszonym. S känslighet i diffust fält. (801)
9. **dynamic sensitivity** : under stated conditions of operation, the quotient of the variation of the photoelectric current of the device by the initiating small variation of the incident radiant power or luminous flux. ★ sensibilité dynamique → *sensibilité 26.* R динамическая чувствительность. D dynamische Empfindlichkeit. E sensibilidad dinámica. I sensibilità dinamica. N dynamische lichtgevoeligheid. P czułość dynamiczna. S dynamisk känslighet. (531)
10. **free-field current sensitivity** : of an electroacoustic transducer for sound reception, for a specified frequency and a specified direction of sound incidence, quotient of the short-circuit current at the output terminals of the transducer by the sound pressure in the undisturbed plane-progressive free field. ★ sensibilité en courant en champ libre → *sensibilité 29.* R чувствительность по току в свободном поле. D Frei-Feld-Stromübertragungskoeffizient. E sensibilidad de corriente en campo libre; eficacia de corriente en campo. I sensibilità di corrente in campo libero. N vrije-veldgevoeligheid bij kortsluiting; kortgesloten vrije-veldresponsie. P skuteczność (odbiorcza) prądowa w polu swobodnym. S tryck-strömkänslighet i fritt fält. (801)
11. **free-field sensitivity** : of an electroacoustic transducer for sound reception, for a specified frequency and a specified direction of sound incidence, quotient of the output open-circuit voltage by the sound pressure in the undisturbed plane-progressive free field. *Note.* — If the load impedance is

other than that of an open circuit, it shall be specified. ★ sensibilité en champ libre → *sensibilité 28.* R чувствительность в свободном поле. D Frei-Feld-Empfindlichkeit; Frei-Feld-Übertragungskoeffizient. E sensibilidad en campo libre; eficacia en campo libre. I sensibilità in campo libero; risposta in campo libero. N vrije-veldgevoeligheid; vrije-veldresponsie. P skuteczność (odbiorcza) w polu swobodnym. S tryck-spänningskänslighet i fritt fält. (801)

12. **knee sensitivity** (*Syn.* knee luminous flux) : the luminous flux at the knee point of the light-signal transfer characteristic. ★ sensibilité au coude → *sensibilité 14.* R чувствительность в точке загиба. D Empfindlichkeit im Kniepunkt. E sensibilidad de codo; flujo luminoso de codo. I sensibilità al gomito; flusso luminoso al gomito. N lichtstroom in het kniepunt. P czułość w kolanie charakterystyki. S knäkänslighet. (531)

13. **luminous sensitivity** : *a)* The quotient of the photoelectric current of the device by the incident luminous flux, usually expressed in amperes per lumen; *b)* The quotient of the photoelectric current of the device by the incident illuminance, usually expressed in amperes per lux. ★ sensibilité lumineuse → *sensibilité 35.* R световая чувствительность. D photometrische Empfindlichkeit. E sensibilidad luminosa. I sensibilità luminosa. N lichtgevoeligheid. P czułość świetlna. S ljuskänslighet. (531)

14. **magnetic sensitivity** (of a Hall probe) : the quotient of the Hall voltage by the magnetic flux density in the linear operating range of a Hall probe. ★ sensibilité magnétique → *sensibilité 36.* R магнитная чувствительность (зонда Холла). D magnetische Empfindlichkeit (einer Hallsonde). E sensibilidad magnética (de una sonda de Hall). I sensibilità magnetica (di una sonda di Hall). N magnetische gevoeligheid (van een Hallsonde). P czułość magnetyczna (magnetometru Halla). S magnetisk känslighet. (521)

15. **magnetoresistive sensitivity** : the rate of change of the resistance of a magnetoresistor with magnetic flux density at a specified magnetic flux density. ★ sensibilité de magnétorésistance → *sensibilité 23.* R магниторезистивная чувствительность. D Empfindlichkeit eines Magnetowiderstandes. E sensibilidad de magnetorresistencia. I sensibilità di magnetoresistenza. N magnetoweerstandsgevoeligheid. P czułość rezystancyjna magnetorezystora. S magnetoresistiv känslighet. (521)

16. **(photocathode) sensitivity** : the quotient of the intensity of the photoelectric emission current from the photocathode by the incident luminous flux under specified conditions of illumination. ★ sensibilité → *sensibilité 6.* R чувствительность фотокатода. D Empfindlichkeit einer Photokathode. E sensibilidad de un fotocátodo. I sensibilità di un fotocatodo. N fotokathodegevoeligheid. P czułość fotokatody. S ljuskänslighet (hos fotokatod). (391)

17. **pressure sensitivity** (*Syn.* voltage sensitivity) : of an electroacoustic transducer for sound reception, for a specified frequency, quotient of the output open-circuit voltage by the sound pressure acting on the part of the transducer designed to receive sound. *Note.* — If the load impedance is other than that of an open circuit, it shall be specified. ★ sensibilité en pression (et en tension) → *sensibilité 31.* R чувствительность по давлению; чувствительность по напряжению. D Druckempfindlichkeit; Druckübertragungskoeffizient. E sensibilidad de presión (y de tensión); eficacia de presión (y de tensión). I sensibilità alla pressione; risposta di pressione. N drukgevoeligheid; drukresponsie. P skuteczność (odbiorcza) ciśnieniowa (i napięciowa). S tryckkänslighet. (801)

18. **radiant sensitivity** : *a)* The quotient of the photoelectric current of the device by the incident radiant power, usually expressed in amperes per watt; *b)* The quotient of the photoelectric current of the device by the incident irradiance, usually expressed in amperes per watt per square metre. ★ sensibilité énergétique → *sensibilité 32.* R чувствительность к излучению. D Strahlungsempfindlichkeit. E sensibilidad energética. I sensibilità energetica. N stralingsgevoeligheid. P czułość energetyczna. S strålningskänslighet. (531)

19. **radiation sensitivity** : the counting rate, for a given exposure (dose) rate, produced by radiation of a stated energy. ★ sensibilité au rayonnement → *sensibilité 17.* R чувствительность к излучению. D Strahlungsempfindlichkeit. E sensibilidad de radiación. I sensibilità alla radiazione. N stralingsgevoeligheid (stralingstelbuizen). P czułość napromienienia. S strålningskänslighet. (531)

20. **random-incidence sensitivity** : of an electroacoustic transducer for sound reception, at a specified location, for a specified frequency, quotient of the root-mean-square open-circuit output voltage due to a succession of equal sound waves incident with equal probability from all directions, by the sound pressure at that location due to a single such free sound wave in the absence of the electroacoustic transducer. ★ sensibilité en incidence aléatoire → *sensibilité 30.* R чувствительность при случайном падении. D Richtungsempfindlichkeit. E sensibilidad en incidencia aleatoria. I sensibilità in incidenza aleatoria. N alzijdige gevoeligheid. P skuteczność wszechkierunkowa. S allriktningskänslighet. (801)

21. **relative sensitivity** (of a transducer) : ratio of the sensitivity of a transducer under a particular condition to a stated reference sensitivity of the same kind. ★ sensibilité relative → *sensibilité 38.* R относительная чувствительность (преобразователя). D relative Empfindlichkeit. E sensibilidad relativa (de un transductor). I sensibilità relativa (di un trasduttore); risposta relativa (di un trasduttore). N relatieve gevoeligheid; relatieve responsie. P skuteczność względna (przetwornika). S relativ känslighet. (801)

22. **relative sensitivity** (*Syn.* relative responsivity) : → *responsivity 1*

23. **sensitivity** (of a measuring instrument) : *1)* The quotient of a change in the output information to the change in the input quantity which has produced it. *Note.* — For an instrument with an intentionally non-linear conversion characteristic, the sensitivity is a function of the input value. *2)* The value of the input required to produce an output exceeding, by a specific amount, the output already present due to other causes, such as noise. ★ sensibilité → *sensibilité 5.* R чувствительность (измерительного прибора). D Empfindlichkeit (eines Messgerätes). E sensibilidad (de un aparato de medida). I sensibilità (di uno strumento di misura). N gevoeligheid. P czułość (przyrządu pomiarowego). S känslighet (hos mätinstrument). (303,391)

24. **sensitivity** (*Syn.* threshold luminous flux) : the input luminous flux necessary to obtain a stated signal-to-noise ratio in the output. ★ sensibilité → *sensibilité 7.* R пороговое значение; светового потока. D Schwellenwert des Lichtstromes. E sensibilidad; umbral de flujo luminoso. I sensibilità; soglia di flusso luminoso. N lichtstroomdrempelwaarde. P czułość; strumień świetlny progowy. S ljusflödets tröskelvärde. (531)

25. **sensitivity** (*Syn.* detection threshold) : → *threshold 1*

26. **sensitivity** (of a transducer) : quotient of a specified quantity describing the output signal of a transducer by another specified quantity describing the corresponding input signal. ★ sensibilité → *sensibilité 9.* R чувствительность (преобразователя). D Empfindlichkeit; Übertragungskoeffizient. E sensibilidad (de un transductor). I sensibilità (di un trasduttore); risposta (di un trasduttore). N gevoeligheid; responsie. P skuteczność (przetwornika). S känslighet. (801)

27. **sensitivity** (*Syn.* responsivity) : → *responsivity 4*

28. **sensitivity level** : → *level 83*

29. **sensitivity to current** : of an electroacoustic transducer for sound emission, for a specified frequency, quotient of the sound pressure in a free field at a specified distance from the effective acoustic centre, and in a specified direction, by the current flowing at the electrical input terminals. *Note.* — When the effective acoustic centre of the transducer cannot be easily determined, the distance is measured from the reference point of the transducer. ★ sensibilité au courant → *sensibilité 15.* R чувствительность по току. D Stromübertragungskoeffizient. E sensibilidad a la corriente. I sensibilità alla corrente; risposta alla corrente. N stroomgevoeligheid. P skuteczność prądowa. S strömkänslighet. (801)

30. **sensitivity to electric power** : of an electroacoustic transducer for sound emission, for a specified frequency, quotient of the time-mean-square sound pressure in a free field at a specified distance from the effective acoustic centre of the transducer, and in a specified direction, by the electric power input. *Note.* — When the effective acoustic centre of the transducer cannot be easily determined, the distance is measured from the reference point of the transducer. ★ sensibilité à la puissance → *sensibilité 11.* R чувствительность по электрической

мощности. D Leistungsübertragungskoeffizient. E sensibilidad a la potencia. I sensibilità alla potenza. N vermogensgevoeligheid. P skuteczność mocowa. S effektkänslighet. (801)

31. **sensitivity to voltage** : of an electroacoustic transducer for sound emission, for a specified frequency, quotient of the sound pressure in a free field at a specified distance from the effective acoustic centre, and in a specified direction, by the signal voltage applied at the input terminals. *Note.* — When the effective acoustic centre of the transducer cannot be easily determined, the distance is measured from the reference point of the transducer. ★ sensibilité à la tension → *sensibilité 12.* R чувствительность по напряжению. D Spannungsübertragungskoeffizient. E sensibilidad a la tensión. I sensibilità alla tensione; risposta alla tensione. N spanningsgevoeligheid. P skuteczność napięciowa. S spänningskänslighet. (801)
32. **tuning sensitivity** : the rate of tuning with respect to a change of the controlling parameter (e.g. the position of mechanical tuner or the electronic tuning voltage) at a stated operating point. ★ sensibilité d'accord → *sensibilité 20.* R крутизна перестройки. D Abstimmempfindlichkeit. E sensibilidad de sintonía. I sensibilità di accordo. N afstemgevoeligheid. P czułość przestrajania. S avstämningskänslighet. (531)
33. **voltage sensitivity** (*Syn.* pressure sensitivity) : → *sensitivity 17*

sensor

1. **camera sensor** (*Syn.* image sensor) : → *sensor 3*
2. **(electric) sensor** : an electric signal transducer that converts a signal of any kind into an electric signal. ★ capteur (électrique) → *capteur 4.* R (электрический) датчик. D Fühler; Sensor. E captador (eléctrico). I sensore (elettrico). N (elektrische) sensor; opnemer; voeler. P czujnik (elektryczny). S (elektrisk) givare. (151)
3. **image sensor** (*Syn.* camera sensor) : an optolectronic device which produces electrical signals representing the optical characteristics of an image. ★ capteur d'image → *capteur 3.* R воспринимающий элемент камеры. (723)
4. **record preserving sensor hole** : → *hole 15*
5. **recorder adjustment sensor hole** : → *hole 16*
6. **sensor** (*Syn.* detecting device) : part of a measuring transducer which converts the input signal into a form suitable for measurement. *Note.* — The relationship between the input and the output variables of a sensor is fundamental and cannot be altered by external means other than physically or functionally modifying the device. ★ capteur → *capteur 1.* R чувствительный элемент; детектирующее устройство. D Messfühler. E detector; captador; sensor. I sensore. N opnemer. P czujnik. S ..... (351)

sentence

1. **sentence articulation** : → *articulation 5*

separate

1. **separate earth electrodes** : → *electrode 86*
2. **separate footing foundations** : → *foundation 11*
3. **separate ground electrodes** (*Syn.* separate earth electrodes) : → *electrode 86*
4. **separate network operation** : → *operation 62*
5. **separate self-excitation** : → *self-excitation 8*
6. **separate terminal enclosure** : → *enclosure 11*
7. **separate winding transformer** : → *transformer 57*

separated

1. **electrically separated contact elements** : → *element 15*
2. **phase separated terminal box** : → *terminal box 6*
3. **separated phase layout** : → *layout 3*

separately

1. **separately excited** : → *excited 3*
2. **separately excited motor** : → *motor 86*
3. **separately lead-sheathed cable** : → *cable 59*
4. **separately mounted circulating circuit component** : → *circulating circuit 5*
5. **separately pumped electron gun** (*Syn.* external gun) : → *gun 4*

separating

1. **engaging or separating force** : → *force 18*
2. **separating capability** : → *capability 6*

separation

1. **channel separation** : the ratio, expressed in decibels, between two voltages occuring at the output terminals of a given channel A, viz. U_A due to the wanted signal intended for channel A, and U_B due to the unwanted signal produced by channel B in channel A. ★ séparation des voies → *séparation 8.* R разделение каналов. D Kanaltrennung. E separación de canales. I separazione dei canali. N kanaalscheiding. P tłumienność między kanałami. S kanalseparation. (806)
2. **colour separation overlay** (*Syn.* chromakey) : → *chromakey 1*
3. **separation** (*Syn.* spacer) : → *spacer 2*
4. **separation** (of conductors) : an arrangement of conductors with solid insulation interposed in such a manner that disruptive discharges cannot occur between them. ★ cloisonnement isolant → *cloisonnement 1.* R изоляционное разграничивание (проводников). D Schottung (von Leitern). E separación aislante (entre conductores). I separazione (di conduttori). N isolerende scheiding (tussen geleiders). P przedzielenie (między przewodami); przegroda izolacyjna (między przewodami). S separation. (441)
5. **separation point** : → *point 42*

separator

1. **coil side separator** : additional insulation used to separate embedded coil sides. ★ isolation entre côtés de bobine → *isolation 23.* R изоляционная прокладка между сторонами катушки. D Spulenseiten-Zwischenlage. E aislamiento entre lados de bobina. I isolamento tra i lati di bobina. N scheidingsisolatie (tussen spoelzijden). P przekładka między bokami zezwojów. S härvsidsmellanlägg. (411)
2. **information separator** : a function control designed for separating or qualifying data in accordance with logical or hierarchical order, the exact meaning of which must be specified in each case. *Note.* — If the information separators are used to qualify data in a hierarchical order, it is preferred that the following descending order be used : a file, a group, a record, a unit. ★ séparateur d'information → *séparateur 10.* R разделитель информации. D Informationstrennzeichen. E separador de información. I separatore. N informatiescheider. P separator informacji. S gränstecken. (721)
3. **separator** : in an electrochemical cell, a device made of an insulating material permeable to the ions of the electrolyte and prohibiting totally or partially the mixing of the materials. *Note.* — Membranes and diaphragms are special forms of separators. ★ séparateur → *séparateur 5.* R сепаратор. D Separator. E separador. I separatore. N membraan; separator. P separator. S porös separator. (111)
4. **separator** : a thin layer used as a barrier to prevent mutually detrimental effects between different components of a cable, such as between the conductor and insulation or between insulation and sheath. ★ séparateur → *séparateur 6.* R разделитель. D Trennschicht. E separador. I separatore. N scheidingslaag. P separator. S separerande skikt. (461)
5. **separator** (of a battery) : material with ion permeable structure to provide electrical insulation between plates of opposite polarity. *Note.* — Some membranes and diaphragms are special forms of separators. ★ séparateur (d'accumulateur) → *séparateur 7.* R сепаратор. D Scheider (eines Akkumulators). E separador (de una batería). I separatore. N separator. P separator. S separator. (486)
6. **synchronization pulse separator** : a device for extracting the synchronizing signals from the complete video signal. ★ extracteur de synchronisation → *extracteur 2.* R сепаратор синхронизирующих импульсов. (723)

septate

1. **septate waveguide** : → *waveguide 13*

septet

1. **septet (byte)** : → *byte 6*

sequence

1. **bit sequence independence** : → *independence 1*
2. **digit sequence integrity** : → *integrity 1*

3. **digital test sequence** (*Syn.* DTS (abbreviation)) : a defined sequence of digits used for testing digital transmission systems. *Note.* — An example of a digital test sequence is a specified pseudo-random sequence. ★ suite numérique d'essai → *suite 8.* R цифровая испытательная последовательность. D digitale Testsequenz; DTS (Abkürzung). E secuencia numérica de ensayos. I sequenza numerica di prova; DTS (Digital Test Sequence) (abbreviazione). N digitale testvolgorde. P sekwencja cyfrowa pomiarowa. S digital provningssekvens. (704)
4. **interlacing sequence** : a series of numbers defining the time sequence of the separate fields, in interlaced scanning. ★ séquence d'entrelacement → *séquence 6.* R последовательность перемежения. (723)
5. **international selection sequence** : the first sequence of digits in an international two-stage selection. ★ numéro de batterie → *numéro 10.* R международная комбинация набора. D internationale Wahlfolge. E número de bateria. I numero internazionale. N internationale kiesvolgorde. P sekwencja wybiercza międzynarodowa. S utlandsprefix. (721)
6. **octet sequence integrity** : → *integrity 2*
7. **operating sequence** (of a mechanical switching device) : a succession of specified operations with specified time intervals. ★ séquence de manœuvres → *séquence 4.* R последовательность операций (контактного коммутационного аппарата). D Schaltfolge (eines mechanischen Schaltgerätes). E secuencia de maniobras (de un aparato mecánico de conexión). I sequenza di operazioni (di un apparecchio meccanico di manovra). N schakelvolgorde (van een mechanische schakelaar). P szereg przestawieniowy. S manöverföljd. (441)
8. **PCM digital reference sequence** (*Syn.* DRS (abbreviation)) : a defined sequence of PCM code words which, when applied to an ideal PCM decoder, produces a sinusoidal reference signal of specified level and frequency. *Note.* — An example of a level and frequency is zero dBm0 and 1 020 Hz. ★ suite numérique MIC de référence → *suite 9.* R цифровая эталонная последовательность ИКМ. D PCM-Digitalreferenzsequenz. E secuencia numérica MIC de referencia. I sequenza numerica PCM di riferimento; DRS (Digital Reference Sequence) (abbreviazione). N PCM digitale-referentievolgorde. P sekwencja cyfrowa odniesienia. S kodordssekvens. (704)
9. **phase sequence indicator** : → *indicator 16*
10. **quasi bit sequence independence** : → *independence 3*
11. **sequence chart** : → *chart 7*

sequencing

1. **address sequencing** : the procedure for ensuring that received address messages concerning a call attempt are processed in the correct order. ★ mise en séquence de l'adresse → *mise 14.* R установление последовательности адреса. D Adress-Sequenzierung. E puesta en secuencia de la dirección. I messa in sequenza dell'indirizzo. N ..... P porządkowanie adresu. S adressekventiering. (714)
2. **packet sequencing** : a process of ensuring that packets are delivered to the receiving data terminal equipment in the same sequence as they were transmitted by the sending data terminal equipment. ★ ordonnancement de paquets → *ordonnancement 1.* R соблюдение порядка следования пакетов. D Paketreihung. E ordenamiento de paquetes; secuenciamiento de paquetes. I sequenza dei pacchetti. N ..... P sekwencjowanie pakietów. S paketordnande. (721)
3. **sequencing** : the indication of the order of processing of devices, links, or tasks by a common control. ★ mise en séquence → *mise 13.* R установление последовательности. D Sequenzierung. E puesta en secuencia. I messa in sequenza. N volgorde aangeven. P wyznaczanie kolejności. S följdordnande. (714)

sequential

1. **automatic sequential connection** : → *connection 4*
2. **dot sequential colour television system** : → *system 49*
3. **field sequential colour television system** : → *system 69*
4. **line sequential colour television system** : → *system 102*
5. **sequential circuit** : → *circuit 157*
6. **sequential colour television system** : → *system 185*
7. **sequential control** : → *control 165*
8. **sequential hunting** : → *hunting 8*
9. **sequential monitoring** : → *monitoring 16*
10. **sequential order of the phases** : → *order 6*
11. **sequential phase control** : → *control 166*
12. **sequential programme** : → *programme 10*
13. **sequential scanning** (*Syn.* progressive scanning) : → *scanning 9*
14. **simultaneous line sequential colour television system** : → *system 188*

serial

1. **serial (digital) transmission** : → *transmission 56*
2. **serial radiographic device** (*Syn.* spot-film device) : → *device 53*
3. **serial transmission** : → *transmission 57*

serializer

1. **serializer** (*Syn.* parallel-to-serial converter) : → *converter 13*

serial-to-parallel

1. **serial-to-parallel converter** : → *converter 15*

series

1. **duration of X-ray tube exposure series** : → *duration 13*
2. **equivalent series resistance (of a capacitor)** : → *resistance 22*
3. **Fourier series** (of a periodic function) : a series of terms representing the function, consisting of its mean value and sinusoidal terms having frequencies that are integral multiples of the frequency of the function, the multiple constituting the order of the term. ★ série de Fourier → *série 27.* R ряд Фурье (для периодической функции). D Fourier-Reihe (einer periodischen Funktion). E serie de Fourier (de una función periódica); serie trigonométrica. I serie di Fourier (di una funzione periodica). N Fourierreeks. P szereg Fouriera; szereg trygonometryczny. S Fourier-serie. (101)
4. **harmonic series of sounds** : series of sounds within which the fundamental frequency of each of them is an integral multiple of the lowest fundamental frequency. ★ série harmonique (de sons) → *série 31.* R гармонический ряд звуков. D harmonische Teiltonreihe. E serie armónica (de sonidos). I serie armonica. N harmonische reeks van tonen. P wieloton harmoniczny. S harmoniska deltoner. (801)
5. **homogeneous series** (of fuse-links) : a series of fuse-links, deviating from each other only in such characteristics that, for a given test, the testing of one or a reduced number of particular fuse-link(s) of that series may be taken as representative for all the fuse-links of the homogeneous series. *Note.* — The relevant publications specify the characteristics by which the fuse-links of a homogeneous series may deviate, the particular fuse-links to be tested and the specific test concerned. ★ série homogène → *série 32.* R однородная сепия (заменяемых элементов). D homogene Baureihe (von Sicherungseinsätzen). E serie homogénea (de fusibles). I serie omogenea (di elementi sostituibili). N homogene reeks (van smeltpatronen). P bezpieczniki jednorodnej rodziny konstrukcyjnej. S likformig serie (av säkringspatroner). (441)
6. **line series capacitor** : → *capacitor 46*
7. **primary series circuit** : → *circuit 142*
8. **series** : applied to a machine to denote that it is excited by a series winding. ★ machine à excitation série → *machine 15.* R машина последовательного возбуждения. D Maschine mit Reihenschlußerregung. E máquina con excitación en serie. I macchina ad eccitazione in serie. N seriemachine. P maszyna szeregowa. S serie. (411)
9. **series capacitor** : → *capacitor 59*
10. **series capacitor** : → *capacitor 60*
11. **series cathode heating** : → *heating 51*
12. **series cathode preheating** : → *preheating 5*
13. **series compensation** : → *compensation 10*
14. **series connected starting-motor starting** : → *starting 16*
15. **series connection** : → *connection 48*
16. **series connection** : → *connection 49*
17. **series impedance** : → *impedance 50*
18. **series inductor** : → *inductor 20*

19. **series injection of a centralized telecontrol signal** : → *injection 6*
20. **series mode rejection ratio** : → *ratio 78*
21. **series mode voltage** : → *voltage 189*
22. **series motor** : → *motor 87*
23. **series operation** : → *operation 63*
24. **series reactor** : → *reactor 39*
25. **series resistor** : → *resistor 21*
26. **series resonance frequency** : → *frequency 180*
27. **series T** (*Syn.* E-plane T junction) : → *junction 7*
28. **series transductor** : → *transductor 8*
29. **series transformer** (*Syn.* booster transformer) : → *transformer 12*
30. **series winding** : → *winding 65*
31. **series winding** : → *winding 66*
32. **simulated series motor** : → *motor 90*
33. **X-ray tube exposure series** : regular or irregular series of equal or unequal X-ray tube exposures, occurring principally in serial radiography. ★ série de poses → *série 28.* R серия (рад) включений рентгеновской трубки. D Röntgen-Aufnahmeserie. E serie de exposición de un tubo de rayos X. I serie di esposizioni di un tubo a raggi X. N reeks röntgenbuisbelastingen. P seryjna ekspozycja. S serieexponering. (881)

series-loaded

1. **series-loaded antenna** : → *antenna 101*

series-parallel

1. **series-parallel starting** : → *starting 17*

series-resonant

1. **series-resonant circuit** : → *circuit 158*

seriograph

1. **seriograph** (*Syn.* spot-film device) : → *device 53*

serrations

1. **anti-slip serrations** : radial serrations in the outer part of the label area to prevent friction and slippage between records, during reproduction, when stacked on the spindle of an automatic record changer. ★ stries antidérapantes → *strie 1.* R зубцы сцепления. D radiale Riffelung. E estrías antideslizantes. I strisce anti-slittamento. N antislip vertanding. P karby przeciwślizgowe. S antiglidräfflor. (806)

serveability

1. **serveability performance** : → *performance 11*

service

1. **absent subscriber service** (in telegraphy and data communication) : a facility that permits the calling terminal to be advised automatically by service signal that, due to an action of the called subscriber, the latter's terminal is not available for calls. ★ service des abonnés absents → *service 40.* R служба отсутствующих абонентов (в телеграфии и передаче данных). D Hinweisdienst. E servicio de abonados ausentes (en telegrafía y transmisión de datos). I servizio abbonato assente. N ..... P usługa abonent nieobecny (w telegrafii i teledacji). S hänvisningstjänst. (721)
2. **automatic (telephone) service** : a telephone service in which all the telephone connections of a certain category can be established without operators. ★ service (téléphonique) automatique → *service 62.* R автоматическая (телефонная) служба. D Selbstwähldienst. E servicio (telefónico) automático. I servizio (telefonico) automatico. N automatische telefonie. P ruch telefoniczny automatyczny. S ..... (722)
3. **broadcasting (service)** : radiocommunication in which transmissions are intended for direct reception by the general public ; these may include sound transmissions, television transmissions and other types of transmission. *Note.* — By common usage in French and Spanish the meaning of "radiodiffusion" and "radiodifusión", is frequently restricted to "sound broadcasting". ★ radiodiffusion → *radiodiffusion 6.* R вещание (служба). D Rundfunk. E radiodifusión. I radiodiffusione. N draadloze omroep. P telewizja (rozsiewcza); radiodyfuzja obrazowa. S rundradio(tjänst). (701,723)
4. **datagram service** : a service offered by a packet switching network so that a message short enough to be contained in one packet is sent to the destination identified by the packet address. ★ service de datagramme → *service 39.* R служба датаграмм. D Datagrammdienst. E servicio de datagramas. I servizio datagramma. N datagramdienst. P usługa datagramowa. S datagramtjänst. (721)
5. **direct service area** : → *area 14*
6. **grade of service** : → *grade 1*
7. **justification service digit** : → *digit 19*
8. **local service area** : → *area 25*
9. **manager and secretary service** : a telephone service providing direct non dialling connection between two telephone stations in the same private telephone installation and enabling one of the stations to answer and extend call attempts to the other and to set up outgoing telephone connections for the latter. ★ filtrage d'appel → *filtrage 3.* R служба секретарь-директор. D Vorzimmeranlage. E servicio jefe-secretaria. I servizio direttore-segreteria. N chef-secretaresseschakelaar. P układ aparatów (telefonicznych) sekretarsko-dyrektorski. S ..... (722)
10. **maximum service output (of an internal combustion engine)** : → *output 23*
11. **mean service access delay** : → *delay 29*
12. **mean service provisioning time** : → *time 100*
13. **number of service tapping positions** : → *number 21*
14. **overline service** : several subscriber's line circuits grouped under the same address in such a way that a call to that address may reach any of the free lines of the group. ★ groupement de lignes → *groupement 8.* R серийное включение. D Sammelanschluß. E agrupamiento de líneas. I linee a passo progressivo. N ..... P grupowanie łączy. S gruppnummertjänst. (721)
15. **public telegram service** (*Syn.* telegram service) : → *service 49*
16. **quality of service** : → *quality 7*
17. **quality of service** : → *quality 8*
18. **restricted service** : a service whereby a subscriber may have access barred from his terminal installation to certain services, routes or terminals which would normally be accessible to all customers. ★ service restreint → *service 58.* R служба с ограничениями. D eingeschränkter Betrieb. E servicio restringido. I servizio selettivo. N beperkt verkeer. P usługa ograniczona. S begränsad åtkomst. (721)
19. **service** : a set of functions offered to a user by an organization. ★ service → *service 31.* R услуги; обслуживание; сервис. D Dienstleistung. E servicio. I servizio. N dienst(verlening). P serwis; usługi. S service. (191)
20. **service access probability** (*Syn.* service accessibility) : → *accessibility 1*
21. **service accessibility** : → *accessibility 1*
22. **service accessibility performance** : → *performance 12*
23. **service area** : → *area 37*
24. **service computer** (in telecommunication) : a computer, interoperating with the central processors of one or several switching centres via data channels, that receives information from the switching centres and processes this information for operational and administrative purpose. ★ centre de gestion → *centre 7.* R центр управления (в электросвязи). D Wartungsrechner. E centro de gestión (en telecomunicación). I elaboratore di servizio. N ..... P centralny komputer obsługowy. S styrdator. (714)
25. **service connection impedance** : → *impedance 51*
26. **service digits** : → *digit 26*
27. **service illuminance** : → *illuminance 6*
28. **service indicator** : → *indicator 22*
29. **service integrity** : → *integrity 3*
30. **service life** : → *life 10*
31. **service mass (of a battery)** : → *mass 29*
32. **service operability performance** : → *performance 13*
33. **service position** : → *position 32*
34. **service reliability** : → *reliability 16*
35. **service retainability** : → *retainability 2*
36. **service retainability performance** : → *performance 14*
37. **service security** : → *security 4*

38. **service signal** : → *signal 169*
39. **service support performance** : → *performance 15*
40. **service time** : → *time 163*
41. **service user abandonment probability** : → *probability 13*
42. **service user mistake probability** : → *probability 14*
43. **sound broadcasting (service)** : → *broadcasting 11*
44. **stuffing service digit** (*Syn.* justification service digit) : → *digit 19*
45. **subscriber's service line** (*Syn.* subscriber's lead-in) : → *lead-in 3*
46. **supertelex (service)** : → *supertelex 1*
47. **supply service** (*Syn.* line connection) : a branch line from the distribution system to supply a consumer's installation. ★ branchement → *branchement 1.* R питающая линия (потребителя). D Hausanschlussleitung. E acometida (del consumidor). I collegamento (di un utente). N verbruikersaansluiting. P przyłącze (obdiorcy). S servisledning. (601)
48. **supply system for safety services** : → *system 207*
49. **telegram service** (*Syn.* public telegram service) : the telegraph service offered to the public for the transmission of telegrams and their delivery to the addressees. ★ service des télégrammes → *service 41.* R служба передачи телеграмм. D Telegrammdienst. E (servicio de) telegramas; servicio telegráfico público. I telegrammi (servizio pubblico di inoltro). N telegramdienst. P usługa telegramowa; usługa telegramowa publiczna. S telegramjänst. (721)
50. **telegraph service** : a service for the transmission of information by telegraphy. Examples of telegraph services: telegram service, radiotelegram service, facsimile service, phototelegraphy service, telex service and leased telegraph circuit service. ★ service télégraphique → *service 60.* R телеграфная служба. D Telegrafendienst. E (servicio) telegráfico. I servizio telegrafico. N telegraafdienst. P usługa telegraficzna. S telegrafitjänst. (721)
51. **telematics (services)** : telecommunication services supplementing conventional telegraphic or telephonic services, generally using teleprocessing techniques to permit a user to receive or send public or private information, or to effect operations such as file consultation, reservations, commercial or banking transactions. Examples of telematics services : facsimile, teletex, videography, telewriting *Note.* — Telematics services do not include broadcasting of sound or television programs. ★ (services de) télématique → *télématique 1.* R телематика (службы). D Telematik (-Dienste). E (servicios de) telemática. I (servizio di) telematica. N telematica. P wizjografia rozsiewcza (powszechna); wizjografia dyfuzyjna. S telematik. (701,721)
52. **teletex (service)** : → *teletex 1*
53. **television broadcasting (service)** : → *broadcasting 15*
54. **telex (service)** : → *telex 10*
55. **useful service output** : → *output 71*
56. **user class of service** : → *class 13*
57. **(user) class of service signal** : → *class 14*

serviceability

1. **serviceability performance** (*Syn.* serveability performance) : → *performance 11*

service-oriented

1. **service-oriented part** (*Syn.* user part) : → *part 12*

serving

1. **serving** : one or more non-extruded layers applied to the exterior of a cable. ★ matelas extérieur → *matelas 2.* R наружный покров. D äußere Umhüllung. E revestimiento exterior de un cable. I fasciatura eterna. N bekleding. P odzież. S mantelskydd. (461)
2. **serving connection exchange** : → *exchange 23*
3. **subscriber serving exchange** : → *exchange 24*

servomotor

1. **servomotor actuator** (*Syn.* control-motor actuator) : → *actuator 5*

set

1. **alarm set** (in telephony) : a call maker operated upon the occurrence of a specified event. ★ appareil d'alerte → *appareil 22.* R аварийная сигнализация (в телефонии). D Alarmsatz. E dispositivo de alarma (en telefonía). I teleallarme. N alarmkiesautomaat. P telefoniczne urządzenie alarmowe. S larmnummersändare. (722)
2. **automatic (telephone) set** : a telephone set provided with a dial and intended for connection to an automatic telephone exchange. ★ poste (téléphonique) automatique → *poste 65.* R автоматический (телефонный) аппарат; телефонный аппарат с номеронабирателем. D Selbstwähltelefon. E aparato telefónico automático. I apparecchio telefonico BCA. N telefoontoestel voor geautomatiseerd verkeer. P aparat (telefoniczny) automatyczny. S automatapparat. (722)
3. **auxiliary generator set** : a set comprising one or more generators driven by an electric motor or a prime mover to provide auxiliary power supplies. ★ groupe auxiliaire → *groupe 28.* R вспомогательная генераторная установка. D Hilfsgeneratorsatz. E grupo auxiliar. I gruppo ausiliario. N boordnetgenerator. P zespół silnik-prądnica pomocniczy. S hjälpkraftaggregat. (811)
4. **back-pressure set** : a turbo-generator in which the turbine is of the back-pressure type. ★ groupe à contre-pression → *groupe 25.* R агрегат с противодавлением. D Gegendrucksatz. E grupo de contrapresión. I gruppo a contropressione. N tegendrukeenheid. P zespół przeciwprężny. S mottryckskraftaggregat. (602)
5. **base load set** : a generating set whose purpose is to run on continuous duty under operating conditions approaching full load for as long as that operation mode is economic. ★ groupe de base → *groupe 36.* R базисный генерирующий агрегат. D Grundlast-Generatorsatz. E grupo de base. I gruppo base. N grondlasteenheid. P generator podstawowy. S grundlastaggregat. (603)
6. **coin box set** (*Syn.* coin collection device) : a telephone set equipped with a device for collecting coins or tokens or updating a coded card in payment for outgoing telephone calls. ★ publiphone → *publiphone 1.* R таксофон. D Münztelefon. E teléfono de monedas; teléfono de prepago. I telefono a prepagamento. N munttelefoontoestel. P aparat (telefoniczny) samoinkasujący. S myntapparat. (722)
7. **cold start-up of a thermal generating set** : → *start-up 1*
8. **condensing set** : a turbo-generator set in which the turbine is of the condensing type. ★ groupe à condensation → *groupe 23.* R агрегат с конденсационной турбиной. D Kondensationssatz. E grupo de condensación. I gruppo a condensazione. N condensatieturbine-eenheid. P zespół kondensacyjny. S kondenskraftaggregat. (602)
9. **condensing set with reheat** : a condensing set with equipment for reheating steam after its partial expansion in the turbine. ★ groupe à condensation avec resurchauffe → *groupe 24.* R агрегат с промежуточным перегревом. D Kondensationssatz mit Zwischenüberhitzung. E grupo de condensación con recalentamiento. I gruppo a condensazione con risurriscaldamento del vapore. N condensatie-eenheid met heroververhitting. P zespół kondensacyjny z przegrzewem międzystopniowym. S kondeskraftaggregat med mellanöverhettning. (602)
10. **connector mated set** : → *connector 14*
11. **controllable set** : a generating set whose purpose is to run at load levels varying according to the needs of the network supplied as long as that operational mode is economic. ★ groupe modulable → *groupe 46.* R маневренный генерирующий агрегат. D Mittellast-Generatorsatz. E grupo modulable; grupo de media utilización. I gruppo a scaglioni di potenza. N regelbare produktie-eenheid; middenlasteenheid. P generator regulacyjny. S regleraggregat. (603)
12. **counterweight (to a suspension insulator set)** (*Syn.* suspension set weight) : → *weight 4*
13. **cross-compound set** : a set consisting of a multi-cylinder steam turbine with separate shafts which drive one main generator each. ★ groupe cross-compound → *groupe 34.* R двух-(трех)-вальный агрегат. D Cross-Compound-Satz. E grupo en composición transversal. I gruppo cross-compound. N crosscompoundgroep. P turbozespół wielokadłubowy wielowałowy. S fleraxligt turbinaggregat. (602)
14. **droop of a set** : → *droop 1*
15. **explosion proof (telephone) set** : a telephone set intended for use in an explosive atmosphere. ★ poste (téléphonique) antidéflagrant → *poste 64.* R взрывобезопасный (телефонный) аппарат. D explosionsgeschütztes Telefon. E teléfono antideflagrante. I apparecchio telefonico

antideflagrante. N explosieveilig (telefoon)toestel. P aparat (telefoniczny) iskrobezpieczny. S telefon för explosiv atmosfär. (722)

16. **fan set** : a unit made up of one or more blowers and their driving motor. ★ groupe (moteur) ventilateur → *groupe 49.* R вентиляторная установка. D Lüfteraggregat. E grupo (motor) ventilador; motoventilador. I (gruppo) motoventilatore. N ventilator groep. P zespół wentylacyjny. S fläktaggregat. (811)
17. **(four-wire) terminating set** (*Syn.* 4-wire terminating set; 4W/2W terminating set) : an assembly of apparatus used to terminate the go and return channels of a four-wire circuit, and to provide connections between these channels and a two-wire circuit. ★ termineur (à quatre fils) → *termineur 1.* R дифференциальная система. D (Vierdraht-)Abschlußgerät; 4-Draht-Abschlußgerät; 4D/2D Abschlußgerät. E terminal (de cuatro hilos); terminal (dos hilos / cuatro hilos). I apparato terminale a quattro fili; traslatore quattro fili/due fili. N vierdraadsaansluittoestel. P zakończenie torowe. S fyrtrådsavslutning. (704)
18. **frequency changer set** : a motor generator set which changes the power of an alternating current system from one frequency to another. ★ groupe convertisseur de fréquence → *groupe 32.* R агрегат преобразования частоты. D Frequenzumformer-Maschinensatz. E grupo convertidor de frecuencia. I gruppo convertitore di frequenza. N frequentieomzetaggregaat. P zespół przetwórczy częstotliwości. S frekvensomformaraggregat. (411)
19. **gas turbine set** : a thermal generating set in which the prime mover consists of a gas turbine. ★ groupe à turbine à gaz → *groupe 27.* R газотурбинный электрогенерирующий агрегат. D Gasturbinensatz. E grupo de turbina de gas. I gruppo turbina a gas. N gasturbine-eenheid. P zespół prądotwórczy gazowy. S gasturbinaggregat. (602)
20. **generating set** : a group of rotating machines transforming mechanical or thermal energy into electricity. ★ groupe générateur → *groupe 43.* R электрогенерирующий агрегат. D Generatorsatz. E grupo generador. I gruppo generatore. N generatorgroep. P zespół prądotwórczy. S generatoraggregat. (602)
21. **gross output of a set** : → *output 12*
22. **hands free (telephone) set** : a loudspeaking telephone set which may be used without a handset. ★ poste (téléphonique) mains libres → *poste 69.* R ..... D Freisprechtelefon. E teléfono manos libres. I telefono a viva voce. N luidsprekend (telefoon)toestel. P aparat (telefoniczny) głośnomówiący. S högtalartelefon utan lur. (722)
23. **hot start-up of a thermal generating set** : → *start-up 2*
24. **hydroelectric set** : a generating set consisting of a hydraulic turbine mechanically connected to an electrical generator. ★ groupe hydro-électrique → *groupe 44.* R гидроагрегат. D Wasserkraft-Maschinensatz. E grupo hidroeléctrico. I gruppo idroelettrico. N waterkrachtgroep. P zespół prądotwórczy wodny. S vattenkraftaggegrat. (602)
25. **Ilgner generator set** : a Ward-Léonard generator set which includes a flywheel to reduce the peak power input to the driving motor or motors. ★ groupe Ilgner → *groupe 45.* R агрегат маховичной системы генератор-двигатель; агрегат Илгнера. D Ilgner-Maschinensatz. E grupo Ilgner. I gruppo Ilgner. N Ilgner-aggregaat. P zespół Ilgnera. S Ilgneromformare. (411)
26. **insulator set** : an assembly of one or more insulator strings suitably connected together, complete with fixing and protective devices as required in service. ★ chaîne (isolante) équipée → *chaîne 19.* R изолирующая подвеска. D Isolatorkette. E cadena completa. I ..... N isolatorketting. P zestaw izolatorów. S isolatorkedja. (466)
27. **insulator set** : an assembly of one or more insulator strings suitably connected together, complete with fixing and protective devices as required in service. ★ chaîne équipée → *chaîne 16.* R изолирующая подвеска. D Isolatorkette. E cadena equipada. I equipaggiamento isolante completo. N complete isolatorketting. P łańcuch izolatorów z osprzętem. S isolatorkedja. (471)
28. **internal combustion set** : a thermal generating set in which the prime mover consists of an internal combustion engine. ★ groupe à combustion interne → *groupe 22.* R электроагрегат с двигателем внутреннего сгорания. D Verbrennungsmaschinensatz. E grupo de combustión interna. I gruppo a combustione interna. N groep met inwendige verbranding. P zespół prądotwórczy spalinowy. S förbränningsmotoraggregat. (602)
29. **key pad (telephone) set** (*Syn.* push-button (telephone) set) : → *set 38*
30. **key telephone set** : a telephone set forming part of an internal telephone system. ★ poste d'intercommunication → *poste 38.* R ..... D Telefonapparat mit Sprechtaste. E teléfono de intercomunicación. I apparecchio telefonico intercomunicante. N lijnkiezertoestel. P aparat telefoniczny sieci zamkniętej. S hemtelefon. (722)
31. **long line (telephone) set** : a telephone set containing an amplifier which can be adjusted during installation to compensate for an unusually long line. ★ poste (téléphonique) pour ligne longue → *poste 70.* R (телефонный) аппарат удаленного абонента. D Telefonapparat für lange Anschlußleitungen. E teléfono para línea larga. I apparecchio telefonico per linee lunghe. N ..... P aparat telefoniczny dla długich łączy. S apparat med nivåinställning. (722)
32. **loudspeaking (telephone) set** : a telephone set using a loudspeaker associated with an amplifier as a telephone receiver. ★ poste (téléphonique) à haut-parleur → *poste 62.* R громкоговорящий (телефонный) аппарат. D Lauthörtelefon. E teléfono de altavoz. I telefono con ascolto amplificato in altoparlante. N (telefoontoestel) met (ingebouwde) luidspreker. P aparat (telefoniczny) do odbioru głośnikowego. S högtalartelefon. (722)
33. **motor generator set** : a set which consists of one or more motors mechanically coupled to one or more generators. ★ groupe convertisseur → *groupe 31.* R двигатель-генератор. D Motorgenerator. E grupo convertidor. I gruppo convertitore. N motorgeneratoraggregaat. P zespół przetwórczy. S motorgenerator. (411)
34. **motor set** : a group of rotating machines transforming electricity into mechanical energy. ★ groupe moteur → *groupe 47.* R электродвигательная установка. D Motorsatz. E grupo motor. I gruppo motore. N motorgroep. P zespół silnikowy. S motoraggregat. (602)
35. **motor-generator set** : a set which consists of one or more motors mechanically coupled to one or more generators. ★ groupe convertisseur (tournant) → *groupe 33.* R мотор-генераторная установка. D Motor-Generator-Satz. E grupo convertidor (giratorio). I gruppo convertitore (rotante). N motorgenerator. P zespół silnik-prądnica. S motorgenerator. (811)
36. **net output of a set** : → *output 26*
37. **peak load set** : a generating set whose purpose is to run under discontinuous load conditions and to respond rapidly to peaks in the power demand of the network. ★ groupe de pointe → *groupe 38.* R пиковый генерирующий агрегат. D Spitzenlast-Generatorsatz. E grupo de puntas. I gruppo di punta. N pieklasteenheid. P generator szczytowy. S topplastaggregat. (603)
38. **push-button (telephone) set** (*Syn.* key pad (telephone) set) : an automatic telephone set provided with a key pad. ★ poste (téléphonique) à clavier → *poste 60.* R (телефонный) аппарат с кнопочным номеронабирателем. D Tastenwahltelefon. E teléfono de teclado. I apparecchio telefonico a tastiera. N druktoets(telefoon)-toestel. P aparat (telefoniczny) z klawiaturą. S knappsatsapparat. (722)
39. **regulated (telephone) set** : a telephone set which automatically adapts some of its characteristics to the feeding current for instance by means of a resistance the value of which is controlled by the feeding current. ★ poste (téléphonique) autorégulé → *poste 66.* R (телефонный) аппарат с регулируемыми параметрами. D geregelter Telefonapparat. E teléfono autoregulado. I apparecchio telefonico con regolazione automatica. N ..... P aparat (telefoniczny) z automatyczną regulacją skuteczności. S nivåreglerande apparat. (722)
40. **reversible hydroelectric set** : a rotating set capable of assuming the generating or pumping function. ★ groupe réversible → *groupe 62.* R обратимый гидроагрегат. D reversibler Maschinensatz. E grupo reversible. I gruppo reversibile. N omkeerbare waterkrachtgroep. P zespól prądotwórczy wodny odwracalny. S reversibelt vattenkraftaggregat. (602)
41. **rotary dial (telephone) set** : an automatic telephone set provided with a rotary dial. ★ poste (téléphonique) à cadran → *poste 59.* R (телефонный) аппарат с дисковым

номеронабирателем. D Nummernschaltertelefon. E teléfono de disco. I apparecchio telefonico a disco. N kiesschijf(telefoon)toestel. P aparat (telefoniczny) z tarczą. S fingerskivsapparat. (722)

42. **set** (in television) : an artificial environment constructed in a studio to provide the scenery where the actors will be televised while performing. ★ plateau → *plateau 3.* R сценическая площадка (в телевидении). (723)
43. **set of circuits** (*Syn.* circuit group) : → *group 3*
44. **set of circuits** : a group of circuits established between two exchanges, any circuit of which may be chosen, without preference, for the setting up of a connection. ★ faisceau de circuits → *faisceau 25.* R пучок каналов. D Leitungsbündel. E haz de circuitos. I fascio di circuiti. N verbindingsbundel. P wiązka łączy. S ledningsgrupp. (721)
45. **(set of) components of a polyphase (or *m*-phase) linear quantity** : → *component 50*
46. **set of contacts** : a pair of individual fixed and moving contacts or combination of pairs operating substantially simultaneously. ★ jeu de contacts → *jeu 2.* R контактная группа. D Kontaktsatz. E juego de contactos. I coppie di contatti. N stel contacten. P układ styków. S kontaktsats. (421)
47. **set of voice-frequency multiplex (telegraph) circuits** : the assembly of voice-frequency multiplex telegraph circuits simultaneously accommodated in a telephone type channel. ★ faisceau de télégraphie harmonique → *faisceau 35.* R пучок каналов тонального телеграфирования. D Gruppe von Wechselstromtelegrafieleitungen. E haz de telegrafía armónica. I fascio di circuiti in telegrafia armonica. N ..... P wiązka kanałów telegrafii rozmównopasmowej. S tontelegrafförbindelse. (721)
48. **set transformer** (*Syn.* unit generator transformer) : → *transformer 77*
49. **set value** (*Syn.* selected value) : → *value 60*
50. **signalling link set** (*Syn.* signalling module) : → *module 2*
51. **suspension set** (*Syn.* suspension assembly (USA)) : an insulator set complete with all fittings and accessories to support a conductor or a bundle of conductors at its lower end. ★ chaîne de suspension → *chaîne 12.* R поддерживающая изолирующая подвеска. D Isolatortragkette. E cadena de suspensión. I catena di sospensione. N hangketting. P zestaw izolotarów przelotowy. S hängkedja. (466)
52. **suspension set weight** : → *weight 4*
53. **tandem-compound set** : a set consisting of a multi-cylinder steam turbine and a generator in one line of shafting. ★ groupe tandem-compound → *groupe 65.* R одновальный агрегат. D Tandem-Compound-Satz. E grupo en conposición tandem. I gruppo tandem-compound. N tandemcompoundgroep. P turbozespół wielokadłubowy jednowałowy. S enaxligt turbinaggregat. (602)
54. **telephone answering and recording set** : a telephone answering set associated with a message recording device. *Note.* — On some telephone answering and recording sets, messages that have been recorded can be transmitted to any calling party. ★ répondeur-enregistreur → *répondeur-enregistreur 1.* R телефонный автоответчик и самописец. D Anrufbeantworter mit Aufnahmegerät. E contestador registrador. I segreteria telefonica automatica. N automatisch antwoord - en inspreekapparaat. P automat zgłoszeniowo-rejestrujący. S talregistrerande telefonsvarare. (722)
55. **telephone answering set** : a device associated with a telephone set to answer a successful call attempt automatically by giving a recorded announcement. ★ répondeur (téléphonique) → *répondeur 1.* R телефонный автоответчик. D Anrufbeantworter. E contestador (telefónico). I risponditore automatico. N automatisch antwoordapparaat. P automat zgłoszeniowy. S telefonsvarare. (722)
56. **telephone set** (*Syn.* telephone instrument) : an assembly of apparatus for telephony including at least a telephone transmitter, a telephone receiver and the wiring and components immediately associated with these transducers. *Note.* — A telephone set usually includes other components such as a switchhook ; it may also include a telephone bell and a dial. ★ poste téléphonique → *poste 58.* R телефонный аппарат. D Telefon. E aparato telefónico; teléfono. I apparecchio telefonico; telefono. N telefoontoestel. P aparat telefoniczny. S telefon(apparat). (722)
57. **tension set** (*Syn.* dead-end assembly (USA)) : an insulator set complete with all fittings and accessories to secure a conductor or a bundle of conductors in tension. ★ chaîne d'ancrage → *chaîne 2.* R натяжная изолирующая подвеска. D Isolatorabspannkette. E cadena de amarre. I catena di amarro. N afspanketting. P zestaw izolatorów odciągowy. S spännkedja. (466)
58. **thermal generating set** : a generating set consisting of a thermal prime mover mechanically connected to one or more generators of electricity. ★ groupe thermo-électrique → *groupe 69.* R электрогенерирующий агрегат ТЭС. D thermischer Maschinensatz. E grupo termoeléctrico. I gruppo termoelettrico. N thermische opwekgroep. P zespół prądotwórczy cieplny. S värmekraftaggregat. (602)
59. **to set** (in switching) : to change the state of a traffic carrying device or logic unit from idle to active or busied out or to allocate a specific value to a variable. ★ positionner → *positionner 1.* R установить (в коммутации). D setzen. E posicionar (en conmutación). I posizionare (un organo di commutazione). N (in)stellen; opzetten. P zajęcie. S koppla. (714)
60. **turbo-generator set** : a thermal generating set in which the prime mover consists of a steam turbine. *Note.* — In the field of electric power production, the virtually exclusive use of alternating-current generators explains the more restricted sense of the term used in French. ★ groupe turbo-alternateur → *groupe 70.* R паротурбинный агрегат. D Dampfturbosatz. E grupo turboalternador. I gruppo turboalternatore. N turbogenerator. P zespół cieplny. S turbogeneratoraggregat. (602)
61. **viewphone set** (*Syn.* videophone) : a set used for viewphone consisting of a television camera, a visual display unit and a telephone set. ★ visiophone → *visiophone 1.* R видеотелефонный аппарат. D Bildtelefon. E videoteléfono. I videotelefono. N beeldtelefoontoestel. P wizjofon; aparat wizjotelefoniczny. S bildtelefon. (722)
62. **Ward-Léonard generator set** : a set consisting of one or more Ward-Léonard generators and one or more driving motors. ★ groupe Ward-Léonard → *groupe 71.* R агрегат системы генератор-двигатель; агрегат Вард-Леонарда. D Ward-Léonard-Maschinensatz. E grupo Ward-Léonard. I gruppo Ward-Léonard. N Ward-Léonard-aggregaat. P zespół Warda-Leonarda. S Ward-Leonardomformare. (411)
63. **4W/2W terminating set** (*Syn.* (four-wire) terminating set) : → *set 17*
64. **4-wire terminating set** (*Syn.* (four-wire) terminating set) : → *set 17*

set-point

1. **control with fixed set point** : → *control 85*
2. **set point command** : → *command 21*
3. **set-point** : a signal representing the reference variable. ★ signal de consigne → *signal 101.* R уставка. D eingestellter Wert der Führungsgröße. E señal de consigna; punto de ajuste. I segnale di riferimento. N ingestelde waarde. P sygnał zadany. S referenssignal. (351)

setting

1. **cold setting** (*Syn.* cold curing) : → *curing 1*
2. **current setting** (of an over-current release) : the value of the operating current for which the release is adjusted and in accordance with which its operating conditions are defined. ★ courant de réglage → *courant 92.* R ток уставки (максимального расцепителя тока). D Strom-Einstellwert (eines Überstromauslösers). E corriente (intensidad) de regulación (de un disparador de sobreintensidad). I corrente di taratura (di uno sganciatore di massima corrente). N ingestelde waarde (van een overstroomlosser). P prąd nastawczy (wyzwalacza nadprądowego). S strömінställning för överströmsutlösare. (441)
3. **current setting range** : → *range 13*
4. **path setting** : the activation of crosspoints, devices and transmission links chosen for a specific connection during path allocation. ★ établissement d'itinéraire → *établissement 7.* R проключение тракта. D Wegbelegen. E establecimiento de itinerario. I attivazione della via prescelta. N pad opzetten; weg opzetten. P zestawianie drogi połączeniowej. S väguppkoppling. (714)
5. **setting range of a specified time** : → *range 63*
6. **setting range of the characteristic quantity** : → *range 64*
7. **setting ratio of a specified time** : → *ratio 79*

8. **setting ratio of the characteristic quantity** : → *ratio 80*
9. **setting value of a specified time** : → *value 62*
10. **setting value of the characteristic quantity** : → *value 63*
11. **tolerance of setting** : → *tolerance 15*

setting-up

1. **setting-up time** : → *time 164*

settling time

1. **settling time** : time interval between the step change of an input signal and the instant when the resulting variation of the output signal does not deviate more than a specified tolerance, for instance 5%, from its final steady-state value. ★ durée de rétablissement → *durée 65.* R время регулирования. D Ausregelzeit. E tiempo de corrección; tiempo de restablecimiento. I tempo di assestamento. N hersteltijd. P czas regulacji. S insvängningstid. (351)
2. **settling time** (*Syn.* rise time (of a pulse)) : → *rise time 6*

set-up

1. **call set-up time** : → *time 15*
2. **exchange call set-up delay** : → *delay 20*
3. **forward set-up** : path setting in which the successive seizures of circuits, links and devices required to extend a connection to the called party occur in the same direction as that from calling to called party. ★ établissement en avant → *établissement 8.* R прямое проключение. D Vorwaerts-Verbindungsaufbau. E establecimiento hacia adelante. I attivazione in avanti. N opbouw in voorwaartse richting. P zestawianie w przód. S uppkoppling i framriktning. (714)

sewn

1. **sewn bias-cut fabric** : → *fabric 6*

sextet

1. **sextet (byte)** : → *byte 7*

SFERT

1. **SFERT** (*Syn.* european master reference for telephone transmission) : → *reference 9*

SFX

1. **SFX** (*Syn.* special effects) : → *effect 75*

shackle

1. **shackle insulator** : → *insulator 29*

shade

1. **angle of shade** : → *angle 8*
2. **minimum angle of shade** : → *angle 39*
3. **shade** : screen which may be made of opaque or diffusing material and which is designed to prevent a lamp from being directly visible. ★ abat-jour → *abat-jour 1.* R ..... D Leuchtenschirm. E pantalla. I paralume. N lampekap. P abażur. S lampskärm. (845)

shaded

1. **shaded pole motor** : → *motor 88*
2. **shaded transducer** : → *transducer 13*

shading

1. **shading** : a gradient in output level not consistent with the input to the tube. ★ tache → *tache 5.* R затемнение. D Bildabschattung. E mancha. I macchia. N schaduwvorming. P zacienienie obrazu. S olinjär överföring. (531)
2. **shading** : an unwanted variation in brightness or colour over the area of the reproduced television picture. ★ non-uniformité → *non-uniformité 1.* R затенение. (723)
3. **shading** : device designed to obstruct, reduce or diffuse solar radiation. ★ brise-soleil → *brise-soleil 1.* R экранирующее устройство. D Sonnenschutzeinrichtung. E persiana. I schermo solare. N zonwering. P przesłona. S solavskärmning. (845)

shadow

1. **neck shadow** : a shadow on the screen, caused by interception of the beam by the neck of the tube. ★ ombre de col → *ombre 3.* R тень от горловины. D Halsabschattung. E sombra de cuello. I ombra del collo. N halsschaduw. P cień szyjki. S rörhalsskuggning. (531)
2. **shadow column instrument** : → *instrument 29*
3. **shadow grid** : → *grid 26*
4. **shadow region** : → *region 23*
5. **shadow zone** : → *zone 11*

shadow-mask

1. **shadow-mask tube** : → *tube 75*

shaft

1. **dumb-bell shaft** (UK) (*Syn.* spacer shaft (USA)) : a separate shaft mechanically coupling the shafts of two machines. ★ arbre de transmission → *arbre 8.* R передаточный вал. D Verbindungswelle. E árbol de transmisión. I albero di trasmissione. N tussenas; verbindingsas. P wał transmisyjny. S mellanaxel. (411)
2. **hollow shaft motor drive** : → *drive 13*
3. **jack shaft** : a separate shaft carried in its own bearing and mechanically coupled to the shaft of a machine. ★ arbre intermédiaire → *arbre 9.* R промежуточный вал. D Zwischenwelle. E árbol intermediario. I albero intermedio. N hulpas; tussenas. P wał pośredni. S lagrad axelförlängning. (411)
4. **journal (of a shaft)** : → *journal 2*
5. **quill shaft** : a hollow shaft in which can be mounted and to which can be connected a solid shaft for increased flexibility. ★ arbre de torsion creux → *arbre 7.* R полый вал. D elastische Hohlwelle. E árbol de torsión hueco. I albero elastico cavo. N holle as. P wał rurowy. S hålaxel. (411)
6. **shaft** : that part of a rotor which carries other rotating members and which is supported by bearings in which it can rotate. ★ arbre → *arbre 3.* R вал. D Welle. E árbol; eje. I albero. N as. P wał. S axel. (411)
7. **shaft end** : → *end 17*
8. **shaft extension** : that part of a shaft which extends beyond a bearing and away from the rotor. ★ bout d'arbre → *bout 1.* R конец вала. D Wellenzapfen. E extremo de árbol; extremo de eje. I estremità d'albero. N aseind. P czop wału. S axeltapp. (411)
9. **spacer shaft** (*Syn.* dumb-bell shaft) : → *shaft 1*
10. **stub shaft** : a separate shaft not carried in its own bearings and mechanically coupled to the shaft of a machine. ★ faux arbre → *arbre 15.* R фальш-вал. D Flanschwelle. E falso árbol. I albero sussidiario (prolunga). N verlengas. P króciec wałowy. S axelförlängning. (411)
11. **surge shaft** (*Syn.* surge tank) : → *tank 5*
12. **torque shaft** : a thin shaft used for increasing the flexibility between two coupled shafts. ★ arbre de torsion → *arbre 6.* R торсионный вал. D Verdrehwelle. E árbol de torsión. I albero elastico (albero di torsione). N torsieas. P wał skrętny. S torsionsaxel. (411)

shaft-end

1. **shaft-end mounted exciter** : → *exciter 8*

shafting

1. **line of shafting** : → *line 79*

shaft-voltage

1. **shaft-voltage test** : → *test 76*

shaker

1. **shaker conveyor** : → *conveyor 5*
2. **shaker hearth furnace** : → *furnace 51*

shannon

1. **shannon** (Sh) : a unit of logarithmic measure of information equals 3 shannons, the decision content of a set of two mutually exclusive events, expressed as a logarithm to base two. *Example :* The decision content of a character set of eight characters equals 3 shannons, the logarithm to base two of 8 being 3. ★ shannon → *shannon 1.* R двоичная единица количества информации. D Shannon. E shannon. I shannon. N shannon. P szanon. S shannon. (702)

shape

1. **groove shape** : → *groove 13*
2. **pulse shape discriminator** : → *discriminator 11*
3. **pulse shape selector** : → *selector 10*
4. **shape factor** : → *factor 164*

shaped

1. **shaped conductor** : → *conductor 61*

shaped-beam

1. **shaped-beam antenna** : → *antenna 102*

shaping

1. **pole face shaping** : that portion of the pole shoe which is shaped other than by being bevelled, so as to increase the radial length of the air-gap. ★ biseau profilé de face polaire → *biseau 2.* R профилированные поверхности полюса. D Polflächenkrümmung. E bisel perfilado de cara polar. I sagomatura dell'espansione polare. N poolvlakafronding. P profilowana powierzchnia bieguna. S profilering av polplatta. (411)
2. **pulse shaping** : the process of making the waveform of pulses approach more nearly a desired shape. ★ mise en forme (d'impulsions) → *mise 5.* R формирование импульса. D Impulsformung. E conformado de impulsos; puesta en forma (de impulsos). I sagomatura di impulsi. N pulsvorming. P kształtowanie impulsów. S pulsformning. (702)

shared

1. **accounts for shared terminal** : → *account 1*
2. **shared terminal** : → *terminal 32*

shared-service

1. **shared-service line** : → *line 141*

sharing

1. **function sharing** (*Syn.* function divided control) : → *control 110*
2. **load sharing** (in common channel signalling) : an allocation of signalling traffic to the signalling links of a module in such a way that every signalling link carries some signalling traffic. ★ partage de la charge → *partage 4.* R разделение нагрузки (в сигнализации по общему каналу). D Lastteilung. E reparto de la carga (en señalización por canal común). I divisione di traffico. N belastingsverdeling. P podział obciążenia. S lastdelning. (714)
3. **load sharing** (*Syn.* traffic load divided control) : → *control 195*
4. **time sharing** (*Syn.* time divided control) : → *control 192*
5. **time sharing** : a mode of operation of a data processing system that provides for the interleaving in time of two or more processes in one processor. ★ partage de temps → *partage 5.* R разделение по времени (в вычислительной технике). D Zeitvielfachbetrieb; Zeitmultiplexen. E compartición de tiempo. I divisione di tempo. N tijdscharing. P udział czasowy. S tidsdelning. (714)

sharp-cut-off

1. **sharp-cut-off tube** : → *tube 76*

sharpness

1. **sharpness** (of a radiograph) : the apparent blurring of the border between two adjacent areas of a radiograph having different optical densities. *Note.* — It is attributable to two aspects of sharpness : *1)* The quantitative measure of the linear rate of change of density across the border. 2) The subjective estimate of sharpness. ★ netteté → *netteté 4.* R резкость (радиографии). D Schärfe (eines Röntgenfilmes). E nitidez (de una película radiografica). I nitidezza (di una radiografia). N scherpte (van een radiogram). P ostrość (radiogramu). S bildskärpa. (881)

shear

1. **shear wave** (*Syn.* rotational wave) : → *wave 50*

sheath

1. **sheath** (*Syn.* jacket (North America)) : a uniform and continuous tubular covering of metallic or non-metallic material, generally extruded. *Note.* — The term sheath is only used for metallic coverings in North America, whereas the term jacket is used for non metallic coverings. ★ gaine → *gaine 14.* R оболочка. D Mantel. E cubierta. I guaina. N mantel. P powłoka. S mantel. (461)

sheathed

1. **sheathed heating element** : → *heating element 6*

shed

1. **shed of an insulator** : an insulating part, projecting from the insulator core, intended to increase the creepage distance. The shed can be with or whithout ribs. ★ ailette d'un isolateur → *ailette 1.* R ребро изолятора. D Isolatorschirm. E aleta de un aislador. I aletta di un isolatore. N isolatorscherm. P klosz izolatora. S isolatorskärm. (471)

shedding

1. **load shedding** : the process of deliberately disconnecting preselected loads from a power system in response to an abnormal condition in order to maintain the integrity of the remainder of the system. ★ délestage (de consommation) → *délestage 1.* R разгрузка энергосистемы. D Lastabwurf. E separación (de cargas). I distacco (di carico). N belastingsafschakeling. P awaryjne wyłączanie systemu. S balastningsfrånkoppling. (603)
2. **oxide shedding** : the deterioration of a tape by disintegration of its magnetic coating. ★ perte d'oxyde → *perte 32.* R осыпание порошка. D Schichtfehler; Schichtablösung; Schichtabrieb. E pérdida de óxido. I perdita di ossido. N verpulveren. P łuszczenie (taśmy). S ..... (806)

sheet

1. **sheet** (*Syn.* sheeting) : a thin product in which the thickness is small in proportion to length and width. *Note.* — More specifically, the term *sheet* is used to designate individual pieces with length and width of the same order of magnitude, while *sheeting* is used for material in long continuous lengths, generally supplied in roll form. ★ feuille → *feuille 2.* R лист; листовой материал. D Blatt; Tafel; Bahn. E hoja; placa; folio; lámina. I foglio. N dunne laag. P arkusz. S ark; folie; duk. (212)

sheeting

1. **sheeting** (*Syn.* sheet) : → *sheet 1*

shelf

1. **shelf life** : → *life 11*

shell

1. **arc furnace shell** : a steel constructed vessel usually with refractory lined bottom and side walls into which the charge is placed. ★ cuve de four à arc → *cuve 2.* R кожух дуговой печи. D Lichtbogenofen-Gefäss. E cuba de horno de arco. I involucro di forno ad arco. N boogovenkuip. P obudowa (pieca łukowego). S ugnsfat. (841)
2. **bearing shell** : that element of the journal bearing assembly which supports the bearing lining. ★ coquille de coussinet → *coquille 3.* R остов вкладыша подшипника. D Lagerschale. E concha de cojinete. I guscio del cuscinetto. N lagerschaal. P korpus panwi. S lagerbussning. (411)
3. **shell** (of a socket) : an integral part of a socket used as a locating feature to orientate certain types of plug-in devices in relation to the contacts. It may also be used to provide means for clamping the plug-in device. ★ boîtier → *boîtier 2.* R отверстие под центрирующий выступ (ламповой панели). D Gehäuse (einer Fassung). E caja (de un zócalo). I corpo (di uno zoccolo). N huis. P obudowa (gniazda). S hållarkrage. (581)
4. **shell** : any direct or indirect metal copy of a lacquer disk formed by electroplating. ★ pièce galvanique → *pièce 8.* R оригинал (металлический). D Galvano. E copia galvánica. I copia galvanica. N ..... P kopia metalowa. S ..... (806)
5. **shell base** (*Syn.* shell cap) : → *cap 11*
6. **shell cap** : → *cap 11*
7. **shell-type reactor** : → *reactor 40*
8. **shell-type transformer** : → *transformer 60*

shield

1. **bearing shield** : an end shield in which a bearing is fitted and having spaces to allow the passage of cooling air. ★ palier flasque → *palier 31.* R подшипниковый щит. D Lagerschild. E palier soporte. I scudo supporto. N lagerschild. P osłona łożyska przewiewna. S lagersköld. (811)
2. **biological shield** : a shield whose prime purpose is to reduce ionizing radiation to biologically permissible levels. ★ bouclier biologique → *bouclier 2.* D biologischer Schild; biologische Abschirmung. E blindaje biológico. I schermo biologico. N biologisch scherm. P osłona biologiczna. S biologisk (strål)skärm. (026)

3. **centre shield** : a metal screen located centrally in a socket to provide electrical screening between opposite contacts. ★ écran central → *écran 14.* R экран центральный (ламповой панели). D Mittelabschirmung (einer Fassung). E pantalla central (de un zócalo). I schermatura; schermo centrale (di un supporto). N centrale afscherming. P ekran wewnętrzny (gniazda). S centrumskärm. (581)
4. **connector shield** : a cable outlet specifically designed to terminate the cable braid and provide shielding to electromagnetic interference. ★ écran de connecteur → *écran 15.* R экран соединителя. D Steckverbinder-Abschirmung. E pantalla de un conector. I schermo del connettore. N connectorafscherming. P ekran łącznika. S donskärm. (581)
5. **cooling and protection shield for a coil** : an air or water-cooled shield arranged around a core type inductor to protect it. ★ écran de refroidissement et de protection de l'inducteur → *écran 18.* R охлаждаемый экран для защиты индуктора. D Kühl-und Schutzschirm einer Induktorspule. E pantalla de refrigeración y de protección del inductor. I schermo di raffreddamento e di protezione dell'induttore. N koelschild voor een inductor. P ekran ochronny wzbudnika. S kylfoder. (841)
6. **end shield** : a solid or skeletal structure attached to a stator frame and which serves to protect the windings and into which a bearing may be fitted. ★ flasque → *flasque 1.* R торцевой щит. D Gehäuseschild (Lagerschild). E platillo. I scudo. N (lager)schild. P tarcza łożyskowa. S lagersköld. (411,811)
7. **heat shield** : a metal structure to reduce the heat radiation losses from a hot cathode or to protect other elements of the tube against heat radiation. ★ écran thermique → *écran 36.* R тепловой экран. D Wärmeabschirmung. E pantalla térmica. I schermo termico. N warmtestralingsscherm. P ekran cieplny. S värmesköld. (531)
8. **heat shield** : a screen constructed of either ceramic or metal which may have natural or forced cooling, positioned between the heat source or the charge material and the operating areas to reduce radiation of heat. ★ écran thermique → *écran 37.* R тепловой экран. D Wärmeschild. E pantalla térmica. I schermo termico. N hitteschild. P ekran grzejny. S värmesköld. (841)
9. **insulated shield cable system** : → *system 91*
10. **lower shield** (*Syn.* skirt) : → *skirt 1*
11. **shield** : a body of material intended to reduce the intensity of radiation entering a region. ★ bouclier → *bouclier 1.* D Schild; Abschirmung. E blindaje. I schermo. N scherm. P osłona. S (strål)skärm. (026)
12. **shield** : a mechanical barrier or enclosure provided for protection. ★ blindage → *blindage 2.* R защита. D Schild. E blindaje. I blindatura. N mechanische afscherming. P osłona. S kapsling. (151)
13. **shield** (of a cable) : a surrounding earthed metallic layer to confine the electric field within the cable and/or to protect the cable from external electrical influence. *Note.* — Metallic sheaths, armours and earthed concentric conductors may also serve as shields. ★ écran de protection → *écran 17.* R общий экран (кабеля). D Schirm (eines Kabels). E pantalla de proteccio'n (de un cable). I schermo (di protezione). N aardingsscherm (van een leiding). P ekran kabla (ochronny). S skärm. (461)
14. **shield bonding lead** : → *lead 14*
15. **shield grid** : → *grid 27*
16. **shield latch** : → *latch 2*
17. **shield standing voltage** : → *voltage 190*
18. **shield voltage limiter** : → *limiter 5*
19. **shield wire** (*Syn.* earth wire) : → *wire 6*
20. **special bonding of shields** : → *bonding 5*
21. **spill shield** (*Syn.* louvre) : → *louvre 1*
22. **thermal shield** : a shield intended to reduce heat generation by ionizing radiation in, and heat transfer to exterior regions. ★ bouclier thermique → *bouclier 3.* D thermischer Schild; thermische Abschirmung. E blindaje térmico. I schermo termico. N thermisch scherm. P osłona cieplna. S termisk (strål)skärm. (026)

shielded

1. **collectively shielded cable** : → *cable 23*
2. **shielded connector** : → *connector 46*
3. **shielded enclosure** : → *enclosure 12*

shielded-loop

1. **shielded-loop antenna** : → *antenna 103*

shielding

1. **cable shielding clamp** (*Syn.* cable screen clamp) : → *clamp 6*
2. **corona shielding** : a means adopted to reduce potential gradients along the surface of coils. ★ dispositif antieffluves → *dispositif 12.* R противокоронная защита. D Potentialsteuerung (Glimmschutz). E dispositivo antiefluvios. I dispositivo anti-effluvi. N ontladingsscherm. P ochrona przed wyładowaniami ślizgowymi. S glimskydd. (411)
3. **minimum shielding angle** (*Syn.* minimum angle of shade) : → *angle 39*
4. **shielding angle** (*Syn.* angle of shade) : → *angle 8*
5. **shielding angle** : → *angle 52*
6. **shielding conductor** : → *conductor 62*

shift

1. **adaptive colorimetric shift** : mathematical adjustment to correct for a change in chromatic adaptation. ★ distorsion colorimétrique pour l'adaptation → *distorsion 20.* R адаптационный колориметрический сдвиг. D Farbumstimmungs-adaptation. E desplazamiento colorimétrico por variación de adaptación. I variazione colorimetrica da adattamento. N kleurpuntcorrectie vanwege chromatische adaptatie. P zniekształcenie kolorymetryczne adaptacyjne. S adaptationsbetingad kolorimetrisk ändring. (845)
2. **adaptive (perceived) colour shift** : change in the perceived colour of an object caused solely by change of chromatic adaptation. ★ distorsion de couleur (perçue) pour l'adaptation → *distorsion 27.* R адаптационный сдвиг (воспринимаемого) цвета. D Farbwandlung. E cambio de color (percibido) por variación de la adaptación. I variazione del colore da adattamento. N kleurverschuiving door chromatische adaptatie. P zniekształcenie barwowe adaptacyjne. S adaptationsbetingad färgändring. (845)
3. **amplitude shift keying** : → *keying 1*
4. **amplitude shift modulation** (*Syn.* amplitude shift keying) : → *keying 1*
5. **black level shift** (*Syn.* clamp fault) : a video or picture signal fault due to an incorrectly transmitted or reconstituted DC component. ★ défaut d'alignement (du niveau du noir) → *défaut 13.* R сдвиг черного уровня. (723)
6. **carrier frequency shift** : the change in the average carrier frequency due to the presence of modulation. ★ décalage de la fréquence de l'onde porteuse → *décalage 4.* R смещение частоты несущей. D Trägerfrequenzverschiebung. E desplazamiento de la frecuencia de onda portadora. I cambiamento della frequenza portante. N frequentieverschuiving van de draaggolf. P przesunięcie częstotliwości nośnej. S bärvågsförskjutning. (303)
7. **case shift** : the change over of the translating mechanism of a telegraph receiving apparatus from one case of character to the other case of character. ★ inversion → *inversion 3.* R перевод регистра. D Umschaltung. E inversión. I cambio caratteri. N kastverschuiving. P zmiana pocztu. S lägesskift. (721)
8. **code shift** (*Syn.* shift out) : a function control for changing a code by substituting the normal set of graphic characters with another set of agreed characters to provide a new code or a code extension. ★ hors code → *code 40.* R выход из кода. D Dauerumschaltung. E fuera de código. I cambio codice. N ..... P wyjście z kodu. S utskift. (721)
9. **Compton shift** : the increase in wavelength corresponding to the decrease in energy between incident and emergent photon in the Compton effect. ★ déplacement Compton → *déplacement 3.* R комптоновское смещение. D Compton-Verschiebung. E desplazamiento de Compton. I spostamento Compton. N Comptonverschuiving. P przesunięcie Comptona. S Compton-förskjutning. (881)
10. **differential phase shift keying** : → *keying 2*
11. **figures shift** : a case shift resulting in the translation of signals as secondary characters, predominantly figure characters, or functions of figures case. ★ inversion-chiffres → *inversion-chiffres 1.* R перевод на цифры. D Umschaltung in Ziffernstellung. E inversión-cifras.

I passaggio a cifre. N overgang naar grafische modus. P zmiana cyfr. S sifferskift. (721)

12. **frequency shift** : an intentional frequency change produced by modulation, or an unintentional change due to a natural phenomenon. ★ déplacement de fréquence → *déplacement 5.* R частотный сдвиг. D Frequenzverschiebung. E desplazamiento de frecuencia. I spostamento di frequenza; deviazione di frequenza. N frequentieverschuiving. P przesunięcie częstotliwości. S frekvensskift. (702)
13. **frequency shift** (in keying) : in angle modulation by a discretely timed signal, the difference between the frequencies corresponding to two signal elements of the modulated signal, assuming steady state conditions. ★ déplacement de fréquence → *déplacement 6.* R сдвиг частоты (при манипуляции). D Frequenzhub (bei der Umtastung). E desplazamiento de frecuencia (en modulación). I spostamento di frequenza (in modulazione). N frequentieverschuiving (bij modulatie). P przesunięcie częstotliwości (w modulacji). S frekvensskift. (702)
14. **frequency shift keying** : → *keying 3*
15. **frequency shift keying** (*Syn.* frequency shift telegraphy) : → *telegraphy 7*
16. **frequency shift modulation** (*Syn.* frequency shift keying) : → *keying 3*
17. **frequency shift signalling** (*Syn.* frequency shift keying) : → *keying 3*
18. **frequency shift telegraphy** : → *telegraphy 7*
19. **illuminant colorimetric shift** : change in chromaticity and luminance factor of an object-colour stimulus caused by a change in illuminant. ★ distorsion colorimétrique pour l'illuminant → *distorsion 21.* R колориметрический сдвиг излучения. D farbmetrische Verzerrung. E desplazamiento colorimétrico por variación del iluminante. I variazione colorimetrica per l'illuminante. N kleurpuntverschuiving door de lichtsoort. P zniekształcenie kolorymetryczne iluminantu. S ljusbetingad kolorimetrisk ändring. (845)
20. **illuminant (perceived) colour shift** : change in the perceived colour of an object caused solely by change of illuminant in the absence of any change in the observer's state of chromatic adaptation. ★ distorsion de couleur (perçue) pour l'illuminant → *distorsion 28.* R сдвиг цвета (воспринимаемого) излучения. D Farbverzerrung. E cambio de color (percibido) por variación del iluminante. I variazione del colore per l'illuminante. N kleurverschuiving. P zniekształcenie barwove iluminantu. S ljusbetingad färgändring. (845)
21. **letters shift** : a case shift resulting in a translation of signals as primary characters, predominantly letter characters, or functions of letters case. ★ inversion-lettres → *inversion-lettres 1.* R перевод на буквы. D Umschaltung in Buchstabenstellung. E inversión-letras. I passaggio a caratteri letterali. N letterssignaal. P zmiana liter. S bokstavsskift. (721)
22. **minimum (phase frequency) shift keying** : → *keying 5*
23. **multiple phase shift keying** : → *keying 6*
24. **n-condition frequency shift keying** : → *keying 7*
25. **negative scanning shift** : relative shift of the facsimile scanning device in relation to the document when the surface of the latter is scanned along the lines from right to left where the scanning lines proceed from the top to the bottom. *Note.* — In a drum apparatus helicoidal scanning towards the right is a negative scanning shift. ★ translation d'exploration négative → *translation 4.* R отрицательное смещение развертки. D negative Abtasteinrichtung. E traslación de exploración negativa. I salto di scansionamento negativo. N ..... P przesunięcie ujemne. S negativ avsökning. (721)
26. **phase shift** : in angle modulation by a discretely timed signal the difference between the phases of two signal elements of the modulated signal, assuming steady state conditions. ★ déplacement de phase → *déplacement 7.* R фазовый сдвиг. D Phasenhub. E desplazamiento de fase. I spostamento di fase. N faseverschuiving. P przesunięcie fazy (w modulacji kątowej). S fasskift. (702)
27. **phase shift** : the alteration of the phase relationship between two a.c. voltages. Generally this is used to control the period of conduction in each half cycle of a thyristor or an ignitron. ★ retard à l'amorçage → *retard 20.* R фазовая регулировка. D Phasenanschnitt. E desplazamiento de fase. I spostamento di fase. N faseverschuiving. P przesunięcie fazowe. S fasförskjutning. (851)
28. **phase shift keying** : → *keying 8*
29. **phase shift modulation** (*Syn.* phase shift keying) : → *keying 8*
30. **phase shift signalling** (*Syn.* phase shift keying) : → *keying 8*
31. **positive scanning shift** : relative shift of the facsimile scanning device in relation to the document when the surface of the latter is scanned along the lines from left to right where the scanning lines proceed from the top to the bottom. *Note.* — In a drum apparatus helicoidal scanning towards the left is a positive scanning shift. ★ translation d'exploration positive → *translation 5.* R положительное смещение развертки. D positive Abtasteinrichtung. E traslación de exploración positiva. I salto di scansionamento positivo. N ..... P przesunięcie dodatnie. S positiv avsökning. (721)
32. **quadrature phase shift keying** : → *keying 9*
33. **resultant colorimetric shift** : resultant (vector) of illuminant colorimetric shift and adaptive colorimetric shift. ★ distorsion colorimétrique totale → *distorsion 22.* R результирующий колориметрический сдвиг. D farbmetrische Verschiebung. E desplazamiento colorimétrico total. I variazione colorimetrica totale. N resulterende kleurpuntverschuiving. P zniekształcenie kolorymetryczne całkowite. S total kolorimetrisk ändring. (845)
34. **resultant (perceived) colour shift** : combined illuminant perceived colour shift and adaptive perceived colour shift. ★ distorsion totale de couleur (perçue) → *distorsion 78.* R результирующий сдвиг (воспринимаемого) цвета. D Farbverschiebung. E cambio de color (percibido) total. I variazione totale del colore. N resulterende kleurverschuiving. P zniekształcenie barwowe całkowite. S resulterande färgändring. (845)
35. **shift in** (*Syn.* code reversion) : → *reversion 1*
36. **shift out** (*Syn.* code shift) : → *shift 8*
37. **shift register** : → *register 7*
38. **spectral shift control** : → *control 174*
39. **spectral shift reactor** : → *reactor 42*

shifter

1. **wavelength shifter** : a photofluorescent compound used with a scintillating material to absorb photons and emit photons of a longer wavelength, with the purpose of causing more efficient use of the photons by a photomultiplier tube or photocell. ★ convertisseur de longueur d'onde → *convertisseur 23.* R сместитель спектра. D Sekundärphosphor. E convertidor de longitud de onda. I convertitore di lunghezza d'onda. N golflengteverschuiver. P przetwornik długości fali. S våglängdsskiftare. (391)

shift-on

1. **letters shift-on space** : → *space 12*

shim

1. **shim element** (*Syn.* shim member) : → *shim 2*
2. **shim member** (*Syn.* shim element) : a control member used to compensate for long-term reactivity and flux density distribution effects in a reactor. ★ élément de compensation → *élément 25.* D Trimmelement. E elemento de compensación. I elemento di regolazione a lungo termine. N stellichaam. P element kompensacyjny. S grovstyrelement. (026)
3. **waveguide shim** : a thin resilient metal sheet inserted between waveguide flanges to ensure electrical continuity. ★ cale mince → *cale 2.* R волноводная прокладка. D Hohlleiter-Fiederblech. E junta de contacto. I foglio di raccordo. N contactraam; aanpasstuk. P uszczelka sprężysta. S kontaktbleck. (726)

shimming

1. **coarse control (shimming)** : → *control 34*

shock

1. **acoustic shock** (in telephony) : any temporary or permanent disturbance of the functioning of the ear, or of the nervous system, which may be caused to the user of a telephone earphone by a sudden sharp rise in the acoustic pressure produced by it. *Note.* — An acoustic shock usually results from the occurrence, in abnormal circumstances, of short-lived high voltages at the terminals of a telephone set. ★ choc acoustique → *choc 1.* R акустический удар. D Schallschock; Gehörschock. E choque

acústico (en telefonía). I impulso acustico; choc. N kortstondige overbelasting van het gehoor. P udar akustyczny. S akustisk chock. (722)

2. **acoustic shock suppressor** : → *suppressor 1*
3. **duration of shock pulse** : → *duration 12*
4. **electric shock** : a pathophysiological effect resulting from an electric current passing through a human or animal body. ★ choc électrique → *choc 9.* R электрический шок. D elektrischer Schlag. E choque eléctrico. I scossa elettrica. N elektrische schok. P porażenie elektryczne. S elchock. (604,826)
5. **shock current** : → *current 184*
6. **shock pulse** : → *pulse 80*

shoe

1. **collector shoe** : the part of the shoegear making contact with the contact rail. ★ sabot → *sabot 1.* R токоснимающая вставка. D Schleifschuh (Schienenstromabnehmer). E zapata. I pattino di contatto. N stroomafnemerschoen. P ślizgacz łyżwowy. S kontaktsko. (811)
2. **contact shoe** (*Syn.* contact slipper) : → *slipper 1*
3. **pole shoe** : that part of a salient pole facing the air-gap. ★ épanouissement polaire → *épanouissement 1.* R полюсный наконечник (башмак). D Polschuh. E expansión polar. I espansione polare. N poolschoen. P nabiegunnik. S polplatta. (411)

shoegear

1. **shoegear** (*Syn.* third rail collector) : an assembly of parts for collecting current from a conductor rail. ★ frotteur → *frotteur 2.* R башмак токоприемника; устройство для токосъема с контактного рельса. D Schleifschuhträger (für Schienenstromabnehmer). E frotador (de rail de contacto). I presa (di corrente) a pattino. N stroomafnemer voor 3e rail. P odbierak łyżwowy. S strömavtagare för strömskena. (811)

shooting

1. **shooting** (*Syn.* taking) : the action of producing a picture of the scene to be televised and an electrical signal corresponding to the brightness and colour characteristics of the scene. ★ prise de vue → *prise 30.* R съемка. (723)

short

1. **dead short** : an insulation fault whose impedance can be regarded as zero. ★ défaut franc → *défaut 26.* R металлическое короткое замыкание. D satter Kurzschluß. E defecto franco. I guasto franco. N botte kortsluiting; klemmenkortsluiting. P zwarcie bezoporowe. S stum kortslutning. (604)
2. **distortion of short duration** : → *distortion 34*
3. **rated short time thermal current** : → *current 162*
4. **short address** : → *address 15*
5. **short code selection** : → *selection 17*
6. **short period fading** (*Syn.* fast fading) : → *fading 10*
7. **short slot coupler** : → *coupler 20*
8. **short wave infra-red radiation** : → *radiation 109*

short-arc

1. **short-arc lamp** : → *lamp 58*

short-circuit

1. **adjustable short circuit** (*Syn.* piston) : → *piston 4*
2. **current in the short circuit** : → *current 52*
3. **direct-axis sub-transient short-circuit time constant** : → *time constant 4*
4. **direct-axis transient short-circuit time constant** : → *time constant 6*
5. **maximum short-circuit power** : → *power 83*
6. **quadrature-axis sub-transient short-circuit time constant** : → *time constant 13*
7. **quadrature-axis transient short-circuit time constant** : → *time constant 15*
8. **short circuit** : the accidental or intentional connection, by a relatively low resistance or impedance, of two or more points in a circuit which are normally at different voltages. ★ court-circuit → *court-circuit 10.* R короткое замыкание. D Kurzschluß. E cortocircuito. I corto circuito. N kortsluiting. P zwarcie. S kortslutning. (151)
9. **short circuit transition** (*Syn.* shunt transition) : → *transition 11*
10. **short-circuit breaking capacity** : → *capacity 24*
11. **short-circuit calculation** : → *calculation 7*
12. **short-circuit characteristic** : → *characteristic 74*
13. **short-circuit flux of a magnetic tape** : → *flux 23*
14. **short-circuit impedance** : → *impedance 52*
15. **short-circuit impedance of a pair of windings** : → *impedance 53*
16. **short-circuit impedance of an arc furnace installation** : → *impedance 54*
17. **short-circuit making capacity** : → *capacity 25*
18. **short-circuit operation** : → *operation 64*
19. **short-circuit power** : → *power 175*
20. **short-circuit ratio** : → *ratio 81*
21. **short-circuit termination** : → *termination 8*
22. **short-circuit time constant of primary windings** : → *time constant 18*
23. **small-signal short-circuit forward current transfer ratio** : → *ratio 92*
24. **sudden short-circuit test** : → *test 82*
25. **sustained short-circuit test** : → *test 83*

short-circuit current

1. **aperiodic component of short-circuit current** : → *component 4*
2. **conditional short-circuit current** (of a circuit or a switching device) : the prospective current that a circuit or a switching device, protected by a specified current limiting device, can satisfactorily whithstand for the operating time of that current limiting device under specified conditions of use and behaviour. ★ courant de court-circuit conditionnel → *courant de court-circuit 6.* R условный ток короткого замыкания (цепи или коммутационного аппарата). D bedingter Nennkurzschlussstrom (eines Stromkreises oder Schaltgerätes). E corriente (intensidad) de cortocircuito condicional (de un circuito o de un aparato de conexión). I corrente di cortocircuito condizionata (di un circuito o di un apparecchio di manovra). N beheerste kortsluitstroom (van een stroombaan of een schakeltoestel). P prąd ograniczony (wytrzymywany przez łącznik). S willkorlig kortslutningsström. (441)
3. **fused short-circuit current** : the conditionnal short-circuit current when the current limiting device is a fuse. ★ courant de court-circuit avec fusible → *courant de court-circuit 5.* R ток короткого замыкания с предохранителем. D bedingter Nennkurzschlussstrom bei Schutz durch Sicherungen. E corriente (intensidad) de cortocircuito con fusible. I corrente di cortocircuito con fusibile. N door smeltveiligheden beheerste kortsluitstroom. P prąd ograniczony bezpiecznika (wytrzymywany przez łącznik). S villkorlig kortslutningsström med säkring. (441)
4. **initial symmetrical short-circuit current** : the root mean square value of the current in the primary winding immediately after the winding has been suddenly short-circuited, the aperiodic component of current, if any, being excluded. ★ courant initial symétrique de court-circuit → *courant de court-circuit 10.* R начальный ток при симметричном коротком замыкании. D subtransienter Kurzschlußwechselstrom (Anfangs-Kurzschluß-Wechselstrom). E corriente inicial simétrica de cortocircuito. I corrente simmetrica iniziale di cortocircuito. N symmetrische aanvangskortsluitstroom. P początkowy symetryczny prąd zwarciowy. S symmetrisk begynnelseström. (411)
5. **maximum asymmetric short-circuit current** : the peak value reached by the current in the primary winding within a half of a cycle after the winding has been suddenly short-circuited, when conditions are such that the initial value of any aperiodic component of current is a maximum. ★ courant maximal asymétrique de court-circuit → *courant de court-circuit 11.* R максимальный ток при несимметричном коротком замыкании. D Stoßkurzschlußstrom. E corriente máxima asimétrica de cortocircuito. I corrente massima asimmetrica di cortocircuito. N piekkortsluitstroom. P udarowy prąd zwarciowy. S maximal stötström. (411)
6. **maximum short-circuit currents in welding** : the r.m.s. values of the current at the rated supply voltage and at the highest value of the secondary voltage setting, the electrodes

being short-circuited according to specified test conditions and the machine being arranged so as to have successively : *a)* Minimum impedance corresponding to the minimum throat depth and gap; *b)* Maximum impedance corresponding to the maximum throat depth and gap. ★ courants maximaux en court-circuit en soudage → *courant 167.* R максимальные токи короткого замыкания при сварке. D größte Kurzschlußströme beim Schweißen. E corrientes máximas de cortocircuito en soldadura. I correnti massime di cortocircuito nella saldatura. N maximale kortsluitstromen tijdens lassen. P prąd zwarciowy maksymalny przy zgrzewaniu. S maximal korstlutningsström. (851)

7. **short-circuit current** : the maximum current given by a battery into a circuit of a very low resistance compared with that of the battery, under specified conditions. ★ courant de court-circuit → *courant de court-circuit 3.* R ток короткого замыкания. D Kurzschlußstrom. E corriente de cortocircuito. I corrente di cortocircuito. N kortsluitstroom. P prąd zwarciowy. S kortslutningsström. (486)
8. **short-circuit current** : the current flowing at a given point of a network resulting from a short circuit at another point of this network. ★ courant de court-circuit → *courant de court-circuit 4.* R ток короткого замыкания. D Teilkurzschlußstrom. E corriente de cortocircuito. I corrente di cortocircuito. N kortsluitstroom. P prąd zwarciowy. S kortslutningsström. (441,603)
9. **short-circuit current capability** : → *capability 7*
10. **(solid) short-circuit current** : an overcurrent resulting from a fault of negligible impedance between live conductors having a difference in potential under normal operating conditions. ★ courant de court-circuit (franc) → *courant de court-circuit 7.* R ток короткого замыкания (металлического). D (unbeeinflußter, vollkommener) Kurzschlußstrom. E corriente de cortocircuito (franco). I corrente di cortocircuito. N kortsluitstroom. P prąd zwarciowy. S kortslutningsström. (826)
11. **steady short-circuit current** : the steady-state current in the primary winding when short-circuited. ★ courant de court-circuit permanent → *courant de court-circuit 9.* R установившийся ток короткого замыкания. D Dauerkurzschlußstrom. E corriente de cortocircuito. I corrente permanente di cortocircuito. N stationaire blijvende kortsluitstroom. P ustalony prąd zwarciowy. S stationär korslutningsström. (411)

short-circuiting

1. **short-circuiting device** : → *device 51*

shortfall

1. **energy shortfall** : a lack of available energy with respect to the energy demand over a stated period of time. ★ défaillance en énergie → *défaillance 13.* R дефицит энергии. D Energiemangel. E fallo de energía. I deficienza d'energia. N energietekort. P deficyt energii. S energibrist. (603)
2. **power shortfall** : a lack of available power with respect to the power demand at any moment in time. ★ défaillance en puissance → *défaillance 14.* R дефицит мощности. D Leistungsmangel. E fallo de potencia. I deficienza di potenza. N vermogenstekort. P deficyt mocy. S effektbrist. (603)

shorting

1. **shorting contact** : → *contact 104*

short-path

1. **short-path signal** : → *signal 170*

short-run

1. **short-run marginal cost** : → *cost 21*

short-term

1. **short-term frequency stability** : → *stability 12*
2. **short-term instability** : → *instability 5*
3. **(short-term) sync pulling** : → *pulling 7*

short-time

1. **limiting short-time current of an output circuit** : → *current 119*
2. **limiting short-time thermal withstand value of an energizing quantity** : → *value 19*
3. **rated short-time current** : → *current 163*
4. **short-time duty** : → *duty 13*
5. **short-time duty-type** : → *duty-type 9*
6. **short-time (quantity)** : → *quantity 31*
7. **short-time rating** : → *rating 15*
8. **short-time rating** : → *rating 16*
9. **short-time whithstand current** : → *current 185*

short-wave

1. **short-wave fade-out** : → *fade-out 3*

shot

1. **multiple shot reclosing** : → *reclosing 6*
2. **shot noise** : → *noise 71*
3. **shot noise** : → *noise 72*
4. **single shot reclosing** : → *reclosing 9*

shroud

1. **fan shroud** : the structure forming the periphery of a fan and which restricts radial leakage of coolant gas past the fan blades. ★ capot de refoulement de ventilateur → *capot 2.* R экран вентилятора. D Lüfterkragen. E envolvente estanca de ventilador. I cappa del ventilatore. N ventilatormantel. P prowadnica wentylatora. S fläktring. (411)
2. **protective shroud** : a part surrounding the head of a bolt or screw or nut in a specified manner in order to produce a special fastener. ★ coupelle → *coupelle 1.* R охранное кольцо. D Schutzkragen. E copela. I coppella. N beschermingskraag. P otoczka zabezpieczająca. S skyddskrage. (426)
3. **shroud** : a part of a component or an accessory which provides physical protection to otherwise exposed terminals or contacts. ★ protecteur de contact → *protecteur 10.* R кожух защитный. D mechanischer Kontaktschutz. E protector de contacto. I copertura di protezione di contatti; protezione di contatto. N contactbescherming. P osłona stykochronna. S krage. (581)
4. **shroud** (*Syn.* protective cover) : → *cover 5*

shunt

1. **(electric) shunt** : a conducting device connected in parallel with part of a current-carrying electric circuit to divert current from that part. ★ shunt (électrique) → *shunt 11.* R (электрический) шунт. D elektrischer Nebenschluß. E shunt (eléctrico). I derivatore (elettrico). N (elektrische) shunt. P bocznik (elektryczny). S (elektrisk) shunt. (151)
2. **inductive shunt** : an iron-cored coil in a shunt circuit, usually that associated with the main poles of traction motors during field weakening. ★ shunt inductif → *shunt 12.* R индуктивный шунт. D induktiver Nebenwiderstand. E shunt inductivo. I derivatore induttivo. N inductieve shunt. P bocznik indukcyjny. S fältförsvagningsspole; shuntreaktor. (811)
3. **magnetic shunt** : a device of magnetic material which is placed in parallel with part of a magnetic circuit to divert flux from that part. ★ shunt magnétique → *shunt 13.* R магнитный шунт. D magnetischer Nebenschluß. E shunt magnético. I derivatore magnetico. N magnetische shunt. P bocznik magnetyczny. S magnetisk shunt. (151)
4. **shunt** : a resistor connected in parallel with the current circuit of a measuring instrument in order to reduce, by a known ratio, the current passing through it. *Note.* — A shunt is generally intended to provide a voltage proportional to the current to be measured. ★ shunt → *shunt 10.* R шунт (измерительного прибора). D Nebenwiderstand. E shunt (de un aparato de medida). I derivatore. N shunt. P bocznik. S shunt. (301)
5. **shunt** : applied to a machine to denote that it is excited by a shunt winding. ★ machine à excitation en dérivation → *machine 13.* R машина параллельного возбуждения. D Maschine mit Nebenschlußerregung. E máquina con excitación en derivación; máquina con excitación shunt. I macchina ad eccitazione derivata. N shuntmachine. P maszyna bocznikowa. S shunt. (411)
6. **shunt admittance** : → *admittance 13*
7. **shunt capacitance** : → *capacitance 15*
8. **shunt capacitor** : → *capacitor 61*
9. **shunt compensation** : → *compensation 11*
10. **shunt injection of a centralized telecontrol signal** : → *injection 7*
11. **shunt motor** : → *motor 89*

12. **shunt reactor** : → *reactor 41*
13. **shunt relay** : → *relay 39*
14. **shunt release** : → *release 29*
15. **shunt resistor** : → *resistor 22*
16. **shunt T** (*Syn.* H-plane T junction) : → *junction 9*
17. **shunt transition** : → *transition 11*
18. **shunt winding** : → *winding 70*
19. **stabilized shunt (generator)** : applied to an under-compounded generator providing a voltage drop with load such that machines may be operated in parallel without equalizers. ★ génératrice à excitation shunt stabilisée → *génératéur 34.* R стабилизированный генератор с параллельным возбуждением. D Nebenschlußgenerator mit Stabilisierungswicklung. E generador con excitación en derivación estabilizada. I generatore ad eccitazione derivata stabilizzata. N gestabiliseerde shuntgenerator. P prądnica bocznikowa stabilizowana. S stabiliserad shunt(generator). (411)
20. **stabilized shunt (motor)** : applied to a compound motor with a series field winding of such proportion and polarity so as to cause a small reduction in speed with increasing load. ★ moteur à excitation shunt stabilisé → *moteur 41.* R стабилизированный двигатель с параллельным возбуждением. D Nebenschlußmotor mit Stabilisierungswicklung. E motor con excitación en derivación estabilizada. I motore ad eccitazione derivata stabilizzata. N gestabiliseerde shuntmotor. P silnik bocznikowy stabilizowany. S stabiliserad shunt(motor). (411)

shunting

1. **auxiliary pole shunting** : a shunt system giving a suitable value and phase to the commutating field. ★ shuntage des pôles auxiliaires → *shuntage 4.* R шунтирование обмотки дополнительных полюсов. D Wendepolbeschaltung (Nebenwiderstand). E shuntado de polos auxiliares. I derivazione dei poli ausiliari. N hulppoolveldverzwakking. P bocznikowanie biegunów komutacyjnych. S shuntning av kommuteringslindning. (811)
2. **field shunting** : a method of field weakening in which field regulation is effected by diverting a portion of the total field current without making any change in the number of field turns. ★ affaiblissement de champ par dérivation → *affaiblissement 9.* R ослабление поля путем шунтирования обмотки возбуждения. D Feldschwächung durch Parellelwiderstand. E debilitamiento de campo por derivación. I indebolimento di campo con derivatore. N veldverzwakking door stroomverlaging. P bocznikowanie wzbudzenia. S fältförsvagning genom shuntning. (811)
3. **shunting control position** : → *position 33*
4. **shunting locomotive** : → *locomotive 8*

shutdown

1. **emergency shutdown** (*Syn.* scram) : the act of shutting down a reactor suddenly to prevent or minimize a dangerous condition. ★ arrêt d'urgence → *arrêt 2.* D Notabschaltung. E parada de emergencia. I arresto (spegnimento) d'emergenza. N noodstop. P wyłączenie awaryjne. S snabbavställning. (026)
2. **emergency shutdown rod** : → *rod 6*
3. **emergency shut-down system** : → *system 63*
4. **safety shut-down system** (*Syn.* emergency shut-down system) : → *system 63*

shutter

1. **shutter** (of an assembly) : a part of an assembly that can be moved from a position where it permits contacts of a removable part to engage fixed contacts, to a position where it becomes a part of the enclosure or partition shielding the fixed contacts. ★ volet → *volet 2.* R заслонка (комплекта). D Blende. E persiana (de un conjunto). I otturatore (di un complesso); sportello (di un complesso). N luik (van een inrichting); klep (van een inrichting); scherm (van een inrichting). P przegroda ruchoma. S avskärmare. (441)
2. **sliding shutter** : a movable metallic plate placed between two waveguide flanges; in one position the plate acts as a short-circuit termination and its other position permits free passage of incident waves. ★ obturateur à guillotine → *obturateur 2.* R подвижная заслонка. D zuschaltbarer Kurzschluss(abschluss); Kurzschlussschalter. E obturador de guillotina. I otturatore a ghigliottina. N kortsluitschuif. P zasuwa. S slutare. (726)

SI

1. **International System of Units (SI)** : → *system 95*
2. **SI base unit** : → *unit 54*
3. **SI derived unit** : → *unit 55*
4. **SI supplementary unit** : → *unit 56*
5. **SI unit** : → *unit 57*

sickness

1. **radiation sickness** : an illness caused by exposure to ionizing radiation. ★ mal des rayons → *mal 1.* R лучевая болезнь. D Strahlenkrankheit. E enfermedad por radiacion. I male da raggi. N stralingsziekte. P choroba popromienna. S strålsjuka. (881)

SID

1. **SID** (*Syn.* sudden ionospheric disturbance) : → *disturbance 15*

side

1. **arc furnace side door** : → *door 1*
2. **coil side** : → *coil 8*
3. **coil side separator** : → *separator 1*
4. **embedded coil side** : → *coil 19*
5. **(relative) side lobe level** : → *level 80*
6. **side circuit** : → *circuit 162*
7. **side conductor rail** : → *rail 16*
8. **side lobe** : → *lobe 8*
9. **side locking** : → *locking 6*
10. **side reaction** : → *reaction 11*
11. **side slope at X metres** : → *slope 8*
12. **side thrust** : → *thrust 1*
13. **side walls** : → *wall 9*

sideband

1. **compatible single sideband modulation** : → *modulation 10*
2. **double sideband** (*Syn.* DSB (abbreviation)) : pertaining to a transmission or emission where both sidebands resulting from amplitude modulation are preserved equally. ★ à double bande latérale → *bande 4.* R две боковые полосы; ДБП. D Doppelseitenband; DSB (Abkürzung). E doble banda lateral; DBL (abreviatura). I a doppia banda laterale. N dubbelzijband; DSB. P (transmisja lub emisja) dwuwstęgowa. S dubbelt sidband. (702)
3. **independent sideband** (*Syn.* ISB (abbreviation)) : pertaining to a transmission or emission in which the lower sideband and the upper sideband resulting from amplitude modulation correspond to independent modulating signals. ★ à bandes latérales indépendantes → *bande 3.* R независимая боковая полоса. D unabhängiger Seitenband-...; ISB (Abkürzung). E bandas laterales independientes; BLI (abreviatura). I a bande laterali indipendenti. N onafhankelijkezijband; ISB. P (transmisja lub emisja) o wstęgach bocznych niezależnych. S oberoende sidband. (702)
4. **lower sideband** : the sideband containing the spectral components of frequency lower than the frequency of the carrier. ★ bande latérale inférieure → *bande 37.* R нижняя боковая полоса. D unteres Seitenband. E banda lateral inferior. I banda laterale inferiore. N onderste zijband; onderzijband. P wstęga boczna dolna. S undre sidband. (702)
5. **sideband** : 1. The spectral components resulting from the modulation of a sinusoidal carrier and lying above or below the carrier frequency. 2. A frequency band lying above or below a sinusoidal carrier frequency and containing spectral components of significance produced by modulation. ★ bande latérale → *bande 36.* R боковая полоса (частот). D Seitenband. E banda lateral. I banda laterale. N zijband. P wstęga boczna. S sidband. (702)
6. **sideband interference** : → *interference 20*
7. **single sideband** (*Syn.* SSB (abbreviation)) : pertaining to a transmission or emission where only either the lower sideband or the upper sideband resulting from amplitude modulation is preserved. ★ à bande latérale unique → *bande 2.* R одна боковая полоса; ОБП. D Einseitenband-...; SSB (Abkürzung). E banda lateral única; BLU (abreviatura). I a banda laterale unica. N enkelzijband; SSB. P (transmisja lub emisja) jednowstęgowa. S enkelt sidband. (702)

8. **upper sideband** : the sideband containing the spectral components of frequency higher than the frequency of the carrier. ★ bande latérale supérieure → *bande 39.* R верхняя боковая полоса. D oberes Seitenband. E banda lateral superior. I banda laterale superiore. N bovenste zijband; bovenzijband. P wstęga boczna górna. S övre sidband. (702)
9. **vestigial sideband** (*Syn.* VSB (abbreviation)) : a sideband in which only the spectral components corresponding to the lower frequencies of the modulating signals are preserved, the other components being strongly attenuated. ★ bande latérale résiduelle → *bande 38.* R остаточная боковая полоса. D Restseitenband. E banda lateral residual; BLR (abreviatura). I banda laterale residua. N restzijband; VSB. P wstęga boczna szczątkowa. S stympat sidband. (702)
10. **vestigial sideband** (qualifying term) : pertaining to a transmission or emission in which one complete sideband and its complementary vestigial sideband are utilized. ★ à bande latérale résiduelle → *bande 1.* R остаточная боковая полоса. D Restseitenband. E banda lateral residual (término calificativo). I a banda laterale residua. N restzijband. P (transmisja lub emisja) o wstędze bocznej szczątkowej. S ..... (702)
11. **vestigial sideband filter** : → *filter 41*

sidelight

1. **sidelight** : navigation light positioned generally at the side of a vessel, and designed to show either a fixed green light to the starboard or a fixed red light to the port side of the longitudinal axis of the vessel but not rearwards. ★ feu de côté → *feu 13.* R бортовой огонь. D Seitenlicht. E luz lateral. I fanale di via. N boordlicht. P światło burtowe. S sidolanterna. (845)

side-lobe

1. **side lobe suppression** : → *suppression 5*

sidereal

1. **sidereal period of revolution** : → *period 31*
2. **sidereal period of rotation** : → *period 32*

sidetone

1. **ambient noise sidetone** : sidetone produced by ambient noise. ★ effet local pour le bruit ambiant → *effet 66.* R местный эффект шума помещения. D Umgebungsgeräusch-Rückhören. E efecto local por el ruido ambiente. I effetto locale per il rumore ambiente. N lokaal effect bij geruis. P dogłos dla szumu otoczenia. S bullersidoton. (722)
2. **sidetone** : the reproduction in the telephone receiver of sounds picked up by its associated transmitter and transmitted without appreciable delay by the internal circuitry of the telephone set. ★ effet local → *effet 64.* R местный эффект. D Rückhören. E efecto local (de un centro telefónico). I effetto locale. N lokaal effect (in een telefoontoestel). P dogłos (w aparacie telefonicznym). S sidoton. (722)
3. **sidetone reference equivalent** : → *equivalent 65*
4. **speech sidetone** : the sidetone produced by the voice of a person speaking into the transmitter of a telephone set. ★ effet local pour la parole → *effet 65.* R местный эффект речи. D Sprachrückhören. E efecto local por la palabra. I effetto locale per la parola. N lokaal effect van spraak. P dogłos dla mowy. S talproducerad sidoton. (722)

sidewall

1. **external groove sidewall** : the groove wall nearer to the external rim of the disk. ★ flanc externe du sillon → *flanc 3.* R внешняя стенка канавки. D äußere Rillenflanke. E flanco externo del surco. I fianco esterno del solco. N groefbuitenwand. P ścianka zwnętrzna rowka. S yttre spårsida. (806)
2. **internal groove sidewall** : the groove wall nearer to the centre of the disk. ★ flanc interne du sillon → *flanc 4.* R внутренняя стенка канавки. D innere Rillenflanke. E flanco interno del surco. I fianco interno del solco. N groefbinnenwand. P ścianka wewnętrzna rowka. S inre spårsida. (806)

siemens

1. **siemens, S (S)** : SI unit of (electric) conductance. ★ siemens, S → *siemens 1.* (100)

sievert

1. **sievert** : the special name of the SI unit of dose equivalent. 1 Sv = 1 J . kg^{-1}. ★ sievert → *sievert 1.* R зиверт. D Sievert (Sv). E sievert. I sievert. N sievert. P sievert. S sievert. (881)

sight

1. **line of sight propagation** : → *line 80*
2. **sight hole** (*Syn.* inspection hole) : → *hole 11*

sign

1. **matrix sign** : sign designed to display a variable message by means of an array of elementary units, each of which can be individually illuminated or otherwise altered in appearance. ★ panneau matriciel → *panneau 13.* R матричный знак. D Matrix-Zeichen. E panel matricial. I pannello e matrice. N matrixsignaal. P znak mozaikowy. S matrisskylt. (845)
2. **sign** : device that provides a visual signal by virtue of its situation, shape, colour or pattern, and sometimes by the use of symbols or alphanumeric characters. It may be internally illuminated. *Note.* — In French, the term "panneau de signalisation" refers more particularly to a panel that contains a visual signal. ★ panneau de signalisation → *panneau 9.* R знак. D Zeichen. E panel de señalización. I pannello di segnalazione. N teken (verkeersteken). P znak. S skylt. (845)
3. **traffic sign** : authorised sign that conveys, to vehicular and pedestrian traffic, a prohibition, restriction, requirement or warning, or information. *Note.* — In French, the term "panneau de signalisation (routière)" refers only to a panel that contains a sign, and it may in some cases be equivalent to the English term sign plate or sign panel (USA). ★ panneau de signalisation (routière) → *panneau 10.* R дорожный знак. D Verkehrszeichen. E señal de tráfico. I pannello di segnalazione. N verkeersteken. P znak drogowy. S vägmärke. (845)

signal

1. **A signal** (*Syn.* left (stereophonic) signal) : → *signal 111*
2. **acknowledgement signal** : a signal sent in one direction to acknowledge the receipt of a signal in the opposite direction. ★ signal d'accusé de réception → *signal 72.* R сигнал подтверждения. D Bestaetigungszeichen. E señal de acuse de recepción. I segnale di riscontro. N (ontvangst-)kwijtingssignaal. P sygnał potwierdzenia. S kvittenssignal. (714)
3. **acknowledgement signal unit** : → *unit 1*
4. **address signal** : a forward signal containing some or all of the address information. ★ signal d'adresse → *signal 73.* R адресный сигнал. D Waehlzeichen. E señal de dirección. I segnale di indirizzo. N adressignaal. P sygnał adresu. S adressignal. (714)
5. **address-complete signal** : a backward signal sent from the terminating register to indicate that all the address information has been received, and that the originating register may be released. ★ signal d'adresse complète → *signal 74.* R сигнал получения полного номера. D Waehlinformation-Vollstaendig-Zeichen. E señal de dirección completa. I segnale di fine selezione (a ritroso). N nummer-ontvangen-signaal. P sygnał kompletności adresu. S ..... (714)
6. **address-complete signal (with charge)** : an address-complete signal indicating that the call should be charged on answer. ★ signal d'adresse complète (avec taxation) → *signal 75.* R сигнал получения полного номера (таксируемый). D Waehlinformation-Vollstaendig-Zeichen, gebuehrenpflichtig. E señal de dirección completa (con tasación). I segnale di fine selezione - chiamata tassata. N nummer-ontvangen-signaal (met tarifering). P sygnał kompletności adresu (z zaliczaniem). S ..... (714)
7. **address-complete signal (with no charge)** : an address-complete signal indicating that charging should be inhibited. ★ signal d'adresse complète (sans taxation) → *signal 76.* R сигнал получения полного номера (нетаксируемый). D Waehlinformation-Vollstaendig-Zeichen, gebuehrenfrei. E señal de dirección completa (sin tasación). I segnale di fine selezione - chiamata non tassata. N nummer-ontvangen-signaal (zonder tarifering). P sygnał kompletności adresu (bez zaliczania). S ..... (714)
8. **address-incomplete signal** : a backward signal sent from the terminating register to indicate that the connection should now be released because insufficient address information has been received to enable that connection to be completed. ★ signal d'adresse incomplète → *signal 77.* R сигнал получения неполного адреса. D Waehlinformation-Unvollstaendig-Zeichen. E señal de

dirección incompleta. I segnale di selezione incompleta. N onvolledig-adres-signaal. P sygnał niekompletności adresu. S ..... (714)

9. **aggregate (isochronous) signal** : the isochronous signal produced by combining signals from the derived channel of a time-division multiplex. ★ signal composite (isochrone) → *signal 68.* R групповой (изохронный) сигнал. D zusammengefügtes Signal (isochrones). E señal compuesta (isocrona). I segnale aggregato. N geaggregeerd (isochroon) signaal. P sygnał złożony (izochroniczny). S isokronsignal. (721)
10. **alternate mark inversion signal** (*Syn.* AMI signal; bipolar signal) : the encoded signal produced by alternate mark inversion code. ★ signal bipolaire (alternant) → *signal 60.* R сигнал с чередованием полярности импульсов; биполярный сигнал. D Bipolarsignal; alternierendes Signal; AMI-Signal. E señal bipolar (alternante). I segnale bipolare AMI. N bipolair signaal. P sygnał obubiegunowy. S AMI-signal. (704)
11. **alternative selection signals** : the acceptance by the network of several different codes for selection signals e.g.International Telegraph Alphabet No.2 and International Alphabet No.5, the choice of code being either fixed for a given subscriber or variable at the subscriber's choice, for each call attempt. ★ pluralité des codes de signaux de sélection → *pluralité 1.* R альтернативные сигналы набора. D alternative Wählzeichen. E pluralidad de códigos de señales de selección. I selezione multipla. N alternatieve kiessignalen. P sygnały wybiercze alternatywne. S alternativa söksignaler. (721)
12. **AMI signal** (*Syn.* alternate mark inversion signal) : → *signal 10*
13. **amplitude modulated signal generator** : → *generator 2*
14. **analogue signal** : signal the information parameter of which may assume all values of a given range. ★ signal analogique → *signal 54.* R аналоговый сигнал. D analoges Signal. E señal analógica. I segnale analogico. N aftastsignaal. P sygnał analogowy. S analog signal. (351)
15. **analogue signal** : a signal in which the characteristic quantity representing information may at any instant assume any value within a continuous interval. *Note.* — For instance, an analogue signal may follow continuously the values of another physical quantity representing information. ★ signal analogique → *signal 55.* R аналоговый сигнал. D Analogsignal. E señal analógica. I segnale analogico. N analoog signaal. P sygnał analogowy. S analog signal. (702,704,721)
16. **analytic signal** : a complex function whose real part is the real function f(*t*) representing a signal and whose imaginary part is the Hilbert transform g(*t*) of the function f(*t*) :

$$f(t) + j\,g(t) = f(t) - \frac{j}{\pi}\int_{-\infty}^{+\infty}\frac{f(t)}{\tau - t}\,d\tau$$

Notes. 1 — The real part f(*t*) of an analytic signal is the opposite of the Hilbert transform of the imaginary part g(*t*). *2* — If it exists, the complex Fourier transform of an analytic signal is zero for all negative frequencies so that, for instance, the analytic signal can be used to represent a single sideband modulated signal. ★ signal analytique → *signal 56.* R аналитический сигнал. D Analytiksignal. E señal analítica. I segnale analitico. N analytisch signaal. P sygnał analityczny. S analytisk signal. (702)
17. **answer signal** : a backward signal sent when the call has been answered. ★ signal de réponse → *signal 139.* R сигнал ответа. D Beginnzeichen; Antwortzeichen. E señal de respuesta. I segnale di risposta. N beantwoordingssignaal. P sygnał odzewu. S svarssignal. (714)
18. **answer signal (with charge)** : an answer signal which initiates charging. ★ signal de réponse (avec taxation) → *signal 141.* R сигнал ответа (с начислением оплаты). D Beginnzeichen (mit Gebuehr). E señal de respuesta (con tasación). I segnale di risposta tassata. N beantwoordingssignaal (met tarifering). P sygnał odzewu (z zaliczaniem). S svarssignal med debitering. (714)
19. **answer signal (with no charge)** : an answer signal which inhibits charging. ★ signal de réponse (sans taxation) → *signal 142.* R сигнал ответа (без начисления оплаты). D Beginnzeichen (ohne Gebuehr). E señal de respuesta (sin tasación). I segnale di risposta non tassata. N beantwoordingssignaal (zonder tarifering). P sygnał odzewu (bez zaliczania). S svarssignal utan debitering. (714)
20. **B signal** (*Syn.* right (stereophonic) signal) : → *signal 162*
21. **back porch (of line-synchronising signal)** : → *porch 1*
22. **backward signal** : a signal, used for the establishment or control of a connection, sent in the direction opposite to that of call set-up. ★ signal en arrière → *signal 197.* R обратный сигнал. D Rueckwaertszeichen. E señal hacia atrás. I segnale a ritroso. N terugwaarts signaal. P sygnał wstecz. S bakåtgående signal. (714)
23. **balanced aggregate signal** : an aggregate signal containing an equal number of elements of each significant condition. ★ signal composite équilibré → *signal 67.* R сбалансированный групповой сигнал. D gewichtetes zusammengefügtes Signal. E señal compuesta equivalente. I segnale aggregato bilanciato. N gebalanceerd geaggregeerd signaal. P sygnał złożony zrównoważony. S balanserad isokronsignal. (721)
24. **barred signal** : a service signal which indicates that a call cannot be established because access is barred. ★ signal d'interdiction → *signal 184.* R сигнал запрета. D gesperrt. E señal de prohibición. I segnale di chiamata sbarrata. N blokkeersignaal. P sygnał zakazu dostępu. S spärrsignal. (721)
25. **binary (digital) signal** : a digital signal in which each signal element has one of two permitted discrete values. ★ signal (numérique) binaire → *signal 214.* R двоичный (цифровой) сигнал. D Binär-(Digital)Signal. E señal (numérica) binaria. I segnale (numerico) binario. N binair (digitaal) signaal. P sygnał (cyfrowy) binarny; sygnał (cyfrowy) dwójkowy. S binär signal. (704)
26. **binary signal** : quantized signal with two values conventionally denoted 0 and 1. ★ signal binaire → *signal 59.* R двоичный сигнал. D binäres Signal. E señal binaria. I segnale binario. N analoog signaal. P sygnał dwójkowy; sygnał binarny. S binär signal. (351)
27. **bipolar signal** (*Syn.* alternate mark inversion signal) : → *signal 10*
28. **blanking signal** : signal used to control the suppression of the signal conveying picture information during certain parts of the scanning period, for example, during fly-back. *Example* :camera blanking. ★ signal de suppression → *signal 150.* R сигнал гашения. (723)
29. **block signal** : a set of signal elements representing a block. ★ signal de bloc → *signal 87.* R сигнал блока. D Blocksignal. E señal de bloque. I segnali di un blocco. N bloksignaal. P sygnał bloku. S blocksignal. (721)
30. **blocking signal** : a forward or backward signal sent to make busied out a device at the distant end. *Note.* — If the blocking signal is a continuous signal, then its cessation indicates when use of the device may be resumed. ★ signal de blocage → *signal 88.* R сигнал блокировки. D Sperrzeichen. E señal de bloqueo. I segnale di blocco. N blokkeringssignaal. P sygnał blokady. S blockeringssignal. (714)
31. **bunched frame alignment signal** : a frame alignment signal whose signal elements occupy consecutive digit time-slots. ★ signal de verrouillage de trame concentré → *signal 162.* R сосредоточенный цикловый синхросигнал. D gebündeltes Rastergleichlaufsignal. E señal de cerramiento de trama concentrada. I segnale di allineamento trama concentrato. N ..... P sygnał fazowania ramki skupiony. S samlad ramlåsningssignal. (704)
32. **busy signal** (*Syn.* engaged signal) : → *signal 83*
33. **call accepted (signal)** : → *call 9*
34. **call not accepted signal** : a call control signal sent by the called terminal to indicate that it does not accept the incoming call. ★ signal de refus d'appel → *signal 137.* R сигнал "вызов не принят". D Verbindungsabweisung. E señal de denegación de llamada. I segnale di chiamata non accettata. N oproep-niet-geslaagd-signaal. P sygnał odrzucenia wywołania. S anropsavvisning. (721)
35. **(call) signal generator** : → *generator 8*
36. **call without selection signals** : → *call 30*
37. **call-arrival signal** : a signal sent to a network terminal to initiate ringing. ★ signal de sonnerie → *signal 147.* R сигнал поступления вызова. D Rufzeichen. E señal (de recepción) de llamada. I segnale di comando della chiamata. N weksignaal. P sygnał wyzwolenia wywołania; sygnał wyzwolenia dzwonienia. S påringningssignal. (714)
38. **call-confirmation (signal)** : → *call-confirmation 1*
39. **call-connected signal** : the switching signal returned over the backward signalling path to indicate that the call is extended to

the called station. ★ signal de connexion → *signal 100.* R сигнал "соединение установлено". D ..... E señal de conexión. I utente raggiunto. N verbinding-gereedsignaal. P sygnał zestawienia połączenia. S svarssignal. (721)

40. **calling signal** : a forward switching signal transmitted on a circuit or a subscriber's line to indicate that the setting up of a call is requested. ★ signal d'appel → *signal 79.* R сигнал вызова. D Anruf (Signal). E señal de llamada. I segnale di chiamata. N oproepsignaal. P sygnał wywołania. S anropssignal. (721)

41. **C_B signal** : a unipolar signal used in some digital component television systems, which corresponds to the blue colour difference signal multiplied by a scaling factor. ★ signal C_B → *signal 63.* R сигнал C_B. (723)

42. **C_R signal** : a unipolar signal used in some digital component television systems, which corresponds to the red colour difference signal multiplied by a scaling factor. ★ signal C_R → *signal 64.* R сигнал C_R. (723)

43. **character (of a light signal)** : → *character 9*

44. **character signal** : a set of signal elements representing a character. ★ signal de caractère → *signal 89.* R сигнал знака. D Zeichensignal. E señal de carácter. I segnale carattere. N karaktersignaal. P sygnał znaku. S teckensignal. (721)

45. **characteristic (of a light signal)** (*Syn.* character (of a light signal)) : → *character 9*

46. **chrominance signal** : an electrical signal that is associated with the luminance signal to convey colour information. In practice this signal is made up of two components. ★ (signal de) chrominance → *signal 91.* R сигнал цветности. (723)

47. **clear-back signal** : a backward signal sent when the called party has cleared. ★ signal de raccrochage du demandé → *signal 132.* R сигнал отбоя. D Rueckwaertsausloesezeichen ; Schlusszeichen. E señal de fin de comunicación. I segnale di riaggancio del chiamato. N achterwaarts vrijgeefsignaal. P sygnał zwalniania wstecz. S B-slutsignal. (714)

48. **clear-forward signal** : a forward signal sent to terminate a call or call attempt and to release the traffic-carrying devices. ★ signal de libération → *signal 124.* R сигнал разъединения. D Vorwaertsausloesezeichen. E señal de liberación. I segnale di svincolo (in avanti). N voorwaarts vrijgeefsignaal. P sygnał zwalniania w przód. S A-slutsignal. (714)

49. **clearing signal** : the switching signal transmitted over a circuit to release a switched connection. ★ signal de libération → *signal 125.* R сигнал отбоя. D Auslösen. E señal de liberación. I segnale di svincolo. N vrijmaaksignaal. P sygnał rozłączenia. S nedkopplingssignal. (721)

50. **coded signal** : in multi-frequency signalling, a compound signal in which the combination of frequencies is coded to represent the value of the digit to be transmitted. ★ signal codé → *signal 65.* R кодированный сигнал. D kodiertes Zeichen. E señal codificada. I segnale codificato. N gecodeerd signaal. P sygnał kodowy. S kodad signal. (714)

51. **colour difference signal** : an electrical signal proportional to the difference between one of the primary colour signals and the luminance signal. ★ signal de différence de couleur → *signal 113.* R цветоразностный сигнал. (723)

52. **colour identification signal** : a signal, in the SECAM colour television system, sequentially modulated by the specific values of the D'_R and D'_B signals, occupying 9 lines of the field blanking period and allowing identification of the sequence of lines modulated by D'_R or D'_B. ★ signal d'identification des couleurs → *signal 172.* R сигнал кадровой цветовой синхронизации. (723)

53. **colour signal** : an electrical signal wholly or partially representing the chromaticity of a colour television picture. ★ signal de couleur → *signal 103.* R цветовой сигнал. (723)

54. **colour video signal** : the electrical signal representing the characteristics of the colour television picture. ★ signal d'image en couleur → *signal 177.* R цветовой видеосигнал. (723)

55. **compatible monophonic signal** : programme signal given when the left stereophonic signal and the right stereophonic signal from a stereophonic sound source are mixed, corresponding approximately to the programme signal obtained from a monophonic source. ★ signal monophonique compatible → *signal 207.* R совместимый монофонический сигнал. (723)

56. **complete video signal** : the combined video signal, synchronising signals and other associated signals. ★ signal d'image complet → *signal 176.* R полный видеосигнал. (723)

57. **composite colour signal** : the colour video signal in systems which use colour subcarriers for the chrominance signals. ★ signal (d'image-couleur) composite → *signal 182.* R полный цветовой сигнал. (723)

58. **compound signal** : in alternating current signalling, a signal in which more than one frequency is transmitted at a time. ★ signal composé → *signal 66.* R сложный сигнал. D kombiniertes Zeichen. E señal compuesta. I segnale composto. N samengesteld signaal. P sygnał złożony. S sammansatt signal. (714)

59. **confirmation of clearing signal** : → *confirmation 1*

60. **congestion signal** : a backward signal sent to indicate that there is insufficient equipment to complete the connection. ★ signal d'encombrement → *signal 165.* R сигнал перегрузки. D Gassenbesetzt-Zeichen. E señal de congestión. I segnale di congestione. N congestie-signaal. P sygnał natłoku. S spärrsignal. (714)

61. **continuous signal** : in analogue signalling, a signal which is continuously transmitted as long as the function it indicates persists. ★ signal continu → *signal 69.* R непрерывный сигнал в случае аналоговой сигнализации. D Dauerzeichen. E señal continua. I segnale continuo. N continu signaal. P sygnał ciągły. S kontinuerlig signal. (714)

62. **correction from signals** : → *correction 4*

63. **correction signal** : a special signal used for synchronous correction in a synchronous transmission system. ★ signal de correction → *signal 102.* R сигнал коррекции (синхронизма). D Korrektursignal. E señal de corrección (de sincronismo). I segnale di correzione. N correctiesignaal. P sygnał korekcji synchronizacji. S synkroniseringssignal. (721)

64. **cyclic control signal** : a periodic signal used to control the frequency at which operations occur. ★ signal de commande de fréquence → *signal 92.* R периодический управляющий сигнал. D zyklisches Steuersignal. E señal de control de frecuencia; señal de control cíclico. I segnale ciclico di controllo. N cyclisch besturingssignaal. P sygnał sterujący cykliczny. S cyklisk styrsignal. (704)

65. **cyclic timing signal** : a periodic signal used to determine the instants at which operations are initiated. ★ signal de rythme → *signal 143.* R циклический сигнал синхронизации. D zyklisches Auslösesignal. E señal de ritmo. I segnale ciclico di temporizzazione. N periodiek starttijdsignaal. P sygnał czasujący cykliczny; rytm. S cyklisk taktsignal. (702,704)

66. **data signal** : a signal representing all or part of one or more data messages. ★ signal de données → *signal 114.* R сигнал данных. D Datensignal. E señal de datos. I dato telegrafico. N datasignaal. P sygnał teledacyjny. S datasignal. (721)

67. **D'_B signal** : the colour difference signal corresponding to primary colour blue in the SECAM colour television system. *Note.* — This signal is limited in bandwidth and is pre-emphasised before transmission. ★ signal D'_B → *signal 83.* R сигнал D'_B. (723)

68. **D'_R signal** : the colour difference signal corresponding to primary colour red in the SECAM colour television system. *Note.* — This signal is limited in bandwidth and is pre-emphasised before transmission. ★ signal D'_R → *signal 84.* R сигнал D'_R. (723)

69. **decadic signal** : in analogue signalling, a signal sent in the form of a sequence of identical pulses, the number of which corresponds to the value of the digit to be transmitted. ★ signal décimal → *signal 164.* R декадный сигнал. D dekadisches Zeichen. E señal decimal. I segnale decadico. N kiespulssignaal. P sygnał dekadowy. S dekadisk signal. (714)

70. **desired signal** (*Syn.* wanted signal) : → *signal 256*

71. **difference signal** (*Syn.* S signal) : a signal theoretically equal to half the difference between the left and right stereophonic signals, and in practice proportional to this difference. ★ signal différence → *signal 173.* R разностный сигнал; сигнал S. (723)

72. **digital signal** : quantized signal the information parameter of which represents numbers. ★ signal numéral → *signal 212.* R цифровой сигнал. D digitales Signal. E señal digital. I segnale numerale. N digitaal signaal. P sygnał cyfrowy. S digital signal. (351)

73. **digital signal** : a discreetly timed signal in which information is represented by a finite number of well defined discrete values that one of its characteristic quantities may take in time. ★ signal numérique → *signal 213.* R цифровой сигнал. D Digitalsignal. E señal digital. I segnale numerico. N digitaal signaal. P sygnał cyfrowy. S digital signal. (702,704,721)

74. **discretely timed signal** : a signal composed of a set of successive elements in time, each element having one or more characteristic quantities which can convey information, for example its duration, its position in time, its waveform, its magnitude. ★ signal (temporel) discret → *signal 245.* R сигнал дискретного времени. D (Zeit-)diskretes Signal. E señal (temporal) discreta. I segnale temporale discreto. N (tijd)discreet signaal. P sygnał ziarnisty (w czasie); sygnał dyskretny (w czasie). S diskret signal. (702,704,721)

75. **distributed frame alignment signal** : a frame alignment signal whose signal elements occupy non-consecutive digit time-slots. ★ signal de verrouillage de trame réparti → *signal 163.* R распределенный цикловый синхросигнал. D aufgeteiltes Rastergleichlaufsignal. E señal de cerramiento de trama repartida; señal de cerramiento de trama distribuida. I segnale di allineamento trama distribuito. N ..... P sygnał fazowania ramki rozproszony. S fördelad ramlåningssignal. (704)

76. **electric signal transducer** : → *transducer 3*

77. **end of medium signal** : a function signal indicating the end of a data medium or the end of the wanted portion of data recorded on the medium. ★ signal de fin de support → *signal 119.* R сигнал конца носителя. D Ende der Aufzeichnung. E señal de fin de soporte. I segnale di fine supporto. N ..... P sygnał końca nośnika. S mediumslutssignal. (721)

78. **end of text signal** : a character signal or a sequence of such signals which indicates the end of the text of a message. ★ signal de fin de texte → *signal 120.* R сигнал конца текста. D Anfang des Kopfes. E señal de fin de texto. I inizio intestazione. N hoofdstartsignaal. P sygnał początku nagłówka. S rubrikbörjanssignal. (721)

79. **end of transmission signal** : a character signal or a sequence of such signals which indicates the end of transmission of one or more texts. ★ signal de fin de transmission → *signal 121.* R сигнал конца передачи. D Ende der Übertragung. E señal de fin de transmisión. I segnale di fine trasmissione. N overdrachtseindesignaal. P sygnał końca transmisji. S överföringsslutssignal. (721)

80. **end-of-block signal** : signal which identifies the end of a block. ★ signal de fin de bloc → *signal 116.* R сигнал конца блока. D Blockendesignal. E señal de final de bloque. I segnale di fine di un blocco. N blokstopsignaal. P sygnał końca bloku. S blockslutssignal. (721)

81. **end-of-pulsing signal** (*Syn.* ST signal) : a forward signal sent to indicate that no further address signals will be sent. ★ signal de fin de numérotation → *signal 117.* R сигнал конца набора номера. D Waehlinformationsende-Zeichen. E señal de final de numeración. I segnale (in avanti) di fine della selezione ; ST. N kieseindesignaal. P sygnał zakończenia nadawania (sygnału) adresu. S nummerslutssignal. (714)

82. **end-of-selection signal** : a switching signal transmitted among the selection signals after the digits of the called subscriber's number to indicate that there is no further digit belonging to this number. ★ signal de fin de sélection → *signal 118.* R сигнал "конец набора". D Wahlende. E fin de selección de señal. I segnale di fine selezione. N kieseindesignaal. P sygnał końca wybierania. S valslutssignal. (721)

83. **engaged signal** (*Syn.* busy signal) : a service signal which indicates that the called station is busy or not available. ★ signal d'occupation → *signal 193.* R сигнал занятости. D besetzt. E señal de ocupación. I segnale di occupato. N bezetsignaal. P sygnał zajętości. S upptagetsignal. (721)

84. **envelope of an amplitude modulated signal** : → *envelope 9*

85. **erasure signal** : a signal used for the purpose of invalidating a previous signal. ★ signal d'oblitération → *signal 192.* R сигнал аннулирования. D Löschsignal. E señal de borrado. I cancellazione carattere. N wissignaal. P sygnał kasowania. S radersignal. (721)

86. **error signal** : output signal of a comparing element of a feedback control system. ★ signal d'erreur → *signal 167.* R сигнал ошибки. D Regeldifferenz. E señal de error. I segnale di errore. N regelsignaal; verschilsignaal; restsignaal. P sygnał uchybu. S felsignal. (351)

87. **facility request signal** : part of the selection signals indicating that an additional facility is requested. ★ (signal de) demande de service complémentaire → *demande 6.* R сигнал запроса услуг. D Leistungsmerkmal-Anforderung. E (señal de) petición de servicio suplementario. I segnale di richiesta servizio. N oproepsignaal voor faciliteiten. P sygnał żądania udogodnienia. S betjäningssignal. (721)

88. **feedback signal** : signal depending on the controlled variable and returned to a comparing element. ★ signal de réaction → *signal 134.* R сигнал обратной связи. D Rückführsignal. E señal de realimentación. I segnale di retroazione. N terugkoppelsignaal. P sygnał sprzężenia zwrotnego. S återkopplingssignal. (351)

89. **field synchronizing signal** (*Syn.* field sync pulse) : a signal, generally a sequence of pulses, used to synchronise the field scan of the receiver with that of the television camera. ★ signal de synchronisation de trame → *signal 154.* R синхронизирующие импульсы полей. (723)

90. **figure-shift signal** : the signal which conditions a telegraph receiver to translate all signals received as secondary characters or functions of figures case. ★ signal d'inversion-chiffres → *signal 186.* R сигнал перевода на цифры. D Signal zur Umschaltung in Ziffernstellung. E señal de inversión-cifras. I segnale di passaggio a cifre. N overgangssignaal voor grafische modus. P sygnał zmiany cyfr. S sifferskiftssignal. (721)

91. **final signal unit** : → *unit 22*

92. **forward signal** : a signal used for the establishment of control of a connection, sent in the same direction as call set-up. ★ signal en avant → *signal 198.* R прямой сигнал. D Vorwaertszeichen. E señal hacia adelante. I segnale in avanti. N voorwaarts signaal. P sygnał w przód. S framåtgående signal. (714)

93. **forward switching signal** : a switching signal transmitted in the direction from the caller to the called party. ★ signal (de commutation) vers l'avant → *signal 97.* R коммутационный сигнал прямого направления. D Vorwärtskennzeichen. E señal (de conmutación) hacia adelante. I segnale (di connessione) in avanti. N voorwaarts schakelsignaal. P sygnał komutacyjny w przód. S framåtgående kopplingssignal. (721)

94. **forward-transfer signal** : a forward signal sent from an operator on one exchange to request the assistance of an operator at another exchange. ★ signal d'intervention → *signal 185.* R сигнал вмешательства телефонистки. D Vorwaertsuebergabezeichen. E señal de intervención. I segnale di richiesta di assistenza. N ..... P sygnał przywołania (telefonistki). S ..... (714)

95. **frame alignment signal** : a distinctive signal inserted in every frame or once in every n frames, always occupying the same relative position within the frame, and used to establish and maintain frame alignment. ★ signal de verrouillage de trame → *signal 161.* R цикловый синхросигнал. D Rastergleichlaufsignal. E señal de cerramiento de trama. I segnale di allineamento trama. N ..... P sygnał fazowania ramki. S ramlåsningssignal. (704)

96. **frequency modulated signal generator** : → *generator 15*

97. **front porch (of line-synchronising signal)** : → *porch 2*

98. **function signal** : a set of signal elements used to transmit a function control. ★ signal de fonction → *signal 122.* R функциональный сигнал. D Steuerungssignal. E señal de función. I segnale di funzione. N signaal voor de bewaking van de werking; functiebewakingssignaal. P sygnał sterujący. S funktionssignal. (721)

99. **harmonic conjugate signal** (*Syn.* quadrature signal) : → *signal 151*

100. **hazard warning signal** (on a vehicle) : light signal provided by the simultaneous operation of all the direction indicator lights on a vehicle, and used to indicate that the vehicle constitutes a special hazard to other moving vehicles. ★ signal de détresse → *signal 112.* R предупреждающий сигнал (световой). D Warnblinklicht (am Fahrzeug). E luz de peligro. I luce di pericolo. N waarschuwingsknipperlicht. P światło awaryjne. S varningsblinker. (845)

101. **I signal** : the signal representing the component of chrominance information along the orange-cyan axis of the chromaticity diagram, in the NTSC colour television system. *Note.* — It is allotted a greater transmission bandwidth than the Q signal. ★ signal I → *signal 201.* R сигнал I. (723)

102. idle signal unit : → *unit 32*

103. incorrect (discrete) signal : a discretely-timed signal in which the significant conditions of one or more elements differ from the kind prescribed by the code. ★ signal (discret) incorrect → *signal 190.* R неправильный (дискретный) сигнал. D unvollkommenes (diskretes) Signal. E señal (discreta) incorrecta. I segnale distorto. N fout (discreet) signaal. P sygnał (dyskretny czasowy) błędny. S felaktig signal. (721)

104. initial signal unit : → *unit 34*

105. input signal (of a transmission system) (*Syn.* transmitted source signal) : a signal applied to an input port of the sending terminal equipment of a transmission system. ★ signal à transmettre → *signal 51.* R входной сигнал (системы передачи). D Eingangssignal; zu übertragendes Signal (eines Übertragungssystems). E señal a transmitir; señal de entrada (de un sistema de transmisión). I segnale di ingresso (a un sistema di trasmissione). N ingangssignaal (van een transmissiesysteem). P sygnał źródłowy nadawany. S insignal. (704)

106. insertion reference signal (*Syn.* insertion test signal) : → *signal 108*

107. insertion signal : a signal used for identification, test, control, or the transmission of data, inserted into certain lines of the field-blanking interval outside the period of the field synchronising signal. ★ signal d'insertion → *signal 183.* R вводимый сигнал. (723)

108. insertion test signal (*Syn.* ITS (abbreviation); insertion reference signal; IRS (abbreviation)) : insertion signal used for measurement of the transmission performance of the video signal. *Note.* — The signals can be used for automatic correction of certain faults. ★ signal d'essai (d'insertion) → *signal 170.* R вводимый измерительный сигнал. (723)

109. interfering signal : a signal that impairs the reception of a wanted signal. ★ signal brouilleur → *signal 62.* R мешающий сигнал. D Beeinflussungssignal. E señal interferente. I segnale interferente. N stoorsignaal. P sygnał zakłócający. S störande signal. (161,702)

110. KP signal (*Syn.* start-of-pulsing signal) : → *signal 222*

111. left (stereophonic) signal (*Syn.* A signal) : the signal intended to be reproduced by the loudspeaker system to the left, and in front (of the listener). ★ signal (stéréophonique) gauche → *signal 243.* R левый (стереофонический) сигнал; сигнал А. (723)

112. letter-shift signal : the signal which conditions a telegraph receiver to translate all signals received as primary characters or functions of letters case. ★ signal d'inversion-lettres → *signal 187.* R сигнал перевода на буквы. D Signal zur Umschaltung in Buchstabenstellung. E señal de inversión-letras. I segnale di passaggio a caratteri letterali. N ..... P sygnał zmiany liter. S bokstavsskiftssignal. (721)

113. light signal : visual signal that emanates from a light source. *Notes. 1* — The term is sometimes used for an object or apparatus that emits a light signal, but this usage is not recommended. *2* — In German, the term "Lichtsignal" refers to a signal that stimulates visual perception ; and the term "Signallicht" refers to the visible radiation that conveys a signal. ★ signal lumineux → *signal 202.* R световой сигнал. D Lichtsignal; (Leucht-)Feuer. E señal luminosa. I segnale luminoso. N lichtsignaal. P sygnał świetlny. S ljussignal. (845)

114. limiting (of sound signal level) : → *limiting 12*

115. line signal : the signal actually transmitted over a transmission channel. *Note.* — Where the line signal needs to have a different form from that of the signal applied to the input port of the terminal equipment, this terminal equipment carries out the required reversible processing, such as modulation, multiplexing, coding. ★ signal en ligne → *signal 199.* R линейный сигнал. D Leitungssignal. E señal en línea. I segnale di linea. N lijnsignaal. P sygnał liniowy. S linjesignal. (704)

116. line synchronizing signal (*Syn.* line sync pulse) : a signal, generally a pulse or sequence of pulses, used to synchronise the line scanning process of the receiver with that of the television camera. ★ signal de synchronisation de ligne → *signal 153.* R синхронизирующие импульсы строк. (723)

117. locally-derived synchronization signal : a synchronization signal derived at a synchronization node from the phase relationship between the cyclic time-scale generated by the local clock and the cyclic time-scale of a digital signal received over a synchronization link from a particular distant synchronization node. ★ signal de synchronisation local → *signal 156.* R местный сигнал синхронизации. D örtlich abgeleitetes Synchronisationssignal. E señal de sincronización local. I segnale di sincronizzazione derivato localmente. N lokaal verkregen synchronisatiesignaal. P sygnał synchronizacji formowany lokalnie. S lokal synkroniseringssignal. (704)

118. lone signal unit : → *unit 38*

119. long-path signal : a radio signal having travelled along a path between the transmission point and the reception point for a distance greater than half of the Earth's circumference. ★ signal (se propageant) par l'arc majeur → *signal 237.* D ..... P sygnał długodrożny. (705)

120. luminance signal : an electrical signal representing the luminance of the television picture elements. *Note.* — In colour television the luminance signal is obtained from a specified linear combination of the three primary colour signals. ★ (signal de) luminance → *signal 126.* R сигнал яркости. (723)

121. M signal (*Syn.* sum signal) : → *signal 228*

122. modulated signal (*Syn.* modulated wave; modulated oscillation) : an oscillation or wave produced by modulation. ★ modulat → *modulat 1.* R модулированный сигнал. D moduliertes Signal; modulierte Welle; modulierte Schwingung. E señal modulada; oscilación modulada; onda modulada. I segnale modulato. N gemoduleerd signaal; gemoduleerde golf. P sygnał modulowany; fala modulowana; drganie modulowane. S modulerad våg. (702)

123. modulating signal (*Syn.* modulating wave) : in modulation, a signal, oscillation or wave whose variations are followed by the carrier through modulation. ★ signal modulant → *signal 204.* R модулирующий сигнал. D Modulationssignal; Modulationswelle. E señal moduladora; onda modulante. I segnale modulante. N modulerend signaal. P sygnał modulujący; fala modulująca. S moduleringsvåg. (702)

124. monophonic signal : programme signal corresponding to a monophonic sound control. ★ signal monophonique → *signal 206.* R монофонический сигнал. (723)

125. multiburst signal : a line-repetitive test signal consisting of sequential bursts of various frequencies, superimposed on a constant luminance signal. *Note.* — This signal may also contain luminance bars. ★ signal multisalve → *signal 210.* R частотные пакеты. (723)

126. multi-component signal : in alternating current signalling, a signal consisting of more than one component. ★ signal à plusieurs éléments → *signal 50.* R сигнал с несколькими составляющими. D Zeichen mit mehreren Bestandteilen. E señal de varios elementos. I segnale a più elementi. N ..... P sygnał wieloelementowy. S flerkomponentsignal. (714)

127. multiframe alignment signal : a distinctive signal inserted in every multiframe or once in every *n* multiframes, always occupying the same relative position within the multiframe, and used to establish and maintain multiframe alignment. ★ signal de verrouillage de multitrame → *signal 160.* R сверхцикловый синхросигнал. D Mehrfachrastergleichlaufsignal. E señal de cerramiento de multitramo. I segnale di allineamento di multitrama. N ..... P sygnał fazowania wieloramki. S multiramlåsningssignal. (704)

128. multiplex signal (*Syn.* multiplexed signal) : the composite signal produced by multiplexing several signals. ★ signal multiplex → *signal 208.* R мультиплексный сигнал; групповой сигнал. D Multiplexsignal. E señal múltiplex. I segnale multiplato. N multiplex signaal; gestapeld signaal. P sygnał zbiorczy. S multiplexsignal. (704,721)

129. multiplexed signal (*Syn.* multiplex signal) : → *signal 128*

130. n-ary (digital) signal : a digital signal in which each signal element has one of *n* permitted discrete values. ★ signal (numérique) n-aire → *signal 216.* R Н - ичный (цифровой) сигнал. D n-när-(Digital)Signal. E señal (numérica) n-aria. I segnale (numerico) *n*-ario. N n-tallig (digitaal) signaal. P sygnał (cyfrowy) n-kowy. S n-när signal. (704)

131. negative video signal : a video signal whose instantaneous value decreases when going from black to white. ★ signal d'image en négatif → *signal 178.* R негативный видеосигнал. (723)

132. off-hook signal : a signal indicating the condition of a terminal when it is busy. ★ signal de terminal décroché → *signal 158.* R сигнал "занято" занятости оконечного устройства. D Signal beim Aushaengen (Gabelumschalter geschlossen). E señal de terminal ocupado. I segnale di terminale occupato. N bezetsignaal. P sygnał podniesienia mikrotelefonu. S avlyft-lursignal. (714)

133. **on-hook signal** : a signal indicating the condition of a terminal when it is free. ★ signal de terminal raccroché → *signal 159.* R сигнал "свободно" оконечного устройства. D Signal beim Einhaengen (Gabelumschalter offen). E señal de terminal libre. I segnale di terminale libero. N vrijsignaal. P sygnał położenia mikrotelefonu. S pålagd-lursignal. (714)

134. **operator call-in signal** : a signal sent from a private automatic branch exchange (PABX) extension during a direct inward dialling call to request the intervention of a PABX operator. ★ signal d'appel de l'opérateur → *signal 80.* R сигнал вызова телефонистки. D Bediener-Eintret-Zeichen. E señal de llamada del operador. I segnale di richiamo dell'operatrice interna. N ..... P sygnał przywołania telefonistki aparatu pośredniczącego. S ..... (714)

135. **operator recall signal** : a signal sent to recall an operator at the switchboard which was involved in setting up the connection. ★ signal de rappel → *signal 133.* R сигнал повторного вызова телефонистки. D Bediener-Herbeiruf-Zeichen. E señal de rellamada. I segnale di richiamo dell'operatrice. N ..... P sygnał przywołania ponownego. S ..... (714)

136. **order signal** : a pre-arranged signal sent to a studio or any other broadcast programme source to bring about an intervention in the normal course of the programme. ★ signal d'ordre → *signal 194.* R распорядительный сигнал. (723)

137. **output signal (of a transmission system)** (*Syn.* received source signal) : a signal emitted from an output port of the receiving terminal equipment of a transmission system. *Note.* — Ideally, the output signal of a transmission system should be an undistorted version of the corresponding input signal. ★ signal restitué → *signal 235.* R выходной сигнал (системы передачи). D Ausgangssignal; empfangenes Signal (eines Übertragungssystems). E señal restituida; señal de salida (de un sistema de transmisión). I segnale di uscita (da un sistema di trasmissione). N uitgangssignaal (van een transmissiesysteem); ontvangen bronsignaal. P sygnał źródłowy odbierany. S utsignal. (704)

138. **perfect (discrete) signal** : a discretely-timed signal such that all significant intervals are associated with correct significant conditions and conform accurately to their theoretical durations determined by the code. ★ signal (discret) parfait → *signal 191.* R идеальный (дискретный) сигнал. D vollkommenes (diskretes) Signal. E señal (discreta) perfecta. I segnale perfetto. N ideaal (discreet) signaal. P sygnał (dyskretny czasowy) właściwy. S idealsignal. (721)

139. **phasing signal** : a special signal sent by a facsimile transmitter to the corresponding receiver in order to ensure phasing. ★ signal de mise en phase → *signal 127.* R сигнал фазирования. D Einphassignal. E señal de puesta en fase. I sincronizzazione. N ..... P sygnał fazowania. S fasningssignal. (721)

140. **picture signal** (*Syn.* video signal) : → *signal 251*

141. **pilot (signal)** : → *pilot 11*

142. **positive video signal** : a video signal whose instantaneous value increases when going from black to white. ★ signal d'image en positif → *signal 179.* R позитивный видеосигнал. (723)

143. **primary colour signal** : electrical signal representing the luminance characteristics of the television picture weighted according to a specified spectral sensitivity curve. *Note.* — In general, these correspond to the standard primary colours, red, green and blue. ★ (signal) primaire de couleur → *signal 228.* R сигнал основного цвета. (723)

144. **proceed-to-select signal** : a return switching signal transmitted by an exchange in response to a calling signal or after a call-confirmation signal to indicate that the exchange is ready to receive the selection signals. ★ signal d'invitation à numéroter → *signal 189.* R сигнал "приглашение к набору". D Wahlaufforderung. E señal de invitación a numerar. I invito a selezionare. N ..... P sygnał zaproszenia do wybierania. S valberedskapssignal. (721)

145. **proceed-to-send signal** : a backward signal sent, following the receipt of a seizing signal, to indicate that the necessary conditions have been established for receiving the address information. ★ signal d'invitation à émettre → *signal 188.* R сигнал готовности к приему номера. D Waehlaufforderungszeichen. E señal de invitación de emisión. I segnale di pronto. N goed-voor-ontvangst-signaal. P sygnał zaproszenia do nadawania. S valberedskapssignal. (714)

146. **programme signal** : the electrical signals representing a sound or television programme, used ultimately as a modulating signal for transmission. ★ signal de programme → *signal 131.* R программный сигнал; модулирующий сигнал. (723)

147. **pseudo n-ary signal** : a redundant *n*-ary digital signal which is derived from a m-ary digital signal without change of the line digit rate and for which *n* is greater than *m*. ★ signal pseudo-n-aire → *signal 229.* R псевдо- *n*-ичный сигнал. D Pseudo-n-när-Signal. E señal seudo n-aria. I segnale pseudo *n*-ario. N pseudo-n-waardig signaal. P sygnał niby-n-wartościowy. S kvasi-n-när signal. (704)

148. **pseudo-ternary signal** : a redundant ternary digital signal which is derived from a binary digital signal without change of the line digit rate. *Note.* — An alternative mark inversion signal is an example of a pseudoternary signal. ★ signal pseudo-ternaire → *signal 230.* R псевдотроичный сигнал. D Pseudo-Ternär-Signal. E señal seudoternaria. I segnale pseudo-ternario. N pseudo-ternair signaal. P sygnał niby-trójwartościowy. S kvasi-ternär signal. (704)

149. **pulse signal** : in analogue signalling, a signal of bounded duration which is usually sent once only to indicate a function. ★ signal (de signalisation) impulsionnel → *signal 146.* R импульсный сигнал. D Impulszeichen. E señal impulsional; impulso de señalización. I impulso (di segnalazione); segnale impulsivo. N (im)pulssignaal. P sygnał impulsowy. S pulssignal. (714)

150. **Q signal** : the signal representing the component of chrominance information along the green-magenta axis of the chromaticity diagram, in the NTSC colour television system. *Note.* — It is allotted a smaller transmission bandwidth than the I signal. ★ signal Q → *signal 231.* R сигнал Q. (723)

151. **quadrature signal** (*Syn.* harmonic conjugate signal) : the imaginary part $g(t)$ of an analytic signal. *Note.* — The name "quadrature signal" is justified by the fact that, apart from sign changes, $\sin \omega t$ and $\cos \omega t$ are Hilbert transforms of each other and that consequently the analytic signal corresponding to the real signal $\cos \omega t$ is $e^{j\omega t}$. ★ signal en quadrature → *signal 200.* R квадратурный сигнал. D Quadratursignal ; harmonisches konjugiertes Signal. E señal en cuadratura. I segnale in quadratura. N kwadratuursignaal; 90° in fase verschoven signaal. P sygnał kwadraturowy. S konjugerad harmonisk signal. (702)

152. **quantized signal** : signal having a quantized information parameter. ★ signal quantifié → *signal 232.* R квантованный сигнал. D quantisiertes Signal. E señal cuantificada. I segnale quantizzato. N gekwantificeerd signaal. P sygnał kwantowany. S kvantiserad signal. (351)

153. **radio frequency vision signal** (*Syn.* vision signal) : radio frequency signal obtained when a carrier is modulated with a complete video signal. ★ signal d'image à radiofréquence → *signal 175.* R радиосигнал изображения. (723)

154. **ready for data signal** : a call control signal transmitted by the data circuit terminating equipment to the data terminal equipment to indicate that the data connection is available for data transfer. ★ signal prêt pour la transmission de données → *signal 227.* R сигнал "готовность к данным". D Übertragungsbereitschaftszeichen. E señal de disponible para la transmisión de datos. I pronto a trasmettere (dati). N gereed-voor-datasignaal. P sygnał gotowości wymiany danych. S klarsignal. (721)

155. **received source signal** (*Syn.* output signal (of a transmission system)) : → *signal 137*

156. **redundant digital signal** : the encoded signal produced by encoding a given original signal in accordance with a given redundant line code. *Note.* — For a redundant *n-ary digital signal*, the average binary equivalent content per encoded signal element, expressed in bits, is less than the binary logarithm lb *n*. ★ signal numérique redondant → *signal 219.* R избыточный цифровой сигнал. D redundantes Digitalsignal. E señal numérica redundante. I segnale numerico ridondante. N overdadig digitaal signaal. P sygnał cyfrowy nadmiarowy. S redundant digital signal. (704)

157. **release guard signal** : a backward signal sent in response to a clear-forward signal, to maintain the calling equipment in the busy condition until such time as the called equipment has released. ★ signal de garde à la libération → *signal 123.* R сигнал освобождения. D Ausloesequittungszeichen; Rueckwaertsausloesequittung. E señal de guarda a la liberación. I segnale di controllo svincolo (a ritroso). N beveiligd vrijgeefsignaal. P sygnał zwalniania nadzorczy. S nedkopplingskvittens. (714)

158. remotely-derived synchronization signal : a synchronization signal received at a synchronization node over a synchronization link from a particular distant synchronization node, this signal having been derived at the distant node, as a locally-derived synchronization signal, from the phase relationship between the cyclic time-scale generated by its own clock and the cyclic time-scale of a digital signal received from the node to which the synchronization signal is sent. ★ signal de synchronisation formé à distance → *signal 155.* R дистанционный сигнал синхронизации. D fernabgeleitetes Synchronisationssignal. E señal de sincronización formada a distancia. I segnale di sincronizzazione derivato a distanza. N op-afstand-verkregen synchronisatiesignaal. P sygnał synchronizacji formowany zdalnie. S fjärrsynkroniseringssignal. (704)

159. repeated signal : in analogue signalling, a pulse signal which is repeatedly transmitted as long as the function it indicates persists. ★ signal répété → *signal 234.* R повторяемый сигнал. D Impulswiederholungs-Zeichen. E señal repetida. I segnale impulsivo persistente. N herhaaldsignaal. P sygnał powtarzany. S repeterad signal. (714)

160. repertoire of signals : → *repertoire 1*

161. return switching signal : a switching signal transmitted in the direction from the called party to the caller. ★ signal (de commutation) vers l'arrière → *signal 96.* R коммутационный сигнал обратного направления. D Rückwärtskennzeichen. E señal (de conmutación) hacia atrás. I segnale (di connessione) all'indietro. N terugwaarts schakelsignaal. P sygnał komutacyjny zwrotny. S återgående kopplingssignal. (721)

162. right (stereophonic) signal (*Syn.* B signal) : the signal intended to be reproduced by the loudspeaker system to the right and in front (of the listener). ★ signal (stéréophonique) droit → *signal 242.* R правый (стереофонический) сигнал; сигнал Б. (723)

163. S signal (*Syn.* difference signal) : → *signal 71*

164. sampled signal : a succession of pulses whose values are proportional to the instantaneous values of the signal at the time of each pulse. ★ signal échantillonné → *signal 195.* R сигнал; представленный дискретными значениями (квантованный сигнал). D Abtastsignal; getastetes Signal. E señal muestreada. I segnale campionato. N reeks van signaalmonsters. P sygnał próbkowany. S samplad signal. (101)

165. sampled signal : signal representing a variable which is only intermittently observed and represented. ★ signal échantillonné → *signal 196.* R импульсный сигнал. D abgetastetes Signal; getastetes Signal. E señal muestreada. I segnale campionato. N ..... P sygnał próbkowany. S samplad signal. (351)

166. seizing signal : a forward signal sent at the start of the busy condition of a traffic-carrying device. ★ signal de prise → *signal 130.* R сигнал занятия. D Belegungszeichen. E señal de retención. I segnale di impegno. N beleggingssignaal. P sygnał wzięcia do pracy. S anropssignal. (714)

167. selection signals : a sequence of forward signals giving to an exchange information necessary to set up a call. ★ séquence de sélection → *séquence 5.* R сигналы набора. D Wählzeichenfolge. E secuencia de selección. I selezione. N kiessignalen. P sygnały wybiercze. S söksignal. (721)

168. series injection of a centralized telecontrol signal : → *injection 6*

169. service signal : signal transmitted automatically by the network to the calling terminal indicating the progress of a call or the cause of failure of the call attempt. ★ signal de service → *signal 144.* R служебный сигнал. D Dienstsignal. E señal de servicio. I segnale di servizio. N dienstsignaal. P sygnał służbowy. S servicesignal. (721)

170. short-path signal : a radio signal having travelled along a path between the transmission point and the reception point for a distance shorter than half of the Earth's circumference. ★ signal (se propageant) par l'arc mineur → *signal 238.* D ..... P sygnał krótkodrożny. (705)

171. shunt injection of a centralized telecontrol signal : → *injection 7*

172. signal : a time-dependent physical quantity representing information. ★ signal → *signal 47.* R сигнал. D Signal. E señal. I segnale. N signaal. P sygnał. S signal (storhet). (101)

173. signal : measurable variable, one or more parameters of which carry information about one or more variables which the signal represents. these parameters are called "information parameters" of the signal. *Examples :* For an amplitude-modulated sinusoidal carrier, the instantaneous amplitude is the information parameter of the signal; for a duration- or position- modulated pulse signal, the duration or width or the position of each pulse respectively is the information parameter of the signal. ★ signal → *signal 48.* R сигнал. D Signal. E señal. I segnale. N signaal. P sygnał. S signal. (351)

174. signal : a physical phenomenon one or more of whose characteristics may vary to represent information. *Note.* — The physical phenomenon may be for instance an electromagnetic wave or acoustic wave and the characteristic may be an electric field, a voltage or a sound pressure. ★ signal → *signal 49.* R сигнал. D Signal. E señal. I segnale. N signaal. P sygnał. S signal. (701,702,704)

175. signal component : → *component 51*

176. signal converter : → *converter 16*

177. signal current : → *current 186*

178. signal diode : → *diode 20*

179. signal distribution : → *distribution 37*

180. signal electrode : → *electrode 88*

181. signal element : → *element 49*

182. signal element : → *element 50*

183. signal element (*Syn.* unit interval) : → *interval 25*

184. signal generator : → *generator 31*

185. signal imitation : → *imitation 1*

186. signal/interference ratio (*Syn.* signal to interference ratio) : → *ratio 85*

187. signal light : → *light 66*

188. signal message : → *message 14*

189. signal/noise ratio (*Syn.* signal-to-noise ratio) : → *ratio 91*

190. signal plate : → *plate 29*

191. signal processing (*Syn.* modulation processing) : → *processing 2*

192. signal processing antenna : → *antenna 104*

193. signal quality detection : → *detection 12*

194. (signal) quality detection : → *detection 13*

195. signal recording telegraphy : → *telegraphy 11*

196. signal repetition : → *repetition 9*

197. signal spill-over : → *spill-over 2*

198. signal tilt : → *tilt 3*

199. signal to crosstalk ratio : → *ratio 84*

200. signal to interference ratio : → *ratio 85*

201. signal to noise ratio of a tape recorder : → *ratio 86*

202. signal transfer point : → *point 43*

203. signal transit time : → *transit-time 2*

204. signal unit : → *unit 58*

205. signal unit indicator : → *indicator 23*

206. (signalling) signal (in telecommunication) : a signal used to convey information relating to a particular circuit, a particular call, or to the management of traffic. *Notes. 1* — A signal may stem from the state or change of state of the system which sends it. *2* — A signal may intentionally change the state of the system which receives it : the state of the receiving system may be indeterminate whilst the signal is being applied to it. ★ signal (de signalisation) → *signal 145.* R сигнал (сигнализации) (в электросвязи). D Zeichen; Zeichengabe; Signal; Kennzeichen. E señal (de señalización) (en telecomunicación). I segnale. N signaal; signaleringsbericht. P sygnał (w sygnalizacji telekomunikacyjnej). S signal. (714)

207. signal-to-bias noise ratio : → *ratio 87*

208. signal-to-erased signal ratio after bulk erasure : → *ratio 89*

209. signal-to-noise ratio : → *ratio 90*

210. signal-to-noise ratio : → *ratio 91*

211. simple signal : in alternating current signalling, a signal in which only one frequency is transmitted at a time. ★ signal simple → *signal 239.* R простой сигнал. D Einfachzeichen. E señal simple. I segnale semplice. N enkelvoudig signaal. P sygnał prosty. S enkel signal. (714)

212. single-component signal : in alternating current signalling, a signal consisting of only one component. ★ signal à un élément → *signal 52.* R сигнал с одной составляющей. D Zweifaches Bestandteil des Zeichen. E señal de un elemento.

I segnale a singolo elemento. N ..... P sygnał jednoelementowy. S enkomponentsignal. (714)

213. **sound signal** : audiofrequency programme signal representing a sound programme or the sound accompanying a television picture. *Note.* — In English the term sound programme signal is used to designate the programme signal representing a sound programme. ★ signal son → *signal 241.* R звуковой сигнал. (723)

214. **space signal** : signal corresponding to a code combination which causes the printing position to be advanced by the character pitch without printing. ★ signal d'espace → *signal 169.* R сигнал пробела. D Leerzeichensignal. E señal de espacio. I spazio. N spatieteken. P sygnał odstępu. S blankstegssignal. (721)

215. **ST signal** (*Syn.* end-of-pulsing signal) : → *signal 81*

216. **standardized digital signal** : a digital signal having a digit rate standardized by CCITT, primarily for use in the standardized digital multiplex hierarchy. *Notes. 1* — A standardized digital signal may or may not be a multiplexed assembly of standardized digital signals from a lower hierarchical level. *2* — Examples of such signals are "standardized 2 048 kbit/s digital signal" and "standardized 44 736 kbit/s digital signal", which may be abbreviated to "2 048 kbit/s digital signal" and "44 736 kbit/s digital signal" or, by convention, to "2 Mbit//s signal" and "45 Mbit/s signal". ★ signal numérique normalisé → *signal 217.* R стандартизованный цифровой сигнал. D standardisiertes Digitalsignal. E señal numérica normalizada. I segnale numerico normalizzato. N genormaliseerd digitaal signaal. P sygnał cyfrowy standardowy. S standardiserad digitalsignal. (704)

217. **standardized 64 kbit/s digital signal** (*Syn.* 64 kbit/s signal (abbreviation)) : a standardized digital signal having a standardized digit rate of 64 kbit/s, and which constitutes the normal basis of a primary digital group. ★ signal (numérique normalisé) à 64 kbit/s → *signal 218.* R стандартизованный цифровой сигнал со скоростью 64 кбит/с. D standardisiertes 64-kbits/s-Digitalsignal; 64-kbit/s-Signal (Abkürzung). E señal (numérica normalizada) o 64 kbit/s. I segnale (numerico normalizzato) a 64 kbit/s. N genormaliseerd 64 kbit/s digitaal signaal. P sygnał cyfrowy standardowy 64 kbit/s. S standardiserad 64 kbit/s-signal. (704)

218. **start of heading signal** : → *start 9*

219. **start of text signal** : → *start 10*

220. **start signal** : in start-stop transmission, a signal preceding each group of signal elements which prepares the receiving device for the reception of the elements of the group. ★ signal de départ → *signal 111.* R стартовый сигнал. D Startsignal. E señal de arranque. I segnale di start. N startsignaal. P sygnał startu. S startsignal. (721)

221. **start-of-block signal** : signal which identifies the start of a block. ★ signal de début de bloc → *signal 105.* R сигнал начала блока. D Blockanfangssignal. E señal de comienzo de bloque. I segnale di inizio di un blocco. N blokstartsignaal. P sygnał początku bloku. S blockbörjanssignal. (721)

222. **start-of-pulsing signal** (*Syn.* KP signal) : a forward signal sent to indicate that transmission of the address signals is about to start. ★ signal de début de numérotation → *signal 106.* R сигнал начала набора номера. D Waehlbeginnzeichen. E señal de comienzo de numeración. I segnale di inizio della selezione; KP. N kiesstartsignaal. P sygnał początku nadawania (sygnału) adresu. S nummerstartsignal. (714)

223. **start-stop signal** : signal constituted by a sequence of groups of isochronous signal elements, each group representing a character or a block and having a duration equal to the duration of an integral number of unit intervals and being separated from each other by time intervals of which the duration is not fixed. ★ signal arythmique → *signal 57.* R стартстопный сигнал. D Start-Stop-Signal. E señal arritmica. I segnale start-stop. N start/stop-signaal. P sygnał arytmiczny; sygnał start-stop. S start-stoppsignal. (721)

224. **stereophonic (multiplex) signal** : the signal obtained when the left and right sterophonic signals are multiplexed. ★ signal (multiplex) stéréophonique → *signal 209.* R стереофонический (уплотненный) сигнал. (723)

225. **stop signal** : in start-stop transmission, a signal following each group of signal elements which prepares the receiving device for the reception of the subsequent start signal, or brings the device to rest. ★ signal d'arrêt → *signal 81.* R стоповый сигнал. D Stopsignal. E señal de parada. I segnale di stop. N stopsignaal. P sygnał stopu. S stoppsignal. (721)

226. **subscriber-busy signal** : a backward signal sent to indicate that the line or lines connecting the called party to the exchange is or are busy. ★ signal d'abonné occupé → *signal 71.* R сигнал занятости абонента. D Teilnehmerbesetzt-Zeichen. E señal de abonado ocupado. I segnale di chiamato occupato. N bezetsignaal. P sygnał zajętości abonenta. S upptagetsignal. (714)

227. **subsequent signal unit** : → *unit 62*

228. **sum signal** (*Syn.* M signal) : a signal theoretically equal to half the sum of the left and right stereophonic signals, and in practice proportional to this sum. *Note.* — The sum signal is considered as a compatible monophonic signal. ★ signal somme → *signal 240.* R суммарный сигнал; сигнал М. (723)

229. **supervisory signal** : a forward or backward signal to indicate the state of a traffic-carrying device involved in a connection. ★ signal de supervision → *signal 149.* R сигнал контроля соединения. D Hinweiszeichen; Ueberwachungszeichen. E señal de supervisión. I segnale di supervisione. N bewakingssignaal. P sygnał nadzoru. S övervakningssignal. (714)

230. **sweep signal** : signal which controls the movement of the scanning spot. ★ signal de balayage → *signal 85.* R сигнал развертки. (723)

231. **switching signal** : a signal transmitted between two exchanges or between one exchange and a terminal for establishing or clearing a call. ★ signal de commutation → *signal 94.* R коммутационный сигнал. D Schaltkennzeichen. E señal de conmutación. I segnale di connessione. N schakelsignaal. P sygnał komutacyjny. S kopplingssignal. (721)

232. **switching signal telex-data** : a signal which switches a terminal from the telex mode to the data transmission mode. ★ signal de commutation télex-données → *signal 95.* R сигнал переключения "телекс-данные". D Telex-Daten-Umschaltesignal. E señal de conmutación télex-datos. I segnale di commutazione telex-dati. N uit-telexmodus-signaal. P sygnał przełączający teleks-dane. S omkopplingssignal till datamod. (721)

233. **symmetrical (alternating) signal** : an alternating signal in which points one half a period apart have equal values and opposite signs. ★ signal (alternatif) symétrique → *signal 53.* R симметричный сигнал. D (wechselweise) symmetrisches Symbol. E señal (alterna) simétrica. I segnale (alternato) simmetrico. N symmetrisch (wisselspannings)signaal. P sygnał (przemienny) symetryczny. S symmetrisk signal. (702)

234. **synchronization signal** : a signal which indicates the phase relationship between two cyclic time-scales or a significant variation of this relationship. ★ signal de synchronisation → *signal 151.* R сигнал синхронизации. D Synchronisationssignal; Synchronisierungssignal. E señal de sincronización. I segnale di sincronizzazione. N synchronisatiesignaal. P sygnał synchronizacji. S synkroniseringssignal. (704)

235. **synchronization signal unit** : → *unit 63*

236. **synchronizing signal** : a signal used to determine the timing for the scanning processes in transmission and reception. ★ signal de synchronisation → *signal 152.* R сигнал синхронизации. (723)

237. **telegraph signal** : a signal representing all or part of one or more telegraph messages. ★ signal télégraphique → *signal 244.* R телеграфный сигнал. D Telegrafiesignal. E señal telegráfica. I segnale telegrafico. N telegraafsignaal. P sygnał telegraficzny. S telegrafsignal. (721)

238. **television signal** : programme signal representing a television programme. ★ signal de télévision → *signal 157.* R телевизионный сигнал. (723)

239. **ternary (digital) signal** : a digital signal in which each signal element has one of three permitted discrete values. ★ signal (numérique) ternaire → *signal 220.* R троичный (цифровой) сигнал. D Ternär-(Digital)Signal. E señal (numérica) ternaria. I segnale (numerico) ternario. N ternair (digitaal) signaal. P sygnał (cyfrowy) trójkowy. S ternär signal. (704)

240. **test signal** : special signal used as a video signal for measuring the characteristics of television equipment or of a transmission channel. ★ signal type → *signal 246.* R измерительный сигнал. (723)

241. **timing signal** : a signal used to determine the instants at which operations are initiated. ★ signal de commande temporelle → *signal 93.* R сигнал синхронизации. D Auslösesignal. E señal de control temporal. I segnale di temporizzazione. N starttijdsignaal. P sygnał czasujący. S taktsignal. (702,704)

242. **transmitted source signal** (*Syn.* input signal (of a transmission system)) : → *signal 105*

243. **U signal** : the colour difference signal corresponding to primary colour blue in the PAL colour television system. ★ signal U → *signal 247.* R сигнал U. (723)

244. **unblocking signal** : a signal sent in the same direction as a blocking signal indicating that the use of the device may be resumed. ★ signal de déblocage → *signal 104.* R сигнал разблокировки. D Freigabezeichen. E señal de desbloqueo. I segnale di sblocco. N deblokkeringssignaal. P sygnał odblokowania. S deblockeringssignal. (714)

245. **undesired signal** (*Syn.* unwanted signal) : → *signal 247*

246. **(uniform) multivalue digital signal** : a digital signal whose nominal permitted discrete values form a set in which adjacent values differ by the same constant amount. *Note.* — A uniform multivalue digital signal is usually used as a line signal. ★ signal numérique multivalent uniforme → *signal 215.* R (равномерный) многоуровневый цифровой сигнал. D Mehrwertdigitalsignale. E señal numérica multivalente uniforme. I segnale numerico multivalore (uniforme). N (uniform) meerwaardig digitaal signaal. P sygnał (cyfrowy) wielowartościowy jednolity. S ..... (704)

247. **unwanted signal** (*Syn.* undesired signal) : a signal that may impair the reception of a wanted signal. ★ signal non désiré → *signal 211.* R нежелательный сигнал. D Störsignal; unerwünschtes Signal. E señal no deseada. I segnale spurio. N ongewenst signaal. P sygnał niepożądany. S oönskad signal. (161,702)

248. **(user) class of service signal** : → *class 14*

249. **V signal** : colour difference signal corresponding to primary colour red in the PAL coulour television system. ★ signal V → *signal 249.* R сигнал V. (723)

250. **vacant-number signal** : a backward signal sent to indicate that the called number has not been allocated. ★ signal de numéro non utilisé → *signal 128.* R сигнал незадействованности номера. D Zeichen fuer nicht zugeteilte Rufnummer. E señal de número no utilizado; señal de número vacante. I segnale di numero non assegnato. N abonnee-niet-aangesloten-signaal. P sygnał nieobsadzenia. S vakanssignal. (714)

251. **video signal** (*Syn.* picture signal) : electrical signal representing the brightness and colour characteristics of a television picture. ★ signal (d')image → *signal 174.* R видеосигнал. (723)

252. **video signal source gamma** : → *gamma 13*

253. **vision signal** (*Syn.* radio frequency vision signal) : → *signal 153*

254. **visual signal** : visible phenomenon intended to convey information. ★ signal visuel → *signal 250.* R визуальный сигнал. D visuelles Signal. E señal visual. I segnale visivo. N visueel signaal. P sygnał optyczny. S visuell signal. (845)

255. **voice-frequency signal** : a signal, generally electric, representing speech or, in certain cases, other sounds within the range of voice-frequencies. ★ signal vocal → *signal 251.* R тональный сигнал. D Sprachfrequenzsignal. E señal vocal. I segnale a frequenza vocale. N spraakfrequent signaal; audiofrequent signaal. P sygnał mowy. S talfrekvenssignal. (722)

256. **wanted signal** (*Syn.* desired signal) : a signal conveying information sought by one or more receivers. ★ signal utile → *signal 248.* R полезный сигнал. D Nutzsignal; gewünschtes Signal. E señal útil; señal deseada. I segnale utile. N gewenst signaal. P sygnał użyteczny. S önskad signal. (702)

257. **warning signal** : a function signal which operates an audible or visual calling device with a view to attracting attention. ★ signal avertisseur → *signal 58.* R предупредительный сигнал. D Warnsignal. E señal de advertencia. I segnale d'allarme. N waarschuwingssignaal. P znak ostrzegawczy. S varningssignal. (721)

258. **"Who are you" signal (function)** (*Syn.* WRU signal) : signal corresponding to a code combination which, when received by a telegraph terminal or data station, causes a call-sign device to transmit a call-sign. ★ signal "qui est là" → *signal 233.* R сигнал (функция) "Кто там ?". D Wer-da-Signal. E señal (función) "¿Quien es Usted?". I segnale "Chi va là"; WRV. N "met wie"-signaal(functie). P sygnał "kto tam ?". S "Vem där"-signal. (721)

259. **window signal** : test signal representing a uniform background, with a uniform rectangular or square area, clearly contrasted in relation to the background. ★ signal de fenêtre → *signal 115.* R сигнал окна. (723)

260. **WRU signal** (*Syn.* "Who are you" signal (function)) : → *signal 258*

261. **Y signal** (in television) : signal representing the luminance. ★ signal Y → *signal 252.* R сигнал Y. (723)

262. **Y-C signal** : video signal used in colour television component comprising separate luminance and chrominance signals. ★ signal Y-C → *signal 253.* R сигнал Y - C. (723)

263. **64 kbit/s signal** (*Syn.* standardized 64 kbit/s digital signal) : → *signal 217*

signalling

1. **ac signalling** (*Syn.* alternating current signalling) : → *signalling 2*

2. **alternating current signalling** (*Syn.* ac signalling) : an analogue signalling method in which the signalling information is represented by alternating current signals. ★ signalisation en courant alternatif → *signalisation 37.* R сигнализация переменным током. D Wechselstromzeichengabe. E señalización en corriente alterna. I segnalazione in corrente alternata. N wisselstroomsignalering. P sygnalizacja prądem przemiennym. S växelströmssignalering. (714)

3. **analogue signalling** : a signalling method using an analogue transmission channel. ★ signalisation analogique → *signalisation 25.* R аналоговая сигнализация. D analoge Zeichengabe. E señalización analógica. I segnalazione analogica. N analoge signalering. P sygnalizacja analogowa. S analogsignalering. (714)

4. **associated signalling** : a mode of operation in which the signal messages for a group of traffic circuits between two switching centres are sent over a signalling link which terminates at these centres. ★ signalisation associée → *signalisation 27.* R связанная сигнализация. D assoziierte Zeichengabe. E señalización asociada. I segnalazione associata. N geassocieerde signalering. P sygnalizacja skojarzona. S förenad signalering. (714)

5. **central battery signalling (telephony)** (*Syn.* common battery signalling (telephony); CBS (abbreviation)) : a telephone system in which the switching entity supplies signalling current but not feeding current to the telephone stations. *Note.* — Local batteries are required for feeding purposes. ★ (téléphonie à) batterie centrale limitée à la signalisation → *batterie 31.* R сигнализация от центральной батареи (телефония); ЦВС (сокращение). D ZB-Signalisierung. E telefonía con batería central de señalización. I segnalazione a batteria centrale. N ..... P system telefoniczny o zasilaniu centralnym sygnalizacyjnym. S lokalbatterisystem; LB-system. (722)

6. **channel-associated signalling** : a signalling method in which the signals for the traffic carried by a single transmission channel are transmitted over the channel itself or over a signalling channel permanently associated with it. *Note.* — The term may also be applied when the signals for a telecommunication circuit are transmitted over that channel. ★ signalisation voie par voie → *signalisation 53.* R сигнализация по методу привязки к каналу. D kanalassoziierte Zeichengabe. E señalización por canal asociado. I segnalazione associata al circuito. N kanaalgebonden signalering. P sygnalizacja w kanale skojarzonym. S kanalbunden signalering. (714,721)

7. **common battery signalling (telephony)** (*Syn.* central battery signalling (telephony)) : → *signalling 5*

8. **common-channel signalling** (*Syn.* label-addressed signalling) : a signalling method in which signalling information relating to a multiplicity of telecommunication circuits is conveyed over a single transmission channel by labelled messages. ★ signalisation (par canal) sémaphore → *signalisation 46.* R сигнализация по общему каналу. D zentrale Zeichengabe; Zentralkanal-Zeichengabe. E señalización por canal común; señalización (por canal de señalización). I segnalazione a canale comune. N gemene-weg-signalering. P sygnalizacja w kanale wspólnym. S gemensam-kanalsignalering. (714,721)

9. **compelled signalling** : a signalling method in which, after one signal has been sent, the sending of any further signals in the

same direction is inhibited until the sent signal has been acknowledged by the receiving terminal and the acknowledgement has been received. ★ signalisation asservie → *signalisation 26.* R взаимоконтролируемая сигнализация. D Zwangs-Zeichengabe. E señalización de inhibición. I segnalazione asservita. N gedwongen signalering. P sygnalizacja współzależna. S tvångsstyrd signalering. (714)

10. **data channel signalling conditions** : → *condition 5*
11. **dc signalling** (*Syn.* direct current signalling) : → *signalling 13*
12. **digital signalling** : a signalling method using a digital transmission channel. ★ signalisation numérique → *signalisation 45.* R цифровая сигнализация. D digitale Zeichengabe. E señalización digital. I segnalazione numerica. N digitale signalering. P sygnalizacja cyfrowa. S digitalsignalering. (714)
13. **direct current signalling** (*Syn.* dc signalling) : an analogue signalling method in which the signalling information is represented by direct current signals. ★ signalisation en courant continu → *signalisation 38.* R сигнализация постоянным током. D Gleichstrom-Zeichengabe. E señalización en corriente continua. I segnalazione in corrente continua. N gelijkstroomsignalering. P sygnalizacja prądem stałym. S likströmssignalering. (714)
14. **diversity of a signalling module** : → *diversity 3*
15. **e and m signalling** : a channel-associated signalling method for transferring signalling information between transmission equipment and switching equipment over leads designated e and m : the "e" lead transmits to the switching equipment and the "m" lead transmits to the transmission equipment. *Note.* — "e" and "m" are respectively the abbreviations of "ear" and "mouth". ★ signalisation TRON/RON → *signalisation 52.* R сигнализация типа. D e- und m - Signaluebertragung. E señalización transmisión/recepción; señalización E y M. I segnalazione E & M. N e/m-signalering. P sygnalizacja po żyłach nadawania i odbioru. S ..... (714)
16. **en-bloc signalling** : a signalling method in which the address digits are assembled into one block for onward transmission. ★ signalisation en bloc → *signalisation 36.* R сигнализация с передачей "блоком". D Blockwahl. E señalización en bloque. I segnalazione con invio "in blocco". N en-bloc-signalering. P sygnalizacja blokowa. S blocksignalering. (714)
17. **end-to-end signalling** : a signalling method in which signals are transmitted from one end of a multi-link connection directly to the other end. ★ signalisation de bout en bout → *signalisation 32.* R сигнализация из конца конец. D Ende-zu-Ende-Zeichengabe. E señalización extremo a extremo. I segnalazione da estremo a estremo. N van-eind-tot-eind-signalering. P sygnalizacja od końca do końca. S genomgående signalering. (714)
18. **frequency shift signalling** (*Syn.* frequency shift keying) : → *keying 3*
19. **fully dissociated signalling** : a form of non-associated signalling in which the signal messages can follow any satisfactory routes through the signalling network, without regard to the related traffic circuits. ★ signalisation entièrement dissociée → *signalisation 39.* R полностью несвязанная сигнализация. D voellig unabhaengige Zeichengabe. E señalización enteramente disociada. I segnalazione totalmente dissociata. N ..... P sygnalizacja oderwana. S helt uppdelad signalering. (714)
20. **in-band signalling** : a signalling method in which signals are sent over the same transmission channel or telecommunication circuit as the user's communication and in the same frequency band as that provided for the users. ★ signalisation "dans la bande" → *signalisation 30.* R внутриполосная сигнализация. D In-Bandzeichengabe. E señalización "en la banda". I segnalazione "in banda". N binnen-de-band-signalering. P sygnalizacja w kanale rozmównym. S inombandssignalering. (714)
21. **in-slot signalling** : a digital channel-associated signalling method in which the signals for a channel are transmitted by a digit time-slot in the channel time-slot. *Note.* — The digit time-slot concerned may be permanently allocated for signalling, or alternatively it may be periodically allocated for this purpose by means of a multiframe. ★ signalisation dans le créneau temporel → *signalisation 31.* R сигнализация во временном канальном интервале. D Schlitz-interne Signaluebertragung. E señalización en ranura de tiempo. I segnalazione PCM allocata nell'intervallo di canale. N binnen-de-sleuf-signalering. P sygnalizacja w szczelinie czasowej; sygnalizacja szczelinowa. S inomkanalsignalering. (714)
22. **label-addressed signalling** (*Syn.* common-channel signalling) : → *signalling 8*
23. **line signalling** : a signalling method in which signals are transmitted between network terminals which continuously monitor part or all of the traffic circuit. ★ signalisation de ligne → *signalisation 33.* R линейная сигнализация. D Leitungszeichengabe. E señalización en línea. I segnalazione di linea. N lijnsignalering. P sygnalizacja liniowa. S linjesignalering. (714)
24. **link-by-link signalling** : a signalling method in which signals are transmitted in a multi-link connection and are stored at the next switching point for subsequent transmission. ★ signalisation section par section → *signalisation 50.* R сигнализация по участкам. D Link-by-link-Zeichengabe. E señalización sección por sección. I segnalazione sezione per sezione. N ..... P sygnalizacja odcinkowa. S länk-för-länksignalering. (714)
25. **loop/disconnect signalling** : a direct current signalling method in which the signalling information is represented by the making and breaking of a loop circuit. ★ signalisation par ouverture de boucle → *signalisation 47.* R сигнализация размыканием шлейфа. D Schleifenschlusskennzeichengabe; Schleifenschluss-Zeichengabe. E señalización por apertura de bucle. I segnalazione per apertura del circuito ad anello. N lussignalering. P sygnalizacja w pętli. S avbrottssignalering. (714)
26. **mf signalling** (*Syn.* multi-frequency signalling) : → *signalling 27*
27. **multi-frequency signalling** (*Syn.* mf signalling) : a voice-frequency signalling method in which the signalling information is represented by compound signals, each consisting of *n* frequencies from a set of *m* frequencies. ★ signalisation multifréquence → *signalisation 43.* R многочастотная сигнализация. D Mehrfrequenzzeichengabe. E señalización multifrecuencia; señalización MF. I segnalazione multifrequenza; MF. N multitooncode-signalering. P sygnalizacja wielocz̨estotliwościowa. S flerfrekvenssignalering. (714)
28. **non-associated signalling** : a mode of operation in which the signal messages for a group of traffic circuits between two switching centres are sent over two or more signalling links in tandem, with the signal messages being processed for forward routing and forwarded to the next link at one or more signal transfer points. ★ signalisation non associée → *signalisation 44.* R несвязанная сигнализация. D nichtassoziierte Zeichengabe. E señalización no asociada. I segnalazione non associata. N niet-geassocieerde signalering. P sygnalizacja nieskojarzona. S uppdelad signalering. (714)
29. **out-band signalling** : a signalling method in which signals are sent over the same transmission channel or telecommunication circuit as the user's communication but in a different frequency band from that provided for the users. ★ signalisation "hors bande" → *signalisation 40.* R внеполосная сигнализация. D Ausserbandzeichengabe; Out-Band-Zeichengabe. E señalización "fuera de banda". I segnalazione "fuori banda". N buiten-de-band-signalering. P sygnalizacja pozapasmowa. S utombandssignalering. (714)
30. **out-slot signalling** : a digital channel-associated signalling method in which the signals for a speech channel are transmitted in one or more digit time-slots, but not within the channel time-slot. ★ signalisation hors créneau temporel → *signalisation 41.* R сигнализация в вынесенном временном интервале. D Schlitz-externe Signaluebertragung. E señalización fuera de ranura de tiempo. I segnalazione PCM allocata fuori dall'intervallo di canale. N buiten-de-sleuf-signalering. P sygnalizacja pozaszczelinowa. S utomkanalsignalering. (714)
31. **overlap signalling** : a signalling method in which the onward transmission of address signals from a switching centre may commence before the reception of the signals from the previous switching centre has been completed. ★ signalisation avec chevauchement → *signalisation 29.* R сигнализация с перекрытием. D Ueberlappende Zeichengabe. E señalización con superposición. I segnalazione con sovrapposizione. N overlapsignalering. P sygnalizacja na zakładkę. S siffra-för-siffrasignalering. (714)

32. **phase shift signalling** (*Syn.* phase shift keying) : → *keying 8*
33. **protection system associated with signalling system** : → *system 162*
34. **quasi-associated signalling** : a form of non-associated signalling in which the signal messages may take only one prescribed route through the signalling network. ★ signalisation quasi associée → *signalisation 49.* R квазисвязанная сигнализация. D quasiassoziierte Zeichengabe. E señalización cuasi asociada. I segnalazione quasi associata. N quasi-geassocieerde signalering. P sygnalizacja niby-skojarzona. S delvis förenad signalering. (714)
35. **register signalling** : a signalling method in which signals are transmitted between registers during the call set-up phase. ★ signalisation d'enregistreur → *signalisation 34.* R межрегистровая сигнализация. D Registerzeichengabe. E señalización de registrador. I segnalazione di registro. N registersignalering; opbouwsignalering. P sygnalizacja rejestrowa. S registersignalering. (714)
36. **regular signalling link** : → *link 34*
37. **reserve signalling link** : → *link 35*
38. **signalling** (in telecommunication) : the transmission of information specifically concerned with the establishment and control of connections, between entities of a telecommunication network. ★ signalisation → *signalisation 21.* R сигнализация (в электросвязи). D Zeichengabeverfahren. E señalización (en telecomunicación). I segnalazione. N signalering. P sygnalizacja (w telekomunikacji). S signalering. (714)
39. **signalling** (in telecommunication) : the exchange of information specifically concerned with call set-ups and supervision in a telecommunication network and with network management. ★ signalisation → *signalisation 22.* D Zeichengabe (in der Fernmeldetechnik). P sygnalizacja (w telekomunikacji). (715)
40. **signalling channel** : → *channel 43*
41. **signalling circuit** : → *circuit 163*
42. **signalling current** : → *current 187*
43. **signalling information** : → *information 29*
44. **signalling link** : → *link 37*
45. **signalling link set** (*Syn.* signalling module) : → *module 2*
46. **signalling module** : → *module 2*
47. **signalling network** : → *network 85*
48. **signalling network** : → *network 86*
49. **signalling network management** : → *management 5*
50. **signalling path** : → *path 25*
51. **signalling rate** (*Syn.* binary rate) : → *rate 5*
52. **signalling route** : → *route 10*
53. **signalling routing** : → *routing 8*
54. **signalling security** : → *security 5*
55. **(signalling) signal** : → *signal 206*
56. **signalling system** : → *system 186*
57. **signalling time-slot** : → *time-slot 5*
58. **speech digit signalling** (*Syn.* bit stealing (USA)) : a digital channel-associated signalling method in which digit time-slots, normally used for the transmission of encoded speech, are periodically used to transmit signals. ★ signalisation par vol de bit → *signalisation 48.* R сигнализация по цифровому речевому каналу. D digitale Signaluebertragung. E señalización por dígitos de palabra. I segnalazione PCM allocata negli intervalli di fonia. N ..... P sygnalizacja w kanale rozmównym cyfrowym. S tidluckesignalering. (714)
59. **synchronous signalling** (in common channel signalling) : a signalling method in which fixed length signal units are transmitted continuously at a uniform bit rate over a signalling channel, and in which the receiving terminal is operated in the correct time relationship for the reception of the signal units. *Note.* — The two signalling c hannels in opposite directions in a signalling link are not necessarily synchronized to each other. ★ signalisation synchrone → *signalisation 51.* R синхронная сигнализация. D synchrone Signaluebertragung. E señalización síncrona. I segnalazione sincrona (nella segnalazione a canale comune). N synchrone signalering. P sygnalizacja synchroniczna. S synkron signalering. (714)
60. **vf signalling** (*Syn.* voice-frequency signalling) : → *signalling 61*
61. **voice-frequency signalling** (*Syn.* vf signalling) : an analogue signalling method in which the signalling information is represented by alternating current signals which have frequencies in the telephone speech band. ★ signalisation à fréquences vocales → *signalisation 23.* R сигнализация тональной частотой. D Tonfrequenzzeichengabe. E señalización en audiofrecuencia; señalización AF. I segnalazione a frequenza vocale. N toonfrequente signalering. P sygnalizacja wewnątrzpasmowa. S tonfrekvenssignalering. (714)

signal-to-disturbance

1. **signal-to-disturbance ratio** : → *ratio 88*

significant

1. **coherent significant instants** : → *instant 1*
2. **genetically significant dose** : → *dose 31*
3. **number of significant conditions** : → *number 22*
4. **significant condition** : → *condition 25*
5. **significant instant** : → *instant 6*
6. **significant instant** : → *instant 7*
7. **significant interval** : → *interval 18*
8. **theoretical duration of a significant interval** : → *duration 42*

signum

1. **signum** : a function equal to −1 for all negative values of the independent variable, +1 for all positive values and 0 for the zero value. ★ fonction signe → *fonction 35.* R знаковая функция. D Signum. E función signo; signo. I funzione segno; signum. N signum. P funkcja znaku; signum. S signum. (101)

silent

1. **silent period** : → *period 33*
2. **silent zone** : → *zone 12*

silica

1. **fused silica** (*Syn.* vitreous silica) : a vitreous substance consisting of almost pure silicon dioxide SiO_2. ★ silice fondue → *silice 3.* R кварцевое стекло. D Quarzglas. E silicio fundido; silicio vítreo. I silice fusa; silice vetrosa. N kwartsglas. P krzemionka topiona; szkło kwarcowe. S syntetiskt kvartsglas. (731)
2. **plastic clad silica fibre** : → *fibre 22*
3. **vitreous silica** (*Syn.* fused silica) : → *silica 1*

silicone

1. **silicone liquid** : → *liquid 11*

silver-cadmium

1. **silver-cadmium battery** : → *battery 63*

silvering

1. **silvering** : the process of providing a metallic silver coating on the surface of a lacquer original to enable a metal master or stamper to be formed by subsequent electroplating. ★ argenture → *argenture 1.* R серебрение. D Versilberung. E plateado. I argentatura. N verzilveren. P srebrzenie. S försilvring. (806)

silver-zinc

1. **silver-zinc battery** : → *battery 64*

simple

1. **simple (catenary) equipment with single contact wire** : → *equipment 66*
2. **simple (catenary) equipment with twin contact wires** : → *equipment 67*
3. **simple packaged crystal oscillator** : → *oscillator 6*
4. **simple signal** : → *signal 211*
5. **simple sound source** : → *source 30*

simplex

1. **simplex** : designating or pertaining to a method of operation in which information can be transmitted in either direction, but not simultaneously, between two points. ★ simplex → *simplex 1.* R симплекс. D Simplex. E símplex; semidúplex.

I semplice; simplex. N simplex. P (wymiana) przeciwsobna przemienna. S simplex. (701,721)

2. **simplex lap winding** : → *winding 71*
3. **simplex wave winding** : → *winding 72*
4. **speech + simplex (equipment)** : → *speech 11*

simulated

1. **simulated series motor** : → *motor 90*

simulator

1. **answer-back unit simulator** : a device or program routine not being part of a teleprinter, but performing the same function as the answer-back unit on receipt of a specific "Who are you" signal. ★ simulateur d'émetteur d'indicatif → *simulateur 1.* R имитатор автоответчика. D Kennungsgeber-Simulator. E simulador de emisor de indicativo. I simulatore di risposta automatica. N elektronische antwoordcodezender/zendeenheid. P symulator znamiennika. S svarsenhetssimulator. (721)
2. **mastoid simulator** (*Syn.* artificial mastoid) : → *mastoid 1*
3. **mouth simulator** (*Syn.* artificial mouth) : → *mouth 1*
4. **voice simulator** (*Syn.* artificial voice) : → *voice 1*

simulcast

1. **simulcast** : the simultaneous broadcast of a television programme by a television transmitter network and of the associated sound by a separate sound broadcast transmitter network, used, for example to provide stereophonic sound with television. ★ diffusion jumelée → *diffusion 28.* R одновременная передача. (723)

simultaneous

1. **simultaneous broadcast** : → *broadcast 14*
2. **simultaneous colour television system** : → *system 187*
3. **simultaneous line sequential colour television system** : → *system 188*

simultaneously

1. **simultaneously accessible parts** : → *part 11*

sine-squared

1. **sine-squared pulse** : → *pulse 81*

singing

1. **singing** : an unwanted self-sustaining oscillation caused by excessive positive feedback. ★ amorçage (non désiré) → *amorçage 6.* R зуммирование. D wilde Schwingung; Pfeifen. E cebado. I innesco (non voluto). N rondzingen. P gwizd. S tjut. (702)
2. **singing point** : → *point 44*

single

1. **(biologically) equivalent single dose** : → *dose 8*
2. **compatible single sideband modulation** : → *modulation 10*
3. **simple (catenary) equipment with single contact wire** : → *equipment 66*
4. **single action mechanical system** : → *mechanical system 12*
5. **single busbar substation** : → *substation 26*
6. **single channel amplifier** : → *channel 44*
7. **single circuit line** : → *circuit 164*
8. **single command** : → *command 22*
9. **single conductor** : → *conductor 64*
10. **single convertor** : → *convertor 41*
11. **single current transmission** : → *transmission 58*
12. **single error** : → *error 57*
13. **single feeder** : → *feeder 19*
14. **single function (measuring) instrument** : → *measuring instrument 20*
15. **single hole mounting** : → *mounting 6*
16. **single lacing** (*Syn.* single warren) : → *warren 3*
17. **single layer winding** : → *winding 73*
18. **single line to ground fault** (*Syn.* phase-to-earth fault) : → *fault 67*
19. **single pole automatic reclosing control equipment** : → *equipment 69*
20. **single pressure maintained mechanical system** : → *mechanical system 13*
21. **single pressure non-locking mechanical system** (*Syn.* momentary mechanical system) : → *mechanical system 11*
22. **single range (measuring) instrument** : → *measuring instrument 21*
23. **single shot reclosing** : → *reclosing 9*
24. **single sideband** : → *sideband 7*
25. **single supply** : → *supply 16*
26. **single sweep operation** : → *operation 65*
27. **single tramway-type equipment** : → *equipment 70*
28. **single warren** : → *warren 3*
29. **single X-ray tube exposure** : → *exposure 18*

single-anode

1. **single-anode valve device** : → *valve device 8*

single-channel

1. **single channel amplifier** : → *channel 44*
2. **single-channel analyzer** : → *analyzer 4*

single-coil

1. **single-coil filament** : → *filament 10*

single-component

1. **single-component signal** : → *signal 212*

single-conductor

1. **single-conductor cable** : → *cable 60*

single-core

1. **single-core cable** (*Syn.* single-conductor cable) : → *cable 60*
2. **single-core type current transformer** : → *transformer 61*
3. **solidly bonded single-core cable system** : → *system 190*

single-element

1. **single-element semiconductor** : → *semiconductor 24*

single-ended

1. **single-ended input** (*Syn.* earthed input) : → *input 7*
2. **single-ended output** (*Syn.* earthed output) : → *output 6*
3. **single-ended synchronization** : → *synchronization 9*

single-input

1. **single-input multiband amplifier** : → *amplifier 27*

single-line

1. **single-line diagram** : → *diagram 17*

single-manning

1. **single-manning** : a method of operation in which the driver's cab is occupied by only one man who carries out all the driving operations. ★ conduite à un seul agent → *conduite 3.* R управление в одно лицо. D Ein-Mann-Besetzung. E conducción por un solo agente. I condotta con un solo agente. N eenpersoonsbemanning. P sterowanie o zaŧodze jednoosobowej. S enbemanning. (811)

singlemode

1. **singlemode fibre** : → *fibre 24*

single-peak

1. **single-peak generator** (*Syn.* half-wave apparatus) : → *apparatus 10*

single-phase

1. **single-phase a.c. motor vehicle** : → *vehicle 22*
2. **single-phase a.c. traction** : → *traction 9*
3. **single-phase bridge (rectifier)** : → *bridge 16*
4. **single-phase circuit** : → *circuit 165*
5. **single-phase concentric neutral cable** : → *cable 62*
6. **single-phase device** : → *device 52*
7. **single-phase machine** : → *machine 25*

8. **single-phase motor** : → *motor 92*
9. **single-phase (voltage) source** : → *voltage source 7*

single-phasing

1. **single-phasing** : the abnormal operation of a polyphase machine when its supply is effectively single-phase. ★ marche en monophasé → *marche 20.* R однофазная работа. D einphasiger Betrieb. E funcionamiento monofásico. I marcia in monofase. N tweefasenloop. P praca jednofazowa. S enfasdrift. (411)

single-point

1. **single-point bonding** : → *bonding 4*
2. **single-point information** : → *information 30*

single-polarized

1. **single-polarized antenna** : → *antenna 105*

single-reduction

1. **single-reduction gearing** : → *gearing 5*

single-sided

1. **flexible single-sided printed board** : → *board 7*
2. **rigid single-sided printed board** : → *board 21*
3. **single-sided field system** : → *system 189*
4. **single-sided printed board** : → *board 22*

single-signal

1. **single-signal method** : → *method 23*

single-speed

1. **single-speed floating action** : → *action 21*

single-unit

1. **single-unit message** : → *message 15*

single-way

1. **single-way connection** : → *connection 52*

single-wire

1. **single-wire line** : → *line 145*

sink

1. **data sink** : a device that receives data from a data link. ★ collecteur de données → *collecteur 6.* R получатель данных. D Datensenke. E colector de datos. I ricevitore dati. N databestemming. P ujście danych. S datamottagare. (721)

sintered

1. **sintered plate** : → *plate 30*

sinusoidal

1. **sinusoidal distribution** : → *distribution 38*

siphon

1. **siphon recorder** : → *recorder 16*

site

1. **(radiation) test site** : a site meeting requirements necessary for correctly measuring, under defined conditions, electromagnetic fields emitted by a device under test. ★ emplacement d'essai (de rayonnement) → *emplacement 2.* R площадка для измерения (излучений); измерительная площадка. D Feldstärke-Meßplatz. E emplazamiento de ensayos (de radiación). I sito di prova (di radiazione). N (stralings)meetveld. P stanowisko pomiarowe (promieniowania). S mätplats. (161)

six-peak

1. **six-peak generator** (*Syn.* three-phase apparatus) : → *apparatus 18*

size

1. **contact size** : → *contact 50*
2. **critical size** : the minimum physical dimensions of a reactor core or an assembly which can be made critical for a specified geometrical arrangement and material composition. ★ taille critique → *taille 1.* D kritische Größe. E tamaño critico. I dimensione critica. N kritieke (kritische) afmetingen. P rozmiary krytyczne. S kritisk storlek. (026)
3. **group size** : either the number of circuits in a circuit group or the number of lines in a line group. ★ taille d'un faisceau → *taille 3.* D Bündelstärke. P wielkość wiązki łączy lub linii. (715)

sizing

1. **sizing tool** : → *tool 8*

skeleton

1. **skeleton frame** : → *frame 43*

skew

1. **skew** : a defect in facsimile reproduction in which lines that should be at right angles to the scanning direction are inclined to it, owing to a difference between the scanning speeds at transmission and reception. ★ obliquité → *obliquité 1.* R перекос. D Schräglauf. E oblicuidad. I obliquità. N skew. P pochylenie. S snedhet. (721)
2. **skew catenary** (*Syn.* inclined catenary) : → *catenary 9*
3. **skew ray** : → *ray 23*

skid

1. **skid hearth furnace** : → *furnace 52*
2. **skid wire** : → *wire 25*

skid-washer

1. **skid-washer** : a washer sometimes fitted between a clamp-nut and a pressure-sleeve, to reduce the transmission of torque to the pressure-sleeve. ★ rondelle → *rondelle 1.* R шайба антифрикционная. D Gleitscheibe. E mordaza (de deslizamiento). I rondella (di slittamento). N glijring. P podkładka przeciwślizgowa. S glidbricka. (581)

skin

1. **skin depth** (*Syn.* penetration depth) : → *depth 8*
2. **skin effect** : → *effect 71*

skip

1. **skip distance** : → *distance 20*
2. **skip distance focussing** : → *focusing 15*
3. **skip hoist** : → *hoist 1*
4. **skip monorails** : → *monorails 1*
5. **skip zone** : → *zone 13*

skirt

1. **skirt** (*Syn.* lower shield) : the metal part of a socket for electrical and mechanical connection to the tube or shield. It usually performs also the function of a saddle. In certain cases it is used for the conduction of heat. ★ embase de blindage → *embase 3.* R обойма (ламповой панели). D Kragen (einer Fassung). E base de blindaje. I collare di rinforzo. N kraag. P odgiętka. S böjavlastning. (581)

skull

1. **skull unit** (*Syn.* head unit) : → *unit 28*

sky

1. **CIE standard clear sky** : cloudless sky for which the relative luminance distribution is described in CIE Publication No.22 (1973). ★ ciel serein normalisé CIE → *ciel 2.* R чистое небо МКО. D klarer Himmel nach CIE (genormt). E cielo despejado patrón CIE. I cielo sereno secondo CIE. N heldere-hemelstandaard van de CIE. P nieboskłon bezchmurny znormalizowany CIE. S CIE standard för klar himmel. (845)
2. **CIE standard overcast sky** : completely overcast sky for which the ratio of its luminance L_ϑ in the direction at an angle γ above the horizon to its luminance L_Z at the zenith is given by the relation

$$L_\gamma = L_Z(1 + 2\sin\gamma)/3.$$

★ ciel couvert normalisé CIE → *ciel 1.* R облачное небо МКО. D bedeckter Himmel nach CIE. E cielo cubierto patrón CIE. I cielo coperto secondo CIE. N betrokken-hemelstandaard van de CIE. P nieboskłon pokryty znormalizowany CIE. S CIE standard för mulen himmel. (845)
3. **diffuse sky radiation** : → *radiation 17*
4. **sky component of daylight factor** : → *component 52*

skylight

1. **skylight** : visible part of diffuse sky radiation. *Note.* — When dealing with actinic effects of optical radiations, this term is commonly used for radiations extending beyond the visible region of the spectrum. ★ lumière du ciel → *lumière 15.* R свет неба. D Himmelslicht. E luz del cielo. I luce dal cielo. N hemellicht. P oświetlenie słoneczne rozproszone. S himmelsljus. (845)
2. **skylight** (*Syn.* rooflight) : → *rooflight 1*

slab

1. **axial slab interferometry** (*Syn.* slab interferometry) : → *interferometry 2*
2. **slab interferometry** : → *interferometry 2*
3. **slab line** : → *line 146*

slack

1. **slack bus** : → *bus 13*

slag

1. **refining slag** : a layer of materials having given chemical composition, carried on the surface of the molten metal to react with the various elements to achieve an alloying and refining process. ★ laitier d'affinage → *laitier 1.* R рафинирующий шлак. D Feinungsschlacke. E escorias de afino. I scoria di affinazione. N raffinerende slaklaag. P materiał rafinacyjny. S raffineringsslagg. (841)

slagging

1. **arc furnace slagging door** : → *door 2*

slave

1. **slave operation** : → *operation 66*
2. **slave station** : → *station 32*
3. **slave tracking operation** : → *operation 67*

sleeve

1. **cable support sleeve** : a flexible accessory or a part of a component placed around the cable to minimize flexing of the cable at the point of entry into the component. ★ manchon support de câble → *manchon 11.* R юбка кабельная. D Kabeltülle. E manguito soporte de cable. I manicotto di supporto del cavo. N flexibele kabelondersteuning. P tuleja przewodu. S kabelavlastningshylsa. (581)
2. **quarter-wave sleeve balun** : → *balun 4*
3. **quarter-wave sleeve element** : → *element 40*
4. **repair sleeve** : a special fitting which can be installed over a damaged conductor in order to restore its electrical and mechanical properties. ★ coquille de réparation → *coquille 4.* R ремонтный зажим. D Reparaturverbinder. E manguito de reparación. I manicotto per riparazione. N reparatiemanchet. P złączka naprawcza. S reparationshylsa. (466)
5. **sleeve bearing** : → *bearing 30*
6. **sleeve monopole (antenna)** : → *monopole 5*
7. **sleeve stub (antenna)** (*Syn.* sleeve monopole (antenna)) : → *monopole 5*
8. **split sleeve bearing** : → *bearing 32*

sleeve-dipole

1. **sleeve-dipole** (antenna) : a dipole antenna surrounded in its central portion by a coaxial conductive sleeve. ★ doublet à manchon → *doublet 3.* R трубчатый симметричный вибратор. D Hülsendipol (-Antenne). E dípolo con manguito (antena). I dipolo a manicotto; dipolo a cannocchiale. N dipool(antenne) met manchet. P dipol rękawowy. S ärmdipol. (712)

sleeving

1. **sleeving** : flexible tube used for insulation and/or identification. *Note.* — In North America *sleeving* designates a coated, fibrous reinforced tubing. See also, *tube, tubing.* ★ manchon → *manchon 3.* R чулок. D Schlauch. E tubo flexible. I manicotto; guaina. N kous. P koszulka (izolacyjna). S slang. (212)

slewing

1. **slewing (array) antenna** : → *antenna 106*

slicer

1. **slicer** : a limiter used for slicing. ★ éminceur → *éminceur 1.* R двусторонний ограничитель. D Slizer. E limitador doble. I assottigliatore. N afsnijder. P wycinacz międzyprogowy. S tvånivåbegränsare. (702)

slicing

1. **slicing** : a form of limiting in which all the instantaneous values of a signal lying outside two predetermined threshold values are reduced to values close to that of the nearer threshold, the instantaneous signal values between the two thresholds being preserved. ★ éminçage → *éminçage 1.* R двустороннее ограничение. D Einpassen (von Signalen). E doble descrestado. I limitazione con doppia screstatura; assottigliamento. N afsnijding. P wycinanie międzyprogowe (sygnału). S tvånivåbegränsning. (702)
2. **time slicing** : a mode of operation in which two or more processes are assigned quanta of time on the same processor. ★ découpage de temps → *découpage 1.* R квантование по времени. D Zeitmultiplexen; Zeitvielfachbetrieb. E corte de tiempo. I partizione di tempo. N periodieke tijdtoewijzing. P rozdział czasowy. S tidsskivning. (714)

slide

1. **slide scanner** : → *scanner 3*
2. **slide screw tuner** : → *tuner 2*
3. **wheel slide protection device** : → *device 61*

sliding

1. **sliding contact** : → *contact 107*
2. **sliding load** : → *load 73*
3. **sliding shutter** : → *shutter 2*

slip

1. **controlled slip** : the controlled loss or gain of a set of consecutive digit time-slots in a digital signal to enable it to accord with a digit rate different from its own digit rate, and in which this loss or gain of digit time-slots cannot be corrected. *Note.* — The term may be qualified, for example, controlled octet slip, controlled frame slip. ★ glissement commandé → *glissement 5.* R управляемое проскальзывание. D gesteuerter Schlupf. E deslizamiento controlado. I scorrimento controllato. N bestuurde slip. P poślizg sterowany. S styrd efterslåpning. (704)
2. **frame slip** : the loss or gain of a complete frame of consecutive digit time-slots in a digital signal, and in which this loss or gain of the frame cannot be corrected. ★ glissement de trame → *glissement 7.* R проскальзывание цикла. D Rasterschlupf. E deslizamiento de trama. I scorrimento di trama. N ..... P poślizg ramki. S ramefterslåpning. (704)
3. **horizontal picture slip** : a horizontal displacement or movement of all or part of the picture due to a line synchronisation fault. ★ glissement horizontal → *glissement 12.* R горизонтальное скольжение изображения. (723)
4. **octet slip** : the loss or gain of eight consecutive digit time-slots conveying an octet in a digital signal, and in which this loss or gain of the octet cannot be corrected. ★ glissement d'octet → *glissement 10.* R проскальзывание октета. D Oktettschlupf. E deslizamiento de octete. I scorrimento di ottetto. N octet-slip; byte-slip. P poślizg oktetu. S oktettefterslåpning. (704)
5. **slip** : the difference between the synchronous speed and the actual speed of a rotor expressed as per unit or percentage of the synchronous speed. ★ glissement → *glissement 3.* R скольжение. D Schlupf. E deslizamiento. I scorrimento. N (relatieve) slip. P poślizg. S efterslåpning. (411)
6. **slip** : the loss or gain of a digit time-slot or a set of consecutive digit time-slots in a digital signal, and in which this loss or gain of digit time-slots cannot be corrected. ★ glissement → *glissement 4.* R проскальзывание. D Schlupf. E deslizamiento. I scorrimento. N slip. P poślizg. S efterslåpning. (704)
7. **slip (of a linear traction asynchronous motor)** : the difference between the synchronous speed and the actual speed, expressed as a proportion or percentage of the synchronous speed. ★ glissement (d'un moteur de traction linéaire asynchrone) → *glissement 11.* R скольжение (линейного тягового асинхронного двигателя). D Schlupf. E deslizamiento (de un motor de tracción lineal asíncrono).

I scorrimento (d'un motore di trazione lineare asincrono). N slip (van een lineaire asynchrone tractiemotor). P poślizg. S eftersläpning. (811)

8. **slip regulator** : → *regulator 2*
9. **slip ring** : → *ring 20*
10. **uncontrolled slip** : the uncontrolled loss or gain of a digit time-slot or a set of consecutive digit time-slots in a digital signal, possibly as the result of an aberration of the timing processes associated with the transmission or switching of that signal, and in which this loss or gain of digit time-slots cannot be corrected. ★ glissement non commandé → *glissement 13.* R неуправляемое проскальзывание. D ungesteuerter Schlupf. E deslizamiento no controlado. I scorrimento non controllato. N niet-bestuurde slip. P poślizg niesterowany. S okontrollerad eftersläpning. (704)
11. **vertical picture slip** : a vertical displacement or movement of the picture due to a field synchronisation fault. ★ glissement vertical → *glissement 14.* R вертикальное скольжение изображения. (723)

slipper

1. **contact slipper** (*Syn.* contact shoe) : a grooved fitting enabling current to be collected by sliding against a contact wire. ★ cuillère de contact → *cuillère 1.* R контактная вставка. D Schleifschuh; Stangenstromabnehmer. E frotador de trole; zapata de contacto. I pattino a gola. N trolleyschoen. P ślizgacz żyżkowy. S släpsko. (811)

slipping

1. **pole slipping** : the process of the secondary member of a synchronous machine slipping one pole pitch with respect to the primary magnetic flux. ★ glissement de pôle → *glissement 6.* R проскальзывание полюсов. D Polschlüpfen. E deslizamiento de un paso polar. I scorrimento di un passo polare. N poolslip. P przeskok biegunów. S urfasfall. (411)

slit

1. **slit fabric** : → *fabric 7*

slope

1. **forward slope resistance** : → *resistance 24*
2. **frequency slope** : between any two points in a system, the difference in gain or attenuation at two specified frequencies. *Note.* — Generally applied to frequencies corresponding to the extremities of the pass band. ★ pente → *pente 4.* R крутизна. (723)
3. **leg slope** : an angle defining the inclination of a main leg (see fig. 3.25). ★ pente de membrure → *pente 7.* R угол наклона пояса. D Neigung des Eckstieles. E inclinación de montante. I pendenza dei montanti. N poothelling. P zbieżność trzonu. S benlutning. (466)
4. **Nyquist slope bandwidth** : → *bandwidth 7*
5. **on-state slope resistance** : → *resistance 41*
6. **plateau relative slope** : the slope of the plateau expressed as the percentage change in counting rate per one hundred volts change in applied voltage. ★ pente de palier → *pente 8.* R наклон плато. D relative Plateausteigung. E pendiente de meseta. I pendenza di pianerottolo. N relatieve plateauhelling. P względne nachylenie plato; względne nachylenie równi. S relativ platålutning. (391)
7. **plateau slope** : the percentage change in counting rate per volt for a stated change in applied voltage. ★ pente du plateau → *pente 10.* R наклон плато. D Plateausteilheit. E pendiente de meseta. I pendenza del pianerottolo. N plateauhelling. P nachylenie plato; nachylenie równi. S platålutning. (531)
8. **side slope at X metres** (*Syn.* offset profile) : a representation of the ground contour in the vertical plane located X metres from, and parallel to, the axis of the line (see fig. 1). ★ profil parallèle → *profil 16.* R подгорный профиль; нагорный профиль. D Parallelprofil. E perfil lateral. I profilo parallelo a x metri dall'asse linea. N lengteprofiel op X m uit de as. P profil równoległy w odległości X metrów. S sidlut. (466)
9. **slope overload distortion** : → *distortion 64*
10. **visual approach slope indicator** : → *indicator 27*

sloping

1. **sloping hearth furnace** : → *furnace 53*
2. **sloping span** : → *span 9*
3. **sloping span length** : → *length 29*

slot

1. **annular slot antenna** : → *antenna 4*
2. **coupling slot** (*Syn.* coupling aperture) : → *aperture 12*
3. **fractional slot winding** : → *winding 29*
4. **integral slot winding** : → *winding 33*
5. **short slot coupler** : → *coupler 20*
6. **slot** : the recess in a metal core in which the conductors of a winding are laid. ★ encoche → *encoche 4.* R паз. D Nut. E ranura. I cava. N gleuf; groef. P żłobek. S spår. (411,811)
7. **slot antenna** : → *antenna 107*
8. **slot array** : → *array 19*
9. **slot liner** : → *liner 2*
10. **slot packing** : → *packing 4*
11. **slot radiator** : → *radiator 9*
12. **slot wedge** : → *wedge 3*
13. **symmetrical fractional slot winding** : → *winding 80*

slotted

1. **slotted coaxial balun** : → *balun 5*
2. **slotted core cable** (*Syn.* grooved cable) : → *cable 31*
3. **slotted cylinder** : → *cylinder 5*
4. **slotted cylinder panel** : → *panel 13*
5. **slotted hearth furnace** (*Syn.* grooved hearth furnace) : → *furnace 20*
6. **slotted line** : → *line 147*
7. **slotted line carriage** : → *carriage 2*
8. **slotted measuring section** (*Syn.* slotted line) : → *line 147*
9. **slotted panel** : → *panel 14*
10. **slotted waveguide** : → *waveguide 14*

slow

1. **reverse slow motion** : → *motion 3*
2. **slow action contact** : → *contact 108*
3. **slow fading** : → *fading 16*
4. **slow motion** : → *motion 4*
5. **slow neutrons** : → *neutron 31*
6. **slow wave** : → *wave 55*
7. **slow wave** : → *wave 56*
8. **slow wave structure** : → *structure 4*

slowing-down

1. **slowing-down area** : → *area 38*
2. **slowing-down length** : → *length 30*
3. **slowing-down power** : → *power 176*

slow-wave

1. **slow-wave structure** : → *structure 5*

sludge

1. **sludge** : insoluble degradation products which are formed in an insulating liquid as a result of ageing. ★ boues → *boue 1.* R осадок. D Schlamm. E lodo. I depositi asfaltici. N drab. P szlam. S slam. (212)

slug

1. **slug** : a small fuel element of cylindrical form. ★ barreau de combustible → *barreau 1.* D ..... E lingote combustible. I spezzone di combustible. N splijtstofstaafje. P elementarny pręt paliwowy. S kuts. (026)
2. **slug tuner** : → *tuner 3*
3. **tuning slug** : a means for varying the resonance frequency by introducing a slug of material into a resonant structure. ★ tige de réglage → *tige 10.* R настроечный сердечник. D Abgleichstempel. E varilla de sintonización. I vite di regolazione. N afstemprop. P wkładka strojeniowa. S anpassningsplugg. (726)

small-power

1. **small-power locomotive** : → *locomotive 9*
2. **small-power motor** : → *motor 94*

small-signal

1. **small-signal gain** : → *gain 33*
2. **small-signal short-circuit forward current transfer ratio** : → *ratio 92*

smearing

1. **smearing** (*Syn.* lag) : → *lag 2*

Smith

1. **Smith chart** : → *chart 8*
2. **Smith diagram** (*Syn.* Smith chart) : → *chart 8*

smooth

1. **smooth body conductor** : → *conductor 65*
2. **smooth traffic** : → *traffic 20*

smoothing

1. **smoothing** : treatment of an image in which neighbouring values of luminance signal are replaced by one value. The same process may also be carried out for the chrominance signals. ★ (traitement par) équidensité → *traitement 12.* R сглаживание. (723)
2. **smoothing capacitor** : → *capacitor 62*
3. **smoothing inductor** : → *inductor 21*

SMRR

1. **SMRR** (*Syn.* series mode rejection ratio) : → *ratio 78*

snap-on

1. **snap-on contact** : → *contact 109*

snatch-disconnect

1. **snatch-disconnect connector** : → *connector 47*

SNG

1. **SNG** (*Syn.* satellite news gathering) : → *gathering 2*

snubber

1. **arc furnace electrode mast snubber** : → *mast 3*

soaking

1. **soaking time** : → *time 165*

socket

1. **ball and socket coupling** : → *coupling 3*
2. **peritelevision connector** : a multipole connector, fitted to some television receivers, for the connection of external equipments generally for peritelevision applications. ★ connecteur péritélévision → *connecteur 31.* R перителевизионный соединитель. (723)
3. **socket** : a separate device that provides electrical connections between pins of the tube base and the external wiring, keeping the tube easily removable; it may also provide mechanical retention of the tube and of a tube shield, if any. ★ support → *support 12.* R ламповая панель. D Fassung. E zócalo; soporte. I supporto (porta-zoccolo). N buishouder. P gniazdo lampowe; podstawka (lampowa). S rörhållare. (531)
4. **socket** : a connector intended to mate with a plug-in device such as: tubes, relays, etc. ★ support → *support 13.* R панель. D Fassung. E soporte. I supporto. N houder. P gniazdo. S hållare. (581)
5. **socket body** : the insulating part of a socket. ★ corps de support → *corps 4.* R корпус панели ламповой. D Isolierkörper einer Fassung. E cuerpo de zócalo. I corpo isolante di zoccolo. N isolatieblok van de houder. P obsada izolacyjna (gniazda). S hållarkropp. (581)
6. **socket flange** : → *flange 16*

sodium

1. **high pressure sodium (vapour) lamp** : → *lamp 24*
2. **low pressure sodium (vapour) lamp** : → *lamp 37*

soft

1. **magnetically soft material** : → *material 23*
2. **soft annealing** : → *annealing 3*
3. **soft soldering** : → *soldering 2*

softening

1. **softening temperature** : → *temperature 46*

softlight

1. **softlight** : lighting device of sufficient size to produce diffused lighting with indefinite shadow boundaries. ★ (appareil) diffuseur → *diffuseur 1.* R светильник бестеневого диффузного света. D ..... E iluminador difusor. I apparecchio diffusore. N armatuur voor diffuus licht. P oprawa światła wypełniającego. S mjukljusarmatur. (845)

software

1. **software** (in telecommunications) : computer programs, procedures, rules and any associated documentation pertaining to the operation of an equipment, a telecommunication network or other system. ★ logiciel → *logiciel 1.* R средства математического обеспечения (в электросвязи). D Software (in der Telekommunikation). E lógica; software (en telecomunicación). I software (in telecomunicazioni). N programmatuur (bij telecommunicatie). P logistyka (w telekomunikacji); oprogramowanie. S programvara. (702,714)

soil

1. **soil moisture meter** : → *meter 53*

solar

1. **direct solar radiation** : → *radiation 18*
2. **extraterrestrial solar radiation** : → *radiation 25*
3. **global solar radiation** : → *radiation 31*
4. **monthly mean solar radio-noise flux** : → *flux 18*
5. **reflected (global) solar radiation** : → *radiation 103*
6. **solar activity** : → *activity 12*
7. **solar activity centre** : → *centre 19*
8. **solar (activity) index** : → *index 39*
9. **solar constant** : → *constant 29*
10. **solar cycle** : → *cycle 20*
11. **solar factor** : → *factor 166*
12. **solar power station** : → *power station 21*
13. **solar radiation** : → *radiation 110*

solder

1. **solder connection** : → *connection 53*
2. **solder contact** : → *contact 110*

soldering

1. **hard soldering** (*Syn.* brazing) : a brazing or soldering process using a molten filler material having a melting temperature lower than that of the parts to be joined but above 450° C. *Note.* — In English "brazing" is a specific type of hard soldering in which the filler material used is brass. ★ brasage fort → *brasage 2.* R пайка твердым припоем. D Hartlöten. E soldadura fuerte. I saldatura forte; brasatura. N hardsolderen. P lutowanie twarde. S hårdlödning. (851)
2. **soft soldering** : a soldering process using a molten filler material having a melting temperature lower than that of the parts to be joined and generally below 450° C. ★ brasage tendre → *brasage 3.* R пайка мягким припоем. D Weichlöten. E soldadura blanda. I saldatura dolce. N zachtsolderen. P lutowanie miękkie. S mjuklödning. (851)
3. **soldering** (*Syn.* brazing (general)) : → *brazing 2*

solderless

1. **solderless connection** : → *connection 54*

sole

1. **emitting sole** : an electron source, in crossed-field tubes, that is extensive and parallel to the slow-wave structure and may be a thermionic or secondary-electron emitter. ★ sole émissive → *sole 11.* R эмиттирующее основание. D emittierende Sohle. E base emisora; suelo emisor. I suola emittente. N emissievlak. P podstawa emitująca. S emissionsplatta. (531)

solenoid

1. **solenoid** : a cylindrical coil, whose length is usually much greater than its transverse dimensions. ★ solénoïde → *solénoïde 3.* R соленоид. D Solenoid. E solenoide. I solenoide. N solenoïde. P solenoid. S solenoid. (151)
2. **solenoid actuator** : → *actuator 10*
3. **solenoid braking** : → *braking 41*
4. **solenoid inductor** : → *inductor 22*

solid

1. **colour solid** : that part of a colour space which contains surface colours. ★ solide des couleurs → *solide 1.* R цветовое тело. D Farbkörper. E sólido de color. I solido dei colori. N kleurenlichaam. P bryła barw. S färgkropp. (845)
2. **solid adsorbant treatment** : → *treatment 4*
3. **solid bond** : → *bond 3*
4. **solid conductor** : → *conductor 66*
5. **solid conductor** : → *conductor 67*
6. **solid fault** (*Syn.* persistent fault) : → *fault 66*
7. **solid frame** : → *frame 44*
8. **solid gearing** : → *gearing 6*
9. **solid pole synchronous motor** : → *motor 95*
10. **(solid) short-circuit current** : → *short-circuit current 10*

solid-core

1. **solid-core insulator** : → *insulator 31*

solidification

1. **solidification point** (*Syn.* freezing point) : → *freezing 2*

solidly

1. **solidly bonded single-core cable system** : → *system 190*
2. **solidly earthed (neutral) system** : → *system 191*

solid-state

1. **solid-state rectifier** : → *rectifier 13*

solution

1. **standard radioactive solution** : a standard radioactive source in liquid form. ★ solution radioactive de référence → *solution 2.* R образцовый радиоактивный раствор. D radioaktive Standardlösung. E solución radiactiva de referencia; solución radiactiva patrón. I soluzione radioattiva standard. N radioactieve standaardoplossing. P wzorcowy roztwór radioaktywny. S radioaktiv standardlösning. (881)

somatic

1. **somatic effects** : → *effect 72*

sonar

1. **active sonar** : technique or equipment by which information concerning a distant object is obtained by evaluation of its effect on sound generated by the equipment. ★ sonar actif → *sonar 9.* R гидролокационная станция. D Aktiv-Sonar. E sonar activo. I sonar attivo. N actieve sonar. P sonar aktywny. S aktiv sonar. (801)
2. **figure of merit of an active sonar** : → *figure 5*
3. **passive sonar** : technique or equipment by which information concerning a distant object is obtained by analysis of sound generated by the object. ★ sonar passif → *sonar 10.* R шумопеленгаторная станция. D Passiv-Sonar. E sonar pasivo. I sonar passivo. N passieve sonar. P sonar pasywny. S passiv sonar. (801)
4. **sonar** : technique or equipment to obtain by underwater sound, information regarding objects in the sea. *Note.* — The term is an acronym for SOund NAvigation and Ranging. ★ sonar → *sonar 8.* R гидроакустическая станция. D Sonar. E sonar. I sonar. N sonar. P sonar. S sonar. (801)
5. **sonar background noise** : → *noise 77*
6. **sonar dome** : → *dome 2*
7. **sonar dome insertion loss** : → *loss 89*
8. **sonar dome loss directivity-pattern** : → *directivity-pattern 1*
9. **sonar self-noise** : → *self-noise 1*
10. **sonar source level** : → *level 84*

sone

1. **sone** : the unit of loudness, equal to the loudness of a pure tone presented frontally as a plane wave of frequency 1 000 Hz and a sound pressure level of 40 dB, re 20 μPa. *Note.* — The loudness of a sound that is judged by the listener to be *n* times that of the 1-sone tone is *n* sones. ★ sone → *sone 1.* R сон. D sone. E sonio. I son. N soon. P son. S sone. (801)

sound

1. **amplitude sound spectrum** : → *spectrum 2*
2. **audible sound** : *a)* Acoustical oscillation of such character as to be capable of exciting a sensation of hearing. *b)* Sensation of hearing excited by an acoustic oscillation or vibration. ★ son (audible) → *son 13.* R слышимый звук. D Hörschall. E sonido. I suono. N hoorbaar geluid; geluid. P dźwięk. S ljud. (801)
3. **complex sound** : sound that is not a simple oscillation. ★ son complexe → *son 14.* R сложный звук. D komplexer Schall. E sonido compuesto. I suono complesso. N samengestelde toon. P dźwięk złożony. S sammansatt ljud; sammansatt ton. (801)
4. **complex sound spectrum** : → *spectrum 5*
5. **elementary dephasing of sound propagation** : → *dephasing 1*
6. **elementary exponent of sound propagation** : → *exponent 1*
7. **equivalent continuous sound level** (*Syn.* time-average sound level) : → *level 99*
8. **harmonic series of sounds** : → *series 4*
9. **intercarrier sound** : a technique used in television receivers whereby the difference frequency obtained by non-linear combination of the sound carrier and vision carriers is used as the intermediate frequency in the part of the receiver which processes the sound signal. ★ démodulation interporteuse → *démodulation 7.* R звук на биениях между несущими. (723)
10. **limiting (of sound signal level)** : → *limiting 12*
11. **linear exponent of sound propagation** : → *exponent 2*
12. **peak sound level** (*Syn.* peak frequency-weighted sound pressure level) : → *level 65*
13. **phase sound spectrum** : → *spectrum 22*
14. **point sound source** : → *source 20*
15. **power sound spectrum** : → *spectrum 24*
16. **pure sound** (*Syn.* pure tone) : sinusoidal acoustical oscillation. ★ son pur → *son 18.* R чистый звук; чистый тон. D reiner Ton; sinusförmiger Schall. E sonido puro. I suono puro. N enkelvoudige toon. P dźwięk prosty; ton. S ren ton. (801)
17. **simple sound source** : → *source 30*
18. **sound** (*Syn.* acoustical oscillation) : → *oscillation 1*
19. **sound absorbing material** : → *material 39*
20. **sound absorption** : → *absorption 38*
21. **sound absorption coefficient** (*Syn.* Sabine absorption coefficient) : → *coefficient 53*
22. **sound analyzer** : → *analyzer 5*
23. **sound articulation** : → *articulation 6*
24. **sound broadcasting receiver** : → *receiver 11*
25. **sound broadcasting (service)** : → *broadcasting 11*
26. **sound broadcasting transmitter** : → *transmitter 13*
27. **sound carrier** : → *carrier 29*
28. **sound channel** : → *channel 45*
29. **sound channel** : → *channel 46*
30. **sound control** : → *control 170*
31. **sound control console** (*Syn.* sound control desk) : → *desk 3*
32. **sound control desk** : → *desk 3*
33. **sound control room** : → *room 15*
34. **sound effects** : → *effect 73*
35. **sound exposure** : → *exposure 19*
36. **sound exposure level** : → *level 85*
37. **sound insulation** (*Syn.* sound reduction index) : → *index 40*
38. **sound intensity** (*Syn.* sound power density) : → *density 31*
39. **sound intensity level** : → *level 86*
40. **sound isolation between rooms** (*Syn.* level difference) : → *difference 18*
41. **sound level** (*Syn.* weighted sound pressure level) : → *level 103*
42. **sound level meter** : → *meter 54*
43. **sound locator** : → *locator 3*
44. **sound on vision** : the appearance, in the case of a horizontally scanned picture, of horizontal bands varying with the sound accompanying the picture, and resulting from interference from the sound channel into the video signal. ★ son dans l'image

→ *son 16.* R перекрестные искажения звук - изображение. (723)

45. **sound pair** (*Syn.* programme line) : → *line 127*
46. **sound (power) reflection coefficient** : → *coefficient 58*
47. **sound programme** : → *programme 11*
48. **sound programme channel** : → *channel 47*
49. **sound propagation coefficient** (*Syn.* linear exponent of sound propagation) : → *exponent 2*
50. **sound receiver** (*Syn.* sound broadcasting receiver) : → *receiver 11*
51. **sound reduction index** : → *index 40*
52. **sound signal** : → *signal 213*
53. **sound spectrograph** (*Syn.* visible speech apparatus) : → *apparatus 19*
54. **sound spectrum** : → *spectrum 30*
55. **sound supervisor** : → *supervisor 1*
56. **sound transmitter** : → *transmitter 14*
57. **sound wave velocity** : → *velocity 19*
58. **speed of sound** : → *speed 48*
59. **standardized sound isolation between rooms** (*Syn.* normalized level difference) : → *difference 22*
60. **statistical sound (power) absorption coefficient** : → *coefficient 66*
61. **stereophonic sound system** : → *system 205*
62. **time-average sound level** : → *level 99*
63. **underwater sound projector** : → *projector 9*
64. **(vision/sound) diplexer** : → *diplexer 2*

sound field

1. **diffuse sound field** : sound field which in a given region has statistically uniform energy density, for which the directions of propagation at any point are randomly distributed. ★ champ acoustique diffus → *champ 15.* R диффузное звуковое поле. D diffuses Schallfeld. E campo acústico difuso. I campo diffuso. N diffuus geluid(s)veld. P pole akustyczne dyfuzyjne. S diffust ljudfält. (801)
2. **far sound field** : sound field distant from a sound source where instantaneous sound pressure and particle velocity are substantially in phase. ★ champ acoustique lointain → *champ 17.* R дальнее звуковое поле. D Fernfeld. E campo acústico lejano. I campo acustico lontano. N ver veld. P pole akustyczne dalekie. S fjärrljudfält; fjärrfält. (801)
3. **free sound field** : sound field in a homogeneous isotropic medium whose boundaries exert an negligible effect on the sound waves. ★ champ acoustique libre → *champ 16.* R свободное звуковое поле. D freies Schallfeld. E campo acústico libre. I campo acustico libero. N vrij geluid(s)veld. P pole akustyczne swobodne. S fritt ljudfält. (801)
4. **near sound field** : sound field near a sound source where instantaneous sound pressure and particle velocity are substantially out of phase. ★ champ acoustique proche → *champ 18.* R ближнее звуковое поле. D Nahfeld. E campo acústico próximo. I campo acustico vicino. N nabij veld. P pole akustyczne bliskie. S närljudfält; närfält. (801)
5. **reverberant sound field** : sound field in which substantially all sound waves have been reflected several times from a boundary of the medium. ★ champ acoustique réverbéré → *champ 19.* R реверберационное звуковое поле. D Nachhallfeld. E campo acústico reverberante. I campo acustico riverberato. N nagalmveld. P pole akustyczne pogłosowe. S efterklangsljudfält; efterklangsfält. (801)
6. **sound field** : region of an elastic medium containing sound waves. ★ champ acoustique → *champ 14.* R звуковое поле. D Schallfeld. E campo acústico. I campo acustico; campo sonoro. N geluidsveld. P pole akustyczne. S ljudfält. (801)

sound power

1. **sound (power) absorption coefficient** : → *coefficient 57*
2. **sound power density** : → *density 31*
3. **sound power level** : → *level 89*
4. **sound power of a source** : total sound energy radiated by the source in aspecified frequency band over a certain time interval, divided by the interval. ★ puissance acoustique d'une source → *puissance 58.* R мощность источника звука. D Schalleistung einer Schallquelle. E potencia acústica de una fuente. I potenza sonora di una sorgente. N geluid(s)vermogen van een bron. P moc źródła dźwięku. S ljudeffekt hos en ljudkälla. (801)
5. **sound power through a surface element** (*Syn.* sound energy flux) : → *flux 24*

sound pressure

1. **average sound pressure level in a room** : → *level 5*
2. **band sound pressure level** : → *level 7*
3. **equivalent continuous sound pressure level** (*Syn.* time average sound pressure level) : → *average 18*
4. **field normalized impact sound pressure level** : → *level 22*
5. **impact sound pressure level** : → *level 32*
6. **instantaneous sound pressure** : at a point in a medium, difference between the pressure existing at the instant considered and the static pressure. ★ pression acoustique instantanée → *pression acoustique 13.* R мгновенное звуковое давление. D Augenblickswert des Schalldrukes. E presión acústica instantánea. I pressione acustica istantanea. N momentane geluidsdruk. P wartość chwilowa ciśnienia akustycznego. S momentant ljudtryck. (801)
7. **normalized impact sound pressure level** : → *level 59*
8. **peak frequency-weighted sound pressure level** : → *level 65*
9. **peak sound pressure** : greatest absolute instantaneous sound pressure during a given time interval. ★ pression acoustique de crête → *pression acoustique 10.* R пиковое звуковое давление. D Spitzenschalldruck. E presión acústica decresta. I pressione acustica di picco. N topwaarde van de geluid(s)druk. P wartość szczytowa ciśnienia akustycznego. S toppljudtryck. (801)
10. **reference sound pressure** : sound pressure, conventionnally chosen, equal to 20 μPa for gases and to 1 μPa for liquids and solids. ★ pression acoustique de référence → *pression acoustique 12.* R опорное звуковое давление. D Bezugsschalldruck. E presión acústica de referencia. I pressione acustica di riferimento. N vergelijkingsdruk. P ciśnienie akustyczne odniesienia. S referensljudtryck. (801)
11. **sound pressure** : root-mean-square of instantaneous sound pressures over a given time interval, unless specified otherwise. ★ pression acoustique → *pression acoustique 9.* R звуковое давление. D Schalldruck. E presión acústica. I pressione acustica; pressione sonora. N geluid(s)druk. P wartość skuteczna ciśnienia akustycznego; ciśnienie akustyczne. S ljudtryck. (801)
12. **sound pressure level** : → *level 90*
13. **sound pressure reflection coefficient** : → *coefficient 59*
14. **time average sound pressure level** : → *average 18*
15. **weighted sound pressure level** : → *level 103*

sound energy

1. **instantaneous kinetic sound energy density** : → *density 11*
2. **instantaneous potential sound energy density** : → *density 12*
3. **sound energy density** : → *density 30*
4. **sound energy flux** : → *flux 24*
5. **sound energy flux density** (*Syn.* sound power density) : → *density 31*
6. **sound-energy flux density level** (*Syn.* sound intensity level) : → *level 86*

sounder

1. **ionospheric sounder** (*Syn.* ionosonde) : → *ionosonde 1*
2. **sounder** : a telegraph receiving instrument in which Morse signals are translated into sound signals characterized by intervals of different duration between two consecutive sounds. ★ sounder → *sounder 1.* R клопфер. D Summer. E receptor acústico. I ripetitore acustico. N akoestische ontvanger. P głośnik. S summer. (721)
3. **vertical incidence ionospheric sounder** (*Syn.* vertical incidence ionosonde) : → *ionosonde 2*

sounding

1. **back-scatter ionospheric sounding** : monostatic or bistatic ionospheric sounding in which the received signals are due to back scattering in the ionosphere or at the surface of the Earth, propagation occurring in the second case, in both directions, by

ionospheric reflection. ★ sondage ionosphérique par rétrodiffusion → *sondage 8.* D Rückstreulotung. P przydźwięk jonosferyczny rozproszeniowy zwrotny. (705)

2. **bottom-side ionospheric sounding** : vertical incidence ionospheric sounding made from a ground station or a station close to the ground. ★ sondage ionosphérique zénithal → *sondage 10.* D Ionosphärenlotung von unten. P przydźwięk jonosferyczny od spodu. (705)
3. **incoherent-scatter ionospheric sounding** : monostatic or bistatic ionospheric sounding based on the spectral analysis of radio signals scattered at random by the electrons in the ionosphere, this scattering being due to fluctuations in the ionospheric plasma of thermal origin. *Note.* — Incoherent scatter ionospheric soundings enable the following quantities to be determined : electron density, electron temperature, ion temperature, mean ionic mass and ion drift. ★ sondage ionosphérique par diffusion incohérente → *sondage 5.* D Ionosphärenlotung durch inkohärente Streuung. P przydźwięk jonosferyczny rozproszeniowy bezładny. (705)
4. **(ionospheric) bistatic sounding** : ionospheric sounding in which the transmitter and the receiver are at different locations. ★ sondage (ionosphérique) bistatique → *sondage 3.* D bistatische Ionosphärenlotung. P przydźwięk jonosferyczny bistatyczny. (705)
5. **(ionospheric) monostatic sounding** : ionospheric sounding in which the transmitter and the receiver are colocated. ★ sondage (ionosphérique) monostatique → *sondage 4.* D monostatische Ionosphärenlotung. P przydźwięk jonosferyczny monostatyczny. (705)
6. **ionospheric sounding** : the experimental determination of certain properties of the ionosphere by the transmission and reception of appropriate radio signals. ★ sondage ionosphérique → *sondage 1.* D Ionosphärenlotung. P przydźwięk jonosferyczny. (705)
7. **oblique incidence ionospheric sounding** : ionospheric bistatic sounding by means of signals transmitted so as to arrive at the ionospheric layers with oblique incidence. ★ sondage ionosphérique (à incidence) oblique → *sondage 2.* D Schräglotung. P przydźwięk jonosferyczny nachylony. (705)
8. **top-side ionospheric sounding** : vertical incidence ionospheric sounding made from an artificial Earth satellite above the maximum electron density of the F region. ★ sondage ionosphérique par en haut → *sondage 7.* D Ionosphärenlotung von oben. P przydźwięk jonosferyczny wierzchni. (705)
9. **vertical incidence ionospheric sounding** : ionospheric sounding using signals transmitted vertically and received at the transmission point. *Note.* — The term "vertical incidence ionospheric sounding" is generally used to designate bottom-side ionospheric sounding. ★ sondage ionosphérique vertical → *sondage 9.* D Senkrechtlotung. P przydźwięk jonosferyczny pionowo padający. (705)

sound-in-syncs

1. **sound-in-syncs** : a method of transmitting a sound signal as a digital signal superimposed on the line synchronising signal. ★ son dans la synchronisation → *son 15.* R звук в синхросигнале. (723)

sound-level

1. **sound-level meter** : → *meter 55*

source

1. **axial source level** (*Syn.* sonar source level) : → *level 84*
2. **balanced polyphase source** : in sinusoidal operation, a polyphase source where the source phasors added in the sequential order of the phases form a *m*-sided regular polygon. ★ source polyphasée équilibrée → *source 27.* R уравновешенный многофазный источник. D symmetrisch betriebene Mehrphasenquelle. E fuente polifásica equilibrada. I sorgente polifase simmetrica. N gebalanceerde meerfasenbron. P źródło wielofazowe zrównoważone; źródło wielofazowe symetryczne. S ..... (131)
3. **(cell) source voltage** : → *voltage 21*
4. **CIE standard sources** : artificial sources specified by the CIE whose radiations approximate CIE standard illuminants A, B, and C (see CIE Publication No.15). ★ sources normalisées CIE → *source 37.* R стандартные источники МКО. D CIE-Normlichtquellen. E fuentes patrones CIE. I sorgenti CIE. N standaard lichtbronnen van de CIE. P źródła normalne CIE. S CIE standardljuskällor. (845)
5. **closed radioactive source** : a radioactive source for which, by sealing or other means, dispersal of the radioactive material is minimized. ★ source radioactive scellée → *source 34.* R закрытый радиоактивный источник. D umhüllte radioaktive Quelle. E fuente radiactiva cerrada. I sorgente radioattiva chiusa. N gesloten radioactieve bron. P zamknięte źródło radiaoktywne. S sluten strålkälla. (881)
6. **controlled current source** : a current source controlled by a voltage or current from another part of the circuit. ★ source de courant dépendante → *source de courant 5.* R зависимый источник тока. D gesteuerte (geregelte) Stromquelle. E fuente de intensidad dependiente. I generatore di corrente dipendente. N gestuurde stroombron. P źródło prądowe zależne. S styrd strömkälla. (131)
7. **data source** : a device that provides the data that enters into a data link. ★ source de données → *source 17.* R источник данных. D Datenquelle. E fuente de datos. I sorgente dati. N databron. P źródło danych. S datakälla. (721)
8. **drooping characteristic (of an arc welding power source)** : → *characteristic 34*
9. **dynamic characteristic (of an arc welding power source)** : → *characteristic 36*
10. **electroluminescent source** : luminous source in which the light is produced by electroluminescence. ★ source électroluminescente → *source 23.* R электролюминесцентный источник. D Elektrolumineszenz-Lichtquelle. E fuente electroluminiscente. I sorgente elettroluminescente. N elektroluminescentielichtbron. P źródło elektroluminescencyjne. S elektroluminiscent ljuskälla. (845)
11. **flat characteristic (of an arc welding power source)** : → *characteristic 40*
12. **ideal current source** : an active element through which the current is independent of the terminal voltage. ★ source idéale de courant → *source de courant 9.* R идеальный источник тока. D ideale Stromquelle. E fuente ideal de intensidad. I sorgente ideale di corrente. N ideale stroombron. P źródło prądowe idealne. S ideal strömkälla. (131)
13. **(independent) current source** : an active element which can be represented by an ideal current source, independent of all currents and voltages in the circuit, in parallel with a passive circuit element. ★ source de courant (indépendante) → *source de courant 7.* R (независимый) источник тока. D unabhängige Stromquelle. E fuente de intensidad independiente. I generatore di corrente indipendente. N onafhankelijke stroombron. P źródło prądowe niezależne. S strömkälla. (131)
14. **Lambertian source** (*Syn.* Lambertian radiator) : → *radiator 3*
15. **load voltage (of a welding power source)** : → *voltage 101*
16. **luminous efficacy of a source** : → *efficacy 1*
17. **maximum source e.m.f.** : → *e.m.f. 3*
18. **minimum source e.m.f.** : → *e.m.f. 4*
19. **multiple operator power source** : a power source supplying current to several welding stations, each station having a welding current regulator. ★ centrale de soudage → *centrale 4.* R многопостовой источник питания. D Mehrstellenschweißstromquelle. E central de soldadura. I saldatrice multipla. N toestel voor meer dan een lasketen. P zasilacz spawalniczy wielostanowiskowy. S flersvetsströmkälla. (851)
20. **point sound source** : source that radiates sound as if from a single point. ★ source acoustique ponctuelle → *source 13.* R точечный источник звука. D Punktstrahler. E fuente sonora puntual. I sorgente puntiforme. N puntbron. P źródło (dźwięku) punktowe. S punktstrålare. (801)
21. **polyphase source** : an element of a polyphase circuit where each branch contains a source. ★ source polyphasée → *source 26.* R многофазный источник. D Mehrphasenquelle. E fuente polifásica. I sorgente polifase. N meerfasenbron. P źródło wielofazowe. S flerfaskälla. (131)
22. **primary light source** : surface or object emitting light produced by a transformation of energy. ★ source primaire de lumière → *source 30.* R первичный источник света. D Selbstleuchter; Primärlichtquelle. E fuente de luz primaria. I sorgente primaria di luce. N primaire lichtbron. P źródło światła pierwotne. S primärljuskälla. (845)
23. **radiation source** : an apparatus or a material emitting or capable of emitting ionizing radiation. ★ source de

rayonnement → *source 18.* R источник излучения. D Strahlenquelle. E fuente de radiación. I sorgente di radiazione. N stralingsbron. P źródło promieniowania. S strål(nings)källa. (026,391,881)

24. **radioactive source** : any quantity of radioactive material which is intended for use as a source of ionizing radiation. ★ source radioactive → *source 31.* R радиоактивный источник. D radioaktive Quelle. E fuente radiactiva. I sorgente radioattiva. N radioactieve bron. P źródło radioktywne. S radioaktivt preparat; strålkälla. (026,881)
25. **received source signal** (*Syn.* output signal (of a transmission system)) : → *signal 137*
26. **reference source** : a device which is intended to produce, for reference purposes, an electrical or magnetic quantity within specified tolerances. ★ source de référence → *source 20.* R опорный источник. D Referenzquelle. E fuente de referencia. I sorgente di riferimento. N referentiebron. P źródło odniesienia. S referenskälla. (301)
27. **sealed radioactive source** : a radioactive source fully encased to prevent dispersal of the radioactive material. ★ source (radioactive) scellée → *source 33.* R запаянный радиоактивный источник. D umschlossene radioaktive Quelle. E fuente radiactiva sellada. I sorgente radioattiva sigillata. N ..... P szczelne źródło radioaktywne. S förseglad strålkälla. (881)
28. **sealed source** : a radioactive source sealed in a container or having a bonded cover, where the container or cover has sufficient mechanical strength to prevent contact with and dispersion of the radioactive material under the conditions of use and wear for which it was designed. ★ source scellée → *source 35.* D umschlossener radioaktiver Strahler; geschlossenes radioaktives Präparat; umschlossener radioaktiver Stoff. E fuente hermética. I sorgente a tenuta; sorgente stagna. N gesloten bron. P źródło zamknięte. S förseglad källa. (026)
29. **secondary light source** : surface or object which is not self-emitting but receives light and re-directs it, at least in part, by reflection or transmission. ★ source secondaire de lumière → *source 36.* R вторичный источник света. D Fremdleuchter; Sekundärlichtquelle. E fuente de luz secundaria. I sorgente secondaria di luce. N secundaire lichtbron. P źródło światła wtórne. S sekundärljuskälla. (845)
30. **simple sound source** (*Syn.* monopole) : source that radiates sound equally in all directions in a free field. ★ source acoustique simple → *source 14.* R простой источник звука; монополь. D Kugelstrahler. E fuente sonora simple. I sorgente sonora semplice. N monopool. P źródło kulistej fali dźwiękowej; kula pulsująca. S monopol; kulstrålare. (801)
31. **sonar source level** : → *level 84*
32. **source** (of field-effect transistors) : a region from which the majority carriers flow into the channel. ★ source → *source 12.* R исток (полевого транзистора). D Source (eines Feldeffekttransistors). E fuente (de un transistor de efecto de campo). I sorgente (di un dispositivo a effetto di campo). N aanvoer(elektrode) (van een veldeffecttransistor). P źródło (w tranzystorze polowym). S emitter (hos fälteffekttransistor). (521)
33. **source current** : → *current 191*
34. **source e.m.f.** : → *e.m.f. 6*
35. **source language** : → *language 9*
36. **source of harmonic current** : any apparatus which is part of the electricity supply system or of installations connected to it and which causes a harmonic distortion of the current wave, due to non-linear impedances and/or admittances. ★ source de courant harmonique → *source de courant 6.* R источник гармоник тока. D Erzeuger von Stromoberschwingungen. E fuente de corriente armónica. I sorgente di corrente armonica. N bron van stroomharmonischen. P źródło wyższych harmonicznych prądu. S alstrare av strömövertoner. (604)
37. **source of harmonic voltage** : any apparatus which is part of the electricity supply system or of installations connected to it, and which contains one or more e.m.f. components, whose frequencies are harmonics of the system fundamental frequency. ★ source de tension harmonique → *source de tension 4.* R источник гармоник напряжения. D Erzeuger von Spannungsoberschwingungen. E fuente de tensión armónica. I sorgente di tensione armonica. N bron van spanningsharmonischen. P źródło wyższych harmonicznych napięcia. S alstrare av spänningsövertoner. (604)
38. **source of release** : a point or location from which a gas, vapour, mist or liquid may be released into the atmosphere so that an explosive gas atmosphere could be formed. *Note.* — IEC Publication 79-10 gives a classification of sources of release. ★ source de dégagement → *source 16.* R источник выброса. D Austrittsstelle. E fuente de emisión. I centro di pericolo. N gevarenbron; lekkagebron. P źródło wyrzutu. S riskkälla. (426)
39. **source power efficiency** : → *efficiency 40*
40. **source range** : → *range 66*
41. **source strength** : → *strength 4*
42. **source voltage** : → *voltage 193*
43. **spectral source strength** : → *strength 5*
44. **standard radioactive source** : a radioactive source against which other radiation sources and/or instruments for ionizing radiation measurements are to be calibrated and which has been approved as a standard source in accordance with established procedures. ★ source radioactive de référence → *source 32.* R образцовый радиоактивный источник. D radioaktiver Prüfstrahler. E fuente radiactiva de referencia; fuente radiactiva patrón. I sorgente radioattiva standard. N radioactieve standaardbron. P wzorcowe źródło radioaktywne. S standardstrålkälla. (881)
45. **static characteristic (of an arc welding power source)** : → *characteristic 87*
46. **transmitted source signal** (*Syn.* input signal (of a transmission system)) : → *signal 105*
47. **video signal source gamma** : → *gamma 13*
48. **welding power source** : equipment for supplying current and voltage and having the required characteristics suitable for the welding process for which the equipment is used. ★ source de courant pour soudage → *source de courant 8.* R сварочный источник питания. D Schweißstromquelle. E fuente de alimentación para soldadura. I saldatrice. N lastoestel. P zasilacz spawalniczy. S svetsströmkälla. (851)

south

1. **south pole** : → *pole 41*
2. **south pole face** : → *face 8*

space

1. **chromatic space** (*Syn.* colour space) : a three-dimensional space in which each point represents the colour characteristics of a luminous radiation, from the point of view of human visual sensation. *Note.* — Luminous radiation may be characterised by three coordinates which depend on the three-dimensional space which has been chosen. ★ espace chromatique → *espace 9.* R цветовое пространство. (723)
2. **CIE 1976 $L^* a^* b^*$ colour space** (*Syn.* CIELAB colour space) : three-dimensional, approximately uniform colour space produced by plotting in rectangular coordinates L^*, a^*, b^* quantities defined by the equations :

$$L^* = 116\,(Y/Y_n)^{1/3} - 16 \qquad Y/Y_n$$
$$a^* = 500\,[(X/X_n)^{1/3} - (Y/Y_n)^{1/3}] \qquad X/X_n > 0{,}008\,856$$
$$b^* = 200\,[(Y/Y_n)^{1/3} - (Z/Z_n)^{1/3}] \qquad Z/Z_n$$

X, Y, Z describe the colour stimulus considered and X_n, Y_n, Z_n describe a specified white achromatic stimulus. *Note.* — Approximate correlates of lightness, chroma and hue may be calculated as follows: "CIE 1976 lightness"

$$L^* = 116\,(Y/Y_n)^{1/3} - 16 \qquad Y/Y_n > 0{,}008\,856$$

"CIE 1976 *a, b* chroma"

$$C^*_{ab} = (a^{*2} + b^{*2})^{1/2}$$

"CIE 1976 *a, b* hue-angle"

$$h_{ab} = \arctan\,(b^*/a^*)$$

(See CIE Publication CIE No.15.2). ★ espace chromatique $L^* a^* b^*$ CIE 1976 → *espace 13.* R цветовое пространство МКО 1976 г. $L^* a^* b^*$. D $L^* a^* b^*$ Farbenraum CIE 1976; CIELAB-Farbenraum. E espacio de color CIELAB. I spazio colorimetrico $L\,a\,b$ CIE 1976; spazio colorimetrico CIELAB. N ($L^* a^* b^*$)kleurenruimte van de CIE 1976. P przestrzeń barw CIE 1976 ($L^* a^* b^*$). S CIELAB-rymd. (845)

3. **CIE 1976 $L^* u^* v^*$ colour space** (*Syn.* CIELUV colour space) : three-dimensional, approximately uniform colour space produced by plotting in rectangular coordinates L^*, u^*, v^* quantities defined by the equations :

$$L^* = 116\,(Y/Y_n)^{1/3} - 16 \qquad Y/Y_n > 0{,}008\,856$$
$$u^* = 13\,L^*\,(u' - u'_n)$$
$$v^* = 13\,L^*\,(v' - v'_n)$$

Y, u', v' describe the colour stimulus considered and Y_n, u'_n, v'_n describe a specified white achromatic stimulus. *Note.* — Approximate correlates of lightness, saturation, chroma, and hue may be calculated as follows: CIE 1976 lightness

$$L^* = 116\,(Y/Y_n)^{1/3} - 16 \qquad Y/Y_n > 0{,}008\,856$$

CIE 1976 u, v saturation

$$s_{uv} = 13\,[(u' - u'_n)^2 + (v' - v'_n)^2]^{1/2}$$

CIE 1976 u, v chroma

$$C^*_{uv} = (u^{*2} + v^{*2})^{1/2} = L^*\,s_{uv}$$

CIE 1976 u, v hue-angle

$$h_{uv} = \arctan\,[(v' - v'_n)/(u' - u'_n)] = \arctan\,(v^*/u^*)$$

(See CIE Publication No.15.2). ★ espace chromatique $L^*\,u^*\,v^*$ CIE 1976 → *espace 14.* R цветовое пространство МКО 1976 г. $L^*\,u^*\,v^*$. N ($L^*\,u^*\,v^*$)kleurenruimte van de CIE 1976. P przestrzeń barw CIE 1976 (L^*, u^*, v^*). S CIELUV-rymd. (845)

4. **CIELAB colour space** (*Syn.* CIE 1976 $L^*\,a^*\,b^*$ **colour space**) : → *space 2*
5. **CIELUV colour space** (*Syn.* CIE 1976 $L^*\,u^*\,v^*$ **colour space**) : → *space 3*
6. **colour space** (*Syn.* chromatic space) : → *space 1*
7. **colour space** : geometric representation of colours in space, usually of three dimensions. *Note.* — In German, "Vektorraum der Farben" refers to a colour space in which colours are represented by vectors originating at the point corresponding to the achromatic stimulus. ★ espace chromatique → *espace 10.* R цветовое пространство. D Farbenraum. E espacio de color. I spazio colorimetrico. N kleurenruimte. P przestrzeń barw. S färgrymd. (845)
8. **deep space** : space at distances from the Earth greater than or approximately equal to the distance between the Earth and the Moon. ★ espace lointain → *espace 21.* R дальний космос. D äusserer Weltraum. E espacio lejano. I spazio lontano. N verre ruimte. P kosmos głęboki. S fjärrymd. (725)
9. **deep space probe** : → *probe 3*
10. **drift space** : a region, free of impressed radiofrequency fields, in which bunching takes place. ★ espace de glissement → *espace 17.* R пролетное пространство. D Triftraum. E espacio de deriva. I regione di scorrimento. N inhaalruimte. P obszar przelotowy. S löpsträcka. (531)
11. **free space propagation** : → *propagation 8*
12. **letters shift-on space** : a means by which a telegraph receiver, on receiving the space signal, is caused to shift from the figures case to the letters case while the printing position is advanced by one character pitch without printing. ★ "blanc des lettres" automatique → *blanc 3.* R пробел с переводом на буквы. D Umschaltung in Buchstabenstellung mit Leerzeichen. E "blanco de letras" automático. I spazio e passaggio a caratteri letterali. N ..... P zmiana liter z odstępem. S bokstavsskift efter blanksteg. (721)
13. **loss relative to free space** : → *loss 56*
14. **marker space** : a portion of the recorded surface where the groove pitch has been increased to mark the separation of two successive bands of recording. ★ plage de séparation → *plage 12.* R разделительный промежуток. D Kennrille. E zona de separación. I spazio di separazione. N marge. P ..... S skiljeyta. (806)
15. **space** : a transmission medium in which manufactured structures are not used for guiding electromagnetic energy.. ★ espace → *espace 6.* R пространство; естественная среда передачи. D Raum. E espacio (en transmisión). I spazio. N ruimte. P przestrzeń (w transmisji). S rymd. (704)
16. **space** (between characters and words in Morse code) : a signal element of space condition and nominal duration of two unit intervals between characters and six unit intervals between words. ★ espace → *espace 7.* R пробел (между знаками и словами в коде Морзе). D Zwischenraum (zwischen Zeichen und Wörtern im Morse-Code). E espacio (en código Morse). I spazio. N spatie (tussen karakters en woorden in de Morsecode). P odstęp (w kodzie Morse'a). S mellanrum. (721)
17. **space coherence** (*Syn.* spatial coherence) : → *coherence 7*
18. **space condition** : → *condition 26*
19. **space division** : → *division 8*
20. **space division switching** : → *switching 42*
21. **space phase difference** : → *difference 28*
22. **space probe** : → *probe 10*
23. **space radiocommunication** : → *radiocommunication 2*
24. **space signal** : → *signal 214*
25. **space station** : → *station 33*
26. **space system** : → *system 192*
27. **(space) tracking** : → *tracking 7*
28. **uniform colour space** : colour space in which equal distances are intended to represent threshold or suprathreshold perceived colour differences of equal size. ★ espace chromatique uniforme → *espace 15.* R равноконтрастное цветовое пространство. D gleichförmiger Farbenraum. E espacio de color uniforme. I spazio colorimetrico uniforme. N uniforme kleurenruimte. P przestrzeń barw równomierna. S jämnfördelad färgrymd. (845)

space-charge

1. **space charge** : the electric charge in a region of space, caused by electrons or ions. ★ charge d'espace → *charge 53.* R пространственный заряд. D Raumladung. E carga de espacio. I carica spaziale. N ruimtelading. P ładunek przestrzenny. S rymdladdning. (531,881)
2. **space-charge debunching** : → *debunching 1*
3. **space-charge limited state** : → *state 34*
4. **space-charge region** : → *region 24*
5. **space-charge region** : → *region 25*

space-charge-controlled

1. **space-charge-controlled tube** : → *tube 78*

space-charge-wave

1. **space-charge-wave tube** : → *tube 79*

spacecraft

1. **spacecraft** : a man-made vehicle which is intended to go beyond the major part of the Earth's atmosphere. ★ engin spatial → *engin 2.* R космический корабль. D Raumfahrzeug. E vehículo espacial. I veicolo spaziale. N ruimtevaartuig. P pojazd kosmiczny. S rymdfarkost. (725)

spacer

1. **duct spacer** : a space between adjacent packets of laminations to provide a radial ventilation duct. ★ entretoise de ventilation → *entretoise 3.* R распорки вентиляционных каналов. D Stützsteg (Distanzsteg). E separador para ventilación. I distanziatori dei canali di ventilazione. N afstandstrip. P rozpórka wentylacyjna. S kanalmellanlägg. (411)
2. **spacer** (*Syn.* separation) : a device made of insulating material used to maintain the spacing between electrodes of opposite polarity. ★ écarteur → *écarteur 1.* R держатель. D Abstandshalter. E tabique. I distanziatore. N isolator. P przekładka izolacyjna. S separator. (111,486)
3. **spacer** : a device which keeps the sub-conductors of a bundle in a given geometrical configuration. ★ entretoise → *entretoise 1.* R распорка. D Feldbündelabstandhalter. E separador. I distanziatore. N veldafstandhouder. P odstępnik. S distansstång. (466)
4. **spacer damper** : → *damper 3*
5. **spacer shaft** (*Syn.* dumb-bell shaft) : → *shaft 1*

spacing

1. **message spacing** : a facility whereby a subscriber may request the network to transmit several line feed characters to his terminal at the end of each successful call, before clear down, for the purpose of providing a blank space between adjacent printed messages. ★ espacement des messages → *espacement 2.* R разделение сообщений. D Vorschub zwischen Sendungen. E espaciador de mensajes. I spaziatura messaggi. N ruimte tussen de berichten. P spacjowanie wiadomości. S meddelandemellanrum. (721)

2. **phase-to-phase spacing** : the distance between the axes of two adjacent line conductors, or bundles of line conductors, of adjacent phases. ★ distance entre phases → *distance 18.* R расстояние между фазами. D Leiterabstand. E distancia entre fases. I distanza tra le fasi. N faseafstand. P odstęp międzyprzewodowy. S fasavstånd. (466)
3. **pulse spacing** : the time interval between two specified corresponding instants in two consecutive pulses. ★ espacement d'impulsions → *espacement 3.* R разнос импульсов. D Impulsabstand. E espaciamiento de impulsos. I spaziatura (di impulsi). N pulsinterval. P odstęp międzyimpulsowy. S pulsintervall. (702)
4. **relative frequency spacing** (B_s) : the ratio of the difference between the parallel resonance frequency f_p and the series resonance frequency f_s in a given mode of vibration, to the series resonance frequency:

$$B_s = \frac{f_p - f_s}{f_s}$$

★ écart relatif entre fréquences → *écart 17.* R относительный резонансный промежуток. D relativer Frequenzabstand. E separación relativa entre frecuencias. I scarto relativo fra frequenze. N relatieve frequentieafstand. P odstęp częstotliwości rezonansowych względny. S trimfaktor. (561)

5. **spacing** (of an insulator) : the distance between two corresponding consecutive points recurring in repetitive positions on an insulator or insulator assembly. ★ pas → *pas 5.* R шаг (элементов в изоляторе). D Baulänge. E paso. I passo. N steek. P skok. S delning. (471)
6. **spacing** (in an installation) : distance between the light centres of adjacent luminaires of the installation. ★ espacement → *espacement 1.* R размещение (осветительной установки). D Abstand (in einer Beleuchtungsanlage). E espaciamiento. I interdistanza. N lichtpuntafstand. P odstęp między oprawami. S armaturavstånd. (845)

span

1. **back span** : the coil span at the non-connection end of a winding. ★ pas arrière → *pas 7.* R обратный шаг обмотки. D Wicklungsschritt auf der Gegen-Schaltseite. E paso atrás. I passo posteriore. N spoelwijdte aan de achterzijde. P poskok tylny. S härvsteg på sida motsatt förbindningssida. (411)
2. **coil span** (UK) (*Syn.* coil pitch (USA)) : the number of tooth pitches which separate the slots in which the two sides of a coil are placed. ★ pas de bobinage → *pas 12.* R шаг обмотки. D Wicklungsschritt (Spulenweite). E paso de bobina. I passo di avvolgimento. N spoelwijdte. P rozpiętość zezwoju (poskok zezwoju). S spårsteg. (411)
3. **equivalent span** (*Syn.* ruling span) : d2fictitious single span in which tension variations due to load or temperature changes are nearly the same as in the actual spans in a section. *Note.* — The approximate value a_e of the equivalent span is calculated from :

$$a_e \simeq \sqrt{\frac{\Sigma a_i^3}{\Sigma a_i}}$$

where a_i is the length of the span i in the section. ★ portée équivalente → *portée 8.* R приведенный пролёт. D ideelle Spannweite. E vano regulador. I campata equivalente. N equivalent veld; nominaal veld. P przęsło równoważne. S normalspann. (466)

4. **front span** : the coil span at the connection end of a winding. ★ pas avant → *pas 9.* R прямой шаг обмотки. D Wicklungsschritt auf der Schaltseite (Schaltschritt). E paso adelante. I passo frontale. N spoelwijdte aan de voorzijde. P poskok przedni. S härvsteg på förbindningssida. (411)
5. **inclined span** (*Syn.* sloping span) : → *span 9*
6. **level span** : a span in which the attachment points of the conductor on two consecutive supports are nearly in the same horizontal plane. ★ portée de niveau → *portée 6.* R пролет с точками подвеса на одинаковой высоте. D ebenes Spannfeld. E vano a nivel. I campata in piano. N horizontaal veld. P przęsło poziome. S plant spann. (466)
7. **measuring span** : difference between the upper and the lower range values. ★ ..... → . R промежуток измерения. D Mess-Spanne. E intervalo de medida. I ampiezza del campo di misura. N meetbreedte. P zakres pomiarowy (przyrządu wielozakresowego). S mätomfång. (351)
8. **ruling span** (*Syn.* equivalent span) : → *span 3*
9. **sloping span** (*Syn.* inclined span) : a span in which the attachment points of the conductor on two consecutive supports are not in the same horizontal plane. ★ portée dénivelée → *portée 7.* R пролет с точками подвеса на разных высотах; наклонный пролет. D geneigtes Spannfeld. E vano inclinado. I campata a dislivello. N hellend veld. P przęsło pochyłe. S lutande spann. (466)
10. **sloping span length** : → *length 29*
11. **span** : the algebraic difference between the upper and lower limits of the measuring range. ★ plage (de mesurage) → *plage 9.* R интервал измерений. D Messspanne. E intervalo (de medida). I intervallo di misura. N omvang van het meetgebied; span. P obszar pomiarowy. S spann. (301)
12. **span** : the part of a line between two consecutive points of support of a conductor. ★ portée → *portée 3.* R пролет. D Spannfeld. E vano. I campata. N veld. P przęsło. S spann. (466)
13. **span** : the overhead contact line from one support or suspension point to the next. ★ portée → *portée 5.* R пролет. D Spannweite. E vano. I campata. N veld. P przęsło. S spann. (811)
14. **span length** : → *length 31*
15. **span wire** (*Syn.* cross-span) : → *cross-span 1*
16. **weight span** : the horizontal distance between the lowest points of a conductor on either side of a support. *Note.* — In steeply sloping terrain, the lowest points of the catenary curves of both adjacent spans can be on the same side of the support. ★ portée poids → *portée 19.* R весовой пролёт. D Gewichtsspannweite. E vano de peso. I campata gravante. N gewichtsveldlengte. P przęsło ciężarowe. S vertikalt belastande linlängd. (466)
17. **wind span** : the horizontal distance between the points at mid-span on each side of a support. ★ portée vent → *portée 21.* R ветровой пролёт. D Windspannweite. E vano de viento. I campata media. N windveldlengte. P przęsło wiatrowe. S horisontellt belastande linlängd. (466)

spare

1. **manufacture's spare pair** : → *pair 5*
2. **spare pair** : → *pair 15*

spark

1. **(electric) spark** : a commonly used term designating a small arc of short duration. ★ étincelle (électrique) → *étincelle 3.* R (электрическая) искра. D (elektrischer) Funken. E chispa (eléctrica). I scintilla (elettrica). N vonk. P iskra (elektryczna). S (elektrisk) gnista. (121)
2. **spark chamber** : → *chamber 15*
3. **spark detector** : → *detector 36*
4. **spark test apparatus (for intrinsically-safe circuits)** : → *apparatus 14*

spark-gap

1. **measuring spark gap** : a spark gap, generally between spheres, intended to measure peak voltage as a function of the flash-over distance between the electrodes. ★ spintermètre → *spintermètre 1.* R разрядник измерительный. D Messfunkenstrecke. E explosor de medida; espinterómetro. I spinterometro. N meetvonkbrug. P iskiernik pomiarowy. S mätgnistgap. (302)
2. **(protective) spark gap** : a protective device which consists of an open air-gap between one or more energized electrodes in series, and an electrode connected with earth. *Note.* — *Rod spark gap:* spark gap made of two rods set in line opposite to each other. *Horn spark gap:* spark gap made of two or more upright vertical rods splaying out at the top to facilitate arc extinction. ★ éclateur (de protection) → *éclateur 3.* R защитный искровой промежуток. D Schutzfunkenstrecke. E descargador; explosor; descargador de varillas; descargador de vátago. I spinterometro (di protezione). N vonkbrug; stavenvonkbrug; hoornvonkbrug. P iskiernik. S gnisthorn. (604)
3. **spark-gap** : a device with two or more electrodes designed for sparkover to occur under specified conditions. ★ éclateur → *éclateur 1.* R разрядник. D Funkenstrecke. E explosor. I scaricatore. N vonkbrug. P iskiernik. S gnistgap. (151)

sparkover

1. **sparkover** (*Syn.* disruptive discharge) : → *discharge 14*

spatial

1. **spatial coherence** : → *coherence 7*
2. **(spatial) distribution of luminous intensity** : → *distribution 39*
3. **spatial effect** : → *effect 74*

SPC

1. **SPC** (*Syn.* stored program control) : → *control 177*
2. **SPC** (*Syn.* stored program control) : → *control 178*

speach

1. **mutilation (of speech)** : → *mutilation 2*

special

1. **CIE 1974 special colour rendering index** : → *index 3*
2. **special atmosphere** : → *atmosphere 15*
3. **special bonding of shields** : → *bonding 5*
4. **special coinbox discriminating tone** : → *tone 30*
5. **special dial tone** : → *tone 31*
6. **special effects** : → *effect 75*
7. **special effects generator** : → *generator 34*
8. **special effects operator** : → *operator 5*
9. **special fastener** : → *fastener 1*
10. **special information tone** : → *tone 32*
11. **special load** : → *load 74*
12. **special purpose motor** : → *motor 96*
13. **special studio floodlight** : → *floodlight 2*

specific

1. **(secondary) battery for specific application** : → *battery 61*
2. **specific acoustic admittance** : → *admittance 14*
3. **specific acoustic impedance** : → *impedance 55*
4. **specific acoustic reactance** : → *reactance 19*
5. **specific acoustic resistance** : → *resistance 60*
6. **specific activity** : → *activity 15*
7. **specific activity** : → *activity 16*
8. **specific air resistance** : → *resistance 61*
9. **specific apparent power** (*Syn.* apparent power (mass) density) : → *density 1*
10. **specific burn-up** : → *burn-up 4*
11. **specific characteristic** : → *characteristic 75*
12. **specific cymomotive force** (*Syn.* specific field strength-distance product) : → *product 9*
13. **specific electrode consumption** : → *consumption 1*
14. **specific energy consumption of an electric vehicle** : → *consumption 2*
15. **specific field strength-distance product** : → *product 9*
16. **specific flow resistance** : → *resistance 62*
17. **specific fuel consumption of a thermo-electric vehicle** : → *consumption 3*
18. **specific gamma-ray constant** : → *constant 30*
19. **specific heat capacity** : → *capacity 26*
20. **specific ionization coefficient** : → *coefficient 61*
21. **specific output** : → *output 64*
22. **specific power** : → *power 179*
23. **specific resistance due to curves** : → *resistance 63*
24. **specific resistance on inclined track (gradient)** : → *resistance 64*
25. **specific rolling resistance** : → *resistance 65*
26. **specific saturation magnetization** (*Syn.* saturation magnetization (mass) density) : → *density 28*
27. **specific total loss** (*Syn.* total loss (mass) density) : → *density 38*
28. **specific train resistance** : → *resistance 66*

specification

1. **interface (specification)** : → *interface 5*

specified

1. **specified breakaway torque** : → *torque 23*
2. **voltage drop or rise for a specified load condition** : → *voltage drop 3*
3. **voltage regulation for a specified load condition** (*Syn.* voltage drop or rise for a specified load condition) : → *voltage drop 3*

specified-time

1. **actual value of a specified time** : → *value 1*
2. **setting range of a specified time** : → *range 63*
3. **setting ratio of a specified time** : → *ratio 79*
4. **setting value of a specified time** : → *value 62*
5. **specified time** : a time interval which is a specified characteristic of a specified-time relay. ★ temporisation → *temporisation 4*. R выдержка времени. D Zeitverzögerung; festgelegtes Zeitverhalten (bei einer gegebenen Funktion). E temporización. I temporizzazione. N gespecificeerde tijd. P nastawa czasowa. S especificerad tid. (446)
6. **specified-time relay** : → *relay 40*

speckle

1. **speckle noise** (*Syn.* modal noise) : → *noise 41*

spectral

1. **bit energy to noise spectral density ratio** : → *ratio 10*
2. **energy spectral density** : → *density 10*
3. **Napierian spectral absorbance** (*Syn.* Napierian spectral internal transmittance density) : → *density 16*
4. **Napierian spectral absorption coefficient** : → *coefficient 42*
5. **Napierian spectral internal transmittance density** : → *density 16*
6. **power spectral density** : → *density 19*
7. **power spectral density** : → *density 20*
8. **power spectral density of fractional frequency deviations** : → *density 21*
9. **relative spectral distribution** : → *distribution 34*
10. **relative spectral responsivity** : → *responsivity 2*
11. **spectral** : an adjective that, when applied to a quantity X pertaining to electromagnetic radiation, indicates : either that X is a function of the wavelength λ, symbol : $X(\lambda)$, or that the quantity referred to is the spectral concentration of X, symbol :

$$X_\lambda \equiv \frac{\mathrm{d}X}{\mathrm{d}\lambda};$$

In the latter case, in French, "spectrique" is preferred to "spectral". X_λ is also a function of λ and in order to stress this may be written $X_\lambda(\lambda)$ without any change of meaning. *Note.* — The quantity X can also be expressed as a function of frequency ν, wave number σ, etc. ; the corresponding symbols are $X(\nu)$, $X(\sigma)$, etc. and X_ν, X_σ, etc. ★ spectral → *spectral 53*. R спектральный. D spektral. E espectral. I spettrale. N spectraal. P widmowy. S spektral. (845)
12. **spectral absorbance** (*Syn.* spectral internal transmittance density) : → *density 33*
13. **spectral absorption index** : → *index 41*
14. **spectral absorptivity** : → *absorptivity 1*
15. **spectral characteristic** : → *characteristic 76*
16. **spectral chromaticity coordinates** : → *coordinates 2*
17. **spectral component** : → *component 53*
18. **spectral concentration** : → *concentration 9*
19. **spectral density** : → *density 32*
20. **spectral distribution** (*Syn.* spectral concentration) : → *concentration 9*
21. **spectral internal absorptance** : → *absorptance 2*
22. **spectral internal transmittance** : → *transmittance 4*
23. **spectral internal transmittance density** : → *density 33*
24. **spectral irradiance** : → *irradiance 6*
25. **spectral line** : → *line 149*
26. **spectral linear absorption coefficient** : → *coefficient 62*
27. **spectral linear attenuation coefficient** : → *coefficient 63*
28. **spectral linear scattering coefficient** : → *coefficient 64*

29. **spectral linewidth** : → *linewidth 1*
30. **spectral luminous efficiency** : → *efficiency 41*
31. **spectral mass attenuation coefficient** : → *coefficient 65*
32. **spectral optical depth** (*Syn.* spectral optical thickness) : → *thickness 7*
33. **spectral optical thickness** : → *thickness 7*
34. **spectral radiance** : → *radiance 9*
35. **spectral representation** : → *representation 3*
36. **spectral response curve** : → *curve 35*
37. **spectral responsivity** : → *responsivity 5*
38. **spectral responsivity** : → *responsivity 6*
39. **spectral shift control** : → *control 174*
40. **spectral shift reactor** : → *reactor 42*
41. **spectral source strength** : → *strength 5*
42. **spectral stimulus** (*Syn.* monochromatic stimulus) : → *stimulus 9*
43. **spectral transmissivity** : → *transmissivity 2*
44. **spectral width** : → *width 7*
45. **spectral window** : → *window 2*

spectral sensitivity

1. **absolute spectral sensitivity** : the radiant sensitivity for monochromatic radiation of a stated wavelength. ★ sensibilité énergétique monochromatique → *sensibilité 33.* R абсолютная спектральная чувствительность. D spektrale Empfindlichkeit. E sensibilidad energética monocromática absoluta. I sensibilità energetica monocromatica. N absolute spectrale gevoeligheid. P czułość widmowa absolutna. S (absolut) spektralkänslighet. (531)
2. **absolute spectral sensitivity characteristic** : → *characteristic 1*
3. **relative spectral sensitivity** : the ratio of the radiant sensitivity at any considered wavelength to the radiant sensitivity at a certain wavelength taken as reference, usually the wavelength of maximum response. ★ sensibilité énergétique monochromatique relative → *sensibilité 34.* R относительная спектральная чувствительность. D relative spektrale Empfindlichkeit. E sensibilidad energética monocromática relativa. I sensibilità energetica monocromatica relativa. N relatieve spectrale gevoeligheid. P czułość widmowa względna. S (relativ) spektralkänslighet. (531)
4. **relative spectral sensitivity** (*Syn.* relative spectral responsivity) : → *responsivity 2*
5. **relative spectral sensitivity characteristic** : → *characteristic 70*
6. **spectral sensitivity** (*Syn.* spectral responsivity) : → *responsivity 6*
7. **spectral-sensitivity characteristic** : → *characteristic 77*

spectrogram

1. **spectrogram** : a record or display of a spectrum. ★ spectrogramme → *spectrogramme 1.* R спектрограмма. D Spektrogramm. E espectrograma. I spettrogramma. N spectrogram. P spektrogram. S spektrogram. (881)

spectrograph

1. **crystal spectrograph** : an instrument that measures the wavelengths of X-radiation or gamma radiation by means of their diffraction by a crystal. ★ spectrographe à cristal → *spectrographe 2.* R кристаллический спектрограф. D Kristall-Spektrograph. E espectrógrafo de cristal. I spettrografo a cristallo. N kristalspectrograaf. P spektrograf krystaliczny. S kristallspektrograf. (881)
2. **mass spectrograph** : an assembly intended to analyse a substance in terms of the relative abundances of its components, separating the components by their "mass to charge" ratios. The detection and the counting of the ions are by photographic means. ★ spectrographe de masse → *spectrographe 6.* R масс-спектрограф. D Massenspektrograph. E espectrógrafo de masa. I spettrografo di massa. N massaspectrograaf. P spektrograf masowy. S masspektrograf. (391)
3. **sound spectrograph** (*Syn.* visible speech apparatus) : → *apparatus 19*
4. **spectrograph** : an apparatus for determining spectra : the spectrograph provides a permanent record. ★ spectrographe → *spectrographe 1.* R спектрограф. D Spektrograph. E espectrógrafo. I spettrografo. N spectrograaf. P spektrograf. S spektrograf. (881)
5. **vacuum spectrograph** : a spectrograph operating in a vacuum in order to avoid attenuation of long-wavelength radiation by the air. ★ spectrographe à vide → *spectrographe 4.* R вакуумный спектрограф. D Vakuum-Spektrograph. E espectrógrafo de vacío. I spettrografo a vuoto. N vacuümspectrograaf. P spektrograf próżniowy. S vakuumspektrograf. (881)

spectrometer

1. **alpha ray spectrometer** : a radiation spectrometer for alpha radiation. ★ spectromètre alpha → *spectromètre 4.* R альфа спектрометр. D Alpha -Spektrometer. E espectrómetro alfa. I spettrometro alfa. N alfaspectrometer. P spektrometr promieniowania alfa. S alfaspektrometer. (391)
2. **anti-Compton gamma ray spectrometer** : a gamma ray spectrometer in which the continuous background due to the Compton effect is reduced. ★ spectromètre gamma anti-Compton → *spectromètre 10.* R гамма-спектрометр с подавлением комптоновского распределения. D Anti-Compton-Gamma-Spektrometer. E espectrómetro gamma anti-Compton. I spettrometro gamma anti-Compton. N anti-Comptongamma spectrometer. P spektrometr promieniowania gamma ze zredukowanym tłem. S anti-Compton-gammaspektrometer. (391)
3. **beta ray spectrometer** : a radiation spectrometer for beta radiation. ★ spectromètre bêta → *spectromètre 5.* R бета спектрометр. D Beta -Spektrometer. E espectrómetro beta. I spettrometro beta. N bêtaspectrometer. P spektrometr promieniowania beta. S betaspektrometer. (391)
4. **gamma ray spectrometer** : a radiation spectrometer for gamma radiation. ★ spectromètre gamma → *spectromètre 9.* R гамма- спектрометр. D Gamma -Spektrometer. E espectrómetro gamma. I spettrometro gamma. N gammaspectrometer. P spektrometr promieniowania gamma. S gammaspektrometer. (391)
5. **mass spectrometer** : an assembly intended to analyse a substance in terms of the relative abundances of its components, separating the components by their "mass to charge" ratios. The detection and the counting of the ions are by electrical means. ★ spectromètre de masse → *spectromètre 6.* R масс-спектрометр. D Massenspektrometer. E espectrómetro de masa. I spettrometro di massa. N massaspectrometer. P spektrometr masowy. S masspektrometer. (391)
6. **radiation spectrometer** : a measuring assembly intended to determine the energy spectrum of ionizing radiation. ★ spectromètre de rayonnement → *spectromètre 8.* R спектрометр ионизирующих излучений. D Spektrometer für ionisierende Strahlen. E espectrómetro de radiación. I spettrometro di radiazione. N stralingsspectrometer. P spektrometr promieniowania. S (strålnings)spektrometer. (391,881)
7. **recoil proton spectrometer** : a radiation spectrometer intended to determine the energy spectrum of fast neutrons by measuring the energy distribution of the recoil protons resulting from elastic scattering of fast neutrons in a detector containing nuclei of hydrogen. ★ spectromètre à protons de recul → *spectromètre 2.* R спектрометр протонов отдачи. D Rückstoßprotonenspektrometer. E espectrómetro de protones de rechazo. I spettrometro a protoni di rinculo. N spectrometer voor protonenterugslag. P spektrometr protonów odrzutu. S protonrekylspektrometer. (391)
8. **scintillation spectrometer** : a radiation spectrometer that utilizes a scintillation detector. ★ spectromètre à scintillation → *spectromètre 3.* R сцинтилляционный спектрометр. D Szintillationsspektrometer. E espectrómetro de centelleo. I spettrometro a scintillazione. N scintillatiespectrometer. P spektrometr scyntylacyjny. S scintillationsspektrometer. (391,881)
9. **semiconductor spectrometer** : a radiation spectrometer that utilizes a semiconductor detector. ★ spectromètre semi-conducteur → *spectromètre 11.* R полупроводниковый спектрометр. D Halbleiterspektrometer. E espectrómetro semiconductor. I spettrometro a semiconduttore. N halfgeleiderspectrometer. P spektrometr półprzewodnikowy. S halvledarspektrometer. (881)
10. **spectrometer** : an apparatus for determining spectra : the spectrometer measures quantities such as wavelengths and relative amplitudes of components. ★ spectromètre

→ *spectromètre 1.* R спектрометр. D Spektrometer. E espectrómetro. I spettrometro. N spectrometer. P spektrometr. S spektrometer. (881)

11. **time-of-flight neutron spectrometer** : a radiation spectrometer intended to determine the energy spectrum of the neutrons in a beam, by measuring their times-of-flight. ★ spectromètre de neutrons à temps de vol → *spectromètre 7.* R нейтронный спектрометр по времени пролета. D Neutronen-Flugzeit-Spektrometer. E espectrómetro de neutrones de tiempo de vuelo. I spettrometro di neutroni a tempo di volo. N spectrometer voor neutronenlooptijd; looptijdspectrometer voor neutronen. P spektrometr czasu przelotu neutronów. S löptidsspektrometer för neutroner. (391)
12. **X ray spectrometer** : a radiation spectrometer for X radiation. ★ spectromètre X → *spectromètre 12.* R рентгеновский спектрометр. D Röntgen -Spektrometer. E espectrómetro X. I spettrometro X. N röntgenspectrometer. P spektrometr promieniowania X. S röntgenspektrometer. (391)

spectrophotometer

1. **spectrophotometer** : instrument for measuring the ratio of two values of a radiometric quantity at the same wavelength. ★ spectrophotomètre → *spectrophotomètre 1.* R спектрофотометр. D Spektralphotometer. E espectrofotómetro. I spettrofotometro. N relatieve spectroradiometer. P spektrofotometr. S spektrofotometer. (845)

spectroradiometer

1. **spectroradiometer** : instrument for measuring radiometric quantities in narrow wavelength intervals over a given spectral region. ★ spectroradiomètre → *spectroradiomètre 1.* R спектрорадиометр. D Spektralradiometer. E espectroradiómetro. I spettroradiometro. N spectroradiometer. P spektroradiometr. S spektroradiometer. (845)

spectroscope

1. **spectroscope** : an apparatus for deterining spectra : the spectroscope provides a visible display. ★ spectroscope → *spectroscope 1.* R спектроскоп. D Spektroskop. E espectroscopio. I spettroscopio. N spectroscoop. P spektroskop. S spektroskop. (881)

spectroscopic

1. **spectroscopic lamp** : → *lamp 59*

spectrum

1. **(actinic) action spectrum** (of optical radiations, for a specified actinic phenomenon, in a specified system) : efficiency of monochromatic radiations for producing that phenomenon in that system. ★ spectre d'action (actinique) → *spectre 16.* R спектр (актиничного) действия (оптических излучений для определенного явления актиничности, в определенной системе). D (aktinische) Wirkungsfunktion (der optischen Strahlung, für ein spezielles aktinisches Phänomen, in einem ausgewählten System). E espectro de acción. I spettro d'azione (attinico). N spectrale (actinische) werkzaamheid. P widmo czynne (aktyniczne). S aktionsspektrum. (845)
2. **amplitude sound spectrum** : the distribution, as a function of frequency, of the amplitudes of the sinusoidal components of an acoustic signal. *Note.* — The amplitude sound spectrum is the modulus of the complex sound spectrum. ★ spectre acoustique d'amplitude → *spectre 9.* R амплитудно-частотный спектр звука; спектр амплитуд звука. D Schallamplitudenspektrum. E espectro acústico de amplitud. I spettro acustico d'ampiezza. N geluidsamplitudespectrum; amplitudespectrum van het geluid. P widmo amplitudowe sygnału akustycznego. S ljudamplitudspektrum. (722)
3. **amplitude spectrum** : the distribution as a function of frequency of the amplitude of the spectral components of a signal or noise. ★ spectre d'amplitude → *spectre 17.* R спектр амплитуд. D Amplitudenspektrum. E espectro de amplitud. I spettro d'ampiezza. N amplitudespectrum. P widmo amplitudowe. S amplitudspektrum. (702)
4. **beta ray spectrum** : distribution, in energy or in momentum, of beta particles (not including conversion electrons) emitted by a beta disintegration process. ★ spectre de rayons bêta → *spectre 24.* D Betaspektrum. E espectro de rayos beta. I spettro di raggi beta. N bêtaspectrum. P widmo promieniowania β. S betaspektrum. (026)
5. **complex sound spectrum** : a complex function of frequency equal to the Fourier transform of a function of time representing an acoustic signal. ★ spectre acoustique complexe → *spectre 8.* R спектр сложного звука. D komplexes Schallspektrum. E espectro acústico complejo. I spettro acustico complesso. N complex geluid(s)spectrum. P widmo zespolone sygnału akustycznego. S komplext ljudspektrum. (722)
6. **complex spectrum** (*Syn.* spectral representation) : → *representation 3*
7. **continuous spectrum** : a spectrum having non-zero values which occupy one or more continuous frequency intervals. *Example* of continuous spectrum : the continuous set of values of the Fourier transform representing a non-periodic signal. ★ spectre continu → *spectre 13.* R непрерывный спектр. D kontinuierliches Spektrum. E espectro continuo. I spettro continuo. N continu spectrum. P widmo ciągłe. S kontinuerligt spektrum. (702)
8. **continuous spectrum** : sound spectrum whose components are continuously distributed over a given frequency range. ★ spectre continu → *spectre 14.* R непрерывный спектр. D kontinuierliches Spektrum. E espectro continuo. I spettro continuo. N continu spectrum. P widmo ciągłe. S kontinuerligt spektrum. (801)
9. **continuous X-ray spectrum** : spectrum of X-radiation, excluding characteristic radiation, having a maximum photon energy that is equal to the product of the electron charge and the maximum accelerating voltage. ★ spectre continu → *spectre 15.* R непрерывный спектр рентгеновского излучения. D kontinuierliches Röntgenspektrum. E espectro continuo (de rayos X). I spettro continuo (di raggi X). N continu röntgenspectrum. P ciągłe widmo promieniowania rentgenowskiego. S kontinuerligt röntgenspektrum. (881)
10. **electromagnetic spectrum** : the ordered sequence of wavelengths, frequencies or quantum of energy which exists in an electromagnetic radiation. ★ spectre électromagnétique → *spectre 30.* R электромагнитный спектр. D elektromagnetisches Spektrum. E espectro electromagnético. I spettro elettromagnetico. N elektromagnetisch spectrum. P widmo elektromagnetyczne. S elektromagnetiskt spektrum. (841)
11. **emission spectrum** (of a scintillator) : a curve representing the distribution of the number of emitted photons as a function of their wavelength or energy. ★ spectre d'émission → *spectre 26.* R спектр испускания (сцинтиллятора). D Emissionsspektrum (eines Szintillators). E espectro de emisión (de un centelleador). I spettro di emissione (di uno scintillatore). N emissiespectrum (v.e. scintillerend materiaal). P widmo emisyjne (scyntylatora). S emissionsspektrum. (391)
12. **equal energy spectrum** (*Syn.* equi-energy spectrum) : → *spectrum 13*
13. **equi-energy spectrum** (*Syn.* equal energy spectrum) : spectrum of a radiation whose spectral concentration of a radiometric quantity as a function of wavelength is constant throughout the visible region ($\varphi(\lambda)$ = const.). *Note.* — The radiation of the equi-energy spectrum is sometimes regarded as an illuminant, in which case it is denoted by the symbol E. ★ spectre d'égale énergie → *spectre 25.* R равноэнергетический спектр. D energiegleiches Spektrum. E espectro equienergético. I spettro di uguale energia. N equi-energiespectrum. P widmo równoenergetyczne. S isoenergetiskt spektrum. (845)
14. **excitation spectrum** (for a monochromatic component of specified wavelength λ of the emitted radiation) : spectral concentration at the specified emission wavelength λ of the radiant or photon flux emitted by a photoluminescent material as a function of the wavelength of exciting incident monochromatic radiations of equal power. ★ spectre d'excitation → *spectre 29.* R спектр возбуждения (испускаемого монохроматического излучения определенной длины волны λ). D Anregungsspektrum (für einen monochromatischen teil der gegebenen wellenlänge λ der emittierten Strahlung). E espectro de excitación. I spettro di eccitazione. N aanslagspectrum. P widmo wzbudzenia. S excitationsspektrum. (845)
15. **fission spectrum** : for a specified fissionable nuclide the energy distribution of its prompt neutrons. Sometimes the term also refers to the energy spectrum of the prompt gamma radiation emitted in fission. ★ spectre de fission → *spectre 18.* D Spaltspektrum. E espectro de fisión. I spettro di fissione. N splijtingsspectrum. P widmo rozszczepienia. S klyvningsspektrum. (026)

16. **intermediate spectrum reactor** (*Syn.* intermediate reactor) : → *reactor 18*
17. **line spectrum** : a spectrum having non-zero values only for certain discrete values of frequency, or, by extension, in the vicinity of these values. *Example* of line spectrum : the sequence of coefficients of the Fourier series representing a periodic signal or noise. ★ spectre de raies → *spectre 21.* R линейчатый спектр. D Linienspektrum. E espectro de rayas. I spettro a righe. N lijnenspectrum. P widmo prążkowe. S linjespektrum. (702)
18. **line spectrum** : a spectrum consisting of one or more spectral lines. ★ spectre de raies → *spectre 22.* R спектр линии. D Linienspektrum. E espectro de líneas. I spettro a righe. N lijnenspectrum. P widmo liniowe; widmo prążkowe. S linjespektrum. (731)
19. **line spectrum** : sound spectrum containing only discrete frequency components. ★ spectre de raies → *spectre 23.* R линейчатый спектр. D Linienspektrum. E espectro de rayas. I spettro a righe. N lijnenspectrum. P widmo prążkowe. S linjespektrum. (801)
20. **(luminescence) emission spectrum** : spectral distribution of the radiation emitted by a luminescent material for a specified excitation. ★ spectre d'émission (de luminescence) → *spectre 27.* R спектр излучения люминесценции. D (Lumineszenz-) Emissionsspektrum. E espectro de emisión. I spettro di emissione per luminescenza. N emissiespectrum (bij luminescentie). P widmo emisyjne (luminescencyjne). S emissionsspektrum. (845)
21. **optical spectrum** : the range of wavelengths in vacuum of optical radiation. ★ spectre optique → *spectre 32.* R оптический спектр. D optisches Spektrum. E espectro óptico. I spettro ottico. N (optisch) spectrum. P widmo optyczne. S optiskt spektrum. (731)
22. **phase sound spectrum** : the distribution, as a function of frequency, of the phases of the sinusoidal components of an acoustic signal. *Note.* — The phase sound spectrum is the argument of the complex sound spectrum. ★ spectre acoustique de phase → *spectre 10.* R фазочастотный спектр звука; спектр фаз звука. D Schallphasenspektrum. E espectro acústico de fase. I spettro acustico di fase. N geluidsfasespectrum; fasespectrum van het geluid. P widmo fazowe sygnału akustycznego. S ljudfasspektrum. (722)
23. **phase spectrum** : the distribution as a function of frequency of the initial phases of the spectral components of a signal or noise. ★ spectre de phase → *spectre 19.* R спектр фаз. D Phasenspektrum. E espectro de fase. I spettro di fase. N fasespectrum. P widmo fazowe. S fasspektrum. (702)
24. **power sound spectrum** : the distribution, as a function of frequency, of the power of the spectral components of an acoustic signal. ★ spectre acoustique de puissance → *spectre 11.* R энергетический спектр звука. D Schall-Leistungsspektrum. E espectro acústico de potencia. I spettro acustico di potenza. N geluidsvermogenspectrum; vermogenspectrum van het geluid. P widmo mocy sygnału akustycznego. S ljudeffektspektrum. (722)
25. **power spectrum** : the distribution of the power of a signal as a function of frequency, equal to the Fourier transform of the autocorrelation function in the case of a stationary random signal of finite power. ★ puissance spectrique → *puissance 155.* R спектральная плотность. D Leistungsspektrum. E espectro de energía. I spettro di potenza. N vermogensspectrum. P widmo mocy. S effektspektrum. (101)
26. **power spectrum** : the distribution as a function of frequency of the square of the amplitudes of the spectral components of a signal or noise. *Note.* — The spectrum of an electromagnetic radiation can be considered as a power spectrum. ★ spectre de puissance → *spectre 20.* R спектр мощности. D Leistungsspektrum. E espectro de potencia. I spettro di potenza. N vermogensspectrum. P widmo mocy. S effektspektrum. (702)
27. **power spectrum density** (*Syn.* power spectral density) : → *density 19*
28. **power spectrum density** (*Syn.* power spectral density) : → *density 20*
29. **(signal or noise) spectrum** : the set of sinusoidal oscillations representing in the frequency domain a time-varying signal or noise, each oscillation being characterized by its frequency, its amplitude, and its initial phase. ★ spectre → *spectre 5.* R спектр (сигнала или шума). D (Signal- oder Rausch-) Spektrum. E espectro (de una señal o de un ruido). I spettro (di un segnale o di un rumore). N (signaal- of ruis)spectrum. P widmo (sygnału lub szumu). S spektrum. (702)
30. **sound spectrum** : representation of the magnitudes (and sometimes of the phases) of the components of a complex sound arranged as a function of frequency. ★ spectre acoustique → *spectre 7.* R спектр звука. D Schallspektrum. E espectro acústico. I spettro acustico. N geluid(s)spectrum. P widmo akustyczne. S ljudspektrum. (801)
31. **spectrum** : the distribution of a quantity as a function of frequency or of wavelength. ★ spectre → *spectre 3.* R спектр. D Spektrum. E espectro (de frecuencia). I spettro (di frequenza). N spectrum. P widmo. S spektrum. (101)
32. **spectrum** (of an ionizing radiation) : distribution of the values of a specific radiation quantity usually associated with energy, for example emission rate as a function of energy of emitted particles. ★ spectre → *spectre 4.* R спектр (ионизирующих излучений). D Spektrum (ionisierender Strahlung). E espectro (de una radiación ionizante). I spettro (di una radiazione ionizzante). N spectrum (v.e. ioniserende straling). P widmo (promieniowania jonizującego). S spektrum (av joniserande strålning). (391,881)
33. **spectrum** (of a radiation) : display or specification of the monochromatic components of the radiation considered. *Notes. 1* — There are line spectra, continuous spectra, and spectra exhibiting both these characteristics. *2* — This term is also used for spectral efficiencies (excitation spectrum, action spectrum). ★ spectre → *spectre 6.* R спектр (излучения). D Spektrum (einer Strahlung). E espectro. I spettro. N spectrum. P widmo (promieniowania). S (strålnings) spektrum. (845)
34. **spectrum analyzer** : → *analyzer 6*
35. **spectrum density** (*Syn.* spectral density) : → *density 32*
36. **spectrum density level** : → *level 92*
37. **spectrum level** (*Syn.* spectrum density level) : → *level 92*
38. **spectrum stabilizer** : → *stabilizer 1*
39. **(telecommunication) frequency spectrum** : the range of frequencies of electromagnetic oscillations or waves which can be used for the transmission of information. ★ spectre des fréquences → *spectre 28.* R спектр частот (электросвязи). D (Telekommunikations-)Frequenzspektrum. E espectro de frecuencias (en telecomunicación). I spettro delle frequenze. N (telecommunicatie) frequentiespectrum. P widmo częstotliwości (w telecommunikacji). S frekvensspektrum. (702,704)
40. **whole-body gamma spectrum analyzer** : → *analyzer 10*

spectrum locus

1. **spectrum locus** : locus, in a chromaticity diagram or in a tristimulus space, of points that represent monochromatic stimuli. *Note.* — In tristimulus space, the spectrum locus is a cone that is called in German "Spektralkegel" ("spectral cone") or, when including the vectors that represent the purple boundary, the "Farbtüte". ★ lieu spectral → *lieu 3.* R линия спектральных цветностей; поверхность спектральных цветов. D Spektralfarbenzug. E lugar de los estímulos (de color) espectrales. I luogo spettrale. N kromme van de spectrumkleuren. P krzywa barw widmowych. S spektrumort. (845)

specular

1. **specular reflection** : → *reflection 28*
2. **specular reflection** : → *reflection 29*
3. **specular reflection** (*Syn.* regular reflection) : → *reflection 25*
4. **specular surface** : → *surface 27*

speech

1. **acoustical speech power** : → *power 2*
2. **ARAEN speech voltmeter** : → *voltmeter 1*
3. **average speech power** : → *power 17*
4. **instantaneous speech power** : → *power 76*
5. **normal speech power for voice-ear measurements** : → *power 93*
6. **peak speech power** : → *power 101*
7. **peak speech power** : → *power 102*
8. **reference speech power for the measurement of AEN** : → *power 164*

9. **reference speech power for the NOSFER** (*Syn.* normal speech power for voice-ear measurements) : → *power 93*
10. **speech + duplex (equipment)** (*Syn.* S + D (equipment)) : equipment for intraband transmission providing a duplex transmission by using discretely-timed signals and two carrier frequencies. ★ (équipement) bivocal → *équipement 8.* R оборудование "разговор + дуплекс". D Duplexeinlagerungseinrichtung. E (equipo) bivocal. I apparecchiatura S+D. N spraak + duplex; spraak + duplexapparatuur. P urządzenie współrozmówne dupleksowe. S tonduplexutrustning. (721)
11. **speech + simplex (equipment)** (*Syn.* S + S (equipment)) : equipment for intraband transmission providing a simplex transmission by using discretely-timed signals and a single carrier frequency. ★ (équipement) univocal → *univocal 1.* R оборудование "разговор + полудуплекс". D Simplexeinlagerungseinrichtung. E (equipo) univocal. I apparecchiatura S+S. N spraak + simplex; spraak + simplexapparatuur. P urządzenie współrozmówne simpleksowe. S tonsimplexutrustning. (721)
12. **speech circuit** : → *circuit 167*
13. **speech current** : → *current 193*
14. **speech digit signalling** : → *signalling 58*
15. **speech sidetone** : → *sidetone 4*
16. **threshold of speech intelligibility** : → *threshold 28*
17. **visible speech apparatus** : → *apparatus 19*

speed

1. **adjustable constant speed motor** : → *motor 1*
2. **adjustable speed motor** : → *motor 2*
3. **adjustable varying speed motor** : → *motor 3*
4. **average speed between stops** : the quotient of the distance between two or more stops by the time taken to cover this distance, excluding stationary time. ★ vitesse moyenne (entre arrêts) → *vitesse 89.* R техническая (среднеходовая) скорость. D Durchschnittsgeschwindigkeit zwischen Aufenthalten. E velocidad media entre paradas. I velocità media. N gemiddelde snelheid (tussen halteplaatsen). P prędkość techniczna (między przystankami). S medelhastighet mellan uppehåll. (811)
5. **balancing speed** : the speed of a vehicle or train at which the applied tractive effort and the total resistance to motion are equal. ★ vitesse d'équilibre → *vitesse 76.* R установившаяся скорость. D gleichbleibende Geschwindigkeit. E velocidad de equilibrio. I velocità di regime. N evenwichtssnelheid. P prędkość ustalona. S balanserad hastighet. (811)
6. **base speed** : with chopper control, the speed obtained under given conditions when full traction motor supply voltage is reached. ★ ..... → . R базовая скорость. D Grunddrehzahl (Geschwindigkeit). E velocidad base. I velocità a piena tensione. N snelheid bij volledige uitsturing. P prędkość podstawowa. S bashastighet. (811)
7. **constant speed motor** : → *motor 18*
8. **continuous operation duty-type with related load/speed changes** : → *duty-type 3*
9. **critical build-up speed** : the lowest speed at which the machine voltage builds up under specified conditions. ★ vitesse critique d'amorçage → *vitesse 39.* R критическая скорость возбуждения. D kritische Selbsterregungs-Drehzahl. E velocidad crítica de cebado. I velocità critica di autoeccitazione. N minimum toerental voor zelfbekrachting. P krytyczna prędkość obrotowa samowzbudzenia. S kritisk hastighet. (411)
10. **critical speed in resistance braking** : the minimum speed at which rheostatic braking can be established under specified conditions. ★ vitesse critique en régime de freinage sur résistance → *vitesse 42.* R критическая скорость в режиме реостатного торможения. D kleinste Geschwindigkeit für Selbsterregung der Widerstandsbremse. E velocidad crítica en frenado por resistencia. I velocità critica (nella frenatura reostatica). N kritische snelheid bij weerstandsremmen. P prędkość minimalna hamowania rezystorowego. S lägsta hastighet för motståndsbromsning. (811)
11. **critical torsional speeds** : the speeds at which the amplitudes of the vibrations of a machine rotor due to shaft torsional vibration reach their maximum values. ★ vitesses critiques de torsion → *vitesse 97.* R критические торсионные скорости вращения. D torsionskritische (drehkritische) Drehzahlen. E velocidades críticas de torsión. I velocità critica torsionale. N torsiekritische toerentallen. P krytyczne prędkości obrotowe dla drgań skrętnych. S kritiskt torsionssvängningsvarvtal. (411)
12. **critical whirling speeds** : the speeds at which the amplitudes of the vibrations of a machine rotor due to shaft whirling vibration reach their maximum values. ★ vitesses critiques de rotation → *vitesse 96.* R критические скорости вращения. D biegekritische Drehzahlen. E velocidades críticas de rotación. I velocità critica di rotazione. N kritische toerentallen. P krytyczne prędkości obrotowe. S kritiskt precessionssvängningsvarvtal. (411)
13. **deviation from rated speed** : → *deviation 6*
14. **electrode speed** : the rate of rise or fall of the electrode. ★ vitesse de déplacement de l'électrode → *vitesse 51.* R скорость перемещения электрода. D Elektrodengeschwindigkeit. E velocidad del electrodo. I velocità di spostamento dell'elettrodo. N elektrodesnelheid. P prędkość przemieszczania elektrody. S elektrodhastighet. (841)
15. **erasing speed** : the linear scanning speed of the beam across the storage surface during erasing. ★ vitesse d'effacement → *vitesse 73.* R скорость стирания. D Löschgeschwindigkeit. E velocidad de borrado. I velocità di cancellazione. N wissnelheid. P prędkość kasowania. S släckningshastighet. (531)
16. **firing speed** : the minimum speed at which an internal combustion engine must run to enable it to fire under the most unfavourable conditions of temperature and pressure likely to be encountered in service and with the fuel normally used. ★ vitesse d'allumage → *vitesse 43.* R скорость зажигания. D Zuenddrehzahl. E velocidad de encendido. I velocità di accensione. N minimaal ontsteektoerental. P prędkość zapłonowa. S tändningsvarvtal. (811)
17. **groove speed** : the linear speed of a disk groove with respect to a point such as a recording or reproducing stylus tip. ★ vitesse de défilement du sillon → *vitesse 50.* R скорость канавки. D Tangential-Geschwindigkeit der Rille; Relativgeschwindigkeit der Rille gegenüber Schneid- bzw. Abtaststift. E velocidad de desarollo del surco. I velocità del solco. N groefsnelheid. P prędkość przesuwu rowka. S spårhastighet. (806)
18. **high speed automatic reclosing** : → *reclosing 5*
19. **high speed telex** (*Syn.* supertelex (service)) : → *supertelex 1*
20. **idling speed** : the minimum unloaded speed to which an internal combustion engine is adjusted when installed in a vehicle. ★ vitesse de ralenti d'utilisation → *vitesse 67.* R скорость холостого хода. D Leerlaufdrehzahl. E velocidad de ralentí de utilización. I velocità di rotazione minima. N nullasttoerental. P prędkość minimalna eksploatacyjna (silnika). S tomgångsvarvtal. (811)
21. **maximum speed (of a vehicle)** : the maximum speed allowable for a vehicle running in normal service. *Note.* — This speed, inherent in the vehicle, is limited by factors such as the stability and mechanical strength of the parts (e.g. of the traction motors). ★ vitesse maximale (d'un véhicule) → *vitesse 88.* R конструкционная скорость (единицы подвижного состава). D Höchstgeschwindigkeit (eines Fahrzeuges). E velocidad máxima (de un vehículo). I velocità massima (di un veicolo). N maximale toegelaten snelheid (van een voertuig). P prędkość maksymalna (pojazdu). S maximihastighet. (811)
22. **maximum start time to record/reproduce speed** : → *time 88*
23. **maximum stopping time from maximum spooling speed** : → *time 89*
24. **maximum stopping time from record/reproduce speed** : → *time 90*
25. **maximum usable writing speed** : the maximum speed at which information can be written to stated levels under stated operating conditions. ★ vitesse d'inscription maximale utilisable → *vitesse 79.* R максимальная применимая скорость записи. D maximale nutzbare Schreibgeschwindigkeit. E velocidad de inscripción máxima utilizable. I massima velocità di scrittura utilizzabile. N maximum bruikbare schrijfsnelheid. P prędkość zapisywania użyteczna maksymalna. S maximal användbar skrivhastighet. (531)

26. **minimum idling speed** : the minimum speed specified by the manufacturer at which it is possible for an internal combustion engine to run unloaded. ★ vitesse de ralenti minimale → *vitesse 68.* R минимальная скорость холостого хода. D kleinste Leerlaufdrehzahl. E velocidad de ralentí mínima. I minimo (della velocità di rotazione). N minimale nullasttoerental. P prędkość minimalna nominalna (silnika). S lägsta tomgångsvarvtal. (811)
27. **minimum usable reading speed** : the lowest reading speed, under stated operating conditions, at which a stated degree of decay occurs. ★ vitesse de lecture minimale utilisable → *vitesse 60.* R минимальная скорость считывания. D minimale nutzbare Lesegeschwindigkeit. E velocidad de lectura mínima utilizable. I minima velocità di lettura utilizzabile. N minimum bruikbare leessnelheid. P prędkość odczytywania użyteczna minimalna. S minsta användbara avläsningshastighet. (531)
28. **multi-constant speed motor** : → *motor 66*
29. **multi-varying speed motor** : → *motor 69*
30. **peripheral speed** : the speed of movement of a point on the surface of a body rotating about its axis expressed as a distance per unit of time. ★ vitesse périphérique → *vitesse 90.* R окружная скорость. D Umfangsgeschwindigkeit. E velocidad periférica. I velocità periferica. N omtreksnelheid. P prędkość obwodowa. S periferihastighet. (811)
31. **priming speed** : the linear scanning speed of the beam across the storage surface during priming. ★ vitesse d'apprêtage → *vitesse 44.* R скорость подготовки. D Vorbereitungsgeschwindigkeit. E velocidad de preinscripción. I velocità di predisposizione. N activeringssnelheid. P ..... S föraktiveringshastighet. (531)
32. **rated speed** : the rotational speed at which an internal combustion engine develops its international rated output. ★ vitesse assignée → *vitesse 37.* R номинальная скорость. D Bemessungsdrehzahl; Nenndrehzahl. E velocidad asignada. I velocità nominale. N toegekend toerental. P prędkość znamionowa. S märkvarvtal. (811)
33. **reading speed** : the linear scanning speed of the beam across the storage surface during reading. ★ vitesse de lecture → *vitesse 59.* R скорость считывания. D Lesegeschwindigkeit. E velocidad de lectura. I velocità di lettura. N leessnelheid. P prędkość odczytywania. S avläsningshastighet. (531)
34. **runaway speed** : the maximum speed attained by the engine/generator set after removal of the full load of the generator if the speed regulator does not function. ★ vitesse d'emballement d'un groupe électrogène → *vitesse 75.* R повышенная частота вращения. D Durchgangsdrehzahl. E velocidad de embalamiento de un grupo electrógeno. I velocità (di rotazione) di fuga. N onbelast maximaal toerental zonder regeling. P prędkość rozbiegowa. S maximivarvtal. (811)
35. **scanning speed** : the linear speed of the facsimile scanning spot in its movement over the original document or over the recording medium. ★ vitesse d'exploration → *vitesse 77.* R скорость развертки. D Abtastgeschwindigkeit. E velocidad de exploración. I velocità di scansionamento. N aftastsnelheid. P szybkość rozwinięcia. S avsökningshastighet. (721)
36. **scanning speed** : the linear speed at which the scanning spot traverses the surface being scanned. ★ vitesse de balayage → *vitesse 46.* R скорость развертки. (723)
37. **schedule speed** : the quotient of the distance between two or more stops by the time taken to cover this distance, including stationary time. ★ vitesse commerciale → *vitesse 38.* R участковая скорость. D Reisegeschwindigkeit. E velocidad comercial. I velocità commerciale. N reissnelheid. P prędkość handlowa. S tidtabellsenlig hastighet. (811)
38. **speed at end of notching** : 1. With resistance control, the speed obtained under given conditions when all resistance is cut-out. 2. With transformer voltage control, the speed obtained under given conditions when full traction motor supply voltage is reached. ★ vitesse en fin de réglage → *vitesse 84.* R скорость выхода на автоматическую характеристику. D Geschwindigkeit beim Erreichen der vollen Spannung. E velocidad al final del reglaje. I velocità (raggiunta) alla fine della fase di regolazione (in avviamento). N snelheid bij bereiken volle motorspanning. P prędkość nastawcza końcowa. S hastighet vid högsta körläge. (811)
39. **speed conversion** : → *conversion 29*
40. **speed converter concentrator** : → *concentrator 8*
41. **(speed) detecting element** : → *element 52*
42. **speed fluctuation** : → *fluctuation 5*
43. **speed governor** : → *governor 1*
44. **speed (of a rotating machine)** : the rotational speed of the machine. ★ vitesse (d'une machine tournante) → *vitesse 83.* R частота вращения (вращающейся машины). D Motordrehzahl. E velocidad (de una máquina rotativa). I velocità di rotazione (di una macchina rotante). N rotatiesnelheid; toerental. P prędkość maszyny wirującej. S rotationsvarvtal. (811)
45. **speed (of a vehicle)** : the linear speed of the vehicle. ★ vitesse (d'un véhicule) → *vitesse 82.* R скорость (единицы подвижного состава). D Geschwindigkeit. E velocidad (de un vehículo). I velocità (di un veicolo). N snelheid (van een voertuig). P prędkość (pojazdu). S hastighet. (811)
46. **speed of melting** (*Syn.* melting rate) : → *rate 56*
47. **speed of rotation** : angular velocity of the anode of a rotating-anode tube usually expressed in revolutions per minute. ★ vitesse de rotation → *vitesse 70.* R скорость вращения. D Anodendrehzahl. E velocidad de rotación. I velocità di rotazione. N rotatiesnelheid. P szybkość obrotowa. S rotationshastighet. (881)
48. **speed of sound** : magnitude of the phase velocity of a free progressive sound wave. ★ célérité du son → *célérité 1.* R скорость звука. D Schallgeschwindigkeit. E velocidad del sonido. I velocità del suono. N geluidssnelheid. P prędkość dźwięku. S ljudhastighet. (801)
49. **speed ratio** : → *ratio 93*
50. **speed regulation characteristic** : → *characteristic 78*
51. **speed restriction** : → *restriction 1*
52. **speed variator** (*Syn.* torque variator) : → *variator 2*
53. **synchronous speed** : the speed of rotation which results from the frequency of the system to which the machine is connected and either the number of poles or the number of projections in the machine. ★ vitesse synchrone → *vitesse 91.* R синхронная скорость. D synchrone Drehzahl. E velocidad síncrona. I velocità sincrona. N synchroon toerental; synchrone snelheid. P prędkość (obrotowa) synchroniczna. S synkront varvtal. (411)
54. **synchronous speed (of a linear traction motor)** : the speed at which there is no relative movement between the travelling magnetic field and the armature. ★ vitesse synchrone (d'un moteur de traction linéaire) → *vitesse 92.* R синхронная скорость (линейного тягового двигателя). D Synchrongeschwindigkeit. E velocidad sincrona (de motor de tracción lineal); velocidad de sincronismo. I velocità sincrona (d'un motore di trazione lineare). N synchrone snelheid (van een lineaire tractiemotor). P prędkość synchroniczna. S synkron hastighet. (811)
55. **tape speed** : the speed at which a tape moves past a fixed point. ★ vitesse de défilement → *vitesse 49.* R скорость ленты. D Bandgeschwindigkeit. E velocidad de la cinta. I velocità del nastro. N bandsnelheid. P prędkość przesuwu (taśmy). S bandhastighet. (806)
56. **varying speed motor** : → *motor 119*
57. **writing speed** : the linear scanning speed of the beam across the storage surface during writing. ★ vitesse d'inscription → *vitesse 78.* R скорость записи. D Schreibgeschwindigkeit. E velocidad de inscripción. I velocità di scrittura. N schrijfsnelheid. P prędkość zapisywania. S skrivhastighet. (531)
58. **writing speed, maximum** : the maximum speed at which the spot can travel on the screen while a required level of resolution is maintained. ★ vitesse maximale d'inscription → *vitesse 87.* R максимальная скорость записи. D Schreibgeschwindigkeit (maximale). E velocidad máxima de inscripción. I massima velocità di scrittura. N maximale schrijfsnelheid. P prędkość zapisywania maksymalna. S maximal skrivhastighet. (531)

speedometer

1. **radar speedometer** : radio transmitting/receiving equipment using the Doppler effect to measure speed by comparing the frequencies of the signal emitted by the equipment and that received by reflection from the track supports. ★ radar de mesure → *radar 2.* R радарный скоростемер. D Radar-Geschwindigkeitsmesser. E rádar de medida.

I tachimetro radar. N radarsnelheidsmeter. P miernik prędkości radarowy. S hastighetsradar. (811)

2. **speedometer** : an instrument indicating the linear speed of a vehicle. ★ tachymètre → *tachymètre 1.* R скоростемер. D Geschwindigkeitsmesser. E tacómetro. I tachimetro (della velocità di marcia). N snelheidsmeter. P miernik prędkości; prędkościomierz. S hastighetsmätare. (811)

sphere

1. **integrating sphere** (*Syn.* Ulbricht sphere) : hollow sphere whose internal surface is a diffuse reflector, as non-selective as possible. *Note.* — An integrating sphere is used frequently with a radiometer or photometer. ★ sphère d'Ulbricht → *sphère 1.* R фотометрический шар; шар Ульбрихта. D Ulbrichtsche Kugel. E esfera integrante. I sfera di Ulbricht; sfera integratrice. N bol van Ulbricht; integrerende bol. P kula Ulbrichta; kula fotometryczna. S integrerande sfär; fotometerklot; Ulbricht-klot. (845)
2. **Ulbricht sphere** (*Syn.* integrating sphere) : → *sphere 1*

spherical

1. **mean spherical luminous intensity** : → *luminous intensity 3*
2. **radiant spherical exposure** : → *exposure 17*
3. **spherical aberration** : → *aberration 2*
4. **spherical array** : → *array 20*
5. **spherical diffraction** : → *diffraction 12*
6. **spherical irradiance** : → *irradiance 7*
7. **spherical reflector** : → *reflector 27*
8. **spherical reflector antenna** : → *antenna 108*
9. **spherical reproducing stylus tip** : → *stylus tip 6*
10. **spherical reproducing stylus tip radius** : → *radius 5*
11. **spherical wave** : → *wave 59*

spherically

1. **spherically seated bearing** : → *bearing 31*

spider

1. **spider** : a structure supporting the core or poles of a rotor from the shaft, and typically consisting of a hub, spokes and rim, or some modified arrangement of these. ★ croisillon → *croisillon 1.* R крестовина. D Armstern. E cuerpo o estrella. I raggera; bussola; Lanterna. N rotorster. P szkielet wirnika. S nav. (411,811)

spigot

1. **spigot** : a projection on the base, usually cylindrical, that serves to locate the tube in the socket. ★ ergot → *ergot 1.* R ключ. D Führungszapfen. E guía. I codolo. N ring. P wpust cokołu. S styrpinne. (531)
2. **spigot** : a projection from the base of a plug-in device extending beyond the male contacts which, in conjunction with a hole or recess in the socket, provides an axis of rotation to facilitate insertion. The spigot may carry a longitudinal key to ensure the correct orientation of the plug-in device in its socket, and in some cases may be used for an electrical contact. ★ ergot → *ergot 3.* R выступ центрирующий. D Zentrierzapfen. E guía. I chiave d'inserzione. N geleidepen. P występ prowadzący. S styrtapp. (581)

spike

1. **spike** : a unidirectional pulse of relatively short duration. ★ impulsion brève → *impulsion 20.* R выброс. D Nadelimpuls. E impulso breve. I impulso breve. N naald. P impuls szpilkowy. S spik(puls). (161)
2. **spike leakage energy** : → *energy 74*

spill

1. **spill shield** (*Syn.* louvre) : → *louvre 1*

spill-over

1. **call spill-over** : the effect on a traffic circuit when an abnormally delayed signal message from a previous call is received at a switching centre whilst a new call is being set up on that circuit. ★ empiètement de communications → *empiètement 3.* R перекрытие вызовов. D Anruf Ueberlauf. E usurpación de comunicación. I sconfinamento di chiamata. N ..... P przecięcie połączenia. S kommunikationsintrång. (714)
2. **signal spill-over** : in voice frequency signalling, that part of a v.f. signal which passes from one link to the next in a multi-link connection before splitting of the incoming line. ★ débordement de signal → *débordement 3.* R просачивание сигнала. D Signal-Ueberlauf. E desbordamiento de señal. I trabocco del segnale. N ..... P odcięcie sygnału. S signalspill. (714)
3. **spill-over factor** : → *factor 167*
4. **spill-over power** : → *power 180*
5. **spill-over route** (*Syn.* overflow route) : → *route 4*

spin

1. **spin (quantum number)** (*s*) : a quantum number which gives the angular momentum of the electron considered as a small charged sphere revolving around its axis. *Note.* — The spin may have two values: +1/2 or −1/2. ★ (nombre quantique de) spin → *spin 1.* R спиновое квантовое число. D Spin-Quantenzahl. E espín. I numero quantico di rotazione. N spin. P liczba spinowa. S spinn. (521)

spindle

1. **record spindle** : a device for the purpose of stacking disks and which may be equipped with mechanical means to drop one record at a given time on the turntable. ★ axe d'empilage → *axe 8.* R шпиндель проигрывателя автомата. D Stapelachse. E eje de apilado. I barra di impilamento. N stapelas. P wałek zmieniacza płyt. S växlarpinne. (806)

spinning

1. **spinning reserve of a system** : → *reserve 7*

spiral

1. **cross-talk between spiral groove** : → *crosstalk 6*
2. **equiangular spiral antenna** : → *antenna 47*
3. **fast spiral** : an unmodulated groove on a disk having a spacing that is much greater than that of the modulated groove. ★ sillon à grand pas → *sillon 12.* R спираль с большим шагом. D Rille mit großer Steigung. E surco de gran paso. I solco con grande passo. N wijde spiraal. P ..... S spår med brant stigning. (806)
4. **spiral binder tape** : → *tape 13*
5. **spiral inductor** (*Syn.* solenoid inductor) : → *inductor 22*
6. **spiral resistor** : → *resistor 23*

splash-proof

1. **splash-proof** : applied to a machine so constructed that liquid or solid particles coming towards it at any angle between the vertical and a specified angle from that direction cannot cause interference with satisfactory operation. ★ machine protégée contre les projections → *machine 67.* R брызгозащищенная машина. D spritzwassergeschützte Maschine. E máquina a prueba de proyecciones laterales. I macchina protetta contro gli spruzzi. N spatwaterveilig. P maszyna okapturzona. S strilsäker. (411)

splice

1. **contact wire splice** : a fitting for joining two lengths of contact wire mechanically and electrically. ★ griffe → *griffe 1.* R стыковый зажим. D Fahrdrahtstoßklemme. E contacto hilo-junta. I giunto. N rijdraadlasklem. P złączka. S skarvklämma. (811)
2. **fusion splice** : a splice accomplished by the application of localised heat sufficient to fuse or melt the ends of two lengths of optical fibre, to produce a continuous single optical fibre. ★ épissure par fusion → *épissure 4.* R оптическое неразъемное соединение; выполненное методом сварки. D LWL-Schmelzspleiß. E empalme por fusión. I giunto a fusione. N smeltlas. P połączenie zgrzewane. S svetsskarv. (731)
3. **mechanical splice** : a fibre splice accomplished by fixtures or materials, rather than by thermal fusion. ★ épissure mécanique → *épissure 3.* R механическое неразъемное соединение. D mechanischer LWL-Spleiß. E empalme mecánico. I giunto meccanico. N mechanische las. P połączenie mechaniczne. S mekanisk skarv. (731)
4. **optical fibre splice** (*Syn.* splice; optical splice) : a permanent joint whose purpose is to couple optical power between two optical fibres. *Note.* — Associated terms : to splice, splicing. ★ épissure → *épissure 2.* R оптический неразъемный соединитель; оптическое неразъемное соединение. D LWL-Faser-Spleiß; LWL-Spleiß; Spleiß. E empalme de fibras ópticas; empalme; empalme óptico.

I giunzione in fibra ottica. N optische vezellas; las; optische (vezel)las. P połączenie trwałe (włókien). S skarv. (731)

5. **optical splice** (*Syn.* optical fibre splice) : → *splice 4*
6. **splice** : a connecting device with barrel(s) accommodating electrical conductor(s) with or without additional provision to accommodate and secure the insulation. ★ jonction de fil → *jonction 12.* R муфта соединительная. D Kabel-Verbinder. E conexión de hilo. I giuntura di connessione. N draadverbindingshuls. P złączka; tulejka. S skarvhylsa. (581)
7. **splice** (*Syn.* optical fibre splice) : → *splice 4*
8. **splice** : a butt-joint in a magnetic tape held by means of a strip of adhesive material. ★ collure → *collure 1.* R сращивание. D Klebestelle. E empalme. I giunzione. N las. P sklejka. S bandskarv. (806)
9. **splice loss** : → *loss 92*

split

1. **permanent split capacitor motor** (*Syn.* capacitor start and run motor) : → *motor 13*
2. **reactor start split phase motor** : → *motor 79*
3. **resistance start split phase motor** : → *motor 82*
4. **split antenna** : → *antenna 109*
5. **split concentric cable** : → *cable 66*
6. **split core type current transformer** : → *transformer 62*
7. **split echo suppressor** (*Syn.* half echo suppressor) : → *suppressor 4*
8. **split phase motor** : → *motor 97*
9. **split sleeve bearing** : → *bearing 32*
10. **split throw winding** : → *winding 74*

split-beam

1. **split-beam cathode-ray tube** : → *cathode-ray tube 8*

splitter

1. **power splitter** (*Syn.* power divider) : → *divider 5*
2. **splitter box** (*Syn.* dividing box) : → *box 5*

splitting

1. **mica splitting** : mica laminae split from block mica or thin mica plate, and of a specified maximum thickness, typically about 30 μm. ★ clivures de mica → *clivure 1.* R щипаная слюда. D Spaltglimmer. E laminillas de mica. I scaglie di mica. N micaschilfers; gespleten mica. P mika łuszczona. S glimmerfjäll. (212)
2. **network splitting** (*Syn.* islanding (USA)) : an emergency measure comprising the division of a power system into subsystems in each of which there is an attempted balance between generation and load to achieve isolated operation. ★ îlotage (d'un réseau) → *îlotage 1.* R деление энергосистемы. D Inselbildung. E formación de islas (de una red). I frazionamento in isole (di una rete). N netsplitsing. P awaryjne rozcinanie systemu. S sektionering. (603)
3. **splitting of the incoming line** : in voice frequency signalling, disconnecting the through transmission path on partial recognition of an incoming voice frequency signal to prevent false operation of subsequent signalling equipment. ★ coupure à la réception → *coupure 7.* R разделение сигнала на входящей линии. D Abtrennen der ankommenden Leitung. E corte de la recepción. I sezionamento (verso valle) del collegamento entrante. N ..... P odcięcie łącza przyjściowego. S delning av inkommande linje. (714)
4. **splitting of the outgoing line** : in voice frequency signalling, disconnecting the through transmission path to prevent interference from a previous circuit or equipment from affecting a transmitted v.f. signal. ★ coupure à l'émission → *coupure 8.* R разделение сигнала на исходящей линии. D Abtrennen der gehenden Leitung. E corte de la emisión; corte de la línea saliente. I sezionamento (verso monte) del collegamento uscente. N ..... P odcięcie łącza wyjściowego. S delning av utgående linje. (714)

split-tube

1. **split-tube balun** (*Syn.* slotted coaxial balun) : → *balun 5*

spontaneous

1. **spontaneous emission** : → *emission 28*
2. **spontaneous magnetization** : → *magnetization 12*
3. **spontaneous transmission** : → *transmission 59*

spool

1. **field spool** : a structure for the support of a field coil. *Note.* — This structure may be of insulating material or may carry field spool insulation. ★ armature de bobine de champ → *armature 1.* R каркас обмотки возбуждения. D Polspulenträger; Erregerspulenkasten. E armadura de bobina de campo. I sostegno della bobina di campo. N spoelkoker. P szkielet cewki. S spolhylsa. (411)
2. **field spool insulation** : → *insulation 17*
3. **supply spool** : a spool from which the magnetic tape is unwound during recording, reproduction, or a fast forward movement. ★ bobine débitrice → *bobine 10.* R подающая катушка. D Abwickelspule. E bobina suministradora. I bobina di svolgimento. N afwikkelspoel. P szpula podająca; szpula odwijająca. S förrådsspole. (806)
4. **take-up spool** : a spool on which the magnetic tape is wound during recording, reproduction, or a fast forward movement. ★ bobine réceptrice → *bobine 18.* R приемная катушка. D Aufwickelspule. E bobina colectora. I bobina di avvolgimento. N opwikkelspoel. P szpula odbierająca; szpula zwijająca. S upptagningsspole. (806)
5. **wire spool** (*Syn.* wire reel) : → *reel 1*

spooling

1. **maximum fast spooling time** : → *time 85*
2. **maximum stopping time from maximum spooling speed** : → *time 89*

spoon

1. **sampling spoon** : a device having the form of a spoon to enable samples of molten metal to be drawn from the bath to allow metallurgical investigations. ★ louche d'échantillonnage → *louche 1.* R ложка для отбора проб. D Probenlöffel. E cuchara de muestreo. I cucchiaio di campionamento. N monsterschep. P łyżka probiercza. S provskopa. (841)

sporadic

1. **sporadic E layer** : → *layer 20*
2. **sporadic ionization** : → *ionization 17*

spot

1. **automatic spot brake** : → *brake 3*
2. **effective focal spot** : the central projection, under specific measuring conditions, of the focal spot on a plane perpendicular to the beam axis. ★ foyer (optique) → *foyer 2.* R эффективное фокальное пятно. D optischer Brennfleck. E foco efectivo. I macchia focale effettiva. N effectief focus. P ognisko optyczne. S effektivt fokus. (881)
3. **electrical spot displacement** : → *displacement 4*
4. **focal spot** : the part of the electron beam beyond the lens system where the electron beam is concentrated to a minimum cross-sectional area. ★ tache focale → *tache 10.* R фокальное пятно. D Brennfleck. E mancha focal. I macchia focale. N inslagschijf. P plamka ogniskowa. S fokuseringsfläck. (841)
5. **focal spot** : that part of the target of the X-ray tube which is struck by the electron beam. ★ foyer électronique → *foyer 1.* R фокальное пятно. D Brennfleck. E foco electrónico. I macchia focale. N focus. P ognisko elektryczne. S fokus; brännfläck. (881)
6. **hard spot** : a point in the overhead contact line, in the region of the registration arm, which has a low vertical resilience. ★ point dur → *point 53.* R жесткая точка. D harter Punkt. E punto duro. I punto rigido. N hard punt. P punkt sztywny. S fast punkt. (811)
7. **leakage spot displacement** (*Syn.* electrical spot displacement) : → *displacement 4*
8. **mechanical spot displacement** : → *displacement 8*
9. **mechanical spot misalignment** (*Syn.* mechanical spot displacement) : → *displacement 8*
10. **refractory hot spot of an arc furnace** : an area of the side wall refractories of an arc furnace shell adjacent to the electrode where a thinning of the refractory wall takes place due to greater rate of wear. ★ point chaud du réfractaire d'un four à arc → *point 8.* R горячая зона футеровки дуговой печи. D Überhitzungsverschleiss in der Zustellung eines Lichtbogenofens. E punto caliente del refractario de un horno de arco. I punto caldo del refrattario di un forno ad arco. N hete

plaats op de vuurvaste bekleding van de boogovenkuip. P miejsce gorące (ściany ogniotrwałej pieca łukowego). S ..... (841)

11. **scanning spot** : the small area of the target or screen surface, instantaneously affected by the impact of a light or electron beam. *Note.* — In French the generic term "spot" includes three specific terms : "Spot de balayage" (scanning spot) ; "spot analyseur" (analysis spot) ; "spot synthétiseur" (reproducing spot). ★ spot → *spot 8.* R развертывающий элемент. (723)
12. **scanning spot (at reception)** : that smallest area of the recording medium, the imprinting of which, during the scanning process, ensures the synthesis of the document to be reproduced by facsimile. *Notes. 1* — In phototelegraphy, the scanning spot is the part of the photo-sensitive recording medium which is exposed at a given moment. *2* — In direct recording, the scanning spot is the part of the recording medium which is in contact with the scanning device. ★ tache d'exploration (à la réception) → *tache 8.* R развертывающее пятно (на приеме); синтезирующее пятно. D Wiedergabepunkt (beim Empfang). E traza de exploración (en recepción); traza sintetizadora. I traccia di scansionamento (in ricezione). N aftastpunt (bij ontvangst). P element rozwinięcia syntezowany. S uppbyggnadspunkt. (721)
13. **scanning spot (at transmission)** : the portion of the area of the document to be transmitted by facsimile, that is sensed at a given instant by the reading head in scanning the document. ★ tache d'exploration (à l'émission) → *tache 9.* R развертывающее пятно (на передаче); анализирующее пятно. D Abtastpunkt (bei Sendung). E traza de exploración (en emisión); traza analizadora. I traccia di scansionamento (in trasmissione). N aftastdpunt (bij overdracht). P element rozwinięcia analizowany. S avsökningspunkt. (721)
14. **spot** : the small luminescent area of the screen surface, or target area, excited by the impact of the electron beam. ★ spot → *spot 7.* R пятно. D Leuchtfleck; Punkt. E spot. I macchia luminosa. N lichtstip. P plamka. S fläck; punkt. (531)
15. **spot distortion** : → *distortion 65*
16. **spot noise factor** : → *factor 168*
17. **spot noise figure** (*Syn.* spot noise factor) : → *factor 168*
18. **spot noise temperature** : → *temperature 47*
19. **spot recorder** : → *recorder 17*
20. **spot wobble** : → *wobble 1*
21. **yellow spot** (*Syn.* macula lutea) : layer of photostable pigment covering parts of the retina in the foveal region. ★ tache jaune → *tache 11.* R желтое пятно. D gelber Fleck; Macula lutea. E mancha amarilla. I macchia lutea. N gele vlek. P żółta plamka. S gula fläcken. (845)

spot-film

1. **spot-film device** : → *device 53*

spotlight

1. **Fresnel spotlight** : lens spotlight but with a stepped lens. ★ projecteur à lentille de Fresnel → *projecteur 4.* R прожектор с линзой Френеля. D Stufenlinsen-Scheinwerfer; Fresnellinsen-Scheinwerfer. E proyector con lente de Fresnel. I proiettore con lente di Fresnel. N schijnwerper met fresnellens. P projektor fresnelowski. S Fresnel-strålkastare. (845)
2. **lens spotlight** : projector with simple lens, with or without reflector, sometimes capable of adjustment of divergence by relative movement of lamp and lens. ★ projecteur à lentille → *projecteur 3.* R линзовый прожектор. D Linsen-Scheinwerfer. E proyector con lente. I proiettore regolabile. N lensschijnwerper. P projektor soczewkowy. S linsstrålkastare. (845)
3. **profile spotlight** : projector giving a hard-edged beam of light which can be varied in outline by diaphragms, shutters or silhouette cut-off masks. ★ projecteur de silhouettes → *projecteur 8.* R прожектор с проекционной оптической системой. D Profil-Scheinwerfer. E proyector de siluetas. I sagomatore. N projectieschijnwerper. P projektor konturowy. S profilstrålkastare. (845)
4. **reflector spotlight** : projector with simple reflector and sometimes capable of adjustment of divergence by relative movement of lamp and mirror. ★ projecteur-réflecteur → *projecteur-réflecteur 1.* R зеркальный прожектор. D Spiegel-Scheinwerfer. E proyector con reflector. I proiettore-riflettore. N spiegelschijnwerper. P projektor (reflektor) zwierciadłowy. S reflektorstrålkastare. (845)
5. **spotlight** : a projector having an aperture usually smaller than 0.2 m and giving a concentrated beam of light of usually not more than 0.35 radian (20°) divergence. ★ spot → *spot 9.* R прожектор с узким пучком света. D Punktstrahler. E proyector para iluminación concentrada. I proiettore a fascio stretto. N schijnwerper. P projektor wąskostrumieniowy. S spotlight. (845)
6. **spotlight effect** : → *effect 78*

spotlighting

1. **spotlighting** : lighting designed to increase considerably the illuminance of a limited area or of an object relative to the surroundings, with minimum diffused lighting. ★ éclairage ponctuel → *éclairage 23.* R прожекторное освещение. D Anstrahlung. E alumbrado puntual. I illuminazione puntiforme. N geconcentreerde verlichting. P oświetlenie punktowe. S puntbelysning. (845)

spout

1. **arc furnace spout** : the refractory lined channel at the tapping point, positioned to allow the molten metal charge to be drained from furnace shell. ★ bec de coulée d'un four à arc → *bec 1.* R желоб дуговой печи. D Giessschnauze des Lichtbogenofens. E pico de colada de un horno de arco. I becco di colata di un forno ad arco. N aftapgoot (van een boogoven). P lej spustowy (pieca łukowego). S ..... (841)

spread

1. **error spread** : the number of consecutive digits of the output signal over which digital errors are distributed when a single digital error in the input signal causes error multiplication. ★ étalement d'erreurs → *étalement 2.* R распространение ошибки. D Fehlerausbreitung. E reporte de errores; error de propagación. I distribuzione degli errori. N foutspreiding. P rozprzestrzenianie błędów. S felspridning. (704)
2. **one-half-peak spread** (*Syn.* half-peak divergence) : → *divergence 8*
3. **spread F** : diffuse traces observable on certain ionograms and caused by irregularities of the electron density of the F region. ★ F-diffus → *F-diffus 1.* D ..... P warstwa F rozsiana. (705)
4. **spread factor** : → *factor 169*
5. **spread footing with pier** (*Syn.* pad and chimney foundation) : → *foundation 6*
6. **transit-time spread** : → *transit-time 8*

spreading

1. **pulse spreading** (*Syn.* pulse broadening) : → *broadening 3*
2. **spreading loss** : → *loss 93*
3. **spreading loss** (*Syn.* divergence loss) : → *loss 23*

spring

1. **brush spring** : → *brush 9*
2. **electrically released spring brake** : → *brake 12*
3. **rubber spring drive** : → *drive 21*
4. **spring drive** : → *drive 22*
5. **spring loaded bearing** : → *bearing 33*

SPTV

1. **SPTV** (*Syn.* still-picture television) : → *television 32*

spur

1. **spur** (*Syn.* branch line) : → *line 8*
2. **spur amplifier** : → *amplifier 28*
3. **spur feeder** : → *feeder 20*

spurious

1. **spurious count** : → *count 4*
2. **spurious emission** : → *emission 29*
3. **spurious response frequency** : → *frequency 182*
4. **spurious response rejection ratio** : → *ratio 94*

SPXO

1. **SPXO** (*Syn.* simple packaged crystal oscillator) : → *oscillator 6*

square

1. **candela per square metre** : → *candela 2*

2. **Epstein square** (*Syn.* Epstein test frame) : of an apparatus used for the measurement of magnetic properties of samples of magnetic sheet material, a part in which the sample in the form of stacks of uniform flat rectangular strips is arranged in a closed magnetic circuit around the sides of a square, each side being equipped with test windings which surround the sample. ★ cadre d'Epstein → *cadre 7.* R квадрат Эпштейна; аппарат Эпштейна. D Epsteinrahmen. E cuadro de Epstein. I circuito magnetico di Epstein. N Epsteinraam. P aparat Epsteina. S epsteinram. (221)
3. **inverse square law** : → *law 5*
4. **square law detection** : → *detection 14*
5. **square pulse train** : → *train 12*

square-wave

1. **square-wave response** : → *response 19*
2. **square-wave response characteristic** : → *characteristic 79*

squeeze

1. **squeeze section** : → *section 26*

squint

1. **squint** : a property of an antenna such that the beam axis or the directional null departs slightly from a specified axis such as the direction perpendicular to the aperture or the intended direction of the beam axis or directional null of the antenna. *Note.* — Squint is often the undesired result of a defect in an antenna ; in certain cases however it is designed to satisfy an operational requirement. ★ strabisme → *strabisme 2,* R перекос. D Schielen. E estrabismo (de una antena). I strabismo. N richtingsafwijking. P odchylenie ukierunkowania (anteny). S skelning. (712)
2. **squint angle** : → *angle 53*

squirrel

1. **squirrel cage induction motor** (*Syn.* cage induction motor) : → *induction motor 2*
2. **squirrel cage winding** (*Syn.* cage winding) : → *winding 9*

SRAEN

1. **SRAEN** (*Syn.* reference system for the determination of AEN) : → *system 169*

SRD

1. **SRD** (*Syn.* superluminescent LED) : → *LED 2*

SSB

1. **SSB** (*Syn.* single sideband) : → *sideband 7*

SSU

1. **SSU** (*Syn.* subsequent signal unit) : → *unit 62*

stability

1. **absolute stability** (of a linear system) : for a linear single-loop control system, the property such that there exists a limiting value of the static open-loop gain such that the system is stable for all lower values of that gain and unstable for all higher values. ★ stabilité absolue → *stabilité 10.* R абсолютная устойчивость линейной системы. D absolute Stabilität eines linearen Systems. E estabilidad absoluta de un sistema lineal. I stabilità assoluta di un sistema lineare. N absolute stabiliteit van een lineair systeem. P stabilność układu liniowego bezwarunkowa. S ..... (351)
2. **arc stability** : the characteristic of an electric arc such that the arc current reproduces itself identically at each half cycle of the voltage applied between the arc terminals. ★ stabilité de l'arc → *stabilité 13.* R устойчивость дуги. D Bogenstabilität. E estabilidad del arco. I stabilità dell'arco. N boogstabiliteit. P stabilność łuku. S ljusbågsstabilitet. (841)
3. **conditional stability** (of a linear system) : for a linear single-loop control system, the property of being stable for a certain interval of values of the static open-loop gain and unstable for certain lower and higher values of that gain. ★ stabilité conditionnelle → *stabilité 11.* R условная устойчивость линейной системы. D bedingte Stabilität eines linearen Systems. E estabilidad condicional de un sistema lineal. I stabilità condizionata di un sistema lineare. N voorwaardelijke stabiliteit van een lineair systeem. P stabilność układu liniowego warunkowa. S villkorligt stabilt linjärt system. (351)
4. **conditional stability of a power system** : a steady-state stability condition of a power system that can only be achieved with the assistance of automatic control. ★ stabilité conditionnelle d'un réseau → *stabilité 12.* R искусственная устойчивость энергосистемы. D bedingte Netzstabilität; künstliche Netzstabilität. E estabilidad condicional de una red. I stabilità condizionata di una rete. N voorwaardelijke stabiliteit van een elektrisch energiesysteem. P równowaga warunkowa systemu elektroenergetycznego. S villkorlig systemstabilitet. (603)
5. **excitation system stability** : the capability of the excitation system during steady-load conditions or following a change to a new steady-load condition to control the excitation voltage of the principal electrical machine so that transient changes in the regulated voltage are effectively suppressed, or sustained oscillations in the regulated voltage are not produced. ★ stabilité d'un système d'excitation → *stabilité 15.* R устойчивость системы возбуждения. D Stabilität der Erregeranordnung. E estabilidad de un sistema de excitación. I stabilità del sistema di eccitazione. N stabiliteit van het bekrachtigingssysteem. P stabilność układu wzbudzającego. S stabilitet i magnetiseringssystem. (411)
6. **hydrolytic stability** : the ability of a product to withstand chemical reaction with water to produce acids and other substances. ★ stabilité à l'hydrolyse → *stabilité 8.* R гидролитическая стойкость. D hydrolytische Stabilität. E estabilidad a la hidrólisis. I stabilità all'idrolisi. N hydrolysevastheid. P odporność na hydrolizę. S hydrolysbeständighet. (212)
7. **inherent stability of a power system** : a power system stability that exists without the assistance of automatic control. ★ stabilité intrinsèque d'un réseau → *stabilité 17.* R естественная устойчивость энергосистемы. D natürliche Netzstabilität. E estabilidad intrínseca de una red. I stabilità intrinseca di una rete. N eigen stabiliteit van een elektrisch energiesysteem. P równowaga naturalna systemu elektroenergetycznego. S egenstabilitet hos system. (603)
8. **load stability** : the capability of a load consisting of rotating machines to regain a steady state of operation after a disturbance. ★ stabilité d'une charge → *stabilité 16.* R устойчивость нагрузки. D Laststabilität. E estabilidad de una carga. I stabilità di un carico. N stabiliserend vermogen. P stabilność obciążeniowa maszyny wirującej. S belastningsstabilitet. (603)
9. **natural stability** (*Syn.* stable characteristic) : → *characteristic 84*
10. **oxidation stability** : the ability of an insulating liquid to withstand oxidative ageing. ★ stabilité à l'oxydation → *stabilité 9.* R стойкость к окислению. D Oxidationsstabilität. E estabilidad a la oxidación. I stabilità all'ossidazione. N oxidatievastheid. P odporność na utlenianie. S oxidationsstabilitet. (212)
11. **power system stability** : the capability of a power system to regain a steady state, characterized by the synchronous operation of the generators after a disturbance due, for example, to variation of power or impedance. ★ stabilité d'un réseau → *stabilité 14.* R устойчивость энергосистемы. D Netzstabilität. E estabilidad de una red. I stabilità di una rete. N stabiliteit van een elektrisch energiesysteem. P równowaga (stabilność) systemu elektroenergetycznego. S systemstabilitet. (603)
12. **short-term frequency stability** : the random fluctuations of the frequency of an oscillator over short periods of time. ★ stabilité à court terme de la fréquence → *stabilité 7.* R кратковременная нестабильность частоты. D Kurzzeit-Frequenzstabilität. E estabilidad a corto plazo de la frecuencia. I stabilità a corto termine della frequenza. N korte-termijn-frequentiestabiliteit. P stadilność częstotliwości krótkoterminowa. S korttidsstabilitet. (561)
13. **stability** (of an electronic measuring instrument) : the ability of an instrument to keep its performance characteristics unchanged during a specified time, all conditions remaining constant. ★ stabilité → *stabilité 5.* R стабильность (электронного измерительного прибора). D Stabilität (eines elektronischen Messgerätes). E estabilidad (de un aparato de medida electrónico). I stabilità (di uno strumento elettronico di misura). N stabiliteit. P stabilność (przyrządu pomiarowego elektronicznego). S stabilitet (hos elektroniskt instrument). (303)
14. **stability** (of a linear system) : for a linear system, the property such that, after having been displaced from its

steady-state condition by an external disturbance, it comes back to that steady-state condition when the disturbance has ceased. ★ stabilité → *stabilité 6.* R устойчивость линейной системы. D Stabilität eines linearen Systems. E estabilidad de un sistema lineal. I stabilità di un sistema lineare. N stabiliteit van een lineair systeem. P stabilność układu liniowego. S stabilitet (hos ett linjärt system). (351)

15. **stability error** : the change in a performance characteristic due to a lack of stability. ★ erreur de stabilité → *erreur 30.* R нестабильность. D Stabilitätsabweichung. E error de estabilidad. I errore di stabilità. N fout. P błąd stabilności. S stabilitetsfel. (303)
16. **stability limit of a system state variable** : → *limit 18*
17. **stability margin of a system state variable** : → *margin 15*
18. **stability zone** : → *zone 14*
19. **steady state stability of a power system** : a power system stability in which any disturbances occurring have only small rates of change and small relative magnitudes. ★ stabilité statique d'un réseau → *stabilité 19.* R статическая устойчивость энергосистемы. D statische Netzstabilität. E estabilidad estática de una red. I stabilità statica di una rete. N stabiele toestand van een elektrisch energiesysteem. P stan równowagi statycznej systemu elektroenergetycznego. S stationär systemstabilitet. (603)
20. **thermal stability** : the ability of an insulating liquid or gas to withstand long time exposure to elevated temperature essentially in the absence of oxygen. ★ stabilité thermique → *stabilité 20.* R нагревостойкость (жидкого и газообразного электроизоляционного материала). D thermische Stabilität. E estabilidad térmica. I stabilità termica. N warmtevastheid. P stabilność termiczna. S termisk stabilitet. (212)
21. **transient stability of a power system** : a power system stability in which disturbances may have large rates of change and/or large relative magnitudes. ★ stabilité transitoire d'un réseau → *stabilité 21.* R динамическая устойчивость энергосистемы. D transiente Netzstabilität. E estabilidad transitoria de una red. I stabilità dinamica di una rete. N transiënte stabiliteit van een elektrisch energiesysteem. P stan przejściowy (dynamiczny) równowagi systemu elektroenergetycznego. S dynamisk systemstabilitet. (603)
22. **voltage stability** : a quality of supply which is determined on the basis of the observed voltage deviations of an electrical system during a given period of time. ★ tenue de la tension → *tenue 5.* R стабильность напряжения. D Spannungshaltung. E estabilidad de la tensión. I tenuta della tensione. N spanningsstabiliteit. P stabilność napięcia. S spänningsstabiliteit. (604)

stabilization

1. **closed loop stabilization** : a mode of operation in which the value of an output is compared with a reference value so that the difference between those values controls directly or indirectly the output quantity at the desired value. ★ fonctionnement en boucle fermée → *fonctionnement 27.* R стабилизация с обратной связью. D Stabilisierung durch Regelung. E funcionamiento en bucle cerrado. I funzionamento ad anello chiuso. N ..... P stabilizacja w pętli zamkniętej. S stabilisering genom sluten slinga. (303)
2. **line impedance stabilization network** (*Syn.* artificial mains network) : → *network 4*
3. **open loop stabilization** : a mode of operation in which the value of an output is set at a desired value by external means without taking into account the difference between the actual and the desired values. ★ fonctionnement en boucle ouverte → *fonctionnement 28.* R стабилизация без обратной связи. D Stabilisierung durch Steuerung. E funcionamiento en bucle abierto. I funzionamento ad anello aperto. N ..... P stabilizacja w pętli otwartej. S extern stabilisering. (303)
4. **plasma stabilization** : method of stabilizing in which a gas flow is tangential to the axis of the nozzle and produces a vortex in the nozzle of the plasma torch so as to constrain the gas discharge on the axis of the nozzle throat. ★ stabilisation de plasma → *stabilisation 6.* R стабилизация плазмы. D Plasmastabilisierung. E estabilización de plasma. I stabilizzazione del plasma. N vortexstabilisatie. P stabilizacja plazmy. S plasmastabilisering. (841)
5. **stabilization** : the means and methods by which a measuring instrument maintains its indicated or supplied values during a specified time when influence quantities and/or the load, if any, are changed within specified limits. ★ stabilisation → *stabilisation 5.* R стабилизация. D Stabilisierung. E estabilización. I stabilizzazione. N stabilisering. P stabilizacja. S stabilisering. (303)
6. **stabilization time** : → *time 166*

stabilized

1. **stabilized current characteristic** : → *characteristic 80*
2. **stabilized insulator** : → *insulator 32*
3. **stabilized load characteristic** : → *characteristic 81*
4. **stabilized output characteristic** : → *characteristic 82*
5. **stabilized shunt (generator)** : → *shunt 19*
6. **stabilized shunt (motor)** : → *shunt 20*
7. **stabilized supply apparatus** : → *apparatus 15*
8. **stabilized voltage characteristic** : → *characteristic 83*

stabilizer

1. **spectrum stabilizer** : a sub-assembly associated with a radiation spectrometer and designed to reduce distortion of the spectrum by compensating for the drifts of some elements of this assembly. ★ stabilisateur de spectre → *stabilisateur 2.* R стабилизатор спектрометрического тракта. D Spektrum-Stabilisierer. E estabilizador de espectro. I stabilizzatore di spettro. N spectrumstabilisator. P urządzenie do stabilizacji widma. S spektrumstabilisator. (391)
2. **stabilizer** : a substance used in the formulation of some plastics to assist in maintaining the properties of the material at or near their initial values during processing and service life. ★ stabilisant → *stabilisant 1.* R стабилизатор. D Stabilisator. E estabilizador. I stabilizzatore. N stabilisator. P stabilizator. S stabiliseringsmedel; stabilisator. (212)
3. **stabilizer** (in radiology) : a device for maintaining constant X-ray tube voltage or current. ★ stabilisateur → *stabilisateur 1.* R стабилизатор (в радиологии). D (Röhrenspannung-oder Röhrenstrom-)Stabilisator. E estabilizador (en radiologia). I stabilizzatore (in radiologia). N stabilisator (in de radiologie). P stabilizator (w radiologii). S stabilisator. (881)

stabilizing

1. **multi-electrode voltage stabilizing tube** : → *tube 55*
2. **stabilizing resistor** : → *resistor 24*
3. **stabilizing winding** : → *winding 76*
4. **voltage stabilizing tube** : → *tube 98*

stable

1. **stable characteristic** : → *characteristic 84*
2. **time to stable closed condition** : → *time 211*
3. **time to stable open condition** : → *time 212*

stack

1. **(capacitor) stack** : an assembly of capacitor units connected in series. ★ empilage (de condensateurs) → *empilage 2.* R (конденсаторный) блок. D Kondensatorstapel. E banco (de condensadores). I colonna; colonna di condensatori. N serieschakeling van condensatoren. P stos kondensatorowy. S kondensatorstapel. (436)
2. **(valve device) stack** : a single structure of one or more valve devices with its (their) associated mounting(s). ★ bloc (d'éléments de valve) → *bloc 9.* R вентильный модуль. D (Ventilbauelement-)Baugruppe. E bloque (de elementos de válvula). I colonna (di dispositivi a valvola). N (ventielelement)stel. P stos zaworowy; blok zaworowy. S ventilstapel. (551)

stacking

1. **stacking factor** (*Syn.* lamination factor) : → *factor 104*

stage

1. **buffer (stage)** (*Syn.* buffer amplifier) : → *amplifier 6*
2. **link connected switching stage** : a switching stage having more than one sub-group of switches which operate jointly and are interconnected by a set of links, internal to the switching stage. ★ étage de commutation à mailles → *étage 3.* R ступень коммутации со звеньевым включением. D Koppelstufen mit Linkverbinder. E etapa de conmutación de mallas. I rete di commutazione multistadio. N verschalmde

schakeltrap. P stopień komutacyjny wielodrożny. S länkkopplat väljarsteg. (714)

3. **modulating stage** (*Syn.* modulator) : → *modulator 2*
4. **stage** (of a series connection) : a part of a series connection consisting of one or more convertor connections connected in parallel. ★ étage → *étage 1.* R каскад (последовательного соединения). D Stufe (einer Reihenschaltung). E etapa (de un montaje en serie). I stadio (di una connessione in serie). N trap (van een serieschakeling). P stopień (układu szeregowego). S strömriktarsteg. (551)
5. **switching stage** : an aggregate of switches constituting a subset of an exchange and designed to operate as a single unit from a traffic handling point of view. ★ étage de commutation → *étage 2.* R ступень коммутации. D Koppelstufe. E etapa de conmutación. I stadio di selezione. N schakeltrap. P stopień komutacyjny. S väljarsteg; kopplingssteg. (714)

stage-by-stage

1. **stage-by-stage selecting** : → *selecting 6*

stagger

1. **stagger** : displacement of the contact wire to opposite sides of the track centre at successive supports, to avoid localised wear of the pantograph wearing strips. ★ désaxement → *désaxement 1.* R зигзаг (контактного провода). D Zick-Zack (der Oberleitung). E escalonado. I poligonazione. N zigzagverschuiving van de rijdraad. P zygzakowanie. S saxning. (811)

staggered-contact

1. **staggered-contact connector** : → *connector 48*

stake

1. **stake contact** : → *contact 111*

stall

1. **telephone stall** : an enclosure similar to a telephone booth but with an open side and usually without a ceiling. ★ cabine téléphonique ouverte → *cabine 6.* R открытая телефонная кабина. D Telefonstand. E cabina telefónica abierta. I cabina telefonica aperta. N open telefooncel; deurloze telefooncel. P kabina telefoniczna otwarta. S öppen telefonhytt. (722)

stamper

1. **stamper** : a negative metal part generated by an electroplating process from which finished pressings are moulded. A stamper can be generated either from a metal positive (mother) or from a lacquer original. ★ matrice → *matrice 1.* R матрица. D Matrize («Sohn»). E matriz. I matrice. N matrijs. P matryca. S presspatris. (806)

stand

1. **battery stand** (*Syn.* battery rack) : → *rack 1*
2. **vertical examination stand** : an X-ray examination apparatus having vertical backboard for standing or sitting patient. ★ dossier vertical → *dossier 1.* R стенд для вертикального обследования. D vertikales Untersuchungsgerät. E aparato para examen vertical. I ortoscopio. N verticale onderzoekopstelling. P ścianka rentgenowska pionowa. S vertikalstativ. (881)

standard

1. **CIE standard clear sky** : → *sky 1*
2. **CIE standard illuminants** : → *illuminant 1*
3. **CIE standard overcast sky** : → *sky 2*
4. **CIE standard photometric observer** : → *observer 1*
5. **CIE standard sources** : → *source 4*
6. **CIE 1931 standard colorimetric observer** : → *observer 2*
7. **CIE 1931 standard colorimetric system (X Y Z)** : → *system 26*
8. **CIE 1964 supplementary standard colorimetric observer** : → *observer 3*
9. **CIE 1964 supplementary standard colorimetric system (X_{10} Y_{10} Z_{10})** : → *system 27*
10. **comparison standard** : a standard intended for the comparison among themselves of standards of the same order of accuracy. ★ étalon de comparaison → *étalon 3.* R эталон сравнения. D Vergleichsnormal. E patrón de comparación. I campione di comparazione. N vergelijkingsstandaard. P etalon porównawczy. S jämförelsenormal. (301)
11. **"high band" standards** : the operating procedure of a transverse video tape recorder causing the following instantaneous frequencies to correspond to the various levels of the video signals:

	625 lines 50 Hz	525 lines 60 Hz
Peak white	9.30 MHz	10,00 MHz
Blanking	7.80 MHz	7.90 MHz
Tip of sync. pulse	7.16 MHz	7.06 MHz

★ normes à fréquences élevées → *norme 4.* R стандарт «широкой полосы». D «High-Band»-Standard. E normas de frecuencias altas. I norme per la parte superiore della banda. N "high-band"-standaard. P norma pasma szerokiego. S högfrekvensbandstandard. (806)

12. **international standard** : a standard recognized by an international agreement to serve internationally as the basis for fixing the value of all other standards of the given quantity. ★ étalon international → *étalon 6.* R международный эталон. D internationales Normal. E patrón internacional. I campione internazionale. N internationale standaard. P etalon międzynarodowy. S internationell normal. (301)
13. **"low band" standards** : the operating procedure of a transverse video tape recorder causing the following instantaneous frequencies to correspond to the various levels of the video signals:

	625 lines 50 Hz	525 lines 60 Hz
Peak white	6.80 MHz	6.80 MHz
Blanking	5.50 MHz	5.00 MHz
Tip of sync. pulse	4.95 MHz	4.28 MHz

★ normes à fréquences basses → *norme 3.* R стандарт «узкой полосы». D «Low-Band»-Standard. E normas de frecuencias bajas. I norme per la parte inferiore della banda. N "low-band"-standaard. P norma pasma wąskiego. S lågfrekvensbandstandard. (806)

14. **(measurement) standard** : a measuring instrument, apparatus or system intended to define, represent physically, conserve or reproduce either the unit of measurement of a quantity, or a multiple or sub-multiple thereof (e.g. standard resistor) or a known value of a quantity (e.g. standard cell). ★ étalon → *étalon 2.* R эталон. D Normal. E patrón. I campione. N meetstandaard. P etalon. S normal. (301)
15. **national standard** : a standard recognized by an official national decision as the basis for fixing the value, in a country, of all other standards of the given quantity. *Note.* — Generally, in a country, the national standard is also the primary standard. ★ étalon national → *étalon 7.* R национальный эталон. D nationales Normal. E patrón nacional. I campione nazionale. N nationale standaard. P etalon państwowy. S nationell normal. (301)
16. **primary photometric standard** : device designed to establish the photometric base unit (candela). ★ étalon photométrique primaire → *étalon 9.* R первичный фотометрический эталон. D photometrisches Primärnormal. E patrón fotométrico primario. I campione fotometrico primario. N primaire fotometrische standaard. P wzorzec fotometryczny pierwotny. S fotometrisk primärnormal. (845)
17. **primary standard** : a standard of a particular quantity which has the highest metrological qualities in a given field. *Notes. 1* — The concept of a primary standard is equally valid for base units and for derived units. *2* — The primary standard is never used directly for measurement other than for comparison with duplicate standards or reference standards. ★ étalon primaire → *étalon 11.* R первичный эталон. D Hauptnormal. E patrón primario. I campione primario. N primaire standaard. P etalon pierwotny; etalon podstawowy. S primärnormal. (301)
18. **reference standard** : a secondary standard with which standards of lower accuracy are compared. ★ étalon de référence → *étalon 4.* R исходный эталон. D Bezugsnormal.

E patrón de referencia. I campione di riferimento. N referentiestandaard. P etalon odniesienia. S referensnormal. (301)

19. **secondary photometric standard** : light source or photometer calibrated by reference to a primary photometric standard. ★ étalon photométrique secondaire → *étalon 10.* R вторичный фотометрический эталон. D photometrisches Sekundärnormal. E patrón fotométrico secundario. I campione fotometrico secondario. N secundaire fotometrische standaard. P wzorzec fotometryczny wtórny. S fotometrisk sekundärnormal. (845)
20. **secondary standard** : a standard, whose value is fixed by direct or indirect comparison with a primary standard or by means of a reference-value method. ★ étalon secondaire → *étalon 12.* R вторичный эталон. D Sekundärnormal. E patrón secundario. I campione secondario. N secundaire standaard. P etalon wtórny. S sekundärnormal. (301)
21. **secondary standard lamp** : → *lamp 56*
22. **standard attenuation curve** : → *curve 36*
23. **standard command** (*Syn.* instruction command) : → *command 11*
24. **standard deviation** : → *deviation 17*
25. **standard dimensioned motor** : → *motor 99*
26. **standard (electrode) potential** : → *potential 13*
27. **standard hydrogen electrode** : → *hydrogen 3*
28. **standard lamp** : → *lamp 60*
29. **standard microphone** : → *microphone 33*
30. **standard musical pitch** (*Syn.* standard tuning frequency) : → *frequency 183*
31. **standard power (of an internal combustion engine)** (*Syn.* international rated output) : → *output 15*
32. **standard propagation** : → *propagation 31*
33. **standard radio atmosphere** : → *atmosphere 16*
34. **standard radio horizon** : → *horizon 5*
35. **standard radioactive solution** : → *solution 1*
36. **standard radioactive source** : → *source 44*
37. **standard refraction** : → *refraction 7*
38. **standard refractive modulus gradient** : → *gradient 6*
39. **standard refractivity gradient** : → *gradient 7*
40. **standard replay chain** : → *replay 2*
41. **standard threshold of hearing** : → *threshold 13*
42. **standard tuning frequency** : → *frequency 183*
43. **standard unabsorbed field strength** : → *field strength 13*
44. **standards conversion** : → *conversion 30*
45. **television standard** : technical specification giving the characteristics of a television system adopted by a qualified organisation. ★ normes de télévision → *norme 5.* R телевизионный стандарт. (723)
46. **television standards converter** : → *converter 18*
47. **working photometric standard** : light source or photometer used, on a day to day basis, for photometric measurements and calibrated by reference to a secondary photometric standard. ★ étalon photométrique de travail → *étalon 8.* R рабочий фотометрический эталон. D photometrisches Arbeitsnormal. E patrón fotométrico de trabajo. I campione fotometrico di lavoro. N fotometrische werkstandaard. P wzorzec fotometryczny roboczy. S fotometrisk arbetsnormal. (845)
48. **working standard** : a standard which, calibrated against a reference standard, is intended to verify working measuring instruments of lower accuracy. ★ étalon de travail → *étalon 5.* R рабочий эталон. D Arbeitsnormal. E patrón de trabajo. I campione di lavoro. N werkstandaard. P etalon roboczy. S arbetsnormal. (301)
49. **working standard** (in telephonometry) : a specified combination of a sending system and a receiving system, with associated subscriber's telephone lines and feeding bridges or equivalent systems, connected by means of a distortionless variable attenuator, and employed under specified conditions to determine by comparison some aspects of the transmission performance of other telephone systems or parts of systems. *Note.* — A working standard may be used for determining reference equivalents of a telephone complete connection in a given direction, sending reference equivalents and receiving reference equivalents. ★ système étalon de travail → *système 110.* R рабочая эталонная система (в телефонометрии). D Arbeitsstandard. E sistema patrón de trabajo (en telefonometría). I sistema campione di lavoro (in telefonometria). N werkstandaard. P wzorzec roboczy (w telefonometrii). S arbetslikare. (722)
50. **working standard lamp** : → *lamp 73*

standardized

1. **degree of standardized test distortion** : → *degree 14*
2. **normalized level difference** : → *difference 22*
3. **standardized digital signal** : → *signal 216*
4. **standardized sound isolation between rooms** (*Syn.* normalized level difference) : → *difference 22*
5. **standardized value** : → *value 64*
6. **standardized 64 kbit/s digital signal** : → *signal 217*

standard-M

1. **standard-M gradient** (*Syn.* standard refractive modulus gradient) : → *gradient 6*

standard-N

1. **standard-N gradient** (*Syn.* standard refractivity gradient) : → *gradient 7*

standby

1. **hot stand-by** : all the means of generation ready to start-up for prompt coupling to the system. ★ réserve chaude → *réserve 5.* R оперативный резерв мощности энергосистемы. D Heissreserve. E reserva caliente. I riserva calda. N warme reserve. P rezerwa gorąca. S varm reserv; snabb reserv. (602)
2. **standby charge** : → *charge 42*
3. **standby conditions** : → *condition 27*
4. **stand-by duration** : → *duration 40*
5. **standby hand control** : → *control 175*
6. **stand-by lighting** : → *lighting 30*
7. **stand-by losses** : → *loss 95*
8. **standby or emergency cooling** : → *cooling 12*
9. **standby redundancy** : → *redundancy 4*
10. **standby state** : → *state 37*
11. **stand-by supply** : → *supply 18*
12. **standby supply system** : → *system 196*
13. **standby tariff** : → *tariff 37*
14. **standby time** : → *time 167*

standing

1. **shield standing voltage** : → *voltage 190*
2. **standing charge** : → *charge 43*
3. **standing charge tariff** : → *tariff 38*
4. **standing DC component** : → *component 54*
5. **standing losses** (*Syn.* stand-by losses) : → *loss 95*
6. **standing wave antenna** : → *antenna 110*
7. **standing wave detector** : → *detector 37*

standing-wave

1. **standing wave** : a modification of the physical state of a medium that can be represented by a product of a function of time and a function of position. ★ onde stationnaire → *onde 112.* R стоячая волна. D stehende Welle. E onda estacionaria. I onda stazionaria. N staande golf. P fala stojąca. S stående våg. (101)
2. **standing wave** (in a transmission line) : a field pattern created by the interference of two waves having the same frequency propagating in the same mode in opposite directions along a uniform transmission line. ★ onde stationnaire → *onde 113.* R стоячая волна (в линии передачи). D stehende Welle (in einer Übertragungsleitung). E onda estacionaria (en una línea de transmisión). I onda stazionaria (in una linea di trasmissione); modo progressivo. N staande golf. P fala stojąca. S stående våg. (705,726)
3. **standing wave** : periodic wave having a fixed distribution in space that is the result of interference of progressive waves of the same frequency and kind. *Note.* — Such waves are characterized by the existence of nodes or partial nodes and anti-nodes that are fixed in space. ★ onde stationnaire → *onde 114.* R стоячая волна. D stehende Welle. E onda estacionaria. I onda stazionaria. N staande golf. P fala stojąca. S stående våg. (801)
4. **standing-wave indicator** (*Syn.* standing-wave meter) : → *meter 56*

5. **standing-wave maximum** : → *maximum 63*
6. **standing-wave meter** : → *meter 56*
7. **standing-wave minimum** : → *minimum 23*
8. **standing-wave ratio** : → *ratio 95*
9. **voltage standing-wave ratios** (*Syn.* standing-wave ratio) : → *ratio 95*

staple

1. **staple fibre** : → *fibre 25*

star

1. **star connection** : → *connection 55*
2. **star connection** : → *connection 56*
3. **star coupler** : → *coupler 21*
4. **star network** (*Syn.* star system) : → *system 197*
5. **star point** : → *point 46*
6. **star system** : → *system 197*

star-connected

1. **star-connected device** : → *device 54*

star-delta

1. **star-delta starter** : → *starter 7*
2. **star-delta starting** : → *starting 18*

star-polygon

1. **star-polygon conversion** : → *conversion 31*
2. **star-polygon transformation** (*Syn.* star-polygon conversion) : → *conversion 31*

start

1. **capacitor start and run motor** : → *motor 13*
2. **capacitor start motor** : → *motor 14*
3. **frame start** : an instant, always occupying the same relative position in every frame, used as the datum for timing other events in the frame. ★ début de trame → *début 1.* R начало цикла. D Rasterbeginn. E principio de trama. I inizio di trama. N ..... P początek ramki. S ramstart. (704)
4. **maximum start time to record/reproduce speed** : → *time 88*
5. **reactor start split phase motor** : → *motor 79*
6. **repulsion start induction motor** : → *induction motor 6*
7. **resistance start split phase motor** : → *motor 82*
8. **start element** : → *element 53*
9. **start of heading signal** : a character signal or a sequence of such signals which indicates the start of the heading of a message. ★ signal de début d'en-tête → *signal 108.* R сигнал начала заголовка. D Textbeginnsignal. E señal de arranque de encabezamiento. I inizio testo. N tekststartsignaal. P sygnał początku tekstu. S textbörjanssignal. (721)
10. **start of text signal** : a character signal or a sequence of such signals which indicates the start of the text of a message or the end of a message heading. ★ signal de début de texte → *signal 107.* R сигнал начала текста. D Textendesignal. E señal de comienzo de texto. I fine testo. N teksteindesignaal. P sygnał końca tekstu. S textslutssignal. (721)
11. **start signal** : → *signal 220*
12. **start time** : → *time 168*
13. **to start** (for an electrical relay) (see Figure 446-1) : to leave an initial condition or release condition. ★ démarrer → *démarrer 1.* R трогаться при срабатывании (для электрического реле). D starten. E arrancar (para un relé eléctrico). I spuntare. N starten. P rozpocząć (pracę). S starta. (446)

starter

1. **auto-transformer starter** : a starter of an induction motor which uses for starting one or more reduced voltages derived from an auto-transformer. ★ démarreur par autotransformateur → *démarreur 7.* R автотрансформаторный пускатель. D Anlasser mit Spartransformator. E arrancador por autotransformador. I avviatore ad autotrasformatore. N aanzetter met spaartransformator. P rozrusznik autotransformatorowy. S transformatorpådrag. (441)
2. **direct-on-line starter** : a starter which connects the line voltage accross the motor terminals in one step. ★ démarreur direct → *démarreur 5.* R одноступенчатый пускатель. D Motorstarter zum direkten Einschalten. E arrancador directo. I avviatore diretto. N aanzetter voor directe inschakeling. P rozrusznik bezpośredni. S motorskyddsbrytare. (441)
3. **manual starter** : a starter in which the force for closing the main contacts is provided exclusively by manual energy. ★ démarreur à main → *démarreur 3.* R ручной пускатель. D Motorstarter mit Handantrieb. E arrancador manual. I avviatore manuale. N aanzetter met handbediening. P rozrusznik ręczny. S handmanövrerad startkopplare. (441)
4. ***n*-step starter** : a starter in which there are (*n*-1) intermediate accelerating positions between the off and full on positions. ★ démarreur à *n* étapes → *démarreur 2.* R *n*-ступенчатый пускатель. D Anlasser mit *n*-Einschaltstellungen. E arrancador de *n* etapas. I avviatore a *n* gradino. N *n*-staps-aanzetter. P rozrusznik *n*-stopniowy. S *n*-stegsstartkopplare. (441)
5. **rheostatic rotor starter** : a rheostatic starter for an asynchronous wound-rotor motor which, during the starting period, cuts out successively one or several resistors previously provided in the rotor circuit. ★ démarreur rotorique à résistances → *démarreur 8.* R реостатный роторный пускатель. D Widerstands-Läuferanlasser. E arrancador rotórico de resistencias. I avviatore rotorico reostatico. N aanzetter met rotorweerstanden. P rozrusznik wirnikowy opornikowy. S rotorpådrag. (441)
6. **rheostatic starter** : a starter utilizing one or several resistors for obtaining, during starting, stated motor torque characteristics and for limiting the current. ★ démarreur à résistances → *démarreur 4.* R реостатный пускатель. D Widerstands-Anlasser. E arrancador de resistencias. I avviatore con resistenze. N aanzetter met weerstanden. P rozrusznik opornikowy. S motståndsprådrag. (441)
7. **star-delta starter** : a starter for a three-phase induction motor such that in the starting position the stator windings are connected in star and in the final running position they are connected in delta. ★ démarreur étoile-triangle → *démarreur 6.* R пускатель «звезда-треугольник». D Stern-Dreieck-Starter. E arrancador estrella-triángulo. I avviatore a stella-triangolo. N ster-driehoekaanzetter. P przełącznik gwiazda-trójkąt. S stjärn-triangelkopplare. (441)
8. **starter** : the combination of all the switching means necessary to start and stop a motor in combination with suitable overload protection. *Note.* — Starters may be designated according to the method by which the force for closing the main contacts is provided. ★ démarreur → *démarreur 1.* R пускатель. D Motorstarter. E arrancador. I avviatore. N aanzetter. P rozrusznik. S startkopplare. (441)
9. **starter** : a starting device, usually for fluorescent lamps, which provides for the necessary preheating of the electrodes and, in combination with the series impedance of the ballast, causes a surge in the voltage applied to the lamp. ★ starter → *starter 3.* R стартер. D Starter. E cebador. I starter. N starter. P zapłonnik. S glimtändare. (845)
10. **starter gap** : → *gap 19*
11. **starter transfer current** : → *current 196*

starterless

1. **starterless fluorescent lamp** : → *lamp 61*

starting

1. **across-the-line starting** (*Syn.* direct-on-line starting) : → *starting 7*
2. **auto-transformer starting** : the process of starting an a.c. motor at reduced voltage by connecting the primary winding initially to an auto-transformer and re-connecting the winding directly to the supply at rated voltage for the running conditions. ★ démarrage par autotransformateur → *démarrage 17.* R пуск через автотрансформатор. D Anlauf mit Sparumspanner. E arranque con autotransformador. I avviamento con autotrasformatore. N aanlopen met spaartransformator. P rozruch autotransformatorowy. S transformatorstartning. (411)
3. **auxiliary starting winding** : → *winding 4*
4. **breakaway starting current** : → *current 12*
5. **closed circuit transition auto-transformer starting** (*Syn.* closed transition auto-transformer starting) : → *starting 6*
6. **closed transition auto-transformer starting** (UK) (*Syn.* closed circuit transition auto-transformer starting (USA)) : the process of auto-transformer starting whereby the motor remains connected to the supply during the transition

from reduced to rated voltage. ★ démarrage par autotransformateur sans coupure → *démarrage 19.* R пуск через автотрансформатор без перерыва питания. D Anlauf über Sparumspanner ohne Stromunterbrechung. E arranque con autotransformador sin apertura de circuito. I avviamento con autotrasformatore a transizione chiusa. N aanlopen met spaartransformator zonder onderbreking. P rozruch autotransformatorowy z zasilaniem ciągłym. S transformatorstartning utan avbrott. (411)

7. **direct-on-line starting** (UK) (*Syn.* across-the-line starting (USA)) : the process of starting a motor by connecting it directly to the supply at rated voltage. ★ démarrage direct → *démarrage 15.* R прямой пуск. D Anlauf mit direktem Einschalten. E arranque directo. I avviamento diretto. N aanlopen door middel van directe inschakeling. P rozruch bezpośredni. S direktstartning. (411)
8. **filament or heater starting (surge) current** : → *current 89*
9. **intermittent periodic duty-type with starting** : → *duty-type 7*
10. **motor starting capacitor** : → *capacitor 51*
11. **open circuit transition auto-transformer starting** (*Syn.* open transition auto-transformer starting) : → *starting 12*
12. **open transition auto-transformer starting** (UK) (*Syn.* open circuit transition auto-transformer starting (USA)) : the process of auto-transformer starting whereby the motor is disconnected from the supply during the transition from reduced to rated voltage. ★ démarrage par autotransformateur à coupure → *démarrage 18.* R пуск через автотрансформатор с перерывом в питании. D Anlauf über Sparumspanner mit Stromunterbrechung. E arranque con autotransformador con apertura de circuito. I avviamento con autotrasformatore a transizione aperta. N aanlopen met spaartransformator en onderbreking. P rozruch autotransformatorowy z przerywanym zasilaniem. S transformatorstartning med avbrott. (411)
13. **part-winding starting** : the process of starting a motor by connecting it to the supply with one circuit of each primary winding phase initially connected and for the running condition changing over to all circuits or each phase connected in parallel. ★ démarrage sur fraction d'enroulement → *démarrage 25.* R пуск с использованием части обмотки. D Teilwicklungsanlauf. E arranque con arrollamiento fraccionado. I avviamento con avvolgimento parziale. N aanlopen op een deel van de wikkeling. P rozruch na części uzwojenia. S startning med extra lindningsuttag. (411)
14. **reactor starting** : the process of starting a motor at reduced voltage by connecting it initially in series with a reactor (inductor) which is short-circuited for the running condition. ★ démarrage par réactance → *démarrage 21.* R реакторный пуск. D Anlauf über Vorschaltdrosseln. E arranque con reactancia. I avviamento con reattanza. N aanlopen met (aanzet)smoorspoel. P rozruch dławikowy. S reaktorstartning. (411)
15. **rotor resistance starting** : the process of starting a wound rotor induction motor or synchronous induction motor by connecting the rotor secondary winding initially in series with starting resistors which are short-circuited for the running condition. ★ démarrage par résistance rotorique → *démarrage 22.* R пуск с помощью сопротивления в цепи ротора. D Anlauf über Widerstände im Läufer. E arranque con resistencia rotórica. I avviamento con resistenze rotoriche. N aanlopen met rotor(aanzet)weerstand. P rozruch oporowy. S startning med rotorresistans. (411)
16. **series connected starting-motor starting** : the process of starting a motor by connecting its primary winding to the supply in series with the primary windings of a starting motor, this latter being short-circuited for the running condition. ★ démarrage par moteur auxiliaire en série → *démarrage 20.* R пуск с помощью последовательно включенного пускового двигателя. D Anlauf durch Hilfsmotor in Reihenschaltung. E arranque con motor auxiliar en serie. I avviamento con motore ausiliario in serie. N aanlopen met aanzetmotor in cascadeschakeling. P ..... S startning med seriekopplad startmotor. (411)
17. **series-parallel starting** : the process of starting a motor by connecting it to the supply with the circuits of each primary winding phase initially connected in series, and changing them to a parallel connection for the running condition. ★ démarrage série-parallèle → *démarrage 24.* R пуск с последовательно-параллельным переключением обмоток. D Reihen-Parallelanlauf. E arranque serie-paralelo. I avviamento serie-parallelo. N aanlopen door middel van serie-parallelschakeling. P rozruch przy szeregowo-równoległym przełączaniu uzwojeń. S startning med serie-parallellkoppling. (411)
18. **star-delta starting** : the process of starting a three-phase motor by connecting it to the supply with the primary winding initially connected in star, then re-connected in delta for the running condition. ★ démarrage étoile-triangle → *démarrage 16.* R пуск переключением со звезды на треугольник. D Stern-Dreieck-Anlauf. E arranque estrella-triángulo. I avviamento stella-triangolo. N ster-driehoekaanloop. P rozruch z przełącznikiem gwiazda-trójkąt. S stjärn-triangelstartning; Y-startning. (411)
19. **starting** : the process of bringing a machine up to speed from rest. from a state of rest to running speed. *Note.* — For an electrical machine, this includes energizing breaking away, accelerating and, if necessary synchronizing with the supply. ★ démarrage → *démarrage 11.* R пуск. D Anlauf. E arranque. I avviamento. N aanlopen (passief); aanzetten (actief). P rozruch. S startning. (411)
20. **starting** : the first part of the accelerating period, during which the equipment may work under short-time conditions of overload. ★ démarrage → *démarrage 12.* R пусковой режим. D Anfahrt. E arranque. I avviamento. N aanzetten. P rozruch. S start. (811)
21. **starting capability** : → *capability 8*
22. **starting capacitor** : → *capacitor 63*
23. **starting circuit** : → *circuit 168*
24. **starting command** : → *command 24*
25. **starting current** : → *current 197*
26. **starting current** : → *current 198*
27. **starting device** : → *device 55*
28. **starting electrode** : → *electrode 92*
29. **starting electrode** : → *electrode 93*
30. **starting resistor** : → *resistor 25*
31. **starting strip** : → *strip 4*
32. **starting stripe** (*Syn.* starting strip) : → *strip 4*
33. **starting test** : → *test 78*
34. **starting time** : → *time 169*
35. **starting torque** : → *torque 24*
36. **starting torque** : → *torque 25*
37. **starting up** : the operation of bringing an internal combustion engine up to firing speed. *Note.* — The term "starting" must not be used in this particular sense. ★ lancement → *lancement 3.* R запуск. D Anlassen. E lanzamiento. I lancio. N aanslaan. P uruchomienie. S uppstart. (811)
38. **starting value** : → *value 65*
39. **starting voltage** : → *voltage 195*
40. **starting winding** : → *winding 77*
41. **starting winding** : → *winding 78*
42. **stator resistance starting** : the process of starting a motor at reduced voltage by connecting the primary winding initially in series with starting resistors which are short-circuited for the running condition. ★ démarrage par résistance statorique → *démarrage 23.* R реостатный пуск с помощью сопротивления в цепи статора. D Anlauf über Widerstände im Ständer. E arranque con resistencia estatórica. I avviamento con resistenze statoriche. N aanlopen met stator(aanzet)weerstand. P rozruch z rezystancją w obwodzie stojana. S startning med statorresistans. (411)
43. **total starting time** : → *time 215*
44. **tube starting time** : → *time 219*

starting-motor

1. **series connected starting-motor starting** : → *starting 16*
2. **starting motor** : an auxiliary motor used to facilitate the starting and accelerating of a main machine to which it is mechanically connected. ★ moteur de démarrage → *moteur 73.* R пусковой двигатель. D Anwurfmotor. E motor de arranque. I motore di lancio. N startmotor; aanzetmotor. P silnik rozruchowy. S startmotor. (411)

start-of-block

1. **start-of-block signal** : → *signal 221*

start-of-pulsing

1. **start-of-pulsing signal** : → *signal 222*

start-stop

1. **degree of gross start-stop distortion** : → *degree 6*
2. **degree of start-stop distortion** : → *degree 15*
3. **degree of start-stop distortion at the actual mean modulation rate** (*Syn.* degree of synchronous start-stop distortion) : → *degree 17*
4. **degree of synchronous start-stop distortion** : → *degree 17*
5. **start-stop apparatus** : → *apparatus 16*
6. **start-stop signal** : → *signal 223*
7. **start-stop system of data transmission** : → *system 198*
8. **start-stop system of telegraphy** : → *system 199*
9. **start-stop telecontrol transmission** : → *transmission 61*
10. **start-stop transmission** : → *transmission 62*
11. **stepped start-stop system of data transmission** : → *system 203*
12. **stepped start-stop system of telegraphy** : → *system 204*
13. **synchronous (start-stop) margin** : → *margin 16*

start-up

1. **cold start-up of a thermal generating set** : the process by which the generating set is raised to speed, the machine connected to the system and loaded after a long period of being out of operation. ★ démarrage à froid d'un groupe thermo-électrique → *démarrage 14.* R пуск паротурбинного агрегата из холодного состояния. D Kaltstart eines thermischen Maschinensatzes. E arranque en frío de un grupo térmico. I avviamento da freddo di un gruppo termoelettrico. N koude start van een thermische opwekeenheid. P rozruch zimny zespołu prądotwórczego cieplnego. S kallstart av värmekraftaggregat. (602)
2. **hot start-up of a thermal generating set** : the process by which the generating set is raised to speed, the machine connected to the system and loaded after a short period of being out of operation which did not change very much the turbine thermal state. ★ démarrage à chaud d'un groupe thermo-électrique → *démarrage 13.* R пуск паротурбинного агрегата из горячего состояния. D Warmstart eines thermischen Maschinensatzes. E arranque en caliente de un grupo térmico. I avviamento da caldo di un gruppo termoelettrico. N warme start van een thermische opwekeenheid. P rozruch gorący zespołu prądotwórczego cieplnego. S turbinvarmstart. (602)

state

1. **anhysteretic state** : a state of a magnetic material obtained by means of a static magnetic field on which is superimposed an alternating field having an amplitude which initially takes the material into magnetic saturation and then decreases to zero. ★ état anhystérétique → *état 5.* R безгистерезисное состояние. D anhysteretischer (idealisierter) Zustand. E estado anhisterético. I stato non-isterico. N anhysteretische toestand. P stan bezhisterezowy. S anhysteretiskt tillstånd. (221)
2. **balanced state of a polyphase network** : the condition in which the voltages and currents in the phase conductors form balanced polyphase sets. ★ régime équilibré d'un réseau polyphasé → *régime 23.* R симметричный режим многофазной электрической сети. D symmetrischer Zustand eines mehrphasigen Netzes. E régimen equilibrado de una red polifásica. I regime equilibrato di una rete polifase. N symmetrische toestand van een meerfasennet. P równomierne obciążenie faz sieci. S symmetriskt nättillstånd. (603)
3. **binary state information** : → *information 2*
4. **break-in state** (of an echo suppressor) : the state of an echo suppressor which results from the simultaneous presence of voice signals in both transmission paths and the large loss required for the suppression state is not inserted. *Note.* — A small loss is normally inserted in at least one of the transmission paths. ★ état d'intervention → *état 34.* R состояние перебоя (эхозаградителя). D Einbruchszustand (eines Echounterdrückers). E estado de intervención; modo de intervención. I stato d'intervento. N beïnvloedende toestand (van een echo-onderdrukker). P stan zawodności (tłumika echa). S ..... (704)
5. **busy state** : the state of an item in which it performs a required function for a user and for that reason is not accessible by other users. ★ occupation → *occupation 5.* R занятое состояние. D Besetztzustand. E estado de ocupación. I stato di occupazione. N bezette toestand. P stan zajętości. S upptaget tillstånd. (191)
6. **change of state announcement** : → *announcement 1*
7. **conducting state** (*Syn.* on-state) : → *on-state 3*
8. **critical state** : a state of an item assessed as likely to result in injury to persons, significant material damage or other unacceptable consequences. *Note.* — A critical state may be the result of a critical fault, but not necessarily. ★ état critique → *état 12.* R критическое состояние. D gefährlicher Zustand. E estado crítico. I stato critico. N kritieke toestand. P stan krytyczny. S kritiskt tillstånd. (191)
9. **disabled state** (*Syn.* outage) : a state of an item characterized by its inability to perform a required function, for any reason. ★ état d'incapacité → *état 30.* R неработоспособное состояние. D Unbrauchbarkeit. E estado de incapacidad. I stato di incapacità. N onbruikbare toestand. P stan niezdatności. S hindertillstånd. (191)
10. **disabled state** (of an echo suppressor) : a particular version of the unoperated state resulting from disabling action. *Note.* — Disabling action will need to be taken, for example, where a circuit incorporating an echo suppressor is used for transmission of data or telegraphy. ★ état neutralisé → *état 43.* R состояние нейтрализации. D Außerbetriebszustand (eines Echounterdrückers). E estado neutralizado (de un amortiguador de eco). I stato di disattivazione (di un suppressore d'eco). N uitgeschakelde toestand (van een echo-onderdrukker). P stan blokowania (tłumienia echa). S blockerat tillstånd. (704)
11. **down state** (*Syn.* internal disabled state) : a state of an item characterized either by a fault, or by a possible inability to perform a required function during preventive maintenance. *Notes. 1* — This state relates to availability performance. *2* — In French, the adjective "indisponible" qualifies an item in a down state. ★ état d'indisponibilité → *état 33.* R неработоспособное состояние по внутренним причинам; простой по внутренним причинам. D Unklarzustand; Unbrauchbarkeit wegen interner Ursachen. E estado de indisponibilidad; estado de incapacidad interna. I stato di indisponibilità. N onbruikbare toestand door een interne oorzaak. P stan niezdatności z przyczyn wewnętrznych. S (internt) hindertillstånd. (191)
12. **dynamically neutralized state** : a neutral magnetic state obtained by means of an external alternating magnetic field or, more generally, an alternately reversing magnetic field, the peak value of which is decreased progressively to zero from a value corresponding to saturation. ★ état neutralisé dynamiquement → *état 44.* R динамически размагниченное состояние. D dynamisch neutralisierter Zustand; dynamisch abmagnetisierter Zustand. E estado neutralizado dinámicamente. I stato dinamicamente neutralizzato. N dynamisch geneutraliseerde toestand. P stan zneutralizowany dynamicznie. S dynamiskt neutraliserat tillstånd. (221)
13. **excited state** : a state corresponding to an energy level higher than that of the ground state. ★ état excité → *état 35.* R возбужденное состояние. D angeregter Zustand. E estado excitado. I stato eccitato. N aangeslagen toestand. P stan wzbudzony. S exciterat tillstånd. (111)
14. **external disabled state** : that subset of the disabled state when the item is in an up state, but lacks required external resources or is disabled due to other planned actions than maintenance. ★ état d'incapacité externe → *état 31.* R неработоспособное состояние по внешним причинам. D Unbrauchbarkeit wegen externer Ursachen. E estado de incapacidad externa. I stato di incapacità per cause esterne. N onbruikbare toestand door externe oorzaken. P stan niezdatności z przyczyn zewnętrznych. S externt hindertillstånd. (191)
15. **faulty state information** : → *information 7*
16. **forward blocking state** (*Syn.* off-state) : → *off-state 7*
17. **free state** (*Syn.* idle state) : → *state 20*
18. **fully charged state (of a cell or battery)** : a state where all the available active material has been reconverted to its fully charged state. ★ état de charge complète (d'un accumulateur) → *état 15.* R состояние полной заряженности (вторичного химического источника тока). D Volladezustand. E estado de carga completa (de un elemento o batería). I stato di carica completa. N volledig geladen toestand (doorgeladen). P stan pełnego naładowania. S fulladdat. (486)

19. ground state : the state corresponding to the lowest energy level. ★ état fondamental → *état 37.* R основное состояние. D Grundzustand. E estado fundamental. I stato fondamentale. N grondtoestand. P stan podstawowy. S grundtillstånd. (111)

20. idle state (*Syn.* free state) : a non-operating up state during non-required time. ★ état vacant → *état 52.* R плановый простой работоспособного объекта; свободное состояние. D Leerlauf; betriebsfreier Klarzustand. E estado de reposo; estado libre. I stato di riposo. N vrije toestand; onbelaste toestand. P stan nieobciążenia. S tomgång. (191)

21. intermediate state information : → *information 19*

22. internal disabled state (*Syn.* down state) : → *state 11*

23. metastable state : an excited state from which the transition to a state of lower energy is normally forbidden. *Note.* — The energy is often transferred to another particle such as a molecule, atom or electron. ★ état métastable → *état 41.* R метастабильное состояние. D metastabiler Zustand. E estado metaestable. I stato metastabile. N metastabiele toestand. P stan metastabilny. S metastabilt tillstånd. (111)

24. metastable state : an excited state of an atomic nucleus, with a relatively long radioactive half-life (see nuclear isomeric transition). ★ état métastable → *état 42.* R метастабильное состояние. D metastabiler Zustand. E estado metastable. I stato metastabile. N metastabiele toestand. P stan metastabilny. S metastabilt tillstånd. (881)

25. neutral magnetic state : a state of a magnetic substance in which the magnetic flux density and magnetic field strength are zero. ★ état magnétique neutre → *état 40.* R нейтральное магнитное состояние. D magnetisch neutraler Zustand. E estado magnético neutro. I stato magnetico neutro. N magnetisch neutrale toestand. P stan magnetycznie obojętny. S (magnetiskt) neutralt tillstånd. (121)

26. non-operating state : the state when an item is not performing a required function. ★ (état de) non-fonctionnement → *non-fonctionnement 1.* R простой; нерабочее состояние. D nicht in Betrieb. E estado de no funcionamiento. I stadio di non funzionamento. N buiten-gebruiktoestand; (toestand) buiten dienst. P stan niefunkcjonowania. S vila. (191)

27. operating state : the state when an item is performing a required function. ★ (état de) fonctionnement → *fonctionnement 20.* R состояние нормального функционирования; рабочее состояние. D in Betrieb. E estado de funcionamiento. I stato di funzionamento. N gebruiktoestand; werktoestand; (toestand) in dienst. P stan funkcjonowania. S funktion; drift. (191)

28. output state : the whole information (electrical or visual) which is available during the readout time. ★ condition de sortie → *condition 3.* R состояние выхода. D Ausgangszustand. E condiciones de salida. I configurazione dei caratteri di uscita. N ..... P stan wyjściowy. S utläst information. (303)

29. recoil state : the state of a permanent magnet when its internal field has been reduced, for example by reducing the reluctance of its circuit or by reducing an external demagnetizing field. ★ état de recul → *état 20.* R состояние возврата. D Zustand der rückläufigen Schleife. E estado de retroceso. I stato di ritorno. N terugplooptoestand. P stan po powrocie. S återgångstillstånd. (221)

30. resonance state : an excited state from which the transition directly to the ground state by emission of a photon is permitted. ★ état de résonance → *état 25.* R состояние резонанса. D Resonanzzustand. E estado de resonancia. I stato di risonanza. N resonantietoestand. P stan rezonansowy. S resonanstillstånd. (111)

31. reverse blocking state (of a reverse blocking thyristor) : the condition of a reverse blocking thyristor corresponding to reverse currents of lower magnitude than the current at the reverse breakdown voltage. ★ état bloqué en inverse → *état 10.* R непроводящее состояние в обратном направлении (тиристора, не проводящего в обратном направлении). D Sperrzustand in Rückwärtsrichtung; Rückwärts-Sperrzustand. E estado bloqueado en sentido inverso (de un tiristor bloqueado en sentido inverso). I stato di blocco (in senso) inverso (di un tiristore di blocco in senso inverso). N blokkerende spertoestand (van een in sperrichting blokkerende thyristor). P stan zaworowy (blokującego wstecznie tyrystora). S spärrtillstånd. (521)

32. reverse blocking state : the non-conducting state of a valve or arm when reverse voltage is applied between its main electrodes or terminals. ★ état bloqué (dans le sens inverse) → *état 8.* R обратное непроводящее состояние. D Rückwärts-Sperrzustand. E estado bloqueado (en sentido inverso). I stato di blocco (in senso) inverso. N blokkeertoestand in sperrichting. P stan zaworowy. S spärrtillstånd. (551)

33. saturation state (*Syn.* temperature limited state) : phenomenon in which an output variable shows a negligeable change for any further increase of the corresponding input variable. ★ saturation → *saturation 21.* R режим насыщения. D Sättigungszustand. E saturación. I saturazione. N verzadigingstoestand. P stan nasycenia. S mättningstillstånd. (531)

34. space-charge limited state : the state of operation in which the presence of a negative potential minimum caused by space charge in front of the cathode, causes the electron emission current to be largely independent of the cathode temperature. ★ limitation (du courant) par charge d'espace → *limitation 4.* R режим ограничения пространственным зарядом. D Raumladungszustand. E régimen de corriente limitada por la carga de espacio. I limitazione per carica spaziale (della corrente). N ruimteladingstoestand. P stan uwarunkowany ładunkiem przestrzennym. S rymdladdningsbegränsning. (531)

35. stability limit of a system state variable : → *limit 18*

36. stability margin of a system state variable : → *margin 15*

37. standby state : a non-operating up state during the required time. ★ attente → *attente 2.* R дежурное работоспособное состояние; нахождение в резерве. D in Bereitschaft. E estado de espera. I stato di attesa. N parate toestand. P stan gotowości. S funktionsberedskap. (191)

38. state estimation : → *estimation 1*

39. state information : → *information 32*

40. statically demagnetized state (*Syn.* statically neutralized state) : a magnetic state obtained by means of an external magnetic field which brings the magnetic flux density to such a value that when this field is removed the flux density becomes near zero. ★ état désaimanté statiquement → *état 29.* R статически размагниченное состояние. D statisch abmagnetisierter Zustand; statisch neutralisierter Zustand. E estado desmagnetizado estáticamente; estado neutralizado estáticamente. I stato staticamente neutralizzato. N statisch geneutraliseerde toestand. P stan zneutralizowany statycznie. S statiskt neutraliserat tillstånd. (221)

41. statically neutralized state (*Syn.* statically demagnetized state) : → *state 40*

42. suppression state (of an echo suppressor) : the state of an echo suppressor in which one transmission path is carrying voice signals and the echo suppressor has inserted a large loss in the other transmission path. ★ état de suppression → *état 27.* R состояние подавления (эхозаградителя). D Unterdrückungszustand (eines Echounterdrückers). E estado de amortiguación; estado de bloqueo. I stato di soppressione (di un soppressore d'eco). N werkende toestand (van een echo-onderdrukker). P stan tłumienia echa. S spärrtillstånd. (704)

43. system state variables : → *variable 9*

44. temperature limited state (*Syn.* saturation state) : → *state 33*

45. thermally neutralized state (*Syn.* virgin state) : a neutral magnetic state obtained by lowering the temperature of a material through the Curie point, in the absence of any external magnetic field. ★ état neutralisé thermiquement → *état 46.* R термически размагниченное состояние; первоначальное состояние. D thermisch neutralisierter Zustand; thermisch abmagnetisierter Zustand. E estado neutralizado térmicamente; estado virgen. I stato termicamente neutralizzato. N thermisch geneutraliseerde toestand; maagdelijke toestand. P stan zneutralizowany cieplnie. S termiskt neutraliserat tillstånd. (221)

46. transient state of a system : the operating condition of a network in which at least one of the state variables is changing, usually for a short period. ★ régime transitoire d'un réseau → *régime 27.* R переходный режим электрической сети. D transienter Zustand eines Netzes. E régimen transitorio de una red. I regime transitorio di una rete. N transiënte toestand van een systeem. P stan przejściowy systemu elektroenergetycznego. S dynamiskt tillstånd. (603)

47. unbalanced state of a polyphase network : the condition in which the voltages and/or currents in the phase conductors do not form balanced polyphase sets. ★ régime déséquilibré

d'un réseau polyphasé → *régime 21.* R несимметричный режим многофазной электрической сети. D umsymmetrischer Zustand eines mehrphasigen Netzes. E régimen desiquilibrado de una red polifásica. I regime squilibrato di una rete polifase. N asymmetrische toestand van een meerfasennet. P nierównomierne obciążenie faz sieci. S osymmetriskt nättillstånd. (603)

48. **unoperated state** (of an echo suppressor) : the state of an echo suppressor in which it does not insert loss in either direction of transmission. ★ état de repos → *état 22.* R нерабочее состояние (эхозаградителя). D Ruhezustand (eines Echounterdrückers). E estado de reposo (de un amortiguador de eco). I stato di riposo (di un soppressore d'eco). N rusttoestand (van een echo-onderdrukker). P stan nieużumienia echa. S vilotillstånd. (704)
49. **up state** : a state of an item characterized by the fact that it can perform a required function, assuming that the external resources, if required, are provided. *Notes. 1* — This state relates to availability performance. *2* — In French, the adjective "disponible" qualifies an item in an up state. ★ état de disponibilité → *état 16.* R работоспособное состояние. D Klarzustand. E estado de disponibilidad. I stato di disponibilità. N beschikbare toestand. P stan zdatności. S funktionsdugligt tillstånd. (191)
50. **virgin state** (*Syn.* thermally neutralized state) : → *state 45*

statement

1. **statement of call account** : the sending by the network upon request of a subscriber, an administration, closed user group or private network, of a detailed account of his call charges either since his last request or over a nominated period. ★ décompte de taxes de communications → *décompte 1.* R счет о плате за соединения. D Einzelgebührennnachweis. E relación de cuentas de llamadas. I stato degli addebiti. N opgevraagde gespecificeerde kostenopgaaf. P wskazanie stanu rachunku. S kontoställningsmeddelande. (721)

state-transition

1. **state-transition diagram** : → *diagram 19*

static

1. **static characteristic** : → *characteristic 85*
2. **static characteristic** : → *characteristic 86*
3. **static characteristic (of an arc welding power source)** : → *characteristic 87*
4. **static convergence** : → *convergence 13*
5. **static convertor** (*Syn.* electronic convertor) : → *convertor 18*
6. **static forward current transfer ratio** : → *ratio 96*
7. **static *B*(*H*) loop** : → *loop 34*
8. **static *J*(*H*) loop** : → *loop 35*
9. **static *M*(*H*) loop** : → *loop 36*
10. **static Kraemer system** : → *system 200*
11. **static level meter** : → *meter 57*
12. **static magnetization curve** : → *curve 37*
13. **static permittivity** : → *permittivity 7*
14. **static pressure** : → *pressure 29*
15. **static relay** : → *relay 41*
16. **static relay with output contact** : → *relay 42*
17. **static relay without output contact** : → *relay 43*

statically

1. **statically demagnetized state** : → *state 40*
2. **statically neutralized state** (*Syn.* statically demagnetized state) : → *state 40*

station

1. **broadcast transmitting station** : a centre for sound or television broadcasts, comprising one or more transmitters with their antennas and associated equipment: *Examples :* Radio transmitting station ; television transmitting station. ★ station d'émission (de radiodiffusion) → *station 14.* R радиовещательная передающая станция. (723)
2. **combined station** : a data station that can perform the functions of both primary station and secondary station. ★ station mixte → *station 17.* R комбинированная оконечная установка (в сети данных). D Hybridstation. E estación mixta. I stazione mista. N ..... P stacja kombinowana. S kombinerad station. (721)
3. **concentrator station** (*Syn.* submaster station) : → *station 35*
4. **control station** : an assembly of one or more control switches fixed on the same panel or located in the same enclosure. *Note.* — A control station panel or enclosure may also contain related equipment, e.g., potentiometers, signal lamps, instruments, etc. ★ poste de commande → *poste 23.* R пункт управления. D Befehls-und/oder Meldeeinheit. E centro de mando. I stazione di comando. N bedieningseenheid. P sterownica. S kontroller. (441)
5. **control station** : in a multipoint or a point-to-point connection, that data station which nominates the master station and supervises polling, selecting, interrogating and recovery procedures. ★ station pilote → *station 18.* R управляющая оконечная установка. D Leitstation. E estación piloto; estación de control. I stazione di controllo. N besturingsstation. P stacja sterująca. S styrstation. (721)
6. **controlling (repeater) station** : a repeater station which originates signals for remotely controlling the characteristics of repeaters in other repeater stations. ★ station (de répéteurs) régulatrice → *station 10.* R управляющая ретрансляционная станция. D Steuerungs(-Leitungsverstärker)-Station. E estación (de repetidores) reguladora. I stazione (ripetitrice) di controllo. N besturend versterkerstation. P stacja (wzmacniakowa) sterująca. S styrande station. (704)
7. **data station** (*Syn.* terminal installation for data transmission) : an assembly comprising a data terminal equipment, a data circuit terminating equipment and their common interface. ★ station de données → *station 4.* R оконечная установка данных; оконечная установка для передачи данных. D Datenstation; Endstelleneinrichtung für Datenübertragung. E estación de datos; instalación terminal para transmisión de datos. I installazione terminale per dati. N datastation. P stacja teledacyjna. S datastation. (721)
8. **dependent (repeater) station** : a repeater station which receives its electrical energy from a power-feeding repeater station. *Note.* — Electrical energy may be conveyed to a dependent repeater station by the physical transmission medium itself, or by conductors in the same cable sheath, or by another exterior cable. ★ station (de répéteurs) téléalimentée → *station 12.* R ретрансляционная станция с дистанционным питанием. D abhängige (Leitungsverstärker-)Station. E estación (de repetidores) telealimentada. I setazione ripetitrice telealimentata. N op-afstand-gevoed versterkerstation. P stacja (wzmacniakowa) zasilana zdalnie. S fjärrmatad station. (704)
9. **directly-powered (repeater) station** : a repeater station which receives electrical power from the local mains or from a local source. ★ station (de répéteurs) à alimentation indépendante → *station 8.* R ретрансляционная станция с непосредственным питанием. D direktversorgte (Leitungsverstärker-)Station. E estación (de repetidores) con alimentación independiente; estación (de repetidores) autoalimentada. I stazione (ripetitrice) alimentata localmente. N versterkerstation met lokale voeding. P stacja (wzmacniakowa) zasilana lokalnie; stacja (wzmacniakowa) o zasilaniu własnym. S direktmatad station. (704)
10. **earth station** : a radio station located either on the Earth's surface or within the major portion of the Earth's atmosphere intended for communication: with one or more space stations; or with one or more stations of the same kind by means of one or more reflecting satellites or other objects in space. *Note.* — An earth station located on board a ship (an aircraft) is called a "ship earth station" ("aircraft earth station"). ★ station terrienne → *station 23.* R земная станция. D Bodenstation. E estación terrena; estación terrestre. I stazione terrestre. N grondstation. P stacja naziemna. S jordstation. (725)
11. **electrical generating station** (*Syn.* power station) : → *power station 17*
12. **energy-supply station** (*Syn.* pre-heating supply; pre-conditioning supply) : a fixed installation supplying power to the air-conditioning or heating equipment of a train before it enters service. ★ installation de préconditionnement → *installation 12.* R питающая станция. D Energieversorgungsstation. E instalación de precalefacción. I impianto per la preclimatizzazione; impianto per il preriscaldamento. N voorverwarmingsinstallatie. P urządzenie klimatyzacji wstępnej. S värmepost. (811)

13. **feeder station** : a substation at which the supply lines are connected to the contact line. ★ point d'alimentation → *point 10.* R пункт питания. D Speisepunkt (Stromversorgungsstelle). E punto de alimentación. I posto di alimentazione. N voedingspunt; voedingsstation. P punkt zasilania. S matarstation. (811)
14. **intercommunication station** (*Syn.* intercom) : a telephone set in a private telephone network interconnecting only loudspeaking telephone sets to provide communications over a limited area. ★ interphone → *interphone 1.* R телефонный аппарат внутренней связи. D Freisprecheinrichtung. E interfono. I interfono. N intercom. P aparat telefoniczny do łączności wewnętrznej do odbioru głośnikowego. S snabbtelefon. (722)
15. **locally-controlled (repeater) station** : a repeater station with means for adjusting the characteristics of repeaters under manual control or automatically under the control of locally derived signals. ★ station (de répéteurs) régulée localement → *station 11.* R ретрансляционная станция с управлением от местной станции. D örtlich gesteuerte (Leitungsverstärker-)Station. E estación (de repetidores) regulada localmente. I stazione (ripetitrice) controllata localmente. N versterkerstation met lokale bewaking. P stacja (wzmacniakowa) sterowana lokalnie. S lokalt styrd station. (704)
16. **main station** (*Syn.* parent station) : broadcasting transmitter whose transmissions are retransmitted by one or several rebroadcast transmitters. ★ émetteur pilote → *émetteur 25.* R главная станция. (723)
17. **main (telephone) station** (*Syn.* subscriber's main station) : → *station 37*
18. **master station** (*Syn.* control centre) : → *centre 7*
19. **master station** : the data station that has been designated by the control station to ensure data transfer to one or more slave stations. *Note.* — At a given instant, there can be only one master station on a data link. ★ station maîtresse → *station 16.* R главная оконечная установка. D Sendestation. E estación maestra. I stazione master. N meester(station). P stacja nadrzędna. S huvudstation. (721)
20. **monitoring station** (*Syn.* monitoring centre) : station used for receiving broadcast transmissions for the purpose of monitoring these transmissions, or recording programmes. ★ station de réception (de radiodiffusion) → *station 5.* R станция технического радиоконтроля; центр технического радиоконтроля. (723)
21. **parent station** (*Syn.* main station) : → *station 16*
22. **passive station** : in a multipoint connection, any tributary station waiting to be polled or selected. ★ station en veille → *station 15.* R пассивная оконечная установка. D Wartestation. E estación pasiva. I stazione in attesa. N passief station. P stacja oczekująca. S passiv station. (721)
23. **pay station** (*Syn.* public call office) : → *office 1*
24. **power-feeding (repeater) station** : a directly-powered repeater station which supplies electrical energy to other repeater stations. ★ station d'alimentation (de répéteurs) → *station 2.* R питающая ретрансляционная станция. D Leistungsversorgungs(-Leitungsverstärker)station. E estación de alimentación (de repetidores). I stazione di alimentazione di ripetitori. N voedend versterkerstation. P stacja (wzmacniakowa) zasilająca. S matande station. (704)
25. **primary station** : the data station that provides the overall control of the data link according to the link protocol. ★ station primaire → *station 19.* R первичная оконечная установка. D Leitsteuerstation. E estación primaria. I stazione primaria. N hoofdstation. P stacja główna. S primärstation. (721)
26. **public telephone station** (*Syn.* public call office) : → *office 1*
27. **relay station** (*Syn.* rebroadcast transmitter) : → *transmitter 12*
28. **relay station** : a station containing one or more rebroadcast transmitters, their antennas and associated equipment. ★ station de réémission → *station 6.* R релейная станция. (723)
29. **remotely-controlled (repeater) station** : a repeater station where the characteristics of repeaters are adjusted by signals received from a controlling repeater station. ★ station (de répéteurs) télérégulée → *station 13.* R ретрансляционная станция с управлением удаленной станции. D ferngesteuerte (Leitungsverstärker-)Station. E estación (de repetidores) teleregulada. I stazione (ripetitrice) telecontrollata. N op-afstand-bestuurd versterkerstation. P stacja (wzmacniakowa) sterowana zdalnie. S fjärrstyrd station. (704)
30. **repeater station** : an aggregate of transmission equipment at one location, usually including repeaters and other equipment for such functions as signalling, modulating, multiplexing, monitoring, and power feeding. ★ station de répéteurs → *station 7.* R ретрансляционная станция. D (Leitungs-)Verstärkerstation. E estación de repetidores. I stazione ripetitrice. N versterkerstation. P stacja wzmacniakowa. S överdragsstation. (704)
31. **secondary station** : the data station that responds to commands from the primary station according to the link protocol. ★ station secondaire → *station 20.* R вторичная оконечная установка. D Folgesteuerstation. E estación secundaria. I stazione secondaria. N secundair station. P stacja zależna. S sekundärstation. (721)
32. **slave station** : a data station that is selected by a master station to receive data. ★ station asservie → *station 1.* R зависимая оконечная установка. D Empfangsstation. E estación esclava. I stazione asservita. N slaaf(station). P stacja podrzędna. S sidostation. (721)
33. **space station** : a radio station located on an object which is beyond, is intented to go beyond, or has been beyond, the major portion of the Earth's atmosphere. *Note.* — (Radio) station: one or more transmitters or receivers, or a combination of transmitters and receivers, including auxiliary equipment, necessary at one location for carrying on a radiocommunication service. ★ station spatiale → *station 21.* R космическая станция. D Weltraum-Funkstation. E estación espacial. I stazione spaziale. N ruimtestation. P stacja kosmiczna. S rymdradiostation. (725)
34. **station interrogation command** : → *command 25*
35. **submaster station** (*Syn.* concentrator station) : a station in a hierarchical telecontrol network at which the monitored information coming from outstations is concentrated for transmission to the master station and at which the command information is distributed to the outstations. ★ poste de regroupement → *poste 32.* R промежуточный пункт. D Knoten-Station; Konzentrator-Station. E estación intermedia; estación de reagrupamiento. I posto secondario; posto di concentrazione. N groepsstation; groepspost. P stacja zbiorcza. S koncentrator. (371)
36. **subscriber's extension station** (*Syn.* extension) : → *extension 4*
37. **subscriber's main station** (*Syn.* main (telephone) station) : a subscriber's telephone station with a unique subscriber number directly connected to a local switching entity. *Notes. 1* — The word "main" is used even if a subscriber's main station has no extensions since such a station is counted as a main station for administrative purposes. By the same convention, an installation with one or more subscriber's lines is considered to contain the same number of subscriber's main stations as it has subscriber's lines. *2* — When two or more subscriber's stations are connected in parallel, usually one is designated as the subscriber's main station, the others as extensions. ★ poste (téléphonique) principal → *poste 71.* R основной абонентский аппарат. D Hauptstelle. E teléfono principal. I apparecchio telefonico principale. N hoofdaansluiting. P aparat (telefoniczny) główny. S huvudapparat. (722)
38. **subscriber's (telephone) station** : a telephone station installed in a subscriber's premises and having access to a public telephone network. ★ poste (téléphonique) d'abonné → *poste 67.* R абонентская (телефонная) установка. D Teilnehmersprechstelle. E teléfono de abonado. I apparecchio telefonico d'abbonato. N aansluiting op een openbaar net. P aparat (telefoniczny) abonencki. S abonnentapparat. (722)
39. **system control station** : the station which is responsible for maintenance and clearance of faults on a transmission system. ★ centre directeur → *centre 14.* R главная станция системы. D Kontrollstelle. E centro director. I centro di controllo e manutenzione. N systeembewakingspost. P centrum nadzorcze. S systemstyrningsstation. (721)
40. **telephone station** : a telephone set with associated wiring and auxiliary equipment connected to a telephone network for the purpose of telephony. *Note.* — The auxiliary equipment may include for example : an external call indicating device, a protector, a local battery. ★ poste téléphonique (installé) → *poste 68.* R телефон пользователя (абонента). D Sprechstelle. E aparato telefónico instalado. I impianto

telefonico. N telefoonaansluiting. P stacja telefoniczna abonencka. S (installerad) telefon. (722)

41. **transit station** : an intermediate station through which messages or signals are switched. ★ poste de transit → *poste 36.* R транзитный пункт. D Transit-Station. E estación de tránsito. I posto di transito. N tussenstation; tussenpost. P stacja tranzytowa. S transitstation. (371)
42. **tributary station** : in a multipoint connection, any data station other than the control station. ★ station subordonnée → *station 22.* R подчиненная оконечная установка. D Trabantenstation. E estación subordinada; estación tributaria. I stazione subordinata. N ..... P stacja podporządkowana. S understation. (721)

stationary

1. **stationary equipment** : → *equipment 73*
2. **stationary grid** : → *grid 28*
3. **stationary noise** : → *noise 82*
4. **stationary random noise** : → *noise 83*
5. **stationary satellite** : → *satellite 17*
6. **stationary test** : → *test 79*

station-keeping

1. **station-keeping satellite** : → *satellite 18*

statistical

1. **statistical delay of ignition** : → *delay 39*
2. **statistical impulse withstand voltage** : → *voltage 196*
3. **statistical sound (power) absorption coefficient** : → *coefficient 66*

statistics

1. **Fermi statistics** (*Syn.* Fermi-Dirac statistics) : → *statistics 2*
2. **Fermi-Dirac statistics** (*Syn.* Fermi statistics) : the set of probabilities of the macroscopic states of a quantized system of particles, with only discrete energy levels, obeying to the Pauli-Fermi exclusion principle. ★ statistique de Fermi-Dirac → *statistique 4.* R статистика Ферми-Дирака; статистика Ферми. D Fermi-Dirac-Statistik; Fermi-Statistik. E estadística de Fermi-Dirac; estadística de Fermi. I statistica di Fermi-Dirac; statistica di Fermi. N Fermistatistiek. P statystyka Fermiego-Diraca. S Fermistatistik. (521)
3. **Maxwell-Boltzmann statistics** : the probability distribution of the macroscopic states of a non-quantized system of particles, defined by the average values of the position, velocity or energy co-ordinates, in a very small, but finite, volume of the system. ★ statistique de Maxwell-Boltzmann → *statistique 5.* R статистика Максвелла-Больцмана. D Maxwell-Boltzmann-Statistik. E estadística de Maxwell-Boltzmann. I statistica di Maxwell-Boltzmann. N Maxwell-Bolzmann statistiek. P rozkład Maxwella-Boltzmanna. S Maxwell-Bolzmann statistik. (521)
4. **statistics on request** : provision for the network to send to the subscriber at his request, details of his calls under defined headings, e.g. international calls, national calls, calls to certain subscribers or total of all calls. ★ statistiques sur demande → *statistique 6.* R статистика по запросу. D Statistik auf Anforderung. E estadísticas según demanda. I statistica a richiesta. N gebruiksgegevens op aanvraag. P statystyka połączeń na żądanie. S samtalsstatistik. (721)

stator

1. **stator** : the portion of a machine which includes the stationary magnetic parts with their associated windings. ★ stator → *stator 2.* R статор. D Ständer. E estator. I statore. N stator. P stojan. S stator. (411,811)
2. **stator frame** : → *frame 45*
3. **(stator or rotor) lamination** : → *lamination 2*
4. **stator resistance starting** : → *starting 42*
5. **stator winding** : → *winding 79*

status

1. **status channel** : → *channel 48*

stay

1. **stay** (*Syn.* guy (USA)) : a steel wire rope or rod, working under tension, connecting a point of a support to a separate anchor, or connecting two points of the support. ★ hauban → *hauban 1.* R оттяжка. D Abspannung. E tirante. I strallo. N tui. P odciąg. S stag. (466,811)

stayed

1. **stayed support** : → *support 21*

steady

1. **steady arm** : → *arm 15*
2. **steady short-circuit current** : → *short-circuit current 11*

steady-state

1. **d.c. steady-state recovery voltage** : → *recovery voltage 1*
